**PBGC 2017-000458**

March 3, 2017

Re: Request for copies of PBGC Documents

I am responding to your request submitted to the Pension Benefit Guaranty Corporation's (PBGC) Disclosure Division via email on January 1, 2017. You requested digital/electronic copies of the following:

1. Insurance Operations Department (IOD) Manual;
2. Premium Compliance Review Procedures Manual;
3. BAPD Operations Manual; and,
4. PBGC Securities Lending Procedures Manual.

We processed your request in accordance with the Freedom of Information Act (FOIA) and the PBGC's implementing regulation. Pursuant to your request, the Corporate Controls and Reviews Department (CCRD), Financial Operation Department (FOD), Office of Benefits Administration (OBA), and Corporate Investments Department (CID) conducted searches of their records and located the following documents enclosed CD:

Item 1: IOD Manual (1,219 pages) [1];
Item 2: Premium Compliance Review Procedures Manual (17 pages);
Item 3: OBA (formerly BAPD) Operations Manual (1,532 pages); and,
Item 4: PBGC Securities Lending Procedures Manual (21 pages).

Unfortunately, a small amount of information contained in Item 4 is commercial and financial in nature and must be withheld from release. I have relied upon one FOIA exemption to withhold this information.

The applicable exemption, 5 U.S.C. §552(b)(4), permits the exemption from disclosure of matters that are "trade secrets and commercial or financial information obtained from a person and privileged or confidential." The records you have requested contain "commercial or financial information" within the meaning of the above-cited statutory language and the Pension

[1] The Insurance Operations Department no longer exists. IOD was subsumed by the Office of Benefits Administration. Per OBA, the record provided is the most recent version of the record requested – May 13, 2005.

Benefit Guaranty Corporation's (PBGC) regulation 29 C.F.R. §4901.21(b)(2) and, therefore, I have determined that these records are exempt from disclosure.

As this response constitutes a partial denial of your records request, I am providing you with your administrative appeal rights in the event you wish to avail yourself of this process. The FOIA provides at 5 U.S.C. § 552(a)(6)(A)(i) (2014) amended by FOIA Improvement Act of 2016, Pub. L. No. 114-185, 130 Stat. 538 that if a disclosure request is denied in whole or in part by the Disclosure Officer, the requester may file a written appeal within 90 days from the date of the denial or, if later (in the case of a partial denial), 90 days from the date the requester receives the disclosed material. The PBGC's FOIA regulation provides at 29 C.F.R. § 4901.15 (2015) that the appeal shall state the grounds for appeal and any supporting statements or arguments, and shall be addressed to the General Counsel, Attention: Disclosure Division, Pension Benefit Guaranty Corporation, 1200 K Street, N.W., Washington, D.C. 20005. To expedite processing, the words "FOIA Appeal" should appear on the letter and prominently on the envelope.

In the alternative, you may contact the Disclosure Division's Public Liaison at 202-326-4040 for further assistance and to discuss any aspect of your request. You also have the option to contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001; e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

This request has been categorized as an "all other request." These requests are assessed search and duplication fees.[2] There are no fees associated with the processing of your request.[3] This completes the processing of your request. You may submit future requests for PBGC records by accessing FOIAonline, our electronic FOIA processing system, at https://foiaonline.regulations.gov, or by email to Disclosure@pbgc.gov.

Sincerely,

D. Camilla Perry
DISCLOSURE OFFICER

Enclosure (CD)

---

[2] See 5 U.S.C. §552(a)(4)(A) (ii)(1).

[3] The OPEN Government Act precludes an agency from charging search fees to a FOIA requester if the agency does not meet the FOIA's twenty-day time limit. As such, all search fees associated with this request have been waived. The FOIA Improvement Act of 2016 precludes an agency from charging review fees to a FOIA requester if the agency does not meet the FOIA's twenty-day time limit.

## Background: ERISA and PBGC

**12/07/2001**

The function of the Pension Benefit Guaranty Corporation (PBGC) is to protect the retirement incomes of nearly 41 million American workers — one of every three workers — in about 66,000 defined benefit pension plans.

PBGC was established by Title IV of the Employee Retirement Income Security Act (ERISA) in 1974 to encourage the growth of defined benefit pension plans, provide timely and uninterrupted payment of pension benefits when a plan sponsor developed problems, and maintain pension insurance premiums at the lowest level possible to carry out the Corporation's obligations. IOD is the operations arm of the Corporation, with the functions of identifying and investigating plans that present a potential risk to PBGC, recommending plans that should be terminated, and administering the pension benefits in those plans which are terminated and trusteed.

The Corporation and its programs are financed through premiums collected from companies that sponsor defined benefit plans, investment returns on PBGC assets, plan assets from terminated plans, and recoveries from employers responsible for underfunded terminated plans.

Under the single-employer insurance program, a company can voluntarily seek to terminate its plan using either a standard termination or a distress termination procedure. Additionally, the Corporation can seek a PBGC-initiated termination of a plan without the employer's consent when necessary to protect the interests of the plan participants, of the plan, or of PBGC. PBGC must seek termination if a plan cannot pay current benefits. If a PBGC-insured multiemployer plan is unable to pay benefits when due, PBGC will provide the plan with financial assistance to continue paying participants their guaranteed benefits, generally in the form of a loan.

## Overview of Core Processing (IOD) 11/16/99

For a visual representation of the IOD case processing model, see the high-level **PPD Flow** and **TPD Flow** diagrams. They illustrate how a case moves through IOD.

The following is a very simplified version of the process. For more detail, see the process group overviews and specific procedures for each process.

A case comes into PPD. This could be through a reportable event notice, a distress termination application, or some other action which highlights a potential problem with a plan. The case is assigned to an auditor or financial analyst. If so, the person working the case will begin to collect information to determine if the plan should be terminated and trusteed. To obtain all of the needed information on the plan, the sponsor, and the controlled group could take a significant amount of time. Once enough information is available to make a recommendation, three choices are available--close the case, continue monitoring the case, or recommend termination and trusteeship (either by PBGC or a third party). If the recommendation is to terminate the plan, a Termination Decision Record (TDR) will go to the Trusteeship Working Group (TWG). Depending on the size of the plan, whether the sponsor is ongoing, or any unique issues, the recommendation may only go to the TWG Chair for a decision. When the decision to terminate and trustee a plan is final, PPD notifies the plan administrator and the sponsor. Responsibility for the terminated plan is then passed to a TPD.

If during the time the case is in PPD, payees are not receiving benefits (and it is certain that the plan will be recommended for termination), a TPD will be brought into the process to initiate action to begin paying participants through the prior paying agent or State Street Corporation (SSC), PBGC's contracted paying agent. The TPD will also work with PPD to assist in gathering information which will be needed later.

If the plan meets the large case criteria, the Large Case Coordinator will be notified and a Large Case Working Group will be convened.

When the terminated plan is transferred to a TPD, a case team is assigned. PBGC assumes payment responsibility and adjusts benefit levels to an estimated guaranteed level commensurate with PBGC maximums and plan provisions. At the same time, an account is set up at SSC and assets are transferred to SSC from the prior paying agent and the case team auditor begins developing the audit program for the plan.

Once the audit program is complete, or at any time that records appear to be in danger of being lost or destroyed, the auditor, assisted by others as required, visits any sites where records are stored. This visit is to collect available plan and participant information which will be needed for the audits. In some cases, much or all of the data may be obtained without an actual visit. Data is also collected from third parties, such as the Internal Revenue Service (IRS), Social Security Administration (SSA), unions, and other sources. The information collected, along with the information obtained by PPD, serves as the basis for building the participant database, determining the controlled group, writing the plan abstract, and doing the participant audit, plan asset audit, and net worth audit. When the audits are complete, the auditor prepares an audit report into which the individual audit outcomes are combined.

The next step in the process is to value any recoveries that have been made or agreed to, and allocate the money recovered. This allocation includes Due and Unpaid Employer Contributions (DUEC), unpaid premiums, Unfunded Benefit Liabilities (UBL), and funds to be allocated for participant benefits from actual recoveries. For plans with unfunded nonguaranteed benefits (UNB) of $20 million or less, IOD calculates allocation according to the small plan average recovery ratio (SPARR) in accordance with ERISA 4022(c). The actual recovery for each of these SPARR plans is factored into SPARR figures for subsequent years.

The case team actuary, and the contract actuary, if one is involved, prepare the final valuation. This is the present value of each participant's benefit and the total present value for the entire plan. The

valuation processes also provide the information necessary for developing benefit statements and for sending Benefit Determination Letters (BDLs).

At the same time, the case team PLS is preparing to send BDLs explaining the final benefit level to the individual participants. Once the participants have had the chance to review and appeal the determination, the final adjustments are made to benefits, if required. For participants who have received a net underpayment while being paid an estimated amount, PBGC sends a check for the amount of accumulated difference plus interest. For those who received net overpayments, IOD applies recoupment procedures against payees with a continuing stream of payments or takes recovery action against those who are not eligible to receive future benefits from PBGC.

Operating day-to-day throughout the entire cycle of case processing involves interaction with participants. Participants retire and apply for benefits, others die, some move and many have questions. Many types of other activities occur that require investigation and responsive action. Most of this is accomplished by the Customer Service Center and/or the PLS or Field Benefit Administrator (FBA). In many cases the FBA handles most aspects of the plan for larger cases.

After the BDLs have been sent and all that remains is ongoing administration of the benefits, the case is transferred to a contractor. The TPD or FBA closes the case and a close-out group from TSD does a statistical sample review to ensure that all actions have been completed. The records are passed to the ongoing administration contractor who then manages the plan under PBGC direction.

## The Team Processing Model

05/31/96

The TPD Case Team is the core group for IOD processing. The team is composed of at least one actuary, one auditor, and one PLS. Other members might include the attorney assigned to the case, a contract actuarial firm, one or more contract auditors, a Field Benefit Administrator (FBA), and/or a Pension Benefit Administrator (PBA, also known as Pension Benefit Examiners). The Case Team works together to accomplish the tasks required to take a plan from trusteeship to case closure. Good communication between the team members is an important part of successful team processing.

The integration of the three primary disciplines (actuary, auditor, and PLS) into a team ensures better sharing of information which makes for faster and more accurate case processing. Team members are able to back each other up and support one another in the their duties. Each has specific tasks to complete, but some tasks can be done by anyone on the team or any combination of disciplines.

The high-level flow diagram is a graphic representation of the PPD or TPD processes.

## Overview Topic

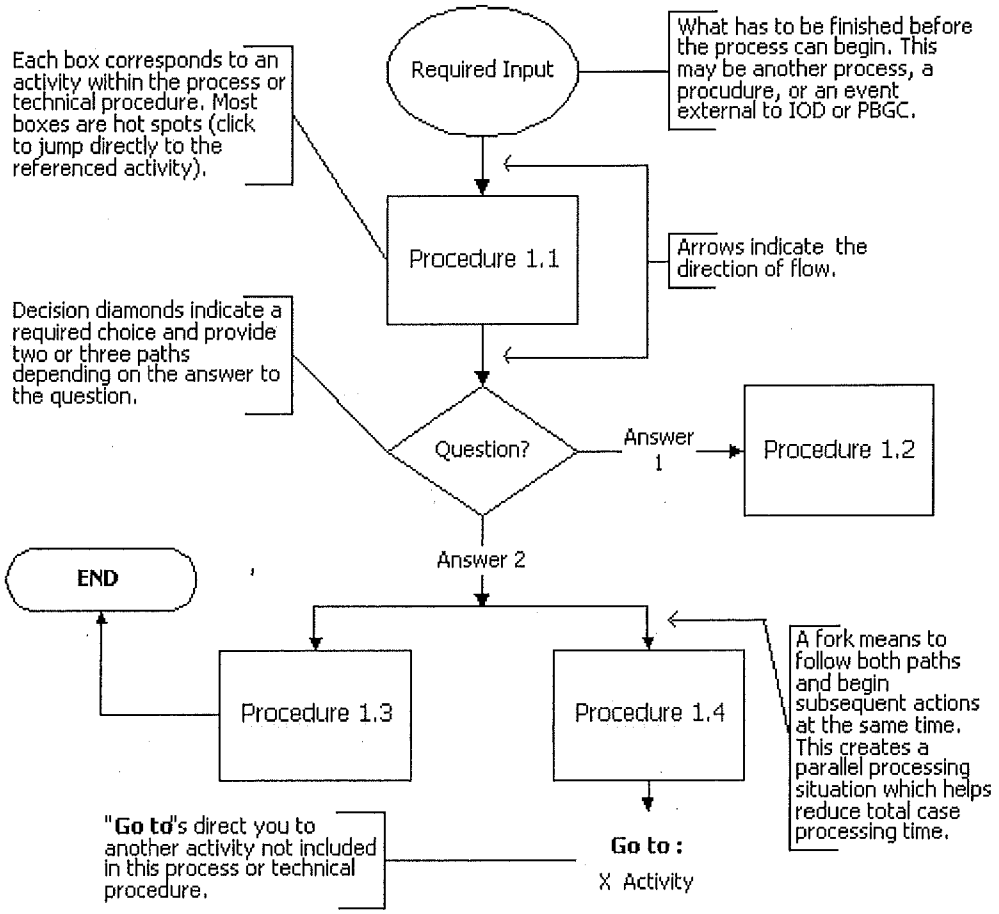
**05/31/96**

This general overview, often less than one page, provides a context for the process, explains its purpose and relation to other processes. The overview also explains major changes reflected in the process compared to previous ways of doing it. When applicable, there may be a discussion of the theory or history behind PBGC's reason for doing the process. Definitions of terms are drawn from the glossary for the entire manual.

Each section of the manual covers one process or technical procedure. Activities that are handled in order as part of all cases are considered processes. Activities that happen because of an event that is independent of case processing (either periodic such as balancing, or one-time events such as a participant death) are considered technical procedures as are activities that can be performed by more than one division such as controlled group analysis. Processes and technical procedures look the same except that some technical procedures do not have workflow diagrams.

# Workflow Diagram

05/31/96



## Sub-Processes & Sub-Technical Procedures 08/31/2001

The Sub-Processes and Sub-Technical Procedures should provide everything needed to perform an activity in the shortest time possible with no errors (or within a defined range of acceptable accuracy). More specifically, the new Sub-Processes and Sub-Technical Procedures are intended to:

- be complete;
- provide information users need to correctly perform the required tasks;
  provide sufficient guidance to ensure uniform application throughout the divisions;
- support efficient and consistent application of PBGC policy and regulations across all cases and as they affect participants; and
- leave flexibility for TPD managers to implement the procedures according to their own priorities and management styles.

Each Sub-Process and its number (10.1, 10.2, for example) correspond to the numbered boxes in the related workflow diagram. (Some Technical Procedures also have workflows with numbered boxes that correspond to Sub-Technical Procedure numbers.)

Just as each Process and Technical Procedure has an *overview*, each Sub-Process and Sub-Technical Procedure has an *outline*. The outline is on the first "page" of the Sub-Process or Sub-Technical Procedure. The second "page" contains a list of *action steps* while the outline on the first page is a table containing the following headings and explanations:

# Outline:

| | |
|---|---|
| **Purpose** | Why IOD does this. |
| **Time Reporting (BMPRS)** | The applicable category(ies) for time reporting. |
| **Required Input and Source** | Information and materials required to perform the procedure and where to get them.<br>✶ **CAS Activity:** Actions or requests (e.g. task referrals, milestones) received through CAS. |
| **Output and Recipient** | The product resulting from the procedure activities and what to do with it.<br>✶ **CAS Activity:** Actions taken through CAS, esp. completion of milestones. |
| **Control Issues** | Things that have to be done a certain way in order for the output to be acceptable to PBGC for purposes or quality, customer service, auditing and internal controls. |
| **Important Concepts** | Things to keep in mind about how we do this and why it's important in relation to the big picture of IOD processing and PBGC goals.<br>✶ **Timing:** Deadlines, timeframes, or schedules are highlighted here. |
| **Guidance** | Law, regulations, and policy that dictate how we do it and give us the required authority. |
| **Procedure Owner** | Who is responsible for doing it. For many activities, the owner is identified as the "TPD Case Team" to emphasize group ownership of the procedure. For others, the owner is identified as the Actuary, Auditor, PLS, or other specific position. **("N/A" means "not applicable".)**<br>✶ These items appear on an outline when appropriate. |

## Click here for more information...

Action Steps

**Sub-Processes & Sub-Technical Procedures**

## Action Steps

**05/31/96**

1 Step one.

2 Step two.

3 etc.

The action steps provide information that a relative novice would need to perform the sub-process or sub-technical procedure. Details on entering data into systems or forms are included by reference to the appropriate system documentation or form instructions. The same is true for references to other procedure manuals, such as the Actuarial Technical Manual. Most of these references are hot spots: click on the underlined reference to jump directly to the referenced part of the appropriate manual.

Some action step modules contain examples which usually appear in table format as well.

## Major Changes in Case Processing Incorporated in the Procedures 05/31/96

As a result of the IOD reorganization and the reengineering project, there have been a number of significant changes to the way that IOD processes cases as compared to the way thing were done prior to 1995. These changes range from the very large and visible, such as team processing, to the small and unnoticed, such as a general reduction in the number of required concurrence and approval levels. In all instances, the changes were instituted to make processing faster, better, cheaper, or easier. Customer service was a primary concern. In some areas, the changes were limited by law or policy. The following is a list of some of the most important and the primary location in the manual where they can be found. The list is not all-inclusive, nor in order of priority. There are a large number of smaller changes throughout out the manual which are not listed here.

## Click here for more information...

List of Major Changes

# List of Major Changes in Case Processing 02/07/97

| Primary Change | Location |
|---|---|
| Team processing | Throughout |
| Concurrent processing (multiple steps in a case occurring at the same time) | Throughout |
| More emphasis on using the work done by other divisions or departments | Throughout |
| More emphasis on communication (within the team and across divisions/departments) | Throughout |
| Reduced approval levels; peer approvals for many actions | Throughout |
| Reduced numbers of concurrences (normally a maximum of two) | Throughout |
| On-line repository on the i:\ drive for standard letters, memos, forms and checklists | Throughout |
| No approvals required for "standard" letters or memos | Throughout |
| Incorporated PRISM ALGS procedures and de-emphasized SSB ALGS | Throughout |
| Encourage of the use of administrative subpoenas | Process 2, 12, Technical Procedures 1 & 2 |
| Codified the procedures for Large Cases | Process 4, Technical Procedure 23 |
| Simplified routing of recommended terminations to reflect the approval authority of the TWG Chair | Process 5 |
| Monitoring of selected plans with long-term potential risk to PBGC in PPD | Process 6 |
| Set up a meeting or memo for transfer of a case and all information from PPD to TPD | Process 7 |
| TPDs can be brought into the process prior to termination/trusteeship | Process 7 |
| After DOPT, all new payees will be put in pay status through SSB. Also the conversion from the PPA to SSB should be made as quickly as possible. | Process 9 |
| Allow for multiple adjustments (previously called cutbacks ) in benefits. These adjustments are also processed earlier with the first adjustment taking place as close to assumption of payment responsibility as possible. | Process 10 |
| Requiring a written audit program for all cases | Process 11 |

| | |
|---|---|
| **Incorporated procedures for auditing and using third party electronic files (such as actuarial databases) as primary source documents for participant data** | Processes 11, 12 |
| **Combined, simplified, and formalized the format for audit reports** | Processes 11-15 |
| **Formalized audit procedures to more closely conform to AICPA and government standards** | Processes 11-15 |
| **Emphasize obtaining participant data from existing databases** | Process 12 |
| **Combined net worth and controlled group audits** | Process 14 |
| **Simplified controlled group procedures for TPDs in some cases** | Process 14, Technical Procedure 1 |
| **Incorporation of 4022(c) policy and allocation procedures, including the use of the SPARR** | Process 16 |
| **Early reconciliation of PLUS and actuarial databases for valuation** | Process 16 |
| **Identify "types" of IDLs needed for a plan upon completion of plan abstract** | Process 18 |
| **Early IDLs in all cases, if applicable** | Process 19 |
| **No "mini-vals" with early IDLs** | Process 19 |
| **More of the close-out procedures done by the TPDs** | Process 21 |
| **All responsibility for benefit administration remains with the TPD during plan closing** | Process 21 |
| **Procedures for plan termination expenses** | Technical Procedure 3 |
| **Deletion of the requirement for a "wet" (actual) signature for payee address changes** | Technical Procedure 4 |
| **Shifted responsibility for many day-to-day interactions with participants from TPDs to the CSC** | Technical Procedures 4, 5, 10 |
| **Identified procedures for a Recovery Coordinator to monitor recoveries from participants** | Technical Procedure 6 |
| **Documented procedures for returned or received checks** | Technical Procedure 8 |
| **Five business day response time for all correspondence** | Technical Procedure 10 |
| **Procedures for providing financial assistance to multiemployer plans** | Technical Procedure 11 |
| **Multiemployer plans will all be handled in one division** | Technical Procedure 11 |
| **Procedures for handling fraud/forgeries, in coordination with OIG** | Technical Procedure 12 |
| **Simplified and codified QDRO processing; standardized QDRO letters** | Technical Procedure 13 |

| | |
|---|---|
| **Procedures for holding a participant meeting** | Technical Procedure 14 |
| **Codified plan & participant file indexing to meet IPS requirements** | Technical Procedure 16 |
| **Initiated a methodology for answering policy/case processing questions** | Technical Procedure 17 |
| **Procedures for securing records in danger of being lost or damaged** | Technical Procedure 22 |
| **Provided a master list of documents which might be needed for any case** | Appendix A |
| **Provided a list of some alternate sources for information** | Appendix B |
| **Codified the PBGC-preferred sources for participant related data** | Appendix F |

**Manual Updates** Historical Recent

**Recent Content Updates** **05/13/2005**

| Section | Date | Description |
|---|---|---|
| **Process 19:** Overview | 05/13/2005 | **Added** paragraph about Limited-Scope BDLs. |
| **Process 19:** Workflow | 05/13/2005 | **Added** steps for issuing Limited-Scope BDLs, and revised in entirety. |
| **Process 19.3:** Determine Net Overpayment/Underpayment Status for Annuities | 05/13/2005 | **Removed** reference to letter 402LBR. |
| **Process 19.6:** Issue Limited-Scope BDLs | 05/13/2005 | **Added** new process for issuing Limited-Scope BDLs. |
| **Process 19.7:** Forms Letters Memos (renumbered) | 05/13/2005 | **Renumbered** – previously Process 19.6.<br>**Revised** list of documents. |

| | 09/04/98 | **Revised** instructions regarding preparation of Executed Trusteeship Cover Letters. New WP document replaces Forms 1160 and 1159, formerly prepared through CAS. |
| **Process 08.1:** Transfer Information From PPD to TPD | 08/31/01 | **Modified** to add details including required input and imaging. |
| | 05/25/99 | **Clarified** details regarding the transfer of case information and documents. |
| **Process 08.2:** Assign TPD Case Team | 08/31/01 | **Revised** throughout, now reflects the more routine assignment of a TPD case team while the case is with PPD, and clarifies instructions for non-FBA plan workplans. |
| | 10/20/00 | **Revised** to describe the initial preparation of an FBA Workplan. |
| | 11/16/99 | **Clarified** Large Case Coordinator involvement.<br>**Deleted** references to FBA procurement. |
| **Process 8.3:** Effect Trusteeship | 02/18/05 | **Revised** to remove step to send an Accounts Adds & Changes form to SSC to update DOTR. |
| | 05/18/01 | **Modified** to clarify provision of 4042(d) notice to interested parties. |
| | 11/16/99 | **Clarified** distribution list of final TAs. |
| | 10/10/97 | **Revised** instructions for preparation of Premium Information Request Memo<br>**Revised** Premium Information Request Memo (i:\wp\standard\preminfo.wpd) |
| | 07/11/97 | **Revised** TA prepared by PPD (not TPD) |
| | 06/06/97 | **Added** detail about premium information requested from FOD |
| | 03/07/97 | **Inserted** new action step 11 requesting premium information from FOD. (streamlining project) |
| | 02/07/97 | **Added** text that DOPT may differ from date in original recommendation. |
| | 09/13/96 | **Revised** instructions with new cover ltr (cotruscl.wpd) for Court Ordered |

| | | |
|---|---|---|
| | | Trusteeship. Clarified use of Form 1159 and Form 1160 Trusteeship Agreement Cover Letters<br>FBA no longer in list of recipients<br>Reorganized numbering of steps |
| | 05/31/96 | **Added** controlled group members to list of interested parties for 4042(d) notification #10 |
| **Process 8.4:** Forms, Letters, Memos | 02/18/05 | **Revised** list. |
| | 05/07/02 | **Modified** the Case Contact Sheet (i:\wp\standard\contacts.wpd) |
| | 10/20/00 | **Replaced** FBA Workplan (I:\MSWord\xls\FBAWorkplan.xls). |
| | 10/13/00 | **Revised** Document Transfer List Memo (i:\wp\standard\ppd\tpdtrf.wpd). |
| | 05/25/99 | **Added** Case Contact Sheet (i:\wp\standard\contacts.wpd) |
| | 05/25/99 | **Revised** Document Transfer List Memo (i:\wp\standard\ppd\tpdtrf.wpd) |
| | 05/28/98 | **Revised** Court Ordered Trusteeship Agreement Cover Letter (i:\wp\standard\cotruscl.wpd) |
| | 05/28/98 | **Added** new document (replaces CAS 1159, and CAS 1160) - Executed Trusteeship Agreement Cover Letter (i:\wp\standard\extacvlt.wpd) |
| | 04/22/98 | **Revised** Document Transfer List Memo (i:\wp\standard\ppd\tpdtrf.wpd) |
| | 01/16/98 | **Revised** Document Transfer List Memo, **Added** case contact list (i:\wp\standard\ppd\tpdtrf.wpd) |
| | 10/10/97 | **Revised** Premium Information Request Memo (i:\wp\standard\preminfo.wpd) |
| | 03/07/97 | **Added** a jump to the Premium Information Request Memo (i:\wp\standard\preminfo.wpd). (streamlining project) |
| | 10/24/96 | **Revised** (i:\wp\standard\cotruscl\wpd), including replacement of "plan asset insufficiency" with "unfunded benefit liabilities" |
| | 09/13/96 | **Added** New letter: Court Ordered Trusteeship Agreement Cover Letter (i:\wp\standard\cotruscl.wpd) |
| | 07/19/96 | **Added** New document: Workplan.wpd |
| **Process 9:** Plan Assumption | 02/18/05 | **Replaced** entirely with new content including a new workflow. Also, renamed Process from *Assume Payment/Set Up Account* to *Plan* |

| | | |
|---|---|---|
| | | *Assumption.* |
| **Process 09:** Assume Payment/ Set Up Account | 03/08/02 | **Replaced** reference to RARE with PACS in overview |
| | 09/28/01 | **Modified** to revise Datahub loading timeframes, and added description of 9A loading process. |
| | 09/01/99 | **Revised** Overview to incorporate details about PRISM online assumptions |
| | 05/25/99 | **Modified** throughout for clarification of payment of optional forms, imaging of documents and other details. |
| | 03/05/99 | **Added** detail regarding check cycle, and cut-off date. |
| | 10/14/98 | **Revised** Overview to describe Datahub Procedures |
| | 02/13/98 | **Revised** Overview to incorporate references to Operating Policy 5.4-4, and PBGCs policy with respect to interest payments (97-7). |
| | 01/10/97 | **Inserted** the third paragraph which describes processing for woodwork persons |
| **Process 09:** Assume Payment/Set Up Account, Workflow | 03/10/00 | **Replaced** workflow for additions to Process 09. |
| **Process 09.01:** Request Plan Administrator to Continue Payment Processing | 05/25/99 | **Revised** outline regarding payment of optional forms, and addition of policy manual reference. |
| | 10/14/98 | **Added** details about payment information needed |
| | 11/25/98 | **Added** details about requests for payee data. |
| **Process 09.2:** Prepare and Transmit Funding Memo | 05/25/99 | **Revised**, editorial changes only. |
| **Process 09.3:** Obtain Participant Payment Data | 09/28/01 | **Edited** text. |
| | 08/31/01 | **Added** reference to finalizing Plan Assumption Milestone (CAS) and Process 10.4. |
| | 09/01/99 | **Revised** to incorporate details about PRISM online assumptions |
| | 05/25/99 | **New** subprocess details collection of participant payment data needed for plan assumption |
| **Processes 09.4 through 09.8** | 10/14/98 | **Renumbered** to be 09.8 through 09.12 |
| **Process 09.4:** Prepare & Submit Plan Assumption Package | 09/28/01 | **Modified** to revise the Datahub timeframes for submission of plan assumption package. |

| | | |
|---|---|---|
| | 09/01/99 | **Revised** to incorporate details about PRISM online assumptions |
| | 05/25/99 | **Clarified** instructions in action step 1. |
| | 10/14/98 | **Renamed** subprocess, and revised to describe initiation of Datahub Procedures by TPD |
| **Process 09.4:** Review Participant Payment Information, Map Data | 10/14/98 | **Added** Subprocess |
| **Process 09.5:** Review Participant Payment Information, Map Data | 09/28/01 | **Modified** to revise Datahub timeframes for submission of plan assumption package and data mapping. |
| | 09/01/99 | **Revised** to incorporate details about PRISM online assumptions |
| | 05/25/99 | **Clarified** outline and action steps, esp. about imaging documents. |
| **Process 09.5:** Enter Participant Payment Data | 10/14/98 | **Added** new subprocess |
| **Process 09.6:** Enter Participant Payment Data | 09/28/01 | **Modified** to revise Datahub timeframes for completion of data loading (by DMC or OASD). |
| | 09/01/99 | **Revised** to incorporate details about PRISM online assumptions |
| | 05/25/99 | **Renumbered** subprocess |
| | 10/14/98 | **Added** new subprocess |
| **Process 09.07:** Evaluate and Reconcile Initial Payee Information Load.(formerly 09.06) | 05/25/99 | **Clarified** action steps, esp. about imaging documents. |
| | 03/05/99 | **Added** detail regarding check cycle, and cut-off date. |
| | 10/14/98 | **Added** new subprocess |
| **Process 09.8** Authorize Plan Assumption | 09/13/02 | **Revised** outline to add intranet link for Check Schedule Key Dates |
| | 08/31/01 | **Added** specifics about updating and finalizing Plan Assumption Milestone (CAS) to outline and action steps. |
| | 09/01/99 | **Revised** to incorporate details about PRISM online assumptions |
| | 05/25/99 | **Deleted** subprocess (obsolete, see new 09.03) |
| | 05/25/99 | **Renumbered** subprocess |
| **Process 09.8:** Transfer Data to SSB for Payments to Retirees -- Less than 200 Current Payees (Formerly 9.4) | 01/10/97 | **Revised** text to establish that **All** account adds and the loading of retirees must be done at SSB for internal control purposes. |
| **Process 09.9:** Notify Current Payees | 05/18/01 | **Deleted** reference to filepathame of obsolete Plan Abstract version. |
| | 08/25/00 | **Added** instructions regarding the new Preliminary Plan Summary |

| | | |
|---|---|---|
| | | (CSWG recommendation) |
| | 03/10/00 | **Added** information about *new* Trusteeship Notification Packages (REACH Team project) |
| | 09/22/99 | **Revised** to refer to new participant forms. |
| | 05/25/99 | **Modified** outline. |
| | 10/30/98 | **Added** details about EDD. |
| | 10/10/97 | **Revised** outline and actions steps to refer to new participant letter (PRISM ALGS), which merges Trusteeship Notice and Notice of Change in Paying Agent into a single letter for retirees. (streamlining project) |
| **Process 09.10:** Prepare and Submit 9A Participant Data | 09/28/01 | **Modified** to revise Datahub timeframes for completion of data loading (by DMC or OASD). |
| | 03/10/00 | **Renamed** subprocess, and revised to describe initiation of Datahub procedures by TPD. |
| | 05/25/99 | **Revised, renumbered & renamed** subprocess |
| **Process 09.10:** Reconcile Trial Check Run & Pay Participants | 05/25/99 | **Deleted** subprocess (obsolete) |
| | 04/07/99 | **Replaced** reference to PSDADJ with RARE |
| **Process 09.11:** Review 9A Participant Package | 03/10/00 | **Added** new subprocess. |
| **Process 09.12:** Enter 9A Data. | 09/28/01 | **Modified** to revise Datahub timeframes for completion of data loading (by DMC or OASD). |
| | 03/10/00 | **Added** new subprocess. |
| **Process 09.13:** Evaluate, Reconcile & Authorize 9A Data | 03/10/00 | **Added** new subprocess. |
| **Process 9.14:** Forms Letters Memos | 02/18/05 | **Added**:<br>*PIF Tracking Spreadsheet*<br>*(PIFtracking.xls)*<br>*Plan Assumption Reconciliation Report (planasmprec.doc)*<br><br>**Deleted:** Data Entry Request Form<br>Transfer Control Sheet<br>**Revised:**<br>*Benefit Funding Memo (Funding.doc)*<br>*Concurrence Form (Concurr.doc)*<br>*Datahub - Data Mapping Instructions for Data Entry(Dhmapin.doc)*<br>*Notification Letter to Prior Paying* |

| | | |
|---|---|---|
| | | *Agent (Notifppa.doc)*<br>*Notification of Authorization to Make Payments Letter (Authpay.doc)*<br>*PA Request Follow-Up Letter (Pareqfol.doc)*<br>*PPA Information Letter (ppainfo.doc)* |
| **Process 09.14:** Forms, Letters, Memos | 01/07/03 | **Modified** Notification of Authorization to Make Payments Letter - reflecting change in SSC personnel (I:\wp\standard\authpay.wpd) |
| | 04/05/02 | **Modified** the Data Entry Form (i:\wp\standard\derf.wpd) |
| | 08/01/01 | **Corrected** typo in Plan Assumption Authorization Verification (i:\wp\standard\assverif.wpd) |
| | 06/28/01 | **Modified** Benefit Funding Memo (FOD names only). |
| | 05/18/01 | **Deleted** obsolete Plan Abstract. |
| | 03/14/01 | **Updated** Benefit Funding Memo (i:\wp\standard\funding.wpd) for FOD personnel changes. |
| | 08/25/00 | **Added**: new document - Preliminary Plan Summary (i:\wp\standard\prelimps.wpd); and new link to Plan Abstract (i:\wp\standard\abstract.wpd) |
| | 02/28/00 | **Revised** Data Entry Request Form (i:\wp\standard\derf.wpd) |
| | 09/22/99 | **Revised** to refer to new participant forms |
| | 09/01/99 | **Added** new Plan Assumption Authorization Verification (i:\wp\standard\assverif.wpd) |
| | 08/20/99 | **Revised** Data Entry Request Form (i:\wp\standard\derf.wpd) |
| | 08/20/99 | **Revised** Datahub - Data Mapping Instructions for Data Entry (i:\wp\standard\dhdmapin.wpd) |
| | 05/25/99 | **Deleted** reference to Monthly Adds and Updates, Form 487 |
| | 05/13/99 | **Modified** Plan Administrator/Paying Agent Request Follow Up Letter (i:\wp\standard\pareqfol.wpd) |
| | 04/27/99 | **Revised** Notification of Authorization to Make Payment Letter (i:\wp\standard\authpay.wpd) |
| | 10/30/98 | **Added** references to additional participant forms and letters (PRISM ALG). |
| | 10/14/98 | **Deleted** Proposed Schedule of SSB Activities (i:\wp\standard\ssbsched.wpd) |

| | | |
|---|---|---|
| | 10/14/98 | **Added** link to WordPerfect version of Account Adds and Changes Form (i:\wp\standard\acaddchg.wpd) |
| | 03/23/98 | **Revised** Benefit Funding Memo to include number of payees (i:\wp\standard\funding.wpd) |
| | 10/14/98 | **Added** new document, Datahub - Data Mapping Instructions (i:\wp\standard\dhdmapin.wpd) |
| | 10/14/98 | **Added** new document, Data Entry Request Form (i:\wp\standard\derf.wpd) |
| | 09/30/98 | **Revised** Notification of Authorization to Make Payments Letter (i:\wp\standard\authpay.wpd) |
| | 08/06/98 | **Revised** Notification Letter to Prior Paying Agent (i:\wp\standard\notifppa.wpd) |
| | 08/05/98 | **Revised** Notification of Authorization to Make Payments Letter (i:\wp\standard\authpay.wpd) |
| | 09/17/96 | **Added** "Financial Analyst, Treasury Division" as a "cc" in the Notification Letter to Prior Paying Agent -- (i:\wp\standard\notifppa.wpd) |
| **Process 10: Adjust Benefits** | 09/22/99 | **Revised** to add benefit adjustment details. |
| **Process 10 Workflow** | 08/31/01 | **Revised** to reflect re-named subprocess 10.4 |
| | 05/02/97 | **Clarified** 4022(c) amount not payable as estimated benefit |
| | 02/07/97 | **Added** text to emphasize importance of documenting analysis for benefit adjustments (cutbacks). |
| **Process 10.1:** Analyze Plan Documents | 08/31/01 | **Reformatted** output section of outline. |
| | 05/18/01 | **Deleted** reference to filepathame of obsolete Plan Abstract version. |
| | 08/25/00 | **Added** instructions about new Preliminary Plan Summary, and updating CAS milestone. (CSWG recommendation) |
| **Process 10.02:** Obtain Data | 10/20/00 | **Added** late retirement details about adjusting the maximum guaranteeable benefit. |
| | | **Added** links to the ATM and Policy Bulletin regarding late retirement. |
| **Process 10.3:** Analyze Data and Funding for PC3 | 12/13/02 | **Edited** for clarification. |
| | 12/07/01 | **Added** clarification in allocating to PC3 to control issues and action steps and |

| | | |
|---|---|---|
| | | added reference to IOD PB 00-08 in guidance. |
| **Process 10.4:** Identify Current Payees for Benefit Adjustments | 02/18/05 | **Added** requirements for notifying payees of benefit adjustments; other general edits. |
| **Process 10.4:** Identify Current Payees for Benefit Adjustments | 12/13/02 | **Edited** for clarification. |
| | 08/31/01 | **Re-named** subprocess.<br>Added specifics about finalizing Estimated Cutbacks/ Adjustments Milestone (CAS) to outline and action steps. |
| | 10/20/00 | **Added** late retirement details about adjusting the maximum guaranteeable benefit. |
| **Process 10.7**: Forms, Letters, Memos | 05/18/01 | **Deleted** obsolete Plan Abstract. |
| | 08/25/00 | **Added**: new document - Preliminary Plan Summary (i:\wp\standard\prelimps.wpd), and new link to Plan Abstract (i:\wp\standard\abstract.wpd) (CSWG recommendation) |

| | 02/16/01 | **Modified** to incorporate the use of new document: Internal Controls Questionnaire |
| | 05/25/99 | **Clarified** output and recipient. |
| **Process 11.04**: Forms, Letters, Memos | 05/18/01 | **Deleted** obsolete Plan Abstract. |
| Forms, Letters, Memos | 02/16/01 | **Added** Internal Controls Questionnaire (i:\wp\standard\intonqu.wpd) |
| Forms, Letters, Memos | 01/08/01 | **Modified** Internal Controls Determination (i:\wp\standard\intcont.wpd) |
| Forms, Letters, Memos | 08/28/00 | **Revised** Data Elements Source List (i:\wp\standard\datasrcs.wpd) |
| Forms, Letters, Memos | 08/25/00 | **Clarified** documents' names - Plan Document Audit |

| | | |
|---|---|---|
| | | (i:\wp\standard\plandocs.wpd), and Information Request Letter (i:\wp\standard\inforeq.wpd) |
| Forms, Letters, Memos | 05/26/99 | **Revised** Plan Documents List, typographical only (i:\wp\standard\plandocs.wpd) |
| | 04/07/99 | **Revised** text to reflect new path \ filename of Plan Abstract (i:\wp\standard\abstract.wpd) |
| **Process 12:** Obtain & Evaluate Participant & Plan Document Data, Workflow | 04/16/04 | **Modified** workflow to show that Early BDL process is initiated after completion of source document audit. |
| | 09/22/99 | **Updated** workflow for earlier revisions to Process 09 |
| | 07/11/97 | **Clarified** throughout to provide strengthened instructions regarding thorough documentation. |
| **Process 12:** Obtain & Evaluate Participant and Plan Data, Workflow | 02/11/00 | **Revised** workflow for earlier addition to Process 12, and corrected typo. |
| **Process 12.1**: Finalize Plan Document Audit | 05/18/01 | **Deleted** reference to filepathame of obsolete Plan Abstract version. |
| | 08/25/00 | **Clarified** correct document name (Plan Document Audit).<br>**Added** new instruction to finalize CAS milestone.<br>(CSWG recommendation) |
| **Process 12.2** Prepare Plan Abstract | 02/07/03 | **Added** processing guidelines on crediting military service (PB 00-4). |
| | 05/18/01 | **Deleted** reference to filepathame of obsolete Plan Abstract version. |
| | 08/25/00 | **Added** reference to the Preliminary Plan Summary.<br>(CSWG recommendation)<br>**Clarified** correct document name (Plan Document Audit), and added WP file pathnames. |
| | 04/07/99 | **Revised** text to reflect new path\filename of Plan Abstract (i:\wp\standard\abstract.wpd) |
| **Process 12.5:** Perform Source Document Audit | 05/25/99 | **Deleted** action step 7. |
| | 11/25/98 | **Added** details to the outline about identification of participant data elements in the process, and scanning of source documents to IPS. |
| | 07/19/96 | **Added** report file name to item 6 |
| **Process 12.06**: Build Participant Database | 05/18/01 | **Clarified** that data elements are all traceable to a source. |
| | 05/25/99 | **Modified** controls section, and clarified identification of action steps (now |

| | | |
|---|---|---|
| | | 12.6.A & 12.6.B). |
| | 11/25/98 | **Added** details to the outline and actions steps about establishing and updating the data shell. |
| | 01/10/97 | **Revised** to state that FBAs should get a hard copy of the TPD's controlled group determination (or no controlled group determination) |
| **Process 12.6A:** Build Participant Database | 09/22/99 | **Corrected** typo |
| **Process 12.6B:** Build Participant Database | 09/22/99 | **Corrected** typo |
| **Process 12.7:** Audit Participant Database | 03/28/03 | **Added** details of necessity to retain and archive sampling database and supporting documentation. |
| | 05/25/99 | **Deleted** completion of Participant Data Audit Report from output and recipient. **Deleted** action steps 7-10. |
| | 08/15/97 | **Added** statement of purpose and other clarifications. |
| | 12/06/96 | **Clarified** use of random number generator program. |
| | 07/19/96 | **Added** Output and Recipient item |
| | 07/19/96 | **Revised** items 7 & 8 in action steps |
| **Process 12.8:** Prepare Participant Data Audit Report | 05/25/99 | **New** subprocess providing details about preparation of report. |
| **Process 12.9:** Forms, Letters, Memos | 01/16/05 | **Revised:** Participant Database Archiving Guidelines (PDA). |
| | 03/04/04 | **Revised** Participant Database Archiving Guidelines |
| | 03/28/03 | **Added** Participant Database Archiving Guidelines (i:\wp\standard\pdaarchiveinstructionsv1.doc) |
| | 05/18/01 | **Deleted** obsolete Plan Abstract. |
| | 08/28/00 | **Revised** Data Elements Source List (i:\wp\standard\datasrcs.wpd) |
| | 08/25/00 | **Added** new document - Preliminary Plan Summary (i:\wp\standard\prelimps.wpd). **Clarified** documents' names - Plan Document Audit (i:\wp\standard\plandocs.wpd), and Information Request Letter (i:\wp\standard\inforeq.wpd). **Added** new link to Information Request Letter (i:\wp\standard\inforeq.wpd). (CSWG recommendation) |
| | 06/14/99 | **Revised** Locator Project Facts (i:\wp\standard\loc_fact.wpd) **Revised** Locator Project Request |

| | | |
|---|---|---|
| | | (i:\wp\standard\locproc.wpp) |
| | 05/26/99 | **Revised** Plan Documents List, typographical only (i:\wp\standard\plandocs.wpd) |
| | 05/25/99 | **Revised** Participant Data Audit Report (i:\wp\standard\pdarept.wpd) |
| | 04/07/99 | **Revised** text to reflect new path\filename of Plan Abstract (i:\wp\standard\abstract.wpd) |
| Forms, Letters, Memos | 07/19/96 | **Added** Participant Data Audit Report |
| **Process 13:** Verify Data for Participant Database | 02/18/05 | **Revised** Overview to remove references to mailing 4042(d) letters; other general edits.<br>**Revised** Workflow.<br>**Removed** Process 13.1 and included instructions for issuing 4042(d) letters in new *9.13 Notify Participants*.<br>**Renumbered** *Process 13.2 Verify Data from Returned Forms* to 13.1; other general edits.<br>**Renumbered** *Process 13.3 Forms, Letters, Memos, etc.* to 13.2; revised list. |
| **Process 13:** Verify Data for Participant Database | 04/05/02 | **Clarified** timing to send 4042(d) packages. |
| | 03/10/00 | **Added** information to overview about *new* Trusteeship Notification Packages (REACH Team project) |
| | 09/22/99 | **Revised** Overview to refer to new participant forms. Revised proof document requirements. (streamlining) |
| | 10/10/97 | **Added** detail to Process Overview, and Process 13.1 about combined letter which merges Trusteeship Notice and Change of Paying Agent into a single letter for retirees. (streamlining project) |
| | 07/11/97 | **Added** guidance (deadlines) for 4042(d) notifications to participants and follow up letters. Miscellaneous revisions to reflect Process 17 new name. Clarifications throughout to provide strengthened instructions regarding thorough documentation |
| **Process 13.1:** Send 4042(d) Letter and Data Verification Forms | 04/05/02 | **Clarified** timing to send 4042(d) packages. |
| | 08/31/01 | **Added** specifics about updating and finalizing **new** Participant Trusteeship Letters Milestone (CAS). |
| | 03/10/00 | **Modified** to add information about *new* Trusteeship Notification Packages |

| | | |
|---|---|---|
| | | (REACH Team project) |
| | 09/22/99 | **Revised** to refer to new participant forms. |
| | 05/25/99 | **Changed** only to reflect renumbered subprocess. |
| | 10/30/98 | **Added** details about EDD. |
| **Process 13.2:** Verify Data from Returned Forms | 08/31/01 | **Added** references to Operating Policy 8.5-1 Signature by Mark and Appendix J. |
| | 08/11/00 | **Replaced** references to obsolete Locator Project with references to new TP 33: Locate Customer Address. |
| | 12/03/99 | **Added** details about preparation of Acknowledgment Letter (ALGS 530). |
| | 09/22/99 | **Revised** to refer to new participant forms. Revised proof document requirements. (streamlining) |
| | 11/25/98 | **Added** to outline additional output item of updates to PRISM. Added to action steps (PLS & auditor) details about reconciliation or addition of participant data elements from data verification forms to PRISM, and to the participant database. Added specific listing of appropriate data elements. |
| | 10/30/98 | **Added** details to action steps about EDD. |
| | 10/30/98 | **Clarified** in outline and action steps that PBGC no longer requires original source documents, copies are acceptable. (streamlining project) |
| | 07/11/97 | **Added** information about Locator Project |
| **Process 13.3:** Forms, Letters, Memos | 08/11/00 | **Deleted** Locator Project Facts (i\wp\standard\loc_fact.wpd), and Locator Project Request (i\wp\standard\locproj.wpd) |
| | 12/03/99 | **Replaced** reference to Response Card, PBGC Form 1690a with Acknowledgment Letter (ALGS 530). |
| | 09/22/99 | **Added** references to new participant forms, deleted obsolete forms |
| | 02/23/99 | **Revised** Locator Project Facts - (i:\wp\standard\loc_fac.wpd) |
| | 02/23/99 | **Revised** Locator Project Request - (i:\wp\standard\locproj.wpd) |
| | 10/30/98 | **Added** reference to Application for EDD. |
| | 07/11/97 | **Added** two **new** documents: Locator Project Facts (i:\wp\standard\loc_fact.wpd), and |

| | | |
|---|---|---|
| **Process 14:** Determine Controlled Group and Net Worth | 09/04/98 | **Added** new BMPRS code to Time Reporting section to outlines of subprocesses (topics not redated) |
| | 09/04/98 | **Revised** overview to identify PPD Manager as IOD's point of contact for settlements. |
| **Process 14.1:** Review PPD Controlled Group Findings | 06/29/01 | **Modified** to replace IPS for paper file references. |
| | 09/22/99 | **Clarified** procedure with PBGC Operating Policy 7.2-1, and added reference in guidance |
| | 01/10/97 | **Revised** to state that FBAs should get a hard copy of the TPD's controlled group determination (or no controlled group determination) |
| **Process 14.2:** Perform TPD Controlled Group Analysis (IRS Disclosure Offices) | 11/08/02 | **Deleted** section. Information in new **Appendix M.** |
| | 03/23/01 | **Added** new adddress to request tax returns for tax-exempt entities. |
| **Process 14.2**: Perform TPD Controlled Group Analysis | 11/08/02 | **Modified** to reflect that requests for non-exempt tax information are sent to a new centralized IRS location.<br>**Deleted** separate listings of IRS Regional Offices by State and IRS Disclosure Offices.<br>**Added** link to new Appendix M: IRS Disclosure Offices. |
| | 06/29/01 | **Modified** to replace IPS for paper file references. |
| | 03/23/01 | **Added** instructions for requesting tax returns for tax exempt entities. |
| | 02/16/01 | **Updated** L.A. office address. |
| | 12/03/99 | **Revised** IRS Regional Offices by State (added note).<br>**Revised** IRS Disclosure Offices address and telephone numbers. |
| | 12/03/99 | **Clarified** the use of Form 333 when making IRS Tax Return Requests. |
| | 09/22/99 | **Clarified** procedure with PBGC Operating Policy 7.2-1, and added reference in guidance |

| Forms, Letters, Memos | | |

## Historical Updates

Historical | Recent

## Processes 16 - 17

04/15/2005

| Valuation Processes | Date | Change |
|---|---|---|
| **Process 16:** Value Recoveries and Allocate to Claims | 10/10/97 | **Added** instruction to use new Allocation Recovery Tool (ART) Clarified zero Recovery Determinations are documented in Recovery Determination Memo |
| | 12/06/96 | **Clarified** with minor changes throughout |
| **Process 16.2**: Value Recoveries and Allocate to Claims | 01/10/03 | **Deleted** requirement to provide Recovery Determination Memo to PPD |
| | 02/16/01 | **Specified** the type of CAS task referral sent. |
| **Process 16.3:** Allocate Combined Recoveries... | 02/16/01 | **Modified** to specify how to request PPD Assistance, including references to two new documents: PPD Recovery Allocation Data Form and Request for PPD Financial Analysis Assistance |
| | 11/25/98 | **Updated** details about Actuarial Recovery Tool (ART) |
| **Process 16.4:** Document Recovery Values | 01/10/03 | **Modified** to reflect that the SPARR Coordinator is in MCU (from PPD). |
| | 06/06/97 | **Added** text regarding importance of updating CAS Plan Assets Milestone |
| **Process 16.9:** Forms Letters Memos | 2/10/05 | **Updated** *Recovery Determination Memo (Recdeter.doc).* |
| **Process 16** Forms, Letters, Memos | 12/05/02 | **Modified** Reovery Determination Memo (i:\wp\standard\recdeter.wpd) |
| Forms, Letters, Memos | 02/16/01 | **Added** two new documents:<br>PPD Recovery Allocation Data Form (i:\wp\standard\ppdrecal.wpd), and<br>Request for PPD Financial Analysis Assistance (i:\wp\standard\ppdanal.wpd) |
| Forms, Letters, Memos | 11/22/99 | **Revised** Recovery Determination Memo (i:\wp\standard\recdeter.wpd) |
| | 06/06/97 | **Revised** Recovery Determination Memo (additional cc to FOD) |
| | 04/13/97 | **Revised** the Recovery Determination Memo (i:\wp\standard\recdeter.wpd) |
| **Process 17** Prepare Actuarial Case Report & Software | 03/28/03 | **Updated** Workflow |
| | 06/06/97 | **Revised** throughout in response to new PBGC Operating Policy Manual 6.7-1. |
| | 08/30/96 | **Changed** the order of the sub-processes in the workflow diagram |

| | | |
|---|---|---|
| **Process 17.1** Reconcile Participant Database | 03/28/03 | **Revised** to clarify required data elements & format of database |
| **Process 17.2** Convert Participant Database to an ACT Database | 03/28/03 | **Added** new sub-section with link to ACT manual. |
| | 12/07/01 | Added clarification in allocating to PC3 to control issues and action steps and added reference to IOD PB 00-08 in guidance. |
| **Process 17.3** Determine Title IV Benefits, including Asset Allocation per 4044 | 03/28/03 | **Renumbered** |
| | 06/20/96 | **Revised** Control Issues re recovery ratio for multiple terminated plans |
| **Process 17.4** Determine Plan 4022(c) Benefits Payable | 03/28/03 | **Renumbered** |
| | 01/11/99 | **Revised** cash out limit to $5,000 in action steps |
| **Process 17.5** Determine 4022(c) Benefits Payable | 03/28/03 | **Renumbered** |
| **Process 17.6** Program BSRS | 03/28/03 | **Renumbered** |
| | 08/10/99 | **Modified** reference to ACR checklist. |
| **Process 17.7** Produce Actuarial Case Report Package | 03/28/03 | **Renumbered** and **Revised** to delete obsolete processing step |
| **Process 17.7** Action Steps: Finalize Actuarial Case Report Package & Review | 08/10/99 | **Modified** reference to ACR checklist. |
| **Process 17.8** Finalize Actuarial Case Report Package & Review | 03/28/03 | **Renumbered** and **Added** reference in Guidance to ACT manual. |
| **Process 17.9** Perform Software/ADT Review | 03/28/03 | **Renumbered** and **Revised** to strengthen controls and add link to ACT manual. |
| **Process 17.10** Finalize IPV-Ready Data | 03/28/03 | **Renumbered** and **Modified** to reflect correct names of reports and processing steps. |
| | 11/25/98 | **Added** details to outline about ADT load of participant data elements to PRISM. |
| **Process 17.11** Close Out Software (OASD) | 03/28/03 | **Renumbered** and **Modified** to reflect correct processing steps |
| **Process 17.12** Present Case to Team | 03/28/03 | **Renumbered** |
| **Process 17.13** Reconcile PRISM & Archive Databases | 03/28/03 | **Renumbered** and **Corrected** name of sub-section |
| **Process 17.14** Forms, Letters, Memos | 03/28/03 | **Renumbered** and **Modified** to delete link to TPD Software Review Checklist and to add Incoming Case Review Checklist |
| | 04/28/98 | **Updated** TPD Software Review Checklist to support ADT utilities version 3.0A (i:\wp\standard\sc_cklst.wpd) |

06/06/97 **Added new** wp documents:
Automated Data Load (ADL) Checklist
(i:\wp\standard\adlcklst.wpd) &
TPD Software Review Checklist
(i:\wp\standard\sc_cklst.wpd)

**Historical Updates** Historical | Recent

**Processes 18 - 20** **04/15/2005**

| Notification of Benefits Processes | Date | Change |
|---|---|---|
| **Process 18:** Identify Types of IDLs for Case | 09/22/99 | **Edited** and added details to guidance. |
| **Process 18.3:** Forms, Letters, Memos | 09/22/99 | **Added** reference to PRISM ALG letters |
| | 12/06/96 | **Added** access to a WordPerfect memo containing Types of Required IDLs -- i: \wp\standard\idltypes.wpd |
| | 05/02/03 | **Deleted** Customized BDL Cover Memo and Benefit Determination Letter (samples).. |
| **Process 19**: Issue BDLs & Make Adjustments to Payments - Overview | 1/19/05 | **Added** that BDLs are issued to alternate payees with certain restrictions. |

| | 03/08/02 | **Clarified** language about rule on interest calculation at PBGC<br>**Added** reference to PACS and the PACS Helpfile<br>**Replaced** details on using RARE with PACS including requirement to scan both PACS Summaries in IPS |
| | 02/08/02 | **Added** language about rule that interest is calculated at PBGC (not SSB). |
| | 07/27/01 | **Added** references to guidance, including applicable Treas. reg cite (withholding).<br>**Modified** processing for:<br>• residual benefit amounts, including when a new lump-sum application is required,<br>• tax withholding rules, and<br>• other clarifications.<br>(IOD PB 00-6: Residual Lump-Sum Distributions.) |
| | 05/18/01 | **Modified** for editorial changes, |

| | | |
|---|---|---|
| | | including IDL/BDL. Renamed subprocess. |
| | 09/22/99 | **Revised** for IOD PB 99-6, very small payments |
| | 01/11/99 | **Revised** cash out limit to 5,000, and add details about cash out limit to outline |
| | 02/13/98 | **Revised** Important Concepts and **Added** Guidance to reflect IOD Policy Bulletin 97-7. |
| **Process 19.5:** Issue Corrected or Revised Benefit Determination Letter | 03/19/04 | **Added** new subsection describes how and when to issue a revised **or** corrected BDL |
| **Process 19.6:** Forms, Letters, Memos | 04/16/04 | **Added** Early BDL Audit Report. |
| **Process 19:** Forms, Letters, Memos | 07/27/01 | **Added** reference to Form 720 - Application for Lump-Sum Payment. |
| | 08/11/00 | **Deleted** Locator Project Facts (i\wp\standard\loc_fact.wpd), and Locator Project Request (i\wp\standard\locproj.wpd) |
| | 09/22/99 | **Added** reference to new PRISM ALG Letter.<br>**Deleted** obsolete PSDADJ report reference. |
| Forms, Letters, Memos | 02/23/99 | **Revised** Locator Project Facts - (i:\wp\standard\loc_fac.wpd) |
| Forms, Letters, Memos | 02/23/99 | **Revised** Locator Project Request - (i:\wp\standard\locproj.wpd) |
| Forms, Letters, Memos | 07/11/97 | **Added** two **new** documents: Locator Project Facts (i:\wp\standard\loc_fact.wpd), and Locator Project Requests (i:\wp\standard\locproj.wpd |
| **Process 20:** Overview | 1/19/05 | **Modified** to indicate that BDLs of related QDRO parties are also stayed if one party appeals. |
| | 02/17/04 | **Added** that some appeals correspondence may be referred outside of IOD. |
| **Process 20:** Respond to Appeal Notice/Make 45-Day Changes | 08/31/01 | **Added** reference to Appendix J. |
| **Process 20:** Workflow | 05/18/01 | **Modified** for editorial changes, including IDL/BDL and renamed subprocesses. |
| | 12/06/96 | **Clarified** throughout Process including new Overview, revised workflow diagram, discussions of PEAD Acknowledgement Memo and PEAD Closing Memo |
| **Process 20:** Respond to Appeal | 05/18/01 | **Modified** for editorial changes, |

| | | |
|---|---|---|
| Notice/Make 45-Day Changes, workflow | | including IDL/BDL and renamed subprocesses. |
| **Process 20:** Respond to Appeal Notice/Make 45-Day Changes, overview | 05/18/01 | **Modified** for editorial changes, including IDL/BDL. |
| **Process 20:** Respond to Appeals Notice and PEAD Referrals (renamed) | 05/02/03 | **Revised** in its entirety, includes two new subsections. |
| **Process 20.1**: Respond to PEAD Acknowledgment Memo | 1/19/05 | **Added** step to stay BDL of all QDRO parties if one party appeals, and to notify them via ALGS. |
| **Process 20.1:** Respond to PEAD Acknowledgment of Appeal or Extension Request | 2/17/04 | **Added** language on notifying Recovery Coordinator when an appeal concerns a Recovery BDL. |
| **Process 20.1:** Respond to PEAD Acknowledgment Memo | 5/18/01 | **Modified** name of time reporting categories. |
| | 5/02/03 | **Revised** to reflect updated IOD/PEAD processing including clarification of actions that may/may not be taken when an appeal is filed. |
| **Process 20.2**: Respond to PEAD Closing Memo | 01/19/05 | **Added** new steps on making any necessary changes to BDLs of parties who did not appeal and notifying them via ALGS. |
| **Process 20.2:** Respond to Appeal Closing Memo | 2/17/04 | **Added** language on sending new BDLs; that timely correspondence may appear in IPS days after the appeal period ends; and on notifying Recovery Coordinator as needed. |
| | 1/10/03 | **Added** processing guidelines on de minimis overpayments, when an appeal is filed (IOD PB 03-2) . |
| | 05/18/01 | **Modified** for minor editorial changes. |
| | 05/02/03 | **Revised** to reflect updated IOD/PEAD processing and otherwise clarify processing. |
| **Process 20.3:** Action Steps: Respond to Notice of Referral from PEAD | 02/18/05 | **Added** statements to be included in the emails to PEAD. |
| **Process 20.3**: Respond to Participant Inquiry Referred by PEAD | 01/19/05 | **Added** new steps on making any necessary changes to BDLs of parties who did not appeal and notifying them via ALGS. |
| **Process 20.3:** Respond to Notice of Referral from PEAD | 02/17/04 | **Added** instructions on referrals concerning Recovery BDLs, including hardship cases; and when appeals correspondence is referred outside of IOD. |
| | 05/02/03 | **New** subsection describes processing of correspondence referred from PEAD. |
| **Process 20.3:** Forms, Letters, Memos | 12/06/96 | **Added** access to two new WordPerfect memos - acknowlm.wpd and closingm.wpd (in I:\\wp\standard) |
| **Process 20.4:** RFA Guidelines and | 05/02/03 | New subsection lists: |

| | | |
|---|---|---|
| Appeal Criteria | | New subsection lists:<br>• Examples of RFA correspondence<br>• Appeal criteria |
| **Process 20.5:** Forms, Letters, Memos | 01/19/05 | **Added** new ALGS letters 615 QDRO-Stay of BDL (Appeals) and 616 QDRO – No Benefit Change (Appeals). |
| | 05/02/03 | **Added** references to ALGS Letters.<br>**Deleted** references/links to sample PEAD correspondence. |

## Processes 21 - 23

06/18/2004

| Case Closure Processes | Date | Change |
|---|---|---|
| **Processes 21 & 22** | 04/28/97 | **Replaced** Case Closure Processes (Process 21 and 22) with **New** Case Closure Processes 21, 22, 23 |
| **Processes 21 - 23** | 09/04/98 | **Revised** throughout, clarify procedures applicable to closing of FBA plans |
| **Process 21:** Close Plan | 02/17/04 | **Replaced** in its entirety to incorporate use of online Plan Closing Report and IPVFB Critical Pay Source Errors Report. |
| | 08/11/00 | **Revised Overview** to refer to new TP 33: Locate Customer Address |
| **Process 21:** Close Plan, Workflow | 02/11/00 | **Replaced** workflow for earlier revisions to Process 21. |
| **Process 21.1:** Prepare Plan History (Formerly: Close Plan) | 07/11/97 | **Added** clarifications about imaging additions to files which are being closed at an FBA |
| **Process 21.3:** Reconcile Participant Files/Records on IPS & PRISM (Formerly: Check and Inventory Participant Files) | 07/11/97 | **Revised** about PFI Report |
| **Process 21.6:** Check Completeness of Participant Files (IPS) | 06/29/01 | **Added** references to Process 19 for payment of interest situations. |
| **Process 21.10** Forms, Letters, Memos | 08/11/00 | **Deleted** Locator Project Facts (i\wp\standard\loc_fact.wpd) |
| Forms, Letters, Memos | 04/30/99 | **Revised** Plan Completion Memo (i:\wp\standard\plcompme.wpd) |
| | 02/23/99 | **Revised** Locator Project Facts - (i:\wp\standard\loc_fac.wpd) |
| | 09/04/98 | **Added** link to Locator Project Facts (i:\wp\standard\locproj.wpd) |
| | 09/04/98 | **Deleted** TSD/TPD Plan Completion Checklist (i:\wp\standard\plcmpckl.wpd) |
| | 05/01/98 | **Added** new (optional) TPD/FBA Case Team - Plan Completion Checklist (i:\wp\standard\tpd-tsd.wpd) |
| | 05/01/98 | **Added** new Plan Completion Memo (i:\wp\standard\plancompme.wpd) |
| | 06/06/97 | **Replaced** IPS Plan Re-Index Request with **new** IPS Plan and Participant File Correction Form (i:\wp\standard\ips_chg.wpd) |
| **Process 21.13:** Forms, Letters, Memos | 03/25/04 | **Revised to put on letterhead:** TPD/FBA Case Team - Plan Completion Checklist and Plan Completion Memo. |
| | 03/19/04 | **Replaced** TPD/FBA Case Team – Plan Completion Checklist |

| | | |
|---|---|---|
| | 02/17/04 | **Renumbered** and **Revised** to replace TPD/FBA Case Team - **Plan Completion Checklist** (M:\Helpfile\IOD Manual_std\tpdfbacl.doc) and **Plan Completion Memo** (M:\Helpfile\IOD Manual_std\plcomplme.doc) with current versions<br>**Added Quality Review Check Sheet** (M:\Helpfile\IOD Manual_std\qurecksh.doc) |
| **Process 22:** Review Closed Plan | 02/17/04 | **Revised** in its entirety to reflect new plan closing processes. |
| **Process 22:** Review Closed Plan, Workflow | 02/11/00 | **Replaced** workflow for earlier revisions to Process 22. |
| **Process 22.2:** Review Closed Plan | 06/29/01 | **Added** references to Process 19 for payment of interest situations. |
| **Process 22.4:** Forms, Letters, Memos | 02/17/04 | **Added** Quality Review Checksheet (M:\Helpfile\IOD Manual\std\qurecksh.doc). |
| | 09/04/98 | **Added** Closed Plan Review Memo (i:\wp\standard\clplrmem.wpd) |
| **Process 23:** Transfer Plan to Ongoing Administrator | 02/17/04 | **Updated** link to renumbered Process 21.12 |
| **Process 23.1:** Transfer Administrative Responsibility for Plan | 07/11/97 | **Added** note clarifying that imaged participant files may be more complete than paper participant files |
| **Process 24:** Perform Ongoing Administration | 02/11/00 | **Deleted** section. |

| **TP 24.1:** Determine Net Worth | 9/22/99 | **Clarified** procedure with PBGC Operating Policy 7.2-1, and guidance reference |
| **TP 24.7:** Determine Final Value | 9/22/99 | **Added** guidance reference to PBGC Operating Policy 7.2-1 |
| **TP 25:** Determine & Announce the SPARR | 12/07/01 | **Updated** involuntary termination reference(s) to PBGC-initiated. |
| | 3/05/99 | **Revised** time period for calculation of the SPARR |
| | 6/06/97 | **New** Technical Procedure |
| **TP 25.1:** Determine the SPARR | 8/23/02 | **Modified** to reflect that the SPARR Coordinator is in MCU (from PPD) and other edits. |
| | 10/30/98 | **Clarified** Important Concepts section. |
| | 09/04/98 | **Revised** for changes in the operating policy 8.2.1 |

| | | |
|---|---|---|
| **TP 25.2:** Announce the SPARR | 08/23/02 | **Modified** to reflect that the SPARR Coordinator is in MCU (from PPD) and other edits. |
| **TP 25.3:** Forms Letters Memos | 08/15/02 | **Modified** SPARR Notification Memo (I:\wp\standard\sparrnot.wpd) |
| | 08/09/97 | **Revised** SPARR Notification Memo (i:\wp\standard\sparrnot.wpd) |
| **TP 26:** Request SSA Data | 08/31/01 | **Updated** to reference OPM 8.5-1 Signature by Mark. |
| | 09/26/00 | **Replaced and renamed** entire technical procedure. Revised instructions include:<br>• SSA data requests w/o participant signature<br>• Safeguarding of certain SSA Data<br>• New SSA Safeguard Room<br>• PBGC's access to SSA Online (TSD only)<br>• Target response dates |
| **TP 26:** Request Earnings Data from SSA | 04/07/99 | **New** technical procedure describing how to provide and process requests to SSA for earnings and employment history |
| **TP 26.1** Initiate Request for SSA Data | 08/31/01 | **Added** references to OPM 8.5-1 Signature by Mark and Appendix J. |
| | 09/04/98 | **Deleted** this procedure. (Has been incorporated into revised Case Closure Processes.) This TP is reserved for future use. |
| | 07/11/97 | **Deleted** print options instructions throughout. **Added** detail about PFI report. |
| | 04/28/97 | **New** Technical Procedure describing how to run and use the plan closing reports referenced in Case Closure Processes |
| **TP 27:** Personal Interest Conflict Systems (PICS) | 04/05/02 | **Modified** overview to specify that PICS applies to additional contract staff:<br>• in-house benefit administrators,<br>• auditors,<br>• actuaries, and<br>• PRISM systems support staff. |
| | 06/09/00 | **Modified** references in Overview to reflect transfer of operation in TSB from PSB to BPAB. |
| | 09/04/98 | **Added** new technical procedure |
| | 01/11/99 | **Corrected** for typographical errors |
| **TP 27.2**: Report Federal Employee PICS Cross Match Results and Secure | 08/23/02 | **Modified** to specify that PICS Coordinator requests papers files w/in 3 |

| | | |
|---|---|---|
| Records | | business days. |
| | 04/05/02 | **Modified** to specify that PICS Coordinator can close IPS records and that the PICS findings are issued directly by Coordinator. |
| | 06/09/00 | **Modified** to reflect transfer of operation in TSB from PSB to BPAB. |
| **TP 27.3:** Prepare Contract Employee PICS Memo (formerly "Prepare FBA.....") | 04/05/02 | **Renamed** subsection.<br>**Modified** to specify that PICS applies to various contract staff.<br>**Added**:<br>• Contract Principals notify the PICS Coordinator if a PICS contract employee terminates.<br>• PICS Coordinator can close IPS records.<br>• PICS findings are issued directly by Coordinator. |
| | 06/09/00 | **Modified** to reflect transfer of operation in TSB from PSB to BPAB. |
| | 04/05/02 | **Modified** to reflect that PICS Coordinator can close IPS records. |
| | 06/09/00 | **Modified** to reflect transfer of operation in TSB from PSB to BPAB. |
| **TP 28:** Authorize Financial & Non-Financial Transactions through PRISM | 08/31/01 | **Added** details that provide relevant links from the authorizable transactions to the underlying process or tech procedure and specifics of processing name and SSN changes to PRISM. |
| **TP 28:** Authorize Financial & Non Financial Transactions through PRISM | 08/25/00 | **Added** information about requesting temporary authorizers to Overview. |
| **TP 28:** Authorize Financial & Non-Financial Transactions through PRISM<br>**Overview:** Authorization Levels Table | 03/28/03 | **Modified** dollar amounts for annuity authorization levels. |
| | 08/09/02 | **Added** FBA Team Leader to Authorization Level 1 |
| | 05/12/00 | **Modified** the Level 2 authorizer description to add one FBA backup manager. |
| **TP 28:** Authorize Financial & Non-Financial Transactions through PRISM | 09/01/99 | **Revised** authorization levels for annuity payments |
| | 04/07/99 | **Added** additional detail in Overview: Authorizable Electronic Transactions |
| | 03/05/99 | **New** Technical Procedure. Provides guidance on authorization of transactions through PRISM, including details of authorization levels within IOD. Includes new document, Level 5 Authorization Memo |

| | | |
|---|---|---|
| | | (i:\wp\standard\Lev5auth.wpd) |
| **TP 28.1** Initiate Authorizable Electronic Transactions | 09/13/02 | **Revised** outline to add intranet link for Check Schedule Key Dates |
| **TP 28.2** Authorize or Reject Electronic Transaction | 09/13/02 | **Revised** outline to add intranet link for Check Schedule Key Dates |
| | 08/25/00 | **Edited** text to reflect addition of new subsection. |
| **TP 28.3** Request Temporary PRISM Authorizer | 02/17/04 | **Revised** to specify that temporary authorizers must meet established authorizer criteria. |
| | 09/13/02 | **Revised** outline to add intranet link for Check Schedule Key Dates |
| | 08/25/00 | **Added** new subsection. |
| **TP 28.4** Request Targeted PRISM Authorizer (Inclusions) | 09/13/02 | **Revised** outline to add intranet link for Check Schedule Key Dates |
| | 03/08/02 | **Added** new subsection. |
| **TP 28.5:** Confirm PRISM Authorizers/Levels | 03/19/04 | **New** subsection. Provides quarterly process of verifying PRISM Authorizers meet the established criteria. |
| **TP 29:** Request Off-Cycle Payment | 11/07/00 | **Modified** the overview to emphasize the importance of ensuring the customer record has been established in PRISM before requesting an off-cycle payment. |
| | 11/16/99 | **Revised** to clarify off-cycles are requested to ensure commitment to customer. |
| | 09/01/99 | **New** Technical Procedure provides guidance on requests for off-cycle payments. Includes new Request Off-Cycle Payment Memo (i:\wp\standard\offcy.wpd) |
| **TP 29.1** Determine Need for Off-Cycle Payment Request | 02/17/04 | **Revised** to indicate that BPAB compares data entered into NBX with approved data entry forms<br>**Modified** instructions for routing of manual data entry forms<br>**Modified** to:<br>• ensure the customer record has been established in PRISM, **and** future annuity payments authorized **before** requesting an off-cycle payment,<br>• clarify preparation of the Form 487 only for the missed annuity payment(s),<br>• more clearly describe required supporting documentation to off-cycle request. |

| | | |
|---|---|---|
| | 11/16/99 | **Revised** to clarify off-cycles are requested to ensure commitment to customer. |
| **TP 29.2** Review and Approve/Disapprove Request For Off-Cycle Payment | 02/17/04 | **Modified** instructions for routing of Off-Cycle Payment Request Memoranda and manual data entry forms<br>**Added** instructions for BPAB on handling of manual data entry forms |
| | 05/18/01 | **Added** details about benefit confirmation process. |
| | 11/07/00 | **Modified** to ensure the customer record has been established in PRISM before approving an off-cycle payment. |
| **TP 29.2:** Review Approve/Disapprove Request for Off-Cycle Payment | 11/16/99 | **Revised** to clarify off-cycles are requested to ensure commitment to customer. |
| **TP 29.3:** Track Off-Cycle Payments and Requests | 02/18/05 | **Revised** text to clarify that off-cycles are not included in the Balancer reconciliation and to update TSD to RSD. |
| **TP 29.3:** Track Off-Cycle Payments and Requests | 11/07/00 | **Revised** throughout to include TSDs use of new application- PRISM Off-Cycle Check |
| **TP 29.4** Forms, Letters, Memos | 03/18/04 | **Revised** Off-Cycle Payment Request Memo |
| | 02/17/04 | **Modified** names of manual data entry forms and **corrected** file path |
| | 11/07/00 | **Added** electronic versions of 3 data entry forms that may be printed and viewed:<br>• PBGC Monthly Benefit Adds and Updates, PBGC Form 487,<br>• PLUS Lump-Sums, PBGC Form 491, and<br>• Special Check Form, PBGC Form 490. |
| Forms, Letters, Memos | 01/19/00 | **Revised** Off-Cycle Payment Request (i:\wp\standard\offcyreq.wpd). |
| Forms, Letters, Memos | 11/05/99 | **Revised** Off-Cycle Payment Request Memo (i:\wp\standard\offcyreq.wpd) |
| **TP 30:** Reconcile Funding | 06/18/04 | **Revised** to include the reconciliation of Non-Benefit Payments funding requests. |
| | 08/23/02 | **Added** a deadline for completion of monthly reconciliation. |
| | 02/08/02 | **Updated** throughout to reflect "as needed" funding and reconciliation. |
| | 11/16/99 | **Clarified** wire transfer request name in overview. |

| | | |
|---|---|---|
| | 09/30/99 | **New** Technical Procedures describes reconciliation of funding requested by SSB with requested payments. Includes 2 new documents: IOD Wire Transfer Request - SSB Benefit Funding Memo (i:\wp\standard\reqfund.wpd), and TSD Funding Reconciliation Memo (i:\wp\standard\fundrec.wpd) |
| **TP 30.1** Reconcile Funding to SSC with Actual Payments | 02/17/04 | **Modified** to clarify routing of TSD Funding Reconciliation Memo |
| | 11/16/99 | **Clarified** location of Funding Reconciliation Administrator. |
| **TP 30.2** Forms, Letters, Memos | 01/23/04 | **Revised** TSD Funding Reconciliation Memo (M:\Helpfile\IODManual_std\fundrec.wpd) |
| | 11/05/99 | **Revised** IOD Wire Transfer Request - SSB Benefit Funding Memo (i:\wp\standard\reqfund.wpd) **Revised** TSD Funding Reconciliation Memo (i:\wp\standard\fundrec.wpd) |

## Appendices and Glossary

04/15/2005

| Appendices & Glossary | Date | Change |
|---|---|---|
| **Appendices** | | |
| **Appendix B: Preferred Source Documents for Participant Data Elements** | 04/05/02 | **Revised** in "Active Participants", "Retirees", and "Terminated Vested Participants" to clarify when certain benefit documents should be collected versus sampled. |
| | 09/26/00 | **Clarified** name of select data elements |
| | 08/11/00 | **Replaced** references to obsolete Locator Project with references to new TP 33: Locate Customer Address. |
| | 09/22/99 | **Revised** to refer to new participant forms. Revised proof document requirements. (streamlining) |
| | 10/30/98 | **Clarified** to provide that PBGC no longer requires original source documents, copies are acceptable. (streamlining project) |
| | 11/01/96 | **Clarified** the description of "terminated non-vested participants" |
| | 09/13/96 | **Reordered** the list of sources to have W2s as the primary source for obtaining SSNs |
| **Appendix C: Bankruptcy Overview** | 12/07/01 | **Updated** involuntary termination reference(s) to PBGC-initiated. |
| **Appendix D: Maximum Guaranteeable Benefits for DOPT Years** | 02/18/05 | **Added** maximum guaranteed benefit for DOPT year 2005. |
| **Appendix D: Maximum Guaranteeable Benefits for DOPT Years** | 2/17/04 | **Added** maximum guaranteed benefit for DOPT years 2002, 2003, 2004 |
| | 02/16/01 | **Added** maximum guaranteed benefit for DOPT year 2001. |
| | 10/20/00 | **Modified** title<br>**Added** details to NOTE about adjusting the maximum guaranteeable benefit upward for late retirements. |
| | 12/03/99 | **Added** maximum guaranteed benefit for DOPT year 00. |
| | 11/25/98 | **Added** maximum guaranteed benefit for DOPT year 1999 |
| | 02/13/98 | **Added** maximum guaranteed benefit for DOPT year 1998 |
| | 02/13/98 | **Added** maximum guaranteed benefit for DOPT year 1998 |
| | 12/06/96 | **Added** maximum guaranteed benefit |

| | | |
|---|---|---|
| | | for DOPT year 1997 |
| **Appendix E: IOD Time Reporting (BMPRS)** | 08/25/00 | **Added** minor updates: new BMPRS codes etc. |
| **Appendix E - Referenced Directive on Safeguarding IRS Documents** | 10/11/96 | **Deleted** text of existing PBGC directive (available elsewhere). This appendix is reserved for future use. |
| | 07/11/97 | **Clarified** time reporting for holidays and special project names |
| | 06/06/97 | **Updated** IOD Time Reporting (BMPRS) |
| | 05/02/97 | **Added** this appendix describing the Budget, Management, Planning and Reporting System |
| **Appendix F: Alternate Sources for Plan Information** | 08/11/00 | **Replaced** references to obsolete Locator Project with references to new TP 33.3: Locate Address Resource Guidelines |
| **Appendix G: Acceptable Proof of Age** | 10/18/02 | **Added** details about acceptable alternate proofs of age. |
| | 08/09/02 | **Corrected** typos. |
| | 07/23/02 | **Modified** to clarify that proofs of age must include the customer's date of birth. |
| | 05/18/01 | **Revised** to add more proofs of age to the the list of single documents permissable. Also re-written into Q & A format. |
| | 09/22/99 | **Revised** to refer to new participant forms. Revised proof document requirements. (streamlining) |
| | 10/30/98 | **Clarified** to provide that PBGC no longer requires original source documents, copies are acceptable. (streamlining project) |
| **Appendix H: Historical SPARR Information** | 02/18/05 | **Updated** to include FY2003 SPARR. |
| **Appendix H: Historical SPARR Information** | 2/17/04 | **Updated** to include FY2002 SPARR |
| | 11/08/02 | **Updated** to include FY2001 SPARR |
| | 3/08/02 | **Updated** to include FY2000 SPARR |
| | 02/16/01 | **Updated** to include FY99 SPARR |
| | 1/14/00 | **Updated** to include FY98 SPARR |
| | 8/10/99 | **Updated** to include FY97 SPARR |
| | 10/30/98 | **Updated** to include FY96 SPARR |

| | | |
|---|---|---|
| | 10/31/97 | **Updated** to include FY 1994 and FY 1995 SPARRs |
| | 8/15/97 | **Updated** to include FY93 SPARR |
| | 6/06/97 | **New** Appendix H: Historical SPARR Information |
| **Appendix I: Maintaining Participant Data Records** | 6/29/01 | **Modified** to clarify IPS is official location of participant records. |
| | 2/11/00 | **Deleted** reference to Process 24. |
| | 11/25/98 | **Added** new Appendix I: Maintaining Participant Data Records, includes detailed list of data elements loaded to PRISM through ADT |
| **Appendix J: Participant Forms Summary** | 9/26/00 | **Modified** to reflect new SSA request from (Form SSA-581) |
| **Appendix J: Participant Forms Information** | 2/07/03 | **Modified** to include complete list of Participant Forms with brief description of their use. |
| | 10/18/02 | **Deleted** reference to obsolete Form 704: Annuity Election Form |
| | 7/23/02 | **Added** information that DMC stocks hard copies. |
| | 8/31/01 | **Added** two new Q & A's about acceptable signatures on participant documents, including the use of Power of Attorney's and signatures by mark. |
| | 1/14/00 | **New** Appendix provides information about all participant forms with usage comments. |
| **Appendix K: IOD's Records Management** | 8/23/02 | **New** Appendix adds detailed information about Records Management, including:<br>• Description of IOD Records;<br>• Records Creation and Filing;<br>• Records Disposition<br>• Storing and Retrieving Records;<br>• Records Security and Privacy; **and**<br>• Records Management Guidance. |
| **Appendix L: Field Benefit Administrators** | 08/23/02 | **New** Appendix adds FBA information in Q & A format |
| **Appendix M: IRS Disclosure Offices** | 11/08/02 | **New** Appendix provides IRS addresses to use to request tax return information for tax exempt and non-exempt |

| | | |

**Overview of Process Groups**

## Pre-Termination Processes

**05/31/96**

Pre-termination processes describe IOD's investigation of pension plans covered by Title IV of ERISA with the goal of making a recommendation as to whether or not PBGC should terminate a pension plan and become trustee of the plan. PPD investigates plans which are identified as a potential risk to PBGC. This identification normally would come through a notice of a Reportable Event defined in ERISA or an application for Distress Termination. PPD investigative activities include obtaining information on identified pension plans, the status of their funding, the sponsoring employer, and other members of any controlled group. Pre-termination processes include monitoring of pension plans that may pose a potential long-term risk to PBGC. Once a plan has been terminated and prepared for trusteeship, PPD initiates a shift of responsibility to the appropriate TPD. PPD performs other tasks as well, some of which can occur after termination and trusteeship of a plan, such as valuing hard-to-value assets and other financial analysis services. In addition, some TPD activities, such as assuming payment of benefits responsibility, can occur before termination.

## Pre-Termination Processes include:

01 Determine Type of Case, Assign, & Begin Collecting Initial Case Information

02 Gather Plan & Sponsor Information

03 Determine Financial Condition of Plan & Analyze Controlled Group

04 Make Recommendation

05 Route Recommended Termination

06 Monitor Plan

07 Initiate PPD/TPD Coordination

## PR 01. Determine Type of Case, Assign, & Begin Collecting Initial Case Information

1.4 Determine Status of Pension-Related Records
1.5 Determine Probability of Trusteeship
1.6 Resolve Participants Out of Pay Status
1.7 Request Attorney
Forms, Letters, Memos, etc.

**Determine Type of Case, Assign, & Begin Collecting Initial Case Information**

## 1. Overview

**02/07/97**

The Pre-Termination Processing Division's (PPD) goal in processing Reportable Events and Distress Terminations is to develop a complete administrative record to support the recommendation to close a case or terminate a pension plan and seek PBGC's appointment as trustee, if applicable.

Once PPD opens a case as a reportable event or distress termination, the case is assigned to an auditor or financial analyst who takes ownership of the case until a recommendation can be made to close, monitor, or terminate and trustee the plan. Ownership responsibilities include, for cases where termination is likely, requesting through CAS or a memo to the office of the Deputy Director of IOD that a TPD be assigned, and requesting that OGC assign an attorney. The request for TPD involvement may happen at any point during PPD's processing of the case. The specific TPD is selected on a rotating basis, with consideration given to current workload. Reportable events can enter PPD from filings by the plan administrator, OGC, directly to PPD as a participant phone call, or from other sources such as Dun and Bradstreet bankruptcy matches against the Premium Administration System (PAS).

While the process at the highest level is the same for Reportable Events and Distress Terminations, at the more detailed level, there are different processing steps required. Reportable Events can even be divided into statutory and non-statutory. Non-statutory would be those situations which need to be investigated, but do not fall under the Reportable Events listed in ERISA and at 29 CFR 4043.

Collecting of initial data is limited, in PPD, to obtaining data necessary to assess coverage, size of plan, complexity, and important issues, including the identification of "probable plans" for financial statement reporting. However, collection and analysis of information to make a recommendation of the disposition of a plan is detailed and complex. It should be noted that information collected in the pre-termination processing is financial in nature and is not necessarily what the TPDs will use in the participant services function of IOD. The TPD performs data collecting and analysis later for the annuity (participant benefits) function when a plan is terminated and trusteed. The value of collecting information early is that it saves time later on. The earlier that PBGC requests information, the more likely IOD is to get it, especially in liquidation cases. Documents collected must be kept secured in order to protect the plan sponsor, because of Privacy Act considerations, IRS document safeguarding requirements, and as a matter of customer service. Keep in mind that much of the information collected may be sensitive.

Document all contacts, attempted contacts, and requests in the case activity log. This log is important because it provides a history of the case, supports the PBGC's administrative record, and justifies making a request for an administrative subpoena, if necessary. Also, if PBGC ever has to go to court over a case, the activity log may be subject to disclosure.

ERISA 4003(a) states: *"The corporation may make such investigations as it deems necessary to enforce any provision of this title or any rule or regulation thereunder, and may require or permit any person to file with it a statement in writing. . . as to all of the facts and circumstances concerning the matter to be investigated."* Prior to trusteeship PBGC has the authority to make copies of documents, but normally does not take original documents. By taking original employee or personnel records prior to trusteeship, PBGC could be drawn into future lawsuits related to employee records, even if the records do not involve a pension plan. With plan records, PBGC can take originals if the plan administrator provides them, or if the records are in danger of being lost. Examples of records being potentially lost would include foreclosure on the building with the records being thrown away, an auction of the office furniture and equipment (including all file cabinets with the files), or word from someone that the files are being destroyed. Original plan records will be obtained after DOPT, if available.

Coordinate data collecting efforts with OGC, FOD, and the TPD to avoid multiple requests for the

same information.

## 1.01 Definitions for Process 1

Distress Filing

Statutory Reportable Event

Non-Statutory Reportable Events

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.02 Definitions - Distress Filing

**09/28/2001**

**A distress filing is a voluntary application made by a plan administrator on behalf of the plan's sponsor to terminate a pension plan.** Sometimes PBGC will recommend that a plan administrator submit a distress filing rather than process a reportable event as a PBGC-initiated termination. PPD processes distress filings and approves or denies the application. Approvals are final agency determinations, but denials are subject to reconsideration rights. As part of a distress filing, the plan administrator must:

- Issue Notices of Intent to Terminate (NOIT) to all interested parties at least 60 days in advance of the proposed DOPT,
- File with PBGC a complete Distress Termination Application, including Enrolled Actuary (EA) Certification (note that on a case-by case basis, the PBGC may forego the submission of certain information required to be submitted to the PBGC under the distress termination rules, including the EA's certification), and
- The plan sponsor and, if applicable, each controlled group member must meet at least one of the **distress criteria, or "tests":**

  **1** Liquidation in bankruptcy or insolvency proceedings

  **2** Reorganization in bankruptcy or insolvency proceedings, with the approval of the court and a specific finding by the court that unless the plan is terminated the debtor will be unable to pay all its debts under the plan or reorganization and will be unable to continue in business outside reorganization.

  **3** Unable to pay debts and continue in business unless the plan is terminated.

  **4** unreasonably burdensome pension costs caused solely by a decline in work force.

Per ERISA and PBGC policy, distress terminations will only be pursued in certain situations, for example, when the plan sponsor is ongoing, or the plan is sufficient for guaranteed benefits. If PBGC-initiated (mandatory) termination is required (plan assets are not available to provide benefits currently due) or circumstances dictate PBGC-initiated (discretionary) termination, do not proceed with the distress filing. Other circumstances to consider would include:

- **Potential loss to PBGC.** During the time required to obtain a distress termination, it is reasonable to expect, based on the facts, that PBGC's potential liability with respect to the plan will increase unreasonably. This increase may result from shutdown benefits, change in the identity of the controlled group, phase-in, payments in excess of guaranteed benefits, etc.
- **Imminent date.** Plan termination and PBGC trusteeship must be effected and expedited to collect money due to the plan, collect PBGC employer liability, or avert abandonment of the plan or possible unfavorable court action.

Review and become familiar with section 4041(c) of ERISA, 29 CFR 4041, Subpart C, and the Distress Termination Filing Instructions booklet, available in PPD or from the Government Printing Office.

## 1.03 Definitions - Statutory Reportable Event 09/28/2001

Reportable events specified in ERISA 4043 and PBGC regulations at 29 CFR 4043: Reportable Events and certain other notification requirements, are "statutory reportable events". These are events which are spelled out either in the statute or regulations. The reporting requirements to PBGC by the plan administrators and/or contributing sponsors are also detailed.

Reportable event reporting requirements are intended to protect pension plan participants and the PBGC. Section 4043 of ERISA was most recently expanded by the Retirement Protection Act of 1994 (RPA). In addition to adding several new reportable events to Section 4043, this Act expanded reporting requirements to apply to the contributing sponsor as well as the plan administrator, and also provided for **advance notice** of certain reportable events to PBGC. Other reportable events require **post-event notice** to PBGC.

Processing of reportable events consists largely of conducting investigations necessary to identify any potential risk to the PBGC and participants. The exact nature and scope of the investigation depends on the type of reportable events; Chapter 7 bankruptcies (liquidations) are handled differently from Chapter 11 bankruptcies (reorganizations), and withdrawals from multiple employer plans are also handled differently. The differences in processing reflect the difference in types of information required, responses available to the PBGC, and case-specific factors. The flow of pre-trusteeship processing is the same regardless of the type of reportable event. Based on the level of risk the investigation identifies, if any, PBGC may close the case, advise the plan administrator to submit a distress or standard termination filing, select the employer for monitoring, or proceed with a mandatory or discretionary PBGC-initiated termination of the plan.

PBGC has the authority to modify and waive reporting requirements for certain events in 29 CFR 4043. Certain events have had their notification requirements waived completely or waived under specified circumstances as detailed in the regulations.

Statutory Reportable Events include the following:

**Advance Notice Events**

- Change in contributing sponsor or controlled group
  (notice waived for specified circumstances [29 CFR 4043.62(b)])
- Liquidation
  (notice waived for specified circumstance [29 CFR 4043.63(b)])
- Extraordinary dividend or stock redemption
  (notice waived for specified circumstance [29 CFR 4043.64(b)])
- Transfer of benefit liabilities
  (notice waived for specified circumstances [29 CFR 4043.65(b)])
- Application for minimum funding waiver
  (notice extended until 10 days after the event has occurred [29 CFR 4043.66(b)])
- Loan Default
  (notice waived for specified circumstances [29 CFR 4043.67(b)])
- Bankruptcy or similar settlement
  (notice extended until 10 days after the event has occurred [29 CFR 4043.68(b)])

**Post Event Notices**

- Tax disqualification and Title I noncompliance
  (notice waived)

- Amendment decreasing benefits payable
  (notice waived)
- Active participant reduction
  (notice waived for specified circumstances [29 CFR 4043.23(c)])
- Termination or partial termination
  (notice waived)
- Failure to make required minimum funding payment
  (notice waived for specified circumstances [29 CFR 4043.25(c)])
- Inability to pay benefits when due
  (notice waived for specified circumstances [29 CFR 4043.26(c)])
- Distribution to a substantial owner
  (notice waived for specified circumstances [29 CFR 4043.27(c)])
- Plan merger, consolidation or transfer
  (notice waived for specified circumstances [29 CFR 4043.28(b)])
- Change in contributing sponsor or controlled group
  (notice waived for specified circumstances [29 CFR 4043.29(c)])
- Liquidation
  (notice waived for specified circumstances [29 CFR 4043.30(c)])
- Extraordinary dividend or stock redemption
  (notice waived for specified circumstances [29 CFR 4043.31(c)])

- Bankruptcy or similar settlement
  (notice waived for specified circumstances [29 CFR 4043.35(c)])

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.04 Definitions - Non-Statutory Reportable Events 05/31/96

When PBGC becomes aware of what appears to be a reportable event or events that suggest one may have occurred, that notice is a *non-statutory reportable event* because it is not defined in the law or regulations. Calls or letters from participants, news items in the media, and informal notices from other sources fall in this category. The first action when a non-statutory reportable event has been received is to determine whether a reportable event for that situation has actually been received, or should be submitted, and to follow up accordingly. Any event that merits investigation due to the possibility of risk to the PBGC and participants, but is not defined in the law or regulations, is a non-statutory reportable event.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.1 Determine Type of Filing and Assign Case

**06/29/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify the case as either a distress termination or a reportable event (standard terminations go to STCD). Allocate PPD human resources to the case based on case priority, complexity, PPD workload, and individual expertise. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Documents or event that triggered PPD investigation. These could be a phone call, letter, bankruptcy notification, Department of Labor (DOL) notification, Reportable Event Filing, Distress Filing, NOIT, etc. |
| **Process Output and Recipient** | Identified type of case for assignment and data collecting according to type.<br>Assignment of case to financial analyst or auditor. |
| **Control Issues** | Abide by all Confidentiality Agreements between PBGC and plan sponsors, employers, etc. |
| **Important Concepts** | Note that there are separate procedures for distress filings, and reportable events.<br>Modify the Reportable Events Information List to fit each unique case, and to ensure that only the information needed to process the case is requested.<br>In rare cases, a plan will be sufficient for guaranteed benefits, but not for benefit liabilities. In those cases, PBGC will not terminate the plan, except in a distress filing.<br>Assign appropriate personnel. |
| **Guidance** | ERISA 4041-4043 and 4048<br>29 CFR 4003, 4043, and 4041<br>RPA Section 771<br>PBGC Technical Updates 95-1 & 95-3<br>PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2)<br>Memo "Exempting Cases from Review by the Trusteeship Working Group and Establishing Dates of Termination of April 15, 1996." |

1.1 Action Steps: A. Distress Filings (Determine Type of Filing and Assign Case)

1.1 Action Steps: B. Statutory Reportable Events (Determine Type of Filing and Assign Case)

1.1 Action Steps: C. Non-Statutory Reportable Events (Determine Type of Filing and Assign Case)

1.1 Action Steps: D. Assign Case (Determine Type of Filing and Assign Case)

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.1 Action Steps: A. Distress Filings 09/28/2001

## Determine Type of Filing and Assign Case

1 **Review the submitted documents.** Distress filers must submit using Form 600, the Distress Termination Notice of Intent to Terminate (NOIT), Enrolled Actuary Certification ( Schedule EA-D), and Form 601, the Distress Termination Application, which contains information demonstrating satisfaction of the distress criteria and providing various plan, sponsor, and participant data.

2 **Ensure that the NOIT issued to participants and other interested parties meets the three conditions required to be valid:** (1) it must state that a termination is intended and give the proposed termination date; (2) it must be issued to all affected parties (including PBGC) at least 60 days prior to the proposed termination date; and (3) it must be hand-delivered or mailed to each affected party. Obtain some documentation that delivery actually occurred.

- **If the NOIT (Form 600) is valid -**
  Within 15 days of receipt of the NOIT send the plan administrator or other filer the *Valid NOIT (Form 600) Letter (VAL600.doc)*. See Process 2.1 Send Reportable Event/Distress Filing Letters. If the filer is not the plan administrator/ plan sponsor, ensure that the letter and all enclosures are copied to the plan administrator/ plan sponsor.

- **If the NOIT (Form 600) is not valid (noncompliant) -**
  Within 15 days of receipt of the NOIT, send the plan administrator or other filer the *Invalid NOIT (Form 600) Letter (INVAL600.doc)*, informing them that the NOIT was noncompliant. See Process 2.1 Send Reportable Event/Distress Filing Letters. If the filer is not the plan administrator/ plan sponsor, ensure that the letter and all enclosures are copied to the plan administrator/ plan sponsor. This letter is an initial determination from PBGC which is subject to reconsideration under PBGC's regulations: Administrative Review of Agency Decisions (29 CFR 4003). Ensure the *Administrative Review Procedures (Noncompliant) (ADREVNON.doc)* attachment is included. This describes the parties' rights to request reconsideration of this initial determination.

  If a request for reconsideration is filed in response to this initial determination, consult with the PPD Supervisor.

  If no response is received, follow up by telephone, and then confirm in writing that no response was received by PBGC and that a final determination of noncompliance has been made. Make no further attempts to pursue a distress termination and assess whether to pursue a PBGC-initiated termination.

3 **Contact the plan administrator by telephone within ten (10) days of receiving the NOIT.** See Process 1.3: Perform Preliminary Analysis and Contact Plan Administrator, step 3, for a list of topics to discuss.

- The validity of the NOIT, including whether all affected parties have been notified as required. If affected parties have been notified, record the date and method of delivery in the log.
- Whether any participants are out of pay status.
- Estimated levels of plan liabilities (including guaranteed benefits and benefit liabilities).
- Estimated levels of plan assets. The plan administrator cannot distribute plan assets or

take other actions in relation to the proposed termination. Note in the file the names, addresses, telephone numbers, and account numbers of entities holding plan assets.

- The reduction of monthly benefits being paid to retirees. The plan administrator is required to reduce benefits to the greater of what can be supported by the plan's funding level or to the PBGC guaranteed level (Title IV). See CFR 4022.21 for further information.
- That the plan administrator may not purchase any irrevocable commitments from an insurer to provide benefits.
- Status of the plan sponsorongoing, bankrupt, liquidating, not in bankruptcy, etc., note for the plan file and forward the information to OGC.
- Imminent bar dates (notify OGC of any established bar dates).
- Whether there is a controlled group and the status of each member.
- The distress test that each member of the controlled group will attempt to establish.

4 **Ensure that the Distress Termination Application (PBGC Form 601) is valid.** Determine if any immediate action should be taken by PBGC. Offer to provide assistance to the plan administrator and the enrolled actuary in adjusting benefits to the guaranteed levels and in completing the Form 601, if such assistance is deemed necessary and appropriate in the judgment of the PPD person processing the case.

- Form 601 should be complete and all information necessary to support the distress claim should be submitted with the form. The form must be certified by the plan administrator.
- Schedule EA-D must be included and show the degree of funding and be certified by the enrolled actuary. This can be waived with the concurrence of the PPD Management Team.
- Participant data schedules may be submitted after PBGC issues a determination letter regarding the distress criteria, and need not be submitted if the enrolled actuary certifies that the plan is sufficient for at least all guaranteed benefits.
- If the Form 600 (NOIT) was filed, but the Form 601 has not been submitted, contact the plan administrator to find out the status of the application. Follow-up as necessary. If the Form 601 is not filed within 120 days, reevaluate the plan using PBGC-initiated termination criteria. Discuss with a supervisor.
- Notify the plan administrator of the acceptability of the Distress Termination Application:
  - If it is valid, send the plan administrator an acknowledgment letter using the *Valid 601 Letter (VAL601.doc)* within fifteen (15) days. See Process 2.1 Send Reportable Event/Distress Filing Letters.
  - If it is *not* valid (noncompliant), write a letter to the plan administrator within fifteen (15) days of receiving the application. Describe the reason(s) the application is not complete or acceptable using the *Invalid 601 Letter (INVAL601.doc)*. Ensure that the filer receives the attachment ( *Administrative Review Procedures (Noncompliant) (ADREVNON.doc)*) which describes the filer's right to request reconsideration of PBGC's initial determination. Obtain supervisor concurrence on the letter and send it to the plan administrator. Take no further action unless evidence suggests there may be a risk to PBGC and a PBGC-initiated termination may be necessary. Refer to the guidelines in Section 4048.

5 **Determine the Date of Termination (4048 termination date).** This can be the date proposed by the plan administrator and agreed to by the PBGC; the date proposed by the PBGC and agreed to by the plan administrator; or the date set by the court. For distress

filings where the date of the NOIT is determined by PPD not to be in the best interest of the PBGC, set a new date and obtain concurrence from OGC. Review the guidelines in section 4048.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.1 Action Steps: B. Statutory Reportable Events 06/29/2001

## Determine Type of Filing and Assign Case

Reportable events are those defined under ERISA 4043 and CFR 4043. They are required to be reported by the plan administrator or plan sponsor.

1 **Based on the type of event, determine whether the organization was required to submit the reportable event notice.**

- If notice requirements for the event in question have been waived (see definition of reportable events and reporting criteria in ERISA 4043 and CFR 4043), review the file for potential problems. Verify that the plan is being properly administered and that there is no expected long-run loss to PBGC. Consult with supervisor to determine if case may be closed, see Process 4.2: Close Case.
- If there is an expected or probable long-term loss, do not close the case. If the reportable event came to PBGC's attention through a third party and no report from the plan administrator was received, contact the plan administrator and send him a *Reportable Event Requirement Letter (REREQINF.doc)*. Prepare and enclose a *Reportable Events Information List (RE-LIST.doc)* with the letter.
- Also, send the third party a *Third Party Reportable Event Acknowledgment Letter (3RDPTYRE.doc)* to advise them that PBGC has opened a case. Prepare and enclose a *Reportable Events Information List (RE-LIST.doc)*, requesting additional information from the third party if it appears they have relevant information needed to process the case. Review the information received with the reportable event and modify your request to third party so that you only request information needed to process the reportable event. See Process 2.1 Send Reportable Event/ Distress Filing Letters.

2 **Determine whether the filing of the notice was timely or not:**

- If a responsible person (any person with a duty to provide material information) provided PBGC with a timely Notice of a Reportable Event with the required documentation and other information as required by ERISA and PBGC regulations, make a comment in the case activity log to that effect. Send the plan administrator a *Reportable Events Acknowledgment Letter (REACKINF.doc)*. Prepare and enclose a *Reportable Events Information List (RE-LIST.doc)*, modified so that it only requests information needed to process the reportable event that has not already been provided. See Process 2.1 Send Reportable Event/ Distress Filing Letters.
- If a responsible person failed to file, within the 30-day time limit, a required Notice of a Reportable Event and/or the required documentation or any other information as required by ERISA and CFR 4043 evaluate whether or not to assess a penalty under ERISA 4071. This section says that PBGC may assess a penalty not to exceed $1,100 per day against anyone who fails to provide any notice or other material information within the time limits specified under ERISA or federal regulations. However, if PBGC does assess a penalty, it will follow the current notice or regulation. **Discuss with the PPD Manager prior to making a decision to implement.**

3 **Verify that all basic information relevant to the event is included.**

**For reportable events filed with PBGC through Form 10, or Form 10-Advance.**

- These optional forms list the information that must be provided to PBGC for each type of reportable event that may be filed using these forms. The required information for the

specified reportable events may be less than what would be required to be provided to PBGC under the regulation. (However, PBGC may request additional information upon receipt of these forms.) Be familiar with these forms and their filing requirements.

**For all other reportable events:**

- The name of the plan.
- Name, address, and telephone and fax numbers of the plan sponsor.
- Name, address, and telephone and fax numbers of the plan administrator (if a corporate body, the name of an individual that should be contacted).
- The nine-digit EIN and three-digit plan number (EIN/PN).
- A brief statement of the pertinent facts relating to the reportable event.
- A copy of the plan document, including all amendments.
- A copy of the most recent AVR relating to the plan and the latest Form 5500, including Schedule B as filed with the IRS/DOL.
- A statement explaining any material change in the assets or liabilities of the plan occurring after the date of the most recent actuarial valuation report.
- A copy of the most recent IRS determination letter (if any) relating to the plan.
- Any other information required by the type of event.

**For bankruptcies:**

- The Plan of Reorganization (POR) (for Chapter 11)
- The Statement of Affairs (SOA) and supporting schedules for all companies in bankruptcy.
- Copies of all claims filed on behalf of the plan.

**For all cases:**

- Copies of appraisals of major fixed assets and properties to be liquidated
- Other information, to include:
  - Location of employer and plan records.
  - Location of plan assets.
  - Whether other government agencies are involved.
  - Whether participants are out pay status. If so, whether there are assets available to pay benefits.
  - The bankruptcy filing number (bankruptcies only).
  - Date of last plan contribution and for what plan year.
  - Minimum funding requirements for current plan year and due date of next plan contribution.
  - Status of all related companies.
  - Whether or not claims have been filed by the plan trustee.
  - Whether phase-ins, shut-down benefits, creep provisions, or subsidized benefits are involved.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.1 Action Steps: C. Non-Statutory Reportable Events 06/29/2001

## Determine Type of Filing and Assign Case

1 Obtain contact information (name, address, phone number, etc.) from the source providing notice.

2 Determine if a reportable event is required to have been filed.

3 If yes, and the contact was the plan administrator, prepare and send a *Reportable Events Acknowledgment Letter (REACKINF.doc)* to the plan administrator along with a case-specific *Reportable Events Information List (RE-LIST.doc)*.

4 If the contact was a third party, inform the source of information (if a person) that a reportable event has occurred and that PBGC is taking appropriate actions by sending the contact a *Third Party Reportable Event Acknowledgment Letter (3RDPTYRE.doc)*, and include a case-specific *Reportable Events Information List (RE-LIST.doc)*. At the same time, send to the plan administrator a *Reportable Event Requirement Letter (REREQINF.doc)* which informs him of the requirement to file a reportable event notice with the PBGC, along with a case-specific *Reportable Events Information List (RE-LIST.doc)*.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.1 Action Steps: D. Assign Case

**06/29/2001**

## Determine Type of Filing and Assign Case

**PPD Manager/Supervisor**

Note that the actual assigning of a case to an auditor or financial analyst could happen at whatever point that the PPD Manager or the supervisor feels that it is appropriate. Most of the actions (telephone calls, letters, etc.) in the above steps will be done by the auditor or financial analyst and not by the supervisor.

1 If a case has not been opened, determine whether a reportable event case should be opened. Base decision on investigative information obtained from initial analysis. All cases should be logged for tracking purposes. Coordinate with STCD if a case should be opened.

2 Set case priority and assign the case to the financial analyst supervisor or auditor supervisor. Provide any special directions or requirements.

**Supervisor**

1 Assign the case to a financial analyst or auditor based on case criteria and work load.

2 Assume ownership of the case and assign all default and other appropriate PPD milestones in CAS.

3 Monitor actions of the person assigned the case.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.2 Begin Collecting Data

**10/11/96**

**Action Steps**

**Purpose**

To obtain the following basic, readily available information to identify PBGC's risk:

Dun & Bradstreet/CBD Infotek: Identify potential controlled group members, and get history on the company and information on financial status, including bankruptcy filings, liens, judgments, etc.

Actuarial Valuation Report (AVR), Form 5500 (Schedule B) from the plan administrator or DOL: Estimate plan asset and liability amounts.

Plan documents from the plan administrator or DOL: Determine plan coverage, etc.

Premium history and funding status (PAS): Determine unpaid premiums and accrued interest.

Tax Returns for plan sponsor (Form 1120, 1120S, 1065, etc., and supporting schedules) from IRS: Determine controlled group members. Request a Schedule K-1 from the sponsor in partnership cases, since it is not always required to be filed with the return.

Tax Returns for individuals (Form 1040 and supporting schedules) from IRS: Determine controlled group members.

Company, plan administrator and/or actuary: Plan information.

**Time Reporting (BMPRS)**

PPD Processing

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required Input and Source**

Phone call, letter, bankruptcy notification, DOL notification, Reportable Event, Distress Filing, etc.

Name and address of company, and EIN/PN, if available. These can be found in tax documents, the Distress Filing and other documents, or can be requested from the plan administrator.

**Output and Recipient**

Readily available information for use in the initial assessment of PBGC's risk and exposure.

**Control Issues**

Follow PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2). Comply with ERISA on acquiring documents. Place source documents in the plan file.

**Important Concepts**

Start with correct company name, address, and DUNS number (if available). User must have access privileges to use D&B On-line/CBD Infotek.

If D&B sends a fax copy of the report, file the hard copy report in the case file when it arrives.

Always request IRS tax returns as soon as possible, even if chances of obtaining copies from the filers are good. It is better to end up with two copies than none.

If any information indicates the need for additional information, make arrangements to obtain it.

| | |
|---|---|
| | The Case Activity Log should be used to keep a running history of the case. Enter all contacts and actions in the log. The Log may become proof of PBGC actions if the case is litigated or appealed. It also shows what has been done should the case have to be taken over by someone else.<br><br>In order to trustee a plan, PBGC previously had to do a full controlled group audit before recommending trusteeship. The Small Plan Simplification Procedures allow plans to be trusteed more quickly which, in turn, speeds up subsequent processing. |
| **Guidance** | Covered plans are defined under ERISA 4(a) and 4021.<br><br>ERISA 4043.<br><br>Small Plan Simplification Procedures for doing abbreviated controlled group analysis apply. See IOD Policy Bulletin 95-2.<br><br>IRC 6103(1)(2) authorizes PBGC to request tax returns from the IRS.<br><br>PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2). |
| **Procedure Owner** | PPD Manager, supervisors, auditor or financial analyst in charge of case |

## Click Here for More Information...

1.2 Action Steps: Begin Collecting Data

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.2 Action Steps: 11/08/2002
## Begin Collecting Data

Reportable events, especially bankruptcies, are frequently the first indication received by the PBGC that a plan sponsor may be experiencing difficulties. The end result of a reportable event may be a plan termination. When a sponsor experiences financial hardship and the plan is sufficiently funded for full benefit liabilities, the plan should be terminated under the standard termination procedures. If the plan is not funded for benefit liabilities, PBGC needs to determine the severity of the problem and take appropriate steps to protect the participants and the PBGC. These data collecting activities begin the decision process which may result in termination and trusteeship.

1 Set up the plan file (See Technical Procedure 16: Establish and Maintain Plan an Participant Files), activity log, and a reminder or "tickler" system for highlighting prompt and timely actions that need to be done on certain dates or within certain time frames.

2 Verify that the pension plan is covered by the PBGC insurance program (ERISA 4021). For reportable events that come directly from STCD/PTAB, the plan should have already been verified as a covered plan. For reportable events coming directly to PPD, make follow up calls to the reportable event initiator, the plan sponsor, and other parties (DOL, etc.), as necessary, in order to determine what kind of plan is involved. Non-covered plans are defined in ERISA 4021(b).

- If the plan may not be covered, request a determination from STCD/PTAB, Non-*Covered Plan Memo (NONCVRED.doc)*. Send the appropriate task referral ("Coverage Question") on CAS to PTAB. Include copies of any appropriate information or documents.
- If the plan is not covered, STCD/PTAB will send a letter via first class mail to the initiator of the reportable event (plan sponsor, plan administrator, or participant) explaining that the plan is not covered and send a copy to PPD. PTAB will enter the appropriate coverage determination on CAS, and return the task referral.
- Close the case and stop processing. See the CAS IOD/PPD User Manual, pages 7-11 for instructions on administratively closing a case. Document the reason for stopping case processing in the activity log and CAS, file a copy of the letter in the plan file (or attach it to the activity log), and notify the supervisor.
- If the plan is covered, STCD/PTAB will provide a written determination for the case file and will update the CAS task referral to indicate the plan is covered. The filer (plan sponsor or other) may not receive a written determination about coverage because the request for a determination was generated internally.

3 Access D&B through on-line service or by telephone (800) DNB-DIAL (362-3425) and identify information to be obtained from reports (use account number and password) for the companies needed. Always request reports for the plan sponsor and any identified controlled group members.

4 Contact DOL (phone call or in person), provide the EIN/ to the Disclosure Office and request 5500s for relevant years (normally the last three years or the most recent three years on file).

5 Determine the plan's payment and contribution (funding) history. Investigate through whatever sources available such as the IRS, plan administrator, or reportable event

initiator. The plan administrator is the best resource, if available and cooperative. Record the information in the activity log, CAS, and/or the plan file, as appropriate. Needed information includes:

- The date of the last contribution to the plan and for what plan year.
- Copies of any minimum funding waiver ruling letters granted or denied by the IRS.
- Copies of any pending applications for minimum funding waivers. (When obtained from the IRS, safeguarding procedures apply.)
- Date the next minimum funding contribution is due and information on the sponsor's plans to make the contribution.

6 **Request the premium history and calculations from PAS and FOD.** Review the premium history to identify when premiums were paid. Request that FOD/Collections & Compliance Division/Review & Collections Branch (FOD/CCD/RCB) determine unpaid premiums, and interest due. Forward a copy of the information from PAS to the OGC attorney to make claims in court, if applicable. Keep a record of the information for entry on the TDR Form.

7 Request plan sponsor tax returns for relevant years (for all except tax exempt employers – Form 990) using the *IRS Request Letter (Irsreq.doc). Form 333 - Request for Access to Tax Return Information Disclosed by the Internal Revenue Service (Form333.doc)*, must be attached to this letter and printed on green paper.

Request plan sponsor tax returns for relevant years for tax exempt employers using the *IRS Returns Request – Tax Exempt Entities (Irsexmpt.doc)*, see Appendix M: IRS Disclosure Offices.

8 Analyze D & B report. Look for bankruptcy filings and identity of potential controlled group members.

- If the information is not available or insufficient, request a report from Infotek on-line.
- If information is still inadequate to make a recommendation, consult with a supervisor. Make a determination if a call to D&B to request additional information is needed.
- If the company has been out of business for several years, determine with a supervisor if there is a need to request archived D&B reports.
- If they cannot locate the organization, request a world-wide search by a person's name, company address, or telephone number. When D&B receives two requests for the same company, they will often do an investigation which results in up-to-date information at no extra cost.

9 **Analyze 5500s (Schedule B) and actuarial valuation reports for contribution and asset information to use as inputs for DUEC calculation and to estimate the UBL, which is PBGC's potential exposure.**

10 **Identify the custodian of the plan assets. This may have to wait until contact with the plan administrator (Process 1.3: Perform Preliminary Analysis and Contact Plan Administrator).** Get updated plan asset amounts from the custodian. Request a current asset statement and quarterly statements for the past three years.

11 **For ongoing companies, do an affordability analysis (see also TP 2: Determine Ability to Fund Plan).** Analyze the company's business or management plan or operating budget, as well as the financial history, to identify:

- major products or services

- the markets served by each product or service and the customers
- methods of selling and distribution
- major competitors, market share, relative strengths and weaknesses among competitors
- historical information on the total market for each product or service
- changes in market share and pricing data
- cost components and factors affecting cost
- capital spending plans and objectives
- for reorganizations, determine whether, and to what extent, financial history is relevant

12 **Analyze plan sponsor tax returns (Form 1120, 1120S, or 1065) for potential controlled group members and for pension fund contributions (Form 1120 Line 24, Schedule M1, etc.).** Also look at partnership tax returns and non-profit tax returns, if appropriate and available.

13 **Analyze the 10k filing to the SEC for potential controlled group information.**

14 **If additional information is necessary, use known or suggested contacts and follow up as necessary.** Further investigation is necessary if information indicates a possible controlled group member for any plan.

15 **Get additional information from third parties including paying agent, attorneys, actuarial firms, accountants, participants, etc.** Make an official *Request for Information from Third Party (3RDPARTY.doc).* See Appendix F: Alternate Sources for Plan Information for details on where to seek different types of information.

16 Summarize and record the results of data gathering, identifying information requested and not received, contacts, and other relevant facts.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.3 Perform Preliminary Analysis and Contact Plan Administrator 05/31/96

Action Steps

| | |

1.3 Action Steps: Perform Preliminary Analysis and Contact Plan Administrator

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.3 Action Steps: 06/29/2001

## Perform Preliminary Analysis and Contact Plan Administrator

1 Determine the plan sponsor, EIN/PN, and information on premiums paid to PBGC:

- For distress filings and filed reportable event notices, obtain the EIN/PN information from the submitted documents. For non-statutory reportable events, it may be necessary to work with the source or query CAS in order to find a match for the plan.
- Obtain premium information from PAS, i.e., underfunding, etc.

2 Identify and call the plan administrator. Among the things to discuss should be:

- Who you are and why you are calling
- The reportable event that is being investigated
- The upcoming written request for information
- How to contact PBGC and person working on the case (phone and fax numbers, address)
- A request to notify PBGC of changes in status, records or assets in danger, and/or other important information
- The validity of the NOIT, including whether all affected parties have been notified as required.
- Whether any participants are out of pay status.
- Estimated levels of plan assets, plan liabilities (including guaranteed benefits and benefit liabilities). The plan administrator cannot distribute plan assets or take other actions in relation to the proposed termination.
- The reduction of monthly benefits being paid to retirees. The plan administrator is required to reduce benefits to the greater of what can be supported by the plan's funding level or to the PBGC guaranteed level (Title IV). (See 29 CFR 4022: Benefits Payable in Terminated Single-Employer Plans for further information.) All benefits, except for death benefits, must be paid in the form of an annuity.
- That the plan administrator may not purchase any irrevocable commitments from an insurer to provide benefits.
- Status of the plan sponsor--ongoing, bankrupt, liquidating, not in bankruptcy, etc., note for the plan file and forward the information to OGC.
- Imminent bar dates (notify OGC of any established bar dates).
- Whether there is a controlled group and the status of each member.
- The distress test that each member of the controlled group will attempt to establish.
- Find out the name, address, and telephone number of the custodian of the plan assets.
- Determine the status of the records (is there any danger of them being lost or destroyed).
- Request other information that might be relevant to the case.

3 Review Process 2.1 Send Reportable Event/Distress Filing Letters.

4 Determine the size of the plan and approximate amount of underfunding. Except for

distress terminations, this determination of size and funding will require additional information, such as the Actuarial Valuation Report (AVR) and/or Form 5500 Schedule B. If the plan or family of plans has more than $25 million of UBLs, OR more than 5000 participants, forward the case through the PPD Manager to the CFND Director for processing.

5 Consider circumstances which may pose a risk or exposure from increased unfunded liabilities/loss to PBGC: Analyze for circumstances such as the following examples:

- The plan contains shut-down benefits which would create additional liabilities in the event that a facility is closed, and there is good reason to believe that a facility may be closed in the near future.
- There has been a history of withdrawals from the plan, and there is a risk that continued withdrawals will further deplete the plan's assets. (A history of withdrawals from the plan and a risk of continued withdrawals presents a risk to PBGC regardless of the purpose.)
- Monthly payments to participants include substantial amounts of nonguaranteed benefits, and there is a reasonable probability that the sponsor will be unable to continue funding.
- There is a pending change in the controlled group which would affect the collection of employer liability should the plan terminate.

6 Determine if there is an event defined as any event which might create a liability to PBGC, that is, a termination of an underfunded pension plan covered under Title IV.

7 Prepare a *Form 1109 (FORM1109.doc)* to request DUEC/UBL from ASD. See Process 2.3: Request DUEC and UBL from ASD. Forward the form and appropriate supporting information to ASD. Submit as early as possible. Refine as more/better information becomes available.

8 Document all of the above in the case activity log and/or the plan file. Include a summary of the preliminary analysis and facts which led to the decision.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.4 Determine Status of Pension-Related Records 05/31/96

Action Steps

| | |
|---|---|
| **Purpose** | Ensure that any records needed for making a termination recommendation, managing overall benefits administration, and performing actuarial valuations are being maintained by the plan administrator, and will be available when needed. Copies of many of these may have already been requested and be in the possession of PPD. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Information from the custodian of the records as to whereabouts and status of records. |
| **Process Output and Recipient** | CAS task referral to a TPD, if required |
| **Control Issues** | N/A |
| **Important Concepts** | The PPD auditor or financial analyst in charge of the case makes the decision, in consultation with the supervisor, as to whether the records are in danger.<br><br>When records are in danger, a joint field trip by PPD and TPD representatives ensures that all the appropriate pension-related records are sought. When records are not in danger, the trip may be postponed until TPD does it as part of normal processing and TPD personnel may handle all of the records collecting at that point.<br><br>Occasionally in the past, records were not adequately secured, causing delays in getting participants into pay status or processing the case because of a lack of information. Failure to get good records as early as possible delays case processing. |
| **Guidance** | ERISA Section 4003 gives PBGC the authority to obtain any information deemed necessary in making a determination for termination and trusteeship of a plan. |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case |

## Click Here for More Information...

1.4 Action Steps: Determine Status of Pension-Related Records

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.4 Action Steps: 10/10/97
## Determine Status of Pension-Related Records

1 Call plan administrator, plan sponsor, or custodian of assets, actuarial firms, etc., as necessary, to determine the status of the records.

2 Verify and document the location of the records, the types of records maintained, and what plans they have for the records (for example: maintain, destroy, transfer to another storage location, etc.)

3 Decide if a field trip is warranted.

- If the status of the records is unknown or the records are in danger, continue this procedure.
- If not, simply request the needed records and consider taking a trip later, if it should be required. When postponing the field trip, always be prepared for the possibility of taking the trip at any time.

4 Coordinate with the TPD to schedule a joint trip, if required. See Process 7.1: Initiate TPD Involvement.

5 Request an inventory listing of records from the plan administrator, and inquire about what might be in other storage locations and where those locations are. For records in storage, request an inventory of boxes. If plan records are stored at multiple locations, plan to cover all locations on a single trip.

6 Prepare for the trip:

- Prepare a detailed action plan for the trip. This should include the purpose of the trip, what will be accomplished during the visit, and the responsibilities of each person making the trip. Submit the action plan to PPD supervisor in advance for review and approval. The plan should also include travel details: departure, arrival, address and phone number of lodgings, and name and phone number of contact(s) at the plan administrator or other field trip site.
- Coordinate with the OGC staff attorney on what information is appropriate.
- Review Appendix A - Master Checklist of Documents to Obtain and identify those required for the case. Remember that it is acceptable to enter some data directly into a database on a PBGC-owned computer in the field (provided sample source documents are retained to support the relevant audit report), negating the need for bringing or shipping some documents back to PBGC .
- Arrange for photocopying services, if necessary.
- Arrange for returning information to PBGC (e.g., Federal Express—take PBGC labels and air bills with PBGC account number).
- Arrange for boxes to be sent to the site or ensure that they can be acquired there.
- Arrange with plan administrator for working space.
- If the case will be handled by an FBA, also coordinate with the COTR and have FBA personnel accompany PPD and TPD on the trip.

7 Document all actions and contacts in the activity log and/or plan file.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.5 Determine Probability of Trusteeship

**09/28/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Estimate extent of PBGC's liability.<br><br>Notify the Large Case Coordinator in order to establish LCWG, if necessary, and/or if there is a need for an FBA, and TPD to begin processing.<br><br>Identify cases that should be routed to CFND. |
| **Time Reporting (BMPRS)** | PPD Processing<br><br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Reportable event documentation, plan documentation, Schedule B (5500)/AVR, D&B/Prentice Hall, relevant tax returns, and DUECG/UBL estimates (or as much of this information as is available). |
| **Process Output and Recipient** | Decision on likelihood of trusteeship. |
| **Control Issues** | Any plan that PBGC might terminate with UBLs of $5 million or more has to be identified for the quarterly Probables Report for FOD. |
| **Important Concepts** | Getting other divisions within IOD and the Large Case Coordinator (if required) involved at this point helps speed up the process later. Identifying the probability of trusteeship helps IOD manage workload better. |
| **Guidance** | Follow safeguarding procedures for tax returns received from IRS and stored in COCD. See PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2).<br><br>ERISA 4041 and CFR 4041, Subpart C for distress terminations ERISA 4042 for PBGC-initiated terminations.<br><br>For distress filings that meet certain criteria (insufficient to cover guaranteed benefits, and plan sponsor and all controlled group members are not ongoing businesses), do not pursue completion of the distress filing. Go straight to PBGC-initiated termination in order to save plan assets.<br><br>IOD Policy Bulletin 95-1 |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case. |

## Click Here for More Information...

1.5 Action Steps: Determine Probability of Trusteeship

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.5 Action Steps: 09/28/2001
## Determine Probability of Trusteeship

1 Identify whether the case is a Large Case, and if so, notify the Large Case Coordinator as early in the review as possible. Prepare a *Request for Large Case Working Group Memo (LCWGREQ.doc)*. Identify whether the case will become a FBA Plan (preparation of FBA procurement is addressed in Process 4.7: Request FBA Procurement).

2 Review all information readily available. Determine the extent of PBGC liability. If the plan does not have available assets to pay benefits currently due under 4042(a), termination and PBGC trusteeship of the plan is required. When a controlled group analysis has been accomplished with no viable controlled group member(s) found, the probability of termination is high.

3 Meet with OGC attorney to discuss the case. OGC may have identified legal issues requiring additional factual information or may have additional factual information

4 Follow PBGC policy for determining DOPT. Propose DOPT for the plan based on when participants' expectations for benefits were extinguished and on what date thereafter best serves PBGC's financial interest.

- In a distress termination and assets are sufficient to cover guaranteed benefits, the date in the NOIT may be appropriate.
- The earliest date which may be established as the date of termination for distress and PBGC-initiated terminations is the date participants' expectations were extinguished with respect to continuation of the plan. Expectations may be extinguished by actual notice, i.e., the issuance of a Notice of Intent to Terminate (NOIT), or by constructive notice, i.e., the date which the sponsor goes out of business or goes into receivership, and participants' employment is terminated. The PBGC may establish a later date of termination when, based on facts and circumstances, it determines the later date is in the best interests of the PBGC. The employer's concerns will have no effect on PBGC's decision making.

5 Document assumptions and justification for DOPT chosen. The DOPT can also be the date that is most beneficial to the PBGC.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.6 Resolve Participants Out of Pay Status

**03/23/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Meet PBGC mission of providing for the continued and uninterrupted payment of benefits to eligible payees in covered plans. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Notification or determination that participants are out of pay status from reportable event or other source. |
| **Process Output and Recipient** | Authorization to Place Participants in Pay Status Memo for non-trusteed plans and payments to participants. Director of IOD or DED/COO depending on criteria (Delegation of Authority Memo from DED/COO to IOD Director, Dec. 1, 1994). |
| **Control Issues** | Log all cases in which benefits are being paid prior to PBGC trusteeship. The PPD Program Assistant assigns each case an authorization number in the log. This information is subject to review and needed for reconciling SSC report of payees against the log. The log is also used for quarterly reporting to OED on aging of non-trusteed cases and to FOD for financial statement purposes. |
| **Important Concepts** | If PBGC puts people in pay status prior to trusteeship by working with a third party paying agent (for example, assisting in calculating benefits, etc.), there is an implied intent that PBGC will become trustee of the plan. Avoid the appearance of implied intent. Plan administration is the responsibility of the plan administrator until PBGC trusteeship is effected.<br><br>When PBGC puts participants into pay status prior to trusteeship using PBGC funds pursuant to policy (See Guidance below), PPD generally has 60 days to recommend the plan for termination and trusteeship.<br><br>In some cases, participants are out of pay status simply because the plan administrator became nervous at the time of bankruptcy. Often, a call from PBGC is sufficient to put participants back into pay status. In these cases the TPD will normally use the prior paying agent in the beginning and then transition to SSC.<br><br>Also, participants being out pay status can be the result of an abandoned plan, insufficient funds, no plan administrator, etc. |
| **Guidance** | PBGC Operating Policy Manual 6.7-1 |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case. |

## Click Here for More Information...

1.6 Action Steps: Resolve Participants Out of Pay Status

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.6 Action Steps: 02/13/98

## Resolve Participants Out of Pay Status

Putting participants in pay status using PBGC funds prior to trusteeship requires the initiator to make a determination that the plan "will" be trusteed by PBGC (see Process 1.5: Determine Probability of Trusteeship). All uncertainties should have been resolved by this point. Before taking this step, the auditor or financial analyst should make every effort to have the plan administrator take responsibility for the plan.

1 The plan administrator is either an entity named in the plan document, designated as specified by the plan document, or the company. See 29 U.S.C 1102(a)(18).. Call the plan administrator to determine why people are out of pay status. If there is no plan administrator, treat it as an abandoned plan.

2 Find out where assets are being held (ask plan trustee). If there are assets, request that the plan administrator put participants in pay status.

3 If there are no assets or the plan administrator will not assist, attempt to get enough information about participants for TPDs to be able to calculate benefits and place participants in pay status (normally through the prior paying agent, but it can be through SSC). The plan administrator or the prior paying agent can be the best sources for the needed information.

4 Determine the approximate monthly amount of all benefits to be paid. The authorization must be approved by the Deputy Executive Director/Chief Operating Officer (DED/COO) for amounts greater than $10,000 per month. The IOD Director may authorize the payment of benefits for amounts up to $10,000 per month. Prepare the appropriate memo: *Authorization to Place Participants in Pay Status Memo (< $10,000 a month) (Paysta.doc)* or *Authorization to Place Participants in Pay Status Memo (≥ $10,000 a month) (Paysta2.doc)*.

5 The PPD Audit Supervisor will identify, using the CAS automatic assignment capability or in coordination with the Deputy Director, IOD for Large Cases, which TPD will be assigned case responsibility.

6 Provide the TPD with copies of plan documents, and any information on participants that has been received, such as:

- recent check registers (to include participant names, check mailing addresses, SSNs, and amount of check with withholding
- census data from the actuarial firm
- plan provisions (with applicable factors)
- forms of benefit elections made by participants
- copies of personnel records to include information required by plan provisions for calculating benefits

7 Send the *Pay Request Memo (PAYREQ.doc)* from the Manager, PPD, to the TPD Division Manager. Include actions required to be accomplished by the TPD case team. Attach the authorization memo signed by the IOD Director or the DED/COO granting authority to use PBGC funds.

8 Send a Task Referral on CAS to the TPD Manager requesting payment assistance.

9 Document all actions and contacts in the activity log and/or plan file.

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.7 Request Attorney

**05/31/96**

**Action Steps**

| | |
|---|---|
| **Purpose** | Get an OGC attorney involved in the case early in order to enable the attorney to file claims in court for DUEC, UBL, and unpaid premiums. The attorney will also assist PPD in getting the case recommended for trusteeship. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Case for which OGC involvement is necessary or desirable. |
| **Process Output and Recipient** | Request memo to the General Counsel with preliminary information and point of contact in PPD. |
| **Control Issues** | Request an attorney immediately for all cases involving a legal or judicial proceeding, such as a bankruptcy. |
| **Important Concepts** | While not all cases require that the attorney be assigned up front, in many cases it is a very good idea. All bankruptcies require that an attorney be assigned upon receipt. The attorney needs to be assigned quickly in order to act in time to meet bar dates, confirmation hearings, coordinate getting information from the plan sponsor (especially in bankruptcy cases), etc. If we miss bar dates, PBGC may lose its standing in bankruptcy court which may reduce the likelihood of recovery.<br>This step may be postponed until later, if it is determined that the attorney is not needed immediately. However, the involvement of an attorney will be necessary before recommending a plan for termination and trusteeship. |
| **Guidance** | N/A |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case. |

1.7 Procedure: Request Attorney

**Determine Type of Case, Assign, and Begin Collecting Initial Case Information**

## 1.7 Action Steps: 02/13/98

## Request Attorney

**Note** This step should generally be taken early in the process when deemed appropriate.

Manual

1. Check with the OGC file room to see if an attorney has already been assigned to the case. If they are unable to provide an answer, call the OGC Administrative Officer.
2. If no attorney has been assigned, send *Attorney Assignment Memo (ATTRNYRQ.doc)* to OGC (address the request to the General Counsel). Include the reportable event description, any other preliminary information, and the point of contact(s) in PPD (and TPD, if involved at this point).

## 1.8 Forms, Letters, Memos, etc.

06/29/2001

**Note** After opening a file listed below, use **File / Save As** to give appropriate name and save with other case related files. To switch between the file and the online IOD Procedures Manual, press **ALT+TAB**.

## PR 02. Gather Plan & Sponsor Information

2. Overview

2. Workflow for Process

2.1 Send Reportable Event/ Distress Filing Lettersr

2.2 Issue Administrative Subpoena

2.3 Request DUEC & UBL from ASD

Forms, Letters, Memos, etc.

## 2. Overview

**02/13/98**

Plan and sponsor information serve the dual purposes of enabling PPD to make a determination and providing the TPD with some of the information necessary to calculate benefits and value the plan.

Other goals of this process are to:

- further develop a good relationship with the plan sponsor and plan administrator, and
- to begin sharing information with the TPD if it is already involved.

**Recognize that early, efficient data collecting does more to shorten total case processing than any other PPD activity**, while serving PPD's immediate goal of obtaining information necessary to make a recommendation regarding termination. Use this process to start obtaining information PBGC will need to process the case from start to finish. This will minimize delays and eliminate multiple requests for the same information. In addition to collecting plan and plan sponsor information needed to determine whether termination and trusteeship of a plan will be recommended, PPD also initiates the collection of basic participant data (names, SSN, and addresses) for plans that are expected to be trusteed. This early collection of basic participant data enables the TPDs to begin early processing of cases. Assuming that the records are not in danger, though, PPD normally will only collect enough participant data to determine whether a plan will be recommended for termination and trusteeship. When participant data is received during pre-trusteeship before a TPD has been assigned, it is passed to the TPD team during the initial PPD/TPD meeting or with the Document Transfer List Memo as part of the transfer of information. (See Process 8.1: Transfer Information From PPD to TPD.)

Pre-Termination Processes

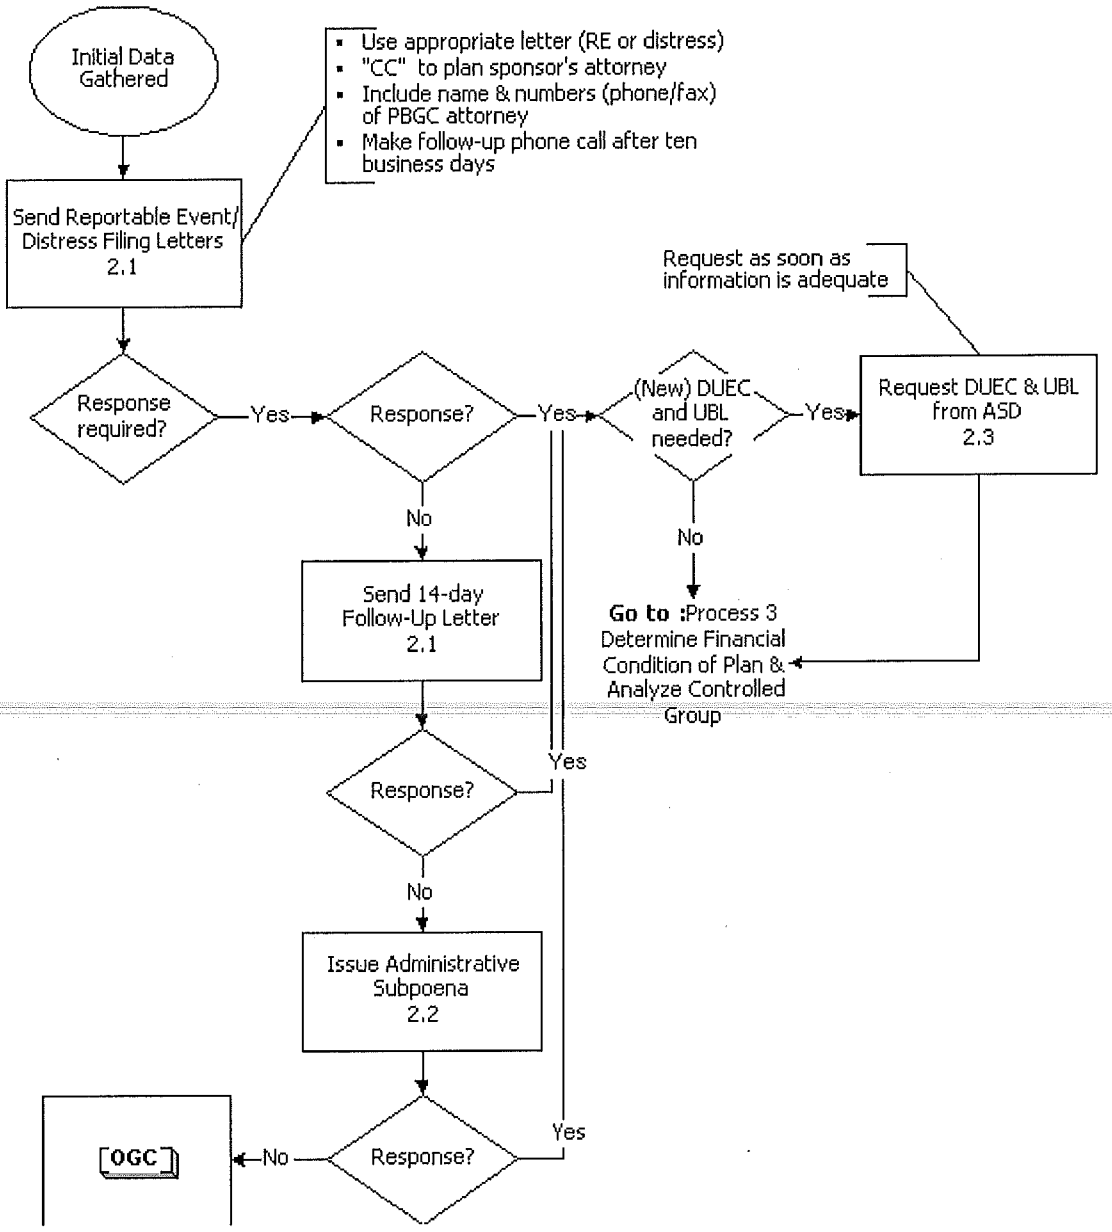
Gather Plan and Sponsor Information

## 2. Workflow for Process 2

06/29/2001



**Gather Plan and Sponsor Information**

## 2.1 Send Reportable Event/ Distress Filing Letters

**06/29/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | **Reportable Events** - Acknowledge receipt of the reportable event by sending the appropriate acknowledgment letter requesting the necessary information.<br><br>**Distress Filings** - Acknowledge receipt of distress filing, NOIT, Form 600, etc., and initiate official contact with plan administrator/sponsor.<br><br>**Either case type** - Initiate the paper trail necessary to issue an administrative subpoena. |
| **Time Reporting (BMPRS)** | PPD Processing<br><br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identification of information needed and addressee. |
| **Output and Recipient** | PPD receipt of required information. |
| **Control Issues** | Consult with OGC, if appropriate.<br><br>Ensure that the letter is dated and that the file copy has the date. The completeness of data collected at this point has a large effect on the success of recovery efforts, timing and accuracy of valuations, and other timely processing of the case. The success of this effort, along with additional data gathering by TPD, has a greater effect on the efficiency of IOD operations than any other PPD activity. When encountering resistance from company officials or the plan administrator, use PBGC's authority to subpoena documents. Consult OGC before issuing a subpoena to any entity that is in bankruptcy proceedings. |
| **Important Concepts** | Modify the *Reportable Events Information List (RE-LIST.doc)* so that it reflects only information needed to process the case that has not already been provided to PBGC. Refer to Appendix A: Master List of Documents to Obtain. Confirm telephone requests for information by letter as soon as possible. |
| **Guidance** | ERISA 4003: PBGC authority to obtain information necessary to process a case. |
| **Procedure Owner** | Financial Analyst or Auditor in charge of case. |

## Click Here for More Information...

2.1 Action Steps: Send Reportable Event/Distress Filing Letters

**Gather Plan and Sponsor Information**

## 2.1 Action Steps: 06/29/2001

## Send Reportable Event/ Distress Filing Letters

1 Determine additional information needed from plan sponsor/administrator. Review the information already received and use Appendix A: Master List of Documents to Obtain to determine what else to request. The documents to request will be determined by the type of case, circumstances, and what information is already held by PBGC. This is primarily a judgment call by the auditor or financial analyst handling the case. Consider including the administrative subpoena with the 14 day letter to shorten the time frame and increase the level of responsiveness. Determine additional information needed from plan sponsor/administrator. Review the information already received and use Appendix A: Master List of Documents to Obtain to determine what else to request. Consider including the administrative subpoena with the 14 day letter to shorten the time frame and increase the level of responsiveness. This provides a method of shortening the process if there is no reply to the *Reportable Events Acknowledgment Letter (REACKINF.doc)* or *Reportable Event Requirement Letter (REREQINF.doc)* and telephone contact has demonstrated that the plan administrator is uncooperative. See Process 2.2: Issue Administrative Subpoena.

- For Example, request from the company, or the trustee in bankruptcy cases (Chapter 7 or 11, when trusteed), the company's business or management plans and latest financial statements, audited or unaudited. If no business plan is available, request an operating budget that has income statements projected for a year or more. Frequently, little or none of this information will be available, but it is best to request it in case it is available. Analyzing this information, if it is available, helps PPD to determine the capability of the sponsor to survive and support the plan, as well as providing financial background on the sponsor.

2 Call the plan sponsor/administrator and notify them to expect a letter requesting documents. Send a copy to the sponsor's attorney or representative, if known.

3 Prepare the appropriate letter(s) and ensure a copy is placed in the file. With each letter, prepare and enclose a *Reportable Events Information List (RE-LIST.doc)*, modified to request only information needed to process the case.

a. **If the Plan Administrator notified the PBGC of the reportable event,** prepare a *Reportable Events Acknowledgment Letter (REACKINF.doc)*. This letter and the attached *Reportable Events Information List (RE-LIST.doc)*:

- remind the administrator of his duties as administrator, and
- request information necessary to process the case that has not already been received by PBGC.

b. **If the Plan Administrator has not filed a reportable event notice**, and PBGC discovers that a reportable event has occurred, prepare a *Reportable Event Requirement Letter (REREQINF.doc)*. This letter and the attached *Reportable Events Information List (RE-LIST.doc)*:

- advise the Plan Administrator of his/her obligations as administrator;
- advise the Plan Administrator that 4071 penalties can be assessed;
- request information necessary to process the case that has not already been received by PBGC; and
- are always sent when a *Third Party Reportable Event Acknowledgment Letter*

*(3RDPTYRE.doc)* is sent to a third party.

**c.** When someone other than the Plan Administrator (service provider [bank, actuarial firm, insurance company, etc.] or participant who was not required to file notice of the reportable event) notifies PBGC, prepare a *Third Party Reportable Event Acknowledgment Letter (3RDPTYRE.doc)*. This letter and the attached *Reportable Events Information List (RE-LIST.doc)*:

- acknowledge notice of this event;
- request information necessary to process the case that has not already been received by PBGC that is reasonably expected to be in the possession of the addressee;
- and are sent in addition to a *Reportable Event Requirement Letter (REREQINF.doc)* to the Plan Administrator.

**d.** For a NOIT (Form 600), prepare either a Valid NOIT (Form 600) Letter (VAL600.doc), or an Invalid NOIT (Form 600) Letter (INVAL600.doc).

**4** Call addressee after ten days to verify receipt. Document the call in the activity log.

**5** If response has not been received by the 14th day, prepare a case-specific 14-day letter:

- Attach copy of previously mailed Reportable Event Requirement Letter or Reportable Event Acknowledgment Letter, Third Party Reportable Event Acknowledgement Letter, and the Reportable Event Information List.
- Send letter (verify date stamp) and place copy in file.

**6** Call addressee after ten days to verify receipt of 14 day letter. Document the call in the case activity log.

**7** If a response has not been received within 14 days, continue to Process 2.2: Issue Administrative Subpoena and notify the OGC attorney assigned to the case. If the person to whom the subpoena is to be issued is in bankruptcy, consult OGC before issuing the subpoena.

**Gather Plan and Sponsor Information**

## 2.2 Issue Administrative Subpoena

**06/06/97**

Action Steps

| | |
|---|---|
| **Purpose** | Empower PBGC to require recipient to provide requested records that are needed to process a case. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | An unanswered 30-day letter and/or 14-day follow-up letter.<br>Clearly uncooperative sources. Uncooperative could be defined as anyone who will not voluntarily furnish information or documents when requested to do so by PBGC. This is demonstrated by non-response to letters; refusing to take telephone calls; taking calls, but refusing to act on request for information; or non-responsiveness such as agreeing to provide information, but never carrying out the action. |
| **Output and Recipient** | Subpoena to a source of needed information. |
| **Control Issues** | Administrative subpoenas must be signed by a PBGC official at the GS-15 level or higher. The PPD Manager will review and sign all administrative subpoenas issued from PPD. Other IOD division managers will review all administrative subpoenas from their respective divisions. |
| **Important Concepts** | Coordinate the use of administrative subpoenas with the PPD Manager and OGC. IOD may issue administrative subpoenas only to obtain documents which are needed for case processing. PBGC must use procedures for issuing administrative subpoenas which will ensure that they are legally enforceable.<br>The subpoena must be specific as to requested documents. Recognize the extent and cost to the person of complying with the terms of the subpoena and consider a field trip with a subpoena instead.<br>Once a subpoena is issued, cooperation may be limited to the extent required by the subpoena. In cases where the plan administrator /sponsor demonstrates an uncooperative stance, consider using the administrative subpoena sooner. Recognize that someone who does not respond to a written request for information should be considered uncooperative.<br>Previously handled only by OGC, the administrative subpoena gives more investigative authority to IOD with certain enforcement capability. |
| **Guidance** | ERISA 4003 |
| **Procedure Owner** | PPD financial analyst or auditor in charge of case, TPD case team, and division manager. |

## Click Here for More Information...

2.2 Action Steps: Issue Administrative Subpoena

**Gather Plan and Sponsor Information**

## 2.2 Action Steps: 06/06/97
## Issue Administrative Subpoena

1 Consult with the OGC attorney assigned to the case. There may be situations when OGC will issue the subpoena, such as when the case is in litigation or the plan sponsor is in bankruptcy. Consult the OGC attorney in the following situations:

- The investigation requires information beyond that requested by the model subpoena.
- The language of the model subpoena does not fit the circumstances.
- The contributing sponsor is a partnership.
- The contributing sponsor is in bankruptcy.

2 Verify that all information to be requested in the subpoena has been requested before in writing or that the written request accompanies the subpoena. Note that when requesting information by telephone; always send a letter confirming the conversation as soon as possible.

3 Use the sample *Administrative Subpoena (Modeliod.doc)* to create the subpoena. Since an administrative subpoena is a legal document, carefully follow the language in the model document. The model document contains phrases in **bold type** that indicate where particular words should be inserted or omitted and to provide general guidance. The model administrative subpoena contains a schedule requesting documents relating to plan information and corporate information. These phrases and sentences in **bold type** should not appear on the final administrative subpoenas. Keep in mind that the requests for corporate information focus on collecting controlled group material. Limit requests to information actually needed for the investigation.

4 Prepare the *Administrative Subpoena Cover Letter (Subcovlt.doc)* to accompany the subpoena.

5 The Administrative Subpoena will be reviewed and signed by the Manager, PPD (or other division manager for subpoenas not issued by PPD).

6 Send the subpoena by certified mail or Federal Express to ensure a proof of delivery. Send a copy of the subpoena to the OGC attorney assigned to the case.

7 Document all actions and calls in the activity log and/or plan file.

**Gather Plan and Sponsor Information**

## 2.3 Request DUEC and UBL from ASD

**03/19/2004**

Action Steps

| | |
|---|---|
| **Purpose** | Estimate DUEC and UBL amounts needed to file in bankruptcy, PBGC's exposure, claims for the DUEC and UBL, and Premiums owed to PBGC. This identifies the funding status of the plan, and the priority status of claims. Identify probable terminations for financial statement purposes. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Most recent AVR and/or 5500 Schedule B (as many and as recent as possible). 2.3 Action Steps: Request DUEC and UBL from ASD

**Gather Plan and Sponsor Information**

## 2.3 Action Steps: 03/19/2004
## Request DUEC and UBL from ASD

1 If not previously requested, prepare *Form 1109 (FORM1109.doc)*

2 Attach supporting documents.

3 Hand deliver to ASD.

4 ASD has 30 days to respond to request. Make a follow up call when it is due if it has not been received.

5 Contact the PPD Manager, who will coordinate with ASD, if the request needs to be expedited. For special or urgent requests, specify the required completion date on the Form 1109.

- Requests from OGC for expedited DUEC/UBL require the concurrence of the appropriate Assistant General Counsel. These requests will be routed through the PPD Audit Supervisor for PPD supervisory concurrence.

6 Form 1109 Request for Underfunding and Minimum Funding Calculations is the only form in use for these calculations. (Form 1109E is obsolete). For a revised calculation, indicate on Form 1109 that a prior request was made, and the date of the earlier request. Ensure that updated information is attached. The prior calculation sheet should be attached to the form. Otherwise the procedures are the same.

7 Document all actions and calls in the activity log and/or plan file. When ASD returns the DUEC/UBL, update the DUEC and Estimated Plan Liabilities and Assets milestones on CAS.

8 If the Case has been classified as Probable for the Contingency Working Group (CWG), then while the case is classified as Probable, request quarterly plan financial statements and update CAS (Custodian Data & Custodian Asset Data) per the CWG Procedures.

9 After CAS has been updated, forward the plan asset statements to FOD/FRAAB.

Determine Financial Condition of Plan & Analyze Controlled Group

## 3. Overview

05/31/96

**The goal of analyzing a plan sponsor's membership in a controlled group is to determine whether or not a viable entity or group of entities within the controlled group (including the plan sponsor) can afford to fund the plan, thus avoiding the need to terminate and trustee the plan.** Even if no member can afford to fund the plan, once the plan is terminated PBGC can still take recovery action against a controlled group member because they are all "jointly and severally liable".

**Prior to 1986 and the passage of the Single Employer Pension Plan Amendments Act (SEPPAA), a plan sponsor could arbitrarily exercise the decision to terminate a plan regardless of the plan's funding condition.** In most cases, when this happened, PBGC had no choice but to assume responsibility for those plans which terminated with insufficient assets to provide guaranteed benefits. This was true regardless of the sponsor's ability to continue the plan. Thanks to SEPPAA and the Pension Protection Act of 1987, employers can no longer arbitrarily transfer their unfunded pension liabilities to the plan termination insurance system (PBGC) and avoid paying promised pension benefits. These Acts were enacted, among other things:

- to increase the likelihood that participants and beneficiaries in covered single-employer defined benefit pension plans will receive their full benefits;
- to provide for the transfer of unfunded pension liabilities onto the single-employer pension plan termination insurance system only in cases of severe hardship;
- to improve the treatment of pensions in Chapter 11 bankruptcy procedures; and
- to increase employer liability to participants when pension plans terminate, thereby providing participants with better protection against the loss of benefits.

**Under ERISA, PBGC protects itself and participants if one (or more) of the members of the controlled group agrees to fund the plan.** If that is not possible and PBGC terminates and trustees the plan, PBGC can try to recover assets from controlled group members to offset PBGC liabilities. Either to terminate or pursue collection fully, PBGC should determine the controlled group members and their viability.

**PPD starts the initial controlled group analysis with readily obtainable information, and investigating further when the collected information suggests more analysis is necessary (such as when a potentially viable controlled group member is found).** Controlled group considerations may affect the application of termination criteria to a case, and may help determine the appropriate DOPT. Once a case is referred to a TPD, the TPD develops the findings of the initial analysis, if necessary, to complete and issue a final controlled group determination. This final determination, which may add to the initial findings, constitutes PBGC's Agency determination on which recovery actions are based.

For specific and general information on bankruptcies, see Bankruptcy Overview in Appendix C.

3.1 Action Steps: Identify Controlled Group

**Determine Financial Condition of Plan & Analyze Controlled Group**

## 3.1 Action Steps: 09/22/99

## Identify Controlled Group

Note that IOD Policy Bulletin 95-1 states that IOD will conduct a preliminary controlled group analysis for the purpose of determining whether the PBGC should seek termination and/or trusteeship of a plan or group of related plans when (1) the estimated total unfunded guaranteed benefits are $5 million or less and (2) the plans are exempt from review by the TWG. For all other cases, a full controlled group analysis is necessary. A preliminary controlled group analysis will be done by PPD based on a review of Dun & Bradstreet and Infotek reports, tax returns (if available), Infotek on-line service, and filings made by the debtor in bankruptcy court, if applicable. If this analysis does not identify the existence of a viable controlled group member and the plan is insufficient to cover guaranteed benefits, the plan(s) should be recommended for trusteeship as soon as possible. See TP 1: Identify Controlled Group for detailed procedures on controlled group analysis.

1. Gather source documents, including Dun & Bradstreet reports, CBD Infotek reports, plan sponsor's tax returns, bankruptcy filings, etc., as listed above. These should have been requested earlier (Process 1.2: Begin Collecting Data).
2. Determine ownership of plan sponsor (mostly from D&B and corporate tax return).
3. Identify whether or not there are any parent or subsidiary corporations.
4. Determine if identified owners also own other entities (brother-sister corporations). This may require requesting individual tax returns.
5. Determine whether any controlled group members claim business expense deductions and/or depreciation for rental property on their Federal tax returns. (Rental property may be considered a trade or business by PBGC for purposes of determining a controlled group. If it is, the value or a portion of the value of the property will be added to the net worth of the controlled group, per PBGC Operating Policy Manual 7.2-1.)
6. Document the finding as a preliminary analysis and enter information in the Controlled Group Milestone in CAS.

**Determine Financial Condition of Plan and Analyze Controlled Group**

## 3.2 Determine Impact of Proposed Reorganization 05/31/96

**Action Steps**

| | |
|---|---|
| **Purpose** | Determine whether a company's Plan of Reorganization (POR) is feasible and whether the post-reorganization company will be able to fund the pension plan along with other obligations. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | POR with accompanying Disclosure Statement, Statement of Affairs ( SOA) with all schedules, Business Plan, financial projections, DUEC/UBL , and proposed minimum funding (if plan is ongoing). |
| **Output and Recipient** | Determination of feasibility of reorganization and the impact on the pension plan. |
| **Control Issues** | N/A |
| **Important Concepts** | The purpose of a Chapter 11 reorganization is to give a company a "second chance". It permits the company to restructure its debts, usually paying off only a portion over a period of time. One of these obligations is to the pension plan. If the PBGC receives adequate advance notification of the bankruptcy's bar date, the PBGC will file claims on behalf of the pension plan for DUEC and UBL. Until the pension plan is actually terminated, these claims are contingent (upon the termination of the plan).<br>Determining whether or not a company is likely to survive a reorganization is a complex process requiring experience and judgment.<br>See the Bankruptcy OverviewApdx_C_Bankruptcy_Overview in Appendix C |
| **Guidance** | ERISA 4041 |
| **Procedure Owner** | PPD financial analyst or auditor in charge of case. |

3.2 Action Steps: Determine Impact of Proposed Reorganization

**Determine Financial Condition of Plan & Analyze Controlled Group**

## 3.2 Action Steps: 09/28/2001

## Determine Impact of Proposed Reorganization

1 **As part of the reorganization process, a company generally prepares a POR and Disclosure Statement which are distributed to creditors.** Review the POR when it becomes available. The timeframe for that availability could vary significantly among cases. The basic question is "are PBGC and the pension plan being treated equitably in respect to other like creditors?" Review the proposed POR to see if it adequately treats the pension obligation (both existing and going forward, if the plan is continued) and to determine if the financial projections contained in the POR are reasonably achievable. As part of the reorganization process, a company generally prepares a POR and Disclosure Statement which are distributed to creditors. Review the POR when it becomes available. The time frame for that availability could vary significantly among cases. The basic question is **"is the pension plan being treated equitably in respect to other like creditors?"** Review the proposed POR to see if it adequately treats the pension obligation (both existing and going forward, if the plan is continued) and to determine if the financial projections contained in the POR are reasonably achievable.

- **The existing pension obligation is obtained from the DUEC/UBL calculation prepared by ASD (see Process 2.3 Request DUEC and UBL From ASD).** This will generally show the DUEC broken into three categories, which reflect the way the claims are treated in the bankruptcy: (1) post-petition (a)(1), (2) accrued during the 180 days prior to the filing of the bankruptcy (a)(4), and (3) general unsecured. In rare cases, there may be an additional category for DUEC accrued during a portion of the time after the filing: post-petition (a)(2)). Also, in some cases there may be a lien for a portion of the DUEC, which is treated as a secured claim, if the lien was perfected prior to the filing of the bankruptcy. OGC also files claims for the UBL, and, in some instances, a portion of the UBL will be filed as a priority claim. UBL priority in bankruptcy generally depends on whether the contributing sponsor and its controlled group have net worth. If it appears that there is positive net worth, notify OGC.
- **To review the POR/Disclosure Statement the reviewer will usually need a projection of minimum funding from ASD, assuming the pension plan is to be ongoing after the reorganization.** Determine how the existing pension obligation (obtained from the DUEC/UBL calculations) is treated in the POR. Is the pension obligation being treated equitably relative to other creditors of like standing? For example, if the 180-day DUEC claim (which is priority [a][4]) is to be paid 25 cents on the dollar while another (a)(4) claim is to be paid 75 cents on the dollar, this should immediately be brought to the attention of OGC so that they can object.
- **After considering how the existing pension obligation is to be treated in the proposed POR, determine (assuming the pension plan is going to be continued) whether the company's financial projections (as contained in the POR) are reasonable and provide sufficient earnings to pay the ongoing minimum funding of the plan.**

2 **Review the SOA and all schedules, including:**

- **The "summary of debts and property" near the end of the SOA**, which provides a standardized balance sheet with cross-references to supporting schedules.
- **Schedule A-1**, the itemization of all debts scheduled by the debtor that are entitled to priority.

- **Schedule A-2**, the itemization of secured debts including the amount of the debt, the name of the creditor, a description of the collateral, and an estimate of the value of the collateral. When collateral includes real property, it should be described in Schedule B-1.
- **Schedule A-3**, the itemization of all general unsecured claims acknowledged by the debtor, to identify major unsecured creditors, disputed claims, and any pension claims included by the debtor.
- **Schedule B-2**, the itemization of all assets other than real property.

3 **Determine whether or not the company can successfully reorganize and emerge from bankruptcy.** This is a complex task. Consider the following and give a best judgment opinion based on experience and professional judgment:

- **If the business is to be continued in essentially the same form after the reorganization, it may be relevant to look at historical financials and extend them into the future.** In other cases, however, the reorganized company will be substantially different than the company in the past (the number of product offerings may be cut, certain manufacturing processes eliminated, administrative overhead costs cut, etc.). When the reorganized company is expected to be significantly different from the historical company, it may not be useful to extrapolate from historical financials.
- **Ask general business questions about the company: who is the competition, what market share does the company have, etc.** If the financial projections contained in the POR look extremely optimistic and not achievable, it may be necessary to get more information from the company's management, possibly including a plant visit. Before representing to OGC that the projections are unreasonable, have a thorough and well-thought-out analysis prepared. The reason is that a bankruptcy judge will normally accept the projections of the company, which are considered to have been prepared by "operating experts." For PBGC to challenge this view, its case should be strong.
- **If the financial projections of the POR, while optimistic, are still achievable, determine if the projected earnings are adequate to cover ongoing minimum funding.** This involves comparing projected earnings before taxes and pension expense ("EBTP") with the minimum funding projection. If EBTP is inadequate to cover minimum funding, this should be documented and immediately brought to the attention of the OGC attorney handling the bankruptcy.
- **In some cases the POR will propose a termination of the pension plan. If so, the POR should include adequate detail about how the plan is to be terminated.** Generally this will be by way of a distress filing. If the debtor proceeds under the second distress test, the bankruptcy must not have been dismissed as of the proposed termination date and that the bankruptcy court must approve the termination. PBGC must be given advance notice of the debtor's request for approval of the distress termination. The court, in approving the termination, must determine that, unless the plan is terminated, the debtor will be unable to pay all its debts pursuant to a POR and will be unable to continue in business outside the reorganization process. Other controlled group members, if any, will each have to meet one of the distress criteria also, but unless they themselves are in bankruptcy, the court cannot make a determination regarding them. (See Process 1.1: Determine Type of Filing and Assign Case).
- **Under certain circumstances the PBGC may determine that a pension plan whose plan sponsor is in bankruptcy must be terminated involuntarily in order to protect the pension plan and/or the PBGC.** For example, the POR may propose that certain controlled group members be sold off, with the proceeds used to fund a settlement with certain creditors while containing no provision to either terminate the

pension plan or provide adequately for its maintenance on an ongoing basis. Since all members of the controlled group are liable for the plan's minimum funding under the joint-and-several liability concept, removing some entities from the controlled group weakens the collective earning power that may be used to support the ongoing pension plan. If the PBGC's potential liability with respect to the plan may increase unreasonably as a result of the controlled group's breakup, this may constitute grounds for a discretionary PBGC-initiated termination of the plan. Any such finding should be documented and also coordinated with OGC (see Process 1.1: Determine Type of Filing and Assign Case).

4 **Document findings and judgment in the activities log and/or the plan file.**

## PR 04. Make Recommendation

4. Overview

4. Workflow for Process 4

4.1 Determine Recommendation

4.2 Close Case

4.3 Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA (if applicable)

4.4 Form Large Case Working Group (If Required)

4.5 Request Insurance Information

4.6 Initiate Request for Participant Data

4.7 Request FBA Procurement

4.8 Refer Fiduciary Breach Issues to DOL

 Forms, Letters, Memos, etc.

## 4. Overview

**03/28/2003**

Use the collected plan and sponsor information, documentation of all actions, DUEC and UBL calculations, controlled group analysis, and DOPT justification to determine whether or not to recommend that PBGC close the case, monitor it, or terminate and become trustee of the plan. In certain cases there may be a long run liability potential for PBGC. If the plan poses little or no current liability, but will pose a long term loss potential, consider recommending termination as soon as possible.

Analysis of this information may indicate to PBGC that there may be a breach of fiduciary responsibility (see Title I of ERISA). Notification of same is provided to the Employee Benefits Security Administration/ DOL, regardless of whether PBGC determines to close, monitor or terminate and trustee a case. (See Process 4.8: Refer Fiduciary Breach issues to DOL.)

Support the recommendation in the Trusteeship Determination Record (TDR ). Remember that one of PBGC's goals is to apply consistency to like-type events or circumstances across all cases to preserve the integrity of PBGC's decision-making. The financial analyst or auditor in charge of the reportable event or distress termination case is responsible for making the recommendation and obtaining supervisor and PPD Management Team approval. The TDR will be routed through OGC for concurrence. (See Process 5: Route Recommended Termination.)

In addition to developing the termination and trusteeship documents (TWG Memo, Notice of Determination or Distress Determination Letter, and Trusteeship Agreement), PPD may take several actions to process the case, including:

- Notice to Large Case Coordinator (for large cases );
- Request for Insurance Contract information for cases funded partially or wholly through an insurer;
- Request for Participant and Payee information; and
- Request for procurement of an FBA (for FBA Plans ).

4.1 Action Steps: Determine Recommendation: Distress Filings [4041(c)]

4.1 Action Steps: Determine Recommendation: PBGC-initiated Terminations [4042(a)]

4.1 Action Steps: Determine Recommendation: Third Party Trusteeship

**Make Recommendation**

## 4.1 Action Steps: Distress Filings [4041(c)] Determine Recommendation

**09/28/2001**

For distress filings, determine if all of the filing requirements are met. See the Distress Termination section of Process 1.1: Determine Type of Filing. PBGC has the authority to waive certain requirements in appropriate cases.

Ensure that the plan sponsor and each controlled group member meets at least one of the distress test criteria (see CFR 4041.3(e) for further explanations of the criteria):

**Criterion 1**

They are undergoing liquidation in bankruptcy (Chapter 7 or 11) or insolvency (state equivalent to bankruptcy) proceedings as of the proposed termination date. As of the proposed termination date, the proceeding has not been dismissed. This also includes foreclosure by secured creditors and receivership.

**Criterion 2**

They are undergoing reorganization in bankruptcy or insolvency proceedings as of the proposed termination date, with court approval of termination and a specific finding by the court stating that unless the plan is terminated the debtor(s) will be unable to pay debts under the plan of reorganization and will be unable to continue in business outside reorganization. As of the proposed termination date, the proceeding has not been dismissed.

**Criterion 3**

PBGC determines that the contributing sponsor or applicable member of the controlled group will be unable to pay debts when due and continue in business unless the plan is terminated.

**Criterion 4**

The contributing sponsor or applicable member of the controlled group will incur unreasonably burdensome pension costs caused solely by a decline in work force covered as participants in all of the contributing sponsor's single-employer plans.

For determination under **Criteria 1** or **2**, work with OGC to obtain a copy of the bankruptcy petition or other proof that the bankruptcy was filed as of the proposed termination date. Determine whether the proceeding has not been dismissed as of the proposed termination date. Note that under the bankruptcy code, the term "dismissed" has specific meaning. When a case is dismissed, the bankruptcy is disallowed because of technical errors, insufficiency of detail, or other reasons. If the proceeding has been dismissed, the Bankruptcy Court will enter an order as such.

For **Criterion 2**, obtain a copy of the court order approving plan termination and any document showing whether PBGC had notice of the request for such an order.

For **Criteria 3** or **4**, prepare a written analysis of whether or not the sponsor and all controlled group members meet the above criteria. Criteria 3 and 4 require more financial analysis of the company concerning whether the plan sponsor and controlled group can fund the plan going forward.

Also for **Criteria 2** or **3**, see Technical Procedure 2: Identify Ability to Fund Plan. Determine if the sponsor or any controlled group member(s), either individually or as a whole, have the wherewithal to continue the plan. The PBGC may wish to oppose a bankruptcy application requesting termination if there is sufficient evidence that the plan could continue or insufficient

evidence supporting a need to terminate. Such opposition may need to be filed very quickly.

**If it appears that one or more of the controlled group members of the sponsor's controlled group would not meet the distress criteria** (one or more members of the controlled group members, individually or collectively, could meet the minimum funding requirements of the plan or fund the plan for a standard termination), in conjunction with OGC, contact those members to seek voluntary assumption of responsibility for the plan. If they are unwilling to voluntarily assume responsibility for the plan, PBGC may take actions to require the controlled group administer the plan and make all required contributions. That will normally be handled by OGC, in coordination with IRS and DOL. If the contributing sponsor or a member of the sponsor's controlled group does not meet the distress criteria, PBGC will issue a written determination. Prepare a *Distress Denial Letter (DISDEN.doc)* for signature of PPD supervisor. Note that this is an initial agency determination that is subject to reconsideration under PBGC's regulations: Administrative Review of Agency Decisions (29 CFR 4003). Ensure the *Administrative Review Procedures (Distress Criteria) (ADREV_DC.doc)* is included as an attachment. This describes the party's rights to request reconsideration of this initial determination, and advises them that requests for reconsideration should be filed to the attention of the Executive Director of the agency.

**If voluntary compliance with distress termination filing requirements would result in expenses which will unreasonably increase PBGC's liability** (for example, plan termination expenses will be paid from plan assets), consider seeking PBGC-initiated termination. First, attempt to have the plan administrator file the distress termination with an agreement that the enrolled actuary will work with PBGC actuaries to prepare participant benefit calculations and other products which PBGC will use to administer the plan. If no agreement can be reached and the cost of a distress termination (including actuarial fees) will unreasonably increase plan asset insufficiency, PBGC-initiated termination may be appropriate and cost beneficial, if applicable criteria are met.

Note that in cases where the contributing sponsor is in bankruptcy and a bankruptcy trustee has been appointed, the distress filing may need to be made by the trustee. Consult the OGC attorney assigned to the case for this or any other questions regarding the termination and/or the filing of claims.

If the plan is subject to a collective bargaining agreement, determine if a challenge from the union has been raised and whether the challenge has been resolved. Consult with OGC if there are any questions.

- The PBGC must suspend processing of a distress termination if allegations that the distress termination violates a collective bargaining agreement are made and the following conditions exist:
    - The union has initiated a formal challenge contesting the legality of the plan termination under its bargaining agreement by commencement of whatever procedure is specified in the bargaining agreement; the filing of a charge with the National Labor Relations Board (NLRB) under section 8 of the NLRB Act; or the commencement of action in court under section 301 of the NLRB Act.
    - The PBGC is notified in writing that a formal challenge was initiated prior to an issuance of the notice under section 4041(c)(3)(A) of ERISA.
- If the union's position is upheld, PBGC will dismiss the termination proceeding.
- If the PBGC is advised of such a challenge, after the issuance of such notice but before the termination is concluded, the PBGC may suspend the termination proceeding and, if it does, it must notify the plan administrator in writing.

Determine the sufficiency of plan assets.

- If the plan is sufficient for guaranteed benefits, once the termination is approved, the plan administrator may be told to distribute the assets in accordance with section 4044 of

ERISA. In such cases, the plan administrator shall purchase irrevocable commitments from an insurer to provide funded benefits under the plan or, in accordance with plan provisions and applicable regulations, otherwise fully provide all guaranteed benefits due under the plan.

- If the plan is sufficient for benefit liabilities, the plan may terminate under the procedures for a standard termination.
- If the plan is insufficient for guaranteed benefits or if sufficiency is unknown, commence PBGC-initiated termination proceedings.

If the requirements for a distress termination are met for steps 1-4, recommend termination and, if applicable, trusteeship. If not, see the PBGC-initiated termination section of this process. Make an effort to obtain compliance with a standard or distress termination before seeking PBGC-initiated termination, except in cases where:

**a.** mandatory PBGC-initiated termination is required or

**b.** where circumstances exist which make PBGC-initiated (discretionary) termination appropriate.

**Make Recommendation**

## 4.1 Action Steps: PBGC-initiated Terminations [4042(a)] 09/28/2001
## Determine Recommendation

I. For PBGC-initiated termination to occur, the PBGC must determine that the plan meets at least one section 4042(a) PBGC-initiated termination criteria (listed below):

- The plan has not met the minimum funding standard under IRC Section 412.
- The plan will be unable to pay benefits when due.
- There is a distribution of $10,000 or more (not because of death) to a participant who is a substantial owner and immediately after the distribution, the plan has nonforfeitable benefits which are not funded.
- The possible long-term loss to PBGC may reasonably be expected to increase unreasonably if the plan is not terminated.

Determine if the plan meets criteria for PBGC-initiated termination.

**Mandatory –** Plan assets are insufficient to provide benefits currently due. When it is determined that it will be a mandatory termination, review all plans of the controlled group to determine the need for further PBGC-initiated terminations.

**Discretionary –** Factors to consider when recommending a case in which a distress filing has been made and is now being considered for PBGC-initiated termination:

- The plan has not met minimum funding standards required under section 412 of the IRC.
- Whether PBGC's potential liability with respect to the plan will increase unreasonably (for example, due to shutdown benefits, changes in the identity of the controlled group, payments in excess of guaranteed maximum, etc.).
- Plan termination and PBGC trusteeship must be effected and expedited to collect funds due to the plan, collect PBGC employer liability, or avoid abandonment of the plan or possible unfavorable court action.
- The plan will be unable to pay benefits when due.
- Other extraordinary circumstances that pose risk to the PBGC or participants.

**Discretionary PBGC-initiated termination may be appropriate only if:**

1 the plan meets one or more of the section 4042 discretionary tests,

— and —

2 the PBGC has established that severe economic hardship exists on the part of the plan sponsor and the applicable members of the sponsor's controlled group or that termination is necessary to terminate the plan. Unless there are special factors requiring immediate action by the PBGC, make a preliminary assessment of whether the sponsor and each applicable controlled group member would meet the distress criteria before making a recommendation for PBGC-initiated termination of the plan.

Before recommending PBGC-initiated discretionary termination, confer with PPD management and, in bankruptcy cases, the OGC attorney assigned. Determine whether to send a letter to the plan administrator informing him or her of the requirements of a distress termination and recommending consideration of a Distress Termination Filing. State in the letter that, until a plan is terminated, it is still ongoing; under PPA, all members

of the controlled group are responsible for meeting the plan's minimum funding requirements, and the plan administrator has continuing duties to the plan. Also include a copy of the Distress Termination Filing Instructions.

**3** If there is potential for imminent or long-term loss to the PBGC, determine and document the potential loss. Quantifying the potential loss provides justification for a recommendation for PBGC-initiated termination.

- Determine the cost to PBGC in lost revenues, decreased recoverable assets, and/or increased costs (for example, money due the plan which would be lost to PBGC, recoverable assets from a controlled group member which might not be available later, phase-ins, shut-down benefits, continued payments of greater than guaranteed benefits, etc.).
- Analyze other relevant issues to PBGC (for example, the possibility of unfavorable court action, plan abandonment, costs of distress versus PBGC-initiated termination, etc.).
- Prepare a memo to the supervisor and the PPD Manager outlining the known and potential costs and any unquantifiable or intangible costs (for example, bad publicity, lost time, etc.).

**4** If the plan has sufficient assets to cover guaranteed benefits, but not for all benefit liabilities, and the cost of closing out the plan by a third party trustee will not require PBGC funds, recommend third party trusteeship. (See Third Party Trusteeship.) If assets are not sufficient to cover guaranteed benefits, and one or more of the 4042(c) criteria are met, recommend termination and PBGC trusteeship. The three 4042(c) criteria are:

- Protecting the interests of participants
- Avoiding any unreasonable deterioration of the financial condition of the plan
- Protecting against unreasonable increases in the liability of the fund, that is, PBGC.

**5** Determine if the case can be closed completely or if it should be monitored. If the case should be monitored see Process 6.0: Monitor Case, or if it should be closed see Process 4.2: Close Case.

**6** If the case will not be closed or monitored, but termination will be recommended, see Process 4.3: Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA (if applicable).

**Make Recommendation**

## 4.1 Action Steps: Third Party Trusteeship Determine Recommendation

**09/27/96**

PBGC will generally seek appointment as trustee of abandoned sufficient plans. PBGC has the discretion to appoint a qualified third party as trustee. PBGC will consider whether the third party is able to perform the necessary trustee duties at a reasonable cost, and whether, after allowance for reasonable administrative costs, the plan will be sufficient for guaranteed benefits as of the date of distribution.

Consult with PPD management and PBGC Operating Policy Manual 3.2-1 on the handling of abandoned sufficient plans.

## 4.2 Close Case

02/13/98

Action Steps

| | |
|---|---|
| **Purpose** | Document that PBGC's investigation and analysis do not warrant monitoring or termination and trusteeship. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Varies, depending on the point in PPD processing where the decision is made to close the case. |
| **Process Output/ Customer** | Notify Filer of case closure. Document case closing internally. |
| **Control Issues** | When closing the case on CAS, include an explanation in the COMMENTS field in addition to selecting the administrative close criteria.<br>If an OGC attorney has been assigned to the case, notify the attorney by e-mail that the case has been closed and why. |
| **Important Concepts** | Use proper Close Case (Reportable Event) Letter. |
| **Guidance** | N/A |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case and PPD supervisor |

## Click Here for More Information...

4.2 Action Steps: Close Case

## 4.2 Action Steps: Close Case

**09/04/98**

1. Determine the reason for closing the case.
2. Contact OGC and get informal concurrence on determination to close case. Document with e-mail notification to the OGC attorney(ies) that the case will be closed. Print the e-mail message and include in the case file.
3. Discuss the details of the case with PPD Supervisor and obtain Supervisor's concurrence for the determination to close the case. Inform them of OGC's concurrence.
4. Prepare a *Close Case (Reportable Event) Letter (CLOSE_RE.doc)* for the filer and any other interested parties informing them that PBGC has closed the case, for signature of the PPD Supervisor. Include the staff attorney as a cc to the letter.
5. Provide brief explanation in CAS COMMENTS field of the case closing. Print the COMMENTs from CAS and include in the case file. Close case on CAS.
6. Submit Close Case (Reportable Event) Letter to supervisor for signature and mailing, with the case file.
7. Supervisor signs letter.
8. Case file is closed and delivered to STCD for shipping to the Federal Records Center (FRC). See Technical Procedure 18: Prepare Files for Shipment.

**Make Recommendation**

## 4.3 Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA (if applicable)

**11/16/99**

**Action Steps**

| | |
|---|---|
| **Purpose** | Formally document the financial analyst or auditor's analysis and conclusions as to whether or not PBGC should terminate and trustee a plan. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Complete plan and sponsor information, documentation of all actions, DUEC and UBL, controlled group analysis, and DOPT justification. |
| **Process Output/ Customer** | TWG/TDR, NOD or Distress Determination Letter, and draft Trusteeship Agreement. |
| **Control Issues** | The background information must support the recommendation. When the auditor or financial analyst receives drafts directly from OGC, notify the program assistant immediately to prevent unnecessary follow-up. |
| **Important Concepts** | One of PBGC's goals is to apply consistency to like-type events or circumstances across all cases. This is particularly important in cases when the PBGC's termination actions may be challenged.<br>The TWG Memo and TDR are functionally one document and, once prepared, are always transmitted or reviewed together.<br>PPD prepares model TAs except for court ordered trusteeships.<br>The TWG Memo should be almost finished by this point because the summary information it contains has been prepared throughout PPD processing. |
| **Guidance** | TR-00-2, TWG Processing Guidelines |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case, the supervisor, and PPD Manager.<br>The PPD Program Assistant is responsible for tracking the routing of drafts through OGC and following up on outstanding drafts. |

## Click Here for More Information...

4.3 Action Steps: Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA (if applicable)

**Make Recommendation**

## 4.3 Action Steps: 09/28/2001

## Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA (if applicable)

1 **Prepare TWG Memo.**
The termination recommendation summarizes PPD's investigation, analysis, and conclusions. The *TWG Memo (TWG.doc)* will include the following sections: Request, Background Information, Pension Plan Information, Controlled Group Information and Analysis (if appropriate), Justification for DOPT, and Recommendation. In cases involving two or more plans, prepare one TWG Memo and a TDR for each plan. If the criteria for termination of the plans are different, the memo must address what criterion each plan meets for the PBGC-initiated termination.

**General guidelines for the content of each section of the TWG memo include:**

I. **Request:** Description of desired action (for example, presentation to the TWG, termination of the plan, and PBGC appointment as trustee).

II. **Background Information:** Describe plan sponsor. This includes a short history of the company, type of business, events leading up to the termination, and current status.

- **Controlled Group Information and Analysis:** Provide a list of controlled group members (if any), how the controlled group was determined, and any other pertinent information. If there is a controlled group, provide a description of the controlled group, types of relationships (for example, brother-sister), percentages of ownership, assets, and any other applicable analyses/results.
- **Plan administrator:** Identify the plan administrator and cite relevant sections of the plan and any other document that designates the administrator.
- **Pension Plan Information:** Describe plan. This includes a short history of the plan, coverage, and current status. Provide funding level of plan, including ASD-provided estimates of plan assets, DUEC, guaranteed benefit liabilities, total benefit liabilities, unfunded benefit liabilities, and unfunded guaranteed benefit liabilities. Also include information such as number of participants, number currently in pay status, monthly benefit total, status of participants, substantial owners, etc.

III. **Recommendation:** Write the desired result of the memo and a summary of why it should happen.

- **Justification for DOPT:** Provide the recommended DOPT, an explanation of how the recommended date was determined, and justification for using that date.

2 **Prepare a Notice of Determination (NOD) or Distress Determination Letter.**
For all PBGC-initiated terminations prepare a draft of the *Notice of Determination (NOD.doc)* . For all distress terminations when it has been determined that the contributing sponsor(s) of the plan and all members of the controlled group meet at least one of the distress criteria, prepare a draft of the *Distress Determination Letter (Criteria Met) (DISCRMET.doc)* When completed, the Distress Determination Letter will include the appropriate funding determination for the plan. The plan may be determined to be: Insufficient for Guaranteed Benefits; Insufficient for Benefit Liabilities; or Sufficient for Benefit Liabilities.

3 **Prepare Trusteeship Agreement and Cover Letter, as appropriate.**

- Where it is known that PBGC will need to initiate court proceedings in order to terminate and trustee the plan (e.g., because the administrator cannot be found or is not agreeable), a TA need not be prepared.
- For non-court ordered trusteeships, first contact the company or bankruptcy trustee by phone to determine who the outside signer should be and notify him or her to expect the trusteeship agreement.
- Prepare a draft of the Trusteeship Agreement and Cover Letter. Use either the *Trusteeship Agreement – PBGC Initiated Terminations (TAMOD_IN.doc)* or the *Trusteeship Agreement - Distress Terminations (TAMOD_VO.doc)*, as appropriate. Attach to the transmittal sheet.
- Prepare the appropriate cover letter, using either *Trusteeship Agreement (PBGC-Initiated) Cover Letter (TACOV_IN.doc)* or *Trusteeship Agreement (Voluntary) Cover Letter (TACOV_VO.doc)*.

4 **Addresses.**
Where the administrator of the plan is an inactive company that is not in bankruptcy or other insolvency proceedings (e.g., state or federal liquidation, reorganization, or receivership proceedings), the NOD or determination letter generally will be addressed to the last known address of the company. If an appropriate company official is willing to execute a TA, a cc of the NOD also should be sent to that official, and the TA should generally be addressed to that official.

5 **Meet with the OGC attorney to discuss the issues that need to be addressed in the documents.**

6 **Complete a Termination Decision Record (TDR) for the plan.**
As appropriate, use either the *Termination and Trusteeship Decision Record – PBGC Initiated Termination (TDR_INV.doc)* or the *Termination and Trusteeship Decision Record - Distress Termination (TDR_DIS.doc)*. (Note these documents **replace** the TDR that was formerly prepared through CAS.)

7 Route the documents to the supervisor and PPD Manager for review.

8 Make revisions as necessary.

9 Have the PPD Program Assistant hand deliver the draft documents to the OGC file room for OGC tracking, distribution, and for review and input the delivery date to the tracking system. Also provide a copy to the Large Case Coordinator if a Large case and/or an FBA plan.

10 Go to Process 4.4: Form Large Case Working Group (if necessary), Process 4.5: Request Insurance Information, Process 4.6: Initiate Request for Participant Data, and Process 5: Route Recommended Termination.

**Make Recommendation**

## 4.4 Form Large Case Working Group (if required) 11/16/99

**Action Steps**

| | |
|---|---|
| **Purpose** | Initiate formation of a Large Case Working Group. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that a recommendation for termination and trusteeship is probable.<br>Case meets the criteria for definition of a large case (over 1000 participants or $5 million or more in UBL). |
| **Output and Recipient** | A Large Case Working Group to coordinate actions on the case. |
| **Control Issues** | N/A |
| **Important Concepts** | Formation of a Large Case Working Group gives the case higher visibility and a higher priority for some actions, such as gathering information, determining financial responsibility, and attempting to recover assets, and processing activities. The notification of the Large Case Coordinator needs to be made as early in the process as possible.<br>Early identification of policy and legal issues associated with a large case prevents potential delays in case processing. |
| **Guidance** | N/A |
| **Procedure Owner** | Large Case Coordinator |

The PPD Manager will notify the Large Case Coordinator as soon as it becomes certain that it will be recommended for termination/trusteeship. Provide the Large Group Coordinator with a copy of the draft TDR at the same time that it goes to OGC, and prepare a *Request for Large Case Working Group Memo (LCWGREQ.doc)* from the PPD Manager through the Large Case Coordinator to the IOD Director recommending establishment of a Large Case Working Group (LCWG).

## Click Here for More Information...

4.4 Action Steps: Form Large Case Working Group (If Required)

**Make Recommendation**

## 4.4 Action Steps: 10/20/2000

## Form Large Case Working Group (if required)

I. Request representatives for the LCWG from the appropriate divisions and departments.

II. Convene the LCWG as necessary to coordinate activities, including contracting for an FBA, (see Process 04.7 Request FBA Procurement) gathering the necessary data and documents to continue processing the case, identifying and resolving policy and legal issues, and any other required actions.

III. Case processing will continue in accordance with normal IOD procedures (see Process 8: Assign TPD Case Team and Initiate Processing).

**Make Recommendation**

## 4.5 Request Insurance Information

**03/07/97**

**Action Steps**

| | |
|---|---|
| **Purpose** | Request insurance contract valuation data for plans which are intended to be terminated and trusteed by PBGC. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that termination and trusteeship will be recommended. |
| **Output and Recipient** | Insurance Contract Data |
| **Control Issues** | N/A |
| **Important Concepts** | Receipt of this information early in the process will improve timely processing of the plan through trusteeship. PPD's role is to collect the information (if possible) which will be valued by the TPD auditor in the Plan Asset Audit. Insurance information which cannot be secured at this time will be requested by the TPD during the audit processes (see Process 15.2: Value Plan Assets). |
| **Guidance** | N/A |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case, the supervisor, and PPD manager. |

## Click Here for More Information...

4.5 Action Steps: Request Insurance Information

**Make Recommendation**

## 4.5 Action Steps: Request Insurance Information

**10/22/97**

1 For plans funded partially or fully through an insurance company contract, prepare and send a letter requesting insurance contract valuation information. Use the *Insurance Contract Valuation Letter (PPD_INS.doc)* provided with provided attachment. Request that the information be provided as of the recommended date of plan termination (referred to in the letter as the proposed date of plan termination). Note that the TPD will request this data in Process 15.2: Value Plan Assets if PPD cannot secure it, and that the TPD auditor is responsible for determining the value of the contract(s).

- Send letter (verify date stamp) and place copy in file.
- Call insurance company after ten days to verify receipt. Attempt to get a firm response date. Document the call in the activity log.
- If insurance company is reluctant to provide information when PBGC is not trustee, advise them of the importance of the information and attempt to persuade them. If they cannot be persuaded, advise them that the information will be requested again following PBGC's appointment as trustee. Document the call in the activity log.

2 When (if) insurance information is provided by insurer, place in file for use by TPD. (See Process 15.2: Value Plan Assets.)

**Make Recommendation**

## 4.6 Initiate Request for Participant Data

**10/14/98**

Action Steps

| | |
|---|---|
| **Purpose** | Initiate request for Participant and Payment Data for plans which are intended to be terminated and trusteed by PBGC. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that termination and trusteeship will be recommended. |
| **Output and Recipient** | Participant Data (names, SSNs and addresses).<br>Payment Data - most recent check register, and electronic payment information. |
| **Control Issues** | N/A |
| **Important Concepts** | Request of this information early in the termination process improves the timely processing of the plan through trusteeship. The information will be used by the TPDs in their processing, and will facilitate the plan assumption process and timely notification of trusteeship (4042(d) letters) to the participants. Request the information by telephone and follow up with written confirmation. It is preferable to get a copy of the payment information in electronic format (ASCII delimited text file) with a hard (paper) copy of the data. |
| **Guidance** | N/A |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case, PPD Supervisor, PPD manager. |

## Click Here for More Information...

4.6 Action Steps: Initiate Request for Participant Data

**Make Recommendation**

## 4.6 Action Steps: 10/14/98
## Initiate Request for Participant Data

This subprocess should be initiated soon after termination and trusteeship are determined likely, but no later than concurrent with Process 5.1: Prepare Recommendation.

1 Review material provided by plan administrators and others (plan sponsor, plan actuary, etc.) to determine whether basic participant data has already been provided -- a list of names, SSNs, and addresses. Also review to determine whether payment information - most recent check register and electronic payment information has previously been received.

2 If basic participant data **and** payment information have been provided, go to Process 5: Route Recommended Termination

3 If not already provided, request that this basic participant data be provided. Determine the best likely resource(s) for the most accurate and current listing of participants, and request the needed information. (The plan administrator may need to request the payment information from the prior paying agent.) Request by phone (documented to case file) and confirm in writing. Prepare *Initial Participant Data. Request (INPDAREQ.doc)*, and send within 5 days of telephone request.

4 Allow a reasonable period of time to respond (14 days), and follow up as necessary, including the use of an Administrative Subpoena (See Process 2.2:Issue Administrative Subpoena for the administrative subpoena process.) The basic participant and payment information is provided to the TPD as an attachment to the Document Transfer Memo.

5 If some or all information is not available, document the circumstances to case file, and advise PPD supervisor.

**Make Recommendation**

## 4.7 Request FBA Procurement

**04/05/2002**

**Action Steps**

| | |
|---|---|
| **Purpose** | Request procurement of FBA services for plan. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that termination and trusteeship will be recommended for a plan that meets the FBA criteria (generally, a case with 250 or more participants). |
| **Process Output and Recipient** | FBA Procurement Request to Management Coordination Unit (MCU). |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case and the PPD Manager. |

## Click here for more information

4.7 Action Steps: Request FBA Procurement

**Make Recommendation**

## 4.7 Action Steps: 04/05/2002
## Request FBA Procurement

1 Prepare the *FBA Procurement Request (Fbaprreq.doc)*.This package requires somewhat detailed information about the plan, including:

- Participant Information - number of payees, deferred vesteds, and non-vested participants.
- Plan and Plan Sponsor Information - background, status, union information, identification. of related plans if plan is part of a family of plans trusteed by PBGC.
- Plan Administration Information.
- Identification of any special or unique circumstances.
- The assigned TPD (available from PPD Audit Supervisor).

2 Submit the completed *FBA Procurement Request (Fbaprreq.doc)* to PPD Supervisor for review.

3 The PPD Supervisor reviews request, then PPD Manager signs the request and forwards it to MCU.

**Make Recommendation**

## 4.8 Refer Fiduciary Breach Issues to DOL

**03/28/2003**

Action Steps

| | |
|---|---|
| **Purpose** | To provide a referral to the Employee Benefits Security Administration (EBSA)/ DOL of a potential breach of fiduciary responsibility. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Sufficient plan administrative and/or asset information to determine that there may be a fiduciary breach under Title I of ERISA. |
| **Process Output and Recipient** | Referral to EBSA/DOL indicating there may be a fiduciary breach. |
| **Control Issues** | N/A |
| **Important Concepts** | Provide referral to EBSA **as soon as** a determination is made that there may be fiduciary breach. It is not necessary to wait for the case to be recommended for termination and trusteeship. The Division Manager makes final decision to refer to DOL. Provide a copy of the notice to OGC (case attorney). |
| **Guidance** | Title I of ERISA |
| **Procedure Owner** | PPD financial analyst or auditor in charge of the case, PPD Supervisor, PPD Manager |

## Click here for more information

4.8 Action Steps: Refer Fiduciary Breach Issues to DOL

**Make Recommendation**

## 4.8 Action Steps: 03/28/2003

## Refer Fiduciary Breach Issues to DOL

This subprocess may be initiated as soon as a determination is made (in coordination with OGC) that there may be a fiduciary breach with respect to a case.

1. Prepare the *DOL/EBSA Investigation Coordination Letter (DOLEBSA.doc)*. The letter includes a description of the probable violation and provide contact point at PBGC.
2. Submit the *DOL/EBSA Investigation Coordination Letter (DOLEBSA.doc)* to PPD Supervisor for review.
3. The PPD Supervisor reviews letter, and once approved submits to the PPD Manager for signature.
4. Send letter and ensure that a copy is filed in case file (imaged).

**Note**: If a TPD receives information (after the case has left PPD) indicating that a case may have a fiduciary breach, they may notify DOL/EBSA, after coordinating with OGC. Follow the above subprocess, substituting TPD supervisor and Division Manager as appropriate.

## 4.9 Forms, Letters, Memos, etc.

03/28/2003

## PR 05. Route Recommended Termination

5. Overview

5. Workflow for Process

5.1 Prepare Recommendation for Routing

5.2 Initiate Termination and Trusteeship (if applicable)

Forms, Letters, Memos, etc

## 5. Overview

**12/07/2001**

Once PPD has recommended that a plan be terminated and trusteed, and supported the recommendation, its role is primarily overseeing the routing of the plan through the PBGC approval process, including presentation to the TWG, when required. Once the Notice of Determination (NOD ) is signed or the distress determination is accepted and the Distress Determination Letter is sent, PPD routes the case to a TPD and transfers ownership. If, in the course of the OGC, TWG/TWG Chair/COO concurrence and approval processes, the PPD recommendation is changed, the plan will come back to PPD for revision or for closing and/or monitoring. The PPD program assistant manages and documents the flow of recommendations through the approval chain. This tracking requires maintaining chronological file copies of the complete package with all signatures from any division or department when they have been obtained.

The Delegation of Authority Memos dated April 25, 1995, April 21, 1995, and August 12, 1994, and the Exempting Cases from Review by the TWG and Establishing Dates of Termination Memo dated July 28, 1993, established procedures for administrative review and trusteeship processing by the TWG. Certain plans are exempt from presentation to the full TWG, and can be reviewed and approved by the Chairperson of the TWG. Others are exempt from presentation to the full TWG, but actions must be approved by Deputy Executive Director/Chief Operations Officer (DED/COO).

Those cases which are exempt from presentation to the full TWG and which may have termination and trusteeship initiated and effected by the Chairperson are those in which:

(a) the aggregate amount of PBGC's claims is less than $5 million and

(b) the number of participants and beneficiaries is less than 5,000 and

(c) no novel or significant policy issues are involved and

(d) meet the requirements for being exempt from presentation to the full TWG (discussed below).

**Click Here for More Information...**

Cases which are exempt from presentation to the full TWG

Cases which must be presented to the full TWG, even if one of the above exemptions is met

## 5.0 Cases which are exempt from presentation to the full TWG 09/28/2001

**When the following situations are determined to exist,** a recommendation for termination and the appointment of PBGC as trustee of a plan will not be presented to the full TWG, but to its Chairperson to concur on the recommendation:

1 **Mandatory PBGC-initiated terminations under** section 4042, that is, PBGC has determined that a plan does not have assets available to pay benefits that are currently due.

2 **PBGC-initiated terminations under** section 4042(a)(2) where either

- PBGC has determined that, within the next six months, a plan will not have assets available to pay benefits when due, or
- after the applicable case processing procedures have been followed, no currently ongoing plan sponsor or controlled group member has been identified.

3 **PBGC-initiated terminations where** PBGC determines that a plan meets one or more of the following 4042(a) tests for termination:

- (1) - failure to meet the minimum funding standard
- (3) - there has been a reportable event described in section 4043(b)(7) (distribution to a substantial owner); and

after the applicable case processing procedures have been followed, no currently ongoing plan sponsor or controlled group member has been identified.

4 **Distress terminations where** PBGC determines that the plan sponsor and, if applicable, each controlled group member meets the liquidation distress test under section 4041(c)(2)(B)(i).

5 **Distress terminations where** the applicable court has made a final determination that the reorganization distress test under section 4041(c)(2)(B)(ii) is met and approves the termination. Prior to the Court hearing regarding the reorganization distress test, IOD, CFND, or OGC may bring a case to the full TWG for review.

**Route Recommended Termination – Overview**

## 5.0 Cases which must be presented to the full TWG, even if one of the above exemptions is met, include:

**12/07/2001**

1 **PBGC-initiated terminations where** PBGC determines that the plan meets the 4042(a)(4) test for termination, that is, PBGC's possible long run loss is reasonably expected to increase unreasonably if the plan is not terminated.

2 **PBGC-initiated terminations where** the 4042(a)(1) and/or (a)(3) tests are met and there is an ongoing sponsor and/or controlled group member(s) (other than those cases in which PBGC has also determined that the 4042(a)(2) test is met and, within the next six months, a plan will not have assets available to pay benefits when due).

3 **PBGC-initiated terminations where** the 4042(a)(2) test is met and there is an ongoing sponsor and/or controlled group member (other than those cases in which PBGC has also determined that the 4042(a)(2) test is met and, within the next six months, a plan will not have assets available to pay benefits when due).

4 **Distress terminations where** is recommended that the sponsor and/or controlled group member(s) meets the business continuation test, 4041(c) (2)(B)(iii)(I) or the pension costs test, 4041(c) (2)(B)(iii)(II).

5 **Cases where** it is recommended that an application for a distress termination be denied, resulting in the plan remaining ongoing.

6 **Cases where** OGC advises the Chairperson, TWG (at any time prior to the issuance of the Notice of Determination) that review by the full TWG is appropriate (for example, because a termination action may be litigated).

7 **Cases where** the aggregate amount of PBGC's claims for unfunded benefit liabilities equals or exceeds $25 million.

8 **Cases where** there are 5,000 or more participants and beneficiaries in the plans at issue.

9 **Cases where** there is a novel or significant policy issue.

All recommendations for termination of a plan, whether a distress termination under section 4041(c) or a PBGC-initiated termination under section 4042, must include a recommendation for setting an appropriate date of plan termination. The recommendation must include sufficient facts to support the date recommended. The actual date of plan termination may be different from the date recommended. It is important to carefully review TWG minutes in addition to recommendation to ensure the correct date of plan termination is used.

To ensure adequate internal controls and administrative reporting, all recommendations must be presented to the full TWG or be presented to and concurred upon by the TWG Chairperson. All presentations must be coordinated between PPD and OGC.

5.1.A Action Steps: Prepare Recommendation for Routing (Exempt Cases-TWG Chairperson Review)

5.1.B Action Steps: Prepare Recommendation for Routing (Non-Exempt Cases-Full TWG Review)

**Route Recommended Termination**

## 5.1.A Action Steps: Exempt Cases
## Prepare Recommendation for Routing

**06/18/2004**

### TWG Chairperson Review

1 Prepare the TWG Memo/TDR, NOD or Determination Letter, and Trusteeship Agreement (if applicable) with the appropriate Trusteeship Agreement Cover Letter and the *OGC Draft Transmittal (OGCDRTR.doc)*. (See 4.3: Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA). Forward the draft package to PPD Supervisor for review. (PPD Manager does not review draft packages at this stage for exempt cases.)

2 After review, forward to the PPD Program Assistant.

### PPD Program Assistant

3 Enter data into tracking system: case name, case number, financial analyst/ auditor's name, attorney's name, date sent out of PPD and type of termination (distress, PBGC-initiated discretionary or mandatory).

4 Deliver original draft package to OGC file room, keep a file copy in PPD.

### Financial Auditor/Analyst

5 Ordinarily, OGC has 14 calendar days for review. The review is by the staff attorney assigned to the case, the Assistant General Counsel and, under some circumstances, the Deputy General Counsel. If not returned within the 14 days, call OGC to find out the status of the draft package. The 14 day deadline may be extended by PPD and OGC.

6 When the draft package with comments is returned by OGC, it is returned to PPD's OGC inbox (outside room 8729). Notify the PPD program assistant so that the return date can be entered into the tracking system.

7 PPD incorporates OGC comments and submits revised draft package (including OGC's mark-ups) to PPD Supervisor. Following review by PPD Supervisor, revised draft package is sent to OGC file room.

### PPD Program Assistant

8 Deliver the revised draft package to the OGC file room.

9 OGC has up to 5 calendar days to review the revised draft package. The review is by the staff attorney assigned to the case, the Assistant General Counsel and, under some circumstances, the Deputy General Counsel.

### Financial Auditor/Analyst

10 When the revised draft package with comments is returned by OGC it is returned to PPD's OGC inbox (outside room 8729).

11 Make the final changes from OGC. Prepare the package in final form. The final package will include:

- *Termination and Trusteeship Recommendation - Transmittal Form (TRAN2TWG.doc)*
- The TWG Memo to the approving official (i.e., the TWG Chairperson or DED through the TWG Chairperson);
- The TDR with PPD's staff signature;

- An unsigned NOD (in a PBGC-initiated termination case), a signed but undated Distress Determination Letter (in a distress termination case), with addressed envelopes for all who will receive the NOD or Distress Determination Letter;
- Three originals of the Trusteeship Agreement and a signed but undated cover letter to accompany the TA. Include original TAs only, and make sure they are clean, wrinkle free, and stapled. (The TWG office will prepare the mailing and return envelopes for the TAs.)

**12** Forward the final package to the PPD Supervisor and PPD Manager for review.

**PPD Program Assistant**

**13** Prepare the appropriate envelopes for certified return receipt. Assign a TDR number (for control purposes). File a copy of the TWG memo/TDR in the chronological file.

**14** Forward the TWG Memo/TDR, TA, and NOD or Distress Determination Letter to IOD Deputy Director for review and concurrence.

**15** The Deputy Director's office will forward the TWG Memo/TDR to OGC for concurrence. If OGC requests further changes, OGC will notify the PPD Supervisor or PPD Manager. The involved financial analyst or auditor may then make the changes.

**16** OGC has five calendar days to forward the TWG Memo/TDR to the TWG Chair. The PPD supervisor will contact the TWG Secretary to ensure the package has arrived. The TWG Chair will either review and approve, request further information, or direct changes.

OED has delegated authority to the TWG Chair to initiate and effect termination for certain cases exempt from review by the full TWG. (See Process 5: Overview - Cases which are exempt from presentation to the full TWG.) When returned, file a copy of the final paperwork.

**17** The Secretary of the TWG Chairman will forward the TWG Memo/TDR to DED/COO for review and approval when required. DED/COO returns the original to TWG for distribution.

**18** When the documents are returned to PPD, enter the date of TWG Chair or DED/COO approval in the tracking system.

**19** File the copy with all concurrences and the NOD (if applicable) in the chronological file.

**Financial Analyst/ Auditor**

**20** Enter the appropriate data into the TDR Milestone and the NOD date in CAS as appropriate. For a distress termination, complete the Distress Termination Screen. Ensure that correct dates are used:

- NOIT date – from line 6b of Form 601
- Form 601 receipt date – receipt date at PBGC
- NOD Date – enter the date the NOD was issued (for PBGC-Initiated Terminations)

If a Form 601 has not been filed or the NOIT date is not provided therein, contact the Plan Administrator to find out the last date a Notice to Intent to Terminate was provided to Participants and other Interested Parties (other than PBGC) and use that date.

**21** Document all actions in the activity log and/or the plan file and prepare the file for transfer to the TPD. Prepare the *Document Transfer List Memo (TPDTRF.doc)* and gather all of the appropriate documents and information. In most cases, a transfer of all the information is all that is required and a meeting may not be needed. In complex cases, schedule a meeting with the TPD case team (see Process 8.1: Transfer Information from PPD to TPD).

**Route Recommended Termination**

## 5.1.B Action Steps: Non-Exempt Cases (Full TWG Review) 06/18/2004
## Prepare Recommendation for Routing

1 Prepare the TWG Memo/TDR, and the *OGC Draft Transmittal (OGCDRTR.doc)*. (See 4.3: Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA). Forward the draft package to PPD Supervisor and PPD Manager for review.

2 After review, forward to the PPD Program Assistant.

**PPD Program Assistant**

3 Enter data into tracking system: case name, case number, financial analyst/ auditor's name, attorney's name, date sent out of PPD and type of termination (distress, PBGC-initiated discretionary or mandatory).

4 Deliver original draft package to OGC file room, keep a file copy in PPD.

**Financial Auditor/Analyst**

5 Ordinarily, OGC has 14 calendar days for review. The review is by the staff attorney assigned to the case, the Assistant General Counsel and, under some circumstances, the Deputy General Counsel. If not returned within the 14 days, call OGC to find out the status of the draft package. The 14 day deadline may be extended by PPD and OGC.

6 When the draft package with comments is returned by OGC, it is returned to PPD's OGC inbox (outside room 8729). Notify the PPD program assistant so that the return date can be entered into the tracking system.

7 PPD incorporates OGC comments and submits revised draft package (including OGC's mark-ups) to PPD Supervisor. Following review by PPD Supervisor, revised draft package is sent to OGC file room.

**PPD Program Assistant**

8 Deliver the revised draft package to the OGC file room.

9 OGC has up to 5 calendar days to review the revised draft package. The review is by the staff attorney assigned to the case, the Assistant General Counsel and, under some circumstances, the Deputy General Counsel.

**Financial Auditor/Analyst**

10 When the revised draft package with comments is returned by OGC it is returned to PPD's OGC inbox (outside room 8729).

11 Make the final changes from OGC. Prepare the TWG Memo and TDR package.

12 Forward the package to the PPD Supervisor and PPD Manager for review.

13 PPD Manager signs and dates TWG Memo (not TDR) and forwards both to the TWG Chair to establish a TWG meeting.

**PPD Program Assistant**

14 File a copy of the package in the chronological file.

**Financial Analyst/ Auditor**

15 Present case at TWG meeting. After meeting, prepare NOD (for Deputy Directory/ COO

signature), or Distress Determination Letter for a distress termination, Trusteeship Agreement and Trusteeship Agreement Cover Letter. (See 4.3: Prepare TWG Memo, TDR, NOD or Distress Determination Letter, Draft TA).

**16** Forward to OGC File Room for review.

**17** Hold on to prepared documents until final TWG meeting minutes are completed. Upon receipt of minutes, see the TWG office to get original TWG memo back.

**18** Prepare package to be routed for final concurrences and approvals:

- *Termination and Trusteeship Recommendation - Transmittal Form (TRAN2TWG.doc)*
- TWG meeting minutes
- The TWG Memo to the approving official (i.e., the TWG Chairperson or DED through the TWG Chairperson);
- The TDR with PPD's staff signature;
- An unsigned NOD (in a PBGC-initiated termination case), a signed but undated Distress Determination Letter (in a distress termination case), with addressed envelopes for all who will receive the NOD or Distress Determination Letter;
- Three originals of the Trusteeship Agreement and a signed but undated cover letter to accompany the TA. Include original TAs only, and make sure they are clean, wrinkle free, and stapled. (The TWG office will prepare the mailing and return envelopes for the TAs.)

**19** Submit to PPD Supervisor for review and signature, then submit to PPD Division Manager.

**20** PPD Division Manager signs TDR.

**PPD Program Assistant**

**21** Prepare the appropriate envelopes for certified return receipt. Assign a TDR number (for control purposes). File a copy of the TWG memo/TDR in the chronological file.

**22** Forward the TWG Memo/TDR, TA, and NOD or Distress Determination Letter to IOD Deputy Director for review and concurrence.

**23** The Deputy Director's office will forward the TWG Memo/TDR to OGC for concurrence. If OGC requests further changes, OGC will notify the PPD Supervisor or PPD Manager. The involved financial analyst or auditor may then make the changes.

**24** OGC has five calendar days to forward the TWG Memo/TDR to the TWG Chair. The PPD supervisor will contact the TWG Secretary to ensure the package has arrived. The TWG Chair will either review and approve, request further information, or direct changes.

**25** The Secretary of the TWG Chairman will forward the TWG Memo/TDR to DED/COO for review and approval when required. DED/COO returns the original to TWG for distribution.

**26** When the documents are returned to PPD, enter the date of TWG Chair or DED/COO approval in the tracking system.

**27** File the copy with all concurrences and the NOD (if applicable) in the chronological file.

**Financial Analyst/ Auditor**

**28** Enter the appropriate data into the TDR Milestone and the NOD date in CAS as appropriate. For a distress termination, complete the Distress Termination Screen. Ensure that correct dates are used:

- NOIT date – from line 6b of Form 601
- Form 601 receipt date – receipt date at PBGC

- NOD Date – enter the date the NOD was issued (for PBGC-Initiated Terminations)

If a Form 601 has not been filed or the NOIT date is not provided therein, contact the Plan Administrator to find out the last date a Notice to Intent to Terminate was provided to Participants and other Interested Parties (other than PBGC) and use that date.

**29** Document all actions in the activity log and/or the plan file and prepare the file for transfer to the TPD. Prepare the *Document Transfer List Memo (TPDTRF.doc)* and gather all of the appropriate documents and information. In most cases, a transfer of all the information is all that is required and a meeting may not be needed. In complex cases, schedule a meeting with the TPD case team (see Process 8.1: Transfer Information from PPD to TPD).

**Route Recommended Termination**

## 5.2 Initiate Termination and Trusteeship (if applicable) 12/07/2001

**Action Steps**

| | |
|---|---|
| **Purpose** | Notify participants of plan termination to extinguish reasonable expectations of the plan's continuance.<br>Initiate actions to trustee terminated plan. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |

5.2 Action Steps: Initiate Termination and Trusteeship (if applicable)

**Route Recommended Termination**

## 5.2 Action Steps: 12/07/2001

## Initiate Termination and Trusteeship (if applicable)

A. Notify Participants of DOPT | B. Initiate Trusteeship of Terminated Plan

### A. Notify Participants of DOPT

If a DOPT was not established (notice was not provided to participants), written notice of the plan's termination is given to the participants to extinguish their reasonable expectations of the plan's continuance. There are two methods of doing this. Follow the guidance provided by PPD Management.

1 For a larger plan (does not have to meet large case definition) make arrangements to publish a notice in one or more local newspapers. Coordinate this activity with OGC, CPAD and IOD's Customer Service Center (TSD).

2 For a smaller plan prepare and send a *Participant DOPT Notice (PNOTDOPT.doc)* to each participant in the plan, including a copy of the Notice of Determination (NOD) and the appropriate version of "Your Guaranteed Pension".

3 Keep a file copy of each letter in the case file.

**Note:** This letter is not available in ALGS. The brochures are available through DMC, see TP 34.1 Order Supplies from DMC.

### B. Initiate Trusteeship of Terminated Plan

**TWG Office**

1 The TWG office normally will send the TA with the NOD or distress determination letter. The TA will be sent FedEx unless some other method of delivery is requested. If two plans are involved, and the administrator is the same for both plans, one cover letter and one package may be used. (Each plan has a separate TA prepared.)

2 A copy of the TA will be kept in a pending file. If it has not been returned after 15 days, the TWG office will notify the TPD Division Manager, PPD Supervisor and Attorney assigned to the case. If the plan has been transferred to TPD, TPD will follow up with the plan administrator; if the case has not been transferred, PPD will follow up. OGC will assist as appropriate.

3 The signed TA will be returned to the TWG office, and will be date/timed in (on back of document) when received.

4 The TWG office will route the signed TA to the TPD. TPD will sign the TA and distribute a signed original to the plan administrator, OGC and the case file, and a copy to FOD/COD/IAB and to Treasurer FOD.

5 If the signed TA has not been received within 30 days of mailing, the assigned TPD normally will request OGC to commence court proceedings, and will copy the TWG office on the request.

**Court Action**

6 In general, OGC will initiate court proceedings within 60 days after receiving a request from the TPD or after the NOD is issued in cases where it is known that PBGC will need to initiate court proceedings in order to terminate and trustee the plan (e.g., because the administrator cannot be found).

7 OGC will notify the assigned TPD and the TWG office when it files court papers seeking termination and trusteeship.

8 OGC will provide a copy of the court order terminating the plan and appointing PBGC trustee to the assigned TPD, to FOD/COD/GAB, and to FOD/COD/FRAAB.

## PR 06. Monitor Plan

6. Overview

6. Workflow for Process

6.1 Determine Monitoring Criteria

6.2 Obtain Current Information & Update File

Forms, Letters, Memos, etc

## 6. Overview

**05/31/96**

This procedure answers PBGC's need to apply a mechanism for watching plans that have been identified as potentially at risk and, if they terminate, would represent a liability to PBGC. The determination to monitor a plan should come mostly from analysis of the unfunded benefit liability ( UBL) and the sponsor's ability to reduce it. The decision to monitor a plan should not be made in lieu of making a recommendation - after a certain amount of monitoring, the reportable event should either be closed completely or the plan recommended for termination. PPD monitors two things, the financial condition of the plan, and the financial condition of the controlled group, while looking for negative developments that warrant termination. Always consider the possibility of long run loss to PBGC. Recommendations and decisions will be based on the facts and circumstances of each case as analyzed by the person monitoring the case and his or her supervisor.

## Click Here for More Information...

6.1 Action Steps: Determine Monitoring Criteria

**Monitor Plan**

## 6.1 Action Steps: 05/31/96
## Determine Monitoring Criteria

1 **Determine an action plan with the supervisor.** Plans that require monitoring are those that are ongoing, pose no immediate risk at this time, but have a potential for risk, and currently do not meet the criteria for termination. Normally they will have $5 million or more in UBL, be in reorganization, or have been identified by OGC or OED for monitoring. Determine an action plan with the supervisor. Plans that require monitoring are those that are ongoing, pose no significant risk at this time, but have a potential for risk, and currently do not meet the criteria for termination. Normally they will have $5 million or more in UBL, be in reorganization or have been identified by OGC or OED for monitoring.

2 **Close the case in CAS.** Continue to use the comments section in CAS, as needed. Do not ship the records to storage. Send a letter to the sponsor or trustee explaining that PBGC will be monitoring the case and that request information (see step 4 and *Monitor Letter (MONITOR.doc)*) will be provided on a continuing basis.

3 **Assign a frequency to review current information.** This will normally be quarterly, but is based on personal experience, supervisor's recommendations and the availability of information. Set up a calendar or "tickler file" for reminders of when to review information or when information should be received. Assign a frequency to review current information. This will normally be quarterly, but is based on personal experience, supervisor's recommendations and the availability of information. Set up a calendar or "tickler file" for reminders of when to review information or when information should be received.

4 **Identify company information necessary for monitoring.**
Get the information for each identified controlled group member, also.

Use the following sources:

- D&B (company can be flagged for special events)
- Financial statements (quarterly and annually)
- Most recent tax returns
- 5500s and Avers
- Proof of payments/contributions (quarterly)
- Bloomburg (for publicly traded companies)
- LEXIS (through OGC)
- Standard and Poor (CD ROM in CFND)

5 Identify plan information necessary for monitoring.

- Status of premium payments (from FOD/CCD)
  - Information from bankruptcy trustee (when in reorganization)
  - Any other information, as required

**Monitor Plan**

## 6.2 Obtain Current Information and Update File 05/31/96

Action Steps

| | |
|---|---|
| **Purpose** | Maintain current information in plan file and justify completely closing case or recommending termination. |
| **Time Reporting (BMPRS)** | Small Plan Early Warning Program<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Current information on company and plan. |
| **Output and Recipient** | Up to date information. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor or financial analyst assigned to case and Supervisor. |

## Click Here for More Information...

6.2 Action Steps: Obtain Current Information and Update File

**Monitor Plan**

## 6.2 Action Steps: 05/31/96
## Obtain Current Information and Update File

1 Maintain contact with the plan administrator or bankruptcy trustee to discuss the status of the plan from their perspective. Review information received from plan sponsor, D&B, etc.

2 Provide to supervisor on a periodic basis for review.

3 Take appropriate action based on any change in status.

- If the situation has changed for the better and there is no need to consider termination, go to Process 4.2: Close Case. Note that for companies undergoing reorganization, continue monitoring until the terms of the POR have been met. If monitoring at the request of OGC or OED, discuss with the requester prior to taking action to cease monitoring. Send a letter notifying the plan sponsor when monitoring is no longer required.
- If the situation has changed for the worse, document the finding in the file and get additional information.
  (See Process 11.3 Conduct Preliminary Field Audit and/or
  Appendix F: Alternative Sources of Plan Information, if required).
  Follow Process 2.3: Request new DUEC and UBL, if necessary, and go to
  Process 3: Determine Financial Condition of the Plan and Analyze Controlled Group
  to restart the process toward termination.
- If the situation is unchanged, continue monitoring the plan.

4 Document all actions and contacts in the activity log and/or plan file and notify OGC of changes in status. Use the Comments section of CAS, as required. File copies of all documents received.

## PR 07. Initiate PPD/TPD Coordination

7. Overview

7. Workflow for Process 7

7.1 Initiate TPD Involvement

 Forms, Letters, Memos, etc.

## 7. Overview

**08/31/2001**

Early in IOD's reorganization, "dual" assignment of cases only occurred when: payees were out of pay status, the plan was abandoned, or records or assets were in danger. Dual assignment of a case with PPD and a TPD case team, is now the rule rather than the exception, where plan termination criteria have been established and the PBGC is moving to terminate the plan and be appointed trustee.

Once it is known that a TPD needs to be assigned, the PPD Audit Supervisor contacts the TPD's Division Manager and Associate Division Manager and requests the TPD case team member information.

The PPD Manager and Audit Supervisor are notified of the case team members, and the PPD Manager makes the assignments on CAS. PPD still has ownership of the case and will continue to process it toward termination until the Notice of Determination (NOD) is signed or the distress termination is approved.

Good communication and coordination of activities between PPD and the TPD ensures smooth processing and eliminates redundant data collection efforts with the plan sponsor and other sources of information. While the case is owned by PPD, the PPD analyst or auditor is the team's point for coordination of data collection efforts. The PPD analyst or auditor assigned to the case briefs the TPD case team and reviews the documents requested and received.

After PPD completes their processing, ownership of the case moves fully to the TPD, see Process 8.2 Assign TPD Case Team.

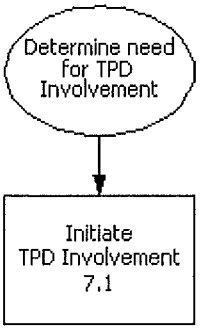
Pre-Termination Processes

Initiate PPD/TPD Coordination

Browse Workflows: 

## 7. Workflow for Process 7

08/31/2001



**Initiate PPD/TPD Coordination**

## 7.1 Initiate TPD Involvement

**08/31/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Assign TPD case team while case is still owned by PPD. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that a recommendation for termination and trusteeship is probable. |
| **Process Output and Recipient** | **CAS Activity:** TPD case team, including FBA if applicable, assigned on CAS by PPD. |
| **Control Issues** | While ownership of a case is in PPD, the TPD case team must be established on CAS by the PPD Manager. The PPD analyst or auditor is the mail and phone point of contact (POC). After the case is transferred by PPD, the TPD Manager re-assigns the POC duties. The case team member data stored in CAS is used by other IOD systems to identify responsible parties. These IOD systems include: PRISM, SCoRe, CCN and STaRS. |
| **Important Concepts** | Getting an earlier start on participant and plan processing is another IOD streamlining initiative to reduce the overall case cycle time. Efficient case processing facilitates improved customer service, as IOD is able to deliver participants better information earlier about their plan and its termination, as well as their benefits.<br><br>Timing: For cases where trusteeship is certain, it is best to involve a TPD as early as possible - typically within 90 days of receipt of a case. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor or financial analyst in charge of case, PPD Manager and PPD Audit Supervisor. |

## Click Here for More Information...

7.1 Action Steps: Initiate TPD Involvement

**Initiate PPD/TPD Coordination**

## 7.1 Action Steps: 08/31/2001
## Initiate TPD Involvement

**Auditor or Financial Analyst**

1 Determine whether immediate TPD (and Large Case Working Group if a large case) involvement is appropriate. For most plans, if PPD is reasonably confident that the plan will be terminated and trusteed by PBGC, and that an early start to TPD processing may reduce the overall time needed to complete case processing, a TPD case team will be established relatively early while a case is still being processed by PPD.

2 Notify PPD Audit Supervisor that a TPD should be assigned. If the size of the plan indicates it will be an FBA plan, take appropriate action for FBA procurement, see Process 4.7: Request FBA Procurement.

**PPD Audit Supervisor**

3 Determine TPD assignment. Cases are assigned among the TPDs on a rotating basis, with the exception of large cases. For a large case, see IOD Deputy Director for TPD assignment.

4 Send e-mail message to assigned TPD Manager (DM) and Associate Division Manager (ADM) including the following information:
Case No.
Plan Name
Name of Sponsor
Number of Participants
PPD Lead
OGC Attorney

**TPD Management**

5 Upon receipt of the e-mail from PPD, the DM or ADM assigns a Team Leader to the case.

6 The Team Leader (in consultation with the DM or ADM) assigns the TPD Case team: auditor, actuary, PLS, PBA, and FBA if an FBA plan.

7 Team Leader e-mails the PPD Manager and Audit Supervisor the names of the following:
Team Leader
Actuary
Auditor
PLS
PBA
FBA

**PPD Manager**

8 Make team member assignments on CAS based on e-mailed information. Designate PPD financial analyst or auditor as mail and phone point of contact (POC) for case.

9 Pass on all relevant information and copies of documents to the TPD case team.

## Introduction to Initial TPD Processes

The Initial TPD Processes describe how a TPD takes ownership of a case and begins acting as trustee of the plan. In addition to the administrative procedure of assigning responsibilities among TPD staff, initial TPD processes include assuming benefit payment responsibility and making adjustments to benefits so that benefits being paid are in accordance with Title IV ERISA guarantees. Assuming benefit payments may take place prior to the termination and trusteeship of a plan. In those cases, it is relatively certain that the plan will be terminated soon.

8.3 Effect Trusteeship

Forms, Letters, Memos, etc.

## 8. Overview

**08/31/2001**

Refers cases to a TPD when it is apparent that termination and PBGC trusteeship is likely. Often, this create a dual processing situation. PPD still has ownership of the case until the Notice of Determination (NOD) is signed or the distress termination is approved and the case is transferred on CAS.

Ongoing communication between the divisions eliminates duplication of effort, particularly multiple requests to the plan administrator, plan sponsor and other sources of the same information.

Communication regarding the final case transfer to the TPD always includes Document Transfer List Memo (includes Transfer Checklist) and the Case Contact Sheet. The team should carefully review all collected data and ensure that necessary information is imaged to IPS. Depending on the size and complexity of the case, an initial meeting between PPD and the TPD may be held. Note that the transfer of information from PPD to the TPD may have begun earlier, as dual processing becomes more routine with most cases (see Process 7.1: Initiate TPD Involvement.)

Some processes are different when obtaining plan information prior to trusteeship. One large difference is that PBGC normally obtains only copies of plan documents prior to trusteeship. Taking originals of documents that are strictly plan related is acceptable, but copies are preferred. (As clarification, PBGC obtains only copies of personnel records, even post-trusteeship, except when the records are in danger. However, since there may be some ambiguity regarding records that can be both personnel records and participant-related pension records, choose copies over originals whenever possible.) This is to prevent PBGC from becoming the de facto custodian of the records, which could lead to involvement in lawsuits. Another difference is that, prior to trusteeship, PBGC cannot direct a plan administrator to adjust benefits; however, we can request that the plan administrator make adjustments. After issuance of an NOIT in distress filings, the reduction of monthly benefits to Title IV levels is a requirement. Also, plans may not pay out any lump sums after issuing the NOIT for a distress termination. One area that is not different between pre- and post-trusteeship is PBGC's authority to request or subpoena information.

8.1 Action Steps: Transfer Information from PPD to TPD

**Assign TPD Case Team and Initiate Processing**

## 8.1 Action Steps: 08/31/2001

## Transfer Information from PPD to TPD

1 Use the *Document Transfer List Memo (TPDTRF.doc)* to review the plan file and for the hand-off meeting, if one is held. Whether a meeting is held, or just a transfer of the written material occurs, the idea is to obtain a complete understanding of the plan status and transfer of all information available at the time. Then, as more information comes in, whatever is relevant should be shared between the two divisions. In some cases, PPD will not have much information or many documents. If the meeting takes place late in the process or after determination of trusteeship, the transfer of information and materials will be greater, but should still cover all information and materials available. Identify as many of the following as possible:

- Inventory of documents already obtained (and access to or copies of documents, as needed); copies of all plan documents are especially critical
- Identity of plan administrator or bankruptcy trustee and contact information
- Status and location of plan assets
- Location of pension records, personnel files, check registers
- History of actions taken by PPD and results
- PPD proposed schedule for any remaining PPD processing
- Identity of OGC attorney for case
- Status of bankruptcy filings, if applicable
- List of points of contact, addresses, and telephone/fax numbers for paying agent, plan sponsor, plan administrator, bankruptcy trustee, attorneys, actuaries, union representatives, etc. Include sources for electronic records. Most of this information should be included in the *Case Contact Sheet (Contacts.doc).*
- List of any legal or policy issues (working retirement issues, shut-down determination, etc.).
- Task(s) to be performed by the TPD and timing
- Plan of Action (normally developed in the meeting or by phone or e-mail)

2 Review all case information, determine what will be retained in file (IPS). Index and submit to DMC for imaging to IPS. See TP 34.2 Submit Documents for Imaging.

3 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Assign TPD Case Team and Initiate Processing**

## 8.2 Assign TPD Case Team

**08/31/2001**

Action Steps

| | |
|---|---|
| **Purpose** | Establish assignment of all TPD disciplines and an FBA if necessary, in CAS. Ensure equitable distribution of workload among TPD staff. Prepare a work plan for each case based on the expected processing cycle. |
| **Time Reporting (BMPRS)** | FTE Initiate Trusteeship Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Notice from PPD that termination and trusteeship of the plan is imminent. Notice of assigned FBA if applicable. |
| **Process Output and Recipient** | Case team assignments established in CAS.<br>Workplan for case processing developed.<br>**CAS Activity:** All CAS milestones assigned to case team members. Mail and phone POC duties assigned. |
| **Control Issues** | N/A |
| **Important Concepts** | Generally, a TPD case team was established while the case ownership (per CAS) was still with PPD, see Process 7.1: Initiate TPD Involvement . Transfer of the case from the PPD to the TPD happens quickly so point of contacts (POCs) can quickly be assigned re-assigned on CAS. This reduces the possibility of delayed customer service. The case team member data stored in CAS is used by other IOD systems to identify responsible parties. These IOD systems include: PRISM, SCoRe, CCN and STaRS. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Division Manager or Team Leader, Deputy Director, IOD and Large Case Coordinator, TPD Case Team. |

## Click Here for More Information...

8.2 Action Steps: Assign TPD Case Team

**Assign TPD Case Team and Initiate Processing**

## 8.2 Action Steps: 08/31/2001

## Assign TPD Case Team

Often a TPD case team will have been assigned while the case was still in PPD, see Process 7.1 Initiate TPD Involvement. At this stage, the case is in the process of being terminated and trusteed and is being transferred fully to the TPD to continue processing the plan and participants through closing (see Introduction to Case Closure Processes.)

**Division Manager**

1 Review CAS information (to ensure that all milestone dates have been entered) and the plan file to determine the complexity and size of case.

**Note** If a Large Case Working Group (LCWG) is necessary, PPD should have already contacted the Large Case Coordinator to establish this. See Process 4.4: Form Large Case Working Group (If Required).

2 Review the team assignments on CAS, notify team leader.

**Team Leader**

3 Review CAS team assignments, ensure all required disciplines are assigned: auditor, actuary, PLS, PBA, and FBA if an FBA plan. Designate the mail POC and phone POC.

4 Assign all default TPD milestones on CAS within the disciplines (auditor, actuary, and PLS).

**TPD Case Team - for FBA Plans**

(Once developed, the FBA Workplan is updated quarterly.)

5 Hold a case team meeting, including the TPD Management and FBA Management to determine a reasonable cycle for case processing. Use video conferencing if available, if not, use telephone conferencing for FBA staff.

6 Prepare an *FBA Workplan (FBAWorkplan.xls)* for the plan, for submission to MCU as soon as possible. Observe the guidance regarding dates and routing for approval and submission to MCU provided in TP 35: Update FBA Workplan.

7 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Note** For non-FBA plans, the TPD case team follows steps 5 & 6 above, except that an FBA is not included, **and** the workplan is only for the TPD use, and is not filed with MCU. Updates to the case workplan are done periodically as determined by TPD Management.

**Assign TPD Case Team and Initiate Processing**

## 8.3 Effect Trusteeship

**10/10/97**

**Action Steps**

| | |
|---|---|
| **Purpose** | Effect trusteeship of the plan. |
| **Time Reporting (BMPRS)** | FTE Initiate Trusteeship Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Signed NOD or approved Distress Termination<br>OGC-reviewed trusteeship agreement prepared by PPD |
| **Output and Recipient** | Executed trusteeship agreement. Recipients include: outside signer, prior paying agent, any relevant union (when required), outside counsel, insurance companies, FOD, Large Case Coordinator (if applicable) and OGC. |
| **Control Issues** | Review documents for authenticity and completeness.<br>If the outside signer modifies the agreement, refer it to OGC to determine if PBGC should execute the agreement as modified or start again.<br>Verify that the correct outside signer signed the agreement. |
| **Important Concepts** | The TA is prepared by PPD and/or OGC and mailed to outside signatories by the TWG office. All three originals of the trusteeship agreement must be signed.<br>The second signature (PBGC's--usually the TPD auditor) actually executes the agreement and determines the date of trusteeship (DOTR ). |
| **Guidance** | ERISA 4041 and 4042 |
| **Procedure Owner** | TPD Auditor, TPD Manager, Team Leader |

## Click Here for More Information...

8.3 Action Steps: Effect Trusteeship

**Assign TPD Case Team and Initiate Processing**

## 8.3 Action Steps: 02/18/2005

## Effect Trusteeship

1 Upon receipt of the executed trusteeship agreements from the outside signer, sign and date the Trusteeship Agreements. Notify the Team Leader so that the signing date can be entered on CAS (finalize the Trusteeship Agreement Milestone). If the outside signer invalidates or nullifies the Trusteeship Agreement, return the original to OGC and file a copy in the plan file.

2 Prepare and send an *Executed Trusteeship Agreement Cover Letter (Extacvlt.doc)* forwarding an original of the executed trusteeship agreement to the outside signer. Prepare and send a C*ourt Ordered Trusteeship Cover Letter (Cotruscl.doc)* forwarding the order, for court ordered trusteeships.

3 Send an e-mail message to Treasurer, FOD Treasury Division (FOD/TD) and FOD Controller Operations Division/Investment Accounting Branch (FOD/COD/IAB) to notify them of the PBGC date of trusteeship. Follow up with a memo (see next step).

4 Distribute the signed Trusteeship Agreements with a *Trusteeship Agreement Transmittal Memo (Tragtran.doc)* for internal distribution as follows:

| | | |
|---|---|---|
| • | original | OGC (attorney assigned) |
| • | original | plan file |
| • | copy | Deputy Director, IOD |
| • | copy | Large Case Coordinator (when applicable) |
| • | copy | FOD Treasury Division (FOD/TD) |
| • | copy | FOD Investment Accounting Branch (FOD/IAB) |

In the case of court ordered trusteeships, OGC will already have the original. Address the *Court Ordered Trusteeship Agreement Transmittal Memo (Tragtrco.doc)* to FOD/COD/IAB.

5 Send the *4042(d) Notification of Trusteeship Letter to Interested Parties (4042DIP.doc)* letter to all interested parties, as described in 4042(d). Interested parties on a case may include:

- Plan sponsor,
- Controlled group members,
- Bankruptcy trustee,
- Actuary,
- Auditor,
- Union(s),
- Bank,
- Accountant,
- Insurance company, and
- Prior paying agent.

This letter provides the statutorily required notice that PBGC is terminating and trusteeing the plan.

**Note** Providing 4042(d) notice to participants is handled separately (see Process 9.13: Notify Participants).

6 Prepare a *Premium Information Request Memo (Preminfo.doc)* and send it to Financial Operations Department, Collection and Compliance Division, Review and Collection Branch. This memo requests that FOD calculate the amount of unpaid PBGC premiums, interest, and penalty due as of DOPT (needed for Plan Asset Audit--see Process 15: Audit Plan Assets) **and** DOTR (needed for recovery valuation--see Process 16: Value Recoveries & Allocate to Claims).

7 Notify all TPD case team members that trusteeship has been effected. Provide DOPT and date of trusteeship. Ensure correct DOPT is used. (May differ from date contained in original recommendation.)

8 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Court Ordered Trusteeship**

9 Work with the OGC attorney assigned to the case.

10 When trusteeship has been effected, proceed with steps 6-8.

## 8.4 Forms, Letters, Memos, etc.

**02/18/2005**

**Note** After opening a file listed below, use **File / Save As** to give appropriate name and save with other case-related files. To switch between the file and the *online IOD Procedures Manual*, press **ALT+TAB**.

9.12 Review and Authorize Status A Datahub Load

9.13 Notify Participants

 Forms, Letters, Memos, etc.

**Plan Assumption**

## 9.0 Overview

**02/18/2005**

When assuming a new plan, a primary objective of PBGC is to ensure participants continue to receive their benefit payments without interruption. The Trusteeship Processing Divisions (TPDs) must work closely with the plan administrator and the plan's paying agent to ensure a smooth transition of the benefit administration functions to PBGC. A brief description of the process follows.

The TPD occasionally must remind the plan administrator of his or her responsibility to administer the plan during its transition to PBGC, and sometimes to request a transfer of funds to the interim paying agent to continue payments. These processes are covered in Process 9.1: Request Plan Administrator to Continue Payment Processing and Process 9.2: Prepare and Transmit Funding Memo , respectively.

For most plans, the TPD begins by obtaining from the plan administrator and/or paying agent the data needed for PBGC to assume payments (see Process 9.3: Obtain Participant Payment Data). The TPD usually routes this data to OASD to load into PRISM through Datahub, but the TPD may load plans manually (Process 9.4: Initiate First Pay Load). With Datahub loads, OASD initially converts the data to the standard pre-load format (see Process 9.6: Prepare First Pay Data for TPD Review, which also covers OASD's role in the following Datahub load). The TPD reviews and edits this pre-load data on the intranet using DAS, reconciles it to the data source (usually the check register), and then requests that OASD load the data into Datahub (Process 9.7: Review and Reconcile First Pay Datahub Pre-Load Database). The TPD then reviews the data and authorizes the final load into PRISM Genesis with their first PBGC payment date (Process 9.8: Review and Authorize First Pay Datahub Load).

The TPD loads the Status A participants (non-payees) in a similar manner. Occasionally, payees also may be loaded as Status A's initially in order to mail letters earlier using eALG. The TPD's role in Status A loads is covered in Processes 9.9: Initiate Status A Participant Load, Process 9.11: Review Status A Datahub Pre-Load Database, and Process 9.12: Review and Authorize Status A Datahub Load. OASD's role is covered in Process 9.10: Prepare Status A Data for TPD Review.

When electronic data is not available for a Datahub load, the TPD submits the participant data on paper through the Datahub Coordinator in RSD. The Datahub Coordinator maps and forwards the data (Process 9.5: Review and Map Data for Datahub Load) to the Document Management Center to begin the manual data entry. OASD coordinates the remaining steps with the TPD.

Once participants are loaded into PRISM, the TPD notifies them of PBGC's trusteeship of their plan and requests data from them. Payees are also notified of the change in paying agent and any changes to their payments. These initial letters are covered in Process 9.13: Notify Participants.

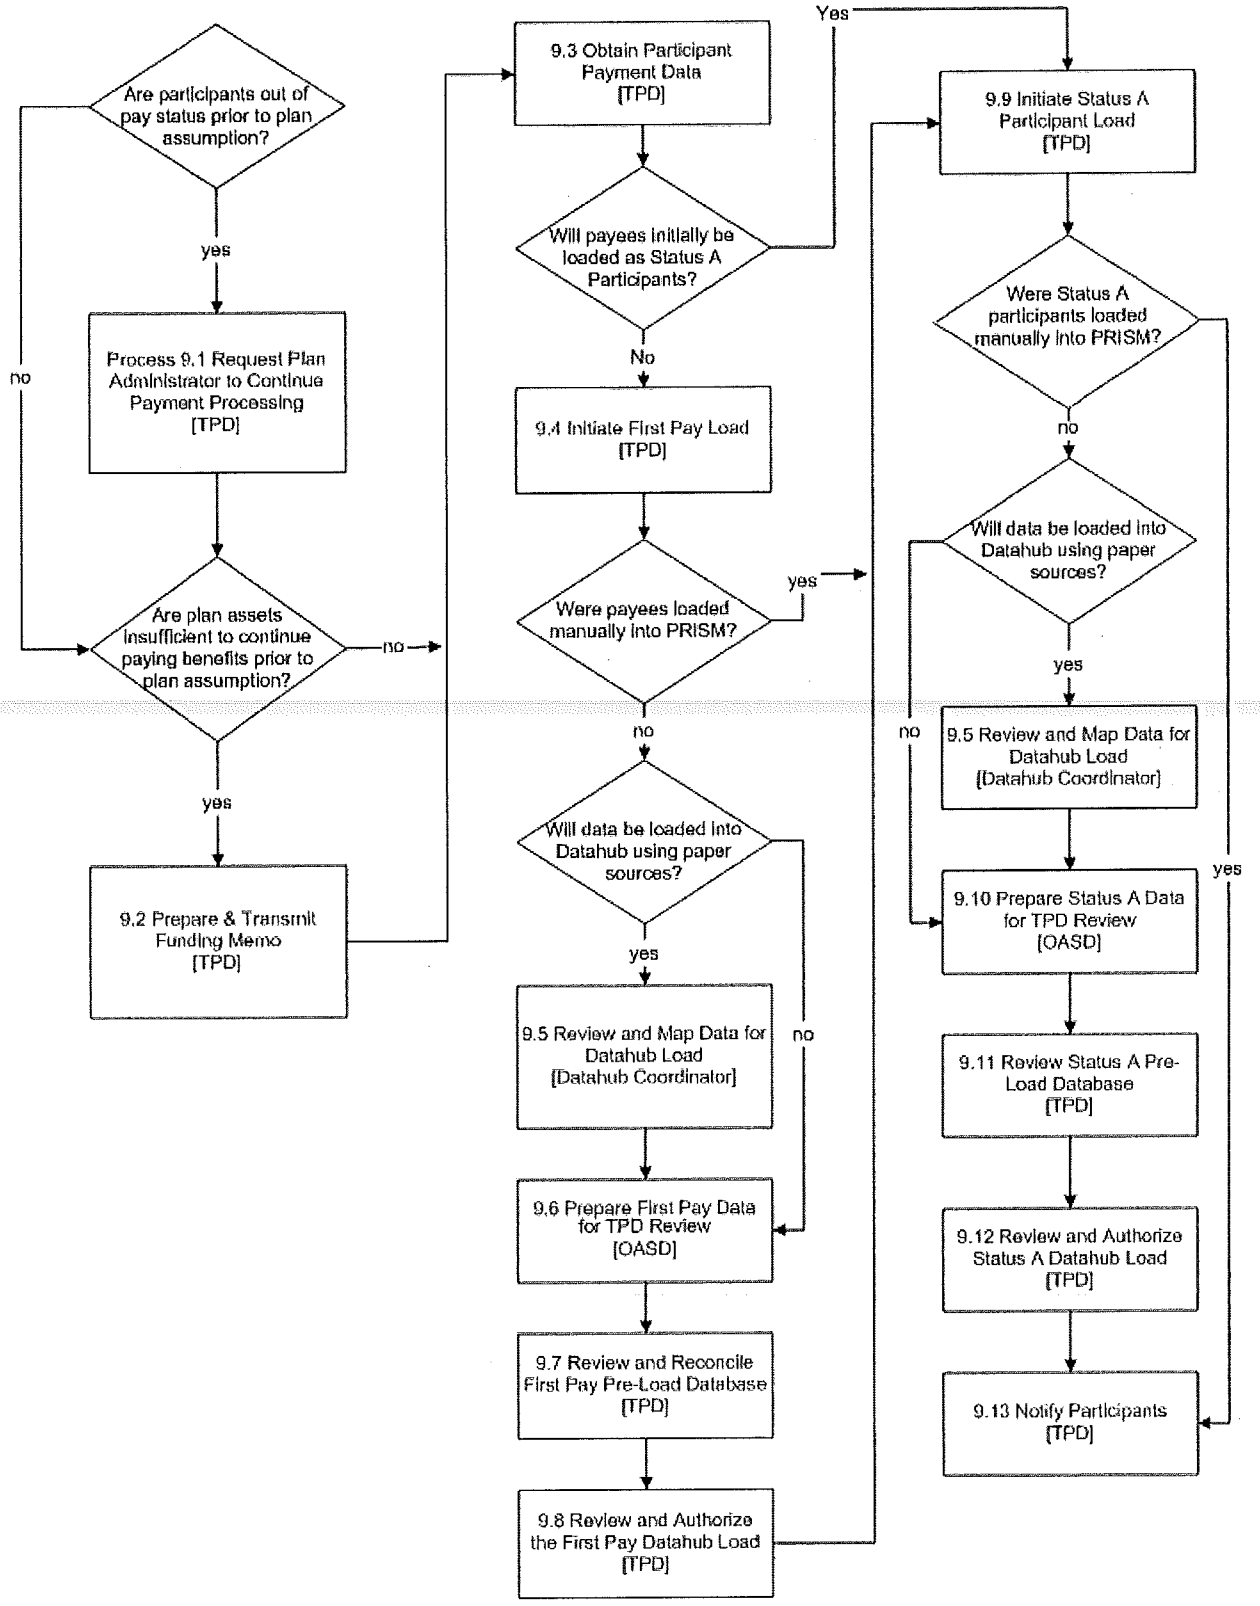
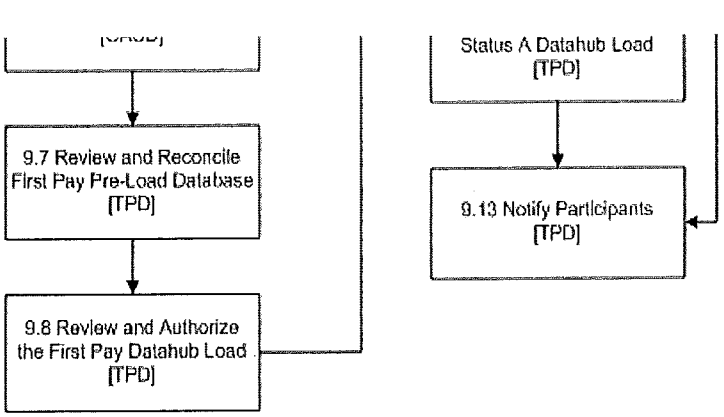
## Plan Assumption

# 9.0 Workflow for Process 9

02/18/2005





[GAUD]
9.7 Review and Reconcile First Pay Pre-Load Database [TPD]
9.8 Review and Authorize the First Pay Datahub Load [TPD]
Status A Datahub Load [TPD]
9.13 Notify Participants [TPD]

**Plan Assumption**

## 9.1 Action Steps: 02/18/2005

## Request Plan Administrator to Continue Payment Processing

| | |
|---|---|
| **Purpose** | To ensure continued payments to retirees prior to PBGC's assumption of payment responsibility by informing the plan administrator of his or her fiduciary duty. |
| **Procedure Owner** | PLS, Auditor |
| **Guidance** | PBGC Operating Policy Manual 5.4-7 Annuity Benefit Forms |

This procedure is used when participants are out of pay status or if there is reason to doubt whether a plan will be administered effectively up to the date PBGC assumes payments.

1 Determine the plan administrator from Division of Insurance Supervision & Compliance (DISC), the case auditor, or a review of the pension plan documents.

2 Call the plan administrator to verify the following:

- The plan administrator (or designated representative) is still performing day-to-day duties and willing to continue paying retirees. In certain bankruptcy cases, a Trustee may assume responsibility for plan administration or designate another person.
- Plan assets are sufficient and available to continue paying retirees until PBGC assumes payments.

3 If the plan administrator is willing to continue paying retirees and perform the day-to-day duties, request that the plan administrator/plan sponsor:

- Continue paying retirees.
- Pay no lump sums (applies only after DOTR).
- Place new retirees into pay status as they become eligible until trusteeship occurs. After trusteeship, direct the plan administrator to refer all new retirees to PBGC so that BAPD can put them into pay status through PBGC's paying agent.
- Forward a copy of the most current monthly check register, including information about electronic payments, and a check register for each subsequent month until PBGC assumes payments.
- Keep PBGC advised of any payment changes (new payees, deaths, etc.).
- Await further instructions from PBGC.

4 Send the *Plan Administrator Request Follow-up Letter (Pareqfol.doc)* to document the call and restate all the points discussed. Image a copy to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files).

5 If the plan administrator indicates plan assets are insufficient to continue payments, initiate PBGC funding of the plan. See Process 9.2: Prepare & Transmit Funding Memo.

6 Monitor the monthly check registers as received through the date PBGC assumes payments to verify that payees continue to receive their benefits. Identify any changes to the check register totals due to new payees entering pay status, deaths, etc. Note that participants who apply for benefits after DOTR should apply to PBGC to be placed into pay status (see TP 20: Put a New Payee into Pay Status).

7 If there is no longer a functional plan administrator (the plan is abandoned) or he/she is uncooperative:

- Expedite assumption of payment responsibility by PBGC. Go to Process 9.4: Initiate First Pay Load. If the plan is not yet trusteed, the concurrence of the Director, BAPD is required.
- Ensure that retirees continue to receive uninterrupted benefit payments prior to payment assumption. Coordinate with the paying agent if possible. If the paying agent is cooperative but plan assets are insufficient, go to Process 9.2: Prepare & Transmit Funding Memo.
- If the paying agent is also not functional or is uncooperative, initiate off-cycle payments to retirees (see TP 29: Request Off-Cycle Payment). Note that payees must be loaded into PRISM and the plan account opened at SSC before off-cycle payments can be made. Notify the payees via eALG of the change in paying agent (see Process 9.13: Notify Participants).

**Plan Assumption**

## 9.2 Action Steps: 02/18/2005

## Prepare and Transmit Funding Memo

| | |
|---|---|
| **Purpose** | To wire funds to the interim paying agent of a plan with insufficient assets to continue paying retirees until PBGC assumes payment responsibility. |
| **Producer Owner** | PLS |
| **Timing** | Funds must be transferred according to the paying agent's deadline. |

This procedure is used only if the plan has insufficient assets to continue to pay retirees before PBGC can assume payments.

1 Receive notification that participants are already out of pay status or will be if funds are not provided. This may come from one of several sources:

- The case team receives a CAS task referral from Division of Insurance Supervision & Compliance, with the name, address, and phone number of the paying agent; and authorization for PBGC to provide funds. This normally occurs prior to trusteeship.
- Receive notice from another source (interim paying agent, plan administrator, etc.) that the plan has insufficient assets to continue payments prior to PBGC assuming payment responsibility. This may also be prompted by a call from a participant who did not receive a payment.

2 Call the interim paying agent (IPA) to coordinate the transfer of funds from PBGC so that the IPA may continue to make uninterrupted payments to retirees. Explain that a letter is needed from the IPA to PBGC requesting the exact amount of funds needed and providing relevant information:

- The number of payees, payment due date, and the date by which funds must arrive to meet the deadline for the paying agent's check cycle.
- Wire transfer information, including: bank name and address, ABA routing number; account number; name and phone number of contact; and the name of the plan administrator, bankruptcy custodian, or other person in charge of the plan.
- Request that the IPA fax the letter to expedite the process, and follow up with the original.

3 Issue the *Prior Paying Agent Information Letter (Ppainfo.doc)* to follow up the conversation and document the phone call. Fax the letter to expedite the process, and follow up with the original. Also image a copy to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files).

4 Upon receipt of the request for funds, ensure that the IPA has provided adequate documentation to verify the information in the letter. Follow up for any missing information.

5 Create the *Benefit Funding Memo (Funding.doc)* to initiate the transfer of funds:

- Attach a *Concurrence Form (Concurr.doc)* and a copy of the IPA's request letter.
- Prepare the funding memo for the TPD Manager and Deputy Executive Director/Chief Operations Officer's (DED/COO) signatures if over $10,000 and the plan is not yet trusteed.
- For all other situations, prepare the funding memo for the TPD Manager and BAPD

Director's signatures.

6 Walk the memo through the approvals to expedite the process. Image a copy of each approved document to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files). The BAPD Deputy Director keeps a log and copies of all signed funding memos for internal control purposes.

7 Call the Branch Chief, Financial Operations Department, Controller Operations Division, General Accounting Branch (FOD/COD/GAB) to determine which staff member will act on the funding memo.

8 Hand deliver the approved funding memo to the assigned staff member in FOD/COD/GAB. Request confirmation of expected date of the wire transfer, and either a copy of the funding memo or an e-mail confirmation when it is sent.

9 Call the IPA and give the expected date of receipt of the funds. Request a courtesy return call when they receive the funds.

10 If no confirmation of the wire transfer is received, call the contact in FOD/COD/GAB to confirm the date the funds were wired. If there is a change in the due date, notify the IPA immediately.

11 Reconcile the amount of money transferred to the IPA to the total amount of benefits to be paid. Prepare a memo to file documenting the reconciliation and place in the IPS plan file.

12 For post-trusteeship cases, accelerate the transfer of payment responsibility to PBGC.

**Plan Assumption**

## 9.3 Action Steps: 02/18/2005

## Obtain Participant Payment Data

| | |
|---|---|
| **Purpose** | To obtain the data necessary for PBGC to assume payment responsibility for a plan. |
| **Procedure Owner** | PLS |
| **Guidance** | PBGC Operating Policy Manual 5.4-3 Frequency of Benefit Payments |

1 Determine whether there are currently payees in pay status in the plan. If so, continue with this procedure. If there are no payees, proceed as follows:

- Note on the *Plan Assumption Reconciliation Report (planasmprec.doc)* that there are no payees and obtain TPD management concurrence. Image the report to the case file in IPS (see TP 16: Establish & Maintain Plan & Participant Files).
- Update the Plan Assumption Milestone in CAS.
- Proceed to load non-payees in the plan (see Process 9.9: Initiate Status A Participant Load).

2 Call a case team meeting to determine the date of PBGC's first payment. Use the following considerations as general guidelines, as applicable:

- How soon the interim paying agent can provide the payee data.
- The timing requirements for submitting the data for Datahub loads or payment cutoff date for PRISM loads (see Process 9.4: Initiate First Pay Load).
- The Date of Trusteeship (DOTR). PBGC's goal is to assume payments within 90 days of DOTR.
- The sooner payments are assumed, the sooner participants will be notified of their eligibility for the Health Coverage Tax Credit (see TP 46: Health Coverage Tax Credit (HCTC)).

3 Call the interim paying agent and state that PBGC will transfer payment responsibility to its paying agent (SSC), and provide the date of PBGC's first payment. Inform the paying agent that a letter will be sent to follow up the phone conversation, and briefly describe the items requested in both paper and electronic format ("raw" data in ASCII delimited text format) in the *Notification Letter to Prior Paying Agent (Notifppa.doc)*:

- Current payee data, including plan assumption data elements needed. (This is sometimes referred to as the "successor extract" which includes a "data dictionary".)
- Copies of check registers from the month prior to the date of plan termination (DOPT) through the date of the interim paying agent's last payment.
- A list of payees who have gone into pay status since DOPT, and of payees whose benefits have ceased since DOPT (due to death, C&C annuities which have expired, etc.).
- A list of payees whose benefits are subject to QDRO provisions, tax levies, or court attachments.
- A list of participants with purchased annuities. If a separate list is not available, they

should be clearly identified in the check register to distinguish them from the payees whose benefits PBGC will assume.

4 Customize and issue the *Notification Letter to Prior Paying Agent (Notifppa.doc)* on the day of the telephone conversation. To expedite, send by fax and follow up with the original. Image a copy of the letter to the plan file (see TP 16: Establish & Maintain Plan & Participant Files), and send a copy to the following:

- TPD Manager
- TPD Case Auditor
- Branch Chief, FOD/COD/IAB
- Trust Accountant, FOD/COD/IAB
- Asset Transfer Group, FOD, Treasury Division

**Important:** Notify FOD of any change in the date of PBGC's first payment.

5 Send an e-mail to the case team confirming the date of PBGC's first payment.

6 Upon receipt of the payee data:

- Review the data and ensure that all the information requested is included. Follow up for any missing or incomplete data.
- Provide the list of payees to the case actuary to review for benefit adjustments (see Process 10: Adjust Benefits).
- Each month, notify **all** case team members who will be involved in loading or reviewing the First Pay load of any changes in the payment data. This will help to ensure that new payees receive their payments, and to prevent payments to payees who die before payment assumption.

7 Prepare to load the payees through Datahub or PRISM online applications. Proceed to Process 9.4: Initiate First Pay Load.

**Plan Assumptions**

## 9.4 Initiate First Pay Load

**02/18/2005**

| | |
|---|---|
| **Purpose** | To initiate the load of First Pay data through either Datahub or PRISM online applications. |
| **Procedure Owner** | PLS, Team Leader |
| **Guidance** | Datahub User Manual<br>Datahub Administration System help page<br>Benefit Payment Schedule on intranet<br>Operating Policy 5.4-3 Frequency of Benefit Payments |
| **Timing** | Loading participants early allows eligible participants earlier access to their benefits under the Health Coverage Tax Credit. See TP 46: The Health Coverage Tax Credit (HCTC) for more information.<br>**Datahub Loads:**<br>• If 500 or fewer retirees, submit the payee data to OASD at least 45 days prior to the month of PBGC's first payment.<br>• If more than 500 retirees, submit the payee data to OASD at least 60 days prior to the month of PBGC's first payment.<br>**PRISM Online Loads:**<br>Transactions must be submitted and authorized according to the check schedule for the month of PBGC's first payment (see Benefit Payment Schedule on intranet). |

Most plans are loaded through Datahub. However, plans with 25 or fewer payees may be loaded directly through PRISM online applications. Click the appropriate link for the type of load to be initiated.

- Process 9.4A: Submit Payee Data for Datahub Load
- Process 9.4B: Load Payees Manually into PRISM

**Plan Assumptions**

## 9.4A Action Steps: 02/18/2005

## Submit Payee Data for Datahub Load

This section applies when payees are to be loaded separately from non-payees, or when updating the records of payees initially loaded as Status A participants (see Process 9.9: Initiate Status A Participant Load).

1 Verify that an account for the plan has been opened with PBGC's paying agent, SSC. Do not proceed with the payee load until certain the account is open.

- Most plans have accounts opened at SSC automatically when the case team assigned in CAS includes a PLS. CAS automatically generates an e-mail requesting that SSC open the account, and SSC e-mails a confirmation. Both are imaged to the IPS plan file by the Customer Communication Branch, RSD. No further notification to SSC is needed. However, if the case team loaded into CAS does not include a PLS, the account does not open automatically at SSC and must be opened manually.
- If uncertain about the status of the account, contact SSC. If SSC indicates it is open, document the call in a memo to the IPS plan file and proceed to step 3. If SSC indicates the account is **not** open, go to step 2.

2 If the account did not open automatically at SSC, submit the following package to Chief, BPB:

- *Notification of Authorization to Make Payments Letter (Authpay.doc)* letter with the TPD Manager's signature. BPB Chief also signs and then forwards the letter to SSC. SSC will not act without both signatures. Do not forward the letter directly to SSC or provide advance copies.
- *Account Adds and Changes Form (Acaddchg.doc).*

BPB Chief forwards the letter and form to SSC and images a copy of each to the IPS plan file. The PLS images copies of any attachments. See TP 16: Establish & Maintain Plan & Participant Files.

3 Submit the electronic Data Entry Request Form (eDERF). For instructions, see the Datahub Administration System help page on the intranet.

**Important:** PBGC's first pay date must be the month following the interim plan administrator's final pay date, as stated in the *Notification Letter to Prior Paying Agent (Notifppa.doc).* Coordinate any change in the date with the interim paying agent.

4 When doing both the First Pay and the Status A loads for a case within the same time frame, complete the first load through authorization in Reconciler before running Evaluator for the second load..

5 Submit the payee data according to the Timing specifications. Also indicate whether the payees were initially loaded as Status A participants, and include all data elements required for the Datahub load.

**Electronic Data:** Prepare and submit the payee data to OASD by e-mail using the Datahub mailbox. If a physical copy (printout) is also available, deliver it to OASD.

**Paper Data:** Print a copy of the eDERF and attach to the data document (check register, extract, etc.), and submit the package to the Datahub Coordinator in BPB/RSD. Do not include handwritten data - all data must be in a typewritten format.

6 Once OASD sends the e-mail indicating that the data is ready for TPD review, proceed to Process 9.7: Review and Reconcile First Pay Pre-Load Database.

**Plan Assumptions**

## 9.4B Action Steps: 02/18/2005

## Load Payees Manually into PRISM

Use the following steps only for very small plans with 25 or fewer payees at the time PBGC assumes payments. Use Datahub to load larger plans. If more than 25 payees will be loaded directly into PRISM , the TPD Manager must document the circumstances by memo to the IPS plan file.

1 Confirm the account is open for the plan at SSC (see Process 9.4A, steps 1 and 2).

2 Load the payees using PRISM online applications, and note the following:

- Transactions must be submitted and authorized according to the check schedule for the month of PBGC's first payment (see Benefit Payment Schedule on intranet). If these dates cannot be met, the payments may be issued off-cycle (see TP 29: Request Off-Cycle Payment).
- PBGC's first pay date must be the month following the interim paying agent's last pay date, as confirmed in the *Notification Letter to Prior Paying Agent (Notifppa.doc)* previously issued. Coordinate any change in the date with the interim paying agent and notify FOD.
- Adjust the benefit amounts of participants who are subject to benefit adjustments, and notify them at least 30 days before the effective date. See Process 10.4: Identify Current Payees for Benefit Adjustments.
- Convert monthly benefit payments under $50 to annual payments (see PBGC Operating Policy 5.4-3 Frequency of Benefit Payments).
- Combine the payments of participants receiving more than one monthly payment (for example, as participant and beneficiary) into a single payment.
- **Important:** When loading participants with Electronic Direct Deposits (EDD) manually into PRISM, bank addresses are **required**. If not available, consider using available internet services to locate them. **Do not use the PBGC address as a default**.

3 Prepare and submit the *Plan Assumption Reconciliation Report (planasmprec.doc)* to reconcile the PRISM load. This step must be completed for all plans trusteed on and after 10/01/2004.

- Attach the check register (or similar document) used to verify the total dollar amounts and number of participants to the data entered into PRISM.
- Request the Participant Payment Report (PPR) from SSC and attach. This report is available around the middle of the month prior to PBGC's first payment.
- Attach a spreadsheet listing any payments that were annualized.
- Attach a spreadsheet to reconcile other discrepancies between PBGC and plan administrator payment amounts.
- Submit the report and attachments to the TPD Manager or designee for concurrence.

4 Upon management concurrence, image the report with all attachments to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files). Within five working days of concurrence, TPD management shall review the plan file to ensure that the reconciliation report and all attachments are imaged.

5 Update the Plan Assumption Milestone in CAS with the date of first payment by SSC.

6 Proceed to Procedure 9.9: Initiate Status A Participant Load to begin loading non-payees. If non-payees will not be loaded immediately, first notify payees of the plan assumption, change in paying agent, and any changes to their benefits (see Procedure 9.13: Notify Participants).

**Team Leader**

7 Finalize the Plan Assumption Milestone in CAS.

**Plan Assumptions**

## 9.5 Action Steps: 02/18/2005

## Review and Map Data

| | |
|---|---|
| **Purpose** | To review the plan assumption package submitted by the TPD and map for data entry by the Document Management Center. |
| **Procedure Owner** | Datahub Coordinator |
| **Guidance** | Datahub Administration System help page |
| **Timing** | Map data as soon as possible following receipt of the plan assumption package, but target for completion within three business days. |

The following actions are required when a TPD submits paper sources of participant data for the First Pay or Status A Datahub load.

- 9.5A Review and Map First Pay Data
- 9.5B Review and Map Status A Participant Data

**Plan Assumptions**

## 9.5A Action Steps: 02/18/2005

## Review and Map First Pay Data

1 Upon receipt, review the electronic Data Entry Request Form (eDERF) and payee documentation (for example, the check register) and ensure that all necessary items have been submitted. Immediately notify the PLS by e-mail (with a cc to the plan's Team Leader) if the package is not complete.

2 Review the participant payment data to determine proper data mapping to Datahub Plan Assumption application screens.

3 Complete the *Datahub - Data Mapping Instructions for Data Entry (Dhdmapin.doc)* as soon as possible, but target for completion within three business days. The data elements necessary for plan assumption are as follows:

***Basic Identification***

- 8-digit Case Number
- SSN
- Name Fields: First, Last, Middle (optional), Suffix (optional)
- Participant Type: Participant, Beneficiary, QDRO

***Address***

- Street
- City
- State
- Postal Code
- Country (use only if not USA. Note that not all Datahub loads can handle foreign addresses)

***Basic Payment Information***

- Frequency (Monthly, Quarterly, Annual)
- 1st Estimated Pay Source: Gross Amount, Start Date, End Date
- 2nd Estimated Pay Source: Gross Amount, Start Date, End Date

***Payment Destination***

- Destination (EDD, Check to Home, Check to Bank)
- If EDD or Check to Bank: Bank Name*, Street, City, State, Postal Code, Account Type (Savings or Checking), Account Number, 9-Digit Bank Routing Number (EDD only)

  * Bank Name and Address are optional if destination is EDD. They are good to have, but do not delay a load if missing.

***Federal Tax Withholding***

- Election (F = Fixed amount; C = Calculated amount based on marital status and allowances. If a payee has both a calculated and a fixed amount for additional withholding, indicate both.)

- Amount (if Election is F)
- Marital Status and Number of Exemptions (if Election is C)

4 Update the BPB Plan Assumption Tracking System.

5 Update the eDERF and deliver completed *Datahub - Data Mapping Instructions for Data Entry (Dhdmapin.doc)* form with the payee data to the DMC.

**Plan Assumptions**

## 9.5B Action Steps: 02/18/2005

## Review and Map Status A Participant Data

1 Upon receipt, review the electronic Data Entry Request Form (eDERF) and participant documentation and ensure that all necessary items have been submitted. Immediately notify the PLS by e-mail (and cc the plan's Team Leader) if the package is not complete.

2 Review the participant data to determine the proper data mapping to Datahub Plan Assumption screens.

3 Complete the *Datahub - Data Mapping Instructions for Data Entry (dhdmapin.doc)* as soon as possible, but target for completion within three business days. The data elements necessary for plan assumption are as follows:

***Basic Identification***

- 8-digit Case Number
- SSN (in text format)
- Name Fields: First, Last, Middle (optional), Suffix (optional)
- Participant Type: Load all as Participants

***Address***

- Street
- City
- State
- Postal Code (in text format)
- Country (Use only if not USA. Not all Datahub loads can handle foreign addresses.)

4 Update the BPB Plan Assumption Tracking System.

5 Update the eDERF and deliver completed the *Datahub - Data Mapping Instructions for Data Entry (Dhdmapin.doc)* with the Status A participant data to the DMC.

**Plan Assumption**

## 9.6 Action Steps: 02/18/2005

## Prepare First Pay Data for TPD Review

| | |
|---|---|
| **Purpose** | To prepare payment data for TPD review. |
| **Procedure Owner** | DMC, OASD |
| **Guidance** | NA |
| **Timing** | If fewer than 500 records, target completion for no later than 14 days from the receipt of the eDERF and complete data.<br><br>If 500 or more records, target completion for no later than 30 days from receipt of the eDERF and complete data. |

OASD completes Datahub loads in two steps. The first is to create a pre-load database and copy it to the Datahub Administration System (DAS) for the TPD to review and edit. Once the TPD completes its review, OASD then loads the data into Datahub.

This procedure covers two scenarios:

- Process 9.6A Prepare First Pay Data from Electronic Source provides instructions for OASD to convert data from electronic sources.
- Process 9.6B Prepare First Pay Data from Paper Source provides instructions first for the DMC to enter data from paper sources, and for OASD then to copy that data to the review area.

Initial TPD Processes

**Plan Assumption**

## 9.6A Action Steps: 02/18/2005

## Prepare First Pay Data from Electronic Source

### OASD Software Closeout Team

1 Upon receipt, review the electronic Data Entry Request Form (eDERF) and participant data submitted. Contact the TPD with any questions.

2 Log the case into the job tracking system in DAS.

### OASD Data Expert Team

3 If the case folder is not already represented in the OASD File Storage Server, create a directory for it using the 8-digit case number and abbreviated plan name (for example, 12345678_LTV) and copy everything from the \00_Template\00_Datahub_Newplan\ directory into it.

4 Copy the input files to the RawData\FirstPay\ directory on the OASD File Storage Server.

5 Review the file layout from the paying agent. Store any documentation files in DOCS directory on the OASD File Storage Server.

6 Update the job status on the eDERF when data conversion begins.

7 Extract the raw data to a readable format (for example, from a fixed width text file to a spreadsheet or database format) in accordance with the documentation.

8 Run a database integrity check in the pre-load database. Correct any errors or address the issue(s) in the Conversion Summary report to provide guidance to the PLS.

9 Create the data mapping and convert the raw data into the pre-load database. Write a brief summary in FIRSTPAY\TOTPD\ConversionSummary.doc including errors, comments, guidance for the TPD with included reference files and documents that have details about the conversion.

10 Consider the following issues when doing this conversion:

a. Is the raw data on a 16-track tape, 3480 cartridge, zip disk or other media?
b. Are there packed fields?
c. Is the Outside Data Expert available?
d. On a given record (row), are there multiple pay sources making up the gross payment?
e. On a given record, are there multiple deductions?
f. Are there customers with more than one record of raw data?
g. For families of plans (for example, TWA), how are customers mapped to PBGC plans?
h. Data formatting issues

- Are address and name fields parsed as needed?
- Do numeric-string fields (SSN, account number, etc.) have leading zeroes?
- Do numeric strings have unwanted embedded characters (for example, $, N/A)?
- Do numeric strings have a decimal point in the right place?
- Are alphabetic fields (for example, name, address) all in upper-case?
- Do date-strings convert to valid dates?

i. For multiple addresses (for example, legal vs. mailing address), which one should be loaded?

**11** Inform the Software Closeout Team that the data conversion is complete and ready for TPD review.

**OASD Software Closeout Team**

**12** Verify that the case number, summary totals and payment start date in the pre-load data agree with the eDERF. If any of these items do not agree, notify the Data Expert Team and return any documents for corrections.

**13** Run a database integrity check in the pre-load database. If there are any errors, request that the Data Expert Team correct them.

**14** Copy the pre-load data to the review area in DAS.

**15** Prepare and send the e-mail message to the PLS that the data is ready for TPD review (the "Ready for Review" message).

**16** Update the job status in the job tracking system.

**17** Upon receipt of the e-mail from the TPD requesting that OASD proceed with the Datahub load, load the pre-load data into Datahub:

- Copy the pre-load database from the review area in DAS and archive it to the archive folder (i:/datahub/DB for Archiving/).
- Run a database integrity check in the pre-load database. Contact the PLS to correct any errors.
- Run the Datahub component to load the pre-load data into Datahub's client/server database.

**18** Send an e-mail to the PLS indicating the load is ready for Datahub Evaluator (the "Ready for Evaluator" message), and cc to TPD Manager, BPB, and Datahub mailbox.

**19** Electronically sign and date the eDERF.

**Plan Assumption**

## 9.6B Action Steps: 02/18/2005

## Prepare First Pay Data from Paper Source

### DMC

1 Review the electronic Data Entry Request Form (eDERF) and documentation package. Contact the TPD with any questions.

2 Manually enter the data from the printed documentation into the Plan Assumption application.

3 Verify that the data has been entered correctly using the Quality Control Report. If the actual number of records or gross payment amount differs from the eDERF, make a notation on the eDERF and return the package to the Datahub Coordinator to resolve the discrepancy and resubmit the package.

4 Upon completion of the data entry, DMC Team Leader electronically signs and dates the eDERF. This generates an e-mail to OASD notifying that the eDERF has been forwarded.

5 Return the documentation package to the TPD with a printout of the eDERF.

### OASD Software Closeout Team

6 Run a database integrity check of the pre-load database. If there are any errors, request that the PLS correct them.

7 Register the case and copy the pre-load data to the review area in DAS.

8 Send an e-mail message to the TPD that the data is ready for review.

9 Upon receipt of the e-mail from the TPD indicating that the review is complete and requesting that OASD proceed with the Datahub load, load the pre-load data into Datahub:

- Copy the pre-load database from the review area in DAS and archive it to the archive folder (i:/datahub/DB for Archiving/).
- Run a database integrity check in the pre-load database. Contact the PLS to correct any errors.
- Run the Datahub component to load the pre-load data into Datahub's client/server database.

10 Send an e-mail to the PLS indicating the load is ready for Datahub Evaluator (the "Ready for Evaluator" message), and cc to TPD Manager, BPB, and Datahub mailbox.

11 Electronically sign and date the eDERF.

**Plan Assumption**

## 9.7 Action Steps: 02/18/2005

## Review and Reconcile First Pay Pre-Load Database

| | |
|---|---|
| **Purpose** | To review and make necessary corrections to the Datahub pre-load data, complete the Plan Assumption Reconciliation Report, and request that OASD proceed with the Datahub load. |
| **Procedure Ownder** | PLS/PBA/FBA |
| **Guidance** | Datahub Administration System (DAS) user guide (intranet) |

1 Upon receipt of the e-mail message from OASD indicating the First Pay pre-load data is ready for review (the "ready for review" message), access the data in the Datahub Administration System (DAS).

2 Compare the case data on the Quality Control Report to the check register (or other source used). Be sure to use the check register for the same payment date, since a later version may not agree.

- Verify the case number and plan name
- Verify the summary data (total participant count, total dollar amount, payment start date, annual payments, etc.)

3 Contact the interim paying agent to determine if any payee deaths or other changes have occurred since the date of the last check register. Record any changes in a phone log and place in the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files).

4 Verify participant data and make necessary changes in DAS:

- Ensure that all case team members involved in reviewing the data have access to the most current payment information. Advise of any day-to-day changes (new payees, deaths, etc.).
- Refer discrepancies that affect a large number of customers to OASD to resolve. Once they are corrected, OASD will issue a new "ready for review" e-mail.
- If there are any new payees who were not included with the First Pay data submitted to OASD, load them manually using PRISM online applications rather than through Datahub.
- Delete the records of any payees who have died. Add these participants as deceased using PRISM on-line applications instead of through Datahub.

5 Reconcile the pre-load data to the check register (or other source provided), and prepare the *Plan Assumption Reconciliation Report (planasmprec.doc)*. This step must be completed for all plans trusteed on and after 10/01/2004.

- Print and attach the First Pay Quality Control Summary report from DAS.
- If any payments were annualized, print and attach the First Pay Quality Control Detail Report for annualized payments from DAS.
- Copy and attach the page(s) of the check register showing the total number of participants and total payments.

- If the data source is electronic, note in the report that the raw data and pre-load data are located in the archive. To verify, load the Archive Access application, select the case number, then select Plan Assumption Data group. The raw data is in the file named rawdata_firstpay.zip. The pre-load data is in the file named (8-digit case number)_fp.mdb (for example, 12345678_fp.mdb). Contact OASD with any questions.
- Submit the Plan Assumption Reconciliation Report and attachments to the Division Manager or designee for concurrence. If the check register is in electronic form, the report should indicate that it is archived and how it may be accessed.

**6** Upon management concurrence on the Plan Assumption Reconciliation Report, reply to the "ready for review" e-mail from OASD with "Please proceed with the Datahub load." OASD will reply by e-mail when the load is complete.

**7** Image the Plan Assumption Reconciliation Report and attachments to the IPS plan file. If the load was based on paper documents instead of electronic data, also image all pages of the paper source document to the IPS plan file. See TP 16: Establish & Maintain Plan & Participant Files.

Within five working days of concurrence, TPD management shall review the plan file to ensure that the reconciliation report and all attachments are imaged.

**8** Once OASD replies that the data is ready for review in Datahub Evaluator, go to Process 9.8: Review and Authorize First Pay Datahub Load.

**Plan Assumption**

## 9.8 Action Steps: 02/18/2005

## Review and Authorize First Pay Datahub Load

| | |
|---|---|
| **Purpose** | To review and authorize the First Pay load in Datahub to begin monthly payments by PBGC. |
| **Procedure Owner** | PLS/PBA/FBA, Team Leader |
| **Guidance** | Datahub User Manual<br>Benefit Payment Schedule on intranet |
| **Timing** | When performing the First Pay and Status A participant Datahub loads within the same time frame, complete the first load through authorization in Datahub Reconciler before running Datahub Evaluator for the second load.<br>Reconciler must be authorized in accordance with the monthly Benefit Payment Schedule on the intranet. |

**PLS/PBA/FBA**

1 Ensure that all case team members involved in reviewing the data have access to the most current payment information. Advise of any day-to-day changes (new payees, deaths, etc.).

2 Upon receipt of OASD's "Ready for Evaluator" e-mail indicating that the First Pay load is ready for review, run Datahub Evaluator and generate the error report. Correct as many errors as possible using the Datahub online applications. Drop any customers from the load whose errors cannot be corrected and load them manually through PRISM on-line applications instead of through Datahub.

If there are a large number of customer errors attributable to the load itself, coordinate with OASD to have the case reloaded.

3 Prepare to run Datahub Reconciler:

- Ensure that all errors have been corrected in Evaluator and that problem customer records have been dropped. Do not allow a few problem records to delay the Datahub load.
- Notify the case team not to load any new customers or make any pay status, customer type or SSN changes to anyone in the plan until further notice. This restriction may be lifted after Reconciler has been authorized.

4 Run Datahub Reconciler.

- Do not begin the Confirm Match process if it cannot be completed and authorized within a day or two in order to reduce the risk of creating duplicate records.
- When performing the First Pay and Status A participant Datahub loads within the same time frame, complete the first load through authorization in Reconciler before running Evaluator for the second load.
- For Datahub records with matches in the Genesis database, select the one with the most current information.
- See the Datahub User Manual for specific instructions on confirming matches.

5 Notify the Team Leader by e-mail when the load is complete and ready to be authorized, and deliver the following to the Team Leader:

- Check register, spreadsheet, or other source used to verify the data
- Printout of the eDERF
- Reconciler First Pay Load Summary Report
- Reconciler First Pay Exceptions Report

**Team Leader**

6 Upon successful review, authorize the load in Datahub Reconciler.

- **Important:** Authorize the load as soon as possible. If someone else on the case team changes the status, type or SSN of any customer whose match was confirmed before authorization, Datahub may create a duplicate record.
- The load must be authorized in accordance with the monthly Benefit Payment Schedule on the intranet.

7 Notify the TPD and FBA team by e-mail (with a cc to the Datahub Coordinator) that the Datahub load is complete and the data entry restriction is lifted.

8 Return the plan assumption documents to the PLS.

9 Finalize the Plan Assumption Milestone in CAS once updated by the PLS.

**PLS/PBA/FBA**

10 Image the items submitted to the Team Leader (in step 4) to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files).

11 Update the Plan Assumption Milestone in CAS with the date of first payment by SSC.

12 Proceed to Procedure 9.9: Initiate Status A Participant Load to begin loading non-payees. If non-payees will not be loaded immediately, first notify payees of the plan assumption, change in paying agent, and any changes to their benefits (see Procedure 9.13: Notify Participants).

**Plan Assumption**

## 9.9 Action Steps: 02/18/2005

## Initiate Status A Participant Load

| | |
|---|---|
| **Purpose** | To provide a list of Status A participants to OASD or the Datahub Coordinator to prepare for the Datahub load. |
| **Procedure Owner** | PLS/PBA/FBA |
| **Guidance** | Datahub User Manual<br>Datahub Administration System help page<br>PRISM User Manuals |
| **Timing** | Datahub Loads:<br>If fewer than 500 participants, submit the data at least 14 days before letters are to be issued.<br>If 500 or more participants, submit at least 30 days before letters are to be issued. |

Normally, the Status A load occurs after the First Pay load and includes only non-payees. However, occasionally it is necessary to include all participants – including payees – in the Status A load; for example, in order to mail participant meeting notices as early as possible via eALG, or to provide HCTC data sooner (see TP 46: The Health Coverage Tax Credit (HCTC)). A Status A load which includes payees is known as an Enhanced Status A Load.

1 Verify an account has been opened for the plan at SSC (if not already done). For instructions to verify or open an account, see Process 9.4: Initiate First Pay Load.

2 If there is a small number of participants to be loaded, consider loading them through PRISM online applications instead of Datahub, and then proceed to Procedure 9.13 Notify Participants. For Datahub loads, continue with this procedure.

3 Assemble the list of participants to be loaded. Include the following data elements:

***Basic Identification***

- 8-digit Case Number
- SSN (in text format)
- Name Fields: First, Last, Middle (optional), Suffix (optional)
- Participant Type: Load all as Participants
- Pay status: If payees are included in the Status A load, indicate which participants are payees

***Address***

- Street Name and Number
- City
- State
- Postal Code (in text format)

- Country (Use only if not USA. Not all Datahub loads can handle foreign addresses; contact Datahub Coordinator for details.)

4 Submit the electronic Data Entry Request Form (eDERF).

5 Submit the Status A participant data according to the Timing specifications above.

**Electronic Data:** E-mail the data to OASD using the Datahub mailbox. Note that if an OASD Data Expert is already involved in the collection of electronic data, a separate list may not be necessary. Contact OASD to confirm.

**Paper Data:** Print a copy of the eDERF and attach to the document containing the data (spreadsheet, etc.). Submit the package to the Datahub Coordinator in RSD. Do not include any handwritten data - all data must be in a typewritten format.

6 Once OASD sends the e-mail that the Datahub pre-load database is ready for TPD review, proceed to 9.11 Review Status A Datahub Pre-Load Database.

**Plan Assumption**

## 9.10 Action Steps: 02/18/2005

## Prepare Status A Data for TPD Review

| | |
|---|---|
| **Purpose** | To prepare Status A participant data for review by TPD. |
| **Procedure Owner** | DMC, OASD |
| **Guidance** | NA |
| **Timing** | If fewer than 500 records, target completion for no later than 14 days from the receipt of the eDERF and complete data.<br>If 500 or more records, target completion for no later than 30 days from receipt of the eDERF and complete data. |

OASD completes Datahub loads in two steps. The first is to create a pre-load database and copy it to the Datahub Administration System (DAS) for the TPD to review and edit. Once the TPD completes its review, OASD then loads the data into Datahub.

This procedure covers two scenarios:

- Process 9.10A Prepare Status A from Electronic Source provides instructions for OASD to convert data from electronic sources.
- Process 9.10B Prepare Status A from Paper Source provides instructions first for the DMC to enter data from paper sources, and for OASD to then copy that data to the review area.

**Plan Assumption**

## 9.10A Action Steps: 02/18/2005

## Prepare Status A Data from Electronic Source

**OASD Software Closeout Team**

1 Upon receipt, review the electronic Data Entry Request Form (eDERF) and Status A participant data submitted. Contact the TPD with any questions.

2 Log the case into the job tracking system in DAS.

**OASD Data Expert Team**

3 If the case folder is not already represented in the OASD file storage server, create a directory for it using the 8-digit case number and abbreviated plan name (for example, 12345678_LTV) and copy everything from the \00_Template\00_Datahub_Newplan\ directory into it.

4 Copy the input files to the RAW\Status A directory on the OASD file storage server.

5 Review the file layout of the data submitted. Store any documentation files in the Status A\DOCS directory on the OASD file storage server.

6 Update the job status on the eDERF when data conversion begins.

7 Extract the raw data to a readable format (for example, from a fixed-width text file to a spreadsheet or database format) in accordance with the documentation.

8 Create the data mapping and convert the raw data into the pre-load database. Write a brief summary in Status A\DOCS\ConversionSummary.doc including errors, comments, guidance for the TPD with included reference files and documents that have details about the conversion.

9 Consider the following issues to consider when doing this conversion:

a. Is the raw data on a 16-track tape, 3480 cartridge, zip disk or other media?
b. Are there packed fields?
c. Is the outside Data Expert available?
d. Are there customers with more than one record of raw data?
e. For families of plans (for example, TWA), how are customers mapped to PBGC plans?
f. Data formatting issues
   - Are address and name fields parsed as needed?
   - Do numeric-string fields (for example, SSN, Zip code) have leading zeroes?
   - Are alphabetic fields (for example, name, address) all in upper-case?
g. For multiple addresses (for example, legal vs. mailing address), which one should be loaded?

10 Run a database integrity check in the pre-load database. Correct any errors or address the issue(s) in the Conversion Summary report to provide guidance to the PLS.

11 Inform the Software Closeout Team that the data conversion is complete and ready for TPD review.

**OASD Software Closeout Team**

12 Verify that the case number and summary totals in the pre-load data agree with the eDERF. If

any items do not agree, notify the Data Expert Team for corrections.

13 Run a database integrity check in the pre-load database. If there are any errors, request that the Data Expert Team correct them.

14 Copy the pre-load data to the review area in DAS.

15 Prepare and send the e-mail message to the PLS that the data is ready for TPD review (the "Ready for Review" message).

16 Update the job status in the job tracking system.

17 Upon receipt of the e-mail from the TPD requesting that OASD proceed with the Datahub load, load the pre-load data into Datahub:

- Copy the pre-load database from the review area in DAS and archive it to the archive folder (i:/datahub/DB for Archiving/).
- Run a database integrity check in the pre-load database. Contact the PLS to correct any errors.
- Run the Datahub component to load the pre-load data into Datahub's client/server database.

18 Send an e-mail to the PLS indicating the load is ready for Datahub Evaluator (the "Ready for Evaluator" message) and cc to TPD Manager, BPB, and Datahub mailbox.

19 Electronically sign and date the eDERF.

**Plan Assumption**

## 9.10B Action Steps: 02/18/2005

## Prepare Status A Data from Paper Source

**DMC**

1. Review the electronic Data Entry Request Form (eDERF) and Status A participant documentation package. Contact the TPD with any questions.
2. Manually enter the data from the printed documentation into the Plan Assumption application.
3. Use the Quality Control Report to verify that the data has been entered correctly. If the actual number of records differs from the eDERF, note the discrepancy on the printout of the eDERF and return the package to the TPD to resolve and resubmit.
4. Upon completion of the data entry, DMC Team Leader electronically signs the eDERF. This generates an automatic e-mail to OASD notifying that the eDERF has been forwarded.
5. Return the documentation package to the TPD with a printout of the eDERF.

**OASD Software Closeout Team**

6. Run a database integrity check in the pre-load database. Correct any errors or address the issue(s) in the Conversion Summary report to provide guidance to the PLS.
7. Register the case and copy the pre-load data to the review area in DAS.
8. Send an e-mail message to the TPD that the data is ready for review (the "Ready for Review" message).
9. Upon receipt of the e-mail from the TPD indicating the review is complete and requesting that OASD proceed with the Datahub load, load the pre-load data into Datahub:
    - Copy the pre-load database from the review area in DAS and archive it to the archive folder (i:/datahub/DB for Archiving/).
    - Run a database integrity check in the pre-load database. Contact the PLS to correct any errors.
    - Run the Datahub component to load the pre-load data into Datahub's client/server database .
10. Send an e-mail to the PLS indicating the load is ready for Datahub Evaluator (the "Ready for Evaluator" message), and cc to TPD Manager, BPB, and Datahub mailbox.
11. Electronically sign and date the eDERF.

**Plan Assumption**

## 9.11 Action Steps: 02/18/2005

## Review Status A Datahub Pre-Load Database

| | |
|---|---|
| **Purpose** | To review and make necessary corrections to the pre-load database, and request that OASD proceed with the Datahub load. |
| **Procedure Owner** | PLS/PBA/FBA |
| **Guidance** | Datahub Administration System help page |

1 Upon receipt of the e-mail message from OASD indicating the Status A participant pre-load database is ready for review (the "ready for review" message), access the data in the Datahub Administration System (DAS).

2 Compare the pre-load case data to the participant list submitted to OASD using the Quality Control Report:

- Verify the case number and plan name
- Verify the summary data (for example, total participant count)

3 Verify the pre-load participant data to the participant documentation submitted using the Quality Control Report. Make necessary changes through DAS.

- Refer discrepancies that affect a large number of customers (for example, many SSN s are out of sequence) to OASD to resolve. Once they are corrected, OASD will issue another e-mail.
- If there are any participants who were not included with the Status A data submitted to OASD, load them manually using PRISM online applications rather than through Datahub.

4 Upon completion of the review, reply to the "ready for review" message from OASD with "Please proceed with the Datahub load." OASD will reply by e-mail when the load is complete.

5 Once OASD replies that the data is ready for review in Datahub Evaluator, go to Process 9.12: Review and Authorize Status A Datahub Load.

**Plan Assumption**

## 9.12 Action Steps: 02/18/2005

## Review and Authorize Status A Datahub Load

| | |
|---|---|
| **Purpose** | To review the Status A participant data in Datahub, make necessary corrections, and authorize the load to PRISM. |
| **Procedure Owner** | PLS/PBA/FBA, Team Leader |
| **Guidance** | Datahub User Manual |
| **Timing** | When doing both the First Pay and the Status A loads for a case within the same time frame, complete the first load through authorization in Reconciler before running Evaluator for the second load. |

**PLS/PBA/FBA**

1 Upon receipt of OASD 's "Ready for Evaluator" e-mail indicating that the Status A load is ready for review, run Datahub Evaluator and generate the error report. Correct as many errors as possible using the Datahub online applications. Drop any customers from the load whose errors cannot be corrected and load them manually through PRISM on-line applications instead of through Datahub (but once Reconciler has been run, wait until the load has been authorized – see below).

If there are a large number of customer errors that are attributable to the load itself, coordinate with OASD to have the case reloaded.

2 Prepare to run Datahub Reconciler:

- Make sure all errors have been corrected in Evaluator and that problem customer records have been dropped. Do not delay the Datahub load because of few problem records.
- Notify the entire case team not to load any new customers or make any pay status, customer type or SSN changes to anyone in the plan until further notice. (This restriction may be lifted after Reconciler has been authorized.)

3 Run Datahub Reconciler.

- Do not begin the Confirm Match process unless it can be completed and authorized within a day or two in order to reduce the risk of duplicate records being created. See Datahub user manual for specific instructions on confirming matches.
- When doing both the First Pay and the Status A loads for a case within the same time frame, complete the first load through authorization in Reconciler before running Evaluator for the second load.
- For Datahub records with matches in the PRISM Genesis database, select the one with the most current information.
- See the Datahub User Manual for specific instructions on confirming matches.

4 Notify the Team Leader by e-mail that the load is complete and ready to be authorized, and deliver the following to the Team Leader:

- Printout of the eDERF
- Copy of Status A participant list provided to OASD

- Reconciler Status A Load Summary report

**TEAM LEADER**

5 After successful review, authorize the data in Reconciler.

**Important:** Authorize the load as soon as possible. If someone else on the case team changes the status, type or SSN of any customer whose match was confirmed before authorization, Datahub may create a duplicate record.

6 Notify the case team by email (with a cc to the Datahub Coordinator) that the Datahub load is complete and the data entry restriction is lifted.

7 Return the documents to the PLS.

**PLS/PBA/FBA**

8 Image the items submitted to the Team Leader in step 4 to the IPS plan file (see TP 16: Establish & Maintain Plan & Participant Files).

9 Notify participants of the plan assumption. Go to Process 9.13: Notify Participants.

**Plan Assumption**

## 9.13 Action Steps: 02/18/2005

## Notify Participants

| | |
|---|---|
| **Purpose** | To notify all participants of PBGC's trusteeship of the plan, and payees of the change in paying agent and any changes to their estimated benefit payments. Also to request data from participants. |
| **Procedure Owner** | PLS/PBA/FBA |
| **Timing** | Notify payees and non-payees of plan assumption (the 4042(d) letter) once they are loaded into PRISM. However, if plan is not yet trusteed and assumption of payments is not scheduled, consult TPD management first.<br><br>Notify payees of the change in paying agent and any changes to their benefit payments (benefit adjustments, annualization of monthly payments, or consolidation of multiple payments) at least 30 days before the effective date. |
| **Guidance** | eALG Correspondence Help |

Click on the appropriate link for the type of participants to be notified:

- Process 9.13A Notify Payees
- Process 9.13B Notify Non-Payees

**Plan Assumption**

## 9.13A Action Steps: 02/18/2005

## Notify Payees

1 Issue either the Initial Notice of Trusteeship for Retirees or the Trusteeship Notice and Paying Agent Change – Retirees (eALG 100 series) to all DOPT payees. Both letters include the Payee Information Form (PIF) which each payee must complete and return. For information on issuing letters, see TP 15: Prepare and Mail Letters. See TP 33: Locate Customer Address if any payees have incomplete or bad addresses.

**Note:** If payees were initially loaded as Status A participants and their status has not yet been updated (that is, the First Pay load has not been completed), a ValPatch is required to send the correct letters to each group. Coordinate this process with OASD.

2 Create a *PIF Tracking Spreadsheet (PIFTracking.xls)* in Excel and record the following (as applicable) for each payee:

- Date of first request for PIF
- Date of second request
- Date of third (final) request
- Target date to suspend payments for non-receipt of PIF
- Date PIF received

3 Ensure a copy of the *Preliminary Plan Summary (Prelimps.doc)* is available to assist in addressing plan-related participant inquiries.

4 Issue the Change in Paying Agent – Retirees Letter (eALG 100 series) with a target of at least 30 days before PBGC's first payment date. (Disregard if this notice was included in the initial notice of trusteeship issued in Step 1.)

5 Notify affected payees of adjustments to their estimated benefit payments. See Process 10.4: Identify Current Payees for Benefit Adjustments.

6 Notify payees of administrative changes to their benefit payments, as applicable. Note that payees must first have been notified of the change in paying agent.

- **Multiple monthly payments combined into single payment:** Issue the Combined Payment Notice (eALG 100 series)or contact the participant by phone and log the call into CCN.
- **Monthly payments converted to annual:** Issue the Annual Payment Notice (eALG 100 series) or contact the participant by phone and log the call into CCN.

7 Acknowledge receipt of the PIFs, or request any missing data or signature, by issuing the Acknowledgement or Incomplete Data Notice (eALG 500 series).

8 Issue follow up letters requesting the PIF as necessary, and record on the *PIF Tracking Spreadsheet (PIFTracking.xls)*:

- Issue the Second Request for Data Verification from Retirees (eALG 100 series) to any payee who has not returned the completed PIF once 30 days have passed since the date of the initial request. For large plans, TPD management may extend the time to issue the follow-up letter.
- Issue the Final Request for Data Verification (PIFs)-Retirees (eALG 100 series) to any

payee who still has not returned the PIF once 30 days have passed since the date of the second request. This letter also informs the payee of the date of their final payment if the information is not received. To determine the final payment date, use the next payment date that is at least 31 days from the date of the letter.

- In no event shall payments continue more than 90 days beyond the date of PBGC's first request without receipt of the PIF or contact by the payee.

**9** TPD management advises whether the case team shall attempt to contact a payee by telephone before suspending payments. Log all participant calls into CCN.

**10** Suspend payments to payees who have not returned their PIFs once the third request has been issued. Once the payee returns the completed PIF, reinstate the payments and issue a backpayment for any payments missed while suspended.

**11** Verify data from PIFs received (see Process 13.1: Verify Data from Returned Forms).

**Plan Assumption**

## 9.13B Action Steps: 02/18/2005

## Notify Non-Payees

1 Issue the Trusteeship Notice for Non-Retiree, Eligibility Unknown or Deferred Vested (eALG 100 series) to non-payees (see TP 15: Prepare and Mail Letters). This letter also requests that the participant complete and return the General Information Form (GIF), Form 702. If any participants have incomplete or bad home addresses, see TP 33: Locate Customer Address.

2 Ensure a copy of the *Preliminary Plan Summary (Prelimps.doc)* is available to assist in addressing plan-related participant inquiries.

3 Acknowledge receipt of GIFs, or request any missing data, signature or proof documents by issuing Acknowledgement or Incomplete Data Notice (eALG 500 series).

4 Issue follow-up letters as necessary:

- Issue the Data Verification Reminder, Participants Whose Eligibility is Unknown or Deferred Vested (eALG 100 series) to any participant who has not returned the completed GIF once 30 days have passed since the initial letter was sent. For large plans, TPD management may extend the time to issue the follow-up letter.
- Issue the Data Verification Last Reminder - Non-Retiree Whose Eligibility is Unknown or Deferred Vested (eALG 100 series) to any non-payee who still has not returned the PIF once 30 days have passed since the second request.

5 Once trusteeship notification letters have been issued to payees and Status A participants, update the Participant Trusteeship Letter Milestone in CAS.

6 Verify participant data as GIFs are received (see Process 13.1: Verify Data from Returned Forms).

**Team Leader**

7 Finalize the Participant Trusteeship Letter Milestone in CAS.

## PR 10. Adjust Benefits

10. Overview

10. Workflow for Process 10

10.1 Analyze Plan Documents

10.2 Obtain Data

10.3 Analyze Data & Funding for PC3

10.4 Identify Current Payees for Benefit Adjustments

10.5 Inform Plan Administrator of Fiduciary Duty

10.6 Prepare Estimated Benefits Calculation Tool

 Forms, Letters, Memos, etc.

## 10. Overview

**02/18/2005**

A benefit adjustment is a change in the benefit amount a payee receives. This process describes the initial adjustment PBGC makes as soon as possible after assuming payment responsibility for current payees. Benefit amounts for current payees at date of plan termination (DOPT) may be decreased based on guaranteed limits. The plan 4022(c) amount cannot be paid as an estimated benefit.

In situations where retirees are still being paid by the prior paying agent using plan funds, PBGC informs the plan administrator of the fiduciary duty to adjust benefits as required for plans that PBGC will trustee. If the plan administrator is using PBGC funds, PBGC can require them to adjust benefits. PBGC encourages the plan administrator's assistance and cooperation in making adjustments because the plan administrator is local to the region and has an established customer service relationship with participants.

Benefits should always be adjusted, if required, as of DOPT. Adjust payments to estimated levels as early as possible to avoid or minimize recoupment or recovery. Adjustments could theoretically occur several times during case processing. The first is the adjustment to estimated Title IV levels. This is done as early in the process as possible, and if not done prior to plan assumption, benefits should be adjusted as part of the plan assumption process. (See Process 9: Plan Assumption.) Adjustment to estimated Title IV levels will always happen when PBGC is funding the payments. Usually PBGC will only make one change prior to the completion of plan valuation. PBGC's policy is to adjust (increase) a participant's estimated benefit anytime it is determined that the increase is at least $5 a month (IOD Policy Bulletin 96-1). However, in some situations, more than one adjustment to estimated benefits may be required. If more than a single adjustment is necessary, it requires Division Manager approval.

Changes in benefit amounts may also occur at other times during case processing. See Technical Procedure 21: Change Benefit Amount(s) for details. All changes in benefit amounts, including benefit adjustments, require that PBGC notify the participant of the change and reason for the change.

Action Steps: Analyze Plan Documents

**Adjust Benefits**

## 10.1 Action Steps: 02/18/2005

## Analyze Plan Documents

These discussions and decisions should take place as soon as possible. The results of the review go into the Plan Abstract (see 12.2 Prepare Plan Abstract ) which is being prepared at approximately the same time or shortly after this point.

1 Read all plan documents to identify all plan benefit requirements. These include: vesting, normal retirement, reduced or unreduced early retirement, credited service versus vesting service, forms of annuity, benefit methodology, supplemental benefits, phase-ins, spousal benefits, etc. All members of the TPD case team should be involved in this activity.

2 Prepare *Preliminary Plan Summary (Prelimps.doc)*, based on preceding review. This may be prepared by one or more members of case team, however, once completed, the case team actuary finishes the form with the reviewed/ approved date. Distribute to all members of case team, and ensure that a copy is imaged to plan file (Correspondence - Participant Services 9E). Also, update the Plan Provisions Milestone in CAS.

**Note** The *Preliminary Plan Summary (Prelimps.doc)* is an important quick reference tool for the case team. It provides basic plan information that facilitates good customer service when responding to early customer inquiries prior to the completion of the Plan Abstract, see Process 12.2: Prepare Plan Abstract. **It should be completed as soon as possible following DOTR**, but never later than the date the participant notification packages are mailed, see: Process 9.13: Notify Participants. The Plan Provision Milestone is CAS is similarly used by the CSR's in the CSC, to provide good customer service to early customer inquiries.

3 Review the plan documents and other materials to develop a general understanding of the plan, make note of any special conditions that may apply, and identify the types of adjustments that may need to be made. The TPD case team actuary must read and study these materials (for example, identifying specific participants who are subject to adjustments and the amount of the adjustments).

- Identify whether there are any temporary supplements (which PBGC does not guarantee to the extent that they are above the accrued at normal limitation).
- Identify whether there are any phase-in issues.
- Identify whether there are any other non-guaranteed benefits. These may include: optional annuity forms that were not elected in writing prior to DOPT; early retirement incentives (buyouts); and incentive awards or benefits not in the plan document, but claimed as such in a collective bargaining agreement or other documents.

4 Identify any legal or policy issues such as working retirement or shut-down determination and notify the TPD Manager for referral to Operations and Policy Support Services Division (OPSS), the LCWG coordinator, and Office of General Counsel) OGC as appropriate.

5 Notify the other members of the case team of the findings. Summarize the plan in the plan file.

Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Adjust Benefits**

## 10.2 Obtain Data

**10/20/2000**

**Action Steps**

| | |
|---|---|
| **Purpose** | To identify the participants in pay status and those who have applied to go into pay status; to determine their benefit entitlements, benefit amounts, and effective pay dates; and to process benefit payments. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefits Adjustment<br>FBA Estimated Benefits Adjustment<br>PBA Estimated Benefits Adjustment<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Participant data. |
| **Output and Recipient** | Identity of current payees and whether any benefits are completely or partially paid for out of purchased annuities. |
| **Control Issues** | Ensure correct name, social security number (SSN), home address, and check mailing address for all immediate eligibles. Verify the identity of current payees for whom there are purchased annuities or partially purchased annuities.<br><br>Accuracy, validity, and documentation of data are very important |
| **Important Concepts** | For the first adjustment (to a current payee) PBGC needs a reasonably certain proposed DOPT if the adjustments are being made prior to trusteeship. Note that current payees and immediate eligibles may have a purchased annuity and never be payable by PBGC. Do not process adjustments for these participants. When requesting a plan administrator to adjust benefits, coordinate with the PA on PBGC rules.<br>Effective March 6, 2000, PBGC adjusts the maximum guaranteeable benefit upward for participants whose age is greater than 65 at the later of retirement date or DOPT. PBGC's late retirement table from the Actuarial Technical Manual, Chapter III, Section F, 5 is used to adjust the maximum guaranteeable benefit upward. |
| **Guidance** | ATM III: Benefit Calculations, Section F, 5. Late Retirement a) - PBGC Late Retirement Factors (Table)<br><br>IOD Policy Bulletin 00-3 |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

10.2 Action Steps: Obtain Data

**Adjust Benefits**

## 10.2 Action Steps: 02/18/2005

## Obtain Data

1 Obtain all relevant participant data. At a minimum the data must include: participant name, address, SSN, date of birth (DOB), date of termination of employment (DOTE), and benefit in pay status, form of annuity, and actual retirement date (ARD); spouse SSN and DOB; and benefit calculation methodology from plan records. For details on obtaining data, see Process 12: Evaluate Plan Documents & Participant Data and Process 9.13: Notify Participants.

2 If prior to trusteeship, verify with PPD the proposed DOPT and their level of certainty about it being the same as the actual DOPT. If PPD is uncertain, consider facts about the case and judge whether to continue processing or wait until PPD has greater confidence in the proposed DOPT. When necessary, seek guidance from the Division Manager, OPSS, and OGC.

3 Verify the name, SSN, DOB, date of hire (DOH), DOTE, and benefit amount for immediate eligibles against company records.

4 Identify any current payees whose benefits are completely or partially paid for out of purchased annuities.

- Contact the plan administrator, account representative at the insurance company, or prior paying agent who handles the pension plan account, as required.
- Ask whether there are purchased annuities for any of the current payees. If there are any, request a letter from the account representative identifying all those current payees by name and SSN and whether the purchased annuity is full or partial. For partially purchased annuities, request the percentage of the whole that is purchased and the corresponding dollar amount.

Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 10.3 Analyze Data and Funding for PC3

12/13/2002

Action Steps

| | |
|---|---|
| **Purpose** | Determine if any current payees identified as subject to adjustment (cut back) can receive all or part of the reduced portion of their benefits out of plan assets. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefits Adjustment<br>FBA Estimated Benefits Adjustment<br>PBA Estimated Benefits Adjustment<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Participant data as of the date three years before DOPT ( DOPT-3) and plan documents effective and adopted prior to the date five years before DOPT (DOPT-5). |
| **Output and Recipient** | List of participants eligible to retire or who had already retired at DOPT-3 and a benefit amount funded by assets in PC3. |
| **Control Issues** | Effective September 25, 2000, IOD revised its policy on the allocation of assets in PC3. The policy clarifies that a participant' s benefit is in PC3 if the benefit was payable or could have been paid before the beginning of the three-year period that ended on DOPT or on the next following date that the plan would make annuity payments. This applies regardless of the plan's provisions or administrative practices. See examples in IOD Policy Bulletin 00-08. |
| **Important Concepts** | Much of the initial adjustment is based on estimates and could be subject to considerable change, e.g. DUEC changes. It is very important that this analysis be documented and included in the plan file. |
| **Guidance** | ATM V: Allocation of Assets, Section C; ERISA 4044; 29 CFR 4044 and others.<br>IOD Policy Bulletin 00-08 |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

10.3 Action Steps: Analyze Data and Funding for PC3

**Adjust Benefits**

## 10.3 Action Steps: 12/13/2002

## Analyze Data and Funding for PC3

1 Use the appropriate checklists to determine and document in the plan file each of the following for current payees at the date three years before DOPT (DOPT-3).

- Checklist for *Participants in Pay status at DOPT (Pipsdopt.doc)* which contains three checklists: 1) PBGC Maximum Guaranteeable Benefits Checklist to determine if any current payees are receiving payments over the PBGC maximum, 2) Phase-In Limitations on Guaranteed Benefits Checklist to identify pre-DOPT retirees who are receiving benefits that may be subject to phase-in limitations, and 3) Supplemental Benefits Checklist to identify pre-DOPT retirees who are entitled to receive temporary supplements.
- Forms of *Benefit Paid Post-DOPT Checklist (Benforms.doc)* to determine if participants' forms of benefit need to be changed due to incorrect forms of benefit offered after DOPT or the J&S policy.

2 Take appropriate action based on whether or not the checklists indicate that any adjustments will apply.

- If any apply, continue this procedure.
- If none apply, go directly to Process 10.6: Prepare Estimated Benefits Calculation Tool.

3 Determine whether any current payees subject to immediate adjustment were eligible to retire at DOPT-3 years. Calculate PC3 benefits in accordance with ERISA 4044(a)(3). See the Actuarial Technical Manual, Chapter V, Allocation of Assets, Section C and the outline of Process 10.3: Analyze Data for Funding for PC3. Provide the list of affected current payees and benefit amounts to the PLS for adjustments to the new amounts. Ensure that written documentation of benefit adjustments are made part of plan file. Determine whether or not early BDLs are appropriate for any participants in the plan. PBGC sends early BDLs to any participants who have been in pay status and receiving the same benefit amount for five or more years as of DOPT (other criteria are listed in Process 19.1: Review List of Participants Eligible for Early BDLs) who are not subject to an adjustment to guaranteed maximum. If there are any participants in this category, early BDLs are appropriate. See Process 19: Issue BDLs and Make Adjustments to Payments for details.

4 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Adjust Benefits**

## 10.4 Identify Current Payees for Benefit Adjustments 02/18/2005

Action Steps

| | |
|---|---|
| **Purpose** | Eliminate or reduce the possibility of overpaying current payees when apparent funding level is insufficient to pay Title IV benefits. Document which pre-DOPT retirees get adjusted and why. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefits Adjustment<br>FBA Estimated Benefits Adjustment<br>PBA Estimated Benefits Adjustment<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Decision that benefits need to be adjusted to guaranteed levels. Estimated benefit amount for each participant in pay status (current payees). List of participants eligible to retire at DOPT-3 and a benefit amount to which their current benefits will be adjusted. |
| **Output and Recipient** | List of pre-DOPT and post-DOPT retirees whose benefits are adjusted, previous benefit, adjusted benefit, and why the adjustments were made.<br>**CAS Activity:** Estimated Cutbacks/Adjustments Milestone finalized, after cutbacks have been implemented and advance notifications provided to affected payees, as described in Process 9.3: Obtain Participant Payment Data. |
| **Control Issues** | Accuracy and timeliness are important. |
| **Important Concepts** | Adjustment of benefits to current payees is determined by the case actuary and provided to the PLS/PBA as soon as possible following trusteeship. Ideally this is completed so that benefits may be adjusted coincident with the assumption of the plan, see Process 9.4: Initiate First Pay Load, but it is not always possible.<br>Effective March 6, 2000, PBGC adjusts the maximum guaranteeable benefit upward for participants whose age is greater than 65 at the later of retirement date or DOPT. PBGC's late retirement table from the Actuarial Technical Manual, Chapter III, Section F, 5 is used to adjust the maximum guaranteeable benefit upward. |
| **Guidance** | N/A |
| **Procedure Owner** | Actuary and PLS |

## Click Here for More Information...

10.4 Action Steps: Identify Current Payees for Benefit Adjustments

**Adjust Benefits**

## 10.4 Action Steps: 02/18/2005

## Identify Current Payees for Benefit Adjustments

**Actuary**

1 Review the *Checklist for Participants in Pay status at DOPT (Pipsdopt.doc)* prepared in Process 10.3: Analyze Data and Funding for PC3, and determine applicable adjustments to payees, including:

- substantial owner reductions;
- accrued at normal;
- the phase-in rule; and
- maximum guaranteeable benefit.

2 Prepare the *Adjustments to Estimated Guaranteed Benefits Memo (Adjgb.doc)* and provide to PLS/PBA.

**PLS**

3 Review Adjustments to Estimated Guaranteed Benefits Memo and make necessary adjustments to payees.

- If benefit adjustments are to be made effective with PBGC's first payment, see Process 9: Plan Assumption for guidance on loading participants.
- To adjust benefits after plan assumption, see TP 21: Change Benefit/Payment Amount.

4 Notify affected payees of estimated benefit adjustments. Each notice must:

- Be in writing, using the appropriate eALG 300 series letter;
- Be dated at least 30 days before the adjustment is effective; and
- Explain the reason for the adjustment. The explanation may be provided within the letter itself or in a separate benefit statement, depending on the nature of the adjustment.

5 Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 10.5 Inform Plan Administrator of Fiduciary Duty 02/07/97

Action Steps

| | |
|---|---|
| **Purpose** | Request the plan administrator to adjust benefits as necessary |
| **Time Reporting (BMPRS)** | FTE Estimated Benefits Adjustment<br>FBA Estimated Benefits Adjustment<br>PBA Estimated Benefits Adjustment<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | *Adjustments to Estimated Guaranteed Benefits Memo (Adjgb.doc)* from actuary. |
| **Output and Recipient** | Action from the plan administrator. |
| **Control Issues** | Timeliness and documentation are important. |
| **Important Concepts** | PBGC can require a plan administrator to adjust payees' benefits to guaranteed levels prior to trusteeship for distress terminations. In other cases, PBGC will request the plan administrator to make the adjustments.<br>Many times there will not be a plan administrator to contact if the plan is in bankruptcy or has been abandoned. In this situation, this procedure is not applicable and PBGC will have to initiate the adjustments. |
| **Guidance** | N/A |
| **Procedure Owner** | PLS |

## Click Here for More Information...

10.5 Action Steps: Inform Plan Administrator of Fiduciary Duty

## 10.5 Action Steps: 02/07/97
## Inform Plan Administrator of Fiduciary Duty

1 Contact the plan administrator. For distress cases or after trusteeship, discuss the fiduciary duty to reduce participant's benefits to the estimated Title IV benefit and request the plan administrator to adjust monthly benefits to the established estimated benefit. (For non-distress cases prior to trusteeship, do not discuss fiduciary responsibility until trusteeship has occurred.) Prompt action can reduce the burden for participants later on by avoiding the recoupment process. Notify the plan administrator that an official letter that identifies benefits to adjust will follow and request a letter identifying the participants affected by the adjustment (name, SSN, previous benefit amount, and adjusted benefit amount) as identified in the official letter.

2 Create the Request Plan Administrator to Adjust Benefits Letter (Paadjben.doc). Attach a copy of the actuary's Adjustments to Estimated Guaranteed Benefits Memo (Adjgb.doc), and mail it to the plan administrator. Ensure that a copy of the letter and memo are filed in the plan file.

3 Make a follow-up phone call in ten days if the plan administrator has not sent the letter identifying the participants affected by the adjustment. If unable to contact the plan administrator, inform the TPD Manager. PBGC may need to accelerate trusteeship of the plan which will require coordination with PPD.

4 File the plan administrator's letter in the plan file upon receipt. Reconcile any discrepancies between the actuary's list of participants whose benefits need to be adjusted and the plan administrator's list.

5 Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 10.6 Prepare Estimated Benefits Calculation Tool 08/10/99

Action Steps

| | |
|---|---|
| **Purpose** | Prepare a tool for PLS/FBA to put new retirees into estimated pay status. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefits Adjustment<br>FBA Estimated Benefits Adjustment<br>PBA Estimated Benefits Adjustment<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan documents and any available evidence of plan practices. |
| **Output and Recipient** | Tool for computing estimated Title IV benefits. |
| **Control Issues** | Authorization and documentation are important. |
| **Important Concepts** | In many cases, an actuarial contractor will do the preparation. In these cases, the TPD actuary is still responsible for reviewing and testing the output. Depending on the number of participants and case complexity, the actuary may create a simple worksheet or program for each type of participant until, layer by layer, the entire Recalculation System is completed. |
| **Guidance** | Actuarial Case Report Checklist |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

10.6 Action Steps: Prepare Estimated Benefits Calculation Tool

## 10.6 Action Steps: 05/31/96

## Prepare Estimated Benefits Calculation Tool

1 Determine if it is appropriate to develop a computer-based, automated RS. Consider:

- How many people are affected by adjustments or are immediate eligibles?
- Is there a working database?
- How complicated are the benefit calculations?

2 Develop the manual or automated RS. Follow the benefit statement standards as described in the Actuarial Case Report Checklist (see the Actuarial Technical Manual, Chapter 1.D.--Actuarial Case Report Checklist , Appendix N for samples). If developing a full BSRS, follow the computer software specifications for BSRS (see the IOD Computer Systems Users Manual, Chapter XI Benefit Statement/Benefit Recalculation System).

3 Review and test the worksheet or RS. When prepared by an actuarial contractor, the TPD actuary, as technical monitor of the case, is responsible for reviewing and testing the product.

4 Train the case team to use the worksheet or RS in making adjustments and putting new retirees into pay status. Run through a sample participant.

Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 10.7 Forms, Letters, Memos, etc.

## Introduction to Audit Processes

07/11/97

The Audit Processes are the means of obtaining the information needed to identify people eligible to receive benefits under the plan, verify their entitlement, and determine the amounts of any benefits to which they are entitled under ERISA. The audit processes also yield information about how PBGC will pay those benefits, whether through identified plan assets, through recoveries from liable parties, or from the PBGC trust funds. Through auditing techniques and thorough evidentiary documentation, a TPD develops an administrative record of the entire investigation and All determinations made. The resulting audits are the inputs required to determine the value of benefits payable by PBGC and its resulting liability. The first audit process, Develop Audit Program, is a planning process which defines the requirements and plan of action for All the audit activities to be performed on a case.

## Audit Processes include:

11 Develop Audit Program

12 Evaluate Plan Documents & Participant Data

13 Verify Data for Participant Database

14 Determine Controlled Group & Net Worth

15 Audit Plan Assets

## PR 11. Develop Audit Program

11. Overview

11. Workflow for Process 11

11.1 Review Documents Already Obtained

11.2 Determine Scope of Audits & Prepare Audit Program

11.3 Conduct Field Audit (If Required)

Forms, Letters, Memos, etc

## 11. Overview

**02/16/2001**

IOD audits of pension plans are operational and data audits. The focus is on identifying sources of quality information and then obtaining the quality information. An important underlying component of the development of the audit program and all the audit process, is that the auditor is charged with **ensuring thorough evidentiary documentation** is maintained throughout the process.

PBGC records (plan and participant files) form the administrative record for each case, which is relied upon for IOD and PBGC operations. Examples: appeal decisions (PEAD), litigation (OGC). These departments (and the affected parties like plan sponsors, and participants) rely on IOD's thorough and careful documentation.

While all employees are responsible for ensuring that their actions are accurately documented in PBGC's records, the auditors audit program responsibilities are particularly important.

Remember: "If you didn't write it down - and put it in the proper file - **it didn't happen!!**"

**Thorough documentation in the audit processes includes:**

- Ensuring sample documents are retrieved from the field, in support of the participant data audit.
- Timely updating of both plan and participant file (forwarding documentation to the DMC for imaging).
- Careful and complete records in the file as to sources of documents, including unsuccessful efforts to obtain records from sources.

In some instances, but not all, the audit processes must be completed prior to the beginning of valuation procedures. However, once the Plan Abstract is complete, the case team actuary begins or continues development of the recalculation system that may have been begun during the process of adjusting benefits. In addition, for cases where it is clear that funding is sufficient to cover priority category 3 (PC3), but not sufficient to cover priority category 5 (PC5), or if it is clear that all benefits are guaranteed, the actuary need not wait for completion of asset valuation to begin the actuarial valuation for cases where the small plan average recovery ratio (SPARR) is used.

The nature, timing, and extent of auditing procedures to be performed are based on the scope and types of desired outputs. For IOD audits of trusteed plans, the types of outputs are always the same, though the content, size, and amount of effort required for those outputs varies widely from plan to plan. The outputs of IOD audit processes are as follows:

| **Audit Process** | **Outputs (Components of Audit Report)** |
|---|---|
| Develop Audit Program | • Audit Program<br>• Internal Controls Determination |
| Audit Plan Assets | • Plan Asset Audit Report |
| Determine Net Worth | • Net Worth Valuation |
| Obtain & Evaluate Plan Documents & Participant Data | • Participant Data Audit<br>• Actuarial Database<br>• Plan Abstract<br>• Plan Document Audit<br>• Data Elements Sources List |
| Verify Data for Participant Database | • Verified Database |
| Determine Controlled Group Recoverability | • Controlled Group Determination |
| Audit Plan Assets | • Plan Asset Audit Report |
| All of the above | • Audit Working Papers with Cover Sheets |

**The audit program provides the road map for achieving all auditing goals. An audit program is a plan of action that does all the following:**

- describes the work that must be completed to accomplish all audit activities for the case,
- identifies the documents that must be obtained for each activity,
- provides a detailed methodology for achieving each activity,
- assigns each activity to one or more members of the case team or contracted parties, and
- identifies target dates for the completion of each activity.

**The list of activities is the same as the headings in the audit report which is comprised of the outputs of all the audit activities.** For each audit process, the audit report is supported by the working papers, which provide a description of how the audit activities were conducted, and a determination that describes the case team's conclusions and recommendations on which future PBGC actions will be based.

**Properly prepared, the audit program focuses case team efforts on the work required for each specific case and acts as a valuable tool for case teams to manage work loads that include many cases at different points in processing.** In order to complete the audit activities, the case team performs each audit task thoroughly, documenting the activities performed and cross referencing relevant working papers. The results of the audit activities are documented in an *audit report*. To encourage proper identification and retention, all working papers are identified by an Audit Working Paper Cover Sheet and numbered, if necessary. For IOD, this audit report is the complete package of all the audit outputs.

**The planning process involves the development strategy for the expected conduct of the audit.** The nature, timing, and extent of planning will vary according to the type of plan, the size, the complexity of the plan's administration, and any limitations placed on the fieldwork activities due to the availability and condition of records.

**Communication and coordination is particularly important in performing a plan audit due to the number of parties who normally maintain accounting records of the plan or are involved in the administration of the plan.** These parties include the plan sponsor, trustees, plan administrator, investment manager, insurance company, other independent auditors, the plan actuary, and attorney. PBGC has investigatory authority (as in ERISA Section 4003) to obtain documents and information it determines necessary to enforce any Title IV provision, rules and regulations.

**Apply analytical procedures in the planning and overall review stages of all audits.** For planning purposes, these procedures should focus on enhancing the auditor's understanding of the plan and the transactions and events that have occurred since the last audit date, and also in identifying areas that may represent specific risk relevant to the audit. These procedures can help to identify such things as the existence of unusual transactions and events, and amounts, ratios, and trends that might indicate matters that have financial statement and audit planning ramifications.

**Prior to performing an IOD audit, become familiar with the two authoritative publications that guide such audits:**

- *Government Auditing Standards* (also called the "Yellow Book") published by the U.S. General Accounting Office.
- *AICPA Audit and Accounting Guide: Audits of Employee Benefit Plans* published by Commerce Clearing House, Inc.

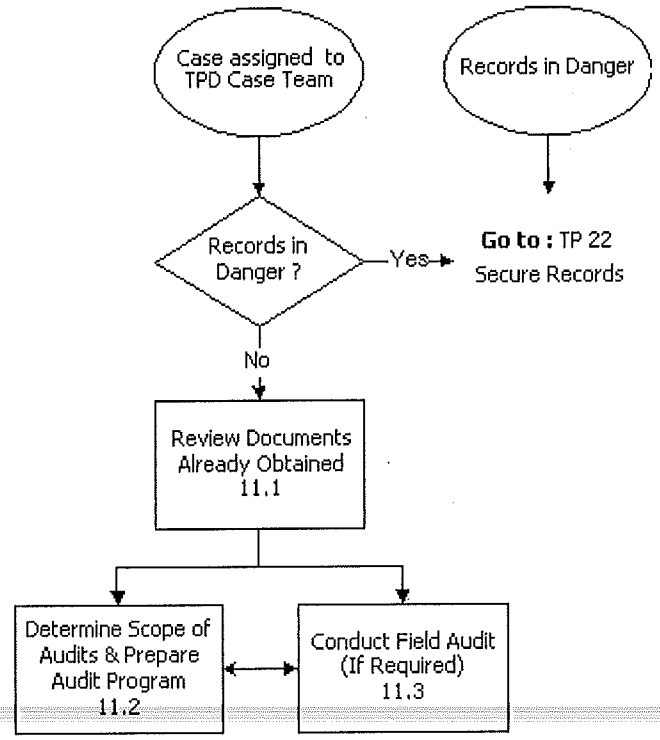
# 11. Workflow for Process 11

05/31/96



**Develop Audit Program**

## 11.1 Review Documents Already Obtained

**07/11/97**

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify documents not already in PBGC possession that need to be obtained. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | List of all documents already obtained. Checklist of documents to obtain. |
| **Output and Recipient** | Checklist of documents still to be obtained in order to complete audit activities. |
| **Control Issues** | Ensure that document list is complete and identify source providing document. |
| **Important Concepts** | If the safety of plan and participant documents is in question, proceed to Technical Procedure 22: Secure Records. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor. |

## Click Here for More Information...

11.1 Action Steps: Review Documents Already Collected

**Develop Audit Program**

## 11.1 Action Steps: 07/11/97

## Review Documents Already Collected

1. Obtain the documents already in-house. These will include the documents from PPD or CFND identified in the Document Transfer Checklist, any document regarding plan asset data collected by FOD/IOD/IAB, and any documents that may have arrived since the PPD-TPD or CFND-TPD transfer.
2. Contact the PPD or CFND staff member who investigated the case to identify which documents have already been requested or obtained, missing documents, and contacts (plan administrator, bankruptcy trustee, etc.). Do this as soon as possible after receiving the Task Referral through CAS, at the PPD/TPD meeting, or after receiving the Document Transfer List. TPD action is initiated in response to the CAS task referral.
3. Use Appendix A - Master Checklist of Documents to Obtain to review the listing of documents for completeness and reliability. Verify which of the documents are already in PBGC possession. The amount of information available will vary depending on the circumstances surrounding PPD's investigation, the amount of time that has elapsed in case processing, and the cooperation of people involved from the past administration of the plan.
4. Create the *Audit Program (Audprog.doc)* and modify the lists of documents and activities as necessary. The circumstances of the case will determine the depth and breadth of what is done.
5. Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Develop Audit Program**

## 11.2 Determine Scope of Audits & Prepare Audit Program 02/16/2001

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify documents and information necessary to complete all parts of the Audit Report.<br><br>Determine interview questions necessary to identify internal controls. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br><br>FBA Participant Data Audits<br><br>PBA Participant Data Audits<br><br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | A completed review of documents PBGC is available in-house.<br><br>Task Referral to TPD from PPD (if TPD case processing begins prior to trusteeship). |
| **Output and Recipient** | Audit Program, including detailed list of all documents to collect and activities to accomplish throughout the audit processes (Processes 12-15).<br><br>Draft of schedule for audit activities and roles of all involved parties (including contractors).<br><br>Internal Controls Questionnaire<br><br>Creation of documents that will become components of the Working Papers to support the Audit Report. |
| **Control Issues** | N/A |
| **Important Concepts** | With some plans it will be possible to identify the full scope of the audits before making a field trip, including a good start on the plan document audit, plan abstract, and source document information.<br><br>When reviewing plan documents, keep in mind the required changes in plan benefits caused by legislation. In many cases, where plan maintenance was neglected over time, benefit increases, changes in vesting, and other changes required by law may not have been adopted. These changes may affect determinations of participants' entitlement to benefits. For plans that have not been amended correctly, see Actuarial Technical Manual, Chapter III. J - ERISAfication.<br><br>IOD Policy Bulletin 00-3<br><br>Avoid getting original personnel/human resources records except for pension records because PBGC does not want to become the *de facto* custodian of any such records. However, these records may also be pension records because of the information they contain. Plan to copy all relevant documents. The source documents used to test the participant database must be copied and are an important part of the audit work papers. Collect and copy necessary information, but do not bring the original records in-house except for necessary pension-related records and records needed to support the audit work papers. Pension records are those records required to run the plan and may include pension, personnel, and payroll records. After trusteeship, all pension records are |

| | |
|---|---|
| | the property of PBGC as trustee. Consult with the TPD manager when deciding on record collection. |
| **Guidance** | ATM III: Benefit Calculations, Section J<br><br>ERISA 4003 gives PBGC authority to investigate. Collecting pension documents is necessary to this investigation.<br><br>ERISA 107 requires that working papers and source documents supporting audits of employee benefit plans be kept for a period of six years. |
| **Procedure Owner** | Team Leader, TPD Case Team |

## Click Here for More Information...

11.2 Action Steps: Determine Scope of Audits & Prepare Audit Program

**Develop Audit Program**

## 11.2 Action Steps: 03/28/2003

## Determine Scope of Audits & Prepare Audit Program

1 The Team Leader will initiate a meeting of the TPD Case Team to determine what information is needed for the case and who will perform which functions. Identify items on the master checklist that are applicable for the case. Identify potential difficulties (offsets to the plan where the benefit is reduced by the value of another benefit, a problem substantial owner, unavailable documents, etc.) and add items to the checklist if necessary. Customize the Audit Program as necessary. Schedule dates for actions.

2 Contact the OGC attorney to determine if additional documents are needed and find out if OGC will be obtaining documents through their discovery process. IOD and OGC are each responsible for obtaining documents they need, but sharing information when gathered speeds case processing. When possible, work together to assure that plan sponsors and other administrators do not receive multiple requests for the same information.

3 Determine if a participant meeting is appropriate. If so, see Technical Procedure 14: Hold Participant Meeting. If the case has been classified as a Large Case, consult Technical Procedure 23: Coordinate Large Case. Note that the TPD may hold a participant meeting for any case, not just large cases.

4 Telephone the contact(s) to request the needed documents (see Process 1.2: Assign Case and Begin Gathering Data). Begin with the Plan Administrator. Follow the request with a fax or letter and file a copy of the request in the plan file. (Other sources would be the attorney who drafted the document and the plan actuary.) If the plan documents are not available, contact the Public Disclosure Office at Department of Labor's (DOL) Employee Benefits Security Administration at (202) 219-8771 to obtain a copy. Have the Employer Identification Number (EIN) and the Plan Number (PN) ready, when possible, because DOL can most readily conduct a search using this information.

5 Start the *Plan Document Audit (Plandocs.doc)* by identifying documents already collected or known by reference to exist. Include all plan documents transferred by PPD and identified on the Document Transfer Checklist. The Plan Document Audit should be a complete list of documents created in relation to the plan itself. These include the original plan document, all amendments and restatements, collective bargaining agreements (CBA), and any other documents that change or modify the provisions of the plan. List documents which have already been obtained. When the content of the documents indicate that a document included in the standard list is not necessary, indicate "N/A" and state the reason in the comments section. Add documents to the list on a continuing basis until the audit is complete. See 12.1: Perform Plan Documents Audit for details.

6 Create the Plan Abstract and fill in basic, case-level information. The plan abstract is a valuable working document because it helps identify where to focus efforts while in the field. One goal is to develop the plan abstract so that necessary data elements for the participant database can be identified. See 12.2 Prepare Plan Abstract for details on completing the plan abstract.

7 Create the *Data Elements Sources List (Datasrcs.doc)*, and input any information already known from plan documents. It contains the same fields as in Appendix B: Preferred Source Documents for Data Elements. See 12.5 Perform Source Document Audit for details. Always find information for the universal data elements (those PBGC collects for all plans), and identify the plan-specific elements that are relevant to the case. Also, investigate the possibility that plan provisions may require data elements not on the master list in Appendix B. Interview plan administrative contacts by phone to determine the availability of source data and the documents where each data element can be found, if necessary. For each document, determine the location and method of retrieval and document this information. When asking questions to

determine which are the best source documents, avoid questions with "yes" or "no" answers. Remember that the purpose of the interview is to establish the existence and extent of data and documents, as well as their validity and usefulness as sources. For large plans, an assessment of the internal controls of the plan sponsor and plan administrator will help measure the validity of the data in primary, secondary and alternate source documents. Often, the Data Elements Sources List can be completed only in the field because secondary, even tertiary, sources may be necessary to satisfy participant data requirements. Document the data elements on a Lotus spreadsheet or Paradox database. For details refer to Procedure 12.6: Build Participant Database.

**8** If it is necessary to use other than primary sources of information, document the reason(s) that primary sources were not used. The assessment of the internal controls will be documented in the *Internal Controls Determination (Intcont.doc)*.

**9** Prepare an *Internal Controls Questionnaire (Intcontqu.doc)* using the template as a guide.

**10** Modify the Audit Program, including any scheduled dates, to reflect findings and case team plans. Discuss changes to scheduled dates with a TPD Team Leader as changes to CAS milestones may be necessary. The Team Leader is the approving authority for the Audit Program.

**11** Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Develop Audit Program**

## 11.3 Conduct Field Audit (if required)

**04/05/2002**

**Action Steps**

| | |
|---|---|
| **Purpose** | Document the background of the company.<br>Obtain participant data.<br>Obtain additional controlled group information, controlled group member asset information (asset statements). Obtain plan asset statements.<br>Secure records if necessary.<br>Verify participant data already collected. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Review of all data already collected and completed plan for collecting remaining data to extent possible. |
| **Output and Recipient** | Internal Controls Determination, Validated Plan Document Audit, Source Document Audit, Plan Abstract, and verified participant data. |
| **Control Issues** | Documentation, completeness, and consistency are important. |
| **Important Concepts** | While at the field audit site, maintain regular communication with TPD case team members and supervisors at PBGC in order to refer questions and resolve concerns about the quality of information, where to look for it, and when to stop looking.<br>Make copies of source document used to test participant database elements. They become part of work papers that support the Participant Data Audit Report.<br>Collect original copies of ***all*** completed benefit related forms, including: beneficiary designation forms, QDRO documents, benefit applications, J & S forms, any spousal waivers and all participant loan documents (application, loan agreement, repayment schedules etc.). Image these forms to the relevant participant file (IPS). |
| **Guidance** | Government travel guidelines apply. |
| **Procedure Owner** | TPD case team |

Follow the appropriate procedure below depending on whether this is a preliminary field audit or a later field audit.

## Click Here for More Information...

11.3 Action Steps: Conduct Preliminary Field Audit (If Required)

11.3 Action Steps: Conduct Field Audit (If Required)

**Develop Audit Program**

## 11.3 Action Steps: 04/05/2002

## Conduct Preliminary Field Audit (if required)

This procedure assumes that prior contact has been made and that the TPD case team has arrived at the field trip site.

1 Upon arrival, meet with the plan administrator or other officials of the plan sponsor.

2 Explain PBGC course of action, time frames, and procedures, if appropriate.

- What PBGC trusteeship means.
- The types of audits (participant data, plan assets, and controlled group/net worth) and information PBGC seeks for each audit, and when results can be expected.
- How to respond to participant queries about retirement, etc.
- Discuss plans for a participant meeting, if there will be one.

3 Using the *Internal Controls Questionnaire (Intconqu.doc)*, compare the company's policies with the actual procedures and document the procedures in order to determine the nature and extent of internal controls and how reliable the company's records are for PBGC use. Document findings of consistency and differences.

4 Request a brief history of the company and plan and copies of procedures, where applicable. As trustee of the plan, PBGC takes the original of the participant retirement folder (including materials used in determining entitlement and calculating the benefit) for all retirees, if the plan administrator maintained such files. Determine:

- How payroll records are maintained.
- How they run pension-related processes, such as calculating benefits and putting retirees into pay status. Compare this information with records from the plan actuary if possible.
- How they manage and handle transferring of plan assets from investment accounts to paying accounts.
- How they document any activities related to pension processing.
- What records they use as their primary and secondary source documents.

5 Review internal controls and document findings. For large plans, the existence of effective internal controls can have a substantial impact on the scope and depth of the audit, so determine the quality of internal controls as early in the process as possible. When effective internal controls do not exist, subsequent audit activities will require greater care and more resources. Adjust the audit program as necessary. Financial problems are frequently an indication of poor internal controls. As financial problems increase for a plan sponsor, the quality or focus on internal controls will normally decrease. The internal controls assessment should:

- Identify who had decision making authority and for what area.
- Identify whether or not plan officials followed internal control procedures consistently.
- Identify the internal controls associated with putting people in pay status.
- Identify the internal controls associated with managing plan assets, including transfers of assets.

6 The internal controls assessment should address the following:

- The procedures and person responsible for determining participant eligibility, credited service, applicable compensation, vesting, benefit commencement, cessation of benefits, etc.
- The identity and functions of plan actuaries and consultants.
- The existence of any previous outside audits (if there has been one, try to obtain a copy). When possible, obtain the working papers of the outside auditors; it may be possible to use them as source documents in the audits.
- Any other internal control areas (compliance with other procedures, reconciliation practices, records keeping practices, etc.).
- Document findings in narrative form in the *Internal Controls Determination (Intcont.doc)*.
  - Documentation is appropriately maintained.
  - Procedures are consistently followed.
  - Transactions are recorded in a timely, accurate and complete manner.
  - Functions are properly segregated.
  - Processes are reviewed by independent auditors.
- Adjust the Audit Program to reflect the assessment of internal controls.

**7** Starting with the list in Appendix B: Preferred Source Documents for Data Elements, review potential sources (including pension, personnel, and payroll files) and determine the best possible sources (primary and secondary) for each data element.

- If the files are separated into retirees, active participant, and terminated vesteds, sample at least five files of each category to identify any difference in source documents that may be appropriate for different categories. Document results of comparison and determination.
- If files are not well organized, sample as many files as necessary until confident of the data sources. It may be necessary to identify different source documents for different date ranges of records. Document results of comparison and determination.
- Obtain information for any data element from more than one source document. Ensure documentation reflects all source documents used for that data element.

**8** Discuss findings with the appropriate plan sponsor officials and/or the plan administrator. People who have been managing the pension plan may be able to point to other sources for required information or identify additional methods for obtaining participant data.

**9** Collect available information for retirees, active participants, and terminated vested participants and collect specific information on non-vested participants as described under the relevant sections in Appendix B: Source Documents for Participant Data. The lists contain suggested sources. The lists are meant to be a guide and are not all-inclusive. Be creative in finding alternate sources, and apply judgment and experience in determining which sources to use if the preferred sources are not available. For each data element, use the preferred source, when available. When a preferred source is not available, identify the secondary source used.

**10** Arrange for copies of records needed to support the audit report. These records must be incorporated into the audit work papers.

**Note** Although copies of records are used to support the audit report (imaged to plan file in IPS), certain participant and benefit related forms ***must be*** collected from the employer to support IOD's benefit processing. These forms are identified in Important Concepts in the preceding outline of Process 11.3: Conduct Field Audit

**11** Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Develop Audit Program**

## 11.3 Action Steps: 05/31/96
## Conduct Field Audit (if required)

This procedure assumes that a preliminary field audit has been performed and that the parties being visited have been contacted in advance.

1 Upon arrival, meet with the plan administrator or other official of the plan sponsor and go over the specific goals of the audit.

2 Conduct the audit according to steps in the appropriate process (12, 13, 14, or 15).

## PR 12. Evaluate Plan Documents & Participant Data

12. Overview

12. Workflow: Evaluate Plan Documents & Participant Data

12.1 Finalize Plan Documents List

12.2 Prepare Plan Abstract

12.3 Identify Participant Data Elements

12.4 Review Existing Databases

12.5 Perform Source Document Audit

12.6 Build Participant Database

12.7 Audit Participant Database

12.8 Prepare Participant Data Audit Report

 Forms, Letters, Memos, etc.

## 12. Overview

**07/11/97**

Obtaining reliable participant and plan data is important because the quality of this effort greatly affects the ease or difficulty of case processing for the life of the case. If all required documents are identified and obtained, case processing proceeds quickly. Efforts made to obtain information and unsuccessful attempts to obtain information should all be carefully documented to the file. This ensures that IOD maintains records which document the efforts made to obtain the participant information which is so critical to our mission. When IOD cannot obtain documents or the information obtained is inaccurate or incomplete, case processing is slowed and compromises customer service.

The participant data audit is a critical activity. It identifies those participants who are due a benefit under the insurance provisions of ERISA . In processing a case, the TPD conducts the participant data audit in order to determine whether PBGC has obtained all the data required to make accurate benefit entitlement determinations and to make accurate benefit payments.

This process produces the participant database, the set of all participant data required for IOD to determine entitlement to benefits and the amount of benefits payable by PBGC. The verification occurs as part of Process 13: Verify Data for Participant Database and the reconciliation occurs as part of Process 17: Prepare Actuarial Case Report & Software. Once reconciled, refer to it as the "valuation database." (See Process 17.1 Reconcile Participant Database.)

Prior to planning and performing an IOD audit, be familiar with the two authoritative publications that guide IOD auditing activities:

- *Government Auditing Standards* (also called the "Yellow Book") published by the U.S. General Accounting Office
- *AICPA Audit and Accounting Guide: Audits of Employee Benefit Plans* published by Commerce Clearing House, Inc.

12.1 Action Steps: Finalize Plan Documents List

**Obtain & Evaluate Participant & Plan Document Data**

## 12.1 Action Steps: 08/25/2000

## Finalize Plan Document Audit

1 Create the *Plan Document Audit (Plandocs.doc)*.

2 Identify the plan by name and Employer Identification Number/Plan Number (EIN/PN).

3 List all documents in reverse chronological order from DOPT back. Include all documents that affect the plan, including Board of Directors' resolutions and CBAs that refer to the plan. In some cases, pension board minutes contain information that can be used if documents are not signed and dated. Ensure that the descriptive name used in the Plan Documents List is the same as the name used on the document itself. If necessary, use the table-sorting capability in WordPerfect to sort the list in descending order by effective date.

4 List and record information for each document, including:

- Name
- Effective date
- Adoption date and/or execution date

5 Identify and comment on each document as follows:

- List all amended sections for each document and what was changed in each amendment and the effective date(s). Look for changes that affect entitlement to Title IV benefits.
- Comment on major issues addressed in the document, including how and where the document was found.
- For plan documents that are not signed or dated, note information from pension board minutes or plan practice as comments to those documents.
- List documents which are referred to, but have not been obtained, and contact the plan administrator, plan sponsor, plan actuaries, union representatives, etc., to request copies of those. Send a written request using the *Information Request Letter (Inforeq.doc)*. Attach a copy of the letter(s) as working papers with an *Audit Working Paper Cover Sheet (Casewpcs.doc)*.

6 Write the narrative describing how documents were obtained and explain pertinent findings in detail.

7 Organize the actual documents in the order of the list, putting a copy of the Plan Documents List at the beginning and all working papers, with their cover sheets, with the documents they support. Use descriptive tabs and follow the indexing structure for the plan file as described in TP 16. Establish & Maintain Plan & Participant Files.

8 Finalize the Plan Provision Milestone in CAS.

9 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.2 Prepare Plan Abstract

**02/07/2003**

Action Steps

| | |
|---|---|
| **Purpose** | Summarize provisions of the plan necessary for PBGC to administer the plan. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | All Pension Plan Documents. Plan Document Audit and plan administrator's standardized calculation sheet, if available. |
| **Output and Recipient** | Plan Abstract for case team. |
| **Control Issues** | Documentation, completeness, and accuracy are important.<br>PBGC credits a plan participant for military service if the participant returns to work for the employer. This service is normally credited regardless of a plan's provisions and/or its DOPT, provided the requirements of the relevant law are satisfied. Participant specific guidance is provided to processing staff from OGC, after referral through OPSS. |
| **Important Concepts** | The Plan Abstract should provide all information necessary to determine the data elements required for determining benefits and performing the final valuation. The Plan Abstract supersedes the *Preliminary Plan Summary (Prelimps.doc)* prepared immediately upon trusteeship, see Process 10.1 Analyze Plan Documents.<br>Review the five-year phase-in rules for applicability. See ERISA 4022(b)(7), 29 CFR 4022.25.<br>Identify any amendments which should have been made to the plan to conform to changes made to ERISA and/or the IRC, but may not have been made (for example: changes to permissible vesting schedules).<br>As soon as the plan abstract is complete, begin building the Benefit Statement Recalculation System (BSRS) for preparing estimated benefits. The case team actuary should coordinate this effort with calculations for adjusting benefits (see Process 10: Adjust Benefits). |
| **Guidance** | ATM III: Benefit Calculations, Section J<br>IOD Policy Bulletin 00-04 |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

12.2 Action Steps: Prepare Plan Abstract

## 12.2 Action Steps: Prepare Plan Abstract

05/18/2001

1 Review the *Plan Document Audit (Plandocs.doc)*.

2 Complete the Plan Abstract based on information from the Plan Document Audit. Refer to the checklists prepared as part of see Process 10: Adjust Benefits. If the checklists have not been completed yet, complete them now. These include:

- *Checklist for Participants in Pay status at DOPT (Pipsdopt.doc)* which contains three checklists: 1) PBGC Maximum Guaranteeable Benefits Checklist to determine if any current payees are receiving payments over the PBGC maximum, 2) Phase-In Limitations on Guaranteed Benefits Checklist to identify pre-DOPT retirees who are receiving benefits that may be subject to phase-in limitations, and 3) Supplemental Benefits Checklist to identify pre-DOPT retirees who are entitled to receive temporary supplements.
- *Forms of Benefit Paid Post-DOPT Checklist (Benforms.doc)* to determine if participants' forms of benefit need to be changed because of incorrect forms of benefit offered after DOPT or because of PBGC's J&S policy.
- Include attachments and footnotes as necessary. They should address, and include tables for the following:
  - early retirement factors
  - vesting schedules
  - Joint and Survivor (J&S) factors used in plan practice

3 Start with the latest plan document and determine whether phase-ins apply (for example, if there was an increase in the benefit formula), and identify the latest plan provisions that can be determined from any documents already on hand.

- If the later of the effective date or the adoption date is more than five years prior to DOPT, then phase-ins do not apply except for substantial owners who are phased in according to the thirty-year rule.
- Otherwise, go through all previous plan documents in reverse chronological order for the last five years to determine if phase-ins apply to non-owners. Go back thirty years for substantial owners.

4 Develop and attach a description of plan practices as compared to plan provisions. Explain where they differ, and which method PBGC will use in determining benefit entitlement and amount. If it will be necessary to use different methods for different groups of participants, identify those groups.

- Develop a formula based on the plan documents and document any ambiguities that different interpretations in the plan language might allow as well as policy or legal questions.
- Identify and document any differences between plan practice and actual plan provisions or possible interpretations of the provisions.
  - If there are no differences, note that there is no problem regarding plan practice versus plan provisions. Make the note in the Narrative section of the *Plan Documents Audit (Plandocs.doc)* make a note in the Plan Abstract also.
  - If there are differences, research for justifiable precedents within PBGC,

document the facts, and seek supervisor guidance in selecting the interpretation to use. Document the rationale behind the selection. Note that it may be necessary to apply different practices or interpretations to different groups of participants if there is a justifiable precedent for doing so. If any questions arise regarding the interpretation, or if the interpretation means that amount of benefits or number of participants will significantly increase PBGC's liability, consult the Technical Adviser Group (TAG). If the consultation points to a policy or legal question, notify the TPD manager and refer the issue to Operations Policy Support Staff (OPSS) and/or OGC as appropriate.

**5** All TPD case team members must review and formally concur in the Plan Abstract. Obtain team leader approval. Document these team leader approvals.

**6** File a copy in the plan file.

**7** Refer to the Workflow diagram at the beginning of this process to determine the next action. The actuary should begin Process 17: Prepare Actuarial Case Report & Software. The auditor should begin identifying participant data elements sources. The PLS should begin Process 18: Identify Types of BDLs for Case.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.3 Identify Participant Data Elements

**05/31/96**

Action Steps

| | |
|---|---|
| **Purpose** | Ensure that PBGC identifies all information required to determine entitlement to benefits and calculate benefits. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan documents, Plan Abstract, and plan administrator's standardized calculation sheet if available. |
| **Output and Recipient** | Comprehensive list of data elements required (with space to identify primary, secondary, and tertiary sources for each). This is the *Data Elements Sources List (Datasrcs.doc)* without the source document references. |
| **Control Issues** | All universal data elements must be included. For each plan-specific data element which is not applicable, state why. Add additional plan-specific data elements as necessary. |
| **Important Concepts** | All case team members must work together closely on defining data elements in order to meet all case processing needs. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

12.3 Action Steps: Identify Participant Data Elements

## 12.3 Action Steps: 05/31/96
## Identify Participant Data Elements

1 Obtain a standardized calculation sheet used by the plan administrator, if possible, and create an *Audit Working Paper Cover Sheet (Casewpcs.doc)*.

2 Review plan documents, Plan Abstract, and plan administrator's standardized calculation sheet to identify which data elements are required to determine participants' entitlement to benefits and calculate benefits payable by PBGC. All universal data elements are required. Using the *Data Elements Sources List (Datasrcs.doc)*, add any data elements under Plan-Specific Data Elements as necessary. For detailed listings of the types of data elements often required for plans with certain characteristics, consult Appendix B: Source Documents for Participant Data. Depending on plan provisions, it may also be necessary to add data elements not appearing in Appendix B. If the plan provisions and the calculation sheet conflict, see 12.2 Prepare Plan Abstract, step 4 for guidance.

3 Document the data elements on a Lotus spreadsheet or Paradox database. For details refer to 12.6: Build Participant Database.

- Include in the definition relevant dates and/or ranges of dates. For certain types of participants, depending on the plan documents, information may be required that pertains to status as of certain dates. In addition, some information may only be available from certain sources. For example, it may be necessary to get "high five" salary for employees hired up to a certain date and only "high three" after that date. This can happen when the content of sponsor forms changes.
- Identify the types of participants for which to get what types of data to get for each type of participant.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.4 Review Existing Databases

**07/21/98**

**Action Steps**

| | |
|---|---|
| **Purpose** | Determine whether hard copy and electronic materials prepared by the plan actuary (the actuary paid by the plan administrator) are reliable sources for participant data elements and determine which data elements should be taken directly from those files rather than from the plan actuary's or plan sponsor's source documents. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Most recent actuarial databases prepared and maintained by plan actuary.<br>Documentation from plan actuary on source documents used for data elements in actuarial census sheet. |
| **Output and Recipient** | Decision as to whether or not actuarial census sheet can be used as source document for data elements, and, if so, for which data elements.<br>Documentation on the Completion of Data Elements Sources List indicating which data elements will be taken from what actuarial materials. |
| **Control Issues** | Documentation, completeness, and validity are prime considerations. |
| **Important Concepts** | The actuarial census sheet contains validated data necessary for determining eligibility and calculating benefits. In addition, it is usually in database form and, if the TPD determines that it can be used as a source document for some data elements, the database information can be converted directly to Lotus or Paradox format which greatly reduces the amount of time and effort required to develop the valuation database. The method for making the determination involves identifying the internal controls observed by the plan actuary and performing a statistical sample of the actuary's data against the identified source documents.<br>Acceptable source documents should be those for which some internal control, or validation, confirms the quality of data in the document. Documents which have original, dated signatures are best. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

12.4 Action Steps: Review Existing Databases

## 12.4 Action Steps: 07/11/97
## Review Existing Databases

1 If possible, obtain a copy of the plan actuary's data and/or database and source documents.

2 Identify which of the data elements identified on the Data Elements Sources List are included in the plan actuary's data. For each of those data elements, identify what source document the plan actuary used. This information may be in the actuary's documents or it may be necessary to obtain it directly from the plan actuary. If the source the actuary used cannot be identified, identify the source document that IOD will use.

3 Select a sample and compare the plan actuary data to the source documents.

4 Follow the steps in 12.7: Audit Participant Database to determine if the existing database can be used as a primary source for any required data elements. If it can be used, identify it as the primary data source for the selected elements in the Data Elements Sources List. If the source document for a data element used is not acceptable to PBGC, information for that data element cannot be taken from the actuary's database. Document the decision in either case.

5 Document what actions were taken to determine whether data elements in the plan actuary's database could be used to build the participant database.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.5 Perform Source Document Audit

**11/25/98**

Action Steps

| | |
|---|---|
| **Purpose** | Identify the primary and secondary source documents which will be used to build a participant database. Generally this information comes from personnel files and payroll files. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | List of data elements and participant information (source documents) needed to complete the audits. |
| **Output and Recipient** | Source documents to use in building the database (by category of employee file, if necessary).<br>Upon completion of the Source Document Audit, the paper source documents identified by the audit should be scanned into the participants' files (IPS). |
| **Control Issues** | Document the factors behind the decisions on which source documents to use. Documentation, validity, and completeness are prime considerations. |
| **Important Concepts** | Obtain complete copies of several sample files for each category of participant from the Plan Administrator to analyze at PBGC. For small plans it may be possible to combine the activities of the preliminary field trip with the later field trip and avoid taking two separate trips. For larger plans, several trips may be necessary.<br>The list of source documents is essentially a version of Appendix B: Preferred Source Documents for Participant Data Elements), but it also provides instruction for the builders of the database on where to obtain data for each defined database element and how to build the database.<br>Verify that the element name listed on the source document corresponds to PBGC's name for the data element. For example, some companies list ***Date of Retirement*** for what PBGC calls ***Date of Termination***<br>The Source Document Audit should always be targeted separately in the Case Workplan and the Large Case and FBA Summary (when applicable).<br>Prior to the entering of missing data, a Source Document Audit should be prepared for the data elements identified by the actuary through the Plan Abstract (as necessary to complete the valuation). This will identify missing data elements to be obtained in the field. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor |

**Click Here for More Information...**

12.5 Action Steps: Perform Source Document Audit

## 12.5 Action Steps: 05/25/99

## Perform Source Document Audit

1 Determine whether an on-site review is needed based on the size and complexity of the plan, the status of the records, and the cooperation of the plan administrator or trustee who is in charge of the source documents.

2 List and number the source documents (1, 2, 3, etc.) on the *Data Elements Sources List (Datasrcs.doc)* created at the time data elements necessary to calculate Title IV benefits were identified.

3 Using the list of data elements required, check if the PBGC preferred source document (See Appendix B: Preferred Source Documents for Participant Data Elements) is available and acceptable for each data element. Acceptable source documents should be those for which some internal control, or validation, confirms the quality of data in the document. Documents that have original, dated signatures of both the participant and a company official are best.

4 If the preferred source is not available or is unacceptable, analyze the secondary source(s).

5 Once the source document to be used is identified, record all the following:

- List the reference number assigned in step 2 for that source document and the name of the field in the source document to be used (if applicable)
- If the source document to be used is not the PBGC preferred primary source, document why the selected source document was chosen.
- Document any circumstances where different groups of employees (e.g., retiree vs. active, or Date of Hire before or after a certain date) should have the data element come from different documents.
- Identify at least two sources (in order of preference) for each data element so that an alternative will be available in case the preferred document is not in a particular file.
- Test a few sample files or sources for each category of participant to determine whether they contain the appropriate data elements. If the sources can be considered reliable, continue to Procedure 12.6: Build Participant Database. If the sources cannot be considered reliable, repeat steps 2 through 5. If a field trip is necessary to find more source documents and test the sample files, Procedure 11.3 Conduct Preliminary Field Audit .

6 Make copies of a sample of the source documents to be included in the *Participant Data Audit Report (Pdarept.doc)* as a work paper reference. Obtain peer review (within the TPD) of the finished Data Elements Sources List. Provide the peer reviewer with copies of the sample files used for testing. The peer reviewer should review the provided materials, using the sample files to verify that required data elements can be obtained from those files.

## 12.6 Build Participant Database

05/18/2001

Action Steps

| | |
|---|---|
| **Purpose** | Develop and populate database necessary for determining benefit entitlement, payable amount, and present value. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Data Elements Sources List, source documents, and Plan Abstract. Controlled Group Determination, if completed. |
| **Output and Recipient** | Participant Database to be used by the actuary to value participant benefits. |
| **Control Issues** | Take data from sources identified in the Data Elements Sources List. When a primary source document is not found, note in the database or field the secondary source document from which the information is actually taken (if not from the source document audit). Explain and document actions taken and decisions made in the work papers. Follow guidelines for data input formats documented in Paradox Tables Standard Structures and Definitions published by ASD 7/16/93. Use these guidelines whether doing input to Lotus or Paradox.<br><br>Prepare instructions for whoever will actually be entering data into either a Lotus spreadsheet or Paradox tables at the site of the source documents. Write in cross-references to each source document. Frequently a contract auditor or even local temps may do data entry, so the instructions need to be sufficiently detailed to ensure accurate data entry.<br><br>Monitor the building of the database, sampling records as necessary to ensure accuracy and modifying the data collection and input methods as appropriate to correct error introduction.<br><br>Documentation, accuracy, and completeness are prime considerations. |
| **Important Concepts** | Once complete, the actuary will use this database to perform valuation calculations.<br><br>The data base shell is populated utilizing source documents on IPS. For smaller plans, it may be more efficient to build the participant database onsite. If electronic information is the source (ex: a database maintained by the plan administrator), the electronic source should be obtained, or a copy of the electronic source.<br><br>The information contained in the participant database is traceable to source documents (paper or electronic). The auditor does **not create** any "assumed" data in the database. |
| **Guidance** | N/A |
| **Procedure** | TPD Case Team and/or data input contractors |

**Owner**

## Click Here for More Information...

12.6.A: Action Steps: Build Participant Database from Paper Sources by Manual Input

12.6.B: Action Steps: Build Participant Database from Electronic Files

**Obtain & Evaluate Participant & Plan Document Data**

## 12.6A Action Steps: 02/18/2005

## Build Database from Paper Sources by Manual Input

1. Download the participant data from PRISM into a participant data shell (Lotus or Paradox). The initial participant data in the data shell should reflect participant data loaded into PRISM at plan assumption (see Process 9: Plan Assumption) and from data verification (see Process 13: Verify Data for Participant Database).
2. Determine who will do the data entry for the plan(s) involved in the case.
3. Input data from source documents identified in the Data Elements Sources List according to instructions prepared.
4. Document any exceptions to sources used. For example, note if it is necessary to use a secondary document because the primary is not available for a range or category of participants.
5. The participant data shell will be updated with the data verification information received since the download from PRISM to the shell (step 1 above). All other information in the data shell is fixed as of DOPT.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.6B Action Steps: 02/18/2005

## Build Database from Electronic Files

1 Download the participant data from PRISM into a participant data shell (Lotus or Paradox). The initial participant data in the data shell should reflect participant data loaded into PRISM at plan assumption (see Process 9: Plan Assumption ) and from data verification (see Process 13: Verify Data for Participant Database).

2 Prepare instructions for whomever will be creating the tapes or diskettes.

- Identify the computer systems and electronic medium from which data will be downloaded based on the Data Elements Sources List.
- Ensure that files that come to PBGC are "copied", and not "backed up" or "restored" to the storage media. It may be difficult or impossible to transfer "backed up" files if the back up utility used has included instructions on where and how to restore the data because the source computer will probably not have the same configuration as IOD's computers.

3 Import the copied files to Lotus or Paradox and make any format changes necessary to ensure that the formats conform to those described in Paradox Tables Standard Structures and Definitions. Be sure to delete data elements included in the source database that are not being used in the participant database either because they are not needed or because the field audit showed that the existing database was not a reliable source for that data element.

4 The participant data shell will be updated with the data verification information received since the download from PRISM to the shell (step 1 above). All other information in the data shell is fixed as of DOPT.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.7 Audit Participant Database

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Determine whether each participant data element input from source documents reflects a confidence level of at least 95%. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Participant Database; sample; source documents. |
| **Output and Recipient** | Auditor's certification that the Participant Database accurately reflects the content of the identified source documents with the required confidence level. |
| **Control Issues** | All source documents traced to during the testing of the database must be copied and placed in the audit work papers to support the confidence level certified by the auditor or reviewer. If the source document is traced to an electronic file, an attempt must be made to print the screen. If a screen print can not be made, describe the attempt in the work paper.<br>Documentation supporting the sample audit is official documentation and must be maintained within the workpapers. Retain and archive the database from which the audit sample is selected. Consult with OASD and follow guidelines for electronic file (see the *Participant Database Archiving Guidelines (pdàarchiveinstructionsv1.doc)*). Image hardcopy documents to the plan file, with the sample documentation, with the exception of participant documentation, which should be imaged to the participant file. |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor |

## Click Here for More Information...

12.7 Action Steps: Audit Participant Database

## 12.7 Action Steps: 03/28/2003
## Audit Participant Database

The objective of the verification is to demonstrate whether the data was accurately entered into the database. No sampling method is likely to disclose all possible errors in data gathering. However, it is possible to calculate a sample size that would give an acceptable level of reliability. Use the sampling technique described in step 2. Since the sampling technique assumes a very small probability of error, when significant errors are discovered in excess of the acceptable number, increase the size of the sample per step 6 to obtain a better representation of the population.

1 Create an *Audit Working Paper Cover Sheet (Casewpcs.doc)* for the statistical audit of the database. Attach all working documents created and source documents observed during this procedure as they become work papers to support the reliability of the database.

2 Forward a copy of the database, from which the sample is selected, to OASD for retention and archiving. Contact OASD for guidance and follow *Participant Database Archiving Guidelines (pdaarchiveinstructionsv1.doc)*.

3 Determine the size of the sample based on the number of participants (by type) and the requirement to achieve a confidence level of 95% (presumed error rate of no more than 5%) that the entire population (based on the sample) is accurate and reliable. The following chart should be used for guidance:

| Population | Sample Size | Population | Sample Size |
|---|---|---|---|
| Less than 20 | All | | |
| 20 - 39 | 19 | 300 - 399 | 54 |
| 40 - 59 | 31 | 400 - 599 | 56 |
| 60 - 79 | 38 | 600 - 799 | 57 |
| 80 - 99 | 42 | 800 - 1499 | 58 |
| 100 - 199 | 45 | 1500 - 4999 | 59 |
| 200 - 299 | 52 | 5000 or more | 60 |

3 Select database records (participants) for testing. Develop a proportional stratified sample which will assure that all categories of participants are proportionally represented. (For example, if 50% of the participants are deferred vesteds, 50% of the sample should be for deferred vested files.)

- Stratify the sample by types of participants (retirees, active vested, active non-vested, terminated vested, and terminated non-vested). Note that if data has already been collected through the data verification process, data elements which use the returned data verification forms as the primary source do not need to be audited.
- Sort and number each stratum (participant record) by assigning the number 1 to the first individual, 2 to the second, and so on within each strata. These numbers will identify the participant data to be audited as selected by the random number generator below.
- Confirm and document the percentage of the total population each strata represents. (For example, if the total population is 100 and 25 are retirees, then retirees should represent 25% of the sample.) That percentage, applied to the sample size of 45 indicates the sample size for the strata. (The sample size would be 25% of 45 or

11.25.) When the sample size yields a fraction, always round up.

- Use the random number generator on the network, accessible through an icon or Windows File Manager (j:\random\random.exe), to generate random numbers for each of the strata. Print the results, and select for testing the source documents for participants corresponding to the numbers generated.
- Document the sample. Confirm each type of participant is properly represented in the sample.
- Collect all documents created in performing these steps and attach an *Audit Working Paper Cover Sheet (Casewpcs.doc)*.

4 Test each selected record, make copies of the source documents, and document the results. Trace each sample record to the source documents identified in the source document listing for each data element to ensure that the information in the database matches the information on the source document. Errors may be either significant or insignificant, depending on the data element.

- **Insignificant errors** are discrepancies that do not affect PBGC's ability to determine a participant's entitlement to a benefit, determine the amount of the guaranteed benefit, or locate the participant.
- **Significant errors** are discrepancies that affect PBGC's ability to determine a participant's entitlement to a benefit or change the amount of a guaranteed benefit by more than $5.00 per month and affect the present value of future benefits (PVFB) or mean the PBGC cannot locate the participant.
- Set parameters for how to determine whether an error is significant or not, obtain management review and approval, and document all decisions and actions in the working papers. The write-up should clearly describe the thought process that went into the determination that the error was significant or insignificant. Errors under the predetermined thresholds will not be considered significant or counted as errors.
- When an error is found, determine the source for that data element and correct the data or use an actuarial assumption.

5 Determine the presumed error rate for significant errors (do not count insignificant errors). This rate is the number of actual errors.

6 If the audit of the first sample reveals significant errors for one or more data elements that exceed the number of acceptable errors, increase the sample size for those data elements as shown in the following table:

| **Original Sample** | | | **Expanded Sample** | |
|---|---|---|---|---|
| **Population** | **Size** | **Acceptable errors (5 %)** | **Size** | **Acceptable errors** |
| less than 20 | All | N/A | N/A | N/A |
| 20 | 19 | 1 | All | N/A |
| 40 | 31 | 2 | 38 | 2 |
| 60 | 38 | 2 | 56 | 3 |
| 80 | 42 | 2 | 73 | 4 |
| 100 | 45 | 2 | 89 | 4 |
| 200 | 52 | 3 | 161 | 8 |
| 300 | 54 | 3 | 220 | 11 |
| 400 | 56 | 3 | 270 | 14 |

| | | | | |
|---|---|---|---|---|
| 500 | 56 | 3 | 312 | 16 |
| 600 | 57 | 3 | 348 | 17 |
| 700 | 57 | 3 | 380 | 19 |
| 800 | 58 | 3 | 408 | 20 |
| 900 | 58 | 3 | 432 | 22 |
| 1000 | 58 | 3 | 454 | 23 |
| 1500 | 59 | 3 | 535 | 27 |
| 2000 | 59 | 3 | 587 | 29 |
| 2500 | 59 | 3 | 624 | 31 |
| 3000 | 59 | 3 | 651 | 33 |
| 4000 | 59 | 3 | 688 | 34 |
| 5000 or more | 60 | 3 | 713 | 36 |

If the expanded sample yields more than the acceptable number of errors for one or more data elements, do a 100% audit for the affected data elements only. This means that once the acceptable number of errors is exceeded (which, for example, is greater than 3 for a population of 60), simply switch to 100% audit for that data element. Provide specific instructions for obtaining information for that data element to whoever is performing the data input in the field. This may require an additional field audit, and if it does the new data will again have to be subjected to statistical sampling. Document all actions and decisions in the audit work papers.

**Obtain & Evaluate Participant & Plan Document Data**

## 12.8 Prepare Participant Data Audit Report

**05/25/99**

Action Steps

| | |

12.8 Action Steps: Prepare Participant Data Audit Report

**Obtain & Evaluate Participant & Plan Document Data**

## 12.8 Action Steps: 05/25/99
## Prepare Participant Data Audit Report

1 Draft *Participant Database Audit Report (Pdarept.doc)*. The report summarizes the History of the Plan, the Plan Sponsor, the audit procedures and participant information.

**Guidelines for content of each section of the Participant Data Audit Report include:**

I. **Purpose:** Brief statement of the purpose of the report.

II. **Scope:** Outline the scope of the audit(s) performed. List all information reviewed, e.g. plan documents, personnel files, insurance cards, pay roll records, electronic database, actuarial reports, retiree files, and the location of this information. Identify any interviews conducted and refer to the attached interview notes. (See Process 11.3: Conduct Field Audit.) Identify and list the material relied upon for the audit report, and include statement that the material is all available in IPS.

III. **History of Plan Sponsor**: Describe the business of the plan sponsor, its location(s), whether the sponsor shutdown or is ongoing and whether there is a union involved. State whether the sponsor has other defined benefit plans. Identify any related companies.

IV. **History of Pension Plan(s)**: Describe the plan history, and address whether certain issues or provisions are applicable to the plan. Refer to the *Internal Controls Determination (Intcont.doc)* previously prepared. (See Process 11.3: Conduct Field Audit.) Ensure the following items are addressed:

- When was the plan established?
- Is there a Successor Plan, or any other working retirement issues?
- Does the plan have employee contributions?
- Does the plan have supplemental benefits or offsets from other plans?
- Describe whether the plan was a frozen plan prior to DOPT.
- Describe any findings about whether the plan is a top-heavy plan?

**Note** Likely sources for this information include: 5500 filings, actuarial valuations and information from prior actuaries.)

V. **Audit Procedures:** Describe who built the database and refer to the written instructions prepared. See Process 12.6 Build Participant Database. Describe who audited the participant database. What was the starting point of the participant database? Was an ADT reasonableness check performed?

State whether all data elements were verified to source documents or whether sampling was done. (See Process 12.7: Audit Participant Database.) If sampling was done to verify the database, describe the sampling including: sample size, categories of participants (retirees, active vesteds, active non-vesteds, terminated vesteds, and terminated non-vesteds), how many data elements were tested and the acceptable error rate. Reveal any significant errors by data element.

VI. **Findings:** Provide a summary of the Plan Population at DOPT. Ensure that all records on PRISM are addressed including Customer records subsequently determined not to be participants, due to deemed cash-out provisions in the plan, if applicable. Address

each type of participant and outline specific data concerns.

VII. **Conclusion:** Provide final statement and certification as to the completeness and accuracy of the participant database, and its reliability for purposes of the valuation and calculation of the participants' termination benefits.

2 Submit report to division management for review and concurrence(s).

3 After concurrences from division management, update the CAS Participant Data Audit Milestone with the completion date.

4 Provide copies of the Participant Data Audit Report to actuary and PLS, and forward original to DMC for imaging to plan file.

**Note** Participant Data Audit Report may include references to previously prepared documents that are already in IPS. If so, references to these will suffice.)

## 12.9 Forms, Letters, Memos, etc.

**03/28/2003**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

## PR 13. Verify Data for Participant Database

13. Overview

13. Workflow for Process 13

13.1 Verify Data from Returned Forms

Forms, Letters, Memos, etc.

## 13. Overview

**02/18/2005**

Participant data is the basis for calculating individual benefits and valuing plan liability for a trusteed plan. As such, the quality of participant data has great impact on PBGC's ability to provide good customer service to participants and to reduce overall risk to the corporation. Pension records and source documents used to verify the participant database become a part of the audit work papers used to support the Participant Data Audit Report.

The notification of trusteeship package (or 4042(d) package), issued in Process 9.13: Notify Participants, is often a first opportunity to establish good customer relations with a participant, and is an important step in PBGC's data collection and verification process. The package includes a Payee Information Form or a General Information Form (for non-retirees) to be completed and returned. It also requests that non-payees provide certain proof documents.

Non-retiree data that PBGC verifies through the data verification process includes:

- Participant name
- Address
- Daytime and evening phones
- Date of birth
- Gender
- Social Security Number
- Marital and spousal information, as of DOPT, including name, maiden name, address, Social Security Number, date of birth, and date of marriage

Retiree data that PBGC verifies through the data verification process includes the above plus:

- Name, address, and phone number of current employer
- Beneficiary and Contingent Beneficiary information including name, relationship, address, and Social Security Number
- Type of payee (participant, beneficiary, alternate payee)
- Identification of a QDRO
- Marital and spousal information listed above, as of date of retirement

**Note** Source documents for proof of age, date of marriage or death are requested for retirees, but, effective 8/99, are not routinely requested for payees.

Verifying data for the participant database is an audit activity and audit guidelines apply. Documents supporting determinations about the accuracy of participant data and the need to correct data must be imaged into the participant file.

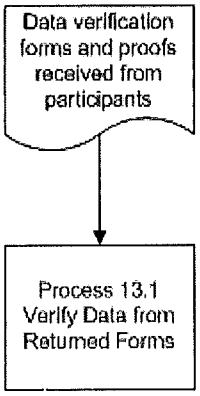
## 13. Workflow for Process 13

02/18/2005



**Verify Data for Participant Database**

## 13.1 Verify Data from Returned Forms

**02/18/2005**

| | |
|---|---|
| **Purpose** | Acquire accurate documentation to support eligibility for PBGC payable benefits. Verify name, address, date of birth (DOB), marital status, form of benefit, spouse's date of birth, etc. |
| **Time Reporting (BMPRS)** | FTE Participant Data Audits<br>FBA Participant Data Audits<br>PBA Participant Data Audits<br>Contract Participant Data Audits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Returned PIF and GIF. |
| **Output and Recipient** | Accurate participant file and database. Updates to PRISM. |
| **Control Issues** | All forms and supporting documents must be imaged for future availability. See TP 16: Establish & Maintain Plan & Participant Files<br>For details on acceptable signatures, see Appendix J: Participant Forms Information. |
| **Important Concepts** | Primary sources for data are PBGC's Form 701 – Payee Information Form (PIF), and Form 702 – General Information Form (GIF). PBGC requests proof of age, date of marriage or death from non-retirees, and accepts copies of these source documents. Ensure that any original source documents sent to PBGC are returned to participants. Effective 8/99, proof documents are not routinely requested from payees. |
| **Guidance** | PBGC Operating Policy Manual 8.5-1: Signature by Mark |
| **Procedure Owner** | PLS for PRISM data and Auditor for data in Participant Database. |

### Click Here for More Information...

- Process 13.1A: Verify Data from Returned Forms - PLS
- Process 13.1B: Verify Data from Returned Forms - Auditor

**Verify Data for Participant Database**

## 13.1A Action Steps: PLS

**02/18/2005**

## Verify Data from Returned Forms

1 Take appropriate action depending on participant response:

- Verify data on returned, completed forms as described below
- For post office returns or other bad address situations, refer to TP 33: Locate Customer Address

2 Review plan provisions to determine requirements for participant eligibility (for determining participant categories). Use the Plan Abstract if it has been completed. If the Plan Abstract has not been completed, work with the actuary and auditor to review the plan documents. The results of the effort will be useful in completing the Plan Abstract.

3 Prioritize the verification of returned forms as follows (from highest priority to lowest):

- Current payees, Form 701 – Payee Information Form (PIF)
- Immediate eligibles – Form 702 – General Information Form (GIF)
- Deferred vesteds – Form 702 – General Information Form (GIF)

4 Follow the priority order and examine each form to ensure that supporting documents are included and acceptable to PBGC.

- Examine current payees and immediate eligibles first, then deferred vested participants.
- PBGC requests source documents for proof of age, date of marriage or death only from non-retirees, and accepts copies of source documents. Proofs are not routinely requested for payees.
- Identify missing or unacceptable items on the acknowledgment letter (ALGS 530) to the participant. Illegible documents are not acceptable.
- Request translation services for any documents in a language other than English for which a certified translation is not attached (see TP 44: Foreign Language Services).
- Examine current payees and immediate eligibles first, then deferred vested participants.

5 Reconcile returned data against existing records in PRISM, and update it with any new or revised data elements from returned PIF or GIF.

- PRISM will be updated for certain participants and/or participant data obtained on the audit field trip (only name, SSN and address) which was not available or verifiable to PRISM prior to the download to establish the data shell. (Non respondents to the data verification letters [eALG 100 series].)
- Enter the following data elements into PRISM upon receipt of any data verification form:

| Date Element/PRISM Field | Primary Source |
|---|---|
| Name | GIF, PIF |
| SSN | GIF, PIF |
| DOB | Birth Certificate |
| DOD (participant) | Death Certificate |

| | |
|---|---|
| DOD (spouse) | Death Certificate |
| DOD (beneficiary) | Death Certificate |
| Sex | GIF, PIF, Birth Certificate |
| Address | GIF, PIF |
| Phone number | GIF, PIF |
| Marital Status | GIF, Marriage Certificate |
| Date of Marriage (Non-Critical) | GIF, PIF, Marriage Certificate |
| Spouses Name | GIF, PIF |
| Spouses DOB | Birth Certificate |
| Spouses SSN | GIF, PIF |
| Actual Retirement Date | Prior Plan Admin Data |
| Payee Status | GIF, PIF |
| Financial Organization | EDD Application |
| Financial Organization Address | EDD Application |
| Organization Contact (name) | EDD Application |
| Bank Telephone Number | EDD Application |
| Organization Routing # (ABA) | EDD Application |
| Account Type | EDD Application |
| Depositor Account Title | EDD Application |
| Depositor Account # | EDD Application |

6 Ensure the source document for the indicated data element is imaged to the participant file (IPS).

**Note** Responses to the 100 series letters are received and imaged at the FBAs or DMC.

7 Update PRISM for the following information in the audit report for the participants in pay status as of DOPT.

| **Participant Data Elements** | **Source** |
|---|---|
| Participant Retirement Type | Audit Report |
| Participant J&S Percent | Audit Report |
| Participant Actual Retirement Date | Audit Report |
| Participant Actual Pay Form | Audit Report |

8 Forward copies of the forms to the auditor for reconciliation with data in the Participant Database.

9 Ensure that the forms and source documents are in the participant file.

**Verify Data for Participant Database**

## 13.1B Action Steps: Auditor

**02/18/2005**

## Verify Data from Returned Forms

1 Reconcile data from the returned forms against data in the participant database, if the participant database is sufficiently complete.

- Information provided by a participant on a completed, signed form and supported by the required documents ordinarily should override conflicting information from any other source except for information regarding employment history
- Do not try to verify the acceptability of the supporting documents; that is the duty of the PLS and the PLS's determination of acceptability is sufficient.
- If the participant database has not been built yet, consider identifying the returned forms as primary source documents for the participant database. Note that doing so will not remove the requirement for identifying other source documents because the percentage of returned forms will always be less than 100%.

2 Review with the PLS any PIF or GIF received since the participant database was initiated. Ensure all new or revised information received is entered into the participant database.

3 If this reconciliation is all that was remaining in finalizing the participant database for valuation, update the Participant Database milestone on CAS.

## 13.2 Forms, Letters, Memos, etc.

**02/18/2005**

## PR 14. Determine Controlled Group & Net Worth

14. Overview

14. Workflow for Process 14

14.1 Review PPD Controlled Group Findings

14.2 Perform TPD Controlled Group/Net Worth Analysis

14.3 Draft Request for Payment/Assist in Filing Liens

 Forms, Letters, Memos, etc.

## 14. Overview

**09/04/98**

ERISA 4001(b) provides that all employers having trades or businesses under common control be treated as a single employer. Therefore, in all cases involving insufficient plans, PBGC must determine the existence of any controlled group, identify its members, and determine any net worth of those liable parties. These determinations must be made before valuation of DUEC and any recovery of employer liability can occur.

A net worth determination is necessary in only a few cases. Cases when a controlled group member is in bankruptcy may require a net worth determination because of the priority of claims. These cases include:

- The contributing sponsor is in Chapter 7 or Chapter 11 bankruptcy, and the controlled group includes one or more entities that are not in bankruptcy.
- The contributing sponsor and/or another member of the controlled group is in Chapter 7 or Chapter 11 bankruptcy, the controlled group includes one or more entities that are going concerns, and PBGC's recoveries against the bankruptcy estate(s) would be enhanced by the allowance of a priority claim as opposed to a general unsecured claim.

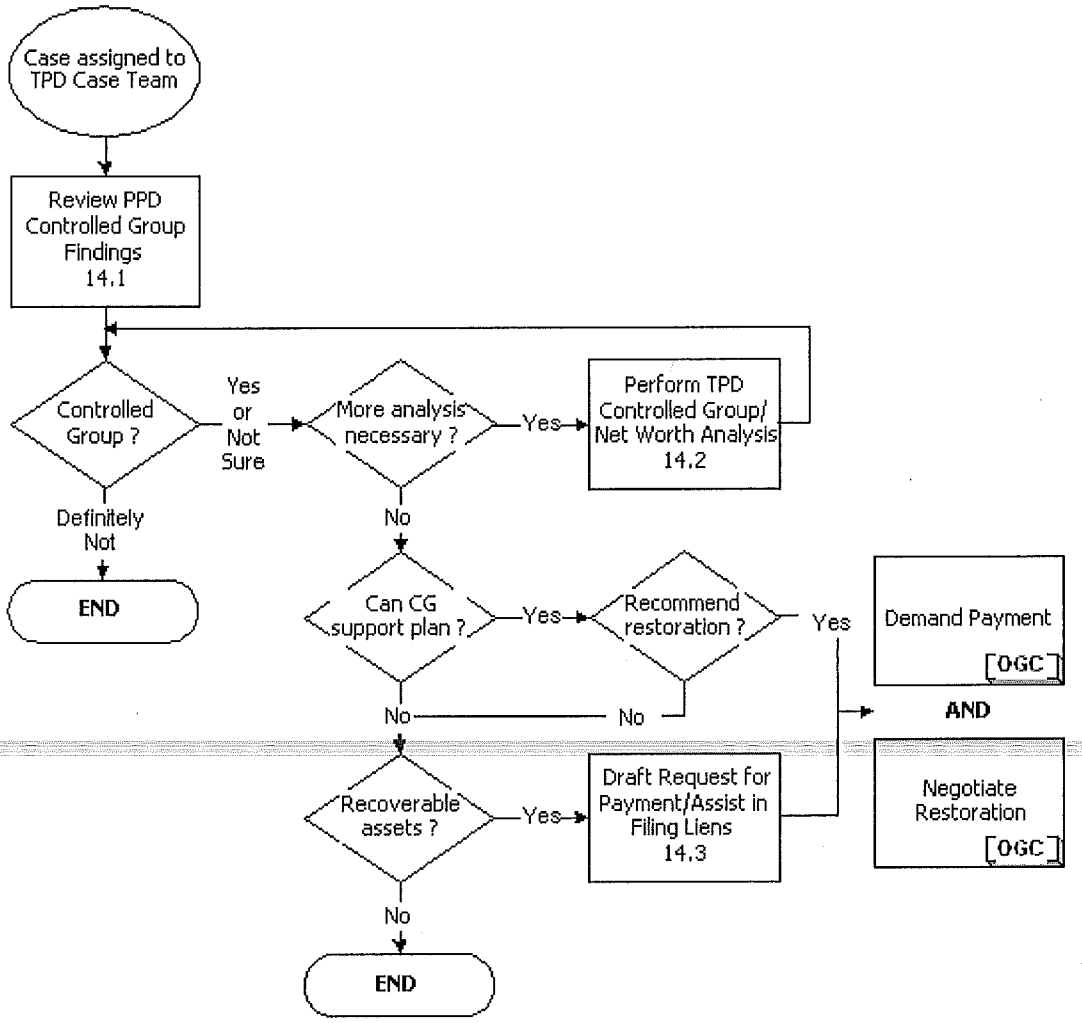
Consult with the TPD manager to determine whether or not a net worth determination is necessary. Keep in mind that the need to make a net worth determination may be overcome by events. If the bankruptcy proceeding is completed by the time TPD processing reaches the point where the net worth analysis would have been done, there is no need to do the analysis because the recovery is already known and is no longer based on the net worth. When a net-worth analysis is performed, update the CAS Net Worth Milestone upon completion.

Both PPD and TPD perform controlled group analysis. PPD's analysis is focused on identifying the ability of controlled group members to support an ongoing plan. The TPD controlled group analysis effort is focused toward identifying any liable controlled group members and supporting efforts to recover money or other assets from controlled group members. The information and tools used in the two efforts are the same. In many cases, the PPD controlled group analysis will have produced conclusions that serve TPD recovery efforts without further analysis. Thus, the TPD's first activities in this process identify the need, if any, of doing further analysis. In cases where there is no controlled group or all controlled group members have been identified as having no recoverable assets, the TPD need only verify PPD findings against any documents that have surfaced since trusteeship, for example, stock record books. Other situations will require only the controlled group analysis to determine whether any viable related entities can support the plan. (If a related entity can support the plan, the TPD assists the Office of General Counsel (OGC) in filing liens against income-producing assets.) If appropriate, the TPD recommends restoration of the plan to the controlled group and assists the OGC in negotiating the restoration. When the controlled group has recoverable assets, the TPD initiates efforts for recovery and assists OGC with follow-on demand and collection efforts. The IOD/PPD Manager is designated as the point of contact for consultation of settlements with OGC.

Determine Controlled Group and Net Worth

## 14. Workflow for Process 14

05/31/96



**Determine Controlled Group and Net Worth**

## 14.1 Review PPD Controlled Group Findings

**09/22/99**

**Action Steps**

| | |
|---|---|
| **Purpose** | Determine the extent, if any, that further controlled group information is needed in addition to information already obtained by PPD. |
| **Time Reporting (BMPRS)** | Controlled Group<br>PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Information from PPD. |
| **Output and Recipient** | Determination of how much further controlled group analysis is necessary, if any. |
| **Control Issues** | N/A |
| **Important Concepts** | Depending on how much PPD data collecting and analysis have been performed by the time the case is referred to TPD, IOD may already have substantial controlled group information available. TPD's goal is to make a controlled group determination which will become the basis for recovery actions.<br><br>If PPD's initial analysis demonstrates that there is obviously no controlled group (for example, a 100% owner who is bankrupt, owns no interest in another business, and has no family), document TPD concurrence of PPD's finding and perform no further controlled group investigation. A copy of the TPD's controlled group determination (or no controlled group determination) should be provided to the FBA, if involved. |
| **Guidance** | PBGC Operating Policy Manual 7.2-1<br><br>29 CFR 4001.3<br><br>IRC 414<br><br>Treas. Reg. 1.414(b) & (c) |
| **Procedure Owner** | Auditor |

## Click Here for More Information...

14.1 Action Steps: Review PPD Controlled Group Findings

## 14.1 Action Steps: 06/29/2001

## Review PPD Controlled Group Findings

1 Review any documents pertaining to controlled group analysis that have surfaced since the PPD analysis was performed, for example, stock record books. When doing field audits, be observant for documents which could pertain to the controlled group.

2 Review PPD controlled group findings as presented in the TWG Memo/TDR sections on controlled group analysis. Use the *Controlled Group Determination Checklist (Cgdeter.doc)* and complete the "Documents" section of the checklist.

- If the findings indicate that there is definitely no controlled group, prepare a *TPD No Controlled Group Memo (Tpdnocg.doc)* indicating your analysis and conclusions to document TPD concurrence with PPD's findings. State that PPD's findings are sufficient and that no further analysis is necessary for TPD purposes. Send the memo to the Division Manager for approval through the Team Leader. Send the memo to the DMC for imaging into the plan file on the IPS and send a copy to the OGC attorney. (See TP 34.2: Submit Documents for Imaging.) If an FBA is involved, notify them that the memo is available on IPS. Do not take further action.
- If the findings indicate that there is a controlled group or may be a controlled group, continue to Process 14.2: Perform TPD Controlled Group/Net Worth Analysis.

**Determine Controlled Group and Net Worth**

## 14.2 Perform TPD Controlled Group/Net Worth Analysis 09/22/99

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify potential financially liable entities against which PBGC may successfully take recovery action. |
| **Time Reporting (BMPRS)** | Controlled Group<br>PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | PPD controlled group findings (from Trusteeship Working Group (TWG) Memo/ Trusteeship Decision Record (TDR) and financial analyst/ auditor's working papers).<br>Any additional documents that provide information on the existence or make up of a controlled group.<br>Controlled Group Determination Checklist with complete list of documents. |
| **Output and Recipient** | Sources for required documents not yet obtained. |
| **Control Issues** | N/A |
| **Important Concepts** | PBGC may consider certain rental property a trade or business for purposes of determining a controlled group, and the value or a portion of the value of this property will be included in the net worth determination of the controlled group. |
| **Guidance** | PBGC Operating Policy Manual 7.2-1<br>29 CFR 4001.3<br>IRC 414<br>Treas. Reg. 1.414(b) & (c) |
| **Procedure Owner** | Auditor |

## Click Here for More Information...

14.2 Action Steps: Perform TPD Controlled Group Analysis

## 14.2 Action Steps

11/08/2002

## Perform TPD Controlled Group Analysis

1 If there is any evidence or suspicion that a controlled group exists, determine what documents are needed to complete TPD controlled group analysis. Confer with the PPD staff member who performed the initial analysis and refer to Appendix A: Master List of Documents to Obtain. Request tax returns of known substantial owners and the plan sponsor from owners and/or their legal representatives.

If not previously requested from the IRS, or if additional information is needed, request plan sponsor tax returns for relevant year (for all except tax exempt employers [Form 990]) using the *IRS Request Letter (Irsreq.doc). Form 333 - Request for Access to Tax Return Information Disclosed by the Internal Revenue Service (Form333.doc)*, must be attached to the letter and printed on green paper.

Request plan sponsor tax return for relevant years for **tax exempt employers** using the *IRS Returns Request – Tax Exempt Entities (Irsexmpt.doc)* letter. See Appendix M: IRS Disclosure Offices.

2 Review the "Questions" section of the Controlled Group Determination Checklist. Call owners to ask the questions or ask during a field audit. Document all responses and include appropriate discussion in the "Comments" section of the checklist.

3 If additional analysis is necessary, follow Technical Procedure 01: Identify Controlled Group to determine who the liable parties may be and follow Technical Procedure 02: Identify Ability to Fund Plan to determine whether or not any liable party can afford to support the plan.

4 Determine if any information from new documents or interview responses indicates that it may be appropriate to file liens against the contributing sponsor or any controlled group member, or if restoration may be appropriate.

- If new, post-termination information about controlled group members reveals a liable party with assets sufficient to fund the plan, notify the TPD Management Team and prepare a special memo to OGC. Ensure that concurrence/approval of the TPD Management Team is on the memo to OGC. OGC handles negotiation of the restoration. Stop TPD processing, but retain the files in case OGC does not restore the plan. Do not continue with this process. Restoration essentially reverses the PBGC actions to terminate and/or trustee a plan. Base the determination on the affordability study performed by PPD or the TPD according to Technical Procedure 02: Identify Ability to Fund Plan.
- If it is not appropriate to recommend restoration, continue this procedure.

5 Determine whether the contributing sponsor or any controlled group members have a positive net worth. If any do, or if uncertain whether any net worth is positive or negative, follow Technical Procedure 24: Determine Net Worth.

6 Submit a copy of the memo to the DMC for imaging into the plan file (IPS). (See TP 34.2: Submit Documents for Imaging.) Provide copies to the Division Manager, OGC attorney, and Financial Operations Department, Controller Operations Division, Investment Accounting Branch (FOD/COD/IAB).

7 Consult with OGC regarding options for collecting any employer liability from the contributing sponsor or any controlled group members. Options include 1) filing priority claims in bankruptcy for up to 30% of net worth, 2) filing liens against income-producing assets, and 3) preparing a request for payment letter.

8 Finalize the Controlled Group milestone on CAS.

9 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Determine Controlled Group and Net Worth**

## 14.3 Draft Request for Payment/Assist in Filing Liens 04/07/99

Action Steps

| | |
|---|---|
| **Purpose** | Prepare official request to liable party or parties for payment of funds due to the trusteed plan and turn over responsibility for collection to OGC . |
| **Time Reporting (BMPRS)** | Controlled Group<br>PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identity of liable party or parties (controlled group members), amounts of employer liability, and identity of recoverable assets. |
| **Output and Recipient** | Letter(s) to liable party or parties. |
| **Control Issues** | Notify FOD/COD/IAB of the party or parties against whom PBGC takes recovery action and of the total recovery attempted. Note that since controlled group members are jointly and severally liable for pension plan underfunding, DUEC, and unpaid premiums, PBGC can pursue any or all liable parties, depending on the likelihood of recovery.<br><br>Do not send a request for payment letter to any entity that is bankrupt or involved in a bankruptcy proceeding. Contact the OGC attorney handling the case to verify what bankruptcy claims have been entered and to provide any supporting information required by OGC. |
| **Important Concepts** | The statutory (ERISA 4064) amount of the liability will not be known until the final valuation is complete and the present value of the plan as of Date of Plan Termination (DOPT) is known. However, send the request letter stating an estimated amount (the sum of DUEC, UBL and unpaid premiums as determined in the trusteeship recommendation process by PPD).<br><br>A request for payment letter must go out, even if the request is for an estimated amount, no later than DOPT+6 years because that is the statute of limitations for payment request. The statute of limitations also applies to cases which are in litigation for matters other than employer liability.<br><br>The IOD/PPD Manager is designated as the point of contact for consultation of settlements with OGC. |
| **Guidance** | ERISA, 4061-4064, 29 CFR 4001.3, and IRC 414 describe controlled groups and make members liable for plan funding, and authorize PBGC to investigate them.<br><br>ERISA Sections 4041, 4042, 4062, 4067, 4068, 4069, 4070.<br><br>PBGC Operating Policy Manual 7.5-1<br><br>Delegation and Redelegation of Authority Memos (8/12/94, 10/25/94, 3/27/95, 4/5/95) |
| **Procedure Owner** | Auditor |

**Click Here for More Information...**

14.3 Action Steps: Draft Request for Payment

14.3 Action Steps: Assist in Filing Liens

## 14.3 Action Steps: Draft Request for Payment 06/29/2001

1 Prepare *a Request Payment Information Memo (Payinfo.doc)* requesting FOD/TD to provide the amount of outstanding employer liability, information on payments made towards the liability, and the amount of interest owed by or owed to the employer. Have the TPD Manager initial the memo.

2 Within ten days of receipt of the requested information from FOD/COD/IAB, prepare a *Request for Payment Letter (Reqpay.doc)* for each of the recipients identified as holders of recoverable assets. Request full payment from liable entities which are not bankrupt or involved in a bankruptcy proceeding. Be sure to include the complete name and address of the liable entity and instructions on how to make the payment to State Street Corporation ( SSC), PBGC's custodial bank, as provided in the template for the standard letter.

3 Obtain the TPD manager's signature on the Request for Payment letter.

4 Mail the letters by certified mail, return receipt requested, to all recipients. Send a copy, with the signed concurrence sheet, to the DMC for imaging into the plan file (IPS), see TP 34.2: Submit Documents for Imaging. Send copies to the OGC attorney assigned to the case and FOD, Controller Operations Division (COD).

5 Take appropriate action depending on the response:

- If one or more recipients respond and request further information, follow up as necessary. File a copy of the response and all related documentation, for example, phone logs, in the plan file. Direct requests and questions to OGC and/or FOD/COD/IAB as necessary.
- If one or more recipients do not respond at all, send a Demand Payment Letter Memo/Payment Request Letter task referral to OGC.
- If one or more recipients respond and request payment terms, coordinate with OGC and PPD. Be aware of Delegation and Redelegation of Authority Memos issued with respect to compromise and settlement authority, dated 8/12/94, 10/25/94, 3/27/95 and 4/5/95. The IOD/PPD Manager is designated as the point of contact for consultation of settlements with OGC.

6 If a Demand Payment Letter is issued (prepared by OGC), forty-five days after the date of the Demand Payment Letter, check with the Participant and Employer Appeals Department ( PEAD) to identify any recipients who have appealed. In the case of an appeal, take no further action but await instructions from PEAD and file copies of all memos and documents from PEAD in the plan file. For each recipient who does not respond or appeal within forty-five days, prepare and send a *Demand Payment Letter Memo (Dempay.doc)* through the Team Leader to the OGC attorney requesting a follow-up demand letter. Attach a copy of the request letter. Send a copy of the memo and attached letter to FOD/COD/IAB also.

## 14.3 Action Steps: Assist in Filing Liens

09/04/98

1. Prepare a *Request to File Liens Memo (Filelien.doc)* for OGC. Include details on the income-producing asset(s) against which to file the lien(s), including the location and contact points of any persons. Attach a copy of the net worth determination which documents its value.
2. Sign the memo and obtain the TPD manager's concurrence using the *Concurrence Form (Concurr.doc)*.
3. Send the memo to the OGC attorney assigned to the case.

## 14.4 Forms, Letters, Memos, etc.

03/23/2001

## PR 15. Audit Plan Assets

15. Overview

15. Workflow for Process 15

15.1 Perform Initial Analysis

15.2 Value Plan Assets

15.3 Value Hard-To-Value Assets

15.4 Value Plan Liabilities

15.5 Calculate Interest

15.6 Complete Plan Asset Audit Report

Forms, Letters, Memos, etc.

## 15. Overview

**06/20/96**

The purpose of valuing plan assets is to determine the fair market value, as of DOPT, of the plan assets. Fair market value is the price at which property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. The audit includes all assets, including receivables such as due and unpaid employer contributions (DUEC), and liabilities such as payables to service providers.

The control and management of the plan assets will determine the scope of the asset audit. Be alert to the propriety of expenses and any prohibited transactions between a plan and a party in interest under ERISA 406(a) unless the transaction is exempted under ERISA 408(b). In addition, review the validity of accruals for both income and expenses as well as any breaches of fiduciary responsibility. The purpose is not to assume the existence of improprieties or breaches, but to test for their existence. Adjust the Audit Program according to the findings of the preliminary review.

The audit report represents the end product of the audit work. It should be clear and concise and should be completed in a timely fashion (within 45 days of acquiring the necessary information). The report should describe what was done and how it was done as well as the findings. The scope of the audit dictates the nature of the report, and the report must conform to the audit program. Obtain Division Management Team concurrence for all reports.

Prepare working papers to reflect the work performed during the audit. Initial and date the upper-right corner of each page. For each set of related working papers, identify the source, purpose, and any conclusion drawn from audited data. Always attach an *Audit Working Paper Cover Sheet (Casewpcs.doc)*. Include a table of contents referencing page numbers for easy access and review.

The asset valuation process resulting from the audit involves the determination of the following:

- The fair market value of plan assets: Plan assets include, cash, cash equivalents, receivables including DUEC, securities, insurance contracts, real property, and any other assets owned by the plan including income accrued as of DOPT.
- The fair market value of plan liabilities: Plan liabilities are liabilities of the plan on DOPT including retroactive payments due participants and accrued expenses for actuarial services, etc., but excluding liabilities for benefits that are payable *after* DOPT. The exception to that are benefit calculations that were performed prior to DOPT for benefits after DOPT. These would be plan liabilities
- The net value of plan assets: Net Value of Plan Assets equals the total fair market value of all assets held by the plan on DOPT minus the total fair market value of all plan liabilities on DOPT including unpaid premium payments.

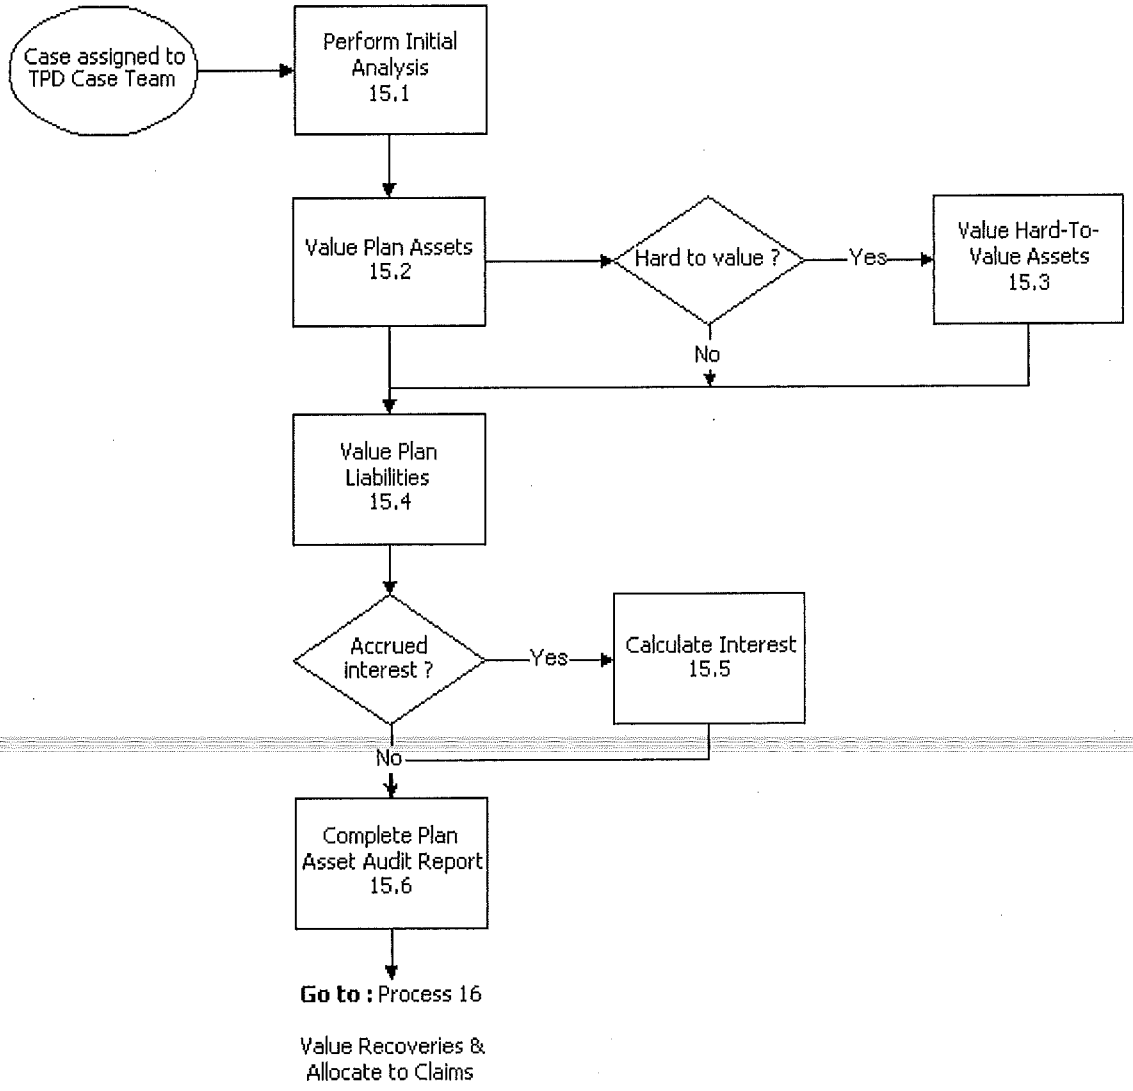
Document steps taken in the valuation of any plan asset or liability. The documents created are audit working papers and should be attached to an *Audit Working Paper Cover Sheet (Casewpcs.doc)*. The compilation of all plan asset audit documents is the Plan Asset Audit Report.

**Audit Processes** **Browse Workflows:**

**Audit Plan Assets**

## 15. Workflow for Process 15

**05/31/96**



**Audit Plan Assets**

## 15.1 Perform Initial Analysis

**02/16/2001**

Action Steps

| | |
|---|---|
| **Purpose** | Determine what constitute plan assets.<br>Determine location and point of contact for each asset.<br>Identify unexplained transfers.<br>For insufficient plans, find out if any money is currently available to offset what PBGC has to put into the pension plan to cover benefit payments. |
| **Time Reporting (BMPRS)** | Plan Assets Audit<br>Contract Plan Assets Audit<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Audit Program.<br>Information from PPD.<br>Financial Operations Department (FOD/COD/IAB ) information, relevant asset information from banks, insurance companies, etc. |
| **Output and Recipient** | • Plan for collecting asset information and necessary modifications to the Audit Program.<br>• If any Hard-to-Value assets, *Request for PPD Financial Analysis Assistance (Ppdanal.doc)* and hard-to-value asset task referrral CAS. |
| **Control Issues** | Follow up with FOD/COD/IAB periodically (at least quarterly). They may have information needs that IOD can meet for them and vice versa. This should continue until the audits are complete.<br><br>When it is extremely difficult to obtain information, weigh the likely value of the asset against the cost of obtaining the information. |
| **Important Concepts** | Work with FOD/COD/IAB . FOD/COD/IAB has to collect information in order to value assets for inputs to the PBGC annual report. FOD/COD/IAB will obtain transaction registers which are useful to identifying all transfers in and out of the accounts. Generally, the FOD/COD/IAB trust accountant contacts the TPD auditor. But in cases where a TPD has been assigned early, it may be necessary for the auditor to request FOD/COD/IAB assignment of a trust accountant.<br><br>When required, issue a subpoena to obtain necessary information. See Process 2.2: Issue Administrative Subpoena.<br><br>Focus on identifying all plan assets, as well as gathering information necessary to value the identified assets.<br><br>Liabilities may include plan expenses due to service providers such as actuaries.<br><br>If the plan document does not require the plan to pay the premiums and premiums are the responsibility of the plan sponsor, line 5 of PBGC Form 1108 (Plan Assets Reconciliation) should not include an item for unpaid premiums as an accrued expense. Assess the plan sponsor for this amount separately.<br><br>For the years 1980 through 1985, do not assess penalties and interest against plans with 100 or fewer participants. |

| | |
|---|---|
| | For the years 1986 forward, do not assess penalties and interest against plans with 50 or fewer participants. |
| **Guidance** | ERISA 4003 |
| **Procedure Owner** | TPD Case Team |

15.1 Action Steps: Perform Initial Analysis

**Audit Plan Assets**

## 15.1 Action Steps: Perform Initial Analysis

**02/16/2001**

1 Review information available from PPD to identify the physical location of the assets. If necessary, call the plan sponsor/administrator or trustee.

2 If an FOD trust accountant has been involved since the PPD/TPD case transfer, contact that trust accountant. Otherwise, contact the FOD/COD/IAB Chief or Supervisor to identify the trust accountant.

3 If not previously requested (see Process 8.3: Effect Trusteeship), prepare a *Premium Information Request Memo (Preminfo.doc)* and send it to the Financial Operations Department, Collections and Compliance Division, Review and Collection Branch (FOD/CCD). This memo requests that FOD calculate the amount of unpaid PBGC premiums, interest, and penalty due as of DoPT (needed for Plan Asset Audit--see Process 15: Audit Plan Assets) **and** DOTR (needed for recovery valuation--see Process 16: Value Recoveries & Allocate to Claims).

4 Take appropriate action for each type of asset:

- If there any are real estate or hard-to-value assets, notify PPD of the possibility that they will need to value assets.
- If the assets are insurance contracts, investigate the holder of the assets. Contact the insurance company. Determine if the holder is a viable insurance organization and whether or not the contracts are irrevocable. Determine the nature and provisions of the contracts.

5 Determine whether the sponsor or the trust pays the plan expenses. All unpaid and accrued expenses should be determined prior to arriving at a final value for the assets.

6 Determine whether employer and employee contributions were made in a timely manner and are current.

- If the assets are held by a financial manager or the plan administrator, get a listing of the assets held as of DOPT and those currently held. Request a copy of any audit reports, especially those done by a certified public accountant (CPA). If audits are not available, obtain any actuarial valuation reports that are available. Verify asset values for a two-year range starting one year prior to DOPT and ending one year after DOPT.
- If there are plan expenses that have been accrued in the termination process and payments have to be made, see Technical Procedure 03: Manage Plan Related Termination Expenses.

7 Analyze the documents, including bank statements, investment statements, and insurance contracts, to identify transfers and the quality of assets. Verify that all transfers are legitimate—money or assets out correspond to money or assets in. Contact the banks and insurance companies to obtain statements for one year prior to Date of Plan Termination (DOPT) and one year after DOPT (FOD/COD/IAB will need statements to the present). If it has not been one year since DOPT, statements to the present are acceptable.

8 Review prior year 5500s for statement of assets.

9 Identify the types of assets and how they are controlled by the plan administrator. Types of assets include:

- Trust assets in a bank

- Insurance contracts
- Assets held by financial manager
- Other assets, including hard-to-value assets
- Plan expenses and other liabilities
- DUEC

**10** Obtain any additional or incomplete information, if required:

- Identify the likely source(s) for the required information. See Appendix F: Alternate Sources for Plan Information for ideas.
- Contact the likely source(s) such as a bank, insurance company, stock broker, accountant, plan administrator/sponsor, etc., to ask if there is any other information. Send a follow-up letter confirming the content of the conversation and requesting that the information be provided within fourteen days.
- If the plan administrator/sponsor does not respond within the fourteen days, call requesting the information be submitted immediately and explain that they will be issued a subpoena (if it was not already used). Send a letter documenting the phone call. This letter can include the administrative subpoena.
- Prepare an *Administrative Subpoena (Modeliod.doc)* and the *Administrative Subpoena Cover Letter (Subcovlt.doc)* following the administrative subpoena process (See 2.2: Issue Administrative Subpoena).

**11** Identify any hard-to-value plan assets. These are assets whose value cannot be readily determined through standard publications or will require a professional appraisal. DUEC is always classified as a hard-to-value asset.

**12** Request PPD Assistance for the valuation of any hard-to-value asset.

- Prepare a *Request for PPD Financial Analysis Assistance (Ppdanal.doc)* and submit through TPD Manager to PPD Manager, including all required attachments.
- Send a hard-to-value asset task referral in CAS.

**13** Determine whether people other than the named fiduciaries were handling investments. The plan portfolio of investments could be administered by only those people authorized by the trust instrument. If this has not been the case, expand the audit to review for any breach of fiduciary responsibility. Consult with OGC if required.

**14** Review any transactions that do not appear to be "arms-length," such as buyer and seller having vested interests, and which should have affected the value of assets sold. When there is a relationship between the buyer and seller (also called "parties at interest"), it must be demonstrated that the price is substantially the same as would have resulted from a strictly arms-length transaction. If this has not been the case, determine whether there has been any breach of fiduciary responsibility. Consult with OGC if required.

**15** Determine whether the transaction meets the conditions to be qualified as fair market value.

**16** Determine whether or not there was an orderly disposition. An orderly disposition is a method of sale which a prudent person would employ to permit the market to absorb the sale of the asset so as to minimize the effect on the price.

**17** Determine whether buyer and seller both had knowledge of relevant facts. Fair market value assumes that both the buyer and the seller have access to and have considered relevant information on the nature of the asset, the risks involved, and the potential for return on the investment.

**18** Determine whether or not the transaction qualifies as an arms length transaction. The sale and the resulting price must be based on conclusions arrived at by both parties independently.

**19** Determine whether or not there was any selling cost. Fair market value assumes a transaction between a buying principal and selling principal and therefore would be free of any agent commission or fees to reduce the proceeds to the seller or increase the price to the buyer.

**20** Establish the existence and degree of internal controls regarding the plan assets. Use the *Plan Asset Internal Control Checklist (Paintct.doc)*:

**21** Develop the *Plan Asset Statement (Planaset.doc)*. List all assets by type, name, location, and estimated value as of DOPT. For distress terminations, the estimated value is the value put on the asset in the distress filing application. Include fiduciary liability insurance if there has been a fiduciary breach.

**22** Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 15.2 Value Plan Assets

12/06/96

Action Steps

| | |
|---|---|
| **Purpose** | Determine the fair market value of all assets, as of DOPT. |
| **Time Reporting (BMPRS)** | Plan Assets Audit<br>Contract Plan Assets Audit<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan asset statement (without final values). |
| **Output and Recipient** | Complete final plan asset statement for IOD valuation and PBGC financial statements. |
| **Control Issues** | Confirm liquidity of assets. If not liquid, reclassify as hard-to-value assets.<br>Data gathered from the holder of assets is normally better than data gathered from the plan administrator/sponsor |
| **Important Concepts** | When are held by a bank or insurance company, analyze statements but do not perform an audit. However, when assets are held by an individual, the employer, or sponsor, do a complete audit. |
| **Guidance** | PBGC Regulations 4001.2 and 4044.41(b) |
| **Procedure Owner** | Auditor |

Establish the value as of DOPT for all assets in each category. Audit steps presented here are based on specific types of assets or liabilities. Modify the steps as necessary to suit the plan funding medium and investment portfolio. During the initial phases of the audit, develop a working trial balance of the plan assets as of DOPT. Also, analyze prior statements to determine if any significant differences exist in the accounts. Trace any differences to verify that funds from the sold assets were deposited.

## Click Here for More Information...

15.2 Action Steps: Value Cash Equivalents, Including Bank Accounts

15.2 Action Steps: Value Receivables

15.2 Action Steps: Value Insurance Contracts

15.2 Action Steps: Value Investment Accounts and Securities (Stocks, Bonds, Warrants, Mutual Funds)

## 15.2 Action Steps: Value Cash Equivalents, Including Bank Accounts

**05/31/96**

I. Obtain bank statements and canceled checks from the previous month.

II. Identify checking, savings, money market fund accounts, CD's and account numbers. Use the statement value for DOPT, if it is a statement date. Ask the bank if a special date statement can be generated (sometimes it can be generated for a fee). Otherwise, use statements covering at least the two months prior to DOPT, but preferably six months or more, and six months after. Identify the following:

- Examine the bank statements for changes of any amounts shown and confirm changes with the bank.
- Examine canceled checks for at least two months comparing payee, amount, and date with disbursement journal, endorsements with name of payee, and signatures with authorized list. Investigate any double endorsements.
- Compare benefit disbursements with current payees' calculated benefit amounts (if available) and investigate any discrepancies.

**23** Perform a bank reconciliation to determine whether or not any checks are outstanding (check six months of statements to assure there are no stale checks -more than six months old). Determine also:

- the amount of interest accrued as of DOPT
- the amount of expenses accrued as of DOPT
- any future fee that is scheduled to be deducted from the account and applies to a period including DOPT

## 15.2 Action Steps: Value Receivables 05/31/96

I. Obtain or prepare an analysis of notes, accounts receivable, and accrued interest.

II. Examine notes on hand and confirm those not on hand by direct communication with the holder.

III. Confirm notes and accounts receivable with the debtor.

IV. Review notes and accounts written off as uncollectible.

V. Ascertain if any receivables were or have been pledged.

VI. Verify interest earned on notes and accrued interest receivable.

VII. Determine if any loans were made to parties-in-interest. If so, notify OGC and the Department of Labor. Include sufficient information about the transaction to allow them to determine whether the loans were exempt under ERISA 408(b). Direct communication to: Associate Director for Enforcement, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C., 20210.

## 15.2 Action Steps: Value Insurance Contracts 03/10/2000

For plans funded partially or fully through an insurance company contract, that contract should be valued as of DOPT using PBGC Regulation 4044, Subpart B. Value group insurance contracts in accordance with PBGC Operating Policy Manual 4.1-1.

I. Insurance information should already be part of the plan file, provided in response to PPD's request in 4.5 Request Insurance Information. That information will have been requested prior to determination of DOPT, with information requested as of a proposed DOPT. Check the proposed DOPT in the PPD insurance request letter against the actual DOPT (per trusteeship agreement).

II. If insurer information is not already included in the plan file, or the proposed date of plan termination used by PPD differs from the actual DOPT, prepare and send a letter requesting the value as of DOPT, the cash-out value, the amount of any applicable fees for cashing out, interest rate, annuity purchase rate (cost of buying one dollar of benefit payable at age 65 for a male) and other similar information. Use the *Insurance Contract Valuation Letter (Insurval.doc).*

III. Upon receipt of the requested information from the insurer (completed attachment to the insurance contract valuation letter), the insurance contract(s) should be valued. Valuation of the insurance may be referred to one of IOD's Technical Expert - Auditors, or may be done by the case auditor.

**Technical Expert - Auditor**

A. Refer the insurance information to one of IOD's Technical Expert - Auditors to value the insurance. In addition to the insurance information, provide the Technical Expert - Auditor with the PBGC annuity factor for healthy males at NRD per the plan's normal form of benefits for single persons as of DOPT. For plans with a DOPT before November 1, 1993, this factor is available from the PBGC Actuarial and Mortality Tables Manual. For plan with a DOPT after October 31, 1993, consult with the TPD actuary to get this factor.

B. The Technical Expert - Auditor will use the insurance contract valuation program developed in-house for a value. (Only these designated individuals have user access in IOD.)

C. The Technical Expert - Auditor will determine the value(s) of the insurance contract(s), and provide the values from the program's report. The summary report provides the values based on three methods: lump sum method, installment method, and annuity method. This will be provided to the auditor generally within 14 days of receipt of the complete insurance information.

**Case Auditor**

A. Case auditor will value insurance contract(s) in accordance with PBGC Operating Policy Manual 4.1-1.

B. Verify the following items:

- Participation rights under the contract.
- Irrevocable commitments made by the insurance company.
- Premiums paid to date or unpaid.
- Unpaid benefits and outstanding checks.

**24** The value of an insurance contract as of DOPT is the sum of a and b.

**a.** the greater of:

- **i** the contracts cash settlement value on the section 4048 date under the lump sum method;
- **ii** the contracts cash settlement value on the section 4048 date under the installment method; or
- **iii** the present value of the benefit that can be provided under the contract on the Section 4048 date by application of the contract assets (annuity method).

**b.** the value of participation rights.

## 15.2 Action Steps: Value Investment Accounts and Securities Stocks, Bonds, Warrants, Mutual Funds 09/28/2001

Note that FOD/COD/IAB has, on microfiche, Wall Street Journal investment price/valuation information (back to 1985).

I. Obtain and review the statements to develop a listing of the following:

- investments as of DOPT
- all transactions
- interest
- fees (such as bank fees)

**25** If the asset is in the form of stocks or bonds, FOD/COD/IAB's microfiche is available for use by IOD in obtaining the following stock/bond information:

- values during the month
- dates dividends and interest are due to be paid
- actual dates dividends and interest were paid
- return on investment.

**26** If the security is traded on a stock exchange (New York Stock Exchange, American Stock Exchange, or NASDAQ), base fair market value on the closing sale price on DOPT as reported in a nationally published or general circulation daily newspaper on the day following DOPT.

If the stock or mutual fund has a dividend declared near the DOPT, be aware of:

- the declaration date (date the company declares the dividend);
- ex-dividend date or ex-date (posted by an exchange, typically two business days preceding the dividend record date). This is the date the shares trade without the dividend and may not apply to mutual funds.
- dividend record date (date the company reviews records to determine its shareholders). Only "shareholders on record" at the close of the business day receive the dividend: and
- payable date or Pay Date (date a company issues a previously announced dividend and mails the checks to shareholders). Pension plan must own the stock on the record date to get a check on the pay date.

If DOPT is after the record date but before the dividend payable date, accrue the dividend. See 15.5 Action Steps: Compute Accrued Dividends Receivable on Corporate Stocks

**27** If a security is not listed on an exchange, base fair market value on the average of the end-of-day-bid and asked prices for the security on the valuation date, as nationally published in a general circulation daily newspaper which is available in any library.

**28** Verify securities on hand and those that have been sold. Be sure that funds from sales have been recorded and deposited.

**29** Check the following for each asset (as applicable):

- Be aware of accrued interest for bonds (accrued interest equals principal times interest rate times days since last payment). Always use 360 days per year. See 15.5: Calculate

Interest.

- Be aware that commercial paper sells either on a discount basis yielding the face amount at maturity or on an interest bearing basis yielding the face amount plus accrued interest at maturity. Be aware that the valuation for state and municipal obligations is the average of the bid and asked prices published on DOPT. If there are no published prices for that date, use the price on the day closest to and falling within five days before DOPT.
- Be aware that Corporate Bonds carry interest, usually paid semi-annually, and the price can sometimes be found in daily newspapers.
- Be aware of cumulative preferred stock dividends that may not have been paid.
- Be aware that convertible bonds, at the option of the holder, can usually be turned into preferred or common shares authorized for that purpose at the date of the issue. Bond prices fluctuate and may also be found in daily newspapers.

**Audit Plan Assets**

## 15.3 Value Hard-To-Value Assets

**04/07/99**

Action Steps

| | |
|---|---|
| **Purpose** | Determine fair market value of assets as of DOPT. |
| **Time Reporting (BMPRS)** | Plan Assets Audit<br>Contract Plan Assets Audit<br>PPD Support to TPD<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identity of assets considered hard to value. |
| **Output and Recipient** | Valuation of assets. |
| **Control Issues** | N/A |
| **Important Concepts** | For a TPD's purposes, any asset that is not readily liquid is considered hard-do-value and referred to PPD for valuation. When valuing hard-to-value assets, it is important to remove uncertainties regarding the value of those assets as of DOPT. If uncertainties cannot be removed, work with the TPD Manager to request a waiver of the removal of uncertainties requirement under guidelines in the PBGC Operating Policy Manual, section 8.2-1. |
| **Guidance** | PBGC Regulation 4044.41(b)<br>PBGC Operating Policy Manual 8.2-1 |
| **Procedure Owner** | PPD Financial Analyst |

15.3 Action Steps: Value Hard-To-Value Assets

## 15.3 Action Steps: Value Hard-To-Value Assets 02/16/2001

This procedure assumes that the TPD auditor prepared and submitted to PPD a *Request to PPD for Financial Analysis Assistance (Ppdanal.doc)*, along with all required attachments, and forwarded a hard-to-value asset task referral in CAS. (See Process 15.1: Perform Initial Analysis.)

## Click Here for More Information...

Collect Information

Value Property (Real)

Value Mortgages

Value Closely-Held Stock

Value DUEC

## 15.3 Action Steps: Value Hard-To-Value Assets 05/31/96

## Collect Information

I. Identify and collect the materials and background data necessary for valuing the hard-to-value asset. The materials necessary will vary according to the type of asset, but will include some of the following:

- Historical cost.
- Copies of all legal documents.
- Real property should include copies of any appraisals and the latest tax assessment.
- Recent sales histories of similar properties sold within the past year in the same geographical area.
- Closely held stock should include any details as to the latest transactions and selling price plus a prospectus, corporate charter, and corporate minutes.

**30** Research recent transactions or valuations for similar assets and ask questions of the supervisor and other financial analysts - it's possible that someone had to value a similar asset in the past. When possible, refer the valuation to a professional appraiser who can make a good estimate. As trustee, PBGC has the option of selling the asset. Depending on its likely value, paying a broker to sell the asset may be the fastest and cheapest way of valuing it. Once sold, its price or value as of DOPT can be determined by discounting the sale price back to that date.

**31** For real property, mortgages, and DUEC, follow the procedures below. For other hard-to-value assets, consult with other financial analysts and PPD management for direction.

## 15.3 Action Steps: Value Hard-To-Value Assets 05/31/96

## Value Property (Real)

Real estate will normally fall into the category of a hard-to-value asset. The goal with real property is to determine the cost, purchase date, market value on DOPT, and to identify any associated liens or mortgages. To value real estate, take the following steps

I. Obtain or develop a description of the property, including its location, size, and the nature of improvements such as buildings.

II. Obtain and review any official documents related to the property. If necessary, visit the local court house and determine ownership of the deed (use liber and folio number), verify that taxes have been paid to date, and verify any liens against the property.

III. Obtain and review the insurance policy to ascertain the amount of insurance on the property.

IV. Contact a local, professional real estate appraiser who specializes in the type of property that constitutes the asset (for example, office building, residence, retail mall, etc.). Explain the purpose of the appraisal and the importance of valuing the property as of DOPT. Make a physical inspection of the property only if it is convenient, otherwise rely on the professional appraiser. Request that the appraiser:

- Appraise the property as of DOPT.
- Determine the amount of rental income, if any, and whether the property is rented to a party-in-interest.
- Determine the rental and vacancy rates, if applicable, and determine if they are reasonable given local conditions.

**32** Close the task referral on CAS and update the Hard-to-Value Assets milestone.

## 15.3 Action Steps: Value Hard-To-Value Assets 05/31/96

## Value Mortgages

I. Prepare a working paper showing description of property, interest rate, and payment terms including amounts.

II. Obtain copies of any mortgage documents and descriptions of collateral.

III. Verify that mortgage income has been properly recorded.

IV. Document the finding and provide a copy to the TPD auditor for inclusion in the asset audit report.

V. Close the task referral on CAS and update the Hard-to-Value Assets milestone.

**Audit Plan Assets**

## 15.3 Action Steps: Value Hard-To-Value Assets 05/31/96

## Value Closely-Held Stock

I. Prepare a working paper showing description of stock, interest rate, and payment terms including amounts.

II. Obtain any minutes from board meetings or other meetings that describe the value of the stock.

III. Obtain evidence of transactions in which the stock changed hands.

IV. Make a valuation based on available evidence and considering the strength of the company and its market potential.

V. Close the task referral on CAS and update the Hard-to-Value Assets milestone.

## Value Payables

### Click Here for More Information...

Value Pre-Termination Plan Liability (Retiree Benefits)

Value Unpaid Premiums

**Accrued Expenses Payable**

Most pension plans incur expenses relating to their operations such as legal, actuarial, and administrative fees. It is important that these types of expenses relating to services provided prior to DOPT be accrued to the date of plan termination. Determine the amount payable for the services rendered prior to DOPT and accrue these amounts. Also, determine the amount of benefit payments outstanding due on DOPT. Note that payables include amounts past due for benefit payments as of DOPT, including payments due participants who should have been put into pay status but were not.

**Example**

*Assume DOPT is 7/1/XX and trustee statements for the plan year 1/1/XX are available. Administrative fees of $400 were charged to the plan in December (for the year ended 12/31/XX). As of 7/1, the DOPT, six months, or 6/12 of the administrative fees should be accrued.*

*Additionally, at 7/15, legal fees of $1,000 were paid relating to plan litigation with a participant and the fees all related to services rendered prior to 7/1. As of DOPT, all of the $1,000 legal fees should be accrued.*

1. Obtain a listing of the plan's accounts payable as of DOPT.
2. Determine if payables are legitimate pursuant to the trust document.
3. Investigate any unrecorded accounts payable (for example, attorney fees, consulting fees, etc.)
4. Confirm payables with creditors by direct confirmation.

## 15.4 Action Steps: Value Plan Liabilities 03/10/2000

## Value Pre-Termination Plan Liability (Retiree Benefits)

I. Determine the PTPL amount. This amount is equal to the amount of benefit payment times the number of missed payments prior to DOPT. The amount includes both payees who were underpaid and participants who should have been put into pay status. For those who were never put into pay status, use the *later* of date of termination of employment (DOTE) and normal retirement date (NRD) as the date of retirement.

- Identify all payees who did not receive benefit payments due to them prior to DOPT and, for each of these payees, multiply the amount of the payment by the number of missed payments prior to DOPT to find the amount due to each of the payees.
- Identify all participants who should have been put into pay status and should have received benefits prior to DOPT, but did not. For each of these participants, determine what the benefit amount would have been, and multiply the amount of the payment by the number of missed payments prior to DOPT to find the amount due to each of the participants.
- Add the amounts for all payees who are owed pre-DOPT benefits to determine the total.

**33** Determine whether the plan assets can cover PTPL and how to value PTPL.

- If the assets exceed PTPL, request the PLS make appropriate back payments. Value PTPL as the actual amount.
- If there are no assets to cover PTPL, actuarially increase the benefits for late retirement for those not actually in pay status at DOPT. If the plan does not provide late retirement factors, use PBGC factors: age on first of month following DOPT. Do not change the benefit for the missed payments if the participant retired pre-DOPT even though the benefit payable after DOPT would be the larger amount. Value PTPL as the actual amount.
- If the assets partially cover the PTPL, pay and value the larger of the benefits as calculated for 1) age on first of month following DOPT, and 2) retirement as of the later of DOTE and NRD.

**34** If required, adjust the plan asset value:

- If FOD/COD/IAB has not finalized the assets, reduce the plan asset amount by the amount of PTPL. Notify FOD/COD/IAB of the action taken.
- If FOD/COD/IAB has finalized the assets, make no adjustment to the plan asset amount.

## 15.4 Action Steps: Value Plan Liabilities 05/31/96

## Value Unpaid Premiums

I. When the information on premiums owed to PBGC is returned from FOD/COD/IAB (see Process 8.3 Effect Trusteeship or Process 15.1 Perform Initial Analysis), use the following guidelines to determine when it should be subtracted from DOPT plan assets:

- For plan years prior to 1/1/88, consider unpaid premiums an expense of the plan and subtract from plan assets.
- For plan years subsequent to 1/1/88, unpaid premiums are a liability of the plan sponsor and members of the control group. Do not subtract the unpaid premiums from plan assets.

## 15.4 Action Steps: Value Plan Liabilities 03/10/2000

## Value Pre-Termination Plan Liability (Retiree Benefits)

I. Determine the PTPL amount. This amount is equal to the amount of benefit payment times the number of missed payments prior to DOPT. The amount includes both payees who were underpaid and participants who should have been put into pay status. For those who were never put into pay status, use the *later* of date of termination of employment (DOTE) and normal retirement date (NRD) as the date of retirement.

- Identify all payees who did not receive benefit payments due to them prior to DOPT and, for each of these payees, multiply the amount of the payment by the number of missed payments prior to DOPT to find the amount due to each of the payees.
- Identify all participants who should have been put into pay status and should have received benefits prior to DOPT, but did not. For each of these participants, determine what the benefit amount would have been, and multiply the amount of the payment by the number of missed payments prior to DOPT to find the amount due to each of the participants.
- Add the amounts for all payees who are owed pre-DOPT benefits to determine the total.

**33** Determine whether the plan assets can cover PTPL and how to value PTPL.

- If the assets exceed PTPL, request the PLS make appropriate back payments. Value PTPL as the actual amount.
- If there are no assets to cover PTPL, actuarially increase the benefits for late retirement for those not actually in pay status at DOPT. If the plan does not provide late retirement factors, use PBGC factors: age on first of month following DOPT. Do not change the benefit for the missed payments if the participant retired pre-DOPT even though the benefit payable after DOPT would be the larger amount. Value PTPL as the actual amount.
- If the assets partially cover the PTPL, pay and value the larger of the benefits as calculated for 1) age on first of month following DOPT, and 2) retirement as of the later of DOTE and NRD.

**34** If required, adjust the plan asset value:

- If FOD/COD/IAB has not finalized the assets, reduce the plan asset amount by the amount of PTPL. Notify FOD/COD/IAB of the action taken.
- If FOD/COD/IAB has finalized the assets, make no adjustment to the plan asset amount.

**Audit Plan Assets**

## 15.5 Calculate Interest

**01/10/97**

Action Steps

| | |
|---|---|
| **Purpose** | Determine the amount of interest accrued on an asset or liability. |
| **Time Reporting (BMPRS)** | Plan Assets Audit<br>Contract Plan Assets Audit<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Value of asset or liability, applicable interest formula for type of asset, and number of days of interest to apply. |
| **Output and Recipient** | Net value of an asset or liability, including interest. |
| **Control Issues** | N/A |
| **Important Concepts** | Account for plan assets on the accrual basis rather than cash basis. Interest, dividends, and other income earned, but not received as of DOPT, should be valued and included as part of the plan assets. |
| **Guidance** | Follow standard accounting procedures for various types of accrued income.<br>Reference provided Chart to Determine Method of Computing Accrued Interest. |

| Insurance Contracts | y | y | n | n | y | n | n | n | n | n | y | n | y |
| CD | | | y | | | | | | | | | | |
| Foreign Gov't. Bonds | | | | y | | | | | | | | | |

## 15.5 Action Steps: 05/31/96

## Calculate Interest Accruals for Securities

Interest accruals should be made for all securities using actual days of interest as the basis for computations. U.S. Notes, Government bonds, Treasury bills and notes provide for payment of interest on a semi-annual basis. For example, a U.S. Treasury Note due August 15, 1987 will have interest payment dates of February 15 and August 15. Therefore, a $1,000,000 face value 10% note will pay $50,000 interest on February 15 and August 15, until Maturity.

Compute accrued interest receivable as follows:

- Face value x interest rate = period interest
- Period interest x (number of days from the date of the last interest payment to DOPT/total days in the interest period)

**Example** Plan A owns a $1,000,000 U.S. Treasury Note maturity dated August 15, 1990 at 10% interest. The Note was purchased two years ago. The Plan's DOPT was June 20, 1987.

The computation of accrued interest receivable as of DOPT is as follows:

**($1,000,000 x .10/2) = $50,000**

**($50,000 x (125/182) = $34,340.66**

The number of days between the last interest payment date and DOPT (125) is computed as follows:

| | |
|---|---|
| **Last interest payment date** | **February 15, 1987** |
| **DOPT** | **June 20, 1987** |
| **February** | **14 days (not considering Leap Year)** |
| **March** | **31** |
| **April** | **30** |
| **May** | **31** |
| **June** | **19 (do not count DOPT)** |
| **TOTAL** | **125** |

The denominator of 182 days in step 2 is the actual number of days between the date of last payment and the date for the next payment.

| | |
|---|---|
| **February** | **14 (not considering leap year)** |
| **March** | **31** |
| **April** | **30** |
| **May** | **31** |
| **June** | **30** |

| | |
|---|---|
| July | 31 |
| August | 15 |
| TOTAL | 182 |

## 15.5 Action Steps: 05/31/96

## Compute Discount and Price on Treasury Bills

Although Treasury bills are widely quoted and traded on a rate basis often called "yield," they are actually quoted and figured on a bank discount basis. The computation of the discount is based on the actual number of days, 360 days per year, according to the following formula:

A - Day to maturity

E - Discount basis

F - Full discount

G - dollar price

$$F = \frac{E}{360} * A$$

G=$100 - F

The following example illustrates the computation: Find the dollar price for a treasury bill due in 347 days on a 8.6% discount basis:

$$F = \frac{E}{360} * A = \frac{8.46\%}{360} * 347$$

=8.1545% Full Discount

=$8.1545 per $100 maturity value

G=$100-F

=$100-$8.1545 per $100

=$91.8455 Dollar Price for 8.46% discount basis

## 15.5 Action Steps: 05/31/96

## Compute Accrued Interest Income on Corporate and Treasury Bonds and Notes

In the normal course of business, interest accruals should be made for corporate bonds and notes on the DOPT, using a 360 day/year basis. A schedule of the interest accruals should be prepared, when applicable.

Corporate bonds and notes provide for the payment of interest on a periodic basis.

Treasury Bonds and Treasury Notes use the actual number of days for the interest earned computation.

**Audit Plan Assets**

## 15.5 Action Steps: 10/11/96

## Compute Accrued Dividends Receivable on Corporate Stocks

Prepare a listing of stocks owned by the plan on DOPT and review for dividends received up to that date. Accrue dividend income per the Standard and Poors Dividend Record Book if the ex-dividend date is prior to DOPT and the payment date is subsequent to DOPT. Also be aware of cumulative preferred stock dividends.

**Audit Plan Assets**

## 15.5 Action Steps: 05/31/96

## Compute Accrued Rental Income

Accrue rental income receivable at DOPT on any rental property held by the plan. If the DOPT falls within the rental payment dates, make a determination for rental income accrued based on the amount and period of the rent.

**Audit Plan Assets**

## 15.5 Action Steps: 01/10/97

## Compute Proportional Interest

To complete the valuation of assets, interest needs to be determined as of DOPT. Often assets (such as money markets or other STIF's) will have additions or disbursements during a statement period. Interest is typically credited after the end of a statement period and when the DOPT is other than the last day of the statement period, proportional interest as of DOPT must be determined. When making this computation, be aware of:

- DOPT;
- daily balance; and
- total interest earned during the period.

**a** = sum of daily balances from first day of period through DOPT

**b** = sum of daily balances from day after DOPT through the last day of the period

**c** = sum of daily balances for entire period

**i** = interest earned during the period

**Calculate proportional interest by the following formula:**

(a ÷ c) x i = interest as of DOPT

**Example** Plan A has a DOPT on the 22nd of the month. The plan's opening balance in the fund was $50,000. It remained at $50,000. until the 20th of the month, when an additional deposit of $450,000. is made. From that day forward the fund's balance was $500,000. Total interest earned for the entire period is $10,000.

**PLAN A: MONEY MARKET FUND INVESTMENT ACCOUNT**

| Day | Daily Balance |
|---|---|
| 1 | 50,000 |
| 2 | 50,000 |
| 3 | 50,000 |
| 4 | 50,000 |
| 5 | 50,000 |
| 6 | 50,000 |
| 7 | 50,000 |
| 8 | 50,000 |
| 9 | 50,000 |
| 10 | 50,000 |
| 11 | 50,000 |
| 12 | 50,000 |

**13** 50,000

**14** 50,000

**15** 50,000

**16** 50,000

**17** 50,000

**18** 50,000

**19** 50,000

**20** 500,000 _____ addition of $450,000 to fund

**21** 500,000

**22** 500,000 DOPT

**23** 500,000

**24** 500,000

**25** 500,000

**26** 500,000

**27** 500,000

**28** 500,000

**29** 500,000

**30** 500,000

---

Following the steps provided above: (a ÷ c) x i = interest as of DOPT

a = 2,450,000

[50,000 x 19 (days 1 through 19)] + [500,000 x 3 (days 20 through 22)]

b = 4,000,000.

[500,000 x 8 (days 23 through 30)]

c = 6,450,000

[ (2,450,000 + 4,000,000) OR (a+b) ]

i = 10,000

(2,450,000 ÷ 6,450,000) x 10,000 = $3,789

Therefore, the interest on this investment account accrued through the DOPT = $ 3,798.00

## Introduction to Valuation Processes

05/31/96

The purpose of the Valuation Processes is to determine the present value of each participant's benefit and the composite present value for the entire plan. PBGC uses the resulting plan present value figure in determining the Corporation's overall liability and for financial statements. The valuation processes also provide the information necessary for developing benefit statements, which explain the data, assumptions, and variables used in calculating each participant's benefit, and for sending BDLs. The activities constitute the final analysis of All of the information collected in earlier processes and create a meaningful presentation of PBGC's liabilities and each participant's final benefit amount.

## Valuation Processes include:

16 Value Recoveries & Allocate to Claims

17 Prepare Actuarial Case Report & Software

## PR 16. Value Recoveries & Allocate to Claims

16. Overview
16. Definitions: Value Recoveries & Allocate to Claims
16. Workflow for Process 16
16.1 Determine Status of Recoveries
16.2 Analyze Data & Value Recovery
16.3 Allocate Combined Recoveries Among DUEC, UBL, & Unpaid Premiums
16.4 Document Recovery Values
Forms, Letters, Memos, etc.

## 16. Overview

**10/10/97**

This process describes how to determine the value of and allocate Due and Unpaid Employer Contribution (DUEC), unfunded benefit liabilities, and unpaid premiums. The procedures are based on PBGC Operating Policy Manual, Chapter 8, Section 2, Subsection 1. Procedures for *allocating* plan assets and recoveries are covered as part of Process 17: Prepare Actuarial Case Report & Software.

As part of terminating an insufficient, covered pension plan, PBGC asserts claims against the contributing sponsor and its controlled group members in two capacities:

1. as trustee, for the amount of DUEC, and
2. as guarantor of benefits, for
   - its employer liability claim for the amount of unfunded benefit liabilities (UBL) and
   - any unpaid PBGC premiums (through DOTR).

When PBGC does not collect the full amount of its claims, the total *value* of PBGC's recovery against the liable parties must be allocated among PBGC's claims for DUEC, employer liability, and unpaid premiums. Liable parties include the contributing sponsor and controlled group members.

DUEC is a plan asset (an account receivable some of which may be a priority claim in bankruptcy court). The value as of Date of Plan Termination (DOPT) of the *recovery on the* DUEC claim affects:

1. the allocation of assets to guaranteed and nonguaranteed benefits in accordance with ERISA Section 4044, and
2. the amount of the PBGC's employer liability claim for unfunded benefit liabilities in accordance with ERISA Section 4062(b).

The value as of DOPT of the *recovery on PBGC's employer liability* claim for a plan affects:

1. for Pension Protection Act (PPA) plans with (a) a termination initiation date on or before December 17, 1990, or (b) a termination initiation date after December 17 1990 and more than $20 million in unfunded nonguaranteed benefits, the recovery ratio used to determine the amount of any ERISA Section 4022(c) benefits that will be paid to participants in *that* plan;
2. for all PPA plans, the computation of the recovery ratio used to compute the amount of ERISA Section 4022(c) benefits that may be paid in SPARR plans; and
3. for all PPA plans, the PBGC's net losses for the financial statements.

Unpaid premiums owed to the PBGC are an asset of PBGC's revolving fund, and thus, affect the financial statements. The value of the recovery on claims against the contributing sponsor and controlled group members for unpaid premiums does not directly affect participants' or employer liability.

The purpose of valuing DUEC and recovery for employer liability is to determine what is *the likely total recovery* that PBGC will obtain from the contributing sponsor and controlled group members: referred to as *recoverability*.

Potential recovery is not necessarily dependent on the net worth of the party or parties against whom PBGC attempts recovery. The recovery will be used to finalize plan assets for DUEC, and the recovery ratio for UBL. Portions of the DUEC claims generally have better standing in bankruptcy court, and thus improve PBGC's chances of a better total recovery. The value of DUEC and other employer liabilities is often zero because employers who cannot afford to fund their pension plans often have no recoverable assets. However, since PBGC can make claims against any and all controlled group members, a "net worth analysis" of the individuals and organizations is necessary to determine the

likelihood of recovery and probable value of any recovery. Once valued, the recovery must be discounted back to DOPT for the plan valuation and allocated between DUEC, UBL, and Premiums.

# 16. Definitions: Value Recoveries & Allocate to Claims 05/31/96

DUEC

Guaranteed Benefit

PPA

Premium

Termination Date

Termination Initiation Date

Title IV Benefit

**DUEC**

See Due and Unpaid Employer Contribution

**Guaranteed Benefit**

For a single-employer plan, the benefit that is guaranteed by the PBGC under ERISA Section 4022(a) and (b) or in a multiemployer plan, the benefit guaranteed by PBGC under Section 4022A of ERISA.

See 29 CFR 4001. 2: Terminology.

**PPA**

Depending on the context, may refer to Pension Protection Act or prior paying agent.

**Premium**

Depending of the context, the meaning may differ. Generally, PBGC uses annual amounts owed by covered plans pursuant to ERISA Section 4007 and PBGC premium regulations (29 CFR Part 4006 and 4007). In valuing recoveries, however, premiums to refer to any unpaid premium amount required to be paid to the PBGC pursuant to ERISA Section 4007 and any penalty and interest thereon. (See PBGC's Operation Policy Manual Issuance, Chapter 8. 2-1, "Valuing Recoveries" for more detail. )

**Termination Date**

Termination Date ("DoPT") means the date established pursuant to ERISA Section 4048(a). (See 29 CFR 4001. 2)

**Termination Initiation Date**

Termination initiation date means --

**a.** for a plan that terminates in a distress termination under ERISA section 4041(c), the last date on which any notice of intent to terminate is issued to any affected party other than PBGC; and

**b.** for a plan that terminates in a PBGC-initiated termination under ERISA section 4042 (even if the plan administrator had filed a notice of intent to terminate the plan in a distress termination), the date on which PBGC issues a notice of determination that the plan will be involuntarily terminated. In the absence of such a notice, the termination initiation date is the date on which PBGC's Executive Director, or his or her designee, authorizes the initiation of proceedings to terminate the plan under ERISA section 4042.

(Source: PBGC Operating Policy Manual 6. 7-1)

**Title IV Benefit**

Means the guaranteed benefit plus any additional benefit to which plan assets are allocated pursuant to section 4044 of ERISA and 29 CFR Part 4044 .It does not include a 4022(c) benefit. Compare Guaranteed Benefit; Termination Benefit.

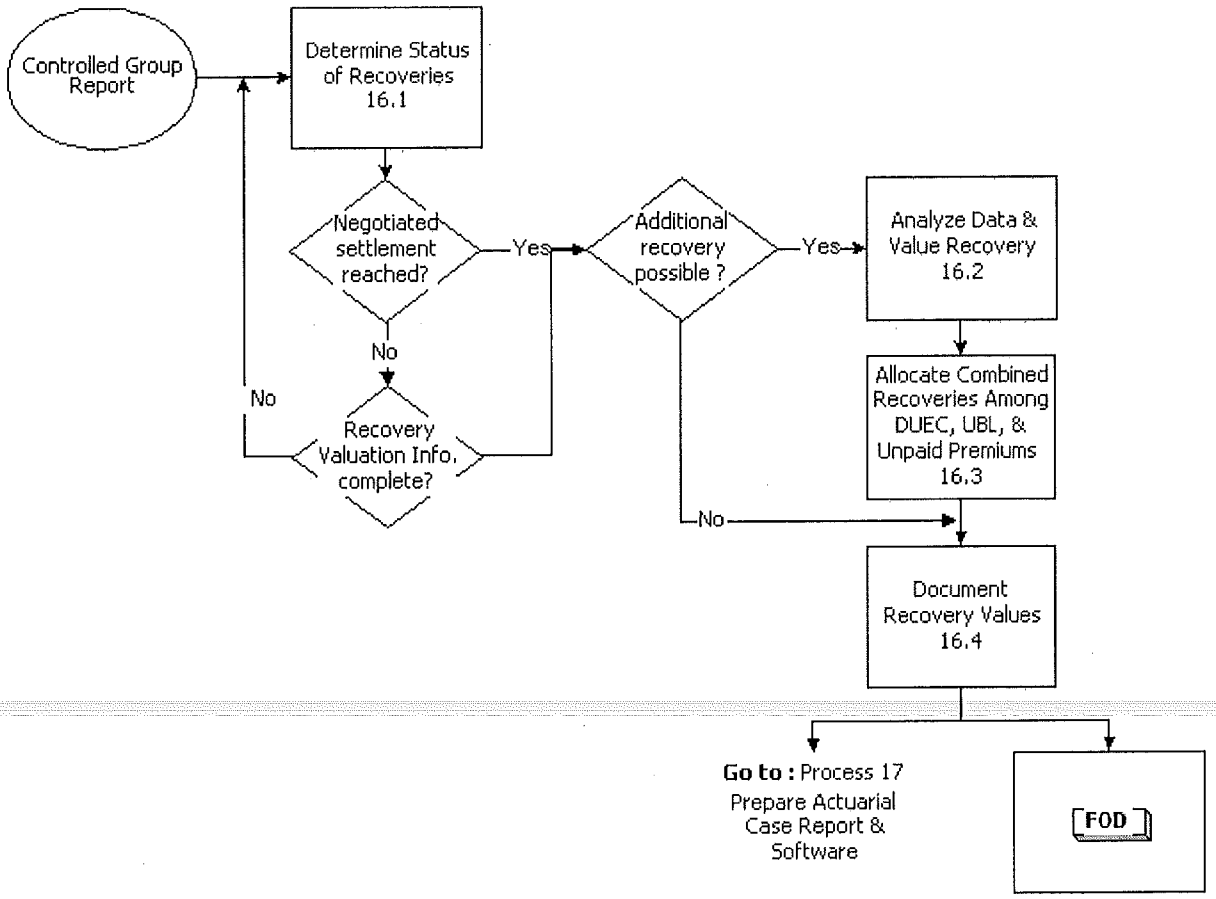
Value Recoveries and Allocate to Claims

## 16. Workflow for Process 16

05/31/96



**Value Recoveries and Allocate to Claims**

## 16.1 Determine Status of Recoveries

**04/07/99**

Action Steps

| | |
|---|---|
| **Purpose** | Obtain sufficient information from OGC on the status of settlements with the liable party or parties to determine how much PBGC will collect.<br>Identify potential recoveries not covered within the scope of any OGC negotiated settlement. |
| **Time Reporting (BMPRS)** | Recovery Assessment and Allocation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Information from OGC attorney working on case.<br>OGC information on negotiated settlements.<br>Identity of controlled group members. |
| **Process Output and Recipient** | Decision whether or not to value recovery as other than zero.<br>Identity of parties against whom PBGC may take recovery action. |
| **Control Issues** | N/A |
| **Important Concepts** | Working closely with OGC at this stage in the recovery process is crucial.<br>If there is no court action, IOD will have the lead in negotiating a settlement (except for CFND cases). |
| **Guidance** | ERISA 4022(c)<br>ERISA 4041(c)<br>ERISA 4062(b)<br>PBGC Operating Policy Manual 8.2-1 |
| **Procedure Owner** | Auditor |

### Click Here for More Information...

16.1 Action Steps: Determine Status of Recoveries

## 16.1 Action Steps: Determine Status of Recoveries

05/31/96

1 Contact the OGC attorney who has worked on the case and request information on the status of negotiations with the sponsor or other controlled group members and the actual or potential outcome of the bankruptcy proceedings. Explain that the TPD is preparing to value DUEC and recovery for employer liability and needs to know if OGC has reached a settlement or anticipates reaching one soon. If sufficient information is not available, postpone valuation until OGC can provide the information.

2 Identify any controlled group members with whom OGC has not negotiated a settlement. These parties represent potential for additional recovery.

3 Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Value Recoveries and Allocate to Claims**

## 16.2 Analyze Data & Value Recoveries

**04/07/99**

Action Steps

| | |
|---|---|
| **Purpose** | Assign value to probable recovery based on data collected. |
| **Time Reporting (BMPRS)** | Recovery Assessment and Allocation<br>PPD Support to TPD<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identity of controlled group members and their recoverable assets.<br>Amount of premiums due PBGC from the Financial Operations Department/Collection and Compliance Division (FOD/CCD) as of DOTR.<br>DUEC and UBL calculations from the Actuarial Services Department ( ASD) or Corporate Finance and Negotiations Department (CFND). |
| **Process Output and Recipient** | Determine current dollar value of each recovery claim, including both claims already collected and those payable, but not received. The Recovery Determination Memo has this information, including the value of the recovery at DOPT. |
| **Control Issues** | N/A |
| **Important Concepts** | Subsequent adjustments to the value of recoveries may be made only when IOD determines that the valuation was based on a material mistake of fact, for example, discovering that an employer has substantial assets that were not taken into account at the time the recoveries were valued. Notify the Director of IOD and the Director of FOD of the mistake of fact as soon as it is discovered. The IOD and FOD directors consult with OGC in deciding whether or not to adjust the recovery value.<br>The recovery may also be *re*valued, but only for plans subject to the "large plan rule" of ERISA 4022(c)(3)(C). If the value of the recovery has changed significantly between the date it was valued and the date PBGC calculates the total section 4022(c) amount for the plan, PBGC may value the recovery as of a later date for the purpose of determining Title IV benefits and the total section 4022(c) amount for the plan.<br>If a plan sufficient at PBGC rates as of DOPT and subsequently becomes insufficient as described in ERISA section 4041(c)(3)(C)(ii), determine the value of recoveries as of the date of the subsequent insufficiency as described in ERISA 4062(b)(1)(B). |
| **Guidance** | ERISA 4022(c)<br>ERISA 4041(c)<br>ERISA 4062(b)<br>PBGC Operating Policy Manual 8.2-1 |
| **Procedure Owner** | PPD auditor or financial analyst, with input from TPD auditor and OGC attorney assigned to case. |

## Click Here for More Information...

16.2 Action Steps: Analyze Data & Value Recoveries

**Value Recoveries and Allocate to Claims**

## 16.2 Action Steps: 02/16/2001
## Analyze Data & Value Recoveries

The TPD auditor begins the procedure and forwards a recovery allocation task referral in CAS to PPD or CFND for any needed valuation. Complex and difficult cases go to PPD and large cases with UBLs over $25M go to CFND. Simple valuations may be done in the TPD. This includes those with a value of zero. For large cases with UBLs over $25M, CFND will value the recovery and either TPD or PPD will do the allocation of the recovery.

### Click Here for More Information...

TPD Auditor

PPD Auditor or Financial Analyst

## 16.2 Action Steps: TPD Auditor Analyze Data & Value Recoveries

**01/10/2003**

I. Determine that all significant uncertainties as to the values of recoveries have been removed. Generally, uncertainties are removed after a settlement agreement has been reached, final court order issued, or some other disposition of bankruptcy claims has been made final. In cases where it is unclear whether or not significant uncertainties have been removed, or if the delay in making the determination will have a negative impact on case processing, refer the matter to the TPD Manager.

II. There are two exceptions to the requirement that all significant uncertainties be removed before valuing recoveries.

- The Deputy Executive Director (DED) and Chief Operating Officer (COO) determine that PBGC is otherwise ready to begin determining participant's benefits for the plan, and
- the DED and COO, after receiving a recommendation from IOD, determine that the impact of the remaining significant uncertainties would not have a material impact on termination benefits in that plan or other plans.

**35** Recovery values determined under these exceptions may be used for all purposes.

**36** Prepare a *Recovery Determination Memo (Recdeter.doc)*. Note for each recovery, the date that uncertainties were removed. This date becomes the "as of" date on which the valuation is based. If different recoveries for a plan have different dates, value each recovery as of the date that applies to that recovery (they may have different valuation dates even for the same plan). Also determine the value of the recoveries at DOPT. If there are no recoveries, state in the memo that there are no recoveries and that the value is zero.

- Use the Allocation Recovery Tool (ART) to value and allocate recovery for up to 3 plans and 2 recoveries. ART can be found through Lotus 1-2-3 (I:\123\ART\ART.WK4). Run ART, check results, and print results. Do not save.
- PBGC-owned calculators have a built-in program for finding future value and past or discount value. This can be used.
- It is also possible to use the Net Present Value (@NPV in Lotus 1-2-3 for Windows) formula for finding discount value.

$$\sum_{i=1}^{n} \frac{vi}{(1+\text{int})^{i}}$$

where *vi...vn* = series of cash flows in a range

*n* = number of cash flows
int = interest rate
*i* = current iteration (1 through *n*)

- See the Lotus 1-2-3 for Windows User's Guide, Chapter 10, "Calculating with @Functions" and Appendix C, "Formulas for @Functions". The on-line help for Lotus 1-2-3 for Windows also has information which will help in determining how to do the calculations.
- To value a single payment, use "0" for the payment received for each period except the single payment.
- If the interest is compounded semi-annually, divide the rate by two; if quarterly, by four; if monthly, by 12. Remember that each row is a compounding period.

- A significant drawback to the use of this formula is the fact that payments are not always received on the last day of a compounding period and DOPT is also not the last day in the period. To get around this, use three worksheets. For the first worksheet, calculate the payment received as of the first day of the payment period. There will then be the number of rows corresponding to the number of days between the first of the period and the date received. Then the interest rate would be further divided by a fraction defined as the number of days since the first of the period divided by the total number of days in the period.
- Bring that amount to the second sheet. This sheet should have the number of compounding periods corresponding to the number between the first period after DOPT up to the start of the period used for the first worksheet.
- The third sheet is done similarly to the first, using the number of days from DOPT to the end of the compounding period. The interest rate divided by the number of compounding periods (e.g., quarterly) further divided by a fraction with the number of days from DOPT to the end of the period over the total number of days in the period.
- When calculating on paper using the above formula, the following apply:
    - The "n" above the sigma symbol stands for the total number of payments received, not the total number of compounding periods. For example, we may receive an initial payment from the bankruptcy estate 5 months after the DOPT and a final payment when the bankruptcy case is closed 23 months later. Regardless of how often interest is compounded, the "n" will be 2. If we received only one payment, the "n" will be just 1.
    - The sigma symbol means that we will have to do two things. First, we perform the calculation required in the formula attached to the symbol, on each individual payment. If we received 15 payments in all, we will divide vi by (1 + int)i 15 times, one for each payment we received. We will end up with a list of 15 quotients. The second thing to do is to add them all up in a single sum.
    - The "i=1" below the sigma symbol stands for the current number of compounding periods. Suppose interest is compounded each month and we don't receive any payment until 5 months after the DOPT. The "i-1" for the first payment will be 5. Also, the "i" immediately to the right of the "(1 + int)" will be 5, too.
    - The "vi" stands for the amount of the payment that we are currently working on. If we received $2,000 5 months after the DOPT, the vi will be 2,000. The final payment of, say, $4,500 when the bankruptcy case is closed will take vi's place.
    - The "int" stands for the interest rate per compounding period. Monthly compounding will require that the interest rate be divided by 12 first, before it can be used in this formula; if semi-annual, divide by 2, and so on.

- An example: DOPT is 2/1/93. The bankruptcy estate paid us $3,500 on 5/31/93. After the sale of an asset, the estate further distributed $12,500 to us on 5/31/94. After settling all claims, the estate finally closed its case, sending us a check for $2,000 on 11/30/95. Monthly interest compounding.

| Number of payment | Compounding periods since DOPT | Amount of payment | Calculation of NPV | Result |
|---|---|---|---|---|
| 1 | 4 | $3,500 | 3,500 / (1 + 12%/12)4 | 3,363.43 |
| 2 | 16 | $12,500 | 12,500 / (1 + 12%/12)16 | 10,660.27 |
| 3 | 34 | $2,000 | 2,000 / (1 + 12%/12)34 | 1,425.95 |
| **Total** | | | | **$15,449.65** |

**37** If uncertainties have not been removed a recovery determination cannot be completed. Consult with the TPD Manager.

**38** Send a recovery allocations task referral in CAS to PPD, requesting a valuation of the recovery.

## 16.2 Action Steps: PPD Auditor or Financial Analyst Analyze Data & Value Recoveries

05/31/96

I. Value the total recovery on PBGC's claims for DUEC, employer liability, and unpaid premiums on a facts-and-circumstances basis. Include all components of PBGC's recovery, even contingent assets such as a PBGC interest in the future profits of an organization.

II. If OGC has reached a settlement, or if the bankruptcy court has made a distribution against claims, the value of the recovery for the entity involved (contributing sponsor or other controlled group member) is generally the negotiated amount of the settlement or distribution. This is usually the case for liquidations (where OGC can confirm that the recovery is zero) and for reorganizations where the entity agrees to pay a certain percentage of the claim (such as ten cents on the dollar). In cases where the settlement includes periodic, such as annual, payments, it may be necessary to value the total recovery in light of the probability of the entity actually making negotiated future payments. When making this valuation, consider factors such as the viability of the entity, its industry, market sector, etc.

III. Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Value Recoveries and Allocate to Claims**

## 16.3 Allocate Combined Recoveries Among DUEC, UBL, & Unpaid Premiums

**04/07/99**

Action Steps

| | |
|---|---|
| **Purpose** | Determine how much of PBGC's recovery to allocate to DUEC, Unfunded Benefit Liabilities (UBL), and unpaid premiums. |
| **Time Reporting (BMPRS)** | Recovery Assessment and Allocation<br>PPD Support to TPD<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Value of all recoveries for the plan, as prepared by CFND, PPD, or TPD. |
| **Process Output and Recipient** | Dollar amounts of the portions of combined recovery allocated to DUEC, UBL, and unpaid premiums. |
| **Control Issues** | N/A |
| **Important Concepts** | When PBGC obtains recovery from more than one entity and/or bankruptcy estate, combine the recoveries for the purpose of allocating them.<br>Allocate the value of PBGC's combined recoveries as soon as practicable after the recoveries are valued and there is no significant uncertainty concerning the amount of any of PBGC's claims. If there is uncertainty, defer the allocation of the combined recoveries until the uncertainties are resolved.<br>In cases where recoveries apply to claims for more than one plan sponsored by the same employer/controlled group, apply the allocation principles in the same way.<br>In cases where recoveries must be allocated to multiple plans in the same controlled group which have different DOPTs, apply the distribution formula (*this formula is pending from OGC and OED and not included in this manual*). |
| **Guidance** | PBGC Operating Policy Manual 8.2-1 |
| **Procedure Owner** | PPD auditor or financial analyst |

## Click Here for More Information...

16.3 Action Steps: Allocate Combined Recoveries Among DUEC, UBL, & Unpaid Premiums

## 16.3 Action Steps: 02/16/2001

## Allocate Combined Recoveries Among DUEC, UBL, & Unpaid Premiums

1 Obtain the best available amounts for DUEC, UBL, and premium claims. Use the IOD figures for DUEC and UBL as they appear in CAS. Get the amount of unpaid premiums as of DOTR directly from FOD/CCD. FOD/CCD should have provided this in response to the Premium Information Request Memo. See either Process 8.3: Effect Trusteeship or Process 15.1: Perform Initial Analysis.

2 Determine the amount of interest due on each of the claim amounts from the start date (stated below) to the payment date or the settlement, as applicable, using the interest rate prescribed under IRC 6621. For claims against a bankrupt entity (except to the extent secured or entitled to tax priority), calculate interest only to the date the bankruptcy petition (whether voluntary or involuntary) was filed. Start dates for interest on different claims are as follows:

- For DUEC, calculate interest from the first day following the end of the plan year within which the termination date occurs
- For UBLs, calculate interest from DOPT
- For unpaid premiums, calculate interest from the date of the missed payment (do not include penalties)

3 Discount the interest from the valuation date back to DOPT as follows:

- For plans with DOPT on or after November 1, 1993, use the first of the select rates in effect on the termination date that are used to value benefits payable as an annuity (that is, *it* for t=1). Select rates are published in Appendix B, Table II to Subpart B - Valuation of Benefits and Assets of PBGC's regulation at 29 CFR 4044: Allocation of Assets in Single-Employer Plans.
- For plans with DOPT before November 1, 1993, use the immediate annuity rate in effect on the termination date.

4 Add the resulting (calculated and discounted) interest to each claim. The resulting figures are the amounts that PBGC would have received if all claims had been paid in full.

5 Total the resulting figures. The sum is the amount to allocate among DUEC, UBL, and unpaid premiums.

6 Allocate the combined recovery amounts first to secured claims in the order of their priority up to the value of the security (or, if less, of the secured claim) -- for example, a lien under IRC 412(n) that has been perfected, or a lien under ERISA 4068 that has been perfected. If the value is not sufficient to cover secured claims of equal priority, allocate the value on a pro-*rata* basis according to the amounts of those secured claims.

7 For bankruptcies, allocate any remaining recoveries to priority bankruptcy claims according their priority. These priority claims include:

- (a) (1) for post-petition DUEC
- (a) (4) for the DUEC accrued during the 180 days prior to the bankruptcy filing
- claims for 30% of net worth

**Note** If a plan has claims other than DUEC claims (for example, a fiduciary breach claim), treat those plan claims as part of the DUEC claim for purposes of allocation. If necessary to adjust the amounts of these other claims on a facts-and-circumstances basis (for example, to reflect the fact that other claims were asserted against more or fewer parties than those against which the DUEC claims were asserted), obtain the concurrence of OGC.

**8** If any recovery value remains:

- reduce the original claims by the recovery amounts allocated to them
- further reduce the UBL claim by the amount of the allocation to DUEC
- allocate the remaining value *pro rata* to the remaining claims as reduced. As part of the *pro rata* allocation, adjust the amount of UBL by the value of the recovery allocated to the DUEC claims using the *pro-rata* allocation formula below:

$$\frac{1}{2}\left[TC - \sqrt{(TC)^2 - 4 \cdot TR \cdot DUEC}\right.$$

Where TC = total claims TR = total available recovery
DUEC = total DUEC claims

- However, if a contributing sponsor or any controlled group member is involved in a bankruptcy or similar proceeding, allocate any remaining recovery value to priority bankruptcy claims in order of their priority (except as may be determined appropriate). Generally, treat the UBL claim as having no priority in these cases.
- Divide the total recovery on DUEC (the result of applying the formula) by the DUEC amount to determine the percentage of recovery on DUEC.
- Reduce the resulting UBL claim amount by the amount of the DUEC recovery (the result of applying the formula). However, do so only when the value of the DUEC recovery reduces the amount of the UBL claim that is sharing the same *pro rata* allocation (most cases).
- Apply the percentage of recovery on DUEC to UBL and unpaid premium claims to determine the recoveries on those claims.

**9** Document the calculations using a format similar to that shown in the examples in Attachment 1 to PBGC Operating Policy Manual, Chapter 8, Section 2, Subsection 1.

**10** Use the Allocation Recovery Tool (ART) to value and allocate the recovery for up to three (3) plans and four (4) recoveries. ART can be found through Lotus 1-2-3 (I:\123\ART\ART.WK4). Run ART, check results, and print results. Do not save.

**11** Request PPD Assistance if the Allocation Recovery Tool (ART) cannot be used. (Ex. There are more than three (3) plans and/or four (4) recoveries, or there are future recoveries.)

- Prepare a *PPD Recovery Allocation Data Form (Ppdrecal.doc)*.
- Prepare a *Request for PPD Financial Analysis Assistance (Ppdanal.doc)* and submit through TPD Manager to PPD Manager, including all required attachments.
- Send a recovery allocations task referral in CAS.

**12** Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Value Recoveries and Allocate to Claims**

## 16.4 Document Recovery Values

**01/10/2003**

Action Steps

| | |
|---|---|
| **Purpose** | Document TPD valuation of plan assets. |
| **Time Reporting (BMPRS)** | Recovery Assessment and Allocation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Recovery estimates developed from OGC information and other the auditor's analysis.<br><br>Any financial analysis performed on the contributing sponsor or other controlled group members, either by PPD as part of pre-termination processing or by TPD. |
| **Process Output and Recipient** | Completed Plan Asset Report<br>Updated CAS Plan Asset milestone<br>Recovery Determination Memo |
| **Control Issues** | N/A |
| **Important Concepts** | CAS Plan Asset milestone must be updated. MCU utilizes the CAS asset figure in the SPARR determination. See TP 25. Determine and Announce the Small Plan Average Recovery Ratio (SPARR)<br><br>Recovery Determination Memo documents all recovery determinations, including zero recovery determinations. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Auditor |

## Click Here for More Information...

16.4 Action Steps: Document Recovery Values

## 16.4 Action Steps: Document Recovery Values

01/10/2003

I. Finalize the plan asset report first created as part of Process 15.6: Complete Plan Asset Report, by adding appropriate information under the following headings:

- **Premiums Due PBGC**: as provided by FOD/CCD or from PPD analysis. Note: the amount of unpaid premiums are considered a liability of the plan sponsor and are not subtracted from plan assets. FOD/CCD should have provided this in response to the Premium Information Request Memo. See either Process 8.3: Effect Trusteeship or Process 15.1: Perform Initial Analysis.
- **Collectability value of** DUEC: based on the results of the bankruptcy proceeding and DUEC's status as an account receivable, determine the probability of PBGC collecting DUEC. Include a summary of any relevant financial analysis (often based on the schedule for proceeds in a Chapter 7 filing). This probability is largely a function of how much money, if any, is left over after any secured claims have been paid. In liquidations, the DUEC value is zero. It may be necessary to value the collectability of other creditors' claims based on the probable outcome of the disposition of the organization's assets. If the claims of secured creditors will not be satisfied, then the DUEC, having a lower standing than secured creditors, will be valued as zero. When benefits are not affected, value benefits as follows: 1) for on-going employers that are controlled group members, value DUEC at 100%, and 2) for bankruptcies, value at 100% for post-petition amounts and zero for all other amounts.
- **Collectability value of unfunded benefit liabilities (UBLs)**: an item-by-item valuation of all other recoveries from the contributing sponsor and controlled group members.
- Allocation **of recoveries**: figures for the amounts allocated to DUEC, UBL, unpaid premiums, and other claims, if any.

**39** Obtain the concurrence of the TPD Management Team.

**40** Distribute the report as follows:

| | |
|---|---|
| • Plan File | **Original** |
| • TPD Division Manager | **Copy** |
| • FOD/COD/IAB | **Copy** |
| • FOD/COD/FRAAB | **Copy** |
| • OGC (attorney working on case) | **Copy** |

**41** Update the Plan Assets milestone in CAS. CAS Plan Asset milestone **must** be updated. MCU utilizes the CAS asset figure in the SPARR determination. See TP 25: Determine and Announce the Small Plan Average Recovery Ratio (SPARR).

**42** Complete the *Recovery Determination Memo (Recdeter.doc)* by including appropriate information under the following headings:

- Purpose (purpose of the memo)
- Scope (how the information was acquired and reviewed)
- Background (information on the plan, sponsor, and case status)

- Analysis (the valuation and how it was done)
- Conclusion (the results)

**43** Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 16.5 Forms, Letters, Memos, etc.

02/16/2001

**Prepare Actuarial Case Report & Software**

## 17. Overview

**06/06/97**

The final Actuarial Valuation produces the Actuarial Case Report (blue-covered report) and all related software. The Actuarial Case Report is produced either by the TPD case actuary or by an actuarial contractor. Included in the report are the following (a list of the required items for the Actuarial Case Report can be found in Actuarial Case Report Checklist.

- Valuation Worksheets that show allocation of assets, calculation of Title IV benefits, and 4022(c) amount, and include the monthly amount and present value (PV) of the termination benefit for each participant in the plan.
- The Actuarial Case Memo, which reports all basic plan information; PBGC liability; funding, legal, or policy issues; interpretations concerning plan practice; and any odd quirks that need to be addressed.
- Benefit Statements and Benefit Recalculation process, including related software (e.g., Benefit Statement Recalculation Program (BSRS) ).
- All required and pertinent software that produced the hard copies of the Actuarial Case Report.

Standard close-out procedures should be followed to ensure accuracy of benefit amounts and efficiency in BDL issuance. This would include peer review of the Actuarial Case Report as well as software review and archiving of all required computer generated programs, memos, and databases.

## 17.1 Reconcile Participant Database

03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | To reconcile the Audited Participant Database with PRISM database and provide to OASD. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Audited Participant database |
| **Process Output and Recipient** | Reconciled Participant Database to OASD |
| **Control Issues** | • Preferable format of Reconciled Participant Database is Microsoft Excel Spreadsheet, Microsoft Access Database or DC Tools. If Reconciled Participant database is not in one of the preferable formats, an e-mail request should be sent to REPORTS-CUSTOM to convert the database, prior to submitting database.<br>• Each column on a spreadsheet/database should have only one type of data e.g. DOH. |
| **Important Concepts** | Provide the eight-digit case number in subject line of e-mail request(s). Reconciliation includes data elements, participant counts and other specific participant information. |
| **Guidance** | AACPS Manual, as applicable<br>ACT<br>PBGC Operating Policy Manual Chapters 5 and 6 |
| **Procedure Owner** | TPD Case Team |

## Click Here for More Information...

17.1 Action Steps: Reconcile Participant Database

**Prepare Actuarial Case Report & Software**

## 17.1 Action Steps: 03/28/2003
## Reconcile Participant Database

I. Review the Audited Participant Database to comply with the following:

- column names have ACT field names as headers.
- headers are not duplicated.
- user defined fields have descriptions - i.e. N001, D001, T001, etc.
- all participants are on the same sheet of the database/spreadsheet.
- each participant has a SSN, Retirement Status at DOPT (RETSTAT) and DOPT ID.

**44** Review the data elements to comply with the following:

- dates are expressed in mm/dd/yyyy format.
- $ signs and commas are not included.
- SSNs are 9 digits and alphanumeric without spaces or dashes.
- columns contain only one type of data element - e.g. DOH only.
- a dummy SSN is assigned to a participant without a SSN.
- participants' first name, last name and middle name/initial are in separate columns.
- no duplicate SSNs.

**45** Compare the Audited Participant Database with PRISM database and reconcile any discrepancies.

**46** Prepare memo for TPD Management's signature documenting completion of this reconciliation. Ensure memo is imaged after management signs.

**47** Send the Reconciled Participant Database to REPORTS-ADT via e-mail to request conversion to valuation data and advise OASD of the location of file (I:\software\case number)

**Prepare Actuarial Case Report & Software**

## 17.2 Convert Partricipant Database to an ACT Database 03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | To convert the Reconciled Participant Database from the TPD to an ACT database. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | E-mail from the TPD with attached Reconciled Participant Database or providing location of database at I:/software/case number (eight digits). |
| **Process Output and Recipient** | ACT Database |
| **Control Issues** | OASD compares the Reconciled Participant Database with PRISM database and provides any discrepancies to the TPD.<br>TPD is responsible for making corrections, after appropriate verifications, to the ACT database. |
| **Important Concepts** | OASD converts the participant database to an ACT database even if there are discrepancies.<br>**Timing:** Within 7 business days, OASD sends the ACT database and discrepancy report(s), if any, by e-mail to the TPD. A hard copy will be provided upon request. |
| **Guidance** | ACT |
| **Procedure Owner** | OASD Software Closeout Group |

## Click here for more information

17.2 Action Steps: Convert Participant Database to an ACT Database

**Prepare Actuarial Case Report & Software**

## 17.2 Action Steps: 03/28/2003

## Convert Participant Database to an ACT Database

I. Compare Reconciled Participant Database from the TPD with PRISM database using the SSN Mismatch Report and Unmatched Base Data Report.

II. Convert reconciled Participant Database to an ACT database.

III. Send the ACT Database and Discrepancy Report(s) by e-mail to the TPD requestor.

IV. Send hard copy of Discrepancy Report to TPD requestor.

**Prepare Actuarial Case Report & Software**

## 17.3 Determine Title IV Benefits, Including Asset Allocation per 4044

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | This procedure produces a final termination benefit amount, as opposed to an estimated amount which may have been calculated earlier.<br>Determine which additional benefits, if any, are funded by plan assets. In addition to benefits guaranteed by PBGC, PBGC pays non-guaranteed benefits that are funded by plan assets allocated as required by ERISA section 4044(a). |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | "Frozen" database.<br>Valuation spreadsheet and databases from 17.1 Reconcile Participant Database Data on substantial owners from auditor. Whether or not the plan is a contributory plan.<br>Final plan asset amount including DUEC value.<br>Final plan abstract. |
| **Process Output and Recipient** | Databases (D1.DB through D6.DB) started but not completed due to pending allocation.<br>Valuation spreadsheets columns showing calculation of plan benefits and guaranteed amounts before allocation.<br>Valuation spreadsheets columns showing Title IV Benefits. |
| **Control Issues** | Refer to the AACPS Manual.<br>Effective September 25, 2000, IOD revised its policy on the allocation of assets in PC3. The policy clarifies that a participant's benefit is in PC3 if the benefit was payable or could have been paid before the beginning of the three-year period that ended on DOPT or on the next following date that the plan would make annuity payments. This applies regardless of the plan's provisions or administrative practices. See examples in IOD Policy Bulletin 00-08. |
| **Important Concepts** | Benefits must be calculated according to the law and PBGC policies.<br>Refer to PBGC actuarial valuations that can be used as examples. |
| **Guidance** | ATM V: Allocation of Assets<br>IOD Policy Bulletin 00-08<br>PBGC Operating Policy Manual Chapters 5 and 6<br>ERISA Sections 4022, 4044<br>PBGC Regulations, including:<br>29 CFR 4022: Benefits Payable in a Single-Employer Plan<br>Subpart A - General Provisions, Guaranteed Benefits<br>Subpart B - Limitations of Guaranteed Benefits<br>Subpart D - Benefit Reductions in Terminating Plans<br>Subpart E - PBGC Recoupment and Reimbursement of Benefit Overpayments and Underpayments<br>— and —<br>29 CFR 4044: Allocation of Assets in Single-Employer Plans<br>Subpart A - Allocation of Assets<br>Subpart B - Valuation of Benefits and Assets |

**Procedure Owner** Actuary

## Click Here for More Information...

17.3 Action Steps: Determine Title IV Benefits including Asset Allocation per 4044

## 17.3 Action Steps: 03/28/2003

## Determine Title IV Benefits, Including Asset Allocation per 4044

The valuation spreadsheets are produced by a program called ValTool as documented in the Valuation Spreadsheet Tool (ValTool) portion of the AACPS Manual. The resulting spreadsheets show details on how benefits were calculated, including the Title IV portion of plan benefits.

I. Determine all benefit amounts in each Priority Category (PC) through PC6 (see ERISA 4044) as if there were enough assets to pay all benefits in all the PCs. The Present Value of this liability is the total Benefit Liability.

II. Determine the Guaranteed Benefit amounts per ERISA 4022 and 4044, implementing appropriate limitations (e.g., Accrued at Normal Limitation, Maximum Insurance Limitation, and Phase-In. See 29 CFR 4022 - Subparts B and D.).

III. Use the ValTool to compute new data elements needed for the spreadsheets. The ValTool process creates the necessary Lotus commands and also adds the additional data fields/data elements to the database. See the **Valuation Spreadsheet Tool** portion of the AACPS Manual for details.

IV. Program the DOPT Report System to create the spreadsheet.

V. Carefully review the spreadsheet, checking it for errors. Hand calculate randomly chosen participant benefits to ensure accuracy. Calculate two-three for each category of participant.

VI. Check CAS for the plan assets amount. This will equal plan assets including DUEC. These assets should be final (i.e., Quality Code 6).

VII. Allocate plan assets through priority categories as described in ERISA 4044 and in the Actuarial Technical Manual, Chapter V Allocation of Assets and the outline Process 17.3: Determine Title IV Benefits, including Asset Allocation per 4044. The Guaranteed Benefits plus any benefits covered by assets produce the Title IV benefit amounts. Note that Non-Guaranteed Benefit Amount is equal to total Benefit Liabilities minus Title IV Benefits.

VIII. Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 17.4 Determine Plan 4022(c) Amount

03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | Determine the Plan 4022(c) amount. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | PV of Title IV benefit amount at DOPT.<br>PV of Recovery amounts (for non-SPARR plans) or SPARR. |
| **Process Output and Recipient** | Total 4022(c) amount. |
| **Control Issues** | Each plan must be determined to be a SPARR or a non-SPARR plan. |
| **Important Concepts** | If the Termination Initiation Date is after 12/17/1987 (that is, post-PPA plans), PBGC may pay an additional non-guaranteed benefit which is funded by a share of PBGC's recoveries on its employer liability claims as required by ERISA 4022(c).<br>There are plans which voluntarily terminate in a distress termination under 4041 and distribute in the private sector, which are sufficient for guaranteed benefits, but not sufficient for all benefit liabilities. The Plan Administrator distributes assets. (See Pre-Termination Processes.) The participants in these plans also share in the allocation of recovery amounts. These cases are rare. |
| **Guidance** | ERISA 4022(c), ERISA 4044<br>PBGC Operating Policy Manual 6.7-1 |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

17.4 Action Steps: Determine Plan 4022(c) Amount

## 17.4 Action Steps: 03/28/2003
## Determine Plan 4022(c) Amount

I. Identify whether the case is a SPARR plan or a non-SPARR plan.

II. Determine Unfunded Guaranteed Benefit Amount (UGB) for plan. This is equal to the PV of Title IV Benefit, as determined in 17.2, minus Final Assets Available for allocation.

III. Compute Unfunded Benefit Liabilities (UBL) for the plan. This amount is equal to the Benefit Liabilities minus the Final Assets Available for Allocation.

IV. Determine Unfunded Non-Guaranteed Benefits (UNGB). This is equal to the UBL minus the UGB.

V. Determine the recovery ratio:

**For non-SPARR plans**, the recovery ratio is the Actual Recovery Ratio equal to the Present Value of the Recovery Amount divided by the UBL.

**For SPARR plans**, the recovery ratio is the SPARR for the applicable fiscal year.

VI. The Plan 4022(c) Amount is the product of the applicable recovery ratio and the UNGB.

Recovery Ratio x Plan UNGB = Plan 4022(c) amount

VII. Refer to the Workflow diagram at the beginning of this process for next action.

## 17.5 Determine 4022(c) Benefits Payable

03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | Compute the termination benefit for each recipient.<br>Determine which participants will be paid in a lump sum distribution and which will receive annuities.<br>Determine the final DOPT amount of PBGC liability for the plan. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Databases (D1.DB-D6.DB).<br>Working valuation spreadsheet, to the extent completed.<br>BSRS version being used for estimated post-DOPT payments.<br>Plan 4022(c) amount. |
| **Process Output and Recipient** | Valuation spreadsheets with Present Value of Termination Benefits for each participant. The PLS uses these figures to reconcile and identify lump sum payments.<br>Actuarial Analysis Memo to ASD. |
| **Control Issues** | N/A |
| **Important Concepts** | This procedure provides the benefit amount and present value of the participant's termination benefit as of DOPT.<br>For single-employer plans with termination initiation dates prior to Pension Protection Act (PPA), the termination benefit is simply the Title IV benefit. For PPA plans, the termination benefit is the sum of the Title IV benefit and the 4022(c) benefit, if any. |
| **Guidance** | ERISA 4022<br>ERISA 4062<br>ERISA 4044 on asset allocation<br>PBGC Operating Policy Manual 6.7-1 |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

17.5 Action Steps: Determine 4022(c) Benefits Payable

## 17.5 Action Steps: 03/28/2003
## Determine 4022(c) Benefits Payable

I. Determine the participant's share of the Plan 4022(c) amount, if any.

- For each participant, determine the UNGB in each priority category, according to ERISA 4044.
- Allocate the Plan 4022(c) amount among participants according to the 4044 priority categories to determine the *individual 4022(c) amounts*. Allocate to each priority category according to ERISA 4044.

**48** Determine each participant's total termination benefit as the sum of (a) and (b):

**a.** the present value as of DOPT of the participant's Title IV benefit.

**b.** the additional benefit amount payable to the participant (if any) under 4022(c) (see step 1 above). This amount is already in present value form.

The resulting amount is the present value of the participant's termination benefits.

**49** If the present value is greater than $5000, convert the 4022(c) present value for each participant to a monthly benefit amount using the actuarial assumptions. If the UNGB to which the individual 4022(c) amount is allocated are nonforfeitable, PBGC will pay the 4022(c) benefit amount in the annuity form of the underlying benefit. Note that the conversion is not necessary for present values of less than or equal to $5000 because these will be paid as a lump sum.

**50** Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Prepare Actuarial Case Report & Software**

## 17.6 Program BSRS

**03/28/2003**

Action Steps

| | |
|---|---|
| **Purpose** | Provide an automated program which produces the benefit statements for BDLs and for actual retirement date. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Participant databases D1-D6.<br>Programmed ValTools |
| **Process Output and Recipient** | Benefit statements, benefit statement text file |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | PBGC Operating Policy Manual Chapters 5 and 6 |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

17.6 Action Steps: Program BSRS

## 17.6 Action Steps: 03/28/2003
## Program BSRS

I. Create a directory in the workspace and copy all participant databases and programmed ValTools into the directory.

II. Copy the CSBSRS.WK3 Lotus file into the workspace and rename it (case#)s1.wk3. This file is the BSRS program used to make the case-specific BSRS.

III. Follow the programming instructions in the AACPS.

IV. Test all possible types of benefit calculations the BSRS should produce. Use the ADT/Software review checklist to help outline the testing process.

V. When all software is complete, copy all pertinent software into the i:\software\(case #) directory on the LAN.

**Prepare Actuarial Case Report & Software**

## 17.7 Produce Actuarial Case Report Package

**03/28/2003**

Action Steps

| | |
|---|---|
| **Purpose** | To compile hard copies of all reports into the blue case report package. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | List from ASD checklist and all tabs. |
| **Process Output and Recipient** | Actuarial Case Report |
| **Control Issues** | N/A |
| **Important Concepts** | All work must be proofread, concise, neat, and well organized. |
| **Guidance** | Actuarial Case Report Checklist |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

17.7 Action Steps: Produce Actuarial Case Report Package

## 17.7 Action Steps: 03/28/2003

## Produce Actuarial Case Report Package

I. Compile all printed reports, spreadsheets, and case-related information that belongs in the Actuarial Case Report as specified in the instructions in the Actuarial Case Report Checklist.

**Prepare Actuarial Case Report & Software**

## 17.8 Finalize Actuarial Case Report Package & Review 03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | Complete the Actuarial Case Report package. Peer review for accuracy. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Valuation Case Report information developed to date, Case Files |
| **Process Output and Recipient** | Final Actuarial Case Report |
| **Control Issues** | Refer to the Actuarial Technical Manual |
| **Important Concepts** | The process of finalizing the Actuarial Case Report package involves at least a thorough peer review and a thorough review of the corrections made after peer review to ensure an accurate product. |
| **Guidance** | Actuarial Case Report Checklist<br>Actuarial Technical Manual<br>ERISA and related Acts<br>ACT<br>AACPS Manual, as applicable |
| **Procedure Owner** | TPD Actuary, Peer Reviewer Actuary |

## Click Here for More Information...

17.8 Action Steps: Finalize Actuarial Case Report Package & Review

## 17.8 Action Steps: 03/28/2003
## Finalize Actuarial Case Report Package & Review

**Actuary**

1 Produce the Actuarial Case Memo, spreadsheets, and other required items per Actuarial Case Report Checklist. Follow the instructions in the ACT or AACPS Manual, as applicable.

2 Ensure all updated data is in CAS (Final Participant Liabilities).

3 Forward the completed report and case files to a peer-reviewer actuary.

**Peer Reviewer Actuary**

1 Use the Actuarial Case Report Checklist (see Section J of case report) to verify that the valuation is complete and correct.

2 Submit requested corrections to the case actuary.

- If corrections are needed, review the corrected report after the actuary resubmits
- Submit for supervisory review/concurrence
- If no further corrections are needed, enter the date of the review completion on CAS for the Final Participant Liabilities milestone and submit for software review. Sign and date report.
- The case Actuary will enter the liability amounts in the appropriate columns in the CAS Final Participant Liabilities screen.

3 Distribute whole copies of the Actuarial Case Report as follows:

- **Original** to Plan File, IPS
- **Copy** to ASD
- **Copy** to OASD (OASD will return this to TPD Actuary)
- **Copy** to PLS
- **Copy** to FBA, if applicable

4Refer to the Workflow diagram at the beginning of this process to determine the next action.

**Prepare Actuarial Case Report & Software**

## 17.9 Perform Software/ADT Review

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | To ensure that all case software, including BSRS, ValTools, Microsoft Word documents, database, etc., is properly tested, error free, and ready for archiving. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | All software related to the case.<br>Actuarial Case Report that was signed and approved by TPD management. |
| **Process Output and Recipient** | Correct and validated software.<br>Completed TPD Software Review Checklist and valuation closeout package to OASD. |
| **Control Issues** | • Freezing the database for valuation purposes prevents minor data changes that are time consuming. It also provides a database that reflects assumptions used in the final valuation and a starter database for checking post-DOPT retiree data updates.<br>• Information from returned data verification forms would be shared between team members to ensure that the participant database, not the frozen valuation database, remains current. Changes in data that would significantly alter the valuation may be made to the valuation database. The definition of what is "significant" is left to each TPD.<br>• Use the ADT Utility available through the Novell Delivered Applications to inspect the valuation databases for missing or incorrect data.<br>• All errors and warnings that the ADT generates must be resolved or explained.<br>• Use the latest version of the TPD Software Review Checklist<br>• Valuation files should be placed on I:\Software\xxxxxxxx (8 digit case number) |
| **Important Concepts** | Adhere to IOD software standards. |
| **Guidance** | ACT |
| **Procedure Owner** | TPD Software Reviewer, Team Leader |

## Click Here for More Information...

17.9 Action Steps: Perform Software/ADT Review

## 17.9 Action Steps: 03/28/2003
## Perform Software/ADT Review

I. Perform the software review per the TPD Software Review Checklist

- Verify that files are named in accordance with naming conventions identified in the TPD Software Review Checklist.
- Test all software programs, using the TPD Software Review Checklist guidelines to verify that everything runs appropriately and output is correct.

**51** All software should be located on the i:\software\(case #) directory. Hand-deliver the completed TPD Software Review Checklist with a copy of the entire Actuarial Case Report to the Software Assistant in OASD for archiving.

**52** Notify TPD Team Leader that the software review has been completed and to send a CAS Request ADT task referral to OASD.

**Prepare Actuarial Case Report & Software**

## 17.10 Finalize IPV-Ready Data

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Verify that the valuation data is correct as of DOPT so that ASD can determine the present value of the plan. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | IOD Pension Report<br>IOD User Defined Fields Report<br>IOD Lump Sum Report |
| **Process Output and Recipient** | Participant database with 5% or fewer errors (preferably 0%). |
| **Control Issues** | N/A |
| **Important Concepts** | The required reports are accessed through the PRISM Reports Icon available through the Novell Delivered Applications. |
| **Guidance** | N/A |
| **Procedure Owner** | PLS |

### Click Here for More Information...

17.10 Action Steps: Finalize IPV-Ready Data

**Prepare Actuarial Case Report & Software**

## 17.10 Action Steps: 03/28/2003
## Finalize IPV-Ready Data

I. Obtain the required reports from PRISM Reports and ADT.

- IOD Pension Report
- IOD User Defined Fields Report
- IOD Lump Sum Report

**53** Correct errors on invalid or missing values identified on the Edit Detail/Summary. Common errors include missing data, such as date of birth or form of benefit. These data elements affect the present values.

- Research the participant files (IPS) for correct data.
- Provide information on the errors to OASD.

**Prepare Actuarial Case Report & Software**

## 17.11 Close Out Software (OASD)

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Submit the final valuation for the ADT Load<br>Complete ADT Load |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Reviewed software and completed TPD Software Review Checklist |
| **Process Output and Recipient** | Valuation data loaded in PRISM.<br>Case software added to IOD Archive Access. |
| **Control Issues** | OASD compares TPD checklist to software available at I:\software\xxxxxxxx. |
| **Important Concepts** | Following completion of the ADT load, complete participant records are loaded to PRISM. With very limited exceptions, the ADT load does not overwrite any existing data. For a complete detailed listing of participant data elements loaded at ADT, and the data elements that are overwritten through the ADT load, see Appendix I: Maintaining Participant Data records. |
| **Guidance** | Incoming Case Review Checklist |
| **Procedure Owner** | OASD |

## Click Here for More Information...

17.11 Action Steps: Close Out Software (OASD)

**Prepare Actuarial Case Report & Software**

## 17.11 Action Steps:

**03/28/2003**

## Close Out Software (OASD)

I. Complete the Incoming Case Review Checklist.

II. Load participant records using ADT.

III. Archive the case software. Follow procedures outlined in the Archive Access/Utility part of the ACT.

IV. Notify the TPD case team that the software has been archived. The TPD case team must ensure that no participants are missed in the BDL process.

V. Load the Benefit Statement Print File to PRISM ALGS.

VI. Notify the TPD by e-mail that ADT is complete and ALGS is ready for use.

VII. Return the Valuation Case Report Package to the TPD.

VIII. Finalize the CAS Request ADT Load Activity Milestone.

**Prepare Actuarial Case Report & Software**

## 17.12 Present Case to Team

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | To brief the TPD case processing team on the actuarial valuation results. The PLS/PBA is trained on running the BSRS program, and is made aware of retiree benefit changes, annuity forms, purchased annuities, and any information needed to ensure smooth processing of the plan BDLs. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Valuation Case Report and case files, participant folders for all retirees.<br>BSRS has been archived by OASD. |
| **Process Output and Recipient** | A fully trained PLS and an updated database. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | Actuary |

## Click Here for More Information...

17.12 Action Steps: Present Case to Team

**Prepare Actuarial Case Report & Software**

## 17.12 Action Steps: 03/28/2003
## Present Case to Team

I. Schedule a meeting with the TPD case team, including the FBA when applicable, to present an overview of the plan benefits and any complications which will produce atypical Benefit Determination Letters (BDLs). The meeting may be unnecessary for case teams that have been working together closely over the life of the case.

- Discuss oddities such as unusual benefit forms, offsets, legal issues, etc.
- Provide a general overview of the plan, including the normal forms of benefit, ERA and NRA and vesting.
- Discuss the number of retirees and if they require benefit changes.

**54** Train the PLS or FBA personnel to run the BSRS. By the end of the training, the PLS should be able to produce and print benefit statements and recalculations without the actuary's assistance. Run through several sample participants with different forms of benefits.

## 17.13 Reconcile PRISM and Archived Databases

03/28/2003

Action Steps

| | |
|---|---|
| **Purpose** | Identify and account for any differences between the DOPT present value figure on CAS and the DOPT present value figure from the participant database (Pay 3000). |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contract Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | DOPT/PV figure from CAS.<br>DOPT/PV figure from Pay 3000. |
| **Process Output and Recipient** | Reconciliation of present value figures from both databases. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | PLS and OASD |

**Click Here for More Information...**

17.13 Action Steps: Reconcile PRISM and Archived Databases

## 17.13 Action Steps: 03/28/2003
## Reconcile PRISM and Archived Databases

**PLS**

I. Obtain required information:

- DOPT/PV figure from CAS
- DOPT/PV figure from Pay 3000

**55** Compare the two figures:

- If the figures match, the two databases match and no reconciliation is necessary (note, however, that the match does not rule out the possibility of having equal, opposite errors).
- If the Pay 3000 number is less than the CAS PV number, PV data for one or more participants may be missing from Pay 30000. Check the PAY 3000 versus the ASD Actuarial Valuation Report.
- If the Pay 3000 number is greater than the CAS PV number, there are three possible reasons. Try all three because one or more may be required to reconcile:
  - woodwork participants have appeared and their PVs been added to Pay 3000. If so, subtract the individual present value for all the woodwork participants from the Pay 3000 figure.
  - the plan has been revalued using new or modified data. Work with the actuary to reconcile the discrepancy.
  - the original CAS figure was wrong. This is most likely to occur with plans that have been in inventory for a long time and may require substantial research. Refer the problem to a supervisor.

**56** Document the reconciliation, including all actions taken as well as the outcome. Provide copies of documentation to OASD.

**OASD**

I. Enter the information into the CAS/PRISM reconciliation database.

## 17.14 Forms, Letters, Memos, etc.

**03/28/2003**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

## Introduction to Notification of Benefits Processes 02/17/2004

Once the value of the benefits is known, the Notification of Benefits Processes are the means of informing each participant of the amount of his or her benefit. They also provide additional information about the appeal rights provided by law. This is done through the BDLs and other correspondence. After the appeal period has expired, any necessary adjustments are made and the paid benefit amounts are shifted from estimated status to final status.

## Notification of Benefits Processes include:

18 Identify Types of BDLs for Case

19 Issue BDLs & Make Adjustments to Payments

20 Respond to Appeals Notices and PEAD Referrals

## PR 18. Identify Types of BDLs for Case

18. Overview

18. Workflow for Process 18

18.1 Determine Categories of BDLs

18.2 Create Customized BDL

Forms, Letters, Memos, etc.

## 18. Overview

05/31/96

Identify types of Benefit Determination Letters (BDLs) early in order to determine if any new BDLs need to be added to the Automatic Letter Generating System (ALGS) in PRISM to issue BDLs for the case. It usually is not necessary to have all of the information needed to calculate benefits to identify the types of BDLs for a specific case; it is enough just to know the plan provisions and annuity forms selected prior to Date of Plan Termination (DOPT). Generally, the TPD team or FBA has enough information to identify BDLs, and draft new ones if necessary, by the time the plan abstract is complete. Starting this process early allows for issuing BDLs as soon as the case is BDL-ready. There is no need to delay after final valuation while new types of BDLs are approved.

Types of BDLs to be issued are based on classes or categories of participants. These classes are determined by forms of benefits. All participants within the same category (same type of participant and same form of benefits) should get the same letter - only the information fields particular to each participant will differ. The goal should always be to use BDLs which are already approved. When it is impossible to use an existing letter, use as much as possible from one or more approved versions to lessen the amount of work and increase the chance of immediate approval.

Notification of Benefits Processes

Identify Types of BDLs for Case

18.1 Action Steps: Determine Categories of BDLs

**Identify Types of BDLs for Case**

## 18.1 Action Steps: 05/18/2001
## Determine Categories of BDLs

Note that "types of BDLs" refers to generic categories within the range of "400" series letters in the PRISM ALGS (formerly in the Participant Correspondence Manual). The input of participant-specific data into each BDL is part of the Process 19: Issue BDLs and Make Adjustments to Payments process. For the purposes of this procedure, think of BDLs as falling in to two major categories: standard and customized.

I. Identify types of standard BDLs needed for the plan by selecting from the list of standard BDLs and prepare a *Types of Required BDLs Memo (IDLtypes.doc)* for record of those needed:

- **Non-vested participants**
- **Lump-sum payments**
- **Estate lump-sum payments**
- **Deferred vested participants.**
- **Current payees (without changes)**
- **Overpayments**
- **Underpayments**
- **Overpayment and Underpayment**

**57** If all BDLs fall into one of these standard categories and there are no unique or extremely unusual plan provisions, customized BDLs are not needed (go to Process 19: Issue BDLs and Make Adjustments to Payments) as soon as the valuation process is complete. Otherwise, continue this procedure.

**58** Determine which categories of participants need special BDLs, and list the type(s) of information that need to be included for each customized BDL.

**59** Review existing customized BDLs to verify whether or not a usable special BDL has already been created that would meet the requirements. If yes, use that customized BDL. If not, continue to the Process 18.2: Create Customized BDL procedure.

**Identify Types of BDLs for Case**

## 18.2 Create Customized BDL

**10/31/97**

**Action Steps**

| | |
|---|---|
| **Purpose** | Create template BDL for an identified class of participants and obtain approval. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Requirement for a new customized BDL. |
| **Process Output and Recipient** | New suitable BDL for case and new BDL available for reference in PRISM ALGS. |
| **Control Issues** | Use customized letters only when absolutely necessary.<br>Proper research and review of plan provisions are necessary.<br>Document reason(s) for creating a new letter.<br>Obtain proper approval. |
| **Important Concepts** | The vast majority of pension plans are similar, or at least similar to other plans for the industry, so any special BDL may be useable later for a similar plan and is worth saving.<br>Consistency across BDLs is as important a goal as correct BDLs. The language should be simple yet communicate what the recipient needs to know.<br>PRISM ALGS allows staff to individually design needed custom BDLs. (Do not use PRISM ALGS "Generic Custom Letter" for BDLs.) |
| **Guidance** | N/A |
| **Procedure Owner** | PLS, approval by supervisor; FBA |

## Click Here for More Information...

18.2 Action Steps: Create Customized BDL

## 18.2 Action Steps: Create Customized BDL

10/31/97

I. Research plan provisions and applicable PBGC operating procedures, list points the letter needs to address, and identify the number of people affected.

II. Review existing standard BDLs on PRISM ALGS and use BDL most similar to plan needs as basis for customized BDL. Make modifications to the letter. If some of the points that need to be covered are addressed in other approved standard or customized BDLs, copy that portion in. Note the source(s) of all copied text.

III. Submit the draft letter to the TPD Team Leader for approval. Generally, approval beyond the Team Leader is necessary only if the new letter touches on an issue which might set agency precedent, affects policy, or deals with a completely new type of benefit. When necessary, the Team Leader can seek approval from the Division Manager. If necessary for a policy decision, the Division Manager will route the letter and policy question(s) to the OPSS Manager.

IV. Make necessary changes, if any.

V. Submit the approved letter to TSD/PSB for inclusion in the ALGS, and provide an index of the points it addresses.

VI. Refer to the Workflow diagram at the beginning of this process to determine the next action.

## PR 19. Issue BDLs & Make Adjustments to Payments

19. Overview

19. Workflow for Process 19

19.1 Create Early BDL Database and Issue Early BDLs

19.2 Review Final Valuation Case Report Package & Classify Participants

19.3 Determine Net Overpayment/Underpayment Status for Annuities

19.4 Determine Overpayment/Underpayment for Lump-Sums

19.5 Issue Corrected or Revised Benefit Determination Letter

19.6 Issue Limited-Scope BDLs

 Forms, Letters, Memos, etc.

## 19. Overview

**05/13/2005**

PBGC issues most Benefit Determination Letters (BDLs) after a plan's final valuation. BDLs sent prior to completion of the valuation are referred to as "early BDLs". The BDL advises participants, or if deceased, surviving spouses, beneficiaries or estates, of entitlement or non-entitlement to a PBGC benefit. It describes the form, amount and effective date of the benefit to those who are entitled. PBGC's regulation (29 CFR 4003: Rules for Administrative Review of Agency Decisions) gives the BDL recipient the right to appeal the agency's initial determination.

In addition to early BDLs, PBGC occasionally issues Limited-Scope BDLs before the plan's valuation is completed. These letters concern one or more, but not all, aspects of benefit entitlement; for example, to deny disability benefits to an individual or shutdown benefits to a group. They provide participants the opportunity to appeal a BAPD determination without waiting for PBGC to finish reviewing the plan. Participants who receive Limited-Scope BDLs will also receive their full-scope BDLs once the valuation is complete.

The appeals period commences with the BDL date. On those rare occasions when it is later learned that a customer never received a BDL, a **complete copy** of the original BDL and all attachments is provided to the customer using ALG 540: BDL Cover Letter. The letter specifies that the appeals period commences with the date of the 540.

As of November 2003, PBGC issues a BDL to an alternate payee instead of the notice previously sent when a BDL was issued to a QDRO participant. The participant's BDL states that PBGC is also issuing a BDL to the alternate payee and that private or sensitive information about the participant is not disclosed to the alternate payee. However, the alternate payee receives information about the benefit calculation. The participant and alternate payee(s) are each advised that if one of them appeals their benefit determination, the benefit of all concerned will be stayed until a decision is made on the appeal.

A benefit statement is sent with most BDLs, and provides specific participant data and describes plan provisions and calculations used in the determination of benefit. Pre-DOPT retirees whose benefits do not change and non-vested participants do not receive a benefit statement.

IOD currently issues early BDLs to participants who have been in pay status for five years or more as of DOPT, with some exceptions. Participants in pay status who receive BDLs will continue to receive the same benefits, except in very rare circumstances.

Once it's determined non-vested participants will not be eligible for any benefits from PBGC, including a 4022(c) benefit; early BDLs may also be issued to these participants. These early BDLs are issued on a discretionary basis, determined by TPD Management for each plan.

After the valuation is completed, move annuity benefits from estimated to guaranteed pay sources in PRISM Benefits as needed to facilitate issuing BDLs through ALG. The BEGIN date for the new guaranteed pay source is the first *available* payment date after the 45-day appeal period for **all** categories of payee (no benefit change, benefit increase or benefit decrease). A payment date is not *available* if the appeals period expires too close to the financial cut-off date to allow payment processing and authorizing, or after the cut-off date. Process a back payment as necessary for the preceding payment date if this occurs. If an appeal is filed or an extension is requested, the data in the guaranteed pay source is deleted and the END date in the estimated pay source is restored. This must be done prior to forwarding the record for authorization.

Changes in benefit amounts may necessitate recoupment or recovery for overpayment or back payments of net underpayments (when paying an annuity), see TP 21: Change Benefit/Payment Amount. A participant who received an estimated lump-sum distribution may be due a residual benefit amount. In paying adjusted benefits or back payments, review of policy and procedural changes are necessary to ensure correct processing.

Effective for March 2002 payments, all interest calculations are completed by PBGC. Interest calculations may no longer be requested from SSC.

**Large Back Payments**

Process a Large Back Payment through PRISM Benefits as a Lump-Sum.

**Small Changes in Final Monthly Benefits**

Prior to May 1, 1999 if the final monthly benefit increase was less than $1.00, PBGC did not change the benefit. A benefit increase is now made regardless of the amount. Revised BDLs with increases of less than a $1.00 are not included in this change. If the total underpayment is less than $1.00 (including interest) the underpayment is not paid, only the benefit is increased. If a final monthly benefit is less than the estimated benefit by $5.00 or less, it is not changed (decreased). (See IOD Policy Bulletin 99-4.)

**Payment of Very Small Benefits (Lump-sums)**

Effective June 6, 1999, PBGC does not require an application to pay a lump-sum distribution when the amount is less than $200 (including interest) **only** if data are good and the address is valid. Federal tax is not withheld on these distributions. The payment is made to the participant simultaneously with the BDL or soon after the BDL is issued. Processing staff does not have to wait until the appeals period expires to make small lump-sum payments. (See IOD Policy Bulletin 99-6.)

With the implementation of PRISM ALGS, prepare all BDLs using ALGS.

## Click Here for More Information...

19.1 Action Steps: Create Early BDL Database and Issue Early BDLs

## 19.1 Action Steps: 04/16/2004

## Create Early BDL Database and Issue Early BDLs

### Auditor

1 Make a preliminary determination on whether early BDLs should be issued for the plan. It may be impractical if, for example, there are too few payees to make the process worthwhile, or the valuation of the plan is near completion and BDLs will soon be issued to all participants. If at any time the case team and TPD Manager decide not to issue early BDLs, document the decision and management's concurrence either on the initial memo from the case team providing the early BDL population, on the *Early BDL Audit Report (ebdlauditreport.doc)*, or by separate memo to the plan file. No further action is necessary.

2 Determine the best source(s) to identify all participants in pay status at the Date of Plan Termination (DOPT). From this list, exclude the following:

- Participants in pay status less than one year prior to DOPT
- Substantial Owners
- Beneficiaries receiving the remainder of a Certain and Continuous Annuity
- Participants whose benefits are subject to a pop-up, step-down, or other odd or unique plan provision
- Participants receiving benefits over the maximum guaranteeable benefit (since their benefits may be adjusted, depending on the sufficiency of the plan)
- Participants who may be subject to the phase-in rule
- Participants whose benefits were or may be adjusted for any other reason (cutbacks, possible prior plan administrator calculation errors, etc.)
- Participants affected by partial annuity purchases or offsets from other plans
- Participants who may be partially vested because of a graded vesting schedule
- Participants who may be eligible for a plan 4022(c) amount
- Participants receiving a modified cash refund of employee contributions

  Other participants or types of participants (for example, non-vested) to be included or excluded from the early BDL population are determined on a case-by-case basis by the case team, subject to TPD management's approval.

3 Consult with the case team as needed on the list of participants eligible for an early BDL. Prepare a memo identifying the early BDL population to the TPD Manager for concurrence before proceeding. Image the memo with concurrence to the plan file.

4 From the resulting list of participants deemed eligible for an early BDL, select a sample of payees whose benefit calculations will be tested. Apply the same sampling methodology as that used for a participant database in Process 12.7: Audit Participant Database.

5 Begin the database for the sample population:

- Create a database shell with the names of participants in the sample and the data elements identified by the actuary or Source Document Audit, if available.
- With input from the case team, determine who will perform the data entry. (The auditor

will audit the database and therefore may not participate in entering data.)

6 Provide the database shell and instructions to the person assigned to build the database:

- If the data will be entered manually, refer to 12.6.A: Action Steps: Build Participant Database from Paper Sources by Manual Input.
- If the data will be downloaded from electronic files, refer to 12.6.B: Action Steps: Build Participant Database from Electronic Files.

7 Upon completion, forward a copy of the database to OASD requesting that it be archived. Follow *Participant Database Archiving Guidelines (pdaarchiveinstructionsv1.doc)*. Contact OASD for guidance if needed.

8 Audit the sample database to the source documents. Ascertain that the source documents are imaged to the participants' IPS files.

9 Record audit findings on the draft of the *Early BDL Audit Report (ebdlauditreport.doc)*. Forward the sample database to the case actuary to verify the benefits in pay status.

**Actuary**

10 For the sample payee population, calculate and value the benefits. Compare them to the benefit amount in pay status. Provide a written summary of the results of the review by memo to the auditor.

**Auditor**

11 Complete the *Early BDL Audit Report (ebdlauditreport.doc)* and submit to TPD Manager for concurrence:

- Attach the lists of data elements and source documents, results of the actuary's review of benefit calculation, and all other supporting documents.
- Include a recommendation that the team proceed or not proceed to issue early BDLs based on the results audit of the sample database and the actuary's review of benefit calculations.
- Confirm that the source documents are imaged to the participants' IPS files.
- Note the location on the shared drive of the sample database.
- Upon concurrence, image the report to the IPS plan file. If early BDLs are to be issued, forward a copy to the PLS/PBA/FBA.

**PLS/PBA/FBA**

12 Based on management's concurrence, issue early BDLs to the eligible population named in the Early BDL Audit Report (see TP 15: Prepare and Mail Letters). However, **do not** issue a letter to any payee who has not yet returned the Payee Information Form (PIF) or whose benefit payments are suspended for any reason. Contact OASD for assistance if a ValPatch is needed to prepare an ALG mailing.

13 Handle payees whose early BDLs were withheld because they either had not returned their PIFs or whose benefits were suspended as follows:

- Upon receiving the PIF, verify it to the data in the early BDL database. If there are no discrepancies which would change the benefit, issue the early BDL after making appropriate corrections in PRISM.
- Upon reinstating benefits that were suspended for any reason, issue the early BDL as long as the payee is still deemed eligible.

**Note:** The sampled early BDL population is stratified in the PDA, and may be excluded from further sampling in the PDA process.

**Issue BDLs and Make Adjustments to Payments**

## 19.2 Review Final Valuation Close-Out Package & Classify Participants

**05/18/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify which BDL each participant will receive. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Final valuation close-out package. |
| **Output and Recipient** | List of all classes of BDLs necessary to notify all types of participants in the plan, including BDLs issued for benefits of participants who died on or after DOPT. |
| **Control Issues** | N/A |
| **Important Concepts** | The final valuation close-out package is a complete package prepared as the output of the final valuation process. It contains all information necessary for issuing BDLs, so this review is to determine if the plan is ready to issue BDLs or not, as opposed to verifying the produced data. |
| **Guidance** | IOD Policy Bulletin 99-9<br>ALG Letters (electronic manual in IOD Manuals system) |
| **Procedure Owner** | PLS; Field Benefit Administrator (FBA) |

## Click Here for More Information...

19.2 Action Steps: Review Final Valuation Close-Out Package & Classify Participants

**Issue BDLs and Make Adjustments to Payments**

## 19.2 Action Steps: 05/18/2001

## Review Final Valuation Close-Out Package & Classify Participants

I. Review the categories of participants and verify that there is a BDL for each type (from Process 18: Identify Types of BDL). Determine which participants and contingent annuitant(s), and how many, will receive each type of BDL. If a participant is deceased and there is no contingent annuitant, send BDL to estate (using last known address of the participant, or, if known, the administrator of the deceased participant's estate).

II. Identify participants and contingent annuitant(s) for whom there is no address information. Review file(s) to determine what efforts have made to locate addresses, and refer to TP 33: Locate Customer Addresses.

III. After the first BDLs are mailed, enter the date in the Benefit Dtermiation Letter Milestone in CAS.

IV. Refer to the Workflow diagram at the beginning of this process to determine the next action.

## 19.3 Determine Net Overpayment/Underpayment Status for Annuities

**03/28/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Pay final benefits. Determine if there is a difference between paid estimated benefits and final benefits. Pay underpayments or recoup/recover overpayments. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | **CAS Activity:** Final Benefit Adjustment Milestone referred.<br>BDL recipients. Estimated payments and final benefits.<br>Payment history to determine if there were net overpayments or underpayments. |
| **Process Output and Recipient** | Payment of final benefit.<br>Overpayment - commencement of recoupment or recovery action.<br>Net Underpayment - Back payment with interest - one time payment of the total amount.<br>**CAS Activity:** Final Benefit Adjustment Milestone finalized |
| **Control Issues** | The final payment, recoupment or recovery, and payment of back payments are made after the 45-day appeal period if the participant does not file an appeal or request an extension to do so. If an appeal is filed, no change is made in PRISM to the benefit amount or pay source (i.e. estimated to guaranteed) until the appeal is resolved.<br>A de minimis overpayment may no longer be de minimis by the time an appeal is resolved because of payments made during the appeals period. In a situation like this, IOD freezes the de minimis overpayment to avoid recoupment after resolution of the appeal. This is applicable to BDLs issued on or after October 28, 2002 and for unresolved appeals as of this date. However, the overpayment is not frozen when the Appeals Board's decision decreases the benefit, resulting in an amount above the de minimis overpayment.<br>The PACS Detailed Summary and Back Payment or Recoupment Summary should be printed and imaged to the participant's file (IPS).<br>**Timing:** The following occurs as soon as possible, but effective no later than 90 days after the later of the expiration of the appeals period or Appeals Board decision. |

- Adjust annuity payments to final amounts and guaranteed pay sources in PRISM.
- Implement recoupment or recovery, as applicable on an overpayment.
- Pay back payments owed, including a Large Back Payment.

| | |
|---|---|
| **Important Concepts** | PBGC pays net underpayments as a back payments in a special check, except for certain Large Back Payments that are paid as a lump sum, see Process 19: Issue BDLs and Make Adjustments to Payments, Overview. Overpayments are subject to recoupment, an automatic form of repayment when a participant has a future stream of payments as of DOPT. If not, recovery action is initiated. Recoupment is a deduction from future payments for a specific period of time with a limit to the amount that can be recouped. PBGC accepts prepayment of the total overpayment if the payee requests to do so.<br><br>PBGC makes lump-sum distributions, after the expiration of the appeals period, to a participant, or to the estate of a participant who died after DOPT, if the participant has a de minimis benefit as of DOPT.<br><br>PBGC pays interest on late benefit payments according to IOD Policy Bulletin 97-7. All interest calculations are completed by PBGC effective from March 2002 payments. SSC no longer calculates interest on payments.<br><br>PACS may be used in either the actual or hypothetical mode. In the actual mode, PACS automatically populates some data fields from GENESIS. Processing staff uses the actual mode to calculate benefit adjustments for payees whose data are in GENESIS. The hypothetical mode facilities computations for a participant not loaded in GENESIS. |
| **Guidance** | ALG Letters (Electronic manual in IOD Manuals system)<br><br>PACS Helpfile<br><br>IOD Policy Bulletin 95-4<br><br>IOD Policy Bulletin 97-7<br><br>IOD Policy Bulletin 99-4<br><br>IOD Policy Bulletin 99-9<br><br>IOD Policy Bulletin 03-2<br><br>PBGC Operating Policy Manual 6.4-1<br><br>29 CFR 4022: Benefits Payable in Single-Employer Plans, Subpart E - PBGC Recoupment and Reimbursement of Benefit Overpayments and Underpayments, covers reimbursements of underpayments.<br><br>29 CFR 4044: Allocation of Assets in Single-Employer Plans, Subpart B - Valuation of Assets and Benefits, covers interest rates for lump-sums. |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

19.3 Action Steps: Determine Net Overpayment/Underpayment Status for Annuities

## 19.3 Action Steps: 05/13/2005

## Determine Net Overpayment/Underpayment Status for Annuities

Take action according to the **Timing** specified in the Important Concepts section of preceding topic.

1 Obtain the final valuation spreadsheet and Valuation Close-Out Memo and group payees in three categories.

- No benefit change
- Benefit increase
- Benefit decrease

2 Carefully review IPS and PRISM Benefits annuity pay sources for the payment history for all three types of payees listed above. In addition to calculating interest for underpayments (benefit increase) and overpayments (benefit decrease), a payee with a "no benefit change" BDL may also be due interest, if all previous payments were not made timely, or previously paid back payments were paid without interest (prior to policy change).

3 Access PACS with your UserID and PRISM password.

- Enter the 8-digit Case number and the participant's ***(or payee's)*** SSN
- Follow the steps in PACS and input required data not automatically populated from GENESIS.
- Add comment, if necessary, and ensure that the box beside "Display Comments on Report" is checked to insert the comment on the Back Payment or Recoupment summary.
- Print the PACS Detailed Summary and Back Payment or Recoupment Summary.
- Ensure both summaries are scanned to the participant's file (IPS).

4 After the expiration of the appeal period, ensure that final payments are made to payees who did not appeal or request an extension to file an appeal. This requires authorized payment records to PLUS.

**Note** If a lump sum benefit of less than $200 (including interest) is due, make the payment coincident with or shortly following issuance of the BDL. It is not necessary to get a signed application or wait until the appeal period expires as long as participant data are reliable (see IOD Policy Bulletin 99-6: Payment of Very Small Benefits).

5 Where recoupment is necessary, reduce the participant's gross benefit by the recoupment amount. Enter the recoupment amount in the recoupment deduction field that corresponds to the new pay source and the recoupment end date from PACS in the deduction end date field.

6 If there has been an underpayment, do a special check for the back payment unless the amount meets the criteria for a lump-sum distribution payment. If the underpayment results in a Large Back Payment, issue the appropriate BDL notifying of distribution options. If the increase in final benefit is less than $1, implement the increase. See Process 19: Issue BDLs and Make Adjustments to Overpayments, Overview. Where it is determined that total back payments will be less than $1.00, increase the benefit from the date the change is implemented.

7 Forward the adjusted records for authorization, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

| | |
|---|---|
| **Note** | If a record with a pay source change from estimated to guaranteed is transmitted to PLUS, and the guaranteed pay source data is deleted afterwards because of an appeal, and the record is re-transmitted to PLUS, the participant will be overpaid. A blank pay source in PRISM cannot overwrite data in a populated pay source in PLUS. PLUS will have two open pay sources resulting in overpayment. |

**8** Finalize the Final Benefit Adjustment Milestone in CAS after all adjustments have been made.

**Issue BDLs and Make Adjustments to Payments**

## 19.4 Determine Overpayment/Underpayment for Lump-Sums 03/19/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Pay final lump-sum distributions. Determine if there is a difference between estimated lump-sums that were paid, and final lump-sums. Pay underpayments and recover overpayments. |
| **Time Reporting(BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Amount of paid estimated lump-sum and final valuation amount. Participants who are eligible for final lump-sum payments and amounts payable. |
| **Process Output and Recipient** | Payment of lump-sums to eligible participants. Extra payment (with interest) to those underpaid and recovery action against those overpaid. |
| **Control Issues** | PBGC pays estimated lump-sums to participants who reach earliest retirement age and apply for benefits between DOPT and completion of the final valuation. The final valuation may reveal an overpayment or underpayment.<br><br>A de minimis overpayment may no longer be de minimis by the time an appeal is resolved because of payments made during the appeals period. In a situation like this, IOD freezes the de minimis overpayment to avoid recovery after resolution of the appeal. This is applicable to BDLs issued on or after October 28, 2002 and for unresolved appeals as of this date. However, the overpayment is not frozen when the Appeals Board's decision decreases the benefit, resulting in an amount above the de minimis overpayment.<br><br>PBGC pays lump sums of $200 or less (including interest) without a benefit application if participant data are reliable (see IOD Policy Bulletin 99-6: Payment of Very Small Benefits). If participant data are questionable, request a signed lump sum application before making payment. Federal income tax is not withheld from these small benefit payments.<br><br>The PACS Detailed Summary and Back Payment or Recoupment Summary should be printed and imaged to the participant's file (IPS). |
| **Important Concepts** | All participants not in pay status whose DOPT present value is $5,000 or less receive lump-sum distributions regardless of the form of benefit.<br><br>PBGC makes lump sum distributions after the expiration of the appeal period to a participant, or if deceased, to the beneficiary or estate.<br><br>In sufficient trusteeship, participants whose plan provisions include lump-sum as an optional form of benefit distribution may elect to receive a lump sum distribution subject to the spousal consent requirements if married. The participant's spouse must approve election of a lump sum payment (i.e., waive the J&S form of benefit). |

The $5,000 limit for lump-sum payments applies to BDLs issued on or after 7/16/98.

A participant who received a very small estimated payment, see Policy Bulletin 99-6: Payment of Very Small Benefits, and is due a residual benefit amount, cannot be paid without a tax withholding in the same calendar year. All interest calculations are completed by PBGC effective from March 2002 payments. Interest calculations may no longer be requested from SSC.

In the actual mode, PACS automatically populates some data fields from GENESIS. Processing staff uses the actual mode to calculate benefit adjustments or interest on lump sum of payees whose data are in GENESIS. The hypothetical mode facilities computations for a participant not loaded in GENESIS.

**Timing:** Take the appropriate action on a residual benefit amount as soon as possible, but no later than the indicated date for each event:

- Pay the lump sum residual benefit amount - 90 days after the later of the expiration of the appeals period or Appeals Board decision.
- Implement a new annuity payment - according to time frames specified in Important Concepts of TP 20.1: Receipt and Review of Benefit Application Package (BAP).

## Click Here for More Information...

19.4 Action Steps: Determine Overpayment/Underpayment for Lump-Sums

## 19.4 Action Steps: 10/18/2002

## Determine Overpayment / Underpayment for Lump-Sums

Take action according to the **Timing** specified in the Important Concepts section of preceding topic.

1 From the list of participants eligible for lump-sum distributions on the final valuation, separate those who were paid estimated lump-sums and those who are eligible for lump-sums.

2 Review the ledgers of paid participants in PRISM Browser to verify the amount of the estimated payment and interest, and if necessary, the participant's files (IPS).

3 Access PACS with your UserID and PRISM password.

- Enter the 8-digit Case number and participant's SSN.
- Follow the steps in PACS and input data not automatically populated from GENESIS.
- Add comments, if necessary, and ensure that the box beside "Display Comments on Report" is checked to insert the comments on the Lump Sum summary.
- Print the PACS Lump Sum Summary and Detailed Summary.
- Ensure both summaries are scanned to the participant's file (IPS).

4 If a participant is entitled to a residual benefit amount and will be paid a lump-sum distribution , determine whether a new Form 720 – Application for Lump-Sum Payment should be sent, based on the following:

| If the date of the estimated payment is... | Do the following - |
|---|---|
| **More than 6 months prior to the expected residual payment** | • Send a new Form 720 – Application For Lump-Sum Payment.<br>• Wait for the completed Form 720 before processing the residual payment. |
| **Within 6 months of the expected residual payment** | • Call the participant to find out if the payment should be made according to previously completed Form 720 (rollover, direct or split payment).<br>• If the participant requests a different payment method and/or destination, send them another Form 720 – Application for Lump-Sum Payment.<br>• Wait for the completed Form 720 before processing residual payment.<br>• Document the call in CCN, see TP 31: Document Telephone Calls. |

5 After the appeals period, do the following for participants who did not file an appeal or

request an extension, see TP 20: Put New Payee in Pay Status.

- New Payment – go to PRISM Benefits and create the lump-sum transaction with the figures from PACS.
- Residual lump-sum:
  - $5,000 or less (excluding interest) - a lump-sum distribution (unless the participant opts for an annuity). If the residual benefit amount is paid as an annuity, the computation is based on PBGC's lump-sum assumptions and the ratio of the residual annuity to the total annuity. If the participant were paid an estimated annuity where the estimated PV was $5,000 or less, the residual benefit amount would be an annuity.
  - More than $5,000 (excluding interest) - an annuity; the amount is determined using PBGC's lump-sum assumptions and the ratio of the residual benefit to the total benefit.
- Overpayments – begin recovery action, see TP 06: Recover Overpayment.

**6** Forward the lump-sum record for authorization, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

## 19.5 Issue Corrected or Revised Benefit Determination Letter 03/19/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | To select and issue the appropriate BDL to change a previously determined benefit. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | As applicable:<br>• Discovery of error in an original BDL<br>• Appeals Board Decision<br>• Need for changes to BDLs of similarly situated participants |
| **Process Output and Recipient** | As applicable:<br>• Revised BDL<br>• Corrected BDL<br>• Amended Benefit Statement<br>• Cover letter to Participant |
| **Control Issues** | Document all material supporting the change of a previously determined benefit and the amended benefit statement in the participant's IPS file (see TP 16.3: Maintain Participant File). Record all telephone contacts with the participant in CCN (see TP 31 Document Telephone Calls).<br><br>The Team Leader or FBA Project Manager's signature is required on Revised and Corrected BDLs. |
| **Important Concepts** | Use only a Corrected BDL or Revised BDL to change a previously determined benefit. In general, issue a Corrected BDL if the original BDL has not yet gone into effect (issued fewer than 46 days ago or an appeal is pending); issue a Revised BDL when the original BDL has already gone into effect (issued more than 45 days ago and no appeal or extension request was filed). There are several letters to choose from in ALGS among the Corrected and Revised BDL series, depending on the situation. The ALGS Help File lists available letters.<br><br>Do not change a previously determined benefit unless it meets the criteria stated in PBGC Operating Policy Manual 5.8-1: Revising Benefit Determinations. Also note that, per IOD Policy Bulletin 96-3: Approval for Revised Benefit Determinations, approval by OPSS is required under certain circumstances if changing the benefit determination reduces the benefit.<br><br>This subprocess clarifies when to change a previously determined benefit, and how to select the appropriate letter regardless of whether |

| | |

19.5 Action Steps: Issue Corrected or Revised Benefit Determination Letter

## 19.5 Action Steps: 03/19/2004

## Issue Corrected or Revised Benefit Determination Letter

1 Determine that a change is needed to a previously issued Benefit Determination Letter (BDL). A change may be needed because, for example:

- Without filing an appeal, a participant calls and states there is a factual error on the BDL (e.g., the Date of Birth is incorrect), and the correction changes the benefit.
- PEAD refers appeals correspondence to IOD, and IOD concludes that the original BDL is incorrect. (For specific instructions on responding to appeals correspondence, see PR 20. Respond to Appeals Notices and PEAD Referrals.)
- After an Appeals Board decision changes an appellant's benefit, IOD decides to change the BDLs of similarly situated participants who did not appeal and whose original BDLs have become effective.

**Before changing any previously determined benefit**, verify that the change falls under the rules of PBGC Operating Policy Manual 5.8-1: Revising Benefit Determinations. Also, if a corrected benefit statement is needed to correct an error that does not change the benefit, issue the amended benefit statement without a new BDL; instead create a cover letter using the ALGS Generic letter.

**Note** If the Appeals Board issues a decision, **do not** issue a Corrected BDL **unless** specifically instructed to by the appeal closing memo from PEAD. An Appeals Board decision is final, and issuing another BDL would grant an additional appeal period that is unwarranted. However, if the appeal closing memo directs, issue a corrected benefit statement (without a BDL) to the participant, with a cover letter (using the ALGS Generic letter). Contact PEAD with any questions on how to respond to appeals closings. See also Process 20 Respond to Appeals Notices and PEAD Referrals.

2 Determine whether to use a Revised BDL or Corrected BDL. Use **only** a letter within the Revised or Corrected BDL series in ALGS to change a benefit; do not use a standard BDL to replace a previously issued BDL that was incorrect. Contact OPSS with any questions about which letter to use.

The following table summarizes when to use a Revised BDL or Corrected BDL. After determining the series, select the appropriate letter within that series, depending on the situation. The ALGS Help File lists available letters.

| | |
|---|---|
| Corrected BDL – ALGS 410 series | To change a benefit determination that has not become effective because the appeal period has not expired. For example:<br>• A mistake is found in a BDL issued fewer than 46 days ago.<br>• PEAD refers appeals correspondence to IOD, and IOD decides to change the original benefit determination.<br>• In its appeal closing memo, PEAD requests that IOD issue a Corrected BDL. |

| | |
|---|---|
| Revised BDL – ALGS 411 series | To change a benefit determination that has become effective because the appeal period has expired. For example:<br>• A mistake is found in a BDL issued more than 45 days ago, and no appeal/extension request was filed.<br>• An Appeals Board's decision on one participant's appeal affects similarly situated participants who did not appeal, and whose BDLs were issued more than 45 days ago. |

3 Customize and issue the appropriate BDL using ALGS (see TP 15. Prepare & Mail Letters). The letter must have the signature of the TPD Team Leader or FBA Project Manager, who must review, initial and date the draft. Image the initialed draft to the participant's IPS file (see TP 16.3 Maintain Participant File).

Under certain circumstances, when changing the benefit determination adjusts the benefit downward, approval by OPSS is required **before** the letter is issued (see IOD Policy Bulletin 96-3: Approval for Revised Benefit Determinations).

4 Verify that all documentation that supports correcting or revising the BDL and/or benefit statement is documented:

- Image all supporting documents into the participant's IPS file, including the new benefit statement and relevant e-mail (see TP 16.3 Maintain Participant File).
- Document all telephone contacts with the participant in CCN (see TP 31 Document Telephone Calls).

5 Once the appeal period has expired, determine whether the participant has appealed the BDL or requested an extension request. If not, make adjustments to the participant's benefit as required (see TP 21 Change Benefit/Payment Amount). If the participant files an appeal or extension request, stay the BDL and proceed to Process 20 Respond to Appeals Notices and PEAD Referrals.

## 19.6 Action Steps: 05/13/2005

## Issue Limited-Scope BDLs

| | |
|---|---|
| **Purpose** | To issue a determination concerning limited aspects of benefit entitlement to an individual or a group of participants before issuing their full-scope benefit determinations. |
| **Procedure Owner** | PLS/PBA/FBA |
| **Guidance** | PBGC Operating Policy Manual 5.8-2 Limited-Scope Benefit Determinations<br><br>eALG Correspondence Help |

1 Determine the need to issue a Limited-Scope BDL before the full-scope BDLs will be issued. Refer to PBGC Operating Policy Manual 5.8-2 Limited-Scope Benefit Determinations for guidance. Consult TPD management before proceeding.

2 Research the issue(s) to be addressed in the letter. Obtain input from the case team and TPD management, as needed.

3 Draft language to be included in the *Limited-Scope BDL (eALG 406)* and obtain approval depending on whether issuing the letter to an individual or group:

- **Limited-Scope BDL to an individual:** Obtain TPD Management approval.
- **Limited-Scope BDLs to a group of participants:** After TPD management concurs, obtain approval from OPSS.

4 Using the approved language, create and issue the customized *Limited-Scope BDL (eALG 406)* via eALG (do not use **any** other letter for this purpose). See TP 15: Prepare & Mail Letters.

5 Image supporting documents to the appropriate file (see Technical Procedure 16: Establish & Maintain Plan & Participant Files):

- **Limited-Scope BDL to an individual:** Image documentation indicating TPD management 's approval of the BDL language, and any supporting documents, to the participant's IPS file.
- **Limited-Scope BDLs to a group of participants:** Image documentation indicating OPSS 's approval of the BDL language, and any supporting documents, to the IPS plan file.

6 If the participant appeals, see Process 20: Respond to PEAD Acknowledgement of Appeal or Extension Request.

20.1 Respond to PEAD Acknowledgement of Appeal or Extension Request

20.2 Respond to Appeal Closing Memo

20.3 Respond to Notice of Referral from PEAD

20.4 RFA Correspondence Guidelines and Appeal Criteria

Forms, Letters, Memos

## 20. Overview

01/19/2005

### Appeals

Individuals may appeal any element of a Benefit Determination Letter (BDL), such as form of benefit, amount, or benefit commencement date. They may also appeal the qualification of a Domestic Relations Order (DRO); however, these procedures deal exclusively with BDLs. An appeal, or a request for an extension of time to file an appeal, generally must be filed within 45 days of the date of the BDL. Guidelines for filing appeals are set forth in the brochure "Your Right to Appeal," which is enclosed with each BDL. Rules governing the agency's review are covered in 29 CFR 4003.

IOD does not implement changes to estimated benefits which would result solely from the BDL during the 45-day appeal period following the date of the BDL. If an appeal or an extension request is received, the 45-day clock stops and the benefit determination is stayed. In general, once an appeal is filed, IOD does not implement any changes to the benefit of a participant (or any party related by a QDRO) which would result from the BDL until the Participant and Employer Appeals Department (PEAD) provides instructions. PEAD images the correspondence and notifies IOD through SCoRe. IOD should continue routine processing, including putting an eligible participant into estimated pay status, ending certain period benefits upon expiration, and implementing step-up and step-down provisions in a plan. The Appeals Board (within PEAD) or PEAD staff researches and makes final decisions on appeals. IOD must implement an Appeals Board decision within 30 days of the decision. Any questions on appeal decisions are referred to the appropriate IOD manager or to PEAD.

### Correspondence Referred from PEAD

PEAD refers certain appeals correspondence to other areas in PBGC for response. IOD receives the most referrals, but some are sent to OGC, CPAD, the Problem Resolution Office (PRO) or within PEAD. PEAD refers to IOD items such as complaints, requests for explanations, or challenges of facts used in benefit calculations (for example, an incorrect Date of Birth). Such correspondence, known as Routed From Appeals (RFA) correspondence, is imaged by PEAD, and IOD is notified by ScoRe that the letter is in IPS. The BDL of the appellant (and any party related by a QDRO) is stayed while the referral is open. IOD should respond to referrals it receives as soon as possible, but target the response for no more than 45 days from the date opened in SCoRe. In certain cases, with TPD management's approval, IOD may return the correspondence to PEAD for processing.

PBGC's response to appeals and inquiries, and the seriousness with which they are viewed, reflect the Corporation's desire to provide complete and accurate decisions and the best service to the participants whom we serve. The Corporation wants to ensure that we provide participants with whatever benefits they are entitled to under their respective plans and by law. A person first must appeal, in order to subsequently seek court review of a PBGC Benefit Determination Letter.

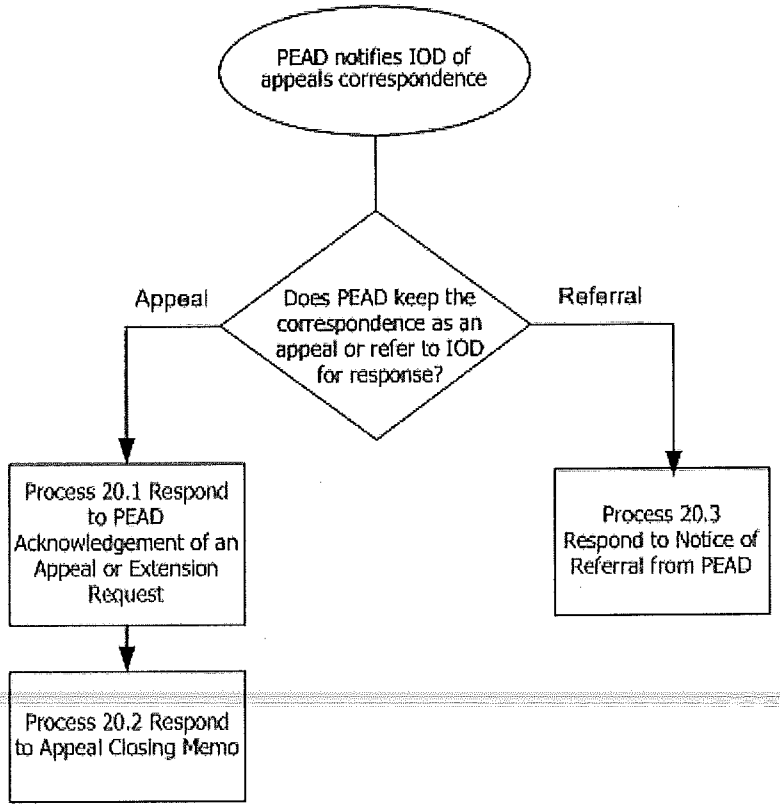
## 20. Workflow for Process 20

01/19/2005



**Respond to Appeals Notices and PEAD Referrals**

## 20.1 Respond to PEAD Acknowledgment of Appeal or Extension Request

**01/19/2005**

**Action Steps**

| | |
|---|---|
| **Purpose** | To ensure that IOD handles pending appeals properly and that participants are given their due process. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Notification from PEAD through SCoRe that an appeal or extension request has been submitted. |
| **Output and Recipient** | A stay (with few exceptions) on implementing any actions or changes in participants' benefits as described in the BDL. |
| **Control Issues** | N/A |
| **Important Concepts** | Appeals are received in very few cases, but regulations allow appeals for all BDLs. If an original (paper) appeal is received in IOD, deliver it by hand to PEAD for imaging and processing. If a letter in IPS appears to be an appeal but is not acknowledged by PEAD, notify PEAD immediately by e-mail.<br>While the appeal or extension request is pending, stay the BDL of the appellant (and anyone related by a QDRO). Continue to communicate with the participant as needed and take necessary actions for routine plan processing only. Notify PEAD by e-mail of any communication with the participant(s) related to the appeal and any payment actions taken during that period. Image e-mails with PEAD to the participant's IPS file. Communications with participants must be documented in IPS and/or CCN . |
| **Guidance** | 29 CFR 4003 |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

20.1 Action Steps: Respond to PEAD Acknowledgment of Appeal or Extension Request

**Respond to Appeals Notices and PEAD Referrals**

## 20.1 Action Steps: 01/19/2005

## Respond to PEAD Acknowledgment of Appeal or Extension Request

PEAD intake staff images all appeal letters to IPS. If an original appeal letter is received in IOD, immediately walk the original, including the envelope, to PEAD for imaging. If received at an FBA office, forward the letter to PEAD via interoffice correspondence.

1 Receive notification of the appeal filing or extension request through SCoRe when PEAD issues an acknowledgment memo. Follow any instructions from PEAD contained in the memo. **If the filing concerns a Recovery BDL** (ALGS 404R, 414, or 415), notify the Recovery Coordinator by e-mail to the Recovery mailbox. Reference the case number, SSN and recovery tracking number. Take no action on the recovery until the appeal is closed.

2 Stay the Benefit Determination Letter. If the participant is in pay status, leave the current payment as previously estimated and in the estimated pay source in PRISM while the appeal or extension request is pending. Make no changes to a participant's benefit based on the BDL. Unless otherwise advised by PEAD, implement only changes which result from the normal operation of the plan or are required by an individual's payment method.

Examples of actions that **may be taken** while an appeal or extension request is pending:

- Beginning estimated annuities, including backpayments to ARD
- Paying BDL lump sums at Earliest Retirement Age as estimated
- Ending a Certain & Continuous Annuity benefit to a beneficiary upon its expiration
- Implementing Step-up and Step-down provisions in a plan
- Performing administrative changes, such as updating EDD information, addresses, federal income tax withholding, etc.

Examples of actions that **should not be taken** while an appeal or extension request is pending **unless** approved by IOD management or PEAD:

- Paying lump sums prior to Earliest Retirement Age
- Adjusting benefits up or down based on the BDL
- Initiating recoupment or recovery
- Initiating backpayments based on a benefit adjustment required by the BDL
- Moving payments from estimated to final pay sources in PRISM

**Note:** Discuss any questions concerning the appropriateness of a payment action with TPD management before acting. Contact PEAD for additional guidance.

3 If the appeal was filed by a party to a Qualified Domestic Relations Order (QDRO),

- Stay the BDL of both the appellant and of the related party(-ies) to the QDRO while the appeal is open, since the appeal decision may change both benefits; and
- Notify the related party(-ies) who did **not** appeal by **ALGS 615 QDRO - Stay of BDL (Appeals)**. (See also TP 13: Domestic Relations Order Handbook.)

4 If any benefit changes have already been implemented, restore the benefit to the estimated pay amount in PRISM for the next check cycle. See TP 21: Change Benefit/Payment Amount.

(However, do not change it from the guaranteed pay source back to the estimated pay source; use the next available pay source only. Reverting to a previous pay source may cause duplicate payments.) If necessary, issue a special check to restore any downward adjustments. Inform the participant of any necessary adjustments by telephone or letter, and document all communications in CCN and/or IPS.

5 Notify PEAD by e-mail of any payment actions taken and appeal-related communications with the participant while the appeal or extension period is pending. Log all participant contacts in CCN and/or IPS. Also document all e-mails to/from PEAD in IPS.

6 Take next action upon notification that the appeal is closed. (See Process 20.2: Respond to Appeal Closing Memo) or has been referred to IOD for response (see Process 20.3: Respond to Notice of Referral from PEAD).

## 20.2 Respond to Appeal Closing Memo 01/19/2005

Action Steps

| | |
|---|---|
| **Purpose** | To take actions as directed by PEAD in response to an appeal. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Memo from PEAD (through SCoRe) directing IOD to take specific action on a participant's benefit determination as a result of the appeal decision. |
| **Output and Recipient** | As needed:<br>• Corrected BDL (ALGS 410)<br>• Adjustment to payee's benefit<br>• PRISM Updates |
| **Control Issues** | N/A |
| **Important Concepts** | A de minimis overpayment is written off at the time the BDL is issued. However, because payments continue without adjustment while an appeal is pending, the overpayment may increase to an amount greater than the de minimis by the time the appeal is resolved. In this situation, the de minimis overpayment amount as noted in the BDL is frozen while the appeal is pending. PBGC will not seek repayment of an overpayment which grew to an amount greater than the de minimis amount solely because of payments made while the appeal was pending. (See IOD Policy Bulletin 03-2.)<br>Occasionally, PEAD will direct IOD to issue a new BDL rather than a Corrected BDL. This occurs when the participant appeals an issue that is not addressed in the original BDL – for example, a disability benefit which the first BDL did not take into account. Contact PEAD with any questions about implementing an Appeals Board decision.<br>Whenever issuing any type of BDL, the participant has 45 days to appeal. Be aware that appeals correspondence is timely if postmarked within 45 days, so allow time for late correspondence to be received and appear in IPS.<br>**Timing:** Implement PEAD's decision within 30 days. |
| **Guidance** | IOD Policy Bulletin 03-2<br>29 Code 4003 |
| **Procedure Owner** | PLS, PBA,FBA |

## Click Here for More Information...

20.2 Action Steps: Respond to Appeal Closing Memo

**Respond to Appeals Notices and PEAD Referrals**

## 20.2 Action Steps: 01/19/2005

## Respond to Appeal Closing Memo

1 Receive memo from PEAD (through SCoRe) advising that the appeal is closed and of what actions to take to implement the decision. Note that the Appeals Board's decisions are **final**. Do not issue a new or Corrected BDL (ALGS 410 Series) unless so directed by the closing memo, since the appellant is not entitled to appeal the decision. Contact PEAD with any questions about the instructions. **If the appeal was filed by a party to a QDRO**, see the Qualified Domestic Relations Order section at the end of this procedure for required actions concerning the related QDRO party(-ies) who did **not** appeal. **If the appeal concerned a Recovery BDL**, notify the Recovery Coordinator by e-mail of the closing, decision, and what actions will be taken based on the following steps. Use the Recovery mailbox and reference the participant's name, SSN and recovery tracking number.

2 If the appeal is denied, dismissed, or administratively closed, implement the BDL according to pay status:

- **Non-Payees:** Normally, no further action is necessary. However, take any actions directed by the PEAD's closing memo.
- **Payees:** Within 30 days of the date of PEAD's closing memo:
  - Move final pay amounts to final pay sources in PRISM;
  - Initiate **recoupment** or **recovery**, if necessary (see Technical Procedure 07: Recoup Overpayments or Technical Procedure 06: Recover Overpayments);
  - Initiate backpayments and other adjustments as needed.

**Note** A de minimis overpayment is written-off at the time the BDL is issued. However, because payments continue without adjustment while an appeal is pending, the overpayment may increase to an amount greater than the de minimis by the time the appeal is resolved. In this situation, the de minimis overpayment amount as noted in the BDL is frozen while the appeal is pending. PBGC will not seek repayment of an overpayment which grew to an amount greater than the de minimis amount solely because of payments made while the appeal was pending. (See IOD Policy Bulletin 03-2.)

3 If the Appeals Board decision changes the benefit, take action as directed by the appeal closing memo within 30 days. **Do not issue a Corrected BDL unless the appeal closing memo specifically directs such action**. If necessary, contact PEAD for clarification on actions to be taken.

4 If the appeal closing memo directs that a Corrected BDL be sent to the participant, take action based on the participant's pay status:

**Non-Payees:** Issue a Corrected BDL (ALGS 420) with a new benefit statement. Customize the letter as appropriate. If necessary, request the new benefit statement from the case actuary. Be aware that the issuance of a Corrected BDL starts another 45-day appeal period for matters addressed in that BDL. Therefore, if the participant elects to go into pay status during the appeal period, use the estimated pay source in PRISM until after the appeal period has expired.

**Payees:** Issue a Corrected BDL (ALGS 420) with a new benefit statement. Customize the letter as appropriate. If necessary, request the new benefit statement from the case actuary. Be aware that the issuance of a Corrected BDL starts another 45-day appeal period for matters addressed in that BDL. Make no benefit changes until after the appeal

period has expired.

5 If the appeal closing memo directs that a new (not Corrected) BDL be issued, follow the directions in the appeal closing memo and contact PEAD with any questions. Make no benefit changes until after the new appeal period has expired. Be aware that appeals correspondence that is received after the 45th day can still be timely if postmarked within 45 days, so allow time for late correspondence to appear in IPS.

6 Once 45 days have passed since the Corrected or new BDL was issued, view the participant's IPS file to determine whether a subsequent appeal or extension request has been filed. (Be aware that appeals correspondence that is received after the 45th day can still be timely if postmarked within 45 days, so allow time for late correspondence to appear in IPS.) If a new appeal has not been filed, make any changes to the participant's benefit required by the Corrected or new BDL (see TP 21 Change Benefit/Payment Amount). If an appeal has been filed, treat it as a new appeal (see PR 20.1 Respond to PEAD Acknowledgement of Appeal or Extension Request).

7 Normally, the decision of the Appeals Board and/or PEAD staff is applied to only the appellant. Occasionally, the Appeals Board will send a separate memo directing IOD to take specific action for similarly situated participants in the same plan. For similarly situated participants who did not appeal and whose BDLs became effective after 45 days, change their benefits by issuing Revised BDLs (ALGS 411). Obtain TPD management approval before taking any action with other participants in the plan based on this direction.

**Qualified Domestic Relations Orders (QDRO)**

If the appeal was filed by a party to a QDRO, the Appeals Board's decision may change the benefit of the appellant and/or other party(-ies) to the QDRO. Use the following instructions concerning the party(-ies) who did **not** file the appeal. (If more than one party to the QDRO appeals, take no action on the benefit of any party until all appeals are closed.)

1 If the Appeals Board's decision does **not** change the benefit of the party who did not file the appeal:
- Issue **ALGS 616 QDRO – No Benefit Change (Appeals)**, and
- Implement the Benefit Determination Letter within 30 days.

2 If the Appeals Board's decision changes the benefit of the party who did not appeal:
- Issue a Corrected BDL (ALGS 410 Series). See PR 19.5: Issue Corrected or Revised Benefit Determination Letter.

**Very Important:** When corresponding with a customer who is a party to a QDRO, do not reveal any sensitive information concerning the other party(-ies) or provide copies of their correspondence. See TP 13: Domestic Relations Order Handbook for more information.

## 20.3 Respond to Notice of Referral from PEAD 01/19/2005

Action Steps

**Purpose**

To assure that correspondence referred from PEAD is handled properly and timely.

**Time Reporting (BMPRS)**

FTE Process Benefit Determination Letters

FBA Process Benefit Determination Letters

PBA Process Benefit Determination Letters

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required Input and Source**

Notification from PEAD (through SCoRe) that correspondence has been received from a participant and referred to IOD or another area for processing.

**Output and Recipient**

As needed:

- Stay of BDL
- Response to the customer/representative allowing additional time to appeal
- E-mail notification to PEAD that the correspondence is closed
- Corrected BDL (ALGS 410)
- Notice to participant's representative of response to participant

**Control Issues**

PEAD sends an acknowledgment letter to participants for any correspondence received in PEAD and advises IOD of all appeals correspondence through SCoRE (coded AP). If PEAD decides to refer the correspondence to IOD, it then appears as RFA (Referred From Appeals) correspondence in SCoRE.

Communications with PEAD and other staff concerning actions taken in response to a PEAD referral must be documented in the participant's IPS file. Be aware that appeals correspondence that is received after the appeals period expires is timely if postmarked within the period, so allow time for late correspondence to appear in IPS.

ALGS letters 410, 532, 533, and 534 require the review and signature of the TPD Team Leader or FBA Project Manager. ALGS authorizers approve all letters.

**Important Concepts**

PEAD may refer correspondence to IOD, OGC, PRO, or within PEAD. Make no changes to benefits, which would result solely from the BDL, while **any** correspondence referred from PEAD is open. If a referral does not come to IOD, stay the BDL until PEAD advises through ScoRe that it is closed and what action to take. Notify the Recovery Coordinator of referrals concerning recovery BDLs, including hardship cases, so that no recovery actions will occur when the appeal period is extended. Responses to letters requesting hardship consideration require specific language.

ALGS 532 and 533 allow an additional 30 days to appeal a BDL. ALGS 410 (Corrected BDL) begins a new 45-day appeal period. Be aware that appeals correspondence that is received after the appeals period expires

| | |
|---|---|
| | is timely if postmarked within the period, so allow time for late correspondence to appear in IPS.<br><br>**Timing:** Respond to RFA correspondence as early as possible, but target the response for no more than 45 days from date received in the TPD/FBA per SCoRe report. |
| **Guidance** | ALGS Help File |
| **Procedure Owner** | Team Leader; Project Manager; PLS; PBA; FBA |

20.3 Action Steps: Respond to Notice of Referral from PEAD

## 20.3 Action Steps: 05/13/2005

## Respond to Notice of Referral from PEAD

1 The IOD mail point of contact for the case (designated in CAS) is notified of any appeal-related correspondence received in PEAD by the code AP on the SCoRe report. When such correspondence is received, stay the BDL until further instructions are received from PEAD. If PEAD refers the correspondence to IOD, it will appear a second time on SCoRe, but coded as type RFA (Referred From Appeals) correspondence.

If the correspondence does not appear as RFA, it has either been referred to another area or kept in PEAD. Take no action on the correspondence and stay the BDL until further instructions are received from PEAD (see Process 20.1: Respond to PEAD Acknowledgement of Appeal or Extension Request).

**If the correspondence concerns a Recovery BDL** (ALGS 404R, 414 or 415), notify the Recovery Coordinator of the referred correspondence. Use the Recovery mailbox and reference the participant's name, SSN and recovery tracking number. Take no action on the recovery until the correspondence is closed.

- If the correspondence requests hardship consideration but raises no other issues, advise the Recovery Coordinator by e-mail to the Recovery mailbox. PEAD will have notified the participant that hardship is not an appealable issue and that the matter has been referred to the Recovery Coordinator, but the mail POC for the case must inform the Recovery Coordinator. Take no further action; the Recovery Coordinator will respond to the letter.
- If the correspondence requests hardship consideration and also raises other issues (e.g. request for explanation, challenge of fact, etc.), see Step 7.

2 Research the issues and obtain input from the IOD Team Leader, as needed. Determine whether:

- The referred correspondence concerns an issue which may be addressed by IOD (continue to Step 3); or
- The referred correspondence concerns issues that should be addressed by PEAD (skip to Step 6).

See PR 20.4 Referred From Appeals (RFA) Correspondence Guidelines and Appeal Criteria for guidance on making this determination. Note that some referrals from PEAD, which meet appeal criteria, can be addressed by IOD.

3 Research the situation and respond to the participant and/or representative as early as possible, but target the response for no more than 45 days from the date opened in ScoRe. Use the appropriate ALGS letter(s) listed below. See TP 10 Respond to Correspondence. Note that each requires the signature of a TPD Team Leader or FBA Project Manager.

**QDROs:** If the appellant is a party to a QDRO, see the Qualified Domestic Relations Order section at the end of this procedure for instructions concerning the related party(-ies) who did **not** appeal.

**Limited-Scope BDLs:** Use the letters in the special instructions at the end of this procedure if the RFA correspondence concerns a Limited-Scope BDL.

---

**ALGS 410: Corrected Benefit Determination Letter**

- Advises participant that a review of the case resulted in a change in the benefit

| | |
|---|---|
| | determination<br>• Grants new 45-day appeal period.<br>• Attach a new benefit statement and image a copy to the participant's IPS file.<br>• Address this letter only to the participant – not to a representative. If applicable, advise the participant's representative of the response using ALGS 534 (see below). |
| **ALGS 532: Response to Representative of Appellant – Referral from Appeals Dept.** | • Advises participant's representative that a review of the case resulted in no change to the benefit determination.<br>• Grants the participant an additional 30 days to file an appeal. |
| **ALGS 533: Response to Appellant – Referral from Appeals Dept.** | • Advises participant that a review of the case resulted in no change to the benefit determination<br>• Grants additional 30 days to file an appeal. |
| **ALGS 534: Notification Letter to Representative of Appellant** | • Advises the participant's representative that a review of the case resulted in a changed benefit determination, and that the response was sent directly to the participant. See ALGS 420 (above). |

4 On the day of the response to the participant, close the RFA correspondence in SCoRe. Also advise PEAD by email to AppealsIntake@pbgc.gov (and cc to TPD Team Leader) including the participant's name and SSN; which ALGS letter was sent and the date; and one of the following statements:

- **RFA Did Not Result in a Change in Benefit.**
- **RFA Resulted in an Increase in Benefit.**
- **RFA Resulted in a Decrease in Benefit.**

Image the e-mail to the participant's IPS file.

5 Once the new or extended period to file an appeal has expired (per ALGS letter sent in Step 3 above), check IPS and act according to whether a new appeal has been filed. Be aware that appeals correspondence is timely if postmarked within 45 days, so allow time for late correspondence to be received and appear in IPS.

- If a new appeal has not been filed, make any necessary adjustments to the benefit and move it to the final pay source in PRISM.
- If a new appeal has been filed, stay the benefit determination and await instructions from PEAD. See Process PR 20.1: Respond to PEAD Acknowledgment of Appeal or Extension Request.
- If the correspondence concerned a Recovery BDL (ALGS 404R, 414 or 415), notify the

Recovery Coordinator that the correspondence is closed, the nature of the response and what actions will be taken on the recovery. Use the Recovery mailbox and reference the participant's name, SSN and recovery tracking number.

6 If TPD Team Leader agrees that the referred correspondence concerns an issue that should be addressed by PEAD and should be returned for processing:

- Send an e-mail to PEAD (AppealsIntake@pbgc.gov), with cc to the Team Leader, stating the reasons the correspondence is being referred back for processing. Reference any documents in the IPS plan and/or participant files used to make that determination. Image the e-mail, response and any follow-up e-mails to the participant's IPS file.
- Enter the date referred to PEAD as the correspondence closing date in SCoRe.
- Stay the BDL and await further instructions from PEAD.

7 If the correspondence not only requests hardship consideration but also raises other issues that must be addressed (e.g. request for explanation, challenge of fact, etc.), PEAD will refer the correspondence to IOD but will not notify the participant that the matter has been referred to the Recovery Coordinator. Treat the letter as a referral (see steps 2-6), but include the following language in the response:

"While we are sympathetic to your situation, hardship is not a basis for appeal. PBGC regulations require that PBGC get back any amounts paid to individuals that exceed the amounts they are entitled to, and the Appeals Board cannot change this requirement. However, PBGC has recently changed its policy on recovering overpayments and will consider demonstrated financial hardship in certain situations. We will send a copy of this letter to PBGC 's Recovery Coordinator, who will contact you concerning the Financial Statement of Debtor form that must be completed by the debtor alleging hardship."

On the same day the response is issued, inform the Recovery Coordinator by e-mail to the Recovery mailbox.

**Qualified Domestic Relations Orders (QDRO)**

If the appellant is a party to a QDRO, it is necessary to notify the related parties of the status of the appeal and its effect on their own benefits. This depends on the response provided the appellant, and whether the appellant files a second appeal during the extended appeal period. Use the following instructions to determine what response to provide the related parties, and when.

1 If a **Corrected BDL** is issued to the appellant, and:

- **The benefit of the related party also changes:** Issue a Corrected BDL to the related party at the same time as to the appellant. See PR 19.5 Issue Corrected or Revised Benefit Determination Letter.
- **The benefit of the related party does not change:** Wait until the 45-day appeal period expires. If the appellant does not file a second appeal and the Corrected BDL becomes final, issue **ALGS 616 QDRO – No Benefit Change (Appeals)** to the related party. Implement the BDL of each party within 30 days. However, if the appellant files a second appeal, continue to stay the BDL of each party to the QDRO (but do not issue a second **ALGS 615 QDRO - Stay of BDL (Appeals)** to the party that did not appeal).

2 If **ALGS 532/533** is issued to the appellant or his/her representative, wait until the 30-day extended appeal period has expired, then:

- If the appellant does not file a second appeal, issue **ALGS 616 QDRO – No Benefit Change (Appeals)** to the related party and implement the BDL within 30 days.
- If the appellant files a second appeal, continue to stay the BDL of each party to the QDRO (but do not issue a second **ALGS 615 QDRO - Stay of BDL (Appeals)** to the party that

did not appeal).

**Limited-Scope BDLs**

Use the appropriate eALG letter(s) from the following list to respond to RFA correspondence concerning Limited-Scope BDLs, and return to the action steps to close it and advise PEAD. Each requires the signature of a TPD Team Leader or FBA Project Manager.

| | |
|---|---|
| **410LtdS Corrected Limited-Scope BDL** | • Advises that a review of the case resulted in a change in the Limited-Scope benefit determination.<br>• Grants a new 45-day appeal period.<br>• Address only to participant – not a representative. If applicable, advise representative via ALGS letter 534 (see below). |
| **532LtdS Response to Representative of Appellant - RFA - Limited-Scope** | • Advises appellant's representative that the review resulted in no change to the determination<br>• Grants an additional 30 days to file an appeal. |
| **533LtdS Response to Appellant - RFA - Limited-Scope** | • Advises appellant that the review resulted in no change to the benefit determination<br>• Grants an additional 30 days to appeal. |
| **ALGS 534: Notification Letter to Representative of Appellant** | • Advises appellant's representative that the review resulted in a change to the determination, and the response was sent directly to the participant. |

# 20.4 RFA Correspondence Guidelines and Appeal Criteria 02/17/2004

A RFA Correspondence B Appeal Criteria

## A Referred From Appeals (RFA) Correspondence

If PEAD Intake Staff determines that the correspondence concerns an issue that can be addressed by IOD, they refer it to IOD as RFA (Referred From Appeals) correspondence. The following are examples:

- Requests for explanations
- Non-specific complaints
- Easily verifiable and resolvable issues
- Disputes of fact regarding any of the following:
  - Date of hire
  - Gender
  - Marital status
  - Date of retirement
  - Date of termination
  - Social security number
  - Salary
  - Length of service
  - Date of birth
  - Date of plan termination
  - Benefit election
  - Vesting

## B Appeal Criteria

The following are examples of issues that meet Appeal Criteria and are typically addressed by PEAD, but can also be addressed by IOD, if referred:

- Plan interpretation
- Plan practice
- Eligibility for benefits
- Legal and policy issues
- Employer appeals (e.g., employer liability)
- Successor plans
- Novel or complex issues
- Precedent-setting cases (e.g., issues that could affect some or all plan participants)
- Disability cases
- Controversial issues (material to PBGC, monetary issues, etc.)
- Cases referred to IOD and not resolved
- QDROs
- Unspecified issues

## 20.5 Forms, Letters, Memos

05/13/2005

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

*Corrected BDL – eALG 410 series*

*Corrected Limited-Scope BDL – eALG 410LtdS*

*Notification Letter to Representative of Appellant – eALG 534*

*No Benefit Change (Appeals) – eALG 616*

*QDRO - Stay of BDL (Appeals) – eALG 615*

*Response to Appellant – Referral from Appeals Dept. – eALG 533*

*Response to Appellant – RFA – Limted-Scope – 533LtdS*

*Response to Representative of Appellant – Referral from Appeals Dept. – eALG 532*

*Response to Representative of Appellant – RFA – Limited-Scope – eALG 532LtdS*

*Revised BDL – eALG 411 series*

## Introduction to Case Closure Processes 02/11/2000

The Case Closure Processes are basically a review to ensure that all required actions for a plan have been completed according to relevant policy and procedures. This is the TPD's opportunity to find and correct any errors. The last step in the process is for IOD to transfer ongoing administrative management of benefits to an outside contractor. These outside contractors continue the administration of benefits under PBGC policies and procedures.

## Case Closure Processes include:

21 Close Plan

22 Review Closed Plan

23 Transfer Plan

## PR 21. Close Plan

21. Overview

21. Workflow

21.1 Request Online Plan Closing Report

21.2 Correct Plan Closing Report Errors

21.3 Check Participant BDL Status

21.4 Prepare Plan History

21.5 Reconcile Prism with CAS and Actuarial Database

21.6 Check Completeness of Participant Files/Records on IPS, PRISM, SCORE and CCN

21.7 Check Completeness of Plan File on IPS

21.8 Run IPVFB Critical Pay Source Errors Detail Report

21.9 Correct Critical Errors

21.10 Request Printed Plan Closing Report

21.11 Assemble and Submit Plan Completion Memo

21.12 Wrap Up Plan Administration

 Forms, Letters, Memos, etc.

**Close Plan**

## 21. Overview

**02/17/2004**

The purpose of the Close Plan Process is to ensure that major IOD case processing has been completed for the plan, before it is moved out to an "Ongoing Administration" contractor. The TPD selects plans that are "final" (payments no longer estimated), have completed all CAS milestones and have issued all BDLs, in accordance with priorities established by IOD management. The following closure processes are completed prior to forwarding the plan to TSD/CSRB for review:

- All errors, identified in the Plan Closing Report have been corrected.
- All issuable Benefit Determination Letters (BDLs) have been correctly issued to locatable customers, and 90 days have elapsed since all BDLs were issued.
- Participant SSN s, counts and present values have been reconciled across the PRISM, CAS and Actuarial databases.
- All participants identified in the actuarial valuation, or later as a woodwork participant, are in PRISM.
- All benefits have been finalized in PRISM, and all eligible participants are receiving benefits.
- IPS plan and participant files are complete and properly indexed.
- All critical errors on the IPVFB Error Report have been corrected.

Cases administered at Headquarters are closed by the TPD Case Team. Cases administered primarily at a Field Benefit Administrator (FBA Plan) are closed by the FBA case team, with support and guidance from the TPD case team.

TSD/CSRB's plan closing team is available to provide technical advice on variance resolution relating to the reconciliation of participant counts and present values. Either the FBA or the TPD can request this assistance from TSD/CSRB.

| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

## Click here for more information...

21.1 Action Steps: Request Online Plan Closing Report

**Close Plan**

## 21.1 Action Steps: 02/17/2004
## Request Online Plan Closing Report

There are two versions of the Plan Closing Report: the printed version and the online (or HTML) version. For the majority of the plan closing process, the online version of the report is the more convenient tool. After all of the data is cleaned up and the plan is ready to be submitted for TPD review, the TPD may require inclusion of the printed version of the report as an attachment to the Plan Completion Memo (See Process 21.10: Request Printed Plan Closing Report).

1 Send an e-mail to "Reports Plan Closing" requesting the Plan Closing Report. It is not necessary to put anything into the body of the message itself. The proper format for the subject line is, for example:

17765800 (Beaumont Hourly) Plan Closing Report Request

Note: Please use the **8-digit** case number, not just the first 6 digits! Abbreviation of the plan name is acceptable. OASD will send a return e-mail containing the online (or HTML) version of the report. Sections of the Online Report can be printed, as required. OASD will send a printed version of the report in the regular mail (on the first run).

2 After making corrections to "errors", in subsequent processes, request a refresh of the online Plan Closing Report to verify progress, as needed. For these subsequent requests, OASD will only send the online version, unless the printed version is specifically requested. Each version of the Online Report is archived, and a Report History for this Case is included in each run.

**Note Overview of the Online Version of the Plan Closing Report:**

OASD sends one HTML file, with a number of links, attached to the same e-mail message. Open the first one (Errors Only). Links to the other files (All Edits, Edit Index) are located immediately beneath the plan name. Click on the link once to jump to the desired file; to return, click the "Back" button on your Browser.

**Case Summary Section:**

- This Section shows the team members, key dates, participant counts and PVs and summarizes the major types of errors present.

**Errors Only Section:**

- **Summary** shows how many errors and how many customer records are present.
- **Links to Customers** provides "jumps" to the section of the Errors Only report associated with each letter of the alphabet.
- **Edit Summary** is a list of each error detected for the case and how many times it was detected. Click once on the error number to jump to the Data area of the report (see below) where that error occurs first. Browse through everyone who has a particular error using "Next". Return to the Edit Summary using "Index" (immediately to the right of the edit number).
- **Data** lists each customer followed by the errors associated with that customer. The error details include: the error number, a description of the error, the data values, and, where feasible, suggestions on probable causes and corrective actions. Several lines are blank after each customer for notes.

**All Edits Section:** This Section contains the same information as the Errors Only Section, except that all edits are displayed.

**Edit Index Section:**

- **Edit Summary** is a list of each edit detected for the case and how many times it was detected. Select an edit number, to jump to a list of all customers who have that particular edit.
- **Edit Index** shows each edit followed by a list of all customers who have that edit. This is useful for pasting a list of customers into the Plan Completion Memo, using "Paste Special" and the "Unformatted Text" option.

**Participant Count Reconciliation Section:**

- This Section shows how the plan population has changed since the DOPT valuation was completed. The first part summarizes how the different DOPT groups have changed, and the second shows the details for each participant.

For an explanation of the data items on the Report, see Process 21.10: Request Printed Plan Closing Report). For an explanation of errors on the Report, see the individual error listings on the Report, which include the error number, description, data contents and suggested corrective action.

**Close Plan**

## 21.2 Correct Plan Closing Report Errors

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Correct Errors Identified in Online Plan Closing Report. Provide a clean case for the Ongoing Administrator. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Online Plan Closing Report<br>Actuarial Case Report (IPS Index 12) from TPD Actuary |
| **Output and Recipients** | PRISM Updates<br>Plan Closing Memo (Part II. Automated Database Reconciliation D. Other PRISM Data Exceptions and Part IV Instructions to Ongoing Administrator A. Participant Issues) |
| **Control Issues** | Document Unresolvable Issues. |
| **Important Concepts** | Basic data, including participant name, SSN, sex, spouse SSN, DOB, DOH, DOD, DOTE, PV, BDL Date, status, benefit form, SDOB, ARD and benefit amount are required to compute the present value of all benefits, and hence PBGC's liability for the plan. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

## Click here for more information...

21.2 Action Steps: Correct Plan Closing Report Errors

**Close Plan**

## 21.2 Action Steps: 02/17/2004
## Correct Plan Closing Report Errors

1 Review the **Errors Only** Section of the Online Plan Closing Report to identify specifics for each error. (Errors are those with an edit number of 500 or less.)

2 Research the error, using PRISM, IPS and SCoRE to determine corrective action, or follow the corrective action identified on the Plan Closing Report.

3 Make corrections on PRISM for any errors. If data are not available, use the Plan Closing Completion Memo to describe attempts to locate data. Make sure the following fields are complete, when relevant: SSN; DOH; DOTE; PV; BDL Date; Participant Name; Participant Sex; Status; DOB; DOD; Actual Benefit Form; Spouse SSN; SDOB; and Actual Retirement Date ( ARD).

4 If the error cannot be directly corrected in PRISM, correct it using TP40. Change Customer Data , as appropriate.

5 After making all corrections, request a refresh run of the Online Plan Closing Report, as necessary.

6 Complete *Plan Completion Memo (plcomplme.doc)*, **Section II. Automated Database Reconciliation:**

- **Part D. Other PRISM Data Exceptions**. Reference the Plan Closing Report. List, with reasons, errors (other than those listed previously) that cannot be resolved.

7 Complete *Plan Completion Memo (plcomplme.doc)*, **Section IV. Instructions to Ongoing Administrator:**

- **Part A. Participant Issues**. From the online version of the Plan Closing Report, copy and paste into this section lists of customers by edit number, or print out a list by edit number from the Report and attach. Address participant issues, including: unlocated participants (edit 1910), unpaid lump sums (edit 1490) and their status (unlocatable, application not received, etc.), separated vested participants (edit 1496), and describe any special circumstances. List and discuss any pending appeals (edit 1851), including the issue under appeal. Also, list participants whose applications have been received, but who are not yet in pay status.

**Close Plan**

## 21.3 Check Participant BDL Status

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Ensure that all participants who can receive a BDL have been issued a BDL, and ensure that reasonable attempts to locate other participants, including participants that notified PBGC that they were woodworks, were made and documented. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] ] |
| **Required Input and Source** | Plan Closing Report<br>Participant files (on IPS) |
| **Output and Recipient** | Verification that all issuable BDL s have been issued.<br>PRISM **Online** - Customer application updated for all participants.<br>Plan Completion Memo (Part IV: Instructions to Ongoing Administrator A. Participant Issues and B. BDL Status) |
| **Control Issues** | All issuable BDLs are sent before the plan is closed. At least 90 days should elapse since all BDLs have been issued, before the plan is closed.<br>Document reasons why a BDL cannot be issued. |
| **Important Concepts** | The BDL date for Lump Sums recorded under the old Pay 3000 system may reflect the DOTR, or a mechanically produced date, e.g., 45 days before the lump sum payment date.<br>Note that some of the errors identified in this process may have previously been corrected in Process 21.2. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team ( PLS , PBA and FBA) |

## Click Here for More Information...

21.3 Action Steps: Check Participant BDL Status

**Close Plan**

## 21.3 Action Steps: 02/17/2004
## Check Participant BDL Status

1 Check that all issuable BDLs, have been issued, and that at least 90 days have elapsed since all BDLs were issued. One or two "stray" BDLs may be disregarded for the purposes of the 90-day constraint. If any BDLs have not yet been sent, send them using Process 19: Issue BDLs & Make Adjustments to Payments.

2 Refer to the **Edit Detail Section** of the Plan Closing Report:

**5-level edits (BDL):**

- Edit 50 flags participants, coded as locatable who have not been sent a BDL. The PRISM Locatable flag, not address, is used to determine locatability. Check to see whether the address has been updated in PRISM and Address Validity reset to "V" (valid). If so, the customer may now be locatable. If a customer gets edit 50, but is in fact unlocatable, re-set the PRISM Locatable flag to "N" (no) in PRISM Customer, and edit 50 (an error) will be replaced by edit 500 (a FYI).
- Edit 500 flags participants, coded as unlocatable who have not been sent a BDL. Verify that PBGC's attempt to locate the customer is properly documented in IPS. In cases where PRISM lists an apparently valid address, but the mail was returned, ensure that Address Validity is set to "R" (invalid address) and re-set the Locatable flag to "N" (no).
- Edit 520 flags customers who were sent a BDL in the past 90 days. Note: The plan cannot be closed until the appeal period (45 days) has expired for all of the BDLs.

3 After making all corrections, request a refresh run of the Online Plan Closing Report, as required.

4 Complete *Plan Completion Memo (plcomplme.doc)*, **Section IV. Instructions to Ongoing Administrator:**

- **Part A. Participant Issues**. Provide details of any pending BDL-related participant issues.
- **Part B. BDL Status**. List unissued BDLs (edits 50, 500) and the reasons they cannot be issued (unlocatable, etc.).

**Close Plan**

## 21.4 Prepare Plan History

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Provide case summary and background for the Ongoing Administrator to familiarize them with key aspects of the plan. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan file<br>Actuarial Case Report<br>Controlled Group Audit<br>Large Case Working Group memos (if applicable) |
| **Output and Recipients** | Plan Completion Memo (Section I: Plan History A. Plan and Corporate History, B. Plan Benefit Provision Highlights, C. PSA and D. 4022(c)) |
| **Control Issues** | N/A |
| **Important Concepts** | The Ongoing Administrator frequently gets calls from persons who may or may not be participants of a PBGC trusteed plan, and may not know the specific name of the plan. The Ongoing Administrator needs the information readily available to make a quick determination about plan participation.<br>**Timing**: This process can proceed after the initial Plan Closing Report is requested and continue in parallel with other validation processes until assembly of the Plan Completion Memo. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

## Click here for more information...

21.4 Action Steps: Prepare Plan History

**Close Plan**

## 21.4 Action Steps: Prepare Plan History

**02/17/2004**

1 Review (on IPS) relevant documents that may have information relevant to plan and corporate history, plan benefit provisions, PSA administration, and 4022(c) benefits. These documents may include, but not be limited to the following: Participant Data Audit, Plan Document Audit, Controlled Group / Net Worth Audit, PBGC Actuarial Case Memo, Large Case Working Group documents, SID documents, the TWG Memo and miscellaneous documents that may be found in the Plan File.

2 Prepare the *Plan Completion Memo (plcomplme.doc)*, **Section I: Plan History**. The required contents are described below and in the standard Plan Completion Memo template. For FBA plans, the draft should be written by the FBA, with assistance and review from the TPD Case Team at the time that the plan is ready to submit.

- **Part A. Plan and Corporate History**. Provide summary of plan and corporate structure, including whether it is a multiple employer plan, part of a family of plans and whether there were any mergers, spin-offs, and related employers that could help to determine whether a woodwork person might be a participant in a particular plan. Describe any predecessor plans, family or related plans, and offsets, if applicable.
- **Part B. Plan Benefit Provision Highlights**. Discuss whether or not the plan has amendments subject to the phase-in rule; purchased annuities; employee contributions; substantial owner(s); and participants affected by the Maximum Insurance Limitation. State whether or not it is a cash balance plan; if it is, identify the actuary that worked on the cash balance statements and explain which statements have been issued for prior years. Describe the plan's normal forms of benefit, normal retirement age and early retirement age. Include the status of any outstanding plan issues, such as appeals that may affect multiple participants, purchased annuities, etc. If these topics are covered in the Actuarial Case Report (ACR), refer to the ACR.
- **Part C. PSA.** Describe whether PBGC charged for PSA coverage, and when refunds for PSA charges were made to participants, if applicable. Discuss any PSA Administration in this case.
- **Part D. 4022(c).** Discuss whether 4022(c) benefits are payable in the plan, and if so, whether BDLs for 4022(c) benefits were issued as part of Title IV benefits, or as supplemental BDLs. Also state whether plan is a PPA plan.

**Close Plan**

## 21.5 Reconcile PRISM with CAS and Actuarial Database 02/17/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Ensure that every participant identified in the actuarial valuation is in PRISM, and present values of liabilities balance to CAS total liability. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Online Plan Closing Report<br>PRISM (problem research)<br>AS (problem research)<br>Actuarial Case Memo |
| **Output and Recipient** | PRISM (problem correction)<br>CAS (problem correction)<br>Plan Completion Memo (Section II: Automated Database Reconciliation A. Participant Count Reconciliation and B. CAS, PRISM, Actuarial Database – PV Comparison and Reconciliation) |
| **Control Issues** | A perfect reconciliation ensures that every participant included in the actuarial valuation has a PRISM record. It ensures that every record in PRISM belongs there and is properly documented.<br>Plan level liability and participant counts in PRISM balance with plan level data in CAS.<br>The report history audit trail shows each Plan Closing Report request, with error counts in each report version. |
| **Important Concepts** | Each record (or row) of the valuation database has room to store a participant and a spouse, if the spouse is known at the time of the valuation. The PRISM database is more current and can store any number of family members associated with each participant. For these reasons, the two databases very seldom have the same number of records. The important thing is to ensure that:<br>• Each participant in the valuation matches up with a family of records (participant, beneficiary, etc) in PRISM.<br>• All participants identified in the actuarial valuation, or later as a woodwork participant, are in PRISM.<br>• Any records in PRISM that do not match a participant in the valuation are properly documented as either a woodwork participant (someone not known at the time of the valuation) or the family member or representative of a participant.<br>PV lump sum payments are sometimes erroneously paid from the Other Lump Sum (L5) pay source. This may result in a critical IPVFB error. If this is the case, identify the payment(s) on the Plan Completion Memo. |

| | |
|---|---|
| | For non-ADT plans, see Guidance below.<br><br>Note that some of the errors identified in this process may have previously been corrected in Process 21.2. |
| **Guidance** | For non-ADT plans, no Plan Closing Report is available. Contact TSD/CSRB for direction. |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

## Click Here for More Information...

21.5 Action Steps: Reconcile PRISM with CAS and Actuarial Database

**Close Plan**

## 21.5 Action Steps: 02/17/2004

## Reconcile PRISM with CAS and Actuarial Database

Plan level liability from the valuation and participant counts in PRISM are compared with plan level data in CAS. Discrepancies are noted in the Plan Completion Memo. Participant level liability in PRISM is reconciled with the participant level liability in the Actuarial Database.

The Plan Closing Report performs the reconciliation among actuarial, PRISM and CAS, presenting error messages wherever there is an imbalance.

Always start with a refreshed report after error resolution activity. See Process 21.1 Request Online Plan Closing Report for instructions.

1 In the **All Edits** Section of the Plan Closing Report: Resolve as many errors as possible that might have an adverse effect on the participant count reconciliation. A list of everyone who has a particular edit can be obtained by looking at the **Edit Index** file. Note most of these errors will have already been resolved in Process 21.9 Correct Critical Errors.

- **1-level (SSN)**: Since participants are matched from the valuation to PRISM based on SSN, look for incorrect SSNs.
- **13-level (PV)**: Non-matches may indicate erroneous lump sum payments, changed SSN or a woodwork participant.
- **16-level (IPS)**: A missing IPS file might be another indication of an incorrect SSN.
- **17-level (Duplicate SSN):** Since a customer may have more than one PRISM record (legitimately or not), look for duplicate SSN edits. Take the appropriate action to merge data and delete any extra records from PRISM.
- **40-level (Reconciliation):** Edits 4930 and higher indicate PRISM records that do not match anyone in the valuation.
- **Missing family members**: Look for any edits that indicate a missing or unlinked family member (e.g. 82, 83, 88, 111, 112).
- **Other Edits** to be aware of are:

- **1930 SSN matches that of a deleted customer role.**
- **1010 This SSN is associated with more than one PBGC plan.**
- 1020 PRISM SSN change.

2 In Section 1: Case Summary "Participant Counts" Area:

- Verify that the total of the "Valuation Database" column matches the total number of participants in the Actuarial Valuation Report.
- Verify that the total of the "Valuation Database" column also matches the total of the "CAS Liab. Screen" column. It may be necessary to subtract any nonmembers listed in CAS first.
- Beneath the total of the "Valuation Database" column is the number "Matched to PRISM". This tells you how many of the participants in the valuation have been automatically matched up with a PRISM record. If all participants are matched to a single PRISM record, no further action is necessary. If there are non-matches, or situations where a participant has multiple PRISM records, refer to the **"Participant Count Reconciliation Summary and Detail"** for further details.

3 In the Case Summary "PV Totals" Section:

- Verify that the "Termination PV" from the "CAS Liab. Screen" column matches that of the "Valuation Database" column. If these numbers don't match, it usually means that the TPD did not archive the final valuation database. If this is the case, contact OASD for assistance in locating the correct final valuation database.
- Verify that the "Lump Sum Disc. PV" column from the "Valuation Database" matches that from "PRISM" column. If these numbers don't match, there will be corresponding 13-level edits that point to the discrepancies.

4 In the **Participant Count Reconciliation Summary** Section, look for any of the following discrepancies, utilizing the **Participant Count Reconciliation Detail** to investigate discrepancies, and explain in the Plan Completion Memo any that cannot be corrected:

- "Multiple PRISM Records" indicates that the participant's SSN in the valuation matches more than one PRISM record. Use PRISM Browser to verify that there is indeed more than one record. If any of the records are duplicates that should not be in PRISM, take the appropriate action to remove the extra record(s). See TP 40: Change Customer Data. Under some circumstances duplicate records will generate 17-level ("Duplicate SSN") edits, so also check **Edit Detail**.
- "Not in PRISM" indicates that the participant's SSN in the valuation does not match anyone in PRISM. This usually means that the SSN in PRISM is different than in the valuation, but it is also possible that the participant was never loaded into PRISM. Use PRISM Browser to search PRISM for that customer's name. If participants were loaded into the wrong plan, request that they be moved to the proper plan, using TP 40 Change Customer Data.
- "In PRISM" indicates participants in PRISM who were not in the actuarial database.

5 For non-vested and non-member participants, ensure that the IPS plan or participant file contains source documents with the DOH and DOTE. (These are necessary for BDL accuracy.)

6 After making all corrections, request a refresh run of the Online Plan Closing Report.

7 Prepare the *Plan Completion Memo (plcomplme.doc)*-**Section II: Automated Database Reconciliation**.

- **Part A. Participant Count Reconciliation.** Reference the Participant Count Reconciliation section of the Plan Closing Report. Research and resolve situations where the report has a PRISM record that is not associated with someone in the valuation, or when there is more than one PRISM record for a participant.
- **Part B. CAS, PRISM, Actuarial Database – PV Comparison and Reconciliation**. Reference the Case Summary Section of the Plan Closing Report, which lists any PV discrepancies (13-level). If any PV discrepancies on the report cannot be resolved, list them here. List each discrepancy and provide an explanation, or use a table.

Close Plan

# 21.6 Check Completeness of Participant Files/Records on IPS, PRISM, SCoRE and CCN

02/17/2004

Action Steps

| | |
|---|---|
| **Purpose** | Ensure that all participants are recorded on both IPS and PRISM, and that each beneficiary is cross- referenced. Ensure that participant files (IPS) are complete, to facilitate benefit administration by the Ongoing Administrator. Ensure that open SCoRE and CCN items are closed. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Online Plan Closing Report<br>Participant files on IPS<br>IPS Cross-Reference Sheet<br>SCoRE Correspondence Report<br>CCN Report<br>Compliance Review Overdue Report from MCU<br>PRISM Genesis database |
| **Output and Recipient** | Plan Completion Memo (Section III. Participant and Plan File Review A. Participant Files, Section II. Automated Database Reconciliation C.IPS vs. PRISM Reconciliation and Section IV. Instructions to Ongoing Administrator A. Participant Issues)<br>Complete and consistent participant information is recorded correctly on PRISM and IPS. Matching fully cross-referenced databases. |
| **Control Issues** | Linking of beneficiaries to participants in PRISM automatically links the related IPS files, ensuring that the relationship information is available for future administration.<br>Ensure that there are no outstanding IPS document problems for the plan on the cumulative Compliance Review Overdue Report. |
| **Important Concepts** | The Case Team checks participant records on IPS. If beneficiaries and alternate payees are not linked in PRISM, the links must be added. This will automatically cross-reference them on IPS to participant files so the Ongoing Administrator can readily access the other records in case of questions about a participant's benefit.<br>Correct all missing IPS document errors on the Plan Closing Report. Note that some of the errors identified in this process may have previously been corrected in Process 21.2.<br>Certain participant files are not on IPS. If the Case Team is not aware of these, contact the PICS Coordinator to ascertain whether any plan participants are in PICS. See TP 27: Run Personal Interest Conflict System (PICS) |

| | |
|---|---|
| **Guidance** | PBGC Operating Policy Manual 6.4-1 |
| | IOD Policy Bulletin 97-7 |
| | Intranet\IOD Manuals\Reindex.htm |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

21.6 Action Steps: Check Completeness of Participant Files/Records on IPS, PRISM, SCORE and CCN

**Close Plan**

## 21.6 Action Steps: 02/17/2004

## Check Completeness of Participant Files/Records on IPS, PRISM, SCoRE and CCN

1 Refer to the **Edit Detail** Section of the Plan Closing Report and make corrections, as applicable:

- 19-level edits (SCoRE)
- Edits 1900 and 1902 flag customers who have an open SCORE item. Take appropriate action and close the item.
- 16-level edits (IPS): Create an IPS file for any customers listed on the report who do not have a file (edits 160, 161). Note that edit 1610 provides a summary of all IPS documents for each customer.
- 8-level edits (Joint Benefit Form): Customers who have a joint benefit form (e.g. J&S) must have their beneficiary in PRISM.
- 14-level edits (Pay Source): Customers who are still in estimated pay status are flagged. If an appeal is open, then this comes up as an FYI (edit 1480) instead of an error (edit 148)

2 For participant files check for the following, noting important observations in the Plan Completion Memo, under Section **IV. Instructions for Ongoing Administrator A. Participant Issues**.

a. **Check that Social Security number is correct.** Each participant should have a unique SSN: no more than one on both IPS and PRISM.

b. **Check that there is proper participant, beneficiary and alternate payee documentation in the file** (See TP 16.3 Maintain Participant Files)**, as applicable** (See Appendix J: Participant Forms Information). Correct all missing IPS document errors on the Plan Closing Report and ensure that there are no outstanding IPS document problems for the plan on the MCU cumulative Compliance Review Overdue Report:

i BDL

ii Benefit Statement

iii Application for Benefits/General Information Form/Payee Information Form

iv Proof of age (non-retirees only)

v Marriage certificate, for participants receiving a Joint and Survivor (J&S) Annuity

vi Spouse proof of age, for participants receiving a J&S annuity

vii Death certificate, for participant whose beneficiary is receiving benefits.

viii DOH and DOTE for non vested/non member (needed for BDLs)

c. **Check the implementation of the BDL.** Check the consistency of the Participant Application, Participant Information Form (if applicable) and PRISM with the BDL and benefit statement.

d. **Check for participant's name on the SCORE Correspondence Report**. Appeals are coded as type "AP", and referrals to IOD from PEAD as type "RFA". Check that any appeal decisions were implemented

e. **Check that underpayment situations were corrected.** Check that participant was

reimbursed for back payments, with appropriate interest, see Process 19.3: Determine Net Overpayment/Underpayment Status for Annuities and Process 19.4: Determine Overpayment/Underpayment for Lump-sums. (Refer to IOD Policy Bulletin 97-7 for guidance about payment of interest.)

f. **Check that overpayment situations were addressed and determinations implemented.** Check that recoupment/recovery determinations have been made and implemented. (As appropriate, see TP 06: Recover Overpayment and/or TP 07: Recoup Overpayment and PBGC Operating Policy, Chapter 6.4-1.)

g. **Check that** employee contributions **were returned, if elected by the participant or spouse.** If employee contributions were returned, verify that the monthly benefit amount was reduced. If return of employee contributions was not elected, verify that monthly benefit amount is unreduced.

h. **Check that any existing** pre-termination liabilities **were paid, with appropriate interest, if applicable.**

i. **Check that interest was paid on lump-sum benefits, backpayments and reimbursements (e.g., for** PSA **charges).** (Refer to IOD Policy Bulletin 97-7 for guidance about payment of interest.)

j. **Check that all retirees and deferred vested participants are in final pay status.** Deferred vested participants should be set up as future payees.

k. **Check that** beneficiary/alternate payee **s are linked in PRISM to associated participant** . The Plan Closing Report lists all beneficiaries and alternate payees. If the beneficiary or alternate payee is not linked in PRISM, use PRISM Customer to add a relationship.

l. **Document any ongoing activity related to processing of QDROs.** (edits 80 and 83)

m. **Check that all participant documents have been properly indexed. The IPS Reindexing Tool can be used to reindex participant documents.**

n. If not already known, contact the PICS Coordinator to ascertain whether any plan participants are in PICS. Confirm that no IPS files were created for PICS participants.

3 Check the CCN Report for open items relating to the plan. Take appropriate action and close the CCN item.

4 After making all corrections, request a refresh run of the Online Plan Closing Report, if required. Allow a few days for any new cross-references to be imaged.

5 Complete *Plan Completion Memo (plcomplme.doc)*, **Section III. Participant and Plan File Review:**

- **Part A. Participant Files**. Provide the date that the last BDL was sent for the subject case. Indicate whether all participants have been placed in proper pay status, have received accurate benefit information in their BDL and are being paid the correct amount. Explain any inconsistencies in this section. Note whether any lump sums remain to be paid. If so, list them in this section, with a brief description of their status (unlocatable, no application received, etc.).

6 Complete Plan Completion Memo, Section II. Automated Database Reconciliation:

- **Part C. IPS and PRISM Reconciliation**. Reference the Plan Closing Report, specifically any 16-level (IPS) edits. If any discrepancies on the report cannot be resolved, list and provide an explanation for each discrepancy.

7 Complete *Plan Completion Memo (plcomplme.doc)*, Section IV. Instructions to Ongoing Administrator:

-

- **Part A. Participant Issues**. Provide details of any open participant issues from CCN and SCoRE (edits 190 and 1902). Identify any participants that are in PICS.

Case Closure Processes

**Close Plan**

## 21.7 Check Completeness of Plan File on IPS

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Ensure that plan-level documentation is complete |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | IPS Plan file<br>Actuarial Case Report from IPS or TPD Actuary |
| **Output and Recipients** | Plan Completion Memo (Part III. Participant and Plan File B. Plan File)<br>An organized, complete, documented, and imaged IPS plan file |
| **Control Issues** | Document efforts made to locate missing items. |
| **Important Concepts** | Each section of the IPS plan file must be indexed correctly. Any mis-indexing should be corrected at this time. Plan files should also cross-reference related plans.<br>Note that some of the errors identified in this process may have previously been corrected in Process 21.2.<br>The plan file is used by the Ongoing Administrator, who needs accurate and easily accessible information in order to process separated vested and woodwork participants. |
| **Guidance** | IPS Indexing Specifications for PBGC Plan File Documents (available in hard copy and as electronic manual in IOD Manuals System.)<br>IPS Reindexing Instructions on Intranet<br>TP16.2 Maintain Plan File |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team (PLS, PBA and FBA) |

## Click Here for More Information...

21.7 Action Steps: Check Completeness of Plan File on IPS

**Close Plan**

## 21.7 Action Steps: 02/17/2004
## Check Completeness of Plan File on IPS

1 Open the plan file in IPS. Spot check the IPS file to make sure all sections are properly imaged and indexed. If the IPS file is illegible, improperly ordered, or incomplete, make corrections using the *IPS Plan and Participant File Correction Form (Ips-chg.doc)*. The IPS Reindexing Tool can be used to reindex plan documents or for sub-indexing of plan file documents. The critical sections to check in full are:

- Section 5 Pension Plan Documents (Plan Amendments and Restatements, Original Plan Documents and Union Contracts and Amendments)
- Section 9 Correspondence
- Section 11 Audit Documents,
- Section 12 Actuarial Case Closeout Report
- Section 13 SID Documents.
- Organize all items in accordance with Technical Procedure 16.2 Maintain Plan File. Verify that audit documents are in IPS, as appropriate:
- Plan Asset Audit
- Participant Data Audit
- Plan Document Audit
- Source Document Audit
- Net Worth
- Transfer Control Sheet
- Control Group and Support Documentation.

  Verify that Participant Data Audit Report contains a list of participants eligible for early BDLs. FBAs should ensure that any additions to plan files that have not been imaged are forwarded to the TPD responsible for the plan being closed. (Note: TPDs are responsible for this step of the process for plan files, even if the plan is being closed by an FBA.)

2 As appropriate, check Rettig (SID) files for additional documents, and image them in the appropriate section. Check SCoRE for Appeals Board memos for cases that have pending appeals. (Additional documents may be discovered in the appeals process. Also, appeals may have plan-wide implications).

3 Ensure that the Actuarial Case Report has been imaged to the appropriate sections of the IPS plan file.

4 To safeguard the integrity of the imaged file, shred or discard extra copies of plan documents to ensure that duplicate images are not accidentally sent to the DMC for imaging.

5 Complete *Plan Completion Memo (plcomplme.doc)*, **Section III. Participant and Plan File Review:**

- **Part B. Plan File**. List and explain any missing or incomplete sections of the plan file, and whether the Actuarial Case Report (bluebook) is available on IPS. If not, ensure that the Actuarial Case Report is properly scanned into IPS prior to submission of the case to TSD.

**Close Plan**

## 21.8 Run IPVFB Critical Pay Source Errors Detail Report 02/17/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Run IPVFB Critical Pay Source Errors Detail Report. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)]] |
| **Required Input and Source** | IPVFB Error Detail (Pay Source Errors) Report Request |
| **Output and Recipients** | IPVFB Error Detail (Pay Source Errors) (#IPVV505A)<br>IPVFB Error Summary (Sort on Source, Assigned Division & Case) (#IPVV515A) |
| **Control Issues** | Plans must meet IPVFB basic tests before they can be accepted as IPVFB-ready. |
| **Important Concepts** | ASD applies three basic tests to determine whether a plan is IPVFB-ready:<br>• Accuracy: Less than 5 percent of the payment streams contain critical errors.<br>• Completeness: The ratio of the aggregate PRISM DOPT PVs vs. the total CAS DOPT PV is 95 percent or greater.<br>• Currency: Participants with a status code of "A" (eligibility unknown) represent less than 100 participants and less than 5 percent of the total number of participants on the plan.<br>The IPVFB System categorizes errors as critical or non-critical. An error is considered critical if the value of the data element in error has a major impact on the liability associated with the benefit record.<br>The IPVFB System is updated from Genesis each weekend. Corrections made to critical errors will not show up until the report is run the next week.<br>One POC Per TPD and FBA has Access to Run the IPVFB Critical Error Reporting Application and to Access the User Manual and Technical Reference Guide |

21.8 Action Steps: Run IPVFB Critical Pay Source Errors Detail Report

**Close Plan**

## 21.8 Action Steps: 02/17/2004

## Run IPVFB Critical Pay Source Errors Detail Report

**Note:** The one POC per TPD or FBA with access to the IPVFB Critical Error Reporting Application will perform Steps 1 through 5, at the request of the PLS, PBA or FBA.

There are three crucial differences between this Report and the Plan Closing Report:

The Plan Closing Report:

- Reports the last Pay Source, regardless of authorization (Case Code errors).
- Does not edit end dates for life annuity forms (Annuity Form errors).
- Allows the last pay source to be estimated when the customer has a pending appeal (Case Code errors).

The IPVFB Critical Pay Source Errors Detail Report:

- Only reports the last authorized pay source (Case Code errors).
- Requires that end dates for life annuity forms be 12/01/2099 (Annuity Form errors).
- Does not check for a pending appeal when the last pay source is estimated (Case Code errors).

The Plan Closing Report has recently been modified to incorporate another edit that was unique to the IPVFB Critical Pay Source Errors Detail Report:

- Deferred vested customers past age 70 (Deferred Vested errors).

1 Logon to the **IPVFB PROD** application.

2 Select **Error Rpt** command button from the IPVFB main menu. Then select **Critical Error Reports**. Select a case, or cases, using the drop down list, a range of case numbers, the case name, or the assigned division. Enter **Query** and wait for the system to finish processing records. The application will select the requested case(s) from a Genesis extract that is refreshed each weekend.

3 Select the **IPVV505A Error Detail (** Pay Source **Errors)** report radio button and designate a printer for output.

4 Select the **IPVV515A Error Summary (Sort on Source, Exam, Case)** report radio button and designate a printer for output.

5 Continue processing using process 21.9 Correct Critical Errors.

**Overview of IPV Error Summary Report: IPVV515A**

This report shows the number and type of data errors for each plan selected. This report is sorted on Source ID, Exam and Case number.The following data items are on the report:

- **Date of Birth:** Number of errors involving dates of birth in the plan
- **Status:** Number of errors involving status in the plan
- Benefit **Amount:** Number of errors involving benefit amount in the plan

- **Benefit Form:** Number of errors involving benefit form in the plan
- **Start/End Date:** Number of errors involving start or end dates in the plan
- **Other Date:** Number of errors involving other dates in the plan
- **Total Critical Errors:** Number of critical errors in the plan
- **Total Payment Streams:** Number of 'payment streams' in the plan
- **Payment Streams in Error:** Number of payment streams in error in the plan
- **Percent w/Critical Error:** Ratio of the number of payment streams in error to the total number of payment streams
- **Incmplt Act in Est Data:** Number of records in the plan which had incomplete data to perform an "active in estimated" calculation.
- **Non-Critical Errors:** Number of non-critical errors in the plan

**Overview of IPV Error Detail Report - Pay Source Errors – Report: IPVV505A**

This report is used for correcting critical errors in a participant's PRISM data records. For each case selected for reporting, one page per participant is generated. For each item that may be in error, that particular item is surrounded by either parentheses (Critical Error) or braces (non-critical error). If a participant's record has no errors, no report is generated for that participant. The Report does not provide error messages. For details on error conditions, see the IPVFB Technical Reference Guide, Sections 4.3.4 through 4.3.6. If you have any questions regarding the Report, please contact the Supervisory Valuation Actuary in ASD. The IPVFB Error Detail (Pay Source Errors) Report contains the following data items:

- **Case Nbr:** Case number
- **Case Name:** Case name
- **Assigned Division:** TPD assigned to case
- **Participant Name:** Last name, first name
- **DOPT:** Date of Plan Termination
- **Valuation Date:** Date of the data on which this report is based
- **Name:** Participant name
- **SSN:** Participant social security number
- **DOPT PV:** Present value of PBGC guaranteed benefits as of DOPT
- **Gender:** Participant gender
- **Status:** Participant status code
- **Retire Type:** Retirement (Health) Type
- **Payee Type:** Recipient Type
- **DOB:** Participant's date of birth
- **Spouse DOB:** Spouse's date of birth
- **Pay Frequency:** Frequency and month that payments are made
- **ARD:** Actual retirement date
- **Actual Form**: Actual benefit form
- **XRD:** Expected retirement date
-

- **Expected Form:** Expected benefit form
- **JSJC:** For joint & survivor or joint & contingent, the percentage of the participant's benefit payable to the survivor
- **Val Amt:** Valuation amount of PBGC guaranteed benefit
- **Pay Source Number:** One of eight pay sources for lump sum benefits in the participant record.
- **Pay Source Start Date:** Date payment of benefits begins.
- **Pay Source End Date:** Last date for payment of benefits.
- **Pay Source Amount:** Amount of benefit.
- **Is Pay Source Authorized?:** Pay source authorization status.

Details on critical error conditions are available in the IPVFB Technical Reference Guide, Seriatim Valuation Specifications, Exhibits 4-18 and 4-20.

**Close Plan**

## 21.9 Correct Critical Errors

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Correct Critical Errors on the IPVFB Error Detail (Pay Source Errors) Report. Provide a clean case for the Ongoing Administrator. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | IPVFB Error Detail (Pay Source Errors) Report (IPV505A) IPVFB Error Summary Report (IPV515A) |
| **Output and Recipients** | PRISM Updates<br>Plan Closing Memo (Part II. Automated Database Reconciliation D. Other PRISM Data Exceptions and Part IV. Instructions to Ongoing Administrator A. Participant Issues) |
| **Control Issues** | Basic data is required to compute Present Value of all benefits and liability of PBGC on an ongoing basis (IPVFB). ASD applies three basic tests to determine whether a plan is IPVFB-ready:<br>• Accuracy: Less than 5 percent of the payment streams contain critical errors.<br>• Completeness: The ratio of the aggregate PRISM DOPT PVs vs. the total CAS DOPT PV is 95 percent or greater.<br>• Currency: Participants with a status code of "A" (eligibility unknown) represent less than 100 participants and less than 5 percent of the total number of participants on the plan.<br>TSD's goal on the IPVFB Error Detail Report is an error rate of 0%, unless the errors are explained. |
| **Important Concepts** | Basic data, including participant name, SSN, sex, DOB, DOD, status, benefit form, SDOB, ARD, and benefit amount, are required to compute the present value of all benefits, and hence PBGC's liability for the plan.<br>Critical Errors on the IPVFB Error Report are in Brackets ().<br>The IPVFB Data Extract from Genesis (PRISM) is refreshed every weekend. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team ( PLS, PBA and FBA) |

21.9 Action Steps: Correct Critical Errors

**Close Plan**

## 21.9 Action Steps: Correct Critical Errors

**02/17/2004**

1 Review the IPVFB Error Detail Report (Pay Source Errors) to identify specifics for each **critical** error. Repeat Steps 2 through 3 for each error on the report.

2 Research the error, using PRISM, IPS and SCoRE to determine corrective action.

**Case Code Errors:**

If a customer's guaranteed pay source was not entered or was never authorized, IPVFB records a Case Code error. The plan is final, but the last authorized pay source is estimated. The absence of authorization cannot be seen on PRISM reports.

- If the last pay source in PRISM is estimated, check IPS for a pending appeal:
  - If there is a pending appeal, annotate the Plan Closing Memo.
  - If there is no pending appeal, add and authorize a guaranteed pay source.
- If the last pay source is guaranteed, have it authorized.

**Annuity Form Errors:**

If a customer with a J&S Annuity has a pay source end date of 12/31/2099, IPVFB records an actual form error, because the default end date is 12/01/2099.

- If the annuity form is blank on the Report, load the correct form in PRISM.
- If the annuity form is not blank on the Report, find the last pay source in PRISM:
  - If the end date is 12/01/2099, have the pay source authorized.
  - If the end date is not 12/01/2099, correct it and have the pay source authorized.

**Deferred Vested Errors:**

Both Reports list an error for deferred vested customers, past age 70, with a valid address. The IPVFB Error Detail Report shows this as a Status Code error, by displaying the Status Code 3 in parentheses. **(This is the most frequent IPVFB critical error**):

- This type of error requires a review of the Correspondence in the Image Processing System (IPS):
  - If the BDL was returned, or PBGC received no reply, then the most appropriate course of action is to change their Address Validity Code to "R" (Returned) or "I" (Invalid), which will initiate locator action (See TP.33 Locate Customer Address).
  - If the Customer applied a benefit, but received no response from PBGC, then the case should be returned to the TPD for further processing.
  - If the customer is locatable, but declines to apply for a pension, annotate this on the Plan Completion Memo, **Section IV. Instructions to Ongoing Administrator.**
  - **Participant Issues.** List the participant and explain that he is deferred vested and unwilling to apply for a pension after age 70

3 Correct the error in PRISM. If the error cannot be directly corrected in PRISM, correct it using

TP40. Change Customer Data, as appropriate. TSD's goal is an error rate of 0%.

4 After making all corrections, request a new run of the IPVFB Error Detail Report ( Pay Source Errors). The IPVFB Error Detail Report should not be rerun until after the weekend, to obtain refreshed Genesis data.

5 Complete *Plan Completion Memo (plcomplme.doc)*, **Section II. Automated Database Reconciliations**:

- **Part D. Other PRISM Data Exceptions**. Reference the IPVFB Error Detail Report. List and explain errors (other than those listed previously) that cannot be resolved.

6 Complete *Plan Completion Memo (plcomplme.doc)*, Section IV. Instructions to Ongoing Administrator:

- **Part A. Participant Issues**. List and explain critical errors (other than those listed previously) that cannot be resolved. Explain any follow-up actions required by the Ongoing Administrator.

**Close Plan**

## 21.10 Request Printed Plan Closing Report

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Optionally, request a printed version of the Plan Closing Report as an attachment to the Plan Closing Memo. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan Closing Report Request to OASD |
| **Output and Recipients** | Printed Plan Closing Report |
| **Control Issues** | N/A |
| **Important Concepts** | TPD Reviewer, optionally, may want hard copy of complete information for review.<br>Initiator may use hard copy in lieu of pasting long lists of participants into Plan Completion Memo. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team ( PLS, PBA and FBA) |

21.10 Action Steps: Request Printed Plan Closing Report

**Close Plan**

## 21.10 Action Steps: 02/17/2004
## Request Printed Plan Closing Report

Printed Plan Closing Reports are **not required**, unless printed lists of participants are used as attachments to the Plan Completion Memo instead of pasted lists. Optionally, after all of the data is cleaned up and the plan is ready to be submitted for review, TPD Reviewers may require inclusion of the printed version of the report as an attachment to the Plan Completion Memo for use in the review.

1 See Process 21.1 Request Online Plan Closing Report for instructions on requesting the Plan Closing Report. Note in the email that the request is for a printed version. OASD will send a printed version of the report in the regular mail.

**Overview of the Printed Version of the Plan Closing Report**

- **Section 1: Case Summary** shows the team members, key dates, participant counts and PVs and summarizes the major types of errors present. This gives a quick, at a glance, summary of how much work is going to be involved to close the plan. The following data items appear on the Report:
  - **Participant Counts:** Number of participants in each DOPT group.
  - **CAS PDA Screen:** CAS Participant Data Audit screen
  - **CAS Liab. Screen:** CAS Liability Screen
  - **Valuation Database:** Valuation database
  - **PRISM:** PRISM Genesis database
  - **Misc Comments:** Miscellaneous comments on participant counts
  - **PV Totals:** Aggregate present value at each stage
  - **# Errors:** Number of errors in present value
  - **Termination PV:** Termination present value
  - **Lump Sum Disc PV:** Lump sum discriminator present value
  - **BDLs:** Number of errors in BDLs
  - **IPS Files:** Number of errors in IPS files
  - **Other:** Number of errors in other categories
  - **Error Rate:** Total error count, percentage of participants with errors, percentage of customers with errors

- **Section 2: Data Exceptions** shows all the types of edits that apply to the PRISM records for this case. Part A summarizes the edits, providing the total number of >hits= for each edit. Part B shows the details for each PRISM record. Data >edits= are not necessarily errors; those numbered less than 500 indicate error conditions, and the others are FYIs. The following data columns appear on the Report:
  - **Typ:** Customer

- **Stat:** Payee status
- **Sex:** Customer's sex
- **BDL:** Benefit Determination Letter date (error number)
- **DOB:** Customer's date of birth
- **DOD:** Customer's date of death
- **ARD:** Actual retirement date
- **Act Ben Form:** Actual benefit form
- **Val Ben Form:** Valuation benefit form
- **Lump Sum Disc PV:** Lump sum discriminator present value
- **Term PV:** Termination present value
- **Edits:** List of error numbers
- **(error number):** Error numbers group errors into categories and severity levels
- **(error message, contents, action):** Description of error, contents of erroneous fields)

- **Section 3: Participant Count Reconciliation** shows how the plan population has changed since the DOPT valuation was completed. Part A summarizes how the DOPT groups have changed, and Part B shows the details for each participant. The data fields displayed on the Report are as follows:
  - **SSN:** Participant social security number
  - **Participant Name:** Participant name
  - **SSSN:** Spouse social security number
  - **Spouse Name:** Spouse name
  - **Lump Sum Disc:** Lump sum discriminator present value
  - **Termination PV:** Termination present value
  - **Valuation Group:** DOPT valuation group
  - **Retstat:** Retiree status
  - **ID:** Family member number

**Close Plan**

## 21.11 Assemble and Submit Plan Completion Memo 02/17/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Assemble all necessary documents and reports to provide materials for review and for Ongoing Administration. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Plan and the participant files<br>Plan Closing Report |
| **Output and Recipients** | Participant File Inventory Report is provided for the Ongoing Administration.<br>Plan Completion Memo (Parts V Actuarial Information and VI Plan Closing Package Attachments) provided to TSD/CSRB.<br>Plan Completion Checklist |
| **Control Issues** | Plan Closing Memo must be dated at time of transfer & contain original signatures.<br>Plan Closing Checklist reviewer must be an Associate, Team Leader or Division Manager.<br>Task referral date in CAS must be the same as the transfer date to TSD.<br>The Reviewer signature on the Plan Completion Checklist is a certification that the review was completed.<br>The signatures on the Plan Completion Memo by its initiators are certifications that the plan closing was completed in accordance with procedures. |
| **Important Concepts** | TSD/CSRB needs complete information for review and referral to Ongoing Administration |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team ( PLS, PBA and FBA)<br>TPD Manager |

## Click Here for More Information...

21.11 Action Steps: Assemble and Submit Plan Completion Memo

**Close Plan**

## 21.11 Action Steps: 02/17/2004
## Assemble and Submit Plan Completion Memo

### TPD or FBA Case Team

1 Complete the checklist (**Section V: Actuarial Information**) of the *Plan Completion Memo (plcomplme.doc)*. This section may be prepared by, or with the assistance of the case actuary. If a section does not apply, or if an explanation is given elsewhere, note that fact (or "N/A") under the appropriate section of memo.

2 Assemble *Plan Completion Memo (plcomplme.doc)*, Sections should be in the standard order provided by the base Memo.

Do not unnecessarily retype information into the memo that is already included in the Plan Closing Report! When you reference it, be sure to include the section and page number of the report.

Remember that the online version of the Plan Closing report e-mailed to you includes the **Edit Index**. This can be used to paste a list of customers with a particular edit to the Plan Closing Memo, using Edit | Paste Special and Unformatted Text

For FBA Plan Closing, the FBA team drafts the Plan Completion Memo and all attachments, and submits the package to the TPD Manager for sign off and concurrence. TSD requires original signatures of all team members.

3 Assemble mandatory and optional attachments, per **Section VI Plan Closing Package Attachments** of the *Plan Completion Memo (plcomplme.doc)*. Identify the attachments.

4 Prepare the *TPD/FBA Case Team - Plan Completion Checklist (TPDFBACL.doc)* to summarize reports utilized and actions taken in the Plan Closing Process. The checklist is required to be submitted to TSD/CSRB with the Plan Completion Memo, but may be required within a TPD or FBA, to assist in supervisory or peer review of a plan closing. TSD/CSRB requires that a reviewer sign off on the checklist.

### TPD Manager

5 Send CAS Task Referral for Plan Administration Milestone to TSD/CSRB. Ensure that all milestones have been completed prior to submitting the case to TSD/CSRB for Plan Closing. The CAS task referral date should agree with the date the Plan Closing package was sent to TSD/CSRB.

- If the PFI report prepared and submitted with the Plan Completion Memo is a paper report, annotate a second paper copy of the PFI throughout the review process for benefit administration issues that occur after the Plan Completion Memo has been prepared.
- If the PFI report is prepared and saved as an electronic file (with file/pathname disclosed in Plan Completion Memo) annotate the electronic file throughout the review process for benefit administration issues that occur after the Plan Completion Memo has been prepared.

6 Approximately two weeks before the transfer date, review the PFI comments section and wrap up outstanding issues.

7 Finish any updates or annotations on the PFI Report.

**Close Plan**

## 21.12 Wrap Up Plan Administration

**02/17/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | Continuity of benefits administration to participants as benefit administration moves from the TPD or FBA to an Ongoing Administrator. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | PFI Report |
| **Output and Recipients** | Customer service to plan participants.<br>Comments on PFI. |
| **Control Issues** | CAS and CCN route customer calls to the TPD or FBA until the Ongoing Assumption date (benefit administration responsibility moved to Ongoing Administration. |
| **Important Concepts** | Benefits Administration remains with the TPD or FBA until Ongoing Assumption Date. Careful effort should be made to ensure successful and smooth transition of benefits administration. Careful attention to the details throughout the Case Closure Processes, particularly around the Ongoing Assumption date, improves seamless customer service. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team and/or FBA Case Team ( PLS, PBA and FBA)<br>TPD Manager |

21.12 Action Steps: Wrap Up Plan Administration

**Close Plan**

## 21.12 Action Steps: Wrap Up Plan Administration

**02/17/2004**

**TPD or FBA Case Team**

1 Continue to perform benefits administration until approximately two weeks before date of transfer to Ongoing Administration. This date is assigned by TSD after successful plan closing review, and appears on CAS Plan Administration Milestone.

2 Record pending administration issues on the spreadsheet copy of the Participant File Inventory (PFI) during review process. The PFI Report identifies the IPS Participant File image count for each customer in a plan. The PFI Report may be prepared as a paper report or exported into an Excel file, and saved in its electronic form. (See Process 21.7: Reconcile Participant Files/Records on IPS and PRISM). The Plan Completion Memo will disclose the format of the PFI (paper or electronic file).

## 21.13 Forms, Letters, Memos, etc.

03/25/2004

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

## PR 22. Review Closed Plan

09/04/98

22. Overview

22. Workflow

22.1 Administrative Check

22.2 Review Closed Plan

22.3 Assign Ongoing Administrator and Determine Transfer Date

Forms, Letters, Memos, etc.

**Review Closed Plan**

## 22. Overview

**02/17/2004**

As a final quality control check, TSD/CSRB (a group independent of the TPD or FBA) uses statistical sampling to gain a confidence level that plan processing is complete, that the electronic files accurately and completely capture the plan, and that all relevant documents are available through the Image Processing System (IPS). This "quality review" group is responsible for ensuring that the case is ready to be forwarded to an Ongoing Administrator. The results of the review are documented on a Quality Review Check Sheet.

The TPD or FBA continues to administer the plan during the review process.

22.1 Action Steps: Administrative Check

**Review Closed Plan**

## 22.1 Action Steps: Administrative Check

**02/17/2004**

**TSD Manager**

1 Receive the CAS task referral for Plan Administration milestone and Plan Completion Memo, with attachments. Verify that all milestones have been completed and that task referral date agrees with the date sent to TSD/CSRB.

**TSD/CSRB**

2 Review the Plan Completion Memo to verify completeness and see that all required items have been forwarded. Any one of the following items indicates that the submission is incomplete:

- Error rate on the IPV Error Summary Report exceeds 5%
- CAS task referral missing
- CAS milestone not completed
- Plan Completion Memorandum missing or incomplete
- Plan Completion Checklist missing or incomplete

3 If submission is incomplete, contact the TPD for the missing item(s), or return to the TPD with a list of missing items (e.g., reports) and return CAS task referral for Plan Administration Milestone with "Incomplete Submission" marked and missing documents listed in the Comments section of CAS.

4 Upon receipt of a complete Plan Completion Memo, initiate the review process.

## 22.2 Review Closed Plan

02/17/2004

Action Steps

| | |
|---|---|
| **Purpose** | Review that the Plan Completion Memo is complete so that all necessary information is available to Ongoing Administration. |

| **Procedure Owner** | TSD/CSRB |

## Click Here for More Information...

22.2 Action Steps: Review Closed Plan

## 22.2 Action Steps: Review Closed Plan

02/17/2004

1 **Read Plan Completion Memo.** All sections should be in standard order (History, Automated Database Reconciliation, Participant and Plan File Review, Instructions to Ongoing Administrator, and Actuarial Information).

2 **Request the Plan Closing Report.** Request the latest Online Plan Closing Report from the archive. The audit review should be performed on the Case Summary, Data Exceptions and Participant Count Reconciliation sections.

3 **Use the *Quality Review Checksheet (qurecksh.doc)* to document any findings that the Quality Assurance Specialist may list during the review process**. The PFI is used to list the participant sample, Complete/Incomplete, Significant/Insignificant and Comments on any errors found.

4 **Check the Data Exceptions Section of the Plan Closing Report.** This Report should contain zero errors, or documentation of why there are outstanding errors in the Plan Completion Memo.

5 **Check whether the plan level PV as stated in CAS is equal to the plan level PV in the actuarial valuation/spreadsheet, with any discrepancies noted in the Plan Completion Memo.** Check that the participant PVs in the actuarial valuation/spreadsheet have been reconciled with the participant PVs in PRISM. (See Process 21.5: Reconcile PRISM with CAS and Actuarial Database.)

6 **Run the IPVFB Critical Pay Source Errors Detail Report.** Check/verify that all critical errors have been addressed in the Plan Completion Memo, so that the case can be promoted through ASD, at the appropriate time.

7 **Review plan file for completeness.** Check the imaged plan file. The critical sections to check in full are: Section 5 Pension Plan Documents, Section 11 Audit Documents, Section 12 Actuarial Valuation Closeout Report and Section 13 SID Documents. Ensure that there are no missing or incomplete sections.

8 **Verify that Actuarial Case Report package is completely and properly imaged.** Ensure that the plan factors are included.

9 **Review the BDL status.** Check that at least 90 days has elapsed since the BDLs were issued. Edit 520 flags customers who were sent a BDL in the past 90 days.

10 **Verify the total population participant count in PRISM in comparison to the Actuarial Closeout Report.**

11 Run **Participant File Inventory (PFI) Report** (accessed through the Plan Closing Reports icon). Data can be exported into an Excel spreadsheet and sorted in any order. The PFI Report shows:

- Participant Name
- SSN
- Type of Participant
- Status
- Image Date
- Image Count

- Comment (blank column for entry of comments)

The Comment field in the Excel spreadsheet, or the hardcopy report, is used to record information that will be useful for the Ongoing Administrator.

12 **Select a Proportional, Stratified Random Sample of participant files to review.** Determine the size of the sample based on the following table to provide a confidence level of 95% (a presumed error rate of no more than 5%) that the entire population in the plan (based on the sample) is accurate and reliable.

| Population | Sample Size |
|---|---|
| <20 | All |
| 20 | 19 |
| 40 | 31 |
| 60 | 38 |
| 80 | 42 |
| 100 | 45 |
| 200 | 52 |
| 300 | 54 |
| 400-500 | 56 |
| 600-700 | 57 |
| 800-1000 | 58 |
| 1500-4000 | 59 |
| 5000 or more | 60 |

- Stratify the sample by types of participants (retirees, active vested, active non-vested and terminated vested).
- Sort and number each stratum (participant record) by assigning the number 1 to the first individual, 2 to the second, and so on within each stratum. These numbers will identify the participant data to be audited as selected by the random number generator.
- Confirm and document the percentage of the total population each stratum represents. (For example, if the total population is 100 and 25 are retirees, then retirees should represent 25% of the sample.) That percentage, applied to the sample size of 45 indicates the sample size for the stratum. (The sample size would be 25% of 45 or 11.25.) When the sample size yields a fraction, always round up.
- Use the random number generator on the network, accessible through an icon or Windows File Manager (j:\random\random.exe), to generate random numbers for each of the strata. Print the results, and select for testing the participants corresponding to the numbers generated. Document the participant sample. Confirm each type of participant is properly represented in the sample.

13 For each participant file in the sample, check for the following (noting important observations in the PFI):

**Note:** The *Quality Review Check Sheet (qurecksh.doc)* is used to document any findings that the Quality Assurance Specialist identifies during the review process. The PFI Report is used to list any information that has not been completed, from the statistical sample.

a. **Check that the file is imaged.** Check that the Image Count on the PFI Report is not zero

for any participant. Make sure there is a PRISM record for each IPS-listed participant, provided that the participant was a plan member. Note in the PFI why the file was not imaged. (Remember that certain participant files are not imaged, due to conflict of interest. See TP 27: Run Personal Interest Conflict System (PICS). (Note that each non-vested participant needs a unique imaged file.)

b. **Check Data Exceptions.** Ensure that SSN, participant name, status, DOH, DOTE, DOB, DOD, spouse SSN and DOB, ARD, PV, BDL Date, sex, ACT BEN FORM, etc. are complete and accurate in PRISM VAL/IDL and IPS for each participant.

c. **Check that Social Security Number is correct.** Each participant should have a unique SSN. Check for changes in IPS that were not entered into PRISM, and identify any conflicts between the systems.

d. **Check that there is proper participant, beneficiary and alternate payee documentation in the file** (See TP 16.3 Maintain Participant Files)**,as applicable** (See Appendix J: Participant Forms Information). Ensure that all missing IPS document errors on the Plan Closing Report have been corrected and that there are no outstanding IPS document problems for the plan on the cumulative Compliance Review Overdue Report:

   i BDL

   ii Benefit Statement

   iii Application for Benefits/General Information Form/Payee Information Form

   iv Proof of age (non-retirees only)

   v Marriage certificate, for participants receiving a Joint and Survivor (J&S) Annuity

   vi Spouse proof of age, for participants receiving a J&S annuity

   vii Death certificate, for participant whose beneficiary is receiving benefits.

   viii DOH and DOTE for non vested/non member (needed for BDLs)

e. **Check the implementation of the BDL.** Check the consistency of the Application for Benefits, Participant Information Form (if applicable) and PRISM with the BDL and benefit statement. Ensure that any BDL changes, revisions, or new BDLs are reflected. Ensure that documentation supports the form of benefit.

f. **Check for open Appeals**. Check SCoRE for any appeal decisions that were implemented.

g. **Check that underpayment situations were corrected.** Check that the participant was reimbursed, as necessary, for back payments or PSA charges, with appropriate interest. (See Process 19.3: Determine Net Overpayment/Underpayment for Annuities and Process 19.4: Determine Overpayment/Underpayment for Lump-sums.) (Refer to IOD Policy Bulletin 97-7 for guidance about payment of interest.)

h. **Check that overpayment situations were addressed and determinations implemented.** Check that recoupment/recovery determinations have been made and action initiated (e.g., first letter sent). (As appropriate, see TP 06: Recover Overpayment and/or TP 07: Recoup Overpayment and PBGC Operating Policy Chapter 6.4-1).

i. **Check that employee contributions were returned if elected by the participant or spouse**. If employee contributions were returned, verify that the monthly benefit amount was reduced. If return of employee contributions was not elected, verify that monthly benefit amount is unreduced.

j. **Check that** pre-termination liabilities **were paid, with appropriate interest, if applicable**.

k. **Check that interest was paid on lump-sum benefits, backpayments and reimbursements (e.g., for PSA charges).** (See IOD Policy Bulletin 97-7 for guidance

about payment of interest.)

l. **Check that retirees and deferred vested participants (who have reached their normal retirement age) have been contacted and processed into final pay status or have not responded.**

14 **Errors may be significant or insignificant, depending on the item tested:**

- **Insignificant errors** are discrepancies that do not affect PBGC's ability to determine a participant's entitlement to a benefit, determine the amount of the guaranteed benefit, or locate the participant.
- **Significant errors** are discrepancies that affect PBGC's ability to determine a participant's entitlement to a benefit or change the amount of a guaranteed benefit by more than $5.00 per month and affect the present value of future benefits (PVFB) or mean the PBGC cannot locate the participant.
- Identify all significant errors, and count as errors all participants with at least one significant error. If the review of the first sample reveals errors that exceed the number of acceptable errors, increase the sample size, as shown in the following table, obtain a full new sample and conduct an expanded review.

| **Original Sample** | | | **Expanded Sample** | |
|---|---|---|---|---|
| **Population** | **Size** | **Acceptable errors (5 %)** | **Size** | **Acceptable errors** |
| less than 20 | All | N/A | N/A | N/A |
| 20 | 19 | 1 | All | N/A |
| 40 | 31 | 2 | 38 | 2 |
| 60 | 38 | 2 | 56 | 3 |
| 80 | 42 | 2 | 73 | 4 |
| 100 | 45 | 2 | 89 | 4 |
| 200 | 52 | 3 | 161 | 8 |
| 300 | 54 | 3 | 220 | 11 |
| 400 | 56 | 3 | 270 | 14 |
| 500 | 56 | 3 | 312 | 16 |
| 600 | 57 | 3 | 348 | 17 |
| 700 | 57 | 3 | 380 | 19 |
| 800 | 58 | 3 | 408 | 20 |
| 900 | 58 | 3 | 432 | 22 |
| 1000 | 58 | 3 | 454 | 23 |
| 1500 | 59 | 3 | 535 | 27 |
| 2000 | 59 | 3 | 587 | 29 |
| 2500 | 59 | 3 | 624 | 31 |
| 3000 | 59 | 3 | 651 | 33 |
| 4000 | 59 | 3 | 688 | 34 |
| 5000 or more | 60 | 3 | 713 | 36 |

If the expanded sample yields more than the acceptable number of errors, treat it as an incomplete case and go to Step 12. Otherwise, treat it as a complete case and go to Step 13.

m. **Check that beneficiary / alternate payees have been linked to the associated participant in PRISM**. The Plan Closing Report lists all beneficiaries and alternate payees. If the beneficiary or alternate payee is not linked in PRISM, use PRISM Customer to add a relationship.

15 **If the review indicates an incomplete case, return the case to the TPD.** Prepare *Closed Plan Review Memo (Clplrmem.doc)* to the TPD or FBA (for FBA plans) listing any problems noted with the case and/or additional work needed. Reject the CAS task referral Plan Administration milestone to TPD and provide CAS comments.

---

**Note:** Verify that all Plan Administration Milestones have been completed (i.e., all dates have been entered in the Milestone section) prior to case submission to TSD; if not completed, the case will be returned to the TPD/FBA.) Upon resubmission of the case, an entirely new sample will be taken.

---

16 **If the review is successful,** prepare *Closed Plan Review Memo (Clplrmem.doc)* indicating successful review of the closed plan.

**Review Closed Plan**

## 22.3 Assign Ongoing Administrator and Determine Transfer Date 02/17/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Select Ongoing Administrator, who will administer the plan for PBGC. Select Ongoing Assumption date when all processing is transferred to Ongoing Administration. Coordinate the Ongoing Assumption date with the DMC to ensure that all needed scanning of files is completed. |
| **Time Reporting (BMPRS)** | FTE Case Closure<br>FBA Case Closure<br>PBA Case Closure<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Successful Review of Closed Plan<br>Quality Review Check Sheet<br>PFI Report (annotated) |
| **Output and Recipients** | Completed CAS Plan Administration Milestone, with Ongoing Administrator information completed, as well as Ongoing Assumption Date to Ongoing Administrator. Tickler date, two weeks before transfer date, is also indicated. This is the date at which processing should be "wrapped up" and outstanding issues forwarded to the Ongoing Administrator. |
| **Control Issues** | TSD sets up transfer, which is done automatically through technology ( CAS and CCN). Ongoing Assumption date is selected to correspond with check cycle. |
| **Important Concepts** | CAS Plan Administration milestone will automatically move forward to TSD on Ongoing Assumption date.<br>**Timing:** The Ongoing Administrator will reply with a POC name within 5 business days. |
| **Guidance** | N/A |
| **Procedure Owner** | TSD/CSRB Quality Review Group |

22.3 Action Steps: Assign Ongoing Administrator and Determine Transfer Date

**Review Closed Plan**

## 22.3 Action Steps: 02/17/2004
## Assign Ongoing Administrator and Determine Transfer Date

**TSD Manager**

1 Upon successful review, select the Ongoing Administrator (OA), and request notification of the Ongoing Administration point of contact (POC). The determination of the Ongoing Administrator takes into account current and projected workloads, size and complexity of the plan, related plans, etc. Fill in this information under the CAS Plan Administration milestone.

**Ongoing Administrator**

2 Provide e-mail notification to TSD/CSRB of POC's name.

**TSD/CSRB**

3 Once the FBA for Ongoing Administration has been selected, and the Team Lead has provided concurrence, assemble the plan completion package for shipment. The package includes the Plan Completion Memo and the Checklist, which is imaged into the plan file. Image additional documentation into the plan file, including the Quality Review Check Sheet, and the Participant File Inventory. These documents are used to perform the audit analysis for work performed to ensure the plan was closed in an efficient manner. Also, image any emails from various TPDs/FBAs, with updated correction information, into the plan file.

4 Make the CAS team assignment, with POC (mail and plan) information for the case.

5 Determine the Ongoing Assumption date based on check cycle and any other relevant factors. The Ongoing Assumption dates occur on the first of the month. Add Ongoing Assumption date to the Plan Administration milestone.

6 Return the CAS Plan Administration milestone referral to the TPD.

**Note:** The TPD should not then forward the milestone, because CAS forwards the milestone automatically.

## 22.4 Forms, Letters, Memos, etc.

## PR 23. Transfer Plan to Ongoing Administrator

23. Overview

23. Workflow

23.1 Transfer Administrative Responsibility for Plan

Forms, Letters, Memos, etc.

## 23. Overview

09/04/98

The last step in case processing for PBGC is to transfer the case first from the FBA or TPD to TSD, and then from TSD to an Ongoing Administrator (OA), a contractor, for ongoing benefit administration. This generally marks closure of the case for PBGC, except for assistance to and oversight of the OA. When a case is transferred to the OA, everything that PBGC can do, should have been completed. That is not to say that there will not still be open issues or that "woodwork" participants will not show up. The goal is to give the contractor as clean a case as possible, so that day-to-day benefit administration is all that remains.

The Ongoing Administrator contractor performs routine activities based on applicable IOD policies, procedures and direction, for the plan and its participants until there are no longer any participants or payees.

23.1 Action Steps: Transfer Administrative Responsibility for Plan

**Transfer Plan to Ongoing Administrator**

## 23.1 Action Steps: 09/04/98

## Transfer Administrative Responsibility for Plan

1. Inform Ongoing Administrator of coming case transfer.
2. Prepare FBA Introduction (ALGS- FBA1, or FBA2), to notify participants of the change in benefits administration. Ensure that the mailing date is 15-30 days prior to the date of transfer.
3. Two weeks before transfer date, TPD or FBA summarizes work in process and annotates open questions on the Participant File Inventory (PFI). See Process 21.12: Wrap Up Plan Administration. Return any files to Document Management Center.
4. If necessary, TSD arranges a conference with TPD case team or FBA case team and Ongoing Administrator.
5. Refer to Workflow at the beginning of this process to determine the next action.

## Technical Procedures

01/19/2005

Technical Procedures are usually event-driven activities rather than case-driven activities occurring at a specific point in case processing. Technical Procedures may be performed one or more times in the life of a case, or may not be performed at all. (For example, balancing occurs periodically and determining net worth is a one-time event.) Technical Procedures may be performed by more than one division. An example of one of the few case-driven activities is controlled group analysis (TP 1: Identify Controlled Group), which is done by PPD and TPD. In each division, there is a different goal: PPD does it to determine whether or not a plan should be terminated; TPD does it to identify and attempt recovery from liable parties.

Technical Procedures may be **plan activities** (example, TP 02: Identify Ability to Fund Plan) or **individual/group participant activities** (example, TP 13: Domestic Relations Order Handbook and TP 14: Hold Participant Meeting). When a Technical Procedure is applicable to a specific process, the Technical Procedure is mentioned in one or more of the action steps of the process.

## Technical Procedures include:

TP 01 Identify Controlled Group

TP 02 Identify Ability to Fund Plan

TP 03 Manage Plan Related Termination Expenses

TP 04 Process Address Changes

TP 05 Process Deaths

TP 06 Recover Overpayment

TP 07 Recoup Overpayment

**09/22/99**

Rules Regarding Controlled Groups

Types of Controlled Groups

Definitions

**Identify Controlled Group**

## TP 01. Rules Regarding Controlled Groups

**09/22/99**

The rules for determining controlled group relationships are based on 4001 of ERISA and 414 of the Internal Revenue Code (IRC) . Important sections include:

- ERISA 4001 (a)(14)(B) identifies IRC 414 as the Code guiding determination of common control for purposes of controlled group analysis.
- ERISA 4062 defines liable parties for plans and establishes that the parties are jointly and severally liable.
- CFR 4001.3 defines controlled groups.
- IRC 414 (b) treats all employees of corporations which are members of a controlled group of corporations as employed by a single employer.
- IRC 414 (c) extends the intent of IRC 414 (b) to include all trades or businesses under common control (whether or not incorporated).
- PBGC Operating Policy Manual 7.2-1: Definition of Rental Property as Trade or Business, describes PBGC's policy with respect to the inclusion of certain rental property in a controlled group determination and the net worth determination of the controlled group.

The purpose of the controlled group analysis is to identify all parent, subsidiary, and brother-sister corporations, as well as their parent, subsidiary, and brother/sister corporations for as many generations as ownership can be determined. Once the analysis reveals the controlled group, if there is one, an analysis of each controlled-group member identifies the parties that PBGC may ask to take over the plan or against which PBGC will take recovery actions.

The purpose of identifying a controlled group is to determine any parties that fall within the category of employer as defined in Title IV of ERISA and may, therefore, be liable for funding the plan and subject to PBGC recovery actions. In considering the application of employer liability, the Congressional Committee Reports contain the following excerpt:

In determining the employer who may be liable for insurance coverage losses of the corporation, all trades or business (whether or not incorporated) under common control are to be treated as a single employer . . ." (Act Section 4062)

Section 4001 (a)(14)(B) provides, in part, the following:

. . . the determination of whether two or more persons are under "common control" shall be made under regulations of the corporation which are consistent and coextensive with regulations prescribed for similar purposes by the Secretary of the Treasury under subsections in (b) and (c) of Section 414 of the Internal Revenue code of 1986 . . .

Code section 414(b) refers to employees of a controlled group of corporations within the meaning of Code 1563(a) being treated as employed as a single employer (without regard to 1563 (a)(4) and (e)(3)(C) ).

Code section 414(c) is much broader, encompassing not only corporate entities but also partnerships, estates and trusts, and proprietorships.

Refer to regulations under 414 (c) for rules governing common controlled groups. Look to regulations under 1563 to explain and reinforce 414 (c). The regulations under 1563 and 414 (c) are the same except that Section 414 (c) applies to partnerships, proprietorships, estates and trusts, as well as to corporations. Section 1563 applies only to corporations.

**Identify Controlled Group**

## TP 01. Types of Controlled Groups

**05/31/96**

There are three types of controlled groups:

- Parent-Subsidiary
- Brother-Sister
- Combined Groups (combination of Parent-Subsidiary and Brother-Sister)

# TP 01. Definitions

05/18/2001

| | | | |
|---|---|---|---|
| Controlling Interest (80% Test) | Effective Control (50% Ownership Test) | | Exclusion |
| Employee | Principal owner | Officer | Partner |
| Fiduciary | Substantial condition | | Attribution |

## Controlling Interest (80% Test)

- In the case of a corporation, ownership of stock possessing at least 80% of the total combined voting power of all classes of stock, or at least 80% of the total value of shares of all classes of stock of such corporation.
- In the case of a trust *or* estate, ownership of an actuarial interest (percentage of the trusts if the trust were liquidated) of at least 80% of such trust.
- In the case of a *partnership*, ownership of at least 80% of the profits interest or capital interest of such partnership.
- In the case of a *sole proprietorship*, ownership of such sole proprietorship.

## Effective Control (50% Ownership Test)

If five (5) or fewer persons (common owners) who are individuals, corporations, estates, or trusts own directly and indirectly with the application of attribution rules under Section 1.414(c) — Rules for Determining Ownership.

- In the case of a corporation, more than 50% of the total combined voting power of all classes of stock entitled to vote, or more than 50% of the total value of shares of all classes of stock of such corporation. [1.414(c) - 4(b)(4)]
- In the case of a trust or an estate, an actuarial interest of more than 50% of such trust or estate. [1.414(c) - 4(b)(3)]
- In the case of a partnership, such persons own an aggregate of more than 50% of the profits, interest or capital interest of such partnership. [1.414(c) - 4(b)(2)]
- In the case of a sole proprietorship, one of such persons owns such sole proprietorship.

**Note** A parent organization is treated as owning an interest if it owns it directly or indirectly through options or other forms of attribution. Remember that treasury stock and nonvoting stock which is limited and preferred as to dividends are excluded in determining 50% interest.

## Exclusion

Exclusion rules identify certain ownership interests which are excluded in determining control. This means that certain interests are not counted. The reason for excluding is to "neutralize" certain stock for control computation and thus prevent ownership alignments geared toward divesting certain persons of statutory control, without affecting their effective control. (H. Report No. 749, 88th Congress. 1st Session (1963) with regard to Sec. 1563.)

For purposes of determining controlling interest (the 80% test) and effective control (the 50% test) for both parent-subsidiary and brother-sister controlled groups, certain rules exclude treasury stock and nonvoting stock which is limited and preferred as to dividends.

Certain interests are treated as excluded for purposes of determining whether an organization is a member of a parent-subsidiary controlled group. If a parent organization owns a 50% or more interest in another organization (a "subsidiary organization"), then certain other interests will be

excluded from the computations of ownership for determining whether the subsidiary or its parent is a member of a parent-subsidiary controlled group.

Certain other interests are excluded also:

- An interest in the subsidiary corporation held by a trust which is part of a deferred compensation plan [as described in Code Section 406(a)(3)] [Regs. 1.414 (c) - 3 (b)(3)].
- An interest which is held (directly and indirectly) by an individual who is a principal owner, officer, partner, or fiduciary of the parent organization [Regs. 1.414 (c) - 3 (b)(4)].
- An interest in the subsidiary owned (directly and indirectly) by an employee of the subsidiary if the ownership interest is subject to substantial conditions on the employee's (or the person holding the direct interest) right to dispose of such interest which run in favor of the parent or subsidiary organization [Reg. 1.414 (c) - 3 (b)(5)].
- An interest in the subsidiary which is owned (directly and indirectly) by a tax exempt organization (other than the parent) which is controlled (based on factual determination) by the parent subsidiary or a related party [Reg. 1.414 (c) - 3 (b)(6)].

**Employee**

A person who performs services for an employer during one-half or more of a pay period. See Code section 3306 (i).

**Principal owner**

A person who owns directly and indirectly a 5% or more interest in an organization. Defined at 1.414 (c) - 3 (d)(2).

**Officer** **10/11/96**

The president, vice president, general manager, treasurer, secretary, and comptroller and any other person who performs corresponding duties.

Defined at 1.414 (c) - 3 (d)(3).

**Partner**

As defined at Code section 7701 (a)(2).

**Fiduciary**

As defined at Code section 7701 (a)(6).

**Substantial Condition**

A condition that restricts the owner's right to dispose of the interest. A right of first refusal is a substantial condition. It is not necessary that a more favorable price is given. Any legally enforceable right which prohibits the direct owner from disposing of the interest without consent of another person is a substantial condition running in favor of that person. The exception to this rule is that for stock owned by an employee, a reciprocal purchase agreement may not be considered a substantial limitation.

Defined at 1.414 (c) - 3 (d)(6).

**Attribution**

Attribution is when ownership of an interest is attributed, or flowed through from one person or organization to another. Attribution is described in Regs. 1.414 (c) - 4. Attribution rules can be applied to:

- Options
- Partnerships
- Estates and Trusts
- Corporations
- Spouse
- Family

Note that constructive ownership rules are applied to one person (or organization) at a time and, when attributed, do not dilute the ownership of others from whom ownership is attributed. This means that the total ownership of all parties, after attribution rules have been applied to each one, could be more than 100%. For example, if Corporation X owns 80% of the stock of Y Corporation, the fact that A, an employee of Y, has an option to acquire 25% of the stock of Y does not take X and Y out of the category of a parent-subsidiary controlled group. Since A has an option to acquire 25% of the company, he or she would be attributed with 25% ownership. Corporation X would still own 80%, making for a total ownership of 105%.

Action Steps: Gather Documents and Identify Owners

**Identify Controlled Group**

## TP 01.1 Action Steps: 05/31/96
## Gather Documents and Identify Owners

1 Obtain and review all the applicable documents as listed below. Some documents are applicable only to certain types of organizations (for example, partnership agreements are only necessary for partnerships).

**Corporate Stock Record Book(S)**

- Obtain one book for each class of stock (voting, common, etc.). The certificates are pre-numbered. Each book will contain records and show the number of shares and to whom shares have been issued.
- Account for all shares as being issued, canceled, or unissued.

**Corporate Minute Book(S)**

- Corporate law usually requires minutes to be maintained, and these may be bound volume(s) containing the minutes.
- Check for other minutes under other names, such as executive committee minutes, compensation committee minutes, etc.
- Check for records of any options (for stock/ownership) that have been offered or have expired

**Partnership Agreements**

- Check for provisions for the allocation of profits and losses
- Check "Schedule A" for the names of the partners and their capital contributions

**Corporate Tax Returns With All Supporting Documents And Schedules**

- Affiliations schedule (Form 851)
- Sources of income
- Investment transactions
- The "Other current assets" line items on the balance sheet of some tax returns (usually on page 3) and explanations of what they include

**Partnership Tax Returns With All Supporting Documents And Schedules**

- Allocation of income or loss
- Sources of income (to identify other ownership)
- Investment transactions (to invest stock bought and sold)
- The "Other current assets" line items on the balance sheet of some tax returns (usually on page 3) and explanations of what they include

**Individual Tax Returns With All Supporting Documents And Schedules**

- Sources of income
- Investment transactions

**A Detailed Trial Balance For Each Account**

- Intercompany receivables and/or payables
- Insurance
- Large receivables and/or payables
- Rent accounts
- Property accounts
- Investment accounts

**Stock Options And Employee Stock Option Purchase Plans (ESOP)**

- They may be treated as outstanding for attribution purposes
- May be excluded depending on restrictions

**Warrant Or Convertible Debt Agreements**

- These are typical in venture capital deals
- May be treated as outstanding

**Personal Financial Statements**

- Investments
- Other business relationships
- Affidavits from individuals listing their investments

**Regulatory Reports**

- Form 10-K for public companies (for ownership information)
- Forms from other regulatory bodies, including the Interstate Commerce Commission, Federal Power Commission, and other sources that contain information with respect to affiliations.

**The Employer's Financial Statements**

- Investments
- Other business relationships
- Other ownership relationships

2 Develop a table listing owners down the left side and owned organizations across the top. Include organizations, such as companies, partnerships, and trusts among the owners as applicable. Note that the owners may include one or more of the organizations listed across the top of the table. **Base the table on this model:**

| **Organizations** | **Acme Plumbing** | **Tri-State Plumbing Supply** |
|---|---|---|
| **Owners** | | |
| Smith & Co. | _____ | _____ |
| ABC Inc. | _____ | _____ |
| XYZ Corp. | _____ | _____ |
| B & B Partners | _____ | _____ |

3 For each owner, indicate the percentage of ownership for each company. Use the actual

percentage (without taking into account exclusion or attribution). For now, record even owner whose percentage is less than 5% (it may increase later due to attribution). Determine percentage of ownership according to the type of organization.

- For a corporation, ownership of stock (to distinguish between voting and non-voting stock if the corporation has issued more than one type, split the column for that organization into voting and non-voting)
- For a trust or estate, actuarial interest.
- For a partnership, ownership of profits interest or capital interest.
- For a sole proprietorship, assign 100% of ownership to the sole proprietor.

For each owner, add names of other organizations owned.

For each organization, add names of other owners.

4 Continue until the percentages of ownership for all known owners have been identified. Note that ownership for any given organization may not total 100% because stock may be distributed among one or more shareholders who each own less than 5% of the organization (although these should be listed).

Identify Controlled Group

## TP 01.2 Apply Exclusion Rules to Eliminate Excluded Interests 05/31/96

Action Steps

| | |
|---|---|
| **Purpose** | Exclude certain interests which may change percentages of controlling interest. |

| **Required Input and Source** | Chart of owners and organizations |
| **Output and Recipient** | Percentages of control that reflect exclusion |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | IRC 1.414(c) - 3, IRC 1.414(c) - 4 |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case (initial analysis) or TPD auditor (final analysis) |

## Click Here for More Information...

Action Steps: Apply Exclusion Rules to Eliminate Excluded Interests

Examples: Applying Exclusion Rules

**Identify Controlled Group**

## TP 01.2 Action Steps: 05/18/2001

## Apply Exclusion Rules to Eliminate Excluded Interests

Special rules provide that certain interests are treated as excluded stock for purposes of determining whether an organization is a member of a brother-sister controlled group of organizations [Regs. 1.414 (c) - 3(c)]. If five or fewer persons (common owners) own directly and through options 50% or more interest in an organization, then for purposes of determining whether that organization is a member of a brother-sister control group, certain interests will be treated as not outstanding .

1 Using the table of owners and organizations already developed, contact representatives of each entity to identify which interests fall into the following, excludable categories.

- an interest held by a tax exempt employee's trust described in code section 401(a). [Regulations 1.414 (c) - 3(c)(2)].
- an interest held by an employee of the organization and which is subject to substantial restrictions on disposition. [Regulations 1.414 (c) - 3(c)(3)].
- an interest held by a controlled tax exempt organization. [Regulations 1.414 (c) - 3(c)(4)].

2 Exclude the interest of the affected parties from all consideration in determining control - both from the numerator and the denominator of the effective control ratio. The examples illustrate how to apply identified exclusions.

# TP 01.2 Examples: Applying Exclusion Rules

10/11/96

## Ownership & Resultof Applying Exclusion Rules

**1** Corporation A

| Owners | Included Stock | Excluded Stock | Total Stock |
|---|---|---|---|
| X | 60 | | 60 |
| Others | 15 | 25 | 40 |
| Total | 75 | 25 | 100 |

X would be treated as having 80% control of Corporation A.

$$\frac{60}{100 - 25} = \frac{60}{75} = 80\%$$

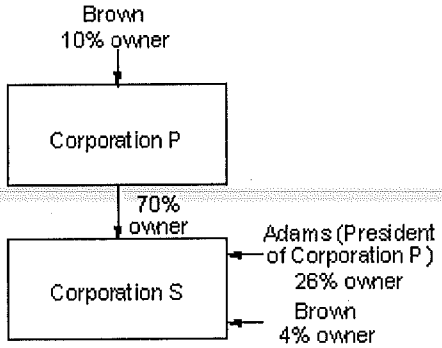
**2** Corporation A

| Owners | Included Stock | Excluded Stock | Total Stock |
|---|---|---|---|
| X | 50 | 10 | 60 |
| Others | 25 | 15 | 40 |
| Total | 75 | 25 | 100 |

A would not be controlled by X. X has only 66.6% control of Corporation A.

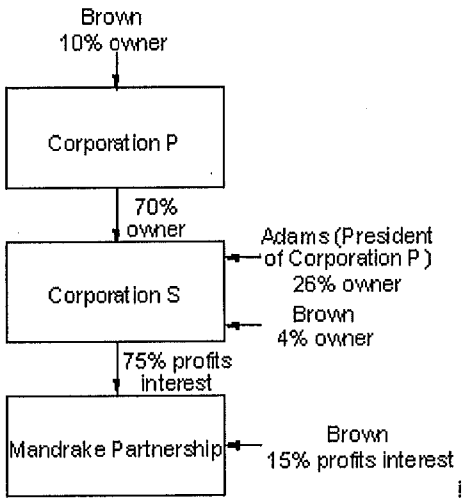
$$\frac{60 - 10}{100 - 25} = \frac{50}{75} = 66\%$$

**3**



Corporation P meets the 50% stock ownership requirement which is a condition precedent to the treatment of any stock as excluded stock under Regulation 1.414(c) - 3(b). Since Adams is an officer of Corporation P, and Brown is a principal owner of Corporation P, the stock owned by Adams in Corporation S (26 shares) and the stock owned by Brown in Corporation S (4 shares) is treated as excluded stock under Regulation 1.414(c) - 3(b)(4). Thus, the total outstanding stock in Corporation S is considered to consist of 70 shares, all of which are owned by Corporation P. Therefore, corporations P and S are members of a parent-subsidiary controlled group of corporations.

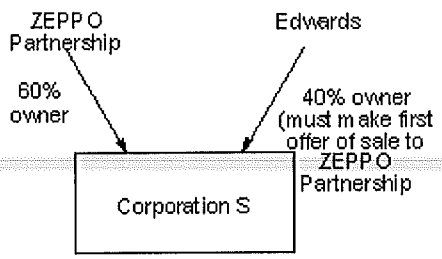
**4**



Assume the same facts as in example 3 above and further assume that Brown owns a 15% profits interest in Mandrake Partnership and that Corporation S owns a 75% profits interest in Mandrake.

Corporation P satisfies the 50% ownership requirement of Regulation 1.414(c) - 3(b) with respect to Mandrake since P is considered as owning 52.5% (70% X 75%) of Mandrake with the application of Regulation 1.414 (c) - 4 (b)(4) (attribution from Corporations). Since Brown is a substantial owner of P, the Mandrake interest owned by him is treated as not outstanding for purposes of determining whether Mandrake is a member of a controlled group. Thus Corporation S is considered to own an 88.2 % interest (75% + 85%) in Mandrake partnership. Accordingly, Corporations P and S and Mandrake partnership are members of a parent-subsidiary controlled group.

**5**



ZEPPO Partnership owns 60% of the only class of stock of Corporation S. Edwards, the general manager of Corporation S, owns the remaining 40% of the stock of Corporation S. Edwards has agreed that if he offers his stock in S for sale he will first offer the stock to ZEPPO at a price equal to the then fair market value of the stock. Since the stock in S held by Edwards is subject to conditions which run in favor of the corporation and substantially restrict Edwards' right to dispose of such stock, such stock is treated as excluded stock under Regulation 1.414 (c) - 3 (b)(5), and ZEPPO is treated as owning 100% of the stock of S. Therefore, ZEPPO is the common parent of a parent-subsidiary controlled group consisting of ZEPPO and Corporation S.

**Identify Controlled Group**

## TP 01.3 Apply Attribution Rules and Determine Percentages of Ownership

**05/31/96**

**Action Steps**

| | |
|---|---|

| **Procedure Owner** | PPD auditor or financial analyst in charge of case (initial analysis) or TPD auditor (final analysis). |

**Click Here for More Information...**

Action Steps: and Examples: Apply Attribution Rules and Determine Percentages of Ownership

## TP 01.3 Action Steps and Examples: 05/18/2001
## Apply Attribution Rules and Determine Percentages of Ownership

1 Apply attribution through options:

In addition to interests owned directly, a person (or organization) is deemed to own all presently outstanding interests which it has an option to acquire. The same applies for an option to acquire an option, etc. The option attribution takes precedence over any other mode of attribution in the event that other modes of attribution exist as to a single person. [Regs. 1.414 (c) - 4(c)(3)]. This may permit the same result as what would otherwise be a non-permissible double application of family attribution rules.

2 Apply attribution through partnerships:

An interest owned by a partnership will be treated as being owned by the partners in proportion to their profits *or* capital interest, whichever is greater (though partners with less than 5% interest are disregarded).

**Examples: Applying Attribution Rules**

**Ownership & Results of Applying Attribution Rules**

1

| Partners | Capital Interest | Profits Interest | *Applicable Ownership* |
|---|---|---|---|
| Al | 36 | 25 | 36 |
| Bob | 60 | 71 | 71 |
| Charlie | 4 | 4 | 4 |
| | 100 | 100 | |

Al, Bob, and Charlie, unrelated individuals are partners in the ABC partnership. The partners' interests in the capital and profits are as illustrated at left.

The ABC partnership owns the entire outstanding stock (100 shares) of X Corporation. Under Regulation 1.414(c) - 4(b)(2)(I), Al is considered to own the stock of X owned by the partnership in proportion to his interest in capital (36%) or profits (25%), whichever is greater. Therefore, Al is considered to own 36 shares of X stock. Since Bob has a greater interest in the profits of the partnership than in the capital, Bob is considered to own X stock in proportion to his interest in such profits. Therefore, Bob is considered to own 71 shares of X stock. Since Charlie does not have an interest of 5% or more in either the capital or profits of ABC, he is not considered to own any shares of X stock.

3 Apply attribution through estates and trusts:

Any interest owned directly or indirectly by an estate or trust will be considered owned by any beneficiary with more than a 5% actuarial interest to the extent of such actuarial interest [Regulations 1.414(c) - 3(4)(b)(3)].

Apply this rule regardless of whether the interest involved is present or future and without regard to whether the interest is vested or contingent.

The actuarial interest of any beneficiary is determined by assuming the maximum exercise of discretion by the fiduciary in favor of the beneficiary and the maximum use of the interest involved to satisfy the beneficiary's rights.

A beneficiary who cannot under any circumstances receive any part of the organization's interest held by the estate or trust, including the proceeds from the sale or the income, does not have an actuarial interest in an organization interest. (1) where stock of a corporation

has been specifically bequeathed to A and the remainder of the estate has been specifically bequeathed to B, the stock can be attributed only to A. (2) an income beneficiary of a trust does have an actuarial interest in stock if he or she has any right to income from the stock, even though, under the terms of the trust, the stock can never be distributed to him. (3) The methods used in Estate Tax Regulations 20.2031-7 and 20.2031.10 should be used in determining a beneficiary's actuarial interest.

The creator of a grantor trust (defined in the Estate and Gift tax code) is considered the owner of any interest owned by the trust.

**4** Apply attribution through corporations

An interest owned by a corporation is considered owned by any person who owns (directly and indirectly through a common control group) 5% or more in value of stock, in the proportion of his or her percentage of ownership to total ownership [Regs. 1.414 (c) - 4 (b)(4)].

Note that only the value of the corporation's stock is considered, not voting power as in the 50% and 80% tests.

The regulations under section 414(c) specifically state, that in computing the amount of stock owned by a person and the proportion of value that it bears to the value of all stock, the following rules apply: (1) stock does not include preferred stock or treasury stock, (2) Corporate shareholders or individuals are considered to own stock which they have an option to purchase, (3) individuals, estates, and trusts are considered to own all the stock attributed to them under all the other methods of attribution.

No back attribution (from shareholder to corporation) is provided for, but the excluded stock rules do exclude stock owned by a major shareholder.

**Ownership & Result of Applying Attribution Rules**

**1**

| Owners | Corporation P |
|---|---|
| Brown | 60 |
| Smith | 4 |
| Corporation X | 36 |
| Total | 100 |

Corporation P is owned as illustrated at left. Corporation P owns directly and indirectly 50 shares of Tyler Corporation

Brown is considered to own 30 shares of Tyler's stock (60/100 X 50).

Since Smith does not own 5% or more in value of Corporation P, he is not considered as owning any stock in Tyler. If in this example, Smith's spouse owned 1% of the stock of P, Smith (and the spouse) would each own 5% of the stock of P, and therefore Smith (and the spouse) would each be considered as owning 2.5 shares of Tyler Co. (5/100 X 50)

**5** Apply attribution through spouse:

An individual is considered to own an interest which is owned directly or indirectly by his or her spouse. [Regs. 1.414(c) - 4(b)(5)].

In recognition of the fact that a husband and wife may own and operate separate businesses, the individual is not attributed with stock owned by a spouse if: (1) the individual owns no interest in the organization (Note: A problem may arise in community property states where separate property is difficult to establish), (2) the individual is not a director, fiduciary, or employee and does not participate in management, (3) not more than 50% of the organization's gross income is derived from royalties, rents, dividends, interest, and annuities (Personal Holding Company income, see Code section 1244), and (4) the spouse's interest was not subject to substantial restrictions running in favor of the individual or their minor children (substantial restriction is defined at 1.414 (c) - 3 (d)(6)(i). [Regulations 1.414 (c) - 4 (b)(5)].

An interest which may be attributed to an individual from a spouse includes only an interest which is owned directly by the spouse or which is owned by the spouse constructively, through rules other than attribution from children, parents, grandchildren, and grandparents [Regs. 1.414 (c) - 4 (c)(2)].

6 Apply attribution through children, grandchildren, parents, and grandparents:

For purposes of family attribution rules, different treatment is provided for children under 21 and for children over 21.

There is a total attribution both ways between parents and their children under age 21. An individual will be considered the owner of any interest owned directly or indirectly by his or her minor children, or if the child is a minor, by his parents.

If an individual is in effective control (50% test), directly and through other attribution, of an organization, then he or she will be treated as the owner of any interest owned by his children over age 21, grandchildren, parents, or grandparents. [Regs. 1.414(b) - 4 (c)(6)].

Family and spouse ownership may not be "double attributed." That is, ownership cannot be attributed from daughter to father and via father to son. [Reg. 1.414 (c) - 4 (c)(2)].

**Ownership & Result of Applying Attribution Rules**

| Owners | Apex Corporation |
|---|---|
| Father | 40% |
| Minor Son (20 years) | 30% |
| Adult Son (30 years) | 20% |
| Unrelated Person | 10% |

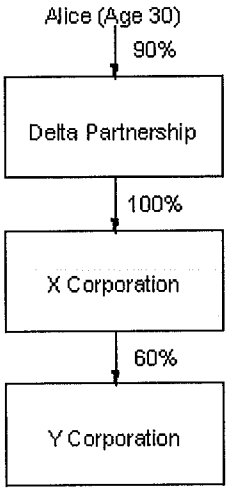
Apex partnership is owned as illustrated at left.

Father's Ownership: Father owns 40% of Apex directly and is considered to own the 30% interest owned directly by Minor. Since for purposes of the effective control test in Regulations 1.414 (c) - 4 (b)(6)(ii), father is treated as owning 70% of Apex. Father is also considered to own the 20% interest owned by Adult. Father is considered as owning a total of 90% interest in Apex Partnership.

Resolve conflicts between types of attribution:

Where an interest is considered to be owned constructively by both option attribution and by another form of attribution, that interest shall be considered to be owned as a result of the option (the option attribution takes precedence).

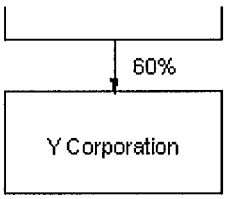
**Ownership and Result of Applying Attribution Rules**



Under Regulations 1.414 (c) -4(c)(1), the 60% of Y is constructively owned by Delta (attributing from corporations). Alice is treated as owning 54% of Y (90% of 60%).

Alison's brother, Bill, who is 20 years old, owns directly 40% of Y corporation. Although the Y stock owned by Bill is considered owned by Father under family attribution [Regs. 1.414 (c) - 4 (b)(6)(I)], that stock cannot be reattributed from Father to Alice.

If, using the same facts, assume that Father has an option to purchase the 40% of Y stock from Bill. The rule against double family attribution does not prevent Alice from being the constructive owner of the 40% of Y stock owned



by her brother. Under Regulations 1.414 (c) - 4(c)(3), Father is treated as the owner of Bill's Y stock by reason of option attribution and not through family attribution. Therefore, since Alice is in effective control of Y (more than 50% ownership), the 40% of Y stock constructively owned by Father is reattributed to Alice. Alice is treated as owning 94% of Y stock.

**Identify Controlled Group**

## TP 01.4 Identify Parent-Subsidiary Relationships 05/31/96

Action Steps

| | |
|---|---|

Definition of Parent-Subsidiary

Action Steps: Identify Parent-Subsidiary Relationships

Examples: Parent-Subsidiary Corporations

**Identify Controlled Group**

## TP 01.4 Definition of Parent-Subsidiary

**05/31/96**

Under section 1.414(c) - 2 of the Treasury Regulations, the term "Parent-Subsidiary group of trades or businesses under common control" means one or more chains of organizations conducting trades or businesses connected through ownership of a controlling interest with a common parent organization if —

a) A controlling interest in each of the organizations, except the common parent organization, is owned (directly and with the application of 1.414(c) - 4(b)(1), relating to options) by one or more of the other organizations; *and*

b) The common parent organization owns (directly and with the application of 1.414(c) - 4(b)(1), relating to options) a controlling interest in at least one of the other organizations, excluding, in computing such controlling interest, any direct ownership interest by such other organizations

**Identify Controlled Group**

## TP 01.4 Action Steps: Identify Parent-Subsidiary Relationships

**05/31/96**

For parent-subsidiary determinations, the goal is to identify one or more chains of organization connected through ownership of a controlling interest with a common parent.

1 Identify owning organizations.

- Use the chart of owners and organizations to separate those who own 80% or more. The 80% may be of voting stock, total value of all stock, total interest, profits interest, or capital interest, depending on the type of owner.

2 Draw a simple chart illustrating the parent-subsidiaries. Use the following examples as guides.

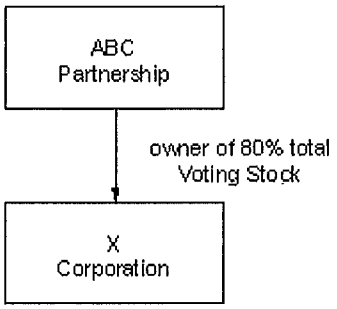
## Identify Controlled Group

# TP 01.4 Examples: Parent-Subsidiary Corporations

05/31/96

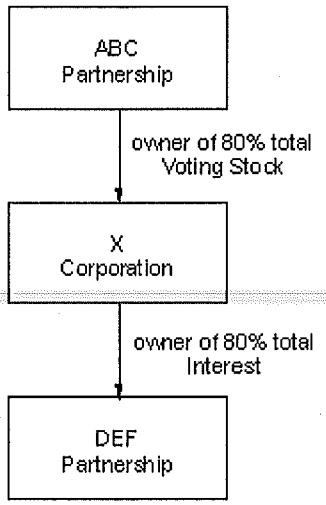
### Ownership and Resulting Parent-Subsidiary Relationships

1



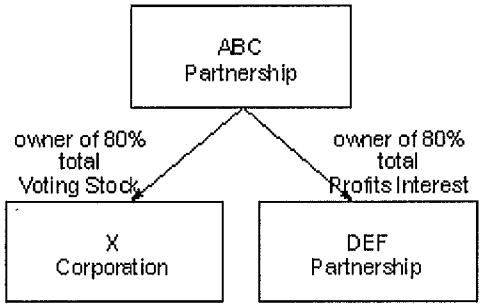
ABC Partnership is the common parent of the parent-subsidiary controlled group under common control.

2



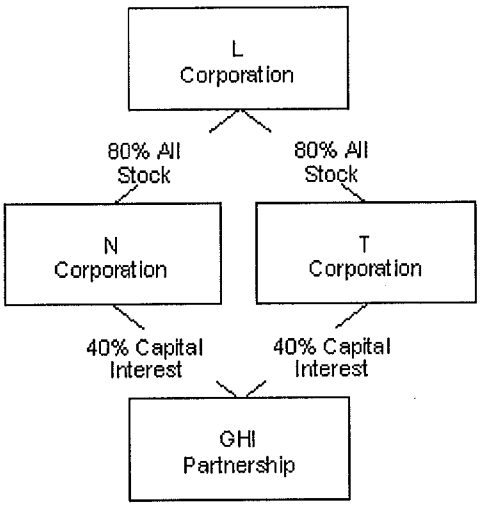
ABC Partnership is the common parent of the parent-subsidiary group of ABC Partnership, X Corporation, and DEF Partnership. Note that the result is the same as for example 3, below.

3



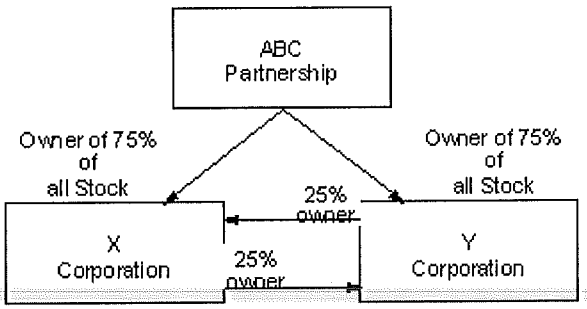
ABC Partnership is the common parent of the parent-subsidiary group of ABC Partnership, X Corporation, and DEF Partnership. Note that the result is the same as for example 2, above.

**4**



L is common parent of a parent-subsidiary group consisting of L, N, T, and GHI Partnership.

**5**



Interorganization ownership is excluded for purposes of determining if ABC owns a controlling interest; therefore ABC is treated as owning 100% of both X and Y. ABC is the common parent of the ABC, X, and Y parent-subsidiary group.

**Identify Controlled Group**

## TP 01.5 Identify Brother-Sister Relationships 10/11/96

**Action Steps**

| | |
|---|---|
| **Purpose** | Identify five or fewer persons with a controlling interest in an organization who are also in effective control of the organization. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Controlled Group Audit<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Chart of owners and organizations with exclusions and attributions applied. |
| **Output and Recipient** | Tables indicating brother-sister relationships. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | PPD auditor or financial analyst in charge of case (initial analysis) or TPD auditor (final analysis) |

## Click Here for More Information...

Definition of Brother-Sister Corporations

Definition of Combined Group

Procedure and Examples

**Identify Controlled Group**

## TP 01.5 Definition - Brother-Sister Corporations

**05/18/2001**

Treasury Regulations Section 1.414 (c) - 2 defines a brother-sister group under common control as two or more organizations conducting trades or businesses if:

- the same five or fewer persons who are individuals, estates, or trusts own (directly and with the application of Section 1.414(c) - 4 a controlling interest in each organization,

– and –

- taking into account the ownership of each such person only to the extent such ownership is identical with respect to each such organization, such persons are in effective control of each organization. The five or fewer persons whose ownership is considered for purposes of the controlling interest requirement for each organization must be the same persons whose ownership is considered for purposes of the effective control requirement.

**Identify Controlled Group**

## TP 01.5 Definition - Combined Group

**10/11/96**

Treasury Regulations Section 1.414(c) - 2(d) defines a combined group of trades or businesses as any group of three or more organizations if:

- Each organization is a member of either a parent-subsidiary or a brother-sister group under common control, and
- At least one organization is the common parent of a parent-subsidiary group, and is also a member of a brother-sister group.

**Identify Controlled Group**

## TP 01.5 Procedure and Examples

**08/15/97**

1 Identify identical ownership for each owner:

- Use the chart of owners and organizations to identify the identical ownership across organizations for each owner. The identical ownership for all organizations will always be the amount of the smallest percentage in the row for that owner (often zero).
- Also identify the identical interest for any possible set of organizations for each individual, for example, the identical interest for any one or more organizations, the owner owns an interest in all the organizations in which he or she has an interest. (See the breakdowns in Example 2, below.)

2 Identify effective control held by each group of five or fewer owners: For each owner or any group of five or fewer owners, identify all combinations where one to five owners whose *combined* identical ownership totals more than 50%. For example, if one owner has 25% identical ownership of two or more organizations and another owner has 26% or more identical ownership of the same organizations, then the two owners have effective control (51% is more than 50%). Owners not falling into any combination do not meet the effective controlled group criteria.

3 Identify controlling interest for each organization For each organization, identify five or fewer owners (who each has ownership in the organization) whose controlling interest totals 80% or more. *These must be the same group of five or fewer owners used for the effective control test above.*

**Examples: Brother-Sister Corporations**

**Ownership and Resulting Brother-Sister Relationships**

| Individuals | Corporations | | | | Identical Ownership |
|---|---|---|---|---|---|
| | C-1 | C-2 | C-3 | C-1 | |
| A | 51% | 54% | 53% | 52% | 51% |
| B | 49% | 46% | | | |
| C | | | 47% | | |
| D | | | | 48% | |
| Total % | 100% | 100% | 100% | 100% | |

**Facts** - The outstanding stock of corporations C-1, C-2, C-3, and C-4, which have only one class of stock outstanding, is owned by four individuals as illustrated at left.

**Conclusions to Example 1**

- Corporations C-1 and C-2 **are members of a brother-sister controlled group** of corporations, as they both meet the more than 50% (effective control) and at least 80% (controlling interest) stock ownership tests.

- Corporations C3 and C4 are **NOT members of the controlled group** because at least 80% of the stock of each of these corporations is not owned by the same five or fewer individuals. These corporations fail the controlled interest test.

| | Organizations | | | | | | |
|---|---|---|---|---|---|---|---|
| Individuals | A | GHI | M | W | X | Y | Z |
| A | 100% | 50% | 100% | 60% | 40% | 20% | 60% |
| B | | 40% | | 15% | 40% | 50% | 30% |
| C | | | | | 10% | 10% | 10% |
| D | | | | 25% | | 20% | |
| E | | 10% | | | 10% | | |
| Total % | 100% | 100% | 100% | 100% | 100% | 100% | 100% |

**Facts -** Five unrelated individuals own an interest in corporation A, a capital interest in the GHI Partnership, and stock of corporations M, W, X, Y, and Z (each of which has only one class of stock outstanding), as illustrated at left.

**Conclusions to Example 2**

There are four brother-sister groups: **(i)** GHI, X, and Z; **(ii)** X, Y, and Z; **(iii)** W and Y; **(iv)** A and M.

| | GHI, X, and Z Controlled Group | | | |
|---|---|---|---|---|
| Individuals | GHI | X | Z | Identical |
| A | 50% | 40% | 60% | 40% |
| B | 40% | 40% | 30% | 30% |
| C | | 10% | 10% | |
| D | | | | |
| E | 10% | 10% | | |
| Total | | | | 70% |
| Total A&B | 90% | 80% | 90% | 80% |

**(i) GHI, X and Z**

- In the case of GHI, X, and Z: A and B together have effective control of each organization because their combined identical ownership of GHI, X, and Z is more than 50% (A's identical ownership of GHI, X, and Z is 40% because A owns at least a 40% interest in each organization and B's identical ownership of GHI, X, and Z is 30% because B owns at least a 30% interest in each organization).

A and B (the persons whose ownership is considered for purposes of the effective control requirement) together own a controlling interest in each organization because they own at least 80% of the capital interest of partnership GHI and at least 80% of the total combined voting power of corporations X and Z. **Therefore, GHI, X, and Z comprise a brother-sister group of trades or businesses under common control.**

- **Y is not a member of a controlled group with GHI, X and Z** because neither the effective control requirement (more than 50%) nor the 80% controlling interest requirement are met. (The effective control requirement is not met because A's and B's combined identical ownership in GHI, X, Y, and Z (20% for A and 30% for B) is not more than 50%. The 80% controlling interest test is not met because A and B together only own 70% of the total combined voting powers of the stock of Y.)

- **A and M are not members of a controlled group with GHI, X and Z** because B owns no interest in either organization and A's ownership of GHI, X, and Z, considered alone, is less than 80%.

| | X, Y, and Z Controlled Group | | | |
|---|---|---|---|---|
| Individuals | X | Y | Z | Identical |
| A | 40% | 20% | 60% | 20% |
| B | 40% | 50% | 30% | 30% |
| C | 10% | 10% | 10% | 10% |
| D | | 20% | | |
| E | 10% | | | |
| Total | | | | 60% |
| Total A,B,C | 90% | 80% | 90% | 80% |

**(ii) X, Y and Z**

- In the case of X, Y, and Z: A, B, and C have a combined identical ownership of 60%, which is over the 50% requirement. They also have controlling interest of 80%, so X and Y comprise a brother-sister controlled group.

| | W & Y Controlled Group | | |
|---|---|---|---|
| Individuals | W | Y | Identical |
| A | 60% | 20% | 20% |
| B | 15% | 50% | 15% |
| C | | 10% | |
| D | 25% | 20% | 20% |
| E | | | |
| Total | | | 55% |
| Total A,B,D | 100% | 80% | 90% |

**(iii) W and Y**

- In the case of W and Y: A, B, and C have a combined identical ownership of 55% and meet the more than 50% effective control test. In addition, they meet the 80% controlling interest test with 80% identical controlling interest. W and Y qualify as a brother-sister controlled group.

| | A & M Controlled Group | | |
|---|---|---|---|
| Individuals | A | M | Identical |
| A | 100% | 100% | 100% |
| B | | | |
| C | | | |
| D | | | |
| E | | | |
| Total | | | 100% |
| Total A | 100% | 100% | 100% |

**(iv) A and M**

- In the case of A and M: owner A, being 100% owner of organizations A and M has 100% identical ownership and easily meets the more than 50% identical ownership for the effective control test. In addition, the 100% ownership of the two organizations makes for an identical controlling interest of 100% which meets the 80% test as well. Therefore, A and M qualify as a brother-sister controlled group.

| | Corporations | |
|---|---|---|
| Individuals | U | V |
| A | 12% | 12% |
| B | 12% | 12% |
| C | 12% | 12% |
| D | 12% | 12% |
| E | 13% | 13% |
| F | 13% | 13% |
| G | 13% | 13% |
| H | 13% | 13% |
| Total % | 100% | 100% |

**Facts -** The outstanding stock of corporations U and V, which have only class of stock outstanding, is owned by eight individuals as illustrated at left.

### Conclusions to Example 3

- Any group of five of the individual shareholders of U and V will own more than 50% of the stock in each corporation, and thus meet the effective control test. However, **U and V are not members of a brother-sister controlled group** because at least 80% of the stock is not owned by the same five or fewer persons (that is, the sum of the individual percentages for any five or fewer individuals is not 80% or more).

| | Organizations | | | | | Identical |
|---|---|---|---|---|---|---|
| Individuals | P | Q | R | S | T | Ownership |
| A | 55% | 51% | 55% | 55% | 55% | 51% in all |
| B | 45% | 49% | | | | 45% in P&Q |
| C | | | 45% | | | |
| D | | | | 45% | | |
| F | | | | | 45% | |
| Total % | 100% | 100% | 100% | 100% | 100% | |

**Facts -** The outstanding stock of corporations P, Q, R, S, and T, which have only one class of stock outstanding, is owned by the five unrelated individuals as illustrated at left.

### Conclusions to Example 4

- Corporations P and Q are members of a brother-sister controlled group of corporations.

- Although the effective control test of more than 50% identical ownership requirement is met for all five corporations, corporations R, S, and T are not members of the brother-sister controlled group because at least 80% of the stock of each of those corporations is not owned by the same five or fewer individuals.

| | Corporations | |
|---|---|---|
| Individuals | X | Y |
| A | 100% voting<br>60% value | 75% voting<br>60% value |
| B | 0% voting<br>10% value | 25% voting<br>10% value |
| Total % | 100% | 100% |

**Facts -** Corporations X and Y each have two classes of stock outstanding: voting and non-voting common. (None of the stock is excluded from the definition of stock under Section 1563 (c).) Unrelated individuals A and B own amounts of the class of stock entitled to vote (voting) and the total value of shares of all classes of stock (value) in

each of corporations X and Y as illustrated at left.

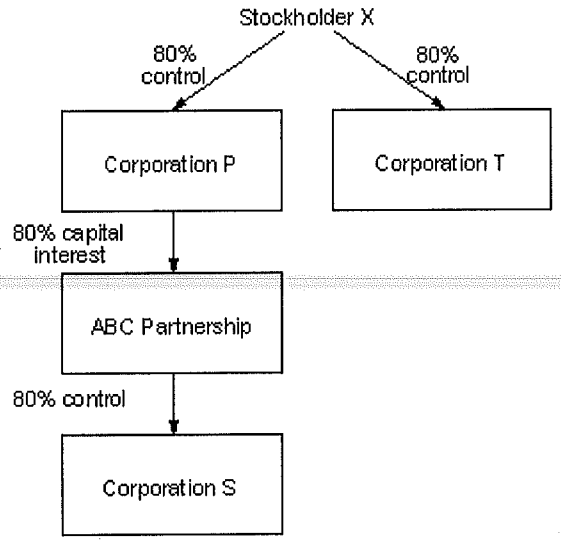
**Conclusions to Example 5**

- No other shareholder of X owns (or is considered to own) any stock in Y. The group meets the effective control test of more than 50% ownership because A and B own more than 50% of the total value of shares of all classes of stock of X and Y. (The group also meets the more than 50% ownership requirement because of A's voting stock ownership.) The group meets the 80% requirements because A and B own at least 80% of the total combined voting power of all classes of stock entitled to vote. **X and Y are a brother-sister controlled group of corporations.**

4 Identify any combined controlled groups. Combinations of brother-sister and parent-subsidiary controlled groups, have the effect of extending the group of liable parties to include all of the members.

**Example: Combined Group**

**Ownership**



**Controlled Group Status**

- Corporation P, ABC Partnership, and Corporation S are a *parent-subsidiary* group.
- Corporation P and Corporation T are *brother-sister* corporations.
- Together, P, ABC, S, and T are a *combined controlled group.*

5 Document the findings. Include the chart of owners and organizations, explanations of all of the exclusions and attributions applied, and all diagrams. For PPD, this document is the controlled group analysis which will be used in the decision of whether or not PBGC will terminate the plan. For TPD, this document starts the recovery process.

Forms, Letters, Memos, etc.

# TP 02. Overview

**05/31/96**

Perform financial analysis for ongoing contributing sponsors or controlled group members for any controlled group with ongoing sponsors. This analysis is especially critical for those that file distress terminations under distress test 3 (unable to pay debts and continue in business unless the plan is terminated) or distress test 4 (unreasonably burdensome pension costs caused solely by a decline in work force). Often, an applicant in Chapter 11 proceedings will meet distress test 2 (approval of the court with a specific finding that, unless the plan is terminated, the debtor will be unable to pay all its debts under the plan or reorganization and will be unable to continue in business outside reorganization) and the financial analysis will not be necessary. However, the analysis is necessary if there are other ongoing controlled group members. Generally, PPD will have to do financial analysis for companies in Chapter 11 when the case is being processed as a reportable event rather than a distress termination. Applicants that are liquidating (Chapter 7 bankruptcy) as a result of foreclosure or assignment for benefit of creditors normally meet distress test 1 (liquidation test).

Very simply, "affordability" is earnings before taxes (EBT) less secured interest expense. Affordability studies are done in two cases: (1) in distress applications when citing test 3 and (2) in reportable events when there are ongoing controlled group members not in bankruptcy who appear to have adequate pre-tax income (after all interest expense) to pay all creditors including the pension plan. The results of the affordability study can determine the recommendation to terminate.

Identifying an organization's ability to fund a plan is basically a credit analysis: the objective is to determine whether or not a business can afford to continue its pension plan(s). This ultimately becomes a comparison of the projected minimum funding requirements for maintaining the plan(s), taking outstanding Due and Unpaid Employer Contributions (DUEC) into consideration, and the ability of the business to generate the necessary funds. Companies that file distress terminations under criteria 3 (unable to pay debts and continue in business unless the plan is terminated) are usually dependent on a secured lender. Often the company is short of cash to meet any obligation, and the lender is concerned about the company meeting all obligations, not just the minimum funding. In these cases, PBGC's decision that results from the financial analysis is whether to grant a minimum funding waiver, accept the distress application, or terminate involuntarily.

There are four primary variables that need to be evaluated in assessing whether or not a business can afford to continue its pension plan(s):

- The funding history and status of the pension plan(s).
- The fundamental viability of the business.
- The amount of "cash flow" (earnings before taxes, but after secured debt interest) that the business can generate, and the sensitivity of the cash flow to events outside of management's control.
- The company's financial condition as evidenced by the structure and level of its assets and debts, including pension debt.

## TP 02.1 Identify Ability to Fund Plan

05/31/96

Action Steps

| | |
|---|---|
| **Purpose** | Determine whether or not plan should be terminated.<br>Identify whether the plan sponsor or any member or combination of members of the controlled group can afford to fund the plan. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Controlled group analysis<br>5-year funding projection for plan (from ASD, when necessary)<br>DUEC amount<br>minimum funding waivers granted by IRS<br>historical earnings for liable employer(s)<br>projected earnings for liable employer(s) (either company projections or PPD projections) |
| **Output and Recipient** | Determination of whether the liable employer(s) can meet minimum funding on an ongoing basis. |
| **Control Issues** | N/A |
| **Important Concepts** | This analysis is the "affordability study" that compares the projected minimum funding requirements to the ability of the business to generate the necessary funds.<br>Recognize that many of the figures that support this analysis are estimates, but the resulting conclusion should be reasonably defensible to the liable party or the TWG.<br>A company's obligation to a pension plan is like long-term unsecured debt: it is a fixed obligation to pay a fairly constant amount over a long period of time.<br>SEPPA identified certain tests for distress terminations. This analysis tested whether or not any liable parties (controlled group members) could fund the plan |
| **Guidance** | IRC 412 with regard to minimum funding and waivers. |
| **Procedure Owner** | Financial analyst or auditor in charge of case. |

## Click Here for More Information...

Action Steps: Identify Ability to Fund Plan

# TP 02.1 Action Steps: Identify Ability to Fund Plan

05/31/96

1 Obtain the following documents (many should have been requested):

- The funding history and status of the pension plan:
  - date of the last contribution to the plan and for what plan year.
  - whether any minimum funding waivers have been granted by IRS. If so, obtain copies of all waiver determination letters.
  - whether any applications for minimum funding waivers are pending. If so, obtain copies of all pending application letters.
  - An Actuarial Services Division (ASD) estimate of DUEC accrued since the last contribution or funding waiver determination, and what part, if any, would be eligible for waiver.
  - An estimate from the sponsor's actuary (or from ASD) of the projected minimum funding requirements for the current plan year and for future plan years.
  - Date when the next minimum funding contribution is due.
- An ASD estimate of minimum funding requirements for next five plan years, when considered necessary.
- Five years of financial statements from each controlled group member.
- Three to five years (preferably five) projected earnings from each controlled group member along with supporting text and schedules. If necessary, make projections estimating cash flow from operations after capital expenditures and secured debt interest, but before the payment of any other interest or principal on debt and before any payments for pension funding. This is "affordability". Take into account market conditions that may affect income into the future.
- The latest balance sheet for each controlled group member.
- General information on all business operations from each controlled group member. This general information should identify all business locations, including approximate number of employees and pension plans they participate in, and business activities at the location.
- Additional information relevant to the situation of each controlled group member:
  - For companies in Chapter 11 bankruptcy proceedings, all documents provided to the creditors' committee by the businesses or the committee's advisors and a copy of the Plan of Reorganization (POR) with the accompanying disclosure statement.
  - For public companies, a copy of the most recent 10-K report.
  - Any information on potential mergers, sales, or acquisitions.

2 Use the latest balance sheet for each controlled group member as a basis for preparation of a pro *forma* balance sheet by making the following adjustments. The balance sheet will show whether there are excess assets not used in the business.

- Remove accrued pension benefits if they are included as liabilities on the balance

sheet, and insert the next minimum funding contribution due as a current liability and insert the difference between total unfunded accrued benefits and the current liability as a long-term liability

- Remove all assets related to operations that are being liquidated or that management plans to liquidate. Estimate the net realizable value of these assets and apply them against debts secured by them. Show any excess in the net realizable value of these assets over the amount of liens against them as a current asset.
- Eliminate all intangible assets such as goodwill, assets set up to offset the recognition of pension liabilities, and organization costs and charge them against equity.
- Write up inventories as FIFO.

3 Compare the annual minimum funding requirement with cash flow available to pay minimum funding.

4 Develop an understanding of the problems that led the company to file for Chapter 11 bankruptcy, file a distress application, file for a minimum funding waiver, substantially reduce employment, etc.:

- Determine if these problems are related to operations of the core business or resulted from other events that are no longer applicable.
- Determine whether operational problems are being corrected and to what extent.
- Determine what management's plans are for the future.

5 Document your opinion as to whether or not any controlled group member(s) can afford to fund the plan. Also document all actions in the activities log and/or the plan file.

6 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

## TP 02.2 Forms, Letters, Memos, etc.

**05/31/96**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

**None**

# TP 03. Manage Plan Related Termination Expenses

TP 03. Overview

TP 03.1 Pay Termination Expenses

Forms, Letters, Memos, etc.

## TP 03. Overview

**12/06/96**

There are two types of plan related termination expenses:

- Expenses Paid From Trust Fund (Plan Assets) - These expenses should be authorized by the plan documents and include expenses such as actuarial fees, attorney fees, accounting fees, trustee fees, administration fees, and paying agent charges. Payments from plan assets cannot be authorized and paid until PBGC is trustee of the plan. The plan administrator/bankruptcy trustee, in some cases, may have continued to pay certain expenses (such as actuarial expenses) during the time that the plan was being considered for termination by PBGC. As long as the expenses were appropriate, this is acceptable.
- Expenses Paid From PBGC's Termination Expense Account - These are incidental expenses for services needed to make a determination as to whether or not to terminate the plan. These expenses may include such things as fees for storage of records, temporary professional fees (e.g., hourly wages for the past plan administrator to assist PBGC personnel), fees for photocopying documents, and other miscellaneous expenses. This account is maintained by IOD's front office, under the supervision of the Deputy Director. These expenses may be paid even if the plan is not terminated and trusteed.

**Manage Plan Related Termination Expenses**

## TP 03.1 Pay Termination Expenses

**12/06/96**

Action Steps

| | |
|---|---|
| **Purpose** | Pay legitimate, authorized plan expenses |
| **Time Reporting (BMPRS)** | N/A<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Authorized expenses incurred by the plan administrator, plan actuary, paying agent, or others. |
| **Output and Recipient** | Payment of expenses. |
| **Control Issues** | All expenses must be approved by a PBGC representative. |
| **Important Concepts** | N/A |
| **Guidance** | FM 05-1 Delegation of Authority Memo, May 25, 1995 |
| **Procedure Owner** | Individual responsible for case, IOD Deputy Director, PPD Manager (for non-trusteed plans), TPD Auditor (for trusteed plans) |

## Click Here for More Information...

Action Steps: Pay Termination Expenses

**Manage Plan Related Termination Expenses**

## TP 03.1 Action Steps: 02/18/2005

## Pay Termination Expenses

### Pay Expenses From Trust Fund

Services normally performed by PBGC, such as calculating benefits for putting new payees into pay status, should be performed by PBGC as soon as possible after trusteeship. PBGC will take over all such activities within sixty days after PBGC assumes payment responsibility (see Process 9: Plan Assumption).

Expenses may be paid out of Trust funds in three different situations:

- Expenses incurred prior to DOPT: These bills can be processed only if plan assets were available at DOPT.
- Expenses incurred between DOPT and DOTR: All reasonable and necessary expenses incurred to administer the plan may be paid.
- Expenses after DOTR: Post-trusteeship services normally performed by PBGC staff for trusteed plans should be entirely assumed by PBGC staff as quickly as possible. However, **reasonable and necessary** services may be performed by service providers and paid for out of the PBGC trust fund during the period immediately following trusteeship. Necessary services are those required for PBGC to operate the trusteed plan, typically when third parties continue to administer terminated pension plans during the limited period before PBGC is able to exercise control or to acquire the assets. Ensure that a reasonable amount is being charged for these services.

In addition, post-trusteeship services related to plan and sponsor data that would normally appear in a correctly filed Notice of Intent to Terminate (NOIT) but was not available prior to trusteeship, may be paid out of the PBGC trust fund. See Form 600 for details on the plan and sponsor data included in the form.

Expenses related to TPD audit activities are part of normal TPD operating costs.

### Preparing a Requisition:

6 Obtain an invoice prepared by the vendor/service provider and a letter certifying that payment for these services has never been received. The invoice must include the plan name, a description of the services performed (including the hours worked and the hourly rate charged, if applicable), and the total amount of the invoice. Obtain additional documentation, if necessary.

7 Prepare a PBGC Form 260 (available from Formflow on-line). Attach the invoice to the requisition. The requisition should contain the following information:

- Name and Address of the Vendor/Service Provider
- Name of Plan
- Case Number
- DOPT
- DOTR
- A brief description of the type of expense to be paid (generally a sentence or two).

If the amount to be paid is associated with more than one plan, allocate a portion to each plan.

8 Route the requisition and invoice through division management for approval by the Deputy Director, IOD, prior to payment.

**Pay Expenses from Termination Expense Account**

1 Obtain an invoice prepared by the vendor/service provider. It must include a description of the services or product provided and the total cost. The initiator of the requisition will determine that the expense is justified and reasonable.

2 Prepare a PBGC Requisition (Form 260 available from on Formflow on-line). Attach the invoice to the requisition. The requisition should contain the following information:

- Name of the PBGC employee(s) incurring the expense
- Name and Address of the Vendor
- Name of Plan
- Name Case Number
- Name A brief description of the reason for the expense and the type of expense to be paid (generally a sentence or two).
- Name If the amount to be paid is associated with more than one plan, allocate a portion to each plan.

3 Route the Requisition and Invoice for approval by the Deputy Director, IOD, prior to payment.

## TP 03.2 Forms, Letters, Memos, etc.

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

*PBGC Form 260*

# TP 04. Process Address Changes

TP 04. Overview

TP 04.1 Make Address Changes

TP 04.2 Make or Change EDD Election

Forms, Letters, Memos, etc.

# TP 04. Overview

**08/25/2000**

Accurate address information supports IOD's excellent customer service and permits timely communication with participants. Correct addresses are necessary for all participants whether payees or deferred vesteds. IOD assiduously works to maintain up to date addresses for participants, see TP 33: Locate Customer Address.

Once PBGC receives a new address or a request to change an address it is processed through entry to the PRISM database (GENEIS) as soon as possible. IOD acknowledges its customers' requests for these changes.

This technical procedure describes several types of address changes:

- Home address
- Customer's bank address - for checks that are directly mailed to a customer's bank
- EDD elections and changes

Accurate records of address changes for customers are necessary to ensure that new address information is updated timely and to allow PBGC to provide quality customer service. These changes of address should be made as soon as possible, but always within five (5) business days.

These notification of changes come into PBGC by several means.

- Telephone call to Customer Service Center, TPD or FBA
- Written notification from the customer
- Checks returned to State Street Corporation, PBGC's paying agent
- Undeliverable correspondence returned and/or forwarding address information from by Post Office

CSR, DMC staff, TPDs or FBA may process these address notifications. IOD acknowledges written and telephone address change notifications from our customers, so that our customer's may be confident of the results of their contact with us. Staff acknowledges the written notifications by preparing and sending the Acknowledgment Letter (ALGS 530) after the PRISM Refresh Process. Telephone notifications of address changes are directly transmitted to PRISM when entered into CCN (by the CSR, TPD or FBA), and then CCN generates an ALG acknowledgment letter. (These ALG acknowledgment letters are only available through CCN. The letters refer to the GENESIS database for information and therefore access the new and correct participant address.)

Telephone notifications are most efficiently implemented by using CCN to transmit the data. If selected by the user, CCN will update a GENESIS record upon receipt of notice of an address change. A specific disposition code in the CCN record indicates that the requested change has been made, and a message tells the user that an ALG acknowledgment letter has been generated.

**Process Address Changes**

## TP 04.1 Make Address Changes

**08/31/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Update a customer's home or bank address in PRISM in a timely manner. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Notice of a new home or bank address from:<br>• telephone call<br>• written notice from customer<br>• SSC<br>• returned mail with forwarding address information |
| **Output and Recipient** | Updated ScoRe Report and address changes in PRISM, documented in CCN and/ IPS, acknowledgment letter sent to customer. |
| **Control Issues** | Addresses in PRISM should be traceable to a source in PBGC's records, e.g., CCN or IPS (participant or plan). Effective 9/99, all written notifications from customers are acknowledged by an Acknowledgment Letter (ALGS 530). Telephone notification may be made only by the participant (payee or deferred vesteds) or their authorized representative (see PBGC Operating Policy: 8.4-1 Power of Attorney and Guardianship). For details on acceptable signatures, see Appendix J: Participant Forms Information. Calls regarding address changes may be received in CSC or in the TPD or FBA. Verify the caller's identity, exercising judgement to determine if the caller is the customer. When in doubt, (for example, unable to provide information such as SSN, DOB, old address and name of company) request that the customer submit a written notification of the address change, including name, SSN, old address, and signature. CSR's process calls from the customers and forward calls from the authorized representatives to the TPD/FBA. |
| **Important Concepts** | Telephone notifications are most efficiently processed using CCN (see action steps). PBGC does not require a 'wet' signature (written notice with actual signature) to change an address. Telephone notification is acceptable **from the customer** except when PBGC suspects that the call is not legitimate. In these circumstances, request the caller to send in written notice for processing and our records. (Signature can be compared with signature on file.) |
| **Guidance** | IOD Customer Service Standards (11/1/95)<br>PBGC Operating Policy Manual 8.4-1: Power of Attorney and Guardianship<br>PBGC Operating Policy Manual 8.5-1: Signature by Mark |
| **Procedure Owner** | PLS, TSD, PSB, CSC, SSC, DMC |

**Click Here for More Information...**

TP 04.1 Action Steps: Make Address Changes

**Process Address Changes**

## TP 04.1 Action Steps: 08/31/2001

## Make Address Changes

**A. Telephone Notifications** **B. Written Notifications**
**C. SSC Notifications** **DMC TPD/FBA**

### A. Telephone Notifications

**CSC, TPD or FBA**

**Note** Telephone notifications to PBGC to elect EDD are typically received by the CSC, but may also go directly to a TPD or FBA. To review guidelines in processing all participant related telephone calls, see also TP 31: Document Telephone Calls.

1 Establish call record in CCN, following TP 31.1 Document Incoming Telephone Calls.

2 Verify caller is the participant or someone authorized to make changes (acceptable power of attorney enclosed [see PBGC Operating Policy Manual 8.4-1], executor with a death notice on file, etc.). If satisfied the caller is the customer or their authorized representative, complete CCN call log with new address information.

**Note** CSR's forward calls from authorized representatives to the TPD/FBA (phone POC) to verify and complete processing.

3 Implement Change:

**CSC, TPDs, FBAs**

- Using CCN. CCN transmits the data directly to the PRISM database, so separate entry of data into PRISM using PRISM Customer is not necessary. This CCN feature is available to all staff. The application also automatically calls ALGS to generate a home address acknowledgment letter (ALGS 560) as part of completing the call record. The signatory on this automatically prepared ALG letter is the staff person completing the call record in CCN.

**— or —**

**TPDs, FBAs**

- Using PRISM online applications. Update the customer home address using PRISM Customer.
- Prepare and send the Acknowledgment Letter (ALGS 530) using PRISM ALGS.

**Note** ALG 530 should be sent to the participant's new home address, therefore the letter should be sent through ALG after the PRISM Refresh Process.

### B. Written Notifications

**Note** IOD sends participant mail using the US Postal Service's "Address Service Requested". If mail is sent to an out of date address, it is either:
- forwarded to the new address on record with the Post Office, and a card with the new address is provided to IOD, or
- returned to IOD (when the forwarding order has expired).

IOD updates its participant records with the forwarding address information, generally following the

same steps as if a written notice was received directly from the participant; however, the DMC does not issue written acknowledgments to the customer.

**DMC**

1 Written notification is handled as mail, imaged to the participant file (IPS) after receipt. For returned mail with forwarding address provided, the returned envelope (with forwarding address information) is imaged.

2 Determine the customer type for the request and take the appropriate action.

| **If the request is from** | | **Do the following (DMC)** |
|---|---|---|
| a customer (with the customer's signature) | ☞ | Determine whether the customer is a deferred vested, or payee |
| the request is not from the customer | ☞ | process any address change request as mail, **-1-** |
| a deferred vested | ☞ | process a home address change using PRISM Customer |
| a payee, receiving check at home address | ☞ | process a home address change request as mail **-1-** |
| a payee, receiving a check at bank | ☞ | process a home address change request using PRISM Customer<br>process a change in bank address (address where check is mailed) as mail **-1-** |

3 If the customer is a payee, review the address change request and PRISM to determine specifics, and then take the following actions:

| **If receiving check at home address** | | **Do the following (DMC)** |
|---|---|---|
| election of EDD | ☞ | implement EDD, if Form 710 completed and signed if not completed or lacks signature, process as mail **-1-** |
| **If receiving check at bank** | | **Do the following (DMC)** |
| change of home address | ☞ | process home address change using PRISM Customer |
| change of bank address (check address) | ☞ | process a home address change request as mail **-1-** |
| **If receiving benefits through EDD** | | **Do the following (DMC)** |
| change of home address | ☞ | update address in PRISM |
| change of bank - new EDD election | ☞ | update address in PRISM |
| change of EDD to home address (cancel EDD) | ☞ | process as mail **-1-** |

**Note** The DMC processes address changes that have a Signature by Mark if the request is notarized. If a request with a Signature by Mark is not notarized, it is processed as mail **-1-**.

**TPD/ FBA**

**Note** The DMC forwards written requests to the TPD/FBA (mail POC) for:

- a deferred vested if the request is not from the actual participant;
- for a payee, for a variety of reasons, see preceding; and

- requests that are signed by a **mark** and are **not** notarized.

In general, the DMC does not process address changes that will impact the payment destination. These are processed by the benefit processing staff. Acknowledgment is not provided by the DMC, it is provided by the TPD/FBA when the action is completed.

---

4 Verify whether the request is signed by the customer or someone authorized to make changes (acceptable power of attorney enclosed [see PBGC Operating Policy Manual 8.4-1], executor with an included death notice, etc.). If request is related to a death notice, see also also TP 5: Process Deaths. Verify that the signature is acceptable, see Appendix J: Participant Forms Information

5 Contact the participant as necessary to confirm the request, and implement changes to home and bank address using PRISM Customer. See TP 4.2: Make or Change EDD Election for EDD elections and changes (to another bank, different account).

6 Prepare and send Acknowledgment Letter (ALGS 530).

### C. SSC Notifications

An address change may come into State Street Corporation (SSC) in several ways, written request from the customer, a telephone notification or returned mail.

| **If the notice is.....** | **SSC does the following...** |
|---|---|
| Returned mail - consists of checks or mass mailings (newsletters/notices/correspondence). ☞ | **Checks:**<br>reviews PRISM Browser for a new address. If there is a new address, sends the check to the new address. If there is not a new address in PRISM, resends the check to the same address. See TP 05.1 Overview: Process Deaths for processing mail that is returned 3 times or is marked deceased.<br>Changes the address in PRISM Customer if the Post Office gives a new address on a yellow label, and sends the check to the new address. Forwards the original returned envelope from the Post Office to the DMC.<br>**Mass Mailings:**<br>reviews PRISM Browser for a new address. If there is a new address, sends the mail to the new address. If there is not a new address in PRISM, sends the mail to the DMC<br>Changes the address in PRISM Customer if the Post Office gives a new address on a yellow label, and sends the mail to the new address. Forwards the original mail from the Post Office to the DMC. |
| telephone call ☞ | directs the caller to the Customer Service Center (1-800-400-PBGC, or 1-800-400-7242) |
| written notification from customer ☞ | processed according to steps below |

1 Verify that the participant signed the request. If the requestor's signature is by a **mark** such as an X and is notarized, process as follows. If it is **not** notarized, refer the request to the TPD/FBA (mail POC) through the DMC.

2 Enter information into PRISM and forward the original written request to PBGC.

3 File copies in work processed for that month when the entry of information is complete.

4 Return the notification to the customer with a request for signature or power of attorney forms, if the participant did not sign. When the request is returned, it will be processed as above.

---

**Footnote -1-** SCoRe report will notify TPD or FBA who will take appropriate action, see TP 10: Response to Correspondence.

# TP 04.2 Action Steps: Make or Change EDD Election

08/31/2001

A. Telephone Notifications

B. Written Notifications

## A. Telephone Notifications

### CSC/ TPD/ FBA

**Note** Telephone notifications to PBGC to elect EDD are typically received by the CSC, but may also go directly to a TPD or FBA. To review guidelines in processing all participant related telephone calls, see also TP 31: Document Telephone Calls.

1 Establish call record in CCN, following TP 31.1 Document Incoming Telephone Calls

2 Verify caller is the participant or someone authorized to make changes (acceptable power of attorney enclosed [see PBGC Operating Policy Manual 8.4-1], executor with a death notice on file, etc.). If request is related to a death notice, see also TP 5: Process Deaths.

3 If electing new or revised EDD, ensure the caller has (at minimum):
- bank name and address
- account number
- account type (savings, checking)
- bank's routing number

4 If satisfied the caller is the customer or their authorized representative, complete CCN call log with new or revised EDD information.

**Note** CSR's forward calls from authorized representatives to the TPD/FBA (phone POC) to verify and complete processing.

5 Implement Change:

**CSC, TPDs, FBAs**

- using CCN. CCN will transmit the data directly to the GENESIS database, so separate entry of data into PRISM using PRISM Customer is not necessary. This CCN feature is available to all staff. The application also automatically calls ALGS to generate an EDD change acknowledgment letter (ALGS 563) as part of completing the call record. The signatory on this automatically prepared ALG letter is the staff person completing the call record in CCN.

**— or —**

**TPDs, FBAs**

- using PRISM online applications. Update PRISM using PRISM Forms and PRISM Benefits.

  (If electing a new bank for EDD, ensure that all information relating to prior bank is replaced or deleted.)

- Prepare and send the Acknowledgment Letter (ALGS 530).

**Note** ALG 530 should be sent to the participant's new home address, therefore the letter should be sent through ALG after the PRISM Refresh Process.

6 Records that have been changed need to be forwarded for authorization (See TP28: Authorize Financial & Non-Financial Transactions through PRISM) to ensure successful

transmittal to PLUS.

7 Based on check cycle, advise caller the applicable payment month that the request will be implemented. Advise them that the first month's payment is made by paper check to bank (permits our paying agent to ensure accuracy of bank and account information and prevent incorrect payments). Thereafter payments will be made electronically.

8 Ensure the customer contact is accurately documented in CCN log, see TP 31: Document Telephone Calls.

### B. Written Notifications

**Note** Participant correspondence received directly at PBGC comes into the DMC, whether it is for HQ staff or FBA staff. All participant mail is entered into the Standard Correspondence Retrieval System (ScoRe) and scanned into IPS. The TPDs and FBAs rely upon their daily ScoRe reports to respond to participant's inquiries and take other action.

#### DMC

Verify the requestor is the customer or someone authorized to make changes (acceptable power of attorney enclosed [see PBGC Operating Policy Manual 8.4-1], executor with an included death notice, etc.), and that the signature is acceptable, including requests where the requestor signs by a **mark**. The DMC processes address changes that have a Signature by Mark if the request is notarized. If a request with a Signature by Mark is not notarized, it is processed as mail -1-. See also Appendix J: Participant Forms Information. Use PRISM to determine the specifics for the payee and take the appropriate action:

| **If receiving check at home address** | | **Do the following** |
|---|---|---|
| • election of EDD | ☞ | implement EDD, if Form 710 completed and signed, update using PRISM Forms and Benefits<br>if not completed or lacks signature, process as mail. -1- |
| **If receiving benefits through EDD** | | **Do the following** |
| • change of bank - new EDD election | ☞ | implement EDD change, update PRISM using PRISM Forms and Benefits.<br>**Note** This change requires authorization, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM. |
| • change of EDD to home address (cancel EDD) | ☞ | process as mail. -1- |

#### TPD/ FBA

1 Notice of written request to elect or change EDD is received through ScoRe Report.

2 Verify requestor is the participant or someone is authorized to make changes (acceptable power of attorney enclosed [see PBGC Operating Policy Manual 8.4-1], executor with a death notice on file, or provided, etc.). If request is related to a death notice, see also TP 5: Process Deaths.

3 Verify Form 710 - Application for Electronic Direct Deposit is complete, correct **and** that it has an acceptable signature, see Appendix J: Participant Forms Information. If it is

incomplete, contact the participant first by telephone (see TP 31: Document Telephone Calls). If unsuccessful, return the form to the participant using the acknowledgment letter (ALGS 530). Once a completed form with an acceptable signature is returned, resume processing.

**4** Access the participant's record by using PRISM Forms and Benefits to enter the EDD election or changes to the EDD information in PRISM. If electing a new bank for EDD, ensure that all information relating to prior bank is replaced or deleted. Records that have been changed need to be forwarded for authorization (See TP28: Authorize Financial & Non-Financial Transactions through PRISM) for transmittal to PLUS.

**5** Prepare and send ALG 530 - Acknowledgment Letter confirming receipt and completion of processing.

---

**Footnote -1-** SCoRe report will notify TPD or FBA who will take appropriate action, see TP 10: Response to Correspondence.

# TP 05. Overview

**08/19/2004**

Once a death is reported to PBGC or verification from other sources confirm that a payee is deceased, IOD's goal is to process the information promptly and correctly.

This is important to the IOD operations as it:

- prevents potential loss of funds from overpayments;
- minimizes time spent on tracking and recovering overpayments;
- ensures that living payees continue to receive their benefits, and
- survivor/beneficiary benefits or payments due after death are made.

There are three main sources of information on which PBGC acts. These are outlined in the Death Processing Table.

IOD's Deathmatch Program provides increased efficiency in death processing. This application greatly enhances the resources that are available to staff and provides reports to management and staff for review.

**Deathmatch Program:**

Compares information from the Social Security Administration Death Master File (SSA DMF) with the PRISM database (GENESIS) by social security number to identify discrepancies. The SSA DMF contains all deaths that are reported to the SSA. If the information from the two sources disagrees, the discrepant record is inserted on the Death Discrepancy Detail Report. The report is used to verify which source has accurate information on the payee. After verification, IOD corrects records in PRISM or payees are notified to request the SSA to correct their records.

**Death Processing Table**

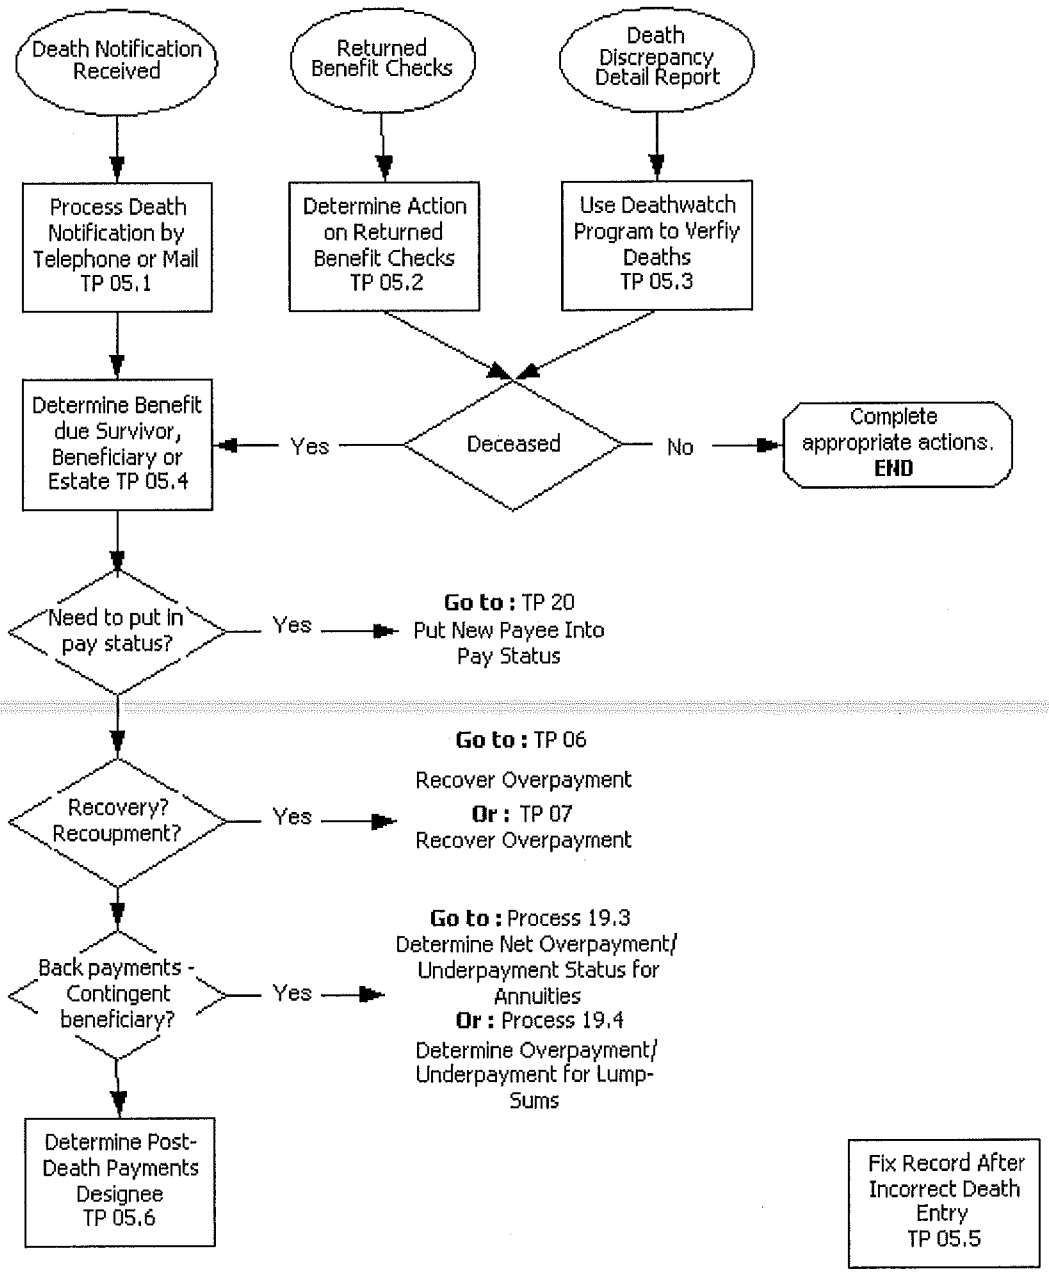
| Source of Death Notice | Who receives information? | Initial Action |
|---|---|---|
| Telephone or mail | CSC, SSC, TPD, FBA | Obtain payee's DOD and survivor's or contact person's information. |
| Post Office returns three (3) consecutive checks as undeliverable or one check as "addressee deceased" | SSC | Change of payee's status code to 2 (suspend) after 3 months of undeliverable checks; an assumed DOD is entered in PRISM for "addressee deceased" |
| IOD Deathmatch Program - Electronic Death Discrepancy Detail Report | PLS, PBAs, FBAs | Resolve discrepancy and act on the correct answer. |

**Technical Procedures** **Browse Workflows:**

**Process Deaths**

## TP 05. Workflow for Technical Procedure 05

**08/19/2004**



**Process Deaths**

## TP 05.1 Process Death Notification by Telephone or Mail 08/23/2002

Action Steps

| | |
|---|---|
| **Purpose** | Take payee out of pay status. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Mail or telephone notification of death. |
| **Process Output and Recipient** | DOD is entered in the payee's record in PRISM Customer and status code is automatically changed to 7. SSC stops payment. |
| **Control Issues** | Written notice of death should be carefully reviewed to ensure that correct information is entered in payee's PRISM record. For telephone notifications, obtain payee's DOD and survivor's or contact person's information. |
| **Important Concepts** | A date of death should be entered in PRISM Customer within 2 business days of the report. Majority of deaths are reported to the CSC and are entered at the same time in PRISM Customer.<br>CSC and SSC staff, who enters DOD in payee's record, automatically authorizes it (autoauthorization). For TPD and FBA staff, who enters DOD in PRISM, see TP. 28: Authorize Financial and Non-Financial Transactions through PRISM.<br>PSB completes CARFs for plans that the TPDs administer; FBAs complete their own. A completed CARF to SSC authorizes SSC to take action on a payment pending receipt of the death transaction from PRISM.<br>**Timing:** This is outlined in Table 05.1 Action Steps - CARF Schedule To SSC |
| **Guidance** | Benefit Payment Schedule |
| **Procedure Owner** | CSC, SSC, TPD, FBA |

TP 05.1 Action Steps: Process Death Notification by Telephone or Mail

## TP 05.1 Action Steps: Process Death Notification by Telephone or Mail

08/19/2004

1 If notice is received by telephone, verify payee's name, SSN, and address. Obtain DOD and information on caller and relationship to the deceased and enter information in CCN log ( CSC, TPD & FBA staff). Let the caller know that PBGC will send a written request for proof of the payee's death, and provide information on whether any future benefits are due. Upon receipt of the proof of death, which is scanned to the deceased person's file, send the Acknowledgment Letter (ALGS 530) to the deceased person's representative who sent the proof of death.

**Note** To have the Acknowledgment Letter (ALGS 530) that is addressed to the deceased participant's representative scanned into the deceased participant's file (IPS), customize the letter as follows:

- **Address:** Customize the home address, if necessary, to reflect the deceased participant's representative address.(This is necessary if the address is different from the participant's.)
- **Name:** Type in the c/o field the name of the person to whom the acknowledgment is to be mailed. **DO NOT** delete the <<NAME _FIRST>> <<NAME_LAST>> merge fields. These fields must remain in the letter's address to ensure proper participant file imaging.

2 If DOD is entered in PRISM Customer by -

- CSC or SSC staff, the transaction is authorized when the data is saved (autoauthorized)
- TPD or FBA staff, the transaction needs to be authorized.

3 CSC gives TSD/PSB a daily Death Notification report from CCN for plans that the TPDs administer. PSB completes CARFs for plans assigned to the TPDs and FBAs complete CARFs for their plans. Use the table below for guidance on use of CARFs and the Benefit Payment Schedule (BPS) for relevant dates.

*Table 05.1 Action Steps: CARF Schedule To SSC*

**Annuities & Special Checks**

| | If DOD is entered in PRISM or CCN | Complete CARF to... | To SSC... |
|---|---|---|---|
| A | ***Before*** the Check Run – Annuities & Specials date | N/A | |
| B | On the Annuities & Specials Check Run date and on later than NOON on next business day | Pull Check and Credit | Fax to (617) 537-1769 no later than noon on the next business day then **on the same day**: **PSB:** Place original and a copy in SSC FedEx tray. **FBAs:** Send original and a copy to SSC by overnight mail. |
| C | After B above | Issue Stop-Pay Order | As above (except faxing) |

**Electronic Direct Deposits (EDDs)**

| | | | |
|---|---|---|---|
| **D** | On the check-run date and until the date stated on the BPS for SSC to pull EDDs | Delete ACH Payment and credit | **PSB:** Place original and a copy in SSC FedEx tray.<br>**FBAs:** Send original and a copy to SSC by overnight mail.<br>**Exception:** On the last day that SSC can pull EDDS, fax by noon to (617) 537-1769 then send original and a copy by overnight mail. |

**4** Ensure that a copy of the completed CARF is scanned to the deceased payee's file (IPS).

**Process Deaths**

## TP 05.2 Determine Action On Returned Benefit Checks 05/30/2003

Action Steps

| | |
|---|---|
| **Purpose** | Determine reason for returned checks. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | SSC notifies IOD when the Post Office returns three consecutive checks to a participant or one stamped "addressee deceased". Payee or representative returns check. |
| **Process Output and Recipient** | Conclusion on reason for returned checks and necessary follow-up action. |
| **Control Issues** | Use specific questions to verify if the payee is alive or deceased. The questions should be those that only the payee should be able to answer correctly. |
| **Important Concepts** | TPD and FBA staff who enters DOD or suspends pay, the transaction needs to be authorized, see TP.28 - Authorize Financial and Non-Financial Transactions through PRISM. |
| **Guidance** | Check Schedule Key Dates |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

TP 05.2 Action Steps: Determine Action On Returned Benefit Checks

## TP 05.2 Action Steps: 08/19/2004
## Determine Action On Returned Benefit Checks

**State Street Corporation** processes returned checks as follows:

- **Three consecutive checks (postal service returns)**

  Credits amounts to payee's account.

  Changes status code to 2.

  Completes CARF forwards a copy to PBGC

- **One check marked "Addressee deceased" (postal service returns)**

  Credits amount to payee's account

  Enters an assumed DOD in PRISM Customer

  Completes CARF forwards a copy to PBGC

- **Check is returned by a payee or representative**

  Credits amount to payee's account

  If deceased, enters DOD in PRISM Customer

  Completes CARF and forwards a copy to PBGC

**PLS/PBA/FBA**, see TP 08. 1: Process Check. Upon notification through SCoRE, do the following:

1 Check PRISM, CCN, IPS and the Death Discrepancy Detail Report for information received on the payee. If death notice was received and corrected in PRISM, verify the DOD. If the payee's death was reported to SSA (Death Discrepancy Detail Report), see TP 05. 3: Use Deathmatch Program to Verify Deaths. Where death is confirmed or address change was received and not processed, do so immediately in the PRISM Customer.

2 If no information is found, try to contact the payee, see TP 42 Follow-up On Outstanding Checks only in this case the reason will be "returned checks". Verify the payee's address, and take action to correct the address and reissue payment.

**Process Deaths**

## TP 05.3 Use Deathmatch Program to Verify Deaths 05/13/2005

Action Steps

**Purpose**

To resolve discrepancies between the Social Security Administration Death Master File (SSA DMF) and PRISM, and ensure payees do not receive more than 2 payments after appearing in the Death Match Report
.

**Time Reporting (BMPRS)**

FTE Administer Benefits

FBA Administer Benefits

PBA Administer Benefits

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required Input and Source**

Death Discrepancy Detail Report; IPS; CCN

**Process Output and Recipient**

As Needed:

- Correction to participant records in PRISM Customer
- Deathmatch letters to Participants (ALGS 555 or 555NP)
- Advice to payees to contact SSA to correct their records
- Updated Disposition Comments on Death Discrepancy Detail Report

**Control Issues**

Where there is suspicion that a death was not reported to PBGC because of fraud or forgery, see TP 12: Deal with Fraud and Forgery. Only a copy of the official Social Security card is acceptable for verification of a SSN.

All actions taken to resolve discrepancies, including communications with participants or other contacts and information used to establish proof of a participant's status (copy of SSA card, death certificate, etc.) must be fully documented. Correspondence (including e-mail), pages from the Deathmatch reports (including e-mail) and memos are imaged to IPS. Telephone contacts are recorded in CCN.

**Important Concepts**

The SSA DMF stores all deaths that are reported, even if the person was not receiving Social Security benefits. The absence of a person's information in the SSA DMF does not mean that the person is alive. Entry of the DOD in the participant's record in PRISM Customer automatically changes the status code to 7 (Deceased). The Death Discrepancy Detail Report is refreshed daily with in-house corrections (PRISM updates by processing staff) and weekly with SSA corrections. The program automatically enters the DOD to the PRISM Customer record of participants with no future benefit entitlement, with a document type code naming SSA as the source.

Deathmatch reports consist of the Death Discrepancy Summary Report, which shows the number of discrepancies by case, and the Death Discrepancy Detail Report, which lists the participants by case.

If the report shows no discrepancies, no further action is required. If discrepancies are reported, the action required is determined by whether

| | |
|---|---|
| | the participant is in pay status and the type of discrepancy.<br><br>This procedure is only to be used to resolve Deathmatch discrepancies. For general guidance on actions to be taken upon a report of death, see TP 05.1 Process Death Notification by Telephone or Mail.<br><br>**Timing:** Take initial action on each discrepancy within 15 calendar days for payees and non-payees. Stop payments if a payee has not responded after 30 days from the date of the Deathmatch letter. For payees using their deceased spouse's SSN, allow 60 days to provide a valid SSN, then issue a letter allowing an additional 30 days before stopping payments. |
| **Guidance** | Deathmatch Help on IOD LAN |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

TP 05. 3 Action Steps: Use Deathmatch Program to Verify Deaths

**Process Deaths**

## TP 05.3 Action Steps: 05/13/2005

## Use Deathmatch Program to Verify Deaths

A Deceased In the SSA DMF But Alive In PRISM | B DOD In SSA DMF Does Not Match DOD In PRISM | C Deceased In PRISM, But Alive In SSA DMF | D Death Match Processing Reporting | ↑Top

Run the Death Discrepancy Report. FBA and TPD personnel will run the Death Match Report for their cases after the weekly update or upon notification from the Retiree Services Division (RSD). Take action based on the type of discrepancy reported:

### A Deceased In The SSA DMF, But Alive In PRISM

1 Verify the participant's status code in PRISM. If a DOD has been entered and the status code has been changed to 7 (Deceased), the discrepancy has been resolved since the report was run and no further action is necessary. If not resolved, continue processing.

2 Check both CCN and the participant file in IPS for any notification of the death which was not processed. If the death was reported, record the DOD in PRISM Customer to resolve the discrepancy. If not resolved, continue processing.

3 Attempt to resolve the discrepancy by telephone and document all efforts (see TP 31: Document Telephone Calls).

**If telephone contact is made with the participant**, request the participant provide PBGC a copy of the Social Security card within 30 days. Inform payees that a response is needed within 30 days to continue payments (although this period many be extended if the payee requests time to obtain proof of the SSN).

If the SSN in PRISM is correct, advise the participant to contact SSA to correct its death records. Update the participant record in the Death Discrepancy Detail Report with the Disposition Comment "Verified Alive" and image to the participant's IPS file the page showing the Disposition Comment. The discrepancy will be removed once SSA has corrected the SSA DMF and the Deathmatch Program is refreshed.

If the SSN in PRISM is incorrect, update the participant record in the Death Discrepancy Detail Report with the Disposition Comment "Verified Alive" and image to the participant's IPS file the page showing the Disposition Comment. Upon receiving proof of the correct SSN, update PRISM Customer. The discrepancy will be removed once the report is refreshed.

**If telephone contact is made with the Estate or Beneficiary**, log the call as a death notification (see TP 31.3: CCN Call Records Guidelines). Create a record for the beneficiary (if applicable) in PRISM Customer, and process as a death notification by telephone. See TP 05.1 Process Death Notification by Telephone or Mail

**If telephone contact cannot be made** or does not resolve the discrepancy, continue processing.

4 Take appropriate action based on whether the participant is in pay status:

**Payee:** Send Deathmatch letter (ALGS 555), addressed to the payee within 15 calendar days of the weekly Death Match report. This letter asks the payee to provide proof of the correct Social Security number (if PBGC has the incorrect SSN) or to contact SSA to correct its records and provide PBGC a copy of SSA's verification document. It also advises that payments will be stopped if no response to the letter is received within 30 days. Note

that this can be extended if the payee contacts PBGC within that period and requests time to obtain proof.

**Non-Payee:** Send Deathmatch letter for non-payees (ALGS 555NP), addressed to the non-payee within 15 calendar days of the weekly Death Match report. This letter asks the participant to provide proof of the correct Social Security number (if PBGC has the incorrect SSN) or to contact SSA to correct its records and provide PBGC a copy of SSA's verification document.

5 Act upon receiving a response to the Deathmatch letter:

- If the participant sends a copy of the Social Security card and it reveals that PBGC has the incorrect SSN, correct it in PRISM Customer. This resolves the discrepancy.
- If the participant provides a copy of a verification document from SSA that the DMF had an error, add the Disposition Comment "Verified Alive" to the participant's record in the Death Discrepancy Detail Report. The discrepancy will be removed from the report once SSA corrects the DMF and the Deathmatch Program refreshed.
- If the payee advises that he or she is the beneficiary and is using the SSN of the deceased person, enter the Disposition Comment "Using Deceased Spouse's SSN" on the Death Discrepancy Detail Report. Image to the participant's IPS file the page showing the Disposition Comment. Then
  - Ask the payee to provide PBGC proof of his/her correct SSN; or
  - If the payee does not have a Social Security Number (or has one but needs to obtain proof), refer the payee to SSA to obtain an SSN (or card), using the contact information below.

| Resides | Contact |
|---|---|
| **In The USA** | SSA - toll-free number (1-800-772-1213) |
| **Overseas (US Citizen)** | US Embassy or Consulate in the country of residence |
| **Overseas (Nonresident Alien)** | US Immigration & Naturalization Service at the Embassy or Consulate in the country of residence |

**Note:** The discrepancy will be resolved once PBGC receives the person's SSN and the correction is made in PRISM Customer.

  - Inform the payee that PBGC needs the new SSN within 60 days in order to continue payments. If the payee does not provide the SSN within that period, send the payee a Generic ALGS letter advising that payments will be stopped if the SSN is not received within 30 days of the date of the letter. Consult with TPD management and document management's approval before suspending payments. If payments are suspended after 30 days, notify the participant in writing using ALGS. Upon receiving the requested SSN, reinstate payments and issue a special check for missed payments.
- If a response is received that the participant is deceased, enter the DOD in PRISM Customer. Create a PRISM record for the beneficiary or spouse who contacted PBGC and send the appropriate ALGS letter requesting a copy of the death certificate, repayment of checks issued after DOD (if applicable), and advising of beneficiary benefits. If someone other than the beneficiary or spouse contacted PBGC, address the letter to the estate of the payee. See TP 05.1 Process Death Notification by Telephone or Mail.

6 If there is no response to the Deathmatch letter after 30 days or the letter comes back as Returned Mail, act according to pay status:

**Payee:** Use Participant Locator to determine whether the participant's address is current in PRISM. If not, update the address in PRISM and send a new Deathmatch letter. If the Participant Locator effort does not reveal a new address, try to contact the participant by telephone again, documenting all calls in CCN. If unsuccessful, assume the DMF is correct and enter the DOD in PRISM, which will stop further payments. Image a copy of the Deathmatch report page with the DOD to the participant's IPS file. Also image all Participant Locator reports and document (by notation on the reports or by separate memo to the file) steps taken to resolve the issue.

**Non-Payee:** Attempt to locate the participant using Participant Locator. If unsuccessful, enter Disposition Comment "DV and Unlocatable" by the participant's record in the Death Discrepancy Detail Report, and image to the participant's IPS file the page showing the Disposition Comment and DOD. Enter the DOD from the Deathmatch Report in PRISM Customer. Also image all Participant Locator reports and document (by notation on the reports or by separate memo to the file) steps taken to resolve the issue.

**Note** Follow TP 33: Locate Customer Addresses as appropriate.

7 If the participant contacts PBGC after the DOD is recorded in PRISM, act according to the participant's pay status:

**Payee:** Request that the payee provide the required proof to resolve the discrepancy (a copy of Social Security card with the correct SSN or verification from SSA that the SSA DMF contained an error). Benefits may not be reinstated until proof of the payee's SSN is received. To reinstate the payee into pay status in PRISM, follow steps in TP 05.06 - Fix Record After Incorrect Death Entry.

**Non-Payee:** Request that the participant provide the required proof to resolve the discrepancy (a copy of Social Security card with the correct SSN or verification from SSA that the SSA DMF contained an error). Upon receipt, remove the DOD from PRISM and correct the status code.

**B DOD In Death Master File Does Not Match DOD In PRISM**

1 Verify the DOD in PRISM from the CCN and/or IPS files, and correct it if necessary. If a death certificate has been received, use it to update the DOD in PRISM Customer, and also record the death certificate in PRISM. Recording the death certificate in PRISM removes the discrepancy when the report is refreshed, even if the dates in the DMF and PRISM disagree. If the DOD on the SSA DMF is incorrect, advise the person who provided the death certificate to request SSA correct its records.

2 If no death certificate has been received, request one from the person who reported the death . Once it is received, see step 1 directly above to resolve the discrepancy. Document all attempts to obtain the death certificate in CCN and/or IPS.

**C Reported Deceased In PRISM But Alive In SSA DMF**

1 Verify the report of death in CCN and/or IPS. If a death certificate has been received, verify in PRISM Customer that the DOD is recorded and matches the DOD on the death certificate, and that the receipt of the death certificate has also been recorded. The record of a death certificate in PRISM Customer resolves the discrepancy, even if the dates in PRISM and the SSA DMF do not agree.

2 If no death certificate has been received, contact the person who reported the death and request a copy. Document all attempts to obtain the death certificate in CCN and/or IPS. Upon receiving it, verify that the DOD on the death certificate as well as the receipt of the death certificate have been recorded in PRISM Customer. The record of a death certificate in PRISM Customer resolves the discrepancy, even if the dates in PRISM and the SSA

DMF do not agree.

3 If there is no record of a report of death in IPS or CCN, verify whether the participant is deceased or alive and document all efforts in CCN and/or IPS. If the participant is found to be alive, remove the DOD from PRISM Customer to resolve the discrepancy. If the participant is found to be deceased, document evidence of the death in CCN and/or IPS and attempt to obtain a death certificate. Once received, verify the DOD on the death certificate matches the date in PRISM, and record the receipt of the death certificate in PRISM Customer. The record of a death certificate in PRISM Customer resolves the discrepancy, even if the dates in PRISM and the SSA DMF do not agree.

## D Death Match Processing Reporting

1 TPD and FBA Management monitor compliance for their cases, ensuring the process is performed in the prescribed timeframes.

2 TPDs and FBAs document their Death Match processing each month, and maintain a file that supports their review.

**Process Deaths**

## TP 05.4 Determine Benefits Due Survivor, Beneficiary or Estate 08/19/2004

Action Steps

| | |
|---|---|
| **Purpose** | Determine whether benefits are due a surviving spouse, beneficiary or an estate. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Deceased participant's form of benefit, completed J& S Waiver form.<br>Deceased beneficiary - determination of whether additional benefits are due.<br>Determination of whether plan provides for survivor benefit (in addition to J& S), from Plan Provisions. |
| **Process Output and Recipient** | PCM 200 or 500 series letter, as appropriate, to the surviving spouse, beneficiary or estate. |
| **Control Issues** | Ensure that all proper supporting documentation is imaged to the participant's, surviving spouse's or beneficiary's file (IPS). |
| **Important Concepts** | Request return of checks issued or repayment for months after the death of the payee. If the request is not successful, apply recoupment (for overpayments received by the new payee), or recovery (for overpayments received by any other party). PBGC will grant a request from a surviving spouse for a temporary suspension of the surviving spouse's benefits to repay PBGC for amounts paid in error after the participant's death. Effective July 25, 2000, IOD accepts a notarized **Signature by Mark** such as an X. If the form of benefits is a C&C, and benefits remaining for the period certain are payable to an estate, the estate may elect whether to receive the payments in one payment or in installments. Document the calculation of the single payment amount to IPS, and provide in writing to estate.<br>**Timing:** Identify survivor or beneficiary for eligibility for ongoing benefits within 7 days of receipt of notice or verification of death. Promptly process payments due the surviving spouse or beneficiary, ensuring that payments are effective the month after the payee's DOD. See TP 20: Put New Payee in Pay Status. |

TP 05.4 Action Steps: Determine Benefits Due To Survivor, Beneficiary or Estate

**Process Deaths**

## TP 05.4 Action Steps: 08/19/2004
## Determine Benefits Due Survivor, Beneficiary or Estate

1 Determine if the participant was a payee or deferred vested before death. Depending on the status, take action:

**Payee:**

- If the form of benefit is a Straight Life Annuity, generally no survivor benefit is due. Review Plan Provisions and/or AVR in plan file (IPS) to determine if the plan has a surviving spouse benefit in addition to the SLA.
- If the form of benefit is a J&S, determine if there is a surviving spouse and the amount to be paid.
- If the form of benefit is a Certain & Continuous Annuity, determine if the period certain has expired. If not, the benefits due for the remaining months of period certain should be paid to the beneficiary. If there is no surviving beneficiary, refer to PBGC Policy Manual 8.6-1. If a beneficiary who was receiving the balance of a C&C dies before receiving all payments, the balance should be paid to the surviving beneficiary.
- If there is a QDRO, determine whether benefit payments to the Alternate Payee continue or change after the participant's date of death.

**Deferred Vested Participant / Not in Pay:**

If the benefit payable is a de minimis benefit, see PBGC Policy Manual 8.6-1: PBGC Payments Owed to Deceased Participants.

**DOD is before NRA**

If the participant was married, spouse is entitled to the Qualified Preretirement Survivor Annuity (QPSA). See PBGC Policy 5.7-2: QPSAs in Plans Terminating on and after 8/23/84.
(Exception if a pre-REA case.)

If the participant was not married, no benefit is due, even if the plan's normal form of benefit is C&C.
(Exception if a participant was entitled to an unreduced early retirement benefit, treat this as if DOD is post-NRA, and as if the early retirement age is the NRA.)

**DOD is after NRA**

In all cases, PBGC pays benefits to which the participant was entitled from NRD to the month of death.

If the participant was married, determine benefits under plan's normal form for married participants, and put surviving spouse into pay status. The spouse is also entitled to backpayments of the ***participant's benefit*** for the period that benefits should have been paid to the participant through DOD.

If the participant was not married (normal form is SLA or C&C), refer to PBGC Policy Manual 8.6-1 to determine correct beneficiary. If there is a QDRO, check the participant's file (IPS) to determine if and when benefits should be paid to the Alternate Payee.

2 If a survivor benefit is determined, create a record in PRISM if needed, and prepare and send the appropriate letter from PRISM ALGS 200 or 500 series (see TP 15: Prepare and

Mail Letters.) In all scenarios, request a copy of the death certificate if not already received at PBGC **and** request return of any payments made after the month of death. (Carefully review PRISM and IPS to determine the correct amount of payments that must be returned, if any.)

If there is no survivor benefit due, the letter will simply confirm the death notification and request the death certificate copy.

For a contingent annuitant, prepare and send the appropriate Benefit Application Package (BAP). The BAP will specify what proof documents are needed.

For beneficiaries (other than the spouse), prepare and send the appropriate BAP.

For estates, request documentation of the identity of the administrator of the estate (Letter of Administration or comparable court documents.) Estates may elect to receive a lump sum payment of the remainder of period certain payments that would have been paid in the future. Contact the estate administrator to determine which form of payment is desired and send the appropriate application for benefits. If a lump sum is elected, see note below regarding calculation of benefit.

**3** Upon receipt of the required documents to put the survivor/beneficiary/estate in pay, follow TP 20: Put New Payee in Pay Status. Ensure that the calculation supporting the amounts paid are imaged.

**Note:** To determine the amount of benefits payable to an estate, the amount of **future payments due** (balance of C&C period certain payments) is discounted using the federal mid-term rate (as determined by the Secretary of the Treasury pursuant to section 1247(d)(C)(ii) of the Code) applicable for the month the participant died based on monthly compounding. The determination of amount of benefits due for any prior months have interest calculated as with any other back payment.

**4** If a surviving spouse, who was married to the participant at the annuity starting date, responds to advice from PBGC of no entitlement (ALG letter 505S) and claims a benefit, determine if the participant

— entered pay status on or after January 01, 1985 (enactment of REA 08/23/1984).

— was married or treated as married as a result of a QDRO at the annuity starting date

— received a form of benefit that was not a QJSA.

- If yes, check the participant's file (IPS) for a J&S waiver, signed by the spouse and notarized. If one is found and the spouse alleges that the signature is forged, or he or she did not waive the QJSA, refer the matter to the Office of the Inspector General (OIG). OIG will evaluate the matter and advise processing staff of the status of the referral at the end of 60 days. If OIG decides to close a case because the spouse, who alleges forgery, is uncooperative, OIG will notify the spouse of their decision. If, at a later date, the spouse cooperates with OIG, OIG will notify processing staff that they have reopened the case.
- If no, determine whose responsibility it was to obtain the waiver. DOPT will be the determining factor.
  - — If the participant went into pay status on or after DOPT, PBGC is responsible. If the spouse claims that he or she did not execute a waiver, PBGC will pay a survivor benefit.
  - — If the participant went into pay status before PBGC trusteed the plan, refer the matter to OPSS for decision if it cannot be determined that the plan followed REA's requirements.

**5** Upon approval to pay a survivor benefit, the spouse will be required to submit an affidavit

and reimbursement agreement, which includes a sworn statement that the spouse did not waive the QJSA (obtain documents from OPSS). The benefit will be adjusted retroactively to the annuity starting date and will be subject to recoupment of the overpayment to the deceased participant.

**6** In all other cases, PBGC will not pay the surviving spouse a QJSA benefit (unless the surviving spouse provides convincing evidence -- copy of a benefit application electing a QJSA). If the participant received a BDL and the appeal deadline has passed, send a copy of the participant's BDL to the spouse, with explanation that the right to challenge it expired. If a BDL was not issued, or the participant died before the appeal deadline, send a BDL to the surviving spouse. The BDL must state that there is no entitlement to the QJSA survivor's annuity as the participant's pay status benefit was not a QJSA and the plan practiced the REA election requirements.

| **Required Input and Source** | Proof that payee (recorded in PRISM as deceased) is alive. |
| **Process Output and Recipient** | Resumption of payment or prevention of disruption in payment. |
| **Control Issues** | Verification that the payee is alive is important to maintain PBGC's internal controls. |
| **Important Concepts** | N/A |
| **Guidance** | Check Schedule Key Dates |
| **Procedure Owner** | PLS, FBA, FBA |

## Click Here for More Information...

TP 05.5 Action Steps: Fix Record After Incorrect Death Entry

**Process Deaths**

## TP 05.5 Action Steps: 08/19/2004
## Fix Record After Incorrect Death Entry

When a DOD is entered and saved in PRISM and there is reason to undo it, the following should be considered.

- Was it discovered - immediately - within the check cycle - after the check cycle?
- Was it authorized?
- Was the record already transmitted to PLUS?

Correct the record depending on which category is applicable.

**Immediately**

1 If the error is discovered immediately or before the transaction is authorized, remove the date of death from the record and save. A reject transaction will automatically be sent to the authorizer's queue (this action removes it from the queue). The record will not be transmitted to PLUS. This means that the customer's benefit will not be disrupted.

2 Go to the annuity screen in PRISM Benefits and change the end date of the pay source back to what it was before the DOD was entered.

3 If the system does not allow the end date change, seek help from the Data Correction Team, TSD.

**After authorization**

If date of death was entered and saved, is auto-authorized or has been authorized by an authorizer, the transaction is sent to the submit queue for transmission to PLUS, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

1 Go to PRISM Customer and delete the date of death and save. The status code changes back to 1. The record will be transmitted to SSC as a status 1 with an end date of the current month.

2 If this is discovered within the current check cycle and before the end of the month in which the DOD was entered, go to the annuity record in PRISM Benefits and change the end date back.

3 If it is after the end of the month, but before the scheduled transmission date to PLUS, seek help from the Data Correction Team, TSD, to have the end date reversed. The record must then be forwarded and authorized before the cut-off date. In this case, if it was an auto-authorizer (e.g. CSC staff) who entered the transaction, the PLS/FBA/PBA for the plan must be advised to take corrective action as outlined.

**After transmission to PLUS**

1 Remove the DOD from Prism Customer. Save the transaction.

2 Go to the PRISM Benefits and populate the next available pay source (estimated or final). Forward the record for authorization. (This will require a special check to make up for the missed month/months).

**Process Deaths**

## TP 05.6 Determine Post-Death Payments Designee 08/19/2004

Action Steps

| | |
|---|---|
| **Purpose** | To determine the correct beneficiary of a deceased payee to whom PBGC owes benefits. |
| **Time Reporting** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Deceased Payee's Date of Death (DOD)<br>Designation of Beneficiary from Payee<br>Plan Designation of Beneficiary |
| **Process Output and Recipient** | Determination of who is entitled to benefits owed a deceased payee. |
| **Control Issues** | Ensure that all proper supporting documentation is imaged to the deceased payee and/or Beneficiary's file (IPS), and that the PRISM records are linked. Document all telephone contact(s) in CCN. |
| **Important Concepts** | This process applies when a deceased payee **does not** have a surviving contingent annuitant. If there is, pay that person rather than using the rules in this section. Note that processing differs based on whether the date of death occurred before June 1, 2002, **or** on or after that date. PBGC payment rules supercede provisions in wills or other testamentary documents submitted to PBGC by claimants. |
| **Guidance** | PBGC Operating Policy Manual 8.6-1 |

TP 05.6 Action Steps: Determine Post-Death Payments Designee

## TP 05.6 Action Steps: 08/19/2004
## Determine Post-Death Payments Designee

1 Verify that payee does not have a surviving contingent annuitant.

2 Verify that amounts owed to a deceased payee are one of the following:

- Underpayment
- De minimis Lump Sum
- Reissuance of uncashed check(s)
- Backpayments

If yes, continue processing. If not, contact OPSS for guidance.

3 Determine beneficiary from following guidance, based on decedents date of death (DOD). If DOD is on or after June 1, 2002, process following TP 5.6A. If DOD is prior to June 1, 2002, process following TP 5.6B.

# TP 06. Recover Overpayments

TP 06. Overview
TP 06. Workflow
TP 06.1 Determine Overpayment Amount and Debtor
TP 06.2 Initiate the Recovery Process
TP 06.3 Continue the Recovery Process
Forms, Letters, Memos, etc.

# TP 06. Overview

**12/13/2002**

PBGC seeks recovery of an overpayment from a person who was not entitled to future annuity payments as of DOPT in accordance with PBGC's Operating Policy Manual 6.4-2 - Recovery of Post-DOPT Benefit Overpayments. Recovery actions are limited to overpayments made on or after the latest of the proposed DOPT, the actual DOPT or if no NOIT is filed, the NOD date. PBGC waives a debt of $500 or less ($10,000 or less for a deceased debtor).

### Recovery Method

IOD notifies the debtor of the overpayment in the first demand letter and offers interest-free installment payments to repay the debt. IOD seeks the debtor's commitment to repay PBGC by executing the Installment Payment Agreement and returning it to FOD. The debtor is required to repay the debt within five years with a minimum installment of $25.00 per month. IOD accepts payment of the full amount in a single payment at the debtor's request. However, debtors are advised that it is financially better to make installment payments, as PBGC does not charge interest on installment payments that are made on time. If the debtor does not respond to the first demand letter, the TSD Recovery Coordinator issues the second/final demand letter.

### Debtor

The debtor is the person who received the overpayment and may be the participant, beneficiary, or other person. There may be more than one debtor -- e.g., a non-vested participant was paid and after his death, another person continued to receive payment in a joint account. The participant is the debtor for the amount that was paid during his lifetime, and the other person is the debtor for the amount that was paid after the participant's death. Where EDD payments were made after a participant's death to a joint account, and the other party who is signatory to the account does not return the overpayment(s), that person is the debtor. The debtor may also be an estate (if the estate administrator confirms that the estate holds payments made after the death of a payee). Typical debtors are:

- Estimated lump-sum payees
- Non-vested participants who are in pay status
- Persons who take deceased payees' benefits
- Estates
- In limited cases, recipients of C&C benefit overpayments

Deceased payees' benefits received by contingent annuitants are not subject to recovery, but recoupment usually applies, see TP 07: Recoup Overpayment.

### Deceased Debtors

PBGC writes off debts of:

- $10,000 or less if the debtor dies before the recovery process starts.
- $10,000 or less if the debtor dies after the recovery process starts but without a completed Installment Payment Agreement.
- Any amount if the debtor dies after executing an Installment Payment Agreement.

The TSD Recovery Coordinator refers all other cases to OGC.

### Estates

If the estate administrator confirms that the estate holds payments after a deceased payee's death

and the amount is more than $500, the TPD/FBA requests repayment from the estate in a single amount. If the estate does not repay within 30 days, the TSD Recovery Coordinator refers the case to OGC. Demand letters are not sent to an estate and estates are prohibited from seeking hardship consideration.

**Hardship Provision**

With the October 03, 2002, recovery policy revision PBGC advises a debtor that it will consider reducing or waiving a debt if the debtor feels that he/she is unable to pay the debt and seeks hardship consideration. A debtor does so by requesting information from the TSD Recovery Coordinator on how to apply. Upon receipt of a hardship request, the TSD Recovery Coordinator refers the case to OGC for their determination. The TSD Recovery Coordinator communicates OGC 's determination to the debtor and takes other action, as necessary.

The debtor may also request hardship consideration during the time that installment payments are being made to PBGC. FOD processes any requests received during that time.

**Request for Return of Payments**

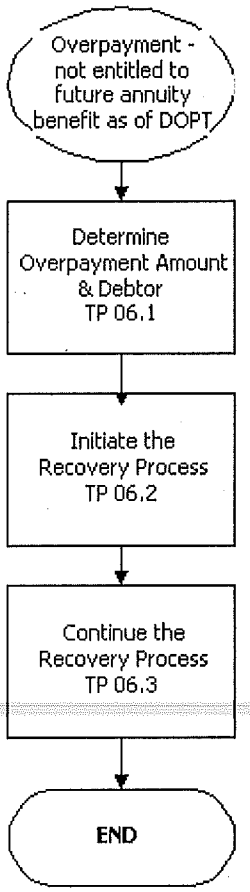
IOD requests that payments made after the month of a payee's death be returned to PBGC in all cases regardless of the amount unless SSC was able to stop the payments. This is also applicable if a lump sum payment is made. If the payment is not returned within 30 days of the request, recovery or recoupment action applies.

**Technical Procedures** **Browse Workflows:**

**Recover Overpayments**

## TP 06. Workflow for Technical Procedure 06

**06/09/2000**



**Recover Overpayments**

## TP 06.1 Determine Overpayment Amount and Debtor 12/13/2002

Action Steps

| | |
|---|---|
| **Purpose** | Establish the total overpayment amount and determine identity of debtor(s). |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | No future annuity benefits were payable to the debtor as of DOPT. Amounts paid and period of each payment stream, or date and amount if payment was a lump sum. |
| **Process Output and Recipient** | Total amount of overpayment (this amount is not reduced for income taxes withheld when the benefit was paid). |
| **Control Issues** | A debt of $500 or less ($10,000 or less for a deceased debtor) is written off documented by the Write-off Memo (a tracking number is not required.)<br>Repayments made to PBGC are posted to the payee's ledger, PRISM Browser, screen 202 even if the debtor is not the payee.<br>A tracking number is required for all recovery cases ($500 or more; $10,000 or more for a deceased debtor) and is inserted on all correspondence relating to the recovery case (participant letters, internal memoranda and relevant forms).<br>PBGC does not recover payments made after a C&C benefit should have ceased if PBGC did not advise the payee of the cessation date.<br>PBGC does not recover overpayments resulting from revised benefit determinations unless the debtor is at fault. |
| **Important Concepts** | The debtor is the person who actually received the overpayment.<br>There may be more than one debtor.<br>The overpayment is not reduced for income taxes withheld when the benefit was paid.<br>• Timely processing is important as delays may reduce PBGC's collection options. |
| **Guidance** | IOD Policy Bulletin 95-3 (for pre-85 DOPT only)<br>PACS Helpfile<br>PBGC Operating Policy Manual 6.4-2 |
| **Procedure Owner** | PLS, PBA, FBA |

TP 06.1 Action Steps: Determine Overpayment Amount and Debtor

**Recover Overpayments**

# TP 06.1 Action Steps: 12/13/2002
# Determine Overpayment Amount and Debtor

## Determine Overpayment Amount

1 For recovery associated with a BDL sent after final valuation, the amount was determined during Process 19.3 Determine Net Overpayment/Underpayment Status for Annuities and Process 19.4 Determine Overpayment/Underpayment for Lump-Sums.

2 For other recoveries, identify all payments that exceeded the benefit amount or were made after the month of a payee's death and were not returned.

3 Check the payee's ledger, PRISM Browser, screen 202 for payments made and payments the debtor returned or made to PBGC, if any.

4 There is usually lapse time of approximately two weeks before the payment to PBGC can be viewed in PRISM Browser, screen 202. However, a completed CARF will give information on the payment. For more information on check processing, see TP 08: Process Returned/Received Check.

5 Review the prior paying agent's pay records and research them to determine if overpayments may have occurred between DOPT and the date of plan assumption.

6 In all cases, count only the overpayments made after the latest of the proposed DOPT, actual DOPT and NOD. If a NOIT was issued, disregard the NOD date (PACS is programmed with the correct cut-off date).

7 Use PACS to calculate the overpayment. The PACS output is a "Recoupment Summary". Delete "recoupment" and insert "overpayment" in the table.

8 If the plan's DOPT was before 01/01/85, review IOD Policy Bulletin 95-3. Recovery may be waived for BDLs issued after 06/19/95.

9 For an overpayment of $500 or less, $10,000 or less for a debtor who is deceased, complete a *Write-off Memo (Trkwroff.doc)* and have it imaged to the payee's file (IPS).

10 If the amount of the overpayment is more than $500 (more than $10,000 for a deceased debtor), go to TP 06.2: Initiate the Recovery Process.

## Identify The Debtor

11 Identify the individual who received the overpayment. This person is the debtor.

12 If it appears that a deceased payee's estate received payments made after the month of death, verify with the estate administrator that the estate holds the payment.

13 If the debtor cannot be identified or located, document efforts to identify or locate the debtor on a memo to the payee's file. Request a tracking number and advise the TSD Recovery Coordinator to close the case.

**Recover Overpayments**

## TP 06.2 Initiate the Recovery Process

**01/10/2003**

Action Steps

| | |
|---|---|
| **Purpose** | To recover overpayments from debtors according to PBGC's policy. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Information on a debtor, an overpayment amount of more than $500 ($10,000 for a deceased debtor) and determination of the appropriate first demand letter or other necessary action.<br>Recovery tracking number from TSD Recovery Coordinator. |
| **Process Output and Recipient** | Based on type of debtor:<br>First demand letter to the debtor.<br>Letter to an estate if confirmed that estate holds payments of more than $500.<br>Referral of deceased debtor cases over $10,000 to the TSD Recovery Coordinator and OGC. |
| **Control Issues** | Each recovery case must have a recovery tracking number from the TSD Recovery Coordinator before the first demand letter or estate letter is sent. Manually insert the total debt, monthly payment, number of months and tracking number on the Installment Payment Agreement (Form 718).<br>The TSD Recovery Coordinator handles all requests for hardship consideration.<br>The TSD Recovery Coordinator does not receive notifications of responses from debtors through SCORE. Processing staff must advise the TSD Recovery Coordinator to check IPS when notified of relevant correspondence.<br>A de minimis overpayment may no longer be de minimis by the time an appeal is resolved because of payments made during the appeals period. In a situation like this, IOD freezes the de minimis overpayment to avoid recovery after resolution of the appeal. This is applicable to BDLs issued on or after October 28, 2002 and for unresolved appeals as of this date. However, the overpayment is not frozen when the Appeals Board's decision decreases the benefit, resulting in an amount above the de minimis overpayment. |
| **Important Concepts** | Send cases of recovery actions that are initiated through BDLs that became effective before May 29, 1998 to the TSD Recovery Coordinator if the overpayment would have been subject to recovery rather than recoupment. The Recovery Coordinator forwards these cases to OGC for consideration on a case-by-case basis.<br>Write off a debt of:<br>$500 or less<br>$10,000 or less (deceased debtor)<br>PBGC also writes off a debt of any amount if a debtor dies after executing the Installment Payment Agreement. |

| | |
|---|---|
| | The PBGC and Debt Collection information sheet is automatically sent with the demand letter.<br>The TSD Recovery Coordinator does not handle issues on recoupment.<br>**Timing: Referrals to the TSD Recovery Coordinator**<br>ALGS 400 series - within 30 days after the expiration of the 45-day appeal period or Appeals Board decision<br>ALGS 506 - within 60 days after issuance |
| **Guidance** | PBGC Operating Policy Manual 6.4-2<br>IOD Policy Bulletin 03-2<br>PRISM ALGS Letters (electronic manual in IOD Manuals System) |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

TP 6.2 Action Steps: Initiate the Recovery Process

# TP 06.2 Action Steps: Initiate the Recovery Process

01/19/2005

**For debts of more than $500 (more than $10,000 for a deceased debtor)**

1 Prepare a *Recovery Tracking Number Request Memo (Rectrack.doc)* to the TSD Recovery Coordinator. Provide:

- Name of debtor and SSN (name and SSN of associated payee, if different)
- Amount of overpayment
- Case number
- there are indications that fraud may be involved a brief description of the indications. Management's concurrence is necessary in these situations.
- Date of death (if applicable)

2 Upon receipt of the tracking number, take action according to the table below. Any ALG letter to a debtor must be customized and details of the debt and tracking number must be manually inserted on letter and page 2 of Form 718, as applicable.

| If the debtor is: | Do the following: |
|---|---|
| A living participant or beneficiary | Send a recovery BDL, ALGS 404R, 414 or 415 |
| A living person other than the participant or beneficiary | Send ALGS 506.<br>Note that this may be a fraud situation. |
| Deceased | Prepare a *Deceased Debtor Memo (Decdbtor.doc)* and refer to TSD Recovery Coordinator. |
| An estate (estate holds payments of more than $500 made after the month of a payee 's death) | Send ALGS 509 to the estate requesting payment of the full amount within 30 days. If the estate does not pay within this time, refer to the TSD Recovery Coordinator using *Estate Referral Memo (Estref.doc)* |

3 Check IPS and CCN for communication from the debtor. Based on the debtor's response, take action:

| If the debtor: | What to do --- |
|---|---|
| Returned the executed Installment Payment Agreement to FOD | Advise the TSD Recovery Coordinator. |
| Requested hardship consideration | Mark your records that this case in now with the TSD Recovery Coordinator – no action is required.<br>Refer a debtor to the TSD Recovery Coordinator if request for hardship is made to anyone other than the TSD Recovery Coordinator. |
| Made payment in full | Advise the TSD Recovery Coordinator. |

| | |
|---|---|
| Requested a review of PBGC's records on the debt (different from an appeal) | Advise the Recovery Coordinator of the debtor's request. The Recovery Coordinator will take the necessary follow-up action. |
| Advised that he/she is unwilling to repay the debt or does not respond at all | Forward the case within these timeframes to the TSD Recovery Coordinator to send the final demand letter.<br>ALGS 400 series - within 30 days after the expiration of the 45-day appeal period or Appeals Board decision<br>ALGS 506 - within 60 days after issuance |
| Appealed the determination or filed an extension (applicable for ALGS 404R, 414 and 415 only)<br>If an extension request was filed (this may not show up in IPS until a few days after the 45 days (the letter has to be postmarked by the 45th day). | • Advise the TSD Recovery Coordinator, see Process 20.1 Respond to PEAD Acknowledgment of Appeal or Extension Request.<br>• If the appellant is the participant or alternate payee to a QDRO, notify the Recovery Coordinator by e-mail to the Recovery mailbox to stay the recovery process for all parties to the QDRO until an Appeals Board decision is made.<br>• Based on the Appeals Board's decision, advise the TSD Recovery Coordinator within 30 days to send the final demand letter or close the recovery case because a corrected Benefit Determination Letter will be issued. |

**4** Refer to the TSD Recovery Coordinator recovery actions that were initiated through Benefit Determination Letters that became effective before May 29, 1998 if the overpayment would have been subject to recovery rather than recoupment before May 29, 1998.

**5** Ensure that a copy of each memorandum and other related documents is scanned to the debtor's file (IPS). (Where the debtor is not the payee, documents should be scanned to the related payee's file see Process 21.3 on cross-referencing.)

**Recover Overpayments**

## TP 06.3 Continue the Recovery Process

**12/13/2002**

**Action Steps**

| | |
|---|---|
| **Purpose** | To take appropriate follow-up action of the debtor's response to the 1st demand letter.<br>To monitor response to the final demand letter.<br>To ensure that all recovery cases are closed or forwarded to the appropriate PBGC Departments for necessary follow-up action. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Advice from TPD/FBA that the debtor -<br>Executed the Installment Payment Agreement or made full payment.<br>Did not respond within the period allowed or that the debtor advised he/she is unwilling to pay the debt.<br>Died during the initial recovery process.<br>Referral of an estate case from TPD/FBA.<br>Request from the debtor for hardship consideration. |
| **Process Output and Recipient** | Close the recovery case.<br>Send the second/final demand letter.<br>Respond to the debtor's request for hardship consideration by sending the debtor information on how to apply.<br>Process a hardship request after receiving relevant information.<br>Referral of certain cases to the FOD, OGC and OIG |
| **Control Issues** | The Write-Off Memo documents actions taken to write-off debts of $10,000 or less if the debtor dies during the recovery process without executing an Installment Payment Agreement.<br>Requests from debtors for hardship consideration are recorded in CCN, see TP 31: Document Telephone Calls for appropriate follow-up and tracking. |
| **Important Concepts** | The TSD Recovery Coordinator must receive all information necessary in a timely manner to process the recovery cases and to update its recovery tracking system on all recovery cases.<br>A debtor may request hardship consideration after receiving the first demand letter or final demand letter.<br>**Timing:**<br>The TSD Recovery Coordinator forwards cases to FOD, OGC and OIG or consults with OGC within 10 days after the response period to the second/final demand letter expired. |
| **Guidance** | PBGC Operating Policy Manual 6.4-2<br>PRISM ALGS Letters (electronic manual in IOD Manuals System) |
| **Procedure Owner** | TSD Recovery Coordinator and staff |

**Click Here for More Information...**

TP 06.3 Action Steps: Continue the Recovery Process

# TP 06.3 Action Steps: Continue the Recovery Process

12/13/2002

**TSD Recovery Coordinator**

1 Issue recovery tracking number to processing staff upon receipt of a *Recovery Tracking Number Request Memo (Rectrack.doc).*

2 Take action on the debtor's response to the first demand letter or estate letter as advised by processing staff or by the debtor.

| If the debtor : | Do the following: |
|---|---|
| Executed Installment Payment Agreement or made full payment. | Close case |
| Did not respond within the period allowed or advised he/she is unwilling to pay the debt | Send second/final demand letter (ALGS 504) |
| Died before executing an installment payment agreement | Refer to OGC |
| Is an estate | Refer to OGC |
| Requests a review of records pertaining to the debt | Consult with OGC and follow-up with debtor |
| Request hardship consideration | Take appropriate action on a debtor's call, see TP 31:Document Telephone Calls . If requested, send the hardship letter (ALGS 513) and follow-up on the debtor's response. |

3 If the debtor does not respond to the final demand letter, follow up appropriately within ten business days:

- Forward cases to OIG if there are indications of possible fraud.
- Review with OGC, cases –
  - of substantial overpayments (more than $20,000) where it appears that the debtor could repay
  - where enforcement may be necessary
  - where collection efforts may be inequitable or unconscionable
- Forward all other cases to FOD including those that OGC returned.

4 Monitor the outcome of hardship review request after the first demand letter. Check the debtor's file in IPS.

- If the debtor does not submit the hardship review request within the specified time, send the final demand letter.
- Refer completed hardship review request from the debtor with a competed file on the debtor to OGC within 10 business days. Based on OGC's decision, advise the debtor that PBGC reviewed their request and:
  - Waived the debt - send ALGS 516

- Reduced the debt, send ALGS 517. Insert the reduced amount and payment terms on a new Installment Payment Agreement.
- Did not grant waiver or reduction, send ALGS 505, second/final demand letter

- f the debtor does not return the executed Installment Payment Agreement after receiving ALGS 517 (reduced debt) or final demand letter (ALGS 515 – hardship was not granted), forward the case to FOD.
- If the debtor executed and returned the Installment Payment Agreement, close the case.

**5** Monitor the outcome of hardship review request after the second/final demand letter. Follow steps under 4 above except if the debt was not reduced or waived, advise the debtor and forward to FOD.

**6** Refer cases to OGC where the debtor is deceased and the amount of the overpayment is more than $10,000.

**7** Refer to OGC for consideration on a case-by-case basis recovery actions that were initiated through Benefit Determination Letters that became effective before May 29, 1998 if the overpayment would have been subject to recovery rather than recoupment before May 29, 1998. TSD referrals to OGC will be in a format that OGC specifies to allow the OGC file room to process the referrals properly.

**8** Prepare written documentation of all referrals of cases to FOD, OIG and OGC and have a copy scanned to the participant's file (IPS).

**9** Maintain a tickler system to ensure that cases remain on track.

## TP 06.4 Forms, Letters, Memos, etc.

# TP 07. Recoup Overpayment

TP 07 Overview

TP 07 Workflow for Technical Procedure 7

TP 07.1 Determine Net Overpayment

TP 07.2 Identify Exceptions to 10% Reduction

TP 07.3 Process QDRO related recoupments

TP 07.4 Effect Recoupment and Notify Payee, if necessary

TP 07.5 Process 4022(c) Benefit where Title IV benefit is being recouped

TP 07.6 Take Appropriate Action on payee's response

Forms, Letters, Memos, etc.

# TP 07. Overview

**01/19/2005**

PBGC uses recoupment to seek repayment of overpayments made to payees when there are future annuity benefits payable with respect to the participant as of DOPT. If there was no annuity benefit payable as of DOPT, recovery applies, see TP 06: Recover Overpayments. Some reasons for overpayments are:

- delays in reduction of benefits to estimated Title IV levels
- Plan Administrators' or PBGC's errors in the computation of benefits
- incorrect information that participants or beneficiaries provide
- failure to implement communicated benefit reductions

PBGC reduces future benefits payable to a payee under its recoupment regulation(subpart E of 29 CFR Part 4022) as amended May 29, 1998 and its Operating Policy Manual 6:4-1. Recoupment ends ( recoupment end date) when a payee repays through recoupment the amount of the net benefit overpayment without interest. Only if a payee insists, will PBGC accept full repayment of an outstanding benefit overpayment that is subject to recoupment. PBGC will advise the payee that prepayment has disadvantages because PBGC does not charge interest during the recoupment period.

PBGC still may seek the return of payment(s) before initiation of formal recoupment action when the error is discovered in the following situations:

- erroneous payment made after the month of the payee's death.
- erroneous payment of a benefit that should have been suspended pending a determination regarding whether a Domestic Relations Order is a QDRO, see TP 13.3: Make QDRO Payments.

## Computation Method

PBGC computes net overpayment or underpayment with respect to a participant's entire benefit (all payments made and payable to the participant and any contingent annuitant), and recoups only the net overpayment from all future benefits including contingent annuity benefits. A benefit overpayment amount includes all underpayments on and after DOPT, and only those overpayments made on and after the latest of the proposed DOPT, the actual DOPT or if no NOIT is filed, the NOD date. If a participant dies before the recoupment end date, and has a contingent annuitant, recoupment will continue from the survivor's annuity. PBGC recomputes the recoupment end date when they put the surviving spouse or other beneficiary into pay, see TP 20: Put New Payee in Pay Status.

PACS calculates benefit overpayments according to the regulations and policy. The benefit reduction is a percentage reduction, generally limited to 10% of the benefit except in specified circumstances, see TP 07.2 Identify Exceptions to 10% Reduction. PBGC does not report the recoupment amount as taxable income.

## A Waiver of Recoupment

PBGC waives recoupment if the overpayment is:

- $500.00 or less (for Benefit Determination Letters issued after June 19, 2000)
- A final partial monthly recoupment amount (i. e. , the final month's recoupment amount is less than the amount of the monthly recoupment reduction)

**Revised Benefit Determination Letters**

If PBGC revises a final Benefit Determination Letter, recoupment does not apply to the difference between the original and revised amount when the revision decreases the benefit. The following are exceptions:

- An error for which the payee is responsible
- A QDRO
- An adjustment in a disability benefit based on a Social Security disability award
- A benefit change following a benefit suspension
- PBGC changed the benefit form to a QJSA after a surviving spouse claims that they did not consent to a QJSA waiver.

**Benefits Attributable to Other Plans or Other Participants**

PBGC generally recoups only from the benefit for which the overpayment was made in situations where:

- A beneficiary of a deceased participant has a contingent annuity subject to recoupment and is entitled to a termination benefit in his or her own right.
- A participant who received an overpayment is entitled to a benefit from more than one plan.

However, an exception applies when a payee received a benefit overpayment subject to recoupment, and is entitled to benefits from one or more related trusteed plans (i. e. , plans maintained within the same controlled group). PBGC may compute the benefit overpayment or underpayment and the percentage recoupment reduction as if the related plans were a single plan. PBGC pays underpayments in a single payment (special check). For overpayments, PBGC applies the percentage recoupment reduction to benefits payable from each of the related plans, and issues BDLs for the related plans simultaneously. Contact OPSS for additional guidance on recoupments involving related plans.

Recoupment that follows as part of issuing BDLs after final valuation requires the same peer review within the TPD/FBA as do all BDLs. Peer review is done for accuracy in the selection of the letter, and to ensure that data from the correct sources have been used. In these cases, PBGC is recouping overpayments because they paid the participant the incorrect estimated amount. BDLs issued on or after June 19, 1995 for certain PBGC-trusteed plans are exempt from recoupment or recovery efforts, see IOD Policy Bulletin, 95-3 and attachment.

TP 07.1 Action Steps: Determine Net Overpayment

**Recoup Overpayment**

## TP 07.1 Action Steps: Determine Net Overpayment

**03/08/2002**

1 Review the participant file (IPS) for PLUS data entry forms to determine pay amounts and begin and end dates.

2 Review the pay sources of the annuity record in PRISM Benefits to verify begin and end dates of each pay amount.

3 Refer to ledgers to confirm that payments reflected in PRISM pay sources were actually made:

PRISM Browser, screen 202

CompuServe ledgers for PBGC payment history before 1986.

4 Obtain the present value figure for the participant from the Final Valuation Close-Out Report.

5 Review the benefit calculation to obtain the termination benefit the participant is entitled to receive.

6 Access PACS with your UserID and PRISM password.

- Enter the participant's SSN and 8-digit Case number.
- Follow the steps in PACS and input data not automatically populated from GENESIS.
- Add comments, if necessary for future reference, and ensure that the box beside "Display Comments on Report" is checked to insert the comments on the summary.
- Print both the PACS Recoupment Summary and Detailed Summary.
- Ensure that both summaries are scanned to the participant's file (IPS).

7 If the recoupment amount is $500 or less, prepare the *Recoupment Waiver Memo (Recoupwv.doc)* to file.

8 Follow TPD guidelines for approval of recoupment summary, peer or management review and concurrence.

9 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

TP 07.2 Action Steps: Identify Exceptions to 10% Reduction

Recoup Overpayments

# TP 07.2 Action Steps: Identify Exceptions to 10% Reduction

03/08/2002

PBGC policy identifies situations for which PBGC can recoup above the 10% limit. The reason for the overpayment determines the percentage above the limit. Two categories of above the limit recoupments apply:

Above the 10% Temporary 40%

## Above the 10%

### A Payments in excess of plan levels

This applies if all benefits paid with respect to a participant after DOPT exceeds the total of all benefits payable under terms of the plan. PBGC will compute the reduction percentage and apply it even if it is more than 10%. If the reduction is not sufficient to recoup the entire benefit overpayment, PBGC may seek to recover the remaining overpayment, see TP 06. Recover Overpayment

### B Termination benefits greater than maximum guaranteeable benefit

Under ERISA section 4022(b)3(B) if the participant's termination benefit exceeds:

The monthly dollar amount of the maximum guaranteeable benefit for normal retirement age in SLA form, see Appendix D: Maximum Guaranteeable Benefits for DOPT Years

– **and** –

The initial reduction percentage is more than 10%;

the reduction is the greater of -

10%

– **or** –

the dollar amount by which the termination benefit exceeds the maximum guaranteeable benefit.

1. Determine the dollar amount by which the termination benefit exceeds the maximum guaranteeable benefit without adjustment for age and benefit form.
2. Determine the dollar amount of the 10% reduction.
3. Use the greater of the two amounts as the reduction.
4. Use the *Worksheet for Application of Variance from the 10% Cap on Recoupment (Var10cap.doc)* to determine the benefit amount to pay.

IOD Policy Bulletin 99-2 deals specifically with different scenarios where all or a portion of a non-level benefit (a life benefit with a temporary supplement, a social security leveling option, etc. ) exceeds the maximum guaranteeable benefit.

### C Benefit overpayments due to PBGC's failure to implement communicated benefit reduction

BDLs that show an overpayment or net overpayment of termination benefits from DOPT require

recoupment action if the payee did not file an appeal during the appeal period. If PBGC fails to implement the benefit reduction, PBGC may recoup the resulting overpayment (i. e. , the additional overpayment, not the entire overpayment) without regard to the recoupment reduction limit.

1 Determine that PBGC should have reduced the benefit earlier based on the information provided in the BDL.

2 Check the payee's file and with PEAD to ensure that the payee did not file an appeal during the appeal period.

3 Use PACS to compute the correct recoupment amount and end date for the benefit decrease (as would have been done after the expiration of the appeals period). Example, BDL dated 10/02/1992 with no appeal - benefit reduction and recoupment would begin 01/01/1993.

4 Use PACS to compute the entire recoupment amount from the date benefit payments started to the month before the target adjustment date, i. e. , the date to begin the recoupment.

5 Find the pre BDL recoupment amount by subtracting the post BDL (action step No. 3) figure from the entire recoupment amount. Recoup the pre BDL overpayment amount at 10% and recoup the post BDL amount above the 10% limit.

6 Adjust the benefit to the correct level in Prism Benefits and enter the reduction amount and BEGIN and END dates in the corresponding deduction field.

7 Notify the participant of the additional overpayment and the monthly recoupment amount.

**D Benefit overpayments caused by false information or an error for which the participant is responsible**

PBGC seeks full repayment of a benefit overpayment if PBGC determines that an overpayment resulted from:

- False information that the payee provided
- Error for which the payee is responsible
- A person who received a payee's benefit after the payee's death failed to notify PBGC of the payee's death.

If full repayment can be made through recoupment, recoup up to 100% if necessary. If recoupment is not sufficient to provide for full repayment, PBGC may seek recovery or other legal action. False information to PBGC does not have to be an intentional misrepresentation to PBGC. This includes situations in which PBGC gave wrong data to a person who failed to tell us the data were wrong. (Those situations may suggest possible fraud to the corporation and referral to OIG, see TP 12: Deal With Fraud and Forgery).

**E Partial Distributions**

If part of a termination benefit has been distributed (before, on, or after DOPT), the entire benefit is considered in computing the participant's termination benefit for recoupment. Partial distributions include a return of mandatory employee contributions, benefits paid through the purchase of an insurance contract, a single sum payment of part of the participant's plan benefits, etc. PBGC applies the recoupment reduction percentage to the total termination benefit paid or payable from all sources. The resulting dollar amount is recouped from the amount PBGC pays. Note that if part of the benefit has been distributed and we overpaid and owe the person no future benefit (because full benefit has been provided (e. g, an annuity purchase),recoupment still applies, not recovery).

PBGC will not seek recoupment from the insurance company of amounts that PBGC cannot recoup if the recoupment amount exceeds the amount payable by PBGC.

## Temporary 40%

### A Overpayments related to certain QDROs and QDRO benefit suspensions

PBGC will apply *an additional 40%* recoupment until they repay the overpayment amount when it occurs because of payments made directly to a participant -

of a benefit that is payable to an alternate payee under a QDRO,

**– or –**

that are subject to suspension while PBGC determines whether they qualify a DRO.

Contact OPSS for approval before applying a 40% reduction.

### B Disability benefits

PBGC will recoup at an additional 40% when overpayments result directly from retroactive payments, cited below, and the participant does not notify PBGC of such an award, if the participant's plan ends the entitlement to a plan disability or reduces the amount of the disability benefit or offsets a temporary supplement.

Social Security disability benefit

Workers' compensation or similar benefit

1 Determine the overpayment amount.

2 Determine 40% of the current benefit amount to determine the reduction amount.

3 Divide the overpayment amount by the reduction amount. The result is the number of months to recoup at the reduction amount. Waive any partial amount for the final payment.

4 Document the determination in the participant file (IPS).

5 Submit the determination letter for supervisory approval; then send the letter to the participant.

### C Benefit suspension overpayments - working retirees

If PBGC advises a participant that their early retirement benefit will be suspended if they return to work for the DOPT employer, PBGC will suspend the benefit. If the participant fails to notify PBGC immediately of reemployment, PBGC ***may*** recoup the amount attributable to the delayed suspension at an additional 40% until they repay the amount.

Benefit suspension overpayments can happen each time the participant returns to work for the DOPT employer, but the participant receives appeal rights only the first time PBGC makes a determination. Each time the participant returns to retiree status, the TPD case team actuary has to recalculate the benefit to accommodate for changes that may affect the benefit amount.

1 Verify that a formal working retirement determination has been made for the plan, see PBGC Operating Policy Manual 5. 2-2

- If not, refer the issue to the auditor and take no action until the determination is made.
- If a formal determination has been made and the participant is receiving an early retirement benefit and returned to work with the DOPT employer, verify that it is applicable to continue with this procedure.
- Draft a determination letter to notify the participant. The letter should include:
  - the facts in PBGC's possession and PBGC's position on those facts

- a request for the participant to confirm or deny the facts and, if denying, provide any supporting documentation.
- a request that the participant respond within 20 calendar days (include the suspense date) or PBGC will suspend the benefit.
- that PBGC will reinstate the benefit if the participant again separates from the DOPT employer's service, but PBGC may adjust the amount of the benefit.

**2** If the actuary's recommendation indicates a net benefit overpayment attributable to a delayed benefit suspension, apply an additional 40% recoupment to the participant's benefit until the amount of the overpayment is recouped.

**3** Submit a copy of the formal working retirement determination, relevant plan provisions, and determination letter for supervisor concurrence.

**4** Send the determination letter to the participant.

**5** Respond to the participant's action:

- If the participant does not respond within the specified period, suspend benefit payments immediately upon completion of the specified period. This requires changing the status code to 2 in the payee's record in PRISM Benefits, and forwarding the record for authorization, see TP 28. Authorize Financial & Non-Financial Transactions through PRISM.
- If the participant denies the facts, treat the case as an appeal and refer it to PEAD. Keep the participant in pay status at the current amount and follow instructions from PEAD, see Process 20.2: Respond to PEAD Instructions.

**Note** The 40% is in addition to any other recoupment reduction in effect for the benefit and applies to any contingent beneficiary as well

Technical Procedures

**Recoup Overpayments**

## TP 07.3 Process QDRO related recoupments

**03/10/2000**

Action Steps

| | |
|---|---|
| **Purpose** | To divide a recoupment amount between participant and alternate payee or beneficiary, as applicable |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | QDRO provision concerning split in benefit payment between participant and alternate payee or beneficiary |
| **Process Output and Recipient** | Recoupment of the appropriate amount and for the specified time from benefit payments of the participant and alternate payee. |
| **Control Issues** | If a QDRO contains specific provisions concerning recoupment of overpayments, PBGC will determine on a case-by-case basis whether to follow such provisions. Contact OPSS before applying any method other than those prescribed in PBGC's recoupment regulation and policy. |
| **Important Concepts** | PBGC reserves the right to use its discretion under the recoupment regulation (29 CFR § 4022. 81(a)) to apply its recoupment rules to cases involving QDROs by other methods on a case-by-case basis. |
| **Guidance** | PBGC Operating Policy Manual 6.4-1 |
| **Procedure Owner** | PLS, PBA, FBA |

TP 07.3 Action Steps: Process QDRO related recoupments

# TP 07.3 Action Steps: Process QDRO related recoupments

01/19/2005

A Qualified Domestics Relation Order (QDRO) stipulates how a participant's pension benefit should be split between the participant and the alternate payee (AP). It may provide information on whether PBGC should treat the AP as the surviving spouse or beneficiary. IOD identifies three distinct categories for the benefit splits.

**A Alternative Payee as Surviving Spouse or Beneficiary**
PBGC applies recoupment rules that are applicable to surviving spouses or beneficiaries to APs who are in this category. There is an overpayment if the actual amounts paid exceed the termination benefits.

**B Shared Payments**

**1 Overpayment Amount**
PBGC compares the combined actual benefits paid to the participant and AP with the combined correct termination benefits payable to them. An overpayment occurs if the actual payments exceed the correct termination benefits.

**2 Recoupment Percentage and Limit**
PBGC uses the participant's PV from the actuarial valuation to determine the recoupment percentage and limit. The QDRO is not considered during this process even if benefits were being paid under the QDRO as of DOPT.

**3 Recoupment End Date**
This is based on the total monthly recoupment amount before it is divided between the participant and the AP.

**4 Division of the Monthly Recoupment Amount**
The method for dividing the monthly amount depends on whether the AP is receiving a fixed percentage or a fixed dollar amount.

- **Fixed Percentage:** the monthly recoupment amount will be divided by the same percentages as the participant's benefit. **Example:** if the AP was receiving 75% of the participant's monthly termination benefit, the recoupment percentage will apply to the AP's monthly benefit, which will be 75% of the participant's benefit.
- **Specified Dollar Amount:** If the AP's benefit is a specified dollar amount, PBGC deducts the monthly recoupment amount from the participant's monthly benefit. However, if the monthly recoupment amount exceeds the participant's monthly benefit, the balance of the monthly recoupment amount will be deducted from the AP's benefit. **Example:** Monthly recoupment amount is $85.00 and participant's benefit is $102.00 - the entire recoupment amount is deducted from the participant's benefit. However, if the monthly recoupment amount is $120.00, $102 will be deducted from the participant's benefit, and $18.00 will be deducted from the AP's monthly benefit.

**C Separate Interest**
In separate interest QDROs, see TP 13: Domestic Relations Order Handbook, PBGC treats the participant and AP as separate participants. PBGC determines separately the overpayment amount, recoupment percentage and recoupment end date.

**1 Separate Amounts of Overpayment**

PBGC compares the actual amounts paid to the correct termination benefit payable. There is an overpayment if the actual amounts the participant or beneficiary received are greater that the termination benefit. There **is not** an offset between the participant and the AP if one was overpaid and the other was underpaid.

2 **Separate PVs as of DOPT**
PBGC determines the PV of the termination benefit separately for the participant and AP. If the actuarial valuation does not provide a separate PV, a PBGC actuary will divide the PV based on the terms of the QDRO.

3 **Separate Recoupment Percentages, Limits and End Dates**
PBGC calculates the recoupment percentage separately for the participant and the AP and applies the applicable percentage limit. The recoupment end date is also determined separately.

---

Note **Contact OPSS for guidance if:**

- the participant's whole monthly benefit (before the QDRO) exceeds the maximum guaranteeable benefit
- the recoupment percentage for either the participant or the AP exceeds 10%

---

## Recoup Overpayments

# TP 07.4 Effect Recoupment and Notify Payee, if necessary 02/17/2004

Action Steps

**Purpose**

To apply recoupment of the correct amount and the recoupment end date based on the percentage determined as outlined. Notify the payee, if recoupment is not related to issuance of a BDL.

**Time Reporting (BMPRS)**

FTE Process Benefit Determination Letters

FBA Process Benefit Determination Letters

PBA Process Benefit Determination Letters

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required input and Source**

Overpayments that are discovered through the final valuation & BDL process.

Overpayments that are discovered other than through the final valuation and BDL process. Typically, these involve QDROs, disability overpayments (adjustments in disability benefit based on a Social Security disability award), overpayments based on false information, and benefit suspension overpayments. Failure to implement a communicated benefit reduction Accrued amount of overpayment.

**Process Output and Recipient**

Recoupment deduction and revised BDL to overpaid benefit recipient.

**Control Issues**

A de minimis overpayment may no longer be de minimis by the time an appeal is resolved because of payments made during the appeals period. In a situation like this, IOD freezes the de minimis overpayment to avoid recoupment after resolution of the appeal. This is applicable to BDLs issued on or after October 28, 2002 and for unresolved appeals as of this date. However, the overpayment is not frozen when the Appeals Board's decision decreases the benefit, resulting in an amount above the de minimis overpayment.

Recoupments should have end dates that match the end date for the corresponding pay source. This may require that the pay source be separated into two pay sources, the first ending on the same date as the recoupment ends, and the second starting the following month. This will ensure that the recoupment is automatically stopped at SSC on its end date.

**Important Concepts**

PBGC's policy does not generally provide for recoupment of overpayments that occur through a revised BDL. See Operating Policy Manual 6. 4-1. F. 5 for stated exceptions. For recoupments initiated before February 28, 1985, PBGC does not seek repayment of benefit overpayments from anyone other than the person who received the benefit overpayment, except to recover from a participant's or beneficiary's estate. Benefit reductions effecting recoupment under this policy are still in effect for some participants. This means that for those recoupments only, PBGC does not recoup against the surviving spouse of a participant who elected a survivor.

If a recoupment was previously set up with an end date earlier than the end date of the corresponding pay source, the payment must be forwarded for authorization after the recoupment end date in order to stop the recoupment. This is necessary because PRISM only sends the pay source to SSC, after calculating a net amount. The PRISM Forecaster application lists participants with expiring recoupments, as a reminder to users that the benefit payments

| | |
|---|---|
| | must be forwarded for authorization after the recoupment end date. |
| **Guidance** | PBGC Operating Policy Manual 6.4-1<br>IOD Policy Bulletin 95-3<br>IOD Policy Bulletin 03-2 |

## Click Here for More Information...

TP 07.4 Action Steps: Effect Recoupment and Notify Payee, if necessary

**Recoup Overpayments**

## TP 07.4 Action Steps: 02/17/2004
## Effect Recoupment and Notify Payee, if necessary

### Effect Recoupment

1. Use the PACS Recoupment Summary to implement the recoupment reduction.
2. In PRISM Benefits, select Update a Benefit Payment and then select View Benefit Summary. Select the annuity screen.
3. End the current pay source with the month prior to the target adjustment date (effective date of commencement of recoupment).
4. Go the next guaranteed pay source and enter the new gross amount, the Begin Date (target adjustment date) and End Date (the recoupment end date).
5. Enter the recoupment amount in the corresponding deduction field, the Begin Date that agrees with the Begin Date of the new pay source, and the recoupment end date.
6. Go the next guaranteed pay source and enter the new gross amount, the Begin Date (the month following the recoupment end date) and End Date (usually 12/01/2099, if not a C&C benefit). This will automatically start up a new pay source, without recoupment, following the end of the recoupment period.
7. Review and save changes and forward the record for authorization, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM.
8. Ensure that all documents pertaining to the benefit change and recoupment are scanned to the participant's file (IPS).

**Recoup Overpayments**

# TP 07.5 Process 4022(c) Benefit where Title IV benefit is being recouped

**02/17/2004**

Action Steps

| | |
|---|---|
| **Purpose** | To process 4022 (c) benefit where Title IV benefit was previously determined and is being recouped. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Entitlement to 4022(c) Benefit after Title IV benefit was determined, and recoupment is in effect. |
| **Process Output and Recipient** | Computation of the amount of back payment to determine size of overpayment and:<br>if there should be an offset toward future recoupment amounts or<br>if back payment should be made.<br>Offset of back payment against future recoupment amount or payment of back payment with no change to future recoupment amounts. Increase in payee's benefits by 4022(c) amount. |
| **Control Issues** | Adherence to recoupment regulation and policy to ensure correct action is taken.<br>Recoupments should have end dates that match the end date for the corresponding pay source. This may require that the pay source be separated into two pay sources, the first ending on the same date as the recoupment ends, and the second starting the following month. This will ensure that the recoupment is automatically stopped at SSC on its end date. |
| **Important Concepts** | PBGC may issue a Title IV Benefit Determination Letter (in cases where a significant delay is expected before 4022(c) benefits will be determined and small amounts are expected), and initiate recoupment. In such cases, PBGC will normally apply the recoupment reduction to Title IV benefit payments, and not to 4022(c) benefits. PBGC may, however, offset back payments of 4022(c) benefits and apply recoupment to future 4022(c) benefits in certain cases (e.g., cases involving large overpayments, and cases in which the monthly recoupment amount was limited to 10%.)<br>If a recoupment was previously set up with an end date earlier than the end date of the corresponding pay source, the payment must be forwarded for authorization after the recoupment end date in order to stop the recoupment. This is necessary because PRISM only sends the pay source to SSC, after calculating a net amount. The PRISM Forecaster application lists participants with expiring recoupments, as a reminder to users that the benefit payments must be forwarded for authorization after the recoupment end date. |
| **Guidance** | PBGC Operating Policy Manual 6.4-1 |
| **Procedure Owner** | PLS, PBA, FBA |

TP 07.5 Action Steps: Process 4022(c) Benefit where Title IV benefit is being recouped

**Recoup Overpayments**

## TP 07.5 Action Steps: 02/17/2004

## Process 4022(c) Benefit where Title IV benefit is being recouped

For background information on this process, see Operating Policy Manual 6.4-1.H.2.

### Small 4022(c) benefit

1 Use PACS to compute the back payment. Enter all required data elements.

**Example**: DOPT 04/30/1988; Title IV benefit $452.80; Estimated benefit $447.13; 4022(c) benefit $5.67. Payee's Title IV benefit was being recouped from 04/1/1995. Target adjustment date to increase benefit by $5.67 is 02/01/2000.

Payment data to input in PACS is -

| | |
|---|---|
| Amount | The current gross amount - $452.80 |
| Begin date | 01/01/1988 (DOPT if pre-DOPT retiree) |
| End date | Month prior to the target adjustment date - 01/01/2000 |

**Note** Begin date is actual benefit commencement date if benefit started after DOPT

2 Increase the benefit amount by the 4022(c) amount effective from the target adjustment date. To do this in PRISM Benefits, follow these steps:

- End the current pay source and the corresponding recoupment deduction field with the month preceding the target adjustment date.
- Enter data in the next pay source - new benefit amount, begin (target adjustment date) and end date (recoupment end date).
- Enter the same recoupment deduction amount with the begin date that agrees with the begin date of the new pay source. The end date should be the recoupment end date.
- Enter data in the next pay source - new benefit amount, begin date (month following recoupment end date) and end date (usually 12/01/2099, if not a C&C benefit). This will automatically start up a new pay source, without recoupment, following the end of the recoupment period.
- Save the changes and forward the record for authorization, see TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

3 Do a special check transaction in PRISM Benefits for the back payment and forward the transaction for authorization.

4 Ensure that all documents pertaining to the actions taken are scanned to the participant's file (IPS).

### Large Overpayments

PBGC may offset back payments of 4022(c) benefits and apply recoupment to future 4022(c) benefits in cases where:

- there are large overpayments
- where the monthly recoupment amount is limited to 10%,

Technical Procedures

**Recoup Overpayments**

## TP 07.6 Take Appropriate Action on Payee's Response 03/10/2000

Action Steps

| | |
|---|---|
| **Purpose** | Take appropriate action depending on payee's response. |
| **Time Reporting (BMPRS)** | FTE Process Benefit Determination Letters<br>FBA Process Benefit Determination Letters<br>PBA Process Benefit Determination Letters<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Expiration of 45-day appeal period. Request from payee to make a prepayment of the overpayment |
| **Process Output and Recipient** | Recoupment (benefit reduced to recoupment amount). Response to PEAD instructions (in case of an appeal). |
| **Control Issues** | N/A |
| **Important Concepts** | PBGC's decisions to recoup overpayments are not subject to appeal. The underlying determinations of benefit entitlement and amount are subject to appeal. At the request of the payee or other interested party, PBGC will review any of the other factors underlying its computation of the amount of a benefit overpayment, and the calculation of the recoupment reduction itself for accuracy, and adjust recoupment as necessary. |
| **Guidance** | PBGC Operating Policy Manual 6.4-1 |
| **Procedure Owner** | PLS, PBA, FBA |

TP 07.6 Action Steps: Take Appropriate Action on Payee's Response

## TP 07.6 Action Steps: Take Appropriate Action on Payee's Response

03/10/2000

Take appropriate action:

***Payee appeals***

Follow instructions from PEAD. See Process 20.2: Respond to PEAD Closing Memo.

1 Follow Process 20.1: Respond to PEAD Acknowledgment of Appeal or Extension Request.

***Payee requests to make full payment***

1 Advise the payee that there is a disadvantage to prepayment as PBGC does not charge interest during the recoupment period.

2 If the payee insists, give them the Lockbox Address to mail the check.

***PSB***

Follow TP 08: Process Returned/Received Check

***TPD /FBA***

SCoRe Report notifies the appropriate TPD/FBA of the receipt of the payment.

1 Send Acknowledgment Letter (ALGS 530) to the payee.

2 Ensure that recoupment is not initiated.

# TP 08. Process Received/Returned Check

TP 08. Overview

TP 08.1 Process Check

TP 08.2 Process Bounced Check

Forms, Letters, Memos, etc.

# TP 08. Overview

**09/01/99**

IOD processes payments for:

Recovery of overpayments or non-entitlement to benefits.

Prepayment of total overpayments.

Returned benefit payments (SSC checks).

IOD must ensure that check processing is efficient. Checks must be deposited quickly to PBGC's account. The amounts should be credited to the correct payees' accounts (ledgers), and any necessary follow-up action taken with minimum elapsed time. A lockbox managed by a bank is used to expedite deposits and processing of personal checks.

PBGC typically receives two types of checks from participants.

## Personal checks

Personal checks to PBGC must be mailed to the Lockbox. The Lockbox Processing Unit (LPU) deposits checks payable to PBGC daily. The exceptions are stale dated (six months or older) and postdated checks (more than three days), and those that have discrepancies in the numeric and written amounts. These are forwarded to TSD for resolution. LPU does not deposit checks payable to SSC or another party such as a plan or a FBA (unless the FBA endorses the check to PBGC).

The Lockbox Processing Unit sends a copy of each deposited check and original checks that they cannot deposit with original correspondence to the TSD/DMC daily. DMC records the documents in SCoRe and scans them to the participant's file (IPS). They then forward the documents to PSB for processing and resolution.

## Returned benefit checks (SSC checks)

SSC receives undelivered checks because a payee is deceased or an address is incorrect or invalid, see TP 05 Overview - Process Deaths.. Representatives of deceased payees return benefit checks to SSC, PBGC and the FBAs. Benefit checks may also be returned upon instructions from PBGC staff. PSB and the FBAs complete a CARF and send it to SSC with the original check and ensure that a copy of the CARF is scanned to the participant's file (IPS).

The plan PLS or FBA receives a SCoRe report of the personal and returned benefit checks received and takes appropriate follow-up action.

**Process Received / Returned Check**

## TP 08.1 Process Check

**12/03/99**

Action Steps

| | |
|---|---|
| **Purpose** | Process personal check or returned benefit check |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Personal check to PBGC or a returned SSC benefit check. |
| **Process Output and Recipient** | Personal check deposited to PBGC's account. Returned benefit check sent to SSC. Amount credited to the participant's account (ledger). Necessary follow-up action is taken. |
| **Control Issues** | DMC processes all checks promptly. Correct processing ensures adherence to high standard of internal controls. DMC and FBA SCoRe **reports** of personal checks forwarded to the Lockbox are sent to PSB for reconciliation to ensure that the Lockbox received the checks. FOD reconciles monthly bank statement from Lockbox Processing Unit with monthly totals of deposited checks from PSB. PSB prepares and sends to SSC the PSB/SSC Checklog with each batch of CARF s and checks. SSC signs and returns the original Checklog to PSB. After 10 business days, PSB reviews the participants' accounts (ledgers) to ensure that the credits were made. |
| **Important Concepts** | For accurate follow-up of recoveries, payees' ledgers must reflect payments PBGC receives in a timely manner. Accurate record keeping enhances Customer Service.<br>Types of payments include personal checks, money orders and cashier checks. |
| **Guidance** | PBGC Directive FM 05-4 Received Funds and Negotiable Instruments Handling Procedures |
| **Procedure Owner** | TSD/PSB, DMC, FBA, PLS |

## Click Here for More Information...

TP 08.1 Action Steps: Process Check

**Process Received / Returned Check**

## TP 08.1 Action Steps: 05/12/2000

## Process Check

A. DMC B. PSB C. SSC D. PLS/FBA E. FBA F. Lockbox Addresses

### A. DMC

**Checks received from the Lockbox**

1 Compare the copies of checks to the adding machine tape from the Lockbox Processing Unit. If there is a discrepancy, notify the DMC COTR.

2 If correspondence is attached to the check, obtain the name or SSN of the payee. If only the name is available, use PRISM Browser to search for the SSN.

3 If no correspondence is attached, use information on the check (name, case number) to search for the SSN using PRISM Browser. If the SSN is not found, send it to PSB for resolution. **Only** use the SSN of the person for whom the payment is made to enter into SCoRe and image. For example, a surviving spouse may send a payment to PBGC because an overpayment was made to the deceased participant. **Use the SSN of the deceased participant and not the surviving spouse.**

4 Enter the documents in SCoRe and scan them to the file (IPS).

5 Send the documents and checks (original/copy) from the Lockbox and the DMC SCoRe report to PSB Chief.

**Checks received directly by DMC**

6 Send personal checks payable to PBGC with attached correspondence after entering into SCoRe and scanning them to PSB with the SCoRe report. The SCoRe report must indicate that the checks have been forwarded to the Lockbox. PSB will send the checks to the Lockbox.

7 Process returned benefit checks, and personal checks payable to SSC as in 2 to 4 above and forward them to PSB with the SCoRe report.

**Checks payable to a FBA (received by Lockbox or directly by DMC)**

8 After entering these into SCoRe and scanning them to the participants files (IPS), forward them to PSB. Clearly indicate on the SCoRe report that they are payable to a FBA. PSB will call the FBA for approval to endorse the check(s) to PBGC and forward them to the Lockbox.

### B. PSB

1 PSB receives two sets of personal checks payable to PBGC.

- Received directly by DMC - see A.6 - send these checks to the Lockbox Address by Federal Express overnight mail after verifying that they agree with the SCoRe report. Insert the Federal Express tracking number and mailing date on the SCoRe report.
- Received from the Lockbox - this group consists of copies of checks participants mailed directly and those PSB, FBAs and SSC forwarded to the Lockbox.

Compare checks mailed directly to the Lockbox with the SCoRe report which accompanies

them from the DMC. Report any discrepancy to the DMC COTR.

Verify that the LPU received and processed checks forwarded to the Lockbox from PSB, SSC and the FBA s by comparing the checks (copies) with the SCoRe reports previously provided by DMC, FBAs SCoRe reports (run by PSB staff) and SSC check log.

If after **4** business days, PBGC does not receive copy of a check, call the contact person at the LPU to inquire about the check. If the LPU did not receive the check, follow-up with Federal Express if PSB mailed the package. If the check is missing from the FBA or SSC package, notify them to follow-up with Federal Express. If the LPU received and processed the check, the LPU must determine if they mailed the copy to PBGC. If the LPU did not mail a copy to PBGC, ask them to do so.

If an original check was lost, notify the sender immediately. If a copy of a deposited check was lost, the LPU must provide us with another copy.

**2** Process all deposited checks received from the Lockbox, returned benefit checks and personal checks payable to SSC as follows:

- Use PRISM Browser, IPS (Participant Query) and CCN to search for or verify information on the reason for the check. If unable to find the record, use the information on the check to search Phone Disk on the LAN or other resources such as the Internet database. Note: two examples are http://anywho.com and http://www.whowhere.com.
- Identify the payee's account to which the amount should be credited. Complete a CARF and distribute -

| **Type of check** | **SSC gets** | **DMC gets** |
|---|---|---|
| Personal Check payable to PBGC | Copy of check<br>Original CARF and one copy | Copy of CARF to scan to the participant's file |
| Returned Benefit (SSC Check) or<br>Personal Check payable to SSC | Original check<br>Original CARF and one copy | Copy of CARF to scan to the participant's file |

- Prepare the PSB/SSC Checklog for each batch of CARFs showing personal and SSC checks separately, and send the original Checklog with the CARFs and checks by overnight mail to SSC. The information on the Checklog will be the participant's name, SSN, check number, check amount and plan number.
- If SSC Operations Manager notifies PSB Chief of a discrepancy after comparing the Checklog with the CARFs and checks, the Branch Chief will arrange for the discrepancy to be resolved, and advise SSC Operations Manager of the action taken.
- File memoranda of discrepancies with the Checklogs.
- Review 10% of each Checklog after 7 business days to confirm that the CARFs were processed. The review consists of querying the participant's ledger in PLUS, to determine if the amount was credited. If there is a mistake in the 10%, review 100% of the Checklog. A mistake will comprise an incorrect credit or no credit to the participant's account. Note the results on the Checklog. Keep the Checklogs for every fiscal year until after the Corporation's audit of that fiscal year is completed.
- PSB Chief will telephone the SSC Operations Officer about any CARFs not processed, and fax the Checklog to SSC.
- At the middle of the following month, prepare and submit to the SSC COTR a report of the Checklogs that were queried during the previous month, and attach copy of the relevant Checklogs showing:

number of CARFs that were sent to SSC

number of accounts (ledgers) that did not reflect the changes

- The SSC COTR will review the reports and Checklogs and send a copy to SSC Project Manager for information and action.

3 If the check and correspondence were originally scored and scanned to an incorrect file, advise the DMC COTR and obtain approval to re-index the documents to the correct file.

4 For checks payable to a FBA, call the FBA Manager for approval to endorse the check to PBGC. After endorsing the check, forward it to the Lockbox and record this on the SCoRe report, see A8.

5 Send Acknowledgment Letter, ALGS 530 to the sender requesting that the incorrectly made check (examples below) be corrected:

- Stale dated checks
- Checks with discrepancies (numeric and written amounts differ)
- Checks payable to a pension plan

Before returning the check, do the following:

- ensure that the check is sent to the correct address (it may be necessary to use the address on the envelope or correspondence sent with the returned check or call the sender for the correct address)
- check the payee's ledger in PRISM Browser, screen 202, and any information available in IPS if necessary, to verify that the check amount is correct. If it is not, let the sender know what the correct amount is and why the amount is different.

Send an e-mail to the PLS, PBA or FBA advising them of the action taken on the incorrect check.

6 Do research to find SSN for check forwarded by the DMC and send it back to the DMC on the same day, see A3.

7 Resolve any issues on the processing of checks with PSB Chief. This includes postdated checks.

8 Provide the total amount deposited by the Lockbox to GAB Chief, FOD, monthly. Obtain this total from copies of checks deposited. Maintain records of the SCoRe reports, check logs and adding machine tapes in a current file to resolve any discrepancies

## C. SSC

1 Personal Checks Mailed to SSC

| Payable to PBGC | Payable to SSC |
|---|---|
| Send check and correspondence to Lockbox Processing Unit. Complete a log with details of checks and send a copy to PSB simultaneously. | Deposit amount, credit payee's account, and complete CARF. Send a copy of CARF to DMC. |

2 **Personal Checks (CARF received from PSB)**

- Check the PSB/SSC Checklog to ensure that listed CARFs and checks are attached. Telephone the PSB Chief if there is a discrepancy and follow up with a memorandum.
- Sign the original PSB/SSC Checklog the same day it is received, and return it by

overnight mail so that the PSB Chief gets it the next business day. (Example, PSB overnights Checklog on Monday to SSC, SSC will review and return signed Checklog on Tuesday by overnight mail to be received by PSB on Wednesday).

- Act on instructions on CARF and complete the final section SSC **Notice of Check Action and Ledger Update,** and send the updated copy of the CARF to the DMC. DMC processes as incoming correspondence (see TP 10: Respond to Correspondence ), logging it into SCORE and scanning to the participant's file (IPS).

3 **Returned Benefit Checks**

- See TP 05 Overview - Process Deaths. for benefit checks returned directly to SSC.
- Process benefit checks returned to PBGC or FBA per instructions on CARF. Complete the final section SSC **Notice of Check Action and Ledger Update** and send the updated copy of the CARF to the DMC to be scored and scanned to the participant's file (IPS).

**D. PLS/FBA (Using Centralized DMC)**

Upon notification through SCoRe of receipt of the check, take appropriate action, see TP 05 Overview - Process Deaths..

**E. FBA (Not Using Centralized DMC)**

1 Forward all personal checks payable to PBGC and to the FBA (after endorsing them to PBGC - rubber stamp provided) to the Lockbox Address by federal express overnight mail. Enter the documents in SCoRe and scan them to the participants' files (IPS), do not complete CARFs. PSB will complete the CARFs. Insert the federal express tracking number and mailing date on the SCoRe report.

2 Send returned benefit checks and personal checks payable to SSC to SSC with CARFs after entering them in SCoRe and scanning them to the participants' files (IPS).

3 Take appropriate follow-up action, see TP 05 Overview - Process Deaths..

**F. Lockbox Address:**

1 Participants send personal checks to this address.

Pension Benefit Guaranty Corporation
P O Box 62133
Baltimore, MD 21264-2133

2 DMC, SSC and FBAs (Not using Centralized DMC), route personal checks payable or endorsed to PBGC to this address via FedEx.

110 S. Paca St.
Lockbox #62133
Baltimore, MD 21201
Attn: 109-320 lockbox
Phone: (410) 613-3400

**Notes:**
1 Do not use the P.O. Box Address to mail checks by Federal Express.
2 The telephone number is provided only to be inserted on the Federal Express label.

**Process Received / Returned Check**

## TP 08.2 Process Bounced Check

**09/01/99**

Action Steps

| | |
|---|---|
| **Purpose** | Debit payee's account and notify sender that payment is still due. |
| **Time Reporting(BMPRS)** | FTE Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS) |
| **Required Input and Source** | Bounced check from FOD. |
| **Process Output and Recipient** | Payee's account is debited. Payee or representative is notified that the check bounced and that the amount is still due. |
| **Control Issues** | Maintaining accurate accounting is an integral part of management internal controls. |
| **Important Concepts** | Importance is given to processing bounced checks to correct the payee's record to reflect that the monies are still due, and to reconcile amounts received with amounts posted to payees' accounts. Also, to insure the income is properly reported to the IRS and the 1099 form is corrected for the current or past tax year(s). |
| **Guidance** | N/A |
| **Procedure Owner** | PSB, PLS, PBA, FBA |

**Click Here for More Information...**

TP 08.2 Action Steps: Process Bounced Check

**Process Received/Returned Check**

## TP 08.2 Action Steps: Process Bounced Check

**05/12/2000**

1. FOD receives bounced checks from the Lockbox Processing Unit and forwards them to PSB.
2. PSB determines which payee's account should be debited by checking PRISM Browser and IPS and completes a CARF.
3. PSB sends the original CARF and one copy, and a copy of the bounced check (front and back) to SSC.
4. SSC debits the payee's account (ledger).
5. DMC gets a copy of the CARF and bounced check (front and back) from PSB and scans it to the participant's file (IPS).
6. PSB forwards the original bounced check with a copy of the CARF to the PLS and sends an e-mail requesting that the check be returned to the sender.
7. PLS returns the bounced check to the payee and requests payment if another check was not received.

## TP 08.3 Forms, Letters, Memos, etc.

# TP 09. Balance / Reconcile Payments

TP 09. Overview

TP 09.1 Resolve Payment Variances

Forms, Letters, Memos, etc.

## TP 09. Overview

**02/18/2005**

IOD is responsible for ensuring that SSC pays authorized benefits to payees. To accomplish this, reconciliation of payments projected in the pay sources of payees' records with actual payments is necessary. PRISM Balancer application performs the post check-run reconciliation of SSC payment activities against PBGC's projected payments. The results ensure that PRISM projections agree with PLUS payments.

RSD administers Balancer. Each month after the check run, Balancer receives an update of actual payments from specific tables in the PRISM database. These are compiled after PRISM loads PLUS payment ledgers. Established criteria within Balancer identifies variances between projected payments and actual payments. The Balancer Administrator (RSD) analyzes the variances identified by Balancer, in consultation and coordination with the PRISM Team. The variances are prioritized, and action is taken to close the variances and prevent recurrence.

The Balancer Administrator notifies the TPD or FBA staff to make the necessary corrections to the PRISM records or initiate correction to PLUS records to prevent the recurrence of the variances, if required.

Technical Procedures

**Balance / Reconcile Payments**

## TP 09.1 Resolve Payment Variances

**09/13/2002**

Action Steps

| | |
|---|---|
| **Purpose** | To resolve variances between projected payments and actual payments. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Variances between projected and actual payments reported by Balancer. |
| **Process Output and Recipient** | Resolution of variances between projected and actual payments reported by Balancer. |
| **Control Issues** | The balancing procedure is an accounting and internal control process that ensures that only authorized payments are made. |
| **Important Concepts** | Variances may occur due to some key differences between PRISM (maintained by PBGC) and PLUS. Correction to PRISM or PLUS pay sources and/or payment frequency may be necessary. Corrections to PLUS require completion of the appropriate data entry form with adequate authorization.<br>If an incorrect payment is detected, quick action should be taken to notify SSC to pull or stop the payment.<br>Where a death report is received on or after the Check Run - Annuities & Special Checks date (late death) and a CARF is sent to SSC to pull or stop the payment, adjusting the totals closes the variance. |
| **Guidance** | Check Schedule Key Dates |
| **Procedure Owner** | Balancer Administrator |

## Click Here for More Information...

TP 09.1 Action Steps: Resolve Payment Variances

## TP 09.1 Action Steps: Resolve Payment Variances

08/23/2002

1 Determine reason(s) for the variance by reviewing the authorized transactions, pay sources, ledgers and other payment data from Balancer and other PRISM applications. Some common variances are:

- Pay source change was made and not forwarded, or forwarded and not authorized. To resolve this type of variance, the TPD/FBA staff forwards and authorizes the record in the next payment cycle or corrects the payment record in PRISM to agree with the PLUS record.
- Death notices received on or after the Check Run – Annuities & Special Checks date. PLUS does not receive the transmission of the payee's death to deactivate the record in time to stop preparation of the next month's payment. IOD staff usually sends a CARF (original and one copy) to SSC to authorize them to pull or stop the payment. In this case the variance total will have to be adjusted to reflect the difference since the PRISM system would show an authorized payment for the month, even though SSC stopped the payment **after** it was prepared.
- Multiple role payees. Variances in this category develop due to key differences between PRISM (maintained by PBGC) and PLUS. PRISM accommodates a payee with multiple roles (i.e. participant and beneficiary) and **payment records** per plan. PLUS accommodates **only one payment record** per payee per plan. The problem occurs when payments to a person in multiple roles in the same plan are not combined in PRISM. More than one payment record is transmitted to PLUS. A pay source on PLUS is overwritten resulting in an overpayment or underpayment. TPD or FBA staff need to take immediate corrective action.
- Other variances may result when the pay frequency code in PRISM does not match the intended payment (for example an annual payment with a monthly pay frequency). Action needs to be taken to ensure the participant is not overpaid.

2 Log the reason for the variance in the Balancer application.

3 Notify the TPD/FBA staff to take corrective action, if necessary, to prevent certain variances from recurring.

4 Close the variance, where possible.

# TP 10. Respond to Correspondence

TP 10. Overview
TP 10. Workflow
TP 10.1 Sort & Set Suspense (DMC or CPAD)
TP 10.2 Route to Appropriate Person in Division
TP 10.3 Review Information & Take Action
TP 10.4 Close Entry in Data Base
TP 10.5 Mail or Route to CPAD or OIG for Review, if Required
Forms, Letters, Memos, etc.

## TP 10. Overview

**02/17/2004**

Written correspondence is one of the primary methods of communication between PBGC and participants, beneficiaries, survivors and others who have an interest in a participant's benefits. Written correspondence leaves a permanent record of the contact. There is also less chance of a prolonged misunderstanding (intentional or unintentional) because of that record.

IOD's goal is to treat all correspondence the same, whether a simple request for an application or a Congressional office requesting help for a constituent. Individually, staff may have to set priorities because of time constraints, but answer all correspondence in a reasonable amount of time. IOD's Customer Service Standards provide response time is five (5) business days or less from the time correspondence comes into IOD. Most can be handled in much less than five days. When a complete response cannot be prepared in that time frame, PBGC will acknowledge the customer's inquiry in writing or by telephone and will provide a date for complete response.

In many cases, PBGC's response is prescribed and is in PRISM ALGS. Use this system to respond to or acknowledge receipt of correspondence, and the return of requested forms and supporting documents. By using ALGS, the letter is scanned to the participant's file (IPS). The standard template should be used and customized, as necessary. The standard ALGS letters do not require concurrence. The Team Leader, Branch Chief, or Division Manager must approve customized ALGS letter or one that is not generated through ALGS. Letters to a Congressional Office follow the Sample Interim Response Letter format in Directive IM-10-1.

Respond quickly, with the right information, or document in an easily understandable manner. Remember that customer service is a PBGC priority.

### Click Here for More Information...

TP 10.1 Action Steps: Sort and Set Suspense (Mailroom or CPAD)

**Respond To Correspondence**

## TP 10.1 Action Steps: Sort and Set Suspense (DMC or CPAD)

**02/17/2004**

**DMC**

1 Date stamp incoming mail. Examine proof of age documents for legibility.

- If a proof of age document is illegible, carefully peruse it to determine the correct DOB, child's last and first names, and sex. If the document is original or certified, or a photocopy that the sender asks to be returned, photocopy the document and stamp it "ILLEGIBLE DOCUMENT."
- After making the best determination of what the information is regarding the above write it on the copy, initial and date it.
- Return the original, certified or photocopy (requested to be returned) document to the sender with PBGC Form 1690a (this is not scanned to the participant's file).

2 Sort incoming mail into two categories: (1) Congressionals (letters from members of Congress) and other sensitive correspondence (Cabinet members, State Governors, complaint letters, etc.), and (2) other types of mail. Forward sensitive correspondence to CPAD for review and distribution. Sort remaining mail into correspondence and documents (normally returned forms or applications from individuals).

3 Determine to which plan the incoming mail is related.

- If a plan or company is named, use the Monthly Plan Update Listing or CAS.
- If only a participant name is known, use PRISM.
- If unable to sort the mail using the Monthly Plan Update Listing, PRISM, or CAS, forward the mail to PSB. PSB personnel will make further attempts to respond to the writer, or determine if the mail concerns either a plan which is trusteed or a plan for which a reportable event or distress termination case has been initiated (check CAS), but the plan has not yet been trusteed. If the mail clearly does not concern such a plan, it is forwarded to STCD which handles other written inquiries from the public.

4 Image mail to appropriate files.

5 Make an entry in the SCORE that establishes a suspense date by which a response should go out. The default suspense is five (5) business days. Recipients in IOD will respond to the writer within those five days and have the person in the division who interfaces with the tracking system close out the action.

**CPAD Office of Executive Director Legislative Affairs (Correspondence Control Person - Sensitive Correspondence Only)**

1 Determine to which plan the incoming mail is related.

- If a plan or company is named, use the Monthly Plan Update Listing or CAS.
- If only a participant name is known, use PRISM.

2 Set the suspense for the sensitive correspondence (normally seven days).

3 Determine which division (for example, a TPD or TSD) should respond to the correspondence and route it via the Control Point Person to a specific Division Manager, Associate Manager, or Team Leader. Ensure that the recipient is available (for example, not out of town or on vacation) prior to routing it. If the recipient is not available, route to

whoever is handling that person's casework.

4 Complete PBGC Correspondence Control Slip (PBGC-117) and attach blue, pink, green and gold copies. Retain white and yellow locator copies.

5 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Respond To Correspondence**

## TP 10.2 Route to Appropriate Person in Division 10/31/97

Action Steps

| | |
|---|---|
| **Purpose** | Route correspondence to person who will take action. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Letters or documents from CPAD or DMC. |
| **Output and Recipient** | PLS/Pension Benefit Administrator (PLS/PBA) |
| **Control Issues** | Get mail to the correct person as quickly as possible to give that person the maximum time to respond within the five-business-day period. Use IPS and electronic routing to the maximum extent possible. |
| **Important Concepts** | Sensitive correspondence coming from CPAD is generally routed directly to the Team Leader, Associate Manager, or Division Manager.<br>The program assistant or designated person within the division should know which individuals in the division are working on which plans. |
| **Guidance** | IOD Customer Service Standards (11/1/95).<br>PBGC Directive on Control of Congressional and Other Sensitive Correspondence (IM-10-1). |
| **Procedure Owner** | Sensitive correspondence: Team Leader<br>Other mail: Program Assistant or designated person |

## Click Here for More Information...

TP 10.2 Action Steps: Route to Appropriate Person in Division

**Respond To Correspondence**

## TP 10.2 Action Steps: Route to Appropriate Person in Division

**02/17/2004**

**Sensitive correspondence**:

Distribute to the appropriate person via the Control Point Person, who retains the pink, green or gold copy of the Correspondence Control Slip.

**Mail from DMC**:

1 DMC point of contact (POC) goes to the DMC daily and picks up SCoRe Report and any mail. (Note: Most mail is imaged upon receipt and hard copies are not provided to the TPDs.

2 Review the SCoRe report, acknowledge receipt of correspondence or requested documents with the Acknowledgment Letter (ALGS 530). This letter is also used to advise the sender if the documents are inadequate or incomplete. **Note**: The DMC staff uses PBGC form 1690a to return all original and certified documents, and photocopies that senders ask to be returned. If only one of these documents was received, it may not be necessary to send the PRISM ALGS 530 letter.

3 If the SCoRe report has a code PD, a proof document was received. If the proof document in the participant's file (IPS) is stamped "ILLEGIBLE DOCUMENT," compare the information that the DMC staff wrote with the information on other documents in the participant's and plan files (IPS). If there is no document in the files to do the comparison or if the information is not the same, contact the sender for another proof document.

4 Refer to the Workflow diagram to determine the next action.

**Respond to Correspondence**

## TP 10.3 Review Information and Take Action

**02/17/2004**

Action Steps

| | |
|---|---|
| **Purpose** | Gather all information necessary to take action on correspondence.<br>Respond to the needs of participants and others who have sent in correspondence. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Correspondence |
| **Output and Recipient** | Responses to those who have written (using format of Sample Interim Response Letter from IM-10-1 for Congressional responses). |
| **Control Issues** | N/A |
| **Important Concepts** | Rapid, accurate response to correspondence is one of PBGC's most important ways of meeting the organization's primary goal of providing customer service. |
| **Guidance** | IOD Customer Service Standards (11/1/95).<br>PBGC Directive on Control of Congressional and Other Sensitive Correspondence (IM-10-1). |
| **Procedure Owner** | PLS or PBA |

## Click Here for More Information...

Action Steps: Review Information and Take Action

**Respond to Correspondence**

## TP 10.3 Action Steps: Review Information and Take Action

**01/19/2005**

1 Review IPS to find the needed information to address all issues in correspondence.

2 Take appropriate action (see table below) based on the type of correspondence and/or the issues raised. Contact the participant by telephone if further information is needed, or if response can be easily provided by phone. CCN record to document conversation, including whether any additional action is necessary - like mailing forms or other information.

3 Ensure that any written response is imaged into the participant's file (IPS).

| Type of Correspondence | Required action |
|---|---|
| **Participant Benefit Entitlement (including request for application)** | Review Participant File (IPS)<br>Determine eligibility<br>If eligible, send the appropriate benefit application form, see Appendix J: Participant Forms Information for listing of forms and their usage.<br>Or advise requestor that he/she is not yet eligible to receive benefits. |
| **Surviving Spouse or Beneficiary Benefit Entitlement** | Get participant file<br>Determine eligibility<br>If eligible, send application, if ineligible, send notice of ineligibility |
| **Death notice** | Follow TP 05.Process Deaths |
| **Congressional inquiry and OIG inquiry** | Review IPS<br>Investigate the specific complaint or needed action<br>Take and/or initiate any necessary actions<br>Write a response letter, using the Sample Interim Response Letter in IM-10-1 as a model. Under limited circumstances, with supervisor approval, make telephone contact and document the call in the phone log.<br>Verify that all issues have been addressed<br>Route responses via the Control Point Person to CPAD Correspondence Control Person for review, unless signed by Department Director. The Correspondence Control Person retains the pink copy of the Correspondence Control Slip and returns the response via the Control Point Person for signature and mailing.<br>After signature by the Department Director, or review by the Correspondence Control Person, mail an original to affected participant(s), copy to CPAD Correspondence Control Person or Office of the Inspector General (OIG), and an original (if required) to Congressional or other government office for sensitive correspondence.<br>**Note**: PBGC Directive IM 10-1 Control of Congressional and other Sensitive Correspondence applies. |

| | |
|---|---|
| **Request for EDD** | Form 710 – Application for Electronic Direct Deposit (EDD)<br>Ensure imaged to participant file (IPS) |
| **Check not received** | Verify that the participant has not changed address (or banks, for EDD)<br>After 10 days, complete CARF and send original and one copy to SSC.<br>Ensure imaged to participant file (IPS) |
| **Benefit Verification (from third party-- not participant)** | Review participant file and plan file (IPS)<br>Verify that release of information has been signed by participant<br>If yes, mail requested information and ensure reply is imaged to participant (IPS).<br>If no, send a benefit verification letter to the participant. Use the standard letter online and ensure reply is imaged to the participant file (IPS). |
| **Appeal** | Ensure imaged to participant file (IPS)<br>Send original, with envelope, to Participant and Employer Appeals Department (PEAD) (if it did not come from them originally). For appeals coming from PEAD, follow Process 20.2: Respond to Appeal Closing Memo. |
| **General information** | Investigate and route as necessary.<br>Take or initiate any necessary action (make a phone call, prepare a response, send a form, etc.) |
| **Domestic Relations Orders (DROs)** | Handle as regular mail. If a DRO cannot be identified with a plan participant, forward it to the IOD QDRO Coordinator, OPSS. |
| **Change of Address** | Follow TP 04: Process Address Changes. |

5 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Respond to Correspondence**

## TP 10.4 Close Entry in Data Base

**10/31/97**

Action Steps

| | |
|---|---|
| **Purpose** | Close out suspense in the mailroom tracking system. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Completed action |
| **Output and Recipient** | Closed suspense |
| **Control Issues** | N/A |
| **Important Concepts** | Good customer service is a primary goal. |
| **Guidance** | IOD Customer Service Standards (11/1/95).<br>PBGC Directive on Control of Congressional and Other Sensitive Correspondence (IM-10-1). |
| **Procedure Owner** | Program assistant or designated person |

# TP 11. Perform Trial Balance

TP 11. Overview
TP 11. Workflow
TP 11.1 Identify and Distribute Variances
TP 11.2 Resolve Variances
Forms, Letters, Memos, etc.

# TP 11. Overview

11/07/2000

IOD is responsible for making prompt, uninterrupted payment of pension benefits to its payees. Accuracy and timeliness of payments are essential components in satisfying this responsibility. IOD maintains the PRISM system that stores all demographic, valuation and payment information. Once payment amounts are determined, entered into PRISM and authorized, they are transmitted to the Paying Agent, SSC, that uses PLUS to make all authorized payments and to perform other payment related functions.

Each month, IOD processes payments as annuities (periodic payments, usually a monthly or an annual payment), special check transactions (for missed payments or back payments) and lump sum distributions through PRISM according to the check production schedule. Processing staff adheres to the schedule to ensure timely payment of benefits. The schedule gives the cut-off dates by which payments and changes to payments must be entered into PRISM and authorized, see TP 28: Authorize Financial and Non-Financial transactions through PRISM. Authorized payments are transmitted to the Paying Agent on the dates specified in the check schedule and consist of:

- all payment changes that were authorized for the current check cycle
- all previously authorized payment records (records in pay not changed for the current check cycle)
- all new payment records (new payees)

IOD performs a trial balance before the check run to ensure that the Paying Agent makes only authorized payments. The goal is to correct any variance(s) before the actual check run. Trial balance is mostly automated. However, processing staff is required to review and resolve variances. Coordination and oversight of the process are necessary to ensure accuracy and timeliness.

PRISM Trial Balance reports the variances between PBGC's authorized payment transactions and the Paying Agent's payment projections as a result of several preprogrammed procedures. PBGC's Forecast Procedure identifies all authorized payments for a specified month. IRMD enables the Variance Determination Procedure to compare PBGC's forecast of authorized payment transactions with the Paying Agent's projections upon successful transmission of the Paying Agent's Extract files (annuities/specials and lump sums are sent on different days) to PBGC. This process identifies variances between the two sets of data. The variances are then displayed in the appropriate formats as the Reporting Procedure determines.

### Responsibilities for Resolving Variances

**The Reconciliation Administrator (TSD/BPAB)** administers PRISM Trial Balance. Duties include:

- Oversight of the functions of PRISM Trial Balance
- Review of all variances and distribution of the Trial Balance Variance Reports to the TPDs/FBAs for resolution
- Update of PRISM Trial Balance with the error correction and resolution codes

**TPDs/FBAs**

- Resolve variances
- Return completed Trial Balance Variance Reports to the Reconciliation Administrator

The time line for resolving variances is very short (less than 2 working days). Therefore, it is

essential that all efforts be made to ensure that the resolution takes place within the allocated time.

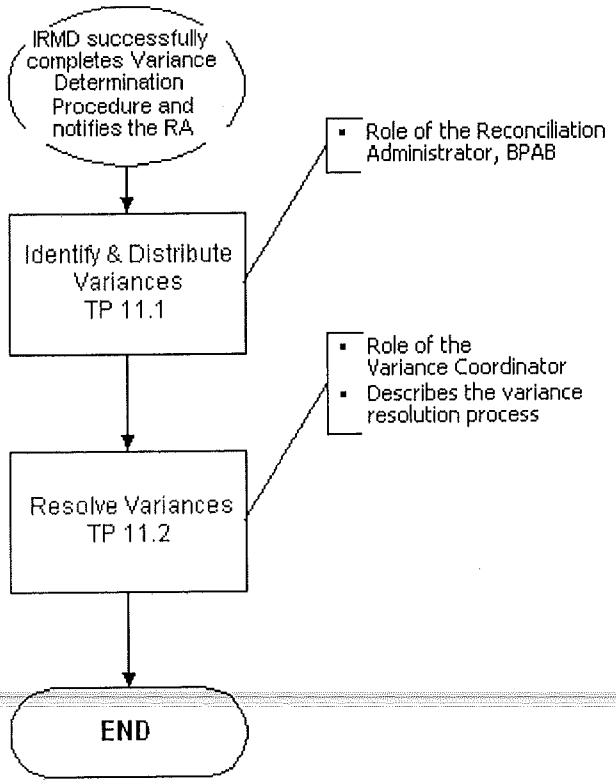
**Technical Procedure**

**Perform Trial Balance**

## TP 11. Workflow

**Browse Workflows:** 

**11/07/2000**



Technical Procedure

**Perform Trial Balance**

## TP 11.1 Identify and Distribute Variances

**09/13/2002**

Action Steps

| | |
|---|---|
| **Purpose** | Review the Reconcile Screen to determine:<br>• apparent variances for immediate correction<br>• variances to be forwarded to TPDs/FBAs for resolution |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | • Trial Balance Reconciliation Detail from PRISM Trial Balance<br>• Trial Manager to determine that steps taken to run Trial Balance were successfully completed |
| **Process Output and Recipient** | • Relevant codes in PRISM Trial Balance to remove apparent variances<br>• Trial Balance Variance Reports to TPDs/FBAs<br>• Insertion of variance resolution codes and error correction codes in the Variance Resolution Screen after receipt of the completed Trial Balance Variance Reports from TPDs/FBAs |
| **Control Issues** | Trial balance is an accounting and internal control process that ensures that the paying agent only makes authorized payments.<br>The Reconciliation Administrator maintains records of 'sent' e-mails for tracking purposes. The e-mails may also be retrieved and forwarded to another recipient, if necessary. |
| **Important Concepts** | Variances may occur due to some key differences between PRISM and PLUS. Correction to PRISM or PLUS pay sources and/or payment frequency codes may be necessary. IOD's intention is to resolve all variances during trial balance.<br>**Timing:** Trial Balance Variance Reports are distributed to processing staff as soon as possible after review of the annuity and special payment variances on Monday (Tuesday if Monday is a holiday) following the week of the financial cut-off date. Lump Sum Variance Reports are distributed later in the month. The Reconciliation Administrator's final review of completed Trial Balance Variance Reports and variances in PRISM Trial Balance is completed by the last business day of the month. |
| **Guidance** | Check Schedule Key Dates |
| **Procedure Owner** | Reconciliation Administrator, TSD/BPAB |

## Click Here for More Information...

TP 11.1: Action Steps: Identify and Distribute Variances

Technical Procedure

**Perform Trial Balance**

## TP 11.1 Action Steps

**08/23/2002**

## Identify and Distribute Variances

**Monday (Tuesday if Monday is a holiday) following the week of financial cut-off date**

1 Check e-mail for confirmation that the Variance Determination Procedure was successfully completed as soon as possible after arrival.

2 If confirmation is received, log onto the PRISM Trial Balance. If confirmation is not received, log onto Trial Manager for the status of the Variance Determination Procedure before calling the IRMD representative.

3 Verify that the check date is correct and review the quality of the data. If data appears to be incorrect or corrupt, contact IRMD to remove the data and advise the Paying Agent to re-send the Extract file to PBGC.

4 Perform query using SSNs to find variances that are in the error logs. Analyze and resolve, if possible. Enter error correction codes and close out resolved variances.

5 Distribute all other variances to TPDs/FBAs for resolution.

6 Modify e-mail messages to users if Trial Balance Variance Reports must be completed in a shorter period of time (less than 2 days). PRISM Trial Balance automatically populates and generates the Trial Balance Variance Reports.

7 Distribute the Trial Balance Variance Reports by e-mail attachment (excel spreadsheet) to the mail POC (point of contact) for the case as in the CAS tables.

8 Send the Trial Balance Variance Summary Reports to the Variance Coordinators (one per TPD/FBA) with copy to the Variance Coordinator's back up and Division Manager/FBA Manager. These persons also receive copies of all the Trial Balance Variance Reports and will be able to reassign the task in the event of the absence of the mail POC for the case. The Variance Summary Report gives the name of the POC for each case and the type (annuity, special, lump sum) and numbers of variances.

**Other**

9 Maintain the Reconcile Screen of all variances and update it with the error correction and variance resolution codes upon receipt of the completed Trial Balance Variance Reports from the TPDs/FBAs.

10 Review completed Trial Balance Variance Reports from the TPDs/FBAs and the variances in the PRISM Trial Balance by the last business day of the month. Document all unresolved variances and report them to the TSD/ BPAB Manager.

11 Send all completed Trial Balance Variance Reports (not summary reports) and any attachments to the DMC for imaging to the payee's files (IPS) after entering the resolutions codes in PRISM Trial Balance.

12 Maintain an editable table of all Variance Coordinators, designated backup, and temporaries. Edit the table upon notification from Variance Coordinators and their backup of any changes because of leave of absence, terminations, etc.

Technical Procedure

**Perform Trial Balance**

## TP 11.2 Resolve Variances

**02/17/2004**

Action Steps

| | |
|---|---|
| **Purpose** | Correct variances and complete Trial Balance Variance Reports |
| **Time Reporting(BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Trial Balance Variance Reports from the Reconciliation Administrator. |
| **Process Output and Recipient** | PRISM and/or PLUS correction to resolve variances.Completion of Trial Balance Variance Reports for submission to the Reconciliation Administrator |
| **Control Issues** | The period between the distribution of the Trial Balance Variance Reports and the resolution of the variances is very short (less than 2 days). Quick action and efficient monitoring are necessary.<br>PBGC Forms 487, 490 and 491 (data entry forms) for manual changes to PLUS require authorization according to the authorization level table in TP 28 Overview - Authorization Levels Table. |
| **Important Concepts** | The **Trial Balance Variance Report** has two sections: An Identification Section that gives information on the variance and a Resolution Section to be completed upon resolution of the variance.<br>The **Trial Balance Variance Summary Report** shows the names of the mail POCs for the case and the number of variances by type, e.g., annuity/special/lump sum.<br>**Time line for submission of manual changes to BPAB for transmission to the Paying Agent (Annuities and Specials):** In extraordinary circumstances, data entry forms will be accepted by 4:00 p.m. on Wednesday.<br>**Adjusted Gross Amount**<br>**Annuities:** the adjusted gross amount is the gross payment amount less any recoupment amount.<br>**Lump sums:** the adjusted gross amount is the gross payment amount less interest if Paying Agent calculates the interest (PBGC has no interest to balance against). If PBGC calculates the interest, the gross amount is not adjusted. |
| **Guidance** | Check Schedule Key Dates<br>Prism User Manuals |
| **Procedure Owner** | PLS, PBA, FBA, Variance Coordinator, Team Leader |

TP 11.2: Action Steps: Resolve Variances

Technical Procedure

**Perform Trial Balance**

## TP 11.2 Action Steps: Resolve Variances

**02/17/2004**

A TPDs/FBAs  B Variance Coordinator(TPD/FBA)  Examples of Completed: Data Entry Forms  Trial Balance Variance Reports

### A. TPDs/FBAs

**These actions are taken upon receipt of e-mail from Reconciliation Administrator on the Monday morning (Tuesday if Monday is a holiday) following the financial cut-off date in the preceding week.**

1 Print and review the Trial Balance Variance Report as soon as it is received. The Report shows the variance of the gross amount (or adjusted gross amount) between PRISM and PLUS.

2 Review the payee's record in PRISM Benefits, View Benefit Summary - Pay Source screen/lump sum screen (as applicable) to determine the reason for the variance and PRISM Tickler for authorized transactions. PRISM Browser, screens 101, 102, 108 and 202 may also be helpful. The three general types of variances are:

— difference in payment amount (pay sources, payment frequency codes)

— PRISM authorized payment - no matching payment in PLUS

— PLUS payment - no matching authorized payment in PRISM

3 If necessary, research the payee's file (IPS) for more information.

4 Make change to PRISM or PLUS according to the table below:

**Annuities**

| If PRISM is... | If PLUS is .... | Resolution - do the following ... | Completion of Trial Balance Variance Report |
|---|---|---|---|
| Correct | Incorrect | Complete Annuity Check (PBGC Form 487) to correct payment amount or payment frequency code or both | Yes |
| Incorrect | Correct | Make correction to PRISM, save the change and forward for authorization.* | Yes |
| Incorrect | Incorrect | • Complete Annuity Check (PBGC Form 487)<br>• Make correction to PRISM, save the change and forward for authorization. * | Yes |

* For transmission to Paying Agent the following month

**Specials and Lump Sums**

| If PRISM is... | If PLUS is .... | Resolution - do the following ... | Completion of Trial Balance Variance Report |
|---|---|---|---|

| | | | |
|---|---|---|---|
| Correct | Incorrect | Complete Special Check (PBGC Form 490)<br>– or –<br>Lump Sum Check (PBGC Form 491) | Yes |
| Incorrect | Correct | -------- | Yes |
| Incorrect | Incorrect | Complete Special Check (PBGC Form 490)<br>– or –<br>Lump Sum Check (PBGC Form 491) | Yes |

5 — the form is authorized according to the authorization level table, see TP 28 Overview - Authorization Levels Table. **FBAs** - if headquarters staff needs to authorize the amount, send the original data entry form to the Plan's Technical Monitor to obtain the signature. In the absence of the Technical Monitor, contact the Division Manager/Associate Manager for assistance.

— the same pay source in PRISM Benefits is used on the form to avoid further variances in payment, e.g., E1 in PRISM is 1 on PBGC Form 487

— if the variance is the result of a death transaction that the Paying Agent did not receive, complete the appropriate data entry form with the correct status code in the status field, and insert the end date (as shown in PRISM) in the correct pay source end date field. Although the form does not have a DOD field, enter the date of death next to the status field.

— if the variance is the result of a recoupment, enter the net amount (gross amount minus recoupment deduction amount) in the appropriate pay source. Add the following comment beside the pay source on the data entry form - `(net amount - recoupment)`.

**Note** Do not enter unnecessary data on the data entry form. If the paying agent has a record of the payee on PLUS, enter only changes to the payment record. Identifying fields, for example, name, SSN and case number, and status must be completed.

6 Make a copy of the completed data entry form (PBGC Form 487, 490 or 491) to attach to the Trial Balance Variance Report for submission to the Reconciliation Administrator through the Variance Coordinator.

7 **TPDs** - Take the original data entry form (PBGC Form 487, 490 or 491) to the DMC Washington, DC, Attention: BPAB Manual Collection Box before 5.00 p.m. on Tuesday (day for Lump sums differs)

**FBAs** - Fax the completed data entry form (PBGC Form 487, 490 or 491), fax number 202-326-4288 to DMC, Washington, DC, Attention: BPAB Manual Collection Box by COB Tuesday (day for Lump sums differs)

8 Complete the **Resolution** section of the Trial Balance Variance Report - indicate the action taken by checking the appropriate box and/or making relevant comments. Print your name, sign and date the Variance Report.

**Examples of Completed Trial Balance Variance Reports**

9 Submit the completed Trial Balance Variance Report **with copy** of any data entry form (PBGC Form 487, 490 or 491) used to resolve the variance to the Variance Coordinator for forwarding to the Reconciliation Administrator.

**B. Variance Coordinator (TPD/FBA)**

1 Check the Trial Balance Variance Summary Report as soon as e-mail from Reconciliation Administrator is received. Make sure that the case POCs listed are present. In the event that a POC is absent, reassign the variance resolution responsibility to another team member.

2 Compare the completed Trial Balance Variance Reports received from POCs in your TPD/FBA with the Trial Balance Summary Report by noon on Tuesday or other date indicated in the Reconciliation Administrator's e-mail to ensure that all variances have been resolved. If any reports are missing, ensure that the responsible POC or designated back up resolve the variance.

3 Submit the completed Trial Balance Variance Reports and attachments (PBGC Forms 487, 490 or 491) to the Reconciliation Administrator.

- **TPDs** Place the completed Trial Balance Variance Reports and attachments (PBGC Forms 487, 490 or 491) in Trial Balance Tray located in TSD/BPAB, room number 7114 for the Reconciliation Administrator.
- **FBAs** Fax the completed Trial Balance Variance Report **only** using the *Trial Balance Fax Cover Sheet - Reconciliation Administrator, TSD (Tbfaxra.doc)* to the Reconciliation Administrator.

4 Notify the Reconciliation Administrator in advance of changes in the distribution list (Variance Coordinator, Variance Coordinator's designated back up and temporaries) for absences or staff terminations to ensure that appropriate substitutions are made in a timely manner.

PBGC FORM 451 Rev. 07/03

Technical Procedure

**Perform Trial Balance**

## TP 11.2 Action Steps: Resolve Variances

**02/17/2004**

A TPDs/FBAs  B Variance Coordinator(TPD/FBA)  Examples of Completed: Data Entry Forms  Trial Balance Variance Reports

### A. TPDs/FBAs

**These actions are taken upon receipt of e-mail from Reconciliation Administrator on the Monday morning (Tuesday if Monday is a holiday) following the financial cut-off date in the preceding week.**

1 Print and review the Trial Balance Variance Report as soon as it is received. The Report shows the variance of the gross amount (or adjusted gross amount) between PRISM and PLUS.

2 Review the payee's record in PRISM Benefits, View Benefit Summary - Pay Source screen/lump sum screen (as applicable) to determine the reason for the variance and PRISM Tickler for authorized transactions. PRISM Browser, screens 101, 102, 108 and 202 may also be helpful. The three general types of variances are:

— difference in payment amount (pay sources, payment frequency codes)

— PRISM authorized payment - no matching payment in PLUS

— PLUS payment - no matching authorized payment in PRISM

3 If necessary, research the payee's file (IPS) for more information.

4 Make change to PRISM or PLUS according to the table below:

**Annuities**

| If PRISM is... | If PLUS is .... | Resolution - do the following ... | Completion of Trial Balance Variance Report |
|---|---|---|---|
| Correct | Incorrect | Complete Annuity Check (PBGC Form 487) to correct payment amount or payment frequency code or both | Yes |
| Incorrect | Correct | Make correction to PRISM, save the change and forward for authorization.* | Yes |
| Incorrect | Incorrect | • Complete Annuity Check (PBGC Form 487)<br>• Make correction to PRISM, save the change and forward for authorization. * | Yes |

* For transmission to Paying Agent the following month

**Specials and Lump Sums**

| If PRISM is... | If PLUS is .... | Resolution - do the following ... | Completion of Trial Balance Variance Report |
|---|---|---|---|

| | | | |
|---|---|---|---|
| Correct | Incorrect | Complete Special Check (PBGC Form 490)<br>– or –<br>Lump Sum Check (PBGC Form 491) | Yes |
| Incorrect | Correct | -------- | Yes |
| Incorrect | Incorrect | Complete Special Check (PBGC Form 490)<br>– or –<br>Lump Sum Check (PBGC Form 491) | Yes |

5 — the form is authorized according to the authorization level table, see TP 28 Overview - Authorization Levels Table. **FBAs** - if headquarters staff needs to authorize the amount, send the original data entry form to the Plan's Technical Monitor to obtain the signature. In the absence of the Technical Monitor, contact the Division Manager/Associate Manager for assistance.

— the same pay source in PRISM Benefits is used on the form to avoid further variances in payment, e.g., E1 in PRISM is 1 on PBGC Form 487

— if the variance is the result of a death transaction that the Paying Agent did not receive, complete the appropriate data entry form with the correct status code in the status field, and insert the end date (as shown in PRISM) in the correct pay source end date field. Although the form does not have a DOD field, enter the date of death next to the status field.

— if the variance is the result of a recoupment, enter the net amount (gross amount minus recoupment deduction amount) in the appropriate pay source. Add the following comment beside the pay source on the data entry form - `(net amount - recoupment)`.

**Note** Do not enter unnecessary data on the data entry form. If the paying agent has a record of the payee on PLUS, enter only changes to the payment record. Identifying fields, for example, name, SSN and case number, and status must be completed.

6 Make a copy of the completed data entry form (PBGC Form 487, 490 or 491) to attach to the Trial Balance Variance Report for submission to the Reconciliation Administrator through the Variance Coordinator.

7 TPDs - Take the original data entry form (PBGC Form 487, 490 or 491) to the DMC Washington, DC, Attention: BPAB Manual Collection Box before 5.00 p.m. on Tuesday (day for Lump sums differs)

FBAs - Fax the completed data entry form (PBGC Form 487, 490 or 491), fax number 202-326-4288 to DMC, Washington, DC, Attention: BPAB Manual Collection Box by COB Tuesday (day for Lump sums differs)

8 Complete the **Resolution** section of the Trial Balance Variance Report - indicate the action taken by checking the appropriate box and/or making relevant comments. Print your name, sign and date the Variance Report.

**Examples of Completed Trial Balance Variance Reports**

9 Submit the completed Trial Balance Variance Report **with copy** of any data entry form (PBGC Form 487, 490 or 491) used to resolve the variance to the Variance Coordinator for forwarding to the Reconciliation Administrator.

**B. Variance Coordinator (TPD/FBA)**

1 Check the Trial Balance Variance Summary Report as soon as e-mail from Reconciliation Administrator is received. Make sure that the case POCs listed are present. In the event that a POC is absent, reassign the variance resolution responsibility to another team member.

2 Compare the completed Trial Balance Variance Reports received from POCs in your TPD/FBA with the Trial Balance Summary Report by noon on Tuesday or other date indicated in the Reconciliation Administrator's e-mail to ensure that all variances have been resolved. If any reports are missing, ensure that the responsible POC or designated back up resolve the variance.

3 Submit the completed Trial Balance Variance Reports and attachments (PBGC Forms 487, 490 or 491) to the Reconciliation Administrator.

- **TPDs** - Place the completed Trial Balance Variance Reports and attachments (PBGC Forms 487, 490 or 491) in Trial Balance Tray located in TSD/BPAB, room number 7114 for the Reconciliation Administrator.
- **FBAs** - Fax the completed Trial Balance Variance Report **only** using the *Trial Balance Fax Cover Sheet - Reconciliation Administrator, TSD (Tbfaxra.doc)* to the Reconciliation Administrator.

4 Notify the Reconciliation Administrator in advance of changes in the distribution list (Variance Coordinator, Variance Coordinator's designated back up and temporaries) for absences or staff terminations to ensure that appropriate substitutions are made in a timely manner.

# TP 12. Deal with Fraud & Forgery

TP 12. Overview
TP 12. Workflow
TP 12.1 Initiate Check Action Request Form
TP 12.2 Take Actions to Determine Fraud/Forgery
TP 12.3 Stop Payment
Forms, Letters, Memos, etc.

## TP 12. Overview

**09/04/98**

Fraud and forgery are threats any time money is involved. While PBGC has not had significant problems with fraud or forgery, it does happen occasionally. These procedures describe PBGCs actions after it is reported that one ore more check(s) were not received by the participant or other intended recipient. When it does happen, or it may have happened, PBGC must react with positive steps to protect itself and participants. These procedures deal with checks that do not reach the recipient. Other potential fraud cases, such as non-notification of the death of a participant in order to continue receiving checks, are generally covered in the specific procedures covering those areas. *Anytime* that fraud is suspected, the person discovering it (or his/her supervisor) must contact the TPD Manager and the Office of Inspector General. Some non-receipt situations (single missed monthly check) will be reported by PBGC to State Street Corporation (SSC) for investigation by their internal forgery unit with OIG monitoring the situation rather than conducting the investigation.

TP 12.1 Action Steps: Initiate Check Action Request Form

**Deal with Fraud and Forgery**

## TP 12.1 Action Steps: Initiate Check Action Request Form

**05/12/2000**

1 When you receive notification from the participant that a check has not been received, initiate the procedure immediately. If the notification comes by mail or from someone other than the participant, call the participant to confirm that no check was received. Document all calls through CCN.

2 Complete the Check Action Request Form (CARF), Form 478, and forward the original and one copy to SSC. Ensure that a copy of the CARF is scanned to the participant's file (IPS).

3 If SSC verifies that the check was negotiated (cashed), they will provide a copy of the check (front and back). Go to TP 12.2: Take Actions for Fraud/Forgery

- If the check has not been cashed and is still outstanding, go to TP 12.3: Stop Payment. On occasion, the check may just be late in arriving. It is prudent to check back with the participant before stopping payment on the check.
- If the check has been returned and redeposited, confirm the address of the participant. After the address is confirmed, complete a Check Action Request Form, (CARF) Form 478 to have another check issued. If the participant receives a monthly annuity, encourage the participant to sign up for Electronic Direct Deposit (EDD). Send the EDD application form if participant is interested.

4 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Deal with Fraud and Forgery**

## TP 12.2 Take Actions to Determine Fraud/Forgery 12/13/2002

Action Steps

| | |
|---|---|
| **Purpose** | Initiate actions to rectify the possible fraudulent situation. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Claim from payee that check was not received, documented in IPS or CCN; copy(-ies) of negotiated check(s) from SSC. |
| **Output and Recipient** | • Cover letter for Form 537 to participant<br>• Affidavit Transmittal Letter to participant<br>• Form 537, Affidavit for Non-receipt of Benefit Check, completed by participant and notarized<br>• Form 200, Authorization to Disclose Financial Records, completed by participant and notarized<br>• Check Action Request Form (CARF), Form 478, to SSC |
| **Control Issues** | Secure Office of Inspector General (OIG) concurrence on the Authorization to Disclose Financial Records, and on certain Affidavits, before sending to participants. Ensure OIG's concurrence (via e-mail) is imaged to the participant's file (IPS). |
| **Important Concepts** | Processing will differ based on whether check was a single monthly benefit check, multiple monthly checks, or a lump sum or special check.<br>**Timing:** OIG will generally respond to IOD's request for concurrence on prepared documents within 2 business days. |
| **Guidance** | PLS, PBA, FBA |
| **Procedure Owner** | PLS |

| TP 12.2.A | Action Steps: Take Actions to Determine Fraud/Forgery, Single Monthly Check |
| TP 12.2.B | Action Steps: Take Actions to Determine Fraud/Forgery, Multiple Monthly Check |
| TP 12.2.C | Action Steps: Take Actions to Determine Fraud/Forgery, Lump Sums and Special Check |

**Deal with Fraud and Forgery**

## TP 12.2A Single Monthly Check 12/13/2002

## Action Steps: Take Actions to Determine Fraud/Forgery

This processing applies to a reported non-receipt of a single monthly benefit check, which SSC reports **has** been cashed.

1 Notify TPD Division Manager of all potentially fraudulent situations.

2 Prepare a *Form 537, Affidavit for Non-Receipt of Benefit Check (Form537.doc)*. Complete the following fields:

- Payee Name, Payee SSN, Acct. ID at the top of the form
- Check number, date, and amount in item 1 in body of form

The remainder of the form is to be completed by the payee and the notary.

**Note:** The Affidavit does not need review by OIG unless the template does not meet the needs of the situation, or if the sender has questions before mailing it to the participant. To request OIG review, send the document to OIG/IOD Forms Review via e-mail, with a short explanation. Once OIG sends an e-mail indicating its concurrence, print and image that e-mail to the participant's IPS file.

3 Send the Affidavit and copy of the cashed check with the *Affidavit Transmittal letter (Trnaffid.doc)* to the participant.

4 When the Affidavit is returned, verify that it is complete and notarized. If the form is incomplete or not notarized, return it to the participant. Prepare a new Affidavit if necessary, and explain to the participant (by letter or phone) why it needs to be resubmitted.

5 For these missed single monthly benefit checks, forward the originals of the Affidavit to SSC. Send a copy to the OIG. SSC's internal fraud unit will investigate these types of potential fraud situations with OIG monitoring.

6 Upon receipt of instructions from SSC that its investigation is completed and a replacement check should be issued, complete a CARF, Form 478 and send the original and one copy to SSC. Include directions to SSC to correct the payment ledgers to credit the previous check and include interest to the new date of payment in the re-issued check. (Compute interest using PACS, in accordance with IOD Policy Bulletin 97-7)

7 Ensure that all documentation is imaged to the participant's file (IPS), including:

- Affidavit and Transmittal Letter sent to participant
- Instructions from OIG
- Affidavit completed by participant
- PACS calculation; and
- a copy of the CARF

8 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Deal with Fraud and Forgery**

## TP 12.2B Multiple Monthly Checks 12/13/2002

## Action Steps: Take Actions to Determine Fraud/Forgery

This processing applies to a reported non-receipt of a more than one monthly benefit check, which SSC reports have been cashed.

1 Notify TPD Division Manager of all potentially fraudulent situations.

2 Prepare the *Authorization to Disclose Financial Records (Form200.doc)* form. Fill in *only* the fields for the amounts and dates of missing checks.

Forward the form to OIG/IOD Forms Review via e-mail. In the e-mail, indicate the participant 's name, Social Security number, and plan number. Forward copies of the cashed checks to the Deputy Inspector General, Office of Inspector General (OIG) via interoffice mail or through overnight mailings (FBAs).

OIG will complete items 1 and 2 of the form (regarding the period for which financial records are requested) and return it by e-mail, and indicate whether it concurs on the form or requests revisions. Once OIG indicates concurrence, print and image the e-mail to the participant's IPS file.

3 Prepare a *Form 537, Affidavit for Non-Receipt of Benefit Check (Form537.doc)*. Complete *only* the following fields:

- Payee Name, Payee SSN, and Acct. ID at the top of the form
- Check numbers, dates and amounts in item 1 in body of form. (Since the template of the form indicates a single check, modify the wording in this section to accurately indicate multiple checks.)

The remainder of the form is to be completed by the payee and the notary.

**Note:** The Affidavit does not need review by OIG unless the template does not meet the needs of the situation, or if the sender has questions before mailing it to the participant. To request OIG review, send the document to OIG/IOD Forms Review via e-mail, with a short explanation. Once OIG sends an e-mail indicating its concurrence, print and image that e-mail to the participant's IPS file.

4 Send the Affidavit, cashed check copies, and the Authorization form with the *Cover Letter for Form 537* (537covl. doc) to the participant.

5 When the Affidavit and Authorization are returned, verify that they are completed and notarized. If a form is incomplete or not notarized, return it to the participant. Prepare a new form if necessary, and explain to the participant via phone or letter why it needs to be resubmitted.

6 Forward the original completed Affidavit and Authorization, through the Division Manager, to the OIG for investigation.

7 OIG takes action and notifies the TPD that a replacement check should be issued. Do not request the replacement check until after notification from OIG.

8 Upon receipt of instructions from OIG that a replacement check should be issued, complete a CARF, Form 478, and send the original and one copy to SSC. Include directions to SSC to correct the payment ledgers to credit the previous check(s). (Compute interest using PACS in accordance with IOD Policy Bulletin 97-7)

9 Ensure that all documentation is imaged to the participant's file (IPS), including:

- Affidavit, Authorization and Transmittal Letter sent to participant
- Instructions from OIG
- Affidavit completed by participant
- PACS calculation; and
- a copy of the CARF

**10** Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Deal with Fraud and Forgery**

## TP 12.2.C Lump Sums, Special Checks 12/13/2002

## Action Steps: Take Actions to Determine Fraud/Forgery

This processing applies to a reported non-receipt of a lump sum check or special check, which SSC reports **has** been cashed.

1 Notify TPD Division Manager of all potentially fraudulent situations.

2 Prepare the *Authorization to Disclose Financial Records (Form200.doc)* form. Fill in *only* the fields for the amounts and dates of missing checks.

Request OIG concurrence on the form by sending the document to OIG/IOD Forms Review via e-mail . In the e-mail, indicate the participant's name, Social Security number, and plan number. Forward copies of the cashed checks to the Deputy Inspector General, Office of Inspector General (OIG) via interoffice mail.

OIG will complete items 1 and 2 of the form (regarding the period for which financial records are requested) and return it by e-mail, and indicate whether it concurs on the form or request revisions. Once OIG indicates concurrence, print and image the e-mail to the participant's IPS file.

3 Prepare a *Form 537, Affidavit for Non-Receipt of Benefit Check (Form537.doc)*. Complete the following fields:

- Payee Name, Payee SSN, Acct. ID at the top of the form
- Check number, date, and amount in item 1 in body of form

The remainder of the form is to be completed by the payee and the notary.

**Note:** The Affidavit does not need review by OIG unless the template does not meet the needs of the situation, or if the sender has questions before mailing it to the participant. To request OIG review, send the document to OIG/IOD Forms Review via e-mail, with a short explanation. Once OIG sends an e-mail indicating its concurrence, print and image that e-mail to the participant's IPS file.

4 Prepare the *Cover Letter for Form 537 (537covl.doc)* to participant along with the Affidavit and the Authorization form.

5 When the Affidavit and Authorization are returned, check that they are completed and notarized. If a form is incomplete or not notarized, return it to the participant. Prepare a new form if necessary, and explain to the participant via phone or letter why it needs to be resubmitted.

6 Forward the original completed Affidavit and Authorization, through the Division Manager, to the OIG for investigation.

7 OIG takes action and notifies the TPD that a replacement check should be issued. Do not request the replacement check until after notification from OIG.

8 Upon receipt of instructions from OIG that a replacement check should be issued, complete a CARF, Form 478, and send the original and one copy of SSC. Include directions to SSC to correct the payment ledgers to credit the previous check(s). (Compute interest using PACS in accordance with IOD Policy Bulletin 97-7)

9 Ensure that all documentation is imaged to the participant's file (IPS), including:

- Affidavit, Authorization and Transmittal Letter sent to participant

- Instructions from OIG
- Affidavit completed by participant
- PACS calculation; and
- a copy of the CARF

**10** Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Deal with Fraud and Forgery**

## TP 12.3 Stop Payment

**02/11/2000**

Action Steps

| | |
|---|---|
| **Purpose** | To prevent the fraudulent cashing of a benefit check. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Notification that a benefit check has not been received by the participant and confirmation from SSC that it has not been negotiated (cashed). |
| **Output and Recipient** | Completed Check Action Request Form (CARF), Form 478 to stop payment on the check. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |

TP 12.3 Action Steps: Stop Payment

**Deal with Fraud and Forgery**

## TP 12.3 Action Steps: Stop Payment

**05/12/2000**

1. If SSC advises that the check in question has not been negotiated or redeposited, complete a CARF, Form 478, and forward the original and one copy to SSC to stop the payment and issue a new check. On occasion, the check may just be late in arriving. It is prudent to check back with the participant before stopping payment on the check.
2. Verify correct address before having the new check issued.
3. File a copy in the participant file.
4. Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

## TP 12.4 Forms, Letters, Memos, etc.

# TP 13. Domestic Relations Order Handbook

TP 13. Overview

TP 13.1 Review Domestic Relations Order (DRO)

TP 13.2 Implement Qualified Domestic Relations Order (QDRO)

TP 13.3 Make QDRO Payments

TP 13.4 Administer QDRO Intake Program

Forms, Letters, Memos, etc.

## TP 13. Overview

01/19/2005

The Retirement Equity Act (REA) of August 23, 1984 amended ERISA to allow pension plans to assign all or a portion of a participant's benefit to the alternate payee(s) under a QDRO. Consequently, PBGC pays the amount(s) of a participant's benefit in a PBGC-trusteed plan to the alternate payee(s) if PBGC determines that the DRO is qualified.

The IOD QDRO Coordinator and FBA QDRO Coordinators review DROs to determine their qualification status and advise submitters and interested parties of PBGC's determination. FBA QDRO Coordinators process DROs for plans they administer and e-mail the IOD QDRO Coordinator, OPSS, for assistance if a DRO has unclear provisions. Processing of DROs in the TPDs is handled differently. The TPD PLS/PBA acknowledges the DRO, and sends notice of its receipt by e-mail to the IOD QDRO Coordinator, OPSS, for review. Once the DRO is qualified, processing staff of TPDs and FBAs are responsible for implementing the Qualified Domestic Relations Order (QDRO) and taking action that the IOD QDRO Coordinator, OPSS, advises.

IOD also reviews draft DROs to determine if they are qualifiable before submitters send them to the courts for approval.

PBGC publishes "Divorce Orders & PBGC", a booklet that provides information about QDROs and includes model QDROs that may be used for PBGC plans.

Participants or alternate payees have the right to an administrative appeal of PBGC's determination on whether or not a DRO is qualified. The DRO itself cannot be appealed because it was issued by a court of law.

IOD has implemented the QDRO Intake Program (QIP) to ensure that proactive steps are taken to collect QDRO information as early as possible before trusteeship.

# TP 13.1 Review Domestic Relations Order (DRO) 01/19/2005

## A. Receipt of an Order

An interested party (interested parties include all persons named in the order, the parties' attorneys, if identified) and any representative designated in a DRO submits the order to PBGC and the DMC processes the DRO as any other document it receives. If the DRO is identified with a plan participant, its receipt is entered into SCoRe and the Point of Contact (POC) of the plan is notified through SCoRe. The DMC also scans the DRO into the participant's file (IPS). Review of the DRO begins immediately.

The DMC forwards original DROs that cannot be identified with a plan participant to the IOD QDRO Coordinator, OPSS, for research and follow-up action.

## B. Determination of Qualification Status

1. Review the order to determine if it is a DRO, a draft DRO or State Agency Order. If it is a DRO or draft DRO, prepare and mail the Acknowledgement of Receipt of DRO letter (ALGS 600) or the Acknowledgement of Receipt of Draft DRO (ALGS 601) letter to the submitter. Send a copy to interested parties. If it is a State Agency Order, FBAs go to (d) below, TPDs go to C.
2. Query PRISM for the participant's status code. If the status code is 7, go to (b) below.
3. If status code is 1, and the DRO **(not draft DRO)** is a shared payment order, reduce the participant's benefit by the amount specified in the DRO. If a separate interest QDRO is received after the participant has submitted a benefit application package, but before the participant's first payment date, reduce the participant's benefit by the amount specified in the DRO starting with the participant's first payment date.

| Note | A separate interest DRO cannot be qualified after the participant's first payment date. |
|---|---|

4. Ask the plan actuary to calculate the amount if it is not a fixed dollar amount.
5. FBAs go to **(a)** or **(b)** or **(c)** below. TPDs follow C. Process for Reviewing DROs for TPD plans.

### (a) Domestic Relations Order (DRO)

1. Determine if the DRO is qualified using the *Checklist for Reviewing a DRO (chklstdro.doc)*. If the DRO has unclear provisions, e-mail the IOD QDRO Coordinator, OPSS, for assistance.
2. Indicate at the top of the Checklist if the DRO is qualified or not. Sign and date the checklist.
3. If the DRO is not qualified, prepare and send the DRO Not Qualified letter (ALGS 606) to the submitter. Mail a copy to interested parties.
4. If the DRO is qualified, prepare the *QDRO Benefits Worksheet (QDRObnwk.doc)* and go to TP 13.2. Implement QDRO..

### (b) Post Mortem DRO

The IOD QDRO Coordinator, OPSS, will make a qualification determination on all post-mortem DROs. A post mortem DRO is one that has not been qualified at the time of the participant's death. Usually, PBGC receives it after the participant dies or it is pending qualification. PBGC does not impose a time limit from the time of death to receipt of a DRO as long as the conditions that PBGC stipulates are met.

1. Send e-mail to IOD QDRO Coordinator, OPSS, that includes the following information:
   - Participant's SSN
   - Copy of Port Mortem DRO
   - Any related document submitted before death such as a court order or separation agreement, and if applicable and available, a draft DRO (if not on IPS).
2. Process the DRO based on IOD QDRO Coordinator's determination.

**Note** PBGC will not normally qualify a post mortem order if the participant was married to another spouse at the time of death, or if the participant's benefit is in pay with another person who is designated as the contingent annuitant.

**(c) Draft DRO**

1. Determine if the draft DRO is qualifiable using the *Checklist for Reviewing a DRO (chklstdro.doc)*. If the DRO has unclear provisions, e-mail the IOD QDRO Coordinator, OPSS, for assistance.
2. If the draft DRO is qualifiable, prepare and mail the Draft DRO Qualifiable letter (ALGS 607) to the submitter and send a copy to interested parties.
3. If the draft DRO is not qualifiable, prepare and send the Draft Order Not Qualifiable (ALGS 608) to the submitter and send a copy to interested parties.

**(d) Orders from State Agencies**

These are usually for child support payments and may not always be DROs.

1. If review of the order reveals that it is **not** a DRO, send the NonDRO Response letter (ALGS 602) promptly. This will prevent the State Agency from holding PBGC in contempt of Court. If the order is a DRO, go to **(a)** above.
2. If PBGC receives a Notice of Noncompliance from a state agency (for not receiving the NonDRO Response letter), complete the *QDRO OGC Fax Cover Sheet (QDOGCfax.doc)* and fax the notice to the OGC QDRO POC and the IOD QDRO Coordinator, OPSS.
3. The OGC QDRO POC will respond to the state agency and e-mail a copy of the response to the sender of the fax and the IOD QDRO Coordinator, OPSS.

**C. Process for Reviewing DROs for TPD plans**

1. PLS/PBA sends e-mail notice to IOD QDRO Coordinator, OPSS that a DRO/Draft DRO or a Court Order is received. E-mail states participant's name, SSN, plan number.
2. IOD QDRO Coordinator, OPSS reviews the order taking the necessary steps in A above and advises the PLS/PBA of the action taken.
3. For qualified DROs, the PLS/PBA follows applicable steps in TP 13.2: Implement QDRO and TP 13.3: Make QDRO Payments.

**D. California Joinders**

These are only issued in the state of California and require a representative of the plan to be part of the hearings. A joinder is sent to notify PBGC that the parties are going to court to resolve marital property and child support issues. One person or both involved in the joinder receives or may receive benefits from a PBGC trusteed plan.

1. Complete the *QDRO OGC Fax Cover Sheet (QDOGCfax.doc)* and fax the California Joinder to the OGC QDRO POC.
2. The OGC QDRO POC will respond to the submitter and e-mail a copy of the response to the person who faxed the Joinder and to the IOD QDRO Coordinator, OPSS, as applicable.

**E. Orders for Non-Trusteed or Standard Termination Plans**

The IOD QDRO Coordinator, OPSS or FBA QDRO Coordinator uses CAS and other available resources to determine the status of the plan, and takes action as outlined below.

| **If** ... | **Do the following** ... |
|---|---|
| Plan is not trusteed | Send *PBGC Not Trustee Letter (PBGCnTrste.doc)* to submitter and a copy to interested parties. |
| Plan was not termination but reportable events were recorded in CAS | Call submitter and give him/her the plan administrator' s last address recorded in CAS and advise them that the address may not be current. |
| The plan was a Standard Termination | Forward the DRO to the Program Assistant in STCD /PTAB for appropriate action. |
| There is no record of case | Seek help from CPRD to identify the plan administrator. May need to request EIN/PIN from submitter or interested party to give to CPRD. |
| No information is available from CPRD | Return DRO to submitter with advice to contact Department of Labor to find information about the plan sponsor or administrator. |

**F. Withdrawal of DRO**

A DRO may only be withdrawn before PBGC qualifies it. Upon receipt of a written request from an interested party to withdraw a DRO not yet qualified, stop processing the DRO immediately. This is not the same as a revocation order which is a request to cancel or vacate a QDRO and is handled by the IOD QDRO Coordinator, OPSS.

1. Send the Withdrawal of DRO letter (ALGS 603) to the requestor. Mail a copy to interested parties.
2. If the participant or alternate payee submits a revocation order, refer it to the IOD QDRO Coordinator, OPSS, for determination of whether the QDRO can be vacated.

**G. Other Activities (May be required throughout Processing)**

1. When reviewing any of the orders referenced above, if required documents are missing, send the Acknowledgment letter (ALGS 530) indicating the documents needed.
2. Ensure that all documents that PBGC receives and prepares (if not imaged through ALGs) are imaged in the appropriate IPS file (participant's and/or alternate payee's).
   - Headquarters QDROs – TPD PLS/PBA are responsible
   - FBA QDROs – FBA QDRO Coordinators are responsible
3. The IOD QDRO Coordinator or FBA QDRO Coordinator maintains and periodically purges a chronological file of copies of the PBGC not Trustee letters (no IPS file for the submitter of the DRO).

# TP 13.2 Implement QDRO

01/19/2005

## Creating PRISM Records

Once the DRO is qualified, implementation of the QDRO begins. The determination of how to establish PRISM records is based on who is designated as the alternate payee in the QDRO. If the alternate payee is a spouse or former spouse, a separate account must be set up in PRISM for the spouse or former spouse using his/her own SSN and processed in PRISM as any other payment record. An alternate payee who is a child or other dependent is paid through a QDRO deduction on the participant's record.

An alternate payee may also be the beneficiary of a participant for a QPSA, QJSA or balance of C&C benefits.

## A. Separate Interest QDRO

The alternate payee chooses his/her form of benefit (single life forms only) and the commencement date, which is no sooner than the participant's earliest PBGC retirement age. Information sent with the Benefit Application Package gives the alternate payee details about the forms of benefit that PBGC offers.

If the alternate payee named a contingent alternate payee and dies before going into pay status, the contingent alternate payee will receive the benefits to which the alternate payee was entitled. If the alternate payee did not name a contingent alternate payee, the benefit will be forfeited to PBGC unless the QDRO stipulates that it should revert to the participant.

1. Create a record in PRISM and in IPS for the alternate payee. Ensure that the records are linked in PRISM and cross-referenced in IPS and that the participant is payee type 1 and the alternate payee is payee type 3, see Creating a Record in PRISM above.
2. Ask the plan actuary to calculate the alternate payee's benefit if necessary and not previously done.
3. Prepare DRO Qualified letter (ALGS 605), and mail to the submitter of the DRO. Send a copy of the letter to interested parties.
4. After the appeals period has expired or a decision is made on the appeal, process the alternate payee as any other PBGC participant.
5. Upon receipt of a completed benefit application package, go to TP 13.3 Make QDRO Payments.

## B. Shared Payment QDROs

The alternate payee cannot start receiving benefits before the participant.

Should the participant die before the alternate payee, payment to the alternate payee must cease. If the alternate payee dies before the participant, the alternate payee's portion of the benefit reverts to the participant unless a contingent alternate payee is named in the QDRO.

### (a) Shared Payment with separate Account

1. Apply steps 1-5 under A.
2. If the participant is a deferred vested, advise the alternate payee of payment eligibility using the Advice to Alternate Payee of Payment Eligibility letter (ALGS 610) when the participant applies for benefits.

**(b) Shared Payment as deduction from participant's account**

1. Prepare DRO Qualified letter (ALGS 605), and mail to submitter of DRO. Send a copy of the letter to interested parties.
2. If the participant is in pay status, go to TP 13.3 Make QDRO Payments.
3. If the participant is not in pay status, start deductions when the participant is put into pay, see TP 13.3: Make QDRO Payments.

# TP 13.3 Make QDRO Payments

01/19/2005

The determination of how to process a QDRO payment is based on who is designated as the alternate payee (spouse, former spouse, child or other dependent) in the QDRO. A parent is usually the designated representative of an alternate payee, who is a child.

QDRO payments must be made payable to the alternate payee regardless of age. Payments should not be made payable to the courts, social agencies, or law enforcements agencies. The **only exception** is if the QDRO specifically designates a state agency as the representative of the alternate payee and specifies that the payment must be payable to the organization. Do not make benefits payable to any other designated representative. Requests for payments to be payable to a designated organization should be made to the IOD or FBA QDRO Coordinator (who will review the QDRO and determine if payment can be made to the Agency), and **not** directly to SSC.

The QDRO Escrow deduction field in PRISM Benefits is not used to process a QDRO deduction. If the need arises for another QDRO deduction field where two QDROs are concurrent, special instructions must be sent to SSC. Contact a PLS in BPAB for details.

## A. Alternate payees responsible for their own taxes (spouse or former spouse)

1. Review alternate payee's record in PRISM Customer and update with any new information e.g. address change, payment destination, etc.
2. Use PACs to calculate the amount of the alternate payee's benefit based on the form of benefit that the alternate payee chose (for separate interest QDROs only) and any back payment that may be due.
3. Process payment in PRISM Benefits and ensure payment(s) is/are authorized, see TP 28. Authorize Financial & Non-Financial Transactions through PRISM. Remember the gross amount is the separate amount to which each party is entitled.

**Note** Upon advice of the death of a participant in a shared payment order, stop payment to the alternate payee simultaneously with ending the participant's benefit.

## B. Alternate payees not responsible for their own taxes (child or other dependent)

1. For a participant now going into pay status, enter the gross amount in the appropriate pay source and the deduction amount in the QDRO deduction field.
2. If participant is in pay status and his/her benefit was reduced during the review of the DRO, use the next available pay source in PRISM Benefits to restore the benefit to the original gross amount.
3. Enter the amount payable to the alternate payee in the QDRO deduction field that is associated with the pay source.
4. Complete the *PBGC QDRO Deduction Instructions to SSC (QDROSCC.doc)* form and send to SSC by overnight mail. SSC will populate PLUS fields with the required information and send a separate payment to the alternate payee or QDRO appointed representative (see **only exception** above).

## C. Release of Benefit to Participant

This occurs when PBGC reduces a participant's benefit upon receipt of a DRO and later determines that the DRO is not qualified.

1. Use PACs to calculate amount withheld from participant's benefit.

2 Process back payment as single payment in PRISM Benefits.

3 Prepare and mail Release of Benefit to Participant letter (ALGS 611) to participant.

**D. Request for Return of Overpayment**

This occurs when PBGC does not start reducing the participant's benefit timely upon receipt of a DRO and the participant is overpaid.

1 Send the Request for Repayment of Overpayment letter (ALGS 612) to participant advising of the overpayment and ask for return of monies within 30 days (regardless of amount).

2 If overpayment is **more than** $500.00 and participant does not repay, recoup at 40% until fully repaid – no waiver of partial payment **(benefit may be estimated or final).**

3 If overpayment is **$500.00 or less** and benefit is **final**, apply recoupment rule (waive amount).

4 If overpayment is **$500.00 or less** and benefit is **estimated**, wait until benefit is final and apply recoupment rules.

# QDRO Intake Program

## Purpose

The TPD Case Team is responsible for ensuring that participants and alternate payees of QDROs are paid accurately and timely when PBGC trustees a plan. In order to meet this goal, the TPD Case Team will take the following actions.

- Establish a QDRO Point of Contact.
- Get QDRO records as early as possible in trusteeship process.
- Assess backlog for timely qualification and payment processing.
- Determine need for site visit.
- Ensure that payments are established correctly in PRISM and with Paying Agent.

## Objectives

### Objective 1:

1. Establish a QDRO Point of Contact (QPOC) with the current plan administrator. The QDRO POC should be familiar with the plan's QDRO processing.
2. Send *QDRO/DRO Statistics and Questionnaire (QDROstats.doc)* to the QPOC for completion and ensure that the letter and response from the QPOC are imaged to the plan file.

A QDRO POC should be available to PBGC even after the transfer of all data to clarify issues or provide additional information. If a QPOC is not available with the current plan administrator, the TPD Case Team will complete the QDRO/DRO Statistics and Questionnaire.

**Objective 2:** Obtain QDRO/DRO records early in the trusteeship process.

**a) Plan Administrator's QDRO Data**

Ask the QPOC to identify alternate payee records and the participant records to which they are associated. This information should be provided electronically where available, and should include the following information for each alternate payee:

- alternate payee's name
- alternate payee's Social Security Number
- alternate payee's birth date
- alternate payee's telephone number
- name of the affected participant
- participant's Social Security Number
- whether DRO is qualified or not

**b) Obtaining Participant and Alternate Payee Paper Files**

Ask the former plan administrator to segregate participant and alternate payee files with QDROs from the general file population, and provide them separately with the designation that they are affected by QDROs. Request that the QDRO files be organized into the following categories:

1) QDROs in pay status
   a) Separate interest QDROs
   b) Shared payment QDROs
   c) QDROs providing surviving spouse benefits only

2) QDROs not in pay status
   a) Separate interest QDROs
   b) Shared payment QDROs
   c) QDROs providing surviving spouse benefits only

3) DROs pending qualification determination (including denials awaiting redraft) sorted according to earliest pay eligibility date.

4) Other QDRO related issues
   a) divorce or other QDRO related orders where former plan administrator believes a DRO will be submitted soon (such as a restraining order preventing a participant from receiving a benefit)
   b) child support orders

If the former plan administrator is unable to sort the QDROs and DROs into the above categories, the TPD Case Team will.

**Objective 3:** Request assistance from the IOD QDRO Coordinator, OPSS through the TPD Manager if:

1. PBGC is unable to obtain necessary data and records from the prior plan administrator, or needs help obtaining the data.
2. The answer to question "c" on the QDRO/DRO Statistics and Questionnaire indicates that there is a backlog of DROs to be qualified.

**Objective 4:** Quickly identify and process a backlog of DROs to be qualified.

Review the backlog to determine which orders must be evaluated immediately (including those where the participant is in pay or may retire soon), and which may be evaluated thereafter (such as a QDRO affecting a young deferred vested participant). If much of the backlog needs to be processed immediately, coordinate with the TPD Manager to obtain the resources needed to perform this function.

**Objective 5:** Review and Update Records in PRISM to facilitate accurate and timely payments.

QDROs will be loaded initially by Datahub with Cust_Type = PP (participant) through either the Datahub "1st Pay" or "9A" load. As soon as possible after records are loaded in PRISM, starting with payee records:

- Compare information obtained from prior Plan Administrator with PRISM data and correct the customer type and status code of the participant and alternate payee in PRISM.

- If answer to question "9" on QDRO/DRO Statistics and Questionnaire is that payments to alternate payees were made as a deduction from the participant's account, review prior paying agent's payment records to identify those payments. The purpose is to ensure that PBGC does not miss payments to alternate payees as a result of the transfer of data.
- Set up records correctly in PRISM – separate records for participants and alternate payees who are responsible for their own taxes. Where the alternate payee is a child or other dependent and payment will be made as a deduction from the participant's record, ensure that the deduction is correctly entered in PRISM.
- Link alternate payee records to the participants records.
- Go to TP 13.3: Action Steps: Make QDRO Payments.

| | |
|---|---|
| **Note** | If a separate alternate payee record is created after trusteeship letters have been mailed, send trusteeship letter to the alternate payee. |

**Objective 6:** Review QDROs qualified by prior plan administrator (before trusteeship).

a) In pay status at DOPT

- Do **not** review any QDRO that was in pay status at DOPT.

b) Not in pay status at DOPT

- Review all QDROs to determine payment eligibility dates.
- Sort the QDROs by payment eligibility dates to identify the participants and alternate payees who are eligible to go into pay during the first year after DOPT.
- Review all QDROs eligible to go into pay during the first year to determine if provisions pertaining to benefit payments are clear.
- If the benefit payment provisions in the QDRO are unclear, do the following:
  - Send letter advising of PBGC's interpretation of QDRO provisions. Letter states that if interested parties disagree with interpretation, they should contact PBGC.
  - If the interested parties disagree with PBGC's interpretation or if the QDRO provisions are so unclear that an interpretation cannot be made, contact IOD QDRO Coordinator, OPSS, for guidance.

Review remaining QDROs as resources permit. However, if significant problems are encountered in QDROs of first year eligibles, review all other QDROs as soon as possible to determine appropriate PBGC response to interested parties.

# TP 14. Hold Participant Meeting

TP 14. Overview
TP 14. Workflow
TP 14.1 Gather Information & Determine if a Meeting is Needed
TP 14.2 Plan Meeting(s)
TP 14.3 Hold Meeting(s)
TP 14.4 Analyze Participant Meeting
Forms, Letters, Memos, etc.

# TP 14. Overview

08/10/99

When PBGC trustees a pension plan, the plan participants have many concerns and questions. A participant meeting is a proactive step for PBGC to initiate good customer relations. It demonstrates our customer service focus in a forum that directly addresses participant concerns and questions in a professional empathetic fashion.

Typical questions and concerns of participants include:

- What is PBGC, I've never heard of it?
- Why does PBGC have my company's pension plan?
- Why isn't there enough money in the plan?
- What will happen to the pension my company was paying?
- What will I get when I retire?
- I'm ready to retire, what do I do now?
- How long will it take for me to get my pension?
- Can I take my money now in a lump sum or transfer to my IRA?
- Whom do I contact if I have a question?

Participant meetings are typically held for Large Cases, defined as a plan or group of plans with 1000 participants or $5 million or more in UBL. Of course, participant meetings may be held for any plan. Consider a participant meeting whenever there is at least 300 participants in a single geographic area or when other circumstances indicate that it would be in the best interests of the participants or the PBGC. Occasionally, a plan sponsor will request that PBGC hold a meeting with the participants, and may work with PBGC to notify the participants. The Participant Meeting Coordinator (PMC) and the TPD Manager usually determine whether to hold a participant meeting.

A participant meeting:

- Introduces PBGC and the federal insurance program that protect their pension benefits.
- Explains how the insurance protection applies to their plan.
- Tells participants how to contact PBGC.
- Provides a forum for questions to be asked and answered in front of the group during the formal meeting, and after the meeting one on one with the individual staff members.
- Allows participants to bring copies of their source documents to the meetings, speeding the data verification process.

Participant meeting planning requires close coordination among the TPD case team, the Participant Meeting Assistant (PMA) and the PMC. Meeting logistics, including dates, locations, equipment, employee notices, coordination with a union or other organization need to be planned. The actual meeting, including speakers, slide show, participant handouts and staff also requires preparation and rehearsals to ensure smooth delivery and a positive reassuring experience for the participants.

TP 14.1Action Steps: Gather Information and Determine if a Meeting is Needed

## TP 14.1 Action Steps: 08/10/99

## Gather Information and Determine if a Meeting is Needed

1 All Large Cases will be considered for a Participant Meeting. Review other cases as circumstances dictate. Review the information and documents already collected by PPD and/or the TPD involved. This will normally be done as a part of case processing. However, it can also occur shortly after a large case is identified and before trusteeship. With large cases, a Large Case Working Group (LCWG) is formed. This is an interdepartmental team created early in the process to expedite and smooth the way for successful case processing. (See TP 23: Coordinate and Process Large Cases.) The high visibility early in the process normally ensures that the needed data is obtained. Among the documents and information needed are the following:

- Plan documents and amendments
- Plan population with current addresses
- Plan contacts (plan administrator, union representatives, paying agent, plan trustee, any participant groups, etc.)
- Any guarantee limitations applicable to the plan(s)
- Controlled groups, assets, liabilities, and conditions of PBGC trusteeship
- Overall background information applicable to the plan(s) and sponsoring employer
- Other information, as required

2 If not already prepared by PPD, prepare a Case Contact Sheet (Contacts.doc). Also, complete a Memorandum to the Executive Director (Pmedmem.doc).

3 Compare information against criteria for holding a meeting. If the case is identified as a large case, the basic decision criterion is whether there are enough participants in a single locale. The normal number required is 300; however, that is a guideline, rather than a concrete requirement. Other facts might justify a meeting with smaller numbers.

4 The TPD Manager and PMC maintain the final decision making authority and the approval authority for participant meetings. Once a decision is made to hold a participant meeting, contact the Participant Meeting Assistant (PMA) who will work with the team on the participant meeting planning.

TP 14.2A Action Steps: Plan Meeting Logistics

TP 14.2B Action Steps: Plan Participant Meeting

**Hold Participant Meeting**

## TP 14.2A Action Steps: 02/18/2005

## Plan Participant Meeting Logistics

1 The Participant Meeting Coordinator (PMC) convenes a meeting of the TPD case team, FBA (if possible), Participant Meeting Assistant (PMA) and others involved in planning the participant meeting. CPAD may be involved depending on the size of the case and other factors, including the need to publicize through the newspapers.

2 Planning for the participant meeting involves:

- Review of case information, participant meeting requirements, and time frames.
- Determination of a schedule for actions prior to the meeting.
- Set a preliminary date for the meeting(s).

Use the *Trip Planning Checklist (Tripplan.doc)* to work through preparation details. Once completed, the checklist provides basic plan information and identifies the assignment of various participant responsibilities among members of the team.

3 Determine the location for the meeting(s), including city and state. Once the number of participants is known, an appropriate location(s) may be determined that will handle the number of people expected. Considerations include:

- Central location(s)
- Size of the expected audience. A smaller, less intimidating setting is preferable, it encourages questions and interaction with the participants.
- Availability of equipment on-site may include: an 8' x 8' screen, PA system, equipment for the projected computer presentation, TV, VCR, copier (to copy source documents) etc.
- Union or other employee organization support. As appropriate, contact any applicable union officials and enlist their cooperation and support for the meetings.
- Familiarity of participants with a location, such as a union hall, where many of those involved might have visited or even have spent considerable time may be appropriate.
- Number and times of the meetings. Meeting may be scheduled to coincide with the availability of the participants, such as one per shift or an afternoon/ evening pairing.

4 The PMA takes the lead on handling meeting logistics, including location, and the FBA may be of great assistance with these meeting arrangements. Other members of the case team may have information about appropriate locations from their field trips. The FBA should rent/provide all required equipment and cover all costs as reimbursables under the contract.

5 After the date(s) is set and the location booked, prepare a Meeting letter (ALG 522) through ALG for all participants. Use Spanish Version as appropriate. Plan to provide this approximately 30 days prior to the date of the meeting. While the preferred method is a separate meeting notice prepared and mailed by the FBA responsible for the plan, other methods of notifying participants include:

- Modifying the 4042(d) letter to include the participant meeting information, taken from ALG 522.
- Notification through plan sponsor, union or other employee organization.

- Notices in local newspapers.

**Note** The Meeting letter (ALG 522) informs participants that they may bring copies of source documents to meeting or if desired, PBGC staff will make copies at the meeting. Source document copies are originally requested in 4042(d) letters, which are typically sent prior to the participant meetings, see Process 9.13 Notify Participants.

**6** Ensure that travel arrangements, including transportation, hotel accommodations, and rental cars are made for all participant meeting staff.

**7** Arrange for equipment and room setup. Equipment needs may include: a portable PC loaded with the slide presentation (Freelance or other), LCD box for projection, LCD projector, a video projector (for videotape), an 8' x 8' screen or larger, PA system with four portable microphones, and a copier(s) (if the Participant Meeting is being coordinated with the Participant Data Verification requests). In most cases this equipment will be rented by the FBA. Some of it may be included as part of the hall rental. Ensure that delivery, setup, and takedown/cleanup are part of the package deal on the hall and equipment, as applicable.

**Hold Participant Meeting**

## TP 14.2B Action Steps:
## Plan Participant Meeting

**05/18/2001**

1 Coincident with the participant meeting logistics planning, the Participant Meeting Assistant (PMA) and participant meeting team coordinate preparation of the participant meeting material. Some material is standard, such as the videos, others are prepared for each individual plan. Participant Meetings generally use some or all of the following:

| Material | Responsibility |
|---|---|
| **PBGC Videotape (2 copies)** | Available from CPAD |
| **slide presentation** | TPD team marks up template slide presentation with plan specifics to be prepared in final by PMA |
| ***Summary Plan Description (Spd.doc)*** | TPD case team prepares using Plan Abstract , completed as part of Process 12.2: Prepare Plan Abstract |
| **Participant Meeting Evaluation Card** | PMA |
| **Brochures** | Available from CPAD |
| **Fact Sheets** | Available from CPAD |
| **PBGC Promotional Material (magnets, pens etc.)** | PMA, CPAD |
| **Meeting Program** | Prepared by the Case Team |
| **PBGC Newsletters - retirees & deferred vesteds** | If excess stock available from TSD |

2 Typically, presentation material will be provided to the Participant Meeting Coordinator (PMC) who handles needed coordination with the Office of Executive Director. Often, executive staff will take part in a participant meeting.

3 The content of the presentation material introduces PBGC, provides specific plan and participant information. The material content may be reviewed and comments/suggestions made by various members of the meeting team, PMC, OED or other management officials, and should be viewed as a whole to ensure that topics are not addressed by multiple parties. Key slides from the slide presentation may be attached to the SPD and provided to participants.

4 In addition to preparing the written material, the meeting team rehearses the presentation as necessary. Members of the team are encouraged to take advantage of any available presentation training opportunities from The Training Institute in advance of the meeting. Use the *Frequently Asked Questions - Participant Meetings (FAQpmtg.doc)* in these rehearsals. Rehearse accurate easy to understand responses to these questions and any other anticipated from the participants.

5 Once the text of the material is prepared, the PMA ensures that copying and shipment of all necessary items is done. Depending on the size of the meeting, arrangements may be made for the handouts to be copied in the field by a local vendor prior to the meeting. Plan to hand carry the PBGC videotape (2 copies) and a laptop computer.

TP 14.3 Action Steps: Hold Meeting(s)

## TP 14.3 Action Steps: Hold Meeting(s)

02/18/2005

1 Because each trip is different, the following steps should be accomplished, although not necessarily in this order. Staff from the FBA may be able to do an early check on the room to get a solid idea of its layout, and communicate that back to the remainder of the team at headquarters.

- Visit the room where the meeting(s) will be held
- Make sure that all equipment is working; if not, get a replacement
- Ensure all shipped items arrived; if not, make copies from the hand carried copies
- Hold any other meetings required prior to the actual participant meetings, e.g., a dry run of the presentation, meeting with union officials
- Ensure the team brings adequate office supplies - tape, staplers, supply of pens for participants etc.

2 Hold the first meeting. Conduct the presentations and the question and answer sessions. Note anything that must be researched at PBGC or any necessary follows up activities. Inform attending participants that their co-workers (or other participants) may contact PBGC's CSC to request that the "package of information" be mailed to them.

3 If applications or other participant forms and/or source documents are received at the meeting, ensure they are delivered to PLS or FBA for processing according to Process 13.1: Verify Data from Returned Forms.

4 After the first meeting, conduct an informal briefing of the team. Review what worked and what did not. Ensure that any commitments made to respond to individual participant inquiries will be met. Note whether the participant group had any specific concerns that arose during individual question and answer period. Consider incorporating these concerns into the next participant meeting for the same plan, and whether these concerns might merit revision of standard participant meeting material: slide show, SPD, FAQs.

Based on the results of the debriefing make any necessary changes to the presentations prior to the next meeting. Handouts usually cannot be changed, but the presentation on the PC can. Staff can also review appropriate answers to new questions or concerns.

5 If multiple participant meetings are held on a case, repeat team debriefing after each meeting.

**Hold Participant Meeting**

## TP 14.4: Action Steps: 08/10/99
## Analyze Participant Meeting

1. The PMA ensures that a supply of the participant handouts (SPD and hard copy of the slide presentation) are available in CSC and that the CSC staff is prepared to respond to these requests. (CSC staff will discard the supply after 30 -45 days depending on whether demand continues.)
2. The PMA reviews the evaluation cards completed by participants at the meeting(s). Tally up the responses and read through individual comments.
3. Draft brief *Participant Meeting Summary Memo (Pmtsum.doc)* to the Meeting Team Leader, provide copies to remainder of the team. Provide the results of the responses, and summarize the participant comments. (The comments may be written up verbatim, depending on the volume of comments.)
4. As a team, determine whether comments from evaluation cards or experience from the participant meeting(s) indicate improvements or additions to the participant process or training. Follow through by forwarding any recommendations to the appropriate party(ies).

# TP 15. Prepare & Mail Letters

TP 15. Overview

TP 15.1 Prepare & Mail Letter(s)

Forms, Letters, Memos, etc.

# TP 15. Overview

This technical procedure describes the production of participant letter(s), as such it does not stand alone. It is followed to produce one or more letters necessary to complete a process or procedure. Case related letters that IOD sends are not covered in this procedure.

Participant Letters are almost always prepared through PRISM ALGS whenever possible. In special circumstance when a unique letter is required that cannot reasonably be created through PRISM ALGS, users may write a participant letter using a word processing program, also referred to as a Custom Letter.

When it is learned that a customer did not receive the original of a letter (BDL or other letter) print the original correspondence from IPS and send it and all necessary attachments to the customer, using the appropriate cover letter. For BDLs, use ALG 540: BDL Cover Letter. For other letters, the 540 may be modified as appropriate or another cover letter prepared.

| Note | It is **never** appropriate to send a hand modified original or copy of a letter to a customer. This includes crossing out and/or changing dates or addresses. |
|---|---|

Regardless of how the participant letters are prepared, **the mail date on the letter is always the actual mailing date,** and letters are quickly imaged to the participant file (IPS) so that customer inquiries are serviced effectively.

**PRISM ALGS (Automated Letter Generation System)**

- Utilizes a range of prepared participant correspondence, organized into five chapters (100 series, 200 series.....).
- Pulls the variable data (customer and plan specific information) from the PRISM Database (retro-PRISM).
- Required for Benefit Determination Letters. Enters the date sent into the PRISM database after the letter has been imaged.
- Handles all sizes Letter Requests from single pieces of correspondence to large mailings.
- Provides an automatic routing approval process for Letter Requests that may be established by each division.
- Prints letters at local printer (users responsible for stuffing and mailing) or through fulfillment centers (DMC or off-site).
- Allows users to delete Letter Requests prepared for local printing at their desktop.
- Quickly and automatically images letters directly to the participant file (IPS).**The imaging date is one full business day after the mailing date.**
- Has a Generic Custom Letter that can be used to create any type of custom letter for a participant in the PRISM database. (Do not use for Benefit Determination Letters.)

**Custom Letters through word processing**

- Generally, printed at local printer with stuffing and mailing the responsibility of the processing unit.
- Must be photocopied and **submitted for imaging immediately**, so that they may be viewed in the participant file (IPS).
- Approved by Team Leader or higher according to TPD guidelines.

| | |
|---|---|
| **Note** | If special circumstances require preparation of a large volume of letters outside of PRISM ALGS, contact the PRISM ALG System Administrator for assistance and planning in order to use the stuffing and mailing services of the fulfillment centers (DMC or off-site). |

**Prepare and Mail Letters**

## TP 15.1 Select and Review Letters

**05/18/2001**

**Action Steps**

| | |
|---|---|
| **Purpose** | Send correct letter(s) with correct forms and enclosures to customer(s). |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Type(s) of letter needed, relevant variable data, recipient approval levels necessary (may vary by Division), and stock of required enclosures. |
| **Process Output and Recipient** | Letter(s) mailed to participant(s) with all appropriate enclosures and imaged timely to the participant(s) file (IPS). |
| **Control Issues** | PRISM ALGS quickly and automatically images letters to participant file (IPS), so that they are viewable by staff **one full business day after the mail date**.<br>Perform quality control review, including spell check, print preview and printing a local Letter Request to "test" a letter before sending a large Letter Request to fulfillment. Delete incorrect local Letter Requests as necessary **ASAP, but not later than mail date**. Deleting the Letter Request ensures the incorrect Letter Requests are not mistakenly imaged. The initiator of the Letter Request ensures the incorrect letter(s) are not mailed. Requests for deletions that are not completed by mail date must be forwarded to the Help Desk.<br>**Approval of Letters:** Letters may or may not require concurrence or supervisor approval. Generally, standard PRISM ALGS response letters require only a peer review to ensure that the correct letter was chosen for sending. However, follow the approval and concurrence requirements addressed in the appropriate process, and as prescribed within the division's Management Team if there are any questions about approval requirements for a particular process. FBAs follow the guidance of the respective TPD for each plan. TPDs may establish routing for approval through ALGS for approvals. |
| **Important Concepts** | Mail letters on mail date **only**, not earlier or later. An accurate mail date is always important, for Benefit Determination Letters it is particularly important as it marks the beginning of the period within which a customer may file an appeal, generally 45 days from date of letter. (See 29 CFR 4003: Rules for Administrative Review of Agency Decisions.)<br>If it is learned that a customer did not receive an original letter (BDL or other) print a copy from IPS and send it and attachments with a cover letter. For BDLs, the ALG 540: BDL Cover Letter is used, as it clearly establishes that the appeals period commences with the date of the 540.<br>**Timing:** Plan Letters Requests taking into consideration the PRISM refresh process (PRISM ALGS utilizes retro-PRISM) and the printing location (local, DMC, or off-site fulfillment). |
| **Guidance** | Appropriate process or technical procedure<br>PRISM ALG Letter User Guide & ALG Letters (electronic manuals in IOD Manual System) |

29 CFR 4003

# TP 16. Establish & Maintain Plan & Participant Files

TP 16. Overview

TP 16.1 Create & Maintain Files

TP 16.2 Maintain Plan File

TP 16.3 Maintain Participant File

Forms, Letters, Memos, etc.

**Establish and Maintain Plan and Participant Files**

## TP 16. Overview

**03/23/2001**

IOD maintains two types of case related files: plan files and individual participant files. The information in these files documents our plan and participant processing in accordance with established policies and procedures. In those rare instances when a specific policy or procedure was not followed, the file will contain documentation (memo to the file) from the TPD Manager providing details as to the nature and circumstance for the processing exception(s).

Our goal is to have plan and participant information imaged and available online.

As documents are received or created, they will be imaged and added to the electronic files. It is critical that all relevant documents are imaged.

Documents vary in title, presentation, and content. As relevant documents are received or created, they must be forwarded to the Document Management Center (DMC) for imaging and retention. The IPS is the official "system of record" for participant information. For exception to electronic participant files, See TP 27: Run Personal Interest Conflict System (PICS) . Relevant documents and correspondence must be forwarded in a timely manner. Concerns about the image process should be immediately referred to the IPS Division Point of Contact in each TPD, or the FBA Manager, who should then relay the concern to the DMC Manager for resolution and advice.

**Establish and Maintain Plan and Participant Files**

## TP 16.1 Create and Maintain Files

**03/23/2001**

Action Steps

| | |
|---|---|
| **Purpose** | To create a record of all plan and participant related actions |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that there is a case<br>Documents and records related to the case |
| **Output and Recipient** | Record of relevant documents received by the PBGC related to the plan or participant |
| **Control Issues** | Ensure that files are created and maintained in a way that information is available to those in PBGC who need it.<br>Do not create duplicate or "working" hardcopy files.<br>Ensure that files are appropriately cross-referenced in IPS so that beneficiary information is not overlooked in benefit administration. |
| **Important Concepts** | Files are the administrative record of the case. In cases where litigation is involved, the files and activity logs may become critical. |
| **Guidance** | N/A |

| | |
|---|---|
| Action Steps: | Create Paper Files |
| Action Steps: | Plan files on IPS |
| Action Steps: | Participant files on IPS |

# TP 16.1 Action Steps: Create Paper Files

10/31/97

1 The financial analyst or auditor in PPD who is in charge of the case will build the initial plan file. Identify the file with the plan name and number.

2 Load all participants into the PRISM system, when participant information is available (Example: the participant's full name, social security number and address, plan name and number). All non-vested and woodwork participants should be loaded into PRISM. When you have completed appropriate research to locate a participant's social security number but no number is available, you may load a participant with a dummy SSN to speed the participant data load process. As soon as the correct SSN is found, update STaRS (Standard Tracking and Retrieval System) using the Barcode Request Form.

3 Bar-coded files will be automatically generated for participants on PRISM, in the following situations:

- A plan is assumed by SSC and the participant is put into pay status.
- A participant is put into pay status through normal payment processing. (estimated or final pay status, lump-sum or annuity benefits)
- Final valuation has been completed for the plan.

If you need bar-coded participant folders for a plan, send an e-mail message to your TPD DMC representative. There is a *List of DMC Representatives for Each TPD (Replist.doc)* available. Your message should list the case number, plan name, your user ID and your four-digit PLS or PBA code. If a folder is needed for a specific person, also include the social security number in your message. Your TPD DMC representative will forward your request to the OASD Systems Analyst in charge of STaRS. When the files have been created, the DMC staff will notify the TPD that the requested participant folders are ready to be picked up.

4 Within 30 days after the participant folders are picked up, TPD staff should place the participant's documentation in the participant folder and return the file to the DMC for imaging. Use the appropriate procedures (TP 16.3 Maintain Participant File) to determine which documents to include and in which order.

5 TPD staff must submit a *Barcode Request Form (Barcreq.doc)* to report a change in participant social security numbers, plan numbers, or participant name --included are spelling corrections or changes. When the Barcode Request Form is received in the DMC, the Barcode database (STaRS), and the imaging system will be updated with corrections you submit. Remember to list both the old and new SSN when you submit an SSN change.

## Use Paper Files

1 The Image Processing System (IPS) must be used whenever you need information from a participant or plan file. If you cannot find needed participant or plan information on the imaging system, complete an IPS File Research Request. You must list the reason for requesting the paper file (for example: response to a congressional, IPS image is illegible, information is missing from IPS, etc.). Submit the Request to the DMC. The DMC staff will compare the physical file to the imaging system and take the following actions:

- If all the documents in the file are on the image system, the DMC will record the results on the Request form and return the form to the requester without the physical file.
- If unscanned pages exist, the DMC will scan the missing pages into IPS. The Request form will be updated with DMC action and the form and the participant file will be provided to the requester.

- If scanned documents do not yet appear on IPS for a participant file, the DMC will update the Request form and provide the form and the file to the requester.

2 Files will normally be checked out for no more than 30 days. A requester must have a User ID to take files from the DMC.

3 Participant documentation which is received directly by TPD staff (not scanned by DMC staff before document is sent to assigned TPD personnel), must be delivered to the DMC with an IPS Scanning Request. The management team for each TPD will designate a TPD Point of Contact for IPS. The TPD IPS Point of Contact is responsible for collecting and delivering participant documents to the DMC for scanning. If the TPD staff has the participant file, place unscanned material on top of the pink sheet/barcodes inside the file folder. Do not interfile unscanned material with scanned material. If the TPD staff does not have the participant file, write the social security number and plan number on each participant document to ensure proper IPS indexing.

TP 16.2 Action Steps: Maintain Plan File

## TP 16.2 Action Steps: 02/18/2005

## Maintain Plan File

The plan file consists of the following documents arranged in the order presented. Not all documents are applicable to any given case, but the order will be the same for those that are present. Documents in each section are in reverse chronological order, with the most recent on top. The order or indexing of documents is the same in paper files and the Image Processing System. Cases are identified by a six-digit number.

**Document Types**

1 Reportable Event Documents

A. Bankruptcy information

B.IRS documents (including Form 5500)

C. Financial analyses documents

D. Controlled group information

E.Other reportable events documents

2 Distress Termination Documents

A. Notice of Intent to Terminate (Forms 600 & 601)

B. Bankruptcy information

C.IRS documents (including Form 5500)

D. Financial analyses documents

E. Controlled group information

3 Trusteeship Documents (PBGC)

A. Notice of Determination

B. Trusteeship Agreement

C. Documents from the Trusteeship Working Group

4 Non-Trusteed Plan Information

A. Notice of Sufficiency

B. Abstract for non-trusteed plans

C. Distribution Data

5 Pension Plan Documents

Plan amendments (last to first)

A. Last amendment

B.Next to last amendment

C. etc. (each amendment will have sections with the following indices)

- general provisions
- termination provisions

- definitions (normal retirement, compensation, etc.)
- service requirements (accrual, vesting, benefits)
- benefit formulas
- early retirement rules
- annuity forms
- disability rules
- EEC provisions
- death benefit provisions
- factors and assumptions
- all other

**Original Plan Documents**

(the following indices apply when the provisions are separate)

- general provisions
- termination provisions
- definitions (normal retirement, compensation, etc.)
- service requirements (accrual, vesting, benefits)
- benefit formulas
- early retirement rules
- annuity forms
- disability rules
- EEC provisions
- death benefit provisions
- factors and assumptions
- all other

**Union contracts (last to first)**

A. Last amendment

B. Next to last amendment

C. etc. (each amendment will have sections with the following indices)

- general provisions
- termination provisions
- definitions (normal retirement, compensation, etc.)
- service requirements (accrual, vesting, benefits)
- benefit formulas
- early retirement rules
- disability rules

- EEC provisions
- death benefit provisions
- factors and assumptions
- all other

**6** Insurance Contracts

(last to first)

**7** **Trust Agreements**

(plan)

**8** Additional Plan and Participant Data

(documents containing gross-level data for multiple participants, including spreadsheets)

A. Compuserve listing (for plans with assumption date earlier than 1986).

**9** **Correspondence**

(internal PBGC memos and plan-level correspondence, last-in-first-out, based on types of issues)...

A. Legal (plus key plan Interpretations)

B. Financial - Notification of Authorization to Make Payments Letter (Gilboy Letter) to SSC

- Accounts Adds and Changes Form
- Notification Letter to Prior Paying Agent
- Participant Payment Data (Check Registers and EDD Payment Information)
- Data Entry Request Form
- Reconciler Report (First Pay Data Load Report)
- Plan Assumption Reconciliation Report

C. Actuarial

D. Negotiations

E. Participant services

F. Appeals

G. Miscellaneous Correspondence and Telephone Logs (Chronological)

H. Congressional

I. Union

J. All correspondence chronologically

**10** Pre-DOPT Actuarial Data

A. Prior Plan Administrator Actuarial Variation Reports (AVRs)

B. IRS Documents (including Form 5500s)

**11** Audit Documents...

A. Participant Data Audit

B. Plan Document Audit

C. Source Document Audit

D.Asset Audit

- 1108
- DUECs

E. Net Worth

- Financial Analysis Documentation
- IRS Documents (i.e. Prior Plan Administrator Tax Returns)
- Bankruptcy Information

F. Controlled Group And Supporting Documentation

G. Transfer Control Sheet (From Case Officer to PSD/DBA/BPD) and Memoranda

H.Plan Closing Audit Report (includes checklist)

I. ADT Audit Completed/IPV Missing Date Report

**12** Actuarial Valuation Closeout Report

**CASE 1: New Closeout Report with Table of Content**

Document will be separated and sorted by Table of Content
Index will be by Table of Content

**CASE 2: New Closeout Report without Table of Content**

Document will be separated and sorted by Tabs
Index will be by Tabs

**CASE 3: Old Closeout Report without Table of Content**

Document will be separated and sorted by a default Table of Content
Index will be by the default Table of Content similar to the following

A. Preface

B.Closeout Memo (This may also be referred to as or as Methods, Procedures, Findings, and Conclusions)

C. Instructions to PSD (BPD)

D. Plan Abstract / Plan Summary / Plan Digest

E. Plan Conversion Factor

- Benefit Form Conversion
- Early Retirement
- Pre-Retirement Survivor Annuity

F. Valuation Spreadsheets (Which may include worksheets for Phase-In Calculations, Substantial Owner Benefits, Average Compensation, etc.)

- Active Vested Participants
- Separated Vested Participants
- Retirees
- Beneficiaries

- Disabled Participants
- Substantial Owners

G. Asset Reports

H. Instructions for the Benefit Statement Recalculation Program Instructions

I. Benefit Recalculation Worksheets and Samples

J. Plan Information Sheet

K. Contractor's Actuarial Certification

L. Programming Code

M. Actuarial Task Orders

N. Purchased Annuity Listings

O. Lump Sums Paid Prior to DOPT

P. Miscellaneous

**13** SID Documents

A. Correspondence

B. Participant data audit

C. Technical review

D. Rettig actuarial close-out report

**CASE 1: New Closeout Report with Table of Content**

Document will be separated and sorted by Table of Content
Index will be by Table of Content

**CASE 2: New Closeout Report without Table of Content**

Document will be separated and sorted by Tabs
Index will be by Tabs

**14** Standard Terminations

A. Standard Termination Notice (Form 500, Schedule EA-S)

- tandard Termination Notice (Form 500)
- Certification of Sufficiency (Schedule EA-S)
- Designation of Representative (Schedule REP-S)
- Post-Distribution Certification (PDC) (Form 501)

B. SPCD Correspondence

- Acknowledgment Letter(s)
- Non-Compliant Letter(s)
- Incomplete Letter(s)

C. Distribution Data

D. General Incoming (from the filer)

E. General Outgoing (Null and Void, etc.)

**15** Coverage/Classification Cases

A. Correspondence requesting coverage/classification

B. Phone logs

C. IRS Determination letter

**16** Multiemployer Cases

A. Correspondence to PBGC

B. Correspondence from PBGC

**17** Reconsiderations

A. Request for reconsideration

B. Documentation

C. Determination

**18** 4071 Penalties

A. Correspondence

B. Penalty analysis documentation

C.Determination letter

D. Review and request documentation

E.Review determination letter

**19** Standard Termination Audit Documents

A. Correspondence

B. Audit forms

C. Plan assets

D.Sample audit

E. Distribution

F. Participant data

G. Annuity/insurance contract

H. Actuarial data/reports

I. IRS documents

J. Enforcement documents

K. Compliance audit documents

L. Miscellaneous documents

**20** Missing Participants Program Plan File

A. Post-Distribution Certificate (PDC)

- Form 501 - Standard Termination Notice
- Form 602 - Distress Termination Notice / Amended Post-Distribution Certificate (non-trusteed plans)

B. Schedule MP

- Plan Administrator certification
- Enrolled Actuary certification

C. Attachment A - Annuity Purchase Information Sheet

D.Correspondence (plan level)

TP 16.3 Action Steps: Maintain Participant File

## TP 16.3 Action Steps: Maintain Participant File

01/19/2005

1 The DMC is responsible for managing participant documentation, ensuring it is scanned, and an image is available in the Image Processing System for all persons who need access to the participant documents. IOD staff are responsible for forwarding all relevant participant documents to the DMC for safeguarding.

2 **Core Participant Documentation**
Where available, prior plan administrator participant files for pre-trusteeship pay status participant are to be retrieved from the prior plan administrator. Only that information which is pension related, and supports the participant's payment status and beneficiary selections, need be retrieved and imaged with core participant information referred to below.

Ensure that the following core information is required for each participant and is promptly forwarded to the DMC to be imaged into the participant file. (A copy of the BDL and benefit statement should be immediately made part of the imaged participant file. Note that PRISM/ALGS automatically saves an electronic copy in the imaged participant file.)

- Core documentation for a **DOPT pay status** participant after data verification consists of the following:
  - 4042(d), Trusteeship notification letter, PRISM ALG 100 series
  - Form 701 – Payee Information Form (PIF)

Note — Prior to the 8/99 implementation of new participant forms (using 700 series numbers), core documentation for the above included: 4042(d) letter, PBGC Benefit Application and proof of marital status. Effective 8/99, PBGC no longer routinely requires source documents for proof of age, spouses age, marriage or death.

- Core documentation for **DOPT non-pay status** participant after data verification consists of the following:
  - 4042(d), Trusteeship notification letter, PRISM ALG 100 series
  - Form 702 – General Information Form (GIF)
  - proof of age
  - proof of marital status

Note — Prior to the 8/99 implementation of new participant forms (using 700 series numbers), core documentation required a PBGC General Information Sheet (or Non-Retiree Information Request, Form 548), in lieu of the GIF.

- Core documentation for a post-DOPT payee consists of the following:
  - 4042(d), Trusteeship notification letter, PRISM ALG 100 series
  - Form 702 – General Information Form (GIF)
  - proof of age
  - proof of marital status
  - One of the following PBGC benefit application forms:
    - Form 700 - Participant Application for Pension Benefits

- Form 720 – Application for Lump Sum Payment
- Form 703 – Application for Elective Lump-Sum Payment
- Form 705 – Beneficiary Application for Pension Benefits
- Form 706 – Beneficiary Application for Pension Benefits – Optional Forms

**Note** Prior to the 8/99 implementation of new participant forms (using 700 series numbers), core documentation required a PBGC General Information Sheet (or Non-Retiree Information Request, Form 548), in lieu of the GIF, and a PBGC Application for Benefits (could be: Participant Application for Benefits, Form 186; Beneficiary Application for Benefits, Form 188; or Alternate Payee Application for Benefits, Form 189A) in lieu of Form 700. Core documentation also included proof of spousal election to waive J & S annuity when applicable (Marital Status and J & S Waiver – Form 457). As of 8/99, the J & S information is included in the Form 700.

3 Individual participant data, necessary for the calculation of the participant's benefit, is captured during the participant data gathering stage of the participant data audit process. At that time, data is abstracted from source documents and recorded into a database. The database is verified by selecting a representative sample of the participant population. Source documents for the sample are copied and become a part of the participant data audit.

4 Other source documents may be added to the participant records to document transactions between the PBGC and the participant. They are listed below:

**Document References (as applicable)**

Other Source Documents

- Actuarial Services Division (ASD) spreadsheet or actuary's individual calculation sheet
- Plan Joint and Survivor Annuity (J&S) factors table and Pre-retirement Survivor Annuity (PSA) reduction factor table
- Plan early retirement factor table
- ASD close-out memo; case officer memo; OGC decisions; Appeals Board decision; and any other PBGC documents which discuss the plan, rather than individual participants

**Prior Plan Administrator Documents**

- Pre-Date of Plan Termination (DOPT) election
- Work history record
- Salary history record (if received from the PPA)
- Employee contribution data
- SSA work history
- Other - (in order) correspondence, calculations, payment documents

**Benefit Calculation Documents**

- Benefit statement or data sheet
- Benefit calculation sheet
- Interest/recoupment calculation sheet
- PBGC Application for Benefits
- J&S waiver/retro J&S election

- PSA election
- Election for the return of employee contributions
- SSA Work History (if received from the participant or PBGC)
- Other benefit calculation data

**Proof Documents**

- Proof of age - participant
- Proof of age - beneficiary
- Marriage license; final divorce decree
- Death certificate - participant
- Death certificate - beneficiary
- Participant information sheets/Data Verification Form
- Power of attorney
- Affidavits
- Locator documents
- Changes of designated beneficiary
- Other proof documents

**Benefit Payment Documents**

***Types of documents which might be present:***

- Address change request form
- Authorizations to pay - memos/forms
- CARF, Form 478
- Data entry form
- Deceased processing form
- Direct deposit form
- Memos related to payee verification and outstanding checks
- Participant Payment Report
- PLUS / PRISM printouts
- Refund check
- Returned benefit check(s)
- Tax election; withholding forms
- Variance resolution form

**Other transactions/documents within the benefit payment system**

Correspondence (all are arranged chronologically, regardless of document type)

***Types of correspondence which might be present:***

- Appeal Board decision letter
- Benefit Dtermiation Letter(BDL) or Trusteeship Letter

- Incoming and outgoing correspondence
- Phone logs/Action sheet, printouts of electronic mail messages
- Return to Sender envelopes and mail

**QDRO Documents**

***Types of QDRO documents which might be present:***

- QDROs, Draft DROs, California Joinders, Checklist for Reviewing a DRO, QDRO Benefits Worksheet, Court orders, subpoenas, judgments
- OGC opinions and correspondence
- Correspondence to or from the Participant or Alternate Payee
- Correspondence with the attorneys for the Participant or Alternate Payee

**SID (SIG) Documents**

| | |
|---|---|
| **Note** | Only plans which are part of the court settlement will have a SID section) |

**Cross References**

Files are cross-referenced to show the relationship between a participant and spouse, or beneficiary (ies) or alternate payee(s).

# TP 17. Refer Policy or Processing Questions

TP 17. Overview

TP 17.1 Answer Policy & Processing Questions

Forms, Letters, Memos, etc.

**Refer Policy or Processing Question**

## TP 17. Overview

**07/31/98**

There will be times when there is a question concerning case processing that stops the processing of the case. The question may have to do with interpretation of a procedure, a general policy, or a specific aspect of the plan.

**The first step to find the answer is researching the topic.** All of the online manuals (IOD Procedures Manual, PBGC Operating Policy Manual, Actuarial Technical Manual, etc.) offer two different kinds of search capability on the Button Bar. The first, **Index,** allows you to enter or pick pre-selected keywords and jump to the topics they relate to. The second, **Find**, gives you the flexibility to search for almost any word(s) and/or phrase(s) you chose. Remember that your key/search word choice is critical to getting the desired results. If your original search does not yield the results you want, try different, but related, key/search words.

**If the research is unsuccessful**, the next step might be to pose the question to a knowledgeable person in the same discipline within the same, or a different, division. However, since there have been many changes in procedures, what has been done in the past may no longer be correct. Rather than asking a co-worker, ask a supervisor, Team leader, or the Division Manager. If that person is unsure of the answer, it is incumbent on him or her to continue to pursue the question.

**Processing and technical questions** should go to the Technical Advisors Group (TAG). This is a group of selected senior people representing the various disciplines and tasked with answering questions and making recommendations for changes in procedures and policy. The TAG meets on a regular basis to discuss questions brought to them by Division Managers and others. They give the answers back to the person who asked and disseminate the questions/answers to all Division Managers. If any member of the TAG feels that there is a policy question involved, the TAG passes their answer and recommendations to the Operations Policy and Support Services (OPSS) Manager for consideration. After reviewing the TAG inputs, the OPSS Manager determines and disseminates a final answer.

**For questions of general policy**, the best source of answers will be OPSS. To learn if your inquiry relates to a pending policy item in OPSS, consult their Policy Inventory maintained in the Town Hall Bulletin Board. OPSS is IOD's policy maker and liaison with the Corporate Policy and Research Department (CPRD). Division Managers may want to take any policy questions directly to OPSS.

Technical Procedures

**Refer Policy or Processing Question**

## TP 17.1 Answer Policy and Processing Questions

**05/31/96**

Action Steps

| | |
|---|---|
| **Purpose** | Provide answers to policy and procedures questions. |
| **Time Reporting (BMPRS)** | Case Related Policy Analysis<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | A question, general or specific, which cannot be answered by the supervisor or Division Manager. |
| **Output and Recipient** | An answer, explanation, interpretation, clarification, statement of policy, and/or change in procedures. |
| **Control Issues** | Any question which relates in any way to policy must be referred to OPSS. If the TAG reviews the policy question, any answer or recommendation must go through OPSS prior to dissemination. |
| **Important Concepts** | There is room for interpretation and clarification in almost any set of procedures and/or policies. This procedure provides a means of review and dissemination of answers whenever questions arise. |
| **Guidance** | N/A |
| **Procedure Owner** | Division Managers, TAG, OPSS, all IOD employees |

Individuals

Supervisors and Managers

Technical Advisors Group

**Refer Policy or Processing Question**

## TP 17.1 Individuals 09/04/98

## Action Steps: Answer Policy and Processing Questions

1 Depending on the topic, conduct research through PBGC's online IOD Procedures Manual, Operating Policy Manual and Bulletins, ERISA, IRC, related regulations, IOD and/or PBGC directives and delegations of authority. Much of this information is available in IOD in an electronic form in addition to paper. PBGC Directives are available in hard copy throughout the corporation. Delegations and re-delegations of authority are maintained by FASD. (See Directive GA 05-5) Some, like the online IOD Procedures Manual, are solely electronic.

For the online information, use the search capability available within each manual. Most have a global, or full text search feature which allows queries by ANY word or combination of words. Note that this is not content sensitive, meaning it will simply provide a mechanical listing of every time the word is used in the text. (**Remember**, Find on the button bar is the full text search tool in this manual.) Understanding how to use full text search will assist in narrowing the search for effective results. Use the table of contents provided with each manual to narrow the topic.

ERISA, IRC and PBGC, IRS and Labor regulations are available in hard copy throughout IOD, and are also available in the OGC library. More complete information may be found in the pension services which are subscribed to by IOD and the OGC library. Several electronic pension services make ERISA, IRC and the regulations available electronically. These pension services also include a search feature which allows the user to quickly access the correct topic. IOD's current electronic service is "Pension and Benefit Expert" which is available on the LAN under the icon of the same name. View the *Pension and Benefit Expert Information (Penbenex.doc.)* for more information.

The OGC library (3rd floor) is available for all agency personnel and library staff is available for assistance. The OGC library also subscribes to several hard copy pension services (usually a 7-10 volume series) which contain ERISA, IRC, regulations, miscellaneous rulings (revenue procedures, notices, opinion letters, analysis of ERISA issues), which may also be useful for research. These services typically provide a detailed index. The OGC library's catalogue has been converted to an electronic format and is available at the Library's computer workstations.

2 If the research is unsuccessful or the results ambiguous take the question to a Supervisor, Team Leader, or Division Manager. Let them know what research you have already conducted and the results.

**Refer Policy or Processing Question**

## TP 17.1 Supervisors and Managers 07/11/97

## Action Steps: Answer Policy and Processing Questions

1 Review research and results of the originator. Use all sources of information to find the answer to policy and procedures questions. This includes those listed in step 1 of the preceding topic. Also use any other written or verbal sources available.

2 If the research is unsuccessful or the results are ambiguous:

- Take policy questions to OPSS.
- Present procedural and other questions to a TAG member.

3 Provide feedback to the originator of the question.

**Refer Policy or Processing Question**

## TP 17.1 Technical Advisors Group 07/11/97

## Action Steps: Answer Policy and Processing Questions

1. Take all questions from Division Managers and present them to the other members of the TAG. Develop an agenda (formal or informal) for the meetings from questions which have been presented. Meetings should be held on a bi-weekly basis and more often, if required.
2. Research and develop answers or recommendations for implementation. This may be done individually or as a group. Recommendations must be the consensus of the group. If there are multiple recommendations and no consensus, present them as options.
3. If any member of the TAG feels that there is a policy question involved, forward the recommendation(s) to OPSS.
4. If there is no policy question involved, give the answer to the manager who presented it. If the answer is of general interest or applicability, distribute it to all Division Managers. When the TAG determines that a procedural change is needed, write up the recommendation and justification and forward it to OPSS and the Division Manager in charge of procedural development (TSD for online IOD Procedures Manual, ASD for Actuarial Technical Manual, OPSS for PBGC Operating Policy Manual, and TSD for support functions).
5. Keep a record of questions that arise and the answers/recommendations provided.

# TP 18. Prepare Files for Shipment

TP 18 Overview

TP 18.1 Ship to FRC from DMC

TP 18.2 Ship to FRC from STCD

Forms, Letters, Memos, etc.

**Prepare Files for Shipment**

## TP 18. Overview

**06/29/2001**

Certain paper files are sent to the National Archives' Federal Records Center (FRC) Program for long term storage. In the Washington, DC area, these records are sent to the Washington National Federal Records Center (WNRC). Records include the files described below. Effective 3/01, participant files are no longer sent to the WNRC or other records centers nationwide. Specific procedures for inventorying, boxing, and shipping of records can be found in PBGC Directive: Records Management Program (IM 15).

IOD files are shipped from:

**Technical Service Division (TSD)**

- TSD's Document Management Center (DMC) periodically ships some closed plan files and other program related records, such as actuarial records and policy records, to the WNRC when PBGC expects that it has no further need for the paper record, the record is deemed archival, or there is a records schedule requiring a long storage period. The National Archives now has each agency and department's inventories of records stored at records centers. Agencies can review their inventories and request retrieval of specific records. See IOD's Records Management Staff (PSB) to identify first, whether a record is at the WNRC and second, to retrieve the record. The National Archives guarantees 24 hour turnaround in delivering records and has established account representatives to support agencies.

**Standard Termination Compliance Division (STCD)**

- STCD ships non-participant files (including trusted plan, reportable event, standard termination, Title IV coverage case files, and multi-employee case files) when PBGC has completed processing. The National Archives has each agency and department's inventories of records stored at records centers. Agencies can review their inventories and request retrieval of specific records. See STCD's Records Management Liaison to identify first, whether a record is at the WNRC; and second, to retrieve the record. The National Archives guarantees 24 hour turnaround in delivering records and has established account representatives to support agencies.

**Prepare Files for Shipment**

## TP 18.1 Ship to FRC from DMC (Document Management Center) 04/28/97

Action Steps

| | |
|---|---|
| **Purpose** | Ship participant records to the Federal Records Center for safekeeping. |
| **Time Reporting (BMPRS)** | Document Management Center<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Inactive participant benefit records no longer needed at PBGC. |
| **Output and Recipient** | Records boxed and shipped. |
| **Control Issues** | All participant records going to the FRC should go through the DMC for preparation and shipment. |
| **Important Concepts** | Participant records going to the FRC should only include those for which PBGC will have no foreseeable use because there will be no future stream of payments. This includes non-vested participants, participants who have received lump sums, and participants deceased over six months. In each case, there are no future stream of payments, appeals, or other on-going issues.<br>All participant files should be imaged prior to going to the FRC. |
| **Guidance** | PBGC Notice 93-1, Part: GA, Section 45-2, Date: 1/8/93 entitled PBGC Records Management Program Records Disposition Authority dated 11/13/86 and 3/6/84 |
| **Procedure Owner** | Document Management Center (DMC) |

### Click Here for More Information...

TP 18.1 Action Steps: Ship to FRC from DMC

**Prepare Files for Shipment**

## TP 18.1 Action Steps: 04/28/97
## Ship to FRC from DMC (Document Management Center)

1 The DMC receives records from the Divisions for shipment to the FRC (non-vested participants, participants who have received lump sums, and participants deceased over six months). When the File room Manager determines that there are enough participant files accumulated, begin processing the files for shipment by cataloging/inventorying the files on the database in the fileroom. Normally the files are shipped at the end of each calendar year, but may be shipped more frequently if the need arises or less often if there are few files to go.

2 The Division should verify that SSC has made all lump sum payments or that user defined data has been entered showing the participant is deceased. If the files are for non-vested participants, verify that they are in Pay 3000/PRISM as non-vested. Note that plans with a DOPT prior to 1/1/85, the non-vested participants are not in the system, nor will they be added.

3 Ensure that a BDL was mailed to each vested participant. Some non-vesteds may have received BDLs explaining they were non-vested and would not be receiving a benefit, but, in many cases, the non-vested participants will not have been sent BDLs.

4 Ensure that each participant file has been imaged by IPS.

5 When the DMC Manager determines that there are enough participant files accumulated, begin processing the files for shipment by cataloging/inventorying the files on the database in the DMC. Normally the files are shipped at the end of each calendar year but may be shipped more frequently if the need arises or less often if there are few files to go.

6 Box the files. Keep files from a single plan together and in alphabetic order.

7 Complete a Form SF-135, Records Center Request for Archives and return it to the FRC.

8 Update the DMC database with the index and location of the files from the SF-135.

9 Contact FRC to arrange for them to pick up prepared files.

**Prepare Files for Shipment**

## TP 18.2 Ship to FRC from STCD

**02/07/97**

Action Steps

| | |
|---|---|
| **Purpose** | Ship non-participant files to the Federal Records Center for safekeeping. |
| **Time Reporting (BMPRS)** | Document Management Center<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Records no longer needed at PBGC. |
| **Output and Recipient** | Records boxed and shipped. |
| **Control Issues** | STCD ships all non-participant files for IOD, including plans which were investigated by PPD but not terminated, plans which were terminated with sufficient assets for all benefit liabilities (standard terminations), and plans which requested a determination as to their coverage under PBGC's plan termination insurance provisions. |
| **Important Concepts** | Records going to the FRC should only include those for which PBGC will have no foreseeable use. |
| **Guidance** | PBGC Notice 93-1, Part: GA, Section 45-2, Date: 1/8/93 entitled PBGC Records Management Program Records Disposition Authority dated 11/13/86 and 3/6/84 |
| **Procedure Owner** | STCD Manager or designee (file clerk) |

## Click Here for More Information...

TP 18.2 Action Steps: Ship to FRC from STCD

## TP 18.2 Action Steps: Ship to FRC from STCD

02/07/97

1. Non-participant files may be forwarded to STCD from PPD or appropriate TPD, or may be files from STCD case processing activities.
2. When enough files have accumulated to justify a shipment, inventory the files, box them and prepare for shipment.
3. Enter accession and box number in CAS, which provides files' location at the FRC.
4. Complete a Form 135, Records Center Request for Archives, to be returned to FRC with files.
5. Contact FRC to arrange for them to pick up files.

**Prepare Files for Shipment**

## TP 18.3 Forms, Letters, Memos, etc.

09/04/98

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

**Form 135, Records Center Request for Archives**

# TP 19. Process Woodwork Person

TP 19. Overview

TP 19.1 Research Participant Entitlement Eligibility

Forms, Letters, Memos, etc.

**Process Woodwork Person**

## TP 19. Overview

**01/10/97**

A woodwork person can be defined as one who claims possible entitlement to a benefit from a particular plan who has not been included in the final valuation. They are so named because they seem to come from "out of the woodwork" unexpectedly. PBGC may become aware of a woodwork person during final valuation, but not include him or her in the final valuation because the necessary determination regarding the person's status (whether he or she is a participant and, if so, the entitlement to and amount of the benefit) cannot be completed until after final valuation. Valuation should not be delayed for the determination on the status of a woodwork person.

Many, if not most, people who contact PBGC to inquire about a possible benefit entitlement under a specific plan are not plan members or they are non-vested plan members. Generally PBGC's DOPT valuations include all participants. Use the procedures and questions here to uncover why an individual was not included in the DOPT valuation. Usually it is possible to explain non-entitlement based on the participant data and the provisions. Occasionally, though, there may be participants who are overlooked, usually because records were lost, illegible, or unavailable. If the TPD case team auditor knows that there are missing records, that information should be shared with the team so that they are aware of the potential for woodwork people.

Some woodwork persons contact PBGC with claims of possible entitlement from a plan which terminated and was not trusteed by PBGC, because it was determined or reported to be sufficient for either guaranteed benefits or benefit liabilities. PBGC may also learn of the existence of this type of woodwork person through the audit processes of STCD.

After learning that the participant exists, it is necessary to investigate whether the person is eligible for benefits. The procedures provide guidance on conducting such an investigation. The participant may be asked to provide information, including information about their employment history with the plan sponsor. Once the person is accepted as vested and eligible, PBGC must take all of the processing steps to begin benefit payments. The valuation and account master records have to be adjusted to reflect the change/addition of the participant.

## TP 19.1 Research Participant Entitlement Eligibility 05/18/2001

Action Steps

| | |
|---|---|
| **Purpose** | To determine if a person is a participant in the plan, vested, and entitled to benefits. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Inquiry from a person who may be a participant. |
| **Output and Recipient** | A decision on whether the person is entitled to benefits.<br>Notification of the participant as to his/her status.<br>Updates to PRISM.<br>Benefit payments, when due. |
| **Control Issues** | All claims must be validated with evidence which shows that the person was a participant in the plan and was vested. The primary proof for this is normally a salary history from SSA, or may be W-2's or other federal or state tax information, if available.<br>There should always be a written determination of the person's entitlement eligibility. It may be a BDL telling the person that there is no entitlement and why, or a BDL explaining that there is entitlement and what will happen next. |
| **Important Concepts** | Initial contact may be by letter, telephone, or in person. It frequently happens soon after BDLs go out. Former employees who do not receive BDLs may hear of PBGC from friends and decide to inquire about their benefit eligibility.<br>Even if the person was a long time employee, he or she may not have been a participant. For example, a salaried employee would not be eligible for the union hourly workers' plan. Other examples include: a person who terminated employment before the plan was in existence; or a person who terminated employment prior to being eligible for vested benefits. |
| **Applicable Guidance** | ATM II: Participant and Plan Data, Section C |
| **Procedure Owner** | PLS or FBA, Actuary |

## Click Here for More Information...

TP 19.1 Action Steps: Research Participant Entitlement Eligibility

**Process Woodwork Person**

## TP 19.1 Action Steps: 02/18/2005

## Research Participant Entitlement Eligibility

1 When an inquiry is made, get the following information from the person:

- Full name
- Address
- Telephone number
- SSN
- Date of birth (DOB)
- Company and plan name (as much information on the plan as possible, in case there is more than one plan)
- Date of hire
- Date of termination of employment (DOTE)
- Any breaks in service
- Salary information (W-2's), if applicable
- Type of work that the person did
- How the person heard about PBGC

2 **Explain to the person that you will have to research the plan and that you may have to contact them to get more information.** Explain that there will be an official determination made and that the person will get written notification of the decision.

3 **Review the Monthly Plan Listing.** Find the appropriate plan or plans.

4 **Research the PRISM data base.** Search under both the name and the SSN. Be sure to check variants of the name. For example, for the name Joseph Michael Woodworker, the possibilities might include, but would not be limited to:

| | | |
|---|---|---|
| Joseph Michael Woodworker | J. M. Woodworker | M. J. Woodworker |
| Michael Joseph Woodworker | Michael J. Woodworker | Mike Woodworker |
| Joseph M. Woodworker | Joe Woodworker | Joe M. Woodworker |

5 **If a variant of the name is there, check to see if it might be the person who inquired.** Double check the SSN and any other pertinent information.

6 Review the plan file (IPS).

- Check the names on the ASD spreadsheets, if final.
- Research the plan provisions and vesting requirements. Ensure that the plan is the one which was in effect when the person terminated employment; later versions would not apply.
- Check the applicable dates. For example, was the plan effective during the time of employment?

- Check the types of employees who were covered by the plan.
- Check all related plans

7 Create a PRISM record for the person. Code as a woodwork person and as status code A.

8 Make an initial determination of the person's status.

- If it can be determined at this time that the person is not entitled to benefits, prepare a memo for record of the justification and place it in the file. Prepare and send a BDL denying entitlement.
  - If the person was a plan participant, but not vested and, therefore, not entitled to benefits, use the Non-vested Letter, PRISM ALG 416.
  - If the person was never a plan participant, send the non-member BDL, ALGS 421.
  - No further action is necessary.
- If it cannot be determined why the individual did not appear as a participant on the DOPT valuation, send a Plan Participation Information Request Letter (PCM 511). The attached forms should include:
  - Authorization to Obtain Earnings Data from the SSA, Form 581
  - Form 709 – Plan Participation Information

9 **Review returned documents for completeness.** Acknowledge receipt, using the Acknowledgment Letter (ALGS 530). If there are incomplete answers, ask for more information by writing what is needed in the 'message' area.

10 **If it still cannot be determined from a review of the completed Form 709 – Plan Participant Information and other information whether the person is or is not entitled to benefits, review the 709 and determine if the person's date of hire and termination meet the plan's service requirement. If they do, request employment and earnings data from the SSA.** See TP 26: Request SSA Data

11 **When returned, review the SSA Employment and Earnings Data.** If it appears that the person is entitled to benefits, meet with the rest of the case team and present the facts to them. Once the team reaches consensus, prepare a final memo for record.

**Note** SSA will only provide earnings information up to the Taxable Wage Base for a year.

If a participant claims earnings were in excess of that amount, look for supporting documentation such as W-2's or other federal or state tax records. If no further documentation can be provided, consult with the actuary on how to proceed. Multiplying the first quarter's earnings by 4, and using the product as the annual amount may be appropriate. The Actuarial Technical Manual provides some guidance on estimating salaries when no data is available (see Chapter 11.C).

12 Do one of the following depending on the status of the plan:

- **Estimated:**
  - Advise the plan auditor to add the participant to the participant database. Forward relevant participant data to the auditor. If more information is needed from the participant, see Process 9.13 Notify Participants.
  - Change to the correct type and status in PRISM Customer.
  - If it appears that the participant may be eligible for an immediate benefit, ask the plan Actuary to calculate the benefit and provide a benefit statement.
  - If eligible, advise the participant and send a BAP, using an ALGS 200 series letter.

- **Final:**
  - Ask the plan Actuary to calculate the benefit and provide a benefit statement.
  - Update PRISM with the present value(PV) using PRISM Val/IDL.
  - Change to the correct type and status in PRISM Customer.
  - Send the appropriate BDL (ALGS 400 series).

**Process Woodwork Person**

TP 20.3 Put in Pay Status

Forms, Letters, Memos, etc.

# Put New Payee in Pay Status

## TP 20. Overview

02/18/2005

Payees are put into pay status by PBGC in groups or individually.

**Groups of participants:**

- When the Director of IOD or the Executive Director of PBGC authorizes paying participants prior to trusteeship.
- At Plan Assumption, following trusteeship IOD assumes responsibility for payment of all retirees currently in pay status.

This technical procedure does not cover moving an entire group into pay status. See Process 9: Plan Assumption for actions required for the above situations.

**Individuals:**

- Upon becoming eligible for benefit payments, whether the plan's valuation is not yet complete (estimated plan) or the valuation is complete (final plan).
- Upon the death of a participant, an eligible survivor or beneficiary is put in pay status once entitlement is determined. (The survivor or beneficiary may also be eligible for a retroactive payment of benefits that were payable to the participant, but not made prior to death.) See TP 05: Process Deaths.
- Upon receipt of a completed application for benefits from an eligible alternate payee, see TP 13.3: Make QDRO Payments.
- Upon determination that a woodwork person is eligible for benefits.

**All new payees:**

When processing an individual payee under any of these circumstances, a complete and accurate benefit application (Form 700- Application for Pension Benefits or 720 - Application for Lump-Sum Payment) is required. However, an application may not be needed to pay a lump sum that is less than $200. To help ensure that the annuity applications are accurately and quickly completed, IOD staff makes follow up telephone contact to verify receipt and offer assistance within one to two weeks (7 - 14 days) after mailing. The Customer Contact Center often mails applications out; however, the phone POC (TPD or FBA) makes the follow up phone contact. The CSR establishes a CCN record with "action required" that notifies the case team that the annuity benefit application (Form 700) was sent.

| Note | A follow up phone call is not required when a Form 720 – Application for Lump Sum Payment is sent. |
|---|---|

When processing a participant for payment, ensure that the person is eligible, all participant forms and associated information are complete and correct and that participant and spouse (as applicable) have signed the forms within the appropriate timeframes. For benefit applications received on or after March 6, 2000, the maximum guaranteeable benefit is adjusted upward for a participant whose age is greater than 65 at the later of retirement date or DOPT. The late retirement factors available from the Actuarial Technical Manual are used to adjust the maximum guaranteeable benefit upward. Effective for March 2002 payments, all interest calculations are completed by PBGC and may no longer be requested from SSC.

Verify the calculations are correct, and then prepare the transaction on PRISM and forward it for authorization. If back payments are owed and a special check must be prepared, the annuity record

must be prepared before the special check transaction is prepared. The authorizer authorizes a special check at the same time as the annuity payment. See TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

Once the authorization is done, provide confirmation to the customer of the expected benefit payment amount and date. The confirmation may be in writing (ALGS 300 or 500 series as appropriate) or by phone call, documented to CCN.

Procedures for a surviving spouse or estate are essentially the same.

**Large Back Payments:** If a customer entitled to an annuity is also entitled to a back payment that becomes a large back payment, there are some different steps. We provide the participant with a Form 720 - Application for Lump-Sum Payment, and the accompanying Special Tax Notice. The participant elects their payment method (direct, rollover or partial rollover) by completing the application, and the payment is processed as a Lump Sum in PRISM. (All other back payments are processed as Special Payments.)

**QDRO Payments:** See TP 13: Domestic Relations Order Handbook.

**Woodworks:** If the woodwork person is determined to be a participant entitled to a benefit in a trusteed plan, the participant is sent a benefit application and processed like other participants in that plan. If a woodwork person is determined to be due benefits based on participation in a plan that was not trusteed by PBGC (this determination is made by STCD), information and documentation regarding the participant and benefit eligibility is forwarded to TSD. TSD processes the participant in this non-trusteed plan. See TP 19: Process Woodwork Person for more information.

**Put New Payee in Pay Status**

## TP 20.1 Receipt and Review of Benefit Application Package (BAP) 03/19/2004

Action Steps

| | |
|---|---|
| **Purpose** | To ensure a Benefit Application Package (BAP) is complete and accurate, and all forms have timely signatures. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Report from PRISM Forecaster listing customers entitled to go into pay status within three months.<br>Participant request to go into pay status. |
| **Process Output and Recipient** | Benefit Application Package completed accurately by customer provided to PBGC. Completed PRISM Customer, Forms and Valuation updated. |
| **Control Issues** | • All forms must be complete and correct with timely signatures. Signatures on application form (Form 700) generally must be within 90 days of the annuity starting date for annuity payments. If the participant did not date the application, use the DMC receipt date. For details on acceptable signatures, see Appendix J: Participant Forms Information.<br>• If a lump sum or annuity application is originally incomplete, the application must be completed within 6 months of PBGC's written notice that the application must be completed.<br>• Most PBGC pension payments must be paid through EDD; therefore, direct deposit information is requested on Form 700 - Application for Pension Benefits. |
| **Important Concepts** | • Promptly process BAPs as high priority immediately upon receipt. Customers are advised to expect first payment within 90 days of receipt of a completed application, however, our goal is to pay customers within 60 days of receipt of a completed benefit application package or the annuity starting date if later. (Remain aware of cut-off dates.)<br>• If processing delays occur, an application may still be processed if the first payment date will occur more than 90 days after receipt of the completed application. Staff should first contact the payee to confirm that their information has not changed.<br>• The completion date entered into PRISM Forms is the date a complete benefit application package was received by PBGC, or an incomplete application was made complete.<br>• Participant benefit applications and related forms are processed as mail (imaged to the participant file (IPS) upon receipt at PBGC, with notice provided through ScoRe). See also TP 10: Respond to Correspondence.<br>• PRISM Forecaster replaces the monthly status report in use in IOD prior to the implementation of PRISM. |

- PBGC pays lump sums of $200 or less (including interest) without a benefit application if participant data are reliable (see IOD Policy Bulletin 99-6: Payment of Very Small Benefits). If participant data are questionable, request a signed lump sum application before making the payment. Note: Federal tax is not withheld on these payments.

**Guidance**

Check Schedule Key Dates

PBGC Operating Policy Manual 5.4-6: Annuity Options for Lump Sum Benefits

PBGC Operating Policy Manual 8.5-1: Signature by Mark

IOD Policy Bulletin 99-6: Payment of Very Small Benefits

**Procedure Owner**

## Click Here for More Information...

TP 20.1 Action Steps: Receipt and Review of Benefit Application Package (BAP)

## TP 20.1 Action Steps: 03/19/2004
## Receipt and Review of Benefit Application Package (BAP)

1 Receive notification that a participant is ready to begin receiving benefits. This could come from a letter or telephone call from the participant, or from a report run through PRISM Forecaster.

2 If notified directly by the participant, verify that the participant is entitled to benefits from the plan and eligible for retirement. Review PRISM and IPS to see if there is a record for the participant.

- If not entitled or unable to verify, prepare and send the Plan Participation Information Request Letter (PRISM ALGS 511) to the person and wait for response. Do not continue this procedure. See Technical Procedure 19: Process Woodwork Person and follow that procedure.
- If entitled and eligible for commencement of benefits, review the participant file (IPS) to determine whether there is a Benefit Application Package (BAP) in the file.
- If covered, but not eligible for commencement of benefits yet, contact the participant and explain that he or she is not yet eligible to receive benefits. (Refer to the Benefit Determination Letter or any other letters previously sent to the participant explaining the date payments may commence.) Explain when he or she will first be eligible and what to do at that time to ensure that benefit payments start. Direct the participant to call the Customer Contact Center to request a Benefit Application Package (BAP) or write PBGC a letter. If contact with the participant is by phone, follow up with a letter and ensure it is imaged to the participant's file (IPS). Do not continue with this procedure.

3 If a benefit application is not found in IPS, prepare and send a Benefit Application Package using the appropriate PRISM ALGS letter. If sending an annuity application (Form 700), make a follow up telephone call within one to two weeks of mailing the BAP to the customer, confirming receipt of the application and offering assistance.

**Note** Processing staff use their own participant tracking methods to ensure timely completion of this task. Options include establishing tasks in MS Outlook with the appropriate deadlines, or developing participant spreadsheets to track steps.

5 Verify that the BAP has an acceptable signature (see Appendix J: Participant Forms Information), and that the form(s) and related information are all complete and correct. Guidelines include

| Participant Information Requested | Processing Notes |
|---|---|
| J&S Waiver | • Notarized spousal consent is required if the participant elects not to receive a J&S.<br>• The spousal and notary's signature dates must match.<br>• The spouse's signature generally must be within 90 days of the annuity starting date. |
| Proof of age for the participant | • Spouse's proof of age is needed only if the |

| | |
|---|---|
| and spouse (for J&S annuity) -2- | participant chose a J&S annuity.<br>• Participant's proof of age always needed. (see Appendix G: Acceptable Proofs of Age) |
| Marriage Certificate -2- | • Only needed if participant is married. |
| EDD election | • If EDD information is not completed, take follow up action with the participant.<br>• A telephone call following up on the missing information, documented to CCN, or an Acknowledgement Letter 530, indicating the missing information is needed.<br>• Do not delay processing the participant's application for EDD information. |
| Tax withholding information | • Apply default withholding (married individual claiming three withholding exemptions) if tax withholding information is missing.<br>• Do not delay processing the participant's application if tax withholding information is missing or incomplete. |
| Signature(s) | • For annuity benefits, the participant and spouse's signature generally must be within 90 days of the annuity starting date. (Form 700)<br>• Lump sum and annuity applications originally received incomplete must be completed within 6 months of PBGC's written request for the missing information<br>• If the participant did not date the application, use the DMC receipt date. |

-1- If the annuity starting date is more that 90 days from the signature date on the application, the application may not be used unless a retroactive annuity starting date is granted under Policy 5.2-4. (If a J&S is being waived, the spouse's signature must also be within 90 days of the annuity starting date.) If a retroactive annuity starting date is not granted, send a new annuity application to the participant and explain why the original application cannot be processed.

-2- Photocopies of source documents are acceptable. Original source documents are no longer required, however, PBGC reserves the right to request an original if there is doubt about the integrity of the document. Whenever PBGC receives originals, they must be returned to the participant..

6 Confirm that all required information is received before processing the payment:

- If any information other than tax-withholding or EDD is missing or incomplete, do not process the participant into pay status until this information is received. Contact the participant by phone and follow up with the ALG 530 - Acknowledgment Letter. Specify the missing information and advise the participant that it should be provided as soon as

possible.

- If the participant does not provide the missing information within six months from the date of PBGC's written request, the application becomes stale-dated and may not be processed. Send the participant a new benefit application package and advise that it must be completed before the benefit can be paid.

**7** If the benefit application package is completed correctly and signatures are timely, prepare and send an ALG 531 – Complete Application Acknowledgement. Customize letter to advise about missing EDD or tax-withholding information in the letter, if applicable.

**Note** Customer Service Guidelines apply to all Acknowledgment Letters

**8** Review the participant file (IPS). Ensure that any special conditions, circumstances, or forms of benefits from the plan documents are documented in the participant file (IPS), if applicable. Also ensure that the ASD memo, ASD spreadsheet, and all applicable forms are present.

**9** Update PRISM Customer, PRISM Forms and PRISM Valuation with data obtained from BAP and ASD spreadsheet, if data are missing.

**10** Update PRISM Forms to record a communication that a BAP has been received.

**11** Enter the completion date in PRISM Forms under 'Update a Form' - Application for Benefits. The completion date is the date PBGC received ALL the information required to put the new payee into pay status, including completed forms and any required proof documents.

**12** Verify that all customer communications have been documented in IPS or CCN. See TP 31, Document Telephone Calls.

**Put New Payee in Pay Status**

## TP 20.2 Request Information Missing from Benefit Application Package (BAP)

**05/30/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Request information missing from application for benefits. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Incomplete benefit application package. |
| **Process Output and Recipient** | Request to the applicant for missing/incomplete information. |
| **Control Issues** | Unlocatable Spouse (spousal consent required) - In all communications with the participant and spouse (written or verbal, documented in CCN), do not reveal any information about the other party. Insert instructions to this effect in the participant's and spouse's IPS file. |
| **Important Concepts** | **Timing**: Spouse's Response to PRISM ALGS 529, Advice to Spouse of Survivor Benefit – 30 days from date of letter. |
| **Guidance** | IOD Policy Bulletin 03-3 |
| **Procedure Owner** | PLS, PBA, FBA |

### Click Here for More Information...

TP: 20.2 Action Steps: Request Information Missing from Benefit Application Package (BAP)

**Put New Payee in Pay Status**

## TP 20.2 Action Steps: 05/30/2003

## Request Information Missing From Benefit Application Package (BAP)

Follow guidelines in the table below to request missing/incomplete information.

| If incomplete/incorrect information is -- | Do the following -- |
|---|---|
| **Spousal Consent** | |
| A married participant chose a form of benefit other than the plan's automatic form | Contact the participant by phone or send ALGS 530 to advise him/her that we cannot pay the requested form of benefit unless the spouse waives the survivor benefit. If the applicant simply missed the section, return only the relevant pages of the application (election and beneficiary sections) to be completed. |
| — If participant advises, he/she is legally separated from or abandoned by the spouse | Request a court order confirmation. If the participant does not provide a court order, put the participant into pay as a married participant. |
| — If the participant advises that the spouse cannot be located | Advise the participant that we will try to locate the spouse and request the spouse's SSN, DOB and maiden and married names. If the SSN is provided, search for the spouse using the on-line Participant Locator and other search tools, see TP 33: Locate Customer Address. Information retrieved from Participant Locator verifies if the SSN is correct, for example, name(s) and DOB associated with SSN.<br><br>If the participant cannot provide the requested information, treat the participant as married. |
| • If the SSN is incorrect | Contact the participant again and ask for the correct SSN. If a different SSN is provided, process once more through Participant Locator. |
| • If spouse cannot be located with verifiable SSN | Treat the participant as unmarried. On the other hand, if the SSN is unverifiable, treat the participant as married. |
| • If an address is obtained for the spouse | Prepare and send PRISM ALGS 529, Advice to Spouse of Survivor Benefit (includes waiver form). The letter tells the spouse that the participant applied for benefits and that he/she is entitled to a survivor benefit unless waived. The spouse is asked to respond within 30 days of the date of the letter. |
| • Advice to participant of the spouse's decision | If the spouse waives the benefit, the participant may choose any form of benefit. If the spouse does not waive the benefit, pay the participant the plan's automatic form of benefit for a married participant. |
| • If spouse's DOB is not | Treat the spouse as the same age as the participant to |

| | |
|---|---|
| available | calculate the participant's benefit. |
| **Federal Tax Withholding Election – periodic payments** | Customize and send ALGS 531. If the payee wishes to elect withholding, he/she will call the Customer Contact Center who will send ALGS 521 with Form 719, Election to Withhold FIT from Periodic Payments. |
| **Method of receiving payments - EDD** | Customize and send ALGS 531. The payee may call the Customer Contact Center with information to change the payment method to EDD. |
| **For all other missing information or proof documents** | Customize and send ALGS 530 to indicate the missing information. |

**Put New Payee in Pay Status**

## TP 20.3 Put in Pay Status

**03/19/2004**

Action Steps

| | |
|---|---|
| **Purpose** | To place an eligible participant, surviving spouse, beneficiary or alternate payee in pay status. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Completed BAP worksheet or Benefit Statement Recalculation System ( BSRS) recalculation system (RS) printout. For alternate payee, a QDRO. |
| **Process Output and Recipient** | New Payee into pay status with correct benefit amount, expected payment and date confirmed to customer by telephone call or in writing. |
| **Control Issues** | PRISM Forms screens must be complete. Incomplete data entry will result in rejection of transaction by SSC, even if authorized at PBGC. Particular attention may be required to ensure that the Periodic Election and EDD screens are completed correctly. |
| **Important Concepts** | PBGC pays interest on estimated lump sums from DOPT to the time of the estimated lump sum payment. PBGC pays participants due lump-sum amounts less than $200 (including interest) without a benefit application if participant data, including address, are reliable (see IOD Policy Bulletin 99-6: Payment of Very Small Benefits). Be aware that participants who received an estimated lump-sum distribution may be due a residual benefit amount at a later date. All interest calculations are completed by PBGC effective from March 2002 payments. Interest calculations may no longer be requested from SSC.<br><br>PBGC's policy to adjust the maximum guaranteeable benefit upward became effective for benefit applications received on or after March 6, 2000. The upward adjustment is for participants whose age is greater than 65 at the later of retirement date or DOPT. The late retirement table available from the Actuarial Technical Manual is used to adjust the maximum guaranteeable benefit upward. Verify benefit payments are authorized and then provide confirmation in advance to customer in writing or phone call of the expected date and of amount. |
| **Guidance** | ATM III: Benefit Calculations, Section F, 5. Late Retirement a) - PBGC Late Retirement Factors (Table)<br><br>IOD Policy Bulletin 00-6<br><br>IOD Policy Bulletin 00-3<br><br>IOD Policy Bulletin 99-6: Payment of Very Small Benefits<br><br>IOD Policy Bulletin 97-7<br><br>PRISM Training/Users Manual |
| **Procedure Owner** | PLS, PBA, FBA |

**Click Here for More Information...**

TP 20.3 Action Steps: Put in Pay Status

## TP 20.3 Action Steps: Put in Pay Status

01/19/2005

1 Input the required variables to the recalculation system (RS) or the worksheet formula. Take the variables from the participant information (probably the application) and from the participant's file (IPS). Incorporate other factors, such as early retirement, late retirement and J&S factors, as applicable. Perform the calculation and determine the benefit. (As appropriate refer to IOD Policy Bulletin 97-7 for guidance about payment of interest on late benefit payments.)

- Estimated benefits may be payable as a lump sum, if the present value of the benefit as of DOPT is $5,000 or less. Look at the present value of the benefit ($5,000 or less), not the amount of the resulting check which includes both the benefit and interest on the benefit to determine whether a lump sum may be paid. (See Process 19.4: Determine Overpayment/Underpayment for Lump-Sum.) A residual benefit amount may be due upon completion of the final valuation. IOD computes the residual annuity amount in accordance with PBGC's lump-sum assumptions and the ratio of the residual benefit to the total benefit.
- Add interest from DOPT to the date of payment to determine the estimated lump sum amount. If an estimated lump sum is payable to a participant, PBGC pays the estimated lump sum benefit (exclusive of the plan 4022(c) amount) with interest. The estimated lump-sum calculation, and the related interest factors, must be approved by the case team actuary, and documented to the participant file.
- If early retirement, use the RS to determine the new amount. If there is an annuity record on PRISM, the actual amount and payment dates will typically be different from the expected amount and date, which reflects normal retirement.

2 Create a payment record or transaction. Go to PRISM Benefits to update or create the benefit type. Determine whether the payment will be a lump sum or an annuity. Determine whether the annuity will be paid monthly or annually. If the monthly annuity is $50.00 or less, set up an annual payment. (PRISM permits annual payments effective the first of any month. Prior to PRISM's 11/97 implementation date, annual payments were made only in November of each year.)

- If there is an annuity record and the amount and dates are correct, forward the record for authorization. If the amount and/or dates do not match current information, make and save the change(s) and forward for authorization.
- If there is no annuity record, create an annuity record. Save the record in PRISM, then forward for authorization.
- If the benefit will be a lump sum, create a lump sum transaction, SAVE and forward for authorization.
- If paying a residual benefit amount, create another lump-sum payment or set up the annuity payment in PRISM Benefits, save the transaction and forward for authorization.

See TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

**Note** Ensure the appeals period has expired before payment of a final lump sum benefit (except as otherwise provided by IOD PB 99-6: Payment of Very Small Benefits. A participant may not waive his or her right to appeal under §4003 to allow for earlier payment.

3 Document the calculation (RS printout or manual calculation worksheet) to the participant's file (IPS).

4 Determine if any back payments are due based on the participant's actual retirement date vs. expected retirement date. Use PACs to calculate payments and any applicable interest. If the new payee is a surviving spouse and the benefit is final, determine whether an overpayment occurred, and a recoupment may be necessary. See Technical Procedure 07: Recoup Overpayments.

5 If back payments are due, determine interest in accordance with IOD Policy Bulletin 97-7, and create a Special Check transaction using PRISM Benefits, or when processing a Large Back Payment, create a lump sum transaction in PRISM Benefits. (See also Process 19.3: Determine Net Overpayment/Underpayment for Annuities and Process 19.4: Determine Overpayment/Underpayment for Lump-Sums.).

6 After the benefit and all appropriate payments have been authorized, confirm the expected benefit payment amount and date in writing (ALGS 300 or 500 series), or by telephone documented to CCN. See TP 31.2 Document Outgoing Telephone Calls.

**Surviving Spouse, Beneficiary or Estate**

Note that the only difference in procedures for a surviving spouse or beneficiary is that there must be a recalculation to ensure that the benefit is correct for the circumstances. For a back payment check to a surviving spouse, beneficiary or an estate, see Technical Procedure 05.4: Determine Benefits Due Survivor, Beneficiary or Estate. There are rules governing to whom the check is made payable.

**Domestic Relations Order**

1 Refer to TP 13: Domestic Relations Order Handbook when an alternate payee submits a completed application for benefits.

2 After the benefit and any other payment due have been authorized, confirm the payment amount(s) and date(s) to the alternate payee and participant, if necessary, in writing or by telephone documented in CCN. See TP 31.2: Document Outgoing Telephone Calls.

## TP 20.4 Forms, Letters, Memos, etc.

05/30/2003

# TP 21. Change Benefit/Payment Amount

TP 21. Overview

TP 21.1 Identify Changes to Pay System

TP 21.2 Implement Change

 Forms, Letters, Memos, etc.

**Technical Procedures** **Browse Overviews:** 

**Change Benefit/Payment Amount**

## TP 21. Overview

**03/05/99**

This technical procedure outlines the processing associated with changes to a payee's total benefit and/or net payment, including the necessary revisions to PRISM. These changes may occur at anytime in response to a variety of situations. Changes to a payee's benefit and/or payment typically occur within the following broad categories:

- Changes In Total Benefit (Gross Amount )
- Changes To The Net Payment

**Change Benefit/Payment Amount**

## TP 21. Overview: 02/18/2005

## Changes in Total Benefit (Gross Amount)

Some changes to a payee's gross benefit may require opening an account for a new payee. Examples of instances that require the establishment of a new account include putting a surviving spouse or beneficiary into pay upon the death of a participant or an alternate payee into pay at the proper time. To open a second account, see TP 20: Put New Payee in Pay Status.

Change in a payee's gross benefit amount may occur at any time in response to any of the following situations:

- **Plan Assumption**

  When PBGC assumes payment responsibility for a plan (See Process 9: Plan Assumption), benefit payments for participants in pay status may be adjusted (cutback) to reflect estimated guaranteed benefits. This process is described in Process 10: Adjust Benefits.

- **Change in estimated benefit**

  PBGC does not usually change estimated benefits until it issues BDLs. However, if the error would increase the participant's benefit by $5 per month or more, the estimated benefit should be revised. (See IOD Policy Bulletin 96-1.)

- **Final amount in Benefit Dtermiation Letter differs from estimated benefit**

  | | |
  |---|---|
  | Annuity: | the benefit may be increased or decreased. |
  | Lump-sum: | PBGC pays a residual benefit amount (see IOD Policy Bulletin 00-6) or recovers an overpayment, see TP 06: Recover Overpayments. |

  The benefit adjustment, also called the 45-day change, is described in Process 19: Issue BDLs and Make Adjustments to Payments and is based on outputs from the Valuation Processes.

- **Benefit corrected following successful appeal**

  If a participant successfully appeals a BDL, any required change in the benefit is also an adjustment. Adjustments resulting from appeals are included in Process 20: Respond to Appeals Notices and PEAD Referrals.

- **Revised benefit based on error**

  A "final" benefit may be changed to correct an error identified by PBGC. PBGC does not change a benefit unless it documents and explains the error. Generally, any error discovered will be corrected in the first year after the BDL is final. After that, there are limits on changes. See PBGC Operating Policy Manual 5.8-1 and IOD Policy Bulletin 96-3 for further information on the issuance of revised Benefit Determination Letters.

- **Payments suspended when proper documentation not received timely**

  Benefits may be suspended if a current payee does not provide a completed application or other necessary documents. See Process 13.1: Verify Data from Returned Forms

- **Benefit change resulting from form of payment**

  A Participant is receiving a form of benefit payment that automatically requires that the benefit be adjusted upon a certain event or at a certain age. One example of this payment method is the Social Security Leveling Option. Participants may also have a benefit form that includes a temporary supplemental payment, once the period for the temporary supplement expires, the

benefit amount will have to be adjusted.

- **Benefit change resulting from QDRO**

  A participant's benefit may be reduced by the amount stipulated in the QDRO for the alternate payee, see TP 13: Domestic Relations Order Handbook.

- **Change in payment frequency**

  If a payee receiving an annual payment requests a change in their payment frequency to monthly, PBGC will make the change, provided the monthly benefit amount is at least $20.

# TP 21. Overview: Changes To The Net Payment 01/19/2005

There are also changes that affect the net payment but not the gross benefit. In some of these situations, the difference between the net payment and the gross benefit is accounted for in PRISM as a deduction that is assigned to another account or payee. Other types of situations involving a change in the net payment do not necessarily require entry of a deduction into PRISM. Changes to the net payment include:

- **QDRO the other words**

  A QDRO may specify payment to an alternate payee who is a dependent (child support). For this type of QDRO, a deduction is made from the participant's benefit, see TP 13.3: Make QDRO Payments.

- **Net Overpayment/ Recoupment**

  PBGC needs to recoup a net overpayment made to the payee (this change would usually happen at the same time as a downward adjustment to the gross benefit amount). For more details see Technical Procedure 7: Recoup Overpayment .

- **Change in tax withholding**

  A payee elects to change the withholding amount for Federal Income Tax.

- **Internal Revenue Service (IRS) tax levy**

  The IRS issues a tax levy on the participant's income. IRS tax levies are processed and implemented by State Street Corporation (SSC). If received by PBGC, the documents are forwarded to SSC. Change to a payee's benefit as a result of an IRS tax levy is implemented by changes to PLUS (made by SSC), rather than by changes to PRISM (made by IOD staff).

**Change Benefit/Payment Amount**

## TP 21.1 Identify Changes to Pay System

**01/19/2005**

Action Steps

| | |
|---|---|
| **Purpose** | Determine required changes to payee records in PRISM and the PRISM applications needed to effect the change in benefit payment or amounts. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Required Input and Source varies according to the necessary change and includes: QDRO – QDRO Benefits; Adjustment to Estimated Pay Amount - Adjustments to Guaranteed Benefits Memo; BDL - Adjust to Final Pay - Valuation Close Out Report; Appeal - PEAD decision; BDL Correction - Notice from actuary or PEAD; Non-response to a PBGC request for a completed application or other documents from a current payee; Death of a payee; Payee request to change payment frequency from an annual payment to a monthly payment. Notice of queued changes - PRISM Forecaster report (replaces status report). |
| **Output and Recipient** | Change(s) to PRISM Forms and/or PRISM Benefits, transmitted to paying agent (SSC). |
| **Control Issues** | Ensure correct pay source is used. For automatically queued changes associated with BDLs, verify that no appeal has been filed. If so, refer to Process 20: Respond to Appeals Notices and PEAD Referrals. IRS tax levy received directly from the IRS that indicates the levy is authorized to attach retirement benefits should be scanned to participant's file (IPS) and the original forwarded to SSC for implementation of the change through PLUS.<br>A spouse's consent may be required for a benefit reduction due to a court order, fiduciary breach or plan loan. Refer any such cases to OPSS. |
| **Important Concepts** | Familiarity with PRISM applications is necessary. |
| **Guidance** | PBGC Operating Policy Manual 6.7-1<br>Training/ Users Manual<br>IOD Policy Bulletin 03-3 |
| **Procedure Owner** | PLS, PBA, FBA |

## Click Here for More Information...

TP 21.1 Action Steps: Identify Changes to Pay System

# TP 21.1 Action Steps: Identify Changes to Pay System

01/19/2005

1 Review payee information to determine the type and effective dates of the needed change, confirm the payee is in pay status and to identify the current pay source:

- PRISM Benefits
- Participant file (IPS)
- CCN Records

2 In PRISM Benefits select Update a Benefit Payment and then select View Benefit Summary. Select the annuity screen and carefully review all benefit information. Verify that the appropriate pay source is available to implement the necessary change.

Note — If a payee's record has already used both estimated benefit pay sources [E1 and E2] and a new estimated pay source is needed, modifications must be made to the existing pay sources. The most recent estimated pay source should be moved to E1 so that the change to be made can be entered into E2. These modifications may not be made by a user, and an e-mail request for a revision should be the referred to the PRISM User Support Group [TSD].)

3 If implementing a change as a result of a QDRO, ensure that benefit payment stipulations in the QDRO are met, see TP 13: Domestic Relations Order Handbook.

4 If making changes as a result of a recoupment situation, use PACS to determine the amount to recoup and recoupment end date. Follow instructions of TP 7: Recoup Overpayment to determine for recoupment deductions.

## TP 21.2 Action Steps: Implement Change

01/19/2005

1 Upon receipt of a properly documented change in benefit amount and determination of the type of change, enter the new amount and payment dates in the next available pay source. Ensure the correct pay source is used.

2 Take appropriate action in PRISM Benefits to implement change:

- For changes as a result of a QDRO, see TP 13: Domestic Relations Order Handbook.
- For changes in federal tax withholding, for which PBGC has received notice from the participant, enter the new information in PRISM Forms and complete a new Periodic Election Form. (This is an example of a change to payments that **does not** require entry to PRISM Benefits.)
- For IRS levies, have the form scanned in the participant's file, and forward the **original** to SSC for processing, using the *IRS Levy Transmittal (Irslevy.doc)*. (The IRS Levy deduction field in PRISM **is not** used). PBGC does not notify the participant prior to the change in benefit amount because the IRS notification to the taxpayer is considered sufficient notice. IRS levies include a statement that the levy does not permit the attachment of retirement type funds, (which includes pension benefits paid by PBGC) unless the IRS indicates a specific authorization by checking a box and providing an additional signature on the levy. This box must be checked and the signature must be provided for PBGC to honor the levy. If the levy does not have this authorization, contact the IRS immediately to get a levy that indicates that PBGC may honor it or have it retracted. (NOTE: THE benefit must be in pay status before the levy can be honored. See PBGC Operating Policy Manual 6.6-2.) No modifications to PRISM are required, SSC makes (manual entry) changes to PLUS to implement an IRS Levy.
- To change an annual payment to a monthly payment in response to a participant's request, change the frequency code in PRISM Benefits to reflect monthly payments (frequency code - 40) and use the next pay source with the correct monthly amount and BEGIN and END dates.
- To suspend a benefit if a participant does not complete and return Form 701 – Payee Information Form (PIF) within 90 days, change the status field in PRISM Benefits to "suspended pay" (status code - 2).

3 If a change was made to PRISM Benefits, forward the record for authorization. See TP 28: Authorize Financial & Non-Financial Transactions through PRISM.

## TP 21.3 Forms, Letters, Memos, etc.

**09/22/99**

Note After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

***IRS Levy Transmittal***
Irslevy.doc

# TP 22. Secure Records

TP 22. Overview

TP 22.1 Secure Records

Forms, Letters, Memos, etc.

## TP 22. Overview

**05/31/96**

Use this procedure *only* when it has been determined that records are in danger of being lost, disposed of, or destroyed. Often, this will come in the form of a call from an outside contact, such as a participant, or the plan administrator notifying PBGC that the company is abandoning the plan. A common scenario is when management of the building where records are stored is evicting the tenant who is custodian of the records or auctioning the bankrupt company's office furniture in an effort to recover back rent or other debt owed.

It may be necessary to secure records before *or* after trusteeship. When occurring before trusteeship, PPD makes a task referral to a TPD and the divisions work together to secure the records. When occurring after trusteeship, the TPD secures the records alone.

Technical Procedure

**Secure Records**

## TP 22.1 Secure Records

**05/31/96**

Action Steps

| | |
|---|---|
| **Purpose** | Protect plan and participant records to ensure that required records are not lost or destroyed. |
| **Time Reporting (BMPRS)** | PPD Processing<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Location of records, contact person |
| **Output and Recipient** | Secured records |
| **Control Issues** | Monitor status of security of records (verify periodically) |
| **Important Concepts** | PPD attempts to arrange for records to be secured by the plan administrator or bankruptcy trustee. If loss of records is imminent, PPD (if prior to termination) and TPD will attempt to secure them. In emergency cases, work closely with the TPD manager, any regional FBA that might be of assistance, and PPD. |
| **Guidance** | ERISA 4003 grants PBGC the right to investigate defined pension plans and subpoena necessary materials. |
| **Procedure Owner** | TPD auditor and division manager. If the case is still in PPD, the TPD auditor works with the person in PPD assigned to the case. |

## Click Here for More Information...

TP 22.1 Action Steps: Secure Records

## TP 22.1 Action Steps: Secure Records

05/31/96

1 Call the plan sponsor/administrator or bankruptcy trustee to establish location(s) of records. For small numbers of records, arrange for them to be shipped to PBGC.

2 Explain the importance of the records, and request that they be safeguarded. Suggest a time frame within which PBGC will obtain copies of the records. It may be necessary to take an emergency field trip, have a regional FBA make an emergency field trip, or to have the plan administrator store records in a warehouse at PBGC's expense. Coordinate all emergency field trips with the TPD manager.

- If making an emergency field trip, follow Procedure 11.3 Conduct Preliminary Field Audit.
- If having a regional FBA secure the records, establish contact between the FBA and the plan administrator or other custodian of the records and explain that the FBA is acting as PBGC's representative in securing the records.
- If arranging to have records stored at PBGC expense, contact the plan administrator to arrange movement of records to a storage facility. Obtain information about the location and phone/fax numbers of the storage facility and establish contact with the facility's administrator. Send a follow-up letter documenting the conversation and put a copy of the letter in the plan file. If arranging storage requires making a field trip, follow Procedure 11.3 Conduct Preliminary Field Audit. If possible, avoid using storage completely by doing the field audit at once.

3 Depending on the number of participants in the plan, it may be possible to bring the secured records back to PBGC or the FBA office at least temporarily. If the volume of records is large enough that space will be a problem, arrange for storage at a storage rental facility near the current location of the records. When selecting a site, keep in mind that the place where records are located may also be the place where those building the database will have to work.

**None**

# TP 23. Coordinate Large Cases

TP 23. Overview

TP 23.1 Coordinate & Process Large Cases

Forms, Letters, Memos, etc.

## TP 23. Overview

**11/16/99**

A Large Case is defined as a plan or group of plans with 1000 participants or $5 million or more of UBL . The cases may come from either PPD or CFND, depending on the amount of the UBLs. Once it is certain that the case will be recommended for termination and trusteeship, the PPD Manager or CFND Department Director will notify the Large Case Coordinator in writing and recommend that a Large Case Working Group (LCWG) be formed.

The LCWG is an interdepartmental working group. Its membership includes the Large Case Coordinator and representatives from PPD or CFND, OGC, CPAD, FOD/Treasury Division (FOD/TD), FOD Controller Operations Division, Investment Accounting Branch (FOD/COD/IAB), and the assigned TPD case team. Anyone else with specific skills or knowledge may be invited. The LCWG seeks to identify legal and policy issues up front and to seek resolution early in the processing cycle. Another separate, but very important function of the LCWG is to keep the Office of the Executive Director informed on the status of the case. The Large Case Coordinator serves as the Chair of the LCWG. Large Cases will have a FBA and an actuarial contractor assigned.

The LCWG meets on a regular basis to discuss the case and actions relating to it. These meetings begin prior to the case going to the Trusteeship Working Group (TWG) and continue, as needed, until the plan is closed. The LCWG tries to anticipate any problems and move to prevent or solve those problems before they affect the case. By focusing on the problematic plan issues early, it is possible to speed up the processing, thus providing better information for PBGC's financial statements, as well as improved customer service to a large number of participants.

IOD has committed to holding on-site meetings with participants on all Large Cases. The meetings are held where there is a large concentration of the plan's participants (see Technical Procedure 14: Hold Participant Meeting). The Participant Meetings are planned, directed and presented by the Large Case Coordinator, the TPD case team, and the FBA assigned to the case.

**Coordinate Large Cases**

## TP 23.1 Coordinate and Process Large Cases 11/16/99

Action Steps

| | |
|---|---|
| **Purpose** | To ensure that large cases are given the priority and resources needed. |
| **Time Reporting (BMPRS)** | [See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identification of a plan or family of related plans that meet the Large Case definition (1000 participants or $5 million or more UBL).<br>Decision that there will be a recommendation to the TWG for PBGC to terminate and trustee the plan(s). |
| **Output and Recipient** | Formation of the LCWG.<br>Coordination and cooperation between all departments involved with the case.<br>Priority for resources assigned to the case. |
| **Control Issues** | Once a plan or family of plans is identified as a Large Case, all plan level communications will include the Large Case Coordinator as an information addressee.<br>The Large Case Coordinator will oversee the maintenance of the Large Case and FBA Processing Summary. This tracks information on the case and the status of all actions related to case processing. This is updated on a regular basis (approximately quarterly) with information provided by the TPDs and FBAs. |
| **Important Concepts** | Actions required on a Large Case are essentially the same as for all other plans. However, there is a significantly larger amount of planning and coordination involved. In most situations there are more communications required in Large Cases because of the number of participants involved and the large amount of underfunding.<br>Large Cases have much higher visibility both inside and outside of PBGC. They receive the attention of the Office of the Executive Director on a frequent basis.<br>There is normally an FBA and Actuarial Contractor for large cases. |
| **Guidance** | N/A |
| **Procedure Owner** | Large Case Coordinator, LCWG members |

## Click Here for More Information...

TP 23.1 Action Steps: Coordinate and Process Large Cases

# TP 23.1 Action Steps: 02/18/2005

# Coordinate and Process Large Cases

The following is the normal processing for any case. Each process is presented by its number and name in the procedures manual. It is noted wherever a Large Case creates exceptions or additions to the procedures in any given process.

## Pre-Termination Processes

1 **Process 1: Determine Type of Case, Assign & Begin Gathering Data**

- Provide a "heads-up" notice to the Large Case Coordinator, if possible

2 **Process 2: Gather Plan and Sponsor Information**

- Provide a "heads-up" notice to the Large Case Coordinator, if possible

3 **Process 3: Determine Financial Condition of Plan and Identify CG**

- Provide a "heads-up" notice to the Large Case Coordinator, if possible

4 **Process 4: Make Recommendation**

- Notify Large Case Coordinator as early as possible
- Proceed with **Process 4.4: Form Large Case Working Group**
  - Establish the Large Case Working Group and schedule first LCWG Meeting
  - Brief the LCWG on all aspects of the case, plan sponsor and status of the termination
  - Complete a *Plan Fact Sheet (Factsht.doc)* and a *Case Contact Sheet (Contacts.doc)* for the case
  - Assign duties and ok target dates within the LCWG
  - Investigate for potential policy, legal or publicity problems
  - Target transfer of payments to SSC

5 **Process 5: Route Recommended Termination**

- Provide a copy of the draft TDR to the Large Case Coordinator

6 **Process 6: Monitor Plan**

- Keep Large Case Coordinator advised

7 **Process 7: Initiate PPD/TPD Coordination**

- This may be replaced by the LCWG meetings

## Initial TPD Processes

1 **Process 8: Assign TPD Case Team & Begin Processing**

- As soon as the plan is trusteed, notify the Large Case Coordinator, CPAD, and FOD /Treasury Division (FOD/TD)
- All Large Cases and FBA plans will have a plan specific workplan with all processing scheduled. Use the *Target Dates Checklist (Trgtdate.doc).* Each will also be scheduled on

the FBA workplan where the targeted completion date will mirror the case workplan and the Large Plan and FBA Summary.

- Contract for FBA and actuarial contractors (if not already done earlier)
- Plan and hold Participant Meeting (see Technical Procedure 14: Hold Participant Meeting ). Awarding of contracts for FBA and actuarial contractor early will provide assistance for the FBA and TPD in preparing for the meetings (need abstract, estimated calculation, and cutbacks ASAP).

  This may be done later, but should be done as early as possible
- Use ALGS for any large scale communications or mass mailings to participants

2 **Process 9: Plan Assumption**

- Use ALGS for any mailings to participants

3 **Process 10: Adjust Benefits**

- Use ALGS for any large scale communications or mass mailings to participants

### Audit Processes

1 **Process 11: Develop Audit Program**

2 **Process 12: Obtain & Evaluate Participant & Plan Document Data**

- The Plan Document and Source Document Audits will normally be scheduled and completed separately from the Participant Data Audit.
- Because of the high visibility of the Large Plans, keep the LCWG apprised of the status of the audits. This provides information to other departments for planning for the task they are assigned.

3 **Process 13: Verify Data for Participant Database**

- Use ALGS for any large scale communications or mass mailings to participants
- Assistance may be provided at the Participant Meeting

4 **Process 14: Determine Controlled Group and Net Worth**

5 **Process 15: Audit Plan Assets**

### Valuation Processes

1 **Process 16: Value Recoveries & Allocate to Claims**

2 **Process 17: Prepare Actuarial Case Report & Software**

### Notification of Benefits Processes

All benefit changes will be communicated to the participants with a clear explanation of change. This also includes notification of estimated benefit amount and date of first payment.

1 **Process 18: Identify Types of BDLs for Case**

2 **Process 19: Issue BDLs and Make Adjustments to Payments**

- Use ALGS for any mailings to participants

3 **Process 20: Respond to Appeals Notices and PEAD Referrals**

Case Closure Processes

1. **Process 21: Close Plan**
2. **Process 22: Review Closed Plan**
3. **Process 23: Transfer Plan to Ongoing Administrator**

## TP 23.2 Forms, Letters, Memos, etc.

TP 24.5 Value by Transactions (Market Approach) Method

TP 24.6 Value by Book Value (Net Assets or Cost Approach) Method

TP 24.7 Determine Final Value

Forms, Letters, Memos, etc.

# TP 24. Overview

**02/07/97**

This chapter provides guidance for making a net worth determination in respect to viable, on-going businesses, including those which have filed for protection under Chapter 11 of the Bankruptcy Code. It assumes the person performing the analysis has already analyzed the company's business plan and projections, completed the financial analysis, and is familiar with all the relevant facts in respect to the company. This analysis would have included activities performed as part of Process 3: Determine Financial Condition of Plan & Analyze Controlled Group.

ERISA states that net worth is "determined on whatever basis best reflects. . . the current status of the (employer's) operations and prospects at the time chosen for determining the net worth" and "increased by the amount of any transfers of assets made by the (employer) which PBGC determines to be improper." The term "net worth" refers to ERISA 4062(c)(1) in which PBGC's recovery on the underfunding of a terminated plan depends on the value of the employer.

The statute gives PBGC wide latitude in the methods it uses to determine net worth. PBGC's regulation offers guidance. It states "an employer's net worth is equal to the fair market value of the employer at date of plan termination." This has been interpreted to mean the fair market value of the enterprise (the entire company) which is the cash equivalent price at which the entire business might reasonably be sold.

According to ERISA, fair market value is determined exclusive of any liability owed *to PBGC* as insurer arising from the termination of a pension plan; that is, a liability claim based on the "net worth" of the employer. This is different from due and unpaid employer contributions (DUEC) claims which are liabilities of the employer *to the plan* which PBGC collects as successor trustee.

PBGC's net worth regulation, 29 CFR 4062.4(c), provides that fair market value be determined according to nine factors:

- A *bona fide* sale of, agreement to sell, or offer to purchase or sell the business of the employer.
- A *bona fide* sale of, agreement to sell, or offer to purchase or sell stock or a partnership interest in the employer.
- If the stock in the employer is publicly-traded, the price of such stock.
- The price/earnings ratios and prices of stocks of similar trades or businesses.
- The employer's economic outlook, as reflected by its earnings and dividend projections, current financial condition, and business history.
- The economic outlook for the employer's industry and the market it serves.
- The appraised value, including the liquidating value, of the employer's tangible and intangible assets.
- The value of the equity assumed in a plan of reorganization of an employer in a proceeding under Chapter 11 of the Bankruptcy Code. See Appendix C: Bankruptcy Overview for details on bankruptcies.
- Any other factor relevant in determining the employer's net worth.

Note that many assets which must be valued in order to make a net worth determination will qualify as "hard to value" assets. For details on how IOD manages the valuing of such assets, see Process 15.3: Value Hard-To-Value Assets.

Net worth in this context refers to the value of a company and not the financial statement amount representing total stockholders' equity. PBGC's regulation at 29 CFR 4062.4(c) states that "fair market value shall be determined on the basis of the (factors listed) to the extent relevant; different factors

may be considered with respect to different portions of the person's operations." In other words, PBGC uses a mixed, or "eclectic", approach, and value is determined by choosing from among the methods.

Many companies for which PBGC must perform a net worth analysis will be in Chapter 11 bankruptcy. An advantage of the bankruptcy process is the debtor's ability to cancel "executory contracts." This is key element from a valuation point of view. Executory contracts commit the debtor to buy goods on a long-term, fixed cost basis. These contracts can become very onerous if competitors can obtain the same goods or services at a much lower cost and the company's ability to cancel such a contract can substantially improve its financial and competitive position.

**Fair market value** of a company which has terminated its pension plan is determined exclusive of any liability owed to PBGC as insurer arising from the termination of a pension plan; for example, under ERISA, the unfunded guaranteed benefit (UGB). DUEC are owed to the pension plan and not to PBGC; therefore, they are not excluded from liabilities of the business. In preparing a valuation, remove any liabilities for the pension plan other than DUEC; for example, from the balance sheet any unfunded pension liabilities which PBGC guarantees and from projected free cash flows any costs attributable to the terminated plan. The cost of terminating a plan is a business expense and included in the liabilities of the employer.

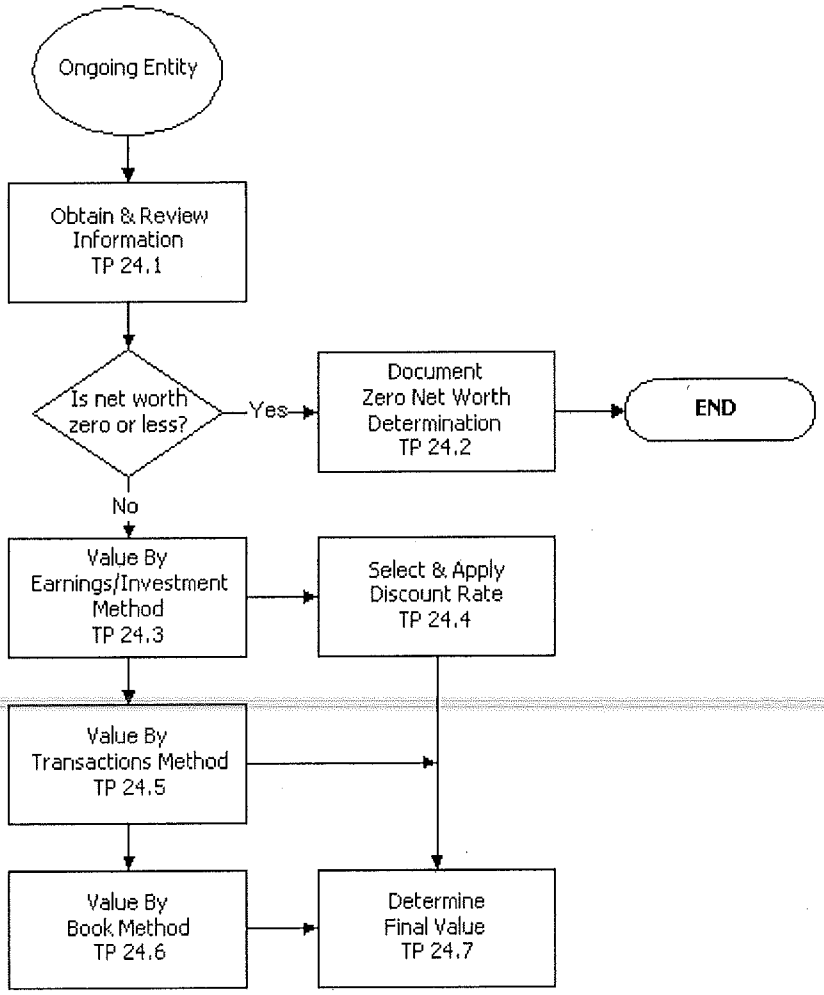
**Reorganization value** is a) the enterprise value of a viable, on-going company in Chapter 11, b) which will be able to propose a plan or reorganization (POR) acceptable to the creditors which it can fund c) that reflects the reduction in the value of its pre-petition claims.

Net worth determinations or valuations are part of PBGC's administrative record.

Browse Workflows:

## TP 24. Workflow for Technical Procedure 24

09/13/96



# TP 24. Definitions: Determine Net Worth

02/07/97

### Close Corporation

Close corporations are privately owned companies whose shares are inactively traded, or companies whose publicly traded share price either is not applicable in the determination of its value or has serious limitations which require a more thorough valuation analysis.

### Current Earnings

Earnings of a company in the most recent period, say the last twelve months, the most recent quarter, or those expected over the next twelve months. Current earnings are important to persons to whom a short time horizon is important such as investment bankers pricing an initial underwritten public offering, one company seeking to acquire another through merger, a company interested in being acquired, and traders.

### Cyclical Earnings

Cyclical earnings are earnings of companies whose results are affected by fluctuations in the nation's economy. The prices of stocks of cyclical companies often are found to be high relative to their earnings at the low point of a recession, and lower when normalized earnings are used as a measure.

### Earning Power

Equivalent to "earning capacity," a term which appears in Revenue Ruling 59-60. "Normalized earnings" is the same as earning power.

### Free Cash Flow

Free cash flow is defined as the net cash flow available after taking into account all cash inflows and outflows.

### Improper Transfer

A transfer of assets by the employer which PBGC determines based on facts and circumstances were transferred for the purpose of and with the effect of avoiding or limiting employer liability.

### Temporary Earnings

Earnings depressed by a temporary factor such as a long strike. Earnings may also increase by a temporary factor; for example, when the demand for a company's product increases sharply at a time the industry's capacity to produce it is well below the new demand. This occurred during the 1970s when oil prices soared and the demand for fiberglass insulation leaped.

### Types of Approaches to Valuation

Normally, three approaches are used to value a business enterprise. The value determined by each approach is usually given a different weight in arriving at a final conclusion. The three valuation approaches are:

- **earnings/investment (capitalized-income) approach**
- **transactions or market approach**
- **book value, net assets, or cost approach**

**The earnings/investment approach** derives value from earnings, or free cash flows, an investor expects the business to generate. PBGC's regulation refers to this approach when it states that fair market value is determined on the basis of nine factors listed in PBGC Regulation

at 29 CFR 4062.4(c), one of which is "the price/earnings ratios and prices of stocks of similar trades or businesses."

**The transactions or market approach** values a company by comparing prices which were paid for companies in the same or a similar line of business to the company being valued. PBGC's regulation refers to this approach in the first three factors listed in the regulation, summarized as follows: "a *bona fide* sale of . . . the business," "a *bona fide* sale of . . . stock . . . in the employer," and "the price of such stock (of the employer)."

**The book value, net assets, or cost approach** appraises a company's assets and liabilities. PBGC's net worth regulation refers to this approach when it states "the appraised value, including the liquidating value, of the employer's tangible and intangible assets" is a factor which determines its value.

The economic outlook, the history of the business, its current financial condition, and any other factors relevant in determining value support the three approaches. These factors and others are covered in Revenue Ruling 59-60 (Rev. Rul. 59-60, 1959-1 C. B. 237) which is applicable for the most part to the preparation of an enterprise value.

Making a net worth determination normally requires using all three approaches (earnings/investment; transactions; net assets). If not using all three, explain the omission.

**Determine Net Worth**

## TP 24.1 Obtain and Review Information

**09/22/99**

Action Steps

| | |
|---|---|
| **Purpose** | Ensure that PBGC has sufficient information to make a valid net worth determination. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |

| **Output and Recipient** | Complete set of materials necessary for making net worth determination. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | 29 CFR 4062.4(c)<br>PBGC Operating Policy Manual 7.2-1 |
| **Procedure Owner** | Auditor/Financial Analyst |

## Related Topics:

TP 24.1 Action Steps: Obtain and Review Information

## TP 24.1 Action Steps: Obtain and Review Information

09/22/99

1 Obtain from the plan file all documents collected by PPD or OGC relating to the contributing sponsor and all identified members of any relevant controlled group.

2 Review the documents to verify that they provide a complete picture of the financial situation of the sponsor and controlled group members. Remember that controlled group members may include rental property if one or more persons claim business expense deductions and/or depreciation for the property in their Federal Tax Returns. Refer to Appendix A. Master List of Documents to Obtain.

- If the company is in Chapter 11 bankruptcy and the company has been rehabilitated and is viable and ongoing, obtain a Disclosure Statement (DS) and Plan of Reorganization (POR). Note that valuing a company in Chapter 11 assumes that the POR is "feasible" from a financial point of view and that the debtor will continue in business and be able to meet its obligations as set forth in the POR.

3 Request additional information if necessary.

**Note Ongoing Entities in Chapter 11 Bankruptcy**

Filing for protection under Chapter 11 of the Bankruptcy Code allows a debtor to prevent creditors from foreclosing on assets, to seek credit from lenders by being able to grant the highest priority in repayment, to stabilize the business and to negotiate an extension and compromise (relaxation of terms and reduction in the face amount) of its debts. A key aspect of the bankruptcy process from a valuation standpoint is the relaxation of terms and the reduction in the face amount of debts. These become gains to the debtor.

PBGC's net worth regulation cites one factor which deals directly with companies that have filed for Chapter 11 bankruptcy. It is the "value of equity assumed in a plan or reorganization of an employer in a proceeding under Chapter 11 of the Bankruptcy Code." Among other matters, this part of the regulation means that PBGC may share in the net worth that arises from the extinguishing of debt.

**Determine Net Worth**

## TP 24.2 Document Zero Net Worth Determination 09/13/96

Action Steps

| | |
|---|---|
| **Purpose** | Document finding that an entity's net worth is zero. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Entity with zero net worth. |
| **Output and Recipient** | Zero Net Worth Determination Memo. |
| **Control Issues** | If there is any doubt that the entity's net worth is zero, follow the full net worth determination procedures. |
| **Important Concepts** | Many companies obviously have zero net worth. In cases where this can be clearly demonstrated with minimum effort, documentation of the determination is still required but in-depth analysis need not be done. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor |

## TP 24.2 Action Steps: 09/13/96
## Document Zero Net Worth Determination

I. Prepare the *Zero Net Worth Determination Memo (Zeronw.doc)*. Complete the narrative section with a complete description of all investigation performed that led up to the zero net worth determination. Attach copies of all relevant documents to the memo, and list them as attachments.

II. Route the completed memo to the team leader for review. Upon approval, the team leader forwards the memo to the division manager.

**Determine Net Worth**

# TP 24.3 Value by Earnings / Investment (Capitalized-Income) Method

**09/13/96**

Action Steps

| | |
|---|---|
| **Purpose** | Arrive at a value based on future earnings. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Estimates of future earnings or free cash flows and historical earnings. |
| **Output and Recipient** | Value figure for the company based on projected future earnings. |
| **Control Issues** | N/A |
| **Important Concepts** | The value of a viable, on-going business rests in large part on an estimate of its future earnings or free cash flows. Analysis focuses on future earnings because these are expected to produce the returns on which an investor/purchaser bases his investment/buy decision. While historical earnings may be a guide to future earnings, the focus remains on the future. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor |

TP 24.3 Action Steps: Value by Earnings/Investment (Capitalized-Income) Method

## TP 24.3 Action Steps: 09/13/96

## Value by Earnings / Investment (Capitalized-Income) Method

When using this method, place a value on a company by selecting a multiplier to apply to the estimate of the company's earning power.

The discounted cash flow (DCF) approach is a method whereby future free cash flows are discounted to their present value.

Sometimes PBGC receives a company's business plan and detailed projections. These projections usually cover five years. After an analysis of the projections, which begins with an examination of historical results, an analyst places a value on a company by discounting projected free cash flows to their present value.

Note: If the company being valued is in Chapter 11 Bankruptcy, it will be difficult to rely on earnings (probably losses) in the period before a company filed for protection. However, by the time the debtor has filed a DS and POR, it has established that it has earning power. The debtor has a business plan and projections that support its DS and POR and has made them available to PBGC. If the business plan and projections are reasonable, they can be used as a basis for projecting a stream of equity cash flows. Adjustments may be made to the debtor's projections such as segregating assets to be disposed of to fund the POR or subsidiaries to be sold as part of the restructuring. Other outcomes may be simulated. Most often equity cash flows among the debtor and its creditors depend on a final compromise (or reduction) of debts. If necessary, refer to Process 15.3 Value Hard-To-Value Assets.

I. Define the earnings to use in valuing the business. Investors emphasize the importance of long-term earnings rather than current earnings or estimates of earnings over the next twelve months. A company's "earning power" is an estimate of a company's future earnings based on the expectation that future earnings will approximate their past level unless extraordinary conditions intervene.

II. Eliminate nonrecurrent items. Straight earnings per share have drawbacks. A per-share figure mixes operating profits; depreciation, which may be calculated differently among companies; taxes which may reflect different elections and interest and debt expense, which reflect a firm's capital structure. Earnings per share focuses on the value of a share of common stock and steers analysis away from considering the company as a whole including all factors that influence value.

- If there are sold or discontinued operations, excludes revenues, cost of sales, and an estimate of the operations portion of the sales, general and administrative expenses.
- If there are interest and debt expenses, treat them separately in preparing *pro forma* financial statements and projections.

4 Select and determine an earnings multiplier by which to multiply the estimate of earnings to yield a value.

- The most frequently used multiplier is a price/earnings ratio. This ratio is defined as share price divided by per-share earnings reported by the company for the most recent four quarters. It is also share price times all common stock outstanding divided by net profit after tax. A price/earnings ratio or earnings multiplier incorporates two variables into a single figure: the capitalization or discount rate and expectations about the company's earnings. A capitalization rate is one used to calculate the present value of a periodical payment or annuity into one payment or sum equivalent to the present value. The reciprocal of a price earnings ratio can be used as a capitalization rate, if one can reasonably anticipate that the company's earnings will be level in perpetuity. If this is not the case, the multiplier needs to incorporate an amount to reflect expectations about the

company's earnings. Be careful when applying a price/earnings multiplier to the earnings of a company in a cyclical industry: if emphasizing current earnings, the multiple chosen to apply to the earnings at or near the top of the business cycle is different (lower) than the multiple chosen to apply to current earnings near the bottom of the cycle.

- Use earnings before interest and taxes (EBIT), or earnings before interest, taxes, depreciation, and amortization (EBITDA), also known as "operating profit".
- Consider using primary cash flow (earnings + depreciation and amortization) or operating cash flow (EBIT + depreciation and amortization +/- changes in working capital - normal expenditures) as a multiplier only in unusual cases.

5 If using an earning multiplier:

- Begin selecting a price/earnings ratio by estimating the ratio for Standard and Poor's (S&P) 400 Industrial Index, a proxy for the stock market. S&P makes available its 400 Index earnings and dividends for the past four quarters and an estimate of earnings and dividends for the next year.
- Estimate a price/earnings ratio for an S&P Industry Group Index. To select a price earnings ratio for a publicly traded company, examine the most recent price/earnings ratios and the ranges of price/earnings ratios in the past of the company being valued as well as those of the most closely comparable companies. To select a price earnings ratio for a close corporation, a company for which there are no publicly traded securities, the process is the same, except one infers a price/earnings ratio from data on price and earnings of closely comparable, publicly traded companies.
- Consider the basic factors which influence the price/earnings ratio of the company being valued and comparable companies in the context of the historical record. Some factors are:
- stability in historical earnings and growth in expected earnings,
- financial leverage,
- expected capital expenditures and the return management expects to receive on its investments, and
- corporate size.

6 Discount cash flows. A company's business plan and projections usually cover five years. On the assumption that this material will contain the projections, make any necessary reasonable adjustments and use them as a basis for valuing the company. When such projections are not available, prepare projections to use as a basis of valuing the company. The projections themselves may need to be recast into free cash flows. The value of a viable, on-going business is the sum of the present values of its free cash flows projected over a forecast period (forecast period value) and the capitalized value of the free cash flows beyond the forecast period (residual or terminal value). The discounted cash flow (DCF) method of determining value, therefore, begins with an estimate of the company's free cash flows over a forecast period, usually five years, and the free cash flows beyond the forecast period, an amount assumed to be constant. The stream of forecasted cash flows is discounted back to its present value; the cash flow beyond the forecast period is capitalized and then discounted back to its present value. The company's value is the sum of the two amounts: the forecast period value and residual or terminal value.

7 Analyze projections to insure that they reflect the prospects of the business. Projections are usually prepared on a more than likely optimistic and pessimistic basis. Choose from the two definitions of cash flow (total capitalization - common equity and market value of debt), depending on whether or not it is necessary to obtain a value for the equity or the enterprise. The definition of free cash flow to determine the value of common equity is a) net profits after taxes, b) plus depreciation and amortization c) less net fixed capital additions and incremental

working capital. To determine the value of total capitalization is the same for common equity, except that interest expense after taxes is added to free cash flow. After determining enterprise value, deduct the value of debt to arrive at the value of equity.

**Determine Net Worth**

## TP 24.4 Select and Apply Discount Rate

**09/13/96**

**Action Steps**

| | |
|---|---|
| **Purpose** | Select and Apply a Discount Rate |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Projections from Value by Earnings/Investment (Capitalized-Income) Method |
| **Output and Recipient** | Discounted valuation figure. |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor/Financial Analyst |

Select the discount rate to apply to the free cash flows in order to arrive at their present value. There are several methods, including: a) the capital asset pricing model ("CAPM"), b) dividend discount model, c) reference to historical stock and bond market data, and d) capitalization rate comparison.

## Related Topics:

TP 24.4 Action Steps: Select Discount Rate Using Capitalization Rate Comparison Method

**Determine Net Worth**

## TP 24.4 Action Steps: 09/13/96
## Select Discount Rate Using CAPM

The capital asset pricing model (CAPM) is a means to select a discount rate. When using the CAPM, the discount rate is called the cost of capital. The principal advantage of the CAPM is that it sets forth a framework to estimate a discount rate. Conceptually, the cost of common equity capital is the return the company must offer investors to persuade them to invest in the company. The return has three components:

a) a return equal to a return on an investment with no risk; that is, the risk-free rate,

b) a return equal to a return one would receive by investing in common stocks in general; that is, the "market risk premium" and

c) a return equal to the risk of investing in a particular company.

**The CAPM may be expressed as follows:**

$Y = Rf + \beta(Rm-Rf)$

Where:

Y = Cost of capital

Rf = Risk free rate (usually yield to maturity on long-term U.S. Treasury Bonds)

$\beta$ = ("Beta") Coefficient of an individual stock with the overall market.

Rm = market rate of return (expected return on S&P 400 for 10+ years)

This formula also expresses the cost of capital for business risk (the cost of common equity in a debt-free company).

**Rf - Risk Free Rate**

Since an investor can choose to invest funds with no risk by investing in U.S. Treasury Bonds, a company must offer an investor the expectation of earning a return at lest equal to one obtainable without risk. Though there are different viewpoints, the yield to maturity on 30-year U.S. Treasury bonds is a good starting point. The rate on U.S. Treasury bills is too volatile.

**Market Risk Premium**

An investor expects a return greater than a risk free one to compensate for assuming the risk of investing in common stock. The risk of investing in common stocks ("market risk") is measured by the return an investor expects to receive by investing in a diversified portfolio of common stocks. The "market risk premium" is the amount by which the return on the overall market exceeds the risk free rate. The task is to estimate the return on the stock market. This return, which is composed of expected capital gains and dividends, is implicit in the stock market level at the time of the valuation. As a practical matter S&P makes available for its 400 Index the last four quarter's earnings and dividends and an estimate of the earnings and dividends for the next year. This information provides a market multiple (and information on dividends) as a starting point.

**$\beta$ - Beta**

Investing in the stock of one company is riskier than investing in the overall stock market. An investor expects a return that compensates him for assuming that risk. A statistical term called Beta is placed in the CAPM to estimate the sensitivity of the price of a common stock of a particular company to the price movements in the stock market. The riskiness of a stock is indicated as follows:

- If Beta =1, the stock's return fluctuates identically with the market's return.
- If Beta >1, the stock's return varies more than the market's return.
- If Beta <1, the stock's return varies less than the market's return.

Sometimes it is difficult to obtain Beta statistics. A good starting point is to look at the companies covered by the ValueLine service (or S&P Stock Reports/tear sheets). If ValueLine or S&P does not follow the company, Beta figures for public companies that might be expected to have the same degree of market risk (such as similar industries and situations) may be helpful. A review of Betas of companies that are only generally comparable may be useful to gain an appreciation of the size and range of this statistic. By fitting some of the Betas into the CAPM formula, an analyst will be better prepared to estimate the cost of capital. Another way to estimate business risk is to consider the factors which influence a price/earnings ratio other than leverage.

**Cost of Capital**

The cost of capital for a company with debt can be determined as follows:

| | (1) | (2) | (3) |
|---|---|---|---|
| | After-Tax Cost | Proportion | (1) X (2) |
| **Debt** | | | |
| **Equity** | | | |
| **Total** | --- | --- | |

Where after-tax cost refers to the after-tax cost of debt and proportion refers to the proportion of debt and equity in the company's capital structure.

The product is the weighted average cost of capital. It is the cost of debt and equity weighted by the proportions of debt and equity which management plans to maintain over time (management's target capital structure).

The principal advantage of the CAPM is that it sets forth a short and simple framework to estimate a discount rate.

**Determine Net Worth**

## TP 24.4 Action Steps: 09/13/96

## Select Discount Rate Using Dividend Discount Model

The dividend discount model specifies that the cost of common equity capital is equal to

$$\frac{d}{V} + g$$

where **d** is the expected dividend amount in the next period,

**V** is the value of the stock (hence $\frac{d}{V}$ is the dividend yield in percent), and **g** is the expected growth rate in dividends.

**Determine Net Worth**

## TP 24.4 Action Steps: 09/13/96

## Select Discount Rate Using Reference Method

Reference to historical stock and bond market data enables an analyst to construct a scale, the bottom rung of which provides a range of risk free returns, the next a range of market returns, and the final rung a range of returns to compensate for the risks of the company being valued.

**Determine Net Worth**

## TP 24.4 Action Steps: 09/13/96

## Select Discount Rate Using Capitalization Rate Comparison Method

The capitalization rate comparison method is one whereby the analyst uses the reciprocal of a price earnings ratio plus a provision for growth.

**Determine Net Worth**

## TP 24.5 Value by Transactions (Market Approach) Method 09/13/96

Action Steps

| | |
|---|---|
| **Purpose** | Value a company by comparing prices which were paid for companies in the same or a similar line of business to the company being valued. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Information on prices recently paid for companies in the same of similar lines of business |
| **Output and Recipient** | Value based on comparison with sales of similar companies |
| **Control Issues** | N/A |
| **Important Concepts** | N/A |
| **Guidance** | N/A |
| **Procedure Owner** | N/A |

Determine which of the four variants to the transactions approach to use and apply that method.

- **Aggregate Market Value Method**. Arrives at an estimate of value by multiplying the market price of a comparable company's common stock by the number of its common shares outstanding to arrive at a value of its equity and by adding to this amount the market value of any preferred stock and debt to arrive at a value of its total capital.
- **Mergers and Acquisition Method**. Arrives at an estimate of value by analyzing the prices and terms paid for similar companies which have been acquired.
- **Stock and Bond Method**. Arrives at an estimate of value by reference to the market values of the company's own securities and
- **Direct Comparison Method**. Arrives at an estimate of value by reference to the terms of its own sale or a *bona fide* offer to buy.

Note that companies in Chapter 11 are not valued on the basis of comparison with other companies in Chapter 11. The task is to find comparable companies which are not in Chapter 11 and measures of value to infer the value of the debtor. If necessary, refer to Process 15.3 Value Hard-To-Value Assets.

## Related Topics:

TP 24.5 Action Steps: Value by Aggregate Market Value Method

TP 24.5 Action Steps: Value by Merger and Acquisition Method

TP 24.5 Action Steps: Value by Stock and Bond Method

TP 24.5 Action Steps: Value by Direct Comparison Method

**Determine Net Worth**

## TP 24.5 Action Steps: 09/13/96
## Value by Aggregate Market Value Method

The aggregate market value of equity method is often used in valuing the debtor while the mergers and acquisition method is used to value ongoing subsidiaries of the debtor which have not filed for protection under Chapter 11.

I. Select a comparable company.

II. Multiply the market price of the comparable company by the number of common shares outstanding. The resulting figure is the value of its equity.

III. Add the market value of any preferred stock and debt to the equity value. The resulting figure is the value of its total capital.

**Determine Net Worth**

## TP 24.5 Action Steps: 09/13/96
## Value by Merger and Acquisition Method

Establishing value by referencing to the sale of entire companies is an approach often referred to as the "merger and acquisition" method. It begins by selecting companies in the same or similar business which were sold or merged at or shortly before the valuation date. From these transactions are extracted the measures of value that can be applied to the company being appraised. The first step in the process is the computation of the purchase price. In addition to cash and stock, it may include debt and other obligations assumed.

Commonly used measures of value relate the purchase price (PP) to measures such as: PP to most recent 12 months earnings or PP to weighted average three year earnings. Therefore it is appropriate to add a premium since the aggregate market value method covers all the common shares outstanding. This view is supported by citing merger and acquisition of companies which appear comparable to the company being valued and which contain a premium over pre-bid market prices.

To add a premium for control requires justification. The following need to examined to determine whether the company being valued is capable of being sold in its entirety; companies which have been acquired and for which a premium have been paid are sufficiently comparable; timeframe of the comparable acquisitions corresponds to that of the company being valued. The merger and acquisitions market is very cyclical and premiums paid in one period may not be paid in another; financing for a deal is available on terms that would make it "doable"'.

**Determine Net Worth**

## TP 24.5 Action Steps: Value by Stock and Bond Method

09/13/96

From time to time it is useful to value a publicly traded company on the basis of the prices paid for its own securities, a method called the "stock and bond" method This is the same as the aggregate market value method, except the market prices of common stock and debt are those of the company being valued.

Be aware that there are technical difficulties such as the determination of the equivalent market price of non-traded equity and debt securities as well as bank loans and the like.

**Determine Net Worth**

## TP 24.5 Action Steps: 09/13/96
## Value by Direct Comparison Method

Direct evidence of value comes from actual or proposed transactions in respect of the entire company or a major portion of it such as sale of 100% of the common stock of the company being valued; *bona fide* offer to buy the common stock of the company being valued; or sale of 100% of a company that is closely comparable. Variants of these methods are acceptable if they present the best evidence of value for example, an offer to buy that might be challenged as not meeting the standards of being *bona fide*.

Sometimes the direct comparison method can be used. In the case of a textile company which had filed for Chapter X, the company was valued by reference to a *bona fide* offer to buy made by a competitor immediately before the date of plan termination.

**Determine Net Worth**

# TP 24.6 Value by Book Value (Net Assets or Cost Approach) Method

**09/13/96**

**Action Steps**

| | |
|---|---|
| **Purpose** | Arrives at a value by determining the market value of all major assets and liabilities of a company. |
| **Time Reporting (BMPRS)** | PPD Processing<br>Net Worth<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Identity of assets and liabilities of company. |
| **Output and Recipient** | Value figure based on combined value of all assets and liabilities. |
| **Control Issues** | N/A |
| **Important Concepts** | The book value approach is based on the premise that an investor will not pay more for an asset or group of assets than it would cost the investor to buy and assemble. |
| **Guidance** | N/A |
| **Procedure Owner** | Auditor |

Use the book value approach is in determining the value of asset based companies, companies engaged in asset conversion activities ("asset converters"), and close corporations. The book value approach arrives at a value by determining the value of liabilities as well as assets. To illustrate, at times long term debt which carries a coupon at a rate much lower than the prevailing market is "marked to market;" that is, valued at market to reflect a decrease in its value. This decrease may be viewed as an addition to equity.

For bankruptcies, keep in mind that the net assets or book value approach arrives at a value by determining the market value of all major assets and liabilities. Sometimes the value is, in effect, an adjusted book value.

Given the peculiarities of companies in Chapter 11 bankruptcy, it may be necessary to give little weight to the market value of assets in the valuation of a profitable company in Chapter 11 if the debtor's assets are highly specialized. In contrast, it may be necessary to assign heavy weight to assets in the valuation of a company with a record of losses whose future cash flows are difficult to project. One consideration in choosing the net assets approach was the existence of a market for the products and related assets such as permits, patents, or privileges of use. If necessary, refer to Process 15.3 Value Hard-To-Value Assets.

Follow the book value procedure appropriate for the type of company.

## Related Topics:

TP 24.6 Action Steps: Determine Book Value of Asset Converters

TP 24.6 Action Steps: Determine Book Value of Close Corporation

**Determine Net Worth**

## TP 24.6 Asset Converters

**09/13/96**

## Action Steps: Determine Book Value of:

Asset converters are companies which undergo major changes in the composition or mix of their assets and liabilities and take steps such as to: sell, divest, distribute or liquidate an important part of their operations or assets; refinance, restructure (loan workout) or reorganize (through Chapter 11) their debt.

In contrast to asset converters are "strict going concerns" which are large, stable, and seasoned enterprises engaged in continuous operations of a particular type to be financed in the future in a bout the same way they have been in the past. Most of the largest companies in the U.S. are strict going concerns. These companies seldom engage in merger and acquisition activities, contests for control, or major financial restructuring or recapitalizations. Use of the book value approach is much less important in valuing "strict going concerns."

**Determine Net Worth**

## TP 24.6 Asset Based Enterprises 09/13/96

## Action Steps: Determine Book Value of:

The value of some companies is closely tied to their assets. Some examples are:

- Financial, natural resource and real estate companies such as banks and casualty insurers, crude oil producers, and mining companies.
- Companies, usually smaller ones, which are regularly bought and sold on the basis of a formula or a proxy of one. Typically, these companies include small manufacturers in specific industrial sectors which are dominated by local and regional firms which are bought and sold on the basis of so many dollars for each percentage of market share. Local and regional brewers once sold on the basis of their capacity (number of barrels).
- Companies with valuable intangible assets, such as a franchise, government permit, operating authority, exclusive contract, or concession. Professional sports teams have value on the basis of their franchises as well as the psychological value from the ownership from a trophy asset. Radio and television broadcasters derive value from their FCC licenses which are government permits to operate within certain media markets.

**Determine Net Worth**

## TP 24.6 Close Corporation

09/13/96

## Action Steps: Determine Book Value of:

Using the book value approach is especially important in determining the value of close corporations or privately owned businesses. Earnings, at times, appear inadequate. While this may reflect poor returns, there may be other causes. Owner-managers exercise prerogatives unavailable to other executives. Owner-managers focus on building asset values rather than on increasing reported earnings. Some owner-managers accept returns that are lower than ones that would be accepted by professional managers. As a result, prices paid for many close corporations are based importantly on their asset values.

In respect to a close corporation which is managed by its owner, consider the effect of the owner's departure. Regarding professionally managed businesses, which have a cadre of executives who will remain after the sale, profits may need to be adjusted to reflect the owner/manager's salary and perquisites. Regarding a personally managed business, one which is an extension of the owner, value is importantly a function of asset value.

A key element in the bankruptcy process from a valuation point of view is the relaxation in the terms and the reduction in the face amount of debts when a settlement is negotiated among the debtor and its creditors.

## Related Topics:

TP 24.7 Action Steps: Finalize Values, Weight Conclusions, and Determine Net Worth

## TP 24.7 Action Steps: 09/13/96

## Finalize Values, Weight Conclusions, and Determine Net Worth

1 Determine the final Components of Value

- Separate assets which are not needed in the business and value them separately, and then add their value to the value of the operating business. Undeveloped real estate usually falls in this category as do improper transfers.
- Add the value of assets which are not needed in the operating business such as undeveloped real estate, assets held for sale, and improper transfers.

2 Compare values resulting from different methods. Sometimes each of the values obtained from the three approaches will be close. They are not required to be.

- If each of the values are *not* close to one another, check the work for computational accuracy and the reasons behind key decisions that affect value.
- If the values remain apart, decide which approach(s) produce the most supportable value. In other words, weight each value. Greatest weight is usually placed on a value derived from the earnings/investment/DCF approach if the company is a "strict going concern," but the greatest weight has been attached to other approaches to value on-going companies. This is particularly true in cases where the company has received a bona fide offer for a principal asset close to the date of valuation.

3 Search for additional value. Sometimes an ongoing company shows a negative net worth on its balance sheet, and this may present a problem in determining its value. The first step is to search for value. Several of the most promising things to look for are:

- hidden assets: for example, in the case of a regional brewer, the hidden values were in the unused capacity of a new brewery, a recognizable brand name and stable market share.
- liabilities which may be disregarded: Corporations have limited liability and creditors cannot seek recovery on debts beyond the assets of the corporation with whom they conducted business. Therefore, a parent is not liable for the debts of its wholly owned subsidiary (unless the parent guaranteed them).

4 Make allowances for controlled group relations. One of the easiest ways to gain an understanding of the intercompany relations among a parent and subsidiaries or any group whose financial reports are presented on a consolidated basis is to obtain a copy of their consolidated statements. These statements set forth the financial results of the individual entities and summarize intercompany accounts. To illustrate, in one case a west coast manufacturer of heating equipment unwisely acquired an east coast manufacturer in the same line of business. The east coast firm failed and was liquidated, but its deficit net worth did not reduce the value of its west coast parent, except to the extent the parent wrote off its investment and a small amount of advances to its subsidiary. In another example, PBGC established that the deficit of one company, a truck maker, in a controlled group did not reduce the positive net worth of other members in the group.

5 Adjust for investments, off balance sheet items, and improper transfers

- Add the current value of marketable securities not needed for working capital to the value of the company as a separate component. The treatment of assets held for sale depends on the use of the proceeds. If the proceeds are to be used as working capital or to fund a plan of reorganization, the value of the assets would not be added to the value of the company.

- Sometimes off balance sheet assets can have considerable value. If material, their value would be added to the value of the company.
- The value of assets transferred with the effect of avoiding or limiting employer liability are added to the value of the company. The determination whether the assets were improperly transferred is made by PBGC on a facts and circumstances basis

6 Adjust for corporate finance and value. A company's capital structure and its ability to finance its operations has a major bearing on its value.

7 Determine the company's "Net Worth" Liability to PBGC and document it in the Net Worth Audit Report.

## TP 24.7 Action Steps: 09/13/96
## Finalize Values, Weight Conclusions, and Determine Net Worth

1 Determine the final Components of Value

- Separate assets which are not needed in the business and value them separately, and then add their value to the value of the operating business. Undeveloped real estate usually falls in this category as do improper transfers.
- Add the value of assets which are not needed in the operating business such as undeveloped real estate, assets held for sale, and improper transfers.

2 Compare values resulting from different methods. Sometimes each of the values obtained from the three approaches will be close. They are not required to be.

- If each of the values are *not* close to one another, check the work for computational accuracy and the reasons behind key decisions that affect value.
- If the values remain apart, decide which approach(s) produce the most supportable value. In other words, weight each value. Greatest weight is usually placed on a value derived from the earnings/investment/DCF approach if the company is a "strict going concern," but the greatest weight has been attached to other approaches to value on-going companies. This is particularly true in cases where the company has received a bona fide offer for a principal asset close to the date of valuation.

3 Search for additional value. Sometimes an ongoing company shows a negative net worth on its balance sheet, and this may present a problem in determining its value. The first step is to search for value. Several of the most promising things to look for are:

- hidden assets: for example, in the case of a regional brewer, the hidden values were in the unused capacity of a new brewery, a recognizable brand name and stable market share.
- liabilities which may be disregarded: Corporations have limited liability and creditors cannot seek recovery on debts beyond the assets of the corporation with whom they conducted business. Therefore, a parent is not liable for the debts of its wholly owned subsidiary (unless the parent guaranteed them).

4 Make allowances for controlled group relations. One of the easiest ways to gain an understanding of the intercompany relations among a parent and subsidiaries or any group whose financial reports are presented on a consolidated basis is to obtain a copy of their consolidated statements. These statements set forth the financial results of the individual entities and summarize intercompany accounts. To illustrate, in one case a west coast manufacturer of heating equipment unwisely acquired an east coast manufacturer in the same line of business. The east coast firm failed and was liquidated, but its deficit net worth did not reduce the value of its west coast parent, except to the extent the parent wrote off its investment and a small amount of advances to its subsidiary. In another example, PBGC established that the deficit of one company, a truck maker, in a controlled group did not reduce the positive net worth of other members in the group.

5 Adjust for investments, off balance sheet items, and improper transfers

- Add the current value of marketable securities not needed for working capital to the value of the company as a separate component. The treatment of assets held for sale depends on the use of the proceeds. If the proceeds are to be used as working capital or to fund a plan of reorganization, the value of the assets would not be added to the value of the company.

- Sometimes off balance sheet assets can have considerable value. If material, their value would be added to the value of the company.
- The value of assets transferred with the effect of avoiding or limiting employer liability are added to the value of the company. The determination whether the assets were improperly transferred is made by PBGC on a facts and circumstances basis

6 Adjust for corporate finance and value. A company's capital structure and its ability to finance its operations has a major bearing on its value.

7 Determine the company's "Net Worth" Liability to PBGC and document it in the Net Worth Audit Report.

# TP 25. Determine & Announce Small Plan Recovery Ratio (SPARR)

TP 25 Overview

TP 25.1 Determine the SPARR

TP 25.2 Announce the SPARR

Forms, Letters, Memos, etc.

**Determine/Announce Small Plan Average Recovery Ratio (SPARR)**

## TP 25. Overview

**12/07/2001**

This technical procedure describes how PBGC determines the Small Plan Average Recovery Ratio (SPARR). It also describes the information used to determine the SPARR, and when and how it is announced within PBGC.

The SPARR is the average recovery ratio of PBGC's recovery experience for all distress terminations and PBGC-initiated terminations, regardless of plan size or sufficiency with TID's in a five-fiscal-year period.

The SPARR is used to determine the plan 4022(c) amount for SPARR plans. (See 17.3 Determine Plan 4022(c) Amount and 17.4: Determine 4022(c) Benefits Payable.)

**Determine and Announce SPARR**

## TP 25.1 Determine the SPARR

**08/23/2002**

Action Steps

| | |
|---|---|
| **Purpose** | Determine the Small Plan Average Recovery Ratio (SPARR) for a particular year. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | CAS SPARR Report from OASD provides Assets, Benefit Liabilities, and recovery amounts for SPARR Plans. |
| **Process Output and Recipient** | Small Plan Average Recovery Ratio (SPARR) for a year, expressed as a percentage, rounded to second decimal point.<br>Plan 4022(c) amounts, individual 4022(c) amounts for participants. |
| **Control Issues** | N/A |
| **Important Concepts** | Once calculated, a SPARR is fixed. The SPARR for any given year will not be updated to include a plan for which the final value of recoveries is determined after the SPARR Calculation Date. Also, once calculated, the SPARR for any given year will not be updated to reflect a subsequent adjustment to the value of a recovery for a plan. The adjustment will be reflected in any SPARR calculated after the date of the adjustment. TPDs update the Plan Assets milestone and Recovery milestone in CAS to provide accurate data elements for the SPARR. TPDs provide MCU with each plan's recovery valuation and allocation by copy of Recovery Determination Memo (See Process 16.4: Document Recovery Values). There is a SPARR for each year, beginning with the FY 1991 SPARR which applies to Plans with a termination initiation date on 12/18/90 through 9/30/91. See Appendix H: Historical SPARR Information. |
| **Guidance** | PBGC Operating Policy Manual 6.7-1<br>PBGC Operating Policy Manual 8.2-1<br>ERISA 4062(b), 4063, 4064 |
| **Procedure Owner** | MCU, SPARR Coordinator, OASD |

## Click here for more information

TP 25.1 Action Steps: Determine the SPARR

Technical Procedure

**Determine and Announce SPARR**

## TP 25.1 Action Steps: Determine the SPARR

**08/23/2002**

I. Throughout the fiscal year (12 month period ending September 30), MCU maintains records of final recovery valuations and allocations received from the TPDs. (See Process 16.4: Document Recovery Values). These amounts are provided to MCU by copy of the Recovery Determination Memo. This summary of recoveries should include "zero recovery" determinations.

II. Prior to the SPARR calculation date, request from OASD the CAS SPARR Report as of the SPARR calculation date. The report will include **all** plans that have a termination initiation date within the applicable five-year SPARR period. Note that the calculation of a FY SPARR will be done as of a SPARR Calculation Date. (See Appendix H: Historical SPARR Information for historical listing of SPARR's and exceptions to the general rule for the SPARR Calculation date.) However, assets, liabilities, and recovery amounts finalized and used in the prior FY SPARR will be fixed for all subsequent applicable FY SPARR calculations.
**Example:** For calculation of the FY 1996 SPARR, the CAS SPARR Report should include all SPARR plans with a termination initiation date of 10/1/90 through 9/30/95.

III. Verify data on CAS SPARR Report against information on Recovery Determination Memos provided throughout the year by TPDs. Resolve any discrepancies.

IV. Ensure that the following information is available to perform the calculation:

| **Data element (sum for all plans as of DoPT)** | Source |
|---|---|
| **CAS Assets figure (Assets)** | CAS SPARR Report |
| **CAS Benefit Liability (BL) figure** | CAS SPARR Report |
| **Unfunded Benefit Liability (UBL) [BL - Assets = UBL]** | Calculated using CAS SPARR Report |
| **Recovery totals for plans, (from TPD's) - sum of all PBGC recoveries on its employer liability claims under sections 4062(b), 4063, or 4064** | CAS SPARR Report (verified against MCU's summary from Recovery Determination Memos) |

**Note** CAS amounts will represent accurate asset amounts as the TPDs update the Plan Asset milestone prior to preparation of the Recovery Determination Memo (see Process 16.4: Document Recovery Values).

**8** Within 20 days of the applicable SPARR Calculation Date, calculate the SPARR (expressed as a percentage rounded to the hundredth decimal), using the information identified and verified above, as follows:

**Recovery Totals** **divided by** **UBL's Totals** **=** **SPARR**

**9** Prepare the *SPARR Notification Memo (Sparrnot.doc)* from MCU Manager, through the Director of IOD to the Deputy Executive Director and Chief Operating Officer notifying them of the calculated SPARR.

**Determine and Announce SPARR**

## TP 25.2 Announce the SPARR

**08/23/2002**

Action Steps

| | |
|---|---|
| **Purpose** | Announce and publish the SPARR within PBGC. |
| **Time Reporting (BMPRS)** | Procedure Review and Maintenance<br>General Policy Analysis<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination of the SPARR. |
| **Process Output and Recipient** | IOD Policy Bulletin announcing the SPARR, updated Appendix H: Historical SPARR Information. Annually announced in PBGC Operating Policy Manual as a policy bulletin. |
| **Control Issues** | N/A |
| **Important Concepts** | The SPARR is an important input into PBGC's determination of participants' termination benefit. |
| **Guidance** | PBGC Operating Policy Manual 6.7-1 |
| **Procedure Owner** | OPSS, TSD |

## Click here for more information

TP 25.2 Action Steps: Announce the SPARR

**Determine and Announce SPARR**

## TP 25.2 Action Steps: Announce the SPARR

**06/06/97**

### OPSS

1 Draft IOD Policy Bulletin that announces the SPARR.

2 Publish Policy Bulletin in online PBGC Operating Policy Manual, and announce to staff via an all IOD e-mail.

### TSD

1 After Policy Bulletin is published, update Appendix H: Historical SPARR Information.

2 List changes in ***Recent Content Updates*** section of online IOD Procedures Manual, and announce to staff via an all IOD e-mail when update published.

## TP 25.3 Forms, Letters, Memos, etc.

06/06/97

Note After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

Processing and Managing SSA Data Requests
Authorizing SSA Data Requests
Overview: SSA Data Requests Summary

PBGC requests earnings and employment data from SSA so that:

- TPDs and FBAs may determine whether a participant who was not included in a trusteed plan's final valuation is entitled to a benefit. See TP 19: Process Woodwork Person.
- TPDs and FBAs may determine the correct benefit amount for a participant when PBGC is unable to collect or verify adequate earnings and employment data from other sources as part of its audit processes.
- STCD may determine a possible woodwork person's entitlement to benefits or correct benefit amount in sufficient plans, as part of their review of sufficient terminated plans.

## Authorizing SSA Data Requests

The SSA Form 581, Authorization to Obtain Earnings Data From the Social Security Administration, used by PBGC to request the data generally requires the participant's (or beneficiary's) signature. The participant's signature is only valid for 60 calendar days. If the signature is by a **mark** and the date is on or after July 25, 2000, ensure the requirements of PBGC Operating Policy Manual 8.5-1: Signature by Mark are met if the signature was **not** notarized. See Appendix J: Participant Forms Information for additional information about acceptable signatures. Once the signed form is reviewed by the processing unit (TPD, FBA, STCD or other department) to ensure accurate completion by the participant, the original form is promptly forwarded to the SSA inbox in PSB. (Note: Photocopies are not acceptable and will be returned.)

Whenever possible, PBGC staff will get a participant's signature on SSA Form 581, Authorization to Obtain Earnings Data From the Social Security Administration Form authorizing the request. There are some circumstances when a signature cannot be obtained after reasonable efforts. PBGC will process SSA data requests for these individuals provided the request has been signed by an IOD Division Manager, Associate Division Manager or other PBGC Department Director (an authorized PBGC official).

## Processing and Managing SSA Data Requests

PBGC first attempts to obtain the necessary SSA information through SSA Online (direct terminal access). PSB/TSD has the direct terminal access, and is the central point in PBGC for all agency SSA information requests (including other departments, like PEAD). Information that cannot be obtained through online access is obtained by forwarding the written requests to SSA. SSA then does the necessary research to obtain the information and mails a response back to PBGC.

PSB's responsibilities include processing and managing the inventory of all SSA requests, including the safeguarding of certain SSA responses as required by PBGC Directives, IM 10-2: Safeguarding of Tax Returns and/or Tax Return Information ..., and IM 10-3: Safeguarding of Information. Employment information obtained from SSA without the participant's signature **is not** subject to safeguarding. Earnings data obtained from SSA without the participant's signature is subject to safeguarding.

SSA responses that must be safeguarded cannot be imaged. Therefore, all SSA mail received by the DMC is handed directly to PSB. PSB reviews the SSA mail, determines what responses are subject to safeguarding, logs all responses into the SSA Request Inventory spreadsheet, and all safeguarded responses into SSA Safeguarded Data spreadsheet. All SSA responses except for

safeguarded SSA earnings data are returned to DMC for mail processing. (See TP 10: Respond to Correspondence.)

Safeguarding requirements require close coordination between FBA staff TPD staff when safeguarded earnings data is requested, as only HQ staff can access safeguarded information. Work products (ex. spreadsheets, databases, memos) that reference safeguarded information must also be safeguarded. Generally, work products may specify conclusions (ex. average compensation) based on safeguarded information (ex. earnings information for specified years) without having to be safeguarded. PBGC's Safeguard Officer provides training to staff on safeguarding requirements.

**Overview: SSA data requests summary**

| | **Employment Data** | **Earnings Data** |
|---|---|---|
| **Available for whom?** | Anyone with SSA covered employment | Anyone with SSA covered employment |
| **How requested? (See question sheet)** | **Preferred**: Form 581, Authorization to Obtain Earnings Data From the Social Security Administration - signed by participant (or their beneficiary, with copy of death certificate)<br>**Less Preferred**: Form 581, Authorization to Obtain Earnings Data From the Social Security Administration signed by *an authorized PBGC official* | **Preferred**: Form 581, Authorization to Obtain Earnings Data From the Social Security Administration - signed by participant (or their beneficiary, with copy of death certificate)<br>**Less Preferred**: Form 581, Authorization to Obtain Earnings Data From the Social Security Administration signed by *an authorized PBGC official* |
| **Available where?** | SSA Online generally for data from 1978 through present.<br>Paper request to SSA for research when data not available online | SSA Online generally for data from 1978 through present.<br>Paper request to SSA for research when data not available online |
| **How long does it take?** | Online - 5 business days for PSB to process request and submit response to DMC for imaging, or to e-mail requestor if data must be safeguarded. (DMC images data from PSB as mail.)<br>Referred to SSA - 5 days for PSB to refer to SSA. 60 business days (3 months) generally for SSA to complete their research and respond to PBGC | Online - 5 business days for PSB to process request and submit response to DMC for imaging, or to e-mail requestor if data must be safeguarded. (DMC images data from PSB as mail.)<br>Referred to SSA - 5 days for PSB to refer to SSA. 60 business days (3 months) generally for SSA to complete their research and respond to PBGC |
| **Safeguarded?** | No | Yes - only when request authorized by PBGC signature and there is no participant or beneficiary signature |

Request SSA Data

# TP 26.1 Initiate Request for SSA Data

08/31/2001

Action Steps

| | |
|---|---|
| **Purpose** | To secure necessary authorization to allow PBGC to obtain earnings and employment data from SSA so to determine a person's entitlement to benefits and/or correct benefit amount. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that earnings or employment records are incomplete for a participant, and that other sources for data are not available. |
| **Process Output and Recipient** | Completed Form 581, Authorization to Obtain Earnings Data From the Social Security Admin from woodwork person or other participant returned to PBGC.<br>Completed Form 581, Authorization to Obtain Earnings Data From the Social Security Admin signed by *an authorized PBGC official* for a request that does not have a woodwork person's or other participant signature. |
| **Control Issues** | Ensure the form is completed accurately. If a beneficiary is claiming benefits, ensure that the form is completed to request the necessary earnings or employment information **for the participant**. The original of the form with the original signature is submitted to PSB. For details on acceptable signatures, see Appendix J: Participant Forms Information. Photocopies of the form are not acceptable and will be returned. A photocopy of the death certificate must be provided with the form to SSA if the participant is deceased, and should be requested from the customer if not already available from PBGC records (IPS). Do not forward incomplete forms to PSB, return them to participant or beneficiary for completion.<br>For earnings/employment requests lacking a participant or other customer's authorizing signature, an *authorized PBGC official (*IOD Division Manager, Associate Division Manager, a PBGC Department Director or Deputy Director) may authorize the request. Only earnings data requests that lack the participant's signature are subject to safeguarding rules and controls. See TP 26: Overview SSA Data Requests Summary.<br>PSB is the agency central point for processing these requests. It receives and manages all agency requests and responses. |
| **Important Concepts** | Safeguarding requirements require close coordination between FBA staff and TPD staff when safeguarded earnings data is requested, as only HQ staff can access safeguarded information.<br>**Timing:** Prompt processing of Form 581, Authorization to Obtain Earnings Data From the Social Security Administration is necessary as the requestor's signature is valid for only 60 calendar days. PSB's target is to complete online requests within 5 days of receipt, depending on |

| | |
|---|---|
| | volume of requests. Unless safeguarding requirements apply, the results are immediately forwarded to DMC. DMC images the response as received mail, and provides notification through ScoRe. Generally the results may be viewed through IPS 2-3 days after submission to DMC. |
| **Guidance** | Follow safeguarding procedures for tax returns received from IRS and stored in Safeguard Room. See PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2) and Safeguarding of Information (IM 10-3) available in hard copy or from PBGC's intranet (see PBGC Directives from intranet home page).<br><br>PBGC Operating Policy Manual 8.5-1: Signature by Mark |
| **Procedure Owner** | PLS, PBA, FBA, STCD |

## Click here for more information

TP 26.1 Action Steps: Initiate Request for SSA Data

# TP 26.1 Action Steps: Initiate Request for SSA Data

08/31/2001

1 If the participant's address is known, prepare Plan Participation Information Request Letter (PRISM ALG 511) with Form 581, Authorization to Obtain Earnings Data From the Social Security Administration, or other letter as appropriate to the individual. (The beneficiary of a deceased participant may sign a request form.)

2 If the participant's address is unknown, make all reasonable attempts to determine the correct address, see TP 33: Locate Customer Address.

- If the participant' address is found, prepare and send Plan Participation Information Request Letter with Form 581, Authorization to Obtain Earnings Data From the Social Security Admin for signature. (The beneficiary of a deceased participant may sign a request form.)
- If the participant cannot be located, or other circumstances make it impossible to obtain the participant's signature on the form, prepare a Form 581, Authorization to Obtain Earnings Data From the Social Security Admin and submit to *authorized PBGC official* for signature. Go to action step 4.

**Note** It is always preferable to have the participant sign the request for data. Earnings data from SSA that is requested without the participant's signature is subject to safeguarding. See TP 26: Overview: SSA Data Requests Summary.

3 Follow up as necessary with the participant about returning the completed form. Due to it's time sensitivity (60 days for validity of signature), it's useful to make follow up requests after about 15 days.

4 When a signed form is received, review it for accuracy and that it has been completed and signed by the participant or beneficiary. Ensure that the signature is acceptable, as described in Appendix J: Participant Forms Information. If necessary, return to customer for signature. **Do not** forward incomplete forms to PSB.

**Note** Be aware that often a beneficiary or surviving spouse will complete the request form improperly, providing their name and social security number instead of the deceased participant's. If this is not caught by the requestor and is forwarded to PSB, the request will be processed as written. The error will not be discovered until the response is returned to the requestor with the data received for the wrong individual. The process will need to be re-done, beginning with sending out a new form to the beneficiary or surviving spouse to be completed properly and signed. This results in delayed processing.

5 After the completed form has been signed by the participant or *authorized PBGC official* send the original of the completed Form 581, Authorization to Obtain Earnings Data From the Social Security Admin to the SSA Data inbox in PSB for processing.

6 In situations where the request is signed by *an authorized PBGC official*, continue to make efforts to have a request signed by the participant. Once a request has been signed by the participant forward it to the SSA Coordinator, the SSA data will no longer have to be safeguarded. See TP 26.3: Manage and Safeguard SSA Data.

Request SSA Data

## TP 26.2 Request SSA Earnings/ Employment Data 09/26/2000

Action Steps

| | |
|---|---|
| **Purpose** | Obtain earnings and/or employment data from SSA. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Completed SSA Form 581, Authorization to Obtain Earnings Data From the Social Security Admin from TPD, FBA, STCD, or other PBGC department. |
| **Process Output and Recipient** | Earnings and/or employment data from SSA for the requested period. Determination whether the data must be safeguarded.<br>• If not subject to safeguarding, the data is imaged to participant file ( IPS), notification of receipt provided to IOD requestor by ScoRe.<br>• If subject to safeguarding, the requestor is notified of receipt by the SSA Coordinator. |
| **Control Issues** | Requests that cannot be completed through online access are forwarded to SSA. |
| **Important Concepts** | Original signatures are required on the Form 581, Authorization to Obtain Earnings Data From the Social Security Admin. The form is reviewed by processing unit prior to submission to SSA inbox in PSB, however if upon receipt PSB believes a form is incomplete (ex. missing a SSN, or a death certificate) or improperly completed, the initiator of the request is promptly contacted by e-mail to pick up the original of the form.<br>Safeguarding requirements require close coordination between FBA staff and TPD staff when safeguarded earnings data is requested, as only HQ staff can access safeguarded information.<br>**Timing:** The requestor's signature is valid for only 60 calendar days. PSB's target is to complete online requests within 5 days of receipt, depending on volume of requests. The online query results are immediately forwarded to DMC and imaged as received mail. Generally the results may be viewed through IPS 2-3 days after submission to DMC.<br>**Exceptions:** If safeguarding is required, the initiator is notified by e-mail that the data is in the SSA Safeguard Room. Also, if request is from STCD, PEAD or other department, initiators receive e-mail notification of receipt from PSB. Requests that cannot be completely answered from the online SSA database are forwarded to SSA. If a response is not received from SSA within 60 days, PSB follows up on these outstanding requests. |
| **Guidance** | Follow safeguarding procedures for tax returns received from IRS and stored in Safeguard Room. See PBGC Directive on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2) and Safeguarding of Information (IM 10-3), available in hard copy or from PBGC's intranet (see PBGC Directives from intranet home page). |
| **Procedure** | SSA Coordinator, PSB |

**Owner**

## Click here for more information

TP 26.2 Action Steps: Request SSA Earnings/ Employment Data

# TP 26.2 Action Steps: Request SSA earnings/ employment data

09/26/2000

1 Enter the request into SSA Request Inventory spreadsheet. Record whether the data will be subject to safeguarding, (see TP 26: Overview SSA Data Requests Summary), and if so, enter request into the SSA Safeguard Inventory.

2 Review Form 581, Authorization to Obtain Earnings Data From the Social Security Admin for accuracy and completeness. If form is not completed or the signature is more than 60 calendar days old, send e-mail notification to HQ initiator to pick up form, or return to FBA in overnight mail. If returned, update SSA Request Inventory spreadsheet to show request returned.

**Note** If requested by HQ staff , or if the HQ staff does not pick up the form within 48 hours of e-mail, return form by interoffice mail.

3 Log into SSA Online and query the SSA database for the relevant information.

4 Print results and notify requestor of results.

**IOD requests (excluding STCD)**

- If data is not safeguarded: Forward printout of results to DMC for imaging. (DMC processes as received mail, and provides notification to the requestor through ScoRe that SSA data has been received and may be viewed in IPS.) If insufficient data is available online, notify requestor that the request is being forwarded to SSA for additional research.
- If data is safeguarded: Contact initiator by e-mail and notify them that the results have been received and are available in the Safeguard Room. If insufficient data is available online, notify requestor that the request is being forwarded to SSA for additional research.

**other dept requests (PEAD) & STCD**

- If data is not safeguarded: contact initiator by e-mail that results have been received and may be picked up from PSB. If requested, or if the staff does not pick up the form within 48 hours of e-mail, return form by interoffice mail. If insufficient data is available online, notify requestor that the request is being forwarded to SSA for additional research.
- If data is safeguarded: Contact initiator by e-mail and notify them that the results have been received and are available in the Safeguard Room. If insufficient data is available online, notify requestor that the request is being forwarded to SSA for additional research.

5 Update the SSA Request Inventory spreadsheet and as appropriate, the SSA Safeguard Inventory spreadsheet, with details about the online search results and notice to user (date submitted to DMC or notice provided to requestor).

6 If no information or only incomplete information is available from SSA Online, send original form to SSA by Federal Express and file a copy of form in "pending with SSA" binder, and update the SSA Request Inventory spreadsheet and as appropriate, the SSA Safeguard Inventory spreadsheet.

| Note | The Document Management Center **does not** immediately image mail from SSA as some of the data is subject to safeguarding. All SSA responses are directly delivered by DMC in a sealed envelope to the SSA Data inbox in PSB. The SSA Coordinator quickly reviews the SSA responses and updates the SSA Request Inventory spreadsheet and SSA Safeguarded Data Inventory spreadsheet for receipt of data. The SSA Coordinator sorts the responses into safeguarded and non-safeguarded responses, and separates out non-IOD (PEAD) and STCD requests that are non-safeguarded. |
|---|---|

**7** If data is not safeguarded, return the SSA responses (except PEAD & STCD requests) to DMC for imaging, and entry to ScoRe. Update the SSA Request Inventory spreadsheet and move copy of Form 581, Authorization to Obtain Earnings Data From the Social Security Administration to the finalized binder. No further action is required by SSA Coordinator with respect to these requests. Send the PEAD & STCD requests to the respective department or division.

**8** If data is safeguarded: Contact initiator by e-mail and notify them that the results are in and available in Safeguard Room.

**9** Each month, review SSA Request Inventory spreadsheet for requests that have been outstanding for more than 60 business days. When requests are more than 60 business days old, send written inquiry for status to SSA.

**Request SSA Data**

## TP 26.3 Manage and Safeguard SSA Data

**09/26/2000**

Action Steps

| | |
|---|---|
| **Purpose** | Track all agency requests for data from SSA, and safeguard data in accordance with PBGC directives. |
| **Time Reporting (BMPRS)** | Safeguard IRS Documents<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Receipt of SSA information that must be safeguarded.<br>Request for safeguarded SSA information.<br>Notice that a participant (or beneficiary of a deceased participant) has authorized a request for SSA data that was previously only authorized by a PBGC official. |
| **Process Output and Recipient** | Proper safeguarding of SSA data, and maintenance of SSA Safeguard Data inventory spreadsheet.<br>Formerly safeguarded SSA information provided to DMC for imaging to IPS. |
| **Control Issues** | The SSA Data Safeguard room is managed in accordance with PBGC directives. The room includes direct terminal access for certain SSA data. Individuals may access safeguarded data only after receipt of training as outlined in PBGC's directives. Any work product (ex. spreadsheet, database, internal memo) that specifies the safeguarded data, **must also be safeguarded**, although that is not required for determinations made as a result of safeguarded information. |
| **Important Concepts** | SSA Coordinator makes the determination as to whether data must be safeguarded. Earnings information obtained from SSA without a participant's signature is subject to safeguarding. Other SSA data, whether received from direct online access or a mailed response, **is not** subject to safeguarding. See TP 26:Overview: SSA Data Requests Summary. Safeguarding requirements require close coordination between FBA staff and TPD staff when safeguarded earnings data is requested, as only HQ staff can access safeguarded information. Some safeguarded information may cease to require safeguarding if the participant's signature is later obtained. |
| **Guidance** | SSA Coordinator follow safeguarding procedures described in PBGC Directive's on Safeguarding of Tax Returns and/or Tax Return Information Disclosed by the IRS (IM 10-2) and Safeguarding of Information (IM 10-3). (Available in hard copy or from PBGC's intranet, see PBGC Directives from intranet home page). |
| **Procedure Owner** | SSA Coordinator, PSB |

TP 26.3 Action Steps: Manage and Safeguard SSA Data

# TP 26.3 Action Steps: Manage and Safeguard SSA Data

09/26/2000

## Checkout of Safeguarded SSA Information

1 Upon request by processing staff to access records, check out safeguarded SSA data to authorized staff.

2 Ensure requestor has received the necessary training provided by PBGC's Safeguard Officer.

## Change safeguarded status of SSA Information

1 Upon receipt of a properly completed Form 581, Authorization to Obtain Earnings Data From the Social Security Admin for an SSA data request with the participant's or beneficiary's signature that was previously authorized by a PBGC official, update the SSA Safeguard Inventory to indicate that the data is no longer safeguarded.

2 Submit the original Form 581, Authorization to Obtain Earnings Data From the Social Security Admin, **and** the SSA data to the DMC for imaging.

3 Update the SSA Request Inventory spreadsheet to indicate the original request (safeguarding applied) has been superceded, and that the data has been forwarded to DMC.

Note After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

*Form SSA-581 - Authorization to Obtain Earnings Data from the SSA*

*PBGC Form 262- Access Authorization for IRS Safeguarded Information*

*PBGC Form 273 - Debriefing for IRS Safeguarded Information*

*Plan Participation Information Request Letter (PRISM ALG 511)*

# TP 27. Run Personal Interest Conflict System (PICS)

TP 27: Overview

TP 27.1: Run Federal Employee PICS Cross Match

TP 27.2: Report Federal Employee PICS Cross Match Results and Secure Records

TP 27.3: Prepare Contract Employee PICS Memo

TP 27.4: Query IPS and Update PICS Inventory Report

Forms Letters Memos

## TP 27. Overview

**04/05/2002**

IOD maintains a Personal Interest Conflict System (PICS) that alerts PBGC to conflict of interest situations arising from a federal or contract employee's access to their own or, a relative's entitlement records in a trusteed plan. Through PICS, IOD secures the records to prevent the employee from accessing personal data. When a conflict of interest is identified, IOD will take action to secure the pertinent records and to restrict access to them. The participant's file **is not** imaged, and the paper participant file is kept secured in BPAB. Any imaged participant record established in IPS prior to the identification of a personal interest conflict is closed and may not be viewed by staff. Prevention of personal interest conflicts is managed by the PICS Coordinator in TSD/BPAB.

**Federal Employees:** The PICS Coordinator identifies any potential conflict of interest with federal employees through a quarterly cross match of personnel records against participant records. The results of this quarterly cross match is reported to all PBGC Department Managers and IOD Division Managers.

**IOD Contract Employees:** The contract Principals ensure that an employee with a personal interest conflict is identified and disclosed to the PICS Coordinator at the earliest possible date, and that all necessary action is taken to secure the contract PICS employee's records. Each quarter, the PICS Coordinator reminds contract Principals of their PICS responsibilities. IOD contract employees covered through this process include: IOD's FBAs, In-house Benefit Administration staff, contract auditors, contract actuaries, and contractors developing and/or maintaining PRISM and/or its ancilliary systems.

**Run Personal Interest Conflicts System**

## TP 27.1 Run Federal Employee PICS Cross Match 01/11/99

Action Steps

| | |
|---|---|
| **Purpose** | Identify all federal employees with a personal conflict of interest. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Human Resource Department (HRD) electronic report. Participant database (GENESIS). |
| **Process Output and Recipient** | Identification of current PBGC employees with personal interest conflicts. |
| **Control Issues** | Employees with personal interest conflicts are restricted from accessing or modifying their participant file (paper or IPS), or those of relatives. |
| **Important Concepts** | Employees are responsible for disclosure of conflicts of interest. PBGC also is proactive in its attempts to ensure adequate safeguards of data to prevent financial loss to the corporation. |
| **Guidance** | N/A |
| **Procedure Owner** | PICS Coordinator |

## Click here for more information...

TP 27.1 Action Steps: Run Federal Employee PICS Cross Match

**Run Personal Interest Conflicts System**

## TP 27.1 Action Steps: 06/09/2000
## Run Federal Employee PICS Cross Match

I. Within 30 days of each calendar quarter (12/31, 3/31, 6/30 and 9/30) , prepare and send a request to HRD for payroll database extract of employees (names and SSN and department/division identification), including all federal employees (full-time, part time, seasonal etc.).

II. HRD will provide report quickly, normally within 10 days of request. Make follow up request if no response within 14 days, and request firm date by which report can be prepared.

III. Upon receipt of file from HRD, run cross matching against participant database (GENESIS).

IV. Upon determination of matches (current PBGC employee listed as a participant in GENESIS), compare the federal employee cross match against the PICS Inventory Report (maintained and updated each quarter).

V. Verify continued existence of all previously reported cross matched PICS cases
– or –
resolve current status if former cases do not show up on current cross matched list.
(Example: Employee has terminated since last report date.)

VI. Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

# TP 27.2 Report Federal Employee PICS Cross Match Results and Secure Records 04/05/2002

Action Steps

| | |
|---|---|
| **Purpose** | Notify all PBGC Department Managers and IOD Division Managers of their employees with conflicts of interest. Request action to secure records as necessary. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Results of Federal Employee PICS Cross match. |
| **Process Output and Recipient** | Notify PBGC Management of federal employees with personal interest conflicts (PICS employees) or affected plans. Secure PICS employees participant records. |
| **Control Issues** | N/A |
| **Important Concepts** | PICS employees may be employed in any PBGC department. PICS participant paper records should only be secured in BPAB. Any PICS employee records created in IPS should be closed by the PICS Coordinator. |
| **Guidance** | N/A |
| **Procedure Owner** | PICS Coordinator, BPAB, PBGC Management |

## Click here for more information...

TP 27.2 Action Steps: Report Federal Employee PICS Cross Match Results and Secure Records

**Run Personal Interest Conflicts System**

## TP 27.2 Action Steps: 08/23/2002

## Report Federal Employee PICS Cross Match Results and Secure Records

**PICS Coordinator**

I. Prepare a memo to each PBGC Department Manager and IOD Division Manager, providing quarterly Federal Employee PICS Cross Match results.

- If manager has no personal interest conflicts (participants or plans), inform them of the results (no matches).
- If manager has previously identified PICS employees, inform the manager of the previously identified situation, and provide confirmation that participant(s) paper folder(s) remains secured in BPAB (based on most recent PICS Inventory Report), and no further action is required with respect to the identified PICS employee.
- If a manager has one or more employees or plans that have newly identified PICS employees, identify the participant and/or case to manager. Inform manager that the participant's paper file must be forwarded to BPAB, as soon as possible (preferably no later than 3 business days) or, if no paper file exists, a written statement to that effect must be forwarded within the same time frame to the PICS Coordinator.

**10** Send Federal Employee PICS Cross Match results memo. Provide copy of memo to BPAB Chief.

**11** Monitor receipt of all participant files. Follow up after 10 days from the date of the memo for any files (or statements) not received.

**12** If any responses are outstanding after two weeks from date of memo notify BPAB Chief and TSD Manager of status.

**13** Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

Run Personal Interest Conflicts System

## TP 27.3 Prepare Contract Employee PICS Memo 04/05/2002

Action Steps

| | |
|---|---|
| **Purpose** | Identify IOD's relevant contract staff with personal conflicts of interest. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Current PICS Inventory Report. |
| **Process Output and Recipient** | Identification of current IOD relevant contract employees with personal interest conflicts (PICS employees) and affected plans. Secure PICS Employees' participant records. |
| **Control Issues** | Employees with personal interest conflicts are restricted from accessing or modifying their personal file (paper or IPS), or those of relatives. |
| **Important Concepts** | PBGC does not maintain personnel records (names, SSNs) for each employee of a contractor. Disclosure of conflicts of interest should be made by the contract Principal to the PICS Coordinator when first recognized. New contract employees are required to complete a Conflict of Interest Statement and Recusal Form which must be filed with the PICS Coordinator ***within two weeks of their hire date***. PBGC is proactive in its attempts to ensure adequate safeguards of data to prevent financial loss to the corporation. Any PICS employee records created in IPS should be closed by the PICS Coordinator. |
| **Guidance** | N/A |
| **Procedure Owner** | PICS Coordinator, Contract Principals |

### Click here for more information...

TP 27.3 Action Steps: Prepare Contract Employee PICS Memo

**Run Personal Interest Conflicts System**

## TP 27.3 Action Steps: 04/05/2002
## Prepare Contract Employee PICS Memo

**PICS Coordinator**

1 Within 30 days of review the end of each calendar quarter (12/31, 3/31, 6/30 and 9/30), review of the prior quarter's PICS Inventory Report.

2 Prepare the Quarterly Contract Employee PICS Memo. Include in or with the memo:
- Basic Information about PICS.
- Copy of the PICS Inventory Report - applicable portion for each Contractor.
- Copy of Conflict of Interest Statement and Recusal Form.
- Description of IOD's Contract Principals' and contract employees' obligations under PICS.

   a Ensure each employee has signed, or signs a Conflict of Interest Statement and Recusal Form (within 2 weeks of date of hire), and forwards signed form to PICS Coordinator.

   b Provide to the PICS Coordinator all paper participant file material for employees listed on the PICS Inventory Report.

   c Once a PICS contract employee is identified, within 2 weeks forward to PICS Coordinator the participant paper file, if any. If no paper file exists, provide written statement (e-mail is acceptable) to PICS Coordinator of the newly determined PICS employee and confirm that no paper file exists.

   d Respond (e-mail) within 2 weeks to the Contract Employee PICS Memo identifying any new PICS contract employees (separately forwarding the paper participant records) or verifying that no new PICS contract employees have been identified.

   e If a PICS Employee terminates employment, notify the PICS Coordinator within **2 weeks**

3 Prepare memo and distribute by e-mail and provide each contract office their current PICS Employee listing. Provides copies to BPAB Chief and relevant COTRs

4 Monitor responses to memo. After 10 days, send e-mail to each non-respondent Contract Principal *and COTR* notifying them that no response has been received. Provide response deadline again (14th day after date of memo). Copy BPAB Chief and TSD Manager.

5 Following two week period, report any non-respondent contract groups to BPAB Chief and TSD Manager.

6 Refer to the Workflow diagram at the beginning of this technical procedure to determine the next action.

**Run Personal Interest Conflicts System**

## TP 27.4 Query IPS and Update PICS Inventory Report 04/05/2002

Action Steps

| | |
|---|---|
| **Purpose** | Ensure all PICS records are secured. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Results of Federal Employee Cross match. Responses from Contract Principals to the Quarterly Contract Employee PICS Memo. IPS records. Prior quarter's PICS Inventory Report. |
| **Process Output and Recipient** | Participant IPS records are secured. Updated PICS Inventory Report. |
| **Control Issues** | N/A |
| **Important Concepts** | PICS employees (federal or contract) paper records are secured by PICS Coordinator. IPS records for PICS employees should be compared against the content of the paper file. IPS records should be periodically queried to ensure that additional PICS employee records have not been imaged, or if imaged have been closed. Thus, the records may be re-activated if the PICS employee situation changes and the participant records are no longer required to be secured. The PICS Coordinator may directly close records in IPS. |
| **Guidance** | N/A |
| **Procedure Owner** | BPAB, IPS Reindex Team |

### Click here for more information...

TP 27.4 Action Steps: Query IPS and Update PICS Inventory Report

**Run Personal Interest Conflicts System**

## TP 27.4 Action Steps: 04/05/2002
## Query IPS and Update PICS Inventory Report

I. Verify that all PICS paper files identified as secured in BPAB on prior quarter's PICS Inventory Report are still secured. Follow up on any discrepancies.

II. Compile list of newly identified PICS employees, from Contract Principals' responses and Federal Employee PICS Cross Match results.

III. Update prior quarter's PICS Inventory Report with newly identified PICS employees (federal and contract). Document whether or not paper files exist and the date paper participant files were received.

IV. Query IPS for all newly identified PICS employees. Compare the contents of paper file against IPS participant records.

V. If any records are on IPS but not in the paper participant file, print these documents.

VI. Once the paper participant file includes copies of all IPS participant information, "close" these records from IPS.

VII. If and when an individual ceases to be a PICS employee, request that their IPS records be reactivated. Prepare the *IPS Plan and Participant File Correction Form (Ips-chg.doc)*, and submit to the IPS Reindex Team for processing.

## TP 27.5 Forms, Letters, Memos, etc.

09/04/98

Note After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

# TP 28. Authorize Financial & Non-Financial Transactions through PRISM

TP 28. Overview

TP 28. Overview: Authorizable Electronic Transactions

TP 28. Overview: Authorization Levels Table

TP 28.1 Initiate Authorizable Electronic Transactions

TP 28.2 Authorize or Reject Electronic Transaction

TP 28.3 Request Temporary PRISM Authorizer

TP 28.4 Request Targeted PRISM Authorizer (Inclusions)

TP 28.5 Confirm PRISM Authorizers/Levels

 Forms, Letters, Memos, etc.

## TP 28. Overview

**05/13/2005**

Authorization is the final step in the transmission of new or changed payee records to SSC. Through authorization, necessary controls are provided as a second person (often of higher level) reviews and approves a change or a new payee record. In this technical procedure, authorization of electronic transactions is described. There are other data changes (manual changes) that may require approval of a second party and are not handled through PRISM.

The electronic transactions that must be authorized through PRISM before transmission to PLUS at SSC include financial and non-financial transactions. All additions or changes made in PRISM Benefits are considered financial and require authorization. Changes made in PRISM Customer (such as change to SSN or name) are examples of non-financial transactions that require authorization. Deaths are recorded in PRISM Customer, but are considered financial transactions and require authorization.

Some authorizable transactions must be "'forwarded" by the initiator using the FORWARD button in PRISM Benefits. Other transactions are self-forwarding, meaning they are automatically forwarded by PRISM to the queue of an authorizer to approve or reject a transaction using PRISM Authorizer. Transactions that require authorization are described in Overview - Authorizable Electronic Transactions Table.

There are 5 authorization levels, described in TP 28: Overview - Authorization Levels Table. PRISM assigns each transaction to an authorizer of the appropriate level who is part of the case team. These assignments are done randomly amongst the available authorizers. Some cases may have a limited number of targeted authorizers available for a plan - at least two at levels 1, 2 and 3. These cases are determined by management and established through a request to the PRISM Access and Authorization Administrator (BPAB/TSD).

Each PRISM authorizer is responsible for ensuring adequate coverage (back up) during absences or other times of unavailability, particularly if scheduled close to or through the relevant financial cut-off date. Requests for a temporary PRISM authorizer are forwarded to the PRISM Access and Authorization Administrator (RSD) for assignment.

Changes to a payee's home or bank address and federal tax withholding are examples of transactions that are self-forwarding and **do not** require authorization. They are not described in this procedure. For information about address changes, see TP 04: Process Address Changes. These changes are automatically sent to the queue of transactions for monthly transmission to PLUS at SSC.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28. Overview: Authorizable Electronic Transactions

**08/31/2001**

| Action Type | PRISM Application Used | Transaction Type | Initiator Forwards or Self-Forwarding |
|---|---|---|---|
| **SSN Change** -1- | Customer | Non-Financial | Self Forwarding |
| **Name Change** -1- | Customer | Non-Financial | Self Forwarding |
| **DOD Input** | Customer | Financial | Self Forwarding |
| (see TP 05: Process Deaths) | | | |
| **New Payee into Pay** | Benefits | Financial | Initiator Forwards |
| (see TP 20: Put New Payee into Pay) | | | |
| **Other Benefit Related Change** | Benefits | Financial | Initiator Forwards |
| (see TP 21: Change Benefit/ Payment Amount) | | | |
| **Estimated to Guaranteed** | Benefits | Financial | Initiator Forwards |
| (see TP 21: Change Benefit/ Payment Amount) | | | |
| **New EDD** | Forms & Benefits | Financial | Initiator Forwards |
| (see TP 04:2 Make or Change EDD Election) | | | |
| **Any other payment destination** | Forms & Benefits | Financial | Initiator Forwards |
| (see TP 04: Process Address Changes) | | | |

-1 Changes to a customer's social security number or name in PRISM may be made by a PLS/PBA or FBA in response to new or updated information received at PBGC, or after identification of an error in PRISM vs. documentation in IPS.
If notice of the "correct" name or SSN is first received by phone (CSC routes these calls to phone POCs for processing) and the information is not supported by existing documentation in IPS, the POC requests that the customer provide supporting documentation for PBGC's records. Once the supporting documentation (e.g. a copy of a Social Security card) is received, the POC updates PRISM. **In all cases, IPS will have documentation supporting the name or SSN in PRISM.**

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.1 Initiate Authorizable Electronic Transactions 05/13/2005

Action Steps

| | |
|---|---|
| **Purpose** | Ensure completed electronic transactions are implemented in PRISM through the authorization process. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Ensure that the submitted transaction is complete and accurate. Provide supporting documentation to the authorizer, if requested. Documents are available to validate the authorization (IPS). |
| **Process Output and Recipient** | Supporting document provided to authorizer, as necessary. Approval will result in the implementation of the transaction. Rejection will require follow-up and corrective action. |
| **Control Issues** | Verification of all data before authorization to maintain PBGC's control & auditing standards. |
| **Important Concepts** | Level 5 transactions require preparation of memo supporting the change. The memo requires review and approval by Division Management prior to forwarding transaction in PRISM for authorization at the BAPD Director or Deputy Director Level, so that the memo is received coincident with receipt of the transaction for authorization. Ensure transactions are forwarded sufficiently in advance of the cut-off date for the appropriate check cycle to ensure processing. If initiator notes a problem with a transaction, alert the authorizer to reject the transaction so the necessary change may be made and the transaction may be re-forwarded for timely authorization. |
| **Guidance** | Check Schedule Key Dates<br>PRISM Training/Users Manual |
| **Procedure Owner** | PLS, PBA, FBA |

### Click here for more information...

TP 28.1 Action Steps: Initiate Authorizable Electronic Transaction

## TP 28.1 Action Steps: 03/05/99
## Initiate Authorizable Electronic Transaction

1 Review transaction and determine correct authorization level, see TP 28: Overview - Authorization Levels Table. Consult check schedule to determine appropriate cut-off date for the applicable month and transaction type.

2 Prepare any supporting required documentation for authorizer:

- If transaction is an authorization level 5, prepare *Level 5 Authorization Memo (Lev5auth.doc)* summarizing the reasons for the transaction.

**Note** Submit this memo to TPD Management for concurrence prior to forwarding transaction on PRISM for authorization by the Level 5 authorizer.

- If transaction is at authorization levels 1 through 4, prepare any supporting documentation required by TPD's management. Consult with TPD Management for specifics on supporting documentation requirements - may include hard copies of back up material or special folder in IPS (if this feature is available at the initiator's location).

3 Query PRISM Observer to determine assigned authorizer, and follow up with authorizer, if necessary, to ensure transaction is authorized before the cut-off date.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.2 Authorize or Reject Electronic Transaction 05/13/2005

Action Steps

| | |
|---|---|
| **Purpose** | To review and approve or reject changes to payee records in PRISM. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Use PRISM Browser for information on transaction and participant's file (IPS) for supporting documentation. The initiator should also provide the authorizer with supporting documentation. |
| **Process Output and Recipient** | Approved (authorized) transaction transmitted to SSC. Rejected transaction returned to the initiator. |
| **Control Issues** | Careful review to assure quality service to the payee and to maintain PBGC's auditing and internal controls. |
| **Important Concepts** | Authorize transactions prior to cut-off date for the monthly check cycle. |
| **Guidance** | Check Schedule Key Dates<br>PRISM Training/Users Manual |
| **Procedure Owner** | Authorizer (see TP 28: Overview Authorization Levels Table) (PBA, PLS, Team Leader, Division Managers & Associate Managers, BAPD Deputy Director, BAPD Director) |

### Click here for more information....

TP 28.2 Action Steps: Authorize or Reject Transaction

## TP 28.2 Action Steps: 08/25/2000
## Authorize or Reject Electronic Transaction

I. Review record submitted to verify correct data and processing. Use PRISM applications, IPS and any supporting documentation submitted by initiator. Level 5 authorizations are always accompanied by the *Level 5 Authorization Memo (Lev5auth.doc).*

II. Contact initiator with any questions about transaction.

III. Take action:

- If transaction is correct, authorize it in PRISM.
- If transaction is not correct, reject it in PRISM. Notify the initiator by e-mail that the transaction has been rejected and why.

**Note** If a transaction requires modification it must be rejected, so that the initiator may make the necessary modifications. Once modified the transaction is resubmitted for authorization. Authorizers may not modify transactions, only approve or reject them.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.3 Request Temporary PRISM Authorizer

**05/13/2005**

Action Steps

| | |
|---|---|
| **Purpose** | Ensure that PRISM authorizers have temporary backups as needed, so that our customers' PRISM transactions are timely authorized. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that a PRISM Authorizer requires backup, request sent to PRISM Access and Authorization Administrator (RSD) (with notice to TPD or FBA managers as appropriate). |
| **Process Output and Recipient** | Temporary PRISM Authorizer assigned by PRISM Access and Authorization Administrator (RSD). |
| **Control Issues** | A temporary authorizer must meet the criteria established in TP 28 Overview: Authorization Levels Table. Assignment as a temporary authorizer does not permit a user to authorize transactions that they initiated. |
| **Important Concepts** | Authorizers absent during critical periods of the check cycle should request that the PRISM Access and Authorization Administrator (RSD) assign a temporary authorizer. Ensure the e-mail request sent to the PRISM Access and Authorization Administrator requesting assignment of a temporary authorizer is sent by, or copied to all three relevant parties: permanent authorizer, temporary authorizer, and a manager. |
| **Guidance** | Check Schedule Key Dates<br>PRISM Training/Users Manual |
| **Procedure Owner** | Authorizer (see TP 28 Overview: Authorization Levels Table)<br>(PBA, PLS, Team Leader, Division Managers & Associate Managers, BAPD Deputy Director, BAPD Director)<br>PRISM Access and Authorization Administrator (RSD) |

## Click here for more information

TP 28.3 Action Steps: Request Temporary PRISM Authorizer

## TP 28.3 Action Steps: 05/13/2005

## Request Temporary PRISM Authorizer

I. Once an authorizer determines that they will not be available (ex. due to scheduled absence, travel etc.), prepare an e-mail to the PRISM Access and Authorization Administrator (RSD).

The e-mail should specify:

- Name of Permanent Authorizer
- Name of Temporary Authorizer
- Effective begin date
- Effective end date
- Confirmation that the Temporary Authorizer meets the appropriate authorization level criteria, or request exception to criteria.

The e-mail should be sent by or copied to:

- Permanent Authorizer
- Temporary Authorizer
- Division Management Team Member, or FBA Supervisor/ Manager (FBA)

**14** The PRISM Access and Authorization Administrator sends an e-mail response (to the same three) confirming he established the temporary authorizer in PRISM.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.4 Request Targeted PRISM Authorizer (Inclusions) 05/13/2005

Action Steps

| | |
|---|---|
| **Purpose** | Establish case specific PRISM authorizers, as needed, so that our customers' PRISM transactions are efficiently authorized by knowledgeable staff. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>PBA Administer Benefits<br>FBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination by management that a case requires targeted authorizers for PRISM transactions. Request sent to PRISM Access and Authorization Administrator (RSD). |
| **Process Output and Recipient** | Assignment of the requested targeted PRISM authorizers by PRISM Access and Authorization Administrator (RSD). |
| **Control Issues** | Targeted PRISM authorizers may be assigned for levels 1, 2 and 3. The individuals **must** meet the criteria established in TP 28 Overview: Authorization Levels Table, and a plan must have **at least 2** targeted authorizers at each level.<br>RSD periodically performs queries to verify that the plans have at least 2 individuals named at the first three levels. |
| **Important Concepts** | Targeted PRISM Authorizers are used on specific cases when management has determined it advisable to assign staff that are familiar with plan specifics. |
| **Guidance** | Check Schedule Key Dates<br>PRISM Training/Users Manual |
| **Procedure Owner** | TPD or FBA Management<br>PRISM Access and Authorization Administrator (RSD) |

## Click here for more information

TP 28.4 Action Steps: Request Targeted PRISM Authorizer (Inclusions)

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.4 Action Steps: 05/13/2005
## Request Targeted PRISM Authorizer (Inclusions)

**Management Team Member or FBA Manager/ Supervisor/Team Leader**

1 Prepare e-mail request to the PRISM Access and Authorization Administrator (RSD). The e-mail should specify:

- Case name
- Case number
- Names of targeted authorizers and authorization levels

**Prism Access And Authorization Administrator**

2 Review e-mail and ensure:

- Request is from appropriate management levels
- Authorizers meet criteria in T.P. 28 Overview: Authorization Levels Table
- At least 2 authorizers are identified for each level

3 After implementing request, send e-mail response to requestor (and cc: newly assigned targeted PRISM authorizers) confirming that the requested action has been implemented.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.5 Confirm PRISM Authorizers/Levels

**05/13/2005**

Action Steps

| | |
|---|---|
| **Purpose** | Verify the authorization levels for all types of PRISM Authorizers are appropriate as outlined in the TP 28. Overview: Authorization Levels Table. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | A list of every PRISM authorizer by name, user id, their maximum authorization level and type, organization and job title from Genesis. |
| **Process Output and Recipient** | Verification that all PRISM authorizers meet the established criteria for their assigned levels. |
| **Control Issues** | To ensure adequate separation of duties, the PRISM Access and Authorization Administrators **do not** participate in running the authorizers listing, or verifying same, they only implement the changes provided to them. |
| **Important Concepts** | Include **all** PRISM Authorizers in confirmation process, including but not limited to Regular; Auto-Authorizers; Temporary; Targeted (Inclusions) and Queue Monitors. The manager for each listed authorizer confirms and validates the assigned level. A Prism Authorizer may have multiple types of Authorization responsibilities. For example, someone may simultaneously be a Regular PRISM Authorizer, a temporary Authorizer, a targeted Authorizer and a Queue Monitor. The level for each type must be confirmed or corrected in this process.<br><br>**Timing:** Authorization confirmations are conducted quarterly by the 7th calendar day of each quarter. BAPD Management and FBA Principals respond within 7 calendar days of receipt of the listing. The PRISM Access and Authorization Administrator implements authorization level changes within 3 workdays of receipt. The Quarterly Authorization Confirmation Summary Report is submitted to the RSD Manager by the 30th calendar day of the quarter. |
| **Guidance** | n/a |
| **Procedure Owner** | PLS Advocates (RSD), PRISM Access and Authorization Administrator |

## Click Here for More Information...

28.5 Action Steps: Confirm PRISM Authorizers/Levels

## TP 28.5 Action Steps: 05/13/2005
## Change Confirm PRISM Authorizers/Levels

### PLS Advocate

1 Obtain a list of all PRISM authorizers. Ensure list includes all types of PRISM authorizers:
- Permanent,
- Temporary,
- Targeted,
- Queue monitors,
- And any others.

2 By 7th day of the quarter, sort and separate report (spreadsheet) by BAPD Divisions and FBA. Prepare the "Prism Authorizer Quarterly Confirmation" e-mail and send (by e-mail) to all Division Managers, and FBA principals, requesting that they validate or correct all listed authorizers within 7 calendar days. Include by cc, the BPB Chief (all messages) and FBA COTRs for their respective FBAs.

3 Monitor responses to message. After 5 calendar days, send e-mail reminder to each non-respondent Division Manager or Contract Principal (and COTR) of deadline to respond (7 days from first notice) and that no response has been received. Copy BPB Chief and RSD Manager.

4 After 7 calendar days, report any non-respondent Division Manager or Contract Principal (and COTR) to BPB Chief and RSD Manager for appropriate action.

5 Forward each authorization level change request immediately upon receipt to the PRISM Access and Authorization Administrator requesting that the change be implemented to the PRISM Authorization structure.

6 Prepare Quarterly Authorization Confirmation Summary Report to the RSD Manager (cc BPB Manager, and PRISM Access and Authorization Administrator). Report summarizes the confirmation process followed and lists any outstanding non-respondents, and describes all changes.

### PRISM Access and Authorization Administrator

7 Implement authorization level change requests within 3 workdays of receipt.

8 Confirm to the PLS Advocate (and responding BAPD Manager or FBA Principal) that the change has been made.

**Authorize Financial & Non-Financial Transactions through PRISM**

## TP 28.6 Forms, Letters, Memos, etc.

**03/08/2002**

Note After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

***Level 5 Authorization Memo***
Lev5auth.doc

# TP 29. Request Off-Cycle Payment

TP 29. Overview

TP 29.1 Determine Need for Off-Cycle Payment Request

TP 29.2 Approve/Disapprove Off-Cycle Payment Request

TP 29.3 Track Off-Cycle Payment Requests

 Forms, Letters, Memos, etc.

# TP 29. Overview

**11/07/2000**

Benefit payments are processed through PRISM, according to the monthly check cycle. These payment requests are electronically transmitted each month from PBGC to PLUS at SSC. TPD and FBA staff are responsible for timely and accurate entry and authorization of participant information in PRISM following the check cycle deadlines, so that proper participant payments are made timely. See TP 20: Put New Payee into Pay Status, TP 21: Change Benefit Payment Amount and TP 28: Authorize Financial & Non-Financial Transactions through PRISM for information about payments made following the monthly check cycle.

Occasionally, a participant will not receive an expected payment. When this occurs, the TPD or FBA determines the reason for the non payment and takes action to correct the situation. If a payment is missed, PBGC will request that SSC issue a payment outside the normal monthly check cycle, referred to as an off-cycle check or payment.

An off-cycle payment can be:

- A monthly or annual annuity
- A special payment for back payments
- A lump sum payment

An off-cycle payment is requested when non-payment occurs due to either of the following reasons:

- **System issue**. A payment transaction failed in PRISM or there was an error or technical problem in the transmission process to the PLUS system;

  — or —

- **Processing issue unrelated to systems.** An expected payment was not processed before the cut-off date and an off-cycle payment is necessary to meet our commitment to the customer(s).

In all cases, the customer record is established in PRISM (if not done previously), then the TPD or FBA prepares the Off-Cycle Payment Request and submits it with supporting documentation directly to TSD for approval. The FBA forwards a copy of the request to the TPD DM and the plan's contract monitor at the same time the original is forwarded to TSD. The TPD DM will contact TSD directly if it is determined that the FBA's request should be returned, and TSD returns the unprocessed request to the TPD. TSD reviews all requests weekly, and records all action taken, approved, disapproved, or returned to TPD. Approved requests are forwarded to SSC. Disapproved requests are returned to the requesting Division or FBA Manager.

Technical Procedures

**Request Off-Cycle Payment**

## TP 29.1 Determine Need for Off-Cycle Payment Request 02/17/2004

Action Steps

| | |
|---|---|
| **Purpose** | Determine reason expected payment was not made through PRISM. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Non payment of expected payment. Knowledge and/or documentation of payee's situation or system issues for failed payment. |
| **Process Output and Recipient** | Off-cycle payment request with supporting documentation to TSD. |
| **Control Issues** | The customer record must be fully established in PRISM prior to submitting an Off-Cycle Payment Request. For an annuity payment, establish an annuity record using PRISM Benefits with payments scheduled as of the next available payment date. (This ensures the customer receives the expected first payment through an off-cycle check, and thereafter receives all expected annuity payments.) For a lump sum payment, create a customer record only. |
| **Important Concepts** | PRISM team provides written verification that the electronic process failed and a recommendation for an off-cycle payment request. TSD returns a disapproved request to the Division or FBA Manager. Most FBA requests are sent directly to TSD (subject to the authorization levels, See TP 28: Overview: Authorization Levels Table). TSD processes the requests unless TPD DM notifies TSD to return the request to the TPD. Do not forward off-cycle payment requests to TSD for approval that would result in payment materially earlier than the original expected payment date.<br><br>**Weekly Schedule:** Tuesday noon is the deadline to submit off-cycle payment requests to TSD Manager for payment that week, and for a TPD DM to ask TSD to return (not process) a request from an FBA. TSD sends approved Off-Cycle Payment Request Memoranda to SSC in Tuesday's overnight mail and forwards authorized data entry forms to DMC, Washington, DC, Attention: BPAB Manual Collection Box.<br><br>BPAB collects all manual data entry forms from the BPAB Manual Collection Box in the DMC, Washington. BPAB staff inputs the data from manual forms into NBX. |
| **Guidance** | IOD Policy Bulletin 97-7<br>Check Schedule Key Dates |
| **Procedure Owner** | PLS, PBA, FBA, Division Management |

**Click here for more information:**

TP 29.1: Action Steps: Determine Need for Off-Cycle Payment

# TP 29.1 Action Steps: Determine Need to Request Off-Cycle Payment

02/17/2004

## PLS, PBA, FBA

1 Query PRISM Browser to verify that a customer record has been established, and screen 202 (ledger) to verify that the payment has not been made or is not scheduled to be made on the correct date (for lump sum payments) or on the correct beginning date (for annuities). Use PRISM Tickler to determine whether a payment has been authorized.

2 Determine whether reason for non-payment is due to system issues (PRISM, transmission to PLUS), or a processing issue unrelated to systems (payment not authorized by cut-off date). The next few steps may be inapplicable for non-payments due to system issues, if the system issues cannot be resolved in a reasonable period of time.

3 If the reason is a system issue related to PRISM or transmission to PLUS, contact the Data Correction Team (TSD) and determine whether issues can be resolved in time for expected payment date. If not, the Data Correction team sends e-mail recommendation to initiator stating that it is necessary to request an off-cycle payment.

4 For annuity payments, establish an annuity payment in PRISM following Technical Procedure 20: Put New Payee into Pay Status, and Technical Procedure 28: Authorize Financial & Non-Financial Transactions through PRISM. The BEGIN date will be the first available payment date after the missed payment, automatically determined by PRISM Benefits.

**Example:** Payments should begin 2/1, but are not on ledger. Establish 3/1 as the beginning date for the annuity payment.

5 Verify payment is authorized.

6 Prepare an *Off-Cycle Payment Request Memo (Offcyreq.doc)* for the off-cycle payment, and detail the reason for non-payment. Complete the required data entry form(s) manually or electronically in WORD and attach supporting documentation. A complete request may include:

- E-mail from Data Correction Team indicating system issue could not be resolved and off-cycle payment is required
- Screen prints from PRISM (ledger and customer record)
- Special Check, PBGC Form 490
- Lump Sum Check, PBGC Form 491 and/or
- Annuity Check, PBGC Form 487

**Note** Complete PBGC Monthly Benefits Adds and Updates, PBGC Form 487, **only** for the missed annuity payment. Subsequent annuity benefits will already be authorized in PRISM unless there are exceptional continued system problems that prevent the payment, in which case additional off-cycles may be required until the problem is resolved.

7 Submit to TPD or FBA Management for signature. Ensure that the manual data entry form(s) with original signature(s) are provided to TSD Manager.

| | |
|---|---|
| **Note** | For FBA requests:<br>• If the dollar amount of request is up to authorization level 2 (FBA Manager), forward one original and two copies directly to TSD. Also, send copies of the request and attachments to the TPD DM and the plan's contract monitor.<br>• If the dollar amount of the request is above authorization level 2 (FBA Manager), forward the original with attachments to the TPD DM. The TPD DM will sign and forward the original with two copies directly to TSD. |

**TPD or FBA Managers**

8 Review Off-Cycle Payment Request and supporting documentation to ensure the request is complete and correct. If yes, sign request and forward original and two copies to the off-cycle check request inbox in TSD, room 7116. If no, return request to staff (PLS, PBA, FBA that prepared the request) for processing.

| | |
|---|---|
| **Note** | The TSD Manager and other designees in TSD must approve off-cycle requests before the transaction data are entered into NBX. |

Technical Procedures

**Request Off-Cycle Payment**

# TP 29.2 Review and Approve/Disapprove Request For Off-Cycle Payment

**02/17/2004**

Action Steps

| | |
|---|---|
| **Purpose** | Review request and approve or disapprove off-cycle payment request. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Off-Cycle Payment Request and supporting documentation from TPD or FBA. |
| **Process Output and Recipient** | Approved request forwarded to SSC to issue payment to the payee. Disapproved request returned to TPD or FBA with explanation. |
| **Control Issues** | TSD tracks all off-cycle payment requests, approved, disapproved, or returned to TPD.<br>BPAB performs quality control by comparing data entered in NBX with approved data on manual data entry forms to rule out NBX data input errors. |
| **Important Concepts** | The TSD Manager and other designees in TSD are the only signatures SSC accepts for off-cycle payment requests. The requesting Division is responsible for imaging the request after approval or disapproval by TSD.<br>**Weekly Schedule:** Tuesday noon is the deadline to submit off-cycle payment requests to TSD Manager for payment that week, and for a TPD DM to ask TSD to return (not process) a request from an FBA. TSD sends approved Off-Cycle Payment Request Memoranda to SSC in Tuesday's overnight mail and forwards authorized data entry forms to DMC, Washington, DC, Attention: BPAB Manual Collection Box. |
| **Guidance** | N/A |
| **Procedure Owner** | TSD, TPD, FBA |

## Click here for more information

TP 29.2 Action Steps: Review and Approve/Disapprove Request For Off-Cycle

**Request Off-Cycle Payment**

## TP 29.2 Action Steps: 02/17/2004

## Review and Approve/Disapprove Request For Off-Cycle Payment

### TSD

1 Review Off-Cycle Payment Request and supporting documentation, if any, to ensure complete information and explanation is provided. Verify that a customer record has been established (supporting document will include screen prints), and verify the payment has not been made or is not scheduled to be made using PRISM Browser and the Ledger Payment Error Log (provided by BPAB). For annuities, verify that the future stream of payment has been authorized.

2 Contact requesting division or FBA if request is incomplete or more information is needed (Example – incomplete forms). Determine whether to approve or disapprove off-cycle payment request. (Note: Requests are disapproved if it is determined no longer necessary, as the payment was made or is scheduled to be made on the expected payment date.)

3 If request is disapproved, initial and date original and both copies, and indicate disapproved. Return original to requesting Division, keep one copy for TSD, and discard third copy.

4 If the request is approved, initial and date original and both copies, and indicate approved. Place approved Off-Cycle Payment Request Memoranda in SSC inbox to be mailed overnight and forward authorized data entry forms to DMC, Washington, DC, Attention: BPAB Manual Collection Box.

5 **FBA request only** - if TPD asks that the request be pulled and not be processed, initial and date both copies, indicate returned unprocessed to TPD at their request . Forward the original to TPD, keep one copy for TSD, and return third copy to FBA. (This ensures the FBA is aware TSD did not process the off-cycle payment request.)

### TPD or FBA

6 Upon receipt of an approved Off-Cycle Payment Request, confirm to the customer the expected benefit amount(s) and date(s) in writing (ALGS 300 or 500 series) or by telephone documented to CCN. See TP 31.2 Document Outgoing Telephone Call. For customers with continuing annuity payments (must be authorized prior to submitting Off-Cycle Request), confirm the annuity as well.

7 Upon receipt of approved or disapproved Off-Cycle Payment Request from TSD, ensure that it is imaged with supporting documentation to the participant file (IPS). The FBA is responsible for imaging an FBA request that TSD returns unprocessed to the TPD.

### TSD/BPAB

8 Collect all off-cycle data entry forms from the BPAB Manual Collection Box in DMC.

9 Enter data from manual forms into NBX.

10 Compare NBX data with manual forms to rule out input errors.

11 Conduct quality review/audit of data entered into NBX.

12 Transmit off-cycle file to SSC weekly on Tuesday.

**Request Off-Cycle Payment**

## TP 29.3 Track Off-Cycle Payments and Requests 02/18/2005

Action Steps

| | |
|---|---|
| **Purpose** | Track all off-cycle payment requests to facilitate management reporting and planning. Ensure that all approved off-cycle payment requests are made. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Off-Cycle Payment Requests. |
| **Process Output and Recipient** | Updated PRISM Off-Cycle Check. Monthly notification to MCU by e-mail of all approved off-cycle payment requests. |
| **Control Issues** | PBGC's internal and management controls require accurate and timely input of all off-cycle payment requests in PRISM Off-cycle Check. The availability of data pertaining to off-cycle requests is necessary for post payment balancing. |
| **Important Concepts** | PRISM Off-cycle Check is a PRISM application to store data on all off-cycle payment requests. RSD updates Off-cycle Check weekly and provides management reports as requested. RSD also maintains a temporary file (purged periodically) of its copies of all requests. |
| **Guidance** | PRISM Off-Cycle Check User Manual |
| **Procedure Owner** | RSD |

## Click here for more information

TP 29.3 Action Steps: Track Off-Cycle Payments and Requests

## TP 29.3 Action Steps: 11/07/2000

## Track Off-Cycle Payments and Requests

I. Each week, update PRISM Off-Cycle Check with all approved off-cycle payment requests. The required data entry input fields are:

- Participant's SSN
- Participant's first and last name
- Participant's plan number and plan name (selected from drop-down menu)
- Amount of requested payment
- Date TSD received the Off-cycle Payment Request Memo
- Name of person submitting the request
- Name of originating TPD/FBA
- Name of originating TPD/FBA Manager
- Payment type (selected from drop-down menu - annuity, special, lump sum)
- Approver's name
- Date of approval
- Target date that the paying agent will make the payment

**15** Input information (same as in 1, except for the final three bullet points) for disapproved requests and also in the following:

- Date Off-cycle Payment Request is returned to originator
- Comments on the reason for the rejection of the Off-cycle Payment Request

**16** After the monthly ledger load, use PRISM Browser, screen 202, to determine whether approved off-cycle payments were made for the correct amounts and dates. Update PRISM Off-Cycle Check with findings, including any discrepancies between expected payment amount and date, or expected payment not made. If an expected payment is not reflected on the ledger, check with the Reconciliation Administrator, BPAB, if the payment is in the Ledger Payment Error Log. If the payment is not there, follow up with SSC and advise the requesting TPD/FBA of the findings.

**17** Update the record in PRISM Off-Cycle Check with changes necessary as a result of any follow-up action that the TPD/FBA takes, and add the reasons for the changes in the comment area.

**18** Provide to MCU monthly by e-mail the number of approved off-cycle payment requests forwarded to SSC.

**19** Provide information on off-cycle payment requests on an ad hoc basis.

## TP 29.4 Forms, Letters, Memos, etc.

02/17/2004

# TP 30. Reconcile Funding

TP 30. Overview

TP 30.1 Reconcile Funding to SSC with Actual Payments

Forms, Letters, Memos, etc.

# TP 30. Overview

**06/18/2004**

## Background

IOD, in fulfilling its mission to pay pension benefits, contracted with State Street Corporation to be its paying agent. IOD staff uses the PRISM suite of applications to store information on participants, beneficiaries and alternate payees, and to place them in pay status upon eligibility for payment. SSC uses the PLUS system to store authorized payees' records, and to perform the actual payment functions.

IOD processes benefit payments according to the monthly check schedule. This means that putting new payees into pay and adjustments to payments and related transactions are entered and authorized in PRISM by the scheduled cut-off date. The authorized transactions are transmitted from PRISM to PLUS. SSC acknowledges the transmitted files, and after necessary intermediate actions such as sending to TSD an error file and receiving corrections thereafter, SSC does the monthly check run. This acknowledgment process applies to all check runs including lump-sums, SIDs, etc. The check run creates the Participant Payment Report (PPR) which gives the amount required to make the payments to PBGC's payees.

## Funding and Reconciliation

SSC requests funds to cover it's PBGC check runs, as needed. Each funding request is reconciled by the TSD Funding Reconciliation Administrator.

SSC faxes the Funding Request Form to IOD. This form breaks down the total amount required by payment types. Payment types may include annuities, lump sums, special checks, Rettig settlement payments and/or 4049 Trust lump sums. After reviewing and approving the funding request, IOD sends a Wire Transfer Request – SSC Benefit Funding to FOD to transmit the funds to SSC's designated account.

SSC sends all documents to support the funding request(s), within five business days after the check run. TSD's Funding Reconciliation Administrator reviews the documents to ensure the figures agree with the funding request for both **benefit payments** and **non-benefit payments.** The benefit payment figures are reconciled with PRISM payment ledgers. Non-benefit payments represent funds wired to SSC that do not produce ledgers. These funds are reconciled with the funding backup documentation. Reasons for non-benefit payments include but are not limited to:

- Refunds of multiple returns of funds by the paying agent to PBGC's trust account;
- Over withholding of taxes; and
- Recovery collection errors.

# TP 30.1 Reconcile Funding to SSC with Actual Payments 06/18/2004

Action Steps

**Purpose**

Reconcile the benefit-funded amount(s) with amounts posted to PRISM payees ledgers and reconcile the non benefit-funded amount(s) with funding backup documentation.

**Time Reporting (BMPRS)**

Special Projects

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required Input and Source**

- Funding Request Tracking Log maintained in IOD.
- Funding requests from SSC with supporting documents such as the Participant Payment Reports (a separate report for each category of payment, e.g., annuities, lump sums, special checks, replacement or stale dated checks).
- Funding requests from SSC for off-cycle payments include as supporting documents copies of the off-cycle payment requests from TSD with payees' information and amounts paid.
- Totals by category of payment from PRISM ledgers obtained by a database query.

Additional SSC documents that may be included in funding request for non-benefit payments include:

- Reconcilement Correction Request Sheet
- Outstanding Check Reconciliation Listing
- Purge Sheet with input date and record number
- Memorandum in re: *Returns of Benefit Payments for CDA # xxxxxxxxx*, listing record numbers and totals for individual Purge Sheets
- Pension Check Request
- Front and back copies of checks
- Purged Check list
- Copy of PBGC Check Action Request Form (CARF)

**Process Output and Recipient**

Memorandum outlining the results of the reconciliation with attached spreadsheet summarizing the funding amounts with the actual payments reflected on PRISM payment ledgers by type.

**Control Issues**

IOD ensures that SSC receives sufficient funds to cover payments.

The reconciliation is part of PBGC's internal control process to ascertain that funding and payments are reconciled.

**Important Concepts**

All types of payments are reconciled - annuities, lump sums, special payments, SID and 4049 trusts payments. This process only applies to payments SSC makes for PBGC.

| | |
|---|---|
| | **Timing:** The funding reconciliation is done **after** the payments have been issued, and is completed no later than the 15th of the month after the payment month. |
| **Guidance** | N/A |
| **Procedure Owner** | TSD's Funding Reconciliation Administrator, Senior Contract Auditor, BPAB |

## Click here for more information

Actions Steps: TP 30.1 Reconcile Funding to SSC with Actual Payments

## TP 30.1 Action Steps 06/18/2004

## Reconcile Funding to SSC with Actual Payments

For each benefit funding request's reconciliation:

1 Review the summary portion of the SSC Participant Payment Reports (PPR) and supporting documentation, as needed, for completeness and accuracy.

- Compare funding requests to PRISM ledgers.
- Analyze and reconcile figures, using lotus worksheet developed for this purpose. The worksheet compares funding request(s) to SSC documentation, and to PRISM ledgers, and flags variances. Required input in the worksheet are:
  - Control totals from SSC Funding Request(s)
  - Control totals from Funding Backup - PPR summaries and other SSC supporting documents.
  - Totals by category from PRISM ledgers obtained by a database query.

2 Reconcile the PRISM payment ledger figures with the SSC PPRs and other supporting documents to ensure that actual payments agree with the funded amount(s) for all payments funded during the period.

3 If there are variances, contact SSC, determine the reason for the variance and resolve it.

4 Prepare *TSD Funding Reconciliation Memo (Fundrec.doc)* and submit to BPAB Chief and TSD Manager for their signatures, and then to IOD's Deputy Director.

5 If the memo reflects any variances, after resolution, prepare a revised *TSD Funding Reconciliation Memo (Fundrec.doc)* and submit through TSD management to IOD's Deputy Director.

For each non-benefit payment (NBP) funding request's reconciliation:

1 Review the funding backup documentation and determine reason for the non-benefit payment.

2 Check the customer record on the paying agent's benefit payment system to ensure that a ledger entry for the requested funds does not exist.

3 Update the spreadsheet in the Documentation and the PRISM Ledger sections. Use the designation NBP to record the NBP data.

## TP 30.2 Forms, Letters, Memos, etc.

**09/30/99**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

# TP 31. Document Telephone Calls

TP 31. Overview

TP 31.1 Document Incoming Telephone Calls

TP 31.2 Document Outgoing Telephone Calls

TP 31.3 CCN Call Records Guidelines

Forms, Letters, Memos, etc.

# TP 31. Overview

**03/10/2000**

Excellent customer service is a basic pledge of PBGC. IOD demonstrates its commitment to excellent customer service in many ways, including its timely and thorough responses to participant telephone calls and correspondence. (For details about correspondence processing in IOD, see TP 10: Respond to Correspondence.) IOD utilizes Customer Communications Network (CCN) to record and track **all** incoming and outgoing participant calls.

## Customer Service Center

IOD's Customer Service Center (CSC) in TSD is often a participant's first telephone point of contact with the PBGC. The 800 number (1-800-400-PBGC, or 1-800-400-7242) and a TTY connection (Federal relay service at 1-800-877-8339) is provided to participants with most standard communications, including participant brochures, all ALG letters and the participant newsletters. CSC phones are staffed from 8am to 5pm (eastern time) each work day. Regardless of whether the plan is at HQ or at an FBA, participants are provided with the 800 number. Customer Service Representatives (CSRs) direct calls to the appropriate staff member in the TPD or FBA (telephone POC in the plan's CAS Team) when they are unable to satisfy the participant.

CSRs are trained and empowered to handle a wide range of participant services and whenever possible will resolve the participants inquiry in the initial phone call. The CSC receives as many as 20,000 calls in a single month.

## Processing a call

Upon receipt of a call from a participant, the CSR (or other IOD call recipient) utilizes the participant's SSN or name to access basic information about the participant through CCN and initiates a CCN record. Each telephone call is logged into CCN and closed in CCN using one or more disposition codes that identify the call type and action taken. Outgoing telephone calls to or about a participant are also recorded in CCN.

More than one disposition code may be used with a single participant call. The CCN record (sometimes referred to as call log) is a vital part of IOD's system of records. It is the **only** record of the participant's call or request to the agency and documents any action taken or information provided. No imaging is required to document the telephone call. The call history feature in CCN permits staff to research IOD's history of telephone contact with a participant. Each staff member is responsible for ensuring that the contents of the call record accurately and completely reflect the details of the participant call.

# TP 31.1 Document Incoming Telephone Calls

05/18/2001

Action Steps

| | |
|---|---|
| **Purpose** | Establish accurate agency record of a participant communication. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits (TPD/TSD)<br>FBA Administer Benefits (TPD/TSD)<br>PBA Administer Benefits (TPD/TSD)<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Incoming telephone call from a participant or about a participant. |
| **Process Output and Recipient** | Call record established in CCN, participant inquiry resolved and record completed. |
| **Control Issues** | Management periodically samples CCN call records for accuracy and thoroughness to verify that PBGC's commitment to excellent customer service is being met. Use accurate disposition codes to ensure accuracy of management reporting. |
| **Important Concepts** | All participant calls received or initiated by IOD (headquarters and FBAs) are recorded in CCN. Ensure mandatory fields and information are completed for each call; see TP 31.3: CCN Call Records Guidelines for specifics. Call records in CCN are the only record of participant calls to IOD. No imaging of CCN logs is needed. The call history feature in CCN permits staff to research IOD's history of telephone contact with a participant. |

| **Procedure Owner** | All IOD (CSC, FBA, TPD, TSD) |

## Click here for more information

TP 31.1 Actions Steps: Record Incoming Telephone Calls

## TP 31.1 Action Steps: 03/10/2000

## Document Incoming Telephone Calls

1 Open CCN to establish call record and determine call type. Refer to TP 31.3: CCN Call Records Guidelines.

2 If possible to fully resolve participants issue, take the requested action or provide the requested information. Document action taken or information provided in the CCN record, noting the specifics of any information given and the source of that information. Close the record in CCN using the appropriate disposition codes. If the record is coded Information Only, and no action is required by the processing group (FBA or TPD) a copy of the CCN record is sent to all members of the plan's CAS team.

Regardless of whether the call is completely handled in the CSC or is routed to a processing group, the call is completely documented in CCN. See TP 31.3: CCN Call Records Guidelines for guidelines on some general categories of calls and the type of specific information to be recorded.

3 If unable to complete the call, refer to the appropriate party within the agency and advise the participant of the referral and when to expect a return call. Forward through CCN the log indicating action required.

4 Upon receipt of a referred call, contact the caller and resolve their inquiry. Update the CCN record and close the call using the appropriate disposition code(s). Ensure that all mandatory fields in CCN have been completed, and that other facts were recorded - in actions taken or comments fields. If you are unable to resolve the issue at the present time, the call will be tracked in the "pending" call box until the issue is resolved and the call is closed.

# TP 31.2 Document Outgoing Telephone Calls

05/18/2001

Action Steps

| | |
|---|---|
| **Purpose** | Establish accurate agency record of a participant communication. |
| **Time Reporting(BMPRS)** | FTE Administer Benefits (TPD/TSD)<br>FBA Administer Benefits (TPD/TSD)<br>PBA Administer Benefits (TPD/TSD)<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Outgoing telephone call to a participant or about a participant. |
| **Process Output and Recipient** | Call record established in CCN, participant inquiry resolved and record completed, or call referred and record updated. |
| **Control Issues** | Management periodically samples CCN call records for accuracy and thoroughness to verify PBGC's commitment to excellent customer service is being met. Use accurate disposition codes to ensure accuracy of management reporting. |
| **Important Concepts** | All participant calls received or initiated by IOD (headquarters and FBAs) are recorded in CCN. All participant calls received or initiated by IOD (headquarters and FBAs) are recorded in CCN. Ensure mandatory fields and information are completed for each call, see TP 31.3: CCN Call Records Guidelines for specifics. Call records in CCN are the only record of participant calls to IOD. No imaging of CCN logs is needed. The call history feature in CCN permits staff to research IOD's history of telephone contact with a participant.<br><br>Telephone calls **initiated** by IOD staff to participants and their representatives are recorded in CCN in addition to incoming calls received by the CSC or others. This does not include return and follow up calls made in response to a participant's initial call. These are documented as actions taken in response to the participant's initial phone call, and recorded in CCN with that initial call record. |
| **Guidance** | CCN Help Text<br>Customer Service Standards |
| **Procedure Owner** | All IOD (CSC, FBA, TPD, TSD) |

## Click here for more information

TP 31.2 Action Steps: Document Outgoing Telephone Calls

## TP 31.2 Action Steps: 03/10/2000

## Document Outgoing Telephone Calls

1 Open CCN and establish call record based on reason for call.

2 Record basics of conversation, any promised action or data given. After completed, document action taken or information provided in the CCN record, noting the specifics of any information given and the source of that information. Close the record in CCN using the appropriate disposition codes.

See TP 31.3: CCN Call Records Guidelines for a list of sample categories of participant calls and examples of the specific information required to be recorded in CCN.

# TP 31.3 CCN Call Records Guidelines

07/27/2001

**Standard practice for all calls:** Verify the identify of the caller (only the participant or their authorized representative may make certain requests or receive certain information) and verify with the caller that PBGC's information about how to reach them is correct - name, SSN, mailing address & telephone number. Any changes to this information should be made immediately.

| CALL TYPE | call typically completed by... | BASIC ELEMENTS DOCUMENTED IN CCN<br>**MF** = mandatory CCN field, completed by IOD staff, if not automatically completed by database.<br>**OA** = other action, includes information provided to caller, by IOD staff. |

# TP 32. Provide Estimated Benefit Calculations

TP 32. Overview

TP 32.1 Receive Request, Gather Initial Information

TP 32.2 Determine and Provide Estimated Calculation

Forms, Letters, Memos, etc.

## TP 32. Overview

**01/19/2005**

When requested, IOD provides written estimated benefit calculations to participants, surviving spouses, beneficiaries and alternate payees. IOD gathers all necessary information to calculate an accurate estimated benefit and provides the requestor a response as soon as possible.

Customers request estimated benefits by telephone or in writing (via letter, fax or e-mail). They may request this information for advance planning purposes, or to determine whether to elect to receive an early retirement benefit (if applicable under their plan) or a normal retirement benefit from PBGC. After receipt of an estimated benefit calculation, these customers may file a benefit application and request to be put into pay status. This process is described in TP 20 Put New Payee into Pay Status.

Accurate and timely provision of estimated benefits to customers is one of the many ways IOD demonstrates its commitment to excellent customer service. These calculations are provided as soon as possible to the customer. If an estimated benefit tool (includes BET) has been prepared for the plan (developed in Process 10.6: Prepare Estimated Benefits Calculation Tool), **or** IOD has recent plan calculations from the prior plan administrator or actuary, the commitment is to respond to the participant's request within **15 business days** of the request, or receipt of all necessary information, if later.

An estimated benefit calculation is personal benefit information subject to Privacy Act considerations, and may only be provided to the individual entitled to the benefit, or to their authorized representative, see PBGC Operating Policy Manual 8.4-1: Power of Attorney and Guardianship. Spouses of participants, children and other relatives are not entitled to the information unless the participant gives written permission (unless the person is the beneficiary of a deceased participant), and a request is made under the Freedom of Information Act (FOIA). The Disclosure Officer in CPAD handles FOIA requests. A spouse or a former spouse having a Domestic Relations Order prepared often make this type of request, and if the request is received by IOD staff, the alternate payee is directed to CPAD (Disclosure Officer) for assistance. For information about processing these orders, see TP 13: Domestic Relations Order Handbook.

Upon receipt of a telephone request in the CSC for an estimated benefit, the CSR collects basic information about the participant and/or caller (when the caller is not the participant). Like all telephone calls, this is recorded in CCN, see TP 31: Document Telephone Calls. Once the call is routed to them, the PLS, PBA, or FBA assigned to the case assumes responsibility of responding to the request. Written requests are routed directly to the PLS, FBA or PBA assigned to the case, who contact the requestor to collect any additional information needed and maintain responsibility for the participant request through completion.

Once all necessary participant and plan information is available, the estimated benefit is calculated using one of these methods, in the following preferred order:

- an estimated benefit calculation tool (includes BET), if available.
- recent prior plan administrator's calculations that have been approved by the PBGC actuary, if available.
- PBGC actuary provides individual calculation.

Generally, the PLS, FBA or PBA provides the estimated benefit and reviews the supporting information by telephone, documented through CCN. This is followed by a written response that specifies the estimated benefit calculation, (clearly identifies the information as estimate) and provides an estimated benefit calculation sheet.

**Provide Estimated Benefit Calculations**

## TP 32.1 Receive Request, Gather Initial Information 05/18/2001

**Action Steps**

| | |
|---|---|
| **Purpose** | Verify estimated benefit requestor entitled to information, collect necessary information to complete calculation. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefit Calculations<br>FBA Estimated Benefit Calculations<br>PBA Estimated Benefit Calculations<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Written or verbal inquiry from a participant, surviving spouse, beneficiary, alternate payee for an estimated benefit amount. |
| **Process Output and Recipient** | All participant and plan information necessary to perform estimated benefit calculation for eligible participant determined and received by PBGC. Determination that requestor may receive this personal benefit information. |
| **Control Issues** | PBGC will ask the necessary questions to verify that the requestor is entitled to the information, and determine whether the participant is eligible for an estimated benefit amount from the plan.<br>Spouses of living participants, children and other relatives are not entitled to a participant's personal benefit information without written permission from the participant. Then their request for information may be made under FOIA. CPAD handles FOIA requests. Potential alternate payees may request benefit information as part of the preparation of a Domestic Relations Order. If received in IOD, direct the requestor to CPAD.<br>Regardless of the method of inquiry (phone, e-mail, fax, letter) all communications with the participant and information used to provide the benefit calculations are fully documented, either imaged to IPS (includes e-mail correspondence) or recorded in CCN. |
| **Important Concepts** | Although estimated benefits **are estimates**, PBGC is sensitive to the customer's reliance on these calculations in their planning and decisions about whether to retire, and strives to provide the most accurate calculation possible. When Benefit Determination Letters are issued, underpayments are made to the customers (see Process 19: Issue BDLs & Make Adjustments to Payments), and overpayments may be repaid through recovery or recoupment (see TP 06 Recover Overpayments, and TP 07 Recoup Overpayments). Complete and accurate data are critical to ensure that PBGC's timely estimated benefit calculations are accurate.<br>**Timing:** PBGC's goal is to always respond to the requestor(s) as soon as possible. In many cases that will be within 15 business days of the estimated benefit calculation request, or receipt of all necessary information, if later. |

TP 32.1. Action Steps: Receive Request, Gather Initial Information

**Provide Estimated Benefit Calculations**

## TP 32.1 Action Steps: 05/18/2001

## Receive Request, Gather Initial Information

A. Telephone request B. Written request

### A. Telephone request

**CSR or PLS, PBA or FBA**

A telephone request for an estimated benefit calculation amount may be received at the CSC or directly by the PLS, PBA, or FBA. As with all customer telephone calls, IOD follows the standard steps of gathering or verifying basic information about the caller and/or participant. See TP 31: Document Phone Calls, for information about call processing.

1 Verify that the caller is the participant, surviving spouse or beneficiary, or authorized representative (see PBGC Operating Policy: 8.4-1 Power of Attorney and Guardianship). If not, no information may be provided to the caller. If the caller requests the information under FOIA, direct the caller to CPAD.

Request the following information from the caller (including the standard call verification procedure):

- Full Name
- Address
- Sex
- Telephone number day & evening
- Social Security Number (SSN)
- DOB
- DOH
- Date of Termination of Employment (DOTE)
- Marital Status
- Spouse's name, if married
- Spouse's DOB
- Date participant wants to retire
- Plan Name and case number

2 If originally received in the CSC, as outlined in TP 31.1: Document Incoming Phone Calls, the request is forwarded to the responsible staff, telephone point of contact (POC) for the plan.

**PLS, PBA or FBA.**

3 First verify whether the plan's status is final or estimated. (A plan is referred to as "final" when its valuation has been completed and Benefit Determination Letters issued. Otherwise, a plan is referred to as "estimated", therefore participant benefits are estimated.) If the plan is final, the benefit may be provided through accessing the archives. Provide a telephone response to the participant (recording the relevant information in CCN,) and follow up with a letter confirming the information provided.

4 In addition to the information outlined in 2 above, additional information is necessary to calculate an accurate benefit estimate. Consult with the plan actuary to develop a complete list of data needed for the estimated benefit calculation, and ensure that this list of data elements is imaged to the plan file (IPS).

Some examples of additional information that may be necessary:

- Transfer between hourly and salaried
- Break in service information, if applicable
- Date of plan participation
- Earnings information (W-2's), if applicable*

* If the requestor is unable to provide enough supporting employment or earnings data, information may need

to be obtained from SSA, if possible. For more information, see TP 26 Request SSA Data

5 Determine status of the plan and whether an estimated benefit calculation can be made.

**Note** In some instances, it may be too early in the case processing cycle to provide this information. For example: There may not be an estimated benefit calculation tool (includes BET) for the plan. See Process 10.6: Prepare Estimated Benefit Calculation Tool. There may not be (reliable) prior plan administrator or actuary's benefit calculations available for the plan, and the plan document audit and plan abstract are not yet completed, or is not available for the plan. See Process 12.1 Finalize Plan Document Audit, and Process 12.2 Prepare Plan Abstract.

6 **If an estimated calculation may not be provided at this time,** notify the requestor that the PBGC is still gathering information about the plan necessary to perform the calculation. The initial provision of this information may be made by telephone (documented to CCN), see TP 31.1: Document Incoming Phone Calls.

7 If PBGC has trusteed the plan but has not yet obtained sufficient records, ask the requestor if he or she has copies of any of the following:

- Benefit statement from the employer/ plan administrator
- Summary Plan Description
- Summary of Material Modifications (SMM)
- pension plan document and/or amendments
- collective bargaining agreement
- union book(s)
- employee handbooks that reference the pension

If the requestor has any or all of these documents, ask them to provide copies to the PBGC.

8 Check PRISM, IPS and/or any other plan database or information to determine whether all information needed to calculate the estimated benefit amount is available. If additional information is needed, contact the requestor by telephone, following TP 31: Document Phone Calls. If unable to contact by telephone, prepare Information Request for Estimated Benefit, available through PRISM ALGS.

9 If the requested information is not received within 15 days, follow-up is appropriate. If efforts to obtain the necessary participant information are unsuccessful, consult with division management about whether to send a final letter advising that until the requested information is provided, PBGC will not be able to provide the estimated benefit calculation, and will not make any further follow up efforts.

10 The TPD case team is responsible for completing the required work that will permit an accurate estimated benefit calculation.

11 Go to TP 32.2 Calculate and Provide Estimated Benefit

### B. Written request - PLS, PBA or FBA (mail POC for plan)

Most letter are received by the DMC, and notification sent to the processing unit (TPD, FBA) through ScoRe. Requests may also be e-mailed. If an e-mail request or letter is directed to someone on the case team other than the plan's mail POC, the request is routed to the plan's mail POC. See also TP 10 Respond to Correspondence.

1 First verify whether the plan's status is final or estimated. (A plan is referred to as "final" when its valuation has been completed and Benefit Determination Letters issued. Otherwise, a plan is referred to as estimated, therefore participant benefits are estimated.) If the plan is final,

the benefit may be provided through accessing the archives. Provide a telephone response to the participant (recording the relevant information in CCN,) and follow up with a letter confirming the information provided.

2 Verify that the requestor is the participant, surviving spouse or beneficiary, or authorized representative (see PBGC Operating Policy: 8.4-1 Power of Attorney and Guardianship). If not, no information may be provided to the requestor. If the requestor would like to request the information under FOIA, direct them to the Disclosure Officer in CPAD.

3 Determine status of the plan and whether an estimated benefit calculation can be made.

**Note** In some instances, it may be too early in the case processing cycle to provide this information. For example: There may not be an estimated benefit calculation tool (includes BET) for the plan. See Process 10.6: Prepare Estimated Benefits Calculation Tool. There may not be (reliable) prior plan administrator or actuary's benefit calculations available for the plan, and the plan document audit and plan abstract may not yet be complete. See Process 12.1: Finalize Plan Document Audit, and Process 12.2 Prepare Plan Abstract.

4 **If an estimated calculation may not be provided at this time,** notify the requestor that the PBGC is still gathering information about the plan necessary to perform the calculation. The initial provision of this information may be made by telephone (documented to CCN), see TP 31: Document Telephone Calls.

5 If PBGC has trusteed the plan but has not yet obtained sufficient records, ask the requestor if he or she has copies of any of the following:

- Benefit statement from the employer/ plan administrator
- Summary Plan Description (SPD)
- Summary of Material Modifications (SMM)
- pension plan document and/or amendments
- collective bargaining agreement
- union book(s)
- employee handbooks that reference the pension

If the requestor has any or all of these documents, ask them to provide copies to the PBGC.

6 Review the request and determine what information is needed to provide the estimated benefit calculation. Consult with the plan actuary to develop a complete list of data needed for the calculation, and ensure that this list of data elements is imaged to the plan file (IPS). The following provides a listing of some of the information that may be necessary to complete the calculation and contact the participant:

- Full Name
- Sex
- Social Security Number (SSN)
- DOH
- Marital Status
- Spouse's DOB, if married
- Plan name and number
- Date of plan participation
- Transfer between hourly and
- Address
- Telephone number day & evening
- DOB
- Date of termination of employment (DOTE)
- Spouse's name, if married
- Date participant wants to retire
- Break in service information, if applicable
- Earnings information (W-2's), if applicable*

salaried

* If the requestor is unable to provide enough supporting employment or earnings data, information may need to be obtained from SSA, if possible. For more information, see TP 26 Request SSA Data

**7** Check PRISM, IPS and/or any other plan database or information to determine whether all information needed to calculate the estimated benefit amount is available. If additional information is needed, contact the requestor by telephone, following TP 31.1: Document Incoming Phone Calls. If unable to contact by telephone, prepare Information Request for Estimated Benefit, available through PRISM ALGS.

**8** If the requested information is not received within 15 days, follow-up is appropriate. If efforts to obtain the necessary participant information are unsuccessful, consult with division management about whether to send a letter advising that until the requested information is provided, PBGC will not be able to provide the estimated benefit calculation, and will not make any further follow up efforts.

**9** Until able to provide calculation, follow Customer Service Guidelines in providing updates to the participant including when the final response may be expected.

**10** The TPD case team is responsible for completing the required work that will permit an accurate estimated benefit.

**11** Go to TP 32.2 Calculate and Provide Estimated Benefit

## TP 32.2 Determine and Provide Estimated Calculation 02/07/2003

Action Steps

| | |
|---|---|
| **Purpose** | Promptly calculate and provide accurate estimated benefit upon request. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefit Calculations<br>FBA Estimated Benefit Calculations<br>PBA Estimated Benefit Calculations<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | All participant and plan information necessary to complete estimated benefit calculation from plan records or requestor. Determination of the method of calculating the estimated benefit, in preferred order:<br>• using prepared benefit estimated tool.<br>• using prior plan administrator (or actuary's) calculations.<br>• PBGC actuary provides individual calculation. |
| **Process Output and Recipient** | Estimated benefit calculation provided to the requestor by telephone, followed by written notification, all fully documented to CCN and IPS. Requestors not entitled (non-vested) may receive Benefit Determination Letters. |
| **Control Issues** | Regardless of the method of inquiry (phone, e-mail, fax, letter) all communications with the participant are fully documented, either imaged to IPS (includes e-mail correspondence) or recorded in CCN. |
| **Important Concepts** | Although estimated benefits are estimates, PBGC is sensitive to the customer's perspective, and strives to provide the most accurate calculation possible. Complete and accurate data are critical to ensure the accuracy of the estimated benefit calculations. Responses to participants provide the **monthly benefit amount**. If a participant applies for benefits or is immediately eligible at the time the estimated calculation is provided, then the lump sum distribution amount may be provided.<br>Participants eligible for retirement may be put into pay on an estimated basis, with adjustments made after Benefit Determination Letters are issued. An eligible participant may request to begin to receive retirement benefits when they are notified by phone of the estimated benefit amount. If so, include the appropriate benefit application form with the Response to Inquiry for a Benefit Estimate, ALGS 305. Make a follow up phone call to customer confirming receipt of the annuity application and offer assistance (7-14 days after sending application).<br>**Timing:** PBGC's goal is to always respond to the requestor(s) as soon as possible, however, when an estimated tool is available or PBGC has prior calculations, an estimate is be provided no later than 15 business days after receipt of all required information. (Exceptions to this 15 day response target must be brought to the attention of division management.) |

## Click here for more information

TP 32.2 Action Steps: Determine and Provide Estimated Calculation

**Provide Estimated Benefit Calculations**

## TP 32.2 Action Steps:

## Determine and Provide Estimated Calculation 02/07/2003

**A. Use estimated benefit calculation tool** **B. Use prior calculation**
**C. Actuary calculates individual estimated benefit**

### A. Use Estimated Benefit Calculation Tool

1 Use the estimated calculation tool to calculate the estimated benefit. (Most estimated benefit tools will produce a benefit calculation sheet. If not, prepare a *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc).)*

2 Submit the calculation for peer review or review by the actuary if desired, or as required by division management. (FBAs follow the plan's TPD's guidelines.)

**Note** If it's determined that the requestor is a non-vested participant who is not eligible for any benefits from PBGC, including a 4022(c) benefit, an early Benefit Determiation Letter may be issued, in response to this request. (See 19.1 Review List of Participants Eligible for Early BDLs for information.)

3 Contact the requestor by telephone and provide the estimated benefit amount, and review the supporting information. If the requestor is eligible for an early retirement benefit or a normal retirement benefit, inform them that an application will be provided. Complete the CCN log (either the original request if originally requested by phone, or the new log prepared for the outgoing call - see TP 31.1: Document Incoming Phone Calls) with the estimated benefit amount(s) and close the call log. Inform the requestor that the estimated benefit and supporting information upon which it was based will be confirmed in writing.

4 Prepare and send the Estimated Benefit Request Response (ALG 305) with the estimated benefit calculation sheet. Include the appropriate benefit application form if an eligible participant, beneficiary or alternate payee requests one. See Appendix J: Participant Forms Information for listing of forms and their usage.

**Note** The Estimated Benefit Request Response (ALG 305) is always customized for the specific request, and must be printed locally so that the benefit calculation sheet can be included with the letter. Retain a copy of the estimated benefit calculation to submit for imaging.

5 If a benefit application is sent, establish a tickler to make a follow up telephone call within one to two weeks of mailing the application to the customer, confirming receipt of the application and offering assistance.

**Note** Processing staff use their own tickler methods to ensure timely completion of this task. Options include establishing tasks in Outlook with appropriate deadlines, or developing participant spreadsheets to track steps.

6 To complete request: ensure that all communications with participant have been documented to CCN and IPS. (This includes the list of data elements needed for the estimated calculation, the estimated benefit calculation sheet or the *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc)* and all correspondence including e-mails with the requestor.)

### B. Use Prior Calculation

**Note** The prior plan administrator or actuary's calculation **must be verified by the case actuary**. The actuary provides this verification either by individually checking a prior calculation before it is provided, or by sampling the calculations for the plan and verifying that the calculations are accurate, and may be used. The actuary's written approval of either the individual calculation or the plan's calculations are clearly documented to the appropriate file in IPS (participant or plan), including the signature and date of approval.

1 Use the prior calculations to determine the estimated benefit. (Be aware of possibility for benefit adjustments, [substantial owner reductions, the phase-in rule, maximum guaranteeable benefit], and consult with the actuary as needed.) Prepare a *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc)*.

2 Submit for peer review and/or review by the actuary, if desired, or as required by division management. (FBAs follow the plan's TPD's guidelines.)

**Note** If it's determined that the requestor is a non-vested participant who is not eligible for any benefits from PBGC, including a 4022(c) benefit, an early Benefit Determination Letter may be issued, in response to this request. (See 19.1 Review List of Participants Eligible for Early BDLs for information.)

3 Contact the requestor by telephone and provide the estimated benefit amount, and review the supporting information. If the requestor is eligible for an early retirement benefit or a normal retirement benefit, inform them that an application will be provided. Complete the CCN log (either the original request if originally requested by phone, or the new log prepared for the outgoing call - see TP 31: Document Phone Call) with the estimated benefit amount(s) and close the call log. Inform the requestor that the estimated benefit and supporting information upon which it was based will be confirmed in writing.

4 Prepare and send the Response to Inquiry for a Benefit Estimate (ALG 305) with the estimated benefit calculation sheet. Include the appropriate benefit application form if an eligible participant, beneficiary or alternate payee requests one. See Appendix J: Participant Forms Information for listing of forms and their usage.

**Note** The Estimated Benefit Request Response (ALG 305) is always customized for the specific request, and must be printed locally so that the benefit calculation sheet can be included with the letter.

5 If a benefit application is sent, establish a tickler to make a follow up telephone call within one to two weeks of mailing the application to the customer, confirming receipt of the application and offering assistance.

**Note** Processing staff use their own tickler methods to ensure timely completion of this task. Options include establishing tasks in Outlook with appropriate deadlines, or developing participant spreadsheets to track steps.

6 To complete request, ensure that all communications with the participant and in support of the calculation are documented to IPS and CCN. (This includes the list of data elements needed for the estimated calculation, the actuary's specific approval of the prior benefit calculation or the approval of the prior calculations **for the plan**, peer review and approval of calculation if done, the estimated benefit calculation sheet or the *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc)*, and all correspondence including e-mails with the requestor.)

**C. Actuary Calculates Individual Estimated Benefit**

1 Submit all information previously determined necessary to calculate the estimated benefit to the case actuary, and request the estimated benefit calculation.

**Actuary**

2 Complete the calculation and provide to PLS, with supporting information. Alternatively, if possible, prepare and provide an early estimated calculation tool. (Review Process 10.6: Prepare Estimated Benefits Calculation Tool.)

3 Submit the calculation for peer review as desired, or as required by or as required by division management.

**Note** If it's determined that the requestor is a non-vested participant who is not eligible for any benefits from PBGC, including a 4022(c) benefit, an early Benefit Determination Letter may be issued, in response to this request. (See 19.1 Review List of Participants Eligible for Early BDLs for information.)

**PLS, PBA, FBA**

4 If an estimated benefit tool is provided, see TP 32.2A: Determine and Provide Estimated Calculation, Use estimated benefit calculation tool.

5 Review the calculation and prepare a *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc)*. As needed, obtain actuary's concurrence with the benefit calculation sheet.

6 Contact the requestor by telephone and provide the estimated benefit amount, and review the supporting information. If the requestor is eligible for an early retirement benefit or a normal retirement benefit, inform them that an application will be provided. Complete the CCN log (either the original request if originally requested by phone, or the new log prepared for the outgoing call - see TP 31: Document Phone Calls) with the estimated benefit amount(s) and close the call log. Inform the requestor that the information will be confirmed in writing.

7 Prepare and send the Response to Inquiry for a Benefit Estimate (ALG 305) with the estimated benefit calculation sheet. Include the appropriate benefit application form if an eligible participant, beneficiary or alternate payee requests one. See Appendix J: Participant Forms Information for listing of forms and their usage.

**Note** The Estimated Benefit Request Response (ALG 305) is always customized for the specific request, and must be printed locally so that the benefit calculation sheet can be included with the letter.

8 If Form 700 - Application for Pension Benefits is sent, establish a tickler to make a follow up telephone call within one to two weeks of mailing the application to the customer, confirming receipt of the application and offering assistance.

**Note** Processing staff use their own tickler methods to ensure timely completion of this task. Options include establishing tasks in Outlook with appropriate deadlines, or developing participant spreadsheets to track steps.

9 To complete request: ensure that all communications with the participant and in support of the calculation are documented to IPS and CCN. (This includes the list of data elements needed for the estimated calculation, the actuary's benefit calculation, the *PBGC Estimated Benefit Calculation Sheet (Estbenst.doc)*, and actuary's concurrence if done, and all correspondence including e-mails with the requestor.)

TP 33.2 Search for Updated Customer Address

TP 33.3 Locate Address Resource Guidelines

Forms, Letters, Memos, etc.

# TP 33. Overview

**02/18/2005**

One of PBGC's missions is to "Provide for the timely and uninterrupted payment of pension benefits to participants and beneficiaries." Thus, timely location of participants who may be due benefits is critical to fulfillment of our mission.

### Collecting Participant Information

When PBGC trustees a pension plan, we obtain as much information about participants and their current whereabouts as possible from the plan sponsor, and/or the plan administrator. PPD's initial case processing includes collection of basic participant information prior to formal trusteeship, see Process 04. 6 Initiate Request for Participant Data.

Although initially PPD and later the TPD requests this information from the prior plan administrator, or employer or any other potential resource, records may be incomplete or simply not up to date because participants may have moved and failed to keep their pension plan or former employer informed of address changes.

### Communicating with Participants

In addition to needing participant information in order to pay benefits when due, as part of IOD's commitment to customer service, IOD strives to maintain ongoing communications with participants in trusteed plans. This process includes:

- Providing the initial notice of trusteeship of the plan, see Process 9.13 Notify Participants
- Ongoing efforts to obtain required information in order to value the plan and determine the participant's benefits
- Providing annual updates to non-payees in estimated plans, see TP 36: Prepare Annual Update Letter.
- Issuing newsletters to participants - separate newsletters are prepared and sent at least annually to the payee population and deferred vesteds
- Issuing Benefit Determination Letters to participants, see Process 19: Issue BDLs & Make Adjustments to Payments
- Sending advance notices of retirement eligibility, and upcoming benefit changes (as identified by running PRISM Forecaster reports)

### Notice of Missing Addresses

In addition to simply not receiving the customer's home address when records are initially collected, PBGC often learns that a customer's address is no longer current when mail is returned, mainly correspondence or PBGC Newsletters. As of early 2000, IOD's mail is sent with "Address Service Requested" from the U.S. Postal Service. If the post office has a forwarding address on file, it is provided to PBGC (also see TP 04: Process Address Changes for additional information.)

### Searching for Missing Addresses

Once notice is received by PBGC that a mailing address is no longer current, PBGC's records (IPS, CCN, PRISM) are all reviewed to determine whether the address used is the most current address on file, and if not, the customer address is updated in PRISM and coded as R (invalid address). Once our records have been reviewed, the next step is to utilize the various resources available to locate the

addresses.

IOD staff has access to a variety of resources, including:

- Phone disc (on LAN)
- Prepare a plan mailing (customize the Generic Custom Letter in ALG) looking for the "unlocatable participants" - may be either to plan participants, or an employee or retiree organization (more likely with larger plans)
- Numerous free internet resources that are useful to locate people
- Participant Locator - an IOD desktop system that permits staff to query a commercial database. Used when other resources are unsuccessful or are impractical to use (ex. common names "John Smith," or large volumes).

In all events, the searches and results are documented to the participant's file (IPS). When a participant's address cannot be located, the address is coded in PRISM as R (invalid address). PRISM is periodically queried for invalid addresses, which are swept into the Pension Search Directory.

**Locate Customer Address**

## TP 33.1 Determine Need for Customer Address 08/11/2000

**Action Steps**

| | |
|---|---|
| **Purpose** | Determine that PBGC does not have a current participant address. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Missing information in the case records - participant name and/or SSN, and no address.<br>Notice that PBGC may not have current correct address for a customer.<br>• returned correspondence<br>• returned newsletters |
| **Process Output and Recipient** | Verification that PBGC does not have participant's current address (CCN, IPS, PRISM) |
| **Control Issues** | Addresses in PRISM should be traceable to a source in PBGC's records, e. g. CCN or IPS (participant or plan). |
| **Important Concepts** | Before searching for a customer's address, IOD first verifies whether an earlier written or telephone notice of an address change from the customer was not entered into PRISM.<br>Effective late 1999, an address change entered into CCN is automatically transmitted to PRISM. Earlier telephone notifications required processing like written notifications, through updates to PRISM Customer. See TP 04: Make Address Changes.<br>Upon receipt of a notice of an incorrect address, ensure the home address in PRISM is coded R (invalid address). PRISM is periodically queried for invalid addresses, which are swept into the Pension Search Directory.<br>A correct address in PRISM is coded V (valid address). An address in PRISM that has been determined to be incorrect is coded R (invalid address). There is no need to enter 'unlocatable' in a customer's PRISM address fields. |
| **Guidance** | ERISA 4050<br>29 CFR 4050: Missing Participants<br>PBGC Fact Sheet - Pension Search Program<br>(hard copies in CPAD, or see PBGC's Home Page on the internet) |
| **Procedure Owner** | PLS, PBA, FBA, DMC |

## Click here for more information

TP 33.1 Action Steps: Determine Need for Customer Address

**Locate Customer Address**

## TP 33.1 Action Steps: 08/11/2000

## Determine Need for Customer Address

A. Incomplete Information B. Returned Mail C. DMC

### A. Incomplete Information

1 Review CCN and IPS to determine if any participant address information has been received that was not transmitted to PRISM.
- If address information is found, go to step 2.
- If no address is located, proceed to step 3.

2 Check customer record in PRISM to see if the address information in CCN or IPS has been entered. If not, update using PRISM Customer. See TP 04 Process Address Changes. No further action under this technical procedure required.

3 Update address following TP 33. 2 Search for Updated Customer Address

### B. Returned Mail

1 Returned mail to PBGC includes:
- returned correspondence
- returned newsletters

2 Mail is sent by PBGC using "Address Service Requested." This means when mail is sent to a wrong address, it is returned with any forwarding address on file with the U.S. Postal Service. Not all mail is returned with a forwarding address, and additional research and/or processing is required in order to determine the customer's address.

### C. DMC

1 Review returned mail and sort into two groups: forwarding address provided, and no forwarding address provided.

2 For mail with forwarding address, process change of address following TP 04: Process Address Changes. No further action under this technical procedure required.

3 For mail with no forwarding address provided, research participant record. First, check the address in PRISM to ensure the mailing address used matches the address listed in PRISM. If the addresses **do not** match, and there's no indication that the PRISM address is incorrect, no further action under this technical procedure required. Otherwise, code the home address R (invalid address) using PRISM Customer.

**Note** There are several possibilities where the PRISM address and the mailing address are not the same. Some examples:
- PBGC received a change of address notification from the customer or other source **after** the mailing was prepared.
- A piece of mail may have been prepared outside of ALG and the wrong address used.

4 Review CCN and IPS to determine if any participant address information has been received that supersedes the address used in the mail. If yes, update following TP 04: Process Address Changes.

5 If not, search for address following TP 33.2: Search for Updated Customer Address.

**Locate Customer Address**

## TP 33.2 Search for Updated Customer Address

**02/07/2003**

**Action Steps**

| | |
|---|---|
| **Purpose** | Locate the home address for a participant or other customer. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Incorrect or missing address for customer. |
| **Process Output and Recipient** | If correct home address for customer determined, PBGC records documented, and address updated following TP 04: Process Address Changes.<br>If correct home address for customer is not found, code address in PRISM as R (invalid address) |
| **Control Issues** | Addresses in PRISM should be traceable to a source in PBGC's records, e. g. CCN or IPS (participant or plan).<br>Document through a memo to the participant's file (IPS) unsuccessful attempts. taken to locate the address.<br>Participant Locator is for official use only. |
| **Important Concepts** | PBGC creatively uses a variety of resources to find customers including:<br>• phone disc (on LAN)<br>• plan mailings looking for the "unlocatable participants"<br>• people locators available on the internet<br>• Participant Locator<br>Once the address is located, update the customer's address in PRISM, following TP 04: Process Address Changes. Thereafter letters prepared through ALG and other communications like newsletters will be sent to the correct address. Once we establish the correct customer address, PBGC's ongoing communication efforts with the participant and returned mail operations reduce the likelihood of the participant later becoming unlocatable.<br>After all in-house efforts have been made and it's determined that the participant is unlocatable, the PRISM address is coded as R (invalid address). There is no need to enter 'unlocatable' in a customer's PRISM address field.<br>PRISM records with invalid addresses are periodically swept into the Pension Search Directory.<br>A correct address in PRISM is coded V (valid address). |

## Click here for more information

TP 33. 2 Action Steps: Search for Updated Customer Address

## TP 33.2 Action Steps: 08/11/2000
## Search for Updated Customer Address

1 Collect data available for the customer:

- name (first, last, middle initial)
- social security number
- case number
- last known address

2 Research external resources for participant address (and telephone number when available). Refer to TP 33.3: Locate Address Resource Guidelines for available resources. If unable to locate through resources other than Participant Locator, or other resources are determined inappropriate or ineffective (ex. due to common names "John Smith", or a large volume of customers), prepare a *Participant Address Search Summary Memo (Padsrch.doc)* documenting the actions taken or decisions about using the different resources and image it to the participant file (IPS).

3 If address cannot be located through other methods, search using Participant Locator.

**Note** DMC researches addresses only using Participant Locator.

| 4 | **If results are. . . .** | **Do the following. . .** |
|---|---|---|
| | Address located | • Print and image results<br>• Update Address information in PRISM, follow TP 04: Process Address Changes |
| | No Address Located | • Print and image results<br>• Update address in PRISM - code R (invalid address). PRISM records with invalid addresses periodically swept into the Pension Search Directory. |

## TP 33.3 Locate Address Resource Guidelines 08/11/2000

| Method | Cost Considerations | Usage Comments |
|---|---|---|
| Plan specific correspondence | Postage cost | • Prepare customized ALG letter - with list of unlocatable participants in letter, or as attachment.<br>• If attachment to ALG letter used, printing must be done locally to hand stuff enclosure<br>• Letter(s) may be sent to plan's participants (document to participant file [IPS]), or to an organization (retiree association, union) (document to plan file [IPS]) |
| Internet Resources **-1-** | No cost to PBGC (use free search services) | • Use with ≤ 10 searches.<br>• Document searches to file (IPS).<br>• Requires name or telephone number.<br>• Often can narrow search by city, state etc.<br>• Can be creatively used to locate relatives and therefore locate customer.<br>• Does not require (and cannot use) SSN.<br>• Often provides telephone number.<br>• Should be contacted by phone to verify identification whenever possible, prior to sending correspondence or updating PRISM. |
| Phone Disc **-2-** | No per unit cost to PBGC | • Use with ≤ 10 searches.<br>• Document searches and results to file (IPS).<br>• Phone Disc is divided by regions, must know region in order to search effectively.<br>• Document searches to file (IPS).<br>• Requires name or telephone number.<br>• Often can narrow search by city, state etc.<br>• Does not require (and cannot use) SSN.<br>• Provides telephone number.<br>• Should be contacted by phone to verify identification whenever possible, prior to sending correspondence or updating PRISM. |
| Participant Locator **-3-** | Fee per search | • Document searches and results to file (IPS).<br>• If 250+ searches, contact PSB to coordinate an electronic search. |

- Requires SSN, name and PBGC Case number.
- Data results stored in PBGC database.

---

**-1-** Internet Resources include the various people locators services. Some useful sites include:

# TP 34. Request DMC Services

TP 34. Overview
TP 34.1 Order Supplies From DMC
TP 34.2 Submit Documents for Imaging
TP 34.3 DMC Document Submission Guidelines
Forms, Letters, Memos, Etc.

# TP 34. Overview

**02/18/2005**

The Document Management Center (DMC) provides numerous services to IOD staff (headquarters and FBAs). IOD divisions and FBAs have a designated point of contact (POC) with a backup that is responsible for interacting with the DMC.

## Supplies

The DMC is the central location for Headquarters and FBA) staff to order a variety of supplies used for participant correspondence and benefit processing. These supplies include but are not limited to:

- Brochures
- Envelopes (all sizes)
- 4042(d) package material - folders, PBGC Magnets (for more information, see Process 9.13 Notify Participants)
- IOD Participant forms (for more information, see Appendix J: Participant Form Information)
- Manual transactions forms (PLUS Forms)

The TSD Supply Request Form lists all available supplies and quantities of each that may be obtained from the DMC.

When a processing unit requires supplies in excess of the stated quantities, these large volume requests are submitted either directly to the DMC Analyst (TSD/PSB) for FBAs or through the DMC POC for the TPD, with approval from the TPD/FBA Manager.

## Imaging

Another important service provided by the DMC is scanning (or imaging) the paper records we collect and create to the Image Processing System (IPS). The (virtual) files in IPS are separated into plan and participant files. See TP 16: Establish & Maintain Plan & Participant Files for information about the organization of content in these "files". Through IPS, staff accesses the information necessary to accomplish all plan and participant processing. IPS replaces paper files in most instances, see TP 27: Personal Interest Conflict System for information about paper files that IOD maintains due to personal interest conflicts.

DMC performs all plan file scanning, and most participant file scanning. (Some FBAs have the necessary equipment to do participant scanning at their sites.) All relevant documents collected from the plan administrator, sponsor and other sources are indexed and submitted by the POC to the DMC to be scanned. As additional records are received, the POC submits these additional documents, referred to as "adscans", to the DMC with the appropriate requests forms.

Generally, within 4 days the images may be viewed in IPS, although this can vary depending on volume and equipment. The DMC processes as many as 110,000 images a month. After scanning and indexing, the paper records are stored temporarily by the DMC or FBA, according to the date they were scanned (chronological order). These are referred to as plan or participant "chrons" or "chron files". The participant chron files are destroyed after three months.

In addition to TPDs and FBAs, other divisions in IOD (ex. OPSS) and other PBGC departments (ex. OGC, PEAD) may collect information that is stored in IPS. These groups coordinate their document submission with the processing staff in the TPD rather than directly with DMC. The DMC also provides imaging service to STCD operations, however, their imaging procedures are not covered in this technical procedure.

**Request DMC Services**

## TP 34.1 Order Supplies from DMC

**09/29/2000**

**Action Steps**

| | |
|---|---|
| **Purpose** | Maintain adequate supplies to allow TPDs and FBAs to provide necessary services to customers. |
| **Time Reporting (BMPRS)** | N/A |
| **Required Input and Source** | Headquarters: TSD Supply Request Form submitted to DMC window by the TPD POC (or back up).<br>FBAs: e-mail specifying supply request to DMC Analyst. |
| **Process Output and Recipient** | Requested supplies issued to requestor. |
| **Control Issues** | Coordinate in advance with DMC Manager for a large volume supply request. FBAs deal directly with DMC (no COTR approval is needed). |
| **Important Concepts** | Each TPD POC and each FBA is responsible for monitoring their division's supply levels to ensure adequate stock. Periodically check supplies and purge obsolete supplies. DMC maintains adequate stock to provide specified quantities of supplies. **Timing:** Headquarters' request are processed immediately upon receipt at DMC window (7th floor).FBA requests are processed within one (1) business day of receipt of e-mail (sent in overnight mail). |
| **Guidance** | N/A |
| **Procedure Owner** | IOD, TSD, PSB, DMC |

## Click here for more information

TP 34.1: Action Steps: Order Supplies from DMC

## TP 34.1 Action Steps: 09/29/2000

## Order Supplies from DMC

**Note** If the volume of supplies requested exceeds the pre-printed amount specified on the *Technical Service Division Supply Request Form (Suplyreq.doc)*, get a TPD Division Manager approval on the request first, then submit the order to the DMC Analyst (TSD/PSB) for approval.

### Headquarters

1. Review supplies (periodically) to determine needed stock.
2. Prepare the *Technical Service Division Supply Request Form (Suplyreq.doc)*. Form is also available in hard copy, located at the DMC window DMC (7th floor).
3. Submit completed *Technical Service Division Supply Request Form (Suplyreq.doc)* at DMC window for processing.
4. Normal volume request are processed immediately by DMC and supplies provided to the TPD/TSD staff.

### FBAs

1. Review supplies (periodically) to determine needed stock.
2. Prepare e-mail specifying supply request (items requested and amount of each) to the DMC Analyst (TSD/PSB).
3. Requests are acknowledged and the actual supplies sent including any quantities not currently available that will be shipped later are confirmed by return e-mail (usually from DMC staff). Supplies are mailed to the FBAs within one (1) business day of the DMC e-mail.

## TP 34.2 Submit Documents for Imaging 06/29/2001

Action Steps

| | |
|---|---|
| **Purpose** | Organize, properly identify and submit all pertinent plan and participant records for electronic storage in IPS, so that PBGC's records are complete and accurate and readily accessible to users. |
| **Time Reporting (BMPRS)** | N/A<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Documents that should be maintained in the plan or participant files, often from outside sources: prior plan administrator, plan sponsor or participants. |
| **Process Output and Recipient** | Properly segregated, batched and indexed documents submitted to DMC for scanning so that electronic images of document available in IPS. |
| **Control Issues** | Attach the correct IPS Scanning Request Form to each batch of participant and/or plan documents submitted to DMC. Ensure that previously scanned documents are not mixed in with to-be scanned documents, and that duplicate copies of documents are not submitted to DMC to avoid the confusion and expense of duplicate images. Each TPD and FBA has a POC (and back up) to interact with DMC. (Observe all TP 34.3: DMC Document Submission Guidelines). |
| **Important Concepts** | Effective 2/01 the Image Processing System (IPS) is the official repository for imaged versions of the plan and participant paper files. Paper case files are no longer maintained as participant records. |
| **Guidance** | Indexing Guidelines (IPS)<br>IPS Users Manual |
| **Procedure Owner** | DMC POC |

## Click here for more information

TP 34.2: Action Steps: Submit Documents for Imaging

## TP 34.2 Action Steps: 06/29/2001
## Submit Documents for Imaging

**TPD/FBA**

1 Upon receipt of documents that require imaging, prepare a *IPS Scanning Request - Participants (IPS-part.doc)* or *IPS Scanning Request - Plan (IPS-plan.doc)* as appropriate and batch all related documents together following TP 34.3: DMC Document Submission Guidelines.

2 If documents have been indexed by other case team members, briefly review to ensure that the TP 34.3: DMC Document Submission Guidelines were followed.

3 Make any necessary adjustments.

4 Submit to the DMC window.

**DMC**

5 Assigns barcode tracking number to the IPS Scanning Request (participant or plan). Provide a copy to POC at window or through inter-office mail.

**Note** The POCs use the barcode on the IPS Scanning Request to access the DMC tracking system and verify that the status of the submitted request.

**TPD/FBA**

6 Within a reasonable period of time after submission, follow TPD management guidelines for performing a spot check on IPS for submitted documents. FBAs follow the plan's TPD's management guidelines.

7 If any errors are noted, work with DMC to resolve until all required documents are properly indexed and available in IPS.

# TP 34.3 DMC Document Submission Guidelines 06/29/2001

- Keep Participant and Plan Documents separate.
- Ensure previously scanned documents are not mixed in with new submissions.
- Review material carefully before submitted for imaging to eliminate multiple copies of documents.
- Legibly complete the IPS Scanning Request (participant or plan).
- Participant Documents - Group multiple documents for the same participant or beneficiary together.
- Participant Documents - Annotate each participant document with the SSN and case number written **in black ink**.

| Type of Document | Usage Comments |
|---|---|
| **Participant** | • Separate unscanned from scanned documents.<br>• Submit only unscanned documents.<br>• Match the plan number and SSN number matches from the outside and inside of a plan folder (applicable when hard copy participant folders are being submitted).<br>• May submit an unlimited number of documents with one IPS Request Form.<br>• Use *IPS Scanning Request - Participants (IPS-part.doc).* |
| **Part Ad-Scan (Loose Docs)** | • For multiple participants in the same plan, segregate and group the documents by participant and plan number.<br>• May submit up to 50 documents with one IPS Request Form.<br>• Use *IPS Scaning Request - Participants (IPS-part.doc).* |
| **Plan Add-scans (Loose Docs)** | • Make sure the correct plan index bar code sheet is attached to the plan documents to be scanned. **(Make sure it is correct and has eight digits)**<br>• If returning Plan file(s), do not place unscanned plan documents inside the plan file case(s).<br>• May submit up to 25 documents with one IPS Request Form.<br>• Use *IPS Scanning Request - Plan (IPS-plan.doc).* |
| **Missing Participant Project (MPP)-Participants** | • For multiple participants in the same plan, segregate and group them by participant and plan number.<br>• Write the plan number and SSN across the top of each document (**in black ink only**).<br>• May submit up to 50 documents with one IPS Request Form.<br>• Missing participant documents are only submitted by TPD5. |

- Use *IPS Scanning Request - Participants (IPS-part.doc).*

**Missing Participant Project (MPP)- Plans**

- Attach the correct Plan Index Bar Code sheet to the plan document to be scanned.
- Write across the top of the first page of the unscanned plan document the plan number and SSN (**in black ink only**).
- Missing participant documents are only submitted by TPD5.
- Use *IPS Scanning Request - Plan (IPS-plan.doc).*

## TP 34.4 Form Letters, Memos, etc

**09/29/2000**

# TP 35. Update FBA Workplans

TP 35. Overview

TP 35.1 Update FBA Workplan

TP 35.2 FBA Workplan Guidelines

Forms, Letters, Memos, Etc.

## TP 35. Overview

**08/31/2001**

This FBA assignment is done after PPD or CFND has requested the procurement of an FBA, in anticipation of the plan's termination and trusteeship by PBGC. Once the plan is assigned to an FBA and a TPD case team, the FBA Workplan is developed by the team, see Process 7.1: Initiate TPD Involvement, and Process 8.2 Assign TPD Case Team. These plans are generally referred to as FBA plans in IOD. The FBAs primary responsibility is participant processing, although they work closely with the TPD Case Team on any assigned case processing activity.

This FBA assignment is done as the plan transfers from PPD or CFND to the TPDs. Once the plan is assigned, the FBA Workplan is developed by the team, see Process 8.2 Assign TPD Case Team. The FBA Workplan is a tool to plan and track the processing steps of each case and is updated as of the close of each quarter. Each quarter, the team meets to review the progress of the case and works together to review and update the FBA Workplan. The updated FBA Workplan is forwarded to the FBA Manager for approval. Once approved and returned to TPD Management, it is submitted to the FBA COTR Coordinator in the Management Coordination Unit (MCU), and provided to the entire case team and the FBA COTR.

## TP 35.1 Update FBA Workplan

10/20/2000

Action Steps

| | |
|---|---|
| **Purpose** | Report on completed case processing activities and establish target dates for future case processing for FBA plans. |
| **Time Reporting (BMPRS)** | Administrative Support<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Status of case from case team members. |
| **Process Output and Recipient** | Quarterly updated FBA Workplan, approved by TPD Manager, concurred with by FBA Manager, and submitted to FBA COTR Coordinator (MCU). |
| **Control Issues** | FBA Workplans are approved and concurred with through e-mail. Signatures are not required. Use FORWARD in the e-mail approval/ concurrence process so that the FBA Workplan (an electronic file) is attached. REPLY to e-mail will not accomplish this. |
| **Important Concepts** | Schedule team meetings with sufficient time to allow the workplan to be updated, approvals received and submissions made by the quarterly deadline. TPD and FBA Managers are involved in the team meeting process. FBAs have cases with each TPD, and must participate in the case team discussion regarding workplan updates so that they can effectively plan and coordinate the timelines for all their cases.<br>**Timing:** Updated FBA Workplans (with FBA concurrence) are due to the FBA COTR Coordinator (MCU) by the 15th day of the month after the close of the prior quarter. Updated FBA Workplans are due to the FBA Manager for concurrence by the 10th of the month after the close of the prior quarter. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team, Team Leader has lead responsibility |

## Click here for more information

TP 35.1 Action Steps: Update FBA Workplan

## TP 35.1 Action Steps

10/20/2000

## Update FBA Workplan

### Team Leader

1 Schedule Case Team Meeting, including FBA staff. Use video conferencing if available, if not, use telephone conferencing for FBA staff. Ensure that all team members have copies of the FBA Workplan to review and are available for meeting, including TPD and FBA Management.

**Recommendation:** TPDs may find it useful to schedule one long meeting with each FBA to discuss all FBA Workplans they have with the particular FBA. Each plan's case team members attend for the discussion regarding their particular plans.

### Case Team

2 **Meeting**: Review the *FBA Workplan (FBAWorkplan.xls)* and ensure that it reflects all completed activities for the previous quarter and establishes target dates for accomplishing future activities, particularly in the next two fiscal year quarters. Observe TP 35.2: FBA Workplan Guidelines.

3 Update the workplan and route to TPD Management designee (DM, ADM, or Team leader) for review and approval.

### TPD Management designee

4 Review the updated FBA Workplan, and once approved **FORWARD** the electronic file via e-mail to the FBA Manager (and cc TPD Management members) for review and approval.

### FBA Manager

5 Review final updated FBA Workplan and concur. Communicate concurrence through an e-mail message (using **FORWARD)** returning the transmittal e-mail back to the TPD Management designee, concurring with the attached workplan as submitted.

**Note** The FBA Manager and staff will have participated in the team meeting and planning of updated target dates to the workplan.

### TPD Management designee

6 **FORWARD** the approving e-mail from the FBA Manager (with the final approved updated FBA Workplan and FBA Manager concurrence) to FBA COTR Coordinator (MCU), with cc's to all case team members and the FBA COTR.

**Update FBA Workplans**

## TP 35.2 FBA Workplan Guidelines

**10/20/2000**

s

| Questions | Answers |
|---|---|
| When is the updated FBA Workplan due to the FBA for concurrence? | • 10/01 through 12/31 - due 10/10 *<br>• 01/01 through 03/31 - due 01/10 *<br>• 04/01 through 06/30 - due 04/10 *<br>• 07/01 through 09/30 - due 07/10 * |
| When is the updated FBA Workplan with FBA concurrence due to the FBA COTR Coordinator (MCU)? | • 10/01 through 12/31 – due 10/15 *<br>• 01/01 through 03/31 – due 01/15 *<br>• 04/01 through 06/30 – due 04/15 *<br>• 07/01 through 09/30 – due 07/15 * |
| Who receives the final FBA Workplan? | Updated FBA Workplans are submitted by TPD Manager to FBA COTR Coordinator (MCU), all case Team Members and the FBA COTR. |
| What changes may we make to the workplan? | • Address any special circumstances, including tasks not specifically addressed in the FBA Workplan, using footnotes and comments in the final section.<br>• Do not make any other changes in the FBA Workplan. |
| What type of dates do we use for Target and Completion Dates? | • Target and Completion Dates are required for numbered task items.<br>• Target and Completion dates for subordinate line items is at team's option.<br>• Target dates for first two quarters (minimum) specified by date/month.(02/17)<br>• Target dates for 3rd and 4th quarters specified by quarter. (02/2004)<br>• Target dates beyond 12 months specified by FY. (FY 2004) |
| What team members do we identify in the FBA Workplan? | All case tem members and their telephone numbers or extensions should be listed on the FBA workplan. Includes:<br>• Auditor<br>• Actuary<br>• PLS/PBA<br>• FBA<br>• Team Leader<br>• FBA COTR |

| | |
|---|---|
| | • Technical Monitor<br>List the individual's name when responsible for a line item.(Ex. Jane Doe, rather than actuary.) |
| Who is responsible for updating the FBA Workplan? | The case's Team Leader (per CAS assignment) is responsible for ensuring that the FBA Workplan is updated each quarter. |

* or next business day if the date falls on a weekend or Federal Holiday

# TP 36. Prepare Annual Update Letter

TP 36. Overview

TP 36.1 Prepare Annual Update Letter

Forms, Letters, Memos, Etc.

## TP 36. Overview

**02/18/2005**

Providing regular written updates to our customers about the status of their plan is one of the many ways IOD demonstrates its commitment to excellent customer service, and is part of PBGC's ongoing communications with customers. (See the overview in TP 33: Locate Customer Addresses.) Following trusteeship of a pension plan, about once a year following the date customers receive their Trusteeship Notification Packages (see Process 9.13 Notify Participants), the case team meets to review the status of the case and to develop the content of the Annual Update Letter (ALG 545).

TPD Management reviews their case inventory each quarter and identifies the targeted plans and case teams for the upcoming quarter.

Annual Update Letters are generally sent to all non-payees in all estimated plans, as identified by the TPD Management. The Annual Update Letter generally provides the status of the case and may also be used to assist in efforts to locate unlocatable participants. When a plan is close to sending out Benefit Determination Letters, the TPD Management may determine that an Annual Update Letter is not appropriate.

## TP 36.1 Prepare Annual Update Letter 08/31/2001

Action Steps

| | |
|---|---|
| **Purpose** | To inform participants of the progress made since PBGC trusteed their pension plan. |
| **Time Reporting(BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Identification of plan to receive an Annual Update Letter from TPD Management.<br>Status of case from case team members. |
| **Process Output and Recipient** | Final content of Annual Update Letter (ALG 545) to be mailed to non-payees. |
| **Control Issues** | Case team determines the content of annual update letters. Division Manager concurs with the provision, timing and content of the Annual Update Letter. |
| **Important Concepts** | Ongoing communication with participants promotes good customer service with deferred vesteds. The annual update letter may be used to locate unlocatable participants by asking other plan members for their assistance. These ongoing communication efforts with the participant and returned mail operations reduce the likelihood of the participant later becoming unlocatable.(See TP 04: Process Address Changes and TP 33: Locate Customer Addresses.)<br>**Timing:** Annual update letter provided during the period beginning when the Trusteeship Notification Packages are sent through the date Benefit Determination Letters are provided. The Annual Update Letter is provided around the first anniversary of sending the Trusteeship Notification Packages, and annually thereafter. If a plan is very close to sending BDLs(expected to be mailed within 6 months or less), an Annual Update Letter may not be necessary. Case teams may also consider the timing the Annual Update Letter so that is it sent at a different time than the deferred vested's newsletter(s). |
| **Guidance** | N/A |
| **Procedure Owner** | TPD Case Team, Team Leaders have lead responsibility |

## Click here for more information

TP 36.1 Action Steps: Prepare Annual Update Letter

## TP 36.1 Action Steps: 08/31/2001

## Prepare Annual Update Letter

**Team Leader** - quarterly

1 Verify the plan is still estimated and that Benefit Determination Letters are not scheduled to be issued for at least six months.

2 Schedule case team meeting, including FBA staff (using video or teleconferencing). Remind each team member to familiarize themselves with the status of the case as a whole and their particular responsibilities for the case.

3 Verify with Management that an Annual Update Letter (ALG 545) is appropriate for the plan, and that the recipients are all non-payee customers.

**Case Team**

4 **Meeting**: Review the Annual Update Letter (ALG 545), and determine the content of the letter. If the case has unlocatable participants, consider incorporating the list of unlocatable participants into the letter or as a separate attachment in ALGS

5 Agree as a team on the content of the Annual Update Letter (ALG 545), then submit to TPD Division Manager for concurrence.

6 After TPD Manager concurs on the letter, the mail POC for the case is responsible for the preparation and mailing of letter of letter through ALG, see TP 15: Prepare and Mail Letters.

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

# TP 37. Develop and Implement Customer Recovery Action Plan

TP 37. Overview
TP 37.1 Develop Customer Recovery Action Plan
TP 37.2 Implement Customer Recovery Action Plan
TP 37.3 Customer Recovery Action Plan Checklist
TP 37.4 Customer Recovery Action Plan
Forms, Letters, Memos, Etc.

## TP 37. Overview

**09/28/2001**

Two of the essential components to IOD's commitment to excellent customer service are:

**Prevention** of customer concerns and unmet expectations; and

**Swift smooth recovery** when an unforeseen incident occurs.

It is IOD's goal to prevent **all** potential customer problems and reduce their impact if they do occur. This technical procedure is followed if a potential customer problem is foreseen or has occurred that impacts or will impact more than **50** participants or may negatively reflect upon PBGC.

Although various controls exist to prevent mistakes, anomalies may nonetheless occur due to processing or system failures. Each situation will be unique and responsible staff immediately consults with the responsible division management if they believe there is a plan that has a potential or realized problem.

Responsible staff is any person who has knowledge of a possible or actual problem involving several participants in a specific plan or plans. It may involve a plan at any stage of processing, therefore, the manager(s) may be from PPD, TPD and/or TSD.

Regardless of whether IOD is being proactive to prevent a possible incident or is reacting to a specific occurrence, our response is first the rapid development and implementation of a "Customer Recovery Action Plan". After completion we conduct a de-briefing of all parties and summarize our findings to eliminate similar future occurrences and provide an action plan to pursue or implement any recommendations.

IOD's focus is to first fix the situation and then to prevent future incidents. Staff will generally do the following:

- Assess situation and scope
- Notify the appropriate internal parties, including as appropriate:
  - Case Team
  - Division Manager (based on case ownership: TPD, PPD and/or TSD)
  - Customer Service Center (CSC)
  - IOD Management as appropriate
  - Support Divisions needed (ex.: TSD for ALGS, offsite fulfillment/DMC and CSC)
  - Large Case Coordinator (if a large case)
- Develop and implement plan for resolution
  - Develop Customer Service Script
  - Develop case-specific ALGS letter(s)
  - Identify and obtain additional resources needed
- Document problem and successful resolution to the plan file (IPS)
- Debrief involved parties and make recommendations for change to prevent similar incidents, including process or system controls, staff training etc.

**Develop and Implement Customer Recovery Action Plan**

## TP 37.1 Develop Customer Recovery Action Plan 09/28/2001

Action Steps

| | |
|---|---|
| **Purpose** | Determination that a potential problems exists or could occur that affects a significant number of participants and can be rectified or prevented with timely action. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits (TPD/TSD)<br>FBA Administer Benefits (TPD/TSD)<br>PBA Administer Benefits (TPD/TSD)<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Recognition or anticipation by a staff member of an event that has or may negatively impact a group of customers, generally 50 or more. |
| **Process Output and Recipient** | Case specific Customer Recovery Action Plan developed and approved by responsible Division Manager, with concurrence from supporting divisions/departments. |
| **Control Issues** | Be alert to the potential for customer problems and initiate action whenever possible to prevent their occurrence. Customer Recovery Action Plans are fully documented by memo to the plan file (IPS). |
| **Important Concepts** | The decision to notify each successive level of management is made according to reporting levels and continues based on the significance/scope of the situation. Tailor the Customer Recovery Action Plan to fit each unique situation. Division Managers are responsible for approving the final plan. Perform thorough analysis to determine how the incident occcured and recommend or implement processing or system changes to prevent future occurrences.<br>**Timing:** Provide alternate recommendations to Division Manager within 1 business day of recognition of event. Participation in a Customer Recovery Action Plan generally takes precedence over other processing activities, consult with management as needed to reschedule other priorities. |
| **Guidance** | N/A |
| **Procedure Owner** | PPD staff, TPD/FBA Case Team, other involved staff |

## Click here for more information

TP 37.1 Action Steps: Develop Customer Recovery Action Plan

## TP 37.1 Action Steps: 09/28/2001

## Develop Customer Recovery Action Plan

1 Assess the nature of the problem and its impact. Determine the number of affected participants and how they are or will be impacted by PBGC's action. (Ex. - incorrect information provided, date or amount of payments issue, improper payments by prior administrator.)

**Note** Some customer problems may occur due to actions by external parties (Ex: prior paying agent not making promised payments or making additional payments in error). IOD assumes responsibility for initiating a Customer Recovery Action Plan regardless.

2 Notify Division Management and case team members.

3 Management establishes team meeting. The team develops alternate response scenarios and determines preferred recommendations, including identification of specific staff to manage these responses. Use TP 37.3: Customer Recovery Action Plan Checklist for guidance about responsible parties. See also TP 37.4: Develop and Implement Recovery Action Plan - Examples for guidance on developing alternate responses.

4 Brief Division Manager of situation and recommended action. If situation involves a case that is still pre-trusteeship, ensure that the PPD and TPD managers are apprised. One manager may assume responsibilty for overseeing the Customer Recovery Action Plan or they may jointly assume this reponsibility.

5 The responsible Division Manager approves/selects the Customer Recovery Action Plan and ensures all relevant parties and activities have been identified and notified to ensure a smooth operation.

**Develop and Implement Customer Recovery Action Plan**

## TP 37.2 Implement Customer Recovery Action Plan 09/28/2001

Action Steps

| | |
|---|---|
| **Purpose** | Implement approved Customer Recovery Action Plan. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits (TPD/TSD)<br>FBA Administer Benefits (TPD/TSD)<br>PBA Administer Benefits (TPD/TSD)<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Customer Recovery Action Plan approved by Division Manager. |
| **Process Output and Recipient** | As described in action plan, may include:<br>• incident specific Customer Service Center scripts provided to CSC;<br>• incident specific customer letter (ALGS) with apology and resolution mailed to customers; and/or<br>• benefit payment related action/correction taken in PRISM. |
| **Control Issues** | Customer Recovery Action Plans are fully documented by memo to the plan file (IPS). Name the point of contact in any customer letter. |
| **Important Concepts** | Perform thorough analysis to determine how the incident occurred and recommend or implement processing or system changes to prevent future occurrences.<br><br>**Timing:** Provide alternate recommendations to Division Managers within 1 business day of recognition of event. Implement Customer Recovery Action Plan immediately upon approval. Develop CSC Scripts and distribute to staff immediately. Develop ALGS letter(s) immediately and coordinate with PRISM ALGS administrator to establish the earliest possible mail date, see TP 15: Prepare and Mail Letters. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD/FBA Case Team, other involved staff |

## Click here for more information

TP 37.2 Action Steps: Implement Customer Recovery Action Plan

## TP 37.2 Action Steps: 09/28/2001

## Implement Customer Recovery Action Plan

Team members and specific responsibilities are outlined in the approved Customer Recovery Action Plan.

1. Team members follow actions and timeframes according to the approved Customer Recovery Action Plan.
2. Notify responsible Division Manager upon completion of each action in the plan.
3. Division Manager verifies that process has been completed according to plan and monitors customer feedback from the phone POC's and CSC for two weeks, or until related calls or inquiries abate, if later.
4. Within 14 days of completion, establish a meeting with all involved parties to analyze the incident that occurred or was averted. Assess as a team whether recommendations for system enhancements/development or operational changes (procedures, staffing, training) are appropriate.
5. Within 30 days of completion, the Division Manager prepares a memo to the file describing the Customer Recovery Action Plan, including:
   - the incident;
   - the approved Customer Recovery Action Plan;
   - results of the plan - e.g. number of customer inquiries before and after the plan was implemented;
   - copy of any customer scripts;
   - congressional or press inquiries, contacts from the PRO's office; and/or
   - results of analysis including whether changes are being made (e.g. reviewing procedures with staff, scheduling systems training) and/or recommended (e.g. system development/enhancement) and plans to accomplish these recommendations.
6. Provide copy of the final memo to the IOD Director (attachments do not need to be provided) and ensure the complete memo is imaged to the plan file (IPS).

## TP 37.3 Customer Recovery Action Plan Checklist 09/28/2001

| Operation/ System | Staff | Circumstances |
|---|---|---|
| Customer Service Center (CSC) | CSC Analyst (TSD), CSC Supervisor(s), TSD Manager | Incident that may trigger calls customer inquiries. |
| Document Management Center (DMC) | DMC Analyst (PSB/TSD), PSB Chief, TSD Manager | Incident requiring local fulfillment, or special mail or data entry processing. |
| Automated Letter Generation System (ALGS) | ALG System Administrator, PSB Chief, TSD Manager | Incident requiring ALGS related research, assistance with expediting a special ALGS mailing, including off-site fulfillment |
| OASD | OASD Manager and Supervisors | To provide necessary system support, including LAN/WAN activity, and/or to coordinate support from IRMD. |
| OPSS | OPSS Manager | To coordinate legal or policy support from OPSS, CPRD and/or OGC. |
| PPD | PPD Manager and Supervisor | Incident involving a plan that is still assigned to PPD. **-1-** |
| IOD Management | Department Director, Deputy Director | As judged necessary by Div. Manager based on case specifics. **-1-** |
| Office of Executive Director | Chief Operating Officer, Office of Executive Director | As judged necessary by Dept Director or Deputy based on case specifics. **-1-** |
| CPAD | Department Director | To prepare for press or congressional inquiries and/or provide specialized communication pieces. As judged necessary by Div. Manager based on case specifics. **-1-** |
| Problem Resolution Office | PRO | As judged necessary by Div. Manager based on case specifics. **-1-** |

**-1-** Typically for information only, not action.

## TP 37.4 Customer Recovery Action Plan

09/28/2001

**Examples of possible customer incidents that will elicit action.**

Although each plan is developed individually, the following steps are likely required with most incidents involving customers:

- Determine a TPD/FBA POC for customers;
- Name POCs in any customer communications;
- Notify the Customer Service Center about incident and all Customer Recovery Action Plan activity; and
- Develop script for CSC and other team members.

**Examples**

| Examples: Customer Scenarios: pre and post-incident | Sample Customer Recovery Action Plan | Sample Analysis and Recommendation |
|---|---|---|
| **post:** ALG Letter intended for one customer mistakenly mailed to multiple participants.<br>(user error). | Provide listing of affected customers.<br>Develop brief letter of apology and retraction and mail immediately. | Evaluate whether ALG letter request process followed IOD's procedure.<br>TPD Management revise their internal ALG authorization process.<br>Retraining of staff. |
| **post:** Duplicate payments (overpayments) determined when PPA mistakenly pays retiree benefits after plan assumption date, and PBGC pays benefits.<br>(user, system or ppa error) | Provide listing of affected customers.<br>Adjust payments in PRISM to suspend payments for subsequent month and then resume.<br>Draft brief letter of explanation with date of next payment and that no action is required. | Evaluate whether communication with prior paying agent was correct and provided according to IOD's procedure.<br>Determine how error occurred, reviewing correct procedures with staff as necessary. |
| **pre or post:** Expected payments are delayed due to unforseen system or processing error(s).<br>(user or system error) | Provide listing of affected customers.Prepare off-cycle payment requests.Draft brief letter of explanation and apology for delayed payment and provide new date of payment (if action cannot be taken in time to provide timely payments through off-cycle process). | Evaluate whether processing or system errors caused incident.<br>Management will review correct procedures with staff if cause is determined to be processing error(s). |

| | | |
|---|---|---|
| **pre:** Customers have been improperly overpaid by ppa or plan administrator - exs. incorrect entitlement determinations, incorrect calculations.<br><br>(pre-PBGC error) | Consult with OPSS as necessary for decisions about novel payment issues.<br><br>Determine correct benefit amounts for individuals in pay at DOTR.<br><br>Prepare advance letter with explanation of benefit adjustments.<br><br>Notify CSC in advance of mailing, and CPAD and/or PRO depending on scope.<br><br>Prepare for customer inquiries on this topic when planning a participant meeting (See TP 14: Hold Participant Meeting). | |

## TP 37.5 Forms, Letters, Memos, etc.

**09/28/2001**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

**None**

## TP 38. Administer PRISM Integrator Application

This IOD technical procedure is maintained in hard copy in TSD and describes:

- Need for this PRISM application and its function in benefit payment processing
- How to generate transactions and create file for the Paying Agent
- How to coordinate error correction with the Data Correction Team (TSD)
- How to report activities and final transaction disposition

This Technical Procedure is available to the responsible parties. Anyone else needing to view this procedure should contact the TSD Manager.

# TP 39. Prepare Early Estimated Benefits for a Case

TP 39. Overview

TP 39.1 Prepare Benefit Estimation Tool for Early Case Estimates

TP 39.2 Issue Early Estimated Benefits for a Case

Forms, Letters, Memos, Etc.

## TP 39. Overview

**03/19/2004**

PBGC recognizes the importance of providing customers with accurate and timely benefit information ***as soon as possible***. In addition to providing individual benefit estimates when requested by customers (see TP 32: Provide Estimated Benefit Calculations), PBGC automatically determines estimated benefits for **all** non-payee participants in a case and notifies each participant of their estimated benefit amount. -1-

PBGC notifies participants with estimated benefits below the cash-out level ($5,000 or less as of DOPT -2-) that they are eligible for an immediate lump sum distribution **or** a deferred annuity. Once the final valuation is completed, underpayment/overpayments are determined and Benefit Determination Letters are prepared and issued to all participants. See Process 19: Issue BDLs and Make Adjustments to Payments for more information.

After the participant data audit and plan abstract are completed, the actuary begins completion of the "final" Benefit Estimation Tool (BET) -3-. With the audited participant database, the BET is used to develop highly accurate estimated Title IV benefits for all participants in the plan.

Using BET, the actuary prepares a print file for loading to ALG. The PLS, PBA and/or FBA prepares estimated benefit letters (EBLs) to be mailed to the non-payees. The BOYLE attachment is provided to all, and the Form 720: Application for Lump-Sum Payment is provided as appropriate.

Eligible customers may respond by electing distribution of their estimated lump sum, and are processed in accordance with TP 20: Put New Payee into Pay Status.

---

**Footnote** -1- Effective for plans with a DOTR on or after 10/1/2001.

**Footnote** -2- Participants whose lump sums are less than $200 (including interest) are not eligible for annuities. These benefits are paid automatically without an application if participant data, including address, are reliable (see IOD Policy Bulletin 99-6: Payment of Very Small Benefits).

**Footnote** -3- Virtually all plans will use BET to develop these estimates, however, exceptions may be determined on a case by case basis by management, documented with a memo to the case file from the TPD Division Manager.

**Prepare Early Estimated Benefits for a Case**

## TP 39.1 Prepare Benefit Estimation Tool for Early Case Estimates 12/19/2001

**Action Steps**

| | |
|---|---|
| **Purpose** | Generate the necessary files and reports to determine estimated benefit amounts<br>(Title IV benefit) for a plan's non-payees, prior to completion of the actuarial valuation. |
| **Time Reporting (BMPRS)** | FTE Actuarial Valuation<br>Contractor Actuarial Valuation<br>FTE Review of Actuarial Contractor Actuarial Valuation<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required input and Source** | Final Participant Database, final plan abstract. |
| **Process Output and Recipient** | Benefit Statement Print File from the Final BET, Estimated Benefit Listing for all non-payees. |
| **Control Issues** | This step is initiated after completion of the plan abstract (Process 12.2: Prepare Plan Abstract) and the participant data audit (see Process 12.6: Build Participant Database.) |
| **Important Concepts** | Estimated Benefits are developed (using BET) for all cases with a DOTR on or after 10/1/2001, unless another method is determined by TPD Management and documented to the case file (IPS). The estimate is of the Title IV Benefit (not the termination benefit) for all non-payees. These "early"estimates facilitate PBGC's offering an immediate lump-sum distribution if a non–payee is eligible for a cash-out, rather than requiring they wait until attainment of early or normal retirement age, or PBGC's issuance of Benefit Determination Letters (after the plan's actuarial valuation is complete). |
| **Guidance** | ERISA Sections 4022, 4044 and PBGC Regulations, including:<br>29 CFR 4022: Benefits Payable in a Single-Employer Plan<br>Subpart A - General Provisions, Guaranteed Benefits<br>Subpart B - Limitations of Guaranteed Benefits<br>Subpart D - Benefit Reductions in Terminating Plans<br>(for copies of regulations, see Legal Info on PBGC's home page: www.pbgc.gov)<br>ACT1 Toolkit User's Manual |
| **Procedure Owner** | Actuary, contract actuary |

## Click here for more information

TP 39.1: Action Steps: Prepare Benefit Estimation Tool for Early Case Estimates

**Prepare Early Estimated Benefits for a Case**

## TP 39.1 Action Steps: 03/08/2002

## Prepare Benefit Estimation Tool for Early Case Estimates

The plan abstract is an output of Process 12.2: Prepare Plan Abstract. The Participant Database is an output of Process 12.6: Build Participant Database. Once these have been completed, as applicable (case has DOTR on or after 10/1/2001) the team actuary initiates this process. If a contract actuary is involved in this process, the case team actuary is responsible for the review and approval of the work product.

**Case Actuary/ Contract Actuary**

1 Use Valtool to calculate estimated Title IV Benefit amounts per ERISA 4022 (and 4044 if possible), implementing appropriate limitations (e.g., accrued at normal limitation, maximum guaranteeable benefit, and phase-in rule).

2 Program the BET to produce BOYLE attachments for mailing with the estimated benefit letters (EBLs) for participants.

**Case Actuary**

3 Sample the estimated benefit amounts and BOYLE attachments to ensure quality and accuracy.

4 Provide approved samples to TPD Management for approval, documented to case file (IPS).

5 Generate listings for five groups of non-payees:

- those eligible to apply for an estimated de-minimis lump sum distribution with an annuity option;
- those eligible for an estimated lump sum without completing an application (less than $200 including interest);
- those not eligible for a lump sum but entitled to an annuity benefit;
- non-vested participants (i.e. who may *only* be entitled to a 4022(c) benefit); and
- non-members (TPD Management may decide to issue early Benefit Determination Letters to these individuals, see Process 19.1 Review List of Participants Eligible for Early BDLs.)

**Note:** These listings contain the estimated monthly Title IV benefit at Normal Retirement Date, the estimated monthly Title IV benefit at Earliest Retirement Date, and the estimated value of the Title IV Benefit payable as a lump sum.

6 Use the BET to generate a Benefit Statement Print File.

7 Submit the Benefit Statement Print File to OASD to load on ALG. Submit the generated listings to the PLS/FBA for use in assigning appropriate letters on ALG.

8 Meet with PLS, PBA and FBA staff as appropriate to review the participant listings and results and review the BOYLE attachment designed for the plan.

# TP 39.2 Issue Early Estimated Benefits for a Case 12/19/2001

Action Steps

| | |
|---|---|
| **Purpose** | Provide accurate estimated benefit amounts to all participants not in pay status. Notify participants with de-minimis benefits of their eligibility for an immediate lump sum distribution or a deferred annuity. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefit Calculations<br>FBA Estimated Benefit Calculations<br>PBA Estimated Benefit Calculations<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Benefit Statement Print File, Estimated Benefit Listing from actuary. |
| **Process Output and Recipient** | Estimated Benefit Letter (EBL) & BOYLE attachment to all customers not already in pay status. EBL includes Form 720: Application for Lump Sum Payment for customers with benefits eligible for cash-out, offering them the option of an immediate lump sum distribution or a deferred annuity. |
| **Control Issues** | Approval of Estimated Benefit Letters (EBLs) follow TPD and FBA guidelines for approval of BDLs. |
| **Important Concepts** | Estimated Benefit Letters (EBLs) are based on a final participant database and include a BOYLE attachment in support of the benefit amount(s) provided. Although estimated benefits are not subject to appeal, the participant may write in with corrections/additions to the date used in the calculation if certain information is not accurate. (They will have appeal rights when the Benefit Determination Letter is issued.) The lump sum distribution amount and the Form 720: Application for Lump-Sum Payment is sent to participants eligible for a cash-out, except as otherwise provided for "very small benefits" (IOD PB 99-6). These customers may apply for their pension benefits and will be processed into pay in accordance with existing procedures, see TP 20: Put New Payee into Pay Status. Customers who receive an estimated lump sum may subsequently receive a residual benefit amount, after the BDL is issued.<br>**Timing:** PBGC's goal is to provide estimated benefit amounts to participants in most plans approximately 1 year after trusteeship (DOTR). |
| **Guidance** | PBGC Operating Policy Manual 5.4-6: Annuity Options for Lump Sum Benefits<br>IOD Policy Bulletin 99-6: Very Small Benefits<br>ALG Letters (electronic manual in IOD Manuals System) |
| **Procedure Owner** | PLS, PBA, FBA |

## Click here for more information

TP 39.2 Action Steps: Issue Early Estimated Benefits for a Case

## TP 39.2 Action Steps: 12/19/2001

## Issue Early Estimated Benefits for a Case

Follow the guidance outlined in TP 15: Prepare and Mail Letters.

1. Review the categories of non-payees received from actuary and identify the appropriate EBL (estimated benefit letter) from ALG to use for each category.
2. Review PRISM to verify that addresses are available or that appropriate activity has been taken to locate current addresses for any customer missing an address or with an invalid address. Refer to TP 33: Locate Customer Addresses.
3. Issue Estimated Benefit Letter(s) using ALG (300 series).

**Note:** ALG will automatically provide the required attachments, BOYLE attachment for all, and a Form 720: Application for Lump Sum for those eligible for a cash-out .

4. Process any returned Form 720's according to TP 20: Put New Payee into Pay Status.

## TP 39.3 Forms, Letters, Memos, etc.

**12/19/2001**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

# TP 40. Change Customer Data

TP 40. Overview

TP 40.1 Request Customer Data Change

TP 40.2 Initiate Interdepartmental Data Change Requests

TP 40.3 Data Change Request Guidelines

Forms, Letters, Memos, Etc.

# TP 40. Overview

**07/23/2002**

Benefit processing staff (PLS, PBA and/or FBAs) maintain primary responsibility for customer records in PRISM, and generally implement changes and updates as needed, using the online PRISM applications. There are some instances where a necessary data change cannot be made through the online PRISM applications. Also, when a large volume of changes is needed, it may be more efficient for a TPD/FBA to request that the changes be made through the following process, rather than through using PRISM online applications.

The Data Change Team (DCT) in OASD coordinates with IRMD to accomplish the changes requested by the TPDs and FBAs, following a specific weekly schedule and process.

## Customer Data Changes

The types of data changes provided through this process include:

- Customer Linking
- Role Changes
- Status Changes
- Plan Number Changes
- Deletion of customer records
- Undeletions

## Weekly Schedule and Process

Each week, IOD staff prepare a summary of the data changes needed, using a specific spreadsheet for each ***type*** of data change. The spreadsheets are submitted by e-mail to the Data Change Team e-mail address.

DCT bundles all the users' requests into a single spreadsheet for each type of data change requested. DCT converts the consolidated spreadsheets to the required file format and then forwards these files to IRMD. IRMD staff executes the changes and notifies DCT by e-mail upon completion. DCT sends a notice back to each requestor that changes have been made.

### Verifying Expected Changes

Benefit staff requesting the data changes are responsible for ensuring their data changes have been made, and taking any necessary follow up action.

**Prepare Early Estimated Benefits for a Case**

## TP 40.1 Request Customer Data Changes

**07/23/2002**

**Action Steps**

| | |
|---|---|
| **Purpose** | Initiate request for data changes to PRISM. |
| **Time Reporting (BMPRS)** | FTE Estimated Benefit Calculations<br>FBA Estimated Benefit Calculations<br>PBA Estimated Benefit Calculations<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Determination that change(s) are needed to customer record(s) in PRISM. |
| **Process Output and Recipient** | Data Change Request Spreadsheet(s) prepared and submitted to Data Change Team via e-mail. |
| **Control Issues** | E-mail requests submitted to the DCT are copied to the case Team Leader (per CAS assignment). The necessary data elements for each type of data change are enumerated in the specified spreadsheet.<br>TPDs may establish guidelines for peer or management review of these data change requests, prior to submission to DCT.<br>Requestors are responsible for ensuring the requested data changes have been made, not the DCT.<br>Spreadsheets and e-mails relating to the changes are not required to be imaged to the participant's file in IPS. |
| **Important Concepts** | Accurate and complete spreadsheets will avoid delays in accomplishing data changes. Submit request and spreadsheet to DCT e-mail address.<br>Timing: Data changes follow a weekly schedule. Spreadsheets received by DCT by noon on Monday (first business day of the week, if later) are in PRISM database on Friday. DCT provides notice to requestors that changes have been made no later than Monday of the following week. Upon receipt of DCT's notice, requestors are responsible for verifying that changes were made (initial and date each verified change) within one month of receipt of DCTs notice, and retaining these hard copies for 12 months. |
| **Guidance** | N/A |
| **Procedure Owner** | PLS, PBA, FBA |

TP 40.1 Action Steps:Request Customer Data Changes

## TP 40.1 Action Steps: 07/23/2002
## Request Customer Data Changes

1 Identify the data elements for affected customers in one or more plans. Refer to TP 40.3: Data Changes Guidelines as needed.

2 Create the appropriate spreadsheet(s) as follows:

| Needed data change is..... | Prepare..... |
|---|---|
| Customer Linking | *Roles/Linking - Data Change Request (Rolelink.xls)* |
| Role Changes | *Roles/Linking - Data Change Request (Rolelink.xls)* |
| Status Changes | *Customer's Status - Data Change Request (Status.xls)* |
| Plan Number | *Customer's Plan Number - Data Change Request (Plannumber.xls)* |
| Deletion of customer records | *Delete Customer Record - Data Change Request (Deletion.xls)* |
| Undeletions | *Undelete Customer Record - Data Change Request (Undeletion.xls)* |

3 Carefully review spreadsheet for completeness and accuracy. Follow TPD guidelines for peer or management review. FBAs follow plan's TPD guidelines.

4 After preparation and review, submit the spreadsheet(s) to the Data Change Team via e-mail.

**Note** After receipt of a request, DCT acknowledges it and provides the expected completion date. See "Timing" specified in Important Concepts in the preceding outline of TP 40.1: Request Customer Data Changes. The DCT also sends a notice to ALL requestors (and Team Leaders) that the changes have been completed, see TP 40.2: Initiate Interdepartmental Data Change Requests.

## Complete the Following Steps Within One Month of Receipt of Notice from DCT

5 After data changes have been made, print out the applicable portion of the consolidated spreadsheets and use it to review PRISM to ensure that the expected changes have been made.

6 Print a hard copy of the list of changes. Initial and date each request verifying that the change has been made. Retain the hard copy for 12 months, and purge old records periodically.

7 Follow up with DCT as necessary to determine why any requested change was not made.

## TP 40.2 Initiate Interdepartmental Data Change Requests 07/23/2002

Action Steps

| | |
|---|---|
| **Purpose** | Consolidate IOD requests for data changes to customer records in PRISM, and coordinate the process between IOD and IRMD. |
| **Time Reporting (BMPRS)** | Special Projects<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Spreadsheets for data changes submitted by e-mail by TPDs, TSD and FBA staff. |
| **Process Output and Recipient** | IOD requests consolidated and converted to tab-delimited text files sent to IRMD, and reminder notice sent to requesters when changes have been made. |
| **Control Issues** | DCT serves as IOD's control point for managing all these customer data change requests. DCT notifies requestors when data changes have been completed, to allow requestors to ensure their expected changes have been made. |
| **Important Concepts** | DCT is **not** responsible for ensuring that expected data changes have been made, the requestors maintain that responsibility.<br>**Timing:** Data changes follow a weekly schedule. Spreadsheets received by DCT by noon on Monday (first business day of the week, if later) are forwarded to IRMD by COB on Wednesday. IRMD makes the data changes Thursday and notifies DCT by e-mail upon completion. |
| **Guidance** | N/A |
| **Procedure Owner** | Data Change Team, OASD |

## Click here for more information

TP 40.2 Action Steps: Initiate Interdepartmental Data Change Requests

## TP 40.2 Action Steps: 07/23/2002

## Coordinate Interdepartmental Customer Data Changes

1. Consolidate all spreadsheets received. Add requestor and case Team Leaders' names and request date to the spreadsheets.
2. Convert these consolidated spreadsheets to tab delimited text file and send to IRMD's POC.
3. Receive e-mail notice from IRMD that changes have been completed - generally Friday of each week, with ORACLE File Error report attached.
4. Forward consolidated spreadsheets to all requestors, as soon as possible. Include reminder that it is their responsibility to follow through and ensure their expected data changes have been made.
5. File ORACLE Error report.
6. Retain e-mail requests, consolidated spreadsheets and ORACLE Error reports for twelve months, and purge old records periodically.

# TP 40.3 Data Change Request Guidelines

04/16/2004

| Customer Data Change Request | Usage comments |
|---|---|
| **Customer Linking -** | A customer in PRISM who is not a participant, must be linked to a participant in the PRISM Family Tree. Sometimes a customer may be loaded as a participant, and it is later determined that they are actually a beneficiary. These situations are resolved through implementing a role change. See Role Changes. |
| **Role Changes -** | The most common example is a customer initially loaded as a Participant whose correct role is Beneficiary. Less common is the reverse, changing a Beneficiary to a Participant. If this role change is made, it is necessary to delete the record of whomever this customer was originally linked to (as a Beneficiary) if that person is not in the plan. See Deletion of Customer Record. |
| **Status Changes -** | There are many circumstances in which a customer's status code has to be changed. One example is when a customer has been paid his full benefit, the status code should be changed from 1 to 6. The situations are often disclosed through reports prepared as part of plan closing, see Process 21: Close Plan. |
| **Plan Number Changes -** | A customer loaded under the wrong plan number must be moved to the correct plan. If a record has already been created under the correct plan, then the incorrect record should be deleted or, if appropriate, the two records should be merged, see Merger of Customer Records. If the customer has already been established on the Paying Agent's system under the incorrect plan, email a BPAB PLS and request that they instruct the Paying Agent to correct the plan number on their system to avoid processing errors and duplicate payments. |
| **Deletion of Customer Records -** | A Customer record for someone who is not a plan member, may be deleted provided:<br>• the individual has not received a 4042(d) notice;<br>• the individual has not received a BDL;<br>• the record does not include valuation data; and<br>• the record does not include ledger data. |
| **Merger of Customer Records -** | The best way to get rid of a duplicate record is to delete it. However, there are circumstances when a duplicate customer record cannot be deleted (see requirements in Deletion of Customer Records, above). If you have a customer with two records, neither of which can be deleted, request that the records be merged by sending an e-mail to the contract support data correction team in TSD, requesting the merger. (Merger of records is not covered in this technical procedure.) |
| **Undeletions -** | It may be necessary to create a PRISM record for a customer whose record was previously deleted. If PRISM indicates the Social Security Number belongs to that person, but the record cannot be viewed in PRISM Browser, then that record was deleted and exists in the database with a deletion flag. |

# TP 41. Follow-Up on FBA Performance Reviews

TP 41. Overview

TP 41.1 Implement Corrective Actions

Forms, Letters, Memos, Etc.

## TP 41. Overview

**12/13/2002**

IOD is responsible for maintaining the contractual relationships with FBA contractors who perform IOD-related services for PBGC, as described in the contract between PBGC and the FBA. In performing its oversight role of FBA contractual relationships, IOD needs assurances that the FBAs are processing participant, survivor, alternate payee, and beneficiary transactions (both financial and customer service related) according to IOD's established policies and procedures, and in compliance with the terms of the Contract. IOD's FBA Review Program Coordinator is in the Management Coordination Unit (MCU).

IOD conducts annual Performance Reviews on most of the FBAs, under clause C.10.c (Audits by the PBGC - FBA Performance Reviews) of the FBA Contract. The procedures for conducting these reviews, through to finalization of the FBA Performance Review Report, are documented in MCU's FBA Performance Review Manual, which is maintained by MCU.

Final FBA Performance Review Reports are submitted by the TPD Manager to the FBA and senior IOD management, as determined by the Director of IOD. The Reports may contain itemized FBA and non-FBA Findings and Recommendations. MCU retains copies of the report in the FBA Review current and permanent files. The report is a confidential document. Generally, no other persons should be given copies of the reports without the consent of the Director of IOD.

Follow-up to an FBA Performance Review is an integral part of effective management, and is a shared responsibility of FBA management and PBGC. The Follow-up on FBA Performance Review process is modeled on PBGC's Notice 94-16 on Audit Follow-up Systems.

The FBA is required to establish a Corrective Action Plan to ensure prompt resolution of FBA Performance Review Findings and Recommendations, documented in the Final FBA Performance Review Report. The Corrective Action Plan is not incorporated into the Report, but is incorporated into the FBA Workplan, required under clause C.9.1 (Work Plans) of the FBA Contract. The Report contains only a statement regarding agreement or disagreement by the FBA and / or IOD Division.

A follow-up system must provide a complete record of actions taken on findings and recommendations and document their status through to closure in FBA Monthly Management Reports, required under clause C.9.2 (Monthly Management Report) of the FBA Contract. The FBA Contract COTR monitors and tracks progress on implementing and closing the corrective actions. ( TP41.1. Implement Corrective Actions)

IOD Division Managers are required to implement corrective actions for non-FBA Findings and Recommendations, as agreed upon in response to the Final Report, and within the established timeframes stated in the response. The IOD Division maintains accurate records on the resolution of recommendations in Final Reports, and informs MCU of all actions taken. When requested by MCU, the IOD Division provides appropriate documentation in evidence of implementation.

**Follow-Up on FBA Performance Reviews**

## TP 41.1 Implement Corrective Actions

**12/13/2002**

**Action Steps**

| | |
|---|---|
| **Purpose** | The FBA and/or IOD Division is responsible for implementing corrective actions, as per the FBA Performance Review Final Report and Corrective Action Plan, and tracking resolution status. |
| **Time Reporting (BMPRS)** | FBA Review<br>FBA Oversight<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | FBA Performance Review Final Report (Findings and Recommendations) |
| **Process Output and Recipient** | FBA Corrective Action Plan<br>Updated FBA Workplan<br>FBA Monthly Management Report<br>FBA Corrective Action Plan Closure Request |
| **Control Issues** | Accurate records and evidence of corrective actions taken.<br>Validation through documentation, system reviews or on-site visits. |
| **Important Concepts** | Status reporting to COTR.<br>Follow-up to FBA Reviews are conducted using FBA Performance Review Manual. |
| **Guidance** | PBGC Notice No. 94-16 provides guidelines and requirements for audit follow-up at PBGC. Resolution of audit recommendations requires designated responsibility, records of actions taken, time schedules and periodic reports. (See FBA Performance Review Manual and related exhibits, maintained by MCU.) |
| **Procedure Owner** | FBA Manager, PBGC Department Manager, FBA COTR, MCU, IOD Division Manager |

## Click Here for More Information...

TP41.1 Action Steps: Implement Corrective Actions

**Follow-Up on FBA Performance Reviews**

## TP 41.1 Action Steps: 12/13/2002

## Implement Corrective Actions

The following describes the responsibilities of the parties relating to the implementation of corrective actions, resulting from FBA Performance Reviews.

**FBA Manager**

1 Ensure timely implementation of corrective actions, documented as Findings and Recommendations in the final FBA Performance Review Report, and incorporated into the FBA's Corrective Action Plan.

2 Incorporate the recommendations in the appropriate Task section of the FBA Workplan, with target dates and assignments, as per the FBA Contract Reporting Requirements (Clause C.9.1). (See TP 35 Update FBA Workplans for details.)

3 Maintain accurate records on the resolution of the recommendations. Inform the FBA COTR ofall actions taken in the Monthly Management Report, as per the FBA Contract Reporting Requirements (Clause C.9.2).

4 Provide appropriate documentation, as evidence of implementation, when requested by the COTR.

**FBA Manager, FBA COTR**

5 Manager - Notify the COTR, with a copy to MCU, of any actual or anticipated delays in implementing corrective actions.

6 COTR - Review the notification, determine whether to approve a requested extension. Advise the TPD Manager of the delay.

7 COTR - Update the FBA Workplan to reflect any agreed changes to timelines.

8 FBA Manager - Once an action has been implemented, notify the COTR of its completion in the Monthly Management Report and provide supporting documentation.

9 COTR - Review supporting documentation provided by the FBA Manager to ensure that the corrective action is satisfactorily closed. This may require a review of system data and/or a site visit.

10 COTR - Notify the FBA Manager if it does not appear that appropriate action has been taken.

11 COTR - Once all corrective action items in the Final FBA Performance Review Report have been closed, notify MCU and request closure of the Corrective Action Plan.

**IOD Division Manager**

12 Implement corrective actions for non-FBA Findings and Recommendations, as agreed upon in response to the Final Report, and within the established timeframes stated in the response.

13 Maintain accurate records on the resolution of recommendations in Final Reports, and inform MCU of all actions taken. When requested by MCU, provide appropriate documentation in evidence of implementation.

**MCU**

14 Monitor corrective actions required by IOD Divisions.

## TP 41.2 Forms, Letters, Memos, etc.

# TP 42. Followup on Outstanding Checks

TP 42. Overview

TP 42.1 Prepare and Distribute Outstanding Checks Listing

TP 42.2 Take Action on Outstanding Checks

Forms, Letters, Memos, Etc.

## TP 42. Overview

**05/30/2003**

Participant checks may remain outstanding for a number of reasons, including: death, incorrect address, non-receipt, absence for vacation, or forgetfulness. SSC produces a quarterly Outstanding Checks Listing that lists all checks that have been outstanding for more than two months. OASD sorts the Listing and inserts TPD, FBA and Mail POC information, to facilitate distribution to responsible processors. The PSB Program Assistant makes the distribution by email to the appropriate Mail POCs, who coordinate any further required distributions.

The processor responsible for a plan uses the Listing to identify outstanding checks that have not been cashed more than two months after issuance, and follows up with the payee to determine the reason and what action, if any, needs to be taken. If a check has not been cashed because of:

- Death: Stop payment, initiate beneficiary or survivor payments, and recover payments made after death, if appropriate.
- Change of Address or Non-Receipt: Stop payment and reissue the check(s).
- Absence for Vacation, or Forgetfulness: Encourage the payee to cash the check(s) as soon as possible.
- Fraud: Where there is a suspicion that a death was not reported to PBGC because of fraud or forgery, see TP12: Deal with Fraud and Forgery.

The Mail POCs collect spreadsheets, annotated with follow up actions, and forward them to the PSB Program Assistant, who follows up on missing spreadsheets or incomplete follow up actions.

Checks that are outstanding for more than six months become stale dated and can no longer be cashed. Processors are notified of these through a separate "Purge Report".

**Follow-Up On Outstanding Checks**

## TP 42.1 Prepare and Distribute Outstanding Checks Listing 05/30/2003

**Action Steps**

| | |
|---|---|
| **Purpose** | Produce and distribute a quarterly Outstanding Checks Listing for follow up by responsible Mail POC, PLS, PBA or FBA. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Excel file "PBGC Outstanding mm/dd/yy" from SSC |
| **Process Output and Recipient** | Excel file "Outstanding for TSD mm/dd/yy" from OASD. |
| **Control Issues** | • Outstanding checks may indicate:<br>  • Vacation, absence or forgetfulness on the part of the participant.<br>  • Death, invalid address or a lost check event that requires PBGC action.<br>• For customer service reasons and to prevent overpayment or fraud, PBGC wants to ensure that the checks are negotiated by the payee and/or don't become stale dated.<br>• Additionally, PBGC wants to minimize the costs associated with stop check actions and reissuance.<br>• Copy the Division Manager or FBA Manager on distributions of the Outstanding Checks Listing, submissions of spreadsheets annotated with actions taken and discrepancy notifications. |
| **Important Concepts** | SSC runs the Outstanding Check Listing quarterly, in March, June, September and December. The report lists all uncashed checks, except those from the two most recent check runs and those that have become stale dated. For example, the report run in March lists all outstanding checks, for the period October through January; the Report date is labeled " January 31."<br>**Timing**:<br>• The PSB Program Assistant forwards the spreadsheet to OASD within one business day of receipt from SSC.<br>• OASD completes the expanded spreadsheet and returns them to PSB within two business days of receipt.<br>• The PSB Program Assistant forwards the spreadsheets to Mail POCs within two business days of receipt from OASD. |
| **Guidance** | N/A |
| **Procedure Owner** | SSC, TSD / PSB Program Assistant, OASD |

## Click here for more information

TP 42.1 Action Steps:Prepare and Distribute Outstanding Checks Listing

**Follow-Up On Outstanding Checks**

## TP 42.1 Action Steps: 05/30/2003

## Prepare and Distribute Outstanding Checks Listing

**SSC**

1 Produce a quarterly Outstanding Checks Listing, itemizing all uncashed checks, that are not yet stale dated, except those from the two most recent check runs. Typically, the Listing will contain checks from four months. The Report is named: "PBGC Outstanding mm/dd/yy" and is in the form of an Excel spreadsheet. The report date is the month end prior to the two most recent check runs. The spreadsheet contains the following columns for each outstanding check:

- **Acct No:** SSC Bank Account for Payee Checks
- **ID-1:** Type of Plan ("PBGC1" or "Collins")
- **ID-2:** (blank)
- **Check Number:** Check Number for the Outstanding Check
- **Issue Date:** Date on the Outstanding Check
- **Amount:** Amount of the Outstanding Check
- **Soc. Sec. No. (SSN):** Payee Social Security Number
- **Name:** Payee Name

2 Send the Outstanding Checks Listing spreadsheet to the PSB Chief as an email attachment.

**TSD / PSB Program Assistant**

3 Forward the Outstanding Checks Listing spreadsheet to OASD, as an email attachment, for insertion of the TPD, FBA and Mail POC for each outstanding check.

**OASD**

4 Import the Excel spreadsheet to an outstanding checks table, in Microsoft Access.

5 Create a new Mail POC table from the Genesis team member, case profile and case summary tables.

6 Create a new outstanding plan numbers table, by selecting unique case numbers from the outstanding checks table.

7 Match the Mail POC and outstanding plan numbers tables, creating a new FBA division table.

8 Join the FBA division and outstanding checks table to create a new "outstanding for TSD" table.

9 Export the "outstanding for TSD" table from Access to an Excel spreadsheet and send it to TSD / PSB as an email attachment. This spreadsheet contains the following additional columns for each outstanding check:

- **Case_Id:** Case Number, Including Suffix
- **Plan_Name:** Plan Name
- **Assign_Field_Benefit_Admininistrator:** Field Benefit Administrator (if applicable)
- **Assign_Division:** Assigned Division (TPDx, PPD, PTAB-S)

- **POC:** Mail Point of Contact for Plan
- **Actions Taken:** blank (for later update by user)

**TSD / PSB Program Assistant**

**10** Sort the spreadsheet by Mail POC and split into one spreadsheet per Mail POC. Send the spreadsheets by email to the Mail POCs, for distribution to the PLS, PBA or FBA, as necessary, with copies to the Division or FBA Managers. Retain the master spreadsheet and distribution emails for later follow-up.

# TP 42.2 Take Action on Outstanding Checks

05/30/2003

Action Steps

**Purpose**

Determine reasons for outstanding checks and take appropriate actions.

**Time Reporting (BMPRS)**

FTE Administer Benefits

FBA Administer Benefits

PBA Administer Benefits

[See Appendix E: IOD Time Reporting (BMPRS)]

**Required Input and Source**

Excel file "Outstanding for TSD mm/dd/yy" from OASD

**Process Output and Recipient**

(As needed:)

- Customer telephone call to payee and CCN call log entry.
- Documentation of reason for outstanding checks and action taken, or de minimis value to PSB.
- DOD in deceased payees' records in PRISM Customer.
- Address change in PRISM Customer.
- CARF to SSC for stop payment and/or reissue of check.
- ALGS Reminder Notice to payee (ALGS536).
- ALGS Intent to Suspend Notice to payee (ALGS537).
- ALGS Suspension Notice to payee (ALGS538).

**Control Issues**

Resolution for an outstanding check requires determination of the reason the check is outstanding; completion of any participant contact, stop payment, replacement or death entry actions required; and annotation of the action on the spreadsheet.

TSD / PSB will monitor that actions have been recorded for all outstanding checks.

Use specific questions to verify if the payee is alive or deceased. The questions should be those that only the payee should be able to answer correctly.

Copy the Division or FBA Manager on the spreadsheet which documents actions taken.

**Important Concepts**

The Outstanding Checks Listing is the only notification a processor receives that a check has not been cashed. Checks may be uncashed for several reasons including death, change of address, non-receipt of the checks, vacation absence, or plain forgetfulness.

Checks automatically become stale dated six months after the issue date and are returned to Treasury. These stale dated checks are listed on a Purge Report and are processed separately.

**Timing:** The processor has 30 days to complete work on the Outstanding Checks Listing and report back to TSD / PSB that the appropriate actions have been taken for each outstanding check.

| | |
|---|---|
| | TSD / PSB monitors the completeness and timeliness of actions.<br><br>If the work cannot be completed within 30 days, the TPD or FBA Manager notifies TSD / PSB of the delay and establishes a new schedule, not to exceed another 30 days. |
| **Guidance** | N/A |
| **Procedure Owner** | Mail POC, PBA, PLS, FBA |

## Click here for more information

TP 42.2 Action Steps: Take Action on Outstanding Checks

# TP 42.2 Action Steps: 05/30/2003
# Take Action on Outstanding Checks

**Mail POC**

1 Review Outstanding Check Listing and identify the plans assigned to the processor (PLS, PBA or FBA). Continue, or forward the Listing to the responsible processor. If a Mail POC is absent, the Division or FBA Manager forwards the Listing to processors.

**PLS / PBA / FBA**

**Note:** Select the checks from the oldest month for priority processing. These checks may become stale dated before processing of the Outstanding Check Listing has been completed.

2 Determine whether the payee has died. Check the payee's status code PRISM . If it is "7", DOD was received and entered. If the status code is still "1", review the payee's records in IPS and CCN and check the Deathmatch Discrepancy Report (see TP 05. 3 Use Deathmatch Program to Verify Deaths .) If a death notice was received and not processed, ensure that the information relates to the payee before processing. (See TP 05.1 Process Death Notification by Telephone or Mail.) If the payee died before the date of the check, take steps to stop payment on the check(s), record the action taken in Actions Taken and exit this procedure. (See TP 12.1 Initiate Check Action Request Form). If the form of benefit provides for survivor or beneficiary benefits, make an effort to locate the estate and beneficiary; if located, reissue to the estate or beneficiary. (See TP 05.4 Determine Benefits Due Survivor, Beneficiary or Estate.)

3 Determine whether a change in address occurred. If a change of address was found in the payee's records in IPS, but was not processed, ensure that the information relates to the payee before processing. (See TP 04.1 Make Address Changes.) Take steps to stop payment on the check(s), reissue the payment(s), record the action taken in **Actions Taken** and exit this procedure. (See TP 12.1 Initiate Check Action Request Form).

4 If the check is under $20, it is de minimis. Take no action and exit this procedure.

5 Try to contact the payee, using the payee's telephone number of record. If it is not available, see TP 33 Locate Customer Address to find a phone number.

- If someone answers the payee's phone, ask for the payee and explain the purpose of the call. If the person claims to be the payee, he/she should be able to answer the questions that only the payee could answer. If the person is the payee, advise that PBGC's records show that there are uncashed benefit check(s). Encourage them to cash the check(s). If they did not receive the check(s), or lost them, verify the address and take steps to stop payment on the check(s), reissue payment(s) and record the action taken in **Actions Taken** (See TP 12.1 Initiate Check Action Request Form).
- If the person is not the payee, seek information on the payee. If the person advises that the payee is deceased, request the DOD and ask the person to mail a copy of the death certificate to your attention. Obtain the name and address of the person. If the person is unable to respond, request that the spouse or executor contact PBGC with the information. Enter the DOD in PRISM Customer and record the action taken in **Actions Taken**. (See TP 05.1 Process Death Notification by Telephone or Mail.)

6 If telephone contact cannot be made, or the payee is uncooperative, send a letter to the payee, at the most recent address, advising of the uncashed checks. Record the action

taken in **Actions Taken**.

- If there is a single uncashed check, send a Reminder Notice (ALGS 536) requesting that the checks be cashed promptly.
- If there are multiple uncashed checks, send an Intent to Suspend Notice (ALGS537), notifying the payee that payments will be suspended if the checks are not cashed promptly and the payee does not contact the Customer Contact Center.

**Note:** SSC reconciles cashed checks every day. Between the run date of the Outstanding Checks Listing and the date a processor takes follow up action, a payee may have cashed the check. Timely processing minimizes the number of outdated listings.

The Outstanding Checks Listing from the prior quarter may be useful to the processor in identifying payees who have not cashed their checks, following a phone call or letter. However, only one month of checks will be common to the quarterly Listings.

**7** If the Reminder Notice or Intent to Suspend Notice is returned by the USPS, or the check remains uncashed on the next quarterly Listing after an Intent to Suspend Notice, change the status code to "2" in PRISM Benefits to suspend payment, and forward the record for authorization (see TP 28:Authorize Financial and Non-Financial Transaction through PRISM ). Send a Suspension Notice (ALGS 538) to the payee at the most recent address, advising of the uncashed checks and suspension action taken. Record the action taken in **Actions Taken**. If a response is received from the payee, change the status back to "1", forward the record for authorization to restore payment and issue a special check for missed payments.

**8** Ensure that all **Actions Taken** have been completed and forward the Outstanding Checks Listing spreadsheet electronically, or in hard copy, to the TSD / PSB Program Assistant, copying the Division or FBA Manager.

**9** Ensure that all calls are documented to CCN, see TP 31 Document Telephone Calls.

**TSD / PSB**

**10** Review the Outstanding Checks Report documentation of Actions Taken by the responsible processor to ensure that actions have been taken for all outstanding checks. Follow up with Mail POCs, in writing, for incomplete submissions, or spreadsheets not received within 30 days or other agreed upon deadline (not to exceed an additional 30 days).

## TP 42.3 Forms, Letters, Memos, etc.

**05/30/2003**

**Note** After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**.

***Reminder Notice (ALGS 536)***

***Intent to Suspend Notice (ALGS 537)***

***Suspension Notice (ALGS 538)***

# TP 43. Change Status for Inactive Participants

TP 43. Overview

TP 43.1 Identify Status Changes for Lump Sum Recipients

Forms, Letters, Memos, Etc.

## TP 43. Overview

**02/17/2004**

ASD calculates quarterly updates to PBGC's Individual Present Value of Future Benefits (IPVFB) to identify changes in liabilities of the Corporation. When a participant receives final guaranteed benefit payment via lump sum, and is not entitled to receive further benefits, the status remains "active, paying" in PRISM, potentially impacting IPVFB actuarial calculations. The purpose of this procedure is to make PRISM accurately reflect the inactive status of Customers who have received estimated or final lump sum benefit payments. An automated PRISM routine is run after the SSC lump sum payments have been processed, and the resulting ledgers have been loaded to Genesis, to change the participant status code from "active, paying" to "paid-in-full", when the lump sum principal payment amount is within 5% of the lump sum discriminator, as set during plan actuarial valuation. However, when the lump sum principal payment amount is **not** within 5% of the lump sum discriminator, or when beneficiaries have been fully paid lump sums, but who do not have a lump sum discriminator, direct action is required by the PLS to change the status code from "active, paying " to "paid-in-full". These status code changes are not allowed directly by the PRISM application and must be made through the Data Change Team, using TP40: Change Customer Data.

Additionally, PBGC management has determined that participants who have been paid an estimated lump sum distribution after trusteeship, and will be eligible for a residual benefit amount, should have their status code changed from "active, paying" to "future pay", in both the automated and manual processes above.

A Lump Sum eReport has been developed to support PLS in determining when a status code change is required from users. This report categorizes lump sum payments into five groups:

- Estimated lump sum paid, but no valuation data available
- Lump sum paid, but less than guaranteed present value to be paid
- Lump sum paid and equal to guaranteed present value to be paid
- Lump sum paid and greater than guaranteed present value to be paid
- No lump sum paid – full guaranteed present value to be paid

The procedure describes PLS, PBA or FBA status code change actions for each of these groups.

**Change Status for Inactive Participants**

## TP 43.1 Identify Status Changes for Lump Sum Recipients 02/17/2004

**Action Steps**

| | |
|---|---|
| **Purpose** | Ascertain from the Lump Sum eReport that participants are in the correct inactive pay status. Set the status code to "paid-in-full" for participants who have been fully paid an estimated or final lump sum. Set the status code to " future pay" for participants who have been paid an estimated lump sum, but are eligible for a residual payment. |
| **Time Reporting (BMPRS)** | N/A<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | **PRISM Reports Activity:** Run PRISM Lump Sum eReport (DB 03-01P) |
| **Process Output and Recipient** | Data Change Request Spreadsheets to Data Change Team |
| **Control Issues** | Status code changes for lump sum payees should not be changed to " paid-in-full" or "future pay" until the payment has been issued by SSC. Otherwise, the status code change will take place first and SSC will be unable to issue the payment in the payment cycle.<br><br>Status code changes for lump sum payees should not be changed to " paid-in-full" or "future pay" until the related ledgers are posted to PRISM. Otherwise, the payment transaction may fail edits and be rejected, prior to the status code change, leaving the PLS, PBA or FBA unable to re-issue the payment in PRISM.<br><br>The Data Change Team notifies the requestor that requested status code changes have been completed, but the PLS, PBA or FBA is responsible for verifying that each status code change has been made, using PRISM.<br><br>For "future pay" participants who have received estimated lump sums, the IPVFB system will generate status code errors. These errors will be restricted to plans that are not IPVFB ready and will disappear when the plans are finalized, residual lump sums paid and the status code changed to "paid-in-full". During plan closing, all finalized lump sum payments should be reviewed to ensure that the status code has been changed to "paid-in-full".<br><br>The PRISM Lump Sum eReport limits user access to plans assigned in CAS.<br><br>(See TP 40: Change Customer Data for details on the schedule and procedures for submitting status code changes. |
| **Important Concepts** | **Timing**: The Lump Sum eReport should be run each month, after the lump sum ledgers have been loaded. The automatic PRISM routine to reset the status code is run immediately after the ledgers are loaded.<br><br>ASD calculates PBGC's IPVFB using PRISM status code and payment data, to identify PBGC's liabilities. The related actuarial calculations can be impacted when a participant receives a final guaranteed benefit lump sum payment, and is not entitled to receive further benefits, but remains in "active, paying" status code. The PRISM System automatically sets the status code for lump sum payees to "paid-in-full", after ledgers are loaded to Genesis from each lump sum pay cycle, for lump sum principal payments within 5 percent of the lump sum discriminator, or to "future pay" for estimated payments, without valuation |

TP 43.1: Action Steps: Identify Status Changes for Lump Sum Recipients

# TP 43.1 Action Steps: 02/17/2004

# Identify Status Changes for Lump Sum Recipients

When PBGC receives the valuation data for a Plan, the PLS, PBA or FBA makes lump sum distributions to eligible participants who have retired. This process is complicated by two factors:

- The PLS, PBA or FBA may have previously paid the participant an estimated lump sum.
- PRISM does not contain data fields to distinguish estimated from final lump sum payments.
- The Lump Sum eReport compares the **Total Lump Sum Payment** (sum of L1 and L4 pay sources) to the lump sum discriminator (**PV Amount** or Valuation Present Value of Guaranteed Benefit from VAL / IDL) for each participant, and sorts them into five payment categories:
- Estimated lump sum paid, but no valuation data available
- Lump sum paid, but less than guaranteed present value to be paid
- Lump sum paid and equal to guaranteed present value to be paid
- Lump sum paid and greater than guaranteed present value to be paid
- No lump sum paid – full guaranteed present value to be paid

The Report helps the PLS, PBA or FBA to determine status code change actions for each of these groups.

**PLS/PBA/FBA**

1 After receiving notification that the monthly lump sum ledgers from SSC have been loaded into Genesis, run the Lump Sum eReport. This Report can be selected from the **eReports-Work Load Planning – Lump Sum Report – Participant Level** menu options. Wizard options will allow selection of plans, payment categories and customer status. [See PRISM Lump Sum Report Help File for details on selection criteria.] The following steps assume selection of all categories and statuses.

2 Review the lump sum payees in each category and take actions as per the Lump Sum eReport Categories and Actions table. Some of these actions can be accomplished directly using PRISM applications, and others must be requested from the Data Change Team. The relevant items on the Report are:

- **Status:** Payee Status Code ("1" = active, paying; "3" = future pay; "6" = paid-in-full)
- **Ledger Type:** Type of Check ( "Lump Sum")
- **PV = $1750 or Less:** Present Value is $1750 or Less and the Plan is Insufficient (Lump Sum Pay Source 1)
- **PV $1751 to $5000:** Present Value is Between $1751 and $5000 and the Plan is Insufficient (Lump Sum Pay Source 4)
- **Other Lump Sums:** May be large annuity back payment or estimated lump sum (entered to the wrong pay source)
- **Total PV Payment:** Sum of Lump Sum Pay Sources 1 and 4
- **VAL PV:** Lump sum discriminator.

The Report does not distinguish whether a lump sum payment was estimated or final. [See PRISM Lump Sum eReport Help File for details on other items on the Report]

| | |
|---|---|
| **Note** | The normal monthly run of the PRISM routine, to change the status code to "paid-in-full", or " future pay", processes only the ledgers from the latest lump sum pay cycle. If a lump sum payment has been reversed by SSC due to a returned check, the reversal will not likely be in the total lump sum payment used in setting the status code. On the quarter-ending runs, prior to ASD's quarterly extract for valuation of liabilities, the routine uses all lump sum ledgers issued to date. This routine will pick up any lump sum payment reversals, and change the status code back to its former value. |
| | In cases where the lump sum paid appears to be less than the guaranteed present value to be paid, check for an estimated payment in Other Lump Sums (pay source L5). Some estimated payments have been erroneously paid from this pay source. These estimated payments should be added to the Total PV Payment amount and manually compared to the VAL PV amount, in determining whether a participant has been paid in full. Care should be taken to ensure that duplicate estimated payments are not made in these circumstances. The PLS, PBA or FBA should use caution in running PRISM Reports that use status code as a selection criterion. Participants with a status code of "future pay" may have actually received payments. |

**Lump Sum eReport Categories and Actions**

| Payment Category | Payment Type on Lump Sum eReport | Action Steps |
|---|---|---|
| **Estimated Lump Sum Paid – But No Valuation Data Available** | Estimated 1 | • Change status code from "1" (active, paying) to "3" (future pay), if this has not been automatically done by the PRISM routine. (The PLS will later change the status code to "6" (paid-in-full) after valuation data is loaded and a final residual benefit amount is paid.) |
| **Lump Sum Paid, but Less Than Guaranteed Present Value to be Paid** | Estimated | • Pay the residual as a final lump sum or an annuity, using Process 19.4 Determine Overpayment / Underpayment. (The PRISM Benefits application will automatically re-set the status code to "1" (active, paying) and then the PRISM routine will automatically change the status code to "6" (paid-in-full) if the total lump sum paid is equal to the guaranteed present value to be paid.) |
| | Final 2 | • After ensuring that the correct amount was paid, change status code from "1" (active, paying) to "6" (paid-in-full). See TP40: Change Customer Data. |
| **Lump Sum Paid and Equal to Guaranteed Present Value to be Paid** | Estimated | • Change status code from "3" (future pay) to "6" (paid-in-full). See TP40: Change Customer Data. |
| | Final | • No action required. (The PRISM routine will have automatically changed the status code to "6" (paid-in-full).) |
| **Lump Sum Paid and Greater Than Guaranteed Present Value to be Paid** | Estimated | • If the difference is greater than the de minimis amount, initiate recovery action. See Process 19.4: Determine overpayment / Underpayment of a Lump Sum. |

| | | |
|---|---|---|
| | Final | • If the difference is less than or equal to the de minimis benefit amount, change status code from "1" (active, paying) to "6" (paid-in-full). See TP40: Change Customer Data. |
| **No Lump Sum Paid – Full Guaranteed Present Value to be Paid** | Estimated or Final | • If an Application for Benefits has been received, pay an annuity or lump sum. See TP20: Put in Pay Status |

1 An "estimated" payment is a lump sum payment type ("L") where there is no valuation present value of guaranteed benefit and the valuation status code is not "final".

2 A "final" payment is a lump sum payment type ("L") where there is a valuation present value of guaranteed benefit and the valuation status code is "final".

# TP 44. Foreign Language Services

TP 44 Overview

TP 44.1 Foreign Language Services

Forms, Letters, Memos, Etc.

## TP 44. Overview

**06/18/2004**

A *foreign language customer* is one who has difficulty understanding English and/or has expressed a preference for corresponding with PBGC in their native language, most often Spanish. The Foreign Language Support Team (FLST) facilitates effective communication between PBGC staff and foreign language customers by providing oral interpretation and translation services. The Customer Contact Center provides telephone call assistance.

# TP 44.1 Foreign Language Services

06/18/2004

Action Steps

| | |
|---|---|
| **Purpose** | To obtain foreign language interpretation and translation services in order to communicate with customers whose preferred language is not English. |
| **Time Reporting (BMPRS)** | FTE Administer Benefits<br>FBA Administer Benefits<br>PBA Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Incoming telephone calls from foreign language customers.<br>Correspondence from foreign language customers.<br>Proof documents from foreign language customers. |
| **Process Output and Recipient** | Letters, forms, statements to foreign language customers.<br>Translated proof documents and/or correspondence.<br>Spanish Translation services for participant meetings.<br>Outgoing telephone calls to foreign language customers. |
| **Control Issues** | Document calls in CCN.<br>All documentation, including the original and translated versions as well as the request to and response from FLST is imaged in IPS, by the requestor. |
| **Important Concepts** | While the majority of requests are for assistance in communicating with Spanish plan participants, assistance with any foreign language can be accommodated.<br>All standard ALG letters are available in Spanish.<br>Letters required in other languages must be requested.<br>**Timing**: All requests are typically processed within 1 to 7 days. |
| **Guidance** | N/A |
| **Procedure Owner** | PLS, PBA, FBA, CCC, FLST |

## Click here for more information

Actions Steps: TP 44.1 Foreign Language Services

## TP 44.1 Action Steps: Foreign Language Services

06/18/2004

1. Determine the type of translation/interpretation service required. For assistance with telephone calls, contact the Customer Contact Center, see table below.

   In general, FLST provides the following services:

   - Translation of participant foreign language proof documents and correspondence into English;
   - Translation/customization of standard ALG letters and enclosures;
   - Translation services of a *Summary Plan Description (Spd.doc)* into Spanish for participant meetings;
   - Translation services into Spanish for participant meetings (see TP 14: Hold Participant Meetings for additional information).

2. Compose and forward e-mail to the FLST mailbox. **All** requests for foreign language services must be submitted to the Foreign Language Services Team via e-mail. Please indicate the Service Type and Basic Requirements/Details according to the table below. Indicate the IPS document number or attach supporting documents if applicable.
3. If a delay in processing is anticipated, the FLST will forward an e-mail providing an estimate of when the request will be completed.
4. After completion of the translation, ensure that the information is imaged, including the original documents, the translations, as well as the request/response for translation services.

| SERVICE TYPE | BASIC REQUIREMENTS/DETAILS |
|---|---|
| **Telephone Calls** | |
| Incoming Telephone Call from a foreign language participant | • Place the customer's call on hold. Call the Customer Contact Center and specify the language required. Once the Customer Contact Center has secured an interpreter, conference in the customer. |
| Outgoing Telephone Calls | • Call the Customer Contact Center. Specify the reason for the call, the specific foreign language, and include relevant telephone numbers. If information is needed from the participant, please specify the details. Similarly, if specific information needs to be relayed to a participant, please provide the details. |
| **Proof Documents** | |

| | |
|---|---|
| Translation of Proof Documents From Spanish | • Send e-mail to FLST<br>• Provide the participant's SSN and Plan Number<br>• Specify the document number in IPS<br>• Provide a brief description of the translation work to be performed<br>• Normal turnaround time is 1 working day |
| Translation of Proof Documents From a Foreign Language other than Spanish | • Send e-mail to FLST<br>• Provide the participant's SSN and Plan Number<br>• Specify the document number in IPS<br>• Provide a brief description of the translation work to be performed and specific foreign language required<br>• Normal turnaround time is 5 working days |
| **Translation of Customer Correspondence** | |
| Spanish letter received from participant translated into English | • Send e-mail to FLST<br>• Provide the participant's SSN and Plan Number<br>• Specify the document number in IPS<br>• Normal turnaround time is 3 working days |
| Letter in language other than Spanish received from participant translated into English | • Send e-mail to FLST<br>• Provide the participant's SSN and Plan Number<br>• Specify the document number in IPS<br>• Normal turnaround time is 5 working days |
| **Outgoing Correspondence** | |
| Customization of ALG letters/enclosures needing only small modifications in Spanish | • Send e-mail to FLST<br>• Provide the participant's SSN, Plan Number, and a brief description of the translation work to be performed<br>• Specify the letter number (e.g. 201, 402LBR). If changes have been made to the standard ALG letter, please provide a draft, by e-mail, of the letter in English. All modifications to standard letters should have prior approval from the appropriate Team Leader.<br>• Normal turnaround time is 3 working days |

**NOTE:** All standard letters are available in ALG in Spanish with the associated enclosures.

| | |
|---|---|
| English letter completely translated into another language including Spanish | • Send e-mail to FLST<br>• Provide the participant's SSN, Plan Number, and a brief description of the translation work to be performed including desired language<br>• Provide a draft, by e-mail, of the letter in English. All letters should have prior approval from the appropriate Team Leader.<br>• Normal turnaround time is 7 working days |
| Review of letter composed in Spanish | • Send e-mail to FLST and attach a draft of letter<br>• Provide the participant's SSN and Plan Number<br>• All letters should have prior approval from the appropriate Team Leader.<br>• Normal turnaround time is 1 working day |

**Customer Meetings**

| | |
|---|---|
| Spanish translation services for participant meetings, including translation of Summary Plan Description. | • Send an e-mail requesting assistance for a plan. Meetings to assess customer needs will then be arranged, see TP 14: Hold Participant Meetings for additional information. |

| **Control Issues** | 1. Insure that PBGC does not pay out more in benefits that the payee is entitled to receive.<br><br>2. Image all documents used: CARF, Fact & Circumstances Determination, etc.<br><br>3. Refer to Fraud/Forgery procedure if check was negotiated by an unauthorized party. |

| | |
|---|---|
| | 4. Document all customer telephone calls in CCN. |
| **Important Concepts** | Checks may be reported missing for a number of reasons, such as misdirected mail. Payees also may simply have forgotten that they cashed a check. Most reports do not involve fraud or forgery.<br><br>Unless the records clearly indicate that a check was not issued or received, the burden is on the payee to provide sufficient evidence that the payment was not issued in accordance with PBGC or plan procedures, or not received.<br><br>**Timing:** When requesting a check be reissued in routine cases, allow 10 days after the issue date to allow sufficient time for clearance. |
| **Guidance** | |
| **Procedure Owner** | Customer Contact Center, PLS/PBA/FBA, TPD Manager, RSD Manager |

## Click Here for More Information...

TP 45.1A Action Steps: Report of Non-Receipt

TP 45.1B Action Steps: Routine Assertions of Non-Receipt

TP 45.1C Action Steps: Non-Routine Assertions of Non-Receipt

## TP 45.1A Action Steps: 08/19/2004
## Report of Non-Receipt

When a payee notifies PBGC that a payment has not been received, initiate the procedure immediately. Document all telephone calls in CCN.

1 Obtain the following identifying information:

- Expected payment date and type (check or EDD)
- Home or financial institution address at the time the payment was issued
- The payee's explanation of why he or she doesn't believe the payment was made or received.

If the payee's address has changed, update the address in PRISM (see TP04.1 Make Address Changes.)

2 Initially, review PBGC records and determine if and when the payment was issued by PBGC' s paying agent and whether or not it was returned to PBGC. Refer to PRISM ledger, address and pay source screens.

3 Determine whether the report of non-receipt is routine-**1**- or non-routine.

**Routine** A report is considered routine if:

- The payment was issued by PBGC's paying agent (currently SSC), an interim paying agent, or the pension plan's administrator or paying agent, and
- Proof of the payment is readily available: a copy of the negotiated check can be obtained, the EDD payment can be traced to a financial account to which the payee has access, or the records clearly indicate that it was returned uncashed or purged as a stale-dated check.

For routine reports, go to TP45.1B Routine Assertions of Non-Receipt.

**Non-Routine** A report of non-receipt is considered non-routine if a copy of the negotiated check is not readily available, or the EDD cannot be traced to a financial account to which the payee has access. This most often occurs when PBGC issues a BDL to a participant who has already received a cash-out of his or her benefit from the prior plan administrator. It may also occur when PBGC issues BDLs

to participants who had previously received estimated lump sums, other large payments, or one or more pension payments. The payment may have been made before or after DOPT, and may have been issued by PBGC's paying agent (currently SSC), an interim paying agent, or the pension plan's administrator or paying agent.

For non-routine reports, go to TP45.1C Non-Routine Assertions of Non-Receipt.

**Footnote -1-** The Customer Contact Center acts only on routine reports of non-receipt of payments recently issued by PBGC'S paying agent. All other situations are logged into CCN for response by the case team's telephone point of contact..

# TP 45.1B Action Steps: 05/13/2005
# Routine Assertions of Non-Receipt

This procedure is for routine handling by the Customer Contact Center (CCC)-1-, TPDs and FBA s of assertions from payees when a benefit payment was issued but not received. The handling varies depending on whether the payment was by check or EDD. These procedures primarily apply to payments issued by PBGC's paying agent, SSC. If the payment was issued by a prior paying agent or interim agent, work with that paying agent to determine if it can be replaced and how. If the prior paying agent or interim paying agent is unable or unwilling, follow the procedures for non-routine reports (see TP45.1C Non-Routine Assertions of Non-Receipt).

1 **Checks** For SSC checks, allow at least **10** days from the issue date for clearance and reconciliation at SSC before requesting the check be reissued.

1) Call SSC to determine whether the check has been paid.
2) Prepare a Check Action Request Form (CARF), PBGC Form 478, as follows:
   - Complete the identifying information in the top section of the form, and
   - If the check was paid, check the box "If Check Paid – Forward Copy" and note the paid date and the CPCS number supplied by the SSC controller on the CARF; or
   - If the check has not been paid, check each of the following boxes: "Issue Stop-Pay Order"; "Issue Replacement Check"; and "If Check Paid – Forward Copy".
3) Forward the original and one copy to SSC. Ensure that a copy of the CARF is scanned to the participant's IPS file.
   - FBAs forward the CARF directly to SSC.
   - TPDs forward the CARF to RSD for delivery to SSC.
4) SSC will take appropriate action and return the CARF and any attachments to PBGC for imaging. The CARF originator is notified by the SCoRe report. If the check was negotiated (paid), SSC provides a copy of the check (front and back), and takes no action to replace the payment.
   - If the payment is still outstanding, SSC takes action to reissue as appropriate:
     - SSC issues a stop payment, reissues the check, and returns a photocopy of the reissued check with the annotated CARF.
     - If the check has become stale-dated and was purged, SSC issues a stop payment and reissues the check.
5) If the CARF indicates the check has been reissued, inform the participant that it has been mailed.
6) If the check was negotiated and the signature appears to be that of the payee, mail a copy of the cashed check (front and back) to the payee. Then contact the payee to confirm whether the signature is theirs.
   - If it is, no further action is needed. Document the finding in CCN.
   - If the payee states the signature is not theirs, find out if they wish to pursue replacement of the payment. If so, go to TP 12.2: Take Actions to Determine Fraud/Forgery.

2. **Electronic Direct Deposits (EDD):** It is not necessary to wait 10 days before requesting a trace on an EDD payment prior to completing the Check Action Request Form (CARF), Form 478. However, contact SSC for the status before issuing a CARF. If the payment is returned to SSC by the receiving bank because of invalid EDD information, SSC immediately cancels the EDD address on PRISM and issues a check.

   To request a trace:

   1) Prepare a CARF as follows:
      - Complete the identifying information in the top section of the form, and
      - Write "Trace" in the top right-hand area of the form to request that SSC trace the payment.
   2) Forward the original CARF and one copy to SSC. Ensure that a copy is scanned to the participant's IPS file.
      - FBAs forward the CARF directly to SSC.
      - TPDs forward the CARF to RSD for delivery to SSC.
   3) SSC will take appropriate action and return the CARF to PBGC for imaging. The CARF originator is notified by the SCoRe report.
      - If the EDD was deposited, SSC will indicate the date and to which account. SSC takes no action to replace the payment.
   4) If the EDD was deposited to the correct account (i.e., the financial institution account and routing numbers on file with PBGC when the deposit was made), advise the payee to contact that financial institution to obtain the payment.
   5) If the EDD was deposited into another person's account, research to determine the reason (whether due to an error by PBGC or SSC, or incorrect information provided by the payee). Then call SSC to coordinate the recovery and redeposit of the funds into the correct account.
      - This process can take considerable time. Ask SSC to estimate the amount of time it will take to resolve.
      - Notify the payee about the actions are needed to replace the payment and about how long the process will take.

3. **Replacement Payments Reminders**

   1) **Interest:** Generally, PBGC does not pay interest on replacement payments unless it takes more than two months from the date the payee contacted PBGC to reissue the payment (see IOD Policy Bulletin 97-7 Payment of Interest on Late Benefit Payments). If interest is due, pay the interest with a **separate** special check; do not add interest to the replacement payment. However, do **not** pay interest if the total interest is less than $1.00.
   2) **Tax Reporting:** PBGC payments are considered constructively paid when issued. Therefore, a payee's 1099 generally should not be adjusted to reflect non-receipt and replacement of a payment (e.g., in a different tax year). However, interest paid on a replacement payment is taxable the year it is paid.

**Footnote -1-** The Customer Contact Center acts only on routine reports of non-receipt of payments recently issued by PBGC's paying agent. All other situations are logged into CCN for response by the case team's telephone point of contact..

# TP 45.1C Action Steps: 05/13/2005
# Non-Routine Assertions of Non-Receipt

When a participant or beneficiary makes a non-routine assertion of non-receipt of a benefit payment, complete the *Non-receipt of Benefit Payments Facts & Circumstances Determination (FactsCircDet.doc)* to document the research, evaluation and determination of whether to pay the benefit. Image the completed and authorized document to the participant's IPS file.

In non-routine cases, PBGC relies heavily on plan provisions, plan or business practices, and PBGC policy, procedures and business practices in effect at the time of the payment to make a determination. The burden is on the payee to provide sufficient evidence that the payment was not issued or received. PBGC generally requires a Participant Application for Benefits (PAB) and various proofs before issuing payments.

**FBAs:** Prior to commencing research, contact the TPD Auditor or PLS for active cases, or the PLS in RSD for closed cases, for guidance.

**Important:** Manage customer expectations. Do not indicate whether or not PBGC will reissue the payment. Tell the customer that PBGC may require additional information from the payee, and that the research may take time, but that PBGC will keep the payee informed of its progress.

## 1 Collect Facts & Circumstances

1) Contact the payee to complete *Part I Required Information and Evidence* of the Facts & Circumstances Determination. The nature of the research to follow depends on whether the alleged payment was issued by a prior plan administrator or by PBGC.
2) If the payment was issued by the prior plan administrator, complete *Section A Payment Made by Prior Plan Administrator* to document the information collected.
3) If the payment was issued by PBGC, complete *Section B Payment Made by PBGC* to document the information collected.

   **Note:** For checks issued January 2003 and after, PBGC's paying agent (currently SSC) maintains copies of checks for 10 years from the month issued. Copies of checks issued prior to January 2003 are kept six years. SSC also maintains listings and may be able to confirm whether a payment was negotiated even if a copy is no longer available.

## 2 Evaluate and Make Recommendation

Once sufficient information is obtained, complete *Part II Determination* to document the decision of whether a payment is due.

1) A payment is **due** if evidence suggests that the payment was not issued, or not received. If a payment is due, also complete *Part III Method of Payment Determination* to indicate whether the payment should be treated as a:
   - Pre-termination liability (i.e., a benefit application dated before DOPT is on file);
   - DOPT benefit; or
   - Benefit due a woodwork person.

2) A payment is **not due** if evidence suggests that the payment was issued and there is no evidence it was *not* received.

### 3 Make Final Determination

1) Forward the Facts & Circumstances Determination to the TPD Division Manager (active cases) or RSD Division Manager (closed cases). The manager will review the document and may either concur or return it for further research. If necessary, the matter may be referred to OPSS for guidance (see TP 17.1 Answer Policy and Processing Questions).
2) Upon management's concurrence, take action on the determination (see steps 4 and 5 below).
3) Image the completed and authorized Facts & Circumstances Determination to the participant's IPS file.

### 4 Take Action if Payment is Determined Not Due

Proceed according to when the payment was issued:

1) **Payment Issued Prior to DOPT:**

   Issue a Benefit Determination Letter (BDL) (see Process 19. Issue BDLs and Make Adjustments to Cases) notifying the payee of the basis for not reissuing the payment. Consider using a Non-Member BDL for this purpose.

2) **Payment Issued On or After DOPT:**

   Issue a Confirmation of Payment Letter (ALGS 569) notifying the payee of the basis for not reissuing the payment.

### 5 Take Action if Payment is Determined Due

Proceed according to when the payment was issued or due:

1) **If Payment was Issued or Due Prior to DOPT:**

   - If the payment was **issued but not received**, the payment is treated as a pre-termination liability and paid accordingly.
   - If the payment was **not issued** and there is a benefit application dated before DOPT in the file, the payment is treated as a pre-termination liability and paid accordingly.
   - If the payment was **not issued** and there is no benefit application dated before DOPT in the file, process the person as a participant at DOPT.

2) **Payment Issued or Due On/After DOPT:**

   - If records indicate that SSC or the prior paying agent did not issue the payment, or that it was not received, reissue the payment.

### 6 Reminders

1) **Payment of Interest:** PBGC pays interest on replacement payments if the replacement is issued more than two months after the date the payee contacted PBGC (see Policy Bulletin 97-7 Payment of Interest on Late Benefit Payments). However, do not pay interest if total interest is less than $1.00. If interest is due, pay interest with a separate check - do **not** add interest to the replacement check.

2) **Taxation of Payments:** Claims that the payment was taxable when issued supports a determination that the payment was issued and received as records indicate. If a determination is made to issue a payment, pre-DOPT or post-DOPT, the payment(s) is taxable income for the year in which paid. These payments are not paid as non-taxable replacement payments, as routine assertions are. A new payment must be created.

## TP 45.2 Forms, Letters, Memo, etc.

**08/19/2004**

# TP 46. The Health Coverage Tax Credit (HCTC)

TP 46 Overview

TP 46.1 HCTC Inquries

TP 46.2 Monthly Transfer of HCTC Data

Forms, Letters, Memos, Etc.

## TP 46. Overview

**08/19/2004**

The Health Coverage Tax Credit (HCTC) was created by the Trade Adjustment Act of 2002 (the "Act"). The Act states that certain persons receiving PBGC benefits may be eligible for the tax credit, which can be used to pay 65% of the cost of qualified health insurance. The HCTC first became available in December 2002. Effective August 2003, eligible participants can claim the credit in advance to help pay for health insurance premiums as they become due. The HCTC program is administered by the IRS.

PBGC participants may be eligible if they are at least 55 years old and receiving benefits from PBGC (or from the prior paying agent, in plans trusteed but not yet assumed). This includes participants who received a lump sum after August 5, 2002. In addition, they must be in a qualified health plan, as defined by the Act. The 4042(d) letters informs participants of HCTC, and the brochure "Health Coverage Tax Credit" (IRS publication 4182) is a standard enclosure. Participants who are eligible may claim the tax credit beginning the first day of the month the plan is trusteed.

TP 46.1 HCTC Inquiries provides direction in handling participant inquiries received by CCC, TPDs/FBAs, and OPSS. These inquiries usually concern a participant's eligibility for the tax credit, but the procedure also covers the routing of calls from non-participants and organizations.

Each month, PBGC provides the HCTC program at IRS a list of participants who may be eligible for the credit. Within IOD, this requires coordination between TPDs, OPSS, and OASD, as discussed in TP 46.2 Monthly Transfer of HCTC Data.

**The Health Coverage Tax Credit (HCTC)**

## TP 46.1 HCTC Inquiries

**08/19/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | To reply to inquires from participants or organizations concerning the Health Coverage Tax Credit (HCTC). |
| **Time Reporting (BMPRS)** | [See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Inquiry from participant or organization concerning the HCTC program<br>Request for OPSS guidance |
| **Process Output and Recipient** | OPSS guidance (telephone inquiries) to TPD/FBA or written response (written inquiries) to participant<br>Response to participant or organization |
| **Control Issues** | Log phone inquiries in CCN<br>Use specific language provided by OPSS for written responses<br>TPDs/FBAs issue written responses concerning eligibility for the end-of-year tax credit using ALGS letter numbers 526, 527 and 528.<br>Image OPSS e-mails providing guidance to participant's IPS file |
| **Important Concepts** | Most inquires from participants will concern their eligibility for the tax credit, for which OPSS provides guidance for TPDs/FBAs to respond. General questions about HCTC and those from non-PBGC participants may be referred directly to the IRS.<br>OIT places a copy of the data it transfers each month into the shared drive, accessible to certain staff. This file assists OPSS in resolving participant inquiries concerning eligibility.<br>Inquiries from unions, governmental entities, and other organizations are referred to OPSS, who will respond or route the inquiry as appropriate. |
| **Guidance** | N/A |
| **Procedure Owner** | CCC, TPD/FBA, OPSS |

**Click here for more information**

Actions Steps: TP 46.1 HCTC Inquiries

# TP 46.1 Action Steps

08/19/2004

## HCTC Inquiries

### CCC

1 Record incoming HCTC inquiries into CCN.

2 Use scripts provided. Refer participant inquiries to the plan's telephone POC as assigned in CAS. Refer general inquiries from non-participants directly to the HCTC program at IRS at 1-866-628-4282 (TDD/TTY 1-866-626-4282).

### TPD/FBA

1 Determine the nature of the inquiry and whether to request OPSS assistance to resolve it:

- **Applying for the Tax Credit and Health Insurance questions -** For questions about how to apply for the tax credit or whether a health plan is qualified, refer the caller directly to the HCTC Program at IRS at 1-866-628-4282 (TDD/TTY 1-866-626-4282).
- **Other General Questions -** Use the Frequently Asked Questions about HCTC on PBGC's website at "http://www.pbgc.gov/trade_adjustment_act_FAQ.htm" to answer general inquiries. Also inform the caller about the website and provide the website address.
- **Participant Eligibility Questions -** If the participant states he or she was not included on the list of participants eligible for the credit provided by PBGC to the HCTC program at IRS, but should have been, determine whether the participant meets basic eligibility requirements for HCTC:

    - Is the participant at least age 55? (A participant must have attained age 55 by the second day of the month in question.)
    - Is the participant in pay status? (This includes monthly, quarterly, annual and semi-annual pay frequencies.)

  If the answer to either question is **no**, advise the participant that he/she is not eligible for the tax credit at this time and close the inquiry in CCN.

  **Note:** Individuals who received a lump sum payment on or after 08/06/2002 become eligible for the tax credit upon attaining age 55.

  If the answer to both questions is **yes**, send an e-mail to the HCTC representative in OPSS requesting guidance. Include the following participant information:

    - Name
    - SSN
    - DOB
    - Phone Number
    - Date Entering Pay Status

- Plan Name
- Case Number
- DOTR
- Details about the inquiry.
- Also indicate whether the response to the participant will be by telephone (preferred) or in writing (for which OPSS will provide specific language).

Upon receiving a response from OPSS, go to step 5.

2 **IRS Denial of End-of-Year Tax Credit** - If the participant requests evidence of their eligibility for HCTC for the previous year because they received a tax credit denial letter from the IRS, a written response is required. Research the participant's records concerning age and pay status during the applicable tax year and issue the appropriate ALGS letter below. **Important:** Use these letters only to address inquiries concerning tax credit denial letters, issued by the IRS to participants who claimed the HCTC End-of-Year tax credit on their tax returns. Do not use them for other types of inquiries.

- ALGS 526 – Ineligible for HCTC – No Benefits Paid
- ALGS 527 – Participant Eligible for HCTC
- ALGS 528 – Ineligible – Not Age 55 or Older

3 Refer inquiries from organizations such as government entities, plan sponsors, unions, congress, etc. to the HCTC representative in OPSS, who will respond or refer the caller to the appropriate office.

4 For other inquiries not listed, contact OPSS.

5 Respond to the participant based on guidance provided by OPSS:

- If responding by telephone, call the participant and close the CCN log.
- If responding in writing, use an ALGS Generic letter and the specific language provided by OPSS in the e-mail.
- On rare occasions, OPSS responds directly to the participant and provides a cc to the mail POC in CAS. Image the cc to the participant's IPS file and close the correspondence in SCoRe.

6 Image any e-mail guidance from OPSS to the participant's IPS file. Close out calls in CCN upon providing a response.

**OPSS HCTC Representative**

1 When guidance is requested concerning a participant's eligibility, check PRISM and IPS records to determine the participant's pay status, age, and other relevant information. Determine whether the plan has been trusteed, and whether payments have been assumed by PBGC or are still with the prior paying agent. Contact the TPD/FBA assigned to case (in CAS) for additional information, as needed.

2 If the participant appears to have been eligible, determine whether his/her information was transferred to the HCTC program at IRS:

- Refer to the file in the shared drive (under I:\HCTC) provided by OIT, which provides copies of monthly and year-end data that PBGC transferred to the HCTC program at

IRS.

- If there is a discrepancy - for example, PBGC's list indicates the participant's information was transferred, but HCTC does not have it - contact HCTC's Problem Resolution Group at IRS to resolve the issue.
- If there is no discrepancy – for example, both PBGC and the HCTC program show the name as transferred – request that HCTC resolve the issue.
- Once the HCTC Problem Resolution Group responds, determine the appropriate response to provide the TPD/FBA.

3 Reply to the e-mail noting the participant's status and the appropriate response. If the TPD/FBA will respond in writing, provide specific language for the letter.

4 Update the Problem Resolution Tracking Sheet.

**The Health Coverage Tax Credit (HCTC)**

## TP 46.2 Monthly Transfer of HCTC Data

**08/19/2004**

**Action Steps**

| | |
|---|---|
| **Purpose** | To provide a monthly list of participants who appear to be eligible for the Health Coverage Tax Credit (HCTC) to the HCTC Program at IRS. |
| **Time Reporting (BMPRS)** | TPD: Administer Benefits<br>[See Appendix E: IOD Time Reporting (BMPRS)] |
| **Required Input and Source** | Weekly list of newly trusteed plans, provided by MCU to OPSS |
| **Process Output and Recipient** | Monthly transfer of participant data to the HCTC Program at IRS |
| **Control Issues** | N/A |
| **Important Concepts** | PBGC provides the names of all payees who may be eligible for the tax credit to the HCTC program at IRS, including retirees, beneficiaries, and alternate payees. They may be currently receiving benefits from PBGC or a trusteed plan's paying agent on a monthly, quarterly, annual or semi-annual frequency, or have received a lump sum from a trusteed plan after August 5, 2002.<br><br>Each month, a list of eligible payees is automatically sent to the HCTC program at IRS by OIT from PRISM ledgers, first pay loads authorized in DataHub Reconciler, and other sources of electronic data (such as check ledgers from prior paying agents) not yet available in DataHub or Prism.<br><br>**Timing:** For DataHub plan assumptions, TPD targets the first pay load to be authorized in DataHub Reconciler within 60 days of DOTR. For PRISM online loads, target the first pay date within 60 days of DOTR. Provide a separate database to OASD only when target cannot be met and as requested by OPSS.<br><br>OASD provides data to OIT generally by the 20th of the month to be included in the monthly data transfer to HCTC which occurs on the 26th. |
| **Guidance** | N/A |
| **Procedure Owner** | TPD, OPSS, OASD |

## Click here for more information

Actions Steps: TP 46.2 Monthly Transfer of HCTC Data

# TP 46.2 Action Steps

08/19/2004

## Monthly Transfer of HCTC Data

**TPD**

1 For newly trusteed plans, no action is necessary if payees are loaded under the following timeframes:

- DataHub loads – The first pay load has been authorized in DataHub Reconciler within 60 days of the Date of Trusteeship (DOTR).
- PRISM online loads – Payees are loaded so that the first pay date by SSC is within 60 days of DOTR.

If these timeframes cannot be met for a plan **and** OPSS requests the payee data be provided to OASD, continue with the procedure.

2 As requested by OPSS, provide an electronic list of payees, including names, SSNs, home addresses, and dates of birth (if available) to OASD. Send the data via e-mail to HCTC.Data, and in the message note the plan name and case number. Provide the requested data to OASD as soon as practicable, but not more than 45 days following the request from OPSS. Generally, these will be plans with a large number of retirees, congressional interest, or other circumstances which require that PBGC expedite the transfer of the data. If the data is in an unfamiliar format, contact OASD to coordinate the data transfer.

3 If the data cannot be provided to OASD within 45 days of the request from OPSS, advise OPSS of the delay.

**OPSS HCTC Representative**

1 Each week, review the list of newly trusteed plans provided by MCU.

2 Send an e-mail to the manager of each TPD with a newly trusteed plan on the list. Request the following information:

- Expected date First Pay Load will be entered into DataHub
- Expected date of first payment by SSC

3 If payee data for a plan will not be authorized in DataHub Reconciler within 60 days of DOTR (for DataHub loads) or the first pay date will not occur within 60 days of DOTR (PRISM online loads), and it will be necessary to transfer retiree data to the HCTC program at IRS as soon as possible, request that the TPD provide OASD a list of payees from the plan's paying agent (as directed under TPD instructions above). This list shall include all participants in pay status at DOTR. Request that the list be provided as soon as practicable, but not more than 45 days from the date requested.

4 Track responses and follow up as needed.

5 **Respond to IRS Exceptions Report -** Resolve exceptions attributable to PBGC-provided data listed on the monthly exceptions report provided by HCTC. Since most exceptions are

due to errors on PRISM, notify the appropriate TPD of the error and request corrections, as needed.

**OASD**

1 Each month, provide to OIT a list of payees in newly trusteed plans which have been authorized in DataHub Reconciler. This list shall include participants meeting the following criteria:

- All participants receiving a monthly, quarterly, semiannual, or annual annuity who were age 55 on or before the second day of the month.
- All participants receiving a monthly, quarterly, semiannual, or annual annuity for whom date of birth is unknown.
- All participants who have received a lump sum payment of their benefit after August 5, 2002, who were 55 on or before the second day of the month.
- All participants who have received a lump sum payment of their benefit after August 5, 2002, for whom the date of birth is unknown.

**Note:** OIT must have this information by the **20th** of the month to have the data included in the monthly transfer.

2 Ensure that supplemental payee lists received from the TPDs are included in the monthly eligibility lists provided to OIT.

## TP 46.3 Forms, Letters, Memos, etc.

**08/19/2004**

| **Note** | After opening a file listed below, use **File/Save As** to give appropriate name and then save with other case related files. To switch between the file and the Manual, press **ALT+TAB**. |

***ALGS 527 – Participant Eligible for HCTC***
***ALGS 528 – Ineligible – Not Age 55 or Older***

Appendix A

## Master List of Documents to Obtain 09/22/99

When obtaining documents from a plan administrator, plan sponsor, or third party, keep in mind that the set of documents obtained should serve the needs of all PBGC functions in relation to the case. Within IOD, PPD requires certain information in order to recommend an action in relation to a case and, within the TPDs, the auditors, actuaries, and PLS functions all require certain, but different sets of information. When a case requires assistance from OGC (whether because it is a bankruptcy, because IOD needs assistance in processing subpoenas, or because the case is being litigated), they will need certain types of information. Other organizations within PBGC, such as the Office of the Executive Director (OED), Trusteeship Working Group (TWG), Financial Operations Department (FOD), etc., also need information.

This master list is designed to present a superset of all the information that any organization in PBGC might possibly want for any type of case. Use this list as a starting point and reduce it as necessary to make it suitable for the current case. When in doubt as to whether an item is needed or not, try to get it anyway. Unless stated otherwise, request three to seven years of data. Generally, three years are sufficient, but request seven years if the OGC attorney on the case believes more data will be necessary for litigation.

Remember, document all your requests and notify all parties working on the case (PPD, TPD, OGC, FOD, etc.) when any documents come in.

### Plan Information

1 All past and present executed plan documents and amendments.

2 Documents indicating the name and address of all persons, past and present, designated or serving as Plan Administrator, Plan Fiduciary, Plan Trustee, including company Board of Directors resolutions of appointment or removal, letters of appointment or resignation, all related documents for the last three years, and all records/minutes of fiduciary, Plan Administrator, Plan and Trustee Manager.

3 All executed Trust Agreements, amendments to the Trust Agreements, and all related documents.

4 Documents indicating the name and address of the person who is custodian of plan records and documents.

5 Documents indicating the address where plan records and documents are located.

6 Documents indicating the name and address of all accountants or actuaries who have performed services for the plan for the last three years.

7 Documents relating to the Trust Funds and Plan Assets, including, but not limited to, the name and address of all persons that held or had custody of Trust Funds, all persons currently holding or having custody of Trust Funds, and the account numbers for any current Trust Fund accounts for the last three years.

8 Documents reflecting whether Trust Funds have been lent to any person for the last three years

9 Documents reflecting whether any plan participants have received lump sum distributions for all or part of their benefits for the last three years and the amount of any such distributions.

10 Documents reflecting whether there are any plan participants currently eligible for early or normal retirements who are not receiving benefits from the plan, and the amount of any such entitlements.

11 Documents relating to any request for a minimum funding waiver from the Internal Revenue Service for the last three years and, if granted, copies of Documents reflecting the terms of the waiver(s).

12 Documents reflecting whether any of the former or current directors and/or officers are, or were, vested plan participants.

13 All Form 5500s for the plan with all schedules and attachments for the last three plan years.

14 All Actuarial Valuation Reports for the plan for the past three plan years, including copies of all communications to and from the plan actuaries regarding the plan.

15 All insurance contracts used to fund the plan.

16 Listing of participant benefits (annuities) which were purchased in the past.

17 Documents relating to the plan, including but not limited to, all letters or correspondence to or from plan, plan participants, the PBGC, the Internal Revenue Service, the Department of Labor, the Company, the company/s Board of Directors, the Bank, and the Sponsors.

18 Documents related to participant benefits under the plan for the past three years.

19 Documents related to applications for benefits under the plan, and waivers of joint and survivor benefits under the plan.

20 Documents relating to the "funding policy and method" for the plan as described in the plan.

21 Documents relating to receipts and disbursements from the plan, including the amount of the receipt or disbursement, the date received or made, the identity of the payor and/or payee, and the reason for the receipt or disbursement for the last three years.

22 All annual reports of the Trustee of the plan for the last three years.

23 Documents relating to contributions to the plan for the last three years.

24 All fidelity bonds and fiduciary liability insurance policies for the plan in effect at any time during the last three years.

25 Copies of personnel and pension records for all plan participants, reflecting name, address, telephone number, age, marital status, date of birth, date of hire, employment termination date (if any), breaks in service ( if any), retirement date, and all other information relating to the calculation of benefits under the plan. When possible, obtain a sample individual's file from each of the standard participant categories (as applicable under the plan):

- Retirees
- Active participants (both vested and non-vested)
- Terminated participants (both vested and non-vested)
- Obtaining the information from these files early allows TPD auditors and actuaries to better develop a list of things they need to gather, as well as identifying the likely source documents for data elements and providing sample participants for actuaries to calculate benefits for when determining any differences between plan provisions and plan practice.

26 The application for benefits under the plan for the owners and all related documents.

27 Documents related to payment of benefits under the plan.

**Corporate Information**

1 Documents, including corporate stock record books, indicating the name(s) and address(es) of all former and current members of sponsor's "controlled group," as that term is currently defined by section 4001(a)(14) of ERISA, 29 U.S.C. § 1301(a)(14) for the last

three years.

2 Financial records of the owner(s)/sponsor(s), including audited and unaudited financial statements and personal tax returns for the last three fiscal years.

3 Corporate federal income tax returns of all controlled group members(s), including all schedules, attachments, and amendments for the last three tax years.

4 A list of all shareholders and the number of voting and non-voting shares held by each at any time during the last three years, including sponsor's stock transfer records and sponsor's corporate minute books with all corporate resolutions for the last three years.

5 All shareholder agreements, agreements to buy, sell or transfer sponsor's stock, and all documents related to any sponsor's shareholder agreements and/or buy, sell or transfer agreements for sponsor's stock entered into, dated, or in effect at any time during the last three years.

6 Complete copies of all asset sale or transfer agreements for assets, and all documents related thereto, for the sale or transfer of assets entered into, dated or in effect at any time during the last three years.

7 Complete copies of all documents relating to the cancellation, non-performance of, or closing on, any agreements described in numbers 31 and 32 above.

8 All insurance policies or contracts providing liability coverage for officers, directors, agents and employees or sponsor in effect at any time during the last three years.

9 Information about owners' spouses, children (natural and adopted), parents, and whether there are any relationships (either blood or marriage) between people on the list of owners. This is for controlled group determination.

10 Information indicating whether or not owners are employees of the plan sponsor or other controlled group members (for exclusion rules).

11 Partnership documents.

Active Participants

Participants Who Were Paid Out Distributions

Retirees

Terminated Non-Vested Participants

Terminated Vested Participants

Terminated Vested Participants With Creep Provisions

Appendix B

## Preferred Source Documents for Participant Data Elements 09/26/2000

**Note**

- As of 8/99, PBGC does not routinely request source documents from retirees (proof of age, dates of marriage or death)
- As of 1998, PBGC no longer requires "original" source documents [for example, birth certificates, death certificates, marriage certificates]. Copies of these source documents are acceptable. If original source documents are provided to PBGC, they are imaged and then returned to sender.
- The titles of forms listed as source documents below may vary from organization to organization. The listed titles are considered the most common and are representative of those used throughout the corporate world.

For many plans, the plan administrator or plan actuary will have much of PBGC-required data in a database format that can be easily imported to a Lotus spreadsheet or QuattroPro database. In such cases, it is more efficient to take a statistical sample of that data (mapping it back to the preferred source documents) for each data element to be used. If the statistical sample for a data element meets the requirements, then the database can be used as the primary source for that data element.

| Data Element<br>Universal Data Elements | Primary Source | Secondary Source | Other Sources/<br>Memos To The File |
|---|---|---|---|
| Name | Pension Application<br>Employee Application | Employee Application<br>Birth Certificate | |

For union plans, a union steward might be able to provide some or all information.

Appendix B

## Source Documents for Information on: 05/31/96

### Active Non-Vested Participants and Terminated Vesteds with Creep

Collect names, SSNs, and addresses for all active non-vested participants, and make sample copies of source documents.

- birth certificates
- W2s and W4s from file, if applicable
- employment applications
- personnel action forms (or equivalent)
- payroll forms (for change in rates, dates of termination)
- insurance forms
- union records

Appendix B

## Source Documents for Information on: 04/05/2002

### Active Participants

Collect information for all active participants. Some participant information is only retained on a sampling basis to support the participant data audit, other documents should be collected to support benefit processing. See also Process 11.3: Conduct Field Audit.

**Collect samples of the following:**

- birth certificates
- W2s from file, if applicable
- marriage certificates
- employment applications
- personnel action forms (or equivalent)
- payroll forms (for change in rates, dates of termination)
- time cards
- insurance forms
- employee family records (useful for finding unlocatable participants)
- death certificates (for beneficiaries in pay status)
- exit interviews
- memos/records regarding termination
- union records
- Form I-9 (proof of eligibility to work in the U.S.A.), if available

**Collect original copies of:**

- beneficiary designation form
- any spousal consent or waiver form
- participant loan documents - loan application, loan agreement, repayment schedule.
- QDRO documents.

Appendix B

## Source Documents for Information on: 05/31/96

**Participants Who Were Paid Out Distributions**

Collect information on former participants who were paid out distributions or "cashed out," and make sample copies of source documents.

- check registers
- canceled checks
- retirement application forms (including spousal waivers, W4s, withholding forms, deductions, etc.)
- calculation sheets
- W2s from file, if applicable
- personnel action forms (or equivalent)
- payroll forms (for change in rates, dates of termination)
- death certificates (for beneficiaries in pay status)
- exit interviews
- beneficiary designation form

Appendix B

## Source Documents for Information on: 04/05/2002

### Retirees

Review retiree information, and make copies of the preferred source documents for each data element. For each data element use the preferred source, when available. As trustee of the plan, PBGC takes the original of the retirement folder (including materials used in determining entitlement and calculating the benefit) for all retirees, if the plan administrator maintained such files. It is particularly important that PBGC collects ***all*** completed benefit related forms, not just sample copies.

- retirement application forms (including spousal waivers, W4s, withholding forms, deductions, etc.)
- QDRO documents
- participant loan documents - loan application, loan agreement, repayment schedule
- birth certificates
- calculation sheets
- W2s from file, if applicable
- marriage certificates
- employment applications
- personnel action forms (or equivalent)
- any documentation identifying breaks in service and all start and end dates
- payroll forms (for change in rates, dates of termination)
- time cards
- insurance forms
- employee family records (useful for finding unlocatable participants)
- death certificates (for beneficiaries in pay status)
- exit interviews
- memos/records regarding termination
- beneficiary designation form
- Form I-9 (proof of eligibility to work in the U.S.A.), if available

Appendix B

## Source Documents for Information on: 11/01/96

### Terminated Non-Vested Participants

Collect names, SSNs and addresses for all terminated non-vested participants, and make sample copies of source documents. Note that the term "terminated non-vested participant" refers to people no longer actively employed by the company, and for whom there are records, who may not be covered by the pension plan or who may have terminated prior to completing enough service to be a deferred vested participant. Depending on whether the plan was properly amended according to ERISA amendments, PBGC ERISAfication of the plan may increase the universe of covered employees.

- birth certificates
- W2s and W4s from file, if applicable
- employment applications
- personnel action forms (or equivalent)
- payroll forms (for change in rates, dates of termination)
- insurance forms
- exit interviews
- memos/records regarding termination

Appendix B

## Source Documents for Information on: 04/05/2002

### Terminated Vested Participants

Collect information for all terminated vested participants. Some participant information is only retained on a sampling basis to support the participant data audit, other documents should be collected to support benefit processing. See also Process 11.3: Conduct Field Audit.

**Collect samples of the following:**

- birth certificates
- W2s and W4s from file, if applicable
- marriage certificates
- employment applications
- personnel action forms (or equivalent)
- payroll forms (for change in rates, dates of termination)
- time cards
- insurance forms
- employee family records (useful for finding unlocatable participants)
- death certificates (for beneficiaries in pay status)
- exit interviews
- memos/records regarding termination
- union records

**Collect original copies of:**

- beneficiary designation form
- any spousal consent or waiver form
- participant loan documents - loan application, loan agreement, repayment schedule
- QDRO documents

Introduction

Forms of Bankruptcy Relief

Commencement of a Case

Bankruptcy Trustee

Administration of Case

Filing of Proofs of Claims

Distribution in Bankruptcy

Chapter 7 Liquidation

Chapter 11 Reorganization

## Introduction

**05/31/96**

Bankruptcy is a form of legal relief where the assets of a debtor, and creditors' claims on those assets, are gathered into a single legal proceeding. As the Supreme Court put it in 1934, one of the main thrusts of our bankruptcy system is to "relieve the honest debtor from the weight of oppressive indebtedness and permit him to start afresh." Bankruptcy also emphasizes equality of treatment for all similarly situated creditors, as opposed to a "race to the courthouse."

Bankruptcy law is federal law. Article I of the Constitution empowers Congress to establish "uniform laws on the subject of Bankruptcies throughout the United States." Congress has exercised this power. Consequently, states are preempted from enacting bankruptcy laws. The federal **Bankruptcy Code** can be found at Title 11 of the United States Code. Within each federal judicial district there is a **bankruptcy court** that has jurisdiction over bankruptcy cases.

Under Title IV of ERISA, bankruptcy is a **reportable event** that may indicate a need to terminate the debtor's pension plan. PBGC is involved in hundreds of bankruptcy cases across the country. The cases are monitored by teams of auditors, actuaries, financial analysts, and attorneys. The agency plays a key role in these bankruptcy cases because our claims are often among the largest, if not the largest.

This appendix provides an overview of the bankruptcy process for non-attorneys, emphasizing how PBGC protects the interests of plan participants and beneficiaries as well as our insurance fund when we become involved in a bankruptcy case.

## Appendix C: Bankruptcy Overview includes:

Forms of Bankruptcy Relief

Commencement of a Case

Chapter 11 Reorganization

## Forms of Bankruptcy Relief

05/31/96

Two Forms of Relief

Chapter 11

**Forms of Bankruptcy Relief**

## Two Forms of Relief

**05/31/96**

There are two general forms of bankruptcy relief: **liquidation**, and **rehabilitation** or **reorganization** . Liquidation relief is available under **Chapter 7** of the Bankruptcy Code. Reorganization is governed by **Chapter 11**. A Chapter 11 plan may also provide for liquidation of the debtor, and Chapter 11 cases are sometimes converted to Chapter 7 liquidations.

Most bankruptcy cases are "straight liquidations" in Chapter 7. In a Chapter 7 case, a **bankruptcy trustee**, usually a local bankruptcy attorney or accountant, is appointed by the **United States Trustee** (not to be confused with the bankruptcy trustee) to administer the liquidation of the debtor's estate. The bankruptcy trustee collects the property of the debtor, converts that property to cash, and distributes the cash to creditors. The debtor gives up all property owned at the time of the filing of the bankruptcy petition.

**Forms of Bankruptcy Relief**

## Chapter 11

**05/31/96**

Chapter 11 generally deals with reorganization, not liquidation, of the debtor's assets. In a Chapter 11 case, creditors usually look to future earnings of the debtor, not the property of the debtor at the time of bankruptcy filing, to satisfy their claims. Usually the debtor remains in possession of its property and operates its business. The debtor makes payments to creditors pursuant to a court-approved **plan of reorganization**. Upon confirmation of a plan, the debtor receives a discharge of all pre-confirmation debts. A Chapter 11 debtor may also file a **plan of liquidation**, where a sale of assets occurs before, during, or after plan confirmation.

Chapter 9 deals with bankruptcies of municipalities; Chapter 12 deals with family farmer bankruptcies; and Chapter 13 governs individual consumer bankruptcies. PBGC rarely becomes involved in these types of cases.

## Commencement of a Case

05/31/96

### Voluntary Petition

Most bankruptcy proceedings will be voluntarily initiated by the debtor by simply filing a petition. The filing constitutes the "**order for relief**."

### Involuntary Petition

An involuntary case may also be filed against a debtor by several creditors who hold claims of specified type and amount. The debtor need only be generally not paying debts as they become due, rather than insolvent.

### Relationship With State Law Remedies

Debtors and creditors sometimes resort to consensual non-bankruptcy workouts or state law remedies rather than the bankruptcy courts. State law remedies may come in the form of a state receivership action, an assignment for the benefit of creditors, or a bulk sale under the Uniform Commercial Code (CC). But where the debtor or creditors wish to obtain rights available only under the Bankruptcy Code, the parties may prefer a federal bankruptcy proceeding.

### Schedules and Statement of Affairs

Along with the petition or shortly thereafter, the debtor is required to file a **list of creditors, schedules of assets and liabilities, and a statement of financial affairs**. PBGC should routinely obtain these documents from the debtor or the bankruptcy court clerk if it appears that we will be asserting claims. Note that these schedules are not always accurate or complete.

## Bankruptcy Trustee

**05/31/96**

The principal officer of the debtor is the **bankruptcy trustee**, who acts as representative of the estate, and has the capacity to sue and be sued. In Chapter 11 proceedings, the debtor normally acts as bankruptcy trustee in the guise of "debtor-in-possession." An independent Chapter 11 trustee or examiner can be appointed upon a proper showing. The trustee has the power, with the court's permission, to employ professionals such as attorneys, accountants, actuaries and financial advisers.

# Administration of Case

12/07/2001

## Meeting of Creditors

A **meeting of creditors** must be held within a reasonable time after the filing of the petition. The meeting must be held **20 to 40 days after the order for relief**. All creditors must receive 20 days notice of the meeting. Typically, a form is used which also notifies creditors of the filing of the petition and the bar date for filing proofs of claim, and identifies debtor's counsel.

The meeting of creditors is presided over by the U.S. Trustee, and affords an opportunity to question the debtor under oath about its financial affairs. Although it is not essential for PBGC to attend the meeting, depending on the facts and circumstances, valuable information can sometimes be obtained.

## Administrative Powers

Upon the filing of a bankruptcy petition, the Bankruptcy Code imposes an **automatic stay** or injunction on virtually all legal proceedings and acts outside of the bankruptcy forum that affect the debtor or property of the debtor's **estate**. The estate is created upon the filing of the petition. Generally, it consists of all of the property of the debtor. The debtor or trustee may use, sell, or lease property of the estate so long as **adequate protection** is given to secured creditors with liens on the property. The debtor or trustee can borrow money, sometimes secured by a lien senior to pre-existing liens. And, any executory contract or unexpired lease can be assumed or rejected. Under certain circumstances the debtor or trustee can also recover **"preferences,"** that is, payments made to creditors within 90 days, or in the case of insiders, 1 year before the petition date.

### *The Automatic Stay*

The automatic stay arises instantly upon the filing of a petition. The stay is very broad and covers all judicial, administrative, or other proceedings against the debtor, including service of process. It also prohibits the enforcement of pre-petition judgments and "any act" to obtain possession of property of the estate, to create, perfect, or enforce a lien against property of the estate, and to collect, assess, or recover a claim.

The automatic stay has an exception for the government's use of its "police or regulatory powers." An action by PBGC to seek PBGC-initiated termination of a pension plan -- but not to collect or enforce termination liability -- is exempt from the automatic stay. Mere requests for information from the debtor are also not subject to the stay.

## Filing of Proofs of Claims 05/31/96

The **timely** filing of a proof of claim is generally a prerequisite to allowance and payment of claims. PBGC attorneys routinely file claims for minimum funding contributions, unfunded benefit liabilities, and premium obligations. Sometimes the claims are asserted on a contingent and unliquidated basis until the amounts of our claims and the status of the pension plan (ongoing or terminated) is determined.

In Chapter 7 cases, the **bar date** for filing claims is 90 days from the date of the meeting of creditors, which generally must be held 20 to 40 days after an order for relief is entered (in a voluntary case, the order for relief is entered on the petition date). Therefore, in Chapter 7 cases the bar date will usually be 110 to 130 days after the petition is filed. In Chapter 11 cases, the bar date is set by the court. However, a claim of a government creditor such as PBGC may always be filed up to **180 days after the date of the order for relief.**

In general, late-filed claims are not allowed unless the creditor can establish a lack of notice of the case, or, in Chapter 11 cases, lack of notice of the bar date. But PBGC may be able to establish that it did not receive proper notice, and collect on late-filed claims, even if the bar date has passed by the time we are notified about the case.

Distribution Scheme

Determination of Secured Status

Unsecured Priority Claims

Priority of PBGC Claims

Minimum Funding Contributions (DUEC)

Unfunded Benefit Liabilities (UBL)

Premiums

### Distribution in Bankruptcy

## Distribution Scheme

**05/31/96**

The general scheme of distribution in bankruptcy is that secured creditors take the value of their security, then priority claims such as administrative expenses are paid, and the residue, if any, is distributed to general unsecured creditors on a pro rata basis. In some cases, secured claims and administrative expenses exhaust the estate.

**Distribution in Bankruptcy**

## Determination of Secured Status

**05/31/96**

A secured claim is secured only to the extent of the value of the collateral or property securing the claim. If the value of the collateral is less than the amount of the claim, the amount of the deficiency is an unsecured claim. An undersecured claim then is really 2 claims - one secured, and one unsecured.

In some cases, PBGC may have secured claims and perfected liens for obligations such as delinquent minimum funding contributions under § 412(n) of the Internal Revenue Code ("IRC"), minimum funding waivers, or pre-bankruptcy contractual settlements.

**Distribution in Bankruptcy**

## Unsecured Priority Claims

**05/31/96**

The Bankruptcy Code specifies the types of unsecured claims that are entitled to priority in distribution, and the order of the priority. Four of the priority categories are relevant to PBGC's claims, as discussed below.

First priority is granted to **administrative expenses**, such as post-petition employee wages, professional fees, taxes, and other costs and expenses of the estate. PBGC typically seeks administrative priority for portions of its claims, to the extent that they arise post-petition.

Third priority is granted to employee claims for wages, vacation, severance and sick leave earned within 90 days of the petition date or the date of cessation of the debtor's business, whichever occurs first, subject to a $4,000 cap for each employee.

Fourth priority is granted to claims for contributions to employee benefit plans, which includes pension and health benefit plans, arising from services rendered within 180 days before the petition date or the date of cessation of business, whichever occurs first (the so-called "180 day claim"). The amount entitled to priority is subject to a cap. The cap is calculated by multiplying $4,000 times the number of employees covered by the plan, and then subtracting the aggregate amount of third priority wage claims with respect to such employees. Subject to these limitations, PBGC will seek fourth priority for any portion of minimum funding contributions arising within the 180-day period.

Eighth priority is granted to pre-petition "tax" claims, including excise tax claims. PBGC seeks eighth priority tax treatment for portions of its DUEC and UBL claims.

**Distribution in Bankruptcy**

## Priority of PBGC Claims

**05/31/96**

Portions of PBGC's claims are entitled to priority under the Bankruptcy Code. The priority and amount of PBGC's claims, however, is often disputed. Recently, several lower courts have ruled adversely to PBGC on these issues, reversing an earlier trend of favorable decisions. Several of these cases are currently on appeal. We continue to file our priority claims as set forth below.

**Distribution in Bankruptcy**

## Minimum Funding Contributions (DUEC)

**05/31/96**

1 **Administrative priority**, to the extent that any DUECs are attributable to the period after the petition filing date. And administrative tax priority for IRC § 412(n) DUEC claims, if the amount of DUECs attributable to the period after the petition date exceeds $1 million;

2 **Day claim**, or fourth priority, for DUECs attributable to the 180-day period before the earlier of the petition date or the date of cessation of business, subject to the limits specified in the Bankruptcy Code.

3 Any amount not entitled to priority is a **general unsecured** claim.

**Distribution in Bankruptcy**

## Unfunded Benefit Liabilities (UBL)

**05/31/96**

1. Administrative tax priority, if the plan terminates after the petition date, subject to the 30% of collective net worth of controlled group limit in ERISA § 4068.
2. Alternatively, eighth priority as a pre-petition tax claim, again subject to the 30% of net worth limit.
3. Any amount not entitled to priority is a general unsecured claim.

## Distribution in Bankruptcy

## Premiums

**05/31/96**

1. **Administrative priority**, for premiums attributable to the period after the petition filing date.
2. Any amount not entitled to priority is a **general unsecured** claim.

## Chapter 7 Liquidation 05/31/96

The simplest bankruptcy proceeding is a straight Chapter 7 liquidation. The debtor turns over its assets to a trustee who liquidates the assets and distributes the proceeds to creditors.

### Duties of Trustee

Although the court may authorize the trustee to operate a debtor's business for a limited period, the trustee's principal duty is to liquidate the assets of the estate as expeditiously as possible. The trustee may examine and object to the allowance of any claim. The trustee is obligated to furnish information concerning the debtor's estate to any party in interest. At the conclusion of the case, the trustee must file a **final report**.

### Distribution of Property of the Estate

The Bankruptcy Code sets forth a distribution scheme for Chapter 7 cases. This distribution scheme also impacts Chapter 11 cases, because the amount that a claim would receive in a Chapter 7 liquidation is the standard of fairness or "best interests of creditors test" against which Chapter 11 reorganization plans are measured.

In a Chapter 7 case, after secured creditors are paid, the liquidation proceeds are first distributed among unsecured priority claimants, in the order of priority specified under the Bankruptcy Code. Next, distribution is made to general unsecured claimants, including late-filed claims, if the creditor did not have notice or knowledge of the case in time to file a timely claim. If any further assets remain, distribution is made on other late-filed claims and then post-petition interest, in that order. Any surplus may be returned to the debtor. Rarely, if ever, are there any surplus assets.

When there are inadequate funds to pay the holders of claims in a particular class in full, the claims within the particular class are paid pro rata.

## Chapter 11 Reorganization 05/31/96

Chapter 11 is designed to rehabilitate rather than liquidate the debtor. In Chapter 11, the debtor may continue to operate its business while it attempts to work out a financial restructuring plan with its creditors. Chapter 11 proceedings are the sole means by which a business operated by a corporation can obtain a discharge of debts.

## Click Here for More Information...

Creditors Committee

Bankruptcy Trustee/Debtor in Possession

Chapter 11 Plan

**Chapter 11 Reorganization**

## Creditors Committee

**05/31/96**

Soon after the Chapter 11 petition is filed, the United States Trustee appoints a committee of unsecured creditors ordinarily consisting of the 7 largest creditors. PBGC is eligible to serve as an official Chapter 11 creditors committee member. Other committees may be appointed to represent secured creditors and equity holders.

Committees play a major role in negotiating the terms of the debtor's plan of reorganization and litigating major controversies in the case. Official committees typically employ their own financial advisers and accountants to investigate the affairs of the debtor.

### Chapter 11 Reorganization

## Bankruptcy Trustee/Debtor in Possession 05/31/96

Ordinarily in a Chapter 11 case, the debtor is the bankruptcy trustee of the estate in the guise of "debtor in possession" ("DIP"). Unless the court orders otherwise, the DIP may continue to operate its business. An independent trustee or examiner may be appointed under certain circumstances, such as cases of fraud or gross mismanagement. The duties of a Chapter 11 trustee/DIP include many of the same duties as a Chapter 7 trustee, as well as the duty to formulate and file a plan of reorganization as soon as practicable, or a liquidation plan if reorganization is not possible.

Appendix C - Bankruptcy Overview

**Chapter 11 Reorganization**

## Chapter 11 Plan

**05/31/96**

Exclusivity

Classification of Claims

Voting Requirements

Disclosure Statement

Confirmation

### Chapter 11 Plan

## Exclusivity

**05/31/96**

At the outset of the case, the debtor enjoys a **120-day exclusive period** to file a plan. If the debtor files a plan within 120 days, the exclusive period is extended to 180 days to permit the debtor to solicit acceptances to its plan. These exclusive periods may be extended for cause. Once the debtor's exclusive period expires, it's open season: any party in interest, such as a creditors committee, may file a plan. Keep in mind, however, that the plan formulation process is primarily a settlement negotiation process. Senior creditors may give up value to junior creditors in order to achieve a consensus, and recoveries may improve generally if major claims and controversies are settled rather than litigated to completion.

### Chapter 11 Plan

## Classification of Claims

**05/31/96**

In general, a plan must designate classes of claims and interests according to their relative priority. The plan must also specify whether or not each class is "impaired." A class of claims is impaired if all claims within the class are not paid in full, or if the plan otherwise alters the legal, equitable, or contractual rights to which the claim holders are entitled. Unimpaired classes are conclusively presumed to have accepted the plan. A debtor or plan proponent need only solicit votes from impaired classes.

**Chapter 11 Plan**

## Voting Requirements

**05/31/96**

Each claim holder in an impaired class may cast a vote to accept or reject a plan. Votes are tallied by class, and only the claims of creditors who actually vote are counted. A class of claims is bound if the plan is accepted by at least 2/3 in amount and more than 1/2 in number of claims held by creditors who actually voted. With respect to equity security interest holders (stockholders), the requisite majority is 2/3 in amount, i.e., 2/3 of the shares voted. If the plan does not provide for a distribution to equity, which is sometimes the case, equity classes are deemed to have rejected the plan.

**Chapter 11 Plan**

## Disclosure Statement

**05/31/96**

In order to solicit votes, the debtor or plan proponent must transmit a court-approved **disclosure statement**. Creditors are given 25-day advance notice of the hearing to approve the disclosure statement, and an opportunity to object to it. The disclosure statement must contain **"adequate information"** sufficient to permit voting parties to make an informed judgment about the plan. The disclosure

statement typically should include a description of the debtor's business, major claims and controversies, and a business plan supported by financial projections.

**Objections to confirmation** of a plan are ordinarily reserved for the confirmation hearing. In practice though, PBGC, like other creditors, often makes confirmation objections at the disclosure stage as part of the plan negotiation process.

## Chapter 11 Plan

## Confirmation

05/31/96

The **plan confirmation** process can proceed from start to finish in as little as 30 to 60 days. 25-day advance notice is required before the disclosure statement hearing. Once the disclosure statement is approved, an additional 25-day advance notice must be given for the plan confirmation hearing. However, in a "pre-packaged bankruptcy," where a plan is negotiated before the bankruptcy filing, no disclosure statement is necessary. Mailing and vote processing time could tack on as little as 10 additional days. Plan proposals are often negotiated and amended during this time on a very fast track. Coordination among PBGC attorneys, financial analysts, and case officers is crucial during the plan confirmation process.

To confirm a plan, the bankruptcy court must find that the plan has been accepted by each impaired class of claims and interests by the requisite majority vote, or alternatively, that the plan satisfies the **"cramdown"** requirements

discussed below. In addition, the bankruptcy court must determine that the plan satisfies the **"best interest of creditors"** and **feasibility** tests discussed below.

The **"best interests of creditors" test** is also known as the **Chapter 7 liquidation test**. It protects individual dissenting holders of claims or interests within a class, as opposed to dissenting classes. The test is automatically satisfied if a class has unanimously accepted the plan. If not, then each individual dissenting claim or interest holder must receive a distribution under the plan with a present value, as of the date of plan confirmation, that is not less than the amount they would receive in a Chapter 7 liquidation. To apply the test, a liquidation analysis must be performed, and the Chapter 7 distribution rules must be applied to compare a hypothetical Chapter 7 distribution to the distribution under the proposed Chapter 11 plan.

The plan must also meet a **"feasibility" test**. In other words, the financial projections and business plan must establish that the plan can be carried out according to its terms with reasonable certainty, and that it is not likely to be followed by a liquidation or further reorganization.

Under a plan, administrative priority claims must be paid in full in cash upon confirmation. Employee wage and benefit priority claims must be paid in full in cash if they reject the plan; otherwise they may receive deferred cash payments with a present value equal to the allowed amount of their claims. Tax priority claims can be satisfied through deferred cash payments over a maximum of 6 years.

Each impaired class must accept the plan by the requisite majority vote. Alternatively, the plan may be confirmed over the objection of a dissenting class in a **"cram-down."** The bankruptcy court can confirm a plan notwithstanding rejection by an impaired class, so long as the plan does not "discriminate unfairly" and is "fair and equitable" with respect to each dissenting class. The central concept behind cram-down is the **"absolute priority" rule:** senior classes must be paid in full before any junior classes may receive any distribution under the plan. If a dissenting class is not paid in full, no class or classes junior to the dissenting class may receive a distribution under the plan. For example, a class of unsecured claims that is not paid in full can be crammed down as long as junior equity classes receive no distribution.

Upon confirmation of a plan of reorganization, the debtor receives a **discharge** from all claims arising before confirmation. All creditors are bound by this discharge and by the terms of the plan. Claims that do not "arise" before confirmation, such as PBGC's contingent UBL claim in a case where the pension plan remains ongoing, are not affected by the discharge. In addition, a creditor who never had notice of the case may not be affected by the discharge.

Appendix D

## Maximum Guaranteeable Benefits for DOPT Years

02/18/2005

**Benefit Fiscal Years**

FY1981 - FY1990 | FY1991 - FY2000 | FY2001 - FY2005

**The limit for the dollar amount a participant may receive as a monthly benefit differs for each year (per 29 CFR 4022.22), as follows:**

| Year of DOPT | Monthly Limit ($) |
|---|---|
| 1974 | 750.00 |
| 1975 | 801.14 |
| 1976 | 869.32 |
| 1977 | 937.50 |
| 1978 | 1,005.68 |
| 1979 | 1,073.86 |
| 1980 | 1,159.09 |
| **FY1981 – FY1990** | |
| 1981 | 1,261.36 |
| 1982 | 1,380.68 |
| 1983 | 1,517.05 |
| 1984 | 1,602.27 |
| 1985 | 1,687.50 |
| 1986 | 1,789.77 |
| 1987 | 1,857.95 |
| 1988 | 1,909.09 |
| 1989 | 2,028.41 |
| 1990 | 2,164.77 |
| **FY1991 – FY2000** | |
| 1991 | 2,250.00 |
| 1992 | 2,352.27 |
| 1993 | 2,437.50 |
| 1994 | 2,556.82 |
| 1995 | 2,573.86 |
| 1996 | 2,642.05 |
| 1997 | 2,761.36 |
| 1998 | 2,880.68 |
| 1999 | 3,051.14 |

| | | |
|---|---|---|
| | 2000 | 3,221.59 |
| **FY2001 – FY2005** | | |
| | 2001 | 3,392.05 |
| | 2002 | 3,579.55 |
| | 2003 | 3,664.77 |
| | 2004 | 3,698.86 |
| | 2005 | 3,801.14 |

**Note** This listing only reflects the maximum monthly amount in dollars as a straight life benefit for each year of DOPT. Determining the maximum payable to a particular participant requires a more involved formula described in ERISA 4022 (b) (3). When applied on an individual basis, many participants may experience a lower maximum monthly limit once the formula is applied (as part of the valuation calculations). Base the adjustment to guaranteeable monthly limit on ages and benefit form in addition to the maximum dollar amount for DOPT. See the Actuarial Technical Manual procedures in Chapter IV.
For benefit applications received on or after March 06, 2000, the maximum guaranteeable benefit is adjusted upward for a participant whose age is greater than 65 at the later of the retirement date or DOPT.

Appendix E

# IOD Time Reporting (BMPRS) 08/25/2000

**Part I: Introductory Questions and Answers (see below)**

**Part II: IOD Time Reporting Categories**

**Q: What is time reporting and BMPRS?**

**A:** IOD's **B**udget, **M**anagement, **P**lanning and **R**eporting **S**ystem (BMPRS) provides a tool for each employee to easily enter their daily time reporting information, providing a record of the time and effort expended on an individual basis for IOD tasks, including:

- Processes tracked by case;
- Other Processes and Categories (includes processing activities not tracked by case, support, management and administrative activities); and
- Special Projects.

ALL IOD Divisions report time using BMPRS. Each division's management team members will extract information about their respective divisions using BMPRS report functions.

BMPRS was specifically developed for IOD to track the timeline of major trusteed plan case milestones (using CAS models) and the number of hours expended to reach these goals.

**Q: Why does IOD need time reporting?**

**A:** IOD time reporting facilitates meaningful management and budget planning and analysis, and permits IOD to estimate its future resource needs to perform necessary departmental functions in fulfillment of the PBGC and IOD missions. Time reporting also assists in setting meaningful goals across the department.

**Q: Who must report time?**

**A:** Most IOD federal and contract employees report time on an individual daily basis. The exact requirements differ for: federal employees, contract employees (non-actuarial), and actuarial contractors.

- All IOD federal employees do daily time reporting.
- All IOD contract employees (non-actuarial) do daily time reporting.
- Actuarial contractors do not do individual daily time reporting. (Entry of actuarial contractor time is the responsibility of the COTR.)

**Q: What time must be reported?**

**A:** The time reporting requirements for IOD federal and contract employees are:

- IOD federal employees' daily time will include all time worked, all scheduled time not worked (all types of leave [sick, annual, comp, credit, admin, lwop, and awol]). Generally a federal employee may easily check their daily time submitted for payroll purposes against BMPRS time reported, as the two should have the same total hours reported with the exception of federal holidays. Federal employees should not enter time on BMPRS for federal holidays unless they actually work those hours. Federal employees will report time using any appropriate category included in II.A., II.B., and II.C. of this Appendix.
- IOD contract employees' (non-actuarial) daily time will only include case processing activities. Time should not be reported for any support, administrative, managerial or special project activities. Contract employees (non-actuarial) will report time using only categories included in II.A, II.B.1., and II.B.2. of this Appendix.

- Actuarial contractors do not do daily individual time reporting. (Entry of actuarial contractor time is the responsibility of the COTR.)

  For more information about specific time reporting categories in BMPRS, see Part II: IOD Time Reporting Categories.

**Q: When must time be reported?**

**A:** BMPRS is a flexible easy to use system which allows for individual time reporting on a daily basis. It is recommended that federal and contract employees enter their time on a daily or weekly basis. However, employees' time must be entered no later than the 3rd business day after the last day of the month. Management team members will work with their staff to encourage accurate and timely reporting of time. BMPRS allows prospective entry of time, so when appropriate employees may enter their individual time in advance. Examples of appropriate circumstances for advance time reporting include scheduled leave and training. Staff should consult with supervisors about the appropriateness of advance time recording.

**Q: Who do I contact if I have questions about using BMPRS?**

**A:** BMPRS is administered by IOD, however, staff experiencing problems with the application should contact PBGC's Help Desk at x 3999.

**Q: What is the effective date of IOD Time Reporting using BMPRS?**

**A:** Individual daily time reporting by employees is required beginning May 19, 1997.

## Part II: IOD Time Reporting Categories 05/02/97

The time reporting categories available in BMPRS are generally divided into three broad types:

- Processes tracked by case;
- Other Processes and Categories (includes processing activities **not** tracked by case, support, management and administrative activities); and
- Special Projects.

## Click here for more information...

A. Processes Tracked by Case

B. Other Processes and Categories not Tracked by Case

C. Special Projects

**Part II: IOD Time Reporting Categories**

## A. Processes Tracked by Case:

**08/25/2000**

A1. Categories for processors except STCD  A2. Categories for STCD processors

## A1. Categories for processes tracked by case (processors except STCD)

To enter time in BMPRS to a case specific processing category you need to know the case you are working on and the specific sub-process or sub-technical procedure you are doing, based on the online IOD Procedures Manual. Your division manager will assign (through BMPRS assign process function) the BMPRS categories which are appropriate for your time reporting needs.

Each Process and Technical Procedure in this online IOD Procedures Manual specifies the BMPRS category(ies) which link to that specific activity. Each sub-process or sub-technical procedure outline (topic which precedes the action steps) lists the specific BMPRS category(ies) for reporting that time. To determine the correct BMPRS category for specific tasks, refer to the outline for the specific sub-process or sub-technical procedure which provides the Time Reporting (BMPRS) category(ies).

Certain BMPRS Categories tracked by case (e.g., Initiate Trusteeship, Process BDLs) are listed several times, preceded by FTE, PBA, FBA and contract. Only one of these categories will be appropriate for you through BMPRS according to the category appropriate to your specific position (federal employee = FTE, pension benefit analyst/contractor = PBA, field benefits administrator employee = FBA, contract = non-PBA or FBA contractor). It is recommended that you use the **Custom Process List** feature of BMPRS to delete those categories which are clearly inappropriate for you.

**PPD Support to TPD**

**PPD Processing**

**FTE Initiate Trusteeship Processing (TPD)**

**FBA Initiate Trusteeship Processing (TPD)**

**PBA Initiate Trusteeship Processing (TPD)**

**FTE Estimated Benefits Adjustment (TPD)**

**FBA Estimated Benefits Adjustment (TPD)**

**PBA Estimated Benefits Adjustment (TPD)**

**FTE Estimated Benefit Calculations**

**FBA Estimated Benefit Calculations**

**PBA Estimated Benefit Calculations**

**FTE Participant Data Audits (TPD)**

**FBA Participant Data Audits (TPD)**

**PBA Participant Data Audits (TPD)**

**Contract Participant Data Audits (TPD)**

**Plan Assets Audit**

**Contract Plan Assets Audits**

**Controlled Group**

**Net Worth**

**Recovery Assessment and Allocation (TPD)**

**FTE Actuarial Valuation (TPD)**

**Contract Actuarial Valuation (TPD)**

**FTE Process Benefit Determination Letters (TPD)**

**FBA Process Benefit Determination Letters (TPD)**

**PBA Process Benefit Determination Letters (TPD)**

**FTE Case Closure (TPD/TSD)**

**FBA Case Closure (TPD/TSD)**

**PBA Case Closure (TPD/TSD)**

**Case Related Policy Analysis (All Divisions)**

## A2. Categories for processes tracked by case (STCD processors)

STCD processing activities are not currently included in the online IOD Procedures Manual. BMPRS Categories for STCD processes which are tracked by case, with related functions under each category are listed here. STCD personnel should consult with STCD division management if additional detail is needed.

***Provide Technical Assistance/Reconsiderations (STCD/PTAB)***

- Administrative Reviews
- Respond to Extension Requests
- Respond to Telephone Requests
- Identify, Data Entry, Assign
- Review Documentation
- Send Appropriate Determination Letter
- Enter determination on CAS and Close

***Audit Standard Termination (STCD CAB)***

- Select Cases to Audit
- Prepare Case File for Audit
- Request Information Necessary for Audit
- Analyze Information Received
- Request Additional Information Necessary for Audit
- Select Sample
- Send Participant Letter
- Compute Benefits
- Reconcile Participant Count
- Classify Errors
- Send Enforcement Letter

- Process Audit Enforcement Reconsideration
- Enforce Action
- Send Information Letter
- Prepare Audit Summary
- Refer Woodwork to TPD
- Close Case

***Process 4071 Penalty (STCD)***

- Assess Penalty
- Administrative Review
- Send Letter

***Compliance Audit (STCD)***

- Select Cases to Audit
- Prepare Case File for Audit
- Request Information Necessary for Audit
- Analyze Information Received
- Request Additional Information Necessary for Audit
- Select Sample
- Send Participant Letter
- Compute Benefits
- Reconcile Participant Count
- Classify Errors
- Send Enforcement Letter
- Process Audit Enforcement Reconsideration
- Enforce Action
- Send Information Letter
- Prepare Audit Summary
- Refer Woodwork to TPD
- Close Case

***Manage Multiemployer Assistance (STCD)***

- Assign Case
- Gather & Analyze Data to Determine Type of Case, Needs & Costs
- Recommend Closure
- Pass to the Designated Person in OED
- Audit On-Site
- Prepare Paperwork

- Coordinate Wire Transfer & Transfer Funds
- Review Expenses & Renew Paperwork
- Determine Repayment Capability

***Case Related Policy Analysis (All Divisions)***

- Refer Policy Questions

## Part II: IOD Time Reporting Categories

# B. Other Processes and Categories not Tracked by Case 06/06/97

↑Top B1. Processes ... included in the online IOD Procedures Manual
B2. Processes ... not included in the online IOD Procedures Manual
B3. Case processing support activity
B4. Other duties, including administrative and managerial duties

To enter time in BMPRS to a category which does not track time by case, you **do not need the name of case you are working on;** you need only identify the specific activity.

Some of the categories for activities which are not tracked by case cover case processing activities, which are described in the online IOD Procedures Manual. These are reported in BMPRS on a non case specific basis (ex: Small Plan Early Warning Program, Administer Benefits). Other categories cover non case processing activities, including support functions, and various administrative and management duties.

Other Processes and Categories not tracked by case include a number of BMPRS categories which may be generally divided into four groups, as follows:

- case processes and/or procedures **included** in the online IOD Procedures Manual which are not **tracked** by case (see B1 below),
- case processes and/or procedures **not included** in the online IOD Procedures Manual which are **not tracked** by case (see B2 below),
- case processing support activities (see B3 below); and
- other duties including administrative and managerial duties (see B4 below).

### B1. Processes and/or procedures not tracked by case which are included in the online IOD Procedures Manual.

Each Process and Technical Procedure in this online IOD Procedures Manual specifies the BMPRS category(ies) which link to that specific activity. Each sub-process or sub-technical procedure outline (topic which precedes the action steps) lists the specific BMPRS category(ies) for reporting that time. To determine the correct BMPRS category for specific tasks, refer to the outline for the specific sub-process or sub-technical procedure which provides the Time Reporting (BMPRS) category(ies).

The Administer Benefits category is listed several times, preceded by FTE, PBA and FBA. Only one of these categories will be appropriate for you through BMPRS according to the category appropriate to your specific position (federal employee = FTE, pension benefit analyst/contractor = PBA, field benefits administrator employee = FBA). It is recommended that you use the **Custom Process List** feature of BMPRS to delete those categories which are clearly inappropriate for you.

- FTE Administer Benefits (TPD/TSD)
- FBA Administer Benefits (TPD/TSD)
- PBA Administer Benefits (TPD/TSD)
- Small Plan Early Warning Program (PPD)

### B2. Processes and/or procedures not tracked by case which are not included in the online IOD

- FTE Review of Contract Auditor Participant Data Audits
- FTE Review of Contract Auditor Plan Assets Audits
- FTE Review of Contractor Actuarial Valuation
- Process Standard Terminations (STCD SPCB/PTAB)
- Verify Coverage
- Process Incomplete Filing
- Process Non-Compliant Filing
- Process Compliant Filing
- Create and Update Standard Termination Case Files
- Determine if Qualified for MPP
- Send Acknowledgment
- Data Entry/Task Referral to TPD5

### B3. Case processing support activity

Some support activities are highly specialized work, with only certain individuals associated with these departmental functions. Other support activity is performed only by a specific division or group.

**The following lists all BMPRS Categories for case processing support activities and a description of activity covered by that category.** Consult with your division management if you need further guidance in determining the appropriate category(ies) for your support activities.

- **Contract Management (Non-FBA).** Includes management and COTR time spent assisting in the procurement, invoicing, and control of contractor activities. Time spent managing contractor activities in relation to billable work by those contracts, is classified as management or by the type of work.
- **Document Management Center.** Includes all document management center such as: mail distribution; file storage, retrieval, and maintenance; all image processing system operations; and physical file security.
- **FBA Oversight.** Includes all COTR, FBA Review and other activities associated with managing FBA contracts.
- **FBA Review.** Annual FBA review program conducted by TPDs in TSD.
- **Financial Statement Support/Annual Support/Budget Follow-Up.** Includes work relating to the valuation of the corporation's liabilities for future benefits for financial statement purposes and accompanying audits; annual report activities, and audit follow-up; PPD estimated recoveries; auditor Follow-Up; attending financial related meetings such as CWG, MWG
- **General Policy Analysis.** Includes researching, drafting, and reviewing Policy materials as well as coordination with Policy organizations outside of IOD (CPRD and OGC) in relation to actual or proposed statutory or regulatory changes, pension and guarantee issues figuring in the media, or in response to Congressional or public inquiry covering more than one case; meetings on Policy issues. All Policy analysis related to particular participant(s) or a particular case should be tracked under Case-Related Policy Analysis.
- **Insurance Support.** Includes time spent analyzing insurance contracts and related

documents, discussing same, and preparing related reports. Also includes time spent assisting TPDs with insurance issues.

- **Litigation Support: DUEC/UBL.** Includes time spent determining DUEC and UBL amounts, performing related analyses, and discussing same. Also includes time spent assisting OGC with related litigation.
- **Litigation Support: Non-DUEC/UBL.** Includes time spent assisting OGC with litigation that does not involve DUEC or UBL claims
- **Management Advisory Activities.** Includes management planning, performance measurement, management control reviews; budgeting activities, and quality assurance.
- **OGC Support.** Includes time spent on review of disclosure statements, plan of reorganization analysis for non PPD cases, and inquiry on potential case openings.
- **Procedure Review and Maintenance.** Includes development of procedures, preparation of manuals, and commenting on procedures.
- **Safeguard IRS Documents.** Includes all activities related to the processing, tracking, and control or tax returns received from the IRS in response to an official PBGC request to an IRS disclosure office.
- **Technical Review.** Includes time spent on providing technical advice, giving FBAs technical guidance, or serving as a technical expert outside of own division; also covers review of cases which can include supervisory, manager, or peer review. Can also include professional advice provided to outside callers and the general public.
- **Training Development**. Includes the time expended in the preparation of course materials, instructor guides, and presentation of training.

**B4. Other duties, including administrative and managerial duties.**

General administrative duties, including items such as leave and training are provided for in these categories.

- **Administrative Support.** Includes time spent in preparing paperwork, tracking, reporting and liaison related to general administrative functions such as: personnel (except as included in supervision and team management), procurement, preparation of travel documents and travel planning, property management, space management, and commenting on directives and other non-Policy documents
- **FTE Training.** Includes the time expended attending formal or informal training classes (e.g., briefings) and professional meetings devoted to training.
- **Leave.** Includes all annual, sick, administrative, leave and LWOP taken during the month, credit hours, and compensation time.
- **Miscellaneous Duty Time.** Other duty time that is devoted to work that is non-case and non-project related, including functions such as: staff and townhall meetings, Corporate Committee meetings and focus groups; completing surveys, reading clips, background information, and professional journals, etc.; and activities such as being a CFC worker.
- **Team Management/Supervision/Personnel/HRD.** Includes time expended on supervisory, team management, personnel, and HRD duties by management team officials, and persons acting in their capacity.

**Part II: IOD Time Reporting Categories**

## C. Special Projects

**07/11/97**

BMPRS permits the user to record time for **Special Projects**. Division Managers in IOD establish specific Special Projects against which people may record time. There are Special Projects which are applicable **only** to employees within a single division, and there are **cross-divisional** Special Projects which involve staff across more than one division in IOD.

Project names established for single division projects will include the division's acronym at the **beginning** of the project name. These single division special project names indicate that only members of the named division should charge time against that special project in BMPRS. Project names established for cross-divisional projects may have a particular division's acronym at the **end** of the project name. These cross divisional special project names indicates that any IOD employee who expends time on that project may charge time against that special project in BMPRS.

BMPRS Special Projects for employees of a single division will be established by the respective Division Manager. BMPRS Special Projects for employees across divisions will be established by the respective Project Manager, and made available within a division by the Division Manager. You should consult with your supervisor and/or division management if you need clarification on the Special Projects available to you on BMPRS, or if you believe a Special Project needs to be established for your time reporting needs.

Appendix F

## Alternate Sources for Plan Information 08/11/2000

The following are types of information and some potential sources. There may be other alternate sources available. Use this list as a starting point. Keep in mind that alternate sources may provide questionable information and attempt to verify the information through more than one source. Make an official request to the appropriate party for each type of information:

| Type Of Information | Source |
|---|---|
| **Actuarial Statements** | Actuaries |
| **Benefit Calculation Of Participants** | Actuaries, DoL 5500s |
| **Company Financial Affairs History** | Attorneys, Accountant, Bank |
| **Corporate Information** | Court House Records, State Corporations Office |
| **Corporate Minutes** | Corporate Officials, Corporate Attorneys |
| **Documentation Of Assets** | Actuaries, Bank, Insurance Companies, Accountants |
| **Employee Information** | Union Representatives, Ssa, IRS, State Unemployment Offices, , Plan Actuaries, Accountants, Other Participants |
| **Information On Substantial Owners** | Attorneys, 10K Filings, Corporate Tax Return Schedule K, Personal Tax Return, Partnership Tax Return Schedule K1, Board Of Directors Minutes |
| **Location Of Plan Assets** | Plan Administrator, Corporate Officials, Accountants |
| **Miscellaneous Information/Records** | Long-Time Employees |
| **Participant Addresses** | See TP 33.3 Locate Address Resource Guidelines, Union |
| **Pay History** | Accountants, State Unemployment Office, SSA, IRS, Payroll Contractors, Actuaries |
| **Payroll Ledgers** | Accountants |
| **Plan Documents** | Actuaries, Union Representatives, DOL |
| **Basic Bargaining Agreements** | Union Representatives, Attorneys |
| **Tax Returns** | Accountants, Attorneys, IRS, Corporate Officials |
| **Financial Statements** | Corporate Officials, Accountants |

Appendix G

## Acceptable Proof of Age

10/18/2002

**When do we require proof of age documents from our customers?**
Proof of age is required from customers unless they retired prior to DOTR. (The exclusion of pre-DOTR retirees was effective 8/99.)

**Do we require original proof documents from our customers?**
Generally copies are acceptable, and we do not require original documents from our customers. However, we may request originals or certified copies of any proof documents, for example when we suspect the document may have been altered.

**What document(s) are acceptable as proofs of age?**
Customers are advised that we will accept a copy of any one of the following documents that provide the individual's date of birth:

- Birth certificate.
- Baptismal certificate or other church record.
- U.S. passport, expired or current.
- Permanent Residence Card (Green Card).
- U. S. Certificate of Naturalization.

**Is a driver's license an acceptable proof of age?**
No, we do not accept driver's licenses.

**What other documents are acceptable for proof of age?**
If one of the above is not readily available, customers are directed to the CSC for guidance about alternate proofs of age that we accept. Customers are advised that PBGC will accept any two from a list of alternate proofs of age.

**Do we accept two of the same type of documents for alternate proofs of age?**
No. We require two different types.

**Must each document include the individual's date of birth?**
**One** of the two documents **must** provide a date of birth. It is preferable that both documents provide date of birth, but if that is not available, one alternate document may specify "age" that validates the date of birth provided in another alternate document.

**What alternate proofs of age are acceptable?**

- A notarized statement by the doctor or midwife who was present at the birth indicating the date of birth as shown in the medical records.
- A statement from the local office of the Social Security Administration showing the amount of the Social Security benefit being received and the date of birth of the recipient. A Social Security card is not acceptable proof.
- A military record of service.
- A marriage certificate, certified as correct by the custodian of the record.
- A vaccination record.
- A school record, certified as correct by the custodian of the record.
- A copy of a birth certificate of the participant's child showing the participant's age at the time of birth.

- An accepted application for life insurance. This must be sent to PBGC by the insurance company.
- An employment record, certified as correct by the custodian of the record.
- A labor union card, certified as correct by the custodian of the record.
- Records of any fraternal organization to which the participant belongs, certified as correct by the custodian of the record.
- An official record of a foreign government or foreign church, certified as correct by the custodian of the record.
- A census transcript showing the participant's age. The participant may obtain this document from the US Census Bureau by requesting a census search using a US Census Bureau Form BC600. This is submitted to the Census History Staff, Bureau of the Census, Washington, DC. A fee is charged by the US Census Bureau. The participant must know the correct street address and name of the head of household at the time of the census.
- A petition for Naturalization of Certificate of Citizenship.
- An immigration visa or application for Permanent Residence.
- Foreign passport, expired or current.

Appendix H

## Historical SPARR Information

02/18/2005

The Small Plan Average Recovery Ratio is determined by IOD (see TP 25: Determine and Announce the Small Plan Average Recovery Ratio (SPARR). Once it has been determined by the SPARR Coordinator, it is formally published in IOD/PBGC through a PBGC Policy Bulletin.

**SPARR Calculation Table**

| SPARR Year | SPARR Calculation Date | Covers Final Recoveries in Plans with Termination Initiation Dates in the Calculation Period | | Applies to Plans with Termination Initiation Dates | | Summary of Calculated SPARRs | |
|---|---|---|---|---|---|---|---|
| | | Start | End | Start | End | SPARR | PBGC Policy Bulletin No. |
| FY 1991 | 8/30/96 | 12/18/87 | 9/30/90 | 12/18/90 | 9/30/91 | 12.01 | 97-2 |
| FY 1992 | 3/31/97 | 12/18/87 | 9/30/91 | 10/1/91 | 9/30/92 | 7.73 | 97-3 |
| FY 1993 | 6/30/97 | 12/18/87 | 9/30/92 | 10/1/92 | 9/30/93 | 7.44 | 97-5 |
| FY 1994 | 9/30/97 | 10/1/88 | 9/30/93 | 10/1/93 | 9/30/94 | 7.04 | 98-1 |
| FY 1995 | 9/30/97 | 10/1/89 | 9/30/94 | 10/1/94 | 9/30/95 | 7.22 | 98-1 |
| FY 1996 | 9/30/98 | 10/1/90 | 9/30/95 | 10/1/95 | 9/30/96 | 7.90 | 99-1 |
| FY 1997 | 3/31/99 | 10/1/91 | 9/30/96 | 10/1/96 | 9/30/97 | 5.98 | 99-5 |
| FY 1998 | 9/30/99 | 10/1/92 | 9/30/97 | 10/1/97 | 9/30/98 | 6.84 | 00-2 |
| FY 1999 | 9/30/2000 | 10/1/93 | 9/30/98 | 10/1/98 | 9/30/99 | 8.01 | 01-1 |

| FY 2003 | 9/30/2004 | 10/1/97 | 9/30/2002 | 10/01/2002 | 9/30/2003 | 7.86 | 05-1 |

Appendix I

## Maintaining Participant Data records 02/18/2005

IOD maintains participant data in PRISM, and IPS. The IPS is the official repository for participant files. Throughout the processing of a plan, PBGC collects, reviews and audits the participant information necessary to pay participant benefits, and documents the source of the information to the appropriate file (plan or participant).

Accurate data is paramount to ensure that participants receive the correct termination benefit. In addition, the participant data in an important element of PBGC's financial statements, as PRISM provides data used to value PBGC's PVFB. Participant data is received by PBGC throughout the processing cycle of plan (Processes 1 through 23), as well as on an individual participant basis. (See various Technical Procedures for individual participant processing guidance.)

In order to ensure a high level of quality and accuracy of the information stored in PRISM, participant data elements are added to PRISM at specific points in the plan processing cycle. Also the sources of this participant data, (see Appendix B: Preferred Source Docs for Participant Data and Appendix G: Acceptable Proof of Age), is based on the processing cycle of the plan.

A number of factors, including the type of information, the type and status of participant, and the source of the information, determine when participant data is loaded into PRISM. Similarly, these factors determine where the source documentation is imaged - to the plan file or the participant file (IPS).

The plan-based requests and processing of participant data generally occur following these four major categories of processing, and are detailed within the indicated processes.

- PRE-TERMINATION PROCESSES
- PPD requests certain basic participant and payee data when it is (reasonably) certain that the plan will be trusteed. (See Process 4.6 Initiate Request for Participant Data) The information is forwarded to the TPD when the plan is transferred.
- INITIAL TPD PROCESSES
- Following trusteeship, the TPD requests participant and payee data as part of its initial processing in order to assume payment responsibility for the plan and load non-payee information into PRISM. (See Process 9: Plan Assumption)
- AUDIT PROCESSES
- The TPD (and/or FBA ) reviews and collects participant data on its field trips to perform the source document audit and participant database audit. (See Process 12: Evaluate Plan Documents & Participant Data and Process 13: Verify Participant Database.)
- VALUATION PROCESSES Intro.ValuationProcesses
- Following completion of the actuarial valuation, complete participant records are loaded to PRISM through ADT. The ADT process in managed by the ADT Coordinator in OASD. With limited exceptions, the ADT load does not overwrite any preexisting data in PRISM. This is the final stage of plan based participant record activity.

ADT Data Load - Data Elements/ PRISM Fields completed

Appendix I

## ADT Data Load - Data Elements/ PRISM Fields completed 11/25/98

**The ADT Transaction Files are as follows**

1 Deferred as of DOPT (annuitants, lump sums & optional lump sums)

3 Retirees as of DOPT

4 Beneficiaries as of DOPT

5 Nonvested

6 Return of Employee Contributions

| | Data Element * | Valuation Database Source Transaction File | 1 | 3 | 4 | 5 | 6 |

Appendix J

Participant Forms

## Participant Forms Information

02/07/2003

**How are participant forms used?**

IOD uses participant forms to:

- Collect information to determine:
  - entitlement to benefits
  - amount of benefits
  - when to begin paying benefits
  - what type of benefit to pay (form and/or frequency of benefits)
  - who is authorized to take actions on behalf of a participant, and what actions may be taken
- Administer:
  - debt collection and review requests for hardship consideration
  - benefit processing

**How do I prepare or provide participant forms?**

- All participant forms are available through PRISM ALGS and are standard enclosures to the appropriate letter templates.
- In exceptional circumstances when ALGS is not appropriate (participants not loaded into PRISM), hard copies are available from the DMC. See TP 34.1: Order Supplies from DMC

**Where are samples of the participant forms?**

- Participant forms and other enclosures may be viewed and printed from the ALGS Letters file in IOD's electronic manual system (available ALG Enclosures)
- Some participant forms are available through PBGC's website (www.pbgc.gov) .

**Whose signature is acceptable?**

- The participant's, beneficiary's, spouse's, alternate payee's (only for his/her documents)
- The legal guardian of any of the above
- The designated representative in a Power of Attorney (POA) subject to limitations, see PBGC Operating Policy Manual 8.4-1: Power of Attorney and Guardianship

**Is any other form of signature acceptable?**

Yes, effective July 25, 2000, IOD accepts a notarized **Signature by Mark** such as a X. A **Signature by Mark** that is not notarized must meet the following criteria to be accepted:

- two witnesses, who know the person making the mark, sign and date the document at the time the mark is made
- one of the two witnesses states that he/she is a disinterested party; someone who will **not** receive a direct financial benefit from the witnessed document

For a Power of Attorney (POA) that is **not** notarized:

- the representative of the person who makes the mark cannot be a witness

- neither of the two witnesses is required to state that he/she is a disinterested party

See PBGC Operating Policy Manual 8.5-1: Signature by Mark for more information on a disinterested party.

**Participant Forms**

## Participant Forms Summary

**02/07/2003**

700 701 702 703 705 706 707 709 710
713 714 715 717 718 719 720 721 722 SSA 581

| Form # | Form Title | Usage Comments |
|---|---|---|
| **700** | Participant Application for Pension Benefits | • Post-DOPT participants use this to apply for annuity benefits<br>• Gives the participant the option to elect form of benefit<br>**Includes:**<br>• Designation of Beneficiary for Annuity Benefit<br>• Spousal consent to elected benefit form and beneficiary<br>• Federal Tax Withholding Election<br>• Method of Receiving benefit payments<br>• Description of Benefit Options from PBGC – Your Benefit, Your Choice |
| **701** | Payee Information Form (PIF) | • Sent to payees as part of the data collection/verification process<br>• Designation of beneficiary included for any amounts that may be due at death. |
| **702** | General Information Form (GIF) | • Sent to plan participants and beneficiaries not yet receiving benefits (or entitlement undetermined) as part of the data collection/verification process.<br>• Designation of beneficiary included for any amounts that may be due at death. |
| **703** | Application for Elective Lump-Sum Payment | • Sent to missing participants and cash balance plan participants with lump-sum entitlements of more than $5,000.<br>• **Spousal consent is required** for an "elective" lump-sum distribution.<br>**Includes:**<br>• Lump-Sum Payment Election<br>• Spousal consent to receive a consensual lump-sum benefit<br>• Participant Election of direct payment or rollover<br>• Special Tax Notice Regarding PBGC Lump-Sum Payments<br>• EDD election does not apply. |
| **705** | Beneficiary Application for Pension Benefits | • Eligible spouses of deceased participants, alternate payees ( **shared payment – QDRO)** and all beneficiaries (such as C&C benefits or optional forms) use this form to apply for benefits.<br>**Includes:**<br>• Federal Tax Withholding Election<br>• Method of Receiving benefit payment |
| **706** | Beneficiary Application for Pension Benefits – Optional Forms | • QPSA spouses and alternate payees (**separate interest QDRO**) use this form to apply for benefits.<br>**Includes:** |

| | | |
|---|---|---|
| | | • Election of Benefit Form<br>• Designation of Beneficiary<br>• Federal Tax Withholding Election<br>• Method of Receiving benefit payments<br>• Description of Benefit Options from PBGC – Your Benefit, Your Choice |
| **707** | Designation of Beneficiary | • Used to designate a beneficiary for annuity benefits payable at death and/or benefits due at death such as back payments and de minimis benefits owed. |
| **709** | Plan Participation Information | • Sent to a woodwork participant to collect information to enable IOD to determine entitlement to benefits. |
| **710** | Application for Electronic Direct Deposit | • Payees use this form to choose EDD or change financial institutions.<br>• Sent at payee's request. |
| **713** | Return of Employee Contributions | • Participants use this form to elect the return (refund) of employee contributions.<br>**Includes:**<br>• Spousal consent.<br>• Federal Tax Withholding Information. |
| **714** | Surviving Spouse Election for Return of Participant Contributions | • Surviving spouses use this form to elect return (refund) of the participant's employee contributions or leave the contributions with PBGC for a full monthly survivor benefit.<br>**Includes:**<br>• Surviving Spouse Election.<br>• Federal Tax Withholding Information. |
| **715** | Power of Attorney | • Participant/beneficiary or alternate payee authorizes another individual to perform actions on his/her behalf.<br>• Alternative POAs meeting PBGC's requirements are accepted.<br>• See PBGC Operating Policy Manual 8.4-1: Power of Attorney and Guardianship for more information including requirements for alternative POAs. |
| **717** | Monthly Payment Election Form | • Sent to a participant receiving an annual payment to change to monthly benefits.<br>• Sent at payee's request. |
| **718** | Installment Payment Agreement | • Sent to a debtor to recover overpayments.<br>• Debtor executes forms and returns it to FOD. |
| **719** | Election to Withhold FIT from Periodic Payments | • Sent to payees who request a change to federal tax withholding. |
| **720** | Application for Lump-Sum Payment | • Sent to post-DoPT participants, beneficiaries and alternate payees who are eligible for a cash-out or a Large Back Payment.<br>• J&S Waiver Provisions do not apply.<br>• Includes participant election for payment destination.<br>• Includes Special Tax Notice Regarding PBGC Lump-Sum Payments<br>• EDD election does not apply. |

| | | |
|---|---|---|
| **721** | Estate or Non-Spouse Beneficiary Application for Taxable Single Payment | • Sent to an estate or non-spouse beneficiary who is entitled to a single payment.<br>• Includes Federal Tax Withholding election. |
| **722** | Financial Statement of Debtor | • Sent to debtors who are seeking PBGC's consideration to waive or reduce their debt. |
| **SSA 581** | Authorization to Obtain Earnings Data from SSA | • Form signed by participant authorizes SSA to provide PBGC with earnings and employment data.<br>• Sent as needed, usually when there is insufficient information to determine benefit eligibility of amount of benefits. |

Appendix K

**IOD's Record Management**

## K.1 Introduction

**08/23/2002**

### *Why Do I Need To Know About Records Management?*

Records Management rules (policies, procedures, etc.) apply to all federal employees and government contractors providing support for various processing functions and/or records storage. Records Management is performed daily throughout IOD and is conducted in accordance with the information in this Appendix, see also App K.7: Records Management Guidance.

### *What is Records Management?*

Records management is defined as:

"the planning, controlling, directing, organizing, training, promoting, and other managerial activities involved with respect to records creation, records maintenance and use, and records disposition in order to achieve adequate and proper documentation of the policies and transactions of the Federal Government and effective and economical management of agency operations."

### *Who is responsible for PBGC/IOD Records Management?*

FASD delegates responsibility to each PBGC department to manage their records in accordance with PBGC procedures and federal law.

TSD manages IOD's records management program. Each IOD division is responsible for managing the paper records within its custody, according to the established policy and procedures and federal law. OASD, as the IOD LAN Manager, provides for the management and preservation of IOD's electronic records.

### *What is a record?*

Simply stated, a record is:

- Any type of documentary material, regardless of medium (i.e. paper, electronic),
- Made or received by an agency of the US Government,
- Preserved or appropriate for preservation, as
- Evidence to document Agency activities or actions.

A more formal explanation is found at 36 CFR:

"all books, papers, maps, photographs, machine-readable materials, or other documentary materials, regardless of physical form or characteristics, made or received by an agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the informational value of data in them..."

Note that a record may be classified as a permanent or temporary record. See Appendix K.2: Description of IOD Records.

### *Is everything IOD collects or creates a record?*

No. Organizations collect other pieces of information or duplicates of records to aid them in their work. These are known as "non records" and the formal definition includes:

"library and museum material made or acquired and preserved solely for reference or exhibition

purposes, extra copies of documents preserved only for convenience of reference, and stocks of publications and of processed documents are not included in the definition of a record."

***Where can I learn more about Records Management?***

This Appendix provides the following information:

K.2: Description of IOD Records

K.3: Records Creation and Filing

K.4: Records Disposition

K.5: Storing and Retrieving Records

K.6: Records Security and Privacy

K.7: Records Management Guidance - references applicable guidance, including PBGC directives and websites.

## K.2 Description of IOD Records 08/23/2002

**Federal**. Records in IOD are not limited to plan and participant case files, but include the majority of documents, e-mail, word processing, spreadsheet, forms, and other materials created or received from the public and used in the processing of terminated pension plans and other daily operations. There are two major groups of federal records: administrative and program.

**Administrative records** are those that are common to all agencies and offices and relate to the internal administration and "housekeeping" activities, and include:

- travel vouchers;
- space requests;
- telephone bills;
- personnel actions; and
- audit reports.

**Program records** are those that document the unique mission and functions of PBGC, and include:

- IOD participant records;
- IOD plan files;
- premium payments;
- PRISM data;
- tracking logs;
- spreadsheets;
- actuarial service requests;
- copies of congressional correspondence;
- check action request forms (CARF); and
- trial balance reports and related e-mail.

Records are created and maintained in three media: paper, microform, and electronic. Electronic can be further described as either computer, image or telephonic.

**Contractors.** FBAs and other contractors may also maintain their company's administrative records relating to contract services for IOD. These records are **not** federal records and should **not** be co-mingled with federal records.

**Company.** IOD copies or takes possession of pension-related records from companies whose pension plans have been or may be terminated. PBGC should not become the de facto custodian of company records, so generally only duplicates should be taken.

**Value.** Records are classified as temporary or permanent for the purpose of records disposition. Most records are temporary and can be destroyed. Permanent records are those considered so valuable that they must be preserved by the National Archives. For example, the National Archives considers records relating to policies, procedures, regulations, and organization of an agency as permanent regardless of format or media.

**Non Records**. Organizations often have documents and materials that are not federal records, but these still must be managed. IOD's non-records include:

- training handouts;

- printouts of images or documents from PRISM and IPS used for reference; and
- e-mail messages created and held in the PBGC corporate wide e-mail system or printed out and which are purely personal or for information only.

| | |
|---|---|
| **Note** | Non-records are NOT an office's copy of a record where that office used the record for a transaction, but is not the office of record. |

## K.3 Records Creation and Filing

**08/23/2002**

**Creation**. The division in which a record is created or for which the division is directly responsible is designated as the Office of Record. With the exception of Plan and Participant Files (see App K.4 Records Disposition) the Official Record is also designated by the responsible division.

**Filing**

**File Types.** Files are created and maintained in paper, microform, or electronically. There are four basic types of files in IOD:

- case (plan, participant, special projects, contracts, personnel, etc.);
- general subjects files;
- chronological files (controlled correspondence, imaged source records; copies of correspondence kept for reference); and
- working files which usually relate to cases or projects.

**Duplicate records**. Offices are discouraged from filing duplicates because these duplicates must then be managed. The Office of Record is responsible for the official record. If you have a copy for information only, do not maintain this longer than you need.

**Updating Plan Files**. TPDs and STCD may audit or review the paper version of a Plan File. This may require adding documents to the file. At no time should the integrity of the paper version of terminated plan files be compromised since this information is also maintained on IPS. All new documents for non-standard pension plan terminations and standard termination woodwork cases must be provided to the DMC for imaging.

## K.4 Records Disposition

08/23/2002

Records disposition means the determination of whether an item is a record or not; whether it is permanent or temporary, and if temporary, a time frame for how long to keep a record. That decision is included in a record schedule. A record schedule includes a description of a record; a broad description of the media; and the time frame for destroying the record (if temporary) or transferring the record to the National Archives for storage (if permanent).

A disposal time frame is based on agency business needs for the information or a specific legal requirement. Only the Archivist of the United States can approve a schedule and grant disposal authority. Records cannot be destroyed without a schedule. Unauthorized destruction of records can result in criminal penalties (18 USC 2071).Records schedules are also referred to as: Disposition schedules, Schedules and Records Disposition Schedules. Records schedules for PBGC are available from FASD.

- **General Records Schedules**. For the convenience of managing administrative records throughout the government, the National Archives has created General Records Schedules (GRS) that describe common records, such as Travel Authorizations. GRS designate a minimum time for an agency to maintain these records. No approval is needed to destroy records that are covered by the GRS. FASD has provided a copy of these schedules on-line in the PBGC Intranet, see App K.7 Records Management Guidance.
- **IOD Records Schedules**. The existing records schedules for IOD do not fully reflect all of IOD operations. Some schedules are published in the *PBGC Records Disposition Handbook* , 1992. IOD's new records schedules are currently at the National Archives for review and approval. Until further notice, offices should continue to keep their records unless they are covered by a General Records Schedule or an existing IOD schedule that still meets management requirements. If there are questions regarding whether a document or item is a record, contact TSD or FASD for guidance.

**IOD's Participant Files' record schedule** (as approved from the National Archives) provides the following:

- **Participant Files (electronic).** IPS is the official repository of Participant Files. Therefore, for all operational and legal purposes, the electronic version of the Participant Files is the official record. An electronic record for a participant will be maintained online until the participant receives his/her final payment. At that time the record will be moved off-line and held for an additional 7 years and then erased.
- **Participant Files (paper).** Individual participant paper files should no longer be created or maintained. "Sealed" individual participant files may be shredded.
- **Paper "chrons"** containing participant related documents that are created daily as a result of scanning will only be maintained for a minimum of 3 months but no more than 6 months after scanning in order to allow for audit and data verification. Paper chron files are established and maintained in the DMC and other scanning locations (FBAs and plan specific processing sites, for example).
- **Shredding and recycling**. Place sensitive non-records and records eligible for disposal in shred bins. Place all other non-records and records eligible for disposal in the recycle boxes at your desks or at designated recycle locations.
- **Electronic records on the <C:> drive**. Whenever a computer is upgraded or changed for some reason, federal employees and contract employees must remove records from the C drive and place them on the LAN in their portion of the H drive. No records or non-records can be maintained on the C drive of a leased computer. OASD must ensure that any computers that are returned do not contain record materials. If records are found, then

OASD must notify the division manager where the computer was located. The division manager will arrange for the records to be reviewed and disposed of in accordance with an approved records schedule or incorporated into active records in the division.

- **Electronic records on the <H:> drive**. One week before a federal employee or contract employee leaves IOD, he/she should discuss with their supervisor the disposition of records held on his/her portion of the H drive. These records can be transferred to another employee, held for review, or disposed of in accordance with an approved records schedule. The supervisor should request OASD to transfer the electronic records in question into a folder with a new password.
- **E-mail**. E-mail of a personal nature or for information only is considered a non-record and can be erased. E-mail on topics covered by a General Records Schedule can be erased according to the individual schedules. Program related e-mail must be reviewed to determine if it is covered by a records schedule before erasure.

## K.5 Storing and Retrieving Records

08/23/2002

### Sending records to the National Archives for Storage

Currently, the National Archives' Records Centers will accept scheduled records only in paper, film, CD-ROM for publications, SGML, XML and ASCII text.

For records transfers from Headquarters staff, the steps are generally:

- Notify TSD/PSB in writing one month before files are ready for transfer;
- Provide an inventory of the contents in each box.
- Identify the appropriate records schedule.
- TSD/PSB prepares an SF 135 and contacts FASD for transfer of the records.

**Exception:** STCD separately sends standard termination, multiemployer, reportable event, and coverage case files to the National Archives.

### Notification of future destruction.

The National Archives will notify FASD of planned destruction of a scheduled record stored either at the Washington National Records Center or one of the regional Records Centers. FASD will forward destruction notices to TSD/PSB who will review the destruction with the Office of Record and approve or refuse. TSD/PSB will notify FASD of its decision. FASD will notify the National Archives.

### Retrieving records stored at the National Archives

To retrieve records from the National Archives, contact either STCD or TSD/PSB (depending on the record) with your request for retrieval from either the Washington National Records Center or a regional Records Center. Using the National Archives online records inventory system, TSD will research whether the records are still in storage and respond to the request. If records are available, TSD or STCD will submit a request to the appropriate National Archives Records Centers.

To retrieve a file plan stored onsite, contact the DMC.

See also TP 18. Prepare Files for Shipment.

## K.6 Records Security and Privacy 08/23/2002

Because of the sensitive nature and amount of the information IOD works with, it can become easy to take access for granted. The information held in IOD files is sensitive and corporate confidential, thus access must be controlled. Paper files containing participant, company or other plan related information are not to be left in the open or stored in semi-public areas such as conference rooms and hallways. Original plan file materials being held by TPDs must be maintained in locked cabinets when not being used. Tax return information is maintained in a locked vault.

PBGC has published guidance (primarily directives) about the security of records. See App K.7: Records Management Guidance for references and links.

Appendix L

**Field Benefit Administrators (FBAs)**

## Overview - Field Benefit Administrators

**08/23/2002**

***What is a Field Benefit Administrator (FBA)?***

A Field Benefit Administrator (FBA) is a contract office Ain the field@ that works with IOD to provide participant and benefit processing services and assistance to case processing. Currently there are eleven FBA offices. Specific information about the FBA offices, including locations and designated contact persons are included in the Customer Service Center Manual, see PBGC Field Offices - the FBAs.

***When does IOD use an FBA?***

IOD usually decides to designate a plan as an FBA plan based the number of participants. Action to initiate procurement of an FBA usually takes place in the early stages of case processing, see Process 4.7 Request FBA Procurement. Process 7.1: Initiate TPD Involvement describes the assignment of a case team on CAS, including the FBA.

***What does an FBA do?***

The FBA provides services as requested by PBGC throughout the cycle of a plan, most falling under the following categories:

- Gathering and maintaining participant data;
- Performing Participant processing;
- Processing Benefit Determination Letters (BDLs);
- Performing Plan closing; and
- Ongoing administration activities of closed plans.

***Do FBAs share the IOD Systems?***

Each FBA has a LAN (local area network) that is connected to the PBGC network through the Corporation's WAN (wide area network). The WAN is jointly administered by IRMD, FASD and IOD ( OASD). Through the WAN, the field offices have access to most systems that are available at HQ.

***How are FBA activities documented to IPS?***

The FBAs all have on site scanning capability to image any participant documents and correspondence to IPS they might receive. (Participants are directed to respond to IOD=s P.O. Box, and most participant mail is processed for all field office through the DMC. However, exceptions often occur.) Imaging to **plan files (IPS)** cannot be done at FBAs, the material must be shipped to headquarters for imaging by DMC. See also TP 34: Request DMC Services.

***What is a Contracting Officer's Technical Representative (COTR)?***

A COTR is a government employee who provides technical expertise and program advice in the supervision of the FBA=s contract with PBGC. The COTR works with the FBA in managing its resources to attain goals and objectives, such as meeting the Corporation=s goals for customer satisfaction. COTRs assist in many other ways, such as providing FBA workload planning, reviewing monthly reports, and budgeting, among others.

***What is a Contract Monitor?***

A Contract Monitor oversees a specific **plan**, unlike the COTR who is responsible for a particular FBA **office**. Each FBA plan has a contract monitor (typically the PLS on the case team) who has responsibility for overseeing and providing technical expertise and advice on the plan specific issues that may arise.

Apendix M

**IRS Disclosure Offices**

## IRS Disclosure Offices

**05/13/2005**

During IOD's case processing, staff may request tax return information from the IRS, see Process 1.2: Begin Collecting Data and Process 14.2: Perform Controlled Group Analysis.

Send all requests for tax returns (Forms 990, 1040, 1120, 1120s, 1065, W-2) to the following address:

Internal Revenue Service
EP Classification Office
31 Hopkins Plaza
Room 1520
Baltimore, MD 21201

Telephone No. (410) 962-0690

Appendix N

Our Service Pledge

## Our Service Pledge

05/02/2003

**Our customers deserve our best effort as well as our respect and courtesy.**

On the first call from you, our customer, we will say:

- what we can do immediately, and what will take longer,
- when it will be done, and
- who will handle your request.

We will call you if anything changes from what we first said, give you a status report and explain what will happen next.

We will have staff available from 8:00 a.m. - 5:00 p.m. Eastern Time to answer your calls. If you leave a message, we will return the call within one workday.

We will acknowledge your letter within one week of receipt.

Appendix O

**Acceptable Proof of Marriage**

## Acceptable Proof of Marriage

**05/13/2005**

### When do we require proof of marriage documents from our customers?

PBGC's Participant Application for Pension Benefits (Form 700) asks whether the participant is currently married and requires the marriage date and proof of marriage. The General Information Form (Form 702) asks whether the participant was married when the plan terminated and requires the marriage date and proof of marriage. The Payee Information Form (Form 701) asks whether the participant was married when they retired and requires the marriage date, but does not require proof of marriage. If a participant retired prior to the DOTR, PBGC does not generally require proof of marriage.

### Why do we require proof of marriage?

The purpose of the marital proof is that PBGC will pay the plan's automatic form for a married participant (the QJSA), as of the participant's application date, unless the participant waives the QJSA, with spousal consent [see PBGC Operating Policy Manual 5.4-7 Annuity Benefit Forms]. Additionally, PBGC provides a qualified pre-retirement survivor annuity (QPSA) to a surviving spouse of any participant with vested benefits that dies before retirement [see PBGC Operating Policy Manual 5.7-2 QPSAs in Plans Terminating on or After 08/23/84 ].

### Do we require original proof documents from our customers?

Generally, copies are acceptable; original documents are not required. However, we may request originals, certified copies, or notarized copies of any proof documents, if we suspect the document may have been altered. Originals, notarized and certified copies are returned.

### What types of marriage does PBGC recognize?

PBGC recognizes the following types of marriage:

- Ceremonial: A marriage that is performed in public, by an authorized official or clergy, in accordance with the laws of the location where the marriage occurred.
- Common Law: A permanent, exclusive union as husband and wife, entered into by mutual consent, without a formal ceremony. In some states, cohabitation is required.
- Indian Tribal or Custom: A marriage where the parties were subject to a tribal government at the time of the marriage, the parties had been following tribal customs and laws, and the marriage was in accordance with tribal customs and laws.
- Chinese Custom: A marriage that took place in China and met the Chinese procedural requirements of law and custom.
- Deemed or Putative: A marriage that would have been valid, except for a legal impediment.

The validity of a marriage is determined by the law of the place where it occurred. Details on acceptable proofs for the various types of marriage are provided below. Image all marriage proof documents to the participant's file in IPS. [See TP16.3: Maintain Participant File.]

### What document(s) are acceptable as primary proofs of a Ceremonial Marriage?

We will accept any one of the following documents as proof of the couple's ceremonial marriage:

- Marriage certificate.
- Copy of a public record of the marriage, which was certified by the custodian of the record.
- Copy of a religious record of the marriage, which was certified by the custodian of the record.
- Foreign records, based on church or civil records, issued pursuant to the foreign law.

**What alternate proofs of marriage are acceptable for a Ceremonial Marriage?**

Before accepting alternative proofs of a Ceremonial Marriage, have the participant (or spouse, if the participant has died) request proof of marriage from the custodian of the record (civic or religious).

If no primary proof document can be obtained, the following secondary documents will be accepted by PBGC, **provided they identify the parties as married**. Two documents must be provided, each from a different category listed below.

- Property deeds or titles, indicating joint ownership as tenants by the entirety.
- Bank accounts, or automobile title, held jointly.
- Immigration records, passports, foreign passports, expired or current immigration visas, Applications for Permanent Residence and Petitions for Naturalization of Certificate of Citizenship.
- A will, signed and properly witnessed.
- An accepted application for life insurance. This must be sent to PBGC by the insurance company.
- An IRS tax return, showing status as married, filing jointly, or married, filing separately. (Financial information is not needed and should be blocked out to preserve privacy.)
- An employment record, or labor union card, certified as correct by the custodian of the record.
- Records of any fraternal organization to which the participant belongs, certified as correct by the custodian of the record.
- A census transcript, identifying the relationship of the requestor to the head of household. The participant may obtain this document from the US Census Bureau by requesting an "age search", using the "Application for Search of Census Records" form BC- 600 submitted to the Census History Staff, Bureau of the Census, Washington, DC. A fee is charged by the US Census Bureau. The participant must know the correct street address and name of the head of household at the time of the census.
- Newspaper account of the wedding, including newspaper name and publication date.
- A signed statement from clergy who performed the ceremony.
- Signed statements from two witnesses or attendees, under penalty of perjury.
- Proof of an SSA determination on the existence of the marriage.
- SSA-795 ("Statement of Claimant or Other Person") describing the church, person performing the ceremony and witnesses.
- A declaration, signed by both spouses, under penalty of perjury.

**What if the marriage ceremony occurred under the laws of a foreign country?**

The preferred proof of a foreign marriage is an official document that verifies the marriage ceremony occurred under the laws of that country. IOD Policy Bulletin 96-2 Verifying Age or Marriage for Applicants from Certain Countries must be followed. If the participant or payee cannot provide an official document, the case should be referred to the OPSS marriage issues coordinator, who will coordinate with the OGC supervisor, if necessary by sending an email to the MarriageProofs mailbox.

**What if the marriage was a Common Law rather than a Ceremonial Marriage?**

State laws govern the recognition of common law marriage, including the type of proof required. PBGC Operating Policy Manual 5.7-4 Payment of Benefits to Common-Law Spouses identifies PBGC's recognition of common law marriages, in accordance with documentation requirements and decisions from the Office of General Counsel. Applicants should be encouraged to submit the

following types of documents in support of an OGC decision:

- SSA-754-F4 (Statement of Marital Relationship) from each spouse.
- SSA-753 (Statement Regarding Marriage) from blood relatives of each spouse.

The case should be referred to the OPSS marriage issues coordinator, who will coordinate with the OGC supervisor by sending an email to the MarriageProofs mailbox. (See the SSA Program Operations Policy Manual for additional information on state laws regarding the recognition of common law marriages, specifically policy GN 00305.075 State Laws on Validity of Marriages Entered into Without a Ceremony.)

**What proofs may be accepted for other types of marriage?**

Proofs for other types of marriages must be referred to the OPSS marriage issues coordinator, who will coordinate with the OGC supervisor, if necessary by sending an email to the MarriageProofs mailbox.

The following guidelines on acceptable proofs are intended to assist the processor in determining the types of supporting documentation to request.

For an Indian Tribal or Custom Marriage, if the tribe is known to provide for licensing or ceremonial requirements, request this documentation. Otherwise, request Indian tribal rolls as evidence.

For a Chinese Custom Marriage, if the spouse's application claims Ceremonial Marriage to the participant, and the participant confirms this in writing, this is normally accepted as sufficient proof. If one party is deceased or lives outside the U.S., request alternate proofs of a Ceremonial Marriage, as above, or the following, with a notarized translation:

- Three-generation papers.
- Certificate of village elder.

A Deemed or Putative Marriage is accepted if there was a marriage ceremony, the applicant participated in good faith, the couple was living together, the impediment relates to a previous marriage that has not been dissolved and there is no living legal spouse entitled to benefits. Request alternate proofs of a Ceremonial Marriage, as above.

**If the participant has been married multiple times, which marriage do we require proof of?**

PBGC's presumption is that the relevant marriage is that as of the time a participant applies for a benefit, or at the time of death in the case of a QPSA. If a prior marriage was in effect as of the DOPT, you should check for a QDRO on Form 701 or 702.

**Whom can I contact for guidance?**

For guidance on marriage proofs, contact the OPSS marriage issues coordinator by sending an email to the MarriageProofs mailbox. The coordinator may provide guidance, make a determination, or request additional evidence. The coordinator will forward claims for Common Law, Indian Tribal or Custom, Chinese Custom and Deemed or Putative marriage to the OGC supervisor for guidance, after receiving supporting documentation. OPSS may supplement current IOD procedures with the SSA Program Operations Policy Manual. [See http://policy.ssa.gov/poms.nsf/aboutpoms for the SSA Website and the SSA Program Operations Policy Manual or select the policy GN 00305 Proof of Marital Relationship.

All marriage proof guidance should be imaged to the participant's file in IPS. [See TP16.3: Maintain Participant File.]

Appendix P

**eReports**

## eReports Information

**04/16/2004**

### What is eReports?

- eReports is a series of web-based reports designed to provide authorized users with current and accurate participant-related data.
- eReports replaces PRISM reports. This means that the report database will be refreshed with new data every night, instead of once a week.

### How is eReports used?

- eReports is used to monitor and manage Benefit Determination Letter issuance, participant data, benefit payments, etc.
- Reports may be generated on demand, providing the user with access to current data to better manage benefit processing.

### What are the benefits of using eReports?

- Report data is current, originating from a database which is refreshed with PRISM data every night.
- Valuable tool for users to identify where data needs to be updated.
- All reports may be downloaded and exported to another application for further customization.
- A series of related reports are available at one user interface screen.
- Reports support IOD's management coordination efforts by summarizing overall performance and production activities.

### How do I access eReports?

- From PBGC's Intranet, type "**eReports**" (or http://ereports) in the address line.
- The user's original PBGC LAN login information is used to authorize access to the eReports application, eliminating the need for a second login.
- Security controls limit access to authorized PRISM users, which include Pension Law Specialists (PLSs), Pension Benefit Administrators (PBAs), Field Benefit Administrators, etc. The automatic list of Plans that may be reported for individual Users is based on their Team Assignments in the Case Administration System. To request access to reports on additional plans, users complete an eLAN Access Request Form.

eReports Summary

eReports

## eReports Summary

04/16/2004

Benefit Change Completion Report | Customer Data Report | Forecaster Report

Letter Information Report | Lump Sum Report | Unissued BDL Report

| Report Name | Usage Comments |
|---|---|
| **Benefit Change Completion Report** | • The Benefit Change Completion Report identifies participants in Pay status "1" (active pay) who have been issued a Benefit Determination Letter (BDL) but have pending benefits administration activities. Users may sort the pending activities into the following groupings:<br>◦ Pending Pay Source Changes<br>◦ Pending Special Checks<br>◦ Pending Recoupments<br>◦ All Pending Changes Sorted by Type. |
| **Customer Data Report** | • The Customer Data Report lists key data elements for all Customers in a specifically requested Pension Plan. The data elements are reported for all the Participants in the Plan, and includes their family members.<br>• The Customer Data Report is used throughout the life of the Plan, assisting the user in managing participant data. |
| **Forecaster Report** | • The Forecaster Report provides information on participants that have or will have benefit changes within the next 30, 60, 90, and 365 days. It lists customers who are eligible for normal retirement, as well as pending benefit and deduction changes for retirees. Users may sort the pending activities into the following groupings:<br>◦ Pension Pay Source Changes<br>◦ Pension Deduction Changes<br>◦ Future Payments.<br>• The Forecaster Report is used throughout the life of the Plan, and is a valuable tool in ensuring participant payment data is accurate, and when certain actions need to be taken. |
| **Letter Information Report** | • The Letter Information Report provides users with information on whether Customers are ready to receive certain types of Benefit Determination Letters. This report also indicates if a benefit statement is on file and provides an overview of the Plan's Participant payment statuses.<br>• The Letter Information Report enables users to easily identify Customers who require locator action and manage the |

remaining Customers according to the types of Benefit Determination Letters they should receive based on: Payment Frequency, Customer Type, SSN, and Name.

**Lump Sum Report**

- The Lump Sum Report groups customers into one of five categories, comparing the Present Value of their Guaranteed Benefit to the total lump sum paid as of the report date. Staff actions in response to this report are outlined in TP 43: Change Status for Inactive Participants.
- The Lump Sum Report allows users to quickly identify customers paid an estimated Lump Sum distribution and determine the appropriate follow-up action to be taken.

**Unissued BDL Report**

- The Unissued Benefit Determination Letter report captures and lists participants or their beneficiaries that are eligible for a Benefit Determination Letter but have not yet received one.
- The Unissued Benefit Determination Report is used after the guaranteed benefits for Customers are determined.

Appendix Q

**BAPD Systems**

## Introduction

**02/18/2005**

This appendix provides a brief overview of Benefit Administration & Payment Department (BAPD) Systems. BAPD Systems handle Plan and Participant data. Plan data contains multiple participants; while, Participant data contains individual data within a plan.

If you experience any problems while using the systems below, please contact the Help Desk.

ACT - Actuarial Calculation Toolkit

Archive

Ariel

BMPRS - Budget, Management, Planning and Reporting System

CAS - Case Administration System

CCN - Customer Communication Network

CRM - Customer Relationship Management

Datahub

eALGS - Automated Letter Generation System

IPS - Image Processing System

PACS - Payment Adjustment Calculation System

Participant Locator

PRISM - Participant Record Information System Management

Appendix Q

**BAPD Systems**

## Actuarial Calculation Toolkit

**02/18/2005**

The ACT system (ACTv5) is used by actuaries to define how a plan is valued and how benefit statements for that plan should be generated. ACT also allows the actuary to define how a plan's benefit estimation calculation is to be completed, prior to final valuation.

Actuaries use ACT to take basic data from the Participant Data Audit Report, which includes the finalized participant and perform the valuation. Once the valuation is complete:

- ACT data is provided to other systems such as ADT (Automated Data Transfer) and Datahub, to load the data into the paying database – Genesis;
- Benefit statements for each customer is loaded into eALG (Automated Letter Generation) system, so that Benefit Determination letters can be sent to customers; and
- All files related to that particular plan are archived and are made available through the Archive system.

ACT includes the following tools:

- ValTool – The Valuation Spreadsheet Tool;
- DRS – The DOPT Report System;
- A Design Tool - BET (Benefit Estimation Tool and BSRS - Benefit Statement and Recalculation System); and
- A Runtime Tool – BET (Benefit Estimation and BSRS - Benefit Statement and Recalculation System).

The Ariel system is replacing ACT for valuing and administering new plans (DOTR on or after October 1, 2004) beginning October 2004. ACT will continue to be used to complete plans started in ACT before October 2004 and for related benefits administration.

Click on the link below for more information:

http://intranet/standards_manuals/manuals/ACT

Appendix Q

**BAPD Systems**

## Archive

**02/18/2005**

The Archive system stores all the historical data for a case including as applicable, electronic payment data from a plan's prior paying agent, the electronic source data used to build the participant database, the sampled participant database and the finalized participant database and the finalized plan valuations. The Archive system allows you to select a case and then view or copy any particular file associated with that case. Users can also access more than one case at a time.

The Archive system is the permanent storage location of BAPD's case-related software, including actuarial valuation spreadsheets, Benefit Statement, and Recalculation Programs.

Click on the link below for more information:

http://intranet/standards_manuals/manuals/Archive

Appendix Q

**BAPD Systems**

## Ariel

**02/18/2005**

As with ACT, Ariel is used to perform PBGC valuations and benefit calculations. It contains parameter-driven software that is able to handle virtually all plan designs and formulas. Ariel also has features to ensure system and data integrity including a full audit trail, data validation capabilities, and multiple security levels.

The Ariel system allows integration and loading of plan data to be performed multiple times or at various stages of case processing. Integration begins when the Ariel Plan Analysis Document (APAD) is sent to OASD. The TPD and OASD work closely during the integration and data loading stages of Ariel.

BAPD began using Ariel in 2004 for select cases and is planned to ultimately replace ACT.

Click on the link below for more information:

http://intranet/benefits/systems/Ariel%20Web/default.cfm

Appendix Q

**BAPD Systems**

## BMPRS

**02/18/2005**

The Budget, Management, Planning and Reporting System (BMPRS) enables the user to record their daily time reporting information. The system was specifically developed for BAPD to track the timeline of major trusteed plan case milestones and the number of hours expended to reach the goals.

It provides a record of the time and effort expended for BAPD tasks, including:

- Processes tracked by case;
- Other processes and categories (includes processing activities not tracked by case, support, management and administrative activities); and
- Special projects.

Click on the link below for more information:

http://intranet/standards_manuals/manuals/bmprs/default.cfm

Appendix Q

**BAPD Systems**

## Case Administration System (CAS)

**02/18/2005**

The Case Administration System (CAS) tracks the events and inquiries that affect the viability of a pension plan. CAS is a suite of applications for BAPD and other departments that supports:

- Workflow, case and sponsor information;
- Milestone processing;
- TPD case processing team assignment data to other BAPD mission critical systems such as PRISM, IPS, CCN, and eALGS; and
- Other functions that underlie PBGC's trusteed case processing.

CAS maintains plan, financial, statistical, and other case-specific information for single employer and multi-employer plan terminations. CAS ensures efficient and accurate case processing and provides a flexible, easy-to-use interface that can rapidly accommodate changes in business requirements.

To access the application you need a User ID and Password.

Click on the link below for more information:

http://intranet/benefits/systems/cas/default.cfm

Appendix Q

**BAPD Systems**

## Customer Communication (CNN)

**02/18/2005**

The Customer Communications Network (CCN) is a tracking/action system that is used to log and track incoming calls made by pension participants to PBGC. These calls are logged and forwarded to Headquarters or FBA staff as appropriate for action. Supervisors have the ability to generate aging reports to monitor progress on outstanding calls. The CCN delivers manual transactions to the Genesis database and email notifications to Microsoft/Exchange Outlook.

The Customer Communications Network (CCN) also tracks outgoing calls initiated by BAPD staff to participants and their representatives. Return and follow up calls made in response to a participant's initial call are documented as actions taken in response to the participant's initial phone call, and recorded in CCN with that initial call record.

For additional information about staff usage of Customer Communications Network (CCN) to document customer phone calls, see TP 31: Document Telephone Calls.

Appendix Q

**BAPD Systems**

## Customer Relationship Management (CRM)

**02/18/2005**

The Customer Relations Management (CRM) system facilitates sharing of customer information across Departments and enables PBGC to better capture and measure its ability to meet customer service expectations. Specifically, the CRM application provides:

- Integrated workflow and tracking of customer contacts across channels;
- Synchronization with PBGC's systems that currently track and manage customer data; and
- Views into IPS/FileNet, Appeals Data, and Payment History Data.

When fully deployed, CRM will replace CCN.

Click on the link below for more information:
http://intranet/groups/initiatives/crm/whatis.cfm

Appendix Q

**BAPD Systems**

## Datahub

**02/18/2005**

Datahub is a subset of the PRISM Suite of Applications. The Datahub Applications allow BAPD to enter participant and payment data for newly trusteed plans, and for loading final valuation data. Once the participant data has been acquired and converted to MS Access tables, OASD will process and load the data into the Datahub database.

Specifically, Datahub enables BAPD to:

- Load new participant payment data;
- Load Status 9A participant data;
- Load final valuation data;
- Evaluate the state of the data;
- Edit the data to meet evaluation criteria;
- Reconcile the data to existing PRISM database data; and
- Update the PRISM database with the new (authorized) data.

Click on the link below for more information:

http://testintranet/intranet/benefits/systems/datahub/dataHubAdm/index.cfm

Appendix Q

**BAPD Systems**

## Automated Letter Generation System (eALGS) 02/18/2005

The eAutomated Letter Generation (eALG) System represents a totally re-engineered Automated Letter Generation (ALG) System. In addition to allowing the user to prepare a letter to a customer or large number of customers quickly using standardized letter templates; and customize letters as needed; eALG provides the user with:

- An Intranet, browser-based application;
- Access to the PRISM database directly, thus eliminating the dependency on the Retro-PRISM database;
- New security requirements based on prioritization by the PBGC;
- Improved system stability by focusing on increasing the overall reliability and maintainability of its sub-systems with no loss in the level of service and functionality of the current system;

Continuation of the current level of integration with the following PBGC operations:

- PBGC off-site fulfillment
- Customer Communications Network (CCN)
- Image Processing System (IPS)
- PRISM Reports
- Case Administration System (CAS)
- OASD (Import Benefit data, Val Patch and ADL)

To access the application you need a User ID and Password.

Click on the link below for more information:
http://intranet/benefits/systems/pamt/eALG

Appendix Q

**BAPD Systems**

## Image Processing System (IPS)

**02/18/2005**

The Image Processing System (IPS) is an on-line repository for those BAPD plan and participant documents necessary for benefit determination and administration. The documents are available on-line for review as an electronic file.

IPS is primarily used to manage PBGC plan and participant documents. The IPS translates paper documents into digital images that are then saved and stored on optical disks. These digital images are retrieved at end user workstations using the index information assigned during the scanning process (SSN and/or Plan Number). Plan number and doc type are the key indexes. Participant data includes plan number, doc type, and SSN for each participant. System users can perform a participant name search to retrieve the plan name. IPS delivers confirmations of submitted letters to the eALG.

Click on the link below for more information:

http://testintranet/IOD/iodmanuals/frame.htm

Appendix Q

**BAPD Systems**

## Payment Adjustment Calculation System (PACS) 02/18/2005

The Payment Adjustment Calculation System (PACS) is a web-based application used to determine whether a recoupment or a refund is applicable to a participant. It calculates:

- The amount of interest PBGC owes on backpayments and lump sums;
- The amount we will recoup or recover from anyone we have overpaid; and
- The amount of benefit that we pay in PBGC's optional Benefit Forms.

PACS is also used to process case level and participant level data and calculate benefit adjustments arising from underpayments and/or overpayments resulting in any of the following:

- Back payments or recoupment;
- Interest for lump sum payments; and
- Optional forms of benefit.

The Ariel System will also be used to calculate optional forms on new plans.

Anyone who has access to CAS and/or PRISM may access all the functions in PACS.

Click on the link below for more information:
http://pacs/Help/pacs/h_getting_started.htm

Appendix Q

**BAPD Systems**

## Participant Locator

**02/18/2005**

The Participant Locator is a BAPD desktop application used to locate BAPD customer addresses. The application permits staff to send queries to a commercial database for an individual's addresses. The participant's name, SSN and PBGC case number are required to enter a query. Participant Locator stores PBGC search results in a database, and first checks the existing database for the participant information before sending the search off to the external agent.

For additional information about staff usage of the Participant Locator application, see TP 33: Locate Customer Address.

Appendix Q

**BAPD Systems**

## PRISM Application Suite

**02/18/2005**

The PRISM Application Suite is PBGC's automated system for Customer Information and benefit payment. It is an integrated information system developed to support PBGC's Benefit Administration & Payment Department (BAPD) in administering pension plan customers. There are approximately 20 applications, including Datahub, described above, that make-up the PRISM suite. These applications are divided into the following 3 categories:

- Manual data entry & automated bulk transactions
- Administrator access
- Reporting applications currently not part of PRISM reports.

The PRISM Application Suite also provides an automated interface to State Street Corporation (SSC) — the PBGC paying agent — by sending payment request information to SSC and retrieving actual payment information from SSC. These data are stored in the PRISM Genesis Database. The PRISM Genesis database is the repository for customer-related information including:

- Benefit calculation and valuation
- General customer information (name, address, SSN, etc.)
- Benefit administration (information obtained via standard PBGC forms)
- Customer payment information.

The PRISM Redesign team has been tasked to re-engineer the core PRISM Application Suite applications (Customer, Forms, Benefits, VAL/IDL and Authorizer).

The new application, named **Spectrum**, will enable Trusteeship Processing Divisions (TPDs) and Field Benefit Administrators (FBAs) to enter, update, and view data in one application, streamlining the data entry process and expediting benefit payments. The re-engineering effort will produce a web-based BAPD benefits administration application utilizing multi-tier architecture.

http://intranet/benefits/Systems/prismredesign/default.cfm

Appendix R

## Federal Tax Withholding

05/13/2005

I. Introduction to Federal Tax Withholding
II. Annuity or Periodic Payment Tax Withholding and Reporting
III. Lump-Sum or Non-Periodic Payment Tax Withholding and Reporting
IV. Other Tax Withholding Considerations
V. Mandatory Withholding Requirements - Invalid TIN
VI. Non-Resident Alien Tax Withholding Requirements
VII. Processing a Change to a Federal Tax Withholding Election
VIII. Returned Form 1099
IX. Requests for Replacement or Revised Form 1099
X. Additional Resources

# I. Introduction to Federal Tax Withholding

### What is the purpose of Tax Withholding?

PBGC is required to withhold Federal Income tax from pension benefit payments, for both annuity and lump-sum payments. Tax withholding is done in anticipation that a taxpayer will have a tax liability. Federal taxes, but not state or local, are withheld from pension payments. The taxpayer may have a tax liability for which he or she is responsible. The liability may be more than, less than, or equal to the tax withheld.

### What does PBGC require from the Payee?

To fulfill its tax withholding and reporting responsibilities, PBGC requires a Taxpayer Identification Number (TIN). A valid TIN is a Social Security Number (SSN) issued by the Social Security Administration (SSA), or an Individual Taxpayer Identification Number (ITIN) issued by the Internal Revenue Service (IRS). It is illegal to use a TIN that belongs to another person, including a deceased spouse.

**a. When a TIN is Available**

| Recipient | Use the |
|---|---|
| Participant | Participant's SSN/ITIN |
| Spouse | Spouse's SSN/ITIN |
| Non-spousal Beneficiary | Beneficiary's SSN/ITIN |
| Estate | Deceased payee's SSN or Estate's ITIN |

**b. When a TIN is Not Available**

If a TIN is not available for use, mandatory tax withholding rules apply (refer to section V. Mandatory Withholding Requirements - Invalid TIN).

**NOTE**: PBGC cannot refuse to make payments if the payee does not provide a valid TIN. Always encourage the taxpayer to get a valid TIN. A PBGC-generated ID number (i.e., Dummy SSN) is **not** a valid TIN and should only be used as a last resort. If a PBGC-generated ID number is used, mandatory tax withholding rules will be applied to the payee's benefit.

**c. Applying for a TIN**

For information on applying for a Social Security Number, refer payees to the SSA at http://www.SSA.gov, or 1-800-772-1311. Applicants residing in the U.S. will complete Form SS5. If the applicant lives outside the U.S., they must use Form SS5FS.

Payees who do not qualify for a SSN can apply for an Individual Taxpayer Identification Number which is issued by the IRS. Refer payees to http://www.IRS.gov or 1-800-929-1040 for additional information. Applicants will be required to complete Form W-7, Application for IRS Individual Taxpayer Identification Number, and attach a copy of their federal income tax return, showing they are receiving pension benefits from PBGC or proof they are due pension benefits from PBGC, and original proof of identity documents.

## II. Annuity or Periodic Payment Tax Withholding and Reporting

Annuities are subject to Federal Income tax withholding and reporting and are treated as wages for withholding purposes. Note that employee contributions are usually made on an after-tax basis and therefore are NOT considered for withholding purposes. PBGC must withhold Federal income tax on annuities unless the taxpayer elects otherwise. There are multiple withholding options available to the taxpayer for having tax withheld.

### i. Tax Withholding Methods for Annuities for Taxpayers Residing in the U.S.

The following tax withholding methods are available to taxpayers residing in the U.S.:

**a. No Withholding**

With this option, the taxpayer:

- elects not to have tax withheld
- must provide a home address in the U.S., and
- must have the payment delivered to a U.S. address.

**b. Withholding Allowance Method**

The taxpayer elects to have their tax calculated using IRS Tax Tables, based on designated marital status and number of allowances.

- Nothing is withheld if the annuity is less than the minimum amount in the Tax Tables.
- This method is preferred by the IRS.

**c. Fixed Dollar Amount**

The taxpayer elects how much tax to withhold.

**d. Withholding Allowance Plus Fixed-Dollar Amount**

The taxpayer elects to have their tax calculated using IRS Tax Tables, based on a designated marital status and number of allowances, **and** requests an additional amount be withheld.

**e. Election Unknown/No Election Received**

If no election is received from the taxpayer, PBGC must still pay the annuity. An automatic or default withholding is applied, based on a marital status of 'married' with three (3) exemptions.

**NOTE:**

- Special tax withholding rules apply to payees who live outside the U.S. (refer to section VI. Non-Resident Alien Tax Withholding Requirements).
- During the plan assumption process, participant withholding elections are captured from existing payment records (see Process 9: Plan Assumption).

### ii. IRS Reporting Requirements for Annuities

**FORM 1099-R**

PBGC reports pension payments to the Internal Revenue Service (IRS) on Form 1099-R. The taxpayer also receives a copy of this form for use in filing their income tax return.

- In the year PBGC assumes payment, the payee will receive 1099s from prior paying agent(s) and PBGC's paying agent (SSC). PBGC's 1099s only includes payments made by PBGC's paying agent. The prior plan administrator and interim paying agent are responsible for issuing 1099s for the payments they made.
- For tax purposes, PBGC's payments are considered "constructively paid" as of the issue date, usually the first of the month.
- PBGC may not always know the taxable amount of an annuity payment therefore, as allowed under IRS rules, 1099s issued by PBGC show the "taxable amount as not determined."

**Category of Distribution Codes for Annuity Payments**

Category of distribution codes indicate to the IRS and the taxpayer how the annuity should be treated for taxation purposes and what if any, special tax treatments may apply. PBGC/SSC currently uses Codes 2 and 7 for annuity payments based on the taxpayer's age (please ensure that appropriate records have the correct date of birth). Other codes used include Code 3, disability, and 4, Death Benefit.

**Code 2** – Early distribution (Taxpayer is Under Age 59 ½), exception applies.

- The annuity is an exception to the 10% Early Distribution Tax because, while the participant is under age 59 ½, as of December 31, the payment is a periodic payment or the taxpayer is an Alternate Payee under a QDRO. (For additional information on the 10% Early Distribution Tax, refer to section IV. Other Tax Withholding Considerations.)

**Code 3** – Disability

- The participant is receiving a disability pension payment from the plan.
- PBGC must:
  - Determine whether the participant meets the requirements of PBGC's Disability Policy to receive disability payments (see PBGC Operating Policy Manual 5.9-1 ).
  - Notify SSC that PBGC has determined that the participant is receiving a disability pension and that Code 3 applies.

**Code 4** – Death Benefit

- The payment is being made to a surviving spouse or other beneficiary and special tax treatment may apply.

**Code 7** – Normal Distribution (Taxpayer is Aged 59 ½ or older)

- The annuity is not subject to the 10% Early Distribution Tax because the participant is age 59 ½ or older as of December 31.
- PBGC must determine if the participant is/will be age 59 ½ or older as of December 31 of each year.
- Used by default usually at plan assumption and/or when date of birth (DOB) is unknown/blank. Send DOB to SSC to correct.

## III. Lump-Sum or Non-Periodic Payment Tax Withholding and Reporting

PBGC refers to all non-periodic payments as "lump-sum" payments. These payments include:

- Present value distributions
- Refunds of mandatory employee contributions
- Large benefit rollovers (LBRs)
- Payments to estates
- Other payments that cannot be paid as special pension payments.

PBGC lump-sums may or may not be a total distribution as defined by the IRS (i.e., the distribution or payment in one tax year of a plan participant's entire balance from all of the employer's qualified plans of one kind).

For Lump-Sum Payments, all or part of a lump-sum payment may be taxable income. The taxable portion of the lump-sum payment is subject to Federal income tax withholding and reporting. The nontaxable portion is not subject to tax withholding, but must be reported to the IRS.

The amount of tax withheld from a lump-sum payment depends on a number of variables, including:

- Taxable portion of the lump-sum
- Method of payment
- Withholding method elected
- Whether the lump-sum is rollover-eligible.

**Rollover Eligible** – Lump-sum payments to the plan participant, surviving spouse, and alternate payee under a QDRO who is a spouse or former spouse generally are rollover eligible.

- Only the taxable portion of a lump-sum payment may be rolled over, however,
- The non-taxable portion of a refund of EEC may also be rolled over if accounted for separately.

**Not Rollover Eligible** – Non-taxable lump-sum payments and lump-sum payments to non-spousal beneficiaries and estates are not rollover eligible. Generally, PBGC must withhold taxes from lump-sum payments; the taxpayer can only elect "No Withholding" if the payment is NOT rollover eligible.

For more information on lump-sum payments:

- i. Tax Withholding Methods for Lump-Sum Payments
- ii. Summary of Lump-Sum Payment Tax Withholding Options
- iii. IRS Reporting Requirements for Lump-Sum Payments

# IV. Other Tax Withholding Considerations

### 10% Tax on Early Distributions

This tax applies to plan participants under age 59 ½ at the time a lump-sum payment is made unless:

- Participant was age ≥ 55 at **actual** DOTE.
- Payment is a disability benefit.
- Payment is due to the death of the plan participant and is made to the surviving spouse, non-spousal beneficiaries or estates.
- Payment is made to an alternate payee under a QDRO.
- IRS levy applies to the payment.

Additional exceptions may apply.

Generally the 10% Tax on Early Distributions does not apply to PBGC annuity payments.

### Alternate Payees Under a Qualified Domestic Relations Order (QDRO)

Alternate payees who are spouses or former spouses under a QDRO generally are subject to the same tax treatment and have the same withholding options as the participant for either an annuity or a lump-sum payment.

### Special Tax Treatments

Special Tax Treatments such as capital gains treatment and/or 10 year averaging, may be available for non-periodic or lump-sum payments when:

- The participant was born before 1936.
- The lump-sum is a total distribution. (As defined by the IRS, a total distribution is the distribution of a participant's "account balance" within one tax year. When distributed, no further payments are due the participant and/or surviving spouse or beneficiaries.)
- The taxpayer will not receive any additional benefits such as monthly or survivor benefits.
- Payment is made directly to the taxpayer.

**NOTE:** Alternate payees under a QDRO, surviving spouses, beneficiaries and estates may use these special tax treatments if the above rules are met. Any subsequent payment, such as a residual lump-sum paid outside the tax year in which the estimated benefit was paid, is not eligible for the special tax treatments.

### Large Benefit Back Payments

Large benefit back payments are annuity back payments or underpayments owed the taxpayer. Large benefit back payments may be paid as "special payments" or as large benefit rollovers (LBRs).

- Special payments are paid similarly to annuity payments. However, the Taxpayer can elect a tax withholding method for the special payment that is different from the method selected for the annuity. The tax withholding is based on the number of months for which the special payment consists, instead of a single monthly payment. However, if the number of months is

not given, the payment is treated as a single monthly payment.

- LBRs are large benefit back payments in which the back payment is more than three times the amount of the participant's current or future monthly benefit and is more than $5,000 including interest. LBRs are paid as lump-sums and are subject to the rollover rules that apply to other lump-sums.
- Large benefit back payments may not be subject to some of the special tax treatments, such as 10-year averaging or capital gains treatments, which apply to other types of lump-sum payments.

## V. Mandatory Withholding Requirements – Invalid TIN

If a payee does not have a valid TIN, mandatory withholding applies regardless of the payee's tax withholding election. In addition, tax treaty benefits cannot be applied.

### Annuity or Periodic Payments

- **Residence within the U.S.** – PBGC applies an automatic or default withholding using a **marital status of 'single' with zero (0) exemptions**, regardless of actual marital status or number of exemptions.
- **Residence Outside the U.S.** – 30% Non-Resident Alien withholding is automatically applied (notify SSC).

### Lump-Sum or Non-Periodic Payments

- **Direct Rollover** (regardless of U.S. residency) to another U.S. qualified pension plan or traditional IRA – No tax withholding is applied.
- **Direct Payment: Residence within the U.S.**

  Rollover eligible – 20% withholding is automatically applied

  Not rollover eligible – 10% withholding is automatically applied
- **Direct Payment: Residence outside the U.S.** - 30% Non-Resident Alien withholding is automatically applied (notify SSC).

(Refer to Section VI. Non-Resident Alien Tax Withholding Requirements if the payee lives outside the U.S.)

**NOTE:** If a PBGC-generated ID number (i.e. Dummy SSN) is being used, these mandatory withholding rules must be applied.

## VI. Non-Resident Alien Tax Withholding Requirements

Non-resident alien tax withholding applies to all payees who live outside the U.S. regardless of whether they are a U.S. citizen or of their resident alien status.

"No withholding" elections from payees who live outside the U.S. generally cannot be honored; most other withholding elections are generally acceptable.

If "No withholding" is elected by a non-resident alien, PBGC applies a 30% withholding rate.

### i. Annuities

If a payee who lives outside the U.S. elects "No withholding", SSC will automatically apply 30% withholding.

If a payee who has elected "No withholding" moves outside the U.S., SSC will automatically apply 30% withholding unless an election to withhold is entered.

Payees living outside the U.S. may elect one of the following options:

- Withholding Allowance Method
- Fixed Dollar Amount
- Tax Treaty Withholding, if applicable.

### ii. Lump-Sum Payments

#### a. Rollover Eligible

- Eligible rollovers to another qualified retirement plan or traditional IRA are not taxed.
- 30% mandatory withholding applies to direct payments.
- Tax treaty rates can be used if applicable.

#### b. Not Rollover Eligible

- SSC, or paying agent, withholds 30% of the lump-sum payment for federal income tax if "No Withholding" is selected.
- To avoid the default 30% withholding the taxpayer must elect:
    - 10% withholding, or
    - Tax Treaty withholding, if applicable.

### iii. Tax Treaty Elections

Payees may elect withholding under a tax treaty for either annuity or lump-sum payments by submitting a completed IRS Form W-8BEN to SSC.

- The payment will be taxed under the rate provided by the tax treaty.
- Tax may not be withheld based on the tax treaty for a given country; many countries do not tax pension payments.

**NOTE:** The payee must have a valid TIN to qualify for tax treaty benefits. A PBGC-generated ID number (i.e. Dummy SSN) cannot be used to qualify for tax treaty benefits.

## VI. Non-Resident Alien Tax Withholding Requirements

Non-resident alien tax withholding applies to all payees who live outside the U.S. regardless of whether they are a U.S. citizen or of their resident alien status.

"No withholding" elections from payees who live outside the U.S. generally cannot be honored; most other withholding elections are generally acceptable.

If "No withholding" is elected by a non-resident alien, PBGC applies a 30% withholding rate.

### i. Annuities

If a payee who lives outside the U.S. elects "No withholding", SSC will automatically apply 30% withholding.

If a payee who has elected "No withholding" moves outside the U.S., SSC will automatically apply 30% withholding unless an election to withhold is entered.

Payees living outside the U.S. may elect one of the following options:

- Withholding Allowance Method
- Fixed Dollar Amount
- Tax Treaty Withholding, if applicable.

### ii. Lump-Sum Payments

#### a. Rollover Eligible

- Eligible rollovers to another qualified retirement plan or traditional IRA are not taxed.
- 30% mandatory withholding applies to direct payments.
- Tax treaty rates can be used if applicable.

#### b. Not Rollover Eligible

- SSC, or paying agent, withholds 30% of the lump-sum payment for federal income tax if "No Withholding" is selected.
- To avoid the default 30% withholding the taxpayer must elect:
    - 10% withholding, or
    - Tax Treaty withholding, if applicable.

### iii. Tax Treaty Elections

Payees may elect withholding under a tax treaty for either annuity or lump-sum payments by submitting a completed IRS Form W-8BEN to SSC.

- The payment will be taxed under the rate provided by the tax treaty.
- Tax may not be withheld based on the tax treaty for a given country; many countries do not tax pension payments.

**NOTE:** The payee must have a valid TIN to qualify for tax treaty benefits. A PBGC-generated ID number (i.e. Dummy SSN) cannot be used to qualify for tax treaty benefits.

## VIII. Returned Form 1099

If mail is returned, the following steps occur (refer to TP 04.1 Action Steps: Make Address Changes for additional information).

1 The Postal Service will forward a 1099 if a current forwarding order is on file at the Postal Service.

2 The Postal Service will return a 1099 to SSC if the forwarding order has expired.

- If the Postal Service provides a forwarding address, SSC will change the address in PRISM and remail the 1099.
- If the Postal Service does not provide a forwarding address, SSC will review PRISM Browser for a new address. If there is a new address, the 1099 is sent to that address.
- If the address has not changed, the 1099 will be sent to the Customer Contact Center (CCC). The CCC will hold the 1099 pending a request from the payee for the 1099. The CCC will use locator services if necessary to locate the payee.

## IX. Requests for Replacement or Revised Form 1099

### i. Requests for a Replacement or Duplicate Form 1099

1 If a participant contacts the Customer Contact Center and reports non-receipt or requests a duplicate 1099, the CCC will confirm the mailing address; enter the correct address in PRISM if necessary (refer to TP 04: Process Address Changes); and mail the 1099 in the pending file or replacement 1099.

2 If the participant contacts the TPD or FBA to request a duplicate 1099, confirm the address and make any necessary change in PRISM (refer to TP 04: Process Address Changes) if necessary, and send an e-mail request for the duplicate to **1099** "that is the email address".

### ii. Requests for Revised Form 1099

1 If the participant requests a revised Form 1099, refer the request to the appropriate PLS or FBA for a decision, who will determine if the request is warranted, e.g. Disability, Death.

2 If appropriate, the request will be forwarded to the SSC for processing.

## X. Additional Resources

The Forms and Publications section of the IRS website, http://www.irs.gov/formspubs/index.html, can also be consulted for additional information on this topic. The following documents are particularly useful:

- IRS General Instructions for Forms 1099-R and 5498
- IRS Publication 15 (Circular E), Employer's Tax Guide (Including Wage Withholding and Advance Earned Income Credit Payment Tables)
- IRS Publication 54 Tax Guide for U.S. Citizens and Resident Aliens Abroad
- IRS Publication 515 Withholding of Tax on Nonresident Aliens and Foreign Entities
- IRS Publication 519 U.S. Tax Guide for Aliens
- IRS Publication 575 Pension and Annuity Income

**V. Premium Compliance Evaluation Program**
**Revised: July 27, 2015**
**Owner: Audit Coordination/Follow-up and Compliance Evaluation Division**
**Corporate Controls and Reviews Department**

## 1. Purpose:

To document the audit procedures followed by the Corporate Controls and Reviews Department (CCRD) in the Premium Compliance Evaluation Program.

## 2. Background:

Under Title IV of the Employee Retirement Income Security Act of 1974 (ERISA), as amended, the Pension Benefit Guaranty Corporation (PBGC) conducts a Plan Termination Insurance program that is designed to protect the retirement benefits of about 44 million workers and retirees without the use of tax dollars from the general fund of the U.S. Treasury. PBGC's revenue is derived from insurance premiums paid by more than 30,000 insured pension plans, investment income, and recoveries from employers responsible for terminated underfunded defined benefit plans. Single-employer pension plans pay a basic flat-rate premium applied on a per participant basis. Underfunded single-employer pension plans pay an additional variable rate premium based on the amount of underfunding. The premium for the multiemployer program also has a basic flat-rate premium applied on a per participant basis. The PBGC premium program relies on data reported by plan administrators.

PBGC established its Premium Compliance Evaluation (PCE) program to determine whether premium amounts were accurately calculated, paid timely and reported in compliance with sections 4006 and 4007 of ERISA, as amended, and the PBGC's premium regulations (29 Code of Federal Regulations (CFR) Parts 4006 and 4007), including testing the validity of the participant count, the flat-rate premium, and the variable rate premium reported on the PBGC Premium Forms and related schedules. PBGC's authority to conduct premium compliance evaluations can be found in sections 4003 and 4007 of ERISA.

All defined benefit pension plans under the Plan Termination Insurance program are eligible for evaluation. CCRD follows a risk-based approach in determining enforcement efforts and uses electronic data comparisons of premium filings and other data to identify anomalies and potential noncompliance with premium regulations requiring further review. The amount of premiums paid, prior compliance issues, and other factors are also considered. Generally, plans are selected from this list for further evaluation. A particular evaluation will generally focus on a single plan year but can be expanded if problems are noted.

In conducting evaluations, CCRD must also ensure that information reported on the required PBGC Premium Forms is accurate and consistent with supporting documentation. Furthermore, CCRD must determine whether the plan timely filed required PBGC Premium Forms in accordance with PBGC regulations.

PBGC also offers compliance assistance to promote greater awareness of PBGC premium rules and to assist plan professionals who contact PBGC for guidance. By helping to ensure that all covered plans pay their required share of the insurance program costs, the PCE program helps to protect the pension insurance program for the benefit of all premium payers.

3. **Authority:**

   a. 29 United States Code (U.S.C.) §1301, *et seq.*, Title IV of the Employee Retirement Income Security Act of 1974 (ERISA), Public Law 93-406, as amended.

   b. 29 Code of Federal Regulations (CFR) Part 4003, *Rules for Administrative Review of Agency Decisions.*

   c. 29 CFR Part 4006, *Premium Rates.*

   d. 29 CFR Part 4007, *Payment of Premiums.*

4. **Applicable Documents and Forms**

   A. Plan Selection Dashboard

   B. Letter of Inquiry

   C. Initial Information Request

   D. Actuarial Valuation Report

   E. Sampling Methodology Plan

   F. Review Plan

   G. Premium Payment Instructions

   H. CPA Monthly Status Report

   I. CPA Final Report

   J. Initial Determination Letter

   K. Final Letter

5. **Roles and Responsibilities:**

   A. **Director, CCRD:** The Director of CCRD is responsible for conduct of a premium compliance evaluation program to ensure that insured plans are calculating and paying premiums in compliance with Title IV of ERISA and its implementing regulations, and supporting corrective action when instances of non-compliance are established. If a Plan Administrator seeks reconsideration of an Initial Determination Letter, the Director of CCRD signs the Final Letter.

   B. **Deputy Director, CCRD:** The Deputy Director, CCRD, is responsible for ensuring the effective execution responsibilities of the Director, CCRD, in the absence of the Director, and for oversight of the Division Manager.

**Manager, Audit Coordination/Follow-up and Compliance Evaluation Division:** The responsibilities of the Director, CCRD, for conduct of a premium compliance evaluation program have been assigned to the Manager, Audit Coordination/Follow-up and Compliance Evaluation Division (Division Manager). Working through the Director and Deputy Director, CCRD, the primary responsibilities of the Division Manager are (1) to ensure all premium compliance evaluation responsibilities of the

Director, CCRD, are performed in a competent and timely manner, and (2) to oversee and approve the work of the premium compliance evaluation team. Specific responsibilities of the Division Manager include the following:

- Assisting CCRD management with the selection of contractor support.
- Approving the selection of plans to perform the evaluation.
- Reviewing and approval the Initial Determination Letter.

C. **Team Leader:** The Team Leader supports the Division Manager in directing premium compliance evaluation activities and provides leadership to the actuaries and contractors executing the evaluations. The Team Leader responsibilities include overseeing the planning of the pension plan premium audit program, reviewing the Actuary's test work, and reviewing the recommendations or findings discovered during the review.

D. **Actuary:** The Actuary performs the evaluation of the Plan. The Actuary's duties include the following:

- Planning and preparing the yearly PBGC pension plan premium audit program.
- Working with contract support to prepare the Plan Selection Dashboard.
- Making recommendations for future audits and premium program improvements.
- Developing actuarial techniques, formulas and methods to verify premium calculations.
- Reviewing pension plan premium audits performed by contractor support.
- Monitoring contractor support including reviewing the review plan, reviewing monthly status reports, and reviewing workpapers, work programs, and reports.

E. **Financial Operations Department (FOD):** The FOD is responsible for the accounting of PBGC funds. FOD maintains the premium receivable records and premium filings. Also, FOD ensures that the premiums that are deemed owed and due are collected.

F. **Plan Administrator (PA):** The PA is a representative of the Plan (generally hired by the trustee) and is responsible for electronically signing the online premium filing and certifying that the filing has the correct participant count and premium amounts.

G. **Plan Administrator (PA):** The PA is a representative of the Plan (generally hired by the trustee) and is responsible for electronically signing the online premium filing and certifying that the filing has the correct participant count and premium amounts.

## 6. Premium Compliance Review Procedures

There are three types of reviews CCRD may conduct: letters of inquiry, limited reviews, and on-site evaluations. PBGC usually sends a letter of inquiry when a clarification is needed regarding an aspect of a premium filing. If more complicated issues are involved, CCRD will conduct a limited review. This level of review typically requires the submission of the plan document and certain records by the plan for more detailed analysis and discussion with plan representatives. CCRD may also conduct on-site examinations, which are broader in scope and include direct verification of evidence supporting the calculation of the premium paid. CCRD generally uses contract support to conduct the on-site examinations.

### A. Risk Assessment and Planning

#### *1. Risk Assessment*

- The Actuary will use the Plan Selection Dashboard (generally prepared with contract support) to identify anomalies in premium activity or identify plans that appear to be at risk (Click here for a sample of the Plan Selection Dashboard). A current to prior year comparison of the dashboards will be performed and documented to gain further insight into risk and identify program improvements. Dashboard results should be filtered based on participant count (e.g., 10,000+) and potential for underreported premiums (e.g., $100,000+).
- Examples of risk that are considered in the identification of potential at risk plans are as follows:
  - Skipped Premium Filing for Plan years.
  - Change in Plan Participant count that is greater than 25%.
  - New plans on the largest variable rate premium (VRP) and Flat rate premium (FRP) list.
  - Plans that filed Form 5500 but no Premium Filing for the same Employer Identification Number (EIN)/Plan Number (PN)/Plan Year Commenced (PYC).
  - FRP or VRP calculated incorrectly.
  - Market value of Assets or premium funding target on the Premium Filing does not match Form 5500 or Schedule SB (actuarial information).
  - Single or multi designation on Premium Filing does not match prior year Form 5500 designation.

- The Actuary will use the results of the dashboard to select plans to review and select the appropriate type of review for each. The plans selected for evaluation will be formally documented in a plan selection memorandum to the Division Manager.
- The Actuary will meet with the Division Manager and Team Leader to discuss the selections made in the plan selection memorandum and determine which plans will be sent to contract support and which plans will be reviewed by CCRD staff.
- If contract support is necessary, the Actuary will follow the specific contract requirements and provide timely documentation to the Procurement Department sufficient to obtain contract support, as needed.

2. *Planning*

- The Actuary prepares a Letter of Inquiry that will be sent to the PA. The Letter of Inquiry will explain the objectives of the evaluation. (Click here for a sample Letter of Inquiry).
- The Actuary will prepare the Initial Information Request to obtain the following information (Click here for a sample Initial Information Request):

  - Background information such as a brief history of the plan, organizational chart, a listing of all defined benefit plans, listing of all employee's information, internal auditors' and independent accountants' reports, etc.).
  - Documents including a copy of the original plan document and all subsequent amendments, a certification of assets by the trustee, etc.
  - A narrative of how the plan participant count was derived and how the number was calculated for applicable classifications.
  - A narrative that describes the sponsor's payroll processing system.
  - Actuarial valuation and assumptions which includes copies of previous actuarial valuation reports from previous years and a description of the availability of actuarial calculation worksheets and supporting records. (Click here for a sample Actuarial Valuation Report)
  - Department of Labor/IRS forms including copies of the IRS Form 6559, transmitter report of magnetic media filing, and the IRS Form 5500 (with all required attachments such as Schedule H, Schedule SB, and audited financial statements).

- Various electronic data records (e.g., participant, payroll, Schedule SSA).

- The Team Leader will review the Letter of Inquiry and the Initial Information Request to ensure that all required information is included. As evidence of review, the Team Leader will send the documents to the PA. The PA will have 60 days to provide the requested information.
- The PA will provide the information requested by CCRD. In some cases, the PA may request additional time to provide the requested information.
- If Contract Support is utilized, Contract Support will host an entrance conference with the PA, CCRD members, and other stakeholders to ensure that all parties are familiar with the scope of the agreed-upon procedures. Also, the staff members will introduce themselves and establish a point of contact for obtaining any additional data for the review. Furthermore, Contract Support will gain an understanding of the Plan's background (listed above). The PA will be given an opportunity to ask questions, if necessary.
- Contract Support will prepare a detailed review plan that will list the steps to perform the evaluation. The review plan will be submitted to the Actuary for review and approval.
- The Actuary will review the plan to ensure that the steps are within PBGC objectives. The Actuary will ask questions or request additional details, if necessary.
- For all premium compliance evaluations, the Actuary will create a service request (SR) in the Premium Practitioner System (PPS) upon initiation of each evaluation. The CCRD manager will reconcile the PPS SR to the PCE list at least on a semi-annual basis.

B. **Fixed-rate Premium (FRP) Review Procedures (Fieldwork)**

PBGC's Premium Payment Instructions may be found on PBGC's public website at www.pbgc.gov/prac/prem/premium-payment-instructions-and-addresses.html. There are multiple versions of the instructions. Select the version that is applicable to the plan you are reviewing. The instructions include a section on "How to Count Participants". Read the instructions (a) to determine who should be included in and excluded from the participant count and also (b) to determine the Participant Count Date. Generally, the Participant Count Date is the last day of the plan year preceding the Premium Payment Year. However, this is not the case for a new plan, a newly-covered plan, and certain mergers and spinoffs. Generally, the participant count includes actives, terminated vested, retirees, and survivors. The plan document describes when an employee is eligible for participation in the Plan (Click here for sample Premium Payment Instructions).

3. *Fixed-rate Premium Testing*

- The Actuary or contract support will perform the following steps during the evaluation:
  - For plans using payroll hours to determine eligibility for participation, test payroll hours and the participation determination.
  - Test selected individuals with breaks in service and carefully analyze periods of service.
  - Test selected individuals who were cashed out.
  - Identify if there are participants that were not cashed out and for which the plan has benefit liabilities (e.g. the participants were not paid out and irrevocable annuities were not purchased). Verify that they are included in the participant count.
  - Test selected individuals who were terminated to determine if the individuals were properly included in or excluded from the participant count.
  - When applicable, obtain a copy and read the irrevocable commitment documentation.
  - Test whether selected individuals receiving periodic payments or listed on Form 1099-R were appropriately classified as participants and included in the participant count.
  - Test whether separated participants included on the Form 5500 Schedule SSA (Social Security Administration) were appropriately classified as participants and included in the participant count.
  - If the plan merged or consolidated at the beginning of the premium payment year or anytime during the preceding year:

a. Based on PBGC account history records, assess whether the number of participants transferred into the plan reasonably approximates the number leaving the transferor plan.

b. To determine the impact on the participant count, compare the merged plan document to each plan document in effect immediately prior to the merger.
   - If it is determined that leased or contract employees represent more than 20% of the non-highly compensated workforce, develop suggested audit tests in coordination with CCRD.
   - Test any other relevant participant count related plan provisions (e.g. transfers from an hourly plan to a salaried plan where the plan states that the transferred participants maintain a benefit liability in the hourly plan.)

- If there is evidence of double counting of participants or any other errors in the participant count in the plan's favor, this should be brought to the Plan's attention for their review and follow-up. This may be included in the report as a finding. Note: sometimes an individual may be eligible for two benefits from the same plan (e.g. their own benefit and their spouse's death benefit).
- Document and evaluate the results of the Participant Count Testing. Generally, the Plan is given an opportunity to provide explanations for the unmatched people (e.g., people who received a W2 or a 1099R who were not included in the participant count). The number of unmatched people is narrowed down and sampling may be performed. In consultation with CCRD, determine whether a) additional testing should be performed, b) any identified errors should be projected to the universe from which a sample was selected, or c) only the identified errors should be reported.

C. **Variable Rate Premium (VRP) Review Procedures (Fieldwork)**

If the Plan is not eligible to claim an exemption from the VRP, then the premium is calculated based on the Plan's unfunded vested benefits (UVBs). The unfunded vested benefit calculation is also explained in the PBGC's Premium Payment Instructions. The services of an enrolled actuary are needed to verify the UVBs. PBGC will determine which cases need the UVBs verified (see review procedures for plans claiming exemption at *2. Plans Claiming an Exemption from VRP Testing,* below).

The Premium Payment Instructions include a section on "How To Determine Unfunded Vested Benefits". For this calculation, the Premium Funding Target (PFT) and the Fair Market Value (FMV) of assets are measured on the funding valuation date for the Premium Payment Year. For large plans, this date is generally the first day of the plan year. This is called the UVB Valuation Date. An enrolled actuary is needed to determine the PFT.

*1. VRP Testing*

The Actuary or contract support will perform the following steps during the evaluation:

*Market Value of Assets Review Procedures*

The determination of the Fair Market Value of Plan Assets is outlined in the Premium Payment Instructions under "How to Determine Unfunded Vested Benefits". Note: any averaging method adopted for funding purposes is disregarded for premium purposes. For premium purposes, the market value of assets is measured on the UVB Valuation Date and adjusted to account for contribution receipts using the same methodology as is used for funding purposes. Read the Premium Payment Instructions to determine the adjustments for 1) prior year contributions and 2) current year contributions. The asset value used to determine unfunded vested benefits is identical to the market value of assets required to be reported on the UVB Valuation Date Form 5500 Schedule SB.

a. Review the independent auditor's financial statement report that supports the assets used for the VRP calculation or exemption. If this independent auditor's financial statement report discloses that a limited scope audit was performed due to the certification of the asset by a financial entity:

   i. Verify that the certifying entity is authorized to issue the certification (See 29 CFR 2520.103).

   ii. Request and examine the original certification and the certifying entity's statement of the value of the assets that were not audited by the independent auditor.

   iii. Compare the certifying entity's reported value of assets to the value that is shown on the independent auditor's financial statement. Document differences and obtain an explanation from the plan administrator.

b. Compare the assets shown on the Form 5500 Schedule SB and the Form 5500 Schedule H to the Market value of assets as of the UVB valuation date shown on the Premium Filing. For adjustments for prior year and current year contributions, follow the Premium Payment Instructions "How to Determine Unfunded Vested Benefits – Fair Market Value of Plan Assets".

   i. Determine the Market Value of Plan Assets on the UVB Valuation Date. Review the Audited Financial Statements, the Actuarial Valuation Report, and the Form 5500 including the Schedule SB and the Schedule H.

   ii. Make any necessary adjustments for prior year contributions.

   iii. Make any necessary adjustments for current year contributions.

c. Determine if the "Market value of assets (adjusted for prior year and current year contributions) as of UVB valuation date" is correct.

   i. Is the asset value consistent with the audited Financial Statements? Note any discrepancies.

   ii. Were plan contributions properly included and excluded? Note any problems.

   iii. Were the correct interest rates used to make the adjustments? Note any problems.

d. Summarize any discrepancies between the Premium Filing "Market value of assets (adjusted for prior year and current year contributions) as of the UVB valuation date" and the Form 5500 Schedule SB asset value. Note any other problems.

e. Identify any hard to value assets where independent market valuations are not readily available (such as loans receivable, real estate interests, partnership interests, etc.) and compute the total market value. Note any exceptions.

If considered to be material, and after coordinating with CCRD, perform the following steps, as necessary.

i. Contact the sponsor or plan administrator for documentation supporting current market valuations – document the source and date of the most recent valuations.

ii. For loans receivable, read loan collection/performance data and document the effect of any loan receivable valuation exceptions on the plan's funded status.

f. Summarize the results of the Market Value of Assets Review Procedures. For any noted exceptions, develop a narrative for inclusion in the draft letter, including any needed recommendations and consider the results in connection with calculations related to the VRP or the related exemptions.

*Discount Rate Review Procedures*

Compare the Discount Rates shown on the PBGC Comprehensive Premium Filing to the VRP Discount Rates published at www.pbgc.gov/prac/interest/vrp.html. The Actuary will use the first day of the premium payment year for large plans. See the "Premium Funding Target" discussion within the "How To Determine Unfunded Vested Benefits" section in the Premium Payment Instructions for the allowable discount rates. Identify and investigate variances. Note any problems.

Assess the overall reasonableness of the interest rate assumptions used in valuing plan assets, the method used to value assets, and any other assumptions related to the asset valuation. If it is determined that assumptions do not appear reasonable or within accepted actuarial standards of practice, then discuss the issue with the plan's enrolled actuary and assess whether further work is warranted. Work performed in connection with the Market Value of Assets Review Procedures discussed above should also be considered.

Unfunded Vested Benefits (UVBs) Review Procedures Obtain a copy of the Following documents: 1) PBGC Comprehensive Premium Filing for the plan year under review, 2) Plan document and amendments in effect as of the UVB valuation date, generally the first day of the plan year for large plans, 3) Form 5500 including Schedule SB and attachments (e.g. assumptions, methods, audited Financial Statements) as of the UVB valuation date, and 4) Actuarial Valuation Report (AVR) as of the UVB valuation date.

i. Obtain the services of an enrolled actuary to verify the UVBs. For purposes of this document, we will call this actuary the "Reviewing Actuary".

ii. In coordination with CCRD, the auditing firm, and the PA, contact the Plan's enrolled actuary to obtain an understanding of the key assumptions used in determining the adequacy of the plan's funding and to respond to any initial concerns.

iii. The Reviewing Actuary should talk to the Plan actuary to determine an efficient way to verify the UVBs. This discussion should include 1) how easy/hard it is to access and transfer the data, and 2) which categories of participants have the highest percentages of liabilities. CCRD should also be involved in this discussion.

iv. The Reviewing Actuary must submit: 1) the proposed method of verifying the UVBs to PBGC, and 2) the estimated cost of this review.

v. CCRD reviews the Reviewing Actuary's proposed UVB review method and estimated cost, and either concurs or asks for a revised plan.

vi. The Reviewing Actuary submits a report of his/her findings to CCRD and the auditing firm, including the methods used to verify the UVBs, data used for the calculation, any data problems, any data and assumptions that could not be verified, the overall reasonableness of the assumptions used to calculate the UVBs (e.g. discount rates, mortality assumptions, other assumptions), and the validity of the UVB calculation. Note any problems. These findings are included in the draft letter.

*2. Plans Claiming an Exemption from the VRP Testing*

a. Plan claimed an exemption due to "No Vested Participants"

i. If the plan under evaluation is a new plan, read the plan document vesting provisions to see if past service was granted for benefit accruals and vesting purposes. Also, read the Actuarial Valuation Report (AVR) for the current plan year to determine if the AVR indicates that there were no vested benefit liabilities as of the first day of the plan year.

ii. If the plan under evaluation is an ongoing plan (not a new plan), read the AVR for the prior plan year and assess why there are no vested benefit liabilities. If the answer is not apparent, ask the plan administrator why and evaluate the reasonableness of the explanation. Consult with the plan's enrolled actuary, if necessary.

iii. For any noted exceptions, develop a narrative for inclusion in the draft report including any needed recommendations.

b. Plan claimed an exemption as a 412(e)(3) Plan

i. Document the Plan's explanation of how it qualifies for this exemption and compare the explanation to the Internal Revenue Code (IRC) Section 412(e)(3) requirements and regulations. Evaluate whether additional procedures are warranted.

ii. For any noted exceptions, develop a narrative for inclusion in the draft report including any needed recommendations.

c. Plan claimed an exemption because the Plan filed for a Standard Termination prior to the Premium Payment Year. For a standard termination, a notice is first sent to the participants, and then a Form 500 is sent to PBGC. When the termination is completed, PBGC receives a Form 501.

i. Obtain a copy of the notice that was provided to participants, any plan amendments (or other documentation, such as Board Meeting Minutes) pertaining to the plan termination date, the Form 500 and the Form 501, as applicable.

ii. Determine whether the Plan termination date is on or before the premium snapshot date. If the termination was aborted or if it was completed after the premium snapshot date, the exemption is not valid.

iii. For any noted exceptions, develop a narrative for inclusion in the draft letter, including any needed recommendations.

d. **Plan Administration and Enrolled Actuary Certification Review Procedures (Fieldwork)**

- On the Comprehensive Premium Filing, verify that the PA has signed and dated the filing. Note any problems.
- On the Comprehensive Premium Filing, verify that the Enrolled Actuary has signed and dated the filing. If the plan is exempt from the variable rate premium, no signature is required. Note any problems.
- If an Enrolled Actuary was required to sign the Comprehensive Premium Filing under evaluation, verify the professional status of the enrolled actuary who signed

the form.

- If certification [by the PA or the Plan Enrolled Actuary] is required and was not made, ask the PA or the Enrolled Actuary why it was not made and document the explanation. Note that the filings are now electronic and the signatures may be kept in the hard copy files at the PAs and Plan Enrolled Actuary offices.

e. **Review Procedures for FRP, VRP and Other Related Evaluations for Contract Support (Fieldwork)**

- The PA will provide the requested information to Contract Support for review.
- Throughout the fieldwork phase, Contract Support will provide a Monthly Status Report to the Contracting Officer Representative (COR). The COR will use the Monthly Status Report as a tool to monitor Contract Support's activity.
- Contract Support is required to document the test work through the use of work papers. Should the Contract Support identify routine findings during the course of the audit, then these findings should be shared with the PA with the provision that all findings are subject to CCRD review upon finalization of the report. If non-routine findings (e.g. fraud indicators or other similar conditions) are discovered, then Contract Support shall coordinate with the Actuary prior to discussing the matter with the PA.

f. **Concluding, Reporting, and Correcting**

- The Actuary or contract support shall summarize the results of its procedures. If any exceptions are noted, the Actuary will develop a narrative for inclusion in the report including any needed recommendations. In addition, the Actuary will assess whether the review should be expanded into other plan years based on the following:
  - Whether or not the participant count was significantly different from the count reported by the plan, or if there is a systemic error affecting past years.
  - Whether or not the VRP was calculated in error, was based on faulty information, or if there is reason to believe that a similar error occurred in past years.
  - Whether or not the plan was able to provide supporting documentation for the plan year under evaluation.
  - Materiality of findings.
  - Size of the plan.
  - Costs involved with expanding testing, and;
  - Availability of funding.
- The Actuary will document all test work, sampling methodologies, findings

and observations, conclusions, and recommendations in TeamMate. The Actuary will submit the work to the Team Leader for review.

- The Team Leader will review the test work and provide review notes, if necessary. The Actuary may need to revise or clarify existing work papers (or report) to reflect the review comments.
- When the evaluation is complete, the Actuary will either close the PPS service request previously opened or transition the SR to FOD/CCD for collections and compliance work based on the results of the premium compliance review. The CCRD manager will reconcile the PPS SR to the PCE list at least on a semi-annual basis.
- If Contract Support is used, they will summarize the results of the procedures and prepare a draft narrative for inclusion in a letter. Any findings should follow the format of condition, criteria, cause, effect, and recommendation. After this work and the draft report have been reviewed by a Partner of the firm, the contractor will submit the completed workpaper package and draft report for the Actuary to review. The draft report and work program will be fully cross-referenced to the workpapers to aid in the review. All findings will include details as to the condition noted, the cause, the criteria used, the effect, and the recommended action. As a result of this review process, Contract Support may need to perform additional procedures, adjust or clarify existing workpapers or the report to reflect review comments provided by the Actuary.
- The Actuary will save Contract Support's workpapers in TeamMate and sign off as evidence of review.
- Contract Support will conduct an exit conference with the PA. The contractor will also provide the PA with a written summary of the findings and request a written response. This process will provide the plan sponsor an opportunity to comment on the results and to provide any additional data or information for audit consideration. Initial results are subject to adjustment if the contractor's responses provide a sufficient basis to warrant such adjustments. CCRD may participate in the exit conference, if necessary. (CCRD will conduct the conference if Contract Support is not involved with the evaluation.)
- The Actuary will read the PA's response and review any related supporting documentation, and determine whether any changes to the findings are necessary. Prepare a rebuttal to the PA's comments, if needed. Contract Support will prepare a final report that includes the PA's response and Contract Support's comments on the response. (Click here for a sample CPA Final Report.)
- After considering the PA's response, an Initial Determination Letter will be prepared by the Actuary. The letter will include the PA's response and the comments on the response. The Actuary will submit the letter to the Team

Leader for review and approval (Click here for a sample Initial Determination Letter.)

- The Team Leader will review the Initial Determination Letter and provide review notes for the Actuary to make the necessary changes. When the report is finalized, it will be sent to the Division Manager for review.
- When the evaluation is complete, the Actuary will either close the PPS service request previously opened or transition the SR to FOD/CCD for collections and compliance work based on the results of the premium compliance review. The CCRD manager will reconcile the PPS SR to the PCE list at least on a semi-annual basis.
- The Division Manager will submit the report to the Deputy Director for final review and distribution. The Deputy Director will sign the report and submit to the PA.
    - If the report presents findings that include an amount due to PBGC, the PA will have the opportunity to seek reconsideration of the Initial Determination Letter within 30 days of the letter date. If the PA believes that the use of the General Rule Method would result in a lower premium amount, the PA is required to submit all schedules and documentation to support the calculation as part of the package.
    - When the PA submits a request for consideration, the package will be evaluated by the Director of CCRD.
    - The Director of CCRD will review the package and make a determination as to whether a modification of the amount due is needed. The Director of CCRD may contact the compliance evaluation team for assistance to review the records, if necessary.
    - Once the Director of CCRD reaches a decision, s/he will send an email to communicate the final decision of the reconsideration to the compliance evaluation team.
    - The Actuary will prepare the Final Letter based on the Director of CCRD final decision. The Actuary will send the Final letter to the Team Leader for review and approval.
    - The Team Leader will review the Final Letter to ensure all relevant information is included. The Team Leader will send the Final Letter to the Division Manager for review.
    - The Division Manager will review the Final Letter to ensure its accuracy and send to the Director of CCRD for signature.
    - The Director of CCRD will sign the Final Letter and send it to the PA.

- The Actuary will perform closing actions to ensure that the documents are properly saved and stored. The actions are as follows:
  - File a copy of the signed letter(s) in TeamMate.
  - Include a printed copy of the final letter, cross-referenced in TeamMate.
  - Include hardcopy printouts of the documentation file indexes, including the supplemental listing of electronic files (unless an acceptable electronic workpaper system is in place and PBGC has continuing access to these files).
  - Ensure all electronic files are "read only" and, if necessary, compressed for final storage.
  - Two complete sets of electronic engagement documentation must be prepared. The "original" set should be stored in TeamMate. The "archive" set is to be stored separately from the engagement documentation file on removable media such as CD-ROM or diskette.
  - Verify that electronic files stored on removable media are not corrupted and can be copied and restored from the archive.
  - Securely enclose the "original" set of electronic files in the engagement documentation file.
  - Ensure that the plan submitted an amended filing for agreed-upon findings. If no amended filing is received, coordinate with FOD as to amount due.
- When the evaluation is complete, the Actuary will either close the PPS service request previously opened or transition the SR to FOD/CCD for collections and compliance work based on the results of the premium compliance review. The CCRD manager will reconcile the PPS SR to the PCE list at least on a semi-annual basis.
- CCRD will rely on FOD process procedures to collect the funds from the Plan. CCRD will assist FOD, if necessary.

g. **Refund Request Review Procedures**

- FOD will send the Actuary a case file containing amended and original premium filings for one or more plan years and any other documentation that FOD collected (e.g. correspondence from the Plan, Account History, etc.)
- The Actuary will review the information provided and retrieve additional information such form 5500 Schedule SB, audited financial statements, and other relevant documents from the Department of Labor's EFast computer system and PBGC's online premium filing system.

- If necessary, the Actuary will contact the PA via email to get other supporting information such as data files and ask questions for further clarification.
- The Actuary will review the information and may require the assistance of a policy actuary or a PBGC lawyer for his/her opinion on the matter.
- After the completion of the review, the Actuary will draft an email to FOD outlining the specifics of the case. The Actuary will render an opinion as to whether FOD should pay the requested refund or deny the requested refund.
- The Actuary will send the email of the opinion to FOD and save a copy in the case file along with any supporting documentation supplied by the PA.
- The Actuary shall return the original case file to FOD.

PBGC Background
OBA Case Processing

Top of Page

## PBGC Background

**07/01/2016**

The PBGC protects the pension benefits of 44 million Americans in 27,500 private-sector pension plans. The agency is directly responsible for paying the benefits of more than 1.5 million people in failed pension plans.

PBGC was established by Title IV of the Employee Retirement Income Security Act (ERISA) in 1974, to encourage the growth of defined benefit pension plans, provide timely and uninterrupted payment of pension benefits when a plan sponsor develops problems, and maintain pension insurance premiums at the lowest level possible to carry out the Corporation's obligations. OBA is the operations arm of PBGC, with the functions of identifying and investigating plans that present a potential risk to PBGC, recommending plans that should be terminated, and administering the pension benefits in those plans that are terminated and trusteed.

PBGC and its programs are financed through premiums collected from companies that sponsor defined benefit plans, investment returns on PBGC assets, plan assets from terminated plans, and recoveries from employers responsible for underfunded terminated plans.

Under the single-employer insurance program, a company can voluntarily seek to terminate its plan using either a standard termination or a distress termination procedure. Additionally, PBGC can seek a PBGC-initiated termination of a plan without the employer's consent when necessary to protect the interests of the plan participants, the plan, or PBGC. PBGC must seek termination if a plan cannot pay current benefits. If a PBGC-insured multi-employer plan is unable to pay benefits when due, PBGC provides the plan with financial assistance to continue paying participants their guaranteed benefits, generally in the form of a loan.

# OBA Case Processing

**07/01/2016**

The procedures outlined in this manual are designed to apply to most of the cases processed by OBA. OBA may occasionally need to deviate from certain procedures to address situations that fall outside the norm or for efficiency. For situations where OBA is deviating from the procedures, documentation to the file (participant or plan as appropriate) must be prepared and approved.

A deviation from procedures for plan-level processing may be approved by the responsible OBA manager. To document an approved plan deviation, the responsible OBA manager will sign a memorandum that describes the proposed changes to procedures and will include:

- What the deviation is, specifically identifying the actions that are being taken in lieu of the identified procedures.
- The rationale for deviating from procedures and how the deviation ensures an appropriate level of controls are met.

After the memorandum has been signed, the OBA manager will ensure it is imaged to IPS in the corresponding section and will concurrently provide a copy to MCD.

A deviation from procedures that is applicable to participant processing may be approved by a Federal Supervisor or higher level and the documentation to support this must be imaged to the participant file. In addition to the appropriate level of approval, the documentation will include:

- What the deviation is, specifically identifying the actions that are being taken in lieu of the identified procedures.
- The rationale for deviating from procedures and how the deviation ensures an appropriate level of controls are met.

### Pre-Termination Processing by CFRD

While the *OBA Operations Manual* does not document CFRD procedures, the information in this subsection provides high-level background information for how CFRD processes a case before transferring to OBA. CFRD receives a case through a reportable event notice, a distress termination application, or some other action that highlights a potential problem with a plan. CFRD notifies the CFRD Audit Supervisor of the need for CSD assignment and notifies CSD that the case is ready for assignment. When a decision to terminate and trustee a plan is final, CFRD notifies the plan administrator and the sponsor. Responsibility for the terminated plan is then passed to a CSD.

CFRD usually completes the controlled group and net worth determinations before terminating the plan and reports the results in the *TWG Memo* to the CMD. If CFRD does not complete the determinations before termination, CFRD is responsible for completing the determinations for CSD.

If during the time the case is in CFRD and payees are not receiving benefits and it is certain that the plan will be recommended for termination, CSD is brought into the process to initiate action to begin paying participants through the prior paying agent or PBGC's paying agent. CSD also works with CFRD to assist in gathering information needed later.

If the plan meets the large case criteria, the Chairperson of the OBA Large Case Working Group schedules a meeting for the plan.

### OBA Processing

When the terminated plan is transferred to CSD from CFRD, CMD assigns a Case Team and pre-trusteeship processing begins (see Process 8 Pre-Trusteeship Processing). PBGC assumes payment responsibility (see Process 9 Plan Assumption) and adjusts benefit levels to an estimated guaranteed level in accordance with PBGC maximums and plan provisions (see Process 10 Benefits Adjustments). An account is set up at PBGC's paying agent and assets are transferred to PBGC's paying agent from the prior paying agent.

At the same time, the Case Team begins to collect and analyze the required data for plan processing and to build the

Case Team participant database (see Process 11 Data Collection and Analysis). The data collected, along with the information obtained by CFRD, serves as the basis for building the participant database, finalizing the *Plan Document List* and *Data Elements and Sources List*, and updating the *Plan Summary*. After collecting and analyzing the participant data, the DMD begins building the participant database and building reports (see Process 13 Participant Database Construction and Reporting). If the plan has 500 or fewer participants, follow Process 12 Small Plan Database Construction and Analysis, which expedites building the database.

The next step in case processing is to perform the plan asset evaluation. The purpose of the plan asset evaluation procedure is to ensure that PBGC has identified all assets and liabilities of the plan; identify potential instances of fraud, fiduciary breach and party-in-interest transactions; and determine the value of the plan's assets at ▸DOPT.

The next step in the process (for non-▸SPDRR plans) is to ensure CFRD values any recoveries that have been made or agreed to, and to allocate the money recovered (see Process 17 Actuarial Valuation). This allocation includes ▸DUEC, unpaid premiums, ▸UBL, and funds to be allocated for participant benefits from actual recoveries. For plans with ▸unfunded nonguaranteed benefits (UNB) of $20 million or less, MCD calculates allocation according to the ▸SPARR in accordance with ▸ERISA 4022(c). The actual recovery for each of these SPARR plans is factored into SPARR figures for subsequent years.

The Case Team actuary and the contract actuary, if one is involved, prepare the final valuation. This is the present value of each participant's benefit and the total present value for the entire plan. The valuation processes also provide the information necessary for developing benefit statements and for sending ▸BDLs.

At the same time, CSD is preparing to send BDLs explaining the final benefit level to the individual participants (see Process 19 Benefit Determination Letters). Once the participants have had the chance to review and appeal the determination (see Process 20 Appeals Correspondence), the final adjustments are made to benefits, if required. For participants who have received a net underpayment while being paid an estimated amount, PBGC sends a check for the amount of accumulated difference plus interest. For those who received net overpayments, CSD applies recoupment procedures against payees with a continuing stream of payments or takes recovery action against those who are not eligible to receive future benefits from PBGC.

After the BDLs have been sent and all that remains is post-valuation administration of the benefits, CSD closes the case (see Process 21 Plan Closing) and the close-out group in CSD reviews the closed plan to ensure that all actions have been completed (see Process 22 Closed Plan Review). The case is then passed to the post valuation administration contractor to manage the plan under PBGC direction.

Operating day-to-day throughout the entire cycle of case processing involves interaction with participants. Participants retire and apply for benefits, others die, some move and many have questions. Many types of other activities occur that require investigation and responsive action. Most of this is accomplished by the ▸CCC and/or the benefit processing staff.

# Process Groups within OBA Case Processing

**07/01/2016**

The manual groups the processes used to perform case processing tasks into seven categories, as each section describes.

**In this Section**

Pre-Trusteeship Process (8)
Initial Processes (9–10)
Participant Database Processes (11–13)
Evaluation Process (15)
Valuation Process (17)
Notification of Benefits Processes (19–20)
Case Closure Processes (21–22)

Top of Page

## Pre-Trusteeship Process (8)

**07/01/2016**

This section describes OBA's initial steps from assigning the Case Team through effecting trusteeship for a case. The Case Team holds a coordination meeting with CFRD, then assesses the available information and begins the case work plan. The Case Team's auditor and actuary create documents for preparation for building the database. CFRD prepares the Trusteeship Agreement, which is sent to the plan administrator or outside signatories. Once both the outside signer and a PBGC representative (the Supervisory Case Management Analyst) have signed the agreement, trusteeship is effective.

The order of the procedures given is a normal progression of a case; however, PBGC may trustee the plan at any time.

Top of Page

## Initial Processes (9–10)

**07/01/2016**

This section describes OBA's assumption of benefit payment responsibility and making adjustments to ensure that benefits are being paid in accordance with Title IV ERISA guarantees. Under certain circumstances, benefit payments may take place prior to the termination and trusteeship of a plan.

Top of Page

## Participant Database Processes (11–13)

**07/01/2016**

This section describes the Case Team's efforts to collect the required data for plan processing and to build the participant database. The Case Team begins collecting and analyzing the available data and then works with TRMD to build and test the database. Testing and documentation requirements can change depending on the size of the plan.

Top of Page

## Evaluation Process (15)

**08/30/2011**

This section describes the process for completing the plan asset evaluation. Together with the participant database, this evaluation serves as an input in determining the value of benefits payable by PBGC.

Top of Page

## Valuation Process (17)

**08/30/2011**

The purpose of the valuation process is to determine the present value of each participant's benefit and the composite present value for the entire plan. PBGC uses the resulting plan present value figure in determining PBGC's overall liability and for financial statements. The valuation process also provides the information necessary for developing benefit statements, which explain the data, assumptions, and variables used in calculating each participant's benefit and for sending BDLs. The activities constitute the final analysis of all of the information collected in earlier processes and create a meaningful presentation of PBGC's liabilities and each participant's final benefit amount.

Top of Page

## Notification of Benefits Processes (19–20)

**08/30/2011**

Once the value of the benefits is known, the notification of benefits processes are the means of informing each participant of the amount of his or her benefit. They also provide additional information about the appeal rights provided by law. This is done through the ▸BDLs and other correspondence. After the appeal period has expired, any necessary adjustments are made and the paid benefit amounts are shifted from estimated status to final status.

Top of Page

## Case Closure Processes (21–22)

**07/01/2016**

The case closure processes are basically a review to ensure that all required actions for a plan have been completed according to relevant policy and procedures. This is the opportunity to find and correct any errors. The last step in the process is for OBA to transfer ongoing administrative management of benefits to an outside contractor. These outside contractors continue the administration of benefits under PBGC policies and procedures.

Top of Page

# Technical Procedures

**07/01/2016**

Technical Procedures (TPs) are usually event-driven activities rather than case-driven activities occurring at a specific point in case processing. TPs may be performed one or more times in the life of a case, or may not be performed at all (for example, balancing occurs periodically, while holding a participant meeting may not occur at all). Multiple divisions can perform TPs (for example, ▸CSD and ▸BPD coordinate to process off-cycle payments).

TPs may be plan activities (for example, TP 61 Successor Plan Determinations) or individual/group participant activities (for example, TP 13 Domestic Relations Order and State Agency Orders). When a TP is applicable to a specific process, the *OBA Operations Manual* provides a link in the process and/or procedure steps to the appropriate TP.

Top of Page

# Appendices

**07/01/2016**

The Appendices provide additional information on specific topics, including background information, reference material, list of job aids, and list of OBA systems.

Top of Page

# Benefit Payments Division Processes

**07/01/2016**

The Benefit Payments Division (BPD) Processes section covers the payment-related tasks performed by BPD, occasionally in conjunction with the other divisions of OBA.

Top of Page

# OBA Operations Manual Layout

**07/01/2016**

This section details what comprises the *OBA Operations Manual* and what each component of the manual contains. In addition, this section identifies the most prominent page layout for processes and technical procedures (TPs).

**In this Section**

Manual Layout
Page Layout of Processes and Technical Processes

Top of Page

## Manual Layout

**07/01/2016**

This table describes, in order, the different components that make up the layout of the *OBA Operations Manual*. These components map to the top-level (unexpanded) items in the left navigation pane.

**Manual Layout Table**

| Table of Contents | Description |
|---|---|
| OBA Operations Manual Introduction | Provides the background of PBGC and ▸ERISA, an overview of ▸OBA core processing, and the Case Team processing model. In addition, this section covers the different process groups followed during case processing. |
| Recent Content Updates | Provides a list of the latest publication updates to the *OBA Operations Manual.* |
| Historical Content Updates | Provides listings of all updates made to the Operations Manual. This section is grouped by processes, technical procedures, appendices and Glossary, and all other miscellaneous updates made within the manual post-2006. This section also lists the updates made pre-2006, grouped in the same manner. |
| Interim Procedures and Guidance | Contains procedures that may supersede existing procedures in the manual, but were not available in time for the publication to implement within the procedures. |
| Core Case Processing:<br>• Pre-Trusteeship Process<br>• Initial Processes<br>• Participant Database Processes<br>• Plan Asset Evaluation<br>• Valuation Process<br>• Notification of Benefits Processes<br>• Case Closure Processes | Contains the processes to perform case processing tasks, divided into seven categories (see Process Groups within OBA Case Processing). |
| Technical Procedures | Contains procedures which are usually event-driven rather than case-driven activities occurring at a specific point in case processing. TPs may be performed one or more times in the life of a case, or not at all. |
| Appendices | Provides additional information on specific topics, including background information, reference material, list of job aids, and list of OBA systems. |
| Benefit Payment Division Processes | Contains payment-related tasks performed by ▸BPD, occasionally in conjunction with other divisions of OBA. |

# Page Layout of Processes and Technical Processes

**08/30/2011**

This section provides the page layout of the different components that make up a process and its associated procedures.

**In this Section**

Overview Layout
Procedures in Processes and Technical Procedures Layout
Resources Layout

Top of Page

**Overview Layout**

**08/30/2011**

The Overview consists of non-procedural background information regarding a process or technical procedure (TP), such as summaries of and links to relevant policies and a statement of the purpose of the process. The Overview also contains a high-level summary of the process and an explanation of how it may connect to or interact with other processes.

Top of Page

**Procedures in Processes and Technical Procedures Layout**

**03/27/2014**

A procedure represents a single task within a process or technical procedure (TP) and provides:

- Information users need to correctly perform the required tasks.
- Sufficient guidance to ensure uniform application throughout the divisions.
- Efficient and consistent application of PBGC policy and regulations across all cases and as they affect participants.

A procedure can also have sub-procedures that break a complex or long procedure into more manageable, smaller sub-procedures.

In most cases, the procedures and sub-procedures are meant to be followed in the order listed in the Table of Contents left-side navigation pane. However, some procedures and sub-procedures are non-sequential, high-level tasks related to the process or TP. Refer to the workflow for specific flow of each process and many TPs.

The following paragraphs describe the different sections of a procedure.

**Key Information Table**

The Key Information table provides the purpose, guidance, and procedure owner for each procedure.

| | |
|---|---|
| **Purpose** | The purpose of the procedure. |
| **Guidance** | Laws, regulations, and policies that dictate how and why PBGC performs the procedure and with the required authority. |
| **Procedure Owner** | Who is responsible for performing the procedure. For many procedures, the owner is identified as the "Case Team" to emphasize group ownership of the procedure. For others, the owner is identified as the actuary, auditor, EBLS, or other specific role. |

**Procedure**

The procedure is the sequence of steps the user follows to accomplish the task of the process or TP.

**Sub-procedures**

If the procedure involves a large number of steps or logically divides into sub-tasks, the manual divides the procedure into sub-procedures.

If there are multiple alternate methods to accomplish the task, the manual also divides the procedure into multiple sub-procedures and describes the different alternate methods and when to perform each sub-procedure.

Top of Page

**Resources Layout**

**08/30/2012**

The Resources pages contain the forms, letters, and memos identified in the procedures of the process, which are also links, listed alphabetically. In addition, the Resources pages contain the ▸eALG letters and forms identified in the procedures of the process. While these file and form names are not links, there is a link to the eALG Correspondence Help so the user can access the letters and forms.

# Processes 8–10

**10/28/2016**

**Processes 8–10 Table**

| Process | Date | Change |
|---|---|---|
| **Process 8** Overview for Pre-Trusteeship Processing | 08/28/14 | **Revised** to reflect that the TWG Chairperson's office (previously the COO) sends the trusteeship agreement to outside signers, and to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 11/26/13 | **Revised** to indicate the TPD Manager executes the Trusteeship Agreement. |
| | 09/26/13 | **Revised** to indicate the TPD Manager executes the Trusteeship Agreement. |
| **Process 8.2** Assess Available Records/Information | 08/30/16 | **Revised** to list the Procedure Owner as Auditor, DCB (not DCD). |
| **Process 8.4** Assign Milestones in CMS | 03/29/12 | **Renamed** from Receive Case from DISC, and **revised** to remove steps not related to assignment of CMS milestones, which are expanded. |
| **Process 8.5** Plan Case and Create Case Work Plan | 03/29/12 | **Revised** to add cross-reference to *BAPD Progress Reporter in Oracle Primavera P6 Interim Guidance*. |
| **Process 8.6** Begin Plan Document List, Plan Summary, and Participant Data Elements List | 03/29/12 | **Revised** to remove the requirement for concurrence on the Plan Summary. |
| **Process 8.7** Effect Trusteeship | 11/21/14 | **Revised** to remove Deputy Chief of Benefits Administration, BAPD as recipient of the *Trusteeship Agreement Transmittal Memo* with attachments. |
| | 08/28/14 | **Revised** to reflect that the TWG Chairperson's office (previously the COO) sends the trusteeship agreement to outside signers; to update the title of the Deputy Chief of Benefits Administration, BAPD; and to remove "4042(d)" from references to the trusteeship notification letter to participants. |
| | 11/26/13 | **Revised** with minor edit. |
| | 09/26/13 | **Revised** to indicate the TPD Manager (previously the Auditor) executes the Trusteeship Agreement and completes the rest of the procedure, while noting that the auditor may sign the agreement if it is prepared for the auditor's signature. |
| **Process 8.8** Complete DUEC Milestone and Update the Recovery Milestone | 11/21/14 | **Revised** to remove the reference to Process 15.10B Value Due and Unpaid Employee Contributions. |
| **Process 8.9** Resources for Pre-Trusteeship Processing | 03/29/12 | **Added:**<br><br>*BAPD Progress Reporter in Oracle* |

| | | |
|---|---|---|
| | | *Primavera P6 Interim Guidance* |
| **Process 9** Overview for Plan Assumption | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 03/27/14 | **Renamed** from Initial TPD Processes. |
| **Process 9** Workflow | 11/26/13 | **Revised** to reflect current processing. |
| **Process 9.1** Ensure Uninterrupted Payments | 08/28/14 | **Revised** with updated titles Deputy Chief of Benefits Administration, BAPD and Chief of Benefits Administration and Director, BAPD, and state that the latter approves all requests to pay benefits prior to trusteeship; and to reflect the current routing process. |
| | 06/27/13 | **Revised** to replace title Deputy Director of Operations (DDO) with Chief Operating Officer (COO). |
| | 11/30/12 | **Revised** to specify the reference to the *Benefit Funding Memo*. |
| | 03/29/12 | **Revised** to indicate that the Deputy Director for Operations approves payments before trusteeship, and with miscellaneous edits. |
| **Process 9.1B** Ensure Uninterrupted Payments for Plans Not Yet Trusteed | 08/28/15 | **Revised** to clarify that CFRD advises BAPD about participants out of pay status; to reflect the retitled memo BAPD uses to request authorization of payments before trusteeship; and to reference a sample memo. |
| | 09/26/13 | **Revised** to correct the acronym for the COO, and for miscellaneous edits. |
| | 11/30/12 | **Revised** to require the determination of the pre-trusteeship authorization date; to cross-reference payment procedures; to indicate actions taken by the Front Office and Deputy Director of Operations; and to require implementation and documentation of payment actions after the plan is trusteed. |
| | 03/29/12 | **Revised** to indicate that the Deputy Director for Operations approves payments before trusteeship; that participants out of pay status includes newly eligible retirees; and with miscellaneous edits. |
| **Process 9.2** Prepare and Transmit Funding Memo | 08/28/15 | **Revised** with new steps to obtain the paying agent's latest check register or other documentation validating the payment amounts to compare with the plan administrator's list of payees, and to attach the supporting documentation to the *Benefit Funding Memo*. |
| | 11/30/12 | **Revised** to clarify that funds may be sent to a plan's paying agent or interim custodian. |
| | | |

| | | |
|---|---|---|
| | 03/29/12 | **Revised** to note that the *Benefit Funding Memo* requires the date of trusteeship or indication that trusteeship is pending, and that the memo authorizing pre-trusteeship payments must be attached; and to clarify that the case team is to be notified when the memo is imaged. |
| **Process 9.3** Obtain Participant Payment Data | 03/27/14 | **Revised** to remove references to the Health Coverage Tax Credit. |
| | 08/26/13 | **Revised** to clarify that if there are no retirees, the Plan Assumption Milestone is updated here to reflect this. |
| | 11/30/12 | **Revised** to add references to new Appendix A Sensitive Information. |
| | 08/30/12 | **Revised** to include payee benefit forms among the list of items to request from the prior paying agent. |
| | 04/30/12 | **Revised** to indicate that payment assumption is to occur as soon as practicable but no later than 180 days after DOTR. |
| **Process 9.4** Initiate First Pay and Customer Data Loads | 03/30/15 | **Added** a step to notify the case team by e-mail once the payees are loaded in Spectrum. |
| | 08/28/14 | **Revised** to add a step to ensure that the data load review and approval are documented, and for minor edits. |
| | 03/27/14 | **Revised** to remove references to the Health Coverage Tax Credit. |
| | 11/26/13 | **Revised** to clarify that the Plan Assumption Milestone is updated and finalized once the payee and customer data loads are approved. |
| | 09/26/13 | **Revised** to clarify that the Plan Assumption Milestone is updated and finalized once the payee and customer data loads are approved. |
| | 06/27/13 | **Added** cross-reference to new TP 16.4 Archive Electronic Files. |
| | 08/30/12 | **Revised** to update archiving instructions, to note that benefit forms are to be included in the First Pay Load if available, and to require that the reason and approval be documented if payments will not assumed within 180 days of DOTR. |
| **Process 9.5** Notify Participants | 03/30/16 | **Revised** to remove the step to advise affected payees that multiple payments from the prior plan administrator will be consolidated into a single payment when PBGC assumes payment responsibility. |
| | 11/20/15 | **Removed** redundant hyperlinks. |
| | 08/28/14 | **Revised** to remove "4042(d)" from references to the trusteeship notification |

| | | |
|---|---|---|
| | | letter to participants. |
| **Process 9.5A** Notify Payees | 08/30/16 | **Revised** to clarify that if a payee who was suspended for non-receipt of the PIF is due a back payment that is greater than $5,000 and more than three times the monthly benefit, the back payment is treated as a Large Reimbursement. |
| | 03/27/14 | **Revised** to remove references to the Health Coverage Tax Credit. |
| **Process 9.7** Verify Data from Returned Forms | 08/28/14 | **Revised** to remove "4042(d)" from references to the trusteeship notification letter to participants. |
| **Process 9.8** Resources for Plan Assumption | 08/28/15 | • **Added:**<br>  • *Authorization to Pay Participants before Trusteeship*<br>  • *Authorization to Pay Participants before Trusteeship Sample*<br>• **Removed:**<br>  • *Authorization to Place Participants in Pay Status Prior to Trusteeship* |
| | 11/30/12 | **Removed** obsolete privacy guidance document. |
| | 03/29/12 | **Added:**<br>*Affidavit of Identity*<br>**Removed:**<br>*Pre-Trusteeship Letter Analysis Memo* |
| **Process 10** Overview for Benefit Adjustments | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **Process 10.1** Analyze Plan Documents | 09/30/16 | **Revised** to state that any participant eligible for a plan-provided early unreduced benefit will be entitled to receive it retroactively to the earliest eligibility date on or after DOPT, regardless of any previous notifications. |
| **Process 10.4** Identify Current Payees for Benefit Adjustments | 09/26/13 | **Revised** to direct that an electronic copy of the completed *Estimated Benefit Adjustments Analysis Memo* be provided to the TPD Operations Manager, BAPD instead of the Deputy Director, BAPD. |
| | 06/27/13 | **Revised** to provide an example of when additional benefit adjustments may be necessary, and state that they must be approved by the TPD Manager and that an addendum to the Estimated Benefit Adjustments Analysis Memo is to be used for this purpose. |
| | 03/28/13 | **Revised** to allow for approval of a manually prepared benefit statement by e-mail or memo, and to note that either may be used to approve multiple benefit |

| | | |
|---|---|---|
| | | statements; and to add steps for the EBLS/FBA to image copies of the benefit statements and approval document. |
| | 12/20/12 | **Revised** to require approval by a GS-13 or higher grade actuary of a manually prepared benefit statement. |
| **Process 10.5** Prepare Estimated Benefits Calculation Tool | 03/28/13 | **Revised** to require that a BET prepared by a GS-12 or lower grade actuary be approved by a GS-13 or higher actuary via the TPD BET Checklist. |
| **Process 10.6** Resources for Benefit Adjustments | 12/20/12 | **Added** the *Manual Benefit Statement Approval Memo*. |
| | 03/29/12 | **Removed:**<br><br>*Pre-Trusteeship Letter Analysis Memo* |

# Processes 11–15

**03/30/2016**

**Processes 11–15 Table**

| Process | Date | Change |
|---|---|---|
| **Process 11** Overview for Data Collection and Analysis | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 03/29/12 | **Revised** to remove reference to finalizing the *Plan Summary*. |
| **Process 11.1** Hold Strategy Meetings | 06/27/13 | **Revised** to clarify that LCWG references are to the BAPD Large Case Working Group (BAPD LCWG). |
| | 11/30/12 | **Revised** to reference to new Appendix A Sensitive Information. |
| | 03/29/12 | **Revised** to remove reference to TP 14 Hold Participant Meetings and update the cross-reference to renamed Process 11.3. |
| **Process 11.2** Perform Site Visit | 06/27/13 | **Revised** to state that if the DMC will participate in the site visit, the auditor is to advise the DMC COR by e-mail once the trip dates are set and provide a minimum of two weeks' notice whenever feasible. |
| **Process 11.2A** Perform Pre-Site Visit Tasks | 11/30/12 | **Revised** to reference to new Appendix A Sensitive Information. |
| **Process 11.2B** Conduct Interviews | 03/29/12 | **Revised** to remove reference to TP 14 Hold Participant Meetings. |
| **Process 11.2C** Review On-Site Documents | 11/30/12 | **Revised** to reference to new Appendix A Sensitive Information. |
| | 03/29/12 | **Revised** to make the *Master List of Documents to Obtain* available directly from the procedure and not through Appendix A. |
| **Process 11.3** Finalize the Plan Document List and Data Elements for Participant Database Construction | 03/29/12 | **Renamed** and **revised** to remove references to finalizing the *Plan Summary.* |
| **Process 11.3B** Finalize Data Elements for Participant Database Construction | 03/29/12 | **Renamed** and **revised** to remove steps to finalize and image the *Plan Summary*. |
| **Process 11.4B** Review Electronic Data | 06/27/13 | **Replaced** archiving instructions with reference to new TP 16.4 Archive Electronic Files. |
| | 03/29/12 | **Revised** to specify location for archiving e-data and to remove the reference to finalizing the *Plan Summary.* |
| **Process 11.5** Resources for Data Collection and Analysis | 11/30/12 | **Removed** obsolete privacy guidance document. |
| **Process 12** Overview for Small Plan Database Construction and Analysis | 08/28/14 | **Revised** to reflect changes involving: the auditor's role in determining the plan population and documenting the process; |

| | | |
|---|---|---|
| | | requiring another auditor to test if the auditor builds the database; requiring a full e-data review; use of statistical instead of judgmental sampling; and providing written instructions for building the database. Revised also to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **Process 12.1** Construct Participant Database for Small Plan | 08/28/14 | **Revised** to require the following: statistical sampling, verification of e-data with source data; updates to the Data Elements and Sources List (as needed); written instructions for building the database; testing once 10% of the database is completed; and providing the auditor a summary of the results of the database construction. |
| | 06/27/13 | **Replaced** archiving instructions with reference to new TP 16.4 Archive Electronic Files. |
| | 03/29/12 | **Revised** with a new step to archive e-data in original format and to which location. |
| **Process 12.2** Test Participant Database for Small Plan | 11/20/15 | **Revised** to state that if a 100% review will be completed, the results are to be documented in the *Participant Data Review Work Paper Summary* once the database is error-free. |
| | 08/28/14 | **Revised** to require statistical sampling of the database; to remove references to documents previously used for judgmental sampling; to require the auditor (not the Database Builder) to prepare the SPDCA Report and update the list of documents referenced or attached; and to require review of the report by the Audit Technical Reviewer. |
| | 06/27/13 | **Added** cross-reference to new TP 16.4 Archive Electronic Files. |
| **Process 12.3** Resources for Small Plan Database Construction and Analysis | 08/28/14 | **Revised** to remove *Certification of Database Review* and *Certification of Electronic Data Review* and samples of each, and the *SPDCA Report Sample*. |
| **Process 13** Overview for Participant Database Construction and Reporting | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **Process 13.3A** Finalize Reasonable Test and Spectrum Reconciliation | 06/27/13 | **Replaced** archiving instructions with reference to new TP 16.4 Archive Electronic Files. |
| **Process 13.3B** Prepare Database Construction Report and Participant Review Summary | 03/29/12 | **Revised** to direct the auditor to obtain the most recent *Plan Summary* from the actuary. |
| **Process 15** Plan Asset Evaluations | 06/27/13 | **Revised** throughout with notes indicating |

| | | |
|---|---|---|
| | | which plans are to be completed using the current procedures or the new procedures posted on the PBGC Portal, and provide a link to the latter. |
| **Process 15** Overview for Plan Asset Evaluations | 03/29/12 | **Revised** to restate the purpose of the plan asset evaluation and define the meaning of fair market value within the context. |
| **Process 15.3** Perform Initial Analysis | 11/30/12 | **Revised** to reference to new Appendix A Sensitive Information. |
| | 03/29/12 | **Revised** to include the table formerly in Appendix F Alternate Sources of Plan Information. |
| **Process 15.8** Prepare for Site Visit and/or Telephone Conference | 11/30/12 | **Revised** to reference to new Appendix A Sensitive Information. |
| | 03/29/12 | **Revised** to make the *Master List of Documents to Obtain* available directly from the procedure and not through Appendix A. |
| **Process 15.10B** Value Due and Unpaid Employer Contributions | 03/29/12 | **Revised** to add steps for the auditor to update, and management to finalize, the Recovery Valuation Milestone. |
| **Process 15.13** Prepare Plan Asset Evaluation Report | 03/29/12 | **Revised** to move the step to obtain concurrence on the *Plan Asset Evaluation Report* and *Form 1108 Plan Asset Reconciliation* from before to after updating CMS. |
| **Process 15.14** Reconcile Plan Assets with FOD/IAB | 03/29/12 | **Added** cross-reference to new TP 16.4 Archive Electronic Files. |
| **Process 15.15** Resources for Plan Asset Evaluation | 11/30/12 | **Removed** obsolete privacy guidance document. |

# Processes 16–17

**11/20/2015**

**Processes 16–17 Table**

| Process | Date | Change |
|---|---|---|
| **Process 17** Overview for Actuarial Valuation | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 11/26/13 | **Revised** to indicate that the TPD Manager is to advise OPSS by the end of the second and fourth quarters of the fiscal year (previously, by the end of each quarter) to update the plan-specific web page if BDLs have not been issued within three years of DOTR, and to specify the information needed. |
| | 09/26/13 | **Revised** to indicate that the TPD Manager should notify OPSS by the end of each quarter to update the plan-specific web page if BDLs will not be issued within three years of DOTR. |
| **Process 17.1** Create V1 File in ValTool | 06/27/13 | **Revised** to update the Guidance section. |
| **Process 17.1G** Calculate Benefits for the Benefit Statements | 06/27/13 | **Revised** to add steps specific to participants who 1) died post-DOPT, 2) were paid lump sums by PBGC, 3) have a partially purchased annuity, and 4) have a QDRO. |
| **Process 17.7** Review Actuarial Case Report and Software by Actuarial Technical Expert | 06/27/13 | **Revised** with new step for the Actuarial Technical Expert to review sample benefit and retirement statements for compliance with guidance in the ATM, and ensure the benefit statements reflect the most current Spectrum data and other events that impact the termination benefit or lump sum amount. |
| **Process 17.8** Finalize Actuarial Case Report Package & Review | 11/26/13 | **Revised** to require that the ASD approval e-mail be included when the *Actuarial Case Report* is submitted for imaging. |
| **Process 17.9** Perform Final Software Review | 03/27/14 | **Revised** to specify references to the "TPD" team leader or case team due to proposed organizational updates. |
| **Process 17.10** Perform Software Closeout (OASD) | 06/27/13 | **Added** cross-reference to new TP 16.4 Archive Electronic Files. |
| | 03/29/12 | **Revised** to include Valuation (ADT) Load: Data Elements/Spectrum Fields table formerly in Appendix I. |
| **Process17.12** Provide Post-Valuation Actuarial Assistance | 03/27/14 | **Revised** to remove DOPT Present Value information from the list of potential Spectrum fields to update due to a revised or corrected benefit statement. |
| | 06/27/13 | **Added** new section to manual. |

Top of Page

# Processes 18–20

**11/20/2015**

**Processes 18–20 Table**

| Process | Date | Change |
|---|---|---|
| **Process 19** Overview for Benefit Determination Letters | 03/30/15 | **Revised** to indicate that limited-scope BDLs may be used after BDLs are issued as well as before; and to remove references to corrected BDLs. |
| | 11/26/13 | **Revised** to indicate that the TPD Manager is to advise OPSS by the end of the second and fourth quarters of the fiscal year (previously, by the end of each quarter) to update the plan-specific web page if BDLs have not been issued within three years of DOTR, and to specify the information needed. |
| | 09/26/13 | **Revised** to indicate that the TPD Manager should notify OPSS by the end of each quarter to update the plan-specific web page if BDLs will not be issued within three years of DOTR. |
| | 06/27/13 | **Revised** to state that for any case that will require more than three years from DOTR to issue BDLs, the TPD Division Manager is to advise OPSS to update the Web page for the plan. |
| **Process 19.1** Create Early BDL Database and Issue Early BDLs | 11/26/13 | **Revised** to replace obsolete archiving guidance with a reference to TP 16.5 Archive Electronic Files. |
| **Process 19.2** Review Actuarial Case Report and Issue BDLs | 08/28/15 | **Revised** to reference Policy 5.4-10 Small Benefit Payments, and to add steps to pay lump-sums of less than $200 including interest if PBGC has reliable and sufficient data on the participant. |
| | 03/30/15 | **Revised** to clarify that a benefit adjustment resulting from a BDL must be reflected in the payment no later than 90 days after the expiration of the appeal period; to indicate that the threshold for annuity benefit decreases changes to $1 or more for plans trusteed after 10/1/14; and to remove references to corrected BDLs. |
| | 08/28/14 | **Revised** to clarify that a BDL to a pre-DOPT retiree with a non-level benefit form is to include a benefit statement, and the BDL is to be customized. |
| | 11/26/13 | **Revised** to mention that all recovery BDLs, including those involving *de minimis* write-offs, require follow-up according to TP 6 Recover Overpayments. |
| | 03/28/13 | **Revised** to require that a BET prepared by a GS-12 or lower grade actuary be |

| | | |
|---|---|---|
| | | approved by a GS-13 or higher actuary via the TPD BET Checklist. |
| | 11/30/12 | **Revised** to correct a policy reference, and to remove the step to pay large reimbursements without an application when an election is not received within 30 days of the BDL. |
| | 08/30/12 | **Revised** to add a note to not issue a BDL to a participant whose Eligibility Status code is Undetermined in Spectrum. |
| **Process 19.3** Determine Net Overpayment/Underpayment for Annuities | 03/30/15 | **Revised** to indicate that the "$5 Rule" for benefit decreases applies to plans trusteed before 10/1/14, and for plans trusteed later, the tolerance is less than $1. |
| | 03/27/14 | **Revised** to clarify that if a participant was underpaid before DOPT and has a post-DOPT net overpayment, the amounts do not offset. |
| | 04/30/12 | **Revised** to update reference to renamed TP 7 Recoupment. |
| **Process 19.4** Determine Net Overpayment/Underpayment for Lump Sums | 03/30/15 | **Revised** to add a reference to policy 5.4-9 Lump-Sum Benefit Payments. |
| | 11/26/13 | **Revised** to add a step to refer to TP 6 Recover Overpayments after issuing BDLs involving de minimis write-offs. |
| | 04/30/12 | **Revised** to replace $500 de minimis with administrative de minimis of less than $25 due to policy changes, and updated cross references to recovery procedures. |
| **Process 19.5** Issue Revised Benefit Determination Letter | 03/30/15 | **Retitled and revised** to remove references to and processing steps for corrected BDLs (in accordance with policy 5.8-1 Benefit Corrections). |
| **Process 19.6** Issue Limited-Scope BDLs | 03/30/15 | **Revised** to indicate that limited-scope BDLs may be used after (as well as before) the final BDL to address certain issues, and to reference policy 5.8-1 Benefit Corrections. |
| **Process 19.9** Resources for Benefit Determination Letters | 08/28/15 | **Added** Policy 5.4-10 Small Benefit Payments. |
| | 03/30/15 | **Removed** *eALG 410 series Corrected BDL*. |
| | 11/30/12 | **Revised** to correct a policy reference. |
| **Process 20.1** Respond to Acknowledgment of Appeal or Extension Request | 09/26/13 | **Revised** to note that benefits processed while an appeal is pending are to be based on the most recent BDL, not a previous one; and to reformat the section. |
| **Process 20.2** Respond to Appeal Closing Memo | 08/28/15 | **Removed** references to Corrected BDLs (eALG 410). |
| **Process 20.3** Respond to Appeals Division Referral | 08/28/15 | **Removed** references to Corrected BDLs (eALG 410). |
| **Process 20.5** Act on Notice of Similarly Situated Participants | 08/28/15 | **Removed** references to Corrected BDLs (eALG 410). |

# Processes 21–23

**11/20/2015**

**Processes 21–23 Table**

| Process | Date | Change |
|---|---|---|
| **Process 21** Overview for Plan Closing | 06/27/13 | **Revised** to allow for plans with 100 or fewer participants to be referred for closing once 45 days have elapsed since the last BDL was issued. |
| **Process 21.2** Check Participant BDL Status | 09/26/13 | **Revised** to remove step to ensure help letters have been sent in efforts to locate participants. |
| | 06/27/13 | **Revised** to allow for plans with 100 or fewer participants to be referred for closing once 45 days have elapsed since the last BDL was issued. |
| **Process 21.4** Check Completeness of Participant Records on PBGC Image Viewer and Spectrum | 03/30/15 | **Removed** an obsolete step on removing access to Image Viewer files for PICS participants, and to replace a reference to PICS with Conflict of Interest. |
| **Process 21.5** Prepare Plan History | 06/27/13 | **Revised** to clarify that LCWG references are to the BAPD Large Case Working Group (BAPD LCWG). |
| | 08/30/12 | **Revised** to clarify memoranda references. |
| **Process 22.2** Review Closed Plan | 03/30/15 | **Revised** to replace a reference to PICS with Conflict of Interest procedures. |

Top of Page

# Technical Procedures 1–10

**01/31/2017**

**Technical Procedures 1–10 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 1** Customer E-Mail Management | 08/30/12 | **Added** new section to manual. |
| **TP 1** Identify Controlled Group | 03/29/12 | **Removed** from the manual since BAPD no longer performs this function. |
| **TP 2** Overview for Administrative Correction of Benefit Overpayments | 03/30/15 | **Removed** the reference to written demand for payment (letter of indemnification). |
| **TP 2** Administrative Correction of Benefit Overpayments | 04/30/12 | **New** section added to consolidate procedures for correcting overpayments by administrative correction, benefit suspension, ACH reclamation, and written demand for payment (letter of indemnification). |
| **TP 2** Identify Ability to Fund Plan | 03/29/12 | **Removed** from the manual since BAPD no longer performs this function. |
| **TP 2.2** Suspend Benefits to Correct Overpayment | 03/27/14 | **Revised** to clarify that the procedure applies to both duplicate payments and overpayment due to death. |
| **TP 2.3** Initiate ACH Reclamation | 09/30/16 | **Updated** with reference to latest version of *PLUS Web Manual*. |
| | 06/27/13 | **Added** note to refer requests for non-benefit payments to RSD/BPB for processing. |
| | 08/30/12 | **Revised** to reference *PLUS Web Manual*. |
| **TP 2.4** Initiate Written Demand for Payment (Letter of Indemnification) | 03/30/15 | **Removed** from the manual. |
| | 06/27/13 | **Added** note to refer requests for non-benefit payments to RSD/BPB for processing. |
| | 08/30/12 | **Revised** to reference *PLUS Web Manual*. |
| **TP 2.4** Resources for Administrative Correction of Benefit Overpayments | 09/30/16 | **Updated** with reference to latest version of *PLUS Web Manual*. |
| | 03/30/15 | **Renumbered** from 2.5.<br>**Removed:**<br>• *Letter of Indemnification*<br>• *Letter of Indemnification Instructions*<br>• *Sample Letter of Indemnification* |
| **TP 2.5** Resources for Administrative Correction of Benefit Overpayments | 08/30/12 | **Revised** to reference *PLUS Web Manual*. |
| **TP 3** Plan Expenses | 03/30/15 | **Revised** in entirety to reflect updates based on the interim procedures issued by e-mail on 12/31/14 and subsequent developments to change the routing and |

| | | |
|---|---|---|
| | | approval process for invoice payments; to merge the processes for payments from the Trust Fund and the Revolving Fund; to require use of the revised and expanded *Concurrence to Pay Plan Expenses* and the new transmittal slip for all invoices; and for various edits. |
| | 09/26/13 | **Renamed** from TP 3 Manage Plan Related Termination Expenses. |
| **TP 3.** Overview for Plan Expenses | 09/26/13 | **Revised** to reflect the new procedure title and process. |
| **TP 3.1** Pay Plan Expenses | 09/26/13 | **Revised** to require that invoices for plan expenses be tracked on a spreadsheet; that a new checklist be completed for each invoice, and approved based on the amount and cumulative total of invoices received; that a new concurrence memo to the BAPD Deputy Director be prepared for payment of an invoice for a plan with cumulative invoices of more than $50,000; to clarify imaging requirements; and to make various other clarifications and edits. |
| **TP 3.2** Resources for Plan Expenses | 09/26/13 | **Revised** to reflect the new procedure title, and to add the *Concurrence to Pay Plan Expenses* and *Plan Expense Invoice Payment Checklist*. |
| **TP 4** Participant Addresses and EDD Elections - Overview | 08/28/14 | **Revised** to clarify that addresses are not changed until verified, and for various miscellaneous edits. |
| | 08/30/12 | **Revised** to address the Outbound Call Campaign administered by the DMC. |
| **TP 4.1** Process Returned Mail for Address Changes | 08/28/14 | **Revised** to remove redundant detail and obsolete references, and for various miscellaneous edits; and to completely revise TP 4.1B Verify Participant Addresses with the new process using the *Address Verification Letter*. |
| | 08/30/12 | **Revised** to clarify the DMC's processes, and to remove references to the LexisNexis locator tool. |
| **TP 4.1B** Verify Participant Addresses | 03/29/12 | **Revised** to consolidate and reorder the processing steps so that the *Participant Address Search Summary Memo* is prepared after (not before) the LexisNexis search; to remove the guidelines table; and for miscellaneous edits. |
| **TP 4.2** Update Participant Addresses | 08/28/14 | **Revised** to remove TP 4.2C Update Participant Address Based on Notification to SSC for obsolescence; and for various clarifications and miscellaneous edits. |
| | 06/27/13 | **Revised** to state the customer's e-mail address is to be requested or confirmed and updated in CRM, if available. |
| | | **Revised** to indicate that the payee's |

| | | |
|---|---|---|
| **TP 4.3** Make or Change EDD Elections | 06/27/13 | name must be on the account receiving payments by electronic direct deposit, and that the customer's e-mail address is to be requested or confirmed and updated in CRM, if available. |
| | 08/30/12 | **Revised** to clarify the DMC's processing of address changes based on whether the request is from the participant or authorized representative. |
| **TP 4.4** Administer the Outbound Call Campaign | 08/30/12 | **New** section added to manual. |
| **TP 4.4** Resources for Participant Addresses and EDD Elections | 03/29/12 | **Added:**<br>*Participant Address Search Summary Memo* |
| **TP 4.5** Resources for Participant Addresses and EDD Elections | 08/28/14 | **Revised** to add *Address Verification Letter*, and remove references to obsolete guidance. |
| **TP 5.1B** Process Report of Death by Mail | 11/30/12 | **Revised** to correct references to steps within the procedure. |
| **TP 5.4A** Determine Whether Continuing Benefits are Due | 11/20/15 | **Revised** to reference TP 20.5E Spousal Consent in cases where the surviving spouse challenges the benefit form. |
| | 11/21/14 | **Revised** with minor edits to clarify language. |
| **TP 5.4B** Determine Contingent Annuitant | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.5A** Determine Eligibility for Preretirement Survivor Annuities | 11/21/14 | **Revised** with minor edits to clarify language. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.5B** Issue Notification of Qualified Preretirement Survivor Annuities | 12/22/16 | **Removed** steps to call the surviving spouse within 15 days of mailing the benefit application if it has not been received. |
| | 08/28/15 | **Revised** to note that an application is not required if the total payment with interest is less than $200 and PBGC has reliable and sufficient information on the beneficiary. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| **TP 5.5C** Determine Pre-Retirement Equity Act Survivor Annuities | 12/22/16 | **Removed** the step to call the surviving spouse within 15 days of mailing the benefit application if it has not been received. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.6B** Notify Beneficiary of Other Amounts Owed | 11/20/15 | **Revised** to clarify the letter to send a surviving spouse depending on whether |

| | | |
|---|---|---|
| | | the payment is rollover eligible. |
| | 08/28/15 | **Revised** to note that an application is not required if the total payment with interest is less than $200 and PBGC has reliable and sufficient information on the beneficiary. |
| | 03/28/13 | **Revised** to remove the note concerning taxation of lump sums of less than $200, since it is not relevant to this procedure. |
| | 11/30/12 | **Revised** the note to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.6C** Determine Lump-Sum Death Benefits | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.7A** Determine Beneficiary when Date of Death is on or after June 1, 2002 | 09/26/13 | **Revised** to re move information about the Defense of Marriage Act (DOMA) and direct that situations involving same-sex marriages or civil unions be referred to OPSS. |
| | 04/30/12 | **Revised** extensively in accordance with updated Policy 8.6-1 and to emphasize use of the *Beneficiary Determination for Deaths on or after June 1, 2002* form to document the determination. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 5.7B** Determine Beneficiary when Date of Death is before June 1, 2002 | 11/21/14 | **Revised** with minor edits to clarify language. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 6** Overview for Recover Overpayments | 11/26/13 | **Revised** the Recovery Not Due to Death Summary Table to add references to specific procedures. |
| **TP 6.1** Perform Initial Recovery Actions | 09/30/16 | **Updated** with reference to latest version of *PLUS Web Manual*. |
| **TP 6.1A** Recovery Due to Benefit Determination Letter | 08/28/15 | **Removed** steps for requesting and referencing a recovery tracking number. |
| | 11/26/13 | **Revised** to remove mentions of write-offs for overpayments of less than $25. |
| **TP 6.1B** Recovery Due to Benefit Determination Letter (Overpayment Less than $1,000) | 11/26/13 | **Revised** to require that all debts that will be written off, regardless of the amount, be referred to the Recovery Team in RSD. |
| | 03/28/13 | **Revised** to require that an acknowledgment e-mail from the eCARF system be imaged to the participant file within five days of the acknowledgment. |
| | 08/30/12 | **Revised** to remove the *Debt Write-off* |

| | | |
|---|---|---|
| | | *Memo* and add steps to print the Debt Write-Off/Discharge eCARF acknowledgment e-mail and image to file. |
| **TP 6.1C** Recovery Due to Death | 08/28/15 | **Removed** the step to advise RSD about full payment if a tracking number was issued. |
| | 03/30/15 | **Removed** steps concerning written demand for payment (letter of indemnification). |
| | 08/28/14 | **Revised** to clarify that a written demand for payment should not be attempted if the reclamation fails for reasons other than insufficient funds. |
| | 11/26/13 | **Revised** to require that all debts that will be written off, regardless of the amount, be referred to the Recovery Team in RSD. |
| | 06/27/13 | **Added** notes stating that 1) requests for non-benefit payments are to be referred to RSD/BPB, and 2) if the beneficiary is due a back payment and is known to be the debtor for the post-death payments, the back payment may be offset by the debt. |
| | 03/28/13 | **Revised** to clarify that an acknowledgment e-mail from the eCARF system be imaged to the participant file within five days of the acknowledgment (not from making the determination). |
| | 11/30/12 | **Revised** to refer users to death processing procedures instead of a following step if the stop payment on a check is successful. |
| | 08/30/12 | **Revised** to remove the *Debt Write-off Memo*, add steps to print the Debt Write-Off/Discharge eCARF acknowledgment e-mail and image to file, and to remove the step to send the eALG 515 to the debtor. |
| **TP 6.1D** Other Recovery Situations | 11/26/13 | **Revised** to require that all debts that will be written off, regardless of the amount, be referred to the Recovery Team in RSD. |
| | 03/28/13 | **Revised** to require that an acknowledgment e-mail from the eCARF system be imaged to the participant file within five days of the acknowledgment. |
| | 08/30/12 | **Revised** to add examples of situations where the procedure may apply; to add that requests for installment payments, debt waivers, and other non-routine requests are to be referred to OPSS; to remove the *Debt Write-off Memo*; and to add steps to print the Debt Write-Off/Discharge eCARF acknowledgment |

| | | |
|---|---|---|
| | | e-mail and image to file. |
| **TP 6.2** Process Recovery Referrals | 09/30/16 | **Updated** with reference to latest version of *PLUS Web Manual*. |
| | 08/30/12 | **Revised** to reference *PLUS Web Manual*. |
| | 04/30/12 | **Renamed, renumbered** and **revised** to require that debts of $10,000 or more be referred to OGC, that requests for administrative review be referred to the BPB Branch Chief, to consolidate procedures for processing requests for debt waivers and installment payment plans, and to add a separate section on processing installment payment agreements, which must generally be for no more than 36 months (from 60). |
| **TP 6.2A** Process Recovery Referrals | 08/28/15 | **Removed** the step to provide a tracking number to a TPD/FBA/PVA requestor. |
| | 03/27/14 | **Revised** to replace completing a write-off memo with documenting the tracking tool and imaging the closeout report; and to enable the BPB Branch Chief to apply discretion in writing off debts of $200-1,000. |
| | 11/26/13 | **Revised** with a new step to write off all debts of less than $25, and to use discretion in writing off debts of up to $200 if it appears the recovery cost would exceed the debt amount. |
| | 06/27/13 | **Added** note indicating that new cases are added to the monthly report to FOD, and to reference new TP 6.4F Monthly Recovery Report to FOD. |
| | 03/28/13 | **Revised** to require that cases be referred to OGC only after the appeal period expires. |
| | 08/30/12 | **Revised** with new steps to include the the Debt Write-Of/Discharge eCARF when writing off a debt, to require research on debts over $10,000, to address the impact of partial payments on the total debt amount, to distinguish processing according to when the payee was notified of the debt, to require including a recommendation when referring a request for administrative review, and to make general clarifications and edits. |
| **TP 6.2B** Process Debt Waiver and Payment Plan Requests | 08/30/12 | **Revised** to require including a recommendation when referring a debt over $5,000 to BPB Branch Chief. |
| **TP 6.2C** Use Subpoena to Identify Payment Recipient | 03/27/14 | **Revised** to replace completing a write-off memo with documenting the tracking tool and imaging the closeout report. |
| | 06/27/13 | **Added** step to issue the *Request for Funds Letter* if the bank reports that |

| | | |
|---|---|---|
| | | funds are available (whether or not debtor is identified). |
| | 03/28/13 | **Revised** to state that when issuing a subpoena, to include a CRM 516CC Customer Communication Letter - Recovery Use ONLY if the receiving bank is known to frequently request a customer communication letter. |
| | 08/30/12 | **Revised** with new steps for following up with the bank, to address situations where funds are not available, and to include the the Debt Write-Off/Discharge eCARF when writing off a debt. |
| **TP 6.2D** Process Estates, Trusts, and Other Legal Entities | 03/27/14 | **Revised** to replace completing a write-off memo with documenting the tracking tool and imaging the closeout report. |
| | 08/30/12 | **Revised** to address partial payments and to add a new step to complete the Debt Write-Off/Discharge eCARF when writing off a debt. |
| **TP 6.2E** Process Installment Payment Agreements | 03/27/14 | **Revised** to replace completing a write-off memo with documenting the tracking tool and imaging the closeout report. |
| | 08/30/12 | **Revised** to remove the requirement to not allow more than 36 months for a payment plan unless so directed by OGC. |
| **TP 6.2F** Monthly Recovery Report to FOD | 08/28/15 | **Revised** to require delivery of the *Recovery of Benefit Overpayments (death) A/R Report* to FOD/GAB by the fifth (from the third) business day of the month. |
| | 06/27/13 | **Added** new section. |
| **TP 6.3** Resources for Recover Overpayments | 09/30/16 | **Updated** with reference to latest version of *PLUS Web Manual*. |
| | 09/26/13 | **Removed** *eALG 514 Advice to Debtor.* |
| | 06/27/13 | **Added** *Request for Funds Letter.* |
| | 04/30/12 | **Renumbered** and **revised** to remove indemnification letters since the process was moved to TP 2, and to add new eALG letters *522 Cover Letter for Form 722* and *515 Request for Overpayment under $1,000 (Recovery)*. |
| **TP 7** Overview for Recoupment | 04/30/12 | **Renamed** section and revised to reflect that administrative correction is no longer covered in this section. |
| **TP 7** Recoupment | 04/30/12 | **Renamed** section to reflect that administrative correction is no longer covered in this section. |
| **TP 7.1A** Determine Net Overpayment | 04/30/12 | **Revised** with updated reference to administrative correction procedures. |
| **TP 7.1B** Determine Exceptions to the 10% Recoupment Reduction Limit | 08/30/12 | **Revised** to clarify section D. Termination Benefits in Excess of the |

| | | |
|---|---|---|
| | | Maximum Insurance Limitation (MIL) and add the *Worksheet for Application of Variance on 10% Cap on Recoupment*. |
| **TP 7.3** Resources for Recoupment | 04/30/12 | **Renamed** and **renumbered**. |
| **TP 8.1** Process Check | 03/30/16 | **Removed** the requirement to use a specific shipping service. |
| **TP 10** Overview for Income Verification Requests | 03/30/15 | **Revised** to mention that annuitants can request and print income verifications from MyPBA. |
| | 08/30/12 | **Revised** to address the DMC's role; to update the criteria for perfected requests to include written consent that is signed and dated, and that a third-party requestor need not be a supervisor or manager; and to state that a participant's request is not to be denied but handled as non-perfected. |
| | 03/29/12 | **Revised** to acknowledge that the process also applies to the TPDs. |
| **TP 10** Workflow for Income Verification Requests | 11/26/13 | **Revised** to address current processing. |
| **TP 10.1** Respond to Income Verification Requests Received by TPD/PVA/FBA | 11/20/15 | **Corrected** internal step references. |
| | 03/30/15 | **Added** a step to inform callers receiving annuities that they can request and print income verifications from MyPBA. |
| | 09/26/13 | **Revised** to remove the requirement for a payee to send a written request an IV letter to the payee, and for minor edits. |
| | 08/30/12 | **Revised** to clarify the processing flow, to add a step to verify the requestor's identity, and to emphasize that requests must be in writing. |
| | 03/29/12 | **Renamed** and **revised** to acknowledge that the process also applies to the TPDs. |
| **TP 10.4** Resources for Income Verification Requests | 09/26/13 | **Removed** *PBGC Income Verification Form.* |

# Technical Procedures 11–20

**01/31/2017**

**Technical Procedures 11–20 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 12.1A** Single Monthly Check - Determine Fraud/Forgery | 03/30/15 | **Revised** to require that correspondence intended for PBGC's paying agent be routed through the BPB Management Analyst. |
| **TP 12.1B** Multiple Monthly Checks - Determine Fraud/Forgery | 03/30/15 | **Revised** to require that correspondence intended for PBGC's paying agent be routed through the BPB Management Analyst. |
| **TP 12.1C** Lump Sums, Special Checks – Determine Fraud/Forgery | 03/30/15 | **Revised** to require that correspondence intended for PBGC's paying agent be routed through the BPB Management Analyst. |
| **TP 13** Overview for Domestic Relations Orders and State Agency Orders | 11/30/12 | **Revised** to summarize changes effective 11/01/12. |
| **TP 13.1** Review Domestic Relations Order from Prior Plan Administrator | 11/30/12 | **Revised** to add step to create IPS and Spectrum records for the alternate payee; to clarify handling of a QDRO previously submitted to the plan administrator but not forwarded to PBGC; to indicate that a DRO is to be disqualified if the participant previously received an lump-sum distribution; to clarify the time a hold is placed on a participant's being put into pay status according to the status of the DRO; to add a step to place a 60-day hold on a pending participant application for benefits if a state order is received; to list additional situations where a DRO should be referred to OPSS; and to indicate that a copy of the QDRO is not to be sent without prior approval from OPSS, OCC or Disclosure Division. |
| **TP 13.1B** Update Spectrum for Qualified Domestic Relations Orders | 09/26/13 | **Revised** to implement the new process for obtaining approval on and routing the *PBGC QDRO Deduction Instructions to Paying Agent*. |
| **TP 13.2** Review Domestic Relations Orders | 11/30/12 | **Revised** to add step to create IPS and Spectrum records for the alternate payee; to clarify handling of a QDRO previously submitted to the plan administrator but not forwarded to PBGC; to indicate that a DRO is to be disqualified if the participant previously received an lump-sum distribution; to clarify the time a hold is placed on a participant's being put into pay status according to the status of the DRO; to add a step to place a 60-day hold on a pending participant application for |

| | | |
|---|---|---|
| | | benefits if a state order is received; to list additional situations where a DRO should be referred to OPSS; and to indicate that a copy of the QDRO is not to be sent without prior approval from OPSS, OCC or Disclosure Division. |
| **TP 13.3** Implement Qualified Domestic Relations Orders | 11/30/12 | **Revised** to add a step to create IPS and Spectrum records for the alternate payee, and to add a step to issue a benefit application to an alternate payee. |
| **TP 13.4** Make Qualified Domestic Relations Order Payments | 11/30/12 | **Revised** to add new step to check IPS for a copy of the QDRO before proceeding, and to follow up as needed; to add a new step for addressing inquiries on external payment agreements from interested parties; to distinguish payment processing based on whether a BDL has been issued, and if so on whether there is an appeal; to distinguish handling of a shared payment order if the participant is reported deceased; and to note that payments to alternate payees are not to be suspended because the participant cannot be paid or there is no separate Spectrum record for the alternate payee. |
| **TP 13.4B** Make Qualified Domestic Relations Order Payments in Spectrum | 09/26/13 | **Revised** to implement the new process for obtaining approval on and routing the *PBGC QDRO Deduction Instructions to Paying Agent*. |
| **TP 13.5** Release Benefits for Domestic Relations Order | 11/30/12 | **Revised** to clarify that PBGC does not suspend any portion of a payee's benefit upon receipt of a draft DRO or California joinder, but does prohibit a participant from entering pay status while a signed or draft DRO or other state order is under review. |
| **TP 13.6** Resources for Domestic Relations Orders and State Agency Orders | 11/30/12 | **Added** new eALG letters used in the section. |
| **TP 14** §436 Benefit Limitations | 11/21/14 | **Revised** throughout to indicate that ASD, not OPSS, evaluates plans impacted by §436 of the Internal Revenue Code. |
| | 08/30/12 | **New** section replaces *§436 Benefit Limitations Interim Guidance.* |
| **TP 14.1** Conduct §436 Evaluation | 03/30/15 | **Renamed and revised** to consolidate former sections TP 14.1 Conduct Preliminary §436 Evaluation and TP 14.2 Request Further §436 Evaluation, reflecting that the actuary now completes and submits the evaluation for review. |
| **TP 14.2** Summary of §436 Provisions | 03/30/15 | **Renumbered** from 14.3. |
| **TP 14.2** Request Further §436 Evaluation | 03/28/13 | **Revised** for changes to information PBGC collects and evaluates for §436 evaluations based on MAP-21. |
| **TP 14.3** Resources for §436 Benefit | 03/30/15 | • **Renumbered** from 14.4. |

| | | |
|---|---|---|
| Limitations | | • **Added:** *§436 Evaluation*.<br>• **Removed:** *Preliminary §436 Evaluation* |
| **TP 14.3** Summary of §436 Provisions | 03/27/14 | **Revised** to list the pending IRS notice about the Windsor decision, with regard to the repeal of the Defense of Marriage Act. |
| | 03/28/13 | **Revised** the table to add an Other Guidance section with rows for IRS Notice 2012-61, WRERA, and Pension Relief Act of 2006; to add additional detail under rows for 436(b) and 436(c); and to add examples for 1.436-1(k)(2). |
| **TP 14.4** Resources for §436 Benefit Limitations | 03/28/13 | **Added** IRS Notice 2012-61 Guidance on Pension Funding Stabilization under the Moving Ahead for Progress in the 21st Century (MAP-21) |
| **TP 16** Plan and Participant File Maintenance | 08/30/12 | **Revised** throughout to clarify language concerning TPD's ability to import documents to IPS, to provide examples of scanning requests forms, to make minor corrections to processing steps, to require that mail be processed the same business day it is received, to add new section (16.5) for handling requests for return of proof documents, and to indicate that paper records are to be retained for 90 days after imaging. |
| **TP 16** Overview for Plan and Participant File Maintenance | 08/28/14 | **Revised** to clarify the purpose for maintaining the files and for various other clarifications. |
| | 09/26/13 | **Revised** to mention that users must request the DMC to perform certain IPS functions (Advanced Functions) beginning the first quarter of FY 2014 once this functionality will then be is no longer available to general users. |
| | 06/27/13 | **Revised** to include information about archiving electronic sources of plan information. |
| | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual*. |
| **TP 16.1** Maintain Plan File | 08/30/16 | **Revised** instructions on having electronic documents imaged with a reference to TP 16.4 Request Advanced Functions for IPS Files. |
| | 03/30/15 | **Removed** the reference to the *IPS Scanning Request Form for Participant Documentation Sample*. |
| | 08/28/14 | **Revised** to remove TP 16.1A Image Documents to the Plan File and renumber TP 16.1B Image Documents to the Plan File as 16.1; to clarify that FBAs send plan file documents to a federal |

| | | |
|---|---|---|
| | | case team member to image; to reference the mailbox for requesting advanced functions; to clarify the process for retaining work papers; and for minor edits. |
| | 09/26/13 | **Revised** to remove mention of special requests since these are now handled as Advanced Functions. |
| | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual*. |
| **TP 16.1A** Image Documents to the Plan File | 09/26/13 | **Revised** to state that requests to have certain functions (known as Advanced Functions) performed in IPS must be submitted to the DMC beginning the first quarter of Fiscal Year 2014 once this functionality is no longer available to general users. |
| **TP 16.1B** Submit Plan File Documents to the DMC for Imaging | 09/26/13 | **Revised** to reference new TP 16.4 Request Advanced Functions for IPS Files for special requests. |
| **TP 16.2** Maintain Participant File | 03/30/15 | **Revised** to replace steps on imaging electronic files with a cross-reference to TP 16.4, and to replace the *IPS Scanning Request Form for Participant Documentation Sample* with the actual template. |
| | 08/28/14 | **Revised** to remove TP 16.2A Image Documents to the Participant File and renumber TP 16.2B Submit Participant File Documents to the DMC for Imaging as 16.2; to reference the mailbox for requesting advanced functions; and for minor edits. |
| | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual*. |
| | 03/29/12 | **Revised** to specify that both the IPS Participant Document Type and High-Level Document Type are to be used when imaging documents to the participant file. |
| **TP 16.2A** Image Documents to the Participant File | 09/26/13 | **Revised** to reference new TP 16.4 Request Advanced Functions for IPS Files for special requests. |
| **TP 16.3** Image Files to IPS | 08/28/14 | **Revised** for minor edits. |
| | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual*. |
| | 03/29/12 | **Revised** to specify that both the IPS Participant Document Type and High-Level Document Type are to be used when imaging documents to the participant file. |
| **TP 16.4** Request Advanced Functions for IPS Files | 03/30/15 | **Revised** to mention scanning electronic documents as an advanced function. |
| | 08/28/14 | **Revised** for minor edits. |
| | | |

| | | |
|---|---|---|
| | 09/26/13 | **Added** new section to manual. |
| **TP 16.4** Archive Electronic Files | 06/27/13 | **Added** new section. |
| **TP 16.5** Archive Electronic Files | 03/30/15 | **Revised** to replace the *Sample Corresponding Readme.txt File* with the *Readme File Template*, with related changes to instructions. |
| | 09/26/13 | **Renumbered** from 16.4; **revised** to correct the list of Archive groups. |
| **TP 16.5** Process Participant Correspondence | 06/27/13 | **Renumbered** from 16.4. |
| **TP 16.6** Process Participant Correspondence | 09/26/13 | **Renumbered** from 16.5. |
| **TP 16.6** Process Request to Return Proof Documents | 06/27/13 | **Renumbered** from 16.5. |
| **TP 16.6** Resources for Plan and Participant File Maintenance | 11/30/12 | **Added** *BAPD Records Management Manual*. |
| **TP 16.7** Process Request to Return Proof Documents | 09/26/13 | **Renumbered** from 16.6. |
| **TP 16.7** Resources for Plan and Participant File Maintenance | 06/27/13 | **Renumbered** from 16.6; **added** *Sample Data Elements and Sources List* and *Sample Corresponding Readme.txt File*. |
| **TP 16.8** Resources for Plan and Participant File Maintenance | 03/30/15 | • **Added:**<br>  • *IPS Scanning Request Form for Participant Documentation*<br>  • *Readme File Template*<br>• **Removed:**<br>  • *IPS Scanning Request Form for Participant Documentation Sample*<br>  • *Sample Corresponding Readme.txt File* |
| | 09/26/13 | **Renumbered** from 16.7. |
| **TP 17.1** Refer Policy and Procedures Questions | 03/27/14 | **Revised** to replace COTR with COR. |
| **TP 18** Prepare Files for Shipment | 08/30/12 | **Revised** throughout to completely revise the DMC's role, to add steps for the BAPD Records Coordinator, and to remove language concerning STDC's processing. |
| **TP 18.1** Ship to FRC from DMC | 08/28/14 | **Revised** to reflect department title change from FASD (Facilities and Services Department) to WSD (Workplace Solutions Department). |
| | 09/26/13 | **Revised** to replace the reference to PBGC records management interim procedures with the *BAPD Records Management Manual*. |
| **TP 18.2** Resources for Prepare Files for Shipment | 09/26/13 | **Revised** to replace the reference to PBGC records management interim procedures with the *BAPD Records Management Manual*. |
| | | **Revised** to add a paragraph advising |

| | | |
|---|---|---|
| **TP 19** Overview for Woodwork Customers | 08/28/14 | that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **TP 19** Woodwork Customers | 09/26/13 | **Revised** in entirety to add a new telephone questionnaire, require more proof from the customer that a benefit may be due, require more certainty before issuing a non-member BDL, and reformat according to current standards. |
| **TP 19.1** Research Participant Entitlement Eligibility | 11/26/13 | **Revised** to clarify that tax returns may be needed for years following termination of employment (not plan termination), and to add a link to the *Woodwork Customer Telephone Questionnaire.* |
| **TP 19.2** Resources for Woodwork Customers | 11/26/13 | **Added** a link to the *Woodwork Customer Telephone Questionnaire.* |
| **TP 20** Unpaid Plan Application for Annuity Payments Review Table | 03/30/15 | **Removed** from the manual. |
| | 11/21/14 | **Revised** to stress that if someone other than the participant signs the application, PBGC must recognize the individual's authority (for example, as a power of attorney) to do so. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| | 11/30/12 | **Revised** to add a cross-reference to plan assumption procedures for when the annuity starting date is before DOTR. |
| **TP 20** Unpaid Plan Application for Lump Sum Payment Review Table | 03/30/15 | **Removed** from the manual. |
| | 11/21/14 | **Revised** to stress that if someone other than the participant signs the application, PBGC must recognize the individual's authority (for example, as a power of attorney) to do so. |
| | 08/30/12 | **Revised** to address the impact of section 436 on processing these applications. |
| **TP 20** Form 700 Participant Application for Pension Benefits Review Table | 09/30/16 | **Revised** to state that a participant who is eligible for either early unreduced retirement benefits or a level benefit may elect an ASD retroactive to the earliest allowable retirement date at any time, regardless of previous notifications and subject to working retirement rules. |
| | 08/28/15 | **Revised** to require that spousal consent be based on an informed decision, and that the payee's name be on the EDD account. |
| **TP 20** Form 700 Annuity Application Review Table | 03/28/13 | **Revised** to indicate that users are to request, not require, and residential address when a post office box is |

| | | |
|---|---|---|
| | | provided at the mailing address; and to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| **TP 20** Form 705 Beneficiary Application for Pension Benefits Review Table | 08/28/15 | **Revised** to require that the payee's name be on the EDD account. |
| **TP 20** Form 706 Beneficiary Application for Pension Benefits – OF Review Table | 09/30/16 | **Revised** to state that a beneficiary may begin receiving benefits retroactive to the later of the month following the participant's death and the participant's earliest allowable retirement date and may elect it at any time, regardless of any previous notifications. |
| **TP 20** Form 721 Application for Lump-Sum Payment -- Non-Spouse Beneficiary or Estate Review Table | 11/21/14 | **Revised** to stress that if someone other than the participant signs the application, PBGC must recognize the individual's authority (for example, as a power of attorney) to do so. |
| **TP 20** Overview for Benefit Payments | 08/28/15 | **Clarified** the example of a pre-DOPT plan application for benefits to mean an annuity application. |
| | 06/27/13 | **Removed** a statement that small benefit payments may be made without a benefit application in some instances. |
| **TP 20.1** Determine Eligibility and Issue Application | 11/20/15 | **Revised** to state that an estimated *de minimis* benefit is payable in a lump sum if the individual reaches EPRD and applies, even if working for the DOPT employer; and to contact Ask OPSS if a participant who has not reached EPRD requests immediate payment claiming hardship. |
| | 08/28/15 | **Clarified** that a final *de minimis* lump-sum benefit is payable after the BDL is issued once the payee reaches EPRD, even if the payee is still employed with the DOPT employer. |
| | 11/21/14 | **Revised** to remove the requirement for written approval to pay a lump sum before the completion of the participant database, or to delay payment after completion of the database; to specify that an estimated *de minimis* benefit is payable if the participant reaches EPRD and applies for benefits, while a final *de minimis* benefit is payable in a lump sum after the BDL is issued, even if the participant continues to work for the DOPT employer, before NRD; and to clarify that annuity benefits may paid as soon as a complete and valid application is filed, regardless of whether the benefit estimation tool is complete. |
| | 03/28/13 | **Revised** to remove instructions for |

| | | |
|---|---|---|
| | | paying lump sums of less than $200 without an application, and to note that if all payments to an individual payee in the same tax year total less than $200, PBGC does not withhold federal income tax. |
| | 11/30/12 | **Revised** to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required. |
| **TP 20.1A** Determine Eligibility for Benefit Payments | 08/28/15 | **Removed** the reference to pre-DOPT lump-sum plan applications. |
| **TP 20.1B** Act on Individual Eligible for Lump Sum | 08/28/15 | **Revised** to note that an application is not required if the total payment with interest is less than $200, and to clarify that if the payment is estimated the payee must have reached EPRD to receive a lump sum. |
| | 11/21/14 | **Revised** to add that participant must have reached the earliest PBGC retirement date to be eligible. |
| | 08/28/14 | **Revised** to clarify the process and remove obsolete letter references. |
| **TP 20.1C** Act on Individual Eligible for Annuity | 12/22/16 | **Removed** the step to call the customer within 15 days of mailing the benefit application if it has not been received. |
| | 09/30/16 | **Revised** to state that a participant who is eligible for either early unreduced retirement benefits or a level benefit may elect an ASD retroactive to the earliest allowable retirement date at any time regardless of previous notifications of eligibility and subject to working retirement rules; and to reference TP 33 Disability Benefit Processing. |
| | 11/21/14 | **Revised** to clarify that annuity benefits may paid as soon as a complete and valid application is filed, regardless of whether the benefit estimation tool is complete. |
| | 09/26/13 | **Revised** to correct typographical error. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date, and for minor edits. |
| | 11/30/12 | **Revised** to add a note stating that a payee has until 90 days after the BDL date to request a retroactive early unreduced retirement date if currently eligible, or prospectively if the EURD is a future date. |
| **TP 20.2A** Solicit Applications for Participants Near Normal or Early | 08/28/14 | **Revised** the title to include the early unreduced retirement date; to add a step |

| | | |
|---|---|---|
| Unreduced Retirement Date | | to initiate letters twice annually; to reference new eALG letters 500NRD and 500EURD; and for general edits. |
| **TP 20.2A** Solicit Applications for Participants Near Normal Retirement Date | 03/28/13 | **Revised** to remove instructions for paying lump-sums of less than $200 without an application. |
| | 11/30/12 | **Revised** to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required. |
| **TP 20.2B** Solicit Application for Participants Near Required Beginning Date | 08/28/14 | **Revised** to include introductory language about required beginning dates; to add a schedule for running reports and notifying affected participants using the eALG 500RBD; and to require follow-up as needed after 30 days. |
| | 03/28/13 | **Revised** to remove instructions for paying lump-sums of less than $200 without an application. |
| | 11/30/12 | **Revised** to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required. |
| **TP 20.3A** Review Annuity Benefit Application | 09/30/16 | **Revised** to distinguish OBA's goal to process benefit applications as early as possible from the 90-day processing requirement. |
| | 08/28/15 | **Revised** to advise that if the participant elects an optional benefit form requiring spousal consent, the benefit statement must reflect the forms and amounts payable at ARD to ensure the spouse made an informed decision. |
| | 09/29/14 | **Revised** to require: use of new eALG letters specific to benefit application processing, and specific response times; keeping the CRM service request for benefit applications open until the benefit is paid or the application expires; reviewing participant IPS files for missing information; and payment within 90 days of receipt of a complete application. |
| | 06/27/13 | **Revised** to state the customer's e-mail address is to be updated in CRM, if provided. |
| | 03/29/12 | **Revised** with new step to refer to TP 44 Foreign Language Services if a proof document needs translation, and to request a clear copy of an illegible proof document. |
| **TP 20.3B** Request Missing Information for Annuity Benefit Application | 09/30/16 | **Revised** to remove usage of *eALG 530F Follow-up for Additional Documentation/Information - Benefit* |

| | | |
|---|---|---|
| | | *Application.* |
| | 09/29/14 | **Revised** to require: use of new eALG letters specific to benefit application processing, and specific response times; reminder letters to customers for missing information; keeping the CRM service request for benefit applications open until the benefit is paid or the application expires; notification of a stale-date application; and payment within 90 days of receipt of a complete application. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| **TP 20.3C** Issues Annuity Payment | 11/21/14 | **Revised** with a new note to consult the actuary as needed to determine a beneficiary's benefit based on a joint-and-survivor percentage. |
| | 09/29/14 | **Revised** to require the payment advice letter to be sent within five business days of the payment cutoff date, and closure of the CRM service request after the payment is approved. |
| **TP 20.4** Process Lump-Sum Applications | 11/20/15 | **Revised** to clarify that an estimated *de minimis* lump-sum payment is payable once the payee reaches EPRD, even if still working for the DOPT employer; to contact Ask OPSS if a customer requests immediate payment before EPRD claiming hardship; and to state that a final *de minimis* lump sum is payable after the BDL has been issued regardless of whether the participant has reached EPRD or is still working for the DOPT employer. |
| | 08/28/15 | **Revised** to reference Policy 5.4-10 Small Benefit Payments, and to add guidance on paying small lump-sum payments without an application. |
| | 03/30/15 | **Corrected** an internal reference. |
| | 11/21/14 | **Revised** to remove the requirement for written approval to pay a lump sum before the completion of the participant database, or to delay payment after completion of the database; to specify that an estimated de minimis benefit is payable if the participant reaches EPRD and applies for benefits, while a final de minimis benefit is payable before NRD in a lump sum after the BDL is issued, even if the participant continues to work for the DOPT employer. |
| | | **Revised** to mention the Roth IRA as a |

| | | |
|---|---|---|
| **TP 20.4A** Review Lump-Sum Applications | 11/20/15 | rollover option, and to reference Appendix R 1.3 Lump-Sum or Non-Periodic Payment Tax Withholding and Reporting for guidance. |
| | 08/28/15 | **Revised** change the period in which the *Special Tax Notice Regarding PBGC Non-Periodic Payments* must be sent before the application filing date to 180 days (from 90), and to remove the reference to pre-DOPT lump-sum plan applications. |
| **TP 20.4A** Review Lump-Sum Benefit Application | 09/30/16 | **Revised** to distinguish OBA's goal to process benefit applications as early as possible from the 90-day processing requirement. |
| | 03/30/15 | **Revised** to state that unpaid plan applications for lump-sum payments are not to be honored (in accordance with policy 5.8-1 Benefit Corrections). |
| | 09/29/14 | **Revised** to require: use of new eALG letters specific to benefit application processing; reviewing IPS files for missing information; and payment within 90 days of receipt of a complete application. |
| **TP 20.4B** Request Missing Information for Lump-Sum Payment | 09/30/16 | **Revised** to remove usage of *eALG 530F Follow-up for Additional Documentation/Information - Benefit Application*, and to remove the note about the 90-day processing requirement due to redundancy. |
| | 09/29/14 | **Revised** to require: use of new eALG letters specific to benefit application processing and specific response times; keeping the CRM service request for benefit applications open until the benefit is paid or the application expires; notification of a state-dated application; and payment within 90 days of receipt of a complete application. |
| | 11/30/12 | **Revised** to remove references to the annuity starting date and spousal consent. |
| **TP 20.4C** Issue Lump-Sum Payment | 09/30/16 | **Revised** to remove the note about the 90-day processing requirement due to redundancy. |
| | 11/20/15 | **Revised** to reference Appendix R 1.3 Lump-Sum or Non-Periodic Payment Tax Withholding and Reporting. |
| | 08/28/15 | **Revised** to state that a payment of less than $200 including interest may not be rolled over. |
| | 03/30/15 | **Revised** to remove the reference to the interim procedures for processing Roth rollovers. |
| | | |

| | | |
|---|---|---|
| | 09/29/14 | **Revised** to require payment within 90 days of receipt of a complete application; the payment advice letter to be sent within five business days of the payment cutoff date; and closure of the CRM service request once the payment is approved. |
| | 06/27/13 | **Revised** to clarify the definition of a large back payment as as Large Reimbursement |
| **TP 20.5A** Discrepancies | 08/28/15 | **Removed** references to Corrected BDLs (eALG 410). |
| **TP 20.5B** Applications | 09/26/13 | **Revised** to direct that situations involving same-sex marriages or civil unions be referred to OPSS. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| **TP 20.5D** Marriage | 09/26/13 | **Revised** to direct that situations involving same-sex marriages or civil unions be referred to OPSS. |
| **TP 20.5E** Spousal Consent | 03/30/15 | **Revised** to distinguish a signature being notarized from being witnessed. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| **TP 20.5F** Lump Sums | 06/27/13 | **Revised** to remove the row in the Large Reimbursements Table addressing payments that do not meet LBR criteria. |
| | 03/28/13 | **Revised** to require an application for all large reimbursements. |
| | 11/30/12 | **Revised** to remove instructions to pay large reimbursements without an application. |
| **TP 20.5G** Payments before Trusteeship | 08/28/15 | **Revised** reference to the retitled document *Authorization to Pay Participants before Trusteeship*. |
| | 11/30/12 | **Revised** to clarify the benefits PBGC pays before trusteeship based on revised Policy 3.4-1 Benefit Payments Prior to Trusteeship; and to cross-reference the plan assumption procedures. |
| | 03/29/12 | **Revised** to clarify that PBGC pays back payments limited by the date the authorization memo permits pre-trusteeship payments; that an optional forms statement is to be included with a new application for benefits; and for miscellaneous edits. |

| | | |
|---|---|---|
| **TP 20.5I** Payments to Minor Children | 06/27/13 | **Revised** to address situations where a parental rights are terminated or a guardian is otherwise appointed, where a guardian or other party applies on a minor's behalf, and where the minor child requests or applies for benefits. |
| | 03/29/12 | **Revised** to clarify requirements for proof of guardianship, signatures, and where to mail payments. |
| **TP 20.5J** Disability Benefits | 09/30/16 | **Removed** from the manual since it was replaced by TP 33 Disability Benefit Processing. |
| **TP 20.5K** Slayer Exception | 03/29/12 | **Added** new section for handling cases in which the beneficiary is convicted for slaying the participant. |
| **TP 20.5L** Third Party Payment Requests | 08/28/15 | **Corrected** a reference to the holder of a power of attorney. |
| | 03/30/15 | **Added** this section, whose content was previously in Appendix R4. |
| **TP 20.6** Resources for Benefit Payments | 09/30/16 | **Revised** to remove *eALG 530F Follow-up for Additional Documentation/Information - Benefit Application.* |
| | 08/28/15 | • **Added:**<br>  • *Authorization to Pay Participants before Trusteeship*<br>  • Policy 5.4-10 Small Benefit Payments<br>• **Removed:**<br>  • *Authorization to Place Participants in Pay Status Prior to Trusteeship* |
| | 08/28/14 | **Revised** to add eALG letters 500EU, 500NRD, and 500EURD. |
| | 03/28/13 | **Renumbered** from 20.6. |
| **TP 20.6** Issue Small Benefit Payments | 03/28/13 | **Removed** from manual. |
| | 11/30/12 | **Revised** to reflect new subsection titles. |
| | 03/29/12 | **Added** note to contact OPSS if a slayer exception may apply to a beneficiary. |
| **TP 20.6A** Issue Lump-Sum Payments of Less than $200 | 11/30/12 | **Revised** to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required, and to reflect new subsection titles. |
| **TP 20.6B** Issue Lump-Sum Payments of $200–$1,000 | 11/30/12 | **Removed** from the manual since benefit applications are required for these payments. |
| **TP 20.6C** Resources for Benefit Payments | 09/29/14 | **Revised** to add:<br>• 531CRM<br>• eALG 530APP Request for Additional Documentation/Information -- Benefit |

| | | |
|---|---|---|
| | | Application<br>• eALG 530EXP Notice of Stale-dated Benefit Application<br>• eALG 530F Follow-up for Additional Documentation/Information -- Benefit Application<br>• eALG 530FIN Final Request for Missing Information -- Benefit Application<br>• eALG 531APP Receipt of Documents -- Benefit Application |
| **TP 20.6C** Issue Other Benefit Payments of $1,000 or Less | 11/30/12 | **Renumbered** and **renamed** as TP 20.6B Issue Other Payments Less than $200; **revised** to change from "$1,000 or less" to "less than $200" the amount of the total payment for which an application may not be required, and to reflect new subsection titles. |
| **TP 20.6D** Determine the Reliability and Sufficiency of Information for Making a Payment | 11/30/12 | **Renumbered** as TP 20.6C. |
| **TP 20.7** Resources for Benefit Payments | 11/30/12 | **Added** the Authorization to Place Participants in Pay Status Prior to Trusteeship, **removed** obsolete BDLs. |

# Technical Procedures 21–30

**09/30/2016**

**Technical Procedures 21–30 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 21** Overview for Changes in Total Benefit (Gross Amount) | 03/30/16 | **Revised** to replace instructions on changes to estimated benefits (concerning the $5 rule and subsequent benefit adjustments) with a reference to Process 10.4 Identify Current Payees for Benefit Adjustments. |
| **TP 21** Overview for Change Benefit/Payment Amount | 06/27/13 | **Revised** to state that this section also addresses changes to valuation data for non-payees. |
| **TP 21** Overview: Changes to the Net Payment | 03/30/16 | **Revised** to correct an internal reference to TP 7 Recoupment. |
| | 06/27/13 | **Revised** to remove the section on IRS levies, and reference where they are addressed in Appendix R. |
| **TP 21.1** Identify Changes to Payment System | 03/30/16 | **Revised** to correct an internal reference to TP 7 Recoupment. |
| | 11/20/15 | **Reformatted** to conform to current standards and **corrected** typographical errors. |
| **TP 22** Overview for Secure Records | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual*. |
| **TP 22.1** Secure Records | 11/30/12 | **Revised** to reference the new *BAPD Records Management Manual* and to remove reference to an obsolete privacy guidance document. |
| **TP 22.2** Resources for Secure Records | 11/30/12 | • **Added** the *BAPD Records Management Manual*.<br>• **Removed** obsolete privacy guidance document. |
| **TP 23** Overview for Coordinate Large Cases | 06/27/13 | **Revised** to clarify that references are to the **BAPD** Large Case Working Group (BAPD LCWG), and to replace references to Deputy Director of Operations with Deputy Director for Policy. |
| | 03/29/12 | **Revised** to remove references to participant meetings. |
| **TP 23.1** Coordinate and Process Large Cases | 06/27/13 | **Revised** to clarify that LCWG references are to the **BAPD** Large Case Working Group (BAPD LCWG), and to replace references to Deputy Director of Operations with Deputy Director for Policy. |
| **TP 24** Determine Net Worth | 03/29/12 | **Removed** from manual since BAPD no longer performs this function. |

| | | |
|---|---|---|
| **TP 26** Overview for Request SSA Data | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 03/27/14 | **Revised** to clarify the reasons PBGC request SSA data; to emphasize restrictions on handling and using safeguarded data; and for miscellaneous edits. |
| | 11/26/13 | **Revised** to remove the statement indicating when information from SSA is not subject to safeguarding and the summary table. |
| | 09/26/13 | **Revised** to mention the new requirement that the customer must sign *IRS Form 8821Tax Information Authorization* for PBGC to image the earnings results into IPS, and the safeguard training requirement; and to make miscellaneous edits. |
| **TP 26.1** Initiate Request for SSA Data | 08/28/14 | **Revised** to require a marriage certificate (in addition to the death certificate) from the spouse of a deceased participant, or a power of attorney from an authorized representative; and to require a new *SSA Safeguard Tracking Form* from users when submitting signed forms to the DMC. |
| | 03/27/14 | **Revised** to list data that must be included on the forms mailed to participants; to state the time requirements for submitting the forms; to distinguish how TPDs and field offices forward return forms; and for miscellaneous edits. |
| **TP 26.2** Request SSA Earnings/Employment Data | 03/30/16 | **Removed** the requirement to use a specific shipping service. |
| | 08/28/14 | **Revised** to require attaching the *SSA Safeguard Tracking Form* when submitting forms for processing. |
| **TP 26.4** Resources for Request SSA Data | 08/28/14 | **Revised** to add *SSA Safeguard Tracking Form*. |
| | 09/26/13 | **Revised** to add *IRS Form 8821 Tax Information Authorization*. |
| **TP 27** Conflict of Interest | 11/21/14 | **New** section replaces TP 27 Personal Interest Conflict System (PICS). |
| **TP 27** Overview for Conflict of Interest | 11/20/15 | **Revised** to remove contractor employees from the process, to further define covered relationships, and to clarify language throughout. |
| | 08/28/15 | **Corrected** an internal procedural reference. |
| **TP 27** Overview of Personal Interest Conflict System (PICS) | 08/30/12 | **Revised** to remove references to paper files, to mention the role of the |

| | | |
|---|---|---|
| | | Contracting Officer's Representative, and to further explain the role of the PICS Coordinator. |
| **TP 27.1** Conflict of Interest Duties for All BAPD Staff | 11/20/15 | **Revised** to remove contractor employees from the process. |
| | 08/28/15 | **Removed** the reference to the PBGC Training Portal. |
| **TP 27.2** Conflict of Interest Monitoring for Supervisors | 11/20/15 | **Retitled** from Conflict of Interest Monitoring for Supervisors and CORs, and **revised** to remove CORs as procedure owners. |
| **TP 27.2** Conflict of Interest Duties for Supervisors and CORs | 08/28/15 | **Removed** the reference to the PBGC Training Portal. |
| **TP 27.2** Report Federal Employee PICS Cross Match Results and Secure Records | 08/30/12 | **Revised** to remove steps for processing paper files. |
| **TP 27.3** Prepare Contract Employee PICS Memo | 11/30/12 | **Revised** to clarify that all (not just new) contract employees are required to complete a *Conflict of Interest Statement and Notice of Recusal Form*. |
| | 08/30/12 | **Revised** to require that PICS employees be removed from the CMS case team from plans in which they or relatives are participants, to remove steps for processing paper files, and to add a step for the PICS Coordinator to maintain relevant documents in a secure location. |
| **TP 27.4** Query IPS and Update PICS Inventory Report | 08/30/12 | **Revised** to remove steps for processing paper files, add a step requiring verification that all PICS employee IPS files are restricted from viewing, and to clarify that restrictions are to be removed once an individual is no longer a PICS employee. |
| **TP 27.5** PICS Benefit Administration | 11/30/12 | **Revised** to clarify that for financial transactions involving PICS participants, the COR requests BPB to assign the TPD or RSD manager **temporary** oversight of the assigned approver's cue. |
| | 08/30/12 | **Revised** to add steps to coordinate with the COR when processing financial transactions, and to add steps for the COR to work the requestor and a TPD or RSD manager in having the transaction approved. |
| **TP 28** Overview for Approve Financial & Non-Financial Transactions through Approval Service | 03/27/14 | **Revised** the Approval Levels Table to reflect 2014 thresholds. |
| | 03/28/13 | **Revised** to mention that temporary approver requests are submitted via the BAPD AWA-SAT Assignments portal, and to clarify the approval levels required for data loads. |
| | 12/20/12 | **Revised** to mention requirements for the memo and checklist to accompany |

| | | |
|---|---|---|
| | | level 50 payment requests, and to update the Approval Levels Table with 2013 approval levels. |
| | 11/30/12 | **Revised** the Approval Levels Table to omit BAPD Director as an approver of Level 50 payments. |
| | 03/29/12 | **Revised** to merge the Approval Levels Table into the Overview; update the table with CY 2012 changes; and to indicate that a designee may approve a Level 50 payment. |
| **TP 28.1** Initiate Electronic Transaction that Requires Approval | 08/30/16 | **Revised** to reflect recent interim procedures for Level 50 payments requiring users to submit all documents no later than three business days before the last cutoff directly to the *Level 50 Paymt Auth* mailbox, and to remove all steps assigned to CSD management. |
| | 03/28/13 | **Reformatted and revised** to move the step reminding users to forward transactions timely from the key information table to the action steps. |
| | 12/20/12 | **Revised** to clarify differences in processing payments at levels 10-40 from level 50 payments, and to require that the new *Level 50 Payment Checklist for TPD and RSD Management* be submitted with the *Level 50 Approval Memo*. |
| **TP 28.2** Authorize or Reject Electronic Transaction | 08/30/16 | **Revised** to reflect the new titles of memoranda used for Level 50 payments and to remove the note describing ORD's role in imaging the Level 50 file. |
| | 03/28/13 | **Reformatted and revised** to move the step reminding approvers to forward or reject the transaction prior to the cutoff date from the key information table to the action steps. |
| | 12/20/12 | **Revised** to clarify differences in approving payments at levels 10-40 from level 50 payments, to require the level 50 payment approver to complete the *Level 50 Payment Approval Checklist for BAPD Front Office*, and to mention the actions taken by the BAPD Front Office staff after a level 50 payment is approved. |
| | 03/29/12 | **Revised** to indicate that assignment of a temporary approver may not exceed 14 days. |
| **TP 28.3** Request Temporary Approver | 03/28/13 | **Reformatted and revised** to reflect the new process for requesting temporary approvers via the BPB AWA-SAT Assignments portal. |
| | | |

| | | |
|---|---|---|
| | 03/29/12 | **Revised** to indicate that assignment of a temporary approver may not exceed 14 days. |
| **TP 28.4** Request Approvers | 03/28/13 | **Reformatted, renamed and revised** to divide into subsections for requesting inclusions and (new) exclusions, using the BPB AWA-SAT Assignments portal. |
| **TP 28.4B** Request to Exclude an Employee from a Case (Exclusions) | 03/30/15 | **Revised** the reference to the Conflict of Interest procedures. |
| **TP 28.5** Confirm Approvers/Levels | 03/28/13 | **Reformatted and revised** to clarify the time frames for completing various steps in the procedure, and reflect the existing process using the BPB AWA-SAT Assignments portal and associated documents. |
| **TP 28.6** Resources for Approve Financial and Non-Financial Transactions through Approval Service | 08/30/16 | **Revised** to reflect the new titles of memoranda used for Level 50 payments. |
| | 03/28/13 | **Added:**<br>AWA/SAT Quarterly Confirmation Report<br>Final AWA/SAT Quarterly Confirmation Report<br>Quarterly Approval Confirmation Summary Report<br>Summary AWA/SAT Quarterly Confirmations Memo |
| | 12/20/12 | **Added** *Level 50 Payment Approval Checklist for BAPD Front Office* and *Level 50 Payment Checklist for TPD and RSD Management*. |
| **TP 29** Overview for Off-Cycle Payment | 03/30/15 | **Revised** to indicate that when the implementation of Spectrum 4.0 State B is complete, off-cycle payments will be made in the weekly check run and these procedures will be required only for those that cannot be made through Spectrum. |
| **TP 29.1** Determine Need and Initiate Off-Cycle Payment Request | 03/30/15 | **Revised** to remove the reference to the *Letter of Indemnification*, and to indicate that when the implementation of Spectrum 4.0 State B is complete, off-cycle payments will be made in the weekly check run and these procedures will be required only for those that cannot be made through Spectrum. |
| **TP 29.2** Review Off-Cycle Payment Requests | 03/30/15 | **Revised** to indicate that when the implementation of Spectrum 4.0 State B is complete, off-cycle payments will be made in the weekly check run and these procedures will be required only for those that cannot be made through |

| | | |
|---|---|---|
| | | Spectrum. |
| | 11/21/14 | **Revised** to remove an obsolete step for actions to occur on check-run day. |
| **TP 30** Monitor Continuous Eligibility For Disability Benefits | 03/28/13 | **New** section added to manual. |

# Technical Procedures 31–40

**01/31/2017**

**Technical Procedures 31–40 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 31** Overview for Congressional and Other Sensitive Correspondence | 11/20/15 | **Revised** to clarify that PBGC has a total of 10 business days to issue a response, and the division has five business days to forward the response to OPSS. |
| | 08/28/15 | **Revised** to update the title of the Project Manager/Senior Advisor to the Director, BAPD, and to state that OPEA (not the BAPD Front Office) mails the final response. |
| | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 03/27/14 | **Revised** to mention the new routing process in BAPD. |
| | 03/28/13 | **Added** new section to the manual. |
| **TP 31.1** Respond to Congressional or Other Sensitive Correspondence | 11/20/15 | **Corrected** the name of and created a hyperlink to the OPSS Congressionals mailbox. |
| | 08/28/15 | **Revised** to update the title of the Project Manager/Senior Advisor to the Director, BAPD; to state that OPEA mails the final response; and to add a step for the BAPD Front Office to scan and forward the approved response to OPEA. |
| | 08/28/14 | **Revised** to require tracking by the Front Office; to require requesting extensions from OPSS, who contacts the Congressional office; and to remove the routing and transmittal slip and otherwise streamline the routing process. |
| | 03/27/14 | **Revised** in entirety to address the new routing process in BAPD for Congressional and other sensitive correspondence. |
| **TP 31.2** Resources for Congressional Correspondence | 03/27/14 | **Added** to the *Guidelines for Replying to Congressional Correspondence*. |
| **TP 32** Overview for Provide Estimated Benefit Calculations | 09/30/16 | **Revised** to state that a request for a benefit estimate for an annuity starting date within 180 days of the request date is considered documented request for an annuity starting date, regardless of whether the customer requests a benefit application. |
| **TP 32.1** Receive Request, Gather Initial Information | 08/30/12 | **Revised** to clarify memoranda references. |
| | | |

| | | |
|---|---|---|
| | 03/29/12 | **Revised** to update references to renamed procedures. |
| **TP 32.2A** Use Estimated Benefit Calculation Tool | 12/22/16 | **Removed** the step to call the customer within one to two weeks of mailing the benefit application if it has not been received and the related note about setting up tickler methods. |
| **TP 32.2B** Use Prior Calculation | 12/22/16 | **Removed** the step to call the customer within one to two weeks of mailing the benefit application if it has not been received and the related note about setting up tickler methods. |
| | 03/28/13 | **Revised** to allow for approval by a GS-13 or higher grade actuary of a calculation prepared by the prior plan administrator or plan actuary to be documented by e-mail or memo. |
| | 12/20/12 | **Revised** to note that approval by a GS-13 or higher grade actuary is required before using a calculation prepared by the prior plan administrator or plan actuary, and that the approval must be documented to the participant's file. |
| **TP 32.2C** Actuary Calculates Individual Estimated Benefit | 12/22/16 | **Removed** the step to establish a tickler to call the customer within one to two weeks of mailing the benefit application if it has not been received and the related note about setting up tickler methods. |
| | 03/28/13 | **Revised** to allow for approval of a manually prepared benefit statement by e-mail or memo, and note that either may be used to approve multiple benefit statements; and to add steps for the EBLS/PVA/FBA to image copies of the benefit statements and approval document. |
| | 12/20/12 | **Revised** to require approval by a GS-13 or higher grade actuary of a manually prepared benefit statement, and that the approval be documented to the participant's file. |
| **TP 32.3** Resources for Provide Estimated Benefit Calculations | 03/28/13 | **Added** the Manual Benefit Statement Approval Memo. |
| | 12/20/12 | **Added** the *Manual Benefit Statement Approval Memo*. |
| **TP 33** Disability Benefit Processing | 08/28/15 | **New** section added to the manual. |
| **TP 33.2** Correct Failure to Convert Disability Benefit to Retirement Benefit | 12/22/16 | **Removed** the step to call the customer within 15 days of mailing the benefit application if it has not been received. |
| **TP 34** Overview for Requests for Supplies | 08/30/12 | **Revised** throughout with minor clarifications in processing supply requests for the DMC and its customers. |
| **TP 34.2** Process Supply Request | 03/30/16 | **Removed** the requirement to use a specific shipping service. |
| | | |

| | | |
|---|---|---|
| **TP 34.3** Forecast Supply Needs | 08/30/12 | **Removed**. |
| **TP 34.3** Resources for Requests for Supplies | 08/30/12 | **Renumbered** from 34.4. |
| **TP 35.1** Maintain the Case Workplan | 03/27/14 | **Revised** to state that the TPD coordinates with ASD, as needed, to update the case work plan. |
| **TP 35.2** Resources for Case Work Plan | 03/29/12 | **Added:**<br><br>*BAPD Progress Reporter in Oracle Primavera P6 Interim Guidance* |
| **TP 36** Overview for Employee Contributions | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **TP 36.1** Evaluate Employee Contributions Provisions | 03/27/14 | **Revised** to mention that the actuary contacts OPSS if the plan provided for voluntary employee contributions. |
| **TP 36.1A** Document Employee Contributions-Related Plan Provisions | 03/27/14 | **Revised** to clarify how to proceed if the plan provides for voluntary employee contributions, mandatory employee contributions, or neither. |
| **TP 36.1B** Develop AMEC Tracking Worksheet | 09/26/13 | **Revised** to clarify what the present value of the benefit including the AMEC is used to determine, and that if the benefit is de minimis, the AMEC cannot be separately withdrawn. |
| **TP 36.2C** Issue Employee Contributions Benefit Determination Letters | 09/26/13 | **Revised** to remove the reference to small payments. |
| **TP 36.3** Process Employee Contribution-Provided Benefits | 11/20/15 | **Revised** to state the rules for withdrawals and rollovers when the total benefit, including the AMEC, is *de minimis*, and to reference the appropriate procedure according to type of benefit elected. |
| | 09/26/13 | **Revised** to clarify that if the benefit including the AMEC is a *de minimis* benefit, the AMEC cannot be separately withdrawn. and which procedures to follow according to the elected payment. |
| | 06/27/13 | **Revised** to state the customer's e-mail address is to be updated in CRM, if provided. |
| **TP 36.3A** Process Withdrawal Election before Retirement | 09/26/13 | **Revised** to clarify that the procedure is to be followed if the benefit including the AMEC is non-de minimis, and which procedures to follow if it is de minimis. |
| **TP 36.3B** Process Withdrawal Election at Retirement | 09/26/13 | **Revised** to clarify that if the benefit including the AMEC is *de minimis*, the AMEC cannot be separately withdrawn. |
| **TP 36.4** Pay Employee Contributions | 11/20/15 | **Revised** to state that a payee may also elect to receive the non-taxable portion directly and roll over the taxable portion. |
| **TP 36.4A** Make Lump-Sum Payment Including Employee Contributions | 03/30/15 | **Revised** to remove the reference to the interim procedures for processing Roth |

| | | |
|---|---|---|
| | | rollovers. |
| **TP 36.4B** Make Single-Sum Payment of Employee Contributions on or before Annuity Starting Date | 03/30/15 | **Revised** to remove the reference to the interim procedures for processing Roth rollovers. |
| **TP 36.4C** Make Single-Sum Payment of Employee Contributions after Annuity Starting Date | 03/30/15 | **Revised** to remove the reference to the interim procedures for processing Roth rollovers. |
| **TP 37.4** Customer Recovery Action Plan | 03/29/12 | **Revised** to remove references to participant meetings. |
| **TP 38** Administer Integrator Application | 03/29/12 | **Removed** from Technical Procedures, replaced by new version added to the Retiree Services Division section. |
| **TP 39** Prepare Early Estimated Benefits for a Case | 11/26/13 | **Removed** from the manual for obsolescence. |
| | 03/28/13 | **Revised** to remove instructions for paying lump-sums of less than $200 without an application. |
| **TP 39.1** Prepare Benefit Estimation Tool for Early Case Estimates | 03/28/13 | **Revised** to remove instructions for paying lump-sums of less than $200 without an application. |
| | 03/29/12 | **Revised** to update references to renamed procedures; remove obsolete Control Issues row in table; and for miscellaneous edits. |
| **TP 40** Customer Data Fixes | 11/26/13 | **Added** new section to the manual. |

# Technical Procedures 41–50

**01/31/2017**

**Technical Procedures 41–50 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 41** Follow up on FBA Performance Reviews | 06/27/13 | **Removed** from the manual due to obsolescence. |
| **TP 44** Overview of Foreign Language Services | 08/28/15 | **Corrected** the title of the Foreign Language Group. |
| | 11/26/13 | **Revised** to mention the DMC's role in facilitating communication with foreign language customers. |
| **TP 44.1** Request Foreign Language Services | 08/28/15 | **Revised** to require CRM service requests be sent to the mail POC for the Foreign Language Group (FLG), and to describe the process in which the FLG imports the completed translation into IPS in its native format for the requestor to open, save, print and mail to the customer. |
| | 03/30/15 | **Revised** the steps for obtaining translation support on incoming and outgoing phone calls, and for the DMC's handling of incoming foreign language correspondence, to reflect processing changes under the new service provider. |
| | 11/26/13 | **Revised** to reassign steps for requesting translation of incoming documents to the DMC, to move all FBA/PVA steps into the table (removing all numbered steps), and to update turnaround times. |
| | 03/29/12 | **Revised** to remove references to participant meetings, to emphasize that turnaround times will vary according to the scope and complexity of the translation, and to indicate that only CRM is to be used to request a translation. |
| **TP 45.1** Process Report of Non-Receipt | 04/30/12 | **Renamed** section and revised to remove TPD and RSD managers as procedure owners. |
| **TP 45.2** Process Routine Assertions of Non-Receipt | 04/30/12 | **Renumbered**, **renamed**, and **revised** to subdivide into sections on unpaid checks, paid checks, and electronic direct deposits, with miscellaneous edits throughout. |
| **TP 45.2A** Stop and Reissue Unpaid Check | 06/27/13 | **Added** note to refer requests for non-benefit payments to RSD/BPB for processing. |
| **TP 45.2B** Investigate Assertion of Non-Receipt of Paid Check | 03/30/15 | **Revised** to require that the check be replaced immediately if it was misdirected due to an error by PBGC at |

| | | |
|---|---|---|
| | | no fault of the customer. |
| **TP 45.2C** Investigate Assertion of Non-Receipt of Electronic Direct Deposit | 03/30/15 | **Replaced** the step to prepare a *Letter of Indemnification* with instructions to notify RSD/BPB when an EDD payment is deposited into the wrong account. |
| **TP 45.3** Process Non-Routine Assertions of Non-Receipt | 04/30/12 | **Renamed** and **renumbered** from TP 45.1C. |
| **TP 45.4** Resources for Non-Receipt of Benefit Payment | 03/30/15 | **Removed:**<br>*Stop and Reissue Payment E-mail Request* |
| | 04/30/12 | **Renumbered**. |
| **TP 46** The Health Coverage Tax Credit (HCTC) | 03/27/14 | **Removed** from the manual. |
| **TP 46** Overview for the Health Coverage Tax Credit (HCTC) | 09/30/16 | **Added** to the manual to reinstate the previous procedures for benefit processing staff. |
| **TP 47** Overview for Missing Participants | 06/27/13 | **Revised** to correct internal reference. |
| **TP 47.3B** Notify Missing Participant of Benefit Other than Purchased Annuity | 06/27/13 | **Revised** to clarify that Actuarial Support Requests are used to request benefit calculations; to remove any distinctions for processing benefits equal to or less than $200; and that not-annuity-only participants will receive a lump-sum application but will be advised in the letter of the annuity option. |
| **TP 47.4A** Review Benefit Application | 03/30/15 | **Revised** to remove the requirement that the signature and notarization dates match. |
| **TP 47.4A** Notify Missing Participants with Purchased Annuities | 06/27/13 | **Revised** to require that an applicant's signature be no more than 90 days before the application filing date. |
| **TP 47.4B** Process Benefit Payment in Spectrum | 09/30/16 | **Revised** to remove usage of the *One-Time Payment Summary*. |
| **TP 47.5A** Process Deceased Missing Participant with Benefit Greater than $5,000 | 06/27/13 | **Revised** to clarify that Actuarial Support Requests (ASR) are used to request benefit calculations, and state that an estate is to receive Form 720 and/or Form 721T. |
| **TP 47.5B** Process Deceased Missing Participant with Benefit Less than or Equal to $5,000 | 06/27/13 | Revised to to remove any distinctions for processing benefits equal to or less than $200; clarify that Actuarial Support Requests (ASR) are used to request benefit calculations, and state that an estate is to receive Form 720 *and/or* Form 721T. |
| **TP 47.8** Resources for Missing Participants | 06/27/13 | **Added** Form 721T Tax Election for Payment Not Eligible for Rollover. |
| **TP 48** Overview for MyPBA Correspondence | 03/27/14 | **Revised** to mention procedures for processing requests to disable a MyPBA account. |
| **TP 48.1** Process MyPBA Correspondence | 09/29/14 | **Revised** to specify that eALG 549 is to be mailed within 10 business days of receipt of an application, as needed: |

| | | |
|---|---|---|
| | | and to replace specific steps on processing benefit applications with references to TP 20 Benefit Applications. |
| | 03/27/14 | **Revised** to add instructions for disabling a MyPBA account based on a customer's response. |
| | 03/28/13 | **Revised** to reflect policy changes requiring that a completed application be received within 180 days of the date of PBGC's letter mailing the application for the customer to retain the requested annuity starting date. |
| | 08/30/12 | **Revised** to require that MyPBA transactions that appear in approvers' queues be approved. |
| **TP 48.2** Resources for MyPBA Correspondence | 09/29/14 | **Removed**<br>• eALG 530 Request for Additional Documentation/Information<br>• eALG 531 Receipt of Complete Documentation/Information |
| | 03/27/14 | **Added** *eALG Generic Letter*. |
| **TP 49** Overview for Power of Attorney and Guardianship | 03/30/16 | **Revised** to reference renamed policy 8.4-1 Power of Attorney. |
| **TP 49.1** Process Power of Attorney | 03/30/16 | **Revised** to reference renamed policy 8.4-1 Power of Attorney. |
| | 08/28/15 | **Revised** to advise reviewing the entire POA document for language that might affect interpretation. |
| **TP 49.1A** Non-Durable Power of Attorney | 08/28/15 | **Revised** to clarify the step for reviewing the POA document for authorizing language, which must specifically be cited in the POA checklist, and to reference new section TP 49.1 POA Authorizing Language Examples. |
| **TP 49.1B** Durable Power of Attorney | 12/22/16 | **Added** new step to review and return the checklist to the reviewer if the DPOA is not approved because authorities are indicated differently than as required by the document. |
| | 08/28/15 | **Revised** to clarify the step for reviewing the POA document for authorizing language, which must specifically be cited in the POA checklist, and to reference new section TP 49.1 POA Authorizing Language Examples. |
| **TP 49.1C** Springing Power of Attorney | 12/22/16 | **Added** new step to review and return the checklist to the reviewer if the springing DPOA is not approved because authorities are indicated differently than as required by the document. |
| | 08/28/15 | **Revised** to clarify the step for reviewing the POA document for authorizing language, which must specifically be cited in the POA checklist, |

| | | |
|---|---|---|
| | | and to reference new section TP 49.1 POA Authorizing Language Examples. |
| **TP 49.1D** POA Authorizing Language Examples | 08/28/15 | **New** section added to the manual. |
| **TP 49.2** Process Power of Attorney Revocation | 03/30/16 | **Revised** to reference renamed policy 8.4-1 Power of Attorney. |
| | 08/28/14 | **Revised** with instructions to send a new letter to the former agent advising of the revocation and to update Spectrum. |
| | 03/27/14 | **Added** new section to manual. |
| **TP 49.2** Process Guardianship and Conservatorship Requests | 06/27/13 | **Revised** to address payees in more than one PBGC plan, situations where an entity or agency is appointed guardian or more than one person is appointed, strengthen steps for reviewing the documents to confirm the guardian's authority and to ensure the document's validity, add steps for handling temporary court orders, clarify routing of decisions on acceptance and their documentation. |
| **TP 49.3** Process Guardianship and Conservatorship Requests | 09/30/16 | **Revised** to require either the court order or the letters of guardianship but not both, per revised Policy 8.4-2; and to require follow-up, allowing a reasonable time to respond, if information appears incomplete. |
| | 03/30/16 | **Revised** to address processing changes required under new policy 8.4-2 Guardianships and Conservatorships, including review of both the court order and any letters of guardianship when making a determination; to clarify language throughout; and to reference renamed policy 8.4-1 Power of Attorney. |
| | 08/28/14 | **Revised** with instructions to update new CRM screens with information on the appointed guardians and conservators and their authority. |
| | 03/27/14 | **Renumbered** from 49.2 |
| **TP 49.3** State Law Requirements for DPOAs | 11/26/13 | **Replaced** the table to update the rows for Delaware, Illinois, Michigan, and Wisconsin. |
| | 09/26/13 | **Replaced** table in its entirety to reflect changes to state laws and effective dates, and add rows for US Virgin Islands and Puerto Rico, and additional notes. |
| | 03/28/13 | **Revised** table for changes in state laws of Arizona, Arkansas and Illinois. |
| | 04/30/12 | **Revised** table to clarify that neither Montana nor North Dakota have special state rules. |
| | | **Revised** table to indicate special rules |

| | | |
|---|---|---|
| | 03/29/12 | apply to North Carolina. |
| **TP 49.4** Process Assertions of Incapacity | 03/30/15 | **Added** new section. |
| **TP 49.4** Legal Requirements for DPOAs | 08/28/14 | **Revised** with updated requirements for states Idaho, Illinois, New Jersey, and Washington; and with new or updated rules for foreign entities Brazil, British Columbia, England, Germany, Italy, Montserrat, Philippines, Portugal, Prince Edward Island, Quebec, Scotland, and Wales. |
| | 03/27/14 | **Retitled and numbered** from 49.3, and split into subsections for state and foreign law requirements. |
| **TP 49.4** Special State Rules for DPOAs | 11/26/13 | **Revised** to update the rules for Delaware, Illinois, Washington and Wisconsin, and to add a new section with rules for Michigan. |
| | 09/26/13 | **Revised** extensively to reflect new rules for certain states, include rules for additional states, and add date stamps for individual states. |
| | 03/28/13 | **Revised** to update rules for Arizona, Arkansas, California and Illinois. |
| **TP 49.4B** Foreign Law Requirements for DPOAs | 11/21/14 | **Revised** to reflect new requirements for Brazil. |
| **TP 49.5** Legal Requirements for DPOAs | 03/30/15 | **Renumbered** from 49.4. |
| **TP 49.5** Special Rules for DPOAs | 08/28/14 | **Revised** with updated rules for states Arkansas, Arizona, Delaware, Florida, Illinois, Maine, Montana, New Hampshire, Pennsylvania, Washington and Wisconsin; and with new or updated rules for foreign entities British Columbia, England, Germany, Italy, Portugal, Prince Edward Island, Quebec, Scotland, US Virgin Islands, and Wales. |
| | 03/27/14 | **Retitled and numbered** from 49.4, and split into subsections for state and foreign law requirements. |
| **TP 49.5A** Special Foreign Rules for DPOAs | 11/21/14 | **Revised** to add special rules for Brazil. |
| **TP 49.5A** Special State Rules for DPOAs | 11/21/14 | **Revised** with new rules for Illinois. |
| **TP 49.5B** Foreign Law Requirements for DPOAs | 08/28/15 | **Revised** the table with new rows for Mexico (Jalisco), Northern Mariana Islands, Poland, and Slovakia. |
| **TP 49.6** Special Rules for DPOAs | 03/30/15 | **Renumbered** from 49.5 |
| **TP 49.6** Resources for Power of Attorney and Guardianship | 08/28/14 | **Revised** to add the *CRM Power of Attorney and Guardianship Data Entry Form* and *eALG 588 POA Revocation Letter – Agent*. |
| | 03/27/14 | **Renumbered** from 49.5 |
| **TP 49.6B** Special Foreign Rules for DPOAs | 08/28/15 | **Revised** with new rules for Mexico (Jalisco), Poland, and Slovakia. |
| | | |

| | | |
|---|---|---|
| **TP 49.7** Resources for Power of Attorney and Guardianship | 03/30/16 | **Revised** to reference renamed policy 8.4-1 Power of Attorney and new policy 8.4-2 Guardianships and Conservatorships. |
| | 03/30/15 | **Renumbered** from 49.6. |
| **TP 50** Overview for Plan-Specific Web Announcements | 11/26/13 | **Revised** to mention that web announcements are required when BDLs for a plan have not been issued within three years of trusteeship, and to remove language concerning participant meetings. |
| **TP 50.1** Plan-Specific Web Announcement | 11/26/13 | **Revised** to remove information about the Rhythmyx application. |
| | 06/27/13 | **Revised** to remove a reference to obsolete guidance on creating BAPD announcements, and to include the status of BDLs as an example of an announcement. |
| **TP 50.1A** Create and Publish a Web Announcement | 11/26/13 | **Revised** to note that the TPD Manager is to advise OPSS by the end of the second and fourth quarters of the fiscal year if BDLs for a plan have not been issued within three years of trusteeship, and to remove information about the Rhythmyx application. |
| | 03/29/12 | **Revised** to remove references to participant meetings. |

# Technical Procedures 51–62

**01/31/2017**

**Technical Procedures 51–62 Table**

| Technical Procedure | Date | Change |
|---|---|---|
| **TP 51** Overview for Earnings Offsets | 08/28/14 | **Revised** to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| | 11/30/12 | **Revised** to replace the existing section and replace *Earnings Offsets Interim Procedures*. |
| **TP 51.1** Administer Earnings Offsets before Benefit Determinations | 11/21/14 | **Revised** to update the reference the the asset evaluation procedures. |
| **TP 52** Cash Balance and Other Statutory Hybrid Plans - Overview | 08/28/14 | **Revised** to state that preparing Frequently Asked Questions is required for statutory hybrid plans only if the FAQs will be posted on the plan-specific Web site; and to add a paragraph advising that, when imaging or archiving to plan and participant files, to follow TP 16 Plan and Participant File Maintenance. |
| **TP 52.1** Prepare Frequently Asked Questions | 08/28/14 | **Revised** to state that the procedure is optional for statutory hybrid plans, and that no action is required if Frequently Asked Questions will not be prepared for the plan-specific Web page. |
| | 03/27/13 | **Revised** to clarify that statutory hybrid plans include post-PPA 2006 plans. |
| **TP 52.2** Issue Cash Balance BDLs | 03/28/13 | **Revised** to remove BDLs for lump sums of less than $200 from tables. |
| | 11/30/12 | **Revised** to remove the reference to 404L$1000CB BDL, which is no longer used. |
| **TP 52.3** Update Cash Balance Program | 06/27/13 | **Added** cross-reference to new TP 16.4 Archive Electronic Files. |
| **TP 52.4A** Provide Pre-BDL Estimated Benefit Calculations | 12/22/16 | **Removed** the step to call the customer within one to two weeks of mailing the benefit application if it has not been received. |
| | 08/28/15 | **Removed** separate steps for processing requests for information only and requests to begin benefits. |
| | 03/28/13 | **Revised** to remove instructions for paying lump-sums of less than $200 without an application. |
| **TP 52.4B** Provide Post-BDL Benefit Calculations | 12/22/16 | **Removed** the step to call the customer within one to two weeks of mailing the benefit application if it has not been received. |
| **TP 52.7** Resources for Cash Balance and | 08/28/15 | **Removed:** |
