DEPARTMENT OF THE ARMY
UNITED STATES ARMY INTELLIGENCE AND SECURITY COMMAND
FREEDOM OF INFORMATION/PRIVACY OFFICE
FORT GEORGE G. MEADE, MARYLAND 20755-5995

Freedom of Information/
Privacy Office

0 2 NOV 2015

This is in further response to your Freedom of Information Act (FOIA) request of June 10, 2008, for a copy of the INSCOM Annual History for FY1986 and supplements our letter of June 11, 2009.

Coordination has been completed with other elements of this command and other government agencies. The records have been returned to this office for our review and direct response to you.

We have completed a mandatory declassification review in accordance with Executive Order (EO) 13526. As a result of our review information has been sanitized and 44 pages are being withheld in their entirety as the information is currently and properly classified TOP SECRET, SECRET and CONFIDENTIAL according to Sections 1.2(a)(1), 1.2(a)(2), 1.2(a)(3) and 1.4(c) of EO 13526. This information is exempt from the public disclosure provisions of FOIA pursuant to Title 5 U.S. Code 552 (b)(1). It is not possible to reasonably segregate meaningful portions of the withheld pages for release. A brief explanation of the applicable sections follows:

Section 1.2(a)(1) of EO 13526, provides that information shall be classified TOP SECRET if its unauthorized disclosure reasonably could be expected to cause exceptionally grave damage to the national security.

Section 1.2(a)(2) of EO 13526, provides that information shall be classified SECRET if its unauthorized disclosure reasonably could be expected to cause serious damage to the national security.

Section 1.2(a)(3) of EO 13526, provides that information shall be classified CONFIDENTIAL if its unauthorized disclosure reasonably could be expected to cause damage to the national security.

Section 1.4(c) of EO 13526, provides that information pertaining to intelligence activities, intelligence sources or methods, and cryptologic information shall be considered for classification protection.

Information has been withheld that would result in an unwarranted invasion of the privacy rights of the individuals concerned, this information is exempt from the public disclosure provisions of the FOIA per Title 5 U.S. Code 552 (b)(6).

In addition, information has been sanitized from the records as the release of the information would reveal sensitive intelligence methods. This information is exempt from public disclosure pursuant to Title 5 U.S. Code 552 (b)(7)(E) of the FOIA. The significant and legitimate governmental purpose to be served by withholding is that a viable and effective intelligence investigative capability is dependent upon protection of sensitive investigative methodologies.

The withholding of the information described above is a partial denial of your request. This denial is made on behalf of Major General George J. Franz, III Commanding, U.S. Army Intelligence and Security Command, who is the Initial Denial Authority for Army intelligence investigative and security records under the Freedom of Information Act and may be appealed to the Secretary of the Army. If you decide to appeal at this time, your appeal must be post marked no later than 60 calendar days from the date of our letter. After the 60-day period, the case may be considered closed; however, such closure does not preclude you from filing litigation in the courts. You should state the basis for your disagreement with the response and you should provide justification for reconsideration of the denial. An appeal may not serve as a request for additional or new information. An appeal may only address information denied in this response. Your appeal is to be made to this office to the below listed address for forwarding, as appropriate, to the Secretary of the Army, Office of the General Counsel.

Commander
U.S. Army Intelligence and Security Command
Freedom of Information/Privacy Office (APPEAL)
2600 Ernie Pyle Street, Room 3S02-B
Fort George G. Meade, Maryland 20755-5910

We have been informed by the Central Intelligence Agency (CIA) that their information is exempt from public disclosure pursuant to Title 5 U.S. Code 552 (b)(1) of the FOIA. The applicable Sections of the Executive Order are Sections 1.4(c) and 3.3 (b)(1). Additional information, while no longer meeting the requirements for declassification, must be withheld on the basis of Section 3.5(c).

The withholding of the information by the CIA constitutes a denial of your request and you have the right to appeal this decision to the Agency Release Panel within 45 days from the date of this letter. If you decide to file an appeal, it should be forwarded to this office and we will coordinate with the CIA on your behalf. Please cite CIA #EOM-2011-00283/Army #589F-08 assigned to your request so that it may be easily identified.

The Defense Intelligence Agency (DIA) has informed our office that they have no objection to the release of their information.

In addition, we have been informed by the National Security Agency (NSA) that portions of their information has been sanitized from the records pursuant to the exemptions listed below:

5 U.S. Code 552(b)(1) – The information is properly classified in accordance with the criteria for classification in Section 1.4(c) of Executive Order 13526.

5 U.S. Code 552(b)(3) – The specific statutes are listed below:

50 U.S. Code 3605 (Public Law 86-36 Section 6)
50 U.S. Code 3024(i)
18 U.S. Code 798

The initial denial authority for NSA information is the Director Associate Director for Policy and Records. Any person denied access to information may file an appeal to the NSA/CSS FOIA/PA Appeal Authority. The appeal must be postmarked no later than 60 calendar days of the date of the initial denial. The appeal shall be in writing to the NSA/CSS FOIA/PA Appeal Authority (DJP4), National Security Agency, 9800 Savage Mill Road, STE 6248, Fort George G. Meade, Maryland 20755-6248. The appeal shall reference the initial denial of access and shall contain, in sufficient detail and particularity, the grounds upon which the requester believes release of the information is required. The NSA/CSS FOIA/PA Appeal Authority will endeavor to respond to the appeal within 20 working days after receipt, absent unusual circumstances.

We apologize for any inconvenience this delay may have caused you.

Copies of the records are enclosed for your use. You have received all available Army intelligence investigative records concerning this subject at this headquarters.

There are no assessable FOIA fees.

If you have any questions regarding this action, feel free to contact this office at 1-866-548-5651, or email the INSCOM FOIA office at: usarmy.meade.902-mi-grp-mbx.inscom-foia-service-center@mail.mil and refer to case #589F-08.

Sincerely,

Joanne Benear
Chief
Freedom of Information/Privacy Office

CHAPTER I

MISSION, FUNCTIONS, AND LOCATION

(b)(1)

~~CONFIDENTIAL~~

8

~~CONFIDENTIAL~~

(b)(1)

Transfer of the Army Biographic Repository. (U) On 27 August 1985, the CG, INSCOM informed ACSI, DA that in FY 1986 INSCOM would discontinue functions involving maintenance of the Army Biographic Repository and that resources involved in that activity would be transferred to higher priority HUMINT tasks. On 27 September 1985, ACSI, DA concurred with the decision and directed that INSCOM coordinate with DIA on disposition of the Army biographic files and give ample notification to the analytical community of the repository's closure. Accordingly, INSCOM operation of the element terminated in 1st Quarter, FY 1986. The files were taken over by DIA.²

Location. (U) All elements of Headquarters, U.S. Army Intelligence and Security Command are located at Arlington Hall Station, 4000 Arlington Boulevard, Arlington, Virginia 22212. Staff elements previously located at Fort George G. Meade were restationed at Arlington Hall during 2d Quarter, FY 1986.³

CHAPTER II

COMMAND AND STAFF RELATIONSHIPS

Command and Staff Relationships. (U) The CG, INSCOM is under supervision of the Chief of Staff, United States Army. Directives; authorities; policy, planning, and programming guidance; approved programs; resource allocations; and other methods of command direction are issued to CG, INSCOM by the Chief of Staff, United States Army.

(U) The CG, INSCOM--

1. Commands all assigned units and activities.
2. Is subordinate to the Chief, Central Security Service (CHCSS) for the conduct of SIGINT operations.
3. Manages SIGINT resources to accomplish SIGINT operational tasks assigned by DIRNSA/CHCSS.
4. Provides specified military personnel and administrative, logistic, and operational support to the DIRNSA/CHCSS.
5. Deals directly with the Director, DIA for the coordination of HUMINT operational proposals.

(U) INSCOM and other major Army commands (MACOM's) are coordinate elements of DA. The CG, INSCOM is authorized to communicate directly with other major Army commanders or with heads of Army Staff agencies on matters of mutual interest.

(U) The CG, INSCOM will maintain liaison as necessary with other MACOM's, field operating agencies, other cryptologic and intelligence activities, and other foreign domestic governmental agencies to maintain an awareness of, to exchange information on, and to ensure coordination of matters of mutual concern.

(U) The CG, INSCOM acts as executive agent for logistic support, SIGINT technical support, and mission steering for the DA TROJAN program, an effort to provide units in garrison with live signals for training (and possibly operational) purposes. In the area of SIGINT technical support/mission steering, INSCOM has the responsibility to ensure adequate SIGINT technical support and mission steering to TROJAN users. This responsibility is met by INSCOM's Army Technical Control and Analysis Element (ATCAE) and

UNCLASSIFIED

Primary Control and Analysis Centers (PCAC's). The 66th MI Group, OPCON to USAREUR, operates the PCAC for USAREUR TROJAN's. CONUS MI Group operates a PCAC, OPCON to FORSCOM, for all CONUS based TROJAN's. The ATCAE provides support to the PCAC's and to TROJAN users not currently supported by a PCAC (such as SOUTHCOM, WESTCOM, and the 8th U.S. Army). Technical support and mission steering provided by the ATCAE and the PCAC's consists primarily of target environment data base management and tipoffs to impending or occurring target activity.

(U) INSCOM does not have a responsibility in the areas of developing, fielding, and testing the TROJAN systems nor for any product improvement plans (PIP); these are the responsibilities of the Army Materiel Command's (USA Electronics Research and Development Command) project manager, USA Signals Warfare Laboratories. USA Information Systems Command (USAISC) has full responsibility for communications support to include: cryptonet establishment, Defense Special Security Communications System (DSSCS) requirements, commercial communications contracts, and overall communications requirements monitoring.¹

INSCOM-TRADOC MOU. (U) On 13 May 1986 a revised Memorandum of Understanding (MOU) between INSCOM and the U.S. Army Training and Doctrine Command (TRADOC) was implemented. The MOU was designed to provide for the integration of certain INSCOM Intelligence and Electronic Warfare (IEW) Echelon Above Corps (EAC) Life Cycle System Management Model (LCSMM) activities into TRADOC; establish relationships and responsibilities between TRADOC and INSCOM for training and development IEW EAC activities; and promote complete expeditious coordination and processing of doctrinal IEW EAC activities between the two commands. It did not impact upon IEW activities exclusive to INSCOM's fixed SIGINT stations and strategic agent or Offensive Counterintelligence (OFCO) activities. Implementation was to be carried out by a specific set of procedures jointly developed by the Chief of Staff, INSCOM and the Deputy Commander of the U.S. Army Intelligence Center and School (USAICS), the TRADOC proponent in the IEW field.²

Staff Turnover. (U) One of the principal strengths of the command has been the reservoir of functional expertise embodied in its senior civilian management. Department of the Army civilians have provided the command and its predecessor organization with the continuity and experience needed for organizational effectiveness. During the course of FY 1986, this pool of talent suffered significant losses. On 22 December 1985, Mr. (b)(6) Deputy Chief of Staff for Systems, was forced to go on extended sick leave. Mr. (b)(6) Deputy Chief of Staff for Plans, Programs,

~~SECRET~~

and Modernization, went to the Pentagon on 13 January 1986 to accept a post in the Senior Executive Service (SES) as special assistant to the Assistant Chief of Staff for Intelligence (ACSI). Finally, Dr. (b)(6) Scientific and Cryptologic Advisor to the command since 1968, retired from Federal Service on 30 June 1986.³

High Technology/Low Intensity Conflict. (U) In a letter dated 6 August 1984, the Vice Chief of Staff Army assigned INSCOM the task of addressing the intelligence requirements of low intensity conflicts. Low intensity conflicts were defined as those military operations involving U.S. Forces in a support role to friendly and allied nations which are being militarily threatened or attacked by internal and/or external military and/or para-military forces. Under these conditions, it was assumed that no major U.S. ground forces were employed in defense of the friendly and/or allied governments. Under such situations as this, the U.S. Army and other service and departmental intelligence resources would be brought to bear against the opposing military and/or para-military forces as a major means to execute U.S. policy in the affected region.

CHAPTER III

ORGANIZATION

INSCOM Organization. (U) At the close of FY 1986, there was a total of 74 units (34 TOE and 40 TDA) within INSCOM. The TDA figure does not include Augmentation or Provisional units. All types of units are listed in appendix A. For individual lists of TOE, TDA, and Provisional units at the close of FY 1986, see appendices B, D, and G respectively. Changes in the status of TOE, TDA, and Provisional are listed in appendices C, E, and H.

(U) Throughout FY 1986, MG Harry E. Soyster served as Commander, INSCOM. BG Charles F. Scanlon served as Deputy Commanding General until 10 May 1986 when he was replaced by BG George J. Walker, the former Chief of Staff. In turn, BG Ira C. Owens replaced BG Walker as Chief of Staff. The position of INSCOM Command Sergeant Major continued to be occupied by CSM (b)(6) throughout the course of FY 1986.

(U) At the end of FY 1986, Headquarters, U.S. Army Intelligence and Security Command was organized to consist of a Command Group, Office of the Chief of Staff, Special Staff, Personal Staff, and Coordinating Staff as shown below:¹

Command Group:

Commanding General (CG). (U) The CG, U.S. Army Intelligence and Security Command was responsible to the Chief of Staff, U.S. Army for accomplishment of the missions and functions prescribed by AR 10-53 and was concurrently responsible to the Chief, Central Security Service for all SIGINT activities for which the National Security Agency/Central Security Service (NSACSS) were responsible.

Deputy Commander (DCG). (U) The deputy commander assisted the commander in the management of all intelligence and support operations of INSCOM to include the review and execution of all tasked and delegated operations and the determination of future requirements.

Command Sergeant Major (CSM). (U) The Command Sergeant Major as the senior enlisted person in the command provided advice and assistance to the CG on all matters involving enlisted personnel.

UNCLASSIFIED

Office of the Chief of Staff:

Chief of Staff (CofS). (U) The CofS acted as the principal coordinating agent of, and advisor to, the CG and DCG on those matters pertaining to INSCOM; directed and coordinated the staff to achieve efficiency and unit of action; and assisted the CG and DCG in the supervision of the execution of orders. Directly subordinate to the CofS were the Liaison Officers, the Office of Public Affairs, Organizational Effectiveness Office, and Internal Review Office.

Command Group Executive Office. (U) The command group executive officer coordinated the activities and communications of the CG and DCG offices with the Chief of Staff. The position was discontinued 8 January 1986 when the incumbent was assigned to a special project.

Deputy Chief of Staff (DCS). (U) The DCS acted for the Chief of Staff during his absence and assisted to coordinate all actions of the HQ INSCOM staff, and supervised the activities of or provided support to the Command Chaplain, Organizational Effectiveness Office, Secretary of the General Staff, Staff Psychologist, Scientific Advisor, Public Affairs Office, and INSCOM Liaison Officers.

Secretary of the General Staff (SGS). (U) The SGS acted as executive officer for the CofS and as office manager for the offices of the CG, DCG's, and CofS.

Special Assistant to Chief of Staff. (U) The Special Assistant to Chief of Staff acted as special advisor and consultant to the commander, deputy commanders, and the Chief of Staff.

Protocol Office. (U) The Protocol Officer served to advise the command group on matters related to protocol.

Liaison Officers. (U) The liaison officers provided liaison representation to NSACSS, FORSCOM, TRADOC, USAREUR, and other commands as required. On 1 August 1986, the INSCOM liaison office at NSA was made an organic part of the CONUS MI Group and initially redesignated as the Office of the Senior INSCOM Representative to NSA (SIRO). This was later changed to INSCOM Representative (INSR) because the first acronym was also used by another element of DOD.

UNCLASSIFIED

Special Staff:

Chief, Leadership Assistance Office. (U) The Leadership Assistance Office (formerly the Organizational Effectiveness Office) aided INSCOM's senior leaders in leading the human element of their organizations through complex organizational change. The office also provided assistance to INSCOM's leaders in management and leadership training programs. Finally, the office managed INSCOM's Organizational Effectiveness (OE) Program. Effective 22 September 1986, the Leadership Assistance Office was reassigned to the Office of the Deputy Chief of Staff, Resource Management.

Chief, Internal Review (IR) Office. (U) Served as the principal advisor to the CDR, INSCOM on internal review matters. Conducted independent review and examination of command operations and internal controls to provide the commander with an objective evaluation of the effectiveness and efficiency with which his financial and related functions were being performed.

Scientific and Cryptologic Affairs Advisor. (U) Served as the principal advisor to the CDR, INSCOM and his staff on scientific and cryptologic matters. The office became vacant on 30 May 1986 when Dr. Edwin A. Speakman, the long-time incumbent, retired. In September 1986, the scientific and technical position was converted to Senior Executive Service (SES) status and retitled as Deputy Director for Policy and Development.

Public Affairs Officer (PAO). (U) Served as the Public Affairs Officer of INSCOM, advising the commander and staff on all public affairs matters.

Command Psychologist. (U) Served as the psychologist of INSCOM, advising the commander on matters pertaining to mental health and providing guidance on psychological factors pertaining to intelligence operations.

Command Chaplain. (U) Served as the chaplain of INSCOM, providing advice and assistance to the commander and his staff on religious, moral, moral leadership, and human self-development matters.

Personal Staff:

Inspector General (IG). (U) The IG, as member of the personal staff, inquired into and reported upon matters affecting the performance of mission and state of the economy, efficiency, discipline, and morale of every phase of activity which was within the sphere of responsibility of the commanding general and as

UNCLASSIFIED

prescribed by law. The IG Office consisted of the Plans and Analysis Division, the Inspections Division, and the Assistance and Investigations Division.

Staff Judge Advocate (SJA). (U) The SJA served as legal advisor to the CG, DCG, CofS, and all staff elements of HQ INSCOM and, as necessary, to subordinate elements of the command.

General Staff:

Deputy Chief of Staff, Force Integration (DCSFI). (U) The DCSFI was the newest member of the INSCOM general staff. The office was created in June 1986 as a result of the MERCURY GRAIL Study commissioned by the the Chief of Staff on 7 January 1986. Motivation for the study came from the increasing unease felt by the command group and staff throughout 1985 that INSCOM was executing responsibilities in combat and materiel developments that did not belong to the command and that, conversely, INSCOM efforts to acquire needed IEW materiel and systems were fragmented both in authority and process. The study found significant disconnects in INSCOM's processes for material acquisition. DCSFI was formed by merging elements of the former DCSSYS and DCSPPM to form a new staff element.

Deputy Chief of Staff, Personnel (DCSPER). (U) The DCSPER served as the principal staff officer for the administration of military and civilian personnel. Acted for the CDR, INSCOM in the direction, supervision, and coordination of plans, policies, and procedures for personnel administration, distribution, and management; maintenance of order and discipline; safety; welfare; morale; human affairs; and nonappropriated fund activities. Throughout FY 1986, DCSPER remained divided between the ADCSPER Military and the ADCSPER Civilian. The ADCSPER Military oversaw the Military Personnel Division and Plans and Proponency Division. The ADCSPER Civilian oversaw Human Resources Division, Equal Opportunity Program Division, and Civilian Personnel Division.

Deputy Chief of Staff, Operations (DCSOPS). (U) The DCSOPS was the principal coordinating staff officer responsible for current intelligence collection, production, electronic warfare, and counterintelligence, and security support operations. Provided operational policy guidance and direction, coordinated, and supervised current operations. Managed REDTRAIN direction; coordinated and supervised current operations. Managed REDTRAIN program as Army executive agent. Provided operationally oriented INSCOM interfaces between national, departmental, theater (echelon above corps), and tactical (echelon below corps); intelligence

UNCLASSIFIED

organizations. Served as the staff budget director (current and budget year) for allocation and employment of Program 2, 3, and 8 operational resources. Coordinated operational matters with Department of the Army, NSA/CSS, Department of Defense, DIA, CIA, FBI, joint/combined commands, other MACOM's, and other governmental agencies. Supervised command aviation activities. Prepared and coordinated command operational plans and managed command operational planning system; was command focal point for reserve affairs. Supervised command historical program. Exercised staff proponency over the Intelligence Exchange Support Center, the ROYAL CAPE SAP, and Administrative Survey Detachment. The office of the Intelligence Counterpart Fund (ICF) Management Officer remained within DCSOPS. The ICF Management Officer advised on all aspects of the control, administration, supervision, and utilization of ICF. The officer was accountable to and received technical financial guidance from the Special Finance and Accounting Officer.

(U) During FY 1986, a number of significant restructurings took place within DCSOPS. On 1 October 1985, the ADCSOPS-IS (Intelligence Support) was dissolved and a new office, ADCSOPS-OR, created. The new office consisted of a Current Operations Division (the old Intelligence Operations Center), a Geographic Division, and the Readiness Training (REDTRAIN) Division. The Geographic Division was designed to provide a focal point for handling all multidiscipline intelligence operational matters involving INSCOM headquarters and field units. However, implementation of the concept was dependent upon a level of resourcing that never materialized. Accordingly, ADCSOPS-OR was disestablished on 12 May 1986 and a restructured ADCSOPS-IS established. Concurrently, REDTRAIN was resubordinated to ADCSOPS, Plans and Training (P&T).

(U) On 2 January 1986, ADCSOPS-SIGINT/EW assumed responsibility for operating the Special Projects Office (formerly CRAZYHORSE Project Office), previously assigned to DCSSYS. The office was integrated into the existing staff aviation office to form a Staff Aviation/Special Projects Division.

(U) In February 1986, the ADCSOPS-IMINT/E-O was redesignated as ADCSOPS IMINT/MASINT as a result of a decision within the intelligence community to substitute the new term Measurement and Signature Intelligence (MASINT) for the old Electro-Optics designation. On 15 August 1986, the ADCSOP IMINT/MASINT Office was resubordinated to ADCSOPS-SIGINT-EW which became the ADCSOPS-Technical Operations (TO).

UNCLASSIFIED

21

UNCLASSIFIED

(U) Finally, on 15 April 1986, an Office of the Special Assistant was created. The development was necessitated by the fact that the position of DDCSOPS had become militarized, forcing the creation of a new civilian position within DCSOPS to provide for the needed continuity of operations.

(U) At the close of FY 1986, DCSOPS consisted of the following major divisions: Office of the Special Assistant, Project Coordination Office, Administrative Office, History Office, Reserve Affairs Office, ADCSOPS Plans/Training, ADCSOPS Counterintelligence (CI), ADCSOPS HUMINT, ADCSOPS SIGINT/TO, and ADCSOPS Intelligence Support.

Deputy Chief of Staff, Logistics (DCSLOG). (U) DCSLOG was the principal coordinating staff officer for logistics, and was responsible for integrated logistics planning policy; procurement/contracts; budgeting; distribution, storage, and maintenance of electronic equipment systems (less telecommunications); engineering; construction; support services; transportation; logistics oversight/compliance; and supply and maintenance management. The DCSLOG also had staff supervision of the Materiel Support Activity at Vint Hill Farms Station and the Maintenance Assistance and Instruction Team Activity based at Arlington Hall Station.

(U) During FY 1986, the organization of the DCSLOG consisted of the following: Supply and Services Division, Maintenance Division, Engineer and Housing Division, Fixed Station Engineering Division, Management and Plans Division, Contracts Support Office, and Administrative Office.

Deputy Chief of Staff, Systems (DCSSYS). (U) DCSSYS was the principal coordinating staff officer responsible for INSCOM materiel/systems development. DCSSYS represented INSCOM as the Army's materiel developer of fixed strategic signal intelligence systems and INSCOM operated fixed automated systems. DCSSYS also represented INSCOM in the materiel development process for systems to be used by INSCOM. The DCSSYS was divided into the Requirement Validations Division, Systems Division, and Budgets and Contracts Office. The position was discontinued in June 1986, and elements formerly assigned were resubordinated to DCSFI. (See Deputy Chief of Staff, Force Integration.)

Deputy Chief of Staff, Resource Management (DCSRM). (U) The DCSRМ was the principal staff officer in matters concerning management, financial management, and manpower management. The DCSRМ established and maintained administrative control of appropriated

UNCLASSIFIED

funds, exercised responsibility for manpower management and The Army Authorization Document System (TAADS), developed and supervised the implementation of force requirements, administered the structure and strength program, exercised control over the manpower and equipment survey programs, and reviewed and prepared financial and/or manpower annexes for operational and force development plans. In addition, the DCSRM exercised staff supervision over the Finance and Accounting Activity. The Special Finance Accounting Officer was established within DCSRM on 1 October 1984. The office provides disbursing services to activities utilizing Special Mission Funds (SMF) and Intelligence Contingency Funds (ICF). During FY 1986, DCSRM was composed of the following elements: Administrative Office, Budget Division, Finance and Accounting Division, Management and Analysis Division, and Manpower Division.

Deputy Chief of Staff, Plans, Programs, and Modernization (DCSPPM).

(U) DCSPPM was the principal coordinating staff officer responsible for INSCOM long-range and mid-range planning; force design and operational concepts; and resource program development, submission, defense, and evaluation. DCSPPM represented INSCOM in the conceptual and doctrinal aspects of the combat development process. Served as staff point of contact with other Army/DOD activities for force planning, combat developments, TENCAP planning, program submission, and force integration. At the beginning of FY 1986, DCSPPM consisted of the Concepts and Studies Division, Force Design and Integration Division, Programs Division, and Program Plans Division. In June 1986, DCSPPM was discontinued and its elements phased into DCSFI. (See Deputy Chief of Staff, Force Integration.)

Deputy Chief of Staff for Information Management (DCSIM). (U) The DCSIM was the principal staff assistant to the Commander, INSCOM for all matters pertaining to information management. The position was dual-hatted, since the DCSIM concurrently served as Director, U.S. Army Information Services Command, INSCOM (USAISC-INSCOM). DCSIM served as Program Area Director for command programs, budgets, and the Army Management System as it relates to telecommunications/automation. Discharged primary staff responsibilities for engineering, installation, and maintenance of INSCOM information systems. Exercised staff supervision over operation of the Defense Special Security Communication System (DSSCS), CRITICOMM, and other telecommunications activities of the command. Directed development of tactical information systems objectives concepts and requirements of the command. Directed development of tactical information systems objectives, concepts, and requirements within INSCOM areas of interest. Finally, the

UNCLASSIFIED

DCSIM exercised operational control over the USAISC Communications Center supporting USAINSCOM, Arlington Hall Station. The staff element also exercised control over the Automated Systems Activity and the Administrative/Visual Information Support Activity (A/VISA). A/VISA, formerly the Administrative/Audiovisual Support Activity, was redesignated on 1 January 1986 in compliance with DOD's redefinition of the term "audiovisual."

Command Security Office (CSO). (U) The Chief, CSO formulated, implemented, and supervised policies and procedures for personnel, physical, automation, and information security and acted as command and headquarters security manager, internal OPSEC manager, TEMPEST Coordinating Officer (TCO), and chief law enforcement official for INSCOM. Due to consolidation of headquarters elements at Arlington Hall, the small satellite CSO formerly maintained at Fort George G. Meade, MD, was closed in January 1986.

Oversight Matters. (U) On 30 June 1986, INSCOM Regulation 15-5, USAINSCOM Intelligence Oversight Board, was published. The regulation established a new mechanism for providing oversight to three functional intelligence areas (intelligence activities, fiscal management, and acquisition contracting actions) from three different role perspectives (policy, advisory, and compliance). The oversight board established by the regulation to advise the Commanding General, INSCOM on these matters consisted of DCSOPS, DCSR, DCSLOG, the Staff Judge Advocate, and the INSCOM Inspector General.²

MI Brigades. (U) During the course of FY 1986, planning continued to convert INSCOM's theater-level MI groups into brigades. This was part of a move to standardize theater-level support units, provide for wartime fill by reserve-component (RC) elements, and give intelligence units designations more readily intelligible to the rest of the Army. The first INSCOM group to be so converted was the 501st MI Group, which became the 501st MI Brigade (Provisional) on 15 April 1986. It was anticipated that the change would be formalized early in FY 1987. The 66th and 513th MI Groups were also scheduled for conversion to brigade status during 1st Quarter, FY 1987. INSCOM's two other theater support units, the 470th and 500th MI Groups, would be upgraded the following year. In addition, plans were underway to relocate the 500th MI Group from Japan to Hawaii. To facilitate this transition, the INSCOM Theater Intelligence Center-Pacific (ITIC-PAC) would be reassigned to the 500th MI Group as its Echelon Above Corps Intelligence Center (EACIC) on 1 October 1986.³

~~SECRET~~

Korean Developments. (U) Under the Army of Excellence (AOE) concept, Tables of Organization and Equipment (TOE's) of MI brigades in support of echelons above corps (EAC) are to be standardized. However, the 501st MI Brigade, when formally organized, would function in a unique environment. No U.S. Army corps-level intelligence assets were available in Korea, although intelligence support is available from other service elements and from Republic of Korea (ROK) sources. As a result, the 501st MI Brigade was allowed to operate under a theater-specific Modification TOE (MTOE), even though, under Army reporting requirements, this might present an appearance of "instant unreadiness."

(U) As a step to flush-out the ultimate brigade, the 532d MI Battalion (Provisional) was organized on 3 September 1986. The unit consisted of a Headquarters, Headquarters and Service Company and Company A, the operations company. Company A functioned as a scaled-down Echelon Above Corps Intelligence Center (EACIC), providing a 77-person intelligence center to the Eighth U.S. Army, an 18-person cell to the All Source Intelligence Center, Combined Forces Army (ASIC-CFA), and manning for the (b)(1) (b)(1) which serviced Tactical User Terminals (TUT 2. CFA, and the Third ROK Army (TROKA). The company was under the operational control of Field Station Korea. Additionally, two other companies were attached to the provisional battalion: the Headquarters and Headquarters Company of the provisional brigade, and the 332d MI Company, a tactical EW unit.⁴

(b)(1)

~~SECRET~~

~~SECRET~~

(b)(1)

(U) The 513th MI Group also underwent structural change. The Echelon Above Corps Aviation Intelligence Company (EACAIC) of the group's 202d MI Battalion was redesignated as the MI Battalion (Low Intensity) (Provisional) on 2 April 1986 and concurrently resubordinated to group headquarters. (The unit had already been attached to the 470th MI Group and deployed to CENTAM.) In June 1986, as the result of an IPR, the 641st MI Company, the group's clandestine collection element, was resubordinated from the 202d MI Battalion to group headquarters. Subsequently, a Service Support Activity was created within the headquarters to manage both clandestine and overt collection operations. In another action, it was found that the 203d MI Battalion had not been resourced under Army of Excellence (AOE). Initial planning was that only the 11th MI Company (Technical Intelligence) and its augmentation would continue to be active. However, DA approved the concept for a Foreign Material Intelligence Group in April 1986 which would assign the Army's technical intelligence and Opposing Forces (OPFOR) mission to a TDA unit, eliminating the need for a technical intelligence battalion. It was decided to place the Headquarters and Headquarters Company, 203d MI Battalion, minimally filled and with a new counterintelligence mission, under the operational control of the Commander, 202d MI Battalion.

(U) INSCOM's CONUS-headquartered Special Security Group was reconfigured to meet changing Army requirements for access to Sensitive Compartmented Information (SCI). During FY 1986, Special Security Detachments (SSD) previously assigned to Watertown, N.Y.; Fort Lee, Virginia; Fort Lewis, Washington; Yuma, Arizona; Automated Switching Centers Coltano and Hancock; and Okinawa were phased out. Functionally tailored detachments were opened in Los Angeles, California (for contractor support), and at the following Combined Training Facilities (CTF): Fort Dix, New Jersey; CTF Hamilton, California; CTF Austin, Texas; and CTF St. Paul, Minnesota. In addition, Combat Support Coordination Teams (CSCT)

~~SECRET~~

26

UNCLASSIFIED

One and Three were fielded in Korea. Control over the CSCT's had been a long-standing issue between Eight U.S. Army and INSCOM. The matter was resolved to INSCOM's satisfaction; it was decided that although these units were performing a tactical function, they still operated at echelon above corps (EAC). One Special Security Command, USAREUR, was eliminated by consolidating SSG assets in Europe under an O-6 at SSC EUCOM.

(U) Finally, INSCOM's 902d MI Group was drastically restructured. At the beginning of FY 1986, the group consisted of two geographic battalions (located respectively on the east and west coasts); one functional battalion involved in technical support services and two independent detachments. These elements were realigned to form a counterintelligence/counterespionage battalion, with headquarters at the Presidio of San Francisco, California; a counterintelligence/security battalion at Fort Meade, Maryland, which operated in support of Army Special Access Programs (SAP); and a counterintelligence technical services support battalion, also at Fort Meade. However, the new structure was found less than adequate to meet the Army's needs. Agents assigned to the SAP-oriented battalion found that their offices were involved in counterespionage cases and vice-versa. Moreover, approximately half of the personnel of the west coast-based counterespionage battalion were located on the east coast and no less than three quarters of them were east of San Antonio, Texas. The conclusion of DCSOPS was that "simply from the viewpoint of location, the CI Battalion is in the wrong place; there is no justification for it being in San Francisco...." By the end of FY 1986, a concept plan to combine the CI/CE Battalion and the CI SAP Battalion at a Fort Meade location was under study.⁶

Headquarters Consolidation. (U) Headquarters, INSCOM was successfully consolidated at Arlington Hall Station during 2d Quarter, FY 1986. The action involved the movement of approximately 180 spaces formerly assigned to INSCOM headquarters and support elements at Fort George G. Meade, Maryland. In actuality, however, faces did not automatically accompany the shifted spaces: clerical employees generally preferred to find new positions in the Fort Meade area, and a number of military personnel chose reassignment. As a result, the Counterintelligence and HUMINT sections of DCSOPS suffered a temporary loss of up to half of their authorized personnel strength when they made the transition from Fort Meade to Arlington Hall. The fact that Fort Meade elements moved into facilities in Building 1, forcing long-established offices to relocate into new offices in a refurbished Building "A", caused further disruptions. Turbulence caused by the reshuffling of people from building to building and the lack of available telephone lines did not stop until August 1986.⁷

RESOURCES AND MANAGEMENT

Operations and Maintenance, Army (OMA) Funds. (U) FY 1986 was an extraordinary year due to the Gramm-Rudman-Hollings (G-R-H) legislation which resulted in a \$9,892 million reduction to INSCOM's funding profile. Overall budget execution was much improved from FY 1985 with yearend turn-ins totaling \$3.3 million of which \$1.4 million was INSCOM funds. Recapped below are yearend returns to include G-R-H.¹

Family Housing Units. (U) The U.S. Army Intelligence and Security Command operated and maintained family housing units at Arlington Hall Station and Vint Hill Farms Station. Funds received from Department of the Army for these units for FY 1986 were \$1,440 of which \$1,440 was obligated (99.8 percent).⁵

(b)(1)

~~CONFIDENTIAL~~

(b)(1)

Army Organizational Efficiency Review/Manpower Staffing Standards System (OER/MS-3). (U) The separate programs at the DA level have been combined at INSCOM into one program. The purpose of OER/MS-3 is to conduct functional organizational efficiency reviews for the purpose of determining appropriate organizational structure, staffing, and operating procedures.⁸

~~CONFIDENTIAL~~

35

UNCLASSIFIED

Memorandum of Understanding/Agreement (MOU/MOA) Program. (U) FY 1986, all MOU/MOA's maintained in the repository were reviewed, and DCSRM personnel were able to eliminate 39 documents and determine the status of the remaining documents. At the end of the fiscal year, the repository contained 120 MOU/MOA's of which 110 were current and 10 were awaiting final signatures of the parties involved. During the reporting period, 18 new or revised MOU/MOA's were processed.⁹

Personnel Security. (U) INSCOM achieved 100 percent execution of Non-Disclosure Agreements (SF189) by July 1986. This satisfied the OACSI DA requirement of July 1985 that all Army personnel (military and civilian) who have access to classified information will complete the form.¹⁰

Information Security. (U) In November 1985, a report was published which had a profound impact on the information security program within Department of Defense. The report was entitled, "Keeping the Nation's Secrets: A Report to the Secretary of Defense by the Commission to Review DOD Security Policies and Practices." Out of 63 recommendations by the "Stilwell Commission" to improve the information security program, two had been implemented by CSO by the end of FY 1986. The first was to implement a one-time top-to-bottom security inspection of all activities that handled or stored classified information; the second was to implement a "two person" rule in all areas where TOP SECRET and Special Access Program materials are processed or stored.

(U) In January 1986, the one-time top-to-bottom security inspection was conducted and the results were reported by 1 October 1986. Inspections of all elements directly subordinate to HQ INSCOM were conducted and formal reports were consolidated and forwarded to OACSI DA, noting that most security programs were operating within acceptable boundaries. Problems were highlighted in automation security, and it was noted that the INSCOM Operations Security Program and the INSCOM Terrorism Counteraction Program were being administered inconsistently in the field. The need for additional security resources and the need to perpetuate the security inspection process were also mentioned.

(U) The "two person" rule was established between INSCOM Special Security Detachment and Arlington Hall Station Garrison to require non-duty hour sign-in and sign-out of all personnel. MP's were then to conduct random patrols and to thereby serve as the second person in areas where people may be working alone.¹¹

UNCLASSIFIED

AUTOVON Funding Cut. (U) The Gramm-Rudman-Hollings fair share budget cut for INSCOM was \$29,590 from AUTOVON service. This was met by eliminating circuit UUBBKK24 from INSCOM AUTOVON service. This netted a savings of \$50,076, a \$20,486 savings over the amount requested by U.S. Army Commercial Communications Office (USARCCO.)¹²

HQ INSCOM STU-II Access. (U) The telephone access for AHS STU-II terminals was expanded to include AUTOVON. The incoming AUTOVON prefix 222 services the CG, CofS, DCSOPS, and DCSIM terminals while AUTOVON 286 accesses DCSSYS, DCSLOG, and Cdr, USASSG.¹³

USAISC-INSCOM Operations and Maintenance, Army (OMA) Funds. (U) a. PE 381055: FY 1986 funds in the amount of \$1,631K were allocated for supplies, TDY, and various support services. A further \$717K was provided in the program element for civilian compensation.¹⁴

b. PE 393111: Civilian compensation was \$126K and an additional \$9.5K was provided for TDY.

c. PE 814771: \$5K was allocated for military TDY for training.

USAISC-INSCOM Other Procurement, Army (OPA). (U) During FY 1986 all PE 381055 OPA funds were apportioned to NSA for budgetary management. Expenditure of primary interest to DCSIM was the communications equipment (ST2D-PC) for \$225K.¹⁵

Secure Voice. (U) INSCOM participation in DOD/DA STU-II and STU-III program is expected to provide the command with extensive secure voice capability to meet command requirements into the next decade. A total of 38 STU-II terminals have been installed command-wide, with another 45 scheduled for installation prior to the conclusion of the program. During FY 1986, the command identified secure voice requirements for 4966 STU-III terminals, the projected DOD-standard secure voice systems.¹⁶

Automation Budget. (U) The automation budget was cut \$548K in FY 1986 due to Gramm-Rudman-Hollings. The obligation rate for FY 1986 ADPE funds was 99.98 percent.¹⁷

Arlington Hall Station Office Automation. (U) During FY 1986, Life Cycle Management Division (LCMD) acquired responsibility for contractual support and inventory of office automation associated with Arlington Hall Station (AHS). All TELEX (Lexitron) equipment became government owned on 30 September 1986. This was due to the completion of the original Lease to Ownership Plan (LTOP) contract. All leased word processing equipment at AHS was brought out or

UNCLASSIFIED

scheduled for return to vendor. Peripherals for the four WANG alliance systems were purchased and will be used with the new VS65 systems due to arrive 1st Quarter, FY 1987.¹⁸

HQ Office Automation. (U) The Headquarters Office Automation (OA) Plan was approved by CofS INSCOM on 7 August 1986. The implementation of the HQ OA plan marks the beginning of HQ wide compatibility in data exchange through the eventual phase-out and conversion from diverse word processing systems. Additionally, HQ will have data exchange compatibility with the field, through acquisition of WANG OA equipment. As written, the plan initially implements the Intelligence Support, Information System (ISIS) architecture as provided in the ISIS Functional Description, a deliverable provided through GSA contract by the American Management Systems (AMS) Incorporated. Implementation at AHS will entail the acquisition of approximately 160 WANG PC's, 7 WANG VS mini computers, and associated printers and communications hardware and software. The new 160 workstations supplement the 50 already onsite connected to present WANG alliance systems. The WANG alliance central processing units currently in use will be replaced with VS minicomputers.

(U) A concurrent action with the acquisition of new WANG office automation equipment is the planned buyout of on-site leased WANG alliance peripheral devices. Since the architecture of the alliance does not readily fit the needs of INSCOM when compared to the cost per connection and power of the Vital Storage - Central Processing Unit (VS CPU), the leased alliances CPU's will not be retained. The associated peripherals, however, as serial devices can be readily used with the more powerful CPU. A further benefit of shifting from alliance to VS technology is the favorable effect of the hardware on the environment. Actual requirement for electricity will decrease since the new modular mass storage units associated with the VS require only 25 percent of the power needed for previous generation disk drive assemblies.

(U) Initial implementation of the system with phased training and conversion from the diverse word processors is delayed due to the inability of WANG to supply letter quality printers. Projected delivery date for the printers is 2d Quarter, FY 1987.

(U) Office automation took a big leap forward in FY 1986. Sixty-nine systems consisting of 447 workstations were approved for INSCOM units worldwide. Total cost of systems approved was \$4,227,048 with a 5-year cost savings estimated to be \$9,245,912. Productivity Enhancing Capital Investment Program/Quick Return On Investment Program (PECIP/QRIP) and Productivity Improvement Funds (PIF) funding programs have proven an effective means of obtaining unprogrammed funds for OA during FY 1986.¹⁹

UNCLASSIFIED

Arlington Hall Station Intelligence Data Handling Systems (IDHS) Node. (U) Because of the loss of the Army Threat Intelligence Production System's (ATIP) computer and no other requirements for IDHS computer support within the HQ INSCOM staff, the AHS IDHS Node was disconnected and declared excess. The AHS IDHS Node had consisted of a PDP/11/145 Mini-Computer System. With its demise, the components of the AHS IDHS Node were transferred to the Pentagon branch and the Fort Bragg branch.²⁰

Commanders' Conference. (U) The 1985 INSCOM Commanders' Conference was held at Fort Monroe, VA, during 29 October-2 November 1985. Billeting was at the Chamberlin Hotel. The theme of the conference was "leadership."²¹

IG Inspections. (U) Eleven major units encompassing 118 different subordinate elements at 77 different locations were inspected by the IG Office during FY 1986. Fifteen inspection reports were published, totaling 77 findings, 17 commendables, and 59 minor irregularities and deficiencies for internal correction.²²

IGAR's. (U) There was a slight increase in IGAR's processed by HQ INSCOM detailed IG's during FY 1986, to include those evolving from complaint periods conducted as an integral part of inspections. Ninety-one such IGAR's were completed in FY 1986 compared to 84 in FY 1985. Acting inspectors general at major subordinate units processed 65 additional IGAR's, representing 34 percent of the total IGAR cases as compared to 57 percent in FY 1985. Of the total 156 IGAR's processed by INSCOM IG/AIG's in FY 1986, 19 percent were substantiated, 41 percent were nonsubstantiated, and 40 percent were assistance cases.²³

IGAR Category. (U) The IGAR category "Conditions in Unit" was the leading INSCOM category with 22 cases (11 percent of the total). This also is the leading category in the Army as a whole. The next most common categories in FY 1986 were: "Assignment/Reassignment" (19 cases/9 percent); "Civilian Personnel Program" (14 cases/7 percent); "Travel and Transportation" (14 cases/7 percent); and "Pay and Allowances" (13 cases/6 percent).²⁴

Congressional Inquiries. (U) During FY 1986, 36 Congressional Inquiries were responded to, an increase of two over FY 1985. Of the 36 total inquiries, 11 were defined as assistance cases, 18 as nonsubstantiated, and 7 were substantiated.²⁵

IG Inquiries and Investigations. (U) There were seven inquiries and zero investigations completed during FY 1986. There was one inquiry at the close of the period.²⁶

UNCLASSIFIED

Department of the Army Inspector General (DAIG) Special Inspection of Procurement. (U) On 11 April 1986, INSCOM's special inspection of procurement was completed and resolved all but one finding. However, the DAIG-IO inspected selected INSCOM units during the period April-June 1986 and developed 14 findings. General officer bi-monthly DAIG Fix-It-Task Force meetings, chaired by the Vice Chief of Staff, were held to monitor the resolution of findings developed by DAIG-IO as a result of their inspection.²⁷

Army Award for Maintenance Excellence. (U) Two INSCOM units were recognized in the FY 1985 Chief of Staff, Army award for Maintenance Excellence Award Competition. Field Station Augsburg received the first place award in the heavy TDA unit category and Detachment Wobeck was the runner up in the light TDA unit category. The nominees for the next FY 1986 awards are: HHC 513th MI Brigade, light TOE unit; HHC 3d MI Battalion, medium TOE units; Detachment Wobeck, light TDA unit; and Field Station Berlin, heavy TDA unit.²⁸

RPMA Funding. (U) The FY 1986 RPMA programs for AHS and VHFS were funded as follows: AHS - \$5,229,751 and VHFS - \$7,236,000. Expenditures to reduce the backlog of maintenance and repair (BMAR) workload, all at VHFS, amounted to \$204,000. The proposed RPMA for FY 1987 will be as follows: AHS - \$6,177,000 and VHFS - \$7,236,000.²⁹

CG's Plaque and the First Annual Chief of Staff, Army Supply Excellence Award. (U) The Command Supply Inspections (CSI) team is responsible for the administrative requirements for preparation of the Annual Chief of Staff Army Supply Excellence Award and the Commanding General's Plaque for Supply Excellence. The CG's Plaque is presented to INSCOM units that score 98 percent or higher on their inspection. The 902d MI Group is the only unit that received the CG's Plaque during FY 1986.

(U) The purpose of the Annual Chief of Staff Army Supply Excellence Award is to provide an incentive at the organizational level to improve the effectiveness and efficiency of supply operations within the total Army force structure, while providing a management tool to ensure standardization of supply support functions and procedures. The program is designed to improve operations within the supply arena and the ability to support and sustain our forces while providing a means for recognizing exceptional performance and standards. INSCOM's Field Station Korea, which is part of the 501st MI Brigade, Seoul, Korea, achieved the runner-up position in the active TDA company category. The Joint Security Area Command Security Force, Korea, took first place.³⁰

~~CONFIDENTIAL~~

Leased Vehicles. (U) Effective 1 October 1986, with transition to begin 1 January 1987, HQDA approved conversion of all CONUS, to include Hawaii and Puerto Rico, non-tactical vehicles over to GSA leased vehicles.³¹

Special Mission Funds. (U) INSCOM processed and coordinated 19 operational projects dealing with issues concerning accountability for property and services purchased with Special Mission Funds. Eighteen operational projects were finalized which established property accountability for approximately \$2,284,000 for equipment procured with Special Mission Funds.³²

Phillip A. Connelly Award. (U) The dining facility at Field Station Berlin, Andrews Barracks, was nominated to represent INSCOM in the small category of the Phillip A. Connelly Awards Program for Excellence in Army Food Service. This category applies to dining facilities serving 200 persons or less per meal. The dining facility at Field Station Augsburg, Gablingen Kaserne, was nominated to represent the command in the large category, serving more than 200 persons per meal.³³

(b)(1)

(U) FY 1986 command personnel strength by unit, see appendix F.

Travis Trophy. (U) The Travis Trophy recognizes the most significant contribution in the field of operations, management, and administration by fixed field stations. NSACSS presented the 1985 award to the U.S. Army Field Station Berlin. See appendix J for a complete list of previous winners.³⁵

~~CONFIDENTIAL~~

UNCLASSIFIED

Director's Trophy. (U) During FY 1980, Vice Admiral B.R. Inman, DIRNSA, established a new award which would recognize the mobile SIGINT element making the most significant contribution to the cryptologic community during the calendar year. For 1985, DIRNSA chose the Army's 525th Military Intelligence Brigade, as the winner of the Director's Trophy. See appendix K for a complete list of the year's winner.³⁶

Public Affairs Activities. (U) The office of Public Affairs began a periodic critique of all INSCOM subordinate unit newspapers as part of a detailed review of unit Command Information during FY 1986. However, due to the departure of the Public Affairs Specialist who held the responsibility for the action, the review process was discontinued with the understanding that it would resume with the arrival of a new Public Affairs Specialist in FY 1987. The following is a list of INSCOM publications as of 30 September 1986.³⁷

<u>Publication</u>	<u>Unit Publisher</u>
<u>Alamo Wrangle</u>	USAFS San Antonio*
<u>Augsburg Profile</u>	USAFS Augsburg
<u>Red Dragon</u>	501st MI Group
<u>The Dagger</u>	66th MI Group
<u>Torii Typhoon</u>	USAFS Okinawa**
<u>Vanguard</u>	Vint Hill Farms Station
<u>Write On</u>	CONUS MI Group***
<u>Kunia Underground News</u>	USAFS Kunia
<u>Caribbean Sentinel</u>	USAFS Key West
<u>Voice</u>	USAFS Berlin****
<u>Diogenese Review</u>	USAFS Sinop

*The USAFS San Antonio newspaper which was a monthly publication in FY 1985 went to semiannual and then to quarterly publication.

**Discontinued when USAFS Okinawa closed.

***Name changed in mid-year to Tiger Tales.

****Discontinued early in year when editor of USAFS Berlin departed.

INSCOM Today. (U) The command overview briefing underwent its most major revision in more than 10 years during FY 1986. Under the guidance of the DCSOPS, COL (b)(6) the INSCOM Today Briefings were rewritten to effect more than 75 percent of the text and half of the visual aids. In the process of making the improvements, the briefing was reduced from 55 minutes to 25 minutes, without loss of meaningful content or understanding.³⁸

UNCLASSIFIED

Transfer-In-Status Program. (U) This program, implemented and tested in FY 1986, allows the in-status transfer of all SCI-cleared soldiers, regardless of rank, from one assignment/billet to another assignment/billet without having to wait for the clearance once the soldier is at his new assignment. A local security indoctrination is built-in: paperwork is reduced, and soldiers can work their SCI-related jobs upon arrival. This program directly impacts on improved support to INSCOM field stations, communication centers, and high-level staff assignments. There are some bugs to be worked out--changes of assignments enroute; lack of pinpoint assignments; total coordination within SSG--but the program is off to an excellent start. In billet management, there was a 6 percent increase (48,000 to 51,000 after annual reviews) of SCI billets in FY 1986 and the automation of the area is about one-quarter complete.³⁹

Request for Service (RFS). (U) The DCSIM prepared and processed 102 RFS actions during FY 1986. RFS actions are used to request circuit start up, circuit cancellation, and circuit changes.⁴⁰

Communications Service for INSCOM's New Building at Fort Belvoir. (U) IAW DOD Directive 4640.7 and DOD Instruction 5335.1, administrative telephone service for INSCOM at Fort Belvoir will be provided by Defense Telecommunications Service-Washington (DTS-W). All communications services provided will comply with DIAM PAAM 5-3 requirements.⁴¹

Army of Excellence (AOE) Reorganization. (U) This Army-wide action was accomplished to standardize unit organization within the Army. AOE changed MI groups to brigades within INSCOM. DCSIM provided tactical communications assistance during the formation of the MI battalion (imagery interpretation), which will be assigned to each theater MI brigade. The conversion of MI groups to brigades also involved the introduction of force modernization packages to improve the communication capability for the brigades. This action was initiated in 1984, and essentially replaced outdated equipment with new equipment.⁴²

Mobile Tactical Communications Center (MTCC). (U) The U.S. Army Signal Center announced significant changes to the fielding of the MTCC in 1980-90. Previously, INSCOM was to receive six units, each going to the groups/brigades. This policy was changed; all MTCC's would now be issued only to signal units. INSCOM will not own or operate the MTCC, a move that reflects the U.S. Army Signal Center's desire to keep the communication mission within signal units.⁴³

UNCLASSIFIED

Introduction of the KL-43. (U) DCSIM received the first MACOM level issue of the KL-43, an off-line crypto device used on dial-up telephones. The KL-43's were used during Exercise PRESENT ARMS 86 by exercise participants. DCSIM also conducted training sessions in the DCSOPS exercise cell, and to the U.S. Army Field Station Kunia operations section. The KL-43 will be issued to all MACOM's for off-line secure telephone use.⁴⁴

Combined Cryptologic Program. (U) Congressional cuts and budget constraints imposed in an effort to balance the budget have begun to affect INSCOM's programmed growth for the outyears. No new initiatives were added to the FY 1988 program within DU41B.

(U) Despite imposed constraints, INSCOM was able to get a new requirement into the program by consolidating a new INSCOM initiative for Agency Standard Hosts (ASH) with an ongoing NSA initiative for ASH's.

(U) Directly related to congressional cuts was the loss of funds for the HQ office automation project. All that remains of a 5-year programmed effort are the funds for FY 1988.⁴⁵

The Headquarters Information Center (HQIC). (U) The HQIC formally opened its door on 24 February 1986, at a ceremony presided over by MG Harry E. Soyster, Commanding General, USAINSCOM. A contract with American Management Systems (AMS) to operate the HQIC began in March 1986, at which time the HQIC became fully operational, providing technical support, consultations, educational assistance, and advice on personal computer software products, standards, and acquisition. The HQIC assists approximately 20 individuals per week. It is also involved in assisting specific HQ INSCOM staff elements which have complex, one-time requirements for either technical assistance or consultation. The HQIC's major undertaking is the in-house training of the HQ INSCOM staff in the use of the standard office automation equipment--WANG. A training plan was developed for the use of the OA equipment and training began on 30 August 1986.⁴⁶

INSCOM Journalist of the Year. (U) U.S. Army Field Station San Antonio was named "INSCOM Journalist of the Year" in October 1985.⁴⁷

CIVPER Classification Surveys. (U) The following position management and classification surveys were completed in FY 1986: ASA, Detachment O, DCSPPM/SAA, Officers' Club and NCO Club, DCSR, DCSLOG, USAISC-AHS, and major portions of DCSOPS, AVISA, and ITAC. Four hundred and eighty-six positions were reviewed during the conduct of these 10 surveys. The FY 1987 survey schedule has been published and distributed to all activities.⁴⁸

UNCLASSIFIED

New OPM Classifications. (U) Several new OPM classification standards were received during FY 1986. Those few that were applicable to the HS serviced population included the Personnel Clerical and Assistance Series (GS-203) and Paralegal Specialist Series (GS-950). Both standards were implemented well within the prescribed time frame of 180 days for application. A test application of the draft EMSGEG (Executive, Managerial, and Supervisory Grade Evaluation Guide) was conducted in July. This standard has not yet been published in final form by OPM.⁴⁹

Performance Appraisal System. (U) The Department of the Army revised the performance appraisal system and on 23 May issued the Performance Management System to all MACOM's. This system set forth several major changes including employee coverage, rating forms, and summary rating levels. Training on the new system was provided by the Management and Employee Relations (MER) Branch to approximately 140 supervisors.

(U) There was a noted improvement in the timeliness and quality of performance appraisal: 65 percent of the Performance Management Recognition System (PMRS) ratings and 70 percent of the GS ratings were received within 60 days of the end of the rating period. The rate of delinquent appraisals decreased from 14 percent to 7 percent.⁵⁰

DA Permanent Part-Time Employment Program. (U) The DA goals for the Permanent Part-Time Employment Program (one position for every 80 permanent positions) were not met during FY 1986. However, at the time of submission of this report, the DCSRM, had agreed to allocate two permanent part-time positions to the AHS Garrison. With the allocation and subsequent fill of these positions in FY 1987, some progress is expected next year.⁵¹

DA Intern Training. (U) Ten DA interns graduated from the Intern Training Program during the fiscal year. Graduation from the program is based upon satisfactory completion of on-the-job training and formal training courses as outlined in their respective training program plans. The intern graduates were placed into permanent positions within the command.

(U) Nine DA interns were employed during the year to participate in a 2-year training program. The entry grade was GS-05 with promotion potential to GS-09 with the exception of two civilian personnel administrative interns. The total interns on board at the end of the fiscal year equals 18.⁵²

45

UNCLASSIFIED

EO (Equal Opportunity) and EEO (Equal Employment Opportunity) Complaints. (U) In FY 1986, two EO complaints and twelve EEO complaints and inquiries were processed. Of these, one EO complaint was resolved through the chain of command and two EEO complaints became formal and were sustained. One EEO complaint was resolved at the command level. The other was resolved after a U.S. Army Civilian Appellate Review Agency fact finding conference on 11 August 1986, was pending resolution at the end of the fiscal year. At the end of FY 1986, there were two active formal complaints of discrimination within the command.⁵³

Purple Heart Recipient. (U) SGT (b)(6) of the 766th MI Detachment was awarded the Purple Heart Medal in a ceremony held on 23 July 1986 for wound received during a terrorist attack on the La Belle Discotheque in Berlin-Steglitz during the early morning hours of 5 April 1986.⁵⁴

Contract Support Activity. (U) The activity came into existence on 21 May 1985 to perform a new mission acquired by HQ INSCOM, supporting the DCSLOG. The activity provides the required supervisory, technical review, staff guidance, and contract oversight necessary to act as Head, Contract Activity (HCA) for procuring supplies and services in support of classified intelligence operations; establishes and operates an activity to support CONUS requirements for secure intelligence procurement in accordance with appropriate guidelines stated in the Federal Acquisition Regulation (FAR), Defense and Army FAR supplements; establishes and operates sufficient activities to support INSCOM worldwide (OCONUS) requirements for secure intelligence procurements in accordance with appropriate guidelines stated in the Federal Acquisition Regulations and Defense and Army FAR supplements.⁵⁵

Safety Program. (U) The command goal in FY 1986 was to reduce accidents in all categories at least 10 percent over the FY 1985 rate. The emphasis on safety at all echelons of command resulted in reaching the overall 10 percent reduction despite a increase in Army military vehicle accidents. The command remained under the Armywide rate in all categories of accidents by a considerable margin.⁵⁶

Alcohol and Drug Prevention Program. (U) The Alcohol and Drug Counselling Officer (ADCO) position which had been vacant since April 1985 was filled in April 1986. During FY 1986, the Army instituted the Tobacco Cessation Program of which a major part was an antismoking campaign starting in July 1986. Smoking became prohibited in Army-controlled buildings, except where specifically authorized. Also in FY 1986, the Army and INSCOM started 100 percent testing for the virus that causes AIDS. Testing was almost complete by the end of the fiscal year.⁵⁷

UNCLASSIFIED

Implementation of the Enlisted Distribution Target Model (EDTM) and the Enlisted Distribution Plan (EDP). (U) The ODCSPER EDTM and EDP were enacted during the 1st Qtr of FY 1986 as a method of distributing the available force to the various MACOM's.

(U) MOS and grade imbalances, averages, and shortages will be distributed among the various MACOM's on a "fair share" basis. Each command's "fair share" will be determined based on DAMPL priorities, missions, and other factors. Assets will be distributed based on projected authorizations contained in the Personnel Management Authorization Document (PMAD), and should achieve a Minimum Acceptable Level of Fill (MALOF) at least to the MACOM level. Provisions have been made to selectively manage certain MOS's as required.⁵⁸

Enlisted Retirements. (U) Thirty-two requests for voluntary retirement were approved by this headquarters in FY 1986. This figure does not encompass all enlisted retirements within INSCOM in that an unknown number were approved by other approving authorities as authorized by paragraph 12-2, AR 635-200. Other cases were processed by this headquarters, and approved by HQDA.⁵⁹

Enlisted Personnel Strength Posture. (U) Enlisted personnel posture by MOS (EW/Crypto and HUMINT MOS's) is shown in the table below.⁶⁰

Table 5. - Enlisted Personnel Posture for FY's 1985-1986.

<u>MOS</u>	<u>4th Qtr FY 1985 Auth/Asg</u>	<u>Percent Of Fill</u>	<u>4th Qtr FY 1986 Auth/Asg</u>	<u>INSCOM Percent Of Fill</u>	<u>DA Percent Of Fill</u>

Retention Conference. (U) INSCOM Retention Office hosted the FY 1987 HQDA CONUS Retention Conference at San Antonio, Texas, during the period 6 October through 10 October 1986. It was the largest such conference ever held, with over 260 attendees. The conference included speakers from the Soldier Support Center, Fort Benjamin Harrison, Indiana, and briefings by members of the Department of the Army Staff and U.S. Army Military Personnel Center in addition to items of specific interest. Attendees included all senior retention NCO's and principal reenlistment NCO's from INSCOM as well as representatives from FORSCOM, TRADOC, USAREUR, Health Services Command (HSC), and Information Systems Command (ISC) commands.⁶¹

Retention NCO of the Year. (U) SFC James Taylor, U.S. Army Field Station Kunia, Wahiawa, Hawaii, was selected as the INSCOM Retention NCO of the Year for FY 1985. SFC Taylor appeared before the HQDA Retention NCO Of the Year Board in January 1985, but was not selected as the HQDA Retention NCO Of the Year.⁶²

HQDA Retention Award. (U) USAINSCOM was presented the HQDA Reenlistment Award for FY 1985 at the meeting of the DA Reenlistment Steering Group in February 1986.⁶³

FY 1986 Retention Statistics. (U) a. The retention goals established by HQDA for FY 1986 were 426 Initial Term, 254 Mid Career, and 244 Career. Minimum acceptable achievement is 100 percent in each reenlistment category.

b. Actual INSCOM achievements:

	<u>Initial Term</u>	<u>Mid Term</u>	<u>Career</u>
Total FY 1986 per DCSPER	537	364	290
Percent achieved	126%	143%	119%

c. For FY 1986, INSCOM has an initial term quality point average of 79.6 compared to the Army goal of 66, and the Army-wide average of 69.9. INSCOM is the leading MACOM in retaining quality initial term soldiers.⁶⁴

UNCLASSIFIED

Retention Rates of CMF 98 and 33 (SIGINT) MOS for FY 1985. (U) In CMF 33 and 98, the Total Army retention rates for FY 1986 were down significantly from FY 1985. A breakdown is shown in the following table.⁶⁵

INITIAL TERM

	<u>Eligible</u>	<u>Reenlisted</u>	<u>Percentage</u>
USAINSCOM	699	301	43
Army Minus INSCOM	951	284	33
Total Army	1550	585	38

Army Minus INSCOM	337	217	64
Total Army	559	369	66

CAREER

USAINSCOM	86	74	86
Army Minus INSCOM	151	123	81
Total Army	237	197	83

Ninth Annual USAINSCOM Organization Day. (U) On 26 September 1986, Major General Harry E. Soyster, INSCOM Commander, officially recognized recipients chosen for their outstanding performance and meritorious service during FY 1986. Eight awards were presented, to include a new addition--the Commander's Plaque for Operational Achievement. Three of the eight awards went to OCONUS command, U.S. Army Field Station Kunia.

(U) The presentation included awarding Russell J. Heinen, Chief of Internal Review in the Office of the Chief of Staff, with the Albert W. Small Award; Captain (b)(6) Field Station Kunia, with the Colonel Richard F. Judge Military/Civilian Team Improvement Award for military recipient and Mr. (b)(6) (b)(6) INSCOM Liaison Detachment NSA, as the civilian recipient; (b)(6) U.S. Army Field Station Kunia, was presented the Jackie Keith Award; Ms. (b)(6) DCSLOG, with the Virginia McDill Award; (b)(6) DCSLOG, with the Equal Employment Opportunity Award; Mr. (b)(6) U.S. Army Field Station Kunia, with the Annual Wage Grade Award; Ms. (b)(6) (b)(6) DPCA, USAG VHFS, the nonappropriated Fund Employee of the Year Award; and Staff Sergeant (b)(6) U.S. Army Field Station Kunia, with the new Commander's Plaque for Operational Achievement.

UNCLASSIFIED

(U) The DCSOPS History Office, Public Affairs Office, and the Audiovisual Information Services Activity contributed significantly to the ceremony with an excellent 10-minute slide/audio presentation on Army Intelligence history and INSCOM.⁶⁶

INSCOM Grade Rollback Program. (U) During FY 1986, INSCOM continued its policy of directing that all nonsupervisory GS-11 and GS-12 positions be filled at the GS-09 level or lower in an effort to comply with the OMB/OPM directed 1.5 percent reduction in GS/GM 11-15 strength program. During FY 1986, INSCOM increased its GS/GM 11-15 population by just 5 positions, an increase of 0.63 percent. This slight growth occurred in spite of many new civilian authorizations, to include military to civilian conversions. INSCOM's GS-01 through GS-10 population increased by nine positions (a 1.10 percent increase). This balanced growth was due mainly to this innovative Position Management Program.⁶⁷

Management Employee Relations. (U) An average number of grievances, appeals, and IG complaints were processed in DCSPER during the year as follows:

- 4 - PMRS rating grievances
- 1 - PMRS informal rating grievance
- 1 - Management reclama on PMRS rating
- 1 - Congressional complaint
- 3 - IG complaints
- 1 - MSPB appeal
- 4 - Grievances
- 1 - Legal suit

(U) A somewhat larger than average number of awards were processed.

- 1 - National Intelligence Medal of Achievement (Central Intelligence Agency)
- 3 - Decorations for Exceptional Civilian Service
- 12 - Meritorious Civilian Service Awards
- 7 - Commander's Awards for Civilian Service
- 4 - Large monetary awards to include a Suggestion Award

(U) Several command letters were also published--one on "Delegation of Authority to Exigencies of the Service" and one on "Disciplinary Action for Civilians Following Violation of Administrative Security Regulations or Procedures." In addition to these letters, seven newsletters for supervisors were published on a variety of civilian personnel management topics to include a summary of the new Federal Employee Retirement System.⁶⁸

UNCLASSIFIED

INSCOM Average Grade. (U) The DA average grade ceiling assigned to INSCOM is 9.17. The FY 1985 average grade was 9.11. During FY 1986, the average grade increased 9.12.⁶⁹

New OPM Classification Guide for Managers and Supervisors Proposed.

(U) OPM proposed a tentative new classification standard by which supervisors and managers will be graded. INSCOM test applied the new standards to 20 positions. The results were as follows: 12 positions (60 percent) maintained their current grade; 6 positions (30 percent) were downgraded; and 2 positions (10 percent) were upgraded. It remains to be seen if this standard will ever be adopted federal-wide.⁷⁰

Development of a SES Position. (U) The only scientific and technical position at INSCOM was converted to the first SES position in September 1986. It is titled: Deputy for Policy and Development, ES-301. The position will report directly to the CG, INSCOM.⁷¹

AHS Task Force to Coordinate Relocation of INSCOM to Fort Belvoir.

(U) In June 1986, Arlington Hall Station established a task force to oversee the details from physical relocation to personnel relocation to Fort Belvoir in May, 1988. Civilian Personnel Training Division (CPTD) is the DCSPER representative on the task force. Civilian Personnel Division (CPD) responsibilities include informing employees of their rights regarding the move and attempting to resolve potential problems before the move actually occurs.⁷²

ISA/FGGM Realignment. (U) In July 1986 the decision was made to close the INSCOM Support Activity at FGGM. DCSPER was an administrative liaison for the activities at Fort George G. Meade. This action was accomplished in order to consolidate resources. Seven positions were abolished but all employees were placed in other positions with no loss of personnel.⁷³

Upward Mobility Program. (U) The Upward Mobility Program (UMP) has been a reporting item for the INSCOM Review and Analysis Program (IRAP) for the past 2 years. The FY 1985 represented a growth year in which the number of participants increased 100 percent (6 positions to 12 positions). Command emphasis continued to promote a significant increase in INSCOM participation in the UMP. During FY 86, the INSCOM goal of 13 positions filled was achieved for the first time. The goal subsequently was exceeded by two positions as a result of 4th Quarter, FY 1986 accomplishments. The program is an important element of the INSCOM affirmative action effort. The number of UMP participants has increased by 250 percent in the past two fiscal years.⁷⁴

UNCLASSIFIED

Intern Program. (U) The FY 1986 average quarterly fill rate for interns was 98-plus percent. This was the result of prior planning accomplished within each training activity and advance recruitment. A perfect record (100 percent) for the placement of intern graduates into permanent spaces was again achieved in FY 1986. For the sixth consecutive year, it was not necessary to request HQDA assistance to place any command intern graduates. Twelve interns graduated from the program during FY 1986. A major and continuing program initiative is the shifting of intern spaces from the command headquarters to field training sites. The reason for this initiative is that technical skills are best developed in the field rather than in MACOM headquarters staff activities. The headquarters to field ratio of spaces in June 1985 was 13:12 or 52 percent to 48 percent whereas in June 1986 the headquarters to field ratio was 10:16 or 38 percent to 62 percent.⁷⁵

Equal Employment Opportunity Program. (U) The following is a brief command overview of USAINSCOM's efforts in eliminating underrepresentation of women and minorities in mid and senior level positions in the workforce:⁷⁶

As of 30 September 1985

Morale and Welfare. (U) The Installation Morale, Welfare, and Recreation Fund (IMWRF) concept was approved in FY 1986 for implementation in FY 1987. The IMWRF consolidates all nonappropriated funds (NAF) and business operations on an installation incorporated into a single fiscal entity. This restructuring of both the financial and business principals allows the installation commander to apply all available NAF resources to Morale, Welfare, and Recreation (MWR) programs and facility requirements. It also provides the means to ensure the efficient use of resources in support of MWR Programs and to maximize the amount of NAF available for Capital Purchases/Minor Construction (CPMC) and NAF major construction. Each installation is required to submit a plan through channels to OSD for approval. The IMWRF is scheduled for implementation at AHS and VHFS on 1 October 1986.

(U) HQDA was successful in obtaining funds to support many of family programs. Vint Hill Farms Station and Arlington Hall Station received support through Programs Development Increment Package (PDIP). These funds supported many areas within Army Community Services (CS) and Child Development Services (CDS). Funds which were passed to the DPCA at VHFS were executed in an outstanding manner. Funds allocated to AHS were diverted to other requirements since they do not provide family support services. These funds will be diverted to VHFS in future years. Although \$122K was allocated to VHFS, only \$72K was actually obligated for the intended purpose. The installation used \$50K of these funds to help offset Gramm-Rudman-Hollings cuts in BASEOPS. Distribution of funds allocated by HQDA is as indicated.

55

UNCLASSIFIED

<u>PDIP Number</u>	<u>Purpose</u>	<u>VHFS</u>	<u>AHS</u>
1S6H	Army Family Child Care	\$ 60K	--
1S6K	Financial Planning	\$ 17K	\$ 7K
1S6G	Army Family Services	\$ 45K	\$15K
--	Family Advocacy	\$ 10K	--
TOTAL		\$132K	\$22K

(U) Construction on the community center at VHFS proceeded at a less than desirable pace. Although originally scheduled for completion in April 1986, the finishing touches were still being applied at years end. Occupancy is now planned for November 1986. A part-day preschool, which will ultimately be housed in this new facility, will open the 1986-87 term in the post chapel. Vint Hill Farms is a proactive installation and has implemented many new programs within the family support arena.⁷⁷

Command Officer Personnel Strength. (U) The command strength as of 30 September 1985 was 1,253 officers and 516 warrant officers. This was an increase of 18 officers and 50 warrant officers compared to the end of FY 1984 strength. As of 30 September 1986, the strength had increased to 1,304 officers and 552 warrant officers.⁷⁸

Badge System at 174th MI Company. (U) The 174th MI Company implemented a badge system in April 1986 to enhance security.⁷⁹

New Attorney Advisor Position. (U) During FY 1985, the CG USAINSCOM was designated a Head of Contracting Activity (HCA) by HQDA. This designation was in response to a need to form a dedicated element within the Army for secure environment contracting. The formation of this element was completed in FY 1986. The office of the SJA played a major role in its successful operation. The TDA for this HCA contains a space for a GM-13 attorney-advisor, the incumbent of which is under the technical supervision of the SJA. As of the close of FY 1986, the position was filled by Mr. Robert M. Echols.⁸⁰

Military Justice. (U) By General Order No. 6, signed by John O. Marsh, Jr., Secretary of the Army, dated 1 May 1985, the CG USAINSCOM was designated, pursuant to Uniform Code of Military Justice Article 22(a)(6), to convene general courts-martial. A breakdown of the military justice reports revealed the following statistics.⁸¹

INSCOM Worldwide Training Conference. (U) The annual INSCOM Worldwide Training Conference took place the week of 3 September 1986 at the Hyatt Regency Hotel, Crystal City, Virginia. The conference was designed around the theme "Values in Training." During the course of the conference, BG Walker expressed concern over the high turnover of trainers in INSCOM units. He noted that of the 34 personnel from INSCOM units in attendance, only six had been present at the previous conference. He was further disappointed that only one unit had elected to send its S-3. BG Walker messaged INSCOM units that "I believe we are putting good people in our training jobs. We just are not keeping them there long enough. Training is one of our highest priorities in INSCOM; we can't do our job without excellent training. We cannot fill these vital positions with someone who will only be in that job a short time while awaiting another job, or who is there for an orientation or OJT program." The general suggested that trainers be kept in their jobs for at least 18 months, or for the entire tour of duty in a short tour area.⁸²

REDTRAIN Training Program. (U) Although REDTRAIN has proved to be one of the most valuable training programs available to the unit commanders, both the Active Component (AC) and Reserve Component (RC) report problems in purchasing off-the-shelf equipment using REDTRAIN funds. This report is based on approximately 90 percent of the AC second half semi-annual REDTRAIN reports and 60 percent of RC second half reports. Several procurement officers indicate although AR 350-3 authorizes such purchases, it is not a recognized authority. Suggestions have been made to update AR 350-3 and logistics regulations to reflect correct procedures and references for procurement of off-the-shelf items using REDTRAIN funds.

(U) RC organizations continue to reflect major problems in the identification and tracking of REDTRAIN funds. AC units express a concern that REDTRAIN funds will decrease as TROJAN facilities come on line, pointing to the fact that most TROJAN facilities will have only four positions and will be available on a limited basis. AC units also expressed the concern that some organizations and personnel tend to forget that TROJAN is a COMINT facility and provides no training for either CMF 96 or non-intelligence personnel working in intelligence positions.

(U) At the same time, the RC reports indicate that Combined Training Facilities (CTF) continues to be both a blessing and a curse. Commanders acknowledge that the CF program offers invaluable skill refresher training for their personnel, but they are concerned that 12 days dedicated to CTF activities out of the available 39 training days seriously hampers their ability to conduct integrated unit and team training and poses potential major disruption as units start transitioning from current to RC CEWI structures.⁸⁶

Technical Intelligence. (U) In December 1985, the results of an ODCSPPM staff study was briefed to a headquarters Executive Committee (EXCOM) regarding a 513th MI Group proposal to modify the Tactical Technical Intelligence (TAC TECHINT) structure developed under AOE and the present TDA organization that supports the Army's worldwide Opposing Forces (OPFOR) Foreign Materiel for Training (FMT) Program. The EXCOM approved forwarding to HQDA a proposed structure that has a Foreign Materiel Intelligence Group (FMIG) directly subordinate to HQ INSCOM with the mission to provide centralized management and support for Army TAC TECHINT training, ensure operational readiness of active and reserve TAC TECHINT training, and manage the Army's OPFOR FMT Program. A concept plan requesting permission to reorganize will be submitted in January 1986 to HQDA IAW AR 310-49. The proposed activation date for the new structure is 4th Quarter, FY 1986.⁸⁷

UNCLASSIFIED

59

UNCLASSIFIED

Technical Languages Systems Incorporated (TLSI) Proposal. (U) INSCOM launched a MACOM-wide Command Language Program (CLP) effective 1 October 1985. In accordance with Regulation 350-3 (chapter 1, para 1-7d) responsibilities of subordinate commanders are formally established. Commanders have been tasked with language enhancement without additional technical or manpower resources. INSCOM headquarters has always regarded diagnostic testing as a key factor in units CLP methodology. INSCOM is considering a language training proposal to contract TLSI to provide diagnostic testing and remedial training to a controlled group of Russian linguists so that INSCOM can evaluate the potential of such a contracted program for command-wide applicability.⁸⁸

Army Biographic Repository. (U) On 27 September 1985 ACSI, DA approved a decision of CG, INSCOM to discontinue maintenance of the Army Biographic Repository at Fort Meade in FY 1986. On 29 October 1985, ADCSOPS-HUMINT forwarded a letter to DIA alerting them to this decision and seeking DIA comments/recommendations on ultimate disposition of the biographic files. On 10 December 1985, DIA/Directorate of Research (DR) notified INSCOM that they were interested in taking all the files. DIA is presently negotiating to reorient several Reserve programs to utilize the manpower necessary to integrate/utilize the material now in the Army biographic files. DIA biographic analysts will work closely with the reservists to ensure proper integration of the material. ADCSOPS-HUMINT anticipates transfer of the files to DIA to be completed by 31 March 1986. As soon as details and dates are worked out with DIA, all units that provide information to or use the biographic repository will be advised of new procedures to follow.⁸⁹

Military Construction Army (MCA) Program. (U) The Authorization Bill for FY 1986 MCA projects was signed into law on 3 December 1985 and the Appropriation Bill on 10 December 1985. Budget cuts will have a big impact on the INSCOM FY 1987 MCA Program, and as in FY 1986, we won't have FY 1987 MCA projects until Congress approves and appropriates the projects. The FY 1987 MCA Program is not final at DA yet, but it is anticipated that five INSCOM funded projects will be in the program totaling \$20,000,010. The MCA construction lists forwarded with the FY 1988-92 PARR submission will follow programming guidance from DA, limiting the INSCOM program as follows:

UNCLASSIFIED

<u>FY</u>	<u>GUIDANCE (\$000)</u>
1988	\$13,809
1989	\$10,504
1990	\$13,936
1991	\$34,098
1992	\$34,098

(U) The trend is toward increased fiscal restraint through the programming years. Greater emphasis on describing, validating, documenting, and justifying requirements will ensure INSCOM retains its share of construction funds to support the mission.⁹⁰

HQ INSCOM Facility at Fort Belvoir. (U) Congress has approved and funded the project, and design of the FY 1986 MCA project for a new headquarters at Fort Belvoir is nearly complete. The design firm has provided the Baltimore Division, Corps of Engineers, a final design package, and once review comments are incorporated, the design effort will be complete. Construction of the new facility should be complete in the Spring of 1988, with occupancy of the new facility anticipated in the Summer of 1988. The specific time schedule may change, but one fact remains--INSCOM HQ will move to Fort Belvoir.⁹¹

Non-Tactical Vehicles (NTV) Update. (U) HQ USAINSCOM received an initial allocation of 289 vehicles for procurement from FY 1986 funds based on a projected requirement of 446 vehicles. In order to obtain other critically needed vehicles not allocated to the command (i.e., fire trucks and ambulances), it was necessary to trade off 39 sedans and 1 bus to stay within the budgetary constraints imposed by Congress. This action reduced the HQ FY 1986 vehicle allocation from 289 vehicles to 244. Subsequent to the passing of the Gramm-Rudman-Hollings legislation requiring a balanced budget by 1991, the command received an additional reduction of 33 sedans and 3 buses from the FY 1986 allocation. This action reduced the command's FY 1986 vehicle allocation to a total of 208 vehicles for distribution command-wide. While this additional reduction may not have a severe impact on vehicle assets throughout the command, it will require an additional expenditure of funds to maintain selected overage/overmileage vehicles beyond their normal life expectancy. Consequently, the latest reduction will alter the initial planned distribution of vehicles to subordinate units and require organizations to become more dependent on leased vehicles.⁹²

61

UNCLASSIFIED

Dissolution of INSCOMBA. (U) The Board of Governors voted to dissolve INSCOMBA effective 1 September 1986. The association discontinued the paying of Death Grants and registering dependents for tuition assistance unless the member was eligible for the benefits on or before 31 August 1986. A trust was established to satisfy all tuition assistance requests from those dependents who were or became eligible on or before 31 August 1986. All INSCOMBA funds raised were discontinued immediately.⁹³

HQIC Newsletter. (U) The HQIC opened its door on February 21, 1986, at a ceremony presided over by MG Harry E. Soyster, Commander, INSCOM. Since the opening, HQIC personnel have produced a monthly newsletter that covers areas of interest to end-users and ADP personnel at HQ INSCOM, the field stations, and MI groups. Pertinent areas considered in the newsletter are mainframe software, personal computer software, hardware, educational advice, special articles, and security issues.⁹⁴

HUMINT/TAREX

HQ Personnel Constraints. (U) Management of the HUMINT discipline within INSCOM was adversely affected during FY 1986 by the consolidation of all elements at DCSOPS at Arlington Hall Station. Although the move greatly aided the functioning of DCSOPS as a whole, the impact on the elements previously stationed at Fort Meade was severe. Over 50 percent of the HUMINT staff declined to make the move. All clerical personnel resigned and opted to seek other employment at Fort Meade, and only 7 of the 22 military personnel assigned to ADCSOPS-HUMINT at the beginning of 1986 were still with the HUMINT staff when it became operational at Arlington Hall on 18 February. The situation was further aggravated by a lack of telephone lines in the new office spaces; a number of offices were without working telephones. This situation had been largely rectified by August. By the end of FY 1986, the HUMINT staff had edged back to a 75 percent fill rate of authorized strength.

(b)(1)

Counter-SIGINT Concept. (U) In 1985, the counter-SIGINT concept became the basis for INSCOM security support in the communications-electronics arena. The approach emphasized analysis of the potential SIGINT threat, assessment of existing vulnerabilities, creation of countermeasures, and evaluation of the success of the countermeasures. It deemphasized traditional COMSEC monitoring. However, this approach was not fully comprehended by other Army elements which INSCOM was tasked with supporting. The situation was exacerbated by the fact that under the Army of Excellence (AOE) concept, Army COMSEC personnel were reduced by 48 percent. Echelons-below-corps were essentially stripped of organic COMSEC monitoring capabilities: all COMSEC assessment people were removed from the division, and only a two-man team left at corps. As a result, INSCOM was deluged with requests for COMSEC monitoring that could not be supported. Nonetheless, the command group was convinced that the counter-SIGINT concept was the only viable way to approach the problem of securing Army communications. Efforts by subordinate elements in the field to develop or acquire new COMSEC monitoring equipment were disapproved as not being cost-effective. It was felt that the fact that all Army communications would be secured within a 5-to7-year period would create a situation in which the need for COMSEC monitoring would no longer exist.⁷

COMSEC Issues. (U) AR 380-40, Policy for Safeguarding and Controlling COMSEC Information, is the Army Regulation which provides physical security standards for the use, storage, transfer, transport, and destruction of COMSEC material. ACSI, DA is the proponent for the AR, but INSCOM and its predecessor have written and revised the document for over 25 years. Since 1982, when the regulation was last revised, COMSEC developments and national policy changes such as electronic keying, over-the-air rekeying (OTAR), the appearance of unclassified equipment designated as Controlled Cryptographic Items (CCI), and the COMSEC Endorsement Program made revision of AR 380-40 imperative. Action to update the document was initiated in April 1984. By the end of FY 1986, a coordinating draft of the revised AR had been distributed to HQDA, Army MACOM's, and INSCOM units and staff elements.⁸

~~SECRET~~

COMSEC Insecurities. (U) The INSCOM COMSEC Insecurity Program for the purpose of monitoring, reviewing, and when required, evaluating COMSEC insecurity reports initiated within DA was implemented in February 1981. The program serves primarily to ensure that all detected insecurities to COMSEC material are reported promptly to the officials responsible for evaluating the incidents and initiating action to minimize their security impact. These reports also help in identifying trends in insecurity occurrences, and in developing measures to prevent recurrences. Evaluations of insecurities are rendered by the cryptonet controlling authority (CONAUTH) in the case of key at the user level; by INSCOM, when the key is in distribution channels, when multiple Army CONAUTH's are involved, or when there is a personnel insecurity; by DIRNSA, for cryptographic insecurities, physical insecurities (COMSEC equipment and documents); and cases involving CONAUTH's from more than one service. Insecurities which involve a mix of NATO and U.S. short titles will be evaluated by the Security and Evaluation Committee of Allied Nations (SECAN).

(U) Total reported COMSEC insecurities, by MACOM, for CY 1984 and 1985 are as follows:

Table 7. - COMSEC Insecurities.

<u>Command</u>	<u>CY 1985</u>	<u>CY 1986</u>
USAISC	99	47
AMC	7	5
USAREUR	317	264
FORSCOM	122	109
HQDA	1	3
INSCOM	11	10
Joint	5	2
EUSAK	15	10
NGB	27	20
TRADOC	1	2
WESTCOM	9	6
SOUTHCOM	0	3
Other	<u>13</u>	<u>11</u>
<u>Total</u>	627	498

(U) As of 1 October 1985, 10 cases were yet to be opened, bringing the total CY 1986 cases to 508.⁹

Mobile TEMPEST Test System (MTS). (U) This project, an initiative to upgrade nine FETTS-160 TEMPEST systems and to fabricate a tenth system for deployment to the field, was first undertaken in 1979. Since that time, the scope of the project was expanded to include replacing all 10 overloaded vehicles mounting the system as well as upgrading mission equipment. However, this project has had a troubled history, and neither a vehicle nor a satisfactorily working system had been delivered to the command by the end of FY 1986.¹¹
