## Continuing Monitor Breakfast Invitation for Secretary Jewell

3 messages

Cook, David <dave@csmonitor.com>

To: "Kershaw, Jessica" <Jessica\_kershaw@ios.doi.gov>

Cc: "Kelly, Kate P" <Kate\_kelly@ios.doi.gov>

Hi Jessica:

Just a quick note to renew our invitation for Secretary Jewell to be the guest speaker at a Monitor-hosted breakfast for reporters.

President Obama's announcement Sunday that he would ask Congress to designate large areas of the Arctic National Wildlife Refuge as wilderness would be a timely peg for such a visit as would the Interior Department's release of its five-year plan outlining where federal waters will be open to or protected from offshore drilling.

Another peg was the double page ad the Choctaw Nation and the Chickasaw Nation ran in Sunday's Post on "The Tragedy of Broken Trust." A breakfast visit would give the Secretary an opportunity to update steps taken to fulfill the pledge she made in her 2013 speech in Reno to "make important progress" in relations between the federal government and Native Americans.

As you know from my earlier missives, we strive to provide our guest speakers with a venue characterized by civilized, in-depth conversation between newsmakers and journalists. The moderated nature of the discussion lends itself to exploring ideas without the "gotcha" aspects of a press conference.

Please let me know if you spot a morning in the Secretary's busy schedule when she could be our guest and we will quickly do the rest.

Thanks so much for keeping our invitation in mind.

All the best,

Dave Cook  
The Christian Science Monitor

Hi Dave -

Thanks so much for reaching out with a reminder on your invitation to the Secretary. This is something we're very much still considering and haven't forgotten. Rest assured that we intend to work with you and your team and I'll circle back on that.

Also - glad you noticed the Post's piece on the Broken Trust special. It also aired on NBC after Meet the Press yesterday - a very moving piece, indeed.

Jessica

**Re: Notice of Deposition of Secretary of Interior Sally Jewell in *The Chickasaw Nation and the Choctaw Nation v. The Department of the Interior, et al.*, No. Civ-05-01524-W**

Dear Ms. Tompkins,

I write to inform you of Plaintiffs' intent to take the deposition of Secretary Sally Jewell in the above referenced litigation. A copy of the Notice of Deposition for Secretary of Interior Jewell, which I am concurrently sending to all attorneys of record in this case, is attached. Secretary Jewell is a named defendant in the above referenced litigation in her official capacity as Secretary of the Interior. Secretary Jewell's testimony is of significant relevance to Plaintiffs, the Chickasaw Nation and the Choctaw Nation. Accordingly, Plaintiffs are entitled to take Secretary Jewell's deposition.

As our discovery deadline is February 15, I have noticed the deposition for February 12, 2014. I also have set the location of the deposition as the offices of the Department of Interior in order to accommodate Secretary Jewell. However, given the Secretary's busy schedule, we are happy to work with you to change the date, time and location of the deposition to the extent that it is necessary, within the confines of the February 15 discovery deadline. Please let me know if there is a date and location that is preferable.

Please feel free to contact me at [mburrage@whittenburrage.com](mailto:mburrage@whittenburrage.com), or 405-516-7800 if you have any questions.

January 22, 2015

## Secretary Jewell to Visit Choctaw High School in Mississippi

*Secretary to continue discussion regarding educational reform;  
tribal control of BIE-funded schools*

**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"I look forward to meeting with the teachers and students at Choctaw Central High School to hear about what's going well and to better understand where they may be facing challenges," said Secretary Jewell. "We have an enormous opportunity before us to improve educational outcomes for Native American youth and to ensure that students attending BIE-funded schools are provided an academically rigorous and culturally appropriate education, while at the same increase accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her Secretarial Order, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

**WHO:** Sally Jewell, U.S. Secretary of the Interior  
Monty Roessel, Director, Bureau of Indian Education  
Phyllis Anderson, Tribal Chief, Choctaw Tribal School System  
Willa Brantley, Director, Division of Schools  
David Germany, Director, Department of Schools  
Rosie Davis, Associate Deputy Director, Bureau of Indian Education Grant Schools

**WHAT:** Secretarial visit to the Choctaw School in Philadelphia, Mississippi

**WHEN:** Wednesday, October 29, 2014, at 8:00- 11:00 a.m. CDT

**WHERE:** Choctaw Central High School

150 Recreation Road

Choctaw MS 39350

**RSVP:** Credentialed members of the media interested in covering the visit are encouraged to RSVP HERE by October 28, 2014, at 5:00 p.m. CDT in order to receive logistical information for the multi-part visit, including a tour, discussions and media availability.

-----  
**Iacobucci, Francis** <francis\_iacobucci@ios.doi.gov> Mon, Oct 27, 2014 at 5:10 PM  
To: "Lambert, Lauren" <lauren\_lambert@ios.doi.gov>, Kate Kelly <kate\_kelly@ios.doi.gov>, Emily Beyer <emily\_beyer@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>  
Cc: EFB <erin\_frautschybarrows@ios.doi.gov>

Team - not sure if EFB's earlier emails came through, but the press should plan on meeting at the Pearl River Elementary School for an 8:30am beginning of the tour. Address is 101 Industrial Road, Choctaw, MS. It's a difficult address to find, as you might imagine, so here are directions provided by the Tribe:

Here are the directions we give visitors:

- If you're flying in from out of state, the most convenient airport is the Jackson International Airport. Start by turning right out of the airport on MS-475 N and head North towards I-25 N (Lakeland Drive). Turn right on I-25 and drive for approximately 45-50 minutes, turn right onto Hwy 16 E and drive straight through Carthage (Hwy 16 E).
- Travel through Edinburg (about 5-10 miles outside of Carthage). About 10 miles outside of Edinburg the Hwy splits to a 4 lane. This is the Choctaw Indian Reservation. On this road you will see the Pow-Wow Gas station on your right, Geyser Falls Entrance to your left, you'll continue straight about ½ mile until you reach the Choctaw Central High School Baseball Stadium. Take the road immediately past the stadium (Recreation Road). There will be a sign that indicates Tribal Headquarters to your left.
- You will travel down Recreation Road approximately ½ mile and the Choctaw Tribal Headquarters will be on your right. There will be three flagpoles in front of the office building.

Cc: "Iacobucci, Francis" <francis\_iacobucci@ios.doi.gov>, "Lambert, Lauren" <lauren\_lambert@ios.doi.gov>, Emily Beyer <emily\_beyer@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>

A couple more corrections from Heather and Misty:

Choctaw Tribal Council Offices  
101 Industrial Road

Bus departs promptly at 8:25

Phyliss Anderson, Tribal Chief, Mississippi Band of Choctaw Indians  
(Name spelled wrong and title correction)

Secretarial Visit to the Choctaw Tribal Schools in Philadelphia, Mississippi  
(Schools sometimes get confused for Choctaw Cty Schools)

Erin Frautschy Barrows  
Deputy Director for Advance  
Department of the Interior  
202.208.5078 (o)  
202.341.0273 (c)

Huh - speaks to the importance of running our advisory past the tribe first... and it looks like we missed that step here, eh?

Jessica - we don't think any of these changes merit re-advising to the whole list. Rather, Lauren can updated online and we can send the new version to Mississippi tomorrow?

Yep - LL, EFB and the tribal folks and I discussed this on another chain earlier after some of the logistics were flagged. I think we got jammed up on timing with this one but I agree, and we will make the changes online and I told LL to re advise to MS only tomorrow with the new/updated logistics.

DATE: FRIDAY, OCTOBER 31, 2014 7:00 AM EDT

### TODAY'S TABLE OF CONTENTS

#### DOI IN THE NEWS:

- + Secretary Jewell Visits Choctaw Schools.
- + Maitland Art Center Designated National Historic Landmark.
- + Deal Reportedly Reached To Recognize Native Hawaiians As Indian Tribe.
- + Audit Of Federal Open Data Catalogs Finds Issues With Interior's Data.
- + Review Finds \$20 Billion In Secret Purchases By Federal Agencies In Recent Months.
- + Additional Coverage: Navajo Nation Awarded Funds To Create School Systems.
- + Additional Protections For Wilderness Urged.

#### AMERICA'S GREAT OUTDOORS:

##### *National Park Service:*

- + Graffiti Found In Three More National Parks.
- + NPS Investing In Energy Efficiency, Water Conservation Projects At Washington Area National Parks.
- + New Washington Flood Barrier To Be Tested.
- + All-Sensory Trail In Maryland's Patapsco Valley State Park Opens.

##### *Bureau of Land Management:*

- + Sen. Murkowski Sides With State Of Alaska In ANWR Boundary Dispute.
- + Photographer To Present Artists-in-residence Photos At Anasazi Heritage Center.
- + BLM's Royal Gorge Field Office Seeking Input On Recreation Management.
- + BLM Plans Slash Burning In Grand County Through December.
- + Additional Coverage: Scholars Challenge Legal Basis Of Utah's Public Lands Campaign.
- + BLM Criticized For Failing To Provide Public Records.

##### *Fish and Wildlife Service:*

- + Animal Resembling Gray Wolf Reported At Grand Canyon.
- + Wyoming Gov. Mead Eyes Congressional Action On Wolf Delisting.
- + Scientists Warn Infection That Devastates Amphibians Could Spread To US.
- + Environmentalists File Lawsuit Over Cormorants
- + Western Energy Alliance Submits Comments On New FWS Rules.
- + FWS Releases Draft Management Plan For James River National Wildlife Refuge.
- + Additional Coverage: FWS Proposes Listing African Lions.
- + Additional Coverage: FWS Seeks Protections For Snapping Turtles.
- + FWS Northeast Regional Director Calls For Stronger Coastal Protections.

##### *US Geological Survey:*

- + Additional Coverage: USGS Monitoring Lava Flow From Hawaii Volcano.

#### SECURING AMERICA'S ENERGY FUTURE:

**Renewable Energy:**

- + South Carolina Eyes Next Steps For Offshore Wind Energy.
- + Wind Project Pulled From California's San Bernardino Mountains.
- + Replacing Safety Netting At Solar Plant Could Have Prevented Bird Deaths.

**Onshore Energy Development:**

- + Interior's IG Report Warns Of Illegal Drilling On Federal Land.
- + Environmentalists Call On BLM's Farmington Field Office To Pause Issuing Drilling Permits.
- + To Help Democrats Keep Senate, Environmentalists Back Candidates Who Oppose Their Goals.
- + New Study Finds High Levels Of Air Toxins At Fracking Sites.
- + Additional Coverage: BLM Releases Environmental Study On ConocoPhillips Project In Alaska.

**Offshore Energy Development:**

- + Questions Raised About Offshore Fracking.
- + Additional Coverage: Shell Seeks More Time To Act On Arctic Leases.
- + Obama Administration Urged To Bar Drilling In Arctic Ocean.

**TACKLING AMERICA'S WATER CHALLENGES:**

- + BOR Makes WaterSMART Grants Available.
- + EPA Questions Northwest Area Water Supply Plan.

**EMPOWERING NATIVE AMERICAN COMMUNITIES:**

- + Native Yale Law Students Honor BIA Head Washburn.
- + Casinos Proliferate Under Obama Administration.

**TOP NATIONAL NEWS:**

- + Obama Campaigns For Michaud In Maine Gubernatorial Race.
- + Three GOP Senators Press President To Hold Off On Unilateral Immigration Moves.
- + Economy Grew At 3.5% Rate In Third Quarter.

**EDITORIAL WRAP-UP:**

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

**BIG PICTURE:**

- + Headlines From Today's Front Pages.

**WASHINGTON SCHEDULE:**

- + Today's Events In Washington.

**LAST LAUGHS:**

- + Late Night Political Humor.

**DOI in the News:**

**SECRETARY JEWELL VISITS CHOCTAW SCHOOLS.** The [AP](#) (10/30) reports that Interior Secretary Sally Jewell praised the Choctaw tribal schools in Mississippi during her visit on Wednesday. Jewell said "much of the success of the Choctaw School System can be attributed to the tribe's hands-on approach, with the chief and tribal council virtually serving as the school board." Jewell said, "In many other communities we don't see that. We don't have engagement between tribal leaders and the schools. Sometimes we run the schools. We run them out of Albuquerque, New Mexico or Washington D.C., and the schools may be all the way across the country."

Coverage by the AP was also picked up by the [Washington Times](#) (10/31, 373K), the [Hattiesburg \(MS\) American](#) (10/30, 34K), [KNOE-TV](#) Monroe, LA (10/31, 2K), [WKRQ-TV](#) Mobile, AL (10/31, 37K), [WSFA-TV](#) Montgomery, AL (10/31, 30K), and [WDBD-TV](#) Jackson, MS (10/31, 152K).

**MAITLAND ART CENTER DESIGNATED NATIONAL HISTORIC LANDMARK.** The [ARTFIXdaily](#) (10/30) reports that "the Art & History Museums – Maitland's (A&H's) Maitland Art Center – has become the first

National Historic Landmark in greater Orlando and the 44th in the state of Florida." According to the article, "awarded on September 30, 2014 by Secretary of the Interior Sally Jewell, the designation applies to places that 'exceptionally illustrate or interpret the heritage of the United States.'" The article notes that "an official plaque dedication ceremony at A&H's Maitland Art Center will take place Jan. 8, 2015 at 11:30 a.m. with details to follow."

**DEAL REPORTEDLY REACHED TO RECOGNIZE NATIVE HAWAIIANS AS INDIAN TRIBE.** The Examiner (10/31, 1.01M) reports that "a deal has been reached between the Department of the Interior and the Obama administration to give federal recognition to native Hawaiians as an Indian Tribe." According to Free Hawaii TV, "the deal is an attempt to do an end run around overwhelming native Hawaiian opposition to being recognized as an Indian Tribe."

**AUDIT OF FEDERAL OPEN DATA CATALOGS FINDS ISSUES WITH INTERIOR'S DATA.** The Sunlight Foundation (10/29, 3K) reports that it is "conducting a broad audit of agencies' sometimes-faithful attempts to comply with President Obama's open data executive order from 2013," but "while auditing the Department of the Interior's data catalog," it found that some data was inaccessible.

The Sunlight Foundation (10/30, 3K) reports that "the Department of the Interior's public data catalog is impressive." It notes that "there were 43,940 unique URL entries associated with these datasets, and quite a few of those point to geographic databases." However, "when we checked those URLs, we also found a variety of issues, from items that didn't exist at the provided URL to entries that pointed to local addresses, meaning the datasets are on agency computers rather than the Internet."

**REVIEW FINDS \$20 BILLION IN SECRET PURCHASES BY FEDERAL AGENCIES IN RECENT MONTHS.** WRC-TV Washington (10/31, 367K) reports that a "review of federal agency purchase records shows each major federal agency spends millions of dollars a year on 'micropurchases.'" It notes that the Interior Department "shared details about the 'micropurchase' items bought by their agency employees."

**ADDITIONAL COVERAGE: NAVAJO NATION AWARDED FUNDS TO CREATE SCHOOL SYSTEMS.** Additional coverage that "a \$200,000 check from the Interior Department will help jumpstart the Navajo Nation's efforts to take local control of Bureau of Indian Education-funded schools" was provided by the Navajo Times (AZ) (10/31, 66K).

**ADDITIONAL PROTECTIONS FOR WILDERNESS URGED.** For the "Pundits" blog of The Hill (10/31, Molvar, 241K), Erik Molvar, who directs the Sagebrush Sea Campaign for WildEarth Guardians, writes that "additional wilderness preservation can be an integral part of solving the global biodiversity crisis by anchoring a network of protected reserves." However, he argues that "we need to be designing such networks at the scales of ecosystems and regions, along natural boundaries, rather than the traditional political borders of states, counties and agency jurisdictions." Molvar also notes that "with economic research pointing to greater job and business growth in rural Western counties with the greatest area of protected public lands, the best interests of jobs and the environment have come into alignment."

## America's Great Outdoors:

### *National Park Service:*

**GRAFFITI FOUND IN THREE MORE NATIONAL PARKS.** The AP (10/31) reports that the NPS says "it has found more graffiti in some of the West's most scenic locations in a case that sparked an uproar on social media last week." Rangers say "they've now confirmed images in Joshua Tree in California and at two more Colorado locations, bringing the total number of tagged parks to eight."

Coverage by the AP was also picked up by the Washington Post (10/30, 4.9M), the Charlotte (NC) Observer (10/30, 572K), the Houston Chronicle (10/31, 2.47M), the Denver Post (10/31, 1.12M), the Salem (OR) Statesman Journal (10/30, 23K), Yahoo! Finance (10/31, 9.7M), WJBK-TV Detroit (10/31, 166K), KCNC-TV Denver (10/30, 74K), and KTVZ-TV Bend, OR (10/31, 1K).

Also reporting on the story is the Denver Post (10/31, Cotton, 1.12M).

Additional coverage of identification of the suspect was provided by Reuters (10/31, Gorman), the Deseret (UT) News (10/31, 538K), the Bend (OR) Bulletin (10/31, 94K), KSL-TV Salt Lake City (10/31, 1.07M), and WDIV-TV

Detroit (10/31, 172K).

**NPS INVESTING IN ENERGY EFFICIENCY, WATER CONSERVATION PROJECTS AT WASHINGTON AREA NATIONAL PARKS.** The National Journal (10/31, Subscription Publication, 626K) reports that the NPS is "investing \$29 million in 81 individual energy efficiency and water conservation projects at national parks throughout the greater Washington region." According to the article, "the 23-year Energy Savings Performance Contract (ESPC) awarded at the end of September to Siemens Government Technologies, will allow the NPS to conserve energy and water with no upfront costs and to accrue cost savings into the future." NPS Director Jonathan B. Jarvis said, "The National Park Service is committed to managing the future health and sustainability of our national parks proactively through this kind of ambitious energy and resource conservation program. The parks in the greater Washington region involved in this effort are demonstrating the kind of leadership that other parks and public lands across the country can follow to reduce our carbon footprint, energy consumption, and water usage."

**NEW WASHINGTON FLOOD BARRIER TO BE TESTED.** The Washington Post (10/30, Ruane, 4.9M) reports that "Washington's long-delayed 17th Street flood barrier is scheduled to be tested Friday when officials from the Army and the National Park Service install the metal apparatus across 17th Street, near Constitution Avenue." According to the article, "the temporary barrier is designed to block floodwaters surging north from the Tidal Basin and flowing into downtown Washington." The test is intended "to demonstrate how the post-and-panel barrier is put in place."

**ALL-SENSORY TRAIL IN MARYLAND'S PATAPSCO VALLEY STATE PARK OPENS.** The Baltimore Sun (10/29, 857K) reports that "the first All-Sensory Trail in Maryland state parks officially opened Oct. 16." According to the article, "located in the Hilton Area of Patapsco Valley State Park, it is designed for the visually impaired." The All-Sensory Trail is a partnership between the state Department of Natural Resources and the NPS.

#### ***Bureau of Land Management:***

**SEN. MURKOWSKI SIDES WITH STATE OF ALASKA IN ANWR BOUNDARY DISPUTE.** The National Journal (10/31, Subscription Publication, 626K) reports that Sen. Lisa Murkowski is backing "a request from Alaska Gov. Sean Parnell that the federal government convey roughly 20,000 acres on the western boundary of the Arctic National Wildlife Refuge (ANWR) to the state." In a letter to Interior Secretary Sally Jewell, Murkowski urged the BLM "to quickly respond to the state's request for priority conveyance under the Alaska Statehood Act and the Alaska National Interest Lands Conservation Act (ANILCA)." Murkowski wrote, "This issue centers on what waters are considered part of the Canning River, which has long been designated and reaffirmed as the western boundary of the Arctic coastal plain. The state believes that the US Fish and Wildlife Service has effectively re-designated the separate Staines River, which empties into the Beaufort Sea several miles west of the Canning River, as a channel of the Canning, thereby shifting nearly 20,000 acres of the coastal plain lying between the streams into the refuge."

**PHOTOGRAPHER TO PRESENT ARTISTS-IN-RESIDENCE PHOTOS AT ANASAZI HERITAGE CENTER.** The Cortez (CO) Journal (10/30, 646) reports that "photographer Wayne Keene took on the challenge of capturing the sacred landscapes of Canyons of the Ancients National Monument through the lens of his camera as an artist-in-residence for the Bureau of Land Management." On Sunday, Nov. 2, Keene will "showcase these images during a multimedia presentation at the Anasazi Heritage Center in Dolores at 1 p.m." according to the article, "Keene's images, in black and white as well as color, capture the rustic landscapes of the monument while weaving elements of the archeological resources into many of the scenes." Marietta Eaton, Canyons of the Ancients National Monument/Anasazi Heritage Center Manager, said, "His keen eye for capturing lighting reveals the distinct contrasts between the landscape and the skyline. We're excited to share the images he captured with the public."

**BLM'S ROYAL GORGE FIELD OFFICE SEEKING INPUT ON RECREATION MANAGEMENT.** The Pueblo (CO) Chieftain (10/31, 79K) reports that the BLM's Royal Gorge Field Office is "seeking input on recreation management in the area and will host several focus group meetings."

**BLM PLANS SLASH BURNING IN GRAND COUNTY THROUGH DECEMBER.** The Sky-Hi Daily News (CO) (10/31, 728) reports that the BLM Kremmling Field Office is "planning to burn slash piles of lodgepole pine early November through December if weather conditions are favorable."

**ADDITIONAL COVERAGE: SCHOLARS CHALLENGE LEGAL BASIS OF UTAH'S PUBLIC LANDS**

**CAMPAIGN.** Additional coverage that "a new legal analysis asserts a successful Utah effort to claim federal land would fuel similar efforts among Western states and potentially end the public land system as it exists today, but it isn't likely to happen" was provided by the Deseret (UT) News (10/31, 538K) and KNRS-FM Salt Lake City (10/31).

**BLM CRITICIZED FOR FAILING TO PROVIDE PUBLIC RECORDS.** In an op-ed for the High Country (CO) News (10/31, 74K), Ray Ring writes that the BLM's "main Freedom of Information Act office appears incompetent or overworked." According to Ring, "its response to our request for public records can only be described as dysfunctional." He encourages "the head of the BLM, Neil Kornze, and his boss, Interior Secretary Sally Jewell, to fix the problems in the BLM's FOIA office."

***Fish and Wildlife Service:***

**ANIMAL RESEMBLING GRAY WOLF REPORTED AT GRAND CANYON.** The AP (10/31, Fonseca) reports that "an animal resembling a gray wolf has been spotted roaming the far reaches of northern Arizona, officials said Thursday, and tests are planned to determine exactly what it is." According to the FWS, "the animal has been seen and photographed in Kaibab National Forest north of Grand Canyon National Park with a collar similar to those used in a wolf recovery effort in the Northern Rockies." Agency spokesman Jeff Humphrey said that "the animal could be from that population of about 1,700 or a wolf-dog hybrid." Humphrey said "the animal should be treated as endangered until more is known about it."

Coverage by the AP was also picked up by the Inside Bay Area (CA) (10/31, 4K).

Also reporting on the story are Reuters (10/31), the Arizona Republic (10/31, 1.21M), the Tucson (AZ) Daily News (10/31), and the Cronkite News (10/31).

**WYOMING GOV. MEAD EYES CONGRESSIONAL ACTION ON WOLF DELISTING.** The AP (10/31, Neary) reports that "Congressional action appears to offer Wyoming its best chance at regaining state management of wolves, Gov. Matt Mead said Thursday." He said "Wyoming's best chance at regaining wolf management authority appears to be seeking congressional action specifying its wolf plan wouldn't be challenged legally." Mead said "his administration is still considering whether to appeal S. District Judge Amy Berman's order."

Coverage by the AP was also picked up by the Washington Times (10/31, Neary, 373K).

**SCIENTISTS WARN INFECTION THAT DEVASTATES AMPHIBIANS COULD SPREAD TO US.** The New York Times (10/31, Gorman, Subscription Publication, 9.9M) reports that "an emerging infection similar to one that has caused the extinction of hundreds of frog and toad species around the world is killing salamanders in Europe and could easily spread to the United States, with disastrous effects, scientists reported Thursday." According to the article, "writing in the journal *Science*, an international team of 27 researchers blamed the spread of the disease on 'globalization and a lack of biosecurity' and said the importation of the fire-bellied newt in the pet trade with Asia was the likely cause." The article notes that "Karen R. Lips at the University of Maryland, one of the authors of the *Science* paper, met on Thursday with Fish and Wildlife Service officials to talk about the new fungus."

**ENVIRONMENTALISTS FILE LAWSUIT OVER CORMORANTS.** The Courthouse News (10/30, 7K) reports that "environmentalists say there is no scientific basis for the extension of US Fish and Wildlife's 'shoot-on-sight' order that has permitted the killing of an estimated half million double-crested cormorants in the last 10 years." The group "Public Employees for Environmental Responsibility (PEER), and five biologists and birders sued the US Fish and Wildlife Service (FWS), and Director Dan Ashe in federal court." The complaint claims that the FWS "re-authorized the killing of tens of thousands of double-crested cormorants without conducting a proper environmental assessment."

**WESTERN ENERGY ALLIANCE SUBMITS COMMENTS ON NEW FWS RULES.** The Farmington (NM) Daily Times (10/31, 47K) reports that "the Western Energy Alliance submitted formal comments to the Fish and Wildlife Service about changes expected to increase protections for critical wildlife habitats." According to the article, "the organization submitted comments about two rules and one policy 'that would considerably expand the Endangered Species Act (ESA) beyond congressional intent and assert new federal powers to control land and economic activity.'"

**FWS RELEASES DRAFT MANAGEMENT PLAN FOR JAMES RIVER NATIONAL WILDLIFE REFUGE.**

The [Ammoland](#) (10/31, 4K) reports that the FWS has "released a draft plan to guide management of the James River National Wildlife Refuge (NWR) for the next 15 years." Alternative B, the agency's preferred alternative, would "pursue Service administrative requirements to expand public deer hunting, open the refuge to spring and fall turkey hunting, open the refuge to limited waterfowl hunting by youth, and promote youth involvement in all hunting opportunities."

**ADDITIONAL COVERAGE: FWS PROPOSES LISTING AFRICAN LIONS.** Additional coverage that the FWS is "seeking to enhance protections for the African lion" was provided by the [AllAfrica](#) (10/31, 12K), the [Hagerstown \(MD\) Herald-Mail Media](#) (10/31), and the [Somerset County \(PA\) Daily American](#) (10/31, 40K).

**ADDITIONAL COVERAGE: FWS SEEKS PROTECTIONS FOR SNAPPING TURTLES.** Additional coverage of the proposal by the FWS to place four kinds of freshwater turtle under the protection of the Convention on International Trade in Endangered Species of Wild Fauna and Flora was provided by [Reuters](#) (10/31, Liston).

**FWS NORTHEAST REGIONAL DIRECTOR CALLS FOR STRONGER COASTAL PROTECTIONS.** For "The Blog" of the [Huffington Post](#) (10/31, Weber, 11.54M), Wendi Weber, Northeast Regional Director for the FWS, writes that for wildlife resource managers, Hurricane Sandy was "a wake-up call to the vulnerability of the beaches, sand dunes, and coastal marshes that not only provide habitat for fish and wildlife but also protect local communities from flooding." According to Weber, "in the aftermath of Sandy, we have an unprecedented opportunity to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms." Weber is "confident the long-term benefits of building a stronger coast will far outweigh initial costs when it comes to protecting communities, sustaining wildlife and lessening the financial impact of damages resulting from future intense storms."

***US Geological Survey:***

**ADDITIONAL COVERAGE: USGS MONITORING LAVA FLOW FROM HAWAII VOLCANO.** coverage of the lava flow from a Hawaii volcano was provided by [CNN](#) (10/30, 14.29M), the [Salt Lake \(UT\) Tribune](#) (10/31, 479K), [TIME](#) (10/31, 23.35M), the [Christian Science Monitor](#) (10/30, 426K), the [Christian Science Monitor](#) (10/30, 426K), and [WDIV-TV](#) Detroit (10/31, 172K).

**Securing America's Energy Future:*****Renewable Energy:***

**SOUTH CAROLINA EYES NEXT STEPS FOR OFFSHORE WIND ENERGY.** The [AP](#) (10/31) reports that "a new study and a proposed law are seen as the next steps in making offshore wind energy a reality in South Carolina." Paul Gayes with the Center for Marine and Wetland Studies at Coastal Carolina University says "the state will match a \$750,000 federal grant to study which areas offshore are the most promising for wind farms." The federal money comes from the BOEM. Meanwhile, Sen. Greg Hembree "plans to reintroduce a bill allowing utilities who want to build demonstration wind projects to apply for rate increases to pay for them."

Coverage by the AP was also picked up by the [Charlotte \(NC\) Observer](#) (10/30, 572K), the [Houston Chronicle](#) (10/31, 2.47M), the [Greenfield \(IN\) Daily Reporter](#) (10/31, 31K), the [Florence \(SC\) Morning News](#) (10/31, 87K), and [WJCL-TV](#) Savannah, GA (10/30, 2K).

**WIND PROJECT PULLED FROM CALIFORNIA'S SAN BERNARDINO MOUNTAINS.** [KQET-TV](#) Los Angeles (10/31, 15K) reports that "a proposal that would have placed 71 wind turbines on the north slope of the San Bernardino Mountains has been withdrawn by its owner, according to the Bureau of Land Management." According to the article, "the 126-megawatt North Peak Wind project, which would have occupied about 16 square miles of the Juniper Flats area between Lucerne Valley and Apple Valley in San Bernardino County, was pulled from consideration by the BLM by its Austin-based owner E.ON Climate and Renewables last Friday." The article notes that "the project had drawn fierce opposition, including from two San Bernardino County supervisors who blasted North Peak Wind's possible impact on wildlife."

**REPLACING SAFETY NETTING AT SOLAR PLANT COULD HAVE PREVENTED BIRD DEATHS.** The [Riverside \(CA\) Press Enterprise](#) (10/30, Danelski, 396K) reports that the death of 64 birds at the NextEra Energy's Genesis solar plant earlier this month "could have been prevented had safety netting been replaced"

after an August thunderstorm, according to officials with the California Energy Commission. The birds died "after getting mired in an oily chemical in the plant's waste-water evaporation ponds," according to the U.S. Fish and Wildlife Service. The ponds "are being drained," according to the FWS, which is overseeing an investigation to determine "whether the company 'took reasonable measures' to protect the birds."

### ***Onshore Energy Development:***

**INTERIOR'S IG REPORT WARNS OF ILLEGAL DRILLING ON FEDERAL LAND.** The High Country (CO) News (10/31, 74K) reports that "a recent report from the Interior Department's inspector general highlighted the problem of illegal drilling on federal lands." The report, released late last month, "found that the increase in horizontal drilling means it's easier than ever for oil and gas companies to operate – inadvertently or not – in areas for which they don't have permission to drill." The article notes that "the unauthorized drilling means the government is losing out on royalty payments, and poses environmental risks." According to the report, the BLM has "a 'weak' policy for deterring lawbreakers and no reliable way of catching operators who drill illegally."

**ENVIRONMENTALISTS CALL ON BLM'S FARMINGTON FIELD OFFICE TO PAUSE ISSUING DRILLING PERMITS.** The Farmington (NM) Daily Times (10/31, 47K) reports that officials with the BLM say "they will organize an internal committee to respond to a letter from environmentalists that calls for the bureau to stop issuing oil and gas drilling permits until an environmental analysis is complete." The San Juan Citizens Alliance, the Chaco Alliance, WildEarth Guardians and the Western Environmental Law Center "sent a 34-page letter to the bureau on Monday outlining issues with BLM's Farmington Field Office and its approval of Mancos Shale drilling permits." A BLM spokeswoman, Donna Hummel, said the bureau "received the letter and will draft a formal response to its demands."

**TO HELP DEMOCRATS KEEP SENATE, ENVIRONMENTALISTS BACK CANDIDATES WHO OPPOSE THEIR GOALS.** The Wall Street Journal (10/31, Harder, Reinhard, Subscription Publication, 5.62M) reports that in an effort to maintain Democratic control of the Senate, environmental groups are spending a record amount of money this year and are supporting Democrats who oppose some of their key goals, including blocking the Keystone XL pipeline and ending the practice of fracking for oil and natural gas.

**NEW STUDY FINDS HIGH LEVELS OF AIR TOXINS AT FRACKING SITES.** NPR (10/30, Phillips, 2.22M) reports that a new study reveals "dangerous levels of air toxins near fracking operations," particularly the carcinogen formaldehyde in levels that exceeded federal safety levels. The study, published Thursday in the journal Environmental Health, also found high levels of the "deadly chemical hydrogen sulfide," which is known to kill oil field workers. It is noted that a 2010 air monitoring study by the Department of Environment did not find dangerous levels of air toxins at fracking sites, which has spurred industry groups to "question the methodology used in this most recent report."

The Albany (NY) Times Union (10/31, Nearing, 465K) reports that toxins from air and gas sites surrounding fracking sites are "much more dangerous" than threats of water pollution, according to the study's lead author, David Carpenter. As a result of the study's findings, Carpenter recommended that "buffer zones around natural gas wells... need to be expanded."

**ADDITIONAL COVERAGE: BLM RELEASES ENVIRONMENTAL STUDY ON CONOCOPHILLIPS PROJECT IN ALASKA.** Additional coverage that the BLM "released its final supplemental environmental impact statement for the proposed Greater Mooses Tooth (GMT1) oil and gas project within the National Petroleum Reserve-Alaska" was provided by the Oil and Gas Journal (10/31, 1K) and the Summit County (CO) Citizens Voice (10/30, 506).

### ***Offshore Energy Development:***

**QUESTIONS RAISED ABOUT OFFSHORE FRACKING.** WWL-TV New Orleans (10/31, 107K) reports that "fracking is also expanding offshore, in the Gulf of Mexico, with hardly anyone noticing." However, "there are questions...about how well the procedures are being tracked by regulators." According to the article, "environmental nonprofits complain that they can't find out when and where acids and other fracking chemicals are being shot down into the bottom of Gulf wells." In response to a request from the station, the BSEE "reported that 115 Gulf oil or gas wells, or 15 percent of the 785 that were completed and prepared for production in 2013, employed a hydraulic fracturing technique known as a frac pack – the less-destructive of two fracking methods used offshore." BSEE spokeswoman Eileen Angelico said that "frac packs account for the vast majority of the offshore fracking work, but the agency could not provide any data for other types of fracking or

well-stimulation.”

**ADDITIONAL COVERAGE: SHELL SEEKS MORE TIME TO ACT ON ARCTIC LEASES.** Additional coverage that Shell is asking the Obama Administration for five more years to explore for oil off Alaska's coast was provided by [Bloomberg BusinessWeek](#) (10/30, 2.52M) and [Bloomberg News](#) (10/30, Ward, 1.94M).

**OBAMA ADMINISTRATION URGED TO BAR DRILLING IN ARCTIC OCEAN.** For the "Congress" blog of [The Hill](#) (10/31, Ritzman, 241K), Dan Ritzman, Alaska Program director for Sierra Club's Our Wild America campaign, writes that "in the US, the Obama administration has done more than any previous administration to reduce emissions, improving fuel economy, investing in clean, renewable energy, and working to set the first-ever carbon pollution standards for dirty power plants." However, he notes that "even as the administration is reducing carbon pollution, it continues to advance an 'all-of-the-above' energy plan that promotes greater fossil fuel production, exporting these polluting fuels abroad, and opening up millions of acres of our nation's most treasured lands and waters to dirty fuel extraction." According to Ritzman, as the administration "reconsiders leasing in the Chukchi Sea and develops its next five-year offshore leasing plan," it has "the opportunity to put the Arctic Ocean off-limits to oil and gas drilling."

### Tackling America's Water Challenges:

**BOR MAKES WATERSMART GRANTS AVAILABLE.** The [WaterWorld](#) (10/31, 96) reports that the BOR is "inviting states, tribes, water and irrigation districts, and other organizations with water or power delivery to apply for a funding opportunity to cost-share on projects that conserve and use water more efficiently, increase renewable energy use and improve energy efficiency."

**EPA QUESTIONS NORTHWEST AREA WATER SUPPLY PLAN.** [KXMC-TV](#) Minot, ND (10/31, 1K) reports that the EPA has "come out against a proposal for getting the Northwest Area Water Supply project finished." The agency "supplied comments this week saying it is not in support of the Bureau of Reclamation's plan for treating water from the Missouri River that will be used to supply NAWWS with water."

### Empowering Native American Communities:

**NATIVE YALE LAW STUDENTS HONOR BIA HEAD WASHBURN.** For the [Indian Country Today Media Network](#) (10/30, 78K), attorney Peter d'Errico writes that "the Native American Law Students Association at Yale Law School held its first ever Alumni Achievement Awards Dinner October 23, 2014." He notes that "the recipient, Kevin Washburn (Chickasaw), class of 1993, is Assistant Secretary for Indian Affairs at the US Department of the Interior." In his piece, d'Errico explains why "Washburn well deserves the honor of receiving the Alumni Achievement Award."

**CASINOS PROLIFERATE UNDER OBAMA ADMINISTRATION.** The [Weekly Standard](#) (10/31, 519K) reports that the Obama Administration has "consciously made it easier for tribes to acquire the right to operate a casino on land far removed from their reservation." The article also notes that "since 1988, the Interior Department has approved 51 percent of applications to allow gaming on trust land. A third of those have been approved by the Obama administration."

### Top National News:

**OBAMA CAMPAIGNS FOR MICHAUD IN MAINE GUBERNATORIAL RACE.** Most reports on the President's visit to Maine, where he reportedly sought to energize the Democratic base by focusing on so-called pocketbook issues and cited evidence of recent improvements in the economy, focus on Obama's apparent unpopularity and his relatively limited campaign schedule, with Democrats cast as seeking to distance themselves from him and his policies. The President's trip was not mentioned on the network newscasts.

The Portland (ME) Press Herald (10/31, 140K) notes that the President's visit, as well as trips to the state by "other prominent Democrats, are designed more to motivate the Democratic base and ensure they show up on Election Day than to sway independent voters," adding that in a recent poll commissioned by the Portland Press Herald, "Obama's approval rating in Maine is just 39 percent," but "among voters who identified as Democrats, the president's approval rating was 75 percent." Similarly, the AP (10/31, Durkin) reports that Maine Democrats are hoping the President's visit "will energize their base and get supporters to get out and vote to unseat Republican Gov. Paul LePage." The President called on the approximately 3,000 [Mike] Michaud supporters in

attendance to "get everyone they know to the polls on Tuesday, saying the election is 'too important to stay home.'"

The Washington Post (10/30, Mufson, 4.9M) reported in its "Post Politics" blog that the President noted that "the last election was decided by an average of just 18 votes per precinct, and urged the avid Michaud supporters to bring others to the polls with them." Michaud campaign spokeswoman Lizzy Reinholt said that the President could help turn out "the voters most supportive of Michaud – seniors, women and young people," noting, "We are at a dead heat with Gov. LePage, and the outcome will be determined by who comes out for this election."

The Washington Times (10/31, Wolfgang, 373K) focuses on the President's criticism of Republicans, noting that he said that "he has no personal issues with Republicans — in fact, he said they're a lot like his own family members who simply 'have bad ideas' and aren't fit to be 'in charge.'" Arguing that Republican "economic principles have been tried and have failed," the President "urged voters to reject the GOP philosophy toward the economy and put Democrats in charge at both the state and federal levels."

The Bangor (ME) Daily News (10/31, Cousins, 166K) reports that while the President's visit "is sure to energize partisan Democrats...to some degree it gives Republicans a rallying point as well," given his "sinking national and state approval ratings."

Bloomberg News (10/31, Keane, 1.94M) reports that while the President has been "mostly limiting himself to raising money for Democratic candidates in the Nov. 4 midterm elections," he is "making a last-ditch effort five days before the mid-term elections to prod voters to the polls." However, with "an approval rating at 43 percent, according to the Gallup Poll, Obama is only scheduled to make one appearance before election day on behalf of a congressional candidate."

The New York Times (10/31, Davis, Subscription Publication, 9.9M) reports that the President is seeking to "shift the public focus from his administration's handling of the Ebola crisis to pocketbook issues that his advisers said play to Democrats' advantage," but "world events were...threatening to drown out his closing arguments in the campaign." Reuters (10/31, Holland) reports that in an effort to blunt Democratic losses next week, the President cited new government figures showing that the economy grew at a rate of 3.5 percent in the third quarter as an indication that his policies are working and that middle class will benefit from electing Democrats. Reuters notes however, that the case he made may not be enough to convince voters who have voiced concerns about his leadership, adding that his approval rating of about 40 percent has kept him away from states where control of the Senate will be determined.

The New York Times (10/31, Davis, Subscription Publication, 9.9M) also notes that the President's "itinerary keeps him far from the main battlegrounds of this year's elections as Democrats fight to keep Senate seats in competitive states Mr. Obama carried — like Iowa, North Carolina and Colorado — and in Republican-leaning places he lost, including Alaska and Louisiana."

Likewise, USA Today (10/31, Jackson, 9.86M) reports that while the Maine stop was "the latest in a string of appearances on behalf of gubernatorial candidates," as Democrats battle for control of the Senate, he "is currently scheduled to appear with only one Senate candidate: Gary Peters, the Democratic nominee in Michigan." The Los Angeles Times (10/31, Lauter, 4M) also contrasts the President's appearances in gubernatorial races in several battleground states with "the races for the Senate, most of which are taking place in conservative states where the president is deeply unpopular."

The Hill (10/30, Sink, 241K) noted in its "Ballot Box" blog that the President "said he was "a little wistful" that this would be his last time working to rally voters as president," and described the comment as "telling for a president who has been largely sidelined during the 2014 campaign cycle." The Hill added that the President's campaign schedule "is a reflection of his perceived liability for Democratic candidates, many of whom have openly sought distance from the president as his approval ratings have steadily eroded throughout the year."

McClatchy (10/30, Lightman, Subscription Publication, 27K) reports that during a Politico Playbook lunch Thursday, NRSC executive director Rob Collins said the President has been "the best surrogate" for Republican candidates in this election cycle. McClatchy added that to win control of the Senate, Republicans need a net gain of six seats, and the President's "sagging popularity has been a big boost." Collins and DSCC executive director Guy Cecil, who appeared with him at the lunch, "agreed...that a lot of races are too close to call."

**Todd: Democrats Are Running Toward The Clintons This Year.** Chuck Todd reported on NBC Nightly News (10/30, story 6, 1:50, Williams, 7.86M) that whatever the result of Tuesday's election "the Democratic Party is

going to be leaving Barack Obama behind and is about to become the party of the Clintons again, because that [is] who all of these Democrats are running toward this election year, Bill Clinton and Hillary Clinton."

**Tapper Calls Obama An "Albatross" For Democrats.** The Daily Caller (10/30, Weaver, 475K) reported that in an interview with conservative radio host Laura Ingraham Thursday, CNN host Jake Tapper described the President as an "albatross" for Democrats in the final days before the midterm election. Taper said that the President is "very unpopular. He's an albatross on Democrats. No question."

**Landrieu: South Is A Tough Place For Obama To Campaign This Year.** In a report on the Louisiana Senate race on NBC Nightly News (10/30, story 6, 1:50, Williams, 7.86M), Chuck Todd noted that while he has not been doing a great deal of campaigning in this election cycle, "the most omnipresent person on the campaign trail" is the President, who Republicans see as the issue that "will get them control of the US Senate." That dynamic is "more acute here in the South and it was something that Democratic Senator Mary Landrieu told me has more to do than his policies." Landrieu: "To be very, very honest with you, the South has not always the friendliest place for African-Americans. It's been a difficult time for the President to present himself in a positive light as a leader."

**Rothenberg: Obama Likely To See Worst Losses For Incumbent Since Truman.** In a blog post for Roll Call (10/30, 90K), Stuart Rothenberg wrote that the President "is likely to have the worst midterm numbers of any two-term president going back to Democrat Harry S. Truman." Rothenberg added that the President is "at least partially to blame" for the losses "because he failed to show leadership on key issues and never successfully moved to the political center."

**Obama's Closed-Door Fundraisers Draw Criticism.** The Washington Times (10/31, Wolfgang, 373K) reports that the President's appearances at party fundraisers in this election cycle have frequently been "held in secret and away from the view of the press," noting that before his appearance for Michaud, he "spoke at a closed-door 'roundtable' for the Democratic National Committee, an event that essentially is a fundraiser with a different title." According to the Sunlight Foundation, about half of the 64 fundraisers the President has headlined this year "have been entirely closed to the press." Critics say the closed-door fundraisers "are just one example of...an unacceptable level of secrecy and censorship from the Obama White House."

### **THREE GOP SENATORS PRESS PRESIDENT TO HOLD OFF ON UNILATERAL IMMIGRATION MOVES.**

The AP (10/31, Cassata) reports that on Thursday, GOP Sens. Lindsey Graham, John McCain and Marco Rubio, who were "responsible for comprehensive immigration legislation," urged the President in a letter to "hold off on any steps to shield millions of people from deportation." They wrote, "Acting by executive order on an issue of this magnitude would be the most divisive action you could take — completely undermining any good-faith effort to meaningfully address this important issue, which would be a disservice to the needs of the American people."

Politico (10/30, Kim, 977K) reported that the three "also questioned whether Obama had the legal authority to take such a wide-scale executive action." They wrote, "In this regard, acting by executive order on an issue of this magnitude would be the most divisive action you could take — completely undermining any good-faith effort to meaningfully address this important issue, which would be a disservice to the needs of the American people."

The Washington Times (10/31, Dinan, 373K) reports that the bill the three senators wrote "as part of the Gang of Eight senators would have granted quick legal status to most of the estimated 12 million illegal immigrants, with an eventual chance at citizenship." Obama "has repeatedly vowed to take unilateral action halting more deportations — but has delayed each time, under political pressure."

Meanwhile, The Hill (10/30, Lillis, 241K) reported that looking to "energize" Hispanic voters ahead of the elections, House Democrats "are making the case for bold executive action on immigration reform" but the message, rolled out on Univision.com on Thursday, "appears to be aimed as much at President Obama as it is the readers of the popular Spanish-language website."

**Grassley Questions Expensive Housing For Unaccompanied Minors.** The Washington Times (10/31, Dinan, 373K) reports that a contractor housing some of the unaccompanied minors from this summer "offers them a petting zoo with miniature ponies, a tilapia fish farm operation and guitar lessons," according to documents released Thursday by Sen. Chuck Grassley. He has "questioned whether the plush accommodations were a good use of taxpayers' money." In a letter to HHS Secretary Sylvia Burwell, Grassley wrote, "It is disturbing that HHS is funding such expensive facilities despite claiming to be unable to meet basic needs for UACs."

**Kerlikowske Looks To Reform CBP.** USA Today (10/31, Gomez, 9.86M) reports that CBP Commissioner Gil Kerlikowske "is trying to get his agency back on track amid controversies that range from deadly shootings by agents to the handling of children flooding across the border from Central America." He has "changed rules that govern when agents can use deadly force, created a new review system to investigate abuses, and is pushing to get body cameras on all agents." In an interview with the paper, Kerlikowske "said those measures attempt to reverse what had become an institutional practice of secrecy when faced with questions from outside."

In a nearly-10,000 word piece for Politico Magazine (10/30, 6.67M), Garret M. Graff traces the rapid growth of Customs and Border Patrol since 9/11. He says that it has "become one of the nation's deadliest law enforcement agencies" during that time. He adds that "corruption and excessive force have also skyrocketed along with the massive hiring surge." Despite this, the agency's "response has been paralyzed by bureaucratic turf battles and the broken Senate confirmation process, which left CBP without a Senate-confirmed leader for five years." CBP "officials admitted during an internal meeting this past spring, that might take a generation to fix."

**ECONOMY GREW AT 3.5% RATE IN THIRD QUARTER.** The New York Times (10/31, Cohen, Subscription Publication, 9.9M) reports that the US GDP rose at a 3.5% annual rate during the 3rd quarter, according to data released Thursday by the Department of Commerce, "offering a strong sign that the economy's plodding growth may be picking up speed." The growth "was driven in part by an unusual spurt of federal spending, concentrated in defense, combined with robust exports and investment in business equipment."

The CBS Evening News (10/30, story 6, 0:20, Pelley, 5.08M) reported, "Good news tonight on the economy" as the government said the GDP grew 3.5 percent during the 3rd quarter. That is "stronger than economists were expecting, but still a little bit slower than the 4.6 percent rate in the 2nd quarter."

Bloomberg News (10/31, Stilwell, 1.94M) says that the Q3 figure, was above economists' expectations of a 3.0 percent increase. Following the 2nd quarter's 4.6 percent rate, it caps the economy's "strongest six months in more than a decade, as gains in government spending and a shrinking trade deficit made up for a slowdown in household purchases."

USA Today (10/31, Davidson, 9.86M) reports that together, "the second and third quarters produced the best six-month stretch for the economy since 2013" and "growth has now exceeded 3% in four of the past five quarters." However, "after including the disappointing first quarter, the economy has expanded just 2% so far this year, in line with its performance for most of the 5-year-old recovery."

The Wall Street Journal (10/31, Timiraos, Morath, Subscription Publication, 5.62M) generally hails the new data as good news, but said that it suggests that there are questions about whether the strong growth can be maintained in the 4th quarter.

The Christian Science Monitor (10/30, Trumbull, 426K) reported that the GDP figure is "a sign of progress against a backdrop of concerns about slow wage growth and difficulties for the wider global economy." The CSM says that the number is also "significant because it's the final overview of the economy to come out before Americans cast ballots in elections next Tuesday."

The Los Angeles Times (10/31, Lee, 4M) reports that the economy's "resilience will be tested in the coming months." While the new report "was clearly positive," economists "at the moment see GDP growth in the last three months of the year coming in at less than 3%." The Times says that if "contributions from government spending and net exports" to the GDP "fade in the near term" from their strong Q3 levels, "that leaves consumers and businesses to pick up the slack, and their ability to do so are question marks at the moment."

In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that the US economy remains resilient despite the heavy burdens imposed by the government. While the Journal hails the GDP numbers, it says that the Commerce report showed that private business investment remained muted, and for it to rise, Washington needs to reform.

**Stocks Up On GDP Report, Strong Corporate Earnings.** The AP (10/31) reports that the stock market climbed on Thursday "as investors were encouraged by better than expected economic growth and strong corporate earnings." The Dow Jones Industrial Average "surged" 221.11 points to 17,195.42, while the S&P 500 was up 12.35 points to 1,994.65. The Nasdaq Composite Index climbed 16.91 points to 4,566.14.

## **Editorial Wrap-Up:**

**NEW YORK TIMES. "The Prospect Of A Republican Senate."** In an editorial, the New York Times (10/31, Subscription Publication, 9.9M) says that the intraparty flare-up regarding Senate Minority Leader Mitch McConnell's suggestion that the ACA is unlikely to be repealed are a "pretty good indication of what life will be like in Congress" if the GOP takes the Senate. The Times says its not just that Republicans are "committed to time-wasting, obstructionist promises like repeal of health care reform," but that the party's leaders "have continually proved unable to resist pressure from the radical right."

**"Tunisia's Victory."** The New York Times (10/31, Subscription Publication, 9.9M) editorializes that while Tunisia "has made impressive progress," it requires "enlightened, constructive leaders and support from the West to continue" its path to a successful democracy.

**"Governor Cuomo's Power Play."** In an editorial, the New York Times (10/31, Subscription Publication, 9.9M) says that in response to the Long Island Power Authority's poor performance in the wake of Hurricane Sandy, Gov. Andrew Cuomo created a commission to improve the situation. However, "even before the commission got to work, it was clear that Mr. Cuomo was largely responsible for LIPA's failings, since he did not fill vacant positions on LIPA's board or appoint a permanent chief executive." With new reforms in place, Cuomo "can take some credit if the new hybrid arrangement works," but "must also accept responsibility for LIPA's failures if it doesn't."

**WASHINGTON POST. "Looking At You, Mr. Kim."** The Washington Post (10/31, 4.9M) editorializes that "no amount of damage control by North Korea" should prevent the UN Security Council from voting on the country's referral to the International Criminal Court for human rights abuses. The Post says "there is no justification for inaction."

**"Hitting The Snooze Button."**

**"For Arlington County."**

**WALL STREET JOURNAL. "Hillary Rodham Warren."** In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that Hillary Clinton's botched comments last week about businesses not creating jobs is a sign that she is tracking her party's sharp move to the left on economic issues. However, the Journal says that Clinton will have to work hard to gloss over the relatively pro-business record amassed by her husband during his time in office.

**"Obama Belittles Israel."** The Wall Street Journal (10/31, Subscription Publication, 5.62M) editorializes the Obama Administration's public embarrassing of Israeli Prime Minister Benjamin Netanyahu and Israeli Defense Minister Moshe Yaalon during the past week only serves to create further distance between the US and Israel and jeopardize the countries' relationship.

**"An Economy On The Verge."** In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that the US economy remains resilient despite the heavy burdens imposed by the government. While the Journal hails the GDP numbers, it says that the Commerce report showed that private business investment remained muted, and for it to rise, Washington needs to reform.

**"David Cameron's Moral."** An editorial in the Wall Street Journal (10/31, Subscription Publication, 5.62M) praises British Prime Minister David Cameron for advocating tax cuts to promote work as opposed to raising taxes to increase welfare.

**"Beijing Loses Friends On Hong Kong."** An editorial in the Wall Street Journal (10/31, Subscription Publication, 5.62M) urges China to compromise with Hong Kong's pro-democracy movement, saying the current situation will make it impossible for Hong Kong Chief Executive Leung Chun-ying to govern the territory.

## Washington Schedule:

### TODAY'S EVENTS IN WASHINGTON.

White House:

**PRESIDENT OBAMA** — Holds a roundtable discussion at Rhode Island College; delivers remarks at Rhode Island College; departs Rhode Island; arrives at the White House; welcomes local children and children of military families to trick-or-treat at the White House.

**VICE PRESIDENT BIDEN** — Meets with senior advisors; travels to San Diego; attends an event for the Democratic National Committee.

**FIRST LADY MICHELLE OBAMA** — join the President in welcoming local children and children of military families to trick-or-treat at the White House.

**US Senate: Oct. 31 – Dec. 17. SENATE GALLERY PERIODICAL PRESS ELECTIONS** — Elections for the seven members Executive Committee of Correspondents of the Congressional Periodical Press Galleries will take place in January of 2015.

**US House: Sept. 22 – Nov. 11. — The House stands in recess until 2 p.m. Wednesday, Nov. 12.**

**Other: Oct. 30 – 31. DEPARTMENT OF COMMERCE, EDA – MANUFACTURING SUMMIT** — The U.S. Department of Commerce and the U.S. Economic Development Administration (EDA) will host a summit bringing together communities to discuss best practices for promoting American manufacturing. In May 2014, U.S. Secretary of Commerce Penny Pritzker announced the 12 communities that were designated as Manufacturing Communities as part of the Investing in Manufacturing Communities Partnership (IMCP) initiative. At the IMCP Summit, representatives from each of the 12 designated communities will discuss their efforts and progress. Speakers include: Jason Miller, Deputy Director, National Economic Council and Special Assistant to the President for Manufacturing; Bruce Andrews, Deputy Secretary, U.S. Department of Commerce; Jay Williams, Assistant Secretary, U.S. Department of Commerce for Economic Development Administration. Closing remarks and special announcement delivered by Bruce Andrews, Deputy Secretary, U.S. Department of Commerce 11:45 a.m. U.S. Deputy Secretary of Commerce Bruce Andrews will make an announcement. Deputy Secretary Andrews remarks are open to the media. To RSVP, please contact Sarah Horowitz at 202-482-4883 or shorowitz@doc.gov Location: Herbert C. Hoover Federal Building Auditorium, 1401 Constitution Avenue NW.

**SAIS – FOREIGN FIGHTERS – RUSSIAN MONEY** — 10 a.m. – 11 a.m. Foreign Fighters, Russian Money, & Ethnic Tensions. The Center for Transatlantic Relations at SAIS will host Senator Chris Murphy (D – CT) for a discussion on the need for U.S. re-engagement in the Balkans. Senator Murphy recently returned from a trip to Kosovo, Serbia, Croatia, Albania, and Montenegro, where he met with government officials, local businesses, and members of the public to discuss U.S. relations in the region. Daniel S. Hamilton, Executive Director of SAIS Center for Transatlantic Relations will moderate the discussion. Location: Kenney Auditorium, Nitze Building, 1740 Massachusetts Avenue NW.

## Last Laughs:

### LATE NIGHT POLITICAL HUMOR.

**Seth Meyers:** "Apple CEO Tim Cook wrote an article this week coming out as gay and saying that he's tried to maintain a basic level of privacy. After Cook came out as gay, a member of Russian Parliament has called for him to be banned from Russia for life. At which point, everyone in Ukraine came out as gay."

**Seth Meyers:** "North Korea released photos of Kim Jong-un sitting in the cockpit of a fighter jet. Said Kim Jong-un, 'I was standing!'"

**Seth Meyers:** "Michael Bay is reportedly in talks to direct a new film about the Benghazi scandal. Said Bay, 'It will be an honest depiction of the events as they happened. Also, Hillary Clinton will be played by Megan Fox.'"

Hi, Kevin,

Thank you—this is helpful context. And I appreciate you sending along my questions and will look forward to hearing more; the best number for someone to reach me at is [REDACTED]

Regards,  
Sierra

On Mon, Oct 20, 2014 at 12:19 PM, Washburn, Kevin <kevin.washburn@bia.gov> wrote:

Hi Sierra - I am not terribly inclined to weigh in on the Tex Hall story because I do not know all of the facts, but you have identified a major challenge for tribal leaders that has become more acute in the age of tribal consultation.

We ask a lot of tribal leaders who are willing to engage with us. That said, there are a lot of tribal leaders who have done well as a tribal leader at home despite a lot of Washington engagement. Two come to mind immediately. First, one who has been doing both jobs well for a very long time is Chairman W. Ron Allen of the Jamestown S'Klallam Tribe in Washington state. And there is another person, a younger tribal leader, who is almost finished with his service and "termed-out" so that he cannot run again who might be helpful. That is Chairman Robert Shepherd of the Sisseton Wahpeton Oyate in South Dakota. Given Robert's situation, he might be more free to speak about the challenges of national leadership while serving a local community. He is nearing the end of his second 2-year term. There are many others as well, but those two have been very successful in different ways.

My own tribe, the Chickasaw Nation of Oklahoma, has handled this challenge especially well. Governor, Bill Anoatubby has been our leader for more than 25 years. He has led our tribe well and presided over incredible growth by closely managing tribal affairs and serving as a first-rate CEO of our growing economic development efforts. While focusing on the core mission (very successfully), Gov Anoatubby has delegated a lot of national leadership to our Lieutenant Governor (and second in command) Jefferson Keel, who has served in numerous national roles and is the immediate past

President of the National Congress of American Indians. The way that Anoatubby and Keel have have split this workload seems, from my viewpoint at least, very productive. It has insured that our tribe is an active participant in national issues but without the cost of losing our leader for large periods of time. (For a bit of perspective, here at Interior, I oversee 7500 employees nationwide in the BIA, BIE and related offices. In contrast, Governor Anoatubby oversees more than 13,000 Chickasaw Nation employees. That is no small job.)

We will get back to you on the thoughtful Land BuyBack Program questions. We should be able to give you someone, but it likely will be someone more directly affiliated with the program. I have informed the LBBP staff, and the DepSec's office (to whom the LBBP reports) about your questions and underscored your looming deadline.

Kevin

## Washburn quote

Bergling, Timothy <timothy\_bergling@ios.doi.gov>  
 To: "Kershaw, Jessica" <jessica\_kershaw@ios.doi.gov>

Tue, Nov 25, 2014 at 11:07 AM

This is his transcript... the closest thing I see is near the end:

"The success of this Program is vitally important to the future of Indian Country. Consolidating and returning these lands to tribes in trust has enormous potential to improve tribal community resources by increasing home site locations, improving transportation routes, spurring tribal economic development, and preserving traditional cultural or ceremonial sites."

[REDACTED]. Whatever you guys want

Hello, my name is Kevin Washburn, Assistant Secretary for Indian Affairs at the Department of the Interior and a member of the Chickasaw Nation of Oklahoma.

As part of the Cobell Settlement the Land Buy-Back Program for Tribal Nations was created. I want to explain how you and Indian tribes can benefit from the Buy-Back Program.

As you may know, land fractionation is a serious problem in Indian Country. Some relatively small parcels of land have hundreds of owners, each of whom owns only a tiny fraction of the parcel of land. For many of these owners, the land has very little value and some of these owners cannot even be found. The result is that we have land within Indian reservations that is virtually impossible to use for any purpose because we cannot get the owners together to make a decision about the land. There are more than 245,000 such owners in Indian Country. And there are more than 3 million of these fractionated interests, spanning 150 Indian reservations.

In the Cobell settlement, President Obama and Congress decided to do something about this serious problem afflicting Indian country. In the settlement, Congress allocated 1.9 billion dollars to buy back many of these fractional interests and to restore them to tribal ownership. Through the Buy-Back Program, we will be contacting many of the owners of fractionated interests and offering to buy their interests back to restore them to the Indian tribe that governs the reservation where the land sits. The dollars made available to purchase fractional interests are not available forever under the Cobell settlement, the money must go back to Treasury at the end of ten years if it cannot be spent. That's something we don't want to happen.

So what can you do to help?

If you are an individual Indian money account holder, you may be a fractionated interest owner. If so, I urge you to learn more about the program and consider participating. If you have a friend or family member who is an owner, you can also help us educate them about this program. Under the Buy-Back Program, we will be offering many individual landowners the chance to be paid fair market value for these interests.

The Program is purely voluntary, and that means that it is up to each owner

to decide whether to participate.

If the land is worth only pennies -- and some of them have little monetary value because the interests are so little -- we will nevertheless make a base payment of \$75 per offer, regardless of the value of the land. Numerous owners have received thousands of dollars, and a few have received more than \$100,000 for their interests.

Of course, most of the values are smaller than that and the amount will be based on actual certified appraisals of the land at issue.

Perhaps best of all, this program will restore tribal sovereignty over Indian reservations. Every fractionated interest of a parcel that we buy through this program will be returned to the Indian tribe that governs the reservation where the land is located.

Let me repeat that:  
the land purchased will not go to the benefit of the federal government.  
It will be used to restore land to the tribe and the reservation.

One other important thing:  
For each sale, a portion of money will result in a separate contribution to the Cobell Education Scholarship Fund, which could eventually total up to 60 million dollars to help Indian students with college.  
This contribution is in addition to the amounts paid to individual sellers, so it will not reduce the amount landowners receive for their interests.

If you are interested in getting more information and potentially selling your ownership interests in your land so that they can be returned to your tribe, please call the Trust Beneficiary Call Center today at (888) 678-6836.

Good information is also available on the Program's website:

[www.doi.gov/buybackprogram](http://www.doi.gov/buybackprogram).

The success of this Program is vitally important to the future of Indian Country. Consolidating and returning these lands to tribes in trust has enormous potential to improve tribal community resources by increasing home site locations, improving transportation routes, spurring tribal economic development, and preserving traditional cultural or ceremonial sites.

I believe strongly that this work can and will succeed, but only with the help of Indian people. Let's work together to strengthen tribal sovereignty by restoring tribal land bases. Let's build stronger tribal economies by returning fractionated lands to tribes. Let's embrace this incredible opportunity to make a difference for generations to come.

Thank you for your help.

## Update Secretary Jewell to Deliver Remarks, Lead Panel Discussions at 2014 White House Tribal Nations Conference

---

**Beyer, Emily** <emily\_beyer@ios.doi.gov>

Tue, Dec 2, 2014 at 11:01 AM

To: "Schwanitz, Cary J" <cschwanitz@hearst.com>

Cc: "Interior\_Press@ios.doi.gov" <Interior\_Press@ios.doi.gov>, Nedra Darling <nedra\_darling@ios.doi.gov>

Hi Cary,

We can certainly work to get you a list of confirmed tribes later today, but in the meantime (since the RSVP deadline is 12pm ET) I'd note that in terms of speakers Assistant Secretary Kevin Washburn and Deputy Interior Secretary Mike Connor are both native New Mexicans (their bios can be found here and here). Washburn is also a member of the Chickasaw Nation, and Connor claims Taos Pueblo.

Hopefully that's helpful for now. Thanks for checking in.

Emily

Release Date: December 17, 2014

Contact Jeffrey Olson, [Jeffrey\\_olson@nps.gov](mailto:Jeffrey_olson@nps.gov) 202-208-6843

## Midwest Region Director Named

WASHINGTON – National Park Service Director Jonathan B. Jarvis has named Cameron (Cam) Sholly as the Midwest Region director. As regional director, Sholly will oversee approximately 60 national park units in 13 states of the Midwest and a workforce of over 2,000 employees. The region headquarters is in Omaha.

"Cam has the right blend of experience to take the helm of the Midwest Region," Jarvis said. "He is a proven leader and collaborator, with a demonstrated performance record in managing large operations and partnering at all levels."

Sholly has served as the associate director for the National Park Service's (NPS) Visitor and Resource Protection Directorate since 2012, overseeing a national portfolio that includes 30 program areas, 850 employees, and a budget exceeding \$200 million. During his tenure, he has focused largely on improving the NPS safety program, interagency wilderness partnerships, and the quality and consistency of NPS law enforcement training. His team also completed a wide range of national policies reduced the NPS regulations backlog, and began a major realignment of the NPS wildland fire workforce to ensure better fiscal and operational effectiveness.

From 2009 to 2012, Sholly was the superintendent of the Natchez Trace Parkway, where he managed the eighth most-visited NPS unit in the country. As superintendent, he oversaw multiple partnership projects including a major rehabilitation of the Meriwether Lewis Death and Burial Site. He worked closely with Choctaw and Chickasaw nations on a variety of partnerships including completion of one of the largest Native American repatriations in the country. He also helped energize new economic, tourism, and conservation partnerships with the city of Nashville, and many other state and local partners along the three-state, 444-mile corridor. Sholly was named superintendent of the year for the Southeast Region in 2011.

From 2005 to 2009, Sholly was the deputy associate director for visitor and resource protection in Washington D.C. From 2002 to 2005, he was the chief of ranger operations in Yosemite National Park. In 2008, he served on detail as special assistant to the NPS director responsible for a major projects portfolio that included assisting with a new national monument designation and multiple other project areas.

"It's a privilege to be appointed to this position," Sholly said. "The Midwest Region has incredible people, parks, and partners. I look forward to working closely with the Midwest team as we move forward, together, toward the NPS centennial and beyond."

Sholly is a U.S. Army veteran and was deployed to Operation Desert Storm. He is also a six-year veteran of the California Highway Patrol.

Sholly received his master's degree from Duke University in environmental management with concentrations in economics and law and policy. He received his bachelor's degree from St. Mary's College of California in management. He is a graduate of the Harvard University Senior Executive Fellows Program and the FBI National Academy.

Sholly has been married for the past 19 years to Jill Sholly. They will relocate to Omaha in the spring of 2015.

Several great Indian Country stories on progress for 2015 to share today - including BIE reforms and the WH initiatives announced for Native Youth at this year's Tribal Nations Conference as well as Kevin's outlook for Indian Country economic progress and child welfare.

A few of the highlights below,  
Jessica

-

## Indian Country Today: 5 Ways Native American Education Is Getting Better Heading Into 2015

Tanya H. Lee  
1/1/15

The 2014 Native Youth Report, prepared by the White House and released in December 2014, states, "Native youth and Native education are in a state of emergency." The report makes a series of recommendations intended to improve education for American Indian and Alaska Native children over the next decades.

But it is hopeful to note that some promising initiatives and trends are already underway, having been started or expanded in 2014.

### Improvements in Public School Curriculum

One part of this trend is providing culturally relevant education for Native students, which is happening—to a greater or lesser extent—in many public schools on or near reservations. The other is developing curriculum to teach all students about the history and contributions of Indigenous Peoples to our nation. For example, Kentucky is "working on a curriculum about Kentucky Native Americans geared to Common Core standards, which would enhance history curriculum already in place," says Helen Danser, Cherokee, chairwoman of the Kentucky Native American Heritage Commission.

*Pictured, from left, are Commission Member Anne Wood, Chair Helen Danser, and Kentucky Heritage Council Commission Coordinator Tressa Brown. (Kentucky Native American Heritage Council)*

Some school districts and states—the Marysville School District in Washington state, Montana, North Dakota and Maine, for example—mandate teaching Native American history and culture to all students in public schools, while in others the state department of education has been tasked with developing curriculum that schools and teachers may opt to use. For example, the Minnesota Office of Indian Education provides information, resources, and support to public schools for teaching Native American history and Utah is working on an Indian Curriculum Project.

**RELATED: Marysville School District Adopts Indigenous History Curriculum**

### **Bans on American Indian Related Mascots and Logos**

California, Colorado, Oregon, the District of Columbia, Oklahoma City and Houston are among the municipalities that have proposed or passed bans on the use of mascots and logos that are derogatory to American Indian tribes and individuals. When the Oklahoma City Public Schools Board passed such a ban in December, Muscogee (Creek) Nation Principal Chief George Tiger, said, "As the Principal Chief of the fourth largest federally recognized Native American tribe in the United States, it is with great respect and appreciation that I commend the Board of the Oklahoma City Public Schools for their decision to terminate the use of racially offensive and demeaning mascots within their school system... I encourage the OKCPS Board to remain steadfast in your resolve to do the right thing, even in the face of adversity, for that is the true measure of a righteous decision. Disrespect and degradation should never be an outcome, even if it is unintended."

**RELATED: Houston School Board Votes To Ban Offensive Sports Mascots**

### **Broadband Initiatives**

Ensuring that American Indian communities, schools, colleges and universities have high-speed Internet access is critical to improving education and economic development opportunities in Indian country. U.S. Department of Agriculture Secretary Tom Vilsack announced at the 2014 Tribal Nations Conference that 20 percent of the \$9.7 million in grants awarded through its 2501 program would go to Native American communities and institutions. The grants included a \$5.4 million loan to upgrade broadband service on New Mexico's Mescalero Apache Reservation.

**RELATED: USDA Announces Broadband and Infrastructure Support for Indian Country**

Through the White House ConnectED initiative, intended to bring next-generation broadband to 99 percent of America's students by 2018, Apple, Inc., just awarded a grant to provide every student at the remote Hoopa Valley High School on the Hoopa Valley Indian Reservation with an iPad, teachers and administrators with iPads and Macs and classrooms with Apple TVs, and to improve wifi at the school. Under the same initiative, Verizon is supplying network infrastructure for American Indian youth at 10 school-related dormitories on reservations across the West and Midwest.

### **President Obama's Generation Indigenous Initiative**

*The Houston Independent School District voted to change the Lamar High School Redskins mascot. A new mascot has not been announced.*

*Agriculture Secretary Tom Vilsack.*

**Announced at the 2014 Tribal Nations Conference, President Obama's Generation**

Indigenous initiative is intended to improve opportunities for Native youth. Among the programs included are new Native Youth Community Projects that will support culturally relevant strategies to improve the college-and-career readiness; a National Tribal Youth Network to support leadership development; the release of the 2014 White House Native Youth Report mentioned above; a Cabinet Native Youth Listening Tour; and the first White House Tribal Youth Gathering, a day-long convention in the summer of 2015.

RELATED: Tribal Nations Conference Will Emphasize Outreach to Native Youth

## New Tribal Colleges

Two new tribal colleges will expand efforts in Native American language revitalization and provide new, culturally-appropriate educational opportunities for Native youth. The San Carlos Apache Tribe is partnering with Arizona State University and Eastern Arizona College to build a tribal college on the reservation. And the Yocha Dehe Wintun Nation is spearheading efforts to build the California Tribal College to serve students from the state's 130 American Indian tribes and its large urban American Indian/Alaskan Native populations.

## Indian Country Today: 'Ring Out the False, Ring in the True': Five Takes on 2015

Gale Courey Toensing

1/1/15

A federal government official, the president of a large tribal organization, the chairman of a landless federally recognized tribe that's waiting for approval of its land-into-trust application, the chief of a state-recognized tribe with a reservation established in 1736 whose federal recognition was rescinded under political pressure, and a Washington lobbyist were asked to answer the wide open questions: "What should we expect in 2015? And/or, what would be the best thing to happen in Indian country next year?" Here are their diverse answers.

### **Department of the Interior Assistant Secretary-Indian Affairs Kevin K. Washburn, Chickasaw Nation**

For 2015, the Department of the Interior will be continuing major efforts within the BIA and the BIE to improve education for Indian children. We will be taking a lot more land into trust for tribes to expand tribal homelands and working, through the Land Buy Back Program to consolidate fractionated interests to restore these lands to tribal control. We will continue to encourage tribes to take control of their own destinies through the HEARTH Act and other tribal self-governance mechanisms. We will work to strengthen Indian families by finalizing new Indian child welfare guidelines for state courts and embarking on an effort to develop regulations that carry the force of law. We will be reforming a host of regulations to improve tribal and federal governance in Indian country, involving rights of way, secretarial elections, housing and transportation. We will be distributing resources to tribes to help develop indigenous responses to climate change. We will be finalizing the reform of our federal acknowledgment regulations so that the recognition process is more transparent, fair and efficient.

On the operations side, Interior will work to improve performance of our routine, day-to-day work serving Indian country to deliver services to Indian country faster, better and cheaper. At the same time, we will be working to further institutionalize the White House Native American Affairs Council and further the Council's crucial mission of bringing an all-of-government approach to supporting Indian country. We will also continue to promote an all-of-the-above energy development strategy in Indian country so that Indian country remains a key partner in American energy independence. We also look forward to continuing a bipartisan working relationship with Congress to keep Indian country's legislative agenda moving forward.

## **Indian Country Today: NCAI's Cladoosby Says 2015 Another Year of 'Breaking the Cycle'**

Vincent Schilling  
1/1/15

*Brian Cladoosby (Swinomish Indian Tribal Community) is the 21st President of the National Congress of American Indians. According to Cladoosby 2014 was an exciting year for Indian country which is leading to an even more exciting 2015.*

*In an interview with Cladoosby, he shared his thoughts on what we could look forward to in 2015, things Indian country needs to consider and what we should all strive for in terms of a 2015 New Year's Resolution for all of Indian country.*

## **From your perspective, how did 2014 go for Indian country?**

In September we saw the GWE pass the House and Senate (the Tribal General Welfare Exclusion Act) with 100 percent Republican and Democratic Senator support. That was a big win for Indian country. When you have a do-nothing Senate and Congress, considering this is one of the most polarized congresses in the history of U.S. – to have tribes have success like this was very rewarding.

RELATED: Native Leaders Applaud Passage of Tribal General Welfare Exclusion Act

We also saw the important Violence Against Women Act piece put into place for Alaskan Natives. It was also fortunate to have Alaska included in the land into trust process considering they were unfortunately left out of the original legislation. It was rewarding to see that our brothers and sisters up north had the same opportunities as the brothers and sisters in the lower 48.

## **Considering the support of the Obama administration through the White House Tribal Nations Conference in Washington, D.C. that took place in 2014, what do you see that Indian country can expect in 2015?**

The Tribal Conference in D.C. was amazing. And as I have said on record this is the greatest administration in the history of the United States for tribes. The commitment that they have made is second to none.

The President told us how affected he and the First Lady were in their visit to the Standing Rock Sioux tribe and that he returned to the White House with tears in his eyes. He has instructed his cabinet that it is their turn to visit Indian country. To have the president come out and tell us that he was going to make his cabinet get out to Indian country that is so very powerful.

Personally I encourage those senators and congressmen whether or not they have tribes in their state – to visit as well. They are our trustees.

During the White House Tribal Nations Conference – It was the only time in the history of the U.S. where the president has had his entire cabinet under one roof the whole year and the only group in the world that he does that with are the Native Americans. That speaks volumes.

Heads of state that come to the United States don't get that kind of attention, no groups in the U.S. get that kind of attention. For him to make that commitment to Indian country is second to none. The vice president was also a rock star.

## **I've had many discussions with officials at the Department of the Interior. For example, Nedra Darling at the BIA once said to me, the BIA is changing for the better, "We are not your grandparents BIA anymore." Do you see relations improving between tribes and the Interior as we venture into 2015?**

Without a doubt. She hit the nail on the head where she says this is not our grandparents BIA. The infrastructure that the tribes have now in the 21st century to create and accomplish change is amazing.

I also always say this is not our grandparent's generation. This is what they dreamed about. Our grandparents and elders that accessed Washington, D.C. did not quite have the infrastructure that we have now in as far as attorneys and lobbyists. Our elders dreamed of this day when tribes would have this type of access to the federal government. They dreamed and prayed we would be able to have these high level meetings with the president, the cabinet secretaries and the Bureau of Indian Affairs.

Now, the Bureau of Indian Affairs is not looking at us as their 'wards of the Federal Government," which was the term recently used by Arizona Congressman Paul Gosar.

**RELATED: Are American Indian Nations 'Wards of the Federal Government'?**

The BIA used to have a paternalistic view of tribes, and we were wards of the federal government.

Nedra is right; the BIA is looking at us like governments, as equals. To be able to sit down and have real and true government-to-government discussions with them – the time has come to change an outdated mindset.

**Having support of the Obama administration and these governmental agencies is one important aspect contributing to the lifeblood of Indian country – but on another side of this coin we have a continuously growing community on social media and the Internet, how do you see things faring in 2015 from this perspective?**

As we look at ourselves as 21st century tribes, they are definitely taking advantage of the tools that are available to us. Definitely one of these tools is social media and the Internet. When stories break in Indian country, online in emails or on Facebook or tweeted – we know about it immediately. Our grandparent's generation never had this type of instant access to this type of news.

When the Arizona congressman called us wards of the federal government – a generation ago we might not have ever heard that. Maybe 1 percent of the Native population might've heard – but with the access of social media it is safe to say a large majority of Native Americans across the U.S. heard it and were very offended. In return and immediately – they made their voices heard.

**What do you see in 2015 for the National Congress of American Indians?**

We look forward to continuing to work with the Obama administration with an emphasis on legacy, legacy, legacy. This president's legacy for Indian country is going to be second to none and we cannot get complacent or lazy in the next two years. We need to keep working very hard on that legacy in as far as legislation, and as far as taking these 19th and 20th century rules and regulations that we have been living under for the last 100-plus years that were paternalistic in nature and working with the BIA and other agencies to do a review the rules and regulations that hinder Indian country.

For example the EPA heard us loud and clear during the WHTNC. The EPA administrator came out with a very strong worded memo to her 12 regions about the importance of treaty rights when they make decisions.

Expanding self-governance has worked; we have shown that it has worked within the IHS and BIA. The EPA, DOJ, BIA – we have proven that we have the infrastructure to be able to take some of these pilot projects from some of these other agencies – who have always looked at things with a cookie-cutter approach what works in the Northwest might not work in Alaska or the Northeast.

The NCAI – which is nonpartisan with friends on both sides of the aisle – Native issues are nonpartisan and are based on treaty rights with the federal government – we need to be able to reach out to the leadership of the Republican Party in the Senate or the House just to show them what we've done in the last few years and we want to continue that.

**What should Indian country as a whole have as its New Year's resolution?**

Continuing to break the cycle. What I mean by that is that we continue to chip away at the

drug and alcohol abuse – we need to continue to chip away at the uneducated workforce through education. I am a firm believer that healthcare and education is a treaty-right not a line item.

I encourage the federal government to fund our healthcare at 100 percent. I believe we are at \$4 billion right now and our need is about \$29 billion. If they put that type of money into our health programs I guarantee in one generation we would save them twice or three times as much.

That is the same with education, if you give us one dollar to educate our children we will save you copy0 in a generation because those kids will be productive members of society. They will not be in the court system; they will not be on drugs because statistics show that if you get a 12th grade education and a two or four year degree, or a Masters and a PhD you will be a productive member of society.

If they would fund our education program at 100 percent we would be a generation filled with productive members of society.

### **Indian Country Today Op-Ed: Making American Indian Children a Priority**

In June of this year, President Barack Obama and the First Lady visited the Standing Rock Sioux Indian Reservation in North Dakota. This was ya historic visit. He was only the fourth sitting President to visit Indian Country, joining Coolidge in 1927, Roosevelt in 1936, and Clinton in 1999.

The events that have happened since demonstrate that for this President, it wasn't a routine visit!

In the months after the visit he has made it a priority to reach out to Native American youth searching for ways to improve their lives.

Last week the President announced an initiative called "Generation – Indigenous", a new initiative including a series of efforts to improve the lives of our youngest First Americans.

It includes creating a partnership between the White House and the non-profit organization I created when I retired from the United States Senate - the Center for Native American Youth (CNAY). I created that organization because too many Native American children are being left behind.

Despite the efforts of parents and Tribes, too many Indian children are living in poverty and strife. They suffer the highest rates of suicide; they are the only population for which high school graduation rates decreased in the last decades; and they experience the highest mortality rates from many preventable diseases.

At CNAY we are working with parents and tribal authorities on issues related to teen suicide prevention, youth leadership development, increasing access to education opportunities, better health care and so much more. We are determined save lives and improve the lives of the children of the first Americans.

The invitation from the White House to create a partnership with the Center for Native American Youth is a wonderful opportunity to join forces and do more to help.

I have traveled to tribal communities all across the United States and I have met many young people who are doing inspiring things – we call them “Champions for Change.” But each visit also reminds me of our government’s failure to keep its many promises to the First Americans. It doesn’t have to remain that way. We can change that!

As I mentioned, the President’s visit to a North Dakota Indian Reservation was more than just a visit; it has led to positive action. I am grateful to the Standing Rock Sioux Tribe for hosting the President and First Lady. And I look forward to this partnership with the White House on new and expanded initiatives to address the urgent needs in Indian Country to help Indian children.

*Byron Dorgan is a former United States Senator (D) from North Dakota. He is now a senior policy advisor at Arent Fox and serves as co-chair, along with Phil English, of the firm’s government relations practice.*

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

**BIG PICTURE:**

- + Headlines From Today's Front Pages.

**WASHINGTON SCHEDULE:**

- + Today's Events In Washington.

**LAST LAUGHS:**

+ Late Night Political Humor

**DOI in the News:**

**OBAMA ADMINISTRATION OFFICIALS PARTICIPATE IN KING DAY SERVICE EVENTS.** The Washington Times (1/20, Boyer, 644K) reports that "many administration officials...participated in King Day events." The article notes that "Interior Secretary Sally Jewell and General Services Administrator Dan Tangherlini took part in the Student Conservation Association's annual King Day cleanup of Anacostia Park."

The Washington Informer (1/19, 55K) reports that "for the third consecutive year, IMPACT hosts the annual Beautification Project at the Dr. Martin Luther King, Jr. Memorial in conjunction with the US National Park Service on Saturday, January 17, 2015."

Additional coverage of the events marking MLK Day was provided by The Hill (1/20, Barron-Lopez, Cama, 224K), the Georgetown (DC) Dish (1/20), WJLA-TV Washington (1/19, 12K) and WRC-TV Washington (1/19, 613K).

**SECRETARY JEWELL INELIGIBLE TO BE "DESIGNATED SURVIVOR" FOR THE STATE OF THE UNION.** ABC Otus News (1/20) reports on "the designated survivor," a "cabinet-level official who spends the evening away from the Capitol, ready to take the reins if everyone above him in the presidential line of succession dies in a crisis at the House chamber." The article notes that "as secretary of the Interior, Sally Jewell would normally be eighth in the line of presidential succession." However, "because she was born in the United Kingdom, she isn't eligible to be president and therefore would never be tapped as the designated survivor."

**POLITICO ANALYSIS: PROSPECTS FOR "AMBITIOUS" SENATE ENERGY AGENDA UNCLEAR.** Politico (1/18, Goode, 683K) reported that it is unclear whether Congress members will "have the stomach" for Senate Energy and Natural Resources chairman Lisa Murkowski's "ambitious agenda" for new oil and gas exploration, power grid enhancement, and energy efficiency "after an extended floor debate" on the Keystone pipeline and other energy amendments. Politico said the climate change amendments appended to the Keystone bill "are designed to unnerve moderate Republicans," while "fiery rhetoric from liberal stalwarts" may preclude the chances of passage.

**FEDERAL OFFICIALS DISCUSS CHALLENGES FACED BY WOMEN IN IT.** Interior Department CIO Sylvia Burns participated in a discussion by the Federal Computer Week (1/15, 263K) on "the challenges that still face women in IT."

**ADDITIONAL COVERAGE OF NATIVE HAWAIIAN SOVEREIGNTY.** Additional coverage of the debate over Native Hawaiian sovereignty was provided by the Longview (TX) News-Journal (1/19, 64K), the Turtle Island News (CAN) (1/19), the Houston Chronicle (1/16, Bussewitz, 2.28M), the Charlotte (NC) Observer (1/16, 584K), the Houston Chronicle (1/16, Bussewitz, 2.28M), the Washington Post (1/16, 5.17M), the Washington Times (1/16, Bussewitz, 644K), The Nation (1/19, 524K), and KITV-TV Honolulu (1/19, 21K).

**OBAMA ADMINISTRATION SAYS FRACKING IS SAFE.** In an editorial, the U-T San Diego (1/17, 580K) notes that "in a Jan. 2 interview with KQED, the Northern California PBS station and website, Sally Jewell — the secretary of the interior for the greenest administration in US history — lambasted local fracking bans that have been adopted or are being considered around the state." She said, "There is a lot of misinformation about fracking. I think that localized efforts or statewide efforts in many cases don't understand the science behind it." The paper stands with the Obama Administration "in concluding that fracking is safe if properly regulated."

**RESTORATION OF EVERGLADES URGED.** In a piece for the South Dade (FL) News Leader (1/20), Stephen R. Shelley, City of Homestead Vice-Mayor, write about the 30th Annual Everglades Coalition Conference. He says that "one of the highlights of this year's conference was an appearance and keynote speech by United States Secretary of the Interior Sally Jewell." Jewell "acknowledged the determination and hard work of the Everglades Coalition and congratulated them on their many successes including bringing Everglades restoration and preservation initiatives to the fore front."

**America's Great Outdoors:**

**National Park Service:**

**NPS SITES PLANNING FOR 100TH ANNIVERSARY.** The AP (1/19) reports that the NPS is "looking for ideas on how to mark its 100th anniversary in 2016." The article notes that "three public sessions are planned in western South Dakota to take input on the centennial: Tuesday, Jan. 27, at the Black Hills National Forest Supervisor's Office in Custer; Wednesday, Jan. 28, at The Outdoor Campus in Rapid City; and Thursday, Jan. 29, at The Mueller Center in Hot Springs." Also, "people who can't attend can post ideas to Facebook sites run by area National Park Service units or send them to the parks."

Coverage was also provided by the Houston Chronicle (1/19, 2.28M), the Mitchell (SD) Daily Republic (1/19, 37K), the Houston Chronicle (1/19, 2.28M), and the Yankton (SD) Press & Dakotan (1/19, 25K).

**CANAVERAL NATIONAL SEASHORE WHISTLE-BLOWER WINS FEDERAL RULING.** The Florida Today (1/16, 178K) reports that "a former employee at Canaveral National Seashore who reported contracting violations, nepotism and other misconduct at the park has won a whistle-blower retaliation ruling against the US Department of Interior." According to the article, "while that ruling closes the loop on a 2011 investigation, federal officials have opened a new inquiry into similar allegations of improper purchases at the park." In December, "a federal civil service court judge in Atlanta ruled that Candace Carter, a former biological science technician at the park, had been subjected to assault, harassment and adverse personnel actions in retaliation for reporting the contracting violations."

**DRAKES BAY OYSTER COMPANY SHUTS DOWN.** Newsweek (1/19, 680K) reports on the closure of the Drakes Bay Oyster Company. The NPS and "wilderness advocates now say that the issue in Drakes Estero was environmental policy, not environmental science." Melanie Gunn, outreach coordinator for Point Reyes National Seashore, said, "Science will always be debated, like climate change. But the law and policy of the Wilderness Act is very clear."

Also providing coverage are the San Jose (CA) Mercury News (1/19, Prado, 936K) and the Inside Bay Area (CA) (1/19, 54K).

**CRATER LAKE NATIONAL PARK HONORED WITH OREGON FILM GOVERNOR'S AWARD.** The Oregonian (1/19, 950K) reports that "the staff at Crater Lake National Park has also been honored for its help with filming of the movie 'Wild.'" They were "presented the Film Advocate Governor's Award on Jan 6, during a banquet of the Oregon Film Board."

**NPS DEPLOYS HERD OF GOATS TO EAT INVASIVE PLANTS AT POINT REYES.** KPIX-TV San Francisco (1/18, 143K) reports that "officials with Point Reyes National Seashore will begin an experiment next week to reduce the invasive plant species on about 12 acres of national parkland, the officials said." The article notes that "the experiment involves allowing goats to eat invasive plant species at the Historic D Ranch to gain control over the species and help park service officials maintain the site." According to spokesman John Dell'Osso, "park service officials are using the goats for the project because the goats will eat a variety of plants that cattle, elk and deer will not eat."

**WOMAN SUES WHITE HOUSE AFTER PORTA-POTTY FALL.** The Washington Times (1/20, Noble, 644K) reports that a Virginia woman "has filed a \$4 million lawsuit over a tumble she took at the 2012 White House Easter Egg Roll, blaming her fall on wet flooring outside a group of portable toilets at the event." Monica Ellis, in a suit filed Thursday, "says she exited a porta-potty at the April 9, 2012 event and slipped on a wet set of stairs, shattering her foot when she fell."

**GARY ROOSEVELT HIGH SCHOOL ADDED TO NATIONAL REGISTER.** The AP (1/19, Mccollum) reports that "the first and only high school in Gary built exclusively for African-Americans, Theodore Roosevelt High School, recently was listed on the National Register of Historic Places."

**ADDITIONAL COVERAGE OF PROPOSAL TO INCREASE FEES AT NPS SITES.** Additional coverage of the proposal to increase fees at NPS sites was provided by The Oregonian (1/19, 950K).

**ADDITIONAL COVERAGE: 1882 WINCHESTER RIFLE FOUND IN GREAT BASIN NATIONAL PARK.** Additional coverage of the discovery of a Winchester rifle manufactured in 1882 in Grand Basin National Park was provided by the Arizona Republic (1/17, 1.14M), the Charlotte (NC) Observer (1/17, 584K), the Denver Post (1/19, Griffith, 804K), and the Daily Mail (UK) (1/19, 4.78M).

**PROFESSOR SUPPORTS NATIONAL PARK IN MAINE.** In an op-ed for the [Bangor \(ME\) Daily News](#) (1/19, 166K), Robert J. Lillholm, the E.L. Giddings Professor of Forest Policy at the School of Forest Resources at the University of Maine, writes that "in the Katahdin area, a national park can transform a region we take for granted." However, "what should be a great opportunity for an economically distressed region — a generous landowner willing to donate 150,000 acres for a new national park and national recreation area, along with a \$40 million endowment to cover operation costs — instead has become a polarized debate tainted by mistrust and misinformation." He argues that "a new national park and recreation area would be a milestone — creating new jobs, bringing new energy and vitality to the region and strengthening our economy in a way that builds on our outdoors heritage."

**WPOST: TIME TO CONSIDER REDESIGN OF WHITE HOUSE FENCE.** The [Washington Post](#) (1/18, 5.17M) editorializes that the "heightened security challenges of a changed world" make it "time for a new appraisal and possible redesign" of the White House fence. The Post says any change "should or need impinge any further on the White House's historic openness" and "any review should seek to restore some of the access that already has been sacrificed in the name of security even while improving actual security." According to the Post, "a taller fence might make unnecessary" some of the "unsightly restrictions" caused by "all the incremental militarization near the White House."

#### ***Bureau of Land Management:***

**BLM PLANS TO REMOVE JUNIPERS IN SOUTHWEST IDAHO.** The [AP](#) (1/19) reports that the BLM "plans to remove Western juniper from a 1.5 million-acre area of public land in southwest Idaho to conserve sage grouse habitat." BLM Boise District Manager Jim Fincher "in a statement Friday says conserving habitat for sage grouse is a key method for improving an entire rangeland ecosystem." The bureau is "hosting two public meetings to provide information about the plan in Owyhee County."

Coverage by the AP was also picked up by the [Houston Chronicle](#) (1/16, 2.28M) and [KIVI-TV](#) Boise, ID (1/19, 861).

**REP. THORNBERRY HOPES TO BLOCK FEDERAL CLAIMS TO RED RIVER LAND.** The [Dallas Morning News](#) (1/18, 1.13M) reports that Rep. Mac Thornberry "remains optimistic that Congress will block federal claims to land along the Red River." The House Natural Resources Committee "approved the bill before Thanksgiving." Thornberry is "hopeful that means a quick trip to the House floor for a vote in the new Congress."

**CONSERVATION GROUPS TRY TO STOP TIMBER SALE.** The [Oregonian](#) (1/19, 950K) reports that "conservation groups are trying to stop a 259-acre timber sale in Lane County, saying the federal government shut opposition voices out of the approval process and violated environmental law." According to the article, "a lawsuit filed in federal court by Cascadia Wildlands and Oregon Wild asks that a judge stop the sale, and force the Bureau of Land Management officials to re-do the reports on what impact the logging would have on the Second Show area outside of Springfield, near Shotgun Creek."

**BLM FINALIZES BAKERSFIELD RESOURCE MANAGEMENT PLAN.** The [Bakersfield Californian](#) (1/20, Subscription Publication, 127K) reports that the BLM has "finalized a plan balancing energy production, outdoor recreation, livestock grazing and other uses for 1.6 million acres of public land and mineral estate in an eight-county area including western Kern." The Bakersfield Resource Management Plan is "the result of six years of planning, public comment and official review. Released Friday, it replaces land-use documents published in 1984 and 1997." BLM Bakersfield Field Manager Gabriel Garcia said, "We developed the plan through close coordination with stakeholders and the public. It represents the best combination of management decisions to both sustain the valuable resources the BLM is entrusted to manage and meet the needs of the community for the next 20 years."

**NEWLY PAINTED YAQUINA LIGHTHOUSE ALMOST READY FOR TOURS.** The [AP](#) (1/19) reports that "the newly repainted Yaquina Lighthouse on the Oregon coast is getting ready to make its debut." The BLM says the "95-foot-tall lighthouse has been surrounded by scaffolding and wrapping since mid-October as old paint was removed and a natural cement wash was applied."

**PALM SPRINGS PREPARING RESPONSE TO PROPOSED LAND SWAP.** The [Palm Springs \(CA\) Desert Sun](#) (1/18, 85K) reports that "Palm Springs city leaders are preparing a response to a proposed exchange of federal and tribal lands that could place popular public hiking trails close to downtown Palm Springs under the

control of the Agua Caliente Band of Cahuilla Indians." According to the article, "the swap between the tribe and the federal Bureau of Land Management entered a new phase in late December with the release of a new BLM report outlining the possible impacts of several trade scenarios, including what trails may be affected."

### ***Fish and Wildlife Service:***

**FWS LAUNCHES REVIEW OF THREATENED CANADA LYNX.** The AP (1/17, Sharp) reports that the FWS is "starting a review of federally protected Canada lynx at a time when the largest population of the cats in the Lower 48 appears to be poised for a decline." According to Jim Zelenak, a biologist with the FWS in Montana, "the end of clear-cutting in Maine with the Forest Practices Act of 1989 has allowed forests to fill in, taking away some of the habitat preferred by snowshoe hares upon which lynx feed, potentially reducing populations of both species." The article notes that "the latest estimates from federal scientists put the number of Canada lynx in Maine at about 500; that's fewer than a state estimate of 750 to 1,000 lynx five years ago."

Coverage by the AP was also picked up by the Lewiston (ME) Sun Journal (1/19, 20K), the Deseret (UT) News (1/19, 538K), the Houston Chronicle (1/17, Sharp, 2.28M), the Valley News (VT) (1/19, 11K), the Spokane (WA) Spokesman-Review (1/19, 167K), the Times Colonist (CAN) (1/19, 1K), the Mississauga News (CAN) (1/19), and Yahoo! (CAN) (1/19, 171K).

Also reporting on the story are the Denver Post (1/20, Finley, 804K), the Helena (MT) Independent Record (1/19, 38K) and the Central Maine (1/17).

**GROUPS SUE OVER CHANGE TO REINTRODUCTION PROGRAM FOR MEXICAN WOLVES.** The AP (1/16) reports that "conservationists sued the federal government Friday over changes to a reintroduction program for the endangered Mexican gray wolf." The FWS "recently announced the first major changes to the program since 1998." The Center for Biological Diversity and Defenders of Wildlife say "limiting wolves that are reintroduced into the wild to 325 doesn't allow for recovery of the species."

Coverage by the AP was also picked up by the Washington Post (1/16, 5.17M), the Houston Chronicle (1/16, 2.28M), the Daily Mail (UK) (1/19, 4.78M), and KOB-TV Albuquerque, NM (1/19, 46K).

Also reporting on the story is the Courthouse News (1/16, 7K).

The Arizona Republic (1/16, 1.14M) editorializes that the FWS' "new rules for Mexican gray wolf recovery offers a frustrating one-step-forward, two-steps-back approach." According to the editorial, the FWS would have been "wiser to do right by the wolves instead of bowing to those who have long opposed reintroduction."

**TIDAL WATER REINTRODUCED TO CULLINAN RANCH SITE.** The San Jose (CA) Mercury News (1/19, Raskin-Zrihen, 936K) reports that a ceremony Tuesday marked "the first time in more than a century that tidal water flowed into the Solano County marshland at Cullinan Ranch near Mare Island." According to FWS spokesman Doug Cordell, "the area is just off Highway 37, near Dutchman Slough, about 1½ miles west of Mare Island." Cordell said, "Cheers rang out as attendees celebrated a levee breach that reintroduced tidal water to the Cullinan Ranch site on the San Pablo Bay National Wildlife Refuge for the first time in more than 100 years. The breach caps a 1,500-acre wetland restoration project long supported by North San Francisco Bay Area conservation advocates."

**NORTHERN LONG-EARED BAT COULD IMPACT PIPELINE PROJECT.** The AP (1/19) reports that "a potentially endangered species of bat could become a major obstacle to the proposed Sandpiper oil pipeline in northern Minnesota." The FWS is "considering whether to declare the northern long-eared bat an endangered species because the spread of the white-nosed syndrome disease has reduced its population." According to the article, "in that case, Enbridge could be forced to postpone its pipeline project or chose a different route."

**TEXAS HUNTING CLUB WITHDRAWS PLAN TO AUCTION OFF ELEPHANT HUNT.** The AP (1/17, Schmall) reports that "a Texas hunting club has canceled plans to auction off a chance to kill an African elephant, the club's executive director said Saturday." Ben Carter of the Dallas Safari Club said that "the donor of the hunt withdrew his donation."

Coverage by the AP was also picked up by the Arizona Republic (1/17, 1.14M), the Charlotte (NC) Observer (1/17, 584K), the Houston Chronicle (1/17, Schmall, 2.28M), the Washington Post (1/17, 5.17M), Newsday (1/19, 1.41M), the Huffington Post (1/17, Schmall, 11.54M), and WRC-TV Washington (1/19, 613K).

Also providing coverage are the [Daily Mail \(UK\)](#) (1/19, 4.78M), the [Guardian \(UK\)](#) (1/17, 2.74M), and the [Independent \(UK\)](#) (1/19, Walker, 853K).

**CANADA TO STAGE HELICOPTER WOLF HUNT TO SAVE CARIBOU.** The [AP](#) (1/17) reports that "officials in British Columbia will use helicopter gunners to shoot up to 24 wolves just north of the Idaho border this winter in an effort to save the 18 remaining southern Selkirk Mountains woodland caribou in a herd from extinction." According to Canadian officials, "Idaho and Washington wildlife officials were consulted, as well as First Nations, the US Forest Service and the US Fish and Wildlife Service."

Also reporting on the story is [Yahoo! News](#) (1/16, 17.91M).

**POTENTIAL SAGE GROUSE LISTING CRITICIZED.** In an op-ed for the [Casper \(WY\) Star-Tribune](#) (1/19, 90K), Barry Russell, the president and CEO of the Independent Petroleum Association of America, writes that "while the recently passed funding bill by Congress may mean some good news for the greater sage grouse – preventing the federal government from potentially listing the bird until after September 2015 – the debate over this iconic bird in the West is far from over." He notes that "in Wyoming, a federal listing could also fuel unemployment in a still-struggling economy." Furthermore, "a listing of the greater sage grouse would also impact existing state-based conservation measures for the bird, while simultaneously ignoring the great strides America's energy industry has taken to reduce surface impacts." Russell concludes that "a one-size-fits-all approach from Washington, D.C., is the wrong choice for this iconic species, the economy, and our secure energy future."

**AUTHOR ARGUES FOR RETAINING FEDERAL PROTECTION FOR GRAY WOLVES.** Author Lydia Millet says in a [New York Times](#) (1/19, Subscription Publication, 9.97M) opinion piece that gray wolf sightings in California and Arizona, the first in "almost a century" and "almost three-quarters of a century," respectively, were "a result of their 40-year protection under the Endangered Species Act." Millet says the "fragile progress" in raising, releasing, and tracking wolves "has been undermined" by the Federal government's move to remove Federal protection in the species' two population centers, turning responsibility over to states that have "opened their doors to the killing of wolves." Millet advises President Obama to "direct the Fish and Wildlife Service to retain protection for wolves" lest they be "wiped off the face of the American landscape forever."

### ***US Geological Survey:***

**STUDY: DENSER CALIFORNIA FORESTS RAISE FIREFIGHTING QUESTIONS.** The [Los Angeles Times](#) (1/20, Goldenstein, 3.49M) reports that "drought, fire-suppression techniques and changes in land use have made California forests denser with smaller trees and more susceptible to fast-moving wildfires, a study to be released Tuesday has found." Researchers at UC Berkeley, UC Davis and the USGS "compared tree surveys conducted between 1929 and 1936 with surveys conducted between 2001 and 2010." They "found that large tree density fell across California, with declines of as much as 50% in the Sierra Nevada highlands, the south and central Coast Ranges and Northern California," and "at the same time, the density of smaller trees increased dramatically."

**USGS SAYS EARTHQUAKE NEAR FOUNTAIN "WASN'T REAL".** The [Colorado Springs \(CO\) Gazette](#) (1/20, 140K) reports that the USGS says "a magnitude 3.0 earthquake reported early Monday morning near Fountain didn't actually happen." Don Blakeman, a geophysicist at the USGS' National Earthquake Information Center in Golden, said, "It turns out that wasn't real." Blakeman said "the earthquake report was the result of a faulty sensor and a newer geologic analyst."

### **Securing America's Energy Future:**

#### ***Renewable Energy:***

**SLIDING OIL PRICES COULD IMPACT WIND AUCTION.** The [New Bedford \(MA\) Standard-Times](#) (1/20, 50K) reports that "cheap carbon-based energy could deflate interest in wind power ahead of the Jan. 29 auction of leases in waters south of Martha's Vineyard." According to the article, "the biggest competitive auction yet of wind energy leases in federal waters will occur amid global plunges in oil prices and conventional energy costs that could lessen interest in renewable sources, a local industry-watcher said." John Miller, executive director of the Marion-based Marine Renewable Energy Collaborative, said, "Certainly, the low prices of energy make it

more difficult to convince people to invest in higher-priced energy sources like offshore wind. The drops this year are certainly an indication that there are unpredictable (fluctuations) in the market."

**BIRDS DYING AT IVANPAH SOLAR PLANT.** The Environment & Energy Publishing (1/19, 705) reports that the Mojave Desert's Ivanpah solar plant is "incinerating birds that fly into the 'flux field' between the mirrors and the towers." Ivanpah, "which opened a year ago, is testing new ways to prevent bird deaths, trying everything from anti-perching devices to spraying a bubble gum extract that birds hate."

### ***Onshore Energy Development:***

**OIL INDUSTRY SAYS FEDERAL METHANE EMISSIONS REGULATIONS THREATEN DOMESTIC GAS PRODUCTION.** The Hill (1/19, Cama, 224K) reported that "aggressive new rules" put forth by the Obama administration to cut methane emissions from oil and gas production have provoked the ire of the oil and gas industry, which claims the regulations would "threaten the very benefits that it has brought in recent years." Jack Gerard, the president and CEO of the American Petroleum Institute, believes "the administration's logic doesn't hold up," noting that further regulations "discourages the industry and adds unnecessary costs" that "will only undermine dramatic reductions in CO2 emissions made possible by an abundant and affordable domestic supply of clean-burning natural gas, while discouraging energy development that is the foundation of the American energy revolution."

Bloomberg New Energy Finance (1/19) reported that the API was critical of proposed methane emissions regulations. API president and CEO Jack Gerard said, "As oil and natural gas production has risen dramatically, methane emissions have fallen thanks to industry leadership and investment in new technologies." He warned, "Onerous new regulations could threaten the shale energy revolution."

The Pittsburgh Tribune-Review (1/19, 672K) in an op-ed noted that the API has warned that new methane emissions regulations "could actually slow down industry progress" on reducing methane emissions by adding "another layer of burdensome requirements."

**WPost Praises Administration's New Efforts To Reduce Greenhouse Gases.** In an editorial, the Washington Post (1/18, 5.17M) says while the Obama Administration's new rules to scale back greenhouse gases "aren't perfect," they "are welcome." The Administration "is right not to rely entirely on voluntary industry effort," according to the Post, "and it should not rule out expanding its regulatory reach beyond drilling sites."

A Bloomberg View (1/16) editorial urged Federal methane emissions regulations to "codify the best practices being followed now, which oil and gas companies have demonstrated are possible." The editorial said the oil and gas "industry's resistance to regulation isn't without merit," and that the API has warned that "one-size-fits-all rules could stymie the innovation that's allowed producers to reduce emissions so far, by preventing them from trying new techniques."

In a "Letter to the Editor" in the Washington Post (1/18, 5.17M) Bethesda, MD resident Steven J. Kalish noted the Jan. 14 article on White House plans to reduce methane emissions. Kalish took issue with comments in that article from American Petroleum Institute director of upstream and industry operations Erik Milito, who said, "Every company is strongly incentivized to capture methane and bring it to the market." Kalish called that "incorrect" because pipelines that transport natural gas "do not bear" the loss of methane during "transportation from the well to the user."

**Additional Coverage.** Additional coverage was provided by Bloomberg BNA (1/17, 8K), the Tyler (TX) Morning Telegraph (1/19, 7K), and the Washington Times (1/19, 644K).

**BLM CANCELS ROAN PLATEAU LEASES.** The AP (1/19) reports that the BLM has "officially canceled 17 of the 19 natural gas leases on top of the Roan Plateau west of Rifle as part of a landmark settlement agreement announced by Secretary of the Interior Sally Jewell in November." The article notes that "the agreement includes refunding more than \$47 million in bonus bids and annual rental payments to leaseholder Bill Barrett Corp." In exchange, the bureau is "working on a plan to allow the two remaining Barrett leases and a dozen other leases near the base of the Roan to be developed."

Coverage was also provided by the Glenwood Springs (CO) Post Independent (1/19, 27K), the Greenfield (IN) Daily Reporter (1/19, 31K), KJCT-TV Grand Junction, CO (1/19, 1K), KKCO-TV Grand Junction, CO (1/19, 1K), and KMGH-TV Denver (1/19, 136K).

**OHIO EARTHQUAKE TIED TO FRACKING.** The Charlotte (NC) Observer (1/19, 584K) reports that a magnitude 3.0 earthquake in Ohio last March "is among the largest thought to be induced directly by hydraulic fracturing." The article says the "Ohio Department of Natural Resources halted nearby fracking activities" after the earthquake, speculating a link to fracking. The article adds that "scientists have now found more substantial evidence for this link," as published in the Bulletin of the Seismological Society of America.

**Kansas Earthquakes Linked To Fracking.** The Lawrence (KS) Journal World (1/17, Dillon, 58K) reports that officials in Kansas "have been reluctant to link the mysterious earthquakes in south central Kansas to fracking," but said last week for the first time that the earthquakes "are likely caused by disposal of the waste water that is a byproduct of the oil and gas extraction process." Rick Miller, geophysicist and senior scientist for the Kansas Geological Survey, is quoted saying, "We can say there is a strong correlation between the disposal of saltwater and the earthquakes." The article adds that the state's chapter of the Sierra Club wants Kansas to follow the lead of other state and local governments and "call a moratorium on fracking."

**North Texas' Seismic Hazard Potential To Be Reevaluated.** The Dallas Morning News (1/18, Kuchment, 1.13M) reports that North Texas, until now considered "one of the least likely places in the country to have an earthquake," will have its seismic hazard reevaluated by the US Geological Survey after over 120 quakes since 2008 were experienced in the Dallas area.

**SENATE TO TAKE ON KEYSTONE XL PIPELINE THIS WEEK.** Politico (1/19, Goode, 683K) reports that Sen. Lisa Murkowski, the Senate Energy and Natural Resources panel's chairwoman, "is already laying out an ambitious agenda to try to open new areas for oil and gas exploration, buttress the power grid and implement new energy efficiency policies." What is not "clear is whether lawmakers will have the stomach for it after an extended floor debate" on the Keystone XL pipeline "and a raft of other energy amendments." Many Democrats have complained "that Republicans chose to pick a fight over Keystone as their first energy issue instead of taking up what the Energy panel's new ranking member, Sen. Maria Cantwell (D-Wash.), has referred to as a '21st Century energy policy.'" Politico says "the climate change amendments that Democrats hope to tag onto the Keystone bill that are designed to unnerve moderate Republicans, and the fiery rhetoric from liberal stalwarts like Sens. Bernie Sanders (I-Vt.) and Elizabeth Warren (D-Mass.) could mean the messaging battle precludes the chances for major energy legislation to pass."

The National Journal (1/18, Johnson, Subscription Publication, 406K) reports the Keystone XL pipeline "will dominate the Senate schedule this week, while the House will focus on an abortion bill and both chambers gather Tuesday to hear President Obama deliver his State of the Union address."

**NEW POLL: AMERICANS WANT KEYSTONE XL, BUT NOT URGENTLY.** The Washington Post (1/19, Blake, 5.17M) reported in its "The Fix" blog that "poll after poll has shown overwhelming support" for Keystone XL construction. However, a new ABC-Washington Post poll "suggests that support for Keystone is softer – and less urgent – than previously thought." The new poll found that 61% of Americans "are happy to allow the review process" for the pipeline to run its course, while only 34% agree with the "build it now" sentiment. Among Republicans, only 53% "insist it's time to move forward," while 43% "want the review to run its course."

The Hill (1/20, Barron-Lopez, 224K) also notes that "a majority of Americans are in favor of completing the ongoing federal review of the Keystone XL pipeline before approving the project."

**NEBRASKA LANDOWNERS SUE TRANSCANADA OVER KEYSTONE PIPELINE PROJECT.** On Friday, seven Nebraska landowners sued TransCanada Corp., the company behind the Keystone XL pipeline, challenging a state law that allowed the project to move forward. Reuters (1/18) reports. In their suits, the landowners claimed that TransCanada used a Nebraska law to threaten their land with eminent domain, according to court documents. The Nebraskans are seeking an injunction against the company to keep it from building on their land. TransCanada spokesman Mark Cooper stated: "We recognize that some people will continue to oppose this project no matter what process is followed in order to put up roadblocks. We accept that."

**CREW CLEANING CRUDE SPILL AT MONTANA'S YELLOWSTONE RIVER.** The AP (1/19, Brown) reports that workers near the Yellowstone River in eastern Montana are cleaning a spill from Bridger Pipeline's crude line. The company said the 12-inch steel pipeline ruptured Saturday morning and "no more than 1,200 barrels" were spilled. Bridger spokesman Bill Salvin said, "Oil has made it into the river. We do not know how much at this point."

Reuters (1/19) reports that the Poplar pipeline transported 42,000 bpd of crude. The company estimates that the spillage was between 300 and 1,200 barrels of crude, and it is unclear how much went into the river.

**REP. LAMBORN URGES PASSAGE OF PIONEERS ACT FOR DRILLING ON FEDERAL LANDS.** In an op-ed in the Denver Post (1/19, Lamborn, 804K) Rep. Doug Lamborn (R-CO) urged the passage of his PIONEERS Act, which would open additional Federal lands to both exploration and development. Lamborn addressed the argument that fracking on public lands would use too much water by noting that the American Petroleum Institute's best practices for fracking state that "whenever practicable operators should consider using non-potable water for drilling and hydraulic fracturing."

#### ***Offshore Energy Development:***

**DROP IN OIL PRICES AFFECTS BP'S BOTTOM LINE AS FEDERAL OIL SPILL FINES LOOM.** The Wall Street Journal (1/19, Gilbert, Scheck, Subscription Publication, 5.67M) reported that BP PLC faces up to \$13.7 billion in Federal fines linked to the company's conduct in the 2010 Gulf of Mexico oil spill, and BP has already set more than \$10 billion aside in anticipation of the fines. The Journal noted that immediately after the spill, oil prices surged and increased BP's cash flow, allowing it to put the money aside, but that the company now faces less advantageous economic circumstances with the dramatic decrease in oil prices.

Bloomberg News (1/20, Fisk, 2.94M) reports that BP Plc "faces a maximum fine of \$13.7 billion after a U.S. judge ruled that the company dumped 3.2 million barrels of oil into the Gulf of Mexico in 2010 – about 75 percent of what the U.S. calculated." The Federal government's 4.2 million-barrel "estimate of the spill size was rejected" by US District Judge Carl Barbier, "decreasing the potential maximum fine from \$18 billion." Judge Barbier "previously found BP's exploration unit acted with gross negligence in causing the largest offshore oil spill in U.S. history," a ruling that "triggered BP's exposure to the maximum fines under the Clean Water Act."

Reuters (1/16) noted that Judge Carl Barbier found that the Deepwater Horizon spill released 3.19 million barrels of crude, far less than the Federal government estimate of 4.09 million barrels.

Bloomberg News (1/16, 2.94M) noted that the potential maximum fine was originally \$18 billion. Judge Barbier will begin determining the amount of the fine in court in New Orleans next week.

NPR (1/19, 1.58M) on "All Things Considered" interviewed several law professors, all of whom commented on Judge Barbier's pending decision on Deepwater Horizon fines. University of Alabama law professor Monte Carodine said, "When he's thinking about how much money ultimately to impose, he's going to be thinking about that testimony that led him to believe that BP acted with gross negligence."

The Examiner (1/19, 1.01M) notes that the final phase of the trial will begin on Tuesday in New Orleans.

FuelFix (1/19, 7K) reports that Barbier found that "contrary to plaintiffs' arguments, federal authorities in charge of the effort to stop the oil spill didn't rely on BP's low estimate on how much oil was flowing from the Macondo well." Barbier found that despite having "misled the government about how oil was flowing," BP's statements "didn't impede the source control effort."

The AP (1/19, McGill) reports that BP says "its costs already have hit \$42 billion, including a \$14 billion response and cleanup."

The Guardian (UK) (1/19, 2.74M) reports that once Barbier has ruled on a fine total, BP will be able to appeal. If so, "it could be many more years before the final bill gets paid."

***Gulf Spill Case Under New Supervision.*** NPR (1/19, Johnson, 1.58M) reports that as new Justice Department Environment Chief John Cruden starts overseeing the Gulf spill case, he notes, "It clearly ranks up there as one of the most significant environmental disasters of our lifetime and deserves the nation's attention to look and to watch and all of our energy to make sure nothing like this ever happens again." Cruden adds, "In most of our minds are those nearly three months of watching the impact of the spill but also a gigantic economic effect," as he heads to New Orleans in order to supervise the next phase of the spill case.

***Settlement Seen Probable In Oil Spill Penalty Trial.*** Bloomberg News (1/20, Fisk, Calkins, 2.94M) reports that Judge Barbier's ruling "may trigger a settlement before a decision on the amount it must pay after a trial set to begin this week." Judge Barbier "determined on Jan. 15 that the penalty will be based on the size of the spill

being 3.19 million barrels, about 25 percent less than estimated by the government," and that ruling, "reduced the potential maximum pollution fines for the 2010 spill to \$13.7 billion from \$18 billion and increased the incentives for a settlement. 'There's a very good chance – about 75 percent – that they'll settle,' said David Berg, a Houston trial attorney who has been following the litigation." Berg predicted that even if the case does not settle, BP probably won't face a maximum fine, and he predicted a fine in the range of \$8 billion to \$10 billion.

**Additional Coverage.** Additional coverage was provided by the Houma (LA) Courier (1/19, 39K), the Panama City (FL) News Herald (1/20, 93K), and the Houston Chronicle (1/20, 2.28M).

**ANADARKO TO CONTEST POSSIBLE DEEPWATER HORIZON FINES IN COURT.** The Wall Street Journal (1/19, Gilbert, Subscription Publication, 5.67M) reports that Anadarko Petroleum Corp. will begin a trial on January 20 alongside BP PLC to battle pollution penalties of upwards of \$3.5 billion, stemming from its partial stake in the Macondo well, site of the 2010 Deepwater Horizon disaster. The article says Anadarko paid \$4 billion to BP to absolve itself of third-party liability and certain environmental fines in 2011, but judges have held that the company retains liability under the Clean Water Act.

**BSEE SEEKS PROPOSALS FOR OIL SPILL RESPONSE RESEARCH PROJECTS.** The Offshore Magazine (1/19, 143K) reports that the BSEE is "soliciting proposals for oil spill response research projects and will invest up to \$6 million to support these projects in 2015."

## Tackling America's Water Challenges:

**SAN JOAQUIN RIVER COULD RECONNECT WITH PACIFIC OCEAN THIS YEAR.** The Fresno (CA) Bee (1/17, 323K) reports that "if the drought breaks by spring," the San Joaquin River "should be ready to reconnect with the Pacific Ocean for the second time in the last six years, say federal officials who are working on restoring the San Joaquin." However, "it's never that easy with this ambitious, \$1 billion project to bring back water and chinook salmon to a river that has been dry for dozens of miles for more than 60 years." The BOR "still wrestles with potentially damaging river seepage along 23,000 acres of west San Joaquin Valley property," and "area farmers haven't been satisfied with the bureau's progress."

Additional coverage was provided by the Fresno (CA) Bee (1/16, 323K).

**BOR SEEKS PUBLIC COMMENT ON RESERVOIR EXPANSION.** The Yakima (WA) Herald-Republic (1/19, 86K) reports that the BOR is "planning two major upgrades to the Kachess and Keechelus reservoirs near Snoqualmie Pass to provide more water supply for the Yakima Basin during times of drought and to improve fish habitat in the uppermost section of the Yakima River." According to the article, "the proposed projects are part of the Yakima Basin Integrated Plan, and the federal agency is asking the public for opinions on the proposals as part of its environmental review process."

**OFFICIALS RELEASE "DROUGHT CONTINGENCY PLAN".** The Sacramento (CA) Bee (1/20, 547K) reports that "with populations of numerous endangered Delta fish species at alarming lows, officials in California are planning a number of steps to help them survive if 2015 proves to be a fourth drought year." to the article, "DWR, the US Bureau of Reclamation, and three state and federal wildlife agencies last week released a 'Drought Contingency Plan' that outlines numerous steps to stretch water supplies and protect fish species this year."

**CALIFORNIA DEPENDENT ON ATMOSPHERIC RIVERS TO REPLENISH WATER.** The Los Angeles Times (1/19, Barboza, 3.49M) reports that California's drought may end "with a torrent of winter storms that stream across the Pacific" known as atmospheric rivers that dump "much of the year's rain and snow in a few fast-moving and potentially catastrophic downpours." The article cites research saying that atmospheric rivers "have broken 40% of California droughts since 1950." The article adds that, should the rivers fail to arrive, as was the case last winter, "California could be in serious trouble," though a series of atmospheric rivers in succession "could bring devastation."

**ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN.** Additional coverage of the Bay Delta Conservation Plan was provided by the U-T San Diego (1/16, 580K).

## Empowering Native American Communities:

**OKLAHOMA TRIBE OPENS FIRST BUSINESS SINCE HEARTH ACT ENACTED.** The Indian Country

**Today Media Network** (1/19, 49K) reports that "a little more than a year after Secretary Sally Jewell traveled to central Oklahoma to announce regulations to promote self-determination and economic development through tribal trust land leases, the Citizen Potawatomi Nation has opened its first business under the new guidelines." Jack Barrett of BDC Gun Room said, "I was poised for growth. My business had grown and grown quite a bit, and I knew the HEARTH Act was coming. I didn't know exactly when, but I wanted to take advantage of that."

**BIA PREPARES FOR REVIEW OF PROPOSED MEDFORD CASINO.** The **AP** (1/19) reports that the Coquille Indian Tribe's "proposal to build a casino in Medford is taking a step forward as the Bureau of Indian Affairs prepares for an environmental review of the plan." The bureau is "seeking public comment as it works to determine the extent of the review."

Coverage by the AP was also picked up by the **Seattle Post-Intelligencer** (1/19, 612K).

Also reporting on the story is **KOBI-TV Medford, OR** (1/19).

**MENOMINEE SAYS STATE, TRIBE HAVE AGREED ON NEW GAMING COMPACT.** **WBAY-TV Green Bay, WI** (1/19, 22K) reports that "a spokesman for the Menominee Tribe says the tribe and State will sign a new gaming compact this week that could clear the way for a new proposed casino in Southeast Wisconsin." According to the article, "the Menominee and the State have negotiated a new compact that will not force taxpayers to cover any budget shortfalls from the new casino instead the tribe would cover the costs."

Also reporting on the story is **WISN-TV Milwaukee** (1/19, 38K).

**FOREST COUNTY POTAWATOMI COMMUNITY SUES BIA OVER DOCUMENTS RELATED TO KENOSHA CASINO.** The **Kenosha (WI) News** (1/19, 64K) reports that "the Forest County Potawatomi Community has sued the federal government over what it says is a pattern of withholding documents related to the Kenosha Casino project." The tribe "claims it has filed multiple records requests for documents related to the Menominee Tribe's efforts to build a casino in Kenosha, and that the government response has repeatedly fallen short."

**FORMER INTERIOR OFFICIAL DISCUSSES NATIVE AMERICAN ISSUES.** The **Rapid City (SD) Journal** (1/19, 101K) reports former US Assistant Secretary of the Interior for Indian Affairs Carl J. Artman "addressed a crowd of about 70 people at this month's Morning Fill Up event hosted at The Garage-Rapid City on Friday Morning." According to the article, "one overarching theme he has seen in almost all reservations, from those booming with success, such as the Chickasaw Nation of Oklahoma, to those suffering extreme poverty, such as Pine Ridge Indian Reservation south of Rapid City, is the necessity of showing Native Americans an example of success."

**NAVAJOS FACE LEADERSHIP CRISIS DUE TO LANGUAGE-FLUENCY REQUIREMENT.** The **New York Times** (1/17, Turkewitz, Subscription Publication, 9.97M) reports that the Navajo Nation "is now facing what many are calling its greatest political challenge in a generation: a power vacuum caused in part by a requirement that its president be fluent in the Navajo language." Chris Deschene, one candidate heading into the November election that many tribe members "thought could successfully lead the Navajo," was disqualified for not being fluent in the language. "prompting a fight that led the tribe to postpone its 2014 presidential election not once, but twice." As of now, the tribe is being led by Ben Shelly, who lost "his re-election bid and will serve only temporarily until the tribe resolves its leadership crisis."

**STUDY SUGGESTS TRIBAL GAMBLING REVENUES CAN MAKE POVERTY WORSE.** **The Economist** (1/19, 1.04M) reports that "a new study in the American Indian Law Journal suggests that growing tribal gaming revenues can make poverty worse." The study looked "at two dozen tribes in the Pacific north-west between 2000 and 2010," and "during that time, casinos owned by those tribes doubled their total annual take in real terms, to \$2.7 billion." But "the tribes' mean poverty rate rose from 25% to 29%."

## **Office of Insular Affairs:**

**ASSISTANT SECRETARY KIA'AINA RELEASES \$18 MILLION IN REMAINING OPERATIONAL SUBSIDIES TO AMERICAN SAMOA.** The **Marianas Variety** (1/19) reports that Assistant Secretary for Insular Areas Esther Kia'aina "released \$18 million remaining in grant assistance for fiscal year 2015 to the American Samoa government through the Office of Insular Affairs' Operations Grant Program." The article notes that "these funds are what remained of the annual \$22.75 million subsidy needed to support the daily operations of

the American Samoa government, the LBJ Tropical Medical Center, the American Samoa Community College, and the High Court of American Samoa." Kia'aina said, "These funds are critical to supporting the operating costs of the judiciary, the hospital, and the public schools for the American Samoan government," said Assistant Secretary Kia'aina. "Interior has a long history with American Samoa and we are pleased to support Governor Lolo and the general public in this way."

## **Top National News:**

**OBAMA SET TO INTRODUCE "ROBIN HOOD" TAX PLAN ALREADY DISMISSED BY GOP.** Amid widespread reports indicating that nothing new will be announced by President Obama in his State of the Union address, and that because the audience for the speech has fallen significantly in recent years, analysts' expectations for the speech are very low. It is also widely accepted that virtually all of the previously announced initiatives that the President will detail have no chance of becoming law due to Republican opposition. Reports last night and this morning indicate that the President's goal for the speech is to take credit for the improving economy, and then contrast his economic agenda with that of Republicans in Congress, whom he will accuse of prioritizing the interests of the wealthy over the middle class.

On ABC World News (1/19, story 5, 1:10, Muir, 5.84M), for example, Jonathan Karl reported that in his SOTU address, the President "is going to play a little Robin Hood," and is "going to propose tax hikes on the rich," along with "help for the poor and middle class." Politico (1/19, Faler, 683K) has a piece titled, "5 Things About Barack Obama's Robin Hood Tax Plan," in which it is reported that the President wants to "take from the rich and give to everyone else." And at the opening of Fox News' Special Report (1/20, 1.53M), Bret Baier reported that "Republicans say the 'Robin Hood' act is getting old."

In a front-page article titled, "Ready To Move Past Hardship, Obama Resets Goals," the New York Times (1/20, A1, Baker, Subscription Publication, 9.97M) reports that the President "plans to...effectively declare victory over the economic hard times that dominated his first six years in office and advocate using the nation's healthier finances to tackle long-deferred issues like education and income inequality." According to the Times, the President "hopes to pivot finally from the politics of adversity and austerity that have frustrated him for much of his tenure." The Times goes on to say that the President previously had been "cautious in welcoming positive economic news by noting that more work needed to be done to recover from the financial crash of 2008," but "lately...has been pushing the nation's economic prospects more robustly and without as many caveats."

On NBC Nightly News (1/19, story 3, 2:05, Williams, 7.86M), Chris Jansing reported that on Tuesday evening, the President will "make the case that the American economic comeback is real." But Jansing added that while "there is good news," including the unemployment rate, which "has dropped significantly" since he took office, it is also true that "the average household is making about \$2,000 less than it was."

On the CBS Evening News (1/19, story 4, 2:00, Pelley, 5.08M), Major Garrett reported that the White House has "proposed \$320 billion in new taxes achieved by raising the tax rate on investments for the top one percent of earners and closing inheritance loopholes for the wealthy." Garrett noted that the White House "says the new tax revenue would pay for all the President's new spending plans," including "free tuition for community college students." Garrett went on to report that the President has also "called for six weeks of paid family leave for Federal workers, reductions to Federal mortgage insurance fee, new subsidies for rural broadband access and a new push for consumer cybersecurity protections." However, according to Garrett, Republicans are "still waiting for what they describe as serious ideas and signs of cooperation from the White House on trade, tax reform and energy."

Marc Thiessen, in his column for the Washington Post (1/20, 5.17M) says the President appears ready to "propose hundreds of billions of dollars in new taxes that will never be enacted, in order to fund a slew of new government programs that have no chance of being approved." Thiessen contends that if he does so, the President will "make it really, really clear that" he is "not serious about governing."

The Washington Post (1/20, Nakamura, 5.17M) reports that "the tone and tenor of the Obama White House since" the midterms, which "have been anything but conciliatory...have raised doubts about whether the president can — or wants to — break through partisan gridlock in Congress." But the Post adds that "White House aides said they see no contradiction in Obama's approach to dealing with the GOP-controlled Congress...and they point out that some of his proposals received Republican support in the past." According to the Post, the same aides "say Obama is eager to work with the GOP in areas where there is common ground, such as free trade and infrastructure."

In a front-page article titled, "Obama Plan Reignites Tax Fight," the Wall Street Journal (1/20, A1, Lee, Mckinnon, Peterson, Subscription Publication, 5.67M) quotes Rep. Charles Boustany as saying: "If the president were really interested in tax reform, rather than making political statements, he would have approached Congress and members of the Ways and Means committee in thoughtful ways." Roll Call (1/19, Fuller, Subscription Publication, 102K) also says that since November, the President "has been on offense, pushing a more aggressive agenda while raining down veto threats on the new Congress." Roll Call adds that "even if many of his initiatives seem destined to become legislative cannon fodder, his pen-and-phone agenda has been in hyperdrive, most notably with his temporary executive amnesty for millions of immigrants."

In a piece for Politico Magazine (1/19, 683K), Michael Grunwald notes that in 2014, "the average wage for an employed American increased about two percent," and "the total number of employed Americans increased by about three million." And Grunwald argues that "ordinary people are absolutely sharing in the comeback," in part due to the implementation of the Affordable Care Act. Under the headline, "Obama To Gloat Over Resurgent US Economy In State Of The Union Address," the Washington Times (1/20, Boyer, 644K) reports that in recent weeks, the President "has recited the positive economic statistics so often that he undoubtedly can do it in his sleep," and "senior administration officials say Mr. Obama intends to use the improving economy as leverage to call on Congress to approve a wide range of new federal programs."

USA Today (1/20, Jackson, 10.32M) notes the President and other Administration officials have "spent the past two weeks promoting items he will highlight in Tuesday's address, including proposals for tax hikes on the wealthy, tax breaks for the middle class, community college, housing, manufacturing, cybersecurity and paid sick leave." On the CBS Evening News (1/19, story 4, 2:00, Pelley, 5.08M), Scott Pelley said that "if there are any surprises" in the President's address "that will be a surprise, because the White House has taken the unusual step of rolling out the President's ideas in advance."

However, according to Politico (1/19, Breitman, 683K), the President's "aides have suggested" that he "could still have a few political and policy surprises up his sleeve." Mark Penn, who served as an adviser to President Clinton and former secretary of state Clinton's 2008 campaign, suggests that the President might propose "a carbon tax." According to Penn, the President "might say that energy will never be lower so now is the time to place a carbon tax with the proceeds going to Social Security and take advantage of the windfall for the good of all."

The AP (1/20) reported that on Monday, the White House released a "brief video" of the President "talking about the annual address and the state of the union" in which he "says the US is now positioned to 'turn the page' after years of being weighed down by the fallout from the recession." The AP (1/20, Pickler) also looks back at how the President's proposals on immigration reform, minimum wage hikes and energy conservation in his 2014 SOTU address fared in the year since.

In an analysis titled, "Do We Even Need A State Of The Union Address Anymore?", Philip Bump of the Washington Post (1/20, 5.17M) writes that the President "knows that there's no utility to" giving the SOTU address, and notes that "his poll numbers haven't been helped by the speech; on average, his approval as measured by Gallup has been a point lower the week after his addresses, compared to the week prior."

**WPost, ABC's Karl Attribute Obama's Improved Polling To Falling Price Of Gas.** On ABC World News (1/19, story 5, 1:10, Muir, 5.84M), David Muir noted that whereas the President's approval rating stood at about 44% before the midterm election, it is now "up to 50%." Jonathan Karl went on to report that "there's no doubt that" the lower cost of gas across the US "is what's driving" the President's polling up, along with the declining unemployment rate. According to Karl, in his address to the nation, the President's "message" will be that "America is back" and "the economic resurgence is real." And Karl added that polling shows that "Americans are starting to feel it," and noted that "41% believe the economy is 'excellent' or 'good,'" which is "a big change from just three months ago when it was just 27%."

In an analysis of the same poll titled, "Rising Economy Boosts Obama's Standing On Eve Of The State Of The Union," the Washington Post (1/20, Clement, Balz, 5.17M) says the President is "enjoying rising approval ratings that have been strengthened by rapidly improving perceptions of the economy." The Post says the President's polling has "shown improvement since the November elections as" he "moved aggressively and unilaterally on issues such as immigration and climate change." But, according to the Post, "the bigger factor helping to boost his standing is a series of economic indicators that have shown steadily improving conditions," including "sharply lower gasoline prices." Nevertheless, the Post notes that "roughly 6 in 10 Americans describe the economy as 'not so good' or 'poor,'" which is "about the same percentage says that things have gotten pretty

seriously off-track when it comes to the overall direction of the nation."

Nate Cohn of the New York Times (1/20, Subscription Publication, 9.97M) also says "there is a well-established relationship between the pace of economic growth and a president's approval ratings," and President Obama is "clearly benefiting from signs of accelerating economic growth." However, Cohn also notes that the President's improved polling coincides with "a flurry of executive actions," including "on immigration," which "may be at least partly responsible for his rebound." According to Cohn, the President's "rating among Hispanic adults jumped decisively, perhaps by as much as 15 percentage points, in the weeks after his decision to defer deportation and offer work authorization for up to five million immigrants."

Gerald Seib, in his column for the Wall Street Journal (1/20, Subscription Publication, 5.67M), suggests that the President ought to keep in mind that his own party has been significantly weakened since he took office. For instance, now there are just 188 Democrats in the House, down from 257 when he was first inaugurated.

**Poll Finds Majority Of Republicans Support Raising Taxes On Those Making More Than \$1 Million A Year.** The Hill (1/19, Cirilli, 224K) reported that "according to a new GBA Strategies poll," 36% of Republicans support "raising the tax rate on personal income above \$1 million annually...and 47 percent of Republicans were opposed." However, The Hill noted that "when asked whether they supported raising the personal income tax on those earning \$1 million a year to 50 percent, 'the same rate taxed under President Reagan,'" 53% supported the idea and 33% were opposed. The Hill added that "overall, 54 percent of those polled support raising the tax rate on millionaires," and "31 percent are opposed."

Michael Hiltzik of the Los Angeles Times (1/20, 3.49M) praises the President's proposals to raise the capital gains tax from 20% to 28% and eliminate "the so-called trust fund loophole" that "allows capital assets to be passed on to one's heirs at their appreciated value." According to Hiltzik, "The beauty part of this proposal is that it's aimed surgically at the wealthiest taxpayers." The Los Angeles Times (1/20, 3.49M), in an editorial, also says the President is "right to focus on inherited wealth as one way to help narrow the widening gap between the wealthiest Americans and the rest of us."

**NYTimes Profile: Obama's Chief Speechwriter Keenan Produces "Everyman Prose," But Has Famous Friends.** In a profile of chief White House speechwriter Cody Keenan titled, "Obama's 'Hemingway' Draws On Friends, Empathy And A Little Whisky For State Of The Union," the New York Times (1/20, A14, Schmidt, Subscription Publication, 9.97M) reports that President Obama calls him "Hemingway" and that he sought help on the State of the Union address from Deputy National Security Adviser Ben Rhodes. According to the Times, the address is "certain to address the struggles of ordinary Americans in some of the gritty, Everyman prose that has become Mr. Keenan's trademark." The Times also reports that Keenan "has used his perch to befriend some of the many people who pass through" the White House, "including comedians like Zach Galifianakis and Stephen Colbert."

**White House's Increasing Reliance On Social Media Draws Attention.** According to the New York Times (1/20, Shear, Subscription Publication, 9.97M), the Administration "has revamped its digital communications strategy in an attempt to reach new audiences for the State of the Union speech," and has "drafted a team of Internet-savvy staff members to produce a series of videos, digital op-eds, Facebook and Twitter posts, and six-second animated GIFs to capture a larger audience than the mainstream media's shrinking number of viewers and readers." The Times also notes that "in recent announcements on college affordability, immigration and net neutrality, the president has relied on social media platforms including YouTube, Facebook, Medium, Vine, LinkedIn and Twitter."

The Wall Street Journal (1/20, Tau, Subscription Publication, 5.67M) has similar reporting in an article titled, "Obama Uses Social Media To Build Momentum For State Of Union Address." The Washington Post (1/20, Heil, 5.17M) notes that after giving his address, the President will be interviewed by YouTube celebrities Bethany Mota, who "posts lifestyle videos," Hank Green, "who focuses on current events," and comedian GloZell.

**Contractor Recently Released From Cuba Will Be Among Obama's SOTU Guests.** The AP (1/20) reports that Alan Gross, the "former federal subcontractor," who returned to the US in December "after spending five years imprisoned in Cuba will have a prime viewing spot for President Barack Obama's State of the Union address: a seat near first lady Michelle Obama." Reuters (1/20, Lynch) notes that Sen. Marco Rubio has announced he has invited Cuban dissident Rosa Maria Payá to be his guest.

The New York Times (1/20, Baker, Subscription Publication, 9.97M) reports that other guests of the President will include Scott Kelly, "an astronaut scheduled to leave soon for a year aboard the International Space

Station," a "wounded Afghanistan war veteran, a doctor fighting Ebola in Africa, the chief executive of CVS Health, a young immigrant allowed to stay in the country under an order by Mr. Obama, and several people who overcame difficult upbringings in places like Compton and the South Bronx." The Christian Science Monitor (1/19, Feldmann, 380K) provides a full list and brief profile of each of the President's guests.

**WTimes Analysis: Ernst Was Chosen To Deliver The GOP Response In Part Due To Her "Outsider's Perspective."** The Washington Times (1/20, McLaughlin, 644K) profiles Sen. Joni Ernst, who will deliver the Republican response to the President's address. According to the Times, it is Ernst's "outsider's perspective that Republican leaders said they hope to harness." The Times notes that Ernst "rose to prominence with a striking campaign ad highlighting how she 'grew up castrating hogs on an Iowa farm' and pledged to bring that pork-cutting talent to Capitol Hill, where she vowed to 'make 'em squeal.'"

**Brooks: Obama Should Address Extraordinarily High Dropout Rates At Community Colleges.** David Brooks, in his column for the New York Times (1/20, Subscription Publication, 9.97M), takes issue with President Obama's proposal to "make community college free." Brooks says that after a "similar program" was introduced in Tennessee, community college enrollment "surged," but, according to Brooks, "getting students to enroll is neither hard nor important," and, instead, "the important task is to help students graduate" from community colleges where "drop out rates now hover somewhere between 66 percent and 80 percent." Brooks also contends that community college is "already free for most poor and working-class students," which means that the President's plan "would largely be a subsidy for the middle- and upper-middle-class students who are now paying tuition."

**Bittman: Obama Ought To Defend Federal Food Labeling.** Mark Bittman, in his column for the New York Times (1/20, Subscription Publication, 9.97M), urges President Obama to address issues related to food policy in his address to the nation. Among other priorities for Bittman are "get[ting] antibiotics out of the food supply," "support[ing] the strongest front-of-package food labeling that the FDA can possibly develop," and "defend[ing] the menu-labeling program that's mandated under the Affordable Care Act."

#### **HOUSE HOMELAND SECURITY PANEL TO MARK UP BORDER SECURITY BILL ON WEDNESDAY.**

The Hill (1/19, Marcos, 224K) reported in its "Blog Briefing Room" blog that on Wednesday, the House Homeland Security Committee will "mark up legislation this week to enhance border security as the GOP debates how to respond to President Obama's immigration action." The bill, authored by committee chair Michael McCaul, would require DHS "to prevent all unlawful entries into the US along the entire southern border within five years, and high-traffic areas within two years." If those goals are not met, DHS political appointees "would be barred from travel using government aircraft, non-essential training and opportunities for salary bonuses."

**Moran, Warner Look To Boost Start-Ups With Immigration Reforms.** The Washington Post (1/20, Harrison, 5.17M) reports that Sens. Jerry Moran (R) and Mark Warner (D) last week introduced "the fourth version of their Startup Act — a piece of legislation they have been lobbying for and tinkering with for more than three years." In its latest form, it would "tweak the nation's tax code, immigration laws and regulatory system in ways intended to help revive America's entrepreneurial economy." The legislation "features changes to the immigration system, including the creation of an entrepreneur visa that would enable up to 75,000 non-citizens to start and attempt to grow a business" in the US. In addition, it would "create a new visa category for up to 50,000 foreign-born students who graduate from U.S. universities" with STEM degrees and would "eliminate caps on the number of work visas that can be granted to individuals from each country."

**Santa Barbara Paper Becomes Flash-Point For Referring To "Illegals."** The Los Angeles Times (1/20, Covarrubias, 3.49M) reports that in recent years, most news outlets have stopped using the terms "illegals" or "illegal immigrant." However, the decision by the Santa Barbara News-Press to use the term "illegals" in several headlines has become an "an unlikely flashpoint in the nation's immigration battles." The paper's use of the term prompted "protests" and a "message painted in red on the wall" of their office. However, the company is sticking by its choice of language, arguing that it is accurate.

#### **DESPITE ECONOMIC CHALLENGES, FED EXPECTED TO PUSH AHEAD WITH RATE HIKE LATER**

**THIS YEAR.** The Wall Street Journal (1/20, Hilsenrath, Subscription Publication, 5.67M) reports that Fed officials remain on track to being raising short-term interest rates later this year, despite growing concerns about low inflation, weak international growth and a drop in long-term rate. The Journal predicts that at the late January policy meeting, the Fed is likely to indicate that it won't raise rates for at least two more meetings, so increasing them in June at the earliest.

**Home Builders Optimistic About New Year.** The Wall Street Journal (1/20, Hudson, Subscription Publication, 5.67M) reports that while sales of new and existing homes was tepid in 2014, there remains a sense of optimism among home builders at the National Association of Home Builders' International Builders show in Las Vegas. For example, NAR Chief Economist Lawrence Yun predicts that new home sales will rise by 41% this year.

**California's Manufacturing Growth Not Keeping Up With Rest Of Nation.** The Los Angeles Times (1/20, Kirkham, 3.49M) reports that the US "has seen a remarkable turnaround in manufacturing employment" in recent years, but California has not. The state "has been among the slowest to recover jobs in an industry long viewed as a bastion of middle-class opportunity." Since February 2010, US manufacturing employment "has increased at a rate of 6.7%," while California manufacturing "has grown at about 1% over the same period."

## **Editorial Wrap-Up:**

**NEW YORK TIMES. "Nativist Lawsuit On The Texas Border."** In an editorial, the New York Times (1/20, Subscription Publication, 9.97M) says a lawsuit brought by two dozen states to block President Obama's executive actions on immigration is "a meritless screed wrapped in flimsy legal cloth and deposited on the doorstep of a federal district judge" in Texas. The Times cautions that the judge in the case, Andrew Hanen, "may well look kindly on the suit," but even if he "buys the plaintiffs' bogus line, the government still seems likely to win on appeal to the United States Court of Appeals for the Fifth Circuit or the Supreme Court. ... So things will likely be O.K., but they may get bumpy in the meantime."

**"A Perilous Year For Abortion Rights."** The New York Times (1/20, Subscription Publication, 9.97M) editorializes that later this week, the House is expected to vote on "the deceptively named Pain-Capable Unborn Child Protection Act" that would "prohibit almost all abortions 20 weeks after fertilization." While it remains to be seen whether the Senate Majority Leader McConnell "will be able to muster the 60 votes needed to pass the bill in his chamber," he has "vowed to try, notwithstanding President Obama's past veto threat." The Times says that while Republicans "scoff at accusations that they are waging a war against women," this "should not obscure a basic fact: The ability of women to control their reproductive lives is essential for their health, careers and equality."

**"A Legal Victory For Monetary Policy In Europe."** In an editorial, the New York Times (1/20, Subscription Publication, 9.97M) welcomes the decision to allow the ECB to buy government bonds to stimulate lending, and argues that now is the time for the bank to begin purchases.

**WASHINGTON POST. "Hacking Away At The IRS."** In an editorial, the Washington Post (1/20, 5.17M) says that the IRS, because of GOP-driven budget cuts, may have to cut services this year. The Post says that "no matter how therapeutic it may feel to hack away at the IRS, it is deeply irrational." The Post says that Congress "should restore IRS funding in the short term, then simplify the tax code in the long term so that it doesn't take a CPA to navigate the internal revenue system."

**"Don't Scale Back US Visa Waivers."** An editorial in the Washington Post (1/20, 5.17M) urges Congress not to "suspend or end the visa waiver program that allows nationals of 38 countries to travel to the United States without a temporary visitor's visa." Noting "the fear that visa waivers might allow the wrong one or two people into the country," the Post argues that the program "isn't about letting America's guard down," adding that "the nation's no-fly list system is a much more important line of defense," and leaders "should worry more about keeping it up to date and refrain from scaling back the visa waiver program."

**"Progress On Police Shootings."** The Washington Post (1/20, 5.17M) editorializes that Fairfax County, VA officials may soon "drop their stonewalling response to the death of John Geer, who was shot by a county police officer in 2013 as he stood unarmed in the doorway of his home," and the county police and county attorney's office "may produce the documents they've been ordered by a judge to turn over in a civil suit brought by Mr. Geer's family." According to the Post, after "nearly 17 months of foot-dragging and unwarranted obstructions mounted by the county, it's high time." The Post notes that after "a dispute between state prosecutors and county officials over the release of information, the Geer case was transferred to the Justice Department, where the civil rights division is investigating," but "county police have refused to budge from a policy of withholding information until a decision on whether to bring charges against" the officer involved in the shooting is made.

**WALL STREET JOURNAL. "Obama, Congress And Iran."** A Wall Street Journal (1/20, Subscription Publication, 5.67M) editorial argues in favor of an Iran sanctions bill, arguing that it would send signal to Iran that

it cannot indefinitely drag out the talks without facing consequences.

**"Eric Holder's Good Deed."** The Wall Street Journal (1/20, Subscription Publication, 5.67M) editorializes in favor of the recent decision by Attorney General Eric Holder to partially suspend the practice of civil forfeiture, through which state and local officials seize property related to criminal activity and share the proceeds with the Federal government. The Journal urges Congress to permanently reform the process so that future attorneys general cannot re-institute it.

**"A Troubling Death In Argentina."** An editorial in the Wall Street Journal (1/20, Subscription Publication, 5.67M) said that in the wake of Argentine special Prosecutor Alberto Nisman's death, his investigation into the 1994 bombing of a Jewish center requires a leader who will not join the regime of President Cristina Fernandez in letting those responsible for the bombing avoid responsibility.

**"London Kowtow On Hong Kong."** An editorial in the Wall Street Journal (1/20, Subscription Publication, 5.67M) criticizes comments by British Foreign Office chief Hugo Swire, who said last week that Hong Kong is "on a journey to greater democracy and accountability," as well as what it describes as Britain's silence on the issue of freedom in Hong Kong.

### **Washington Schedule:**

#### **TODAY'S EVENTS IN WASHINGTON.**

White House:

**PRESIDENT OBAMA** — Delivers his report to Congress on the state of the union to a Joint Session of Congress.

**VICE PRESIDENT BIDEN** — Attends the state of the union address.

**FIRST LADY MICHELLE OBAMA** — Attends the state of the union address.

**US Senate: 9 p.m. STATE OF THE UNION** — President Obama will deliver his report to Congress on the state of the union to a Joint Session of Congress.

10 a.m. — The Senate will convene and begin a period of morning business. Thereafter, resume consideration of S.1, the Keystone XL Pipeline Act.

10 a.m. **BANKING, HOUSING AND URBAN AFFAIRS** — Hearing on Perspectives on the Strategic Necessity of Iran Sanctions. Witnesses: The Honorable Antony J. Blinken, Deputy Secretary, U.S. Department of State; and The Honorable David S. Cohen, Under Secretary for Terrorism and Financial Intelligence, U.S. Department of the Treasury. The witnesses on Panel II will be: Mr. Mark Dubowitz, Director, Center on Sanctions and Illicit Finance, Foundation for the Defense of Democracies; and Dr. Patrick Clawson, Director of Research, The Washington Institute for Near East Policy. [http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing\\_ID=3517e438-a846-4229-941c-4d2f05d3568b](http://www.banking.senate.gov/public/index.cfm?FuseAction=Hearings.Hearing&Hearing_ID=3517e438-a846-4229-941c-4d2f05d3568b) Location: 538 Dirksen.

2:30 p.m. **COMMERCE, SCIENCE, AND TRANSPORTATION** — Organizational business meeting to consider committee rules, and an original resolution authorizing expenditures by the committee during the 114th Congress. <http://www.commerce.senate.gov/public/> Location: 253 Russell.

2:30 p.m. **INTELLIGENCE** — Closed Briefing on Intelligence Matters. <http://www.intelligence.senate.gov/hearings.cfm?hearingId=4979482fba8f2b2a53b70bd6fb198d49> Location: 219 Hart.

**US House: 11:15 a.m. DELAURO – TRADE – PRESS CALL** — Four members of Congress Representatives Rosa DeLauro, Bobby Scott, Ruben Gallego and Brendan Boyle will be holding a press conference call to discuss what they expect to hear from President Obama in that night's State of the Union address. Speakers: Congresswoman Rosa DeLauro (D-CT); Congressman Bobby Scott (D-VA); Congressman Ruben Gallego (D-AZ); Congressman Brendan Boyle (D-PA); Roger Johnson, President, National Farmers Union. DIAL IN: 1-877-366-0711. Passcode: 28065154

9 p.m. STATE OF THE UNION — President Obama will deliver his report to Congress on the state of the union to a Joint Session of Congress.

12 p.m. — The House will meet for Morning Hour debate and at 2:00 p.m. for legislative business. No votes are expected in the House. At approximately 5:30 p.m., the House will recess to allow for a security sweep of the House Chamber prior to the President's State of the Union address. The House will meet again at approximately 8:35 p.m. in a joint session with the Senate for the purposes of receiving an address from the President of the United States.

2 p.m. RULES — Full Committee. On H.R. 36 – Pain-Capable Unborn Child Protection Act, and H.R. 161 – Natural Gas Pipeline Permitting Reform Act. Location: H-313 Capitol.  
Other: SENATOR HATCH – FINANCE COMMITTEE AGENDA — 9 a.m. Senate Finance Committee Chairman Orrin Hatch (R-Utah) will unveil his committees 2015 agenda in a speech at the U.S. Chamber of Commerce. Location: U.S. Chamber of Commerce Headquarters, 1615 H St. NW.

PURPLE HEART CEREMONY — 10 a.m. Army Chief of Staff Gen. Ray Odierno and Sergeant Major of the Army Raymond Chandler participate in the Purple Heart ceremony in honor of Maj. Jesse Baltazar. Location: Joint Base Henderson Hall, Comney Hall, Arlington, VA.

AEI – U.S. MILITARY – THORNBERRY — 10 a.m. – 11 a.m. A congressional roadmap for rebuilding our nations military: A conversation with House Armed Services Committee Chairman Mac Thornberry. The chairman will sit down with former Senator Jim Talent (R-MO) (AEI) to discuss the proper role of Congress in national security policymaking, the need for a strong US military, and the importance of a reformed defense process that quickly and agilely meets the needs of Americas troops. <http://www.aei.org/events/congressional-roadmap-rebuilding-nations-military-conversation-house-armed-services-committee-chairman-mac-thornberry/>  
Location: AEI, Twelfth Floor, 1150 Seventeenth Street, NW.

## **Last Laughs:**

### **LATE NIGHT POLITICAL HUMOR.**

**Jimmy Fallon:** "The other big story is tomorrow's State of the Union address. I read that during President Obama's speech, one cabinet member will be asked to stay behind to run the government, in case there's a crisis at the Capitol. At least that's what they're telling Biden."

**Jimmy Fallon:** "The Republican National Committee released its first presidential debate schedule, which includes at least nine debates in different states across the country. As opposed to the Democratic debates, which will just be Hillary staring at her opponents until they burst into flames."

**Seth Meyers:** "This weekend an unknown vehicle fired shots at Vice President Joe Biden's house in Delaware. The vehicle sped off before Biden could even load his finger guns and shoot back."

### **Interior Department Announces Draft Strategy for Offshore Oil and Gas Leasing**

*Regionally-tailored plan continues balanced approach to leasing, development; Draft proposal would protect sensitive resources, makes available nearly 80% of estimated undiscovered technically recoverable oil and gas resources on U.S. Outer Continental Shelf*

**WASHINGTON, DC** – As part of President Obama's all-of-the-above energy strategy to continue to expand safe and responsible domestic energy production, Secretary of the Interior Sally Jewell and Bureau of Ocean Energy Management (BOEM) Director Abigail Ross Hopper today announced the next step in the development of the nation's Outer Continental Shelf (OCS) Oil and Gas Leasing Program for 2017-2022.

The Draft Proposed Program (DPP) includes 14 potential lease sales in eight planning areas – 10 sales in the Gulf of Mexico, three off the coast of Alaska, and one in a portion of the Mid- and South Atlantic.

"The safe and responsible development of our nation's domestic energy resources is a key part of the President's efforts to support American jobs and reduce our dependence on foreign oil," said Secretary Jewell. "This is a balanced proposal that would make available nearly 80 percent of the undiscovered technically recoverable resources, while protecting

areas that are simply too special to develop.”

Release of the draft is an early step in a multi-year process to develop a final offshore leasing program for 2017-2022. Before the program is finalized, the public will continue to have multiple opportunities to provide input. Today’s draft proposal was informed by more than 500,000 comments from a wide variety of stakeholders and states.

“The draft proposal prioritizes development in the Gulf of Mexico, which is rich in resources and has well-established infrastructure to support offshore oil and gas programs,” added Jewell. “We continue to consider oil and gas exploration in the Arctic and propose for further consideration a new area in the Atlantic Ocean, and we are committed to gathering the necessary science and information to develop resources the right way and in the right places. We look forward to continuing to hear from the public as we work to finalize the proposal.”

The OCS Lands Act requires the Secretary of the Interior to prepare a five-year program that includes a schedule of potential oil and gas lease sales and indicates the size, timing and location of proposed leasing activity as determined to best meet national energy needs, while addressing a range of economic, environmental and social considerations

BOEM currently manages about 6,000 active OCS leases, covering more than 32 million acres – the vast majority in the Gulf of Mexico. In 2013, OCS oil and gas leases accounted for about 18 percent of domestic oil production and 5 percent of domestic natural gas production. This production generates billions of dollars in revenue for state and local governments and the U.S. taxpayer, while supporting hundreds of thousands of jobs.

### **A REGIONALLY TAILORED APPROACH**

The draft proposal reflects a continuation of the regionally tailored leasing strategies employed in the current 2012-2017 Program that are specific to each planning area. The options in the draft proposal involve sales in offshore areas that have the highest oil and gas resource potential, highest industry interest, or are off the coasts of states that expressed a strong interest in potential energy exploration, while still considering potential environmental impacts, stakeholder concerns, and competing uses of ocean and coastal areas.

#### **Gulf of Mexico:**

The draft proposal includes ten sales in the Gulf of Mexico, one of the most productive basins in the world and where oil and gas infrastructure is well established. The draft proposal includes a new approach to lease sales in the Gulf of Mexico by proposing two annual lease sales in the Western, Central, and the portion of the Eastern Gulf of Mexico that is not subject to Congressional moratoria. This shifts from the traditional approach of one sale in the Western and a separate sale in the Central Gulf each year.

“This new approach will allow for BOEM to more effectively balance the sales while providing greater flexibility to industry to invest in the Gulf, particularly given the significant energy reforms recently adopted by the Mexican government,” said BOEM Director Hopper.

#### **Alaska:**

In Alaska, the draft proposal continues to take a careful approach by utilizing the targeted leasing strategy set forth in the current program, which recognizes the substantial environmental, social and ecological concerns in the Arctic. The draft proposal proposes one sale each in the Chukchi Sea, Beaufort Sea, and Cook Inlet areas.

Also today, President Obama – using his authorities under the OCS Lands Act – designated portions of the Beaufort and Chukchi Seas as off limits from consideration for future oil and gas leasing in order to protect areas of critical importance to subsistence use by Alaska Natives, as well as for their unique and sensitive environmental resources. In December, President Obama used this same authority to place the waters of Bristol Bay off limits to oil and gas development, protecting an area known for its world-class fisheries and stunning beauty.

“We know the Arctic is an incredibly unique environment, so we’re continuing to take a balanced and careful approach to development,” said Jewell. “At the same time, the President is taking thoughtful action to protect areas that are critical to the needs of Alaska Natives and wildlife.”

Four of the five areas withdrawn today by President Obama were previously excluded from leasing in the current 2012-2017 oil and gas program; three of the five were also excluded by the prior administration. Those areas include the Barrow and Kaktovik whaling areas in the Beaufort Sea, and a 25-mile coastal buffer and subsistence areas in the Chukchi Sea. The withdrawal also includes the biologically rich Hanna Shoal area in the Chukchi Sea, which has not previously been excluded from leasing. Extensive scientific research has found this area to be of critical importance to

many marine species, including Pacific walruses and bearded seals.

The proposed Alaska sales would be scheduled late in the program to provide additional opportunity to gather and evaluate information regarding environmental issues, subsistence use needs, infrastructure capabilities, and results from any exploration activity associated with existing leases from previous sales.

#### **Atlantic:**

The draft proposal invites public comment on one potential lease sale late in the program for a portion of the Mid- and South Atlantic OCS, which includes areas offshore Virginia, North and South Carolina and Georgia.

"At this early stage in considering a lease sale in the Atlantic, we are looking to build up our understanding of resource potential, as well as risks to the environment and other uses," said Jewell.

The potential lease sale would require a 50-mile coastal buffer to minimize multiple use conflicts, such as those from Department of Defense and NASA activities, renewable energy activities, commercial and recreational fishing, critical habitat needs for wildlife and other environmental concerns.

The July 2014 Programmatic Environmental Impact Statement on Atlantic Geological and Geophysical activities furthered the Atlantic area strategy by establishing a path forward to update information on the region's offshore oil and gas resources, which is more than 30 years old. Today's proposal is in line with comments received from adjacent states and reflects the Administration's thoughtful approach to potential lease sales in new areas, pending further public review and comment.

#### **Pacific:**

Areas off the Pacific coast are not included in this draft proposal, consistent with the long-standing position of the Pacific coast states opposed to oil and gas development off their coast.

#### **NEXT STEPS**

"Public input is a critical part of our process and we encourage citizens and groups to provide comments to help guide our decisions," said Hopper. "We anticipate robust dialogue with stakeholders in the coming months that will help us prepare a program that emphasizes protection of the marine environment and coastal economies and uses the best available science and technology to inform our decision-making."

In conjunction with the announcement of the DPP, the Department is also publishing a Notice of Intent to Develop a Draft Environmental Impact Statement (EIS), in accordance with the National Environmental Policy Act (NEPA). Following significant public comment and environmental review, the Department will prepare a Draft EIS and Proposed Program, and a Final EIS with the Proposed Final Program (PFP).

The Request for Information, published on June 16, 2014, began a process of broad consideration of all 26 areas of the OCS that are available for leasing and gradually narrows as a result of many stages of public comment and environmental analysis. This DPP is the first such narrowing. Prior to any individual lease sale in the future, BOEM will continue to incorporate new scientific information and stakeholder feedback in its environmental reviews to further refine the geographic scope of the lease areas.

The Draft Proposed Program and the Notice of Intent to Develop a Draft Environmental Impact Statement will be available for public comment for 60 days following the publication of the documents in the Federal Register.

### **ACTION REQUIRED BY 13 Feb 2015- OS FOIA REQUEST**

**Deadline for submission of documents: 13 Feb 2015**

Please provide all responsive documents and your guidance on them as to their releasability no later than 13 Feb 2015. The FOIA only allows us 20 workdays (or, in some cases, 30 workdays) to respond to requests. Your cooperation and assistance in helping us meet our legal deadlines is greatly appreciated. If you think there are other offices which may have responsive documents, please let us know so that we can ensure a full response.

**FOIA # OS-2015-00157**

On January 26, 2015, Michael Ravnitzky filed a Freedom of Information Act (FOIA) request. A copy of the requester's letters are attached below for your reference.

#### **Processing Notes:**

- (1) Please conduct a search of your files for any responsive records, review any records found for a release decision.
- (2) Provide the OS FOIA office with the documents electronically if available (email, CD, or thumb drive is acceptable).
- (3) If electronic copies are not available, provide the OS FOIA office with **SINGLE-SIDED, UNBOUNDED COPIES** of the records, and your guidance on them as to their releasability. **DO NOT** submit original documents. **DO NOT** submit double-sided copies of documents. **DO NOT** submit documents bound with paper clips, staples, etc. The OS FOIA office will respond to the requester on your behalf.
- (4) Please track the time required to search for these documents on the attached FOIA request control form and provide this to us as well.
- (5) Please submit all records to the OS FOIA office, Main Interior Building, Room 7021 or MS-7328 no later than COB 13 Feb 2015.

**If you have any questions regarding the specific guidance on copying, reviewing, and submitting documents to the OS FOIA office, please call me at 202-208-3552.**

**Thanks,  
Cindy**

## Indian Country Today: President Obama Wants \$1 Billion for Indian Education

Tanya H. Lee  
2/2/15

President Barack Obama's 2016 budget request includes copy billion to transform American Indian education, a copy38 million increase from the current funding level.

The transformation would change the Bureau of Indian Education into "an organization that serves as a capacity builder and service provider to support tribes in educating their youth and deliver a world-class and culturally appropriate education across Indian Country."

The copy38 million increase would include \$58.7 million for school repairs and replacement; an initial \$34.2 million to deliver broadband access to all BIE schools; an additional \$20 million for operations and maintenance at Indian school facilities; \$75 million (an increase of copy2.9 million) to fully fund tribal costs for running their own education programs; an additional copy0 million "to incentivize creative solutions to school transformation"; and \$2.6 million to improve school administration.

The increased American Indian/Alaska Native education funding request is part of the launch of the president's Generation Indigenous initiative intended to reduce barriers to success for Native American youth. The Gen I initiative also includes a small increase for scholarships and adult education, \$3 million to support 60 new tribal youth projects in natural resources, a copy5 million increase for the Tiwahe Initiative and \$4 million to establish a One-Stop Tribal Support Center. Funding for Native Youth Community Projects would increase by a whopping \$50 million (up from \$3 million) to improve college and career readiness among Native youth.

Interior Secretary Sally Jewell; Assistant Secretary for Indian Affairs Kevin Washburn, Chickasaw; Education Secretary Arne Duncan; and Jodi Gillette, special assistant to the president for Native American affairs, held a teleconference on January 29 to begin to create public support for the education initiatives.

Jewell noted that the president's recommendations would provide the highest level of funding for AI/AN education since the American Recovery and Reinvestment Act of 2009.

Duncan said, "The lack of opportunity [for Native American youth] is simply unacceptable... At every level, early childhood, K to 12, higher education, we have a lot of hard work ahead of us... Tribes need to play a meaningful leadership role in the education of their students. We know that tribes are best able to know their own students' needs and best able to build upon their strengths."

Asked what chance the AI/AN education proposals had to make it through the Congressional appropriations process, Jewell said, "There is strong bipartisan support for addressing the issues that we talked about and identified here today... There is no question that we are not serving Indian children well and I think there is a sense of appreciation that we are tackling these things head-on and we're not just kicking the can down the road as has been done by both Democratic and Republican administrations for many years. I am quite optimistic that we will get support for this budget."

U.S. Rep. Tom Cole, Chickasaw, a Republican representing Oklahoma's 4th District, said in a statement: "Throughout President Obama's tenure, Native American issues have proven to be a source of bipartisan cooperation, particularly on the House Appropriations Committee... In the days ahead, as my colleagues in the House and Senate seek to find common ground with the Administration, I remain hopeful that we can make significant progress in Indian country during this session of Congress." Cole serves as chairman of the House Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies and on the House Budget Committee.

Congresswoman Betty McCollum, D-Minnesota, said in a statement: "The Bureau of Indian Education has long been underfunded and meeting our trust and treaty responsibility for educating Native American children will not happen overnight... President Obama and Secretary Jewell have taken a significant action to set us on a path towards ensuring that all children in Indian Country have access to a safe place to learn." McCollum is the ranking Democratic member on the Interior Appropriations Subcommittee and the Democratic co-chair of the Native American Caucus.

In response to a question from ICTMN about whether other AI/AN programs would be cut in order to fund the education initiative, Washburn responded, "We have not made significant compromises" in developing the budget.

Jewell said the president's commitment to the American Indian community, based in part on his June visit to the Standing Rock Sioux Reservation in North Dakota and December's White House Tribal Nations Conference, was instrumental in developing the FY16 budget requests for AI/AN education. She noted that the administration would launch a Cabinet Native Youth Listening Tour next week to hear directly from AI/AN kids.

## Cronkite News: Feds fund Navajo schools 11 years after replacement was deemed a priority

Text Size: Small | Medium | Large

Thursday, Feb. 5, 2015

By Miranda Leo

Cronkite News

The kitchen building at Little Singer Community School in the Navajo Nation is plagued with mold and possible asbestos problems. It was first targeted for replacement more than 10 years ago.

WASHINGTON – Eleven years after it identified two deteriorating Navajo schools as priorities for replacement, the federal government could finally be ready to fully fund those projects. Next year.

Cove Day and Little Singer Community schools are the last two of 14 Indian schools across the country that were identified in 2004 as being in highest need of replacement. The fiscal 2016 budget proposal released this week includes \$45 million for school replacement construction in the Interior Department budget, said Secretary Sally Jewell, who conceded the allocation is long overdue.

"It's hard not to feel sad and angry when I look at the conditions of the facilities," Jewell said in a conference call last week announcing the funding.

Cove Day School was built more than 50 years ago and has asbestos in its insulation, according to an official with the Bureau of Indian Affairs. Little Singer Community School, built more than 30 years ago, suffered water damage because of missing roof tiles that led to mold in the building, which in turn led to the

possible exposure of asbestos underneath the flooring of its kitchen building.

Ahniwake Rose, executive director of National Indian Education Association, said that tribal nations and their school systems are largely dependent on federal funding because of limitations on the way tribal governments can levy taxes.

"This system is flawed and needs to be fixed," Rose said. "No school should have to wait a decade for repairs."

She said the already-slow process of funding school construction was further sidetracked by the automatic cuts to the federal budget known as sequestration in 2013, which also stopped a new list from being made that year.

Quinton Roman Nose, executive director of the Tribal Education Departments National Assembly, said that he has dealt with the same gridlock in his work as president of a school board.

"By no means should it take as long as it takes," he said. "I don't like to think about it."

"Some of these situations with bureau schools could have been alleviated if they had processed the building in a timely manner with the amount of funding that was available," Roman Nose said.

While they wait, students have to continue trying to learn in those decaying buildings, some of which only meet the bare minimum to function, said Walter Phelps, a Navajo Nation Council delegate.

"If environmental health were to take a very close look, they might shut down some classrooms," he said.

Phelps said Cove Day and Little Singer Community schools are hardly the only Navajo schools in need. Like Rose, he emphasized the need for a new list.

Jewell agreed, and praised staffers in those schools who have had to work hard to make ends meet. She specifically cited a Hopi school, Moencopi Day School, where half the students are in portable classrooms that are more than 30 years old. Despite those shortcomings, the school is making strides due to the "dedicated principal, staff and students" there, Jewell said.

The White House plan still needs to be approved by Congress, but Jewell said she is confident that the funding for Indian education will be in any final budget.

"There's strong bipartisan support," she said. "There's no debate that we are not serving Indian children well."

## **Indian Country Today: President Obama Wants \$1 Billion for Indian Education**

Tanya H. Lee  
2/2/15

President Barack Obama's 2016 budget request includes copy billion to transform American Indian education, a copy38 million increase from the current funding level.

The transformation would change the Bureau of Indian Education into "an organization that serves as a capacity builder and service provider to support tribes in educating their youth and deliver a world-class and culturally appropriate education across Indian Country."

The copy38 million increase would include \$58.7 million for school repairs and replacement; an initial \$34.2 million to deliver broadband access to all BIE schools; an additional \$20 million for operations and maintenance at Indian school facilities; \$75 million (an increase of copy2.9 million) to fully fund tribal costs for running their own

education programs; an additional copy0 million "to incentivize creative solutions to school transformation"; and \$2.6 million to improve school administration.

The increased American Indian/Alaska Native education funding request is part of the launch of the president's Generation Indigenou initiative intended to reduce barriers to success for Native American youth. The Gen I initiative also includes a small increase for scholarships and adult education, \$3 million to support 60 new tribal youth projects in natural resources, a copy5 million increase for the Tiwahe Initiative and \$4 million to establish a One-Stop Tribal Support Center. Funding for Native Youth Community Projects would increase by a whopping \$50 million (up from \$3 million) to improve college and career readiness among Native youth.

Interior Secretary Sally Jewell; Assistant Secretary for Indian Affairs Kevin Washburn, Chickasaw; Education Secretary Arne Duncan; and Jodi Gillette, special assistant to the president for Native American affairs, held a teleconference on January 29 to begin to create public support for the education initiatives.

Jewell noted that the president's recommendations would provide the highest level of funding for AI/AN education since the American Recovery and Reinvestment Act of 2009.

Duncan said, "The lack of opportunity [for Native American youth] is simply unacceptable... At every level, early childhood, K to 12, higher education, we have a lot of hard work ahead of us... Tribes need to play a meaningful leadership role in the education of their students. We know that tribes are best able to know their own students' needs and best able to build upon their strengths."

Asked what chance the AI/AN education proposals had to make it through the Congressional appropriations process, Jewell said, "There is strong bipartisan support for addressing the issues that we talked about and identified here today... There is no question that we are not serving Indian children well and I think there is a sense of appreciation that we are tackling these things head-on and we're not just kicking the can down the road as has been done by both Democratic and Republican administrations for many years. I am quite optimistic that we will get support for this budget."

U.S. Rep. Tom Cole, Chickasaw, a Republican representing Oklahoma's 4th District, said in a statement: "Throughout President Obama's tenure, Native American issues have proven to be a source of bipartisan cooperation, particularly on the House Appropriations Committee... In the days ahead, as my colleagues in the House and Senate seek to find common ground with the Administration, I remain hopeful that we can make significant progress in Indian country during this session of Congress." Cole serves as chairman of the House Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies and on the House Budget Committee.

Congresswoman Betty McCollum, D-Minnesota, said in a statement: "The Bureau of Indian Education has long been underfunded and meeting our trust and treaty responsibility for educating Native American children will not happen overnight... President Obama and Secretary Jewell have taken a significant action to set us on a path towards ensuring that all children in Indian Country have access to a safe place to learn." McCollum is the ranking Democratic member on the Interior Appropriations Subcommittee and the Democratic co-chair of the Native American Caucus.

In response to a question from ICTMN about whether other AI/AN programs would be cut in order to fund the education initiative, Washburn responded, "We have not made significant compromises" in developing the budget.

Jewell said the president's commitment to the American Indian community, based in part on his June visit to the Standing Rock Sioux Reservation in North Dakota and December's

White House Tribal Nations Conference, was instrumental in developing the FY16 budget requests for AI/AN education. She noted that the administration would launch a Cabinet Native Youth Listening Tour next week to hear directly from AI/AN kids.

Updated with Rep Cole statement:

By KIMBERLY HEFLING, AP Education Writer

WASHINGTON (AP) — The Obama administration says it will ask Congress for \$1 billion next year to run schools for Native American children — including millions in new money to help fix crumbling buildings.

The request — \$150 million more than in this year's budget — sets aside \$58 million in new funding for school construction and \$18 million in new funding for repairs. It also seeks \$33 million to expand the schools' Internet capabilities.

"It's hard not to feel sad or angry when I look at the condition of the facilities," Interior Secretary Sally Jewell told reporters, adding, "We can and we must do better."

The federally run schools situated primarily on remote and impoverished reservations are among the nation's worst performing. About 48,000 students attend the 183 schools in 23 states.

The schools have a tainted legacy dating to the 19th century when Native American children were shipped to boarding schools. The federal government continues to have a treaty and trust responsibility to run them, but they've historically struggled with issues such as financial mismanagement, bureaucracy, poverty and attracting high-quality teachers.

Since President Barack Obama's summer visit to a North Dakota reservation, the administration has pushed ahead with a plan to give tribes more control, but the endeavor has been complicated by the estimated \$1 billion in disrepair at the schools.

Mold, mice and leaky roofs are among the problems. More than 60 of the schools are listed in poor condition, and less than one-third have the Internet and the computer capability to administer new student assessments rolling out in much of the country.

Late last year, Congress provided the schools with a \$40 million bump in annual spending for 2015 over the previous year — about \$19 million for school replacement. That meant funding to finish the Beatrice Rafferty school in Maine and design new facilities for the Little Singer Community and Cove Day schools in Arizona, according to the Interior Department.

Rep. Tom Cole, R-Okla., a member of the House Appropriations Committee and a Native American, said in a statement that he appreciates the effort to put more money into tribal education.

"In the days ahead, as my colleagues in the House and Senate seek to find common ground with the administration, I remain hopeful that we can make significant progress in Indian country during this session of Congress," he said.

## White House and Interior, Education Officials to Preview President's Proposed FY2016 Budget Initiatives for Native Youth, Indian Education

**WASHINGTON, D.C.** – TODAY, Thursday, January 29, 2015, U.S. Secretary of the Interior Sally Jewell, U.S. Education Secretary Arne Duncan and Interior Assistant Secretary-Indian Affairs Kevin Washburn will join Jodi Gillette, President Obama's Special Assistant for Native American Affairs, in a 3:30 p.m. EST teleconference to preview the Administration's proposed fiscal year 2016 budget initiatives for Native Youth and Indian Education.

Today's preview discussion will focus on the Departments of the Interior and Education fiscal year 2016 budget portion of an integrative, comprehensive, and culturally appropriate approach across the federal government to help improve lives and opportunities for Native American youth.

**WHO:** Sally Jewell, Secretary of the Interior

Arne Duncan, Secretary of Education

Jodi Gillette, Special Assistant to the President for Native American Affairs

Kevin Washburn, Assistant Secretary-Indian Affairs

**WHAT:** News media teleconference on President's FY 2016 Budget for Native Youth

**WHEN:** Thursday, January 29, 2015 3:30 p.m. EST

**MEDIA:** All credentialed news organizations are invited to participate in the news media teleconference by dialing 1-888-790-3248 and providing the access code INTERIOR. News media will have an opportunity to ask questions following the presentation.

To: Nedra Darling <Nedra\_Darling@ios.doi.gov>

Nedra -

The Secretary interviewed with the Education Editor of the Huffington Post yesterday on the Native Youth Report released last week in conjunction w/WHTNC and they also discussed Indian Ed and school construction.

There are some good sound bytes in here for your awareness.

Reporter opened up by asking for the background around DOI's mission as it relates to Indian Ed.

Then she asked us to identify some 'stories untold' in Indian Ed - the Secretary provided two key examples from MS Choctaw and Standing Rock.

She also asked about the make up of teachers on the reservation - do they reflect the diversity of the students they teach (oftentimes no)

We also proactively raised the discussion around school construction funds and needs and she appreciated that.

THE WHITE HOUSE

Office of the Press Secretary

---

**EMBARGOED FOR 6:00AM EST WEDNESDAY, DECEMBER 3<sup>rd</sup>**

**FACT SHEET: The White House Tribal Nations Conference**

On Wednesday, the White House will host the White House Tribal Nations Conference. Leaders from the 566 federally-recognized Native nations engaged with the President, Cabinet Officials, and the White House Council on Native American Affairs on key issues facing tribes including, respecting tribal sovereignty and upholding treaty and trust responsibilities, lack of access to capital and credit, and protecting Native women and youth.

This year's Conference builds on the President's visit in June of this year to the Standing Rock Sioux Indian Reservation, where he reaffirmed his commitment to education and economic development. Nearly half of Native American people (42 percent) are under the age of 24; more than one-third of Native children live in poverty; and Native youth have the lowest high school graduation rate of students across all schools. As part of the Conference, the White House will release a new Native Youth Report that explores the challenges facing Native youth and makes recommendations for a path forward. For the first time in these Conferences, the voice of Native youth will be represented by 36 White House Youth Ambassadors, who will join tribal leaders in the breakout sessions and panels, and participating in leadership development programming.

President Obama will also announce the launch of **Generation Indigenous (Gen I)**, a Native youth initiative focused on removing the barriers that stand between Native youth

and their opportunity to succeed. This initiative will take a comprehensive, culturally appropriate approach to help improve the lives and opportunities for Native youth and will include:

- **New Native Youth Community Projects**, administered by the Department of Education (ED) through the existing Demonstration Grants Program to provide funding in a select number of Native communities to support culturally relevant coordinated strategies designed to improve the college-and-career readiness of Native children and youth.
- **New National Tribal Youth Network** program in partnership with the Aspen Institute's Center for Native American Youth. The Youth Network will support leadership development, provide peer support through an interactive online portal that links resources and tools, and empowers youth to become leaders within their communities. The White House, in cooperation with the Aspen Institute, will also host a high-level convening on challenges facing Native youth in February 2015.
- The release of the **White House Native Youth Report** that acknowledges past failures of federal policy on the education of Native students, explores the breadth of the challenges facing Native children, and makes recommendations for a path forward.
- The launch of the **Cabinet Native Youth Listening Tour**, which will begin next year as part of the President's call to hear directly from Native youth on how to bolster federal policies to improve youth outcomes. In addition, the Administration will expand federal outreach on youth internships and employment opportunities across the federal agencies.
- The first ever **White House Tribal Youth Gathering** to engage hundreds of Native youth in a day-long convening in the summer of 2015. This gathering builds on the November 2014 Native Youth Conference hosted by Substance Abuse and Mental Health Services Administration (SAMHSA) and the tribal youth visit with President Obama.

In addition to these efforts, the Department of the Interior (DOI) is making progress to transform the Bureau of Indian Education (BIE). Since Secretary Jewell's Secretarial Order

(<http://www.doi.gov/news/upload/BIEsecOrder.pdf>) directing Indian Affairs to restructure the BIE to serve as a support network to schools rather than a direct education provider, DOI, along with ED has made steady progress towards implementing the Administration's vision of high-achieving tribally-controlled schools.

Below are additional announcements and commitments that support tribal nations:

### ***SUPPORTING THE ACADEMIC ACHIEVEMENT OF ALL NATIVE AMERICAN STUDENTS***

**Promoting Educational Self-Determination for Tribal Nations through Sovereignty in Indian Education Enhancements.** In October 2014, DOI took a critical step towards furthering tribal control over BIE-funded schools when it issued \$1.2M to six tribes to research, assess and develop implementation plans to establish tribally managed school systems.

**Building tribal capacity through State Tribal Education Partnership (STEP) grants.** The STEP grant program is designed to strengthen Tribal Education Agencies (TEAs), and improve partnerships between tribes, states, and school districts so they can work together more effectively to meet the academic, cultural, and social needs of Native students. ED's Office of Indian Education (OIE) published a Notice of Proposed Priorities (NPP) for the STEP program on October 31, 2014.

**Expanding Access to STEM Programs.** In September 2014, ED entered into an agreement with the National Park Service at DOI, and the Hands on the Land program at the National Environmental Education Foundation, to develop a project around STEM skills at 17 Bureau of Indian Education (BIE) funded schools and one state funded school near 21<sup>st</sup> Century Community Learning Center programs. The project will introduce students to STEM activities focused on natural and cultural resources to improve the retention of students in STEM activities during their middle and high school years.

**Convening Native Languages Summit.** Following the first Native Languages Summit in June 2014 which brought together 300 participants, the National Endowment for the Humanities, the National Science Foundation, and the Association of Tribal Archives, Libraries, and Museums have joined ED and the Departments of the Interior (DOI) and Health and Human Services, (HHS) to convene a second Native Languages Summit in the Fall of 2015. The Summit will discuss best practices in preserving and revitalizing Native languages.

**Improvements in ED's Special Programs for Indian Children.** On December 3, ED will publish a notice of proposed rulemaking that proposes changes to the Demonstration grants program to add the **Native Youth Community Projects** mentioned above. It also makes substantial improvements to the Professional Development program, which funds the training of new American Indian/Alaska Native teachers and administrators.

## ***BUILDING STRONGER TRIBAL BUSINESSES AND ECONOMIES***

**Including Tribal Nations in Department of Labor (DOL) Grant Programs.** DOL will announce that the agency will treat federally-recognized tribal governments the same way it treats state and local governments when determining eligibility for employment and training grants. Following this announcement, DOL will consult with tribes, develop model grant language, incorporate the language into all relevant Funding Opportunity Announcements, and inform tribal leaders of upcoming funding opportunities.

**Supporting the Hiring of Tribal Members by Federal Contractors.** DOL's Office of Federal Contract Compliance Programs' (OFCCP) Indian and Native American Employment Rights Program assists federal contractors that would like to use a tribal preference for work on or near tribal lands to do so consistent with existing law. OFCCP will sign an MOU with the Council on Tribal Employment Rights to formalize the agency's working relationship with the Council. In turn, the Council will work closely with Tribal Employment Rights Offices (TEROs) to ensure contractors are able to hire tribal members.

**Supporting Native CDFIs' Sustainability and Impact.** In October, the Department of Treasury announced a specialized training and technical assistance series to Native Community Development Financial Institutions (Native CDFIs) to foster their growth and sustainability, and enhance their ability to deliver financial services and financial products to Native American, Alaska Native, and Native Hawaiian nations, tribes, and communities.

**Improving Transportation and Infrastructure.** As part of a set aside to the Federal Highway Administration's (FHWA) (<http://flh.fhwa.dot.gov/programs/ttp/>) Tribal Transportation Program (TTP), DOT awarded \$8.5 million this year in Tribal Transportation Program Safety Funds to 183 tribal nations for 195 projects that address safety needs in tribally identified areas of planning, engineering, education, and emergency response and enforcement. Similarly, under the discretionary component of the Tribal Transit Program (TTP) ([http://www.fta.dot.gov/grants/13094\\_3553.html](http://www.fta.dot.gov/grants/13094_3553.html)), Federal Transportation Authority (FTA) funded 48 projects in 19 States totaling \$5.04 million for Indian tribes to enhance and expand their transit services.

and to support policies and innovative practices.

## ***PROMOTING CLIMATE RESILIENCE AND LAND AND NATURAL RESOURCES***

**Technical Assistance for Tribal Renewable Energy Projects.** Department of Energy's Office of Indian Energy announced a new round of competition for the Alaska Strategic Technical Assistance Response Team Program (START), a technical assistance program that supports the development of clean energy, energy efficiency projects, capacity building and energy planning efforts for rural Alaska Native villages and corporations.

## ***ADVANCING THE GOVERNMENT TO GOVERNMENT RELATIONSHIP***

**Restoring Tribal Homelands in Trust for Tribes.** DOI continues to prioritize placing tribal homelands in trust for tribes, and has placed more than 280,400 acres of land into trust since 2009. Interior Secretary Jewell's goal for DOI is to place at least 500,000 acres of land into trust by the end of the Obama Administration. In May of this year, DOI issued a proposed rule that would allow the Department to consider fee-to-trust applications from tribes in Alaska. Additionally, under DOI's Land Buy-Back Program (<http://www.doi.gov/buybackprogram/index.cfm>) for Tribal Nations, the Department is paying fair-market value to individuals who choose to sell fractional interests in trust or restricted land. Purchased interests are immediately transferred to tribal trust ownership, ensuring that land stays in trust.

**Resolving Longstanding Disputes.** Since President Obama took office, the Administration has established a new relationship with Native nations, increasing consultation with tribes on matters across the federal government that affect their interests, and the fair and expeditious settlement of litigation. The Administration settled the protracted *Cobell* litigation, several significant water rights cases, and lawsuits or claims brought by 80 Indian tribes, over the management of monetary assets and natural resources held in trust by the United States, for a total of \$2.5 billion. These settlements mark an important milestone in the Obama Administration's commitment to upholding the federal trust responsibility and strengthening our partnerships with tribal nations.

Wanted to make sure you guys saw the section on the LBBP which was included in the WH Fact Sheet released today on embargo to reporters ahead of tomorrow's WH Tribal Nations Conf.

We decided to take out specific #'s here because they shift so often - hence the generalities.

John - apologies that we couldn't make the WH conf call work w/you too today! Turns out, we didn't get any ?'s on the LBBP but Jewell did plug it in her remarks. Thanks again for being willing to accommodate at the last minute, despite the outcome!

-Jessica

## ***ADVANCING THE GOVERNMENT TO GOVERNMENT RELATIONSHIPS***

**Restoring Tribal Homelands in Trust for Tribes.** DOI continues to prioritize placing tribal homelands in trust for tribes, and has placed more than 280,400 acres of land into trust since 2009. Interior Secretary Jewell's goal for DOI is to place at least 500,000 acres of land into trust by the end of the Obama Administration. In May of this year, DOI issued a proposed rule that would allow the Department to consider fee-to-trust applications from tribes in Alaska. Additionally, under DOI's Land Buy-Back Program (<http://www.doi.gov/buybackprogram/index.cfm>) for Tribal Nations, the Department is paying fair-market value to individuals who choose to sell fractional interests in trust or restricted land. Purchased interests are immediately transferred to tribal trust ownership, ensuring that land stays in trust.

THE WHITE HOUSE

Office of the Press Secretary

---

EMBARGOED FOR 6:00AM EST WEDNESDAY, DECEMBER 3<sup>rd</sup>

**FACT SHEET: The White House Tribal Nations Conference**

On Wednesday, the White House will host the White House Tribal Nations Conference. Leaders from the 566 federally-recognized Native nations engaged with the President, Cabinet Officials, and the White House Council on Native American Affairs on key issues facing tribes including, respecting tribal sovereignty and upholding treaty and trust responsibilities, lack of access to capital and credit, and protecting Native women and

youth.

This year's Conference builds on the President's visit in June of this year to the Standing Rock Sioux Indian Reservation, where he reaffirmed his commitment to education and economic development. Nearly half of Native American people (42 percent) are under the age of 24; more than one-third of Native children live in poverty; and Native youth have the lowest high school graduation rate of students across all schools. As part of the Conference, the White House will release a new Native Youth Report that explores the challenges facing Native youth and makes recommendations for a path forward. For the first time in these Conferences, the voice of Native youth will be represented by 36 White House Youth Ambassadors, who will join tribal leaders in the breakout sessions and panels, and participating in leadership development programming.

President Obama will also announce the launch of **Generation Indigenous (Gen I)**, a Native youth initiative focused on removing the barriers that stand between Native youth and their opportunity to succeed. This initiative will take a comprehensive, culturally appropriate approach to help improve the lives and opportunities for Native youth and will include:

- **New Native Youth Community Projects**, administered by the Department of Education (ED) through the existing Demonstration Grants Program to provide funding in a select number of Native communities to support culturally relevant coordinated strategies designed to improve the college-and-career readiness of Native children and youth.
- **New National Tribal Youth Network** program in partnership with the Aspen Institute's Center for Native American Youth. The Youth Network will support leadership development, provide peer support through an interactive online portal that links resources and tools, and empowers youth to become leaders within their communities. The White House, in cooperation with the Aspen Institute, will also host a high-level convening on challenges facing Native youth in February 2015.
- The release of the White House **Native Youth Report** that acknowledges past failures of federal policy on the education of Native students, explores the breadth of the challenges facing Native children, and makes recommendations for a path forward.

- The launch of the **Cabinet Native Youth Listening Tour**, which will begin next year as part of the President's call to hear directly from Native youth on how to bolster federal policies to improve youth outcomes. In addition, the Administration will expand federal outreach on youth internships and employment opportunities across the federal agencies.
- The first ever **White House Tribal Youth Gathering** to engage hundreds of Native youth in a day-long convening in the summer of 2015. This gathering builds on the November 2014 Native Youth Conference hosted by Substance Abuse and Mental Health Services Administration (SAMHSA) and the tribal youth visit with President Obama.

In addition to these efforts, the Department of the Interior (DOI) is making progress to transform the Bureau of Indian Education (BIE). Since Secretary Jewell's Secretarial Order (<http://www.doi.gov/news/upload/BIEsecOrder.pdf>) directing Indian Affairs to restructure the BIE to serve as a support network to schools rather than a direct education provider, DOI, along with ED has made steady progress towards implementing the Administration's vision of high-achieving tribally-controlled schools.

Below are additional announcements and commitments that support tribal nations:

### ***SUPPORTING THE ACADEMIC ACHIEVEMENT OF ALL NATIVE AMERICAN STUDENTS***

**Promoting Educational Self-Determination for Tribal Nations through Sovereignty in Indian Education Enhancements.** In October 2014, DOI took a critical step towards furthering tribal control over BIE-funded schools when it issued \$1.2M to six tribes to research, assess and develop implementation plans to establish tribally managed school systems.

**Building tribal capacity through State Tribal Education Partnership (STEP) grants.** The STEP grant program is designed to strengthen Tribal Education Agencies (TEAs), and improve partnerships between tribes, states, and school districts so they can work together more effectively to meet the academic, cultural, and social needs of Native students. ED's Office of Indian Education (OIE) published a Notice of Proposed Priorities (NPP) for the STEP program on October 31, 2014.

**Expanding Access to STEM Programs.** In September 2014, ED entered into an agreement

with the National Park Service at DOI, and the Hands on the Land program at the National Environmental Education Foundation, to develop a project around STEM skills at 17 Bureau of Indian Education (BIE) funded schools and one state funded school near 21<sup>st</sup> Century Community Learning Center programs. The project will introduce students to STEM activities focused on natural and cultural resources to improve the retention of students in STEM activities during their middle and high school years.

**Convening Native Languages Summit.** Following the first Native Languages Summit in June 2014 which brought together 300 participants, the National Endowment for the Humanities, the National Science Foundation, and the Association of Tribal Archives, Libraries, and Museums have joined ED and the Departments of the Interior (DOI) and Health and Human Services, (HHS) to convene a second Native Languages Summit in the Fall of 2015. The Summit will discuss best practices in preserving and revitalizing Native languages.

**Improvements in ED's Special Programs for Indian Children.** On December 3, ED will publish a notice of proposed rulemaking that proposes changes to the Demonstration grants program to add the **Native Youth Community Projects** mentioned above. It also makes substantial improvements to the Professional Development program, which funds the training of new American Indian/Alaska Native teachers and administrators.

### ***BUILDING STRONGER TRIBAL BUSINESSES AND ECONOMIES***

**Including Tribal Nations in Department of Labor (DOL) Grant Programs.** DOL will announce that the agency will treat federally-recognized tribal governments the same way it treats state and local governments when determining eligibility for employment and training grants. Following this announcement, DOL will consult with tribes, develop model grant language, incorporate the language into all relevant Funding Opportunity Announcements, and inform tribal leaders of upcoming funding opportunities.

**Supporting the Hiring of Tribal Members by Federal Contractors.** DOL's Office of Federal Contract Compliance Programs' (OFCCP) Indian and Native American Employment Rights Program assists federal contractors that would like to use a tribal preference for work on or near tribal lands to do so consistent with existing law. OFCCP will sign an MOU with the Council on Tribal Employment Rights to formalize the agency's working relationship with the Council. In turn, the Council will work closely with Tribal Employment Rights Offices (TEROs) to ensure contractors are able to hire tribal members.

**Supporting Native CDFIs' Sustainability and Impact.** In October, the Department of

Treasury announced a specialized training and technical assistance series to Native Community Development Financial Institutions (Native CDFIs) to foster their growth and sustainability, and enhance their ability to deliver financial services and financial products to Native American, Alaska Native, and Native Hawaiian nations, tribes, and communities.

**Improving Transportation and Infrastructure.** As part of a set aside to the Federal Highway Administration's (FHWA) (<http://fh.fhwa.dot.gov/programs/ttp/>) Tribal Transportation Program (TTP), DOT awarded \$8.5 million this year in Tribal Transportation Program Safety Funds to 183 tribal nations for 195 projects that address safety needs in tribally identified areas of planning, engineering, education, and emergency response and enforcement. Similarly, under the discretionary component of the Tribal Transit Program (TTP) ([http://www.fta.dot.gov/grants/13094\\_3553.html](http://www.fta.dot.gov/grants/13094_3553.html)), Federal Transportation Authority (FTA) funded 48 projects in 19 States totaling \$5.04 million for Indian tribes to enhance and expand their transit services.

**Improving Tribal Water Infrastructure.** This year, the Environmental Protection Agency (EPA) distributed \$29 million to initiate the construction of 77 wastewater infrastructure projects for tribal nations to address the desperate need for basic sanitation services on tribal lands. Additionally, EPA distributed over \$18 million for the construction of drinking water infrastructure projects for tribes to improve access to safe drinking water.

## **IMPROVING TRIBAL JUSTICE**

**Disseminating Reports and Recommendations on Tribal Justice.** In November, the Department of Justice (DOJ) disseminated a report titled *Ending Violence So Children Can Thrive* (<http://www.justice.gov/defendingchildhood/cev-rpt-full.pdf>) that outlines policy and practice recommendations on the issue of children's exposure to violence in Indian Country. The report is the culmination of the work of DOJ's Task Force Advisory Committee on American Indian and Alaska Native Children Exposed to Violence, which conducted four public hearings and several listening sessions across the country to gather information on these important issues. Additionally, DOJ's Office for Victims of Crime's National Coordination Committee on American Indian/Alaska Native Sexual Assault Nurse Examiner-Sexual Assault Response Team released a report titled *Improving Federal Agency Response to Sexual Violence in Tribal Nations: Issues and Recommendations*.

## **SUPPORTING HEALTHY, STRONG NATIVE AMERICAN COMMUNITIES**

**Expanding Access to Health Care.** HHS plans to announce the publication of a proposed rule for Medicare like rates for Indian Health Service (IHS) payments for purchased/referred care for non-hospital based and provider services. Additionally, HHS/CMS and Treasury/IRS have developed a new streamlined process for American

Indian and Alaska Native citizens and family members who are eligible for health services from an Indian health-care provider to claim an exemption from the Affordable Care Act's individual shared responsibility payment through the tax filing process. CMS also issued approximately \$4 million for Connecting Kids to Coverage American Indian and Alaska Native Grants to increase participation in Medicaid and CHIP. In November, the Office of Personnel Management (OPM) announced new flexibility concerning the participation of tribal employers that will make it easier for them to enroll their employees in the FEHB Program (<http://www.opm.gov/healthcare-insurance/tribal-employers/>).

**Improving Behavioral Health.** In November, HHS's SAMHSA hosted a Native Youth Conference focused on improving the health and well-being of Native youth. At the conference, youth shared their views on federal policies, programs, and activities; contributed to the national tribal behavioral health agenda; and learned about best practices supported by SAMHSA's tribal grants. In August, SAMHSA also announced the creation of a new Office of Tribal Affairs and Policy (<http://www.usetinc.org/news/samhsa-office-of-tribal-affairs-and-policy-otap/>) to serve as the point of contact on behavioral health issues and to support policies and innovative practices.

### *PROMOTING CLIMATE RESILIENCE AND LAND AND NATURAL RESOURCES*

**Technical Assistance for Tribal Renewable Energy Projects.** Department of Energy's Office of Indian Energy announced a new round of competition for the Alaska Strategic Technical Assistance Response Team Program (START), a technical assistance program that supports the development of clean energy, energy efficiency projects, capacity building and energy planning efforts for rural Alaska Native villages and corporations.

### *ADVANCING THE GOVERNMENT TO GOVERNMENT RELATIONSHIP*

**Restoring Tribal Homelands in Trust for Tribes.** DOI continues to prioritize placing tribal homelands in trust for tribes, and has placed more than 280,400 acres of land into trust since 2009. Interior Secretary Jewell's goal for DOI is to place at least 500,000 acres of land into trust by the end of the Obama Administration. In May of this year, DOI issued a proposed rule that would allow the Department to consider fee-to-trust applications from tribes in Alaska. Additionally, under DOI's Land Buy-Back Program (<http://www.doi.gov/buybackprogram/index.cfm>) for Tribal Nations, the Department is paying fair-market value to individuals who choose to sell fractional interests in trust or restricted land. Purchased interests are immediately transferred to tribal trust ownership, ensuring that land stays in trust.

**Resolving Longstanding Disputes.** Since President Obama took office, the Administration has established a new relationship with Native nations, increasing consultation with tribes

on matters across the federal government that affect their interests, and the fair and expeditious settlement of litigation. The Administration settled the protracted *Cobell* litigation, several significant water rights cases, and lawsuits or claims brought by 80 Indian tribes, over the management of monetary assets and natural resources held in trust by the United States, for a total of \$2.5 billion. These settlements mark an important milestone in the Obama Administration's commitment to upholding the federal trust responsibility and strengthening our partnerships with tribal nations.

Hi Laurel,

Thanks for checking in. Below and attached are the White House Fact Sheet and 2014 Native Youth Report, which are a good place to start. If you have any other specific questions, or need additional info, please let us know.

Thanks again,

Emily

THE WHITE HOUSE

Office of the Press Secretary

---

**EMBARGOED FOR 6:00AM EST WEDNESDAY, DECEMBER 3<sup>rd</sup>**

### **FACT SHEET: The White House Tribal Nations Conference**

On Wednesday, the White House will host the White House Tribal Nations Conference. Leaders from the 566 federally-recognized Native nations engaged with the President, Cabinet Officials, and the White House Council on Native American Affairs on key issues facing tribes including, respecting tribal sovereignty and upholding treaty and trust responsibilities, lack of access to capital and credit, and protecting Native women and

youth.

This year's Conference builds on the President's visit in June of this year to the Standing Rock Sioux Indian Reservation, where he reaffirmed his commitment to education and economic development. Nearly half of Native American people (42 percent) are under the age of 24; more than one-third of Native children live in poverty; and Native youth have the lowest high school graduation rate of students across all schools. As part of the Conference, the White House will release a new Native Youth Report that explores the challenges facing Native youth and makes recommendations for a path forward. For the first time in these Conferences, the voice of Native youth will be represented by 36 White House Youth Ambassadors, who will join tribal leaders in the breakout sessions and panels, and participating in leadership development programming.

President Obama will also announce the launch of **Generation Indigenous (Gen I)**, a Native youth initiative focused on removing the barriers that stand between Native youth and their opportunity to succeed. This initiative will take a comprehensive, culturally appropriate approach to help improve the lives and opportunities for Native youth and will include:

- **New Native Youth Community Projects**, administered by the Department of Education (ED) through the existing Demonstration Grants Program to provide funding in a select number of Native communities to support culturally relevant coordinated strategies designed to improve the college-and-career readiness of Native children and youth.
- **New National Tribal Youth Network** program in partnership with the Aspen Institute's Center for Native American Youth. The Youth Network will support leadership development, provide peer support through an interactive online portal that links resources and tools, and empowers youth to become leaders within their communities. The White House, in cooperation with the Aspen Institute, will also host a high-level convening on challenges facing Native youth in February 2015.
- The release of the White House **Native Youth Report** that acknowledges past failures of federal policy on the education of Native students, explores the breadth of the challenges facing Native children, and makes recommendations for a path forward.

- The launch of the **Cabinet Native Youth Listening Tour**, which will begin next year as part of the President's call to hear directly from Native youth on how to bolster federal policies to improve youth outcomes. In addition, the Administration will expand federal outreach on youth internships and employment opportunities across the federal agencies.
- The first ever **White House Tribal Youth Gathering** to engage hundreds of Native youth in a day-long convening in the summer of 2015. This gathering builds on the November 2014 Native Youth Conference hosted by Substance Abuse and Mental Health Services Administration (SAMHSA) and the tribal youth visit with President Obama.

In addition to these efforts, the Department of the Interior (DOI) is making progress to transform the Bureau of Indian Education (BIE). Since Secretary Jewell's Secretarial Order (<http://www.doi.gov/news/upload/BIEsecOrder.pdf>) directing Indian Affairs to restructure the BIE to serve as a support network to schools rather than a direct education provider, DOI, along with ED has made steady progress towards implementing the Administration's vision of high-achieving tribally-controlled schools.

Below are additional announcements and commitments that support tribal nations:

### ***SUPPORTING THE ACADEMIC ACHIEVEMENT OF ALL NATIVE AMERICAN STUDENTS***

**Promoting Educational Self-Determination for Tribal Nations through Sovereignty in Indian Education Enhancements.** In October 2014, DOI took a critical step towards furthering tribal control over BIE-funded schools when it issued \$1.2M to six tribes to research, assess and develop implementation plans to establish tribally managed school systems.

**Building tribal capacity through State Tribal Education Partnership (STEP) grants.** The STEP grant program is designed to strengthen Tribal Education Agencies (TEAs), and improve partnerships between tribes, states, and school districts so they can work together more effectively to meet the academic, cultural, and social needs of Native students. ED's Office of Indian Education (OIE) published a Notice of Proposed Priorities (NPP) for the STEP program on October 31, 2014.

**Expanding Access to STEM Programs.** In September 2014, ED entered into an agreement

with the National Park Service at DOI, and the Hands on the Land program at the National Environmental Education Foundation, to develop a project around STEM skills at 17 Bureau of Indian Education (BIE) funded schools and one state funded school near 21<sup>st</sup> Century Community Learning Center programs. The project will introduce students to STEM activities focused on natural and cultural resources to improve the retention of students in STEM activities during their middle and high school years.

**Convening Native Languages Summit.** Following the first Native Languages Summit in June 2014 which brought together 300 participants, the National Endowment for the Humanities, the National Science Foundation, and the Association of Tribal Archives, Libraries, and Museums have joined ED and the Departments of the Interior (DOI) and Health and Human Services, (HHS) to convene a second Native Languages Summit in the Fall of 2015. The Summit will discuss best practices in preserving and revitalizing Native languages.

**Improvements in ED's Special Programs for Indian Children.** On December 3, ED will publish a notice of proposed rulemaking that proposes changes to the Demonstration grants program to add the **Native Youth Community Projects** mentioned above. It also makes substantial improvements to the Professional Development program, which funds the training of new American Indian/Alaska Native teachers and administrators.

## ***BUILDING STRONGER TRIBAL BUSINESSES AND ECONOMIES***

**Including Tribal Nations in Department of Labor (DOL) Grant Programs.** DOL will announce that the agency will treat federally-recognized tribal governments the same way it treats state and local governments when determining eligibility for employment and training grants. Following this announcement, DOL will consult with tribes, develop model grant language, incorporate the language into all relevant Funding Opportunity Announcements, and inform tribal leaders of upcoming funding opportunities.

**Supporting the Hiring of Tribal Members by Federal Contractors.** DOL's Office of Federal Contract Compliance Programs' (OFCCP) Indian and Native American Employment Rights Program assists federal contractors that would like to use a tribal preference for work on or near tribal lands to do so consistent with existing law. OFCCP will sign an MOU with the Council on Tribal Employment Rights to formalize the agency's working relationship with the Council. In turn, the Council will work closely with Tribal Employment Rights Offices (TEROs) to ensure contractors are able to hire tribal members.

**Supporting Native CDFIs' Sustainability and Impact.** In October, the Department of

Treasury announced a specialized training and technical assistance series to Native Community Development Financial Institutions (Native CDFIs) to foster their growth and sustainability, and enhance their ability to deliver financial services and financial products to Native American, Alaska Native, and Native Hawaiian nations, tribes, and communities.

**Improving Transportation and Infrastructure.** As part of a set aside to the Federal Highway Administration's (FHWA) (<http://fh.fhwa.dot.gov/programs/ttp/>) Tribal Transportation Program (TTP), DOT awarded \$8.5 million this year in Tribal Transportation Program Safety Funds to 183 tribal nations for 195 projects that address safety needs in tribally identified areas of planning, engineering, education, and emergency response and enforcement. Similarly, under the discretionary component of the Tribal Transit Program (TTP) ([http://www.fta.dot.gov/grants/13094\\_3553.html](http://www.fta.dot.gov/grants/13094_3553.html)), Federal Transportation Authority (FTA) funded 48 projects in 19 States totaling \$5.04 million for Indian tribes to enhance and expand their transit services.

**Improving Tribal Water Infrastructure.** This year, the Environmental Protection Agency (EPA) distributed \$29 million to initiate the construction of 77 wastewater infrastructure projects for tribal nations to address the desperate need for basic sanitation services on tribal lands. Additionally, EPA distributed over \$18 million for the construction of drinking water infrastructure projects for tribes to improve access to safe drinking water.

## **IMPROVING TRIBAL JUSTICE**

**Disseminating Reports and Recommendations on Tribal Justice.** In November, the Department of Justice (DOJ) disseminated a report titled *Ending Violence So Children Can Thrive* (<http://www.justice.gov/defendingchildhood/cev-rpt-full.pdf>) that outlines policy and practice recommendations on the issue of children's exposure to violence in Indian Country. The report is the culmination of the work of DOJ's Task Force Advisory Committee on American Indian and Alaska Native Children Exposed to Violence, which conducted four public hearings and several listening sessions across the country to gather information on these important issues. Additionally, DOJ's Office for Victims of Crime's National Coordination Committee on American Indian/Alaska Native Sexual Assault Nurse Examiner-Sexual Assault Response Team released a report titled *Improving Federal Agency Response to Sexual Violence in Tribal Nations: Issues and Recommendations*.

## **SUPPORTING HEALTHY, STRONG NATIVE AMERICAN COMMUNITIES**

**Expanding Access to Health Care.** HHS plans to announce the publication of a proposed rule for Medicare like rates for Indian Health Service (IHS) payments for purchased/referred care for non-hospital based and provider services. Additionally, HHS/CMS and Treasury/IRS have developed a new streamlined process for American

Indian and Alaska Native citizens and family members who are eligible for health services from an Indian health-care provider to claim an exemption from the Affordable Care Act's individual shared responsibility payment through the tax filing process. CMS also issued approximately \$4 million for Connecting Kids to Coverage American Indian and Alaska Native Grants to increase participation in Medicaid and CHIP. In November, the Office of Personnel Management (OPM) announced new flexibility concerning the participation of tribal employers that will make it easier for them to enroll their employees in the FEHB Program (<http://www.opm.gov/healthcare-insurance/tribal-employers/>).

**Improving Behavioral Health.** In November, HHS's SAMHSA hosted a Native Youth Conference focused on improving the health and well-being of Native youth. At the conference, youth shared their views on federal policies, programs, and activities; contributed to the national tribal behavioral health agenda; and learned about best practices supported by SAMHSA's tribal grants. In August, SAMHSA also announced the creation of a new Office of Tribal Affairs and Policy (<http://www.usetinc.org/news/samhsa-office-of-tribal-affairs-and-policy-otap/>) to serve as the point of contact on behavioral health issues and to support policies and innovative practices.

### *PROMOTING CLIMATE RESILIENCE AND LAND AND NATURAL RESOURCES*

**Technical Assistance for Tribal Renewable Energy Projects.** Department of Energy's Office of Indian Energy announced a new round of competition for the Alaska Strategic Technical Assistance Response Team Program (START), a technical assistance program that supports the development of clean energy, energy efficiency projects, capacity building and energy planning efforts for rural Alaska Native villages and corporations.

### *ADVANCING THE GOVERNMENT TO GOVERNMENT RELATIONSHIP*

**Restoring Tribal Homelands in Trust for Tribes.** DOI continues to prioritize placing tribal homelands in trust for tribes, and has placed more than 280,400 acres of land into trust since 2009. Interior Secretary Jewell's goal for DOI is to place at least 500,000 acres of land into trust by the end of the Obama Administration. In May of this year, DOI issued a proposed rule that would allow the Department to consider fee-to-trust applications from tribes in Alaska. Additionally, under DOI's Land Buy-Back Program (<http://www.doi.gov/buybackprogram/index.cfm>) for Tribal Nations, the Department is paying fair-market value to individuals who choose to sell fractional interests in trust or restricted land. Purchased interests are immediately transferred to tribal trust ownership, ensuring that land stays in trust.

**Resolving Longstanding Disputes.** Since President Obama took office, the Administration has established a new relationship with Native nations, increasing consultation with tribes

on matters across the federal government that affect their interests, and the fair and expeditious settlement of litigation. The Administration settled the protracted *Cobell* litigation, several significant water rights cases, and lawsuits or claims brought by 80 Indian tribes, over the management of monetary assets and natural resources held in trust by the United States, for a total of \$2.5 billion. These settlements mark an important milestone in the Obama Administration's commitment to upholding the federal trust responsibility and strengthening our partnerships with tribal nations.

### Breakout Session: The Next Generation: Education and Supporting Native Youth [more details »](#)

**Changed:** Participants: SJ  
Phylliss Anderson, Chief, Mississippi Band of Choctaw Indians

**Attendees:** up to 250 conference attendees

**Press:** Closed

**Staff:** Kevin Washburn, Jessica Kershaw

**Advance:** Erin Frautschy Barrows

**Set-up:** TBD

**Format:**

- Introduction and greetings from Phylliss Anderson and Sally Jewell (10 mins)
- Introductions and greetings from federal officials (2 mins each)
- Discussion with tribal leaders facilitated by Chief Phylliss Anderson. Potential topics of discussion include (90 mins):
  - Implementation of BIE's Blueprint for Reform
  - Issues Facing Native Youth attending Public Schools
  - Proposed Native Youth Community Projects (ED place-based initiative)
  - Understanding and Addressing the Impact of Exposure to Violence on Native Youth
  - Health, Wellness, Food and Nutrition
  - Postsecondary Education
  - STEM Education: Building a Workforce Pipeline for the 21st Century Economy
- Closing comments from Phylliss Anderson and Sally Jewell (10 mins)

**When** Tue Dec 2, 2014 2pm – 4pm Eastern Time

**Where** Capital Hilton - Congressional Room (map)

**Calendar** Jessica Kershaw

- Who**
- [REDACTED]@ios.doi.gov - organizer
  - Francis Iacobucci - creator
  - Erin Frautschy Barrows

THE WHITE HOUSE

Office of the Press Secretary

\*EMBARGOED FOR 6:00AM EST WEDNESDAY, DECEMBER 3rd \*

\*FACT SHEET: The White House Tribal Nations Conference \*

..

On Wednesday, the White House will host the White House Tribal Nations Conference. Leaders from the 566 federally-recognized Native nations engaged with the President, Cabinet Officials, and the White House Council on Native American Affairs on key issues facing tribes including, respecting tribal sovereignty and upholding treaty and trust responsibilities, lack of access to capital and credit, and protecting Native women and youth.

This year's Conference builds on the President's visit in June of this year to the Standing Rock Sioux Indian Reservation, where he reaffirmed his commitment to education and economic development. Nearly half of Native American people (42 percent) are under the age of 24; more than one-third of Native children live in poverty; and Native youth have the lowest high school graduation rate of students across all schools. As part of the Conference, the White House will release a new Native Youth Report that explores the challenges facing Native youth and makes recommendations for a path forward. For the first time in these Conferences, the voice of Native youth will be represented by 36 White House Youth Ambassadors, who will join tribal leaders in the breakout sessions and panels, and participating in leadership development programming.

President Obama will also announce the launch of "Generation Indigenous (Gen I)", a Native youth initiative focused on removing the barriers that stand between Native youth and their opportunity to succeed. This initiative will take a comprehensive, culturally appropriate approach to help improve

the lives and opportunities for Native youth and will include:

- New **\*Native Youth Community Projects\***, administered by the Department of Education (ED) through the existing Demonstration Grants Program to provide funding in a select number of Native communities to support culturally relevant coordinated strategies designed to improve the college-and-career readiness of Native children and youth.
- New **\*National Tribal Youth Network\*** program in partnership with the Aspen Institute's Center for Native American Youth. The Youth Network will support leadership development, provide peer support through an interactive online portal that links resources and tools, and empowers youth to become leaders within their communities. The White House, in cooperation with the Aspen Institute, will also host a high-level convening on challenges facing Native youth in February 2015.
- The release of the White House **\*Native Youth Report\*** that acknowledges past failures of federal policy on the education of Native students, explores the breadth of the challenges facing Native children, and makes recommendations for a path forward.
- The launch of the **\*Cabinet Native Youth Listening Tour\***, which will begin next year as part of the President's call to hear directly from Native youth on how to bolster federal policies to improve youth outcomes. In addition, the Administration will expand federal outreach on youth internships and employment opportunities across the federal agencies.
- The first ever **\*White House Tribal Youth Gathering\*** to engage hundreds of Native youth in a day-long convening in the summer of 2015. This gathering builds on the November 2014 Native Youth Conference hosted by Substance Abuse and Mental Health Services Administration (SAMHSA) and the tribal youth visit with President Obama.

In addition to these efforts, the Department of the Interior (DOI) is making progress to transform the Bureau of Indian Education (BIE). Since Secretary Jewell's Secretarial Order [ <http://www.doi.gov/news/upload/BIEsecOrder.pdf> ] ( <http://www.doi.gov/news/upload/BIEsecOrder.pdf> ) directing Indian Affairs to restructure the BIE to serve as a support network to schools rather than a direct education provider, DOI, along with ED has made steady progress towards implementing the Administration's vision of high-achieving tribally-controlled schools.

Below are additional announcements and commitments that support tribal nations:

**\*\*SUPPORTING THE ACADEMIC ACHIEVEMENT OF ALL NATIVE AMERICAN STUDENTS\*\***

**\*Promoting Educational Self-Determination for Tribal Nations through Sovereignty in Indian Education Enhancements\***. In October 2014, DOI took a critical step towards furthering tribal control over BIE-funded schools when it issued \$1.2M to six tribes to research, assess and develop implementation plans to establish tribally managed school systems.

• •

**\*Building tribal capacity through State Tribal Education Partnership (STEP) grants.\*** The STEP grant program is designed to strengthen Tribal Education Agencies (TEAs), and improve partnerships between tribes, states, and school districts so they can work together more effectively to meet the academic, cultural, and social needs of Native students. ED's Office of Indian Education (OIE) published a Notice of Proposed Priorities (NPP) for the STEP program on October 31, 2014.

**\*Expanding Access to STEM Programs.\*** In September 2014, ED entered into an agreement with the National Park Service at DOI, and the Hands on the Land program at the National Environmental Education Foundation, to develop a project around STEM skills at 17 Bureau of Indian Education (BIE) funded schools and one state funded school near 21st Century Community Learning Center programs. The project will introduce students to STEM activities focused on natural and cultural resources to improve the retention of students in STEM activities during their middle and high school years.

**\*Convening Native Languages Summit.\*** Following the first Native Languages Summit in June 2014 which brought together 300 participants, the National Endowment for the Humanities, the National Science Foundation, and the Association of Tribal Archives, Libraries, and Museums have joined ED and the Departments of the Interior (DOI) and Health and Human Services, (HHS) to convene a second Native Languages Summit in the Fall of 2015. The Summit will discuss best practices in preserving and revitalizing Native languages.

**\*Improvements in ED's Special Programs for Indian Children\*.** On December 3, ED will publish a notice of proposed rulemaking that proposes changes to the Demonstration grants program to add the **\*Native Youth Community Projects\*** mentioned above. It also makes substantial improvements to the Professional Development program, which funds the training of new American Indian/Alaska Native teachers and administrators.

### **\*\*\*BUILDING STRONGER TRIBAL BUSINESSES AND ECONOMIES \*\*\***

**\*Including Tribal Nations in Department of Labor (DOL) Grant Programs.\*** DOL will announce that the agency will treat federally-recognized tribal governments the same way it treats state and local governments when determining eligibility for employment and training grants. Following this announcement, DOL will consult with tribes, develop model grant language, incorporate the language into all relevant Funding Opportunity Announcements, and inform tribal leaders of upcoming funding opportunities.

**\*Supporting the Hiring of Tribal Members by Federal Contractors.\*** DOL's Office of Federal Contract Compliance Programs' (OFCCP) Indian and Native American Employment Rights Program assists federal contractors that would like to use a tribal preference for work on or near tribal lands to do so consistent with existing law. OFCCP will sign an MOU with the Council on Tribal Employment Rights to formalize the agency's working relationship with the Council. In turn, the Council will work closely with Tribal Employment Rights Offices (TEROs) to ensure contractors are able to hire tribal members.

• •

**\*Supporting Native CDFIs' Sustainability and Impact.\*** In October, the Department of Treasury announced a specialized training and technical assistance series to Native Community

Development Financial Institutions (Native CDFIs) to foster their growth and sustainability, and enhance their ability to deliver financial services and financial products to Native American, Alaska Native, and Native Hawaiian nations, tribes, and communities.

**\*Improving Transportation and Infrastructure.** \* As part of a set aside to the Federal Highway Administration's (FHWA) [ <http://fhwa.dot.gov/programs/ttp/> ] (<http://fhwa.dot.gov/programs/ttp/>) Tribal Transportation Program (TTP), DOT awarded \$8.5 million this year in Tribal Transportation Program Safety Funds to 183 tribal nations for 195 projects that address safety needs in tribally identified areas of planning, engineering, education, and emergency response and enforcement. Similarly, under the discretionary component of the Tribal Transit Program (TTP) [ [http://www.fta.dot.gov/grants/13094\\_3553.html](http://www.fta.dot.gov/grants/13094_3553.html) ] ([http://www.fta.dot.gov/grants/13094\\_3553.html](http://www.fta.dot.gov/grants/13094_3553.html)), Federal Transportation Authority (FTA) funded 48 projects in 19 States totaling \$5.04 million for Indian tribes to enhance and expand their transit services.

**\*Improving Tribal Water Infrastructure.\*** This year, the Environmental Protection Agency (EPA) distributed \$29 million to initiate the construction of 77 wastewater infrastructure projects for tribal nations to address the desperate need for basic sanitation services on tribal lands. Additionally, EPA distributed over \$18 million for the construction of drinking water infrastructure projects for tribes to improve access to safe drinking water.\*\*\*\*

\*\*\* \*\*

#### \*\*\*IMPROVING TRIBAL JUSTICE \*\*\*

**\*Disseminating Reports and Recommendations on Tribal Justice\*\*.** \* In November, the Department of Justice (DOJ) disseminated a report titled "Ending Violence So Children Can Thrive [ <http://www.justice.gov/defendingchildhood/cev-rpt-full.pdf> ]" (<http://www.justice.gov/defendingchildhood/cev-rpt-full.pdf>) that outlines policy and practice recommendations on the issue of children's exposure to violence in Indian Country. The report is the culmination of the work of DOJ's Task Force Advisory Committee on American Indian and Alaska Native Children Exposed to Violence, which conducted four public hearings and several listening sessions across the country to gather information on these important issues. Additionally, DOJ's Office for Victims of Crime's National Coordination Committee on American Indian/Alaska Native Sexual Assault Nurse Examiner-Sexual Assault Response Team released a report titled "Improving Federal Agency Response to Sexual Violence in Tribal Nations: Issues and Recommendations".

#### \*\*\*SUPPORTING HEALTHY, STRONG NATIVE AMERICAN COMMUNITIES\*\*\*\_\_

**\*Expanding Access to Health Care.** \*HHS plans to announce the publication of a proposed rule for Medicare like rates for Indian Health Service (IHS) payments for purchased/referred care for non-hospital based and provider services. Additionally, HHS/CMS and Treasury/IRS have developed a new streamlined process for American Indian and Alaska Native citizens and family members who are eligible for health services from an Indian health-care provider to claim an exemption from the Affordable Care Act's individual shared responsibility payment through the tax filing process. CMS also issued approximately \$4 million for Connecting Kids to Coverage American Indian and Alaska Native Grants to increase participation in Medicaid and CHIP. In November, the Office of Personnel Management (OPM) announced new flexibility concerning the participation of tribal employers that will make it easier for them to enroll their employees in the FEHB Program [ <http://www.opm.gov/healthcare-insurance/tribal-employers/> ] (<http://www.opm.gov/healthcare-insurance/tribal-employers/>).

**\*Improving Behavioral Health.** \*In November, HHS's SAMHSA hosted a Native Youth Conference focused on improving the health and well-being of Native youth. At the conference, youth shared

their views on federal policies, programs, and activities; contributed to the national tribal behavioral health agenda; and learned about best practices supported by SAMHSA's tribal grants. In August, SAMHSA also announced the creation of a new Office of Tribal Affairs and Policy [ <http://www.usetinc.org/news/samhsa-office-of-tribal-affairs-and-policy-otap/> ] (<http://www.usetinc.org/news/samhsa-office-of-tribal-affairs-and-policy-otap/>) to serve as the point of contact on behavioral health issues and to support policies and innovative practices.

**\*\*PROMOTING CLIMATE RESILIENCE AND LAND AND NATURAL RESOURCES\*\***

**\*Technical Assistance for Tribal Renewable Energy Projects.\*** Department of Energy's Office of Indian Energy announced a new round of competition for the Alaska Strategic Technical Assistance Response Team Program (START), a technical assistance program that supports the development of clean energy, energy efficiency projects, capacity building and energy planning efforts for rural Alaska Native villages and corporations.

• •

**\*\*ADVANCING THE GOVERNMENT TO GOVERNMENT RELATIONSHIP\*\***

**\*Restoring Tribal Homelands in Trust for Tribes.\*** DOI continues to prioritize placing tribal homelands in trust for tribes, and has placed more than 280,400 acres of land into trust since 2009. Interior Secretary Jewell's goal for DOI is to place at least 500,000 acres of land into trust by the end of the Obama Administration. In May of this year, DOI issued a proposed rule that would allow the Department to consider fee-to-trust applications from tribes in Alaska. Additionally, under DOI's Land Buy-Back Program [ <http://www.doi.gov/buybackprogram/index.cfm> ] (<http://www.doi.gov/buybackprogram/index.cfm>) for Tribal Nations, the Department is paying fair-market value to individuals who choose to sell fractional interests in trust or restricted land. Don't share this with anyone, but our construction funding is going to the top tomorrow :) You won't be with Sally for this, right?

Subject: Re: Re:

To: "Ayoob, Edward" <Edward.Ayoob@btlaw.com>

I think that is perfect! Right tone – respectful, but still a hard ask!

On Mon, Dec 1, 2014 at 11:07 PM, Ayoob, Edward <Edward.Ayoob@btlaw.com> wrote:

Thoughts?

Mr. President. Thank you for Secretary Jewell's visit to Mississippi in October.

Her visit to Choctaw enforced your commitment to our Native youth, as did your historic visit to Standing Rock.

We agree with you that economic development in Indian Country starts with quality education.

One of the things we discussed was the state of Indian schools at Mississippi Choctaw and around the country.

Some of our schools are fifty years old and in desperate need of repair or replacement, and I know you saw some schools and conditions that are far worse than ours.

Your support of Indian Country is unprecedented, but on school construction I hope that we can work together toward improving results.

For example, President Bush dramatically increased school construction dollars starting in 2001, with a

particular emphasis on replacement school construction.

However, the total amount of replacement school construction dollars during the first six years of your Administration– if you do not count Recovery Act dollars – adds up to less than half of what it was during the first year of the Bush Administration.

Furthermore, replacement school construction funding for Department of Defense schools, was more than \$1 billion for FY13 and FY14.

There are 193 DoD schools and 183 BIA/BIE schools.

While Tribal leaders just as much as anyone understand the challenges of tight budgets, it's hard to understand or accept these numbers.

So my question is this:

Knowing how important quality education is to our youth, especially if we want to improve economic development and create jobs, how do we make Indian School Construction a greater priority in these next two years?

**From:** Yu, Donald [mailto:donald\_yu@ios.doi.gov]

**To:** Ayoob, Edward  
**Subject:** Re: Re:

I would! Also, about bullet point seven, I wouldn't mention the \$100M because taken out of context, that might sound like a lot when in reality it's been cut drastically since the previous administration.

On Mon, Dec 1, 2014 at 10:44 PM, Ayoob, Edward <Edward.Ayoob@btlaw.com> wrote:

So I used the words "previous Administration" You think I should say "President Bush" or "Bush Administration"

**From:** Yu, Donald [mailto:donald\_yu@ios.doi.gov]  
**Sent:** Monday, December 01, 2014 10:40 PM  
**To:** Ayoob, Edward  
**Subject:** Re:

Eddie, thanks for sharing! I think all of the bullet points look good except for bullet number 7 – I think it would be a more effective comparison to highlight funding under Obama against under Bush. That's just my suggestion. If you do decide to keep the \$100M, I would clarify that funding is for major repairs, etc., and replacement schools haven't been built since the Recovery Act under this Administration. Again, I think it's more effective to compare against Bush.

On Mon, Dec 1, 2014 at 10:30 PM, Ayoob, Edward <Edward.Ayoob@btlaw.com> wrote:

Any thoughts on this (trying to find the right balance between gratitude and need). Please don't hesitate to flag if you have an issue or concern...

- Mr. President. Thank you for Secretary Jewell's visit to Mississippi in October.
- Her visit to Choctaw enforced your commitment to our Native youth, as did your historic visit to Standing Rock.
- We agree with you that economic development in Indian Country starts with quality education.
- One of the things we discussed was the state of Indian schools at Mississippi Choctaw and around the country.
- Some of our schools are fifty years old and in desperate need of repair or replacement, and I know you saw some schools and conditions that are far worse than ours.
- Your support of Indian Country is unprecedented, but on school construction I hope that we can work together toward improving results.
- For example, in your budget requests for FY14 and FY15, for the Bureau of Indian Affairs/Bureau of Indian Education (with 183 schools), construction was at approximately \$100 million over both years.
- Compare that to Department of Defense schools (with 193 schools), where your budget request was over \$1 billion for those same two years – ten times more than Indian schools.
- Furthermore, while the previous Administration dramatically increased school construction dollars starting in 2001, funding since 2009 has been less than half of what it was from 2001-2008 if you don't

include Recovery Act dollars.

- So my question is this:

- Knowing how important quality education is to our youth, especially if we want to improve economic development and create jobs on our reservations, how do we make Indian School Construction a greater priority in these next two years?

## Native Youth Report for Photo Clearance

1 message

---

**Jessica Kershaw** <jessica\_kershaw@ios.doi.gov>

Fri, Nov 28, 2014 at 9:06 PM

To: Heather Knight <heather.knight@choctaw.org>

Heather -

Hello - and happy belated Thanksgiving!

The WH would like to use some of our photos from the visit to MS Band of Choctaw in their Native Youth report to be published in conjunction with the White House Tribal Nations Conference.

Since the kids all had photo releases and our official photographer was there too taking photos, it's understood that the photos are usable and shareable in the public domain without re-checking each time of use. However, I want to make sure that's consistent with your understanding.

Would you let me know if there are any concerns here? It's awfully exciting that some of the photos from the visit will be featured in a White House report!

Jessica

**Draft Talking Points for Secretary Sally Jewell  
 2014 White House Tribal Nations Conference  
 Wednesday, December 3, 2014**

*Suggested length: 8-10 minutes*

- **WELCOME!** (2 mins)

- Honored to **welcome** you to 6<sup>th</sup> annual **White House Tribal Nations Conference!**

- - o **Thank you** for traveling from near and far to share your voice with us

- Different look this year (Interior Bldg. under construction), but it's **still the same underlying principal** bringing us together: a **nation-to-nation relationship**

- - o President Obama wanted opportunity for all 566 federally recognized tribes to come together and have **face-to-face dialogues** with him and his cabinet

- - o **Conference is true reflection of the spirit & strength of the Obama Administration's commitment to Indian Country**

- Proud that this year's Conference has a **special focus – Supporting Native Youth** – our next generation of tribal leaders

- - o Hope you'll recognize we've **worked to incorporate your feedback from last year** to make this year's conference even more meaningful (Ex: double break outs sessions, separated panel discussions, multiple days of program)

- **Importantly, we all understand that it's not just Conference Day** that we need to focus on the health, success and future of tribal communities – **it's every day.**

Special focus:

- President established White House Council on Native American Affairs last year

- As chair, held **4 meetings** – convening high number of cabinet members and senior White House officials - interagency work is starting to pay off

- **Shared Commitment to Indian Country** (1 min)

- In past 20 some months, honored to visit over **20 tribes** around the nation

- Every visit, every day in this job – has **deepened my respect and admiration for you, the First Americans** – your spirit, wisdom and resilience

- -Visits to:

- spotlight Indian education (Bug School, Wind River w/Duncan, MS Band of Choctaw)
- highlight efforts to combat the effects of climate change (Inuit, Suquamish)
- stand up important energy projects (Moapa Band, NV solar)
- promote economic growth and trust reform (Navajo - tribal trust; CSKT - land buy back to bring lands back to useful propose)

- Time spent in Indian Country **deepens my commitment** to making sure Interior is doing everything we can to **support your vision for a strong and prosperous future**

- Commitment I share with the President

- **Historic visit to Standing Rock Sioux Tribal Nation**

- o At 5<sup>th</sup> annual **White House Tribal Nations Conference**, made a promise to visit Indian Country this year – **he delivered**

- o I know he looks forward to addressing you later today on his reflections from that special trip.

- **UPDATE: White House Council on Native American Affairs (6 mins)**

- Obama Administration has made incredible **strides** in strengthening our **government-to-government** relationship ... but **more work to be done**

- President established White House Council on Native American Affairs last year

- As chair, held **4 meetings** – convening high number of cabinet members and senior White House officials

- o Continually refining council work to **respond to tribal concerns**
- o Can attest **Cabinet is fully and personally engaged** on issues

- Has already **increased interagency cooperation**

- **Example: Education (one of my top priorities as Secretary)**

- o Working w/**Sec. Duncan** to transform/redesign **BIE**
- o This fall **announced \$1.2 million** to several tribes to begin researching, assessing and developing a plan to **establish a tribally managed school system, if that's what you want to do**
- o Using **whole-of-government** approach to respond to **multifaceted problem** - housing, healthcare, transportation

- o **Suggested Tribal Visits to Highlight:** CrystalBoarding School (Navajo), Mississippi Band of Choctaw, Leech Lake Band of Ojibwe (Bug O Ne Gay Shig, MN)

#### Example: Economic Development

- o **Tribal Trust Management:** More than **80 lawsuits** resolved under this Administration for a total of **\$2.5 billion** (*Navajo Visit*)
- o **Land into Trust:** Taken over **280,000 acres into trust since 2009** - more than half way toward the Department's goal of 500,000 acres before the end of the President's term
- o **Land Buy-Back Program:** First full year this year—made more than \$740 million in offers, restoring more than 410,000 acres of land back to tribes (*CSKT – WY Visit*)
- o **Hearth Act:** Continue to encourage applications for this important program on tribal leasing regs. to spur investment and commercial development (*Citizen Band Potawatomi- OK Visit*)

#### Example: Climate

- o Tribes at pointy end of spear on climate change
- o Example of where you've seen it (*Inuit-AK, Suquamish- WA, Seminole or Miccosukee Tribes – FL*)
- o Working with White House on **Climate Action Plan**

#### Example: Energy

- o Working w/ **Sec. Moniz** to unlock energy development
- o New Mexico
- o Approved 2<sup>nd</sup> **solar project** on tribal lands: 200-MW project, Moapa Band, NV

#### CONCLUSION (1 min)

All the actions we are taking now – whether it's on education, tackling climate change, or trust reforms – are with an eye toward the **health and prosperity** of the next generation

**Thank you for your leadership on behalf of our young people** – you are a **tested vehicle for delivering positive change** to Indian Country

I hope you'll continue to share your wisdom throughout today – **but also throughout the year** - so that we can do our jobs better to serve you and our next generation of Tribal leaders.

## For Review by 12:30 Today: WHTNC Video Script

---

Androff, Blake <blake\_androff@ios.doi.gov>

Tue, Nov 25, 2014 at 11:29 AM

To: "Kershaw, Jessica" <jessica\_kershaw@ios.doi.gov>

Cc: Kate Kelly <kate\_kelly@ios.doi.gov>, Tim Fullerton <tim\_fullerton@ios.doi.gov>

Removing Frank and Tim B for an initial discussion first.

I know we are trying to keep this short and sweet, and I hope I'm not too late to the party here, but I had envisioned something that was a bit more comprehensive of our actions this year that was geared toward tribal leaders and Indian Country specifically. (ie a bit more of a victory lap of how much the Secretary has been personally invested in these efforts -- I think we have a fairly compelling story to tell her so I would be looking for more anecdotes of her travels and her specific visits).

Feel free to overrule me here if resources don't allow us to quickly turn this around.

We could also keep this short by ticking through these in a rather quick manner. ("In October, the Department announced it was investing \$X million to help tribal communities adapt to the impacts of climate change. In June, the Secretary unveiled new efforts to spur economic activities in Indian Country," etc.)

To that end, I think we should discuss including the following -- and would note that this is rather inclusive so not everything needs to be added but wanted to provide a host of ideas from which we can discuss:

-HEARTH Act signings (I know we traveled for one in Nov 2013 but can't remember if we did any in 2014)

-The package of regulatory reforms to spur economic development (<http://www.doi.gov/news/pressreleases/on-the-heels-of-historic-presidential-visit-to-indian-country-secretary-jewell-announces-interior-initiatives-to-support-tribal-led-economic-development.cfm>)

-Since we make a reference to climate change but don't have any specifics, we might consider using the tribal grants for climate change (<http://www.doi.gov/news/pressreleases/secretary-jewell-announces-new-tribal-climate-resilience-program.cfm>)

-For education reform, I think it's worth noting the schools she visited and with whom.

(Choctaw: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-choctaw-high-school-in-mississippi.cfm>) (Maine and Minnesota: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-secretary-duncan-to-visit-indian-school-in-maine.cfm>) (Laguna in Dec 2013: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-laguna-pueblo-school-discuss-american-indian-education-initiatives.cfm>) (Navajo: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-kick-off-multi-state-swing-promoting-major-department-priorities.cfm>)

-Joined DAS Roberts to discuss the Administration's budget priorities tribal summit in April (<http://www.doi.gov/news/pressreleases/secretary-jewell-underscores-presidents-commitment-to-build-strong-resilient-tribal-communities-at-pacific-northwest-tribal-summit.cfm>)

-Her participation (and that of the Cabinet) hosting the White House Council on Native American Affairs meetings (<http://www.doi.gov/news/pressreleases/secretary-jewell-convenes-fourth-meeting-of-the-white-house-council-on-native-american-affairs.cfm>)

-Her participation at the National Congress of American Indians, if there is anything to note from her participation here (<http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-deliver-keynote-remarks-at-national-congress-of-american-indians-annual-convention-in-atlanta.cfm>)

In particular, we need some material concerning Indian Country and, if possible, schools. [REDACTED] [REDACTED] but if we weren't going to use the kid with the solar car (which Sally mentioned) we were going to check with Monty about other possible examples of the hope and success that self-determination combined with proper resources and support provide to Indian children.

I'm not sure what folks are up to this morning, but we need to get the document squared away by early afternoon so that Sally has it and can take a look during her downtime and on the flight.

### **DOI in the News:**

**IDAHO CONFERENCE SEEKS SOLUTIONS FOR SAGE GROUSE.** The [AP](#) (11/6) reports "some of the nation's top public lands officials and rangeland scientists have gathered in Boise to try to figure out what can be

done to avoid a listing of the sage grouse on the federal Endangered Species Act." According to the article, "the three-day conference, called The Next Steppe: Sage-grouse and Rangeland Wildfire in the Great Basin, opened Wednesday with keynote remarks" by Mike Connor, deputy secretary of the Interior Department. Connor said, "Just seeing this grow from primarily a federal agency discussion to a broad-based, diverse level of participation from states and local communities is very encouraging, because that diversity of participation is what we're going to need to make progress over the next year on an important set of issues."

Also, the Idaho Statesman (11/5, 150K) reports that the conference "opened Wednesday with remarks from US Fish and Wildlife Service Director Dan Ashe and US Bureau of Land Management Director Neil Kornze." The article notes that "early remarks focused on finding collaboration among federal, state and private entities as massive wildfires and invasive species threaten a fragmented sage grouse habitat."

Coverage by the AP was also picked up by the Washington Times (11/6, Ridler), the Houston Chronicle (11/6, Ridler, 2.47M), the Twin Falls (ID) Times-News (11/6, 54K), the Seattle Post-Intelligencer (11/6, 1.06M), the San Francisco Chronicle (11/6, 2.24M), the Spokane (WA) Spokesman-Review (11/5, 169K), KSL-TV Salt Lake City (11/6, 1.07M), and KIVI-TV Boise, ID (11/6, 861).

**SECRETARY JEWELL VISITS CHOCTAW TRIBAL SCHOOLS.** The Neshoba (MS) Democrat (11/6, 21K) reports that Interior Secretary Sally Jewell took a tour of the Choctaw Indian Reservation on October 29. She was joined by Assistant Secretary of Indian Affairs Kevin Washburn and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel "to tour the three facilities and discuss ongoing Indian education reform initiatives." According to the article, "in a press conference at the end of the visit, Jewell said the Choctaw school system functioning at such a high level can be used as a model to other Tribal school systems that are struggling." She "identified the involvement of Tribal leadership as something that puts them ahead of the pack." Jewell said, "We got a challenge in Indian education across the country. We under-perform other students, part of my job as Secretary of the Interior is overseeing the bureau of Indian education. We're reforming it, because it's not working well for Indian children, but right here in Mississippi we see a really highly functional school system, we see tribal leadership with the chief engaged deeply in the schools, the school system and the future for these kids and we know that there are lessons that we can learn here, that we can apply elsewhere to Indian country but we also know that there are things that the tribe needs from us to a better job in supporting their needs, so that's why we're here."

**INTERIOR AWARDS GRANTS TO LGBT HISTORIC AND CULTURAL SITES.** The Out In Jersey (11/6, 104) reports that the NPS has "given a \$49,999 grant to the LGBT Sites in New York City Project, which seeks to survey and document 'historic and cultural sites associated with LGBT heritage' in the five boroughs." Also, "a second grant for \$25,000 was given to the LGBT Heritage of Kentucky Project, a group supporting the addition of Louisville's Henry Clay Hotel and the Whiskey Row Historic District to the National Register of Historic Places." Interior Secretary Sally Jewell said, "Our American heritage is a tapestry made up of threads from many nations and communities, and we are working with public and private partners to help ensure that our National Register of Historic Places reflects this remarkable diversity."

**US WATER USE DROPS TO LOWEST LEVEL IN 40 YEARS.** The Environment News Network (11/6, 260) reports that "water use across the country reached its lowest recorded level in nearly 45 years." According to a new USGS report, "about 355 billion gallons of water per day (Bgal/d) were withdrawn for use in the entire United States during 2010." The article notes that "this represents a 13 percent reduction of water use from 2005 when about 410 Bgal/d were withdrawn and the lowest level since before 1970." Mike Connor, deputy secretary of the Interior, said, "Reaching this 45-year low shows the positive trends in conservation that stem from improvements in water-use technologies and management. Even as the US population continues to grow, people are learning to be more water conscious and do their part to help sustain the limited freshwater resources in the country."

Also reporting on the story is the Huffington Post (11/6, Gleick, 11.54M).

**SECRETARY JEWELL TO ATTEND WORLD PARKS CONGRESS.** The Australian Broadcasting Corporation (11/6, 20K) reports that Interior Secretary Sally Jewell will be "in Sydney attending the World Parks Congress."

**SEN. MURKOWSKI POISED TO REINS OF SENATE ENERGY.** The Washington Examiner (11/6, 346K) reports that "with Republicans taking control of the Senate on Tuesday, Sens. Lisa Murkowski of Alaska and Jim Inhofe of Oklahoma are now in line to hold committee chairmanships in the upper chamber." Murkowski has "largely laid out her policy agenda for the Energy and Natural Resources Committee in a 121-page report she

titled "Energy 2020." The article notes that "chief among her policy aims will be expanding oil and gas drilling in federal onshore and offshore lands, including the Arctic."

The New York Times (11/5, Schwartz, Krauss, Subscription Publication, 9.9M) reports that Murkowski and "other Republicans also oppose any new stringent rules governing hydraulic fracturing in shale oil and gas fields." According to the article, "they may also try to obstruct or weaken any Interior Department actions to use the Endangered Species Act to slow drilling and other energy development."

The Hill (11/6, Barron-Lopez, 241K) reports that "Murkowski's new power will allow her to fight for a proposed Alaskan road through a federal wildlife refuge."

Also providing coverage are the Washington Examiner (11/6, 346K), the Anchorage (AK) Dispatch News (11/5, 146K), the FuelFix (11/5, 7K), and Reuters (11/6).

**PROFESSOR CLAIMS CONSTITUTIONAL CONVENTION CAN RESTORE HAWAII KINGDOM.** The Examiner (11/6, 1.01M) reports that "a video was released today of a lecture by Professor Francis Boyle where he advocated that Kanaka Maoli (indigenous Hawaiians) go to a proposed 2015 Constitutional Convention to restore the Kingdom of Hawaii." According to the article, "the lecture was sponsored by the Office of Hawaiian Affairs, and contains Boyles' current analysis of the overthrown Kingdom's status under international law." Boyle, a professor of international law at the University of Illinois College of Law, "claims that US Federal and State control over the Hawaiian Islands are little more than military and civilian facets of an illegal occupation regime that has not extinguished the sovereignty of the Hawaii Kingdom despite over a century of US rule."

Also providing coverage is the Scoop (11/6, 1K).

**CONGRESS URGED TO PROTECT PUBLIC LANDS.** Roll Call (11/6, Subscription Publication, 90K), Dave Richins, a city council member from Mesa, Arizona, writes that "whatever the next Congress brings us, let's hope it brings a fresh perspective on how to balance the management of our public lands, and a renewed push to actually get things done." He argues that "whether we're talking about congressional action on public land conservation, public/private partnerships, or community investments that a private company like Resolution Copper makes, outdoor recreation is a leading economic driver in today's American West, and the 114th Congress should remember that when they get to work next year."

## America's Great Outdoors:

### ***National Park Service:***

**FBI INVESTIGATING EXPLOSIVE DEVICE FOUND AT NATIONAL PARK IN GEORGIA.** The Atlanta Journal-Constitution (11/6, Stevens, 1.21M) reports that the FBI is searching for evidence after a backpack containing explosive materials was found at the Vickery Creek Park in Roswell, Georgia. According to an FBI spokesman, the backpack was found Tuesday by "A mother and daughter walking in the park" who then contacted authorities. The Cobb County police bomb squad responded to the scene and the items were detonated, according to police. .

WXIA-TV Atlanta (11/5, 42K) reports on its website that the FBI was called into the investigation because "Vickery Creek Trail is a national park." The FBI spokesman said that the backpacks contents could have been used to make an improvised explosive device and were detonated to "render them safe." He added that the materials will be sent to the FBI's labs and analyzed and WXIA notes that "It's unclear whether the device was active and set to go off."

**YELLOWSTONE, GRAND TETON NATIONAL PARKS PROPOSES FEE INCREASES.** The Bozeman (MT) Daily Chronicle (11/6, 54K) reports that "Yellowstone National Park is proposing to raise entrance fees for the first time in eight years and to create a backcountry camping permit in order to keep the park running at its current level."

The County 10 (11/5) reports that Grand Teton National Park is "proposing to update its entrance fees and invites public input on this prospect."

**MARIJUANA USE STILL ILLEGAL ON FEDERAL PROPERTY.** The New Republic (11/6, 195K) reports that "the ballot measure to legalize marijuana in the District of Columbia handily passed yesterday," but "although the

local pot laws in D.C. might change, just as they did in Colorado and Washington, the federal law hasn't." Federal employers including the NPS "issued staff-wide memos reminding workers that all pot use is considered unacceptable." The article notes that "marijuana use also remains illegal on federal property, and in D.C., that means legalization won't touch places like the National Mall and Rock Creek Park, a wooded recreational area that covers a large part of the city's northwestern quadrant."

**GOV. MCAULIFFE SUPPORTS AN EXPANSION OF FORT MONROE NATIONAL MONUMENT.** The Newport News (VA) Daily Press (11/6, 181K) reports that Gov. Terry McAuliffe "wants the National Park Service monument at Fort Monroe expanded to connect the two federally protected parcels in the North Beach and Inner Moat areas." Brian Coy, McAuliffe's press secretary, said, "Governor McAuliffe believes a contiguous national monument at Fort Monroe would be an enormous historical and economic asset to Hampton Roads and the commonwealth as a whole." Fort Monroe National Park Superintendent Kirsten Talken-Spaulling said "she couldn't comment on changes to the monument boundary without knowing more details, although she pointed to a section of the federal code dealing with park boundary adjustments."

**MEETINGS TO BE HELD ON POINT REYES NATIONAL SEASHORE RANCH PLAN.** The Marin (CA) Independent Journal (11/6, 67K) reports that "the future of ranches in the Point Reyes National Seashore will be the focus of meetings later this month." This week the NPS "announced two sessions to look at ranching practices and tule elk on pasturelands." The article notes that "the meetings are part of a larger look at ranchlands dubbed the 'Ranch Comprehensive Management Plan/Environmental Assessment.'"

**YELLOWSTONE BISON TO BE MOVED TO FORT PECK.** The AP (11/6) reports that "Montana wildlife officials say a group of about 140 bison captured from Yellowstone National Park will be re-located to the Fort Peck Indian Reservation next week." The animals "went through a lengthy quarantine to ensure they don't carry the animal disease brucellosis."

**REVIEW FINDS ISSUES SURROUNDING LAVA ALTERNATE ROUTE AT HAWAII VOLCANOES NATIONAL PARK.** The AP (11/6) reports that "an environmental review for constructing an emergency access route along a lava-covered section of Chain of Craters Road identifies concerns including the spread of invasive species and possible harm to endangered nene." The NPS has "agreed to accommodate two-way traffic on an alternate route to Puna to prepare for lava flowing over the district's main road." The article notes that "the review released Tuesday says a potential impact is spread of invasive species such as little fire ants and coqui frogs hitching rides on vehicles from Puna."

**GATES BEING INSTALLED TO PROTECT NEW RIVER GORGE'S BATS.** The AP (11/6) reports that "gates are being installed on abandoned mine openings in the New River Gorge National River to protect bat habitat." The NPS said Wednesday that "the old mines provide habitat for 10 species of bats." The article notes that "two species are endangered, the Virginia big-eared bat and the Indiana bat." The gates "allow bats to enter the mines while preventing humans from entering."

**RESEARCHERS STUDYING BLACK BEAR POPULATION IN ALABAMA.** The AP (11/6, Edgemon) reports that this week, an Auburn University team will "begin catching and tagging bears in and near Little River Canyon National Preserve and on private property in the Saraland area far to the south, in Mobile County." According to the article, "ten bears in each area will be outfitted with GPS collars, which cost \$2,500 each." Researchers are "conducting a statewide study of black bears, their population viability and their movements." The article notes that "thanks to grant funding from the National Park Service, Little River Canyon is also installing game cameras and bear-hair snares."

**NPS OFFERING YELLOWSTONE SNOWMOBILE COURSE ONLINE.** The Casper (WY) Star-Tribune (11/6, 90K) reports that the NPS is "offering a Yellowstone Snowmobile Education Certification course for free online."

**TIMBERLAND PARK OPENS ON NATCHEZ TRACE PARKWAY.** The Tennessean (11/5, 386K) reports that Timberland Park has "opened in Williamson County on the historic Natchez Trace Parkway."

**MOUNT RAINIER FEATURED ON TUMBLR.** The Tacoma (WA) News Tribune (11/5, 228K) reports that the Interior Department featured Mount Rainier in its "America's Great Outdoors" Tumblr update.

**ADDITIONAL COVERAGE: NPS INVESTIGATING VANDALISM AT NATIONAL PARKS.** Additional coverage of the vandalism in national parks was provided by the Fort Collins (CO) Coloradoan (11/5, 59K).

**PREDATOR CONTROL MEASURES SUPPORTED.** In an op-ed for the Anchorage (AK) Dispatch News

(11/5, Stratton, 146K), Jim Stratton, the deputy vice president of regional operations for the National Parks Conservation Association, supports the NPS' "proposed wildlife regulations to end unbearable hunting methods on Alaska's national preserve lands." He writes that "hunting will continue on our national preserve lands, as it should, but some of the methods must change." Stratton concludes that "predator control and national park lands just don't mix."

#### **Bureau of Land Management:**

**PROSECUTORS OBJECT TO RETRIAL IN FEDERAL VANDALISM CASE.** The AP (11/6) reports that "prosecutors are objecting to a radio host's request for a new trial after he was convicted of vandalism for tearing down barricades on federal land in Montrose County." The US Attorney's Office argues that "David Justice's motion for a new trial is based on an inaccurate statement of the law." Justice, "whose given name is Stanley Hugh Anderson, was convicted in September after damaging Bureau of Land Management property at the Cushman Creek Trail."

**ARKANSAS HEADWATERS RECREATION AREA CELEBRATES 25 YEARS.** The Leadville (CO) Herald Democrat (11/6) reports that "the public is invited to celebrate the 25th anniversary of the Arkansas Headwaters Recreation Area with Colorado Parks and Wildlife, the Bureau of Land Management and the US Forest Service." According to the article, "festivities will take place from 10:30 a.m. to 1:30 p.m., Nov. 7, at the Salida SteamPlant Ballroom, courtyard and the nearby Salida boat ramp."

**BLM EMPLOYEE KILLED BY FALLING TREE IN COOS COUNTY.** The Eugene (OR) Register-Guard (11/6, 172K) reports that "a falling tree killed a Bureau of Land Management employee in her car at noon Tuesday near Blue Ridge east of Coos Bay." According to the article, "Estella Morgan, 55, was found unresponsive but breathing when medics arrived on land management property off of Blue Ridge Road." Authorities said that "while crews were on scene, she died."

#### **Fish and Wildlife Service:**

**COURT STRIKES DOWN PRAIRIE DOG RULES IN UTAH TOWN.** The AP (11/6) reports that "a judge is striking down federal regulations that prohibit Cedar City residents from controlling prairie dogs on private property." Federal Judge Dee Benson says the FWS "can't regulate the Utah prairie dog population on private land because the species is only found inside the state."

The Washington Post (11/5, Adler, 4.9M) reports that "this decision is significant if for no other reason that it is the first time that a federal court has held that the regulation of private land use exceeds the scope of Congress's enumerated powers."

Coverage by the AP was also picked up by the St. George (UT) Spectrum (11/5, 45K).

**COURT UPHOLDS FWS' REMOVAL OF EAGLES FROM ENDANGERED LIST.** The Law 360 (11/6, 18K) reports that "an Arizona federal judge on Wednesday upheld the US Fish and Wildlife Service's decision not to give Endangered Species Act protection to the Sonoran Desert bald eagle population, finding the analysis used by the agency was not flawed and took adequate scientific evidence into consideration." US District Judge David G. Campbell "granted a motion for summary judgment filed by the FWS, saying that the Center for Biological Diversity and other environmental groups had failed to provide evidence showing the agency's decision runs contrary to scientific and legal conclusions."

**CHICAGO'S SHEDD AQUARIUM WELCOMES ABANDONED SEA OTTER PUP RESCUED OFF CALIFORNIA.** The Los Angeles Times (11/6, Rocha, 4M) reports that "a 5-week-old sea otter pup rescued along the Central California coast will get a second chance at life in Chicago after getting fattened up at Monterey Bay Aquarium, experts announced Tuesday." According to the article, "after receiving around-the-clock care at the aquarium for four weeks, 'Pup 681' – a member of the threatened Southern Sea otter species – was shipped to the Shedd's Abbott Oceanarium in Chicago for continued rehabilitation."

Also reporting on the story are KSBW-TV Monterey, CA (11/6, 7K), WGN-TV Chicago (11/5, 141K), and WTVR-TV Richmond, VA (11/5, 47K).

**FWS OFFERS TOUR OF GREAT BAY NATIONAL WILDLIFE REFUGE.** The Seacoast Online (NH) (11/5, 6K) reports that the FWS is "offering a limited number behind the scenes tours this month of its Great Bay

National Wildlife Refuge on a portion of the former Pease Air Force Base."

**FWS FORENSICS LABORATORY DIRECTOR INTERVIEWED.** In an interview with the [Al Jazeera America](#) (11/6, 177K) FWS Forensics Laboratory Director Ken Goddard discussed "the lab's early beginnings, why he thinks rhinos are nearing extinction, and what it's like wading through walrus guts in the Arctic."

**ADDITIONAL COVERAGE: ANIMAL RESEMBLING GRAY WOLF REPORTED AT GRAND CANYON.** Additional coverage of an animal that could be a gray wolf that has been seen at Grand Canyon National Park was provided by the [Washington Post](#) (11/5, Lanimer, 4.9M).

### ***US Geological Survey:***

**USGS, CANADA DEVELOP NORTH AMERICA WATERWATCH.** The [WaterWorld](#) (11/6, 96) reports that "in an international collaboration, the US Geological Survey (USGS) and the Water Survey of Canada (WSC) have officially produced the North America WaterWatch (NAWW), a new online website that displays streamflow conditions throughout much of North America." According to the article, "NAWW provides a fast, easy-to-use, cartographically-based, central web interface for users to access real-time streamflow conditions for both Canada and the United States." Jerad Bales, USGS chief scientist for water, said, "North America WaterWatch delivers easily understandable maps and graphics of streamflow conditions and, simultaneously, provides access to real-time and past streamflow data at thousands of streamgages in both nations. The portal demonstrates the value of free exchange of water-data through interoperable web services, which is a major strategic focus of the USGS through open-water data activities."

**USGS REPORT DESCRIBES TRACKING NITRATE PULSE TO THE GULF OF MEXICO.** The [Water Technology Online](#) (11/6) reports that "a new report released by the US Geological Survey (USGS) describes how advanced optical sensor technology is being employed in the Mississippi River basin to accurately track the nitrate pulse to the Gulf of Mexico." According to the report, "excessive springtime nitrate runoff, from agricultural land and other sources in the Mississippi drainage, flows into the Mississippi River and then downstream into the Gulf of Mexico." USGS Researcher Brian Pellerin said, "High frequency data from these sensors has revealed considerable variability in nitrate concentrations in small rivers and streams. However, we were surprised to see nitrate concentrations vary by as much as 20 percent in a week in a river as large as the Mississippi River without similar changes in streamflows."

**USGS MODEL SIMULATES HOW SEDIMENT MOVES.** The [Dredging Today](#) (11/5) reports that "for the first time ever, scientists have simulated the movement of sediment throughout the San Antonio River Basin with a new US Geological Survey model, created in cooperation with the San Antonio River Authority (SARA)." According to the article, "the new model simulates how water and suspended sediment flowed through the San Antonio River Basin from 2000-2012." Aarin Teague, SARA Sustainability Stormwater Specialist, said, "The San Antonio River Authority will be utilizing this model and the study findings as part of a holistic watershed master planning effort. With the study results, SARA management strategies will be targeted to efficiently address sources of pollutants."

## **Securing America's Energy Future:**

### ***Renewable Energy:***

**RESEARCHERS TO STUDY MARINE MAMMALS TO MINIMIZE EFFECTS OF WIND FARM DEVELOPMENT.** The [reNews](#) (11/6) reports that "researchers will begin a study of marine mammals off the coast of Ocean City, Maryland this fall to help minimize the affects of wind farm development." According to the article, "a new study led by the University of Maryland Center for Environmental Science will help state and federal decision-makers better understand where whales, dolphins and porpoises occur and how they use this habitat." The article notes that "beginning this fall, underwater microphones will be affixed on buoys anchored to the ocean floor to continuously record sounds produced by large whales and other marine mammals."

**PUBLIC HEARING ON DESERT RENEWABLE ENERGY CONSERVATION PLAN SCHEDULED THURSDAY.** The [Inland Valley \(CA\) Daily Bulletin](#) (11/5, Steinberg, 99K) reports that "there will be a public hearing Thursday night on the Desert Renewable Energy Conservation Plan, a historic planning effort covering more than 22 million acres of the California desert."

**Onshore Energy Development:**

**DENTON, TX VOTERS PASS ANTI-FRACKING BAN; INDUSTRY RESPONDS WITH INJUNCTION REQUEST.** Bloomberg News (11/5, Olson, Polson, 1.94M) reports that on Tuesday the "small college town" of Denton, TX passed a measure banning fracking. The mandate passed with 14,881 votes for 59% of the total vote.

Reuters (11/5, Richter) reports that Denton's vote was considered key because fracking is a widely-used practice in Texas. This is the first anti-fracking measure to pass in the state. In response, Texas Railroad Commissioner David Porter said the ban should be cast aside. He argued, "Bans based on misinformation – instead of science and fact – potentially threaten this energy renaissance and as a result, the well-being of all Texans."

The AP (11/5) reports that in response to Tuesday's vote, the Texas Oil and Gas Association on Wednesday "responded quickly" by filing suit "for an injunction to stop" the anti-fracking ban from taking effect.

The Dallas Morning News (11/5, Miller, 1.16M) reports that in a Wednesday statement, Texas Oil and Gas Association attorney Thomas R. Phillips argued, "A ban on hydraulic fracturing is inconsistent with state law and therefore violates the Texas Constitution."

In "The Two Way" blog NPR (11/5, 2.22M) reports that Denton, TX Mayor Chris Watts vowed to fight for the fracking ban. He said Wednesday, "Hydraulic fracturing, as determined by our citizens, will be prohibited in the Denton city limits." The ban is set to take effect Dec. 2.

The Dallas Morning News (11/5, Heinkel-Wolfe, 1.16M) reports that since July Denton Taxpayers for a Strong Economy, the main group opposed to the fracking ban, raised nearly \$700,000 to defeat it, the bulk of which came from the energy producers including Chesapeake, XTO, and Chevron. In that time, Frack Free Denton raised \$75,000.

**Results Mixed For Local Anti-Fracking Measures.** The New York Times (11/6, Krauss, Subscription Publication, 9.9M) reports that across the nation "local initiatives to ban or restrict the oil and gas production process lost as many elections as were won. Voters in Youngstown, Ohio, a Rust Belt city sitting atop vast deposits of natural gas, sent a proposed ban to a landslide defeat." Overall "on Election Day, the oil industry and fracking opponents split eight local races, three in California, four in Ohio and the one in Denton."

The Hill (11/6, Cama, 241K) notes "Denton, Texas; Athens, Ohio; and San Benito and Mendocino counties in California passed ballot measures to restrict fracking, the controversial method of injecting fluid into wells to extract more oil and gas." According to the Natural Resources Defense Council "the passed measures show a growing trend of localities opposing fracking."

**OSMRE HONORS ACKERMAN COAL MINE WITH AWARD.** WTVA-TV Columbus, MS (11/6, 7K) reports that "a lignite surface mining operation in Choctaw County has been honored for its work to reclaim areas affected by their operations." The OSMRE "named Mississippi Lignite Mining Company Red Hills Mine as a winner of the 2014 National Award." The agency "selected Red Hills for the honor for work done to reclaim the McIntire Branch of Little Byway Creek."

**MINE OPERATOR RECOGNIZED WITH AWARD.** The Logan (WV) Banner (11/6, 574) reports that "Alpha Natural Resources Elk Run Coal Company, Inc., was given the 'Good Neighbor Award' by the USDI, an award given to mine operators for successfully working with the surrounding land owners and the community while completing mining and reclamation." According to the article, "Elk Run received the award for 'its significant contributions each year to communities near Elk Run Coal Company.'"

**ADDITIONAL COVERAGE: ENVIRONMENTAL GROUPS CONTEST MOAB PIPELINE DECISION.**

Additional coverage that environmentalists are challenging the BLM's Moab pipeline decision was provided by the Salt Lake (UT) Tribune (11/6, 479K).

**Offshore Energy Development:**

**LAWSUIT CLAIMS NATIONAL OFFSHORE TRAINING AND LEARNING CENTER SCUTTLED.** WWL-TV New Orleans (11/5, 107K) reports that "a training center – touted as central to the federal government's efforts to

improve offshore drilling safety after the 2010 Deepwater Horizon explosion – failed to get off the ground, and its former director blames Gulf of Mexico regulators for undermining reforms.” Chris Barry, the former head of the National Offshore Training and Learning Center, is “suing the Interior Department, alleging hostile working conditions from senior agency management, who, Barry alleges, called him and his staff ‘idiots’ and used homophobic slurs to refer to Barry.” The article notes that “more importantly, though, Barry says that the safety bureau’s Gulf of Mexico regional office undercut” Michael Bromwich’s plans and “hijacked funds and staff intended for the training center.”

**ANNIVERSARY OF END OF FIRST SEMS AUDIT CYCLE APPROACHING.** The Penn Energy (11/6, 128) reports that “it has been almost four years since the Safety and Environmental Management Systems (SEMS) regulations were promulgated and on November 15, 2014, it will be one year since the end of the first SEMS Audit Cycle.” According to the BSEE, “86 percentage of the regulated operators successfully demonstrated that they met required SEMS program requirements,” and “in August 2014 only three operators were still out of compliance.”

## **Empowering Native American Communities:**

**ADDITIONAL COVERAGE: BOEM RELEASES ARCTIC DRILLING REVIEW.** Additional coverage of the release of the BOEM’s new environmental analysis in the Chukchi Sea was provided by the Offshore Magazine (11/6, 143K) and the Penn Energy (11/6, 128).

**BOR TO DISCUSS BIGHORN RESERVOIR DURING PUBLIC MEETING.** The Billings (MT) Gazette (11/6, 236K) reports that the BOR will “present water supply conditions in the Bighorn Basin and discuss the agency’s proposed fall/winter operating plan for Yellowtail Dam/Bighorn Reservoir at a public meeting on Wednesday.” Also, “the Bighorn River System Issues Group will discuss the river and reservoir aquatic health and operating criteria for Yellowtail Dam.”

**BIA BACKS HOPI’S IMPOUNDING OF NAVAJO SHEEP.** The Indian Country Today Media Network (11/5, 78K) reports that “the deep Southwestern drought has pitted tribe against tribe, as Hopi authorities backed by the Bureau of Indian Affairs (BIA) impound hundreds of sheep and other livestock owned by Navajo who are grazing the animals on Big Mountain, which lies on Hopi Partition Land.” However, “Navajo ranchers in the area, many of them lifelong, elderly, pastoral people, are crying foul on methods that they say are harsh and unfair, even though the activity fits Hopi regulations’ definition of overgrazing.”

## **Top National News:**

**OBAMA DECLINES TO TAKE BLAME FOR DEMOCRATS’ MIDTERM LOSSES.** Almost all the coverage of President Obama’s press conference on Wednesday afternoon describes it as evidence that he does not blame his relative unpopularity for the Democrats’ losses on Tuesday and does not intend to make any major changes, either in staffing or policymaking, in the wake of the Republican wave. On NBC Nightly News (11/5, story 3, 1:35, Williams, 7.86M), Chuck Todd said Democrats told him they believe the President “made a mistake not accepting more responsibility...at that press conference.” Todd added, “What’s amazing here is that this was a horrendous night for the Democratic Party, and the President is not talking about changing either his style or the White House staff.”

Also on NBC Nightly News (11/5, story 2, 2:45, Williams, 7.86M), correspondent Chris Jansing said the midterms were “widely viewed as a repudiation of” the President. But Jansing added that “if the election results left him chastened, the President is not showing it,” and, on Wednesday, he “didn’t accept responsibility” for his party’s defeats.

In the lead story for the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), Major Garrett reported that “after another midterm election drubbing, President Obama pledged no fundamental changes in his White House team or its tactics.” On ABC World News (11/5, lead story, 3:05, Muir, 5.84M), Jonathan Karl also reported that the President “offered no sign that he has...a desire to change course” nor any “apologies.” According to Karl, the President “suggested Democrats lost primarily because most people didn’t bother to vote.”

Just after the President finished his press conference, MSNBC’s (11/5, 111) Alex Wagner said, “If you wanted contrition...from the President, you certainly did not get it.” Under the headline, “Obama Defiant After GOP Wave,” Politico (11/5, Epstein, 977K) reported that the President “sounded a defiant tone on Wednesday, arguing that Democrats’ big losses...were more about dysfunction in Washington than about his policies and

leadership." Politico also reported that the President "repeatedly resisted reporters' efforts to extract political analysis from him," but "offered a broader political takeaway: that Americans are still hungry for the change he promised as a candidate six years ago."

The Hill (11/5, Barron-Lopez, Ferris, 241K) reported that on Wednesday, the President "suggested he's going full steam ahead with plans to take executive action on immigration and made a point of noting that two-thirds of voters didn't take part in the midterms – a swipe at any GOP suggestions that the election gave their party a mandate."

Charles Blow of the New York Times (11/6, Blow, Subscription Publication, 9.9M) says the President "was not contrite or cowed" on Wednesday, which Blow says "could actually stiffen the spines of some staunch progressives who are already...feeling some commingling of betrayal, buyer's remorse and battle fatigue." But the Washington Times (11/5, Wolfgang, 373K) describes the President as "humbled" and reports that he said he is "fully prepared to work with Republicans."

McClatchy (11/5, Clark, Subscription Publication, 27K) reports that the President "declined to take blame for the [Democrats'] showing, though he had said...that his policies would be on the ballot." McClatchy says the President "sought to strike an upbeat, conciliatory tone," and while he "memorably characterized Democratic losses in 2010 as a 'shellacking,'" he "studiously avoided any word like it on Wednesday." USA Today (11/5, Korte, Jackson, Today, 9.86M) also notes that the President "steered clear of using similarly vivid language," and "declined to analyze" the "causes" of the Democrats' losses."

In a column titled, "Obama Seems Numb To This Latest 'shellacking' Of Democrats," Dana Milbank of the Washington Post (11/5, Milbank, 4.9M) writes that on Wednesday, the President "spoke as if Tuesday had been but a minor irritation," and "acknowledged no fault or error and expressed no contrition or regret."

In USA Today (11/5, Goldberg, 9.86M), National Review's Jonah Goldberg writes that "contrary to a lot of spinning early election night, this wasn't an 'anti-incumbent wave'; it was...an anti-Obama wave." Neil Munro of the Daily Caller (11/5, Munro, 475K) said that during his "painful" press conference, the President "declined to promise any staffing changes or trim his progressive goals."

USA Today (11/5, Board, 9.86M) editorializes that "again and again when he was" campaigning, the President said he "would be the peacemaker," but "when that turned out to be harder than he thought, he publicly fumed and finally seemed to lose interest." But the New York Times (11/6, Board, Subscription Publication, 9.9M), in an editorial, praises the President for having "refused on Wednesday to submit to the Republican narrative that his presidency effectively ended with the midterm elections." The Times says the President was "right to ignore" reporters' "demands that he take personal responsibility for the Democratic losses, or exhibit public contrition."

**OBAMA PLEDGES TO WORK WITH REPUBLICANS TO FIND COMMON GROUND.** On Wednesday, both President Obama and Senate Minority Leader Mitch McConnell's remarks on their willingness to cooperate on bipartisan initiatives were met with a great deal of skepticism from media analysts. On NBC Nightly News (11/5, story 2, 2:45, Williams, 7.86M), White House Correspondent Chris Jansing reported that on Wednesday, the President "suggested the bitter campaign season could give way to compromise." In the lead story for the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), Scott Pelley reported that Senate Minority Leader Mitch McConnell and the President "both...said they will try to work together to get things done – try." Also on the CBS Evening News (11/5, story 2, 2:25, Pelley, 5.08M), Nancy Cordes said McConnell's "assertion that he wants to work with the President was met with skepticism from Democrats who say he was a key contributor to the gridlock...and that the few times he did try to meet the President half way, conservatives in his party yanked him back."

Under the headline, "After Midterm Rout, Obama Says He Got Nation's Message," the Washington Post (11/5, Eilperin, Sullivan, Nakamura, 4.9M) reports that the President said he "accepts the American public's message in the midterm elections that Washington needs to break its political gridlock." The Post notes that the President spoke after speaking with Senate Minority Leader Mitch McConnell, who has "sounded a bipartisan note" since Tuesday night. According to the Post, the President "cited investments in infrastructure and multi-nation trade pacts as areas of potential compromise." The Wall Street Journal (11/6, O'Connor, Subscription Publication, 5.62M) details the history between the President and McConnell in an article titled, "Testy Obama-McConnell Relationship Takes The Spotlight."

The Wall Street Journal (11/5, Sparshott, Schwartz, Subscription Publication, 5.62M) covers the President's press conference in an article titled, "Obama Open To Striking Deals With GOP Congress." Reuters (11/5,

Mason, Rampton) quotes the President as saying, "As president, I have a unique responsibility to try and make this town work. ... So, to everyone who voted, I want you to know that I hear you."

The Hill (11/5, Barron-Lopez, Ferris, 241K) says the President "made a point of complimenting" McConnell, and "defended his relationships with members of Congress, which he said have largely been 'cordial' and 'constructive.'" In an article titled, "Obama Vows To 'Get The Job Done' With Republicans," the AP (11/5, Espo, Pace) says the President and McConnell both "pledged to try and turn divided government into a force for good rather than gridlock...yet warned of veto showdowns as well." According to the AP, "Trade legislation loomed as one possibility for quick compromise, and immigration as an early irritant."

USA Today (11/5, Korte, Jackson, Today, 9.86M) reports that the President "put two new items on the agenda for the lame-duck Congress: A \$6.2 billion emergency spending bill that would pay for efforts to fight Ebola and, in a turnaround from his previous stance, explicit congressional authorization for his war against the Islamic State."

In an op-ed for USA Today (11/5, Robbins, 9.86M), author James Robbins writes that despite claims from Democrats, including the President, "Republicans have not been the obstructionists." Robbins notes that the House "has passed dozens of bills that Democratic Majority Leader Harry Reid refused to bring up for a vote."

**Republicans Intend To Focus On Trade Deals, Tax Reform And Energy.** According to Major Garrett, on the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), the President is "hopeful" that he can "cut deals with Republicans on trade, infrastructure, and tax reform," while McConnell says Republicans "are looking to compromise on trade and tax reform, too."

The Washington Post (11/6, Montgomery, Costa, 4.9M) reports McConnell and Speaker Boehner "are both eager to shed the party's image as an unruly collection of obstructionists," and "the remedy, they have decided" is to "act quickly to send President Obama bills with bipartisan support to fast-track international trade agreements, repeal an unpopular tax on medical devices and approve the Keystone XL pipeline."

According to the New York Times (11/6, Hulse, Subscription Publication, 9.9M), the GOP's Congressional leadership intend to "focus on balancing the budget, restoring an orderly process for spending bills, revising if not repealing the health care law and enacting a major overhaul of the tax code." The Times says "approving the Keystone XL oil pipeline...could be fertile ground for agreement with Democrats who have differed with the White House on the issue," and "combining the pipeline with new energy exports, expanded exploration and added efficiency could build a bipartisan consensus."

According to Politico (11/6, Sherman, Raju, 977K), McConnell and Speaker Boehner "are sending subtle warnings to the right wing of their party: The days of crisis-dominated Washington are over." Politico adds that "top Republicans in both chambers have even showed a new eagerness to cut deals with the White House" while "vowing not to repeat the errors of past years, when messy fiscal fights eroded public confidence in Washington and became the hallmark of the GOP-controlled House."

In an op-ed for the Wall Street Journal (11/6, Subscription Publication, 5.62M) titled, "Now We Can Get Congress Going: Reform The Tax Code, Redefine 'Full Time' As Working 40 Hours A Week, Move On The Keystone XL Pipeline." McConnell and Boehner lay out their agenda for the next Congress. In an editorial, the Christian Science Monitor (11/5, Board, 426K) says the White House and Congressional Republicans "should...strike a deal to expand trade with Asia and Europe."

**New Senate Appears To Have Votes To Pass Keystone Bill.** The Huffington Post (11/5, Sheppard, 11.54M) reports that the incoming GOP Senate majority "creates an opportunity" for "likely" Senate Majority Leader Mitch McConnell "to force a vote on the proposed Keystone XL pipeline he's been waiting years to hold." By the HuffPo's count, "the new Senate will have at least 61 votes in favor of a measure forcing the pipeline's approval – a filibuster-proof majority."

The Wall Street Journal (11/5, Harder, Subscription Publication, 5.62M) reports that beyond Keystone, the new Senate GOP majority is likely to oppose many of the President's top energy and environmental policies. McConnell has vowed to hold votes on Keystone and legislation trimming the Administration's proposed carbon limits. However, it remains unclear how much success the GOP will have.

**EXIT POLLS: "ANGER" OVER ECONOMY DROVE GOP SENATE GAINS.** Bloomberg News (11/5, Doming, Allen, 1.94M) reports that on Tuesday, Republicans "seized on voter anger" over the President's handling of the

economy to take control of the Senate. The economy "was voters' most pressing concern," with "with seven of 10 rating conditions poor, preliminary exit polls showed."

The CBS Evening News (11/5, story 5, 2:25, Pelley, 5.08M) reported that the economy was "a major issue" in the elections. CBS (Mason) adds that "the overwhelming majority of voters feel it's in bad shape. Nearly eight in 10 in our exit poll told us they're worried about where the economy is headed." CBS (Mason) adds that the "stock market may be at record highs, and the unemployment rate may finally have fallen below six percent but household incomes have yet to recover from the recession and are now back at levels we last saw in the mid-1990s."

Bloomberg News (11/5, Torres, 1.94M) reports that there are "signs" emerging that incomes are beginning to rise. Wages and salaries of civilian workers "climbed 2.1 percent in the third quarter from the same time last year, the most since the first three months of 2009, Labor Department data showed last week." However, the increase "failed to pay dividends at the polls for Democrats, as voter perceptions of the economy tend to be locked in about six months before Election Day," political analysts say.

In his column for the Washington Post (11/5, Meyerson, 4.9M), Harold Meyerson writes that Democrats lost "catastrophically" because of "their inability to deliver broadly shared prosperity as they used to do." Democrats were unable to "take advantage" of "populist sentiments" among the electorate.

**Businesses Prepare To Push For Priorities In New Congress.** The New York Times (11/5, Schwartz, Krauss, Subscription Publication, 9.9M) reports that following "years of gridlock," businesses are "gearing up for a major push on long-sought goals like an overhaul of the corporate tax system, building the Keystone XL oil pipeline, lighter environmental and financial regulation" and advance major trade deals. However, "despite plenty of public talk of more aggressive action," the Times says that lobbyists, political veterans and Wall Street experts "say the actual legislative agenda will be much more limited."

**Fisher Warns Senate GOP Against Compromising Fed's Independence.** Bloomberg News (11/5, Boesler, Mckee, 1.94M) reports that Dallas Fed President Richard Fisher said in an interview on Wednesday that Senate Republicans "should resist the temptation to erode Federal Reserve independence after victory in mid-term elections." Fisher said, "Think about this: Here's a Congress that can't even get its own budget together. Do you want them running the central bank?"

**More Commentary.** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that at his press event on Tuesday, the President gave no indication that he was interested in driving the economic agenda, so the paper says it will be up to the GOP. The Journal argues that the Republicans should push an economic reform and growth agenda. The papers suggests that the GOP focus on issues that could draw at least some Democratic support, including approving Keystone XL, expanding energy drilling and exports, dumping the ACA's medical device tax, pushing free-trade legislation, and considering tax reform.

In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that the election wasn't just a referendum on the President, but it was also a showdown between blue- and red-state styles of government, and the GOP won a substantial victory. Governors such as Scott Walker, Rick Scott, Brian Sandoval and Rick Snyder all pushed reforms against Democratic opposition that the Journal says boosted their states' economic competitiveness, and all won reelection.

## Editorial Wrap-Up:

**NEW YORK TIMES. "Mr. Obama's Offer To Republicans."** The New York Times (11/6, Board, Subscription Publication, 9.9M), in an editorial, praises the President for having "refused on Wednesday to submit to the Republican narrative that his presidency effectively ended with the midterm elections." The Times says the President was "right to ignore" reporters' "demands that he take personal responsibility for the Democratic losses, or exhibit public contrition."

**"In Red And Blue States, Good Ideas Prevail."** A New York Times (11/6, Board, Subscription Publication, 9.9M) editorial argues that Republican victories were "driven by ideological hatred for President Obama," and when voters had "a choice on an actual policy, rather than between candidates with a D or R next to their names," they "made notably liberal decisions in both red and blue states."

**WASHINGTON POST. "Give Republicans Time."** An editorial in the Washington Post (11/5, Board, 4.9M)

says that while the President "promised to take unilateral action on immigration before the end of the year," he should wait and "give Mr. McConnell the opportunity to make good on some of the lofty promises he has made since the Republican victory." The President, the Post argues, should "seize the moral high ground and test GOP leaders' seriousness about cooperating by offering them time to show they can act, including on immigration."

**"Leaving Yazidis Exposed."** The Washington Post (11/6, 4.9M) editorializes that President Obama's plan to take a "multiyear" approach to the war against ISIL has "advantages," but "also has some big upfront risks." The Post says "one" risk is that the "strategy "is leaving the Yazidis and other vulnerable populations...exposed" to ISIL's "aggression and unspeakable brutality toward non-Muslims."

**"Larry Hogan's Stunning Win."** In an editorial, the Washington Post (11/5, Board, 4.9M) calls Republican Larry Hogan's victory in the Maryland gubernatorial race "a direct repudiation of the administration of Gov. Martin O'Malley." Because Hogan cast the race "as a referendum on Mr. O'Malley and his tax-and-spend policies," he "was able to avoid putting forward an agenda of his own." As a result, "Maryland has a governor-elect who has yet to put forward an implementable agenda."

**WALL STREET JOURNAL. "A Growth And Reform Congress."** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that at his press event on Tuesday, the President gave no indication that he was interested in driving the economic agenda, so the paper says it will be up to the GOP. The Journal argues that the Republicans should push an economic reform and growth agenda. The papers suggests that the GOP focus on issues that could draw at least some Democratic support, including approving Keystone XL, expanding energy drilling and exports, dumping the ACA's medical device tax, pushing free-trade legislation, and considering tax reform.

**"Vindication In The States."** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that the election wasn't just a referendum on the President, but it was a showdown between blue and red state styles of government, and the GOP won a substantial victory. Governors such as Scott Walker, Rick Scott, Brian Sandoval and Rick Snyder all pushed reforms against Democratic opposition that the Journal says boosted their states' economic competitiveness, and all won reelection.

Location: Hall of the Americas, 17th St. & Constitution Ave. NW. Contacts: RSVP to SER-DIA@oas.org. On the Net: [www.oas.org](http://www.oas.org)

**ATLANTIC COUNCIL – ISLAMIC STATE – GEN. AUSTIN — 11 a.m.** The Islamic State and Beyond: US Military Strategy in the Middle East. Commanders Series event with General Lloyd J. Austin III, commander of US Central Command, to discuss the US-led coalition campaign against the Islamic State and the broader role the US military will play in the Middle East in the coming years. <http://www.atlanticcouncil.org/events/upcoming-events/detail/us-military-strategy-in-the-middle-east>. Location: 1030 15th Street, NW, 12th Floor (West Tower).

**IMMIGRANT RIGHTS – EXECUTIVE ACTION — 11 a.m.** National leaders from all segments of the pro-immigrant rights movement will hold a press conference to urge President Barack Obama to seize the moment and use his authority to take administrative action to expand immediate relief from deportations for millions of workers and families. Participants include Mary Kay Henry, Int'l President, SEIU; Rich Trumka, Int'l President, AFL-CIO; Marielena Hincapii, Executive Director, Natl Immigration Law Center. Location: National Press Club, 529 14th Street NW. Contacts: Beatriz Lopez, [beatriz.lopez@seiu.org](mailto:beatriz.lopez@seiu.org), 202-412-7396.

**NASA TELECONFERENCE – ROCKET EXPERIMENT — 2 p.m.** NASA will host a news teleconference to announce discoveries from a sub-orbital rocket experiment "that are redefining what we think of as galaxies." The briefing participants are: Michael Garcia, program scientist, NASA Headquarters, Washington; James Bock, astronomer, NASA's Jet Propulsion Laboratory and California Institute of Technology, Pasadena, California; Michael Zemcov, astronomer, Caltech and JPL; Karoline Gilbert, assistant astronomer, Space Telescope Science Institute, Baltimore, Maryland. Contacts: Felicia Chou, [felicia.chou@nasa.gov](mailto:felicia.chou@nasa.gov), 202-358-0257. Notes: For dial-in information, media representatives should e-mail their name, affiliation and telephone number to Felicia Chou at [felicia.chou@nasa.gov](mailto:felicia.chou@nasa.gov) by noon on Thursday. Audio of the teleconference will be streamed live at: <http://www.nasa.gov/newsaudio>.

**NATURALIZATION CEREMONY – SCIALABBA – CHILDREN — 3 p.m.** U.S. Citizenship and Immigration Services (USCIS) Deputy Director Lori Scialabba will participate in a special naturalization ceremony for 20 children citizenship candidates in recognition of National Adoptions Month. Location: USCIS Washington District Office, 2675 Prosperity Ave., Fairfax, Va. Contacts: DHS Press Office 202-282-8010.

## **Last Laughs:**

### **LATE NIGHT POLITICAL HUMOR.**

**Jimmy Kimmel:** "Yesterday was, of course, Election Day. There were a number of pot-related items on state ballots. Alaska, Oregon, and Washington, D.C. voted to legalize recreational marijuana. Vice President Joe Biden celebrated quietly at home, contemplating the infinite nature of the universe."

**Jimmy Kimmel:** "Imagine Washington, D.C. – if you thought Congress didn't get a lot of work done before, just wait until they get legal pot."

**Jimmy Kimmel:** "In Florida, a measure to legalize medical marijuana did not pass. Which, that's probably for the best, right? People in Florida are weird enough already."

**Jimmy Kimmel:** "Remarkably, the very liberal state of California still has not legalized marijuana for recreational use. Though, due to the drought we are having here, we are considering making it legal to drink bong water."

**Jimmy Kimmel:** "As you probably know, Republicans picked up a lot of seats and won control of both chambers of Congress yesterday, which is key because whoever controls Congress controls the lunch menu at the cafeteria."

**Jimmy Kimmel:** "Republicans have a majority in the Senate and House of Representatives for the first time in eight years. I guess when it was all said and done, the Republicans just had the better lawn signs."

**David Letterman:** "Boy, it was a big night for the Republicans, big night for the conservatives. Rush Limbaugh broke out the OxyContin. ... Even the Washington Redskins are demanding the Democrats change their name."

**David Letterman:** "The governor's race in Florida – very close. They had to wait all night to count the crooked ballots."

**David Letterman:** "The new senator from Iowa, Jodi Ernst, says we're heading to Washington and we're going to make them squeal. I said to myself, 'Lady, it's the United States Senate. It's not a bachelor's party.'"

**David Letterman:** "You know what happened today? When is this going to stop? There was another fence-jumper at the White House. Yeah, this time it was Obama trying to get out."

**Stephen Colbert:** "Huge night for the Republicans across the country. They won everything – the Senate majority, the bigger House majority, tight governor's races, and a giraffe from one of those claw machines."

**Jimmy Fallon:** "The big news, of course, is the mid-term elections. Last night, Republicans picked up a dozen seats in the House to give them their biggest majority since World War II. Or, as they put it, 'Time to party like it's 1939!'"

**Jimmy Fallon:** "'They also took control of the Senate, after gaining another seven seats. I haven't seen the GOP get this many seats since Chris Christie made an airline reservation.'"

**Jimmy Fallon:** "I saw that Republican Scott Brown lost his bid for Senate in New Hampshire last night, two years after he was voted out as senator in Massachusetts. When asked what he was planning to do next, he said, 'Are they still looking for a mayor in Toronto?'"

**Seth Meyers:** "Yesterday, Republicans won enough seats to gain a majority in the Senate and increase their majority in the House. For those Democratic candidates who wanted to distance yourselves from Obama, congratulations, you did. You don't ever have to worry about seeing him again."

**Conan O'Brien:** "But, history was made. For the first time ever, a Black Republican woman has been elected to Congress. President Obama gave her a congratulatory call and told her, 'You're all set. This country never turns against the first black anything.'"

**Conan O'Brien:** "Yesterday, Washington D.C. voted to legalize recreational marijuana. President Obama said, 'And after these midterms, thank God.'"

**Conan O'Brien:** [Referring to Clay Aiken] "The former 'American Idol' star lost his election to Congress. Apparently, his supporters thought they could vote by texting Ryan Seacrest."

**LAST LAUGHS:**

- + Late Night Political Humor.

**DOI in the News:**

**IDAHO CONFERENCE SEEKS SOLUTIONS FOR SAGE GROUSE.** The *AP* (11/6) reports "some of the nation's top public lands officials and rangeland scientists have gathered in Boise to try to figure out what can be done to avoid a listing of the sage grouse on the federal Endangered Species Act." According to the article, "the three-day conference, called The Next Steppe: Sage-grouse and Rangeland Wildfire in the Great Basin, opened Wednesday with keynote remarks" by Mike Connor, deputy secretary of the Interior Department. Connor said, "Just seeing this grow from primarily a federal agency discussion to a broad-based, diverse level of participation from states and local communities is very encouraging, because that diversity of participation is what we're going to need to make progress over the next year on an important set of issues."

Also, the *Idaho Statesman* (11/5, 150K) reports that the conference "opened Wednesday with remarks from US Fish and Wildlife Service Director Dan Ashe and US Bureau of Land Management Director Neil Komze." The article notes that "early remarks focused on finding collaboration among federal, state and private entities as massive wildfires and invasive species threaten a fragmented sage grouse habitat."

Coverage by the AP was also picked up by the Washington Times (11/6, Ridler), the Houston Chronicle (11/6, Ridler, 2.47M), the Twin Falls (ID) Times-News (11/6, 54K), the Seattle Post-Intelligencer (11/6, 1.06M), the San Francisco Chronicle (11/6, 2.24M), the Spokane (WA) Spokesman-Review (11/5, 169K), KSL-TV Salt Lake City (11/6, 1.07M), and KIVI-TV Boise, ID (11/6, 861).

**SECRETARY JEWELL VISITS CHOCTAW TRIBAL SCHOOLS.** The Neshoba (MS) Democrat (11/6, 21K) reports that Interior Secretary Sally Jewell took a tour of the Choctaw Indian Reservation on October 29. She was joined by Assistant Secretary of Indian Affairs Kevin Washburn and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel "to tour the three facilities and discuss ongoing Indian education reform initiatives." According to the article, "in a press conference at the end of the visit, Jewell said the Choctaw school system functioning at such a high level can be used as a model to other Tribal school systems that are struggling." She "identified the involvement of Tribal leadership as something that puts them ahead of the pack." Jewell said, "We got a challenge in Indian education across the country. We under-perform other students, part of my job as Secretary of the Interior is overseeing the bureau of Indian education. We're reforming it, because it's not working well for Indian children, but right here in Mississippi we see a really highly functional school system, we see tribal leadership with the chief engaged deeply in the schools, the school system and the future for these kids and we know that there are lessons that we can learn here, that we can apply elsewhere to Indian country but we also know that there are things that the tribe needs from us to a better job in supporting their needs, so that's why we're here."

**INTERIOR AWARDS GRANTS TO LGBT HISTORIC AND CULTURAL SITES.** The Out In Jersey (11/6, 104) reports that the NPS has "given a \$49,999 grant to the LGBT Sites in New York City Project, which seeks to survey and document 'historic and cultural sites associated with LGBT heritage' in the five boroughs." Also, "a second grant for \$25,000 was given to the LGBT Heritage of Kentucky Project, a group supporting the addition of Louisville's Henry Clay Hotel and the Whiskey Row Historic District to the National Register of Historic Places." Interior Secretary Sally Jewell said, "Our American heritage is a tapestry made up of threads from many nations and communities, and we are working with public and private partners to help ensure that our National Register of Historic Places reflects this remarkable diversity."

**US WATER USE DROPS TO LOWEST LEVEL IN 40 YEARS.** The Environment News Network (11/6, 260) reports that "water use across the country reached its lowest recorded level in nearly 45 years." According to a new USGS report, "about 355 billion gallons of water per day (Bgal/d) were withdrawn for use in the entire United States during 2010." The article notes that "this represents a 13 percent reduction of water use from 2005 when about 410 Bgal/d were withdrawn and the lowest level since before 1970." Mike Connor, deputy secretary of the Interior, said, "Reaching this 45-year low shows the positive trends in conservation that stem from improvements in water-use technologies and management. Even as the US population continues to grow, people are learning to be more water conscious and do their part to help sustain the limited freshwater resources in the country."

Also reporting on the story is the Huffington Post (11/6, Gleick, 11.54M).

**SECRETARY JEWELL TO ATTEND WORLD PARKS CONGRESS.** The Australian Broadcasting Corporation (11/6, 20K) reports that Interior Secretary Sally Jewell will be "in Sydney attending the World Parks Congress."

**SEN. MURKOWSKI POISED TO REINS OF SENATE ENERGY.** The Washington Examiner (11/6, 346K) reports that "with Republicans taking control of the Senate on Tuesday, Sens. Lisa Murkowski of Alaska and Jim Inhofe of Oklahoma are now in line to hold committee chairmanships in the upper chamber." Murkowski has "largely laid out her policy agenda for the Energy and Natural Resources Committee in a 121-page report she titled 'Energy 2020.'" The article notes that "chief among her policy aims will be expanding oil and gas drilling in federal onshore and offshore lands, including the Arctic."

The New York Times (11/5, Schwartz, Krauss, Subscription Publication, 9.9M) reports that Murkowski and "other Republicans also oppose any new stringent rules governing hydraulic fracturing in shale oil and gas fields." According to the article, "they may also try to obstruct or weaken any Interior Department actions to use the Endangered Species Act to slow drilling and other energy development."

The Hill (11/6, Barron-Lopez, 241K) reports that "Murkowski's new power will allow her to fight for a proposed Alaskan road through a federal wildlife refuge."

Also providing coverage are the Washington Examiner (11/6, 346K), the Anchorage (AK) Dispatch News (11/5, 146K), the FuelFix (11/5, 7K), and Reuters (11/6).

**PROFESSOR CLAIMS CONSTITUTIONAL CONVENTION CAN RESTORE HAWAII KINGDOM.** The Examiner (11/6, 1.01M) reports that "a video was released today of a lecture by Professor Francis Boyle where he advocated that Kanaka Maoli (indigenous Hawaiians) go to a proposed 2015 Constitutional Convention to restore the Kingdom of Hawaii." According to the article, "the lecture was sponsored by the Office of Hawaiian Affairs, and contains Boyles' current analysis of the overthrown Kingdom's status under international law." Boyle, a professor of international law at the University of Illinois College of Law, "claims that US Federal and State control over the Hawaiian Islands are little more than military and civilian facets of an illegal occupation regime that has not extinguished the sovereignty of the Hawaii Kingdom despite over a century of US rule."

Also providing coverage is the Scoop (11/6, 1K).

**CONGRESS URGED TO PROTECT PUBLIC LANDS.** Roll Call (11/6, Subscription Publication, 90K), Dave Richins, a city council member from Mesa, Arizona, writes that "whatever the next Congress brings us, let's hope it brings a fresh perspective on how to balance the management of our public lands, and a renewed push to actually get things done." He argues that "whether we're talking about congressional action on public land conservation, public/private partnerships, or community investments that a private company like Resolution Copper makes, outdoor recreation is a leading economic driver in today's American West, and the 114th Congress should remember that when they get to work next year."

## America's Great Outdoors:

### *National Park Service:*

**FBI INVESTIGATING EXPLOSIVE DEVICE FOUND AT NATIONAL PARK IN GEORGIA.** The Atlanta Journal-Constitution (11/6, Stevens, 1.21M) reports that the FBI is searching for evidence after a backpack containing explosive materials was found at the Vickery Creek Park in Roswell, Georgia. According to an FBI spokesman, the backpack was found Tuesday by "A mother and daughter walking in the park" who then contacted authorities. The Cobb County police bomb squad responded to the scene and the items were detonated, according to police. .

WXIA-TV Atlanta (11/5, 42K) reports on its website that the FBI was called into the investigation because "Vickery Creek Trail is a national park." The FBI spokesman said that the backpacks contents could have been used to make an improvised explosive device and were detonated to "render them safe." He added that the materials will be sent to the FBI's labs and analyzed and WXIA notes that "It's unclear whether the device was active and set to go off."

**YELLOWSTONE, GRAND TETON NATIONAL PARKS PROPOSES FEE INCREASES.** The Bozeman (MT) Daily Chronicle (11/6, 54K) reports that "Yellowstone National Park is proposing to raise entrance fees for the first time in eight years and to create a backcountry camping permit in order to keep the park running at its current level."

The County 10 (11/5) reports that Grand Teton National Park is "proposing to update its entrance fees and invites public input on this prospect."

**MARIJUANA USE STILL ILLEGAL ON FEDERAL PROPERTY.** The New Republic (11/6, 195K) reports that "the ballot measure to legalize marijuana in the District of Columbia handily passed yesterday," but "although the local pot laws in D.C. might change, just as they did in Colorado and Washington, the federal law hasn't." Federal employers including the NPS "issued staff-wide memos reminding workers that all pot use is considered unacceptable." The article notes that "marijuana use also remains illegal on federal property, and in D.C., that means legalization won't touch places like the National Mall and Rock Creek Park, a wooded recreational area that covers a large part of the city's northwestern quadrant."

**GOV. MCAULIFFE SUPPORTS AN EXPANSION OF FORT MONROE NATIONAL MONUMENT.** The Newport News (VA) Daily Press (11/6, 181K) reports that Gov. Terry McAuliffe "wants the National Park Service monument at Fort Monroe expanded to connect the two federally protected parcels in the North Beach and Inner Moat areas." Brian Coy, McAuliffe's press secretary, said, "Governor McAuliffe believes a contiguous national monument at Fort Monroe would be an enormous historical and economic asset to Hampton Roads and

the commonwealth as a whole." Fort Monroe National Park Superintendent Kirsten Talken-Spaulling said "she couldn't comment on changes to the monument boundary without knowing more details, although she pointed to a section of the federal code dealing with park boundary adjustments."

**MEETINGS TO BE HELD ON POINT REYES NATIONAL SEASHORE RANCH PLAN.** The [Marin \(CA\) Independent Journal](#) (11/6, 67K) reports that "the future of ranches in the Point Reyes National Seashore will be the focus of meetings later this month." This week the NPS "announced two sessions to look at ranching practices and tule elk on pasturelands." The article notes that "the meetings are part of a larger look at ranchlands dubbed the 'Ranch Comprehensive Management Plan/Environmental Assessment.'"

**YELLOWSTONE BISON TO BE MOVED TO FORT PECK.** The [AP](#) (11/6) reports that "Montana wildlife officials say a group of about 140 bison captured from Yellowstone National Park will be re-located to the Fort Peck Indian Reservation next week." The animals "went through a lengthy quarantine to ensure they don't carry the animal disease brucellosis."

**REVIEW FINDS ISSUES SURROUNDING LAVA ALTERNATE ROUTE AT HAWAII VOLCANOES NATIONAL PARK.** The [AP](#) (11/6) reports that "an environmental review for constructing an emergency access route along a lava-covered section of Chain of Craters Road identifies concerns including the spread of invasive species and possible harm to endangered nene." The NPS has "agreed to accommodate two-way traffic on an alternate route to Puna to prepare for lava flowing over the district's main road." The article notes that "the review released Tuesday says a potential impact is spread of invasive species such as little fire ants and coqui frogs hitching rides on vehicles from Puna."

**GATES BEING INSTALLED TO PROTECT NEW RIVER GORGE'S BATS.** The [AP](#) (11/6) reports that "gates are being installed on abandoned mine openings in the New River Gorge National River to protect bat habitat." The NPS said Wednesday that "the old mines provide habitat for 10 species of bats." The article notes that "two species are endangered, the Virginia big-eared bat and the Indiana bat." The gates "allow bats to enter the mines while preventing humans from entering."

**RESEARCHERS STUDYING BLACK BEAR POPULATION IN ALABAMA.** The [AP](#) (11/6, Edgemon) reports that this week, an Auburn University team will "begin catching and tagging bears in and near Little River Canyon National Preserve and on private property in the Saraland area far to the south, in Mobile County." According to the article, "ten bears in each area will be outfitted with GPS collars, which cost \$2,500 each." Researchers are "conducting a statewide study of black bears, their population viability and their movements." The article notes that "thanks to grant funding from the National Park Service, Little River Canyon is also installing game cameras and bear-hair snares."

**NPS OFFERING YELLOWSTONE SNOWMOBILE COURSE ONLINE.** The [Casper \(WY\) Star-Tribune](#) (11/6, 90K) reports that the NPS is "offering a Yellowstone Snowmobile Education Certification course for free online."

**TIMBERLAND PARK OPENS ON NATCHEZ TRACE PARKWAY.** The [Tennessean](#) (11/5, 386K) reports that Timberland Park has "opened in Williamson County on the historic Natchez Trace Parkway."

**MOUNT RAINIER FEATURED ON TUMBLR.** The [Tacoma \(WA\) News Tribune](#) (11/5, 228K) reports that the Interior Department featured Mount Rainier in its "America's Great Outdoors" Tumblr update.

**ADDITIONAL COVERAGE: NPS INVESTIGATING VANDALISM AT NATIONAL PARKS.** Additional coverage of the vandalism in national parks was provided by the [Fort Collins \(CO\) Coloradoan](#) (11/5, 59K).

**PREDATOR CONTROL MEASURES SUPPORTED.** In an op-ed for the [Anchorage \(AK\) Dispatch News](#) (11/5, Stratton, 146K), Jim Stratton, the deputy vice president of regional operations for the National Parks Conservation Association, supports the NPS' "proposed wildlife regulations to end unbearable hunting methods on Alaska's national preserve lands." He writes that "hunting will continue on our national preserve lands, as it should, but some of the methods must change." Stratton concludes that "predator control and national park lands just don't mix."

#### ***Bureau of Land Management:***

**PROSECUTORS OBJECT TO RETRIAL IN FEDERAL VANDALISM CASE.** The [AP](#) (11/6) reports that "prosecutors are objecting to a radio host's request for a new trial after he was convicted of vandalism for tearing

down barricades on federal land in Montrose County." The US Attorney's Office argues that "David Justice's motion for a new trial is based on an inaccurate statement of the law." Justice, "whose given name is Stanley Hugh Anderson, was convicted in September after damaging Bureau of Land Management property at the Cushman Creek Trail."

**ARKANSAS HEADWATERS RECREATION AREA CELEBRATES 25 YEARS.** The Leadville (CO) Herald Democrat (11/6) reports that "the public is invited to celebrate the 25th anniversary of the Arkansas Headwaters Recreation Area with Colorado Parks and Wildlife, the Bureau of Land Management and the US Forest Service." According to the article, "festivities will take place from 10:30 a.m. to 1:30 p.m., Nov. 7, at the Salida SteamPlant Ballroom, courtyard and the nearby Salida boat ramp."

**BLM EMPLOYEE KILLED BY FALLING TREE IN COOS COUNTY.** The Eugene (OR) Register-Guard (11/6, 172K) reports that "a falling tree killed a Bureau of Land Management employee in her car at noon Tuesday near Blue Ridge east of Coos Bay." According to the article, "Estella Morgan, 55, was found unresponsive but breathing when medics arrived on land management property off of Blue Ridge Road." Authorities said that "while crews were on scene, she died."

#### ***Fish and Wildlife Service:***

**COURT STRIKES DOWN PRAIRIE DOG RULES IN UTAH TOWN.** The AP (11/6) reports that "a judge is striking down federal regulations that prohibit Cedar City residents from controlling prairie dogs on private property." Federal Judge Dee Benson says the FWS "can't regulate the Utah prairie dog population on private land because the species is only found inside the state."

The Washington Post (11/5, Adler, 4.9M) reports that "this decision is significant if for no other reason that it is the first time that a federal court has held that the regulation of private land use exceeds the scope of Congress's enumerated powers."

Coverage by the AP was also picked up by the St. George (UT) Spectrum (11/5, 45K).

**COURT UPHOLDS FWS' REMOVAL OF EAGLES FROM ENDANGERED LIST.** The Law 360 (11/6, 18K) reports that "an Arizona federal judge on Wednesday upheld the US Fish and Wildlife Service's decision not to give Endangered Species Act protection to the Sonoran Desert bald eagle population, finding the analysis used by the agency was not flawed and took adequate scientific evidence into consideration." US District Judge David G. Campbell "granted a motion for summary judgment filed by the FWS, saying that the Center for Biological Diversity and other environmental groups had failed to provide evidence showing the agency's decision runs contrary to scientific and legal conclusions."

**CHICAGO'S SHEDD AQUARIUM WELCOMES ABANDONED SEA OTTER PUP RESCUED OFF CALIFORNIA.** The Los Angeles Times (11/6, Rocha, 4M) reports that "a 5-week-old sea otter pup rescued along the Central California coast will get a second chance at life in Chicago after getting fattened up at Monterey Bay Aquarium, experts announced Tuesday." According to the article, "after receiving around-the-clock care at the aquarium for four weeks, 'Pup 681' – a member of the threatened Southern Sea otter species – was shipped to the Shedd's Abbott Oceanarium in Chicago for continued rehabilitation."

Also reporting on the story are KSBW-TV Monterey, CA (11/6, 7K), WGN-TV Chicago (11/5, 141K), and WTVR-TV Richmond, VA (11/5, 47K).

**FWS OFFERS TOUR OF GREAT BAY NATIONAL WILDLIFE REFUGE.** The Seacoast Online (NH) (11/5, 6K) reports that the FWS is "offering a limited number behind the scenes tours this month of its Great Bay National Wildlife Refuge on a portion of the former Pease Air Force Base."

**FWS FORENSICS LABORATORY DIRECTOR INTERVIEWED.** In an interview with the Al Jazeera America (11/6, 177K) FWS Forensics Laboratory Director Ken Goddard discussed "the lab's early beginnings, why he thinks rhinos are nearing extinction, and what it's like wading through walrus guts in the Arctic."

**ADDITIONAL COVERAGE: ANIMAL RESEMBLING GRAY WOLF REPORTED AT GRAND CANYON.** Additional coverage of an animal that could be a gray wolf that has been seen at Grand Canyon National Park was provided by the Washington Post (11/5, Larimer, 4.9M).

## ***US Geological Survey:***

**USGS, CANADA DEVELOP NORTH AMERICA WATERWATCH.** The WaterWorld (11/6, 96) reports that "in an international collaboration, the US Geological Survey (USGS) and the Water Survey of Canada (WSC) have officially produced the North America WaterWatch (NAWW), a new online website that displays streamflow conditions throughout much of North America." According to the article, "NAWW provides a fast, easy-to-use, cartographically-based, central web interface for users to access real-time streamflow conditions for both Canada and the United States." Jerad Bales, USGS chief scientist for water, said, "North America WaterWatch delivers easily understandable maps and graphics of streamflow conditions and, simultaneously, provides access to real-time and past streamflow data at thousands of streamgages in both nations. The portal demonstrates the value of free exchange of water-data through interoperable web services, which is a major strategic focus of the USGS through open-water data activities."

**USGS REPORT DESCRIBES TRACKING NITRATE PULSE TO THE GULF OF MEXICO.** The Water Technology Online (11/6) reports that "a new report released by the US Geological Survey (USGS) describes how advanced optical sensor technology is being employed in the Mississippi River basin to accurately track the nitrate pulse to the Gulf of Mexico." According to the report, "excessive springtime nitrate runoff, from agricultural land and other sources in the Mississippi drainage, flows into the Mississippi River and then downstream into the Gulf of Mexico." USGS Researcher Brian Pellerin said, "High frequency data from these sensors has revealed considerable variability in nitrate concentrations in small rivers and streams. However, we were surprised to see nitrate concentrations vary by as much as 20 percent in a week in a river as large as the Mississippi River without similar changes in streamflows."

**USGS MODEL SIMULATES HOW SEDIMENT MOVES.** The Dredging Today (11/5) reports that "for the first time ever, scientists have simulated the movement of sediment throughout the San Antonio River Basin with a new US Geological Survey model, created in cooperation with the San Antonio River Authority (SARA)." According to the article, "the new model simulates how water and suspended sediment flowed through the San Antonio River Basin from 2000-2012." Aarin Teague, SARA Sustainability Stormwater Specialist, said, "The San Antonio River Authority will be utilizing this model and the study findings as part of a holistic watershed master planning effort. With the study results, SARA management strategies will be targeted to efficiently address sources of pollutants."

## **Securing America's Energy Future:**

### ***Renewable Energy:***

**RESEARCHERS TO STUDY MARINE MAMMALS TO MINIMIZE EFFECTS OF WIND FARM DEVELOPMENT.** The reNews (11/6) reports that "researchers will begin a study of marine mammals off the coast of Ocean City, Maryland this fall to help minimize the affects of wind farm development." According to the article, "a new study led by the University of Maryland Center for Environmental Science will help state and federal decision-makers better understand where whales, dolphins and porpoises occur and how they use this habitat." The article notes that "beginning this fall, underwater microphones will be affixed on buoys anchored to the ocean floor to continuously record sounds produced by large whales and other marine mammals."

**PUBLIC HEARING ON DESERT RENEWABLE ENERGY CONSERVATION PLAN SCHEDULED THURSDAY.** The Inland Valley (CA) Daily Bulletin (11/5, Steinberg, 99K) reports that "there will be a public hearing Thursday night on the Desert Renewable Energy Conservation Plan, a historic planning effort covering more than 22 million acres of the California desert."

### ***Onshore Energy Development:***

**DENTON, TX VOTERS PASS ANTI-FRACKING BAN; INDUSTRY RESPONDS WITH INJUNCTION REQUEST.** Bloomberg News (11/5, Olson, Polson, 1.94M) reports that on Tuesday the "small college town" of Denton, TX passed a measure banning fracking. The mandate passed with 14,881 votes for 59% of the total vote.

Reuters (11/5, Richter) reports that Denton's vote was considered key because fracking is a widely-used practice in Texas. This is the first anti-fracking measure to pass in the state. In response, Texas Railroad Commissioner David Porter said the ban should be cast aside. He argued, "Bans based on misinformation –

instead of science and fact – potentially threaten this energy renaissance and as a result, the well-being of all Texans.”

The AP (11/5) reports that in response to Tuesday's vote, the Texas Oil and Gas Association on Wednesday “responded quickly” by filing suit “for an injunction to stop” the anti-fracking ban from taking effect.

The Dallas Morning News (11/5, Miller, 1.16M) reports that in a Wednesday statement, Texas Oil and Gas Association attorney Thomas R. Phillips argued, “A ban on hydraulic fracturing is inconsistent with state law and therefore violates the Texas Constitution.”

In “The Two Way” blog NPR (11/5, 2.22M) reports that Denton, TX Mayor Chris Watts vowed to fight for the fracking ban. He said Wednesday, “Hydraulic fracturing, as determined by our citizens, will be prohibited in the Denton city limits.” The ban is set to take effect Dec. 2.

The Dallas Morning News (11/5, Heinkel-Wolfe, 1.16M) reports that since July Denton Taxpayers for a Strong Economy, the main group opposed to the fracking ban, raised nearly \$700,000 to defeat it, the bulk of which came from the energy producers including Chesapeake, XTO, and Chevron. In that time, Frack Free Denton raised \$75,000.

**Results Mixed For Local Anti-Fracking Measures.** The New York Times (11/6, Krauss, Subscription Publication, 9.9M) reports that across the nation “local initiatives to ban or restrict the oil and gas production process lost as many elections as were won. Voters in Youngstown, Ohio, a Rust Belt city sitting atop vast deposits of natural gas, sent a proposed ban to a landslide defeat.” Overall “on Election Day, the oil industry and fracking opponents split eight local races, three in California, four in Ohio and the one in Denton.”

The Hill (11/6, Cama, 241K) notes “Denton, Texas; Athens, Ohio; and San Benito and Mendocino counties in California passed ballot measures to restrict fracking, the controversial method of injecting fluid into wells to extract more oil and gas.” According to the Natural Resources Defense Council “the passed measures show a growing trend of localities opposing fracking.”

**OSMRE HONORS ACKERMAN COAL MINE WITH AWARD.** WTVA-TV Columbus, MS (11/6, 7K) reports that “a lignite surface mining operation in Choctaw County has been honored for its work to reclaim areas affected by their operations.” The OSMRE “named Mississippi Lignite Mining Company Red Hills Mine as a winner of the 2014 National Award.” The agency “selected Red Hills for the honor for work done to reclaim the McIntire Branch of Little Bywy Creek.”

**MINE OPERATOR RECOGNIZED WITH AWARD.** The Logan (WV) Banner (11/6, 574) reports that “Alpha Natural Resources Elk Run Coal Company, Inc., was given the ‘Good Neighbor Award’ by the USDI, an award given to mine operators for successfully working with the surrounding land owners and the community while completing mining and reclamation.” According to the article, “Elk Run received the award for ‘its significant contributions each year to communities near Elk Run Coal Company.’”

#### **ADDITIONAL COVERAGE: ENVIRONMENTAL GROUPS CONTEST MOAB PIPELINE DECISION.**

Additional coverage that environmentalists are challenging the BLM's Moab pipeline decision was provided by the Salt Lake (UT) Tribune (11/6, 479K).

#### **Offshore Energy Development:**

**LAWSUIT CLAIMS NATIONAL OFFSHORE TRAINING AND LEARNING CENTER SCUTTLED.** WWL-TV New Orleans (11/5, 107K) reports that “a training center – touted as central to the federal government's efforts to improve offshore drilling safety after the 2010 Deepwater Horizon explosion – failed to get off the ground, and its former director blames Gulf of Mexico regulators for undermining reforms.” Chris Barry, the former head of the National Offshore Training and Learning Center, is “suing the Interior Department, alleging hostile working conditions from senior agency management, who, Barry alleges, called him and his staff ‘idiots’ and used homophobic slurs to refer to Barry.” The article notes that “more importantly, though, Barry says that the safety bureau's Gulf of Mexico regional office undercut” Michael Bromwich's plans and “hijacked funds and staff intended for the training center.”

**ANNIVERSARY OF END OF FIRST SEMS AUDIT CYCLE APPROACHING.** The Penn Energy (11/6, 128) reports that “it has been almost four years since the Safety and Environmental Management Systems (SEMS)

regulations were promulgated and on November 15, 2014, it will be one year since the end of the first SEMS Audit Cycle." According to the BSEE, "86 percentage of the regulated operators successfully demonstrated that they met required SEMS program requirements," and "in August 2014 only three operators were still out of compliance."

## **Empowering Native American Communities:**

**ADDITIONAL COVERAGE: BOEM RELEASES ARCTIC DRILLING REVIEW.** Additional coverage of the release of the BOEM's new environmental analysis in the Chukchi Sea was provided by the [Offshore Magazine](#) (11/6, 143K) and the [Penn Energy](#) (11/6, 128).

**BOR TO DISCUSS BIGHORN RESERVOIR DURING PUBLIC MEETING.** The [Billings \(MT\) Gazette](#) (11/6, 236K) reports that the BOR will "present water supply conditions in the Bighorn Basin and discuss the agency's proposed fall/winter operating plan for Yellowtail Dam/Bighorn Reservoir at a public meeting on Wednesday." Also, "the Bighorn River System Issues Group will discuss the river and reservoir aquatic health and operating criteria for Yellowtail Dam."

**BIA BACKS HOPI'S IMPOUNDING OF NAVAJO SHEEP.** The [Indian Country Today Media Network](#) (11/5, 78K) reports that "the deep Southwestern drought has pitted tribe against tribe, as Hopi authorities backed by the Bureau of Indian Affairs (BIA) impound hundreds of sheep and other livestock owned by Navajo who are grazing the animals on Big Mountain, which lies on Hopi Partition Land." However, "Navajo ranchers in the area, many of them lifelong, elderly, pastoral people, are crying foul on methods that they say are harsh and unfair, even though the activity fits Hopi regulations' definition of overgrazing."

## **Top National News:**

**OBAMA DECLINES TO TAKE BLAME FOR DEMOCRATS' MIDTERM LOSSES.** Almost all the coverage of President Obama's press conference on Wednesday afternoon describes it as evidence that he does not blame his relative unpopularity for the Democrats' losses on Tuesday and does not intend to make any major changes, either in staffing or policymaking, in the wake of the Republican wave. On NBC Nightly News (11/5, story 3, 1:35, Williams, 7.86M), Chuck Todd said Democrats told him they believe the President "made a mistake not accepting more responsibility...at that press conference." Todd added, "What's amazing here is that this was a horrendous night for the Democratic Party, and the President is not talking about changing either his style or the White House staff."

Also on NBC Nightly News (11/5, story 2, 2:45, Williams, 7.86M), correspondent Chris Jansing said the midterms were "widely viewed as a repudiation of" the President. But Jansing added that "if the election results left him chastened, the President is not showing it," and, on Wednesday, he "didn't accept responsibility" for his party's defeats.

In the lead story for the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), Major Garrett reported that "after another midterm election drubbing, President Obama pledged no fundamental changes in his White House team or its tactics." On ABC World News (11/5, lead story, 3:05, Muir, 5.84M), Jonathan Karl also reported that the President "offered no sign that he has...a desire to change course" nor any "apologies." According to Karl, the President "suggested Democrats lost primarily because most people didn't bother to vote."

Just after the President finished his press conference, MSNBC's (11/5, 111) Alex Wagner said, "If you wanted contrition...from the President, you certainly did not get it." Under the headline, "Obama Defiant After GOP Wave," Politico (11/5, Epstein, 977K) reported that the President "sounded a defiant tone on Wednesday, arguing that Democrats' big losses...were more about dysfunction in Washington than about his policies and leadership." Politico also reported that the President "repeatedly resisted reporters' efforts to extract political analysis from him," but "offered a broader political takeaway: that Americans are still hungry for the change he promised as a candidate six years ago."

The Hill (11/5, Barron-Lopez, Ferris, 241K) reported that on Wednesday, the President "suggested he's going full steam ahead with plans to take executive action on immigration and made a point of noting that two-thirds of voters didn't take part in the midterms – a swipe at any GOP suggestions that the election gave their party a mandate."

Charles Blow of the New York Times (11/6, Blow, Subscription Publication, 9.9M) says the President "was not

contrite or cowed" on Wednesday, which Blow says "could actually stiffen the spines of some staunch progressives who are already...feeling some commingling of betrayal, buyer's remorse and battle fatigue." But the Washington Times (11/5, Wolfgang, 373K) describes the President as "humbled" and reports that he said he is "fully prepared to work with Republicans."

McClatchy (11/5, Clark, Subscription Publication, 27K) reports that the President "declined to take blame for the [Democrats'] showing, though he had said...that his policies would be on the ballot." McClatchy says the President "sought to strike an upbeat, conciliatory tone," and while he "memorably characterized Democratic losses in 2010 as a 'shellacking,'" he "studiously avoided any word like it on Wednesday." USA Today (11/5, Korte, Jackson, Today, 9.86M) also notes that the President "steered clear of using similarly vivid language," and "declined to analyze" the "causes" of the Democrats' losses."

In a column titled, "Obama Seems Numb To This Latest 'shellacking' Of Democrats," Dana Milbank of the Washington Post (11/5, Milbank, 4.9M) writes that on Wednesday, the President "spoke as if Tuesday had been but a minor imitation," and "acknowledged no fault or error and expressed no contrition or regret."

In USA Today (11/5, Goldberg, 9.86M), National Review's Jonah Goldberg writes that "contrary to a lot of spinning early election night, this wasn't an 'anti-incumbent wave'; it was...an anti-Obama wave." Neil Munro of the Daily Caller (11/5, Munro, 475K) said that during his "painful" press conference, the President "declined to promise any staffing changes or trim his progressive goals."

USA Today (11/5, Board, 9.86M) editorializes that "again and again when he was" campaigning, the President said he "would be the peacemaker," but "when that turned out to be harder than he thought, he publicly fumed and finally seemed to lose interest." But the New York Times (11/6, Board, Subscription Publication, 9.9M), in an editorial, praises the President for having "refused on Wednesday to submit to the Republican narrative that his presidency effectively ended with the midterm elections." The Times says the President was "right to ignore" reporters' "demands that he take personal responsibility for the Democratic losses, or exhibit public contrition."

**OBAMA PLEDGES TO WORK WITH REPUBLICANS TO FIND COMMON GROUND.** On Wednesday, both President Obama and Senate Minority Leader Mitch McConnell's remarks on their willingness to cooperate on bipartisan initiatives were met with a great deal of skepticism from media analysts. On NBC Nightly News (11/5, story 2, 2:45, Williams, 7.86M), White House Correspondent Chris Jansing reported that on Wednesday, the President "suggested the bitter campaign season could give way to compromise." In the lead story for the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), Scott Pelley reported that Senate Minority Leader Mitch McConnell and the President "both...said they will try to work together to get things done – try." Also on the CBS Evening News (11/5, story 2, 2:25, Pelley, 5.08M), Nancy Cordes said McConnell's "assertion that he wants to work with the President was met with skepticism from Democrats who say he was a key contributor to the gridlock...and that the few times he did try to meet the President half way, conservatives in his party yanked him back."

Under the headline, "After Midterm Rout, Obama Says He Got Nation's Message," the Washington Post (11/5, Eilperin, Sullivan, Nakamura, 4.9M) reports that the President said he "accepts the American public's message in the midterm elections that Washington needs to break its political gridlock." The Post notes that the President spoke after speaking with Senate Minority Leader Mitch McConnell, who has "sounded a bipartisan note" since Tuesday night. According to the Post, the President "cited investments in infrastructure and multi-nation trade pacts as areas of potential compromise." The Wall Street Journal (11/6, O'Connor, Subscription Publication, 5.62M) details the history between the President and McConnell in an article titled, "Testy Obama-McConnell Relationship Takes The Spotlight."

The Wall Street Journal (11/5, Sparshott, Schwartz, Subscription Publication, 5.62M) covers the President's press conference in an article titled, "Obama Open To Striking Deals With GOP Congress." Reuters (11/5, Mason, Rampton) quotes the President as saying, "As president, I have a unique responsibility to try and make this town work. ... So, to everyone who voted, I want you to know that I hear you."

The Hill (11/5, Barron-Lopez, Ferris, 241K) says the President "made a point of complimenting" McConnell, and "defended his relationships with members of Congress, which he said have largely been 'cordial' and 'constructive.'" In an article titled, "Obama Vows To 'Get The Job Done' With Republicans," the AP (11/5, Espo, Pace) says the President and McConnell both "pledged to try and turn divided government into a force for good rather than gridlock...yet warned of veto showdowns as well." According to the AP, "Trade legislation loomed as one possibility for quick compromise, and immigration as an early irritant."

USA Today (11/5, Korte, Jackson, Today, 9.86M) reports that the President "put two new items on the agenda for the lame-duck Congress: A \$6.2 billion emergency spending bill that would pay for efforts to fight Ebola and, in a turnaround from his previous stance, explicit congressional authorization for his war against the Islamic State."

In an op-ed for USA Today (11/5, Robbins, 9.86M), author James Robbins writes that despite claims from Democrats, including the President, "Republicans have not been the obstructionists." Robbins notes that the House "has passed dozens of bills that Democratic Majority Leader Harry Reid refused to bring up for a vote."

**Republicans Intend To Focus On Trade Deals, Tax Reform And Energy.** According to Major Garrett, on the CBS Evening News (11/5, lead story, 3:00, Pelley, 5.08M), the President is "hopeful" that he can "cut deals with Republicans on trade, infrastructure, and tax reform," while McConnell says Republicans "are looking to compromise on trade and tax reform, too."

The Washington Post (11/6, Montgomery, Costa, 4.9M) reports McConnell and Speaker Boehner "are both eager to shed the party's image as an unruly collection of obstructionists," and "the remedy, they have decided" is to "act quickly to send President Obama bills with bipartisan support to fast-track international trade agreements, repeal an unpopular tax on medical devices and approve the Keystone XL pipeline."

According to the New York Times (11/6, Hulse, Subscription Publication, 9.9M), the GOP's Congressional leadership intend to "focus on balancing the budget, restoring an orderly process for spending bills, revising if not repealing the health care law and enacting a major overhaul of the tax code." The Times says "approving the Keystone XL oil pipeline...could be fertile ground for agreement with Democrats who have differed with the White House on the issue," and "combining the pipeline with new energy exports, expanded exploration and added efficiency could build a bipartisan consensus."

According to Politico (11/6, Sherman, Raju, 977K), McConnell and Speaker Boehner "are sending subtle warnings to the right wing of their party: The days of crisis-dominated Washington are over." Politico adds that "top Republicans in both chambers have even showed a new eagerness to cut deals with the White House" while "vowing not to repeat the errors of past years, when messy fiscal fights eroded public confidence in Washington and became the hallmark of the GOP-controlled House."

In an op-ed for the Wall Street Journal (11/6, Subscription Publication, 5.62M) titled, "Now We Can Get Congress Going: Reform The Tax Code, Redefine 'Full Time' As Working 40 Hours A Week, Move On The Keystone XL Pipeline." McConnell and Boehner lay out their agenda for the next Congress. In an editorial, the Christian Science Monitor (11/5, Board, 426K) says the White House and Congressional Republicans "should...strike a deal to expand trade with Asia and Europe."

**New Senate Appears To Have Votes To Pass Keystone Bill.** The Huffington Post (11/5, Sheppard, 11.54M) reports that the incoming GOP Senate majority "creates an opportunity" for "likely" Senate Majority Leader Mitch McConnell "to force a vote on the proposed Keystone XL pipeline he's been waiting years to hold." By the HuffPo's count, "the new Senate will have at least 61 votes in favor of a measure forcing the pipeline's approval – a filibuster-proof majority."

The Wall Street Journal (11/5, Harder, Subscription Publication, 5.62M) reports that beyond Keystone, the new Senate GOP majority is likely to oppose many of the President's top energy and environmental policies. McConnell has vowed to hold votes on Keystone and legislation trimming the Administration's proposed carbon limits. However, it remains unclear how much success the GOP will have.

**EXIT POLLS: "ANGER" OVER ECONOMY DROVE GOP SENATE GAINS.** Bloomberg News (11/5, Doming, Allen, 1.94M) reports that on Tuesday, Republicans "seized on voter anger" over the President's handling of the economy to take control of the Senate. The economy "was voters' most pressing concern," with "with seven of 10 rating conditions poor, preliminary exit polls showed."

The CBS Evening News (11/5, story 5, 2:25, Pelley, 5.08M) reported that the economy was "a major issue" in the elections. CBS (Mason) adds that "the overwhelming majority of voters feel it's in bad shape. Nearly eight in 10 in our exit poll told us they're worried about where the economy is headed." CBS (Mason) adds that the "stock market may be at record highs, and the unemployment rate may finally have fallen below six percent but household incomes have yet to recover from the recession and are now back at levels we last saw in the mid-1990s."

Bloomberg News (11/5, Torres, 1.94M) reports that there are "signs" emerging that incomes are beginning to rise. Wages and salaries of civilian workers "climbed 2.1 percent in the third quarter from the same time last year, the most since the first three months of 2009, Labor Department data showed last week." However, the increase "failed to pay dividends at the polls for Democrats, as voter perceptions of the economy tend to be locked in about six months before Election Day," political analysts say.

In his column for the Washington Post (11/5, Meyerson, 4.9M), Harold Meyerson writes that Democrats lost "catastrophically" because of "their inability to deliver broadly shared prosperity as they used to do." Democrats were unable to "take advantage" of "populist sentiments" among the electorate.

**Businesses Prepare To Push For Priorities In New Congress.** The New York Times (11/5, Schwartz, Krauss, Subscription Publication, 9.9M) reports that following "years of gridlock," businesses are "gearing up for a major push on long-sought goals like an overhaul of the corporate tax system, building the Keystone XL oil pipeline, lighter environmental and financial regulation" and advance major trade deals. However, "despite plenty of public talk of more aggressive action," the Times says that lobbyists, political veterans and Wall Street experts "say the actual legislative agenda will be much more limited."

**Fisher Warns Senate GOP Against Compromising Fed's Independence.** Bloomberg News (11/5, Boesler, Mckee, 1.94M) reports that Dallas Fed President Richard Fisher said in an interview on Wednesday that Senate Republicans "should resist the temptation to erode Federal Reserve independence after victory in mid-term elections." Fisher said, "Think about this: Here's a Congress that can't even get its own budget together. Do you want them running the central bank?"

**More Commentary.** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that at his press event on Tuesday, the President gave no indication that he was interested in driving the economic agenda, so the paper says it will be up to the GOP. The Journal argues that the Republicans should push an economic reform and growth agenda. The paper suggests that the GOP focus on issues that could draw at least some Democratic support, including approving Keystone XL, expanding energy drilling and exports, dumping the ACA's medical device tax, pushing free-trade legislation, and considering tax reform.

In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that the election wasn't just a referendum on the President, but it was also a showdown between blue- and red-state styles of government, and the GOP won a substantial victory. Governors such as Scott Walker, Rick Scott, Brian Sandoval and Rick Snyder all pushed reforms against Democratic opposition that the Journal says boosted their states' economic competitiveness, and all won reelection.

## **Editorial Wrap-Up:**

**NEW YORK TIMES. "Mr. Obama's Offer To Republicans."** The New York Times (11/6, Board, Subscription Publication, 9.9M), in an editorial, praises the President for having "refused on Wednesday to submit to the Republican narrative that his presidency effectively ended with the midterm elections." The Times says the President was "right to ignore" reporters' "demands that he take personal responsibility for the Democratic losses, or exhibit public contrition."

**"In Red And Blue States, Good Ideas Prevail."** A New York Times (11/6, Board, Subscription Publication, 9.9M) editorial argues that Republican victories were "driven by ideological hatred for President Obama," and when voters had "a choice on an actual policy, rather than between candidates with a D or R next to their names," they "made notably liberal decisions in both red and blue states."

**WASHINGTON POST. "Give Republicans Time."** An editorial in the Washington Post (11/5, Board, 4.9M) says that while the President "promised to take unilateral action on immigration before the end of the year," he should wait and "give Mr. McConnell the opportunity to make good on some of the lofty promises he has made since the Republican victory." The President, the Post argues, should "seize the moral high ground and test GOP leaders' seriousness about cooperating by offering them time to show they can act, including on immigration."

**"Leaving Yazidis Exposed."** The Washington Post (11/6, 4.9M) editorializes that President Obama's plan to take a "multiyear" approach to the war against ISIL has "advantages," but "also has some big upfront risks." The Post says "one" risk is that the "strategy" is leaving the Yazidis and other vulnerable populations...exposed" to ISIL's "aggression and unspeakable brutality toward non-Muslims."

**"Larry Hogan's Stunning Win."** In an editorial, the Washington Post (11/5, Board, 4.9M) calls Republican Larry Hogan's victory in the Maryland gubernatorial race "a direct repudiation of the administration of Gov. Martin O'Malley." Because Hogan cast the race "as a referendum on Mr. O'Malley and his tax-and-spend policies," he "was able to avoid putting forward an agenda of his own." As a result, "Maryland has a governor-elect who has yet to put forward an implementable agenda."

**WALL STREET JOURNAL. "A Growth And Reform Congress."** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that at his press event on Tuesday, the President gave no indication that he was interested in driving the economic agenda, so the paper says it will be up to the GOP. The Journal argues that the Republicans should push an economic reform and growth agenda. The papers suggests that the GOP focus on issues that could draw at least some Democratic support, including approving Keystone XL, expanding energy drilling and exports, dumping the ACA's medical device tax, pushing free-trade legislation, and considering tax reform.

**"Vindication In The States."** In an editorial, the Wall Street Journal (11/6, Subscription Publication, 5.62M) says that the election wasn't just a referendum on the President, but it was a showdown between blue and red state styles of government, and the GOP won a substantial victory. Governors such as Scott Walker, Rick Scott, Brian Sandoval and Rick Snyder all pushed reforms against Democratic opposition that the Journal says boosted their states' economic competitiveness, and all won reelection.

**NASA TELECONFERENCE – ROCKET EXPERIMENT — 2 p.m.** NASA will host a news teleconference to announce discoveries from a sub-orbital rocket experiment "that are redefining what we think of as galaxies." The briefing participants are: Michael Garcia, program scientist, NASA Headquarters, Washington; James Bock, astronomer, NASA's Jet Propulsion Laboratory and California Institute of Technology, Pasadena, California; Michael Zemcov, astronomer, Caltech and JPL; Karoline Gilbert, assistant astronomer, Space Telescope Science Institute, Baltimore, Maryland. Contacts: Felicia Chou, [felicia.chou@nasa.gov](mailto:felicia.chou@nasa.gov), 202-358-0257. Notes: For dial-in information, media representatives should e-mail their name, affiliation and telephone number to Felicia Chou at [felicia.chou@nasa.gov](mailto:felicia.chou@nasa.gov) by noon on Thursday. Audio of the teleconference will be streamed live at: <http://www.nasa.gov/newsaudio>.

**NATURALIZATION CEREMONY – SCIALABBA – CHILDREN — 3 p.m.** U.S. Citizenship and Immigration Services (USCIS) Deputy Director Lori Scialabba will participate in a special naturalization ceremony for 20 children citizenship candidates in recognition of National Adoptions Month. Location: USCIS Washington District Office, 2675 Prosperity Ave., Fairfax, Va. Contacts: DHS Press Office 202-282-8010.

## Last Laughs:

### LATE NIGHT POLITICAL HUMOR.

**Jimmy Kimmel:** "Yesterday was, of course, Election Day. There were a number of pot-related items on state ballots. Alaska, Oregon, and Washington, D.C. voted to legalize recreational marijuana. Vice President Joe Biden celebrated quietly at home, contemplating the infinite nature of the universe."

**Jimmy Kimmel:** "Imagine Washington, D.C. – if you thought Congress didn't get a lot of work done before, just wait until they get legal pot."

**Jimmy Kimmel:** "In Florida, a measure to legalize medical marijuana did not pass. Which, that's probably for the best, right? People in Florida are weird enough already."

**Jimmy Kimmel:** "Remarkably, the very liberal state of California still has not legalized marijuana for recreational use. Though, due to the drought we are having here, we are considering making it legal to drink bong water."

**Jimmy Kimmel:** "As you probably know, Republicans picked up a lot of seats and won control of both chambers of Congress yesterday, which is key because whoever controls Congress controls the lunch menu at the cafeteria."

**Jimmy Kimmel:** "Republicans have a majority in the Senate and House of Representatives for the first time in eight years. I guess when it was all said and done, the Republicans just had the better lawn signs."

**David Letterman:** "Boy, it was a big night for the Republicans, big night for the conservatives. Rush Limbaugh broke out the OxyContin. ... Even the Washington Redskins are demanding the Democrats change their name."

**David Letterman:** "The governor's race in Florida – very close. They had to wait all night to count the crooked ballots."

**David Letterman:** "The new senator from Iowa, Jodi Ernst, says we're heading to Washington and we're going to make them squeal. I said to myself, 'Lady, it's the United States Senate. It's not a bachelor's party.'"

**David Letterman:** "You know what happened today? When is this going to stop? There was another fence-jumper at the White House. Yeah, this time it was Obama trying to get out."

**Stephen Colbert:** "Huge night for the Republicans across the country. They won everything – the Senate majority, the bigger House majority, tight governor's races, and a giraffe from one of those claw machines."

**Jimmy Fallon:** "The big news, of course, is the mid-term elections. Last night, Republicans picked up a dozen seats in the House to give them their biggest majority since World War II. Or, as they put it, 'Time to party like it's 1939!'"

**Jimmy Fallon:** "They also took control of the Senate, after gaining another seven seats. I haven't seen the GOP get this many seats since Chris Christie made an airline reservation."

**Jimmy Fallon:** "I saw that Republican Scott Brown lost his bid for Senate in New Hampshire last night, two years after he was voted out as senator in Massachusetts. When asked what he was planning to do next, he said, 'Are they still looking for a mayor in Toronto?'"

**Seth Meyers:** "Yesterday, Republicans won enough seats to gain a majority in the Senate and increase their majority in the House. For those Democratic candidates who wanted to distance yourselves from Obama, congratulations, you did. You don't ever have to worry about seeing him again."

**Conan O'Brien:** "But, history was made. For the first time ever, a Black Republican woman has been elected to Congress. President Obama gave her a congratulatory call and told her, 'You're all set. This country never turns against the first black anything.'"

**Conan O'Brien:** "Yesterday, Washington D.C. voted to legalize recreational marijuana. President Obama said, 'And after these midterms, thank God.'"

**Conan O'Brien:** [Referring to Clay Aiken] "The former 'American Idol' star lost his election to Congress. Apparently, his supporters thought they could vote by texting Ryan Seacrest."

## Neshoba Democrat: U.S. Secretary of Interior visits Choctaw Tribal Schools

BY DUNCAN DENT

"Do you kids know who my boss is?" Secretary of the Interior Sally Jewell asked a class at Choctaw Central High School last week.

"Barack Obama," a student answered shyly.

Choctaw Tribal Chief Phyliss J. Anderson hosted Interior Secretary Sally Jewell for a tour of the Choctaw Indian Reservation last Wednesday, Oct. 29.

It was the second such visit by a sitting Secretary in almost three decades, the last in 1987 during the Reagan administration.

Chief Anderson and Secretary Jewell visited Pearl River Elementary, Choctaw Central High School and the Occupational Training Center.

Jewell, joined by Assistant Secretary of Indian Affairs Kevin Washburn and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel, were in Choctaw to tour the three facilities and discuss ongoing Indian education reform initiatives.

"We are honored to have had Secretary Jewell visit with us on the Reservation," Anderson said. "Since taking office, I have made considerable efforts to improve and strengthen government-to-government relations between our tribe and the United States. The fact that Secretary Jewell, a cabinet member, came here personally to learn more about our educational system means that the tribe is getting noticed in Washington."

Chief Phyliss Anderson and U.S. Secretary of Interior Sally Jewell

Anderson showed Jewell many aspects of what the Choctaw school system offers, including classes in the Choctaw language, a mobile bus that visits each elementary school in the Choctaw Tribal School System, a science class at the high school and the Tushka Hashi Solar Car team. Jewell got to talk to students and teachers in classes.

Jewell, Washburn, Anderson and Vice-Chief Ronnie Henry participated in a small informal meeting with some CCHS students. Both Chief Anderson and Secretary Jewell felt it was important the students' voices were heard during the visit.

In a press conference at the end of the visit, Jewell said the Choctaw school system functioning at such a high level can be used as a model to other Tribal school systems that are struggling.

Jewell identified the involvement of Tribal leadership as something that puts them ahead of the pack.

"We got a challenge in Indian education across the country. We under-perform other students, part of my job as Secretary of the Interior is overseeing the bureau of Indian education.

"We're reforming it, because it's not working well for Indian children, but right here in Mississippi we see a really highly functional school system, we see tribal leadership with the chief engaged deeply in the schools, the school system and the future for these kids and we know that there are lessons that we can learn here, that we can apply elsewhere to Indian country but we also know that there are things that the tribe needs from us to a better job in supporting their needs, so that's why we're here"

Jewell said she appreciated how well the culture was worked into the classes and programs at all levels of education in the Choctaw school system.

Anderson said that cultural immersion for the children is "not a tough job" because it is something they instinctively "do everyday." She also said she appreciates that federal government is concerned about their needs.

Jewell issued a Secretarial order on June 12 , based on recommendations by American Indian Education Study Group, to promote Tribal control and improve achievement in Tribal schools.

"The future of Indian Country rests on ensuring American Indian children receive a world-class education that honors their cultures, languages and identities as Indian people," said Jewell, who chairs the White House Council on Native American Affairs.

"The redesign of the BIE reflects President Obama's commitment to promoting tribal self-governance and self-determination, enabling the BIE to more effectively support tribal educators who best understand the unique needs of their communities."

This was not the first visit by a Secretary of Interior. Secretary of the Interior Donald P. Hodel visited in May 1987.

Hodel toured three plants on the Reservation. He saw Chahta Electronics radio assembly line and the greeting card and wire harness assemble plants. He also visited Choctaw Elementary which lost almost 30 percent of its building to a fire shortly before the visit.

Secretary Hodel gave a similar report 27 years ago. "I am tremendously impressed with what Chief Martin and the Choctaw Tribe have accomplished here," Hodel said.

**SECRETARY JEWELL VISITS CHOCTAW SCHOOLS.** The AP (10/30) reports that Interior Secretary Sally Jewell praised the Choctaw tribal schools in Mississippi during her visit on Wednesday. Jewell said "much of the success of the Choctaw School System can be attributed to the tribe's hands-on approach, with the chief and tribal council virtually serving as the school board." Jewell said, "In many other communities we don't see that. We don't have engagement between tribal leaders and the schools. Sometimes we run the schools. We run them out of Albuquerque, New Mexico or Washington D.C., and the schools may be all the way across the country."

Coverage by the AP was also picked up by the Washington Times (10/31, 373K), the Hattiesburg (MS) American (10/30, 34K), KNOE-TV Monroe, LA (10/31, 2K), WKRG-TV Mobile, AL (10/31, 37K), WSFA-TV Montgomery, AL (10/31, 30K), and WDBD-TV Jackson, MS (10/31, 152K).

To: "Interior\_Press@ios.doi.gov" &lt;Interior\_Press@ios.doi.gov&gt;

Hello, My name is [REDACTED] My son and I are affiliated with the Choctaw and Crow tribes. We live in Albuquerque NM. I had to go to the MDC on contempt of court charges for 30 days. I had a temporary place for my son lined up, which will be verified by [REDACTED] at pre trial. The principal of [REDACTED] decided that my son should go into CYFD custody instead. The CYFD committed perjury when they told the judge and said I had no place for my child to go while I had to be temporarily incarcerated at the MDC for 30 days. I was awarded 1 hour of supervised visitation with my child. However, after a few months the CYFD agent [REDACTED] decided to (without a hearing on the matter) modify the Judges orders and the visits were terminated. I thought that kind of stuff was illegal. that He then stated that I was banned from the premises and declared that I was now in a state of non compliance. I feel that he was going contrary to the New Mexico religious freedom act and decided to pursue legal recourse at District so I filed a complaint of criminal activities against them (which they failed to respond to) pursuant to 28-22-4 private remedies, which means that they would be held accountable for there crimes against me and my child. Next [REDACTED] then moved the court to terminate my parental rights. I have included a copy of the motion and really hope and pray that you will do something about this menace to our society soon. They are a like an organized crime ring or something that is constantly bankrupting our city and state. And to make matters worse I cannot tell if the crisis intervention team that the CYFD so generously provided for me is an ally or an adversary. Which are they I wonder. What I mean is , ok, I e-mailed my sons new principal

and special-ed teacher at [REDACTED] on [REDACTED] which is just down the road from his foster mom and dads, [REDACTED] house, to see if I could have lunch with my child just like I always have in the past. And man I kid you not they were there in like a matter of a few minutes. And Detective [REDACTED] always said she was there to help me in my time of trouble, but it was like she turned on a dime against me or something because she showed up and started throwing her weight around like she was a sumo wrestler or something and stated that if I go there and have lunch with my son she would take me and put me in jail. And my mom will swear that is so, she was there she what happened. So would you please tell the crisis intervention team that they are not needed or something please. They [REDACTED] me. It is like they are CYFD henchmen out to get me. [REDACTED] recently had my son removed from my pharmacist house, why he did this now is beyond my wildest imagination. He offered to give me their address like he was daring me to go kidnap my child or something. They live at [REDACTED] go there and ask them for you self if you don't believe me. She has been my family pharmacist for about 4 years now so we know each other pretty well, she has a great sense of humor. Ask her husband what was causing the water to be grey a few months ago to while you are there too, ok. The cyfd is like a very bad case of the coach roaches or something.

I won my case by default at civil district court but the case is still ongoing at children's court.

Hello, My name is [REDACTED]. My son and I are affiliated with the Choctaw and Crow tribes. We live in Albuquerque NM. I had to go to the MDC on contempt of court charges for 30 days. I had a temporary place for my son lined up, which will be verified by [REDACTED] at pre trial. The principal of [REDACTED] decided that my son should go into CYFD custody instead. The CYFD committed perjury when they told the judge and said I had no place for my child to go while I had to be temporarily incarcerated at the MDC for 30 days. I was awarded 1 hour of supervised visitation with my child. However, after a few months the CYFD agent [REDACTED] decided to (without a hearing on the matter) modify the Judges orders and the visits were terminated. I thought that kind of stuff was illegal. that He then stated that I was banned from the premises and declared that I was now in a state of non compliance. I feel that he was going contrary to the New Mexico religious freedom act and decided to pursue legal recourse at District so I filed a complaint of criminal activities against them (which they failed to respond to) pursuant to 28-22-4 private remedies, which means that they would be held accountable for there crimes against me and my child. Next [REDACTED] then moved the court to terminate my parental rights. I have included a copy of the motion and really hope and pray that you will do something about this menace to our society soon. They are a like an organized crime ring or something that is constantly bankrupting our city and state. And to make matters worse I cannot tell if the crisis intervention team that the CYFD so generously provided for me is an ally or an adversary. Which are they I wonder. What I mean is , ok, I e-mailed my sons new principal and special-ed teacher at [REDACTED] school on [REDACTED] which is just down the road from his foster mom and dads, [REDACTED] house, to see if I could have lunch with my child just like I always have in the past. And man I kid you not they were there in like a matter of a few minutes. And Detective [REDACTED] always said she was there to help me in my time of trouble, but it was like she turned on a dime against me or something because she showed up and started throwing her weight around like she was a sumo wrestler or something and stated that if I go there and have lunch with my son she would take me and put me in jail. And my mom will swear that is so, she was there she what happened. So would you please tell the crisis intervention team that they are not needed or something please. They [REDACTED] me. It is like they are CYFD henchmen out to get me. [REDACTED] recently had my son removed from my pharmacist house, why he did this now is beyond my wildest imagination. He offered to give me their address like he was daring me to go kidnap my child or something. They live at [REDACTED] go there and ask them for you self if you don't believe me. She has been my family pharmacist for about 4 years now so we know each other pretty well, she has a great sense of humor. U.S. Department of the Interior

Dear Friend,

This week, a new public-private partnership between Interior, The North Face, and the band My Morning Jacket, to benefit the next generation of outdoor stewards; Secretary Jewell addresses the National Congress of American Indians in Atlanta; the Secretary also visits the Choctaw elementary and high schools in Mississippi to continue the discussion about transforming Indian education; the Fish and Wildlife Service proposes Endangered Species Act protection for the African lion; USGS scientists say bats face a threatening future from disease; the Bureau of Reclamation makes a fossil find in Idaho that dates back 70,000 years; and the National Park Service unveils 81 energy and water conservation projects in the greater Washington DC area.

Click here to watch this week's episode.

Thanks,

### U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at [interior.bulletinintelligence.com](http://interior.bulletinintelligence.com).

DATE: FRIDAY, OCTOBER 31, 2014 7:00 AM EDT

### TODAY'S TABLE OF CONTENTS

#### DOI IN THE NEWS:

- + Secretary Jewell Visits Choctaw Schools.
- + Maitland Art Center Designated National Historic Landmark.
- + Deal Reportedly Reached To Recognize Native Hawaiians As Indian Tribe.
- + Audit Of Federal Open Data Catalogs Finds Issues With Interior's Data.
- + Review Finds \$20 Billion In Secret Purchases By Federal Agencies In Recent Months.
- + Additional Coverage: Navajo Nation Awarded Funds To Create School Systems.
- + Additional Protections For Wilderness Urged.

#### AMERICA'S GREAT OUTDOORS:

##### *National Park Service:*

- + Graffiti Found In Three More National Parks.
- + NPS Investing In Energy Efficiency, Water Conservation Projects At Washington Area National Parks.
- + New Washington Flood Barrier To Be Tested.
- + All-Sensory Trail In Maryland's Patapsco Valley State Park Opens.

##### *Bureau of Land Management:*

- + Sen. Murkowski Sides With State Of Alaska In ANWR Boundary Dispute.
- + Photographer To Present Artists-in-residence Photos At Anasazi Heritage Center.
- + BLM's Royal Gorge Field Office Seeking Input On Recreation Management.
- + BLM Plans Slash Burning In Grand County Through December.
- + Additional Coverage: Scholars Challenge Legal Basis Of Utah's Public Lands Campaign.
- + BLM Criticized For Failing To Provide Public Records.

##### *Fish and Wildlife Service:*

- + Animal Resembling Gray Wolf Reported At Grand Canyon.
- + Wyoming Gov. Mead Eyes Congressional Action On Wolf Delisting.
- + Scientists Warn Infection That Devastates Amphibians Could Spread To US.
- + Environmentalists File Lawsuit Over Cormorants.
- + Western Energy Alliance Submits Comments On New FWS Rules.
- + FWS Releases Draft Management Plan For James River National Wildlife Refuge.
- + Additional Coverage: FWS Proposes Listing African Lions.
- + Additional Coverage: FWS Seeks Protections For Snapping Turtles.
- + FWS Northeast Regional Director Calls For Stronger Coastal Protections.

##### *US Geological Survey:*

- + Additional Coverage: USGS Monitoring Lava Flow From Hawaii Volcano.

#### SECURING AMERICA'S ENERGY FUTURE:

**Renewable Energy:**

- + South Carolina Eyes Next Steps For Offshore Wind Energy.
- + Wind Project Pulled From California's San Bernardino Mountains.
- + Replacing Safety Netting At Solar Plant Could Have Prevented Bird Deaths.

**Onshore Energy Development:**

- + Interior's IG Report Warns Of Illegal Drilling On Federal Land.
- + Environmentalists Call On BLM's Farmington Field Office To Pause Issuing Drilling Permits.
- + To Help Democrats Keep Senate, Environmentalists Back Candidates Who Oppose Their Goals.
- + New Study Finds High Levels Of Air Toxins At Fracking Sites.
- + Additional Coverage: BLM Releases Environmental Study On ConocoPhillips Project In Alaska.

**Offshore Energy Development:**

- + Questions Raised About Offshore Fracking.
- + Additional Coverage: Shell Seeks More Time To Act On Arctic Leases
- + Obama Administration Urged To Bar Drilling In Arctic Ocean.

**TACKLING AMERICA'S WATER CHALLENGES:**

- + BOR Makes WaterSMART Grants Available.
- + EPA Questions Northwest Area Water Supply Plan.

**EMPOWERING NATIVE AMERICAN COMMUNITIES:**

- + Native Yale Law Students Honor BIA Head Washburn.
- + Casinos Proliferate Under Obama Administration.

**TOP NATIONAL NEWS:**

- + Obama Campaigns For Michaud In Maine Gubernatorial Race.
- + Three GOP Senators Press President To Hold Off On Unilateral Immigration Moves.
- + Economy Grew At 3.5% Rate In Third Quarter.

**EDITORIAL WRAP-UP:**

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

**BIG PICTURE:**

- + Headlines From Today's Front Pages.

**WASHINGTON SCHEDULE:**

- + Today's Events In Washington.

**LAST LAUGHS:**

- + Late Night Political Humor.

**DOI in the News:**

**SECRETARY JEWELL VISITS CHOCTAW SCHOOLS.** The [AP](#) (10/30) reports that Interior Secretary Sally Jewell praised the Choctaw tribal schools in Mississippi during her visit on Wednesday. Jewell said "much of the success of the Choctaw School System can be attributed to the tribe's hands-on approach, with the chief and tribal council virtually serving as the school board." Jewell said, "In many other communities we don't see that. We don't have engagement between tribal leaders and the schools. Sometimes we run the schools. We run them out of Albuquerque, New Mexico or Washington D.C., and the schools may be all the way across the country."

Coverage by the AP was also picked up by the [Washington Times](#) (10/31, 373K), the [Hattiesburg \(MS\) American](#) (10/30, 34K), [KNOE-TV](#) Monroe, LA (10/31, 2K), [WKRQ-TV](#) Mobile, AL (10/31, 37K), [WSFA-TV](#) Montgomery, AL (10/31, 30K), and [WDBD-TV](#) Jackson, MS (10/31, 152K).

**MAITLAND ART CENTER DESIGNATED NATIONAL HISTORIC LANDMARK.** The [ARTFIXdaily](#) (10/30) reports that "the Art & History Museums – Maitland's (A&H's) Mailland Art Center – has become the first

National Historic Landmark in greater Orlando and the 44th in the state of Florida." According to the article, "awarded on September 30, 2014 by Secretary of the Interior Sally Jewell, the designation applies to places that 'exceptionally illustrate or interpret the heritage of the United States.'" The article notes that "an official plaque dedication ceremony at A&H's Maitland Art Center will take place Jan. 8, 2015 at 11:30 a.m. with details to follow."

**DEAL REPORTEDLY REACHED TO RECOGNIZE NATIVE HAWAIIANS AS INDIAN TRIBE.** The Examiner (10/31, 1.01M) reports that "a deal has been reached between the Department of the Interior and the Obama administration to give federal recognition to native Hawaiians as an Indian Tribe." According to Free Hawaii TV, "the deal is an attempt to do an end run around overwhelming native Hawaiian opposition to being recognized as an Indian Tribe."

**AUDIT OF FEDERAL OPEN DATA CATALOGS FINDS ISSUES WITH INTERIOR'S DATA.** The Sunlight Foundation (10/29, 3K) reports that it is "conducting a broad audit of agencies' sometimes-faithful attempts to comply with President Obama's open data executive order from 2013," but "while auditing the Department of the Interior's data catalog," it found that some data was inaccessible.

The Sunlight Foundation (10/30, 3K) reports that "the Department of the Interior's public data catalog is impressive." It notes that "there were 43,940 unique URL entries associated with these datasets, and quite a few of those point to geographic databases." However, "when we checked those URLs, we also found a variety of issues, from items that didn't exist at the provided URL to entries that pointed to local addresses, meaning the datasets are on agency computers rather than the Internet."

**REVIEW FINDS \$20 BILLION IN SECRET PURCHASES BY FEDERAL AGENCIES IN RECENT MONTHS.** WRC-TV Washington (10/31, 367K) reports that a "review of federal agency purchase records shows each major federal agency spends millions of dollars a year on 'micropurchases.'" It notes that the Interior Department "shared details about the 'micropurchase' items bought by their agency employees."

**ADDITIONAL COVERAGE: NAVAJO NATION AWARDED FUNDS TO CREATE SCHOOL SYSTEMS.** Additional coverage that "a \$200,000 check from the Interior Department will help jumpstart the Navajo Nation's efforts to take local control of Bureau of Indian Education-funded schools" was provided by the Navajo Times (AZ) (10/31, 66K).

**ADDITIONAL PROTECTIONS FOR WILDERNESS URGED.** For the "Pundits" blog of The Hill (10/31, Molvar, 241K), Erik Molvar, who directs the Sagebrush Sea Campaign for WildEarth Guardians, writes that "additional wilderness preservation can be an integral part of solving the global biodiversity crisis by anchoring a network of protected reserves." However, he argues that "we need to be designing such networks at the scales of ecosystems and regions, along natural boundaries, rather than the traditional political borders of states, counties and agency jurisdictions." Molvar also notes that "with economic research pointing to greater job and business growth in rural Western counties with the greatest area of protected public lands, the best interests of jobs and the environment have come into alignment."

## **America's Great Outdoors:**

### ***National Park Service:***

**GRAFFITI FOUND IN THREE MORE NATIONAL PARKS.** The AP (10/31) reports that the NPS says "it has found more graffiti in some of the West's most scenic locations in a case that sparked an uproar on social media last week." Rangers say "they've now confirmed images in Joshua Tree in California and at two more Colorado locations, bringing the total number of tagged parks to eight."

Coverage by the AP was also picked up by the Washington Post (10/30, 4.9M), the Charlotte (NC) Observer (10/30, 572K), the Houston Chronicle (10/31, 2.47M), the Denver Post (10/31, 1.12M), the Salem (OR) Statesman Journal (10/30, 23K), Yahoo! Finance (10/31, 9.7M), WJBK-TV Detroit (10/31, 166K), KCNC-TV Denver (10/30, 74K), and KTVZ-TV Bend, OR (10/31, 1K).

Also reporting on the story is the Denver Post (10/31, Cotton, 1.12M).

Additional coverage of identification of the suspect was provided by Reuters (10/31, Gorman), the Deseret (UT) News (10/31, 538K), the Bend (OR) Bulletin (10/31, 94K), KSL-TV Salt Lake City (10/31, 1.07M), and WDIV-TV

Detroit (10/31, 172K).

**NPS INVESTING IN ENERGY EFFICIENCY, WATER CONSERVATION PROJECTS AT WASHINGTON AREA NATIONAL PARKS.** The National Journal (10/31, Subscription Publication, 626K) reports that the NPS is "investing \$29 million in 81 individual energy efficiency and water conservation projects at national parks throughout the greater Washington region." According to the article, "the 23-year Energy Savings Performance Contract (ESPC) awarded at the end of September to Siemens Government Technologies, will allow the NPS to conserve energy and water with no upfront costs and to accrue cost savings into the future." NPS Director Jonathan B. Jarvis said, "The National Park Service is committed to managing the future health and sustainability of our national parks proactively through this kind of ambitious energy and resource conservation program. The parks in the greater Washington region involved in this effort are demonstrating the kind of leadership that other parks and public lands across the country can follow to reduce our carbon footprint, energy consumption, and water usage."

**NEW WASHINGTON FLOOD BARRIER TO BE TESTED.** The Washington Post (10/30, Ruane, 4.9M) reports that "Washington's long-delayed 17th Street flood barrier is scheduled to be tested Friday when officials from the Army and the National Park Service install the metal apparatus across 17th Street, near Constitution Avenue." According to the article, "the temporary barrier is designed to block floodwaters surging north from the Tidal Basin and flowing into downtown Washington." The test is intended "to demonstrate how the post-and-panel barrier is put in place."

**ALL-SENSORY TRAIL IN MARYLAND'S PATAPSCO VALLEY STATE PARK OPENS.** The Baltimore Sun (10/29, 857K) reports that "the first All-Sensory Trail in Maryland state parks officially opened Oct. 16." According to the article, "located in the Hilton Area of Patapsco Valley State Park, it is designed for the visually impaired." The All-Sensory Trail is a partnership between the state Department of Natural Resources and the NPS.

***Bureau of Land Management:***

**SEN. MURKOWSKI SIDES WITH STATE OF ALASKA IN ANWR BOUNDARY DISPUTE.** The National Journal (10/31, Subscription Publication, 626K) reports that Sen. Lisa Murkowski is backing "a request from Alaska Gov. Sean Parnell that the federal government convey roughly 20,000 acres on the western boundary of the Arctic National Wildlife Refuge (ANWR) to the state." In a letter to Interior Secretary Sally Jewell, Murkowski urged the BLM "to quickly respond to the state's request for priority conveyance under the Alaska Statehood Act and the Alaska National Interest Lands Conservation Act (ANILCA)." Murkowski wrote, "This issue centers on what waters are considered part of the Canning River, which has long been designated and reaffirmed as the western boundary of the Arctic coastal plain. The state believes that the US Fish and Wildlife Service has effectively re-designated the separate Staines River, which empties into the Beaufort Sea several miles west of the Canning River, as a channel of the Canning, thereby shifting nearly 20,000 acres of the coastal plain lying between the streams into the refuge."

**PHOTOGRAPHER TO PRESENT ARTISTS-IN-RESIDENCE PHOTOS AT ANASAZI HERITAGE CENTER.** The Cortez (CO) Journal (10/30, 646) reports that "photographer Wayne Keene took on the challenge of capturing the sacred landscapes of Canyons of the Ancients National Monument through the lens of his camera as an artist-in-residence for the Bureau of Land Management." On Sunday, Nov. 2, Keene will "showcase these images during a multimedia presentation at the Anasazi Heritage Center in Dolores at 1 p.m." according to the article. "Keene's images, in black and white as well as color, capture the rustic landscapes of the monument while weaving elements of the archeological resources into many of the scenes." Marietta Eaton, Canyons of the Ancients National Monument/Anasazi Heritage Center Manager, said, "His keen eye for capturing lighting reveals the distinct contrasts between the landscape and the skyline. We're excited to share the images he captured with the public."

**BLM'S ROYAL GORGE FIELD OFFICE SEEKING INPUT ON RECREATION MANAGEMENT.** The Pueblo (CO) Chieftain (10/31, 79K) reports that the BLM's Royal Gorge Field Office is "seeking input on recreation management in the area and will host several focus group meetings."

**BLM PLANS SLASH BURNING IN GRAND COUNTY THROUGH DECEMBER.** The Sky-Hi Daily News (CO) (10/31, 728) reports that the BLM Kremmling Field Office is "planning to burn slash piles of lodgepole pine early November through December if weather conditions are favorable."

**ADDITIONAL COVERAGE: SCHOLARS CHALLENGE LEGAL BASIS OF UTAH'S PUBLIC LANDS**

**CAMPAIGN.** Additional coverage that "a new legal analysis asserts a successful Utah effort to claim federal land would fuel similar efforts among Western states and potentially end the public land system as it exists today, but it isn't likely to happen" was provided by the Deseret (UT) News (10/31, 538K) and KNRS-FM Salt Lake City (10/31).

**BLM CRITICIZED FOR FAILING TO PROVIDE PUBLIC RECORDS.** In an op-ed for the High Country (CO) News (10/31, 74K), Ray Ring writes that the BLM's "main Freedom of Information Act office appears incompetent or overworked." According to Ring, "its response to our request for public records can only be described as dysfunctional." He encourages "the head of the BLM, Neil Komze, and his boss, Interior Secretary Sally Jewell, to fix the problems in the BLM's FOIA office."

***Fish and Wildlife Service:***

**ANIMAL RESEMBLING GRAY WOLF REPORTED AT GRAND CANYON.** The AP (10/31, Fonseca) reports that "an animal resembling a gray wolf has been spotted roaming the far reaches of northern Arizona, officials said Thursday, and tests are planned to determine exactly what it is." According to the FWS, "the animal has been seen and photographed in Kaibab National Forest north of Grand Canyon National Park with a collar similar to those used in a wolf recovery effort in the Northern Rockies." Agency spokesman Jeff Humphrey said that "the animal could be from that population of about 1,700 or a wolf-dog hybrid." Humphrey said "the animal should be treated as endangered until more is known about it."

Coverage by the AP was also picked up by the Inside Bay Area (CA) (10/31, 4K).

Also reporting on the story are Reuters (10/31), the Arizona Republic (10/31, 1.21M), the Tucson (AZ) Daily News (10/31), and the Cronkite News (10/31).

**WYOMING GOV. MEAD EYES CONGRESSIONAL ACTION ON WOLF DELISTING.** The AP (10/31, Neary) reports that "Congressional action appears to offer Wyoming its best chance at regaining state management of wolves, Gov. Matt Mead said Thursday." He said "Wyoming's best chance at regaining wolf management authority appears to be seeking congressional action specifying its wolf plan wouldn't be challenged legally." Mead said "his administration is still considering whether to appeal .S. District Judge Amy Berman's order."

Coverage by the AP was also picked up by the Washington Times (10/31, Neary, 373K).

**SCIENTISTS WARN INFECTION THAT DEVASTATES AMPHIBIANS COULD SPREAD TO US.** The New York Times (10/31, Gorman, Subscription Publication, 9.9M) reports that "an emerging infection similar to one that has caused the extinction of hundreds of frog and toad species around the world is killing salamanders in Europe and could easily spread to the United States, with disastrous effects, scientists reported Thursday." According to the article, "writing in the journal Science, an international team of 27 researchers blamed the spread of the disease on 'globalization and a lack of biosecurity' and said the importation of the fire-bellied newt in the pet trade with Asia was the likely cause." The article notes that "Karen R. Lips at the University of Maryland, one of the authors of the Science paper, met on Thursday with Fish and Wildlife Service officials to talk about the new fungus."

**ENVIRONMENTALISTS FILE LAWSUIT OVER CORMORANTS.** The Courthouse News (10/30, 7K) reports that "environmentalists say there is no scientific basis for the extension of US Fish and Wildlife's 'shoot-on-sight' order that has permitted the killing of an estimated half million double-crested cormorants in the last 10 years." The group "Public Employees for Environmental Responsibility (PEER), and five biologists and birders sued the US Fish and Wildlife Service (FWS), and Director Dan Ashe in federal court." The complaint claims that the FWS "re-authorized the killing of tens of thousands of double-crested cormorants without conducting a proper environmental assessment."

**WESTERN ENERGY ALLIANCE SUBMITS COMMENTS ON NEW FWS RULES.** The Farmington (NM) Daily Times (10/31, 47K) reports that "the Western Energy Alliance submitted formal comments to the Fish and Wildlife Service about changes expected to increase protections for critical wildlife habitats." According to the article, "the organization submitted comments about two rules and one policy 'that would considerably expand the Endangered Species Act (ESA) beyond congressional intent and assert new federal powers to control land and economic activity.'"

**FWS RELEASES DRAFT MANAGEMENT PLAN FOR JAMES RIVER NATIONAL WILDLIFE REFUGE.**

The [AmmoLand](#) (10/31, 4K) reports that the FWS has "released a draft plan to guide management of the James River National Wildlife Refuge (NWR) for the next 15 years." Alternative B, the agency's preferred alternative, would "pursue Service administrative requirements to expand public deer hunting, open the refuge to spring and fall turkey hunting, open the refuge to limited waterfowl hunting by youth, and promote youth involvement in all hunting opportunities."

**ADDITIONAL COVERAGE: FWS PROPOSES LISTING AFRICAN LIONS.** Additional coverage that the FWS is "seeking to enhance protections for the African lion" was provided by the [AllAfrica](#) (10/31, 12K), the [Hagerstown \(MD\) Herald-Mail Media](#) (10/31), and the [Somerset County \(PA\) Daily American](#) (10/31, 40K).

**ADDITIONAL COVERAGE: FWS SEEKS PROTECTIONS FOR SNAPPING TURTLES.** Additional coverage of the proposal by the FWS to place four kinds of freshwater turtle under the protection of the Convention on International Trade in Endangered Species of Wild Fauna and Flora was provided by [Reuters](#) (10/31, Liston).

**FWS NORTHEAST REGIONAL DIRECTOR CALLS FOR STRONGER COASTAL PROTECTIONS.** For "The Blog" of the [Huffington Post](#) (10/31, Weber, 11.54M), Wendi Weber, Northeast Regional Director for the FWS, writes that for wildlife resource managers, Hurricane Sandy was "a wake-up call to the vulnerability of the beaches, sand dunes, and coastal marshes that not only provide habitat for fish and wildlife but also protect local communities from flooding." According to Weber, "in the aftermath of Sandy, we have an unprecedented opportunity to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms." Weber is "confident the long-term benefits of building a stronger coast will far outweigh initial costs when it comes to protecting communities, sustaining wildlife and lessening the financial impact of damages resulting from future intense storms."

***US Geological Survey:***

**ADDITIONAL COVERAGE: USGS MONITORING LAVA FLOW FROM HAWAII VOLCANO.** coverage of the lava flow from a Hawaii volcano was provided by [CNN](#) (10/30, 14.29M), the [Salt Lake \(UT\) Tribune](#) (10/31, 479K), [TIME](#) (10/31, 23.35M), the [Christian Science Monitor](#) (10/30, 426K), the [Christian Science Monitor](#) (10/30, 426K), and [WDIV-TV Detroit](#) (10/31, 172K).

**Securing America's Energy Future:*****Renewable Energy:***

**SOUTH CAROLINA EYES NEXT STEPS FOR OFFSHORE WIND ENERGY.** The [AP](#) (10/31) reports that "a new study and a proposed law are seen as the next steps in making offshore wind energy a reality in South Carolina." Paul Gayes with the Center for Marine and Wetland Studies at Coastal Carolina University says "the state will match a \$750,000 federal grant to study which areas offshore are the most promising for wind farms." The federal money comes from the BOEM. Meanwhile, Sen. Greg Hembree "plans to reintroduce a bill allowing utilities who want to build demonstration wind projects to apply for rate increases to pay for them."

Coverage by the AP was also picked up by the [Charlotte \(NC\) Observer](#) (10/30, 572K), the [Houston Chronicle](#) (10/31, 2.47M), the [Greenfield \(IN\) Daily Reporter](#) (10/31, 31K), the [Florence \(SC\) Morning News](#) (10/31, 87K), and [WJCL-TV Savannah, GA](#) (10/30, 2K).

**WIND PROJECT PULLED FROM CALIFORNIA'S SAN BERNARDINO MOUNTAINS.** [KCEI-TV](#) Los Angeles (10/31, 15K) reports that "a proposal that would have placed 71 wind turbines on the north slope of the San Bernardino Mountains has been withdrawn by its owner, according to the Bureau of Land Management." According to the article, "the 126-megawatt North Peak Wind project, which would have occupied about 16 square miles of the Juniper Flats area between Lucerne Valley and Apple Valley in San Bernardino County, was pulled from consideration by the BLM by its Austin-based owner E.ON Climate and Renewables last Friday." The article notes that "the project had drawn fierce opposition, including from two San Bernardino County supervisors who blasted North Peak Wind's possible impact on wildlife."

**REPLACING SAFETY NETTING AT SOLAR PLANT COULD HAVE PREVENTED BIRD DEATHS.** The [Riverside \(CA\) Press Enterprise](#) (10/30, Danelski, 396K) reports that the death of 64 birds at the NextEra Energy's Genesis solar plant earlier this month "could have been prevented had safety netting been replaced"

after an August thunderstorm, according to officials with the California Energy Commission. The birds died "after getting mired in an oily chemical in the plant's waste-water evaporation ponds," according to the U.S. Fish and Wildlife Service. The ponds "are being drained," according to the FWS, which is overseeing an investigation to determine "whether the company 'took reasonable measures' to protect the birds."

### ***Onshore Energy Development:***

**INTERIOR'S IG REPORT WARNS OF ILLEGAL DRILLING ON FEDERAL LAND.** The High Country (CO) News (10/31, 74K) reports that "a recent report from the Interior Department's inspector general highlighted the problem of illegal drilling on federal lands." The report, released late last month, "found that the increase in horizontal drilling means it's easier than ever for oil and gas companies to operate – inadvertently or not – in areas for which they don't have permission to drill." The article notes that "the unauthorized drilling means the government is losing out on royalty payments, and poses environmental risks." According to the report, the BLM has "a 'weak' policy for deterring lawbreakers and no reliable way of catching operators who drill illegally."

**ENVIRONMENTALISTS CALL ON BLM'S FARMINGTON FIELD OFFICE TO PAUSE ISSUING DRILLING PERMITS.** The Farmington (NM) Daily Times (10/31, 47K) reports that officials with the BLM say "they will organize an internal committee to respond to a letter from environmentalists that calls for the bureau to stop issuing oil and gas drilling permits until an environmental analysis is complete." The San Juan Citizens Alliance, the Chaco Alliance, WildEarth Guardians and the Western Environmental Law Center "sent a 34-page letter to the bureau on Monday outlining issues with BLM's Farmington Field Office and its approval of Mancos Shale drilling permits." A BLM spokeswoman, Donna Hummel, said the bureau "received the letter and will draft a formal response to its demands."

**TO HELP DEMOCRATS KEEP SENATE, ENVIRONMENTALISTS BACK CANDIDATES WHO OPPOSE THEIR GOALS.** The Wall Street Journal (10/31, Harder, Reinhard, Subscription Publication, 5.62M) reports that in an effort to maintain Democratic control of the Senate, environmental groups are spending a record amount of money this year and are supporting Democrats who oppose some of their key goals, including blocking the Keystone XL pipeline and ending the practice of fracking for oil and natural gas.

**NEW STUDY FINDS HIGH LEVELS OF AIR TOXINS AT FRACKING SITES.** NPR (10/30, Phillips, 2.22M) reports that a new study reveals "dangerous levels of air toxins near fracking operations," particularly the carcinogen formaldehyde in levels that exceeded federal safety levels. The study, published Thursday in the journal *Environmental Health*, also found high levels of the "deadly chemical hydrogen sulfide," which is known to kill oil field workers. It is noted that a 2010 air monitoring study by the Department of Environment did not find dangerous levels of air toxins at fracking sites, which has spurred industry groups to "question the methodology used in this most recent report."

The Albany (NY) Times Union (10/31, Nearing, 465K) reports that toxins from air and gas sites surrounding fracking sites are "much more dangerous" than threats of water pollution, according to the study's lead author, David Carpenter. As a result of the study's findings, Carpenter recommended that "buffer zones around natural gas wells... need to be expanded."

**ADDITIONAL COVERAGE: BLM RELEASES ENVIRONMENTAL STUDY ON CONOCOPHILLIPS PROJECT IN ALASKA.** Additional coverage that the BLM "released its final supplemental environmental impact statement for the proposed Greater Mooses Tooth (GMT1) oil and gas project within the National Petroleum Reserve-Alaska" was provided by the Oil and Gas Journal (10/31, 1K) and the Summit County (CO) Citizens Voice (10/30, 506).

### ***Offshore Energy Development:***

**QUESTIONS RAISED ABOUT OFFSHORE FRACKING.** WWL-TV New Orleans (10/31, 107K) reports that "fracking is also expanding offshore, in the Gulf of Mexico, with hardly anyone noticing." However, "there are questions...about how well the procedures are being tracked by regulators." According to the article, "environmental nonprofits complain that they can't find out when and where acids and other fracking chemicals are being shot down into the bottom of Gulf wells." In response to a request from the station, the BSEE "reported that 115 Gulf oil or gas wells, or 15 percent of the 785 that were completed and prepared for production in 2013, employed a hydraulic fracturing technique known as a frac pack – the less-destructive of two fracking methods used offshore." BSEE spokeswoman Eileen Angelico said that "frac packs account for the vast majority of the offshore fracking work, but the agency could not provide any data for other types of fracking or

well-stimulation."

**ADDITIONAL COVERAGE: SHELL SEEKS MORE TIME TO ACT ON ARCTIC LEASES.** Additional coverage that Shell is asking the Obama Administration for five more years to explore for oil off Alaska's coast was provided by [Bloomberg BusinessWeek](#) (10/30, 2.52M) and [Bloomberg News](#) (10/30, Ward, 1.94M).

**OBAMA ADMINISTRATION URGED TO BAR DRILLING IN ARCTIC OCEAN.** For the "Congress" blog of [The Hill](#) (10/31, Ritzman, 241K), Dan Ritzman, Alaska Program director for Sierra Club's Our Wild America campaign, writes that "in the US, the Obama administration has done more than any previous administration to reduce emissions, improving fuel economy, investing in clean, renewable energy, and working to set the first-ever carbon pollution standards for dirty power plants." However, he notes that "even as the administration is reducing carbon pollution, it continues to advance an 'all-of-the-above' energy plan that promotes greater fossil fuel production, exporting these polluting fuels abroad, and opening up millions of acres of our nation's most treasured lands and waters to dirty fuel extraction." According to Ritzman, as the administration "reconsiders leasing in the Chukchi Sea and develops its next five-year offshore leasing plan," it has "the opportunity to put the Arctic Ocean off-limits to oil and gas drilling."

## Tackling America's Water Challenges:

**BOR MAKES WATERSMART GRANTS AVAILABLE.** The [WaterWorld](#) (10/31, 96) reports that the BOR is "inviting states, tribes, water and irrigation districts, and other organizations with water or power delivery to apply for a funding opportunity to cost-share on projects that conserve and use water more efficiently, increase renewable energy use and improve energy efficiency."

**EPA QUESTIONS NORTHWEST AREA WATER SUPPLY PLAN.** [KXMC-TV](#) Minot, ND (10/31, 1K) reports that the EPA has "come out against a proposal for getting the Northwest Area Water Supply project finished." The agency "supplied comments this week saying it is not in support of the Bureau of Reclamation's plan for treating water from the Missouri River that will be used to supply NAWA with water."

## Empowering Native American Communities:

**NATIVE YALE LAW STUDENTS HONOR BIA HEAD WASHBURN.** For the [Indian Country Today Media Network](#) (10/30, 78K), attorney Peter d'Errico writes that "the Native American Law Students Association at Yale Law School held its first ever Alumni Achievement Awards Dinner October 23, 2014." He notes that "the recipient, Kevin Washburn (Chickasaw), class of 1993, is Assistant Secretary for Indian Affairs at the US Department of the Interior." In his piece, d'Errico explains why "Washburn well deserves the honor of receiving the Alumni Achievement Award."

**CASINOS PROLIFERATE UNDER OBAMA ADMINISTRATION.** The [Weekly Standard](#) (10/31, 519K) reports that the Obama Administration has "consciously made it easier for tribes to acquire the right to operate a casino on land far removed from their reservation." The article also notes that "since 1988, the Interior Department has approved 51 percent of applications to allow gaming on trust land. A third of those have been approved by the Obama administration."

## Top National News:

**OBAMA CAMPAIGNS FOR MICHAUD IN MAINE GUBERNATORIAL RACE.** Most reports on the President's visit to Maine, where he reportedly sought to energize the Democratic base by focusing on so-called pocketbook issues and cited evidence of recent improvements in the economy, focus on Obama's apparent unpopularity and his relatively limited campaign schedule, with Democrats cast as seeking to distance themselves from him and his policies. The President's trip was not mentioned on the network newscasts.

The Portland (ME) Press Herald (10/31, 140K) notes that the President's visit, as well as trips to the state by "other prominent Democrats, are designed more to motivate the Democratic base and ensure they show up on Election Day than to sway independent voters," adding that in a recent poll commissioned by the Portland Press Herald, "Obama's approval rating in Maine is just 39 percent," but "among voters who identified as Democrats, the president's approval rating was 75 percent." Similarly, the AP (10/31, Durkin) reports that Maine Democrats are hoping the President's visit "will energize their base and get supporters to get out and vote to unseat Republican Gov. Paul LePage." The President called on the approximately 3,000 [Mike] Michaud supporters in

attendance to "get everyone they know to the polls on Tuesday, saying the election is 'too important to stay home.'"

The Washington Post (10/30, Mufson, 4.9M) reported in its "Post Politics" blog that the President noted that "the last election was decided by an average of just 18 votes per precinct, and urged the avid Michaud supporters to bring others to the polls with them." Michaud campaign spokeswoman Lizzy Reinholt said that the President could help turn out "the voters most supportive of Michaud – seniors, women and young people," noting, "We are at a dead heat with Gov. LePage, and the outcome will be determined by who comes out for this election."

The Washington Times (10/31, Wolfgang, 373K) focuses on the President's criticism of Republicans, noting that he said that "he has no personal issues with Republicans — in fact, he said they're a lot like his own family members who simply 'have bad ideas' and aren't fit to be 'in charge.'" Arguing that Republican "economic principles have been tried and have failed," the President "urged voters to reject the GOP philosophy toward the economy and put Democrats in charge at both the state and federal levels."

The Bangor (ME) Daily News (10/31, Cousins, 166K) reports that while the President's visit "is sure to energize partisan Democrats...to some degree it gives Republicans a rallying point as well," given his "sinking national and state approval ratings."

Bloomberg News (10/31, Keane, 1.94M) reports that while the President has been "mostly limiting himself to raising money for Democratic candidates in the Nov. 4 midterm elections," he is "making a last-ditch effort five days before the mid-term elections to prod voters to the polls." However, with "an approval rating at 43 percent, according to the Gallup Poll, Obama is only scheduled to make one appearance before election day on behalf of a congressional candidate."

The New York Times (10/31, Davis, Subscription Publication, 9.9M) reports that the President is seeking to "shift the public focus from his administration's handling of the Ebola crisis to pocketbook issues that his advisers said play to Democrats' advantage," but "world events were...threatening to drown out his closing arguments in the campaign." Reuters (10/31, Holland) reports that in an effort to blunt Democratic losses next week, the President cited new government figures showing that the economy grew at a rate of 3.5 percent in the third quarter as an indication that his policies are working and that middle class will benefit from electing Democrats. Reuters notes however, that the case he made may not be enough to convince voters who have voiced concerns about his leadership, adding that his approval rating of about 40 percent has kept him away from states where control of the Senate will be determined.

The New York Times (10/31, Davis, Subscription Publication, 9.9M) also notes that the President's "itinerary keeps him far from the main battlegrounds of this year's elections as Democrats fight to keep Senate seats in competitive states Mr. Obama carried — like Iowa, North Carolina and Colorado — and in Republican-leaning places he lost, including Alaska and Louisiana."

Likewise, USA Today (10/31, Jackson, 9.86M) reports that while the Maine stop was "the latest in a string of appearances on behalf of gubernatorial candidates," as Democrats battle for control of the Senate, he "is currently scheduled to appear with only one Senate candidate: Gary Peters, the Democratic nominee in Michigan." The Los Angeles Times (10/31, Lauter, 4M) also contrasts the President's appearances in gubernatorial races in several battleground states with "the races for the Senate, most of which are taking place in conservative states where the president is deeply unpopular."

The Hill (10/30, Sink, 241K) noted in its "Ballot Box" blog that the President "said he was "a little wistful" that this would be his last time working to rally voters as president," and described the comment as "telling for a president who has been largely sidelined during the 2014 campaign cycle." The Hill added that the President's campaign schedule "is a reflection of his perceived liability for Democratic candidates, many of whom have openly sought distance from the president as his approval ratings have steadily eroded throughout the year."

McClatchy (10/30, Lightman, Subscription Publication, 27K) reports that during a Politico Playbook lunch Thursday, NRSC executive director Rob Collins said the President has been "the best surrogate" for Republican candidates in this election cycle. McClatchy added that to win control of the Senate, Republicans need a net gain of six seats, and the President's "sagging popularity has been a big boost." Collins and DSCC executive director Guy Cecil, who appeared with him at the lunch, "agreed...that a lot of races are too close to call."

**Todd: Democrats Are Running Toward The Clintons This Year.** Chuck Todd reported on NBC Nightly News (10/30, story 6, 1:50, Williams, 7.86M) that whatever the result of Tuesday's election "the Democratic Party is

going to be leaving Barack Obama behind and is about to become the party of the Clintons again, because that [is] who all of these Democrats are running toward this election year, Bill Clinton and Hillary Clinton."

**Tapper Calls Obama An "Albatross" For Democrats.** The Daily Caller (10/30, Weaver, 475K) reported that in an interview with conservative radio host Laura Ingraham Thursday, CNN host Jake Tapper described the President as an "albatross" for Democrats in the final days before the midterm election. Taper said that the President is "very unpopular. He's an albatross on Democrats. No question."

**Landrieu: South Is A Tough Place For Obama To Campaign This Year.** In a report on the Louisiana Senate race on NBC Nightly News (10/30, story 6, 1:50, Williams, 7.86M), Chuck Todd noted that while he has not been doing a great deal of campaigning in this election cycle, "the most omnipresent person on the campaign trail" is the President, who Republicans see as the issue that "will get them control of the US Senate." That dynamic is "more acute here in the South and it was something that Democratic Senator Mary Landrieu told me has more to do than his policies." Landrieu: "To be very, very honest with you, the South has not always the friendliest place for African-Americans. It's been a difficult time for the President to present himself in a positive light as a leader."

**Rothenberg: Obama Likely To See Worst Losses For Incumbent Since Truman.** In a blog post for Roll Call (10/30, 90K), Stuart Rothenberg wrote that the President "is likely to have the worst midterm numbers of any two-term president going back to Democrat Harry S. Truman." Rothenberg added that the President is "at least partially to blame" for the losses "because he failed to show leadership on key issues and never successfully moved to the political center."

**Obama's Closed-Door Fundraisers Draw Criticism.** The Washington Times (10/31, Wolfgang, 373K) reports that the President's appearances at party fundraisers in this election cycle have frequently been "held in secret and away from the view of the press," noting that before his appearance for Michaud, he "spoke at a closed-door 'roundtable' for the Democratic National Committee, an event that essentially is a fundraiser with a different title." According to the Sunlight Foundation, about half of the 64 fundraisers the President has headlined this year "have been entirely closed to the press." Critics say the closed-door fundraisers "are just one example of...an unacceptable level of secrecy and censorship from the Obama White House."

### **THREE GOP SENATORS PRESS PRESIDENT TO HOLD OFF ON UNILATERAL IMMIGRATION MOVES.**

The AP (10/31, Cassata) reports that on Thursday, GOP Sens. Lindsey Graham, John McCain and Marco Rubio, who were "responsible for comprehensive immigration legislation," urged the President in a letter to "hold off on any steps to shield millions of people from deportation." They wrote, "Acting by executive order on an issue of this magnitude would be the most divisive action you could take – completely undermining any good-faith effort to meaningfully address this important issue, which would be a disservice to the needs of the American people."

Politico (10/30, Kim, 977K) reported that the three "also questioned whether Obama had the legal authority to take such a wide-scale executive action." They wrote, "In this regard, acting by executive order on an issue of this magnitude would be the most divisive action you could take — completely undermining any good-faith effort to meaningfully address this important issue, which would be a disservice to the needs of the American people."

The Washington Times (10/31, Dinan, 373K) reports that the bill the three senators wrote "as part of the Gang of Eight senators would have granted quick legal status to most of the estimated 12 million illegal immigrants, with an eventual chance at citizenship." Obama "has repeatedly vowed to take unilateral action halting more deportations — but has delayed each time, under political pressure."

Meanwhile, The Hill (10/30, Lillis, 241K) reported that looking to "energize" Hispanic voters ahead of the elections, House Democrats "are making the case for bold executive action on immigration reform" but the message, rolled out on Univision.com on Thursday, "appears to be aimed as much at President Obama as it is the readers of the popular Spanish-language website."

**Grassley Questions Expensive Housing For Unaccompanied Minors.** The Washington Times (10/31, Dinan, 373K) reports that a contractor housing some of the unaccompanied minors from this summer "offers them a petting zoo with miniature ponies, a tilapia fish farm operation and guitar lessons," according to documents released Thursday by Sen. Chuck Grassley. He has "questioned whether the plush accommodations were a good use of taxpayers' money." In a letter to HHS Secretary Sylvia Burwell, Grassley wrote, "It is disturbing that HHS is funding such expensive facilities despite claiming to be unable to meet basic needs for UACs."

**Kerlikowske Looks To Reform CBP.** USA Today (10/31, Gomez, 9.86M) reports that CBP Commissioner Gil Kerlikowske "is trying to get his agency back on track amid controversies that range from deadly shootings by agents to the handling of children flooding across the border from Central America." He has "changed rules that govern when agents can use deadly force, created a new review system to investigate abuses, and is pushing to get body cameras on all agents." In an interview with the paper, Kerlikowske "said those measures attempt to reverse what had become an institutional practice of secrecy when faced with questions from outside."

In a nearly-10,000 word piece for Politico Magazine (10/30, 6.67M), Garret M. Graff traces the rapid growth of Customs and Border Patrol since 9/11. He says that it has "become one of the nation's deadliest law enforcement agencies" during that time. He adds that "corruption and excessive force have also skyrocketed along with the massive hiring surge." Despite this, the agency's "response has been paralyzed by bureaucratic turf battles and the broken Senate confirmation process, which left CBP without a Senate-confirmed leader for five years." CBP "officials admitted during an internal meeting this past spring, that might take a generation to fix."

**ECONOMY GREW AT 3.5% RATE IN THIRD QUARTER.** The New York Times (10/31, Cohen, Subscription Publication, 9.9M) reports that the US GDP rose at a 3.5% annual rate during the 3rd quarter, according to data released Thursday by the Department of Commerce, "offering a strong sign that the economy's plodding growth may be picking up speed." The growth "was driven in part by an unusual spurt of federal spending, concentrated in defense, combined with robust exports and investment in business equipment."

The CBS Evening News (10/30, story 6, 0:20, Pelley, 5.08M) reported, "Good news tonight on the economy" as the government said the GDP grew 3.5 percent during the 3rd quarter. That is "stronger than economists were expecting, but still a little bit slower than the 4.6 percent rate in the 2nd quarter."

Bloomberg News (10/31, Stilwell, 1.94M) says that the Q3 figure, was above economists' expectations of a 3.0 percent increase. Following the 2nd quarter's 4.6 percent rate, it caps the economy's "strongest six months in more than a decade, as gains in government spending and a shrinking trade deficit made up for a slowdown in household purchases."

USA Today (10/31, Davidson, 9.86M) reports that together, "the second and third quarters produced the best six-month stretch for the economy since 2013" and "growth has now exceeded 3% in four of the past five quarters." However, "after including the disappointing first quarter, the economy has expanded just 2% so far this year, in line with its performance for most of the 5-year-old recovery."

The Wall Street Journal (10/31, Timiraos, Morath, Subscription Publication, 5.62M) generally hails the new data as good news, but said that it suggests that there are questions about whether the strong growth can be maintained in the 4th quarter.

The Christian Science Monitor (10/30, Trumbull, 426K) reported that the GDP figure is "a sign of progress against a backdrop of concerns about slow wage growth and difficulties for the wider global economy." The CSM says that the number is also "significant because it's the final overview of the economy to come out before Americans cast ballots in elections next Tuesday."

The Los Angeles Times (10/31, Lee, 4M) reports that the economy's "resilience will be tested in the coming months." While the new report "was clearly positive," economists "at the moment see GDP growth in the last three months of the year coming in at less than 3%." The Times says that if "contributions from government spending and net exports" to the GDP "fade in the near term" from their strong Q3 levels, "that leaves consumers and businesses to pick up the slack, and their ability to do so are question marks at the moment."

In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that the US economy remains resilient despite the heavy burdens imposed by the government. While the Journal hails the GDP numbers, it says that the Commerce report showed that private business investment remained muted, and for it to rise, Washington needs to reform.

**Stocks Up On GDP Report, Strong Corporate Earnings.** The AP (10/31) reports that the stock market climbed on Thursday "as investors were encouraged by better than expected economic growth and strong corporate earnings." The Dow Jones Industrial Average "surged" 221.11 points to 17,195.42, while the S&P 500 was up 12.35 points to 1,994.65. The Nasdaq Composite Index climbed 16.91 points to 4,566.14.

## **Editorial Wrap-Up:**

**NEW YORK TIMES. "The Prospect Of A Republican Senate."** In an editorial, the New York Times (10/31, Subscription Publication, 9.9M) says that the intraparty flare-up regarding Senate Minority Leader Mitch McConnell's suggestion that the ACA is unlikely to be repealed are a "pretty good indication of what life will be like in Congress" if the GOP takes the Senate. The Times says its not just that Republicans are "committed to time-wasting, obstructionist promises like repeal of health care reform," but that the party's leaders "have continually proved unable to resist pressure from the radical right."

**"Tunisia's Victory."** The New York Times (10/31, Subscription Publication, 9.9M) editorializes that while Tunisia "has made impressive progress," it requires "enlightened, constructive leaders and support from the West to continue" its path to a successful democracy.

**"Governor Cuomo's Power Play."** In an editorial, the New York Times (10/31, Subscription Publication, 9.9M) says that in response to the Long Island Power Authority's poor performance in the wake of Hurricane Sandy, Gov. Andrew Cuomo created a commission to improve the situation. However, "even before the commission got to work, it was clear that Mr. Cuomo was largely responsible for LIPA's failings, since he did not fill vacant positions on LIPA's board or appoint a permanent chief executive." With new reforms in place, Cuomo "can take some credit if the new hybrid arrangement works," but "must also accept responsibility for LIPA's failures if it doesn't."

**WASHINGTON POST. "Looking At You, Mr. Kim."** The Washington Post (10/31, 4.9M) editorializes that "no amount of damage control by North Korea" should prevent the UN Security Council from voting on the country's referral to the International Criminal Court for human rights abuses. The Post says "there is no justification for inaction."

**"Hitting The Snooze Button."**

**"For Arlington County."**

**WALL STREET JOURNAL. "Hillary Rodham Warren."** In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that Hillary Clinton's botched comments last week about businesses not creating jobs is a sign that she is tracking her party's sharp move to the left on economic issues. However, the Journal says that Clinton will have to work hard to gloss over the relatively pro-business record amassed by her husband during his time in office.

**"Obama Belittles Israel."** The Wall Street Journal (10/31, Subscription Publication, 5.62M) editorializes the Obama Administration's public embarrassing of Israeli Prime Minister Benjamin Netanyahu and Israeli Defense Minister Moshe Yaalon during the past week only serves to create further distance between the US and Israel and jeopardize the countries' relationship.

**"An Economy On The Verge."** In an editorial, the Wall Street Journal (10/31, Subscription Publication, 5.62M) says that the US economy remains resilient despite the heavy burdens imposed by the government. While the Journal hails the GDP numbers, it says that the Commerce report showed that private business investment remained muted, and for it to rise, Washington needs to reform.

**"David Cameron's Moral."** An editorial in the Wall Street Journal (10/31, Subscription Publication, 5.62M) praises British Prime Minister David Cameron for advocating tax cuts to promote work as opposed to raising taxes to increase welfare.

**"Beijing Loses Friends On Hong Kong."** An editorial in the Wall Street Journal (10/31, Subscription Publication, 5.62M) urges China to compromise with Hong Kong's pro-democracy movement, saying the current situation will make it impossible for Hong Kong Chief Executive Leung Chun-ying to govern the territory.

## **Washington Schedule:**

### **TODAY'S EVENTS IN WASHINGTON.**

White House:

**PRESIDENT OBAMA** — Holds a roundtable discussion at Rhode Island College; delivers remarks at Rhode Island College; departs Rhode Island; arrives at the White House; welcomes local children and children of military families to trick-or-treat at the White House.

**VICE PRESIDENT BIDEN** — Meets with senior advisors; travels to San Diego; attends an event for the Democratic National Committee.

**FIRST LADY MICHELLE OBAMA** — join the President in welcoming local children and children of military families to trick-or-treat at the White House.

**US Senate: Oct. 31 – Dec. 17. SENATE GALLERY PERIODICAL PRESS ELECTIONS** — Elections for the seven members Executive Committee of Correspondents of the Congressional Periodical Press Galleries will take place in January of 2015.

**US House: Sept. 22 – Nov. 11.** — The House stands in recess until 2 p.m. Wednesday, Nov. 12.

**Other: Oct. 30 – 31. DEPARTMENT OF COMMERCE, EDA – MANUFACTURING SUMMIT** — The U.S. Department of Commerce and the U.S. Economic Development Administration (EDA) will host a summit bringing together communities to discuss best practices for promoting American manufacturing. In May 2014, U.S. Secretary of Commerce Penny Pritzker announced the 12 communities that were designated as Manufacturing Communities as part of the Investing in Manufacturing Communities Partnership (IMCP) initiative. At the IMCP Summit, representatives from each of the 12 designated communities will discuss their efforts and progress. Speakers include: Jason Miller, Deputy Director, National Economic Council and Special Assistant to the President for Manufacturing; Bruce Andrews, Deputy Secretary, U.S. Department of Commerce; Jay Williams, Assistant Secretary, U.S. Department of Commerce for Economic Development Administration. Closing remarks and special announcement delivered by Bruce Andrews, Deputy Secretary, U.S. Department of Commerce 11:45 a.m. U.S. Deputy Secretary of Commerce Bruce Andrews will make an announcement. Deputy Secretary Andrews remarks are open to the media. To RSVP, please contact Sarah Horowitz at 202-482-4883 or shorowitz@doc.gov Location: Herbert C. Hoover Federal Building Auditorium, 1401 Constitution Avenue NW.

**SAIS – FOREIGN FIGHTERS – RUSSIAN MONEY** — 10 a.m. – 11 a.m. Foreign Fighters, Russian Money, & Ethnic Tensions. The Center for Transatlantic Relations at SAIS will host Senator Chris Murphy (D – CT) for a discussion on the need for U.S. re-engagement in the Balkans. Senator Murphy recently returned from a trip to Kosovo, Serbia, Croatia, Albania, and Montenegro, where he met with government officials, local businesses, and members of the public to discuss U.S. relations in the region. Daniel S. Hamilton, Executive Director of SAIS's Center for Transatlantic Relations will moderate the discussion. Location: Kenney Auditorium, Nitze Building, 1740 Massachusetts Avenue NW.

## **Last Laughs:**

### **LATE NIGHT POLITICAL HUMOR.**

**Seth Meyers:** "Apple CEO Tim Cook wrote an article this week coming out as gay and saying that he's tried to maintain a basic level of privacy. After Cook came out as gay, a member of Russian Parliament has called for him to be banned from Russia for life. At which point, everyone in Ukraine came out as gay."

**Seth Meyers:** "North Korea released photos of Kim Jong-un sitting in the cockpit of a fighter jet. Said Kim Jong-un, 'I was standing!'"

**Seth Meyers:** "Michael Bay is reportedly in talks to direct a new film about the Benghazi scandal. Said Bay, "It will be an honest depiction of the events as they happened. Also, Hillary Clinton will be played by Megan Fox."

Misty and Team - this is really, really great! I'm sorry I wasn't able to respond sooner with a quote for the press release - we were in the air and then running to our next flight because the Jackson flight took off so late and we got jammed on our connection! Anyway - we look forward to the video and will plan to use parts for our "This Week at Interior" feature I was mentioning earlier today.

The press release is great.

I imagine you saw the WTOK piece that Lauren in our office flagged earlier - that turned out well too - and photos were great!

Thanks again for such a well organized couple of days. We had a great time in the Magnolia State!

Excellent! Thanks for the heads up, Misty - I'll download to watch now.

We usually post our "This Week at Interior" video around 11 EDT - will that get out ahead of your post or will the video be posted on your end prior to that time?

Thanks for clarifying,  
Jessica

## Thursday PAO mtg

---

Jessica Kershaw <jessica\_kershaw@ios.doi.gov>

Wed, Oct 29, 2014 at 1:12 PM

To: "Androff, Blake" <blake\_androff@ios.doi.gov>

Joan did the release for Monday but I completely rewrote... Frank worked with ASIA on the first draft of NCAI remarks but Kate didn't use them... I decided not to provide talkers for the NCAI or Choctaw pressers - and got no complaints there - just not needed - and I didn't ask for drafts either.

Advisories were fairly well done (Lauren wrote and Frank edited lightly).

Frank wrote a great release for NCAI but we decided not to use - shelved for Tribal Nations.

So.. I'd say we made a conscious decision to provide less and we didn't get complaints

Except for NCAI where she felt she went long and didn't have enough room for anecdotes but that's more for Kate

**LAST LAUGHS:**

- + Late Night Political Humor.

**DOI in the News:**

**SECRETARY JEWELL VISITS CHOCTAW SCHOOLS.** WTOK-TV Meridian, MS (10/30, 642) reports that Interior Secretary Sally Jewell "visited Choctaw tribal schools in Mississippi Wednesday" to "examine the Choctaw education system." Jewell "rates the Choctaw School System as one of the best." According to the article, "she credits much of that to the tribe's hands-on approach, with the chief and tribal council virtually serving as the school board." Jewell said, "In many other communities we don't see that. We don't have engagement between tribal leaders and the schools. Sometimes we run the schools. We run them out of Albuquerque, New Mexico or Washington D.C., and the schools may be all the way across the country."

**GROUP WANTS BLM TO CONDUCT ENVIRONMENTAL REVIEWS BEFORE RENEWING GRAZING PERMITS.** The AP (10/30, Ridler) reports that "a conservation organization is requesting the US Bureau of Land Management conduct environmental reviews before renewing 453 grazing permits that contain areas designated as important sage grouse habitat." In a letter sent last week to Interior Secretary Sally Jewell, Western Watersheds Project said that the grazing permits expire in March. The article notes that "the letter followed a ruling in US District Court in Boise last month that found the BLM improperly used a congressional grazing rider to renew grazing permits in Idaho without necessary environmental reviews."

Coverage by the AP was also picked up by the Houston Chronicle (10/30, Ridler, 2.47M), the Idaho Statesman (10/29, 150K), the San Antonio Express-News (10/30, 904K), the Seattle Post-Intelligencer (10/30, 1.06M), The Oregonian (10/30, 690K), and KIVI-TV Boise, ID (10/30, 861).

## **America's Great Outdoors:**

### ***National Park Service:***

**NPS IDENTIFIES SUSPECT IN VANDALISM AT WESTERN SITES.** The Flathead (MT) Beacon (10/29, 19K) reports that "a 21-year-old New York woman has been identified as the primary suspect in recent vandalism cases that affect eight national parks in the western United States." NPS investigators say Casey Nocket "painted images on rocks and boulders in Yosemite National Park, Death Valley National Park, and Joshua Tree National Park, all in California; Rocky Mountain National Park and Colorado National Monument, both in Colorado; Crater Lake National Park, in Oregon; Zion National Park and Canyonlands National Park, both in Utah." According to the article, "investigators continue to collect evidence of the crimes, conduct interviews, and are consulting with the US Attorney's Office about potential charges."

Also reporting on the story are CNN (10/30, Hetter, Yan, 14.29M) and the San Francisco Chronicle (10/30, 2.24M).

***Yosemite Vandalism Criticized.*** In an editorial, the Marysville (CA) Appeal-Democrat (10/30, 68K) urges the NPS to "throw the book at CreepyTings when they find and arrest her." It argues that "drawing on them isn't art. It's theft."

**GAO: NPS AMONG AGENCIES NOT MEETING CUSTOMER SERVICE STANDARDS.** The Fierce Government (10/30, 224) reports that the NPS is among the five agencies that the Government Accountability Office surveyed that didn't meet "all key elements of the government's customer service standards, an Oct. 24 report says." The NPS lacks "guidance for when to elevate customer comments from the local level up to the agency level." However, "steps are being taken to make agencies compliant, GAO says."

**AMPHITHEATER AT LAKE BARKLEY RECEIVES LWCF FUNDING.** The SurfKy (10/30, 1K) reports that Kentucky Gov. Steve Beshear on Wednesday "came to Lyon County to ceremonially deliver funding for two projects that will bring lasting benefits to the Lake Barkley region, a multi-use 'bike/ped' trail along the lake front and a new amphitheater located on the northern shore." Beshear "ceremonially presented a check for a \$70,000 Land and Water Conservation Fund to city of Kuttawa for the construction of a new amphitheater on the northern shores of Lake Barkley."

Also reporting on the story is the Lane Report (10/30, 4K).

**NPS' PROPOSES CHANGES FOR SPORT HUNTING, TRAPPING IN ALASKA.** KNOM-FM Nome, AK (10/29) reports that the NPS is "proposing changing regulations for sport hunting and trapping on Alaska's national preserves—but while the changes mostly impact a variety of predator species like wolves and bears, new regulations on caribou hunting are drawing concern from local hunters." The article notes that "the new regulations would prohibit taking wolf and coyote pups and adults during the summer denning season; to taking of brown bears over bait stations; and the use of artificial light to take black bear cubs—or sows with cubs—at their den sites." Also, one of the proposals would "prohibit hunting caribou in the water."

**REPORT: GULF ISLANDS NATIONAL SEASHORE CREATED \$39M IN ECONOMIC GROWTH.** The Bloomberg BusinessWeek (10/30, 2.52M) reports that "a group of coastal leaders toured natural resource sites across Jackson County early Tuesday morning to observe how to grow the nature tourism industry." Dan Brown, superintendent of the Gulf Islands National Seashore, said, "We appreciate the partnership and support of our neighbors and are glad to be able to give back by helping to sustain local communities." The article notes that "a National Park Service report showed 944,004 visitors toured the Mississippi portion of the park in 2013 and spent \$39 million in the surrounding area."

**CRATER LAKE SEES RECORD NUMBER OF VISITORS.** The Klamath Falls (OR) Herald And News (10/30, 45K) reports that "visitors have been making the trip to Crater Lake National Park in record numbers this year, but touring the park will be more challenging next summer." The article notes that "as of Sept. 31, the park had counted 536,749 visitors this calendar year." Superintendent Craig Ackerman says that "means it's likely the total number of visitors from all of 2013, 572,527, will likely be surpassed this year."

**LOTTERY OPENS FOR SKIERS WHO WANT TO STAY IN YOSEMITE BACKCOUNTRY HUT.** The Los Angeles Times (10/30, Forgiione, 4M) reports that "the lottery has opened for those who want to bunk down this winter in the Ostrander Ski Hut in Yosemite National Park's backcountry." The lottery opened Tuesday and

continues until Nov. 19,

**RIVERVIEW CEMETERY ADDED TO NATIONAL REGISTER OF HISTORIC PLACES.** The Wilmington (DE) News Journal (10/30, 291K) reports that Wilmington's Riverview Cemetery has been added to the National Register of Historic Places.

**ADDITIONAL COVERAGE: NPS REVIEWING POLICY FOR VIP STAYS AT GRAND TETON LODGE.** Additional coverage that the NPS is "reviewing its policy for the use of a lakeside lodge in the Grand Tetons after Vice President Joe Biden and his family spent some time there in August" was provided by the Alabama Live (10/30, 497K), Fox Business (10/29, 448K), the Newser (10/30, 383K), the Daily Mail (UK) (10/30, 4.35M), and WDIV-TV Detroit (10/30, 172K).

**ADDITIONAL COVERAGE: NPS RELEASES INVENTORY OF ITEMS DESTROYED IN FLIGHT 93 FIRE.** Additional coverage that the NPS has "completed its inventory of items lost in the Pennsylvania fire that destroyed the flag flown above the Capitol on Sept. 11, 2001" was provided by Roll Call (10/30, 90K).

**LATIMES URGES MORE PROTECTIONS FOR SAN GABRIEL MOUNTAINS.** The Los Angeles Times (10/30, 4M) argues that President Obama did not go far enough when he created a national monument to protect the San Gabriel Mountains, noting that the "final map leaves out the entire southwest portion of the Angeles National Forest, which is close to foothill cities and contains some of the most popular and damaged facilities." The Times opines that the monument status should not be seen as "the endgame" and calls on Rep. Judy Chu and the Los Angeles-area congressional delegation to "continue to push for greater protection and funding for the entire range."

#### ***Bureau of Land Management:***

**ARKANSAS HEADWATERS RECREATION AREA CELEBRATES 25TH YEAR.** The Chaffee County (CO) Times (10/30, 9K) reports that "Arkansas Headwaters Recreation Area celebrated its 25th year Monday." The article notes that "plans are being finalized for AHRA's 25th anniversary celebration, beginning at 10:30 a.m. Nov. 7 with activities for kids and adults alike in the area around the AHRA Visitors Center and Salida SteamPlant." The event will "include a reception, followed by guest speakers who will review the accomplishments of the past quarter-century."

**BLM AUTHORIZES TRAIL CONNECTIONS NEAR LANDER.** The Casper (WY) Star-Tribune (10/30, 90K) reports that the BLM Lander Field Office "decided to authorize the construction and maintenance of 1.17 miles of connecting trail in the Johnny Behind the Rocks Area." According to the article, "studies were completed to address connectivity problems between the Johnny-On-Top and Red Ridge Trails."

**SCHOLARS CHALLENGE LEGAL BASIS OF UTAH'S PUBLIC LANDS CAMPAIGN.** The Salt Lake (UT) Tribune (10/30, 479K) reports that "University of Utah legal scholars released a white paper Wednesday concluding the state has no legal basis to demand the federal government turn over title to public lands." According to John Ruple, a research fellow with the U. law school's Wallace Stegner Center for Land, Resources and the Environment, "suing would not only be a waste of money, but also set back efforts to resolve conflicts over public land management." Ruple said, "We recognize there are legitimate questions about how federal lands are managed and there is room for disagreement, but demanding the federal government give those lands to the state is legally untenable."

#### ***Fish and Wildlife Service:***

**FEWER GRIZZLY BEARS DYING IN YELLOWSTONE AREA.** The AP (10/30, Brown) reports that "fewer threatened grizzly bears are being killed in and around Yellowstone National Park, and scientists said Wednesday their numbers appear to be holding stable as officials consider lifting protections for the animals." According to the article, "during a Wednesday meeting of state and federal wildlife agencies in Montana, scientists said a new counting method indicates roughly 1,000 grizzlies in the Yellowstone region, with the population growing zero to 2 percent annually." If the FWS "eliminates protections, it would open the door to limited hunting in the Yellowstone region of Idaho, Montana and Wyoming."

Also reporting on the story is the AP (10/30).

Coverage by the AP was also picked up by ABC News (10/30, 5.02M), the Boston Herald (10/30, 640K), the

Charlotte (NC) Observer (10/29, 572K), the Daily Inter Lake (MT) (10/30, 57K), the Sacramento (CA) Bee (10/30, 646K), the US News & World Report (10/29, 661K), the Washington Post (10/29, 4.9M), the Washington Times (10/30, Brown, 373K), and Yahoo! (10/30, Brown, 65.94M) .

**FWS SEEKS FEDERAL PROTECTIONS FOR SNAPPING TURTLES.** The Hill (10/30, Devaney, 241K) reports that "snapping turtles would be protected under new federal rules proposed Wednesday." The FWS is "considering placing common snapping turtles, along with Florida softshell turtles, smooth softshell turtles and spiny softshell turtles, on an international endangered species list." The agency said "snapping turtles are in danger of being harvested for their meat as well as collected as pets."

Also reporting on the story are the Washington Times (10/30, Chumley, 373K) and Reuters (10/30, Krasny).

**MARKETING TECHNIQUES DRAW NEW VISITORS TO J.N. 'DING' DARLING NATIONAL WILDLIFE REFUGE.** The Sanibel (FL) Island Reporter (10/30) reports that "using social media, direct marketing to local radio and other outreach tools, officials with the J.N. 'Ding' Darling National Wildlife Refuge are reporting a sharp uptick in the number of Hispanics visiting the parkland."

**FWS SEEKS PUBLIC INPUT ON ENVIRONMENTAL IMPACTS OF PROPOSED TRANSMISSION LINE.** NBC (10/30, 441K) reports that on Thursday, the FWS is "publishing a Notice of Intent to prepare an Environmental Impact Statement that will assess the natural and human effects of issuing a permit to authorize the take of the federally endangered American burying beetle." The Nebraska Public Power District has requested that the FWS "issue this permit because the construction, operation, and maintenance of its proposed 220-mile long, 345 kV transmission line is likely to impact the American burying beetle."

**NEBRASKA FARM BUREAU RAISES CONCERNS ABOUT FWS RULE.** WNAX-AM Yankton, SD (10/30) reports that the Nebraska Farm Bureau has submitted comments to the FWS "on a proposed rule that would change critical habitat for endangered species." The Farm Bureau's Vice President of Government Relations Jay Rempe says "the change in the proposed rule would cover a lot of area not now covered." Rempe says "another problem is that the rule would not only expand the regulatory overreach of the Fish and Wildlife Agency, it also would severely limit farming and ranching."

**ADDITIONAL COVERAGE: SOUTHERN PINE BEETLES INVADE LONG ISLAND.** Additional coverage of the discovery of the southern pine beetle on Long Island was provided by Newsday (10/30, 1.38M).

### ***US Geological Survey:***

**CRITIC QUESTIONS ARTIFICIAL SPAWNING REEFS IN DETROIT RIVER.** The Port Huron (MI) Times Herald (10/29, 75K) reports that a recent report from the USGS and the FWS "about the Fighting Island reef project in the Detroit River shows the reef is producing lake sturgeon eggs and larvae." However, Kathy Johnson, "who co-owns Gregory A.D. and is a documentary filmmaker, said she believes man-made reefs are not as important in the St. Clair River to maintaining sturgeon numbers." Johnson "estimates 50,000 sturgeon spawn in the St. Clair River, which would be the largest free-range spawning population in the Great Lakes basin." She said "her estimate is based on combined results from the Ontario Natural Resources Department and the US Department of Natural Resources."

**ADDITIONAL COVERAGE: USGS MONITORING LAVA FLOW FROM HAWAII VOLCANO.** Additional coverage of the lava flow from a Hawaii volcano was provided by the Salem (OR) Statesman Journal (10/28, 23K), the Concord (NH) Monitor (10/30, 47K), the Albany (NY) Times Union (10/30, 465K), the International Business Times (10/29, Varandani, 655K), and Yahoo! (10/30, Mcavoy, Kelleher, 65.94M).

## **Securing America's Energy Future:**

### ***Renewable Energy:***

**SOUTH CAROLINA EYES NEXT STEPS FOR OFFSHORE WIND ENERGY.** The Myrtle Beach (SC) Online (10/29, 5K) reports that "the next step in North Myrtle Beach's years-long drive to become the offshore wind energy capital of South Carolina will begin next month, when Coastal Carolina University, the University of South Carolina and others begin the work to label areas in the Atlantic Ocean off South Carolina as good and not-so-good for the development of wind energy farms." Paul Gayes, director of the Burroughs & Chapin Center

for Marine and Wetland Studies at Coastal Carolina University, said Wednesday "the study will use \$750,000 from the US Bureau of Ocean Energy Management with a match from the state to narrow down a broad swath of ocean to areas that can then be studied further by private companies that might build the farms." The article notes that "the step after that will come early next year when Sen. Greg Hembree, R-North Myrtle Beach, reintroduces a bill that would allow utility companies that wanted to build a demonstration wind tower offshore to apply to the state's Public Service Commission to raise rates to fund the project "

### ***Onshore Energy Development:***

**BLM RELEASES ENVIRONMENTAL STUDY ON CONOCOPHILLIPS PROJECT IN ALASKA.** The [FuelFix](#) (10/29, 7K) reports that "ConocoPhillips' plans for the first oil production facilities from federal lands in Alaska moved one step closer to reality Wednesday, as the Interior Department released a key environmental study on the project." The article notes that "although it is not a final verdict, the assessment by Interior's Bureau of Land Management sets the stage for approval later this year by outlining steps ConocoPhillips would have to take to mitigate environmental effects while boring up to 33 wells at its Greater Mooses Tooth site." BLM director Neil Kornze said, "Reaching this stage of permitting is a major milestone for the project and for the future of balanced, responsible federal oil production in the National Petroleum Reserve-Alaska."

Also reporting on the story is the [Delta \(AK\) News Web](#) (10/29).

**USGS STUDY SAYS WASTEWATER DISPOSAL LIKELY TRIGGER 2011 COLORADO EARTHQUAKE.** Reuters (10/30, Zuckerman) reports that the US Geological Survey claims that underground disposal of wastewater from natural gas production was likely responsible for a moderate earthquake in Colorado in 2011. The study is expected to "fuel debate over the impact of the US energy boom," as it bolsters previous studies linking wastewater disposal with earthquakes in other energy producing states, particularly Texas and Oklahoma.

**TENSIONS MOUNT AS DENTON FRACKING BAN NEARS.** The Dallas Morning News (10/30, Osborne, 1.16M) reports that the vote to ban fracking in Denton has "turned into a flash point for a national debate on the oil and gas drilling boom." More locally, it has created tensions as rival groups in Denton "work to undermine each other." Business owners are reported to avoid talking about the ban "for fear of alienating customers," while opposing sides of the ban accuse one other of "misleading voters on everything from how hydraulic fracturing works to how to vote for the ban."

### ***Offshore Energy Development:***

**NEW DOCUMENTARY DELVES INTO DEEPWATER HORIZON EXPLOSION.** The Los Angeles Times (10/29, Tsai, 4M) reports that the documentary "The Great Invisible," investigates the aftermath of the 2010 Deepwater Horizon explosion in the Gulf of Mexico, and "gives voice to many of the previously nameless and faceless victims of the disaster," such as those who suffered from its environmental and economic consequences.

**ADDITIONAL COVERAGE: SHELL SEEKS MORE TIME TO ACT ON ARCTIC LEASES.** Additional coverage that "Royal Dutch Shell is asking the Obama administration for five more years to explore for oil off Alaska's coast, saying setbacks and legal delays may push the start of drilling past the 2017 expiration of some leases" was provided by The [Fairbanks \(AK\) News-Miner](#) (10/30, 44K).

**ALABAMA'S PLAN FOR CONVENTION CENTER SUPPORTED.** In an editorial, the Montgomery (AL) Advertiser (10/30, 2K) supports "bringing a hotel and convention center" back to Gulf State Park because it "would be a boon for Alabama's economy and would allow the state to draw tourist and convention business that it has been losing for years to Florida facilities only a few miles down the road." However, it notes that "the latest effort to get such a project underway has been challenged in court by a New Orleans-based environmental group that seeks to block the use of funds from the 2010 Gulf of Mexico oil spill recovery program." It also notes that "despite the expenditure's having the blessing of four different federal agencies — the Department of Agriculture, the Department of the Interior, the National Oceanic and Atmospheric Administration and the Environmental Protection Agency — the Gulf Restoration Network claims the approval violates the law."

## **Tackling America's Water Challenges:**

**BOR AREA MANAGER PROVIDES UPDATE ON DROUGHT CONDITIONS IN CALIFORNIA.** The Weaverville (CA) Trinity Journal (10/30, 12K) reports, Area Manager Brian Person of the Northern California Area Office of the BOR "recently offered a historic overview on how the Trinity River Division of the Central Valley Project came to be back in 1955 as he updated Trinity County supervisors on current operations and challenges presented by severe drought conditions." Person "noted that while the vast majority of precipitation occurs in the northern part of the state, the vast majority of people settled in the southern part 'which creates disparity. California has the most complex system of water distribution in the world with state, federal and some local projects. The state is very well-plumbed.'"

**PUBLIC COMMENTS SOUGHT ON PROJECT TO RAISE LAKE CLE ELUM RESERVOIR.** The Ellensburg (WA) Daily Record (10/30, 16K) reports "people have until Nov. 25 to comment on a proposed project that would raise the Lake Cle Elum reservoir by 3 feet." According to the article, "raising the water level by 3 feet would allow for an additional 14,600 acres-feet of water to be stored and released from the reservoir." The project involves the BOR and the Department of Ecology.

## Empowering Native American Communities:

**BIA HEAD WASHBURN INTERVIEWED.** In part two of an interview with the Indian Country Today Media Network (10/29, 78K), Kevin Washburn, the Interior Department's Assistant Secretary – Indian Affairs, discussed the role of the National Congress of American Indians, possible federal recognition for Native Hawaiians, as well as changes to the federal recognition process.

**SEN. TESTER INTERVIEWED ON INDIAN EDUCATION, HEALTH CARE AND ENVIRONMENT.** In an interview with the Indian Country Today Media Network (10/29, 78K), Sen. Jon Tester "outlined his plans for introducing new, comprehensive legislation in November that is designed to address a variety of problems and gaps in Native school districts." Tester said, "We saw some amazing teachers and students on this trip, but there are some things that need our immediate attention. We want to address the needs of Indian students from early childhood development to post secondary education, so it's important that we get the tribes on board, because it will improve education in Indian Country in a positive way."

**CONTINUING COVERAGE: FEDERAL OFFICER ARRESTED FOR ALLEGEDLY THREATENING UBER DRIVER AT GUNPOINT.** In continuing coverage of the arrest of Byron Keith McDonald, a lieutenant for the BIA Office of Justice Services, KSL-TV Salt Lake City (10/30, 1.07M) reports that in a statement, the Interior Department said, "The incident is being investigated by our Internal Affairs Division, which will make use of the investigation being conducted by the Salt Lake City Police Department. Senior managers in the BIA are aware of the decision and are taking steps to investigate the matter properly and then make appropriate decisions in accord with law and policy."

Also providing coverage are the Washington Post (10/29, Phillip, 4.9M) and the Deseret (UT) News (10/30, 538K).

## Top National News:

**OBAMA URGES AMERICANS TO REJECT CALLS FOR MANDATORY QUARANTINES.** Even as controversy continued to grow regarding the implementation of mandatory quarantines, coverage of the Ebola crisis continues to level off from where it was last week. On Wednesday, for the first time in many days, none of the network newscasts led with a report on Ebola. All three networks did mention President Obama's remarks from earlier Wednesday regarding his opposition to imposing quarantine restrictions on medical workers returning from West Africa. But the President's appearance was overshadowed by the news that Kaci Hickox, the nurse who had been involuntarily quarantined in New Jersey this weekend, will not abide by the voluntary restrictions she agreed to when she was allowed to travel to her home in Maine.

Despite the generally positive coverage the President has garnered this week as he makes the case for allowing the free movement of those without symptoms of Ebola, coverage of Hickox and new polling indicate that the President is taking an unpopular stand on the matter. On the CBS Evening News (10/29, story 6, 2:30, Pelley, 5.08M), Scott Pelley noted that a new CBS News poll found that "80% of Americans support the quarantine idea" even though the President has made the case that mandatory quarantines are counterproductive. McClatchy (10/29, Subscription Publication, 27K) similarly says polls show "Americans...overwhelmingly supported quarantine for travelers arriving from West Africa," while Politico (10/29, Epstein, 977K) reported that on Wednesday, "even as he stressed the need for American leadership on Ebola," the President "conceded that

he understands Americans' worries."

On NBC Nightly News (10/29, story 2, 2:55, Williams, 7.86M), after showing a Maine public health official pleading with Hickox to accede to the state's "reasonable request" that she stay at home for a few weeks, correspondent Kate Snow reported that "many Americans agreed," and "some say [Hickox] is putting her self-interest ahead of everybody else."

On ABC World News (10/29, story 5, 1:45, Muir, 5.84M), David Muir reported that President Obama is "calling for 'dignity and respect' for those healthcare workers fighting the disease on the front lines in west Africa, calling them 'heroes.'" On NBC Nightly News (10/29, story 2, 2:55, Williams, 7.86M), Kate Snow reported that the President is "worried quarantine rules will discourage volunteering," but "despite the President's concern about mandatory quarantines, the US military is doing just that" and California "became the latest state to enact some kind of quarantine."

USA Today (10/30, Jackson, 9.86M) reports that on Wednesday, the President "thanked health care professionals...for fighting Ebola on the front lines in West Africa, while criticizing officials who would put restrictions on these 'heroes' who are helping secure the United States." USA Today adds that in reference to "unnamed state officials who want to confine or quarantine health care workers," the President "decried 'policies that would avoid leadership and have us running in the opposite direction and hiding under the covers.'" According to USA Today, the President and White House aides "criticized New Jersey, New York and Illinois over quarantine policies for returning workers."

The Hill (10/29, Sink, 241K) reported that the President "also pushed back against those who have recommended a travel ban against the three African countries where the outbreak is concentrated," and "suggest[ed] doing so would be counterproductive." The Huffington Post (10/29, Delaney, 11.54M) noted that the President, "who has repeatedly sought to show he is unafraid of catching the virus...shook hands with each of the workers after his speech."

The Los Angeles Times (10/30, Hennessey, 4M) calls the President's appearance on Wednesday, in which he delivered a "campaign-friendly riff on American patriotism," was "his most choreographed event on the topic in weeks," and notes that it took place in the White House's East Room, which is "typically used for policy announcements and formal ceremonies." The Times says the appearance "seemed to mark an evolution of the White House public relations push" following "weeks of unscripted reassurances, photo ops and hastily arranged briefings."

The Wall Street Journal (10/30, Sparshott, Subscription Publication, 5.62M) covers the President's remarks in an article titled, "Obama Urges US Leadership To Stem Ebola Outbreak." Sen. Chris Coons, in an op-ed for the Washington Post (10/30, 4.9M), echoes the President's rhetoric when he writes: "Instead of demonizing those who volunteer for service, through stigmatizing mandatory quarantines or the imposition of a travel ban, we should be honoring them."

Bloomberg News (10/30, Olorunnipa, Keane, 1.94M) reports that the President's "appearance was part of a strategy to head off a patchwork of responses by state and local officials, while easing public concern about his administration's response a week before mid-term elections." But Bloomberg notes that earlier on Wednesday, Defense Secretary Hagel "ordered all US troops to be held for 21 days for monitoring after their duty in the Ebola region," which Bloomberg says "add[ed] to conflicting messages about the government's response." Bloomberg notes that the CDC and the President "have advocated against a blanket quarantine for those who don't show any symptoms of the deadly virus."

The Washington Times (10/30, Howell, 373K) reports that the Administration has "had to play catch-up at times, as missteps in Dallas exposed cracks in US preparedness and the administration appeared a step behind states itching to put tough rules in place to stem a potential outbreak within their borders."

The Wall Street Journal (10/30, Subscription Publication, 5.62M), in an editorial, warns that the Administration's criticism of quarantining measures could come back to haunt them if there is a wider outbreak and it becomes necessary to separate Ebola patients and those they have been in contact with from the general public.

**Klain Has Not Spoken Publicly Since Being Named "Ebola Czar."** The New York Daily News (10/29, Warren, Friedman, Siemaszko, 3.52M) reports that as the President "heaped praise on the medics gathered with him at the White House, his enigmatic Ebola czar Ron Klain watched from a front row seat" and then "quickly split after Obama finished speaking." According to the Daily News, White House press secretary Josh Earnest

"hinted strongly they may trot out Klain to talk with reporters soon."

**Doctors Without Borders' Criticism Of Obama's Support For Drug Companies Noted.** The Huffington Post (10/29, Carter, 11.54M) reports that although the President "was celebrating...Doctors Without Borders volunteers" on Wednesday, and Ambassador Samantha Power has praised the group repeatedly, "the recent executive branch acclaim for Doctors Without Borders obscures a long-running struggle between the humanitarian group and the White House over global drug prices." According to the Huffington Post, "the Obama administration has aggressively pursued policies that prevent poor countries from accessing low-cost generic versions of expensive name-brand medications, despite persistent calls from Doctors Without Borders for the White House to reverse course."

**AS EXPECTED, FED WINDS DOWN BOND-BUYING, CITING STRONGER ECONOMY.** The Federal Reserve's announcement that it will wind down its bond-buying stimulus program as the end of this month was widely expected, but still generated significant media coverage, including a mention on the CBS Evening News. A prominent theme was that the Fed saw the labor market improving, while another is that the central bank will still keep interest rates near zero for the foreseeable future.

The CBS Evening News (10/29, story 8, 0:15, Pelley, 5.08M) calls the end of the stimulus program "a major milestone today in the long climb out of the great recession" but adds that the Fed "said it will keep short-term interest rates near zero for a considerable time."

The New York Times (10/30, Appelbaum, Subscription Publication, 9.9M) reports that in a statement following a two-day meeting, an "upbeat" Fed said on Wednesday that the "economic recovery was chugging along and that it would end its latest-bond buying campaign on schedule at the end of the month." The Fed also "upgraded its appraisal of labor market conditions," stating that "underutilization of labor market resources is gradually diminishing." However, it "added that it still planned to keep short-term interest rates near zero for a 'considerable time.'"

Reuters (10/30, Schneider, Flaherty) reports that the Fed said, "On balance, a range of labor market indicators suggests that underutilization of labor resources is gradually diminishing," a change from previous statements which focused on weakness in the labor market.

USA Today (10/30, Davidson, 9.86M) reports that while the Fed "has said for months" that its bond-buying would end this month, "the move was thrown into doubt by reports two weeks ago of weak euro zone growth and disappointing U.S. retail sales that sent stock and bond markets reeling." However, since then, domestic economic news "has been generally encouraging, with factory output and consumer confidence surging, and at least partly recovering."

The Wall Street Journal (10/30, A1, Hilsenrath, Subscription Publication, 5.62M) says that the Fed's actions are a sign that the central bank has confidence in the trajectory of the US economy. Similarly, the Washington Times (10/30, Hill, 373K) says that by ending the bond-buying program, Fed officials "signaled that they believe the economy is returning to normal after more than five years of convalescence from the worst recession and financial crisis since the 1930s."

McClatchy (10/30, Hall, Subscription Publication, 27K) reports that only one member of the Fed's Open Market Committee voted against ending the bond-buying program. The bond-buying program, formally known as quantitative easing, had been "blasted by critics," who were concerned by inflation or a weakened dollar, which didn't materialize. However, the Fed "still has all those bonds on its books, so ending the bond buying is just a first step in a drawn-out wind-down."

The Christian Science Monitor (10/30, Velasco, 426K) reports that the "tone shifts" in the Fed's statement "led to a shift in voting for the new policy," which drew the backing of "known hawks" Richard Fisher and Charles Plosser, who had dissented on several previous policies. The only dissenter "was the Fed's most dovish member, Narayana Kocherlakota, who wanted the \$15 billion a month pace in bond buying to continue."

In one of the only negative pieces of coverage, the Huffington Post (10/30, Gongloff, 11.54M) says that by "pulling away support for the economy, the Fed is taking a chance that recent signs of economic strength are more reliable than recent signs of weakness." While unemployment is down and recent GDP growth has been strong, "wages have stayed stubbornly flat, and much of the drop in unemployment has been due to workers checking out of the labor market, meaning they're no longer counted as unemployed." In addition, financial markets "have been turbulent lately, and economies around the world seem to be teetering on the edge of

recession."

Bloomberg News (10/30, Kearns, Condon, 1.94M) says that Fed Chair Janet Yellen must now "chart a course toward the first interest-rate increase since 2006." The FOMC "repeated it will consider a wide range of information in deciding when to raise the federal funds rate, which has been held near zero since December 2008."

The Washington Post (10/30, Mui, 4.9M) says in its "Wonkblog" section that "debate over when to raise rates, which has already begun, will prove tricky for the Fed — and likely the biggest challenge of Janet Yellen's tenure" so far. Fed officials, "who have suggested that the move could come in the middle of next year, hope that it causes little disruption."

**Stocks Down Slightly After Fed Action.** Reuters (10/30, Vlastelica) reports that US stock indexes drop a bit on Wednesday following the Fed's move. The Dow Jones Industrial Average fell 31.44 points to 16,974.31, while the S&P 500 dropped 2.75 points to 1,982.3. The Nasdaq Composite Index dropped 15.07 points to 4,549.23.

**WSJournal Doesn't See QE As Success.** In an editorial, the Wall Street Journal (10/30, Subscription Publication, 5.62M) says that it has been skeptical of quantitative easing, and says that it has not accomplished all of its goals. In particular, the Journal says that the drop in the jobless rate has been primarily due to workers exiting the workforce, while economic growth has still been tepid.

**Samuelson: "Wage Gains Are Meager."** In his column for the Washington Post (10/30, 4.9M), Robert J. Samuelson writes that despite the drop in unemployment, there are still "too many potential workers must be chasing too few openings" so "wage gains are meager, and the recovery suffers." He says that the issue isn't only the large number of workers that have exited the workforce; another issue is that "workers are so insecure that they're afraid to abandon their present jobs for something better, therefore, companies don't have to pay higher wages to retain them." Overall, "bargaining power has shifted to employers, based on workers' fears of permanent job loss."

**ADMINISTRATION CONSIDERS CRITERIA FOR EXPEDITED ACTION ON IMMIGRATION.** The Wall Street Journal (10/30, Meckler, Subscription Publication, 5.62M) reports that in a move that could potentially provide protection to as many as four million people who are in the country illegally, the Administration is considering an immigrant's minimum length of time in the country and his or her familial ties in the country to determine which illegal immigrants will be granted protection through an expedited executive action.

**Cato Analyst Urges GOP To Reject Nativist Views On Immigration.** In an op-ed for the Wall Street Journal (10/30, Nowrasteh, Subscription Publication, 5.62M), Alex Nowrasteh, an immigration policy analyst at the Cato Institute, argues that the Republican Party should turn away from its nativists, who see opposition to immigration reform as the future of the party, arguing that pursuing nativist policies could have long-term negative political consequences for the party.

**Greenhouse Decries New York School Officials' Demands For Proof Of Residency.** In a column for the New York Times (10/30, Subscription Publication, 9.9M), Linda Greenhouse writes that New York State school officials "know they can't demand proof of legal immigration status, thanks to Plyler v. Doe, a 1982 decision in which the Supreme Court ruled that states can't exclude undocumented children from the free public education provided to all other children," so instead they "have been demanding proof of residency in the district, which families who are trying to make the best of patchwork and last-minute arrangements often can't provide." The "bureaucratic impasse has left these children, finally safe from the gang violence that led to their long journeys north, languishing in their new homes."

## **Editorial Wrap-Up:**

**NEW YORK TIMES. "California Leads On Justice Reform."** The New York Times (10/30, Subscription Publication, 9.9M) editorializes that studies have found that "crime has gone down faster in states that have reduced their prison populations," and it points to California as an "encouraging example" of a state with "some the worst excesses of the mass incarceration era, but also some of the more innovative responses to it." California voters in 2012 "overwhelmingly approved a ballot measure to scale back the state's notorious 'three-strikes' law, leading to the release, so far, of more than 1,900 prisoners who had been serving life in prison — in some cases, for petty theft." The Times notes that it is "very rare for lawmakers anywhere to approve legislation

to shorten sentences for people already in prison; it is virtually unheard-of to do it by ballot measure," and it sees California's "continuing experiment on sentencing" as "a valuable lesson to states around the country looking for smart and safe ways to unravel America's four-decade incarceration binge."

**"The SEC And Political Spending."** An editorial in the New York Times (10/30, Times, Subscription Publication, 9.9M) accuses the SEC of being "complicit in the corrupting system of unlimited campaign donations from unnamed donors," and argues that as the "presumed guardian of investors' right to know how corporate executives spend shareholder money," the SEC should impose a political disclosure rule.

**"Unfinished Business On Press Freedom."** The New York Times (10/30, Subscription Publication, 9.9M) editorializes that Attorney General Holder "bears responsibility for undermining robust journalism by his overzealous leak investigations and his opposition to recognizing a reporter's constitutional or common law privilege to protect sources." The Times notes that Holder "issued new guidelines in February concerning prosecutors' use of subpoenas and search warrants to obtain information from reporters," which include "some valuable changes, but they also contain a central flaw that requires prompt correction, as a group of media representatives will be urging at a meeting with Justice Department officials scheduled for Thursday." The Times argues that the guidelines call for "avoiding the issuance of subpoenas that 'might unreasonably impair ordinary news gathering.'" This change "could invite prosecutors in the future to claim that news gathering that entails the disclosure of classified information (as national security reporting typically does) is out of the 'ordinary' and, therefore, exempted from the guidelines."

**WASHINGTON POST. "Will Congress Compromise?"** An editorial in the Washington Post (10/29, Board, 4.9M) notes a "spreading sense that national political institutions, beset with partisanship, no longer work well," and expresses hope that lawmakers who "quietly prefer governing to posturing" will take the opportunity "to stand up and prove it after the election."

**"Children And Handguns."** In an editorial, the Washington Post (10/29, Board, 4.9M) laments "the sickening ease with which children can get their hands on guns," citing 15-year-old Jaylen Fryberg's "murderous rampage at Marysville-Pilchuck High School in Washington state" last week. The Post notes that "it is important to know what was behind the actions of this seemingly popular high school freshman and whether signs of trouble went undetected," but "we can't help but wonder whether the outcome would have been different if not for his ability to get a gun."

**"Maryland And Isolation."** A Washington Post (10/29, Board, 4.9M) editorial calls on Maryland's General Assembly to revise rules on the use of solitary confinement instate prisons, arguing that the practice "can be expensive and counterproductive, deepening the psychosis that led to bad behavior."

**WALL STREET JOURNAL. "The QE Record."** In an editorial, the Wall Street Journal (10/30, Subscription Publication, 5.62M) says that it has been skeptical of quantitative easing, and says that it has not accomplished all of its goals. In particular, the Journal says that the drop in the jobless rate has been primarily due to workers exiting the workforce, while economic growth has still been tepid.

**"Chow Yun-Fat Beats Jackie Chan."** The Wall Street Journal (10/30, Subscription Publication, 5.62M) editorializes that pro-democracy Hong Kong celebrities unwillingness to be silenced by threats to their income shows the high level of discontent with China's rule of their home.

**"The Science' vs. Ebola."** The Wall Street Journal (10/30, Subscription Publication, 5.62M), in an editorial, warns that the Administration's criticism of quarantining measures could come back to haunt them if there is a wider outbreak and it becomes necessary to separate Ebola patients and those they have been in contact with from the general public.

## **Washington Schedule:**

**TODAY'S EVENTS IN WASHINGTON.****White House:**

**PRESIDENT OBAMA** — Receives the Presidential Daily Briefing, Oval Office; departs Joint Base Andrews; arrives in Portland, Maine; attends a DNC Roundtable; delivers remarks at a campaign event for Mike Michaud and other Maine Democrats; departs Maine; arrives in Rhode Island.

**VICE PRESIDENT BIDEN** — Attends the Presidential Daily Briefing; travels to New York City; attends an event for Bruce Braley.

**FIRST LADY MICHELLE OBAMA** — Headlines a GOTV Rally to Rebuild the Middle Class in support of Gina Raimondo, Democratic candidate for Rhode Island governor; participates in a grassroots campaign rally with Governor Dan Malloy and Connecticut Democrats.

**US Senate:** No scheduled events.

**US House:** Sept. 22 – Nov. 11. — The House stands in recess until 2 p.m. Wednesday, Nov. 12.

**Other:** Oct. 29 – 30. 9 a.m. **THE ATLANTIC – WASHINGTON IDEAS FORUM** — Sixth Annual Washington Ideas Forum. Political leaders, including Secretary of State John Kerry, National Security Advisor Susan Rice, Defense Secretary Chuck Hagel, Attorney General Eric Holder and Commerce Secretary Penny Pritzker will join more than 70 entrepreneurs and innovators who will share their ideas at the sixth annual "Washington Ideas Forum" October 29 and 30. Presented by the Aspen Institute and The Atlantic at the Harman Center for the Arts, the Forum will convene those who are changing our world and the way we livewhether by shaping U.S. policy on the Middle East or Ebola, or pushing action in their fields of business, education, energy, technology, science, and the arts. The Washington Ideas Forum expects to draw an audience of more than 1,500 people across the two days. <https://usaive.ap.org/live/events/washington-ideas-forum/2014/> DanaInfowww.theatlantic.com+ 8:45 a.m. Debbie Stabenow, Senator, State of Michigan. 9:35 a.m. Jeremy Stoppelman, CEO, Yelp! Inc.. 9:50 a.m. John Kerry, Secretary, U.S. Department of State. 10:20 a.m. Ernest Moniz, Secretary, U.S. Department of Energy. 11 a.m. Mike Froman, U.S. Trade Representative. 11:15 a.m. Anthony Fauci, Director, NIAID; David Nabarro, Senior UN Systems Coordinator for Ebola Virus Disease, United Nations. 12:25 p.m. Walter Robb, CEO, Whole Foods. 2 p.m. Fred Hochberg, Chairman and President, Export-Import Bank of the United States. Forum Stage. Location: Harman Center for the Arts, 610 F Street, NW.

**Oct. 30 – 31. DEPARTMENT OF COMMERCE, EDA – MANUFACTURING SUMMIT** — The U.S. Department of Commerce and the U.S. Economic Development Administration (EDA) will host a summit bringing together communities to discuss best practices for promoting American manufacturing. In May 2014, U.S. Secretary of Commerce Penny Pritzker announced the 12 communities that were designated as Manufacturing Communities as part of the Investing in Manufacturing Communities Partnership (IMCP) initiative. At the IMCP Summit, representatives from each of the 12 designated communities will discuss their efforts and progress. Speakers include: Jason Miller, Deputy Director, National Economic Council and Special Assistant to the President for Manufacturing; Bruce Andrews, Deputy Secretary, U.S. Department of Commerce; Jay Williams, Assistant Secretary, U.S. Department of Commerce for Economic Development Administration. Closing remarks and special announcement delivered by Bruce Andrews, Deputy Secretary, U.S. Department of Commerce Location: Herbert C. Hoover Federal Building Auditorium, 1401 Constitution Avenue NW.

**FEDERAL RESERVE DIVERSITY SUMMIT** — 8:15 a.m. – 5:15 p.m. The National Summit on Diversity in the Economics Profession, hosted by the Board of Governors of the Federal Reserve System in partnership with the American Economic Association. <http://www.federalreserve.gov/newsevents/conferences/national-summit-diversity-economics-profession-program.htm> 9 a.m. Remarks by Fed Chair Janet Yellen. Location: William McChesney Martin Federal Reserve Board Building, 20th and C streets, NW.

**CANCER POLICY BRIEFING** — 9:30 a.m. Cancer leaders hosts host Special Policy Forum to Inform Development of New Legislation in 2015. Speakers: Rep. Robert "Bobby" Scott (D-VA); Hampton, VA; Edith P. Mitchell, MD, Clinical Professor of Medicine and Medical Oncology, Kimmel Cancer Center at Thomas Jefferson University; Philadelphia, PA; John Harrington, retired Chief Commercial Officer for Sanofi Global Oncology; Cambridge, MA; Heather Follweiler, a cancer survivor alive today due to cancer innovation; Windsor Mill, MD; Nancy Davenport-Ennis, Founder of the National Patient Advocate, Foundation (NPAF) and Patient Advocate Foundation (PAF) and Chair, Project Innovation; Washington, DC. The forum will also feature taped remarks from leading cancer scientists and clinicians. Location: 2168 Rayburn.

**DUNCAN – SCHOOL PRINCIPALS – DAY IN THE LIFE** — 4 p.m. Secretary Duncan will join U.S. Department of Education staff for a Debriefing on the Principal Shadowing Day. The Secretary and ED staff will discuss observations from the day in the life of a school principal and how important principals are in making a

school environment that supports high-quality teaching and learning. Location: Barnard Auditorium, 400 Maryland Ave. SW.

**EXECUTIVE LEADERSHIP FOUNDATION – CLINTON — 6:45 p.m.** Former Secretary of State Hillary Rodham Clinton will be honored for her global work by The Executive Leadership Foundation (ELF). <https://www.elcinfo.com/information/what-we-do/foundation> Location: Gaylord National Harbor Hotel, Potomac Ballroom, 201 Waterfront St., National Harbor, Md.

## **Last Laughs:**

### **LATE NIGHT POLITICAL HUMOR.**

**Jimmy Fallon:** "I saw that next month Joe Biden is scheduled to make international stops in Turkey, Ukraine, and Morocco to discuss foreign policy issues. While his advisers are learning how to say, 'We're sorry' in all three languages."

**Jimmy Fallon:** "The man in charge of investigating the 2012 Secret Service prostitution scandal has quit after he himself was caught with a prostitute. Which explains why President Obama just appointed an irony czar."

**Seth Meyers:** "Former President George W. Bush will be going on a promotional tour for his new book '41.' Bush says he's excited about the book, and he had a great time coloring it."

**Seth Meyers:** "After being threatened with a lawsuit from the nurse who was quarantined in New Jersey this week, Governor Christie said, 'I've been sued lots of times before. Get in line.' Then he added, 'Oh, not this line. This is the line for cronuts. That line. It's over there.'"

**David Letterman:** "Well, I mean, it keeps happening – the White House computers. You know what happened – they were hacked. Yeah, and they stole all of Michelle Obama's secret kale recipes. And then, then they uploaded to the computer naked photos of Joe Biden."

Hi Heather,

Thanks for reaching out! I'm copying in our Press Secretary, Jessica Kershaw, for advice on your question. Jessica will also be traveling with the Secretary for this visit.

Thank you,  
Erin

On Wed, Oct 22, 2014 at 3:14 PM, Knight, Heather <heather.knight@choctaw.org> wrote:

Hi Erin,

Another quick question please. Will we be able to do media photo-ops with our tribal news publication and local media outlets. It would be 1 tribal pub, 2 newspapers and a TV station. I know the time is limited and we can instruct them video footage and photos only for the Secretary. No interviews. We can make time for Chief Anderson to conduct interviews later if required. What are your thoughts?

Thanks!

**To:** Knight, Heather

**Subject:** Re: Secretary Jewell's visit to Mississippi Choctaw Indian Reservation

Hello Heather,

One more note - we would like to schedule a time on Friday to get on the phone with you (and anyone else you think appropriate) to run through the visit and answer any questions on both ends. When you meet today, could you think through a few times that would work for you? I can coordinate schedules on our end.

Thank you,

Erin

On Wed, Oct 22, 2014 at 1:25 PM, Frautschy Barrows, Erin <erin\_frautschybarrows@ios.doi.gov> wrote:

Hello Heather,

Francis forwarded me your message below. Thank you for your thoughtful e-mail! I will answer your questions as best as I can over e-mail, but perhaps it would be easiest for us to arrange a time to get on the phone this afternoon or tomorrow morning to talk through more details. Let me know if that might work for you.

My responses below:

**Tour Date:** Wednesday, October 29, 2014

\*\*\* correct \*\*\*

**Arrival/ Depart Date:** When will Secretary Jewell arrive?

When will Secretary Jewell depart?

\*\*\* We are hoping that the Secretary could visit the school and surrounding area from 8:00am-11:00am, but I wanted to get a sense of your school schedule and see how we could work that in. \*\*\*

**Number of Party:** How many people will travel with the Secretary? Will you provide names and titles?

\*\*\* We are still finalizing the traveling party, but it will likely be one staff person in advance (that will be me), two security detail and a group of 3-6 other staff. Once it's finalized, I will be happy to share names and titles with you. \*\*\*

**Transportation:** Will the Secretary require transportation from the airport? (JAN is approximately 1.5 hours from Choctaw.)

\*\*\* Thank you, but we've already arranged for transportation. \*\*\*

**Lodging:** Will the Secretary stay overnight with us? If so, may we help with your lodging arrangements? What are her rooming preferences? What support staff shall we accommodate and what are their rooming preferences?

\*\*\* Thank you again! But we're already set with hotel arrangements for Tuesday night. \*\*\*

**Timeframes:** What is the timeframe for the Secretary's visit? What time will she have available to tour?

\*\*\* We would like to visit the school and surrounding area from 8-11am. More details on that below under "Goals."  
\*\*\*

**Goals for the Visit:** What are the primary goals for the visit?

Are there any special request for the tour?

What materials can we prepare in advance for Secretary Jewell?

Ideally, we would like to accomplish the following pieces in the visit:

- Tour of the co-located buildings and Choctaw Central High School (1 hour)
- Roundtable discussion with Tribal Education Department Officials and School Officials (1 hour, at Choctaw Central High School)
- Meeting/round table/class with High School Students (we would like to explore what this could look like - the Secretary would appreciate an opportunity to interact with the students, either in a student leaders round table, in a class if appropriate, etc.) (1 hour)

**Special Accommodations:** Are there any special accommodations we sball make?

Will she be available for breakfast, lunch, dinner? Are there any specific requests or food allergies?

\*\*\* Thank you so much, but because of her limited time there, she won't be eating a meal. \*\*\*

I know this is a very tight schedule, and we're hoping to accomplish a lot, but I'm very interested in your thoughts as we start to put this together. I look forward to working with you!

Thanks in advance,

Erin

 To: "francis\_jacobucci@ios.doi.gov" <francis\_jacobucci@ios.doi.gov>  
 Cc: "Anderson, Phyliss" <PAnderson@choctaw.org>

Greetings, Mr. Jacobucci, from the Mississippi Choctaw Indian Reservation.

My name is Heather Knight and I serve under Chief Phyliss J. Anderson's administration as the Deputy Director of Special Projects. I am contacting you on behalf of Chief Anderson to coordinate details for an upcoming visit with Secretary Sally Jewell. We are so honored that the Secretary will visit Choctaw and we want to ensure her visit is productive and provides a comprehensive overview of the tribal schools. I would like to flesh out the limited details I have right now so we may adequately prepare for this visit. Here are a few of the items where I need feedback:

**Tour Date:** Wednesday, October 29, 2014

**Arrival/ Depart Date:** When will Secretary Jewell arrive?

When will Secretary Jewell depart?

**Number of Party:** How many people will travel with the Secretary? Will you provide names and titles?

**Transportation:** Will the Secretary require transportation from the airport? (JAN is approximately 1.5 hours from Choctaw.)

**Lodging:** Will the Secretary stay overnight with us? If so, may we help with your lodging arrangements? What are her rooming preferences? What support staff shall we accommodate and what are their rooming preferences?

**Timeframes:** What is the timeframe for the Secretary's visit? What time will she have available to tour?

**Goals for the Visit:** What are the primary goals for the visit?

Are there any special request for the tour?

What materials can we prepare in advance for Secretary Jewell?

**Special Accommodations:** Are there any special accommodations we shall make?

Will she be available for breakfast, lunch, dinner? Are there any specific requests or food allergies?

I appreciate you taking time to help plan a successful visit. I am listing my contact information below. I look forward to hearing from you soon.

Hi Heather -

Yes, we are absolutely committed to media opportunities with the Secretary and publications/local media, etc. In fact, the Secretary would prefer to be able to do some interviews at the end of the tour and meetings, and would likely want to do that with Chief Anderson - so a joint media gaggle makes sense to me. We are already sort of planning on that anyway.

To that end, can you share - even if just a list in the body of an email - the names out of the outlets and or reporters that you're envisioning would be interested in this school visit?

Thanks, Heather,  
Jessica

Cc: "Frautschy Barrows, Erin" <erin\_frautschybarrows@ios.doi.gov>, Emily Beyer <emily\_beyer@ios.doi.gov>, Lauren Lambert <lauren\_lambert@ios.doi.gov>

The media list we have in mind is below.

Choctaw Community News (paper Choctaw) – Brian Willis, Editor, brian.willis@choctaw.org

Choctaw News (TV Choctaw) – Jeremy Willis, Producer, willisj@choctaw.org

Neshoba Democrat (paper Philadelphia) – Debbie Myers, Managing Editor, dmyers@neshobademocrat.com

The Carthaginian (paper Carthage) – Waid Prather, Editor, thekid@netdoor.com

WTOK (TV Meridian) – Sheila McClain, News Manager, sheila.mclain@wtok.com

WLBT (TV Jackson) – Wilson Stribling, News Director, wstribling@wlbt.com

Clarion Ledger (paper Jackson) – Jerry Mitchell, Reporter, jmitchell@jackson.gannett.com

We will have an updated media list that shows all media in our surrounding area but for now this is the small group that Heather and I thought would be the group we invite. I am working on an invite and will send once reviewed.

Thanks!

All of this information is excellent - thanks very much for pulling the resources together.

We plan to advise the Secretary's travel to Choctaw on Monday afternoon and will plan to follow up with calls to the local TV assignment desks. Would that be the Jackson, MS market? Lauren L in our shop will take the lead here.

As Emily pointed out, we would very much like to have a radio present and Emily usually takes the lead for us on this front. We will defer to your recommendation on which of the two options you presented is best and please let Emily know if you'd like her to make the pitch.

Emily also reaches out to the local AP for us and will certainly plan to do so in this case as well. She will take the lead there.

I think it's ok for you folks to reach out to the balance of the reporters you listed below tomorrow for an off the record heads up and invitation to join for the visit. Is that possible? If so, you can say we'd plan to fold them into the tours, meetings and provide time on the back end for questions with Jewell.

I plan to reach out to Suzette Brewer from Indian Country Today and who writes on education issues tomorrow to invite her to travel with us.

Let's keep this chain going for awareness on responses and feedback through Monday when we advise the trip.

Jessica

## Secretary of the Interior Visits Choctaw Schools

WTOK // Andrea Williams // October 29, 2014

Choctaw, Miss. U.S. Secretary of the Interior Sally Jewell visited Choctaw tribal schools in Mississippi Wednesday.

The purpose for the visit was to examine the Choctaw education system.

Jewell oversees education for all tribal schools in the nation. She says, compared to most tribal schools around the nation, Mississippi's tribal schools have a lot to offer.

"We have a challenge with Indian education across the country," said Jewell. "We are under-performing compared to other students."

Jewell rates the Choctaw School System as one of the best.

She credits much of that to the tribe's hands-on approach, with the chief and tribal council virtually serving as the school board.

"In many other communities we don't see that. We don't have engagement between tribal leaders and the

schools," said Jewell. "Sometimes we run the schools. We run them out of Albuquerque, New Mexico or Washington D.C., and the schools may be all the way across the country."

With the only culinary arts program for students and a competitive solar car contest, which students compete on an international basis, Jewell says the Choctaw education model is now being examined by other tribal schools nationwide.

"We just did grants for a number of schools to learn about these models, to see if they want to mirror the kinds of things that are going on," Jewell said.

"Although we have advanced programs here on the Choctaw Reservation, we will have needs and those needs need to be met in many ways, such as expanding our system and repairing the buildings that we do have," said Choctaw Chief Phyliss Anderson. "And it takes funding for that. We look forward to working with the federal government to see what we can do."

## Tuesday/Wednesday Readout of Jewell Travel

3 messages

**Kershaw, Jessica** <jessica\_kershaw@ios.doi.gov> Wed, Oct 29, 2014 at 3:42 PM  
 To: Kate Kelly <kate\_kelly@ios.doi.gov>, Blake Androff <blake\_androff@ios.doi.gov>, Emily Beyer <emily\_beyer@ios.doi.gov>, Tim Fullerton <tim\_fullerton@ios.doi.gov>, Lauren Lambert <lauren\_lambert@ios.doi.gov>, Sarah Harris <sarah.harris@bia.gov>, Kevin Washburn <kevin.washburn@bia.gov>, Lawrence Roberts <lawrence\_roberts@ios.doi.gov>, "Roessel, Charles" <charles.roessel@bie.edu>, Donald Yu <donald\_yu@ios.doi.gov>, Nikki Buffa <nicole\_buffa@ios.doi.gov>, Tami Heilemann <tami\_heilemann@ios.doi.gov>, Francis Iacobucci <francis\_iacobucci@ios.doi.gov>, Kerry McNellis <kerry\_mcnellis@ios.doi.gov>, Erin Frautschy Barrows <erin\_frautschybarrows@ios.doi.gov>, John Blair <john\_blair@ios.doi.gov>, Sarah Neimeyer <sarah\_neimeyer@ios.doi.gov>, Jeremy Bratt <jeremy\_bratt@ios.doi.gov>, Tommy Beaudreau <tommy\_beaudreau@ios.doi.gov>, Elizabeth Klein <Elizabeth\_Klein@ios.doi.gov>, Nedra Darling <Nedra\_Darling@ios.doi.gov>

Team -

Catching up again with a delayed readout from yesterday and another one for today.

Yesterday's remarks at NCAI were seemingly well received - a really nice outline of progress for Indian Country during the Obama Admin so far with an appropriate pause on Indian Ed. The understanding is that Kevin W. would tee up the narratives for the Secretary to expand upon in her remarks - which worked well. The morning speaking time was early - and might have been why the room wasn't full when the Secretary entered it but it eventually filled and she spent 25 minutes discussing work done, work to be done and progress made.

The media availability afterward was rather hijacked by tribal members who were encouraged to join the Secretary and Kevin in the media room by the moderator (who announced Jewell would take questions afterward - but didn't specify that those questions should come from accredited media). So aside from Indian Country Today who was in the room, it was hard to tell if anyone else was from media and in any case, they couldn't get a word in edgewise with the tribal members present. A few lessons learned there.

Nikki and Sarah or Kevin/Larry can provide a sense for how yesterday's meetings with NIEA folks and the Trust Modernization Taksforce went, both those meetings bookended the speech and media availability well.

Yesterday afternoon's roundtable with tribal leaders and school administrators at the Mississippi Choctaw schools was informative and extremely well run. Erin and I worked to provide them somewhat of an outline to consider for operating the discussion and they worked really well with us to keep the time, provide organized remarks and appropriate discussion. Moving the roundtable to Tuesday and keeping it off the record made sense, provided the discussion points, and subsequently kept today's message appropriately focused on the kids at the schools themselves.

What we found at MBCI is that they have very strong, consistent tribal leadership, well managed revenue from some 10,000 enrolled members and extremely good legal and political representation to make their case where it make sense. It clearly helps - the staff was escorted by trolley around the main parts of the reservation and we saw their wraparound services like IHS and others that are within close proximity for members and students. The reservation is really like no other that the team has seen so far - it felt hopeful, successful (they have a water park for example and a tech manufacturer, etc) and their tribal leadership is strong. They are not without challenges, and they made that clear as well. They'd like new buildings for kids, more housing for families, etc. Others can weigh in here as needed but overall, the Secretary made the case for understanding, propping them up as a model in some cases and making sure they understand that there are other tribes that are struggling much more than MBCI - but that doesn't mean they don't deserve attention as well.

We had a manageable media entourage follow along today to join us in classroom after classroom of students of varying ages so they were able to see the Secretary's connection with kids and the questions she asked, etc. After a short media availability with the tribal chief after the tours, the tribe exchanged gifts with the Secretary

and we were off.

We're headed back to DC now.

Hi team -

Last we spoke we envisioned having the Secretary travel to Mississippi to meet with the Choctaw and visit a school on October 29th, after her travel to NCAI.

Don - you had some concerns about whether Choctaw would necessarily want the attention, but would follow up; any news on that front?

We're hoping to include OMB on this travel, so would be great to nail down by the end of this week so we can reach out Monday to the appropriate contacts on the ground in Mississippi and at OMB.

Thanks, all.

Booch

Hi Derrick and EO-

Thanks for checking in on this.

Derrick- I think if you have updates to the logistical portions of the memo, that's what EO is referring to for your part.

OCO will certainly have updates to the talking points but those will take some time to adjust. We will work with the briefing team directly to make those updates.

EO - we have a briefing with the Secretary on Weds to review remarks so we should have another draft for you around that time.

Iacobucci, Francis <francis\_iacobucci@ios.doi.gov>

Mon, Oct 20, 2014 at 11:50 AM

To: cbrogers@nmlawgroup.com

Cc: EFB <erin\_frautschybarrows@ios.doi.gov>, Donald Yu <donald\_yu@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>, Sarah Hams <sarah.hams@bia.gov>

Good morning, Bryant:

I hope this note finds you well. I'm reaching out to discuss the potential of Secretary Jewell visiting Mississippi on Wednesday, October 29th. The hope is for the Secretary to be able to visit with the Mississippi Band of Choctaw Indians, and likely tour one or more of the CTS schools and meet with school officials and students.

We'd like to discuss this option in more detail, with the appropriate folks on the line. Are you able to hop on the phone this week (tomorrow or Wednesday) to discuss a visit?

Many thanks,  
Booch

## Visit to Choctaw Central High School

4 messages

---

**Frautschy Barrows, Erin** <erin\_frautschybarrows@ios.doi.gov>

Wed, Oct 22, 2014 at 1:29 PM

To: Donald Yu <donald\_yu@ios.doi.gov>, "Roessel, Charles" <charles.roessel@bie.edu>, Sarah Harris <sarah.harris@bia.gov>

Cc: Francis Iacobucci <francis\_iacobucci@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>

Hi all,

I just got off the phone with the Chief's office, and wanted to flag a couple of details to get input:

- They mentioned that down the street from Choctaw Central High School, there is an Occupational Training Center. This is where they have vocational programs for High School students, and where they have their Choctaw Central High School Solar Car team, which has won a number of awards. They would very much like to include a visit to this vocational center as part of the time she's there.

My thoughts are that we could either try to stop by on the tour at the top of the day, or make this piece the student interaction (since High School students will be there), but I'm not sure if that accomplishes the goals of that piece of the visit. Thoughts?

- They also mentioned that there will be a BIE audit team from Albuquerque at the school next week, and wondered if they should be incorporated in any way.

Please let me know if you have any questions.

Thanks,  
Erin

I personally love the idea of seeing the work re: the Solar Car team. Highlighting that dovetails really well with our messages about clean energy and also STEM education.

Monty, Rosie said she was going to be at the school anyway, even before she knew Sally was going? Is she a part of the audit team?

## Indian Country Today Reporter Recommendations

---

Kershaw, Jessica <jessica\_kershaw@ios.doi.gov>

Wed, Oct 22, 2014 at 4:41 PM

To: Nedra Darling <Nedra\_Darling@ios.doi.gov>

Hi ND -

I wanted to cross-check this small set of ICT reporters with you before making any moves to invite one of them to join Jewell while she's on Choctaw next week to continue discussing Indian Ed.

Do you have a strong feeling one way or the other about these recommendations or do you think any of them would be appropriate to invite to travel with us for coverage/attention on the issue?

Thanks for your thoughts here,  
Jessica

Hello Erin,

Good Morning. I am attaching the itinerary we put together for Wednesday's visit with Secretary Jewell. One thing I wanted to note was the addition of a stop at Pearl River Elementary School first thing on Wednesday morning. Chief Anderson indicated that she wanted to make sure the Secretary had an opportunity to see the facility. I have tried to fit in everything we discussed. Staying on time will be key. Please review and provide feedback. We are very excited about this visit and are making preparations to ensure its success.

Some topics I hope to review with you on the call is:

Itinerary

Transportation

Weather

Student Interaction

Media

Thanks!

Heather

**Frautschy Barrows, Erin** <erin\_frautschybarrows@ios.doi.gov> Fri, Oct 24, 2014 at 1:53 PM  
To: "Yu, Donald" <donald\_yu@ios.doi.gov>  
Cc: Charles Roessel <charles.roessel@bie.edu>, Francis Iacobucci <francis\_iacobucci@ios.doi.gov>, "Gabriella (Janou) Gordon" <gabriella\_gordon@ios.doi.gov>, Heather Knight <heather.knight@choctaw.org>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>, Sarah Harris <sarah.harris@bia.gov>

Thanks, Don - we can definitely talk about it.

I wanted to give everyone a heads up that it's looking more and more likely that the Secretary will come to Mississippi earlier than planned on Tuesday, leaving that afternoon/evening open. I think we're going to float that the Tribal and School Officials Round Table move to Tuesday to give us some more wiggle room on Wednesday. I know that most aren't arriving in MS until late Tuesday, so I wanted to flag since staffing will likely be an issue.

Thanks,  
Erin

## Revised DOI Visit Itinerary

7 messages

**Knight, Heather** <heather.knight@choctaw.org>

Fri, Oct 24, 2014 at 5:14 PM

To: "Frautschy Barrows, Erin" <erin\_frautschybarrows@ios.doi.gov>, Charles Roessel <charles.roessel@bie.edu>, Donald Yu <donald\_yu@ios.doi.gov>, Francis Iacobucci <francis\_iacobucci@ios.doi.gov>, "Gabriella (Janou) Gordon" <gabriella\_gordon@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>, Sarah Harris <sarah.harris@bia.gov>

Hello all,

I am attaching the revised itinerary based on the discussion today. Couple more points and questions:

- We are having the media join us starting at Pearl River Elementary School at 8:30 AM.
- We will start the driving tour of the reservation at 8 AM in the Tribal Headquarters parking lot. There everyone will board the Choctaw Trolley.
- Our Physical Address is 101 Industrial Rd, Choctaw, MS. BUT please note many times the GPS systems will send you to a wrong location 2 hours away in Choctaw County. This has happened to some of our visitors before.

Here are the directions we give visitors:

- If you're flying in from out of state, the most convenient airport is the Jackson International Airport. Start by turning right out of the airport on MS-475 N and head North towards I-25 N (Lakeland Drive). Turn right on I-25 and drive for approximately 45-50 minutes, turn right onto Hwy 16 E and drive straight through Carthage (Hwy 16 E).
- Travel through Edinburg (about 5-10 miles outside of Carthage). About 10 miles outside of Edinburg the Hwy splits to a 4 lane. This is the Choctaw Indian Reservation. On this road you will see the Pow-Wow Gas station on your right, Geyser Falls

Entrance to your left, you'll continue straight about ½ mile until you reach the Choctaw Central High School Baseball Stadium. Take the road immediately past the stadium (Recreation Road). There will be a sign that indicates Tribal Headquarters to your left.

- You will travel down Recreation Road approximately ½ mile and the Choctaw Tribal Headquarters will be on your right. There will be three flagpoles in front of the office building.

#### Questions:

- We plan on starting the reservation tour on the trolley. Will the Secretary board the trolley for this tour or will she be in a separate vehicle?
- We plan on Chief and the Secretary riding separately in a tribal fleet vehicle on the transitions from school properties. Is that ok?

Please let me know if you have any questions.

Have a great weekend.

Heather

**Secretary Jewell to Visit Choctaw High School in Mississippi***Secretary to continue discussion regarding educational reform; tribal control of BIE-funded schools*

WASHINGTON, D.C. – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles "Monty" Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"I look forward to meeting with the teachers and students at Choctaw Central High School to hear about what's going well and to better understand where they may be facing challenges," said Secretary Jewell. "We have an enormous opportunity before us to improve educational outcomes for Native American youth and to ensure that students attending BIE-funded schools are provided an academically rigorous and culturally appropriate education, while at the same time increase accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her **Secretarial Order**, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

**WHO:** Sally Jewell, U.S. Secretary of the Interior  
Kevin Washburn, Assistant Secretary, Indian Affairs

**Monty Roessel**, Director, Bureau of Indian Education  
**Phyllis Anderson**, Tribal Chief, Choctaw Tribal School System  
**Willa Brantley**, Director, Division of Schools  
**David Germany**, Director, Department of Schools  
**Rosie Davis**, Associate Deputy Director, Bureau of Indian Education Grant Schools

**WHAT:** Secretarial visit to the Choctaw School in Philadelphia, Mississippi

**WHEN:** Wednesday, October 29, 2014, at 8:00 - 11:00 a.m. CDT

**WHERE:** Choctaw Central High School  
150 Recreation Road  
Choctaw MS 39350

**RSVP:** Credentialed members of the media interested in covering the visit are encouraged to RSVP HERE by October 28, 2014, at 5:00 p.m. CDT in order to receive logistical information for the multi-part visit, including a tour, discussions and media availability.

Hey there,

Just as a reminder, we had this advisory going out at 1:30 and we have the Bay Delta advisory going out at 2:30. Would hate for these announcements to go out so close in time.

I can perhaps move the Bay Delta advisory to 3:00 if need be. Please let me know your thoughts?

Thanks,

Lauren

## DOI Nightly Repor... - NYT Story on North Face partnership

Beyer, Emily <emily\_beyer@ios.doi.gov>  
 To: "Kershaw, Jessica" <jessica\_kershaw@ios.doi.gov>

Mon, Oct 27, 2014 at 3:56 PM

Hey - sorry for the delay - I assumed me and Lauren would need to get this together, so I had already started it before I got this.

I think we're all good, unless you see something wrong here:

### Nightly Report to White House Comms 10/27/14

#### i. Today's Announcements/Press Releases

- Secretary Jewell and the North Face President Todd Spaletto announced a partnership to protect, preserve, and celebrate public lands in support of the 21st Century Conservation Service Corps (21CSC). The North Face has also launched a new commercial campaign as a key component of the initiative, featuring a new recording of Woody Guthrie's iconic anthem "This Land is Your Land" by two-time Grammy nominee My Morning Jacket. The song is available on iTunes with The North Face donating \$250,000 (My Morning Jacket is also contributing its artist fee). Monies raised will create jobs for youth and returning veterans through 21CSC projects on public lands.
- Secretary Jewell to Deliver Keynote Remarks at national Congress of American Indians Annual Convention in Atlanta  
**WASHINGTON, D.C.** – On Tuesday, October 28, U.S. Secretary of the Interior Sally Jewell will deliver keynote remarks at the National Congress of American Indians (NCAI) Annual Convention in Atlanta, Georgia.
- Secretary Jewell to Visit Choctaw High School in Mississippi  
**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.
- Deputy Secretary Mike Connor to Address Bay-Delta Science Conference  
**SACRAMENTO, CA** -- Deputy Secretary of the Interior Mike Connor will address the 8th Biennial Bay-Delta Science Conference on October 28 at the Sacramento Convention Center. Connor has been a leader at the Interior Department on Bay-Delta issues since 2009, when he became the Commissioner of the Bureau of Reclamation and continues to be actively engaged in his current role.

#### ii. Today's Major Interviews

- While in New York, Secretary Jewell participated in a series of live TV hits discussing the partnership between Interior, The North Face and My Morning Jacket.

- o Jewell was scheduled to speak with:
  - The Weather Channel's Wake Up With Al
  - Huffington Post Live
  - Regional TV affiliates including Fox News Edge, the wire service for Fox TV affiliates
  - Affiliates include: NBC Charlotte; NBC Atlanta; CBS Tampa; Fox Ft Myers; CBS Omaha; IND Huntsville; NBC Milwaukee; ABC Las Vegas; ABC Rochester; NBC Seattle; TBD Wichita

### iii. Major Press Inquiries for Awareness/Stories Flagged

- **TIME Magazine - Zeke Miller:** Working on a story related to VIP use of the Brinkerhoff, a historic cabin located in Grand Teton National Park. I
  - o it is our current understanding that the park superintendent, in most cases, waived payment [about \$180/night + \$10/each extra person] because the officials did some official duty while there related to the park.
  - o According the FOIA records that he received from the park (and confirmed in a conversation with a public affairs officer out there), a number of Cabinet and WH officials have stayed there in the past few years (Biden, Duncan, LaHood, Salazar, Jackson, Phil Schiliro, etc).
  - o National Park Service will issue a statement on their policy and how they implemented it and where they used Superintendent discretion.
  - o Expected story publish date is early this week.
- **New York Times - Midwest Desk:** Preparing to write an expose on school construction funding and disrepair of Indian schools - target date is mid-October
  - o Secretary Jewell completed her interview with Mitch Smith 10/16/14.
  - o On the record interview was held 10/10/14 w/BIE Director & Ed Senior Adviser and Mitch Smith.
  - o *Story publish date is likely before the end of the month.*
- **Minneapolis Star Tribune:** Preparing to write an editorial on school construction funding for Indian schools - target date is end of October.
  - o Interview completed 10/17 with BIE Director and Senior Adviser from ED, detailed to DOI to discuss the BIE transformation initiative.
  - o Editorial publish date is likely this weekend.
  - o *Secretary Jewell will provide written responses today 10/24, as requested by the Editorial writer. Note: Jewell will be directly quoted in the editorial.*

### iv. Social Media/Digital Amplification

- N/A

### v. Major Clips to Flag

- Telling Urbanites to Flee the Cities

The New York Times // Andrew Adam Newman // October 26, 2014

So popular are puffy down jackets made by the North Face that a winter visitor to Manhattan might suspect the coats were issued with every subway card, but advertising for the 48-year-old brand has always eschewed images of bundled-up urbanites, focusing instead on outdoor adventurers climbing snowy peaks or swooshing down ski slopes.

## Secretary Jewell to Visit Choctaw High School in Mississippi

*Secretary to continue discussion regarding educational reform;  
tribal control of BIE-funded schools*

**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"I look forward to meeting with the teachers and students at Choctaw Central High School to hear about what's going well and to better understand where they may be facing challenges," said Secretary Jewell. "We have an enormous opportunity before us to improve educational outcomes for Native American youth and to ensure that students attending BIE-funded schools are provided an academically rigorous and culturally appropriate education, while at the same increase accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her Secretarial Order, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

**WHO:** **Sally Jewell**, U.S. Secretary of the Interior  
**Monty Roessel**, Director, Bureau of Indian Education  
**Phyllis Anderson**, Tribal Chief, Choctaw Tribal School System  
**Willa Brantley**, Director, Division of Schools  
**David Germany**, Director, Department of Schools  
**Rosie Davis**, Associate Deputy Director, Bureau of Indian Education Grant Schools

**WHAT:** Secretarial visit to the Choctaw School in Philadelphia, Mississippi

**WHEN:** Wednesday, October 29, 2014, at 8:00- 11:00 a.m. CDT

**WHERE:** Choctaw Central High School  
150 Recreation Road  
Choctaw MS 39350

**RSVP:** Credentialed members of the media interested in covering the visit are encouraged to RSVP HERE by October 28, 2014, at 5:00 p.m. CDT in order to receive logistical information for the multi-part visit, including a tour, discussions and media availability.

## Secretary Jewell to Visit Choctaw High School in Mississippi

*Secretary to continue discussion regarding educational reform;  
tribal control of BIE-funded schools*

**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"I look forward to meeting with the teachers and students at Choctaw Central High School to hear about what's going well and to better understand where they may be facing challenges," said Secretary Jewell. "We have an enormous opportunity before us to improve educational outcomes for Native American youth and to ensure that students attending BIE-funded schools are provided an academically rigorous and culturally appropriate education, while at the same time increase accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her Secretarial Order, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

 **10-27-14 BIE Choctaw School Visit Advisory - FINAL.docx**  
93K

Jacobucci, Francis <francis\_jacobucci@ios.doi.gov> Mon, Oct 27, 2014 at 5:10 PM  
To: "Lambert, Lauren" <lauren\_lambert@ios.doi.gov>, Kate Kelly <kate\_kelly@ios.doi.gov>, Emily Beyer <emily\_beyer@ios.doi.gov>, Jessica Kershaw <jessica\_kershaw@ios.doi.gov>  
Cc: EFB <erin\_frautschybarrows@ios.doi.gov>

Team - not sure if EFB's earlier emails came through, but the press should plan on meeting at the Pearl River Elementary School for an 8:30am beginning of the tour. Address is 101 Industrial Road, Choctaw, MS. It's a difficult address to find, as you might imagine, so here are directions provided by the Tribe:

Here are the directions we give visitors:

- If you're flying in from out of state, the most convenient airport is the Jackson International Airport. Start by turning right out of the airport on MS-475 N and head North towards I-25 N (Lakeland Drive). Turn right on I-25 and drive for approximately 45-50 minutes, turn right onto Hwy 16 E and drive straight through Carthage (Hwy 16 E).
- Travel through Edinburg (about 5-10 miles outside of Carthage). About 10 miles outside of Edinburg the Hwy splits to a 4 lane. This is the Choctaw Indian Reservation. On this road you will see the Pow-Wow Gas station on your right, Geyser Falls Entrance to your left, you'll continue straight about ½ mile until you reach the Choctaw Central High School Baseball Stadium. Take the road immediately past the stadium (Recreation Road). There will be a sign that indicates Tribal Headquarters to your left.
- You will travel down Recreation Road approximately ½ mile and the Choctaw Tribal Headquarters will be on your right. There will be three flagpoles in front of the office building.

Mon, Oct 27, 2014 at 5:28 PM

A couple more corrections from Heather and Misty:

Choctaw Tribal Council Offices  
101 Industrial Road

Bus departs promptly at 8:25

Phyliss Anderson, Tribal Chief, Mississippi Band of Choctaw Indians  
(Name spelled wrong and title correction)

Secretarial Visit to the Choctaw Tribal Schools in Philadelphia, Mississippi  
(Schools sometimes get confused for Choctaw Cty Schools)

Erin Frautschy Barrows  
Deputy Director for Advance  
Department of the Interior  
202.208.5078 (o)  
202.341.0273 (c)

Huh - speaks to the importance of running our advisory past the tribe first... and it looks like we missed that step here, eh?

Jessica - we don't think any of these changes merit re-advising to the whole list. Rather, Lauren can updated online and we can send the new version to Mississippi tomorrow?

Yep - LL, EFB and the tribal folks and I discussed this on another chain earlier after some of the logistics were flagged. I think we got jammed up on timing with this one but I agree, and we will make the changes online and I told LL to re advise to MS only tomorrow with the new/updated logistics.

Team -

Sending a quick update this AM as I ran out of steam by the time we settled down in Atlanta last night. That's likely because we started our Monday in NYC with 2 strong TV interviews on Wake Up With Al beginning at 620 AM paired with The North Face and then we didn't stop until about 1pm with multiple other interview opportunities.

The Secretary got a lot of practice with local TV yesterday as we worked through 20+ regional tv interviews, again paired with the North Face amplifying the latest news for the 21CSC. It was certainly a different way to announce this news - but in an effort to try new and creative ways to get the word out on this initiative, this was quite a way to make a splash. Each interview got better and better with the Secretary and The North Face Exec getting into a groove - turns out those joint interviews aren't always that easy.

We ended the media blitz with a very, very strong Huffington Post Live in-studio interview where we were greeted and sent off by New York paparazzi (Secretary felt really cool!) and she was on top of her game - talking 21 CSC, climate change, fracking, KXL, relationship with POTUS and more. We will share the clip if you didn't watch it live. It's worth the time in watching.

Big day for the 21 CSC and kudos to David for working through a really innovative partnership. With the TV interviews, the NY Times framing article on Sunday night, HuffPo and more, the bar has been raised to say the least. Will be curious to share the actual coverage aired to get the best sense of how well the media blitz did but we felt great coming out of NYC, if not exhausted.

Onto the keynote at NCAI this AM with meetings and then MS for a roundtable with school leaders at Choctaw - and an all female crew en tow...minus Marcus!

### **UPDATE: Secretarial Visit to the Choctaw Tribal Schools in Philadelphia, Mississippi** *Secretary to continue discussion regarding educational reform; tribal control of BIE-funded schools*

WASHINGTON, D.C. – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles "Monty" Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"We know we have a critical need before us to improve educational outcomes for students attending BIE-funded schools," said Secretary Jewell. "That's why I'm looking forward to spending time with students and teachers at Choctaw Central High School this week to learn about what's going well and to better understand where they may be facing challenges. As we work to transform the way Indian education is delivered, we owe it to Native American youth to provide an academically rigorous and culturally appropriate education while at the same increasing accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess

systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her **Secretarial Order**, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

Heather -

Wanted you to be aware of what we released today ahead of Secretary Jewell's visit to the Nation on Wednesday. We issued this to our Native American press list as well as our general MS press list. Please feel free to forward to those reporters your folks were reaching out to last week and others as you feel appropriate. There is an RSVP link below - we'd appreciate RSVPs so we know what we're dealing with prior to Weds.

Thank you,  
 Jessica

Jessica,

Heather just forwarded this to me and I received one from Mr. Ayoob earlier today. I noticed a few details that I was wondering if you could change, if at all possible. I get that this has already gone out and if the change can't happen it's fine. I want to be able to say that I requested it just in case Chief Anderson asks me. I'm sure you understand. ☺

Chief Anderson's name is spelled wrong and the title is slightly off. It should read Phyliss J. Anderson, Tribal Chief, Mississippi Band of Choctaw Indians. That is Phyliss with two s'. Yes she's Tribal Chief and ultimately over the Choctaw Tribal Schools but we usually have it as Tribal Chief, MBCI.

Also the meet location is actually at a different spot but we can redirect those vehicles if need be. You could update when you send further information after the RSVP comes in. We are asking everyone to come to the Tribal Council Offices parking lot at 101 Industrial Road. Again it's essentially the same location. Right across the street from each other. High School Security can re-direct. I should have mentioned on the call that parking at the high school would be limited and a bit crazy at 8am due to start of school mess that happens every school day.

Thanks!

Misty

Misty -

I'm sorry about this. Yes, we will make the spelling and title change online and we plan to readvise on Weds AM (or could tomorrow afternoon too) and we can update the logistics at that time.

Lauren - can you take the lead on the spelling and title change online please?

Hey Jessica,

Changes were made online before I left today. Those changes will also be reflected when we re-advise Wednesday.

I think they assumed they could just tell me when I walked through the logistics with them this afternoon. They weren't included in the review of the advisory.

However, the advisory didn't reflect the latest information that Heather sent us on Friday, so I'm not sure what happened there.

Bah - ok.

Lauren - when you update the advisory to send to MS press only today, can you send to Erin first to be sure it reflects the logistics appropriately? This is my fault for not taking more time to run the draft past the tribe yesterday.

Thank you!

Oh gosh don't be sorry Jessica. I have your back.

I will make the changes in gov delivery since that is the latest. Changes were made online around 5:30 unless there were new additions after I left for the day.

I will send this out as an "UPDATE" to MS and again re-advise on Wednesday as a "Reminder" to PAM.

I can put this on the messaging doc to go out at 10:00 am ET to give Erin time to make sure logistics are perfect.

How does this sound?

## **UPDATE: Secretarial Visit to the Choctaw Tribal Schools in Philadelphia, Mississippi**

*Secretary to continue discussion regarding educational reform; tribal control of BIE-funded schools*

**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"We know we have a critical need before us to improve educational outcomes for students attending BIE-funded schools," said Secretary Jewell. "That's why I'm looking forward to spending time with students and teachers at Choctaw Central High School this week to learn about what's going well and to better understand where they may be facing challenges. As we work to transform the way Indian education is delivered, we owe it to Native American youth to provide an academically rigorous and culturally appropriate education while at the same increasing accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational

strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her Secretarial Order, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

**WHO:** Sally Jewell, U.S. Secretary of the Interior  
Kevin Washburn, Assistant Secretary, Indian Affairs  
Monty Roessel, Director, Bureau of Indian Education  
Rose Davis, Associate Deputy Director, Bureau of Indian Education Grant Schools  
Phyliss Anderson, Tribal Chief, Mississippi Band of Choctaw Indians  
Willia Brantley, Director, Division of Schools  
David Germany, Director, Department of Schools

**WHAT:** Secretarial visit to the Choctaw School in Philadelphia, Mississippi

**WHEN:** Wednesday, October 29, 2014  
8:15 a.m. CDT - Arrival  
8:25 a.m. CDT - Shuttle departs

**WHERE:** Choctaw Tribal Council Offices  
101 Industrial Road  
Choctaw MS 39350

**RSVP:** Credentialed members of the media interested in covering the visit are encouraged to RSVP HERE by October 28, 2014, at 5:00 p.m. CDT in order to receive logistical information for the multi-part visit, including a tour, discussions and media availability.

Thanks, Lauren and Jessica.

The only thing I'd flag is that on their schedule they list Willa Brantley as the "Education Division Director" and David Germany as the "Tribal Schools Director." I know that I have them listed as you do above in the schedule; I'm not sure why there's a discrepancy but I can ask Heather to clarify.

It might be helpful to just run this by Misty and Heather - are you OK with me forwarding?

Thanks,  
Erin

I'll check into this - for our trips, there is typically a blanket agreement for us of photos and videos. I think we could tweet this based on that but will let Tami weigh in and then go to Tim for posting.

Are you comfortable with this tweet to accompany the pic (it fits w/1 character to spare):

Happy to join MBCI youth today & join in part of their language lesson - we owe all Native kids a chance for a bright future like this -SJ

(We need to use the acronym for MS Band of Choctaw instead of just Choctaw per Sarah Harris).

Here are my edits on Choctaw.

A few things to note:

we have to be vigilant not to misspell the name... I changed it a few times in the release

please update the rsvp date

Lauren, this is a lower priority than than the youth and ncai stuff, so feel free to put this on the backburner for a minute.

On Thu, Oct 23, 2014 at 9:35 PM, Kershaw, Jessica <jessica\_kershaw@ios.doi.gov> wrote:

Kate -

Attached is the Choctaw advisory to accompany other public facing materials for next week's Native American focus.

I made relatively few edits to this version of which Frank/Lauren worked up but would look to you for the final call on whether to include the reference to Ali joining the group of travelers.

Thanks for the review.

On Wed, Oct 22, 2014 at 12:36 PM, Kershaw, Jessica <jessica\_kershaw@ios.doi.gov> wrote:

Hi Kate -

After the briefing/discussion this morning, I'm not sure I'd change much of this advisory at this point for NCAI.

We think this is ready for your review at your convenience,

Jessica

## Secretary Jewell to Deliver Keynote Remarks at National Congress of American Indians Annual Convention in Atlanta

WASHINGTON, D.C. – On Tuesday, October 28, U.S. Secretary of the Interior Sally Jewell will deliver keynote remarks at the National Congress of American Indians (NCAI) Annual Convention in Atlanta, Georgia.

As chair of the White House Council on Native American Affairs, Secretary Jewell will highlight progress made by the Obama Administration to promote tribal self-determination and sovereignty, strengthen the federal government's trust relationship with American Indian tribes and Alaska Native communities and advanced self-reliance and self-government.

As part of President Obama's commitment to assist tribal leaders in building stronger, safer and more prosperous communities, Jewell will also discuss progress to transform and strengthen Indian education, invest in tribal energy and economic development as well as climate change adaptation initiatives launched by the White House Council on Native American Affairs.

Hello,

Attached and below is the draft Choctaw advisory we plan to issue at 1:30 p.m. ET today.

**Please let me know by 12:30 a.m. today if you have any edits.**

Thanks,

Lauren

## Secretary Jewell to Visit Choctaw High School in Mississippi

*Secretary to continue discussion regarding educational reform;*

*tribal control of BIE-funded schools*

**WASHINGTON, D.C.** – As part of the Obama Administration's commitment to ensure all students attending Bureau of Indian Education-funded schools receive a high quality, culturally appropriate education, U.S. Secretary of the Interior Sally Jewell and Bureau of Indian Education Director Dr. Charles 'Monty' Roessel will visit Choctaw Central High School near Philadelphia, Mississippi on Wednesday, October 28, 2014, to discuss ongoing Indian education reform initiatives.

"I look forward to meeting with the teachers and students at Choctaw Central High School to hear about what's going well and to better understand where they may be facing challenges," said Secretary Jewell. "We have an enormous opportunity before us to improve educational outcomes for Native American youth and to ensure that students attending BIE-funded schools are provided an academically rigorous and culturally appropriate education, while at the same increase accountability throughout the BIE school system."

The Choctaw Tribal School System, located in the east central Mississippi counties of Neshoba, Leake and Newton, serves approximately 2,100 students in eight schools, including six elementary schools, one middle school and one high school. Jewell will visit the high school and meet with school administrators and students to discuss educational strategies and ongoing reform efforts at BIE-funded schools.

In 2013, Jewell and U.S. Secretary of Education Arne Duncan organized an American Indian Education Study Group to assess systemic issues within BIE-funded schools and to propose a comprehensive Blueprint for Reform to ensure all students attending BIE-funded schools receive a high quality education.

The Secretary's visit builds on her Secretarial Order, released on the heels of President Obama's historic visit to Indian Country earlier this year that seeks to restructure and redesign the BIE, transforming the agency from solely a provider of education into a capacity-builder and service-provider to tribes that will control and operate BIE-funded schools.

**WHO:** **Sally Jewell**, U.S. Secretary of the Interior

**Monty Roessel**, Director, Bureau of Indian Education

**Phyllis Anderson**, Tribal Chief, Choctaw Tribal School System

**Willa Brantley**, Director, Division of Schools

**David Germany**, Director, Department of Schools

**Rosie Davis**, Associate Deputy Director, Bureau of Indian Education Grant Schools

**WHAT:** Secretarial visit to the Choctaw School in Philadelphia, Mississippi

**WHEN:** Wednesday, October 29, 2014, at 8:00- 11:00 a.m. CDT

**WHERE:** Choctaw Central High School

150 Recreation Road

Choctaw MS 39350

**RSVP:** Credentialed members of the media interested in covering the visit are encouraged to RSVP HERE by October 28, 2014, at 5:00 p.m. CDT in order to receive logistical information for the multi-part visit, including a tour, discussions and media availability.

Removing Frank and Tim B for an initial discussion first.

I know we are trying to keep this short and sweet, and I hope I'm not too late to the party here, but I had envisioned something that was a bit more comprehensive of our actions this year that was geared toward tribal leaders and Indian Country specifically. (ie a bit more of a victory lap of how much the Secretary has been personally invested in these efforts -- I think we have a fairly compelling story to tell her so I would be looking for more anecdotes of her travels and her specific visits).

Feel free to overrule me here if resources don't allow us to quickly turn this around.

We could also keep this short by ticking through these in a rather quick manner. ("In October, the Department announced it was investing \$X million to help tribal communities adapt to the impacts of climate change. In June, the Secretary unveiled new efforts to spur economic activities in Indian Country," etc.)

To that end, I think we should discuss including the following -- and would note that this is rather inclusive so not everything needs to be added but wanted to provide a host of ideas from which we can discuss:

-HEARTH Act signings (I know we traveled for one in Nov 2013 but can't remember if we did any in 2014)

-The package of regulatory reforms to spur economic development (<http://www.doi.gov/news/pressreleases/on-the-heels-of-historic-presidential-visit-to-indian-country-secretary-jewell-announces-interior-initiatives-to-support-tribal-led-economic-development.cfm>)

-Since we make a reference to climate change but don't have any specifics, we might consider using the tribal grants for climate change (<http://www.doi.gov/news/pressreleases/secretary-jewell-announces-new-tribal-climate-resilience-program.cfm>)

-For education reform, I think it's worth noting the schools she visited and with whom. (Chocktaw: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-choctaw-high-school-in-mississippi.cfm>) (Maine and Minnesota: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-secretary-duncan-to-visit-indian-school-in-maine.cfm>) (Laguna in Dec 2013: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-laguna-pueblo-school-discuss-american-indian-education-initiatives.cfm>) (Navajo: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-kick-off-multi-state-swing-promoting-major-department-priorities.cfm>)

-Joined DAS Roberts to discuss the Administration's budget priorities tribal summit in April (<http://www.doi.gov/news/pressreleases/secretary-jewell-underscores-presidents-commitment-to-build-strong-resilient-tribal-communities-at-pacific-northwest-tribal-summit.cfm>)

-Her participation (and that of the Cabinet) hosting the White House Council on Native American Affairs meetings (<http://www.doi.gov/news/pressreleases/secretary-jewell-convenes-fourth-meeting-of-the-white-house-council-on-native-american-affairs.cfm>)

-Her participation at the National Congress of American Indians, if there is anything to note from her participation here (<http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-deliver-keynote-remarks-at-national-congress-of-american-indians-annual-convention-in-atlanta.cfm>)

Blake -

I like your suggestions on a variety of these topics and have gone into the script to reflect where I think we can add some of them.

In the interest of keeping this manageable and shorter (so people/reporters actually watch), and we can write to the visuals we have on hand, I think we should focus on these suggestions:

List of schools and who she met with  
Climate Change Grants  
White House Council Mtgs reference/progress.

I've gone in and added space for each of these - Tim B just needs to write a sentence for each, based off the links provided.

Blake -

I like your suggestions on a variety of these topics and have gone into the script to reflect where I think we can add some of them.

In the interest of keeping this manageable and shorter (so people/reporters actually watch), and we can write to the visuals we have on hand, I think we should focus on these suggestions:

List of schools and who she met with  
Climate Change Grants  
White House Council Mtgs reference/progress.

I've gone in and added space for each of these - Tim B just needs to write a sentence for each, based off the links provided.

On Tue, Nov 25, 2014 at 11:29 AM, Androff, Blake <blake\_androff@ios.doi.gov> wrote:

Removing Frank and Tim B for an initial discussion first.

I know we are trying to keep this short and sweet, and I hope I'm not too late to the party here, but I had envisioned something that was a bit more comprehensive of our actions this year that was geared toward tribal leaders and Indian Country specifically. (ie a bit more of a victory lap of how much the Secretary has been personally invested in these efforts -- I think we have a fairly compelling story to tell her so I would be looking for more anecdotes of her travels and her specific visits).

Feel free to overrule me here if resources don't allow us to quickly turn this around.

We could also keep this short by ticking through these in a rather quick manner. ("In October, the Department announced it was investing \$X million to help tribal communities adapt to the impacts of climate change. In June, the Secretary unveiled new efforts to spur economic activities in Indian Country," etc.)

To that end, I think we should discuss including the following -- and would note that this is rather inclusive so not everything needs to be added but wanted to provide a host of ideas from which we can discuss:

-HEARTH Act signings (I know we traveled for one in Nov 2013 but can't remember if we did any in 2014)

-The package of regulatory reforms to spur economic development (<http://www.doi.gov/news/pressreleases/on-the-heels-of-historic-presidential-visit-to-indian-country-secretary-jewell-announces-interior-initiatives-to-support-tribal-led-economic-development.cfm>)

-Since we make a reference to climate change but don't have any specifics, we might consider using the tribal grants for climate change (<http://www.doi.gov/news/pressreleases/secretary-jewell-announces-new-tribal-climate-resilience-program.cfm>)

-For education reform, I think it's worth noting the schools she visited and with whom. (Chocktaw: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-choctaw-high-school-in-mississippi.cfm>) (Maine and Minnesota: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-secretary-duncan-to-visit-indian-school-in-maine.cfm>) (Laguna in Dec 2013: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-visit-laguna-pueblo-school-discuss-american-indian-education-initiatives.cfm>) (Navajo: <http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-kick-off-multi-state-swing-promoting-major-department-priorities.cfm>)

-Joined DAS Roberts to discuss the Administration's budget priorities tribal summit in April (<http://www.doi.gov/news/pressreleases/secretary-jewell-underscores-presidents-commitment-to-build-strong-resilient-tribal-communities-at-pacific-northwest-tribal-summit.cfm>)

-Her participation (and that of the Cabinet) hosting the White House Council on Native American Affairs meetings (<http://www.doi.gov/news/pressreleases/secretary-jewell-convenes-fourth-meeting-of-the-white-house-council-on-native-american-affairs.cfm>)

-Her participation at the National Congress of American Indians, if there is anything to note from her participation here (<http://www.doi.gov/news/mediaadvisories/secretary-jewell-to-deliver-keynote-remarks-at-national-congress-of-american-indians-annual-convention-in-atlanta.cfm>)

**Re: Notice of Deposition of Secretary of Interior Sally Jewell in *The Chickasaw Nation and the Choctaw Nation v. The Department of the Interior, et al.*, No. Civ-05-01524-W**

Dear Ms. Tompkins,

I write to inform you of Plaintiffs' intent to take the deposition of Secretary Sally Jewell in the above referenced litigation. A copy of the Notice of Deposition for Secretary of Interior Jewell, which I am concurrently sending to all attorneys of record in this case, is attached. Secretary Jewell is a named defendant in the above referenced litigation in her official capacity as Secretary of the Interior. Secretary Jewell's testimony is of significant relevance to Plaintiffs, the Chickasaw Nation and the Choctaw Nation. Accordingly, Plaintiffs are entitled to take Secretary Jewell's deposition.

As our discovery deadline is February 15, I have noticed the deposition for February 12, 2014. I also have set the location of the deposition as the offices of the Department of Interior in order to accommodate Secretary Jewell. However, given the Secretary's busy schedule, we are happy work with you to change the date, time and location of the deposition to the extent that it is necessary, within the confines of the February 15 discovery deadline. Please let me know if there is a date and location that is preferable.

Please feel free to contact me at [mburrage@whittenburrage.com](mailto:mburrage@whittenburrage.com), or 405-516-7800 if you have any questions.

January 22, 2015

## News Release

Date: October 1, 2014

Contacts: [Interior\\_Press@ios.doi.gov](mailto:Interior_Press@ios.doi.gov)

### **Interior Transfers Another \$1 Million from Land Buy-Back Program to Cobell Education Scholarship Fund**

*Scholarships will fund opportunities for American Indian and Alaska Native students*

**WASHINGTON, D.C.** – The U.S. Department of the Interior today announced that an additional \$1 million has been transferred to the Cobell Education Scholarship Fund, bringing the total transferred in 2014 to more than \$4.5 million. The Scholarship Fund was authorized by the historic Cobell Settlement and is funded in part by the Land Buy-Back Program for Tribal Nations (Buy-Back Program). The Scholarship Fund provides financial assistance through scholarships to American Indian and Alaska Native students wishing to pursue post-secondary education and training.

“The scholarships awarded through this fund will give Native American students the opportunity to pursue their educational dreams so that they can become full-fledged participants in charting the future course of Indian Country positively impact tribal communities, as students gain valuable skills, technical abilities and professional expertise which can strengthen institutional development and spur social and economic progress across Indian Country,” said Interior Solicitor Hilary Tompkins, who played a key role in establishing the scholarship program. “This investment in our next generation of tribal leaders will be a lasting, living legacy for Indian nations.”

The Scholarship Fund is administered by the American Indian College Fund in Denver, Colorado, with 20 percent directed to the American Indian Graduate Center in Albuquerque, New Mexico. A five-member Board of Trustees oversees and supervises the activities of the fund administrator. More information about the Cobell Education Scholarship Program can be found at the [American Indian College Fund website](http://www.aicf.org).

Interior makes quarterly transfers, up to \$60 million total, from Buy-Back Program sales to the Scholarship Fund based on a formula that sets aside a certain amount of funding depending on the value of the fractionated interest sold. These contributions do not reduce the amount that an owner will receive for voluntarily consolidating their interests.

The Buy-Back Program was created to implement the land consolidation component of the Cobell Settlement, which provided \$1.9 billion to purchase fractionated interests in trust or restricted land from willing landowners. Consolidated interests are transferred to tribal government ownership for uses benefiting tribal members and their community.

To date, the Buy-Back Program has successfully concluded transactions worth nearly \$142 million and has restored the equivalent of more than 278,000 acres of land to tribal ownership.

Offers are currently pending at a number of locations with deadlines approaching soon. Landowners can contact the Trust Beneficiary Call Center at 888-678-6836 with questions about their purchase offers. Individuals can also visit their local Office of the Special Trustee for American Indians (OST) or Bureau of Indian Affairs (BIA) office, or find more information at [www.doi.gov/buybackprogram/landowners](http://www.doi.gov/buybackprogram/landowners) in order to make informed decisions about their land.

Individual participation is voluntary. The process for selling fractionated interests is separate from individual settlement payments from the Cobell Settlement, which are being handled by the Garden City Group. Inquiries regarding Settlement payments should be directed to 800-961-6109.

Androff, Blake &lt;blake\_androff@ios.doi.gov&gt;

## Week Ahead + Items of Note

1 message

Beyer, Emily &lt;emily\_beyer@ios.doi.gov&gt;

Thu, Oct 2, 2014 at 5:08 PM

Bcc: os\_oco@ios.doi.gov

On October 7, Secretary Jewell may visit Cape May National Wildlife Refuge in New Jersey to tour ongoing restoration projects and to discuss the awarding of Hurricane Sandy contracts at several National Wildlife Refuges (NWR), including: the Long Island NWR Complex, Cape May NWR and Forsythe NWR.

On Sunday October 5, Secretary Jewell will attend the American Veterans Disabled for Life Memorial's dedication ceremony. The Memorial is located on a 2.4-acre triangular site bordered by Washington Avenue SW, C Street SW and Second Street SW, behind the U.S. Botanic Garden and within view of the U.S. Capitol. The NPS has been collaborating with the Disabled Veterans' Life Memorial Foundation, Inc. regarding the opening. CBS has already aired a preview on *CBS Sunday Morning* (September 28) which included interviews with an NPS employee and disabled veteran who will be responsible for coordinating volunteer groups to clean and provide minor maintenance for the memorial once it opens.

On October 7, Secretary Jewell will travel to Atlantic City, NJ, to deliver keynote remarks at AWEA's Offshore Windpower Conference. Following the President's speech on the economy this week, the Secretary's remarks will focus on the economic opportunities of renewable energy. Later in the day, the Secretary will travel to Cape May National Wildlife Refuge to award a contract to implement a Hurricane Sandy coastal resilience projects. This visit will highlight the importance of natural resources to maintaining community and economic resilience in the face of climate change ahead of the White House release of the Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources.

On October 14, Secretary Jewell will travel to Boise, Idaho, to tour innovative sagebrush steppe ecosystem conservation efforts, meet with local ranchers, private landowners, employees, and other stakeholders. We may issue a readout. The visit comes on the heels of a similar visit to Lakeview, Oregon, last week and a visit to Craig, Colorado, earlier this year.

**20141002 Week Ahead.doc**  
1052K

**WEEKLY REPORT  
TO THE  
SECRETARY OF THE  
INTERIOR**

**September 29-October 3, 2014**

**CLOSE HOLD – DO NOT COPY – DO NOT DISTRIBUTE  
BEYOND PRESIDENTIALLY APPOINTED DOI EMPLOYEES**

**WEEK-AHEAD REPORT: NATIONAL PARK SERVICE**  
**October 1 – October 11, 2014**

**Highlights of Travel, Meetings, and other Public Events**

*Legislative Testimony:*

None.

*Meetings:*

October 6, the National Park System Advisory Board's Urban Committee will meet in DC; Jon, Peggy, and Christy will be attending portions of the meeting.

October 7, Jon will host a NPS webchat focusing on the Centennial and the role for parks.

*Travel:*

October 8, Jon will be in Baltimore for a meeting focusing on the Susquehanna River Watershed and its future.

October 11, Jon will participate in the World Heritage site dedication at Poverty Point in Louisiana.

October 11, Peggy will be at Ozark National Scenic Riverways for 50<sup>th</sup> anniversary events.

**Public Announcements**

October 1

On Wednesday, October 1, NPS will highlight a meeting on the National Park Service's Latino Scholars Expert Panel and announce 13 matching grants in States across the country totaling \$500,000, to help increase the number of listings in the National Register of Historic Places that are associated with underrepresented communities, including American Latino, African American, Asian American, Native American and LGBT sites.

October 2

On October 2, NPS will announce the national park fee free days for 2015. There will be a total of nine fee free days: Monday, January 19; Saturday-Monday, February 14-16; Saturday-Sunday, April 18 - 19; Tuesday, August 25; Saturday, September 26; and Wednesday, November 11.

On October 2, Rep. Ken Calvert (R-CA-42) Chairman, Appropriations Subcommittee, Interior, Environment, and Related Agencies, will visit Joshua Tree National Park (CA).

On October 2, 2014, Petroglyph National Monument (NM) is tentatively scheduled to reopen the trail at Rinconada Canyon to the public. The trail was damaged during the September 2013 intense thunderstorm events. Trail crews were able to install erosion control structures and post and cable along the side of the trail to guide visitors and reduce braided trails. Other areas of the park damaged by the storms remain closed until planning and compliance can be completed.

October 3

Nothing to report

#### October 4

October 4-19, The Wilderness Inquiry Canoemobile will be delivering programming along the Lower Delaware River and its tributaries. Canoemobile is a fleet of vans, each with six 24' Voyager canoes, that delivers place-based education on urban rivers and waterways nationwide. As many as 2,400 minority and underserved youth in the four largest cities along the Lower Delaware River (Camden, NJ; Philadelphia, PA; Chester, PA; and Wilmington, DE) will experience, enjoy, and learn about the Delaware and its tributaries. On October 7, there will be a press event on the Camden Waterfront at Wiggins Park Marina. A second Canoemobile fleet will be visiting the Harlem River and other locations in New York City from October 6th through 17th.

On October 4, the Event Marketing Group is sponsoring a "Tour of the Moon" bicycle tour at Colorado National Monument. Up to 2,000 bicyclists will travel the 23-mile section of Rim Rock Drive as one part of a larger route that begins and ends in Grand Junction, CO. The route will be different this year with the tour traveling west to east on Rim Rock Drive in an effort to spread out the participants, thus eliminating any need for road closures.

#### October 5

October 5, a dedication ceremony will be held for the American Veterans Disabled for Life Memorial (DC). Several high-level officials are expected to participate. After the dedication, the NPS will be responsible for the memorial as part of the National Mall and Memorial Parks. The Disabled Veterans' Life Memorial Foundation raised the funds and led the effort to establish and build the memorial. The memorial is located behind the U.S. Botanic Garden and within view of the U.S. Capitol. The NPS has been collaborating with the Disabled Veterans' Life Memorial Foundation, Inc. regarding the opening, and CBS is planning a preview of the memorial, which will air on three programs: *CBS Sunday Morning*, September 28; *CBS This Morning*, October 2 or 3; and, *CBS Evening News*, October 3 or 4. CBS will interview an NPS employee and disabled veteran who will be responsible for coordinating volunteer groups to clean and provide minor maintenance for the memorial once it opens.

During the week of October 5, public stakeholder meetings will be held to get input on a Transportation Planning Study for Wolf Trap National Park for the Performing Arts (VA). Public input is now sought during the evaluation phase of the study. The final report will include recommendations for physical and operational improvements and opportunities to reduce vehicular usage.

#### October 6

Nothing to report

#### October 7

On October 7 and 8, Colorado National Monument (CO) will hold public meetings to discuss safety issues along the park's East Hill Road public right-of-way over vehicle size, cargo, speed and other concerns. The listening sessions arise from local criticism over the park's decision in June (superintendent's compendium revision), since rescinded, to restrict hazardous cargo vehicles (propane delivery trucks, primarily) in winter over a portion of the road. The road is the main travel route between greater Grand Junction and Glade Park, a growing rural community southwest of the monument. An alternate, unpaved route is 2 miles longer.

On October 7, the public comment period ends for the White Sands National Monument (NM)/US Air Force Draft EA and FONSI analyzing the impacts of replacing the QF-4 Full-Scale Aerial Target (FSAT) with QF-16 FSAT at Holloman Air Force Base. Purpose of the USAF project is to field a high-performance and readily available FSAT for land-based pilot and aircrew training using more technologically advanced aircraft as a replacement for the QF-4 FSATs currently being used.

On October 7-9, Devils Tower National Monument (WY) staff will hold a consultation meeting with 24 affiliated tribes. The primary topic will be the desire of Lakota tribe members to have the name of the monument changed. Tribal members hold strong feelings that the name is disrespectful and offensive to the core values that the area holds within their culture. They want the name to reflect a more positive image of the monument. The monument's name has long been an item of contention with the Tribes and is consistently brought up as offensive during consultation meetings, technical meetings; in media interviews and social media.

### October 8

Nothing to report

### October 9

Nothing to report

### October 10

On October 10, the EPA notice of availability for the George Washington Memorial Parkway (VA) Dyke Marsh Wetland Restoration and Long-term Management Plan/Final Environmental Impact Statement (FEIS) will be published. The NPS has identified Alternative C as the preferred alternative. Under this alternative, up to 180 acres of various wetland habitats would be restored within the historic boundaries of the marsh and a breakwater would be installed on the southern edge of the historic promontory to help stabilize the marsh.

### October 11

Nothing to report

## **Major Press Inquiries**

### **Everglades National Park (FL) -**

- Greenwire Articles on Park Issues. In the next few weeks Greenwire will publish feature stories on the invasive exotic fish problem in the park, and on fire management and prescribed burns in the park.
- Web Film Featuring Park Firefighter. A production company recently filmed a short web video for a series called, "Unsung: a day in the life of hard work" that will feature Everglades National Park firefighter Katherine Corrigan. It will be available to the public sometime in late November.
- New York Times Article on Historic Nike Missile Site Tour. The New York Times is planning a travel story highlighting the Historic Nike Missile Site tour in the park. It is expected to run in December.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

**Hawai'i Volcanoes National Park (HI) – Emergency Access Road for Local Residents.** Emergency environmental compliance has been approved that will allow the NPS to work with state and county officials to begin design and construction of a 5.4 mile section of primitive, one-lane road following the alignment of the old Chain of Craters Road within Hawai'i Volcanoes National Park. The NPS, county, and state of Hawai'i have been evaluating all viable options that would allow for emergency ingress and egress for local residents impacted by the recent lava flow that is expected to sever access to the southeast corner of the Big Island of Hawai'i. The proposal for this route was approved in accordance with federal law. The Kalapana-Chain of Craters Road has been blocked by lava for 37 of its 49-year existence. To protect park resources, the proposed emergency route would follow the old lava-covered road alignment as much as practicable. The road will not be open to visitor use. Should the function of the road change after the emergency period, the NPS will complete additional compliance, as appropriate, to evaluate impacts not already accounted for in the emergency approval. Administration and funding of the project has not yet been determined. However, the park will monitor compliance with all anticipated environmental impacts and mitigations identified in the emergency activities approval.

**Glen Canyon National Recreation Area (UT/AZ) – Consultation with Navajo Nation Regarding Access to Antelope Point.** NPS staff has been consulting with the Navajo Nation since late 2012 regarding access within the joint Antelope Point Project area for all Commercial Use Authorization (CUA) holders. Glen Canyon NRA and the Navajo Nation developed a Memorandum of Agreement (MOA) that was signed by the Regional Director. The MOA will provide access to Antelope Point to all CUA holders, consistent with the Glen Canyon NRA Commercial Services Plan, terms of the concession contract, and Antelope Point project agreements in place. This MOA will provide consistency in business practices throughout Glen Canyon NRA, resulting in improved visitor services, increased opportunities for locally-owned businesses (including Navajo owned businesses), and additional employment opportunities for Navajo Nation tribal members in the area. It will also allow Navajo Nation the opportunity to better regulate and benefit from the increased business to Antelope Point. The Navajo Nation President has not yet signed due to political issues within the Tribe and concerns raised by the concessioner. The NPS is preparing a letter to the Navajo Nation President requesting his signature and implementation of this MOA.

**Glen Canyon National Recreation Area (UT/AZ) – Submittal of Notice of Availability for Off-road Vehicle Management Plan.** The Glen Canyon Off-road Vehicle Management Plan and Final Environmental Impact Statement (Plan/FEIS) analyzes a range of alternatives and actions for managing off-road use of motor vehicles and on-road use of off-highway vehicles (OHVs) and street-legal all-terrain vehicles (ATVs). The Plan/FEIS assesses the environmental impacts that could result from continuing current management (the no-action alternative) or implementing any of the four action alternatives. The recommended action in the final plan would allow OHV/ATV use on 7 miles of road presently closed to OHV/ATV use. These seven miles would complete a loop on an existing roads network on NPS and BLM lands. Local and national interest in the Plan/FEIS is expected.

**Trico Plant #1, Buffalo, NY.** A decision denying the Part 2 application (description of proposed work) is expected to be issued in the first week of October. The applicant can revise the project to address the reasons for denial or appeal the decision to the Chief Appeals Officer. The Trico Plant is a long-vacant industrial complex in downtown Buffalo proposed to be converted into hotel and residential uses. The applicant proposes to demolish the oldest portion of the complex, which is in deteriorated condition, but the demolition of which will impact the historic character of the property. There may be inquiries from the New York delegation or media about the project.

**Cape Hatteras National Seashore (NC)** – In early October, a Notice of Intent for a county prepared EIS for beach nourishment near Highway 12 is expected to be published in the Federal Registers. The Seashore has received a permit application from Dare County, NC, to conduct beach nourishment activities to mitigate erosion near Highway 12, which runs the length of the Seashore. To determine if a Special Use Permit can be issued, the County is preparing an Environmental Impact Statement (EIS) for the NPS. The application and EIS process are expected to receive local media coverage and stir controversy. There are strongly differing views about the proposed activity – some local residents are concerned that the highway will be damaged prior to completion of the EIS, and conservation groups are concerned about the precedent being set that beach nourishment may occur in a National Seashore. The North Carolina delegation has been briefed.

**Antietam National Battlefield (MD), Manassas National Battlefield Park (VA), Monocacy National Battlefield (MD) – Deer Final Environmental Impact Statement.** The Record of Decision for the Antietam-Manassas-Monocacy Deer Management Plan and Final Environmental Impact Statement is expected to be signed by October 15. A request to waive the Federal Register notice has been submitted and is expected to be granted. The required 30-day review period ended on September 3.

**National Capital Parks – East (DC/MD) – Town Hall Meetings (DC).** On October 16, the second National Park Service town hall meeting has been tentatively scheduled by Congresswoman Eleanor Holmes Norton to discuss issues related to National Capital Parks – East.

**Lake Clark National Park and Preserve (AK) – Finding of No Significant Impact (FONSI).** The Lake Clark National Park and Preserve General Management Plan Amendment/Environmental Assessment should be signed soon. The plan updates the park's 1984 GMP, and includes direction on wilderness, coastal, and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement, open houses, and ongoing tribal consultation and state engagement per Section 1301 of ANILCA. Public meetings held in February and March at several cities and villages near the park were lightly attended.

**Glacier National Park (MT) – Akokala Creek Fish Passage Barrier.** A Finding of No Significant Impact (FONSI) for the construction of a fish passage barrier on Akokala Creek below Akokala Lake may be signed soon. The project area is within recommended wilderness in the park's North Fork District. The barrier will protect native fish, including bull trout (listed as threatened under the Endangered Species Act) and westslope cutthroat trout (a state listed species of concern), from the severely detrimental effects of non-native invasive fish. The park's high elevation watersheds will provide important habitat refugia for native fish in the face of climate change.

**CLOSE HOLD: Golden Gate National Recreation Area (CA) – Ruling Expected in Taser Incident.** U.S. Magistrate Judge Jacqueline Scott Corley is presiding over the Hesterberg civil lawsuit against the NPS stemming from the January 29, 2012, incident that caused an NPS law enforcement ranger to deploy her Taser. The judge is expected to make a ruling in the next two to five weeks. Last year, federal officials rejected a \$500,000 claim filed on behalf of Hesterberg for his damages and the judge found that the ranger was within the law and did not falsely imprison the complainant. This judgment is specifically about damages. The NPS is working on draft statements and communication plan for after the ruling is made public.

**Great Sand Dunes National Park and Preserve (CO) – Public Scoping for Ungulate Management Plan.** A public comment period on draft preliminary alternatives for the Ungulate Management Plan/EIS will close on November 2. Two public open houses have been held and park staff is also making formal presentations to agencies, organizations and groups throughout the San Luis Valley. The final plan will determine the appropriate future management of bison and elk within the park and preserve. Elk and bison are currently on the landscape; elk range throughout and bison are owned and managed by The Nature Conservancy (TNC) on the Medano Ranch, an inholding within the park. In addition to a no-action alternative, the park is considering three action alternatives. Bison options under consideration include no bison, retention of a smaller number of the existing bison owned by TNC, and introduction of a small conservation herd of outside origin. Elk management options include the use of non-lethal tools and limited lethal removal for dispersal and population reduction purposes. There is interest in this planning effort from TNC, Colorado Parks & Wildlife, Colorado Department of Agriculture, and the US Fish & Wildlife Service. The park is working closely with these entities. A key consideration in this effort is wilderness and potential impacts. More than eighty percent of the park and preserve are either designated or proposed wilderness. Minimum requirements analysis will be done for all alternatives.

### **30-60 Day Look Ahead**

This fall, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between the NPS and Indian tribes and subject to annual permits. Appropriate levels of NEPA and NHPA review and compliance would be required. Collection for commercial uses would be prohibited. This rule change would provide reasonable, resource protection based use of park resources while assisting in support of the continued lifeways of American Indian tribes. National tribal consultations indicate that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

On October 12, at an event in Phoenix, the National Trust for Historic Preservation will officially announce its designation of the Painted Desert Community Complex as a National Treasure – a designation of the Trust's

own making designed to focus on preservation fundraising and raise awareness. The Trust and Petrified Forest National Park (AZ) will be raising the profile of the preservation effort and seeking to accomplish some rehabilitation projects through raised funds or volunteer work. The effort is expected to last 18-24 months.

On October 18, Big Bend National Park (TX) will host a Good Neighbor Day event inviting many local school children as part of a National Park Foundation-funded *Ticket to Ride* grant. The park is expecting 500-700 children at the event.

In mid-October, Everglades National Park (FL) plans to release a new Fire Management Plan/EA for a 30-day public comment period. Current fire management at the park is based on the 1995 Fire Management Plan.

This fall, Grand Canyon National Park (AZ) expects to issue the Backcountry Management Plan/Draft Environmental Impact Statement (Plan/DEIS) for public review and comment. The Plan/DEIS addresses management of over 1.1 million acres of the park's backcountry, most of which is proposed for wilderness designation. The Plan/DEIS is needed to address immediate backcountry issues and provide an adaptable framework to manage backcountry use into the future while protecting natural and cultural resources. Public scoping including public meetings occurred in 2011 and agency and tribal consultation has been on-going.

This fall, documents and environment impact statement are expected to be available for public review, including public hearings, for the Gates of the Arctic National Park & Preserve (AK) draft General Management Plan amendment and Wilderness Stewardship Plan. The park's existing GMP dates from 1986. Since that time, there have been land exchanges within the park and significant development plans made outside the park. The plans introduce management zoning that support current visitor and subsistence activities. Indicators and standards for user capacity are proposed in a wilderness management framework.

On November 20, proposals are due in response to a business opportunity to operate overnight accommodations, food and beverage, retail service, fuel and auto services, and other related services within Yosemite National Park (CA). The new 15-year contract is scheduled to begin on March 1, 2016. This is the park's primary concession operation and the largest concession contract in the NPS.

## FWS SECRETARIAL WEEK-AHEAD REPORT

October 1, 2014

### Highlights of Travel, Meetings and other Public Events

October 1-3: FWS Southeast Regional Director Cindy Dohner and members of the regional directorate team will meet with their counterparts at the North Carolina Wildlife Resources Commission to discuss ongoing collaboration on fish and wildlife issues in eastern North Carolina. The red wolf recovery program in North Carolina and lake management at Mattamuskeet NWR are among the topics to be discussed. R4

October 2: A tree planting ceremony in Alamo, Texas kicks off a new Urban Refuge Partnership project. As part of the Urban Refuge Partnership, the Pharr-San Juan-Alamo Independent School District is working with the Santa Ana NWR and the cities of Pharr, San Juan and Alamo, Texas, to restore 24 acres of school property at three schools. In addition, teachers will implement new science curricula based on the local ecosystem. Parent volunteers will learn to identify native plants and wildlife that are common in the area. Outreach is planned. Attendance by students, parents and local elected officials is expected to total over 300.

October 6: A social media campaign featuring stories about eastern brook trout conservation will begin marking the tenth anniversary of the Eastern Brook Trout Joint Venture. The campaign will focus on the successful completion the removal of 78 dams and barriers resulting in the opening of 205 river miles and restoration of nearly 500 acres of riparian habitat, with an economic benefit of \$232 million. Targeted media pitches are also planned. R5

October 8: FWS will host a Southern New England Tribal Consultation Listening Forum at the Rhode Island NWR Complex Headquarters in Charlestown, Rhode Island, to listen to concerns and interests from the Southern New England tribes regarding inter-federal agency consultation and coordination. Other Federal agencies are invited. Outreach planned. R5

October 10: FWS will issue Enhancement of Survival (EOS) permits to nine Wyoming ranchers who have applied for the Greater Sage-Grouse Candidate Conservation Agreement with Assurances (CCAA). Director Dan Ashe will headline a press event in Sublette County to celebrate this achievement and highlight the ongoing sage-grouse conservation campaign. R6

### Public Announcements

#### Thursday, October 2

The Dan River Scoping Document for Restoration Planning will be released for public review and to solicit ideas to restore the river in response to Duke Energy's coal ash spill. The document includes information about the spill, the potential impacts on natural resources, restoration project concepts for the resources affected by the spill, and an explanation of the restoration planning process. The natural resource trustees are FWS, the North Carolina Department of Environmental and Natural Resources, and the Virginia Department of Environmental Quality. Outreach planned. R4.

On October 2, 3 and 4, FWS joins local, state and federal agencies in a contingency planning exercise led by the Upper Mississippi River Basin Association to prepare for and respond to potential oil spills associated with rail transport of oil through LaCrosse, Wisconsin. The rail lines, used by Burlington Northern Santa Fe and Canadian Pacific railroads, transport large quantities of oil in tanker cars through LaCrosse and in proximity to Upper Mississippi NWR. Media interest is expected due to local concerns about rail safety. Outreach planned. R3

FWS will announce a final rule to designate the western U.S. population of the yellow-billed cuckoo as a distinct vertebrate population segment (DPS) and to list the DPS as threatened under the ESA. This species

occurs in the western United States (WA, ID, MT, OR, CA, NV, WY, UT, CO, AZ, NM and TX), Canada and Mexico. Controversy expected because: (1) it is a wide ranging species, (2) agencies and stakeholders associated with water delivery, storage and recreation may be concerned about effects on their activities, (3) the Canadian and Mexican governments may oppose the listing of the species in their countries, and (4) existing habitat conservation plan permittees may oppose the listing of this species if not already covered in their permits. R8

#### Friday, October 3

The *Deepwater Horizon* Natural Resource Damage Assessment Trustees will announce selection and approval of 44 Early Restoration projects totaling approx. \$627 million as documented in the Programmatic and Phase III Early Restoration Plan and Early Restoration Programmatic Environmental Impact Statement (Phase III ERP/PEIS). The Trustees anticipate signing a Record of Decision at the end of this week or the beginning of the next. The Phase III ERP/PEIS includes three Department projects: The Gulf Island National Seashore Ferry Project and the Gulf Island National Seashore Beach Enhancement Project are National Park Service projects; the North Breton Island Restoration Project is a Service project. R4

#### Monday, October 6

FWS will propose to list the West Coast DPS of the fisher as a threatened species under the ESA. The species is found in the states of Washington, Oregon and California. The states of Oregon and Washington oppose listing of the species as do private timber operators. One of the threats contributing to the listing of the species is the illegal use of anticoagulant rodenticides in illegal marijuana growing operations on public and private lands. Significant interest in this proposal is expected from members of Congress and locally elected officials as well as environmental and industry groups and the media. R8

#### Tuesday, October 7

FWS will release the draft economic analysis for the proposed critical habitat for two butterfly species – the Dakota skipper and the Poweshiek skipperling – proposed for listing under the ESA. FWS will reopen until October 23 the comment period on the proposed critical habitat and also on a proposed 4(d) rule for the Dakota skipper. A final decision on the proposal to list and the 4(d) rule is due October 24. Finalization of the proposed critical habitat is expected within several months. R3

#### Wednesday, October 8

FWS recently acquired approximately seven acres in Brooklin, Maine, that are part of the Maine Coastal Islands NWR. The acquisition is funded in part by North American Wetland Conservation Act and Land and Water Conservation funds (LWCF). Habitat on the island is used by nesting colonies of black guillemots, common eiders and other seabirds. In addition, FWS recently acquired 167 acres in New Jersey that are part of Wallkill River NWR. The acquisition is funded in part by LWCF and the Tennessee Gas Pipeline Company, as fulfillment of one of its responsibilities for mitigating the impacts associated with changing the how the pipeline crosses the Wallkill River within the refuge boundary. Outreach is planned as part of ongoing LWCF campaign. R5

#### Thursday October 9

Nothing to report

#### Friday, October 10

Nothing to report

#### TBD

FWS delivered a proposed rule to list the black pine snake as threatened under the ESA on September 30. This species is endemic to longleaf pine habitat in Mississippi and Alabama. FWS is also proposing a 4(d) rule that will regulate prescribed burning and noxious weed control, as well as timber management activities associated

with restoring and improving the natural habitat to meet the needs of the black pine snake. Outreach planned for the day before *Federal Register* publication (TBD). R4

FWS delivered a proposed rule to list the Florida bristle fern as an endangered species under the ESA on September 30. This species is endemic to Miami-Dade and Sumter Counties, Florida. Outreach planned for the day before *Federal Register* publication (TBD). R4

FWS delivered a final rule to list the straight-horned markhor as threatened under the ESA on September 30. This rule includes a taxonomic revision combining two markhor subspecies endemic to Afghanistan and Pakistan into one. FWS is also finalizing a 4(d) rule that will allow the import of sport-hunted markhor trophies from community-based conservation programs that meet certain criteria. Outreach planned for the day before *Federal Register* publication (TBD). HQ

### **Major Press Inquiries**

Several media outlets, including AP, Wisconsin Public Radio and Wisconsin State Journal have requested copies of FWS's response to a letter sent by a group of scientists to FWS Director Dan Ashe and Midwest Regional Director Tom Melius in August expressing concerns that the best available science was not used in gray wolf management and monitoring in the Western Great Lakes region from January 2012 through December 2013, specifically the State of Wisconsin's wolf management report for post-delisting monitoring. Interest was heightened recently with the decision on the status of wolves in Wyoming. R3

KQED Radio – San Francisco inquired about obtaining background and conducting an interview with FWS regarding illegal trade in elephant ivory and rhino horn for a story to air October 3. Story will air in advance of a march against trafficking Saturday, October 4 in San Francisco.

Los Angeles Times visited Devils Hole and the Ash Meadows Fish Conservation Facility September 24. He is writing a major article about the Devils Hole pupfish, focusing on the successful captive breeding program. Publication date unknown. R8

Bay Nature Magazine requested photos depicting salmon and drought for an article the magazine is working on. Publication date is not known. R8

Numerous media inquiries were fielded on the district court decision impacting the ruling delisting the Wyoming wolf population. HQ/R3

Several inquiries have come in (E&E News, Arizona Republic and Cronkite News) regarding the notice of intent to sue filed by the Center for Biological Diversity and Defenders of Wildlife's in regards to the cactus ferruginous pygmy owl. See item below on Significant Portion of its Range policy. HQ/R2

Numerous inquiries were fielded on the arrest of a man in Detroit for smuggling turtles. HQ/R3

### **Items of Note/Expected Legislative, Legal, Policy Issues**

The Service's Significant Portion of its Range policy has come under attack by several environmental groups in the Southwest. With declines in the Arizona population of the cactus ferruginous pygmy-owl (pygmy owl), and the recent announcement that the Tucson shovel-nosed snake is not warranted, the environmental community is becoming increasingly outspoken in opposition to that policy. The Center for Biological Diversity and Defenders of Wildlife have filed a Notice of Intent to sue the Service over the delisting of the pygmy owl based on this policy, and media has carried several stories about objections to the SPR policy. Media coverage on this issue may increase when the announcement that the Service will not be listing the Rio Grande cutthroat trout appears in the *Federal Register* September 30. R2

As part of routine operations, the Muskegon River was treated by the sea lamprey control team September 9-18. Post-treatment, eight juvenile lake sturgeon were found dead along with many sea lampreys. While it is not unusual for juvenile sturgeon to succumb to the effects of a lampricide treatment, lake sturgeon are state listed as threatened in Michigan and are an important species for the Little River Band of Ottawa Indians. FWS has coordinated among partners to raise awareness of the situation, share information and further investigate the situation. All indications continue to show that it was a very effective treatment. R3

Congressional interest in FWS's proposal to list the northern long-eared bat as endangered remains high, with the most recent letter coming on September 22 from Rep. Bachmann. R3

On September 24, FWS and the Center for Biological Diversity reached settlement on a lawsuit to require FWS to prepare 12-month findings for ten species—the Alexander Archipelago wolf, Ichetucknee silt snail, Kirtland's snake, Slenderclaw crayfish, Barrens Darter, Holiday Darter, Atlantic pigtoe, San Bernardino flying squirrel, and two populations of the black-backed woodpecker. As part of the settlement agreement, deadlines were set for each species by which time FWS must make required petition findings.

FWS, BLM and CEC will conduct informational webinars on the draft Desert Renewable Conservation Plan beginning September 29. The agencies are also working on rollout activities and venues for public meetings to be held at various locations within the 22.5 million-acre plan area between October 20 and November 7. R8

Hurricane Odile brought an enormous volume of water into the San Bernardino Valley, California, watershed last week, severely impacting the San Bernardino NWR. There were no reported injuries to FWS staff and no known damage to buildings. However, there was significant damage to Refuge roads, fences, ponds, dikes and the border patrol bridge. All roads are currently impassible. FWS is assembling an emergency maintenance access team to assist with repairs at the Refuge. R2

On October 24, FWS will announce a proposed rule to list the African lion subspecies as threatened under the ESA. Also proposed is a 4(d) rule allowing for importation of sport-hunted trophies provided they are permitted by FWS as originating from countries with effective lion conservation programs. This action is expected to attract attention from both the animal rights and sport-hunting communities. HQ

Bernalillo County, New Mexico, will hold a news conference on October 15 to announce \$8 million in federal funding through the Federal Lands Access Program for improved access to Valle de Oro NWR in Albuquerque. Funding will be used to improve pedestrian and bike safety and mobility along Albuquerque's 2nd Street corridor, which is the primary access route to the Refuge. Coordinated outreach with Bernalillo County planned. R2

A tour of at the Laguna Atascosa is tentatively planned for staff of Rep. Filemon Vela (D-TX 34<sup>th</sup> District) on Tuesday, October 21. The tour was requested based on the Congressman's interest in learning more about the Refuge's efforts to conserve ocelots. R2

In October, FWS will publish a proposed rule in the *Federal Register* to list four native turtle species (common snapping turtle and three softshell turtles) in Appendix III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). If finalized, these listings would ensure that these turtle species were lawfully obtained before export is approved, and would provide important information to assess the impacts of trade and the potential need for additional protections in the future. HQ

San Francisco Mayor Ed Lee and EPA Region 9 Administrator Jared Blumenfeld have requested a trip to Farallon NWR in October to learn about FWS proposals for eradicating invasive house mice from the refuge. R8

Element Power, has canceled plans to construct the Mill Creek Wind Farm project near Squaw Creek NWR. In discussions with FWS, Element Power stated they may move north to Atchison County, a site with less potential impact on wildlife, primarily birds. Local media interested. R3

Sen. Brian Schatz's (HI) office has inquired about the completion of the Habitat Conservation Plan in the Puuanahulu Game Mammal Management Area and the Puuwaawaa Cooperative Game Management Area in North Kona, Hawaii. FWS is working to update his office. R1

FWS contacted tribes and Alaska Native Claims Settlement Act (ANCSA) corporations to announce opportunities to consult on statewide regulatory changes being considered for Alaska refuges. The changes would: prohibit activities involving predator control for the purpose of increasing hunting opportunities on Alaska refuges; clarify prohibited practices, methods and means related to sport hunting and trapping that are inconsistent with federal laws and FWS policies; clarify the allowable practices related to the collection of natural resources on refuges in Alaska; and update the procedures for closing an area or restricting an activity on refuges in Alaska. FWS is not considering restricting the taking of fish or wildlife for subsistence uses under federal subsistence regulations. Anticipated draft rule publication will be in early 2015. R7

Public Employees for Environmental Responsibility (PEER) submitted an additional FOIA request for documents related to the decision to negotiate a Draft Fiscal Year 2013-2016 Annual Funding Agreement (AFA) between the United States Department of the Interior and the Confederated Salish and Kootenai Tribes of the Flathead Reservation (CSKT). The request includes correspondence and communications concerning the need for, and any directives, guidance or discussions of entering negotiations for an AFA with CSKT concerning the National Bison Range Complex. R6

### **30-60 Day Look Ahead**

FWS plans to award several Hurricane Sandy project contracts within 30 days at the Long Island NWR Complex, Cape May NWR and Forsythe NWR. The contract award amounts vary between \$1 and \$5.6 million. Outreach planned. R5

Kenai NWR in October will propose to amend its public use regulations through publication of a draft rule that would: clarify the existing regulations; implement management decisions from the refuge's June 2010 Revised Comprehensive Conservation Plan; establish regulations for managing wildlife attractants, including food, refuse and retained fish in order to decrease the potential for negative human-bear interactions; and revise regulations for hunting and trapping, including those governing these activities within the Skilak Wildlife Recreation Area. The proposed regulations are aimed at enhancing natural resource protection, public use activities, and public safety on the refuge and are necessary to ensure the compatibility of public use activities with refuge and refuge system purposes. R7

A study by The Nature Conservancy on potential energy development in the Appalachian region is expected to be made available in mid-October. The study, funded by the Appalachian Landscape Conservation Cooperative (LCC), models wind, coal and natural gas potential development sites for the entire Appalachian LCC geography to assess possible impacts from future energy development on natural resources. Models and data from all projections will populate a web-based map server to support discussions about how to accommodate energy development with natural resource conservation and inform regional and local landscape planning decisions. Partner outreach in coordination with TNC is planned. R5

FWS anticipates publishing the Strategic Growth Policy for the National Wildlife Refuge System and response to public comments in the *Federal Register* in early/mid-October. This policy instructs FWS to focus on acquiring interests in lands and waters that support the following three priorities: recovery of threatened and endangered species, implementation of the North American Waterfowl Management Plan, and conservation of migratory birds of conservation concern. HQ

Northeast Climate Science Center Consortium Member College of Menominee Nation Sustainable Development Institute will be hosting the Shifting Seasons Summit that will provide climate change adaptation training for Northeast Tribes on October 15-17, 2014, in Keshena, WI (Menominee Nation of Wisconsin). R5

On October 23, FWS and the City of Albuquerque will celebrate the city becoming an Urban Bird Treaty City at the Albuquerque Open Space Visitor Center. Albuquerque received \$100,000 dollars from the Service to improve bird habitat, educate the public on bird conservation, and promote bird-related experiences from the Service. The city will work with partners, including the Service, to develop and implement activities supporting migratory bird conservation. R2

FWS will announce the availability of the draft Environmental Impact Statement (DEIS) and the draft Regional Habitat Conservation Plan (DRHCP) for the Southern Edwards Plateau in the next several weeks. Led by the City of San Antonio, Texas, and Bexar County, Texas, the DRHCP is an effort to address the potential impacts of infrastructure and commercial and residential development on nine federally endangered species including the golden-cheeked warbler, black-capped vireo, Government Canyon Bat Cave spider, Madla Cave meshweaver, Braken Cave meshweaver, Government Canyon Bat Cave meshweaver, two beetles with no common name (*Rhadine exilis* and *Rhadine infernalis*) and the Helotes mold beetle. The DEIS describes potential impacts of issuing a 30-year permit under section 10(a)(1)(B) of the ESA to authorize incidental take of these species. Strong local interest expected. Outreach planned to coincide with publication of the DEIS in the *Federal Register* Reading Room. R2

In mid- to late October, FWS will announce approval of the Lesser Prairie-Chicken Programmatic Conservation Bank Agreement (PCBA) submitted by Common Ground Capital and finalized May 1. This is the first PCBA to be approved by FWS, with the goal of streamlining the process for lands to be approved as conservation banks to provide for the conservation of the lesser prairie-chicken and its habitat. Outreach planned. R2

The National Wilderness Conference will be held in Albuquerque, New Mexico from October 15-19. This year's conference celebrates the 50<sup>th</sup> anniversary of The Wilderness Act. The Service is organizing two field trips for conferees to several nearby national wildlife refuges and a long-term ecological research program at Sevilleta NWR. The Southwest Region will also host activities for the 50<sup>th</sup> anniversary "Get Wild Festival" scheduled during the conference (October 18) at Albuquerque's Civic Center Plaza. Outreach planned with the partner agencies and organizations on the conference planning team. R2

Texas Mid-coast NWR Complex has been working with a variety of partners in Houston to develop five nature gardens funded by a \$25,000 Connecting People with Nature grant. The refuge will be working with Houston Parks and Recreation Department to construct a pollinator/butterfly garden at the Ley Plaza Park near White Oak Bayou. Joining with the Buffalo Bayou Partnership, the refuge will also reintroduce native berry shrubs and trees to the Greentree Wilderness Area at the Buffalo Bayou Park near Houston's Waugh St. Bridge. Outreach planned. R2

In late October/early November, FWS will publish a notice of intent to prepare a joint Environmental Impact Statement and Environmental Impact Report for the proposed Yuba-Sutter Regional Conservation Plan (a joint habitat conservation plan and natural community conservation plan). The plan outlines strategies to avoid, minimize and offset potential indirect effects to 18 plant and animal species expected from development of 35,000 acres within a 400,000-acre area of Yuba and Sutter Counties in California. R8

FWS will announce its 90-finding on a petition to list the yellow cedar as threatened or endangered under the ESA in November. R7

The draft of the polar bear conservation management plan is scheduled to be released to the public November 17 for a 60-day review and comment period. R7

Following a 60-day extension to the deadline granted by the courts, FWS is now scheduled to make a final listing decision on whether the rufa red knot warrants listing under the Endangered Species Act by November 30. Outreach planned. R5

-----

The following endangered species actions are scheduled to be sent to the *Federal Register* in September and October (announcement dates TBD but most will coincide with the date each notice is placed on public inspection in in the reading room):

- Western yellow-billed cuckoo, final listing, announcement date: October 2. R8
- Fisher, proposed listing, announcement date: October 6, R8
- Straight-horned markhor, final reclassification to threatened with 4(d) rule, September 30 (court deadline). HQ
- Florida bristle fern, proposed listing, September 30, R4
- Black pine snake, proposed listing, September 30. R4
- White-haired goldenrod, proposed delisting, October 3, R4
- Arroyo toad, reopen comment, October 15, R8
- Washington ground squirrel, 12-month finding (not warranted), October 17. R1
- Dakota Skipper & Poweshiek, Final Listing, October 24, R3
- Spring Pygmy Sunfish, final critical habitat, October 31, R4
- African lion, proposed listing, October 24, HQ

**WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT**  
**Oct. 5 – 11, 2014**

**Highlights of Travel, Meetings, and other Public Events**

**Neil Kornze** and **Steve Ellis** will attend the sage-grouse partners meeting in Denver. In addition to the Colorado travel, Steve Ellis will begin the week in Utah participating in the “Walking It Off“ Veterans’ event in Cedar Mesa and conclude the week in Salt Lake City attending the Society for American Forestry conference. **Linda Lance** leads Planning 2.0 meetings in Sacramento, Calif.

**Public Announcements**

Monday, Oct. 6

Oct. 6-11, BLM-Alaska attends **2014 Week of the Arctic sessions, hosted by the Institute of the North**. This platform is for community leaders, subject matter experts, and interested stakeholders to learn about the Arctic while contributing to a growing list of priorities and perspectives. Interviews will be captured on video for distribution through social media and web-based sharing.

Tuesday, Oct. 7

Gov. Sandoval will host a drought forum in Tempe, AZ. BLM AZ State Director Ray Suazo will represent the BLM.

Tuesday, Oct. 7

The BLM-CO Royal Gorge Field Office and Fort Carson Army Base will host a **public meeting regarding an EA on use of public lands for Army helicopter training**. The Army has conducted helicopter training in the area north of Cañon City since 2010. The BLM had previously considered the training as casual use. The training focuses on flying and landing in high-elevation, mountainous terrain. News outlets from the Colorado Springs area may cover the event.

Wednesday, Oct. 8

Oct. 8-11, BLM-WY Worland Field Office Forester Jim Gates will receive the **Presidential Field Forester Award from the Society of American Foresters (SAF)** at the SAF National Convention in Salt Lake City. Gates is being recognized for his dedication in the application of forestry on the ground using sound scientific methods, adaptive management strategies and innovative methods to achieve a record of excellence in the application of forest management.

Thursday, Oct. 9

The BLM-CO Royal Gorge Field Office will be celebrating the **expansion of the Garden Park National Natural Landmark (NNL), as well as National Fossil Day**. Garden Park is an internationally significant fossil locality that played a role in the “Bone Wars” between rival paleontologists Edward Drinker Cope and Othniel Charles Marsh. The event will include school children from Cañon City, local elected officials and BLM Colorado State Director, Ruth Welch.

Friday, Oct. 10

The BLM Montana/Dakotas State Office will hold a ceremony to present the **Public Lands Foundation’s Landscape Stewardship Award** to the Montana Conservation Corps for their work to promote and sustain landscapes. Local media, other agencies and interest groups are invited. The PLF is the BLM’s retiree organization.

FWS Director Dan Ashe will visit the BLM Pinedale field office to host **an event/field tour highlighting a cooperative effort between the BLM, FWS and a private rancher**, Brad Bousman. The 3 parties have

entered into a Candidate Conservation Agreement with Assurances to help conserve/preclude the listing of greater sage grouse on private/federal lands. The event is open to media.

#### Saturday, Oct. 11

BLM-WY Lander Field Office (LFO) will receive the **National Outdoor Leadership School's (NOLS) 2014 Stewardship Award** in recognition of the work of LFO's outdoor recreation specialists, the office's work on the recently finalized Lander Resource Management Plan and the stewardship ethic demonstrated by all LFO staff. This marks the first year in the history of the Stewardship Award that it has been given to an entire office.

Oct. 11-12, BLM-Alaska Eastern Interior Field Office will host an exhibit booth at **the Go Winter! Expo in Fairbanks**, and promote winter recreation opportunities on BLM public lands including the White Mountains National Recreation Area, Steese National Conservation Area, and the Fortymile area. This year the BLM is using the occasion to promote its effort to update supplemental recreation rules in the White Mountains National Recreation Area.

#### Anticipated:

In early Oct., the BLM-UT Monticello Field Office will begin accepting public comments on a proposal from the "Hole in the Rock Foundation" for a multi-year Special Recreation Permit to conduct guided handcart treks and hiking. The treks are intended as experiential learning opportunities that replicates events of the 19th century.

In mid-Oct., the BLM-UT Monticello Field Office will release for public comment an EA analyzing the Indian Creek ATV Trail proposal, which is intended to enhance recreation and ATV experiences in the Indian Creek Basin. The BLM has worked with San Juan County, NPS, and others to draft a proposal for analysis. The comment period will run for 30 days.

#### **Major Press Inquiries**

*Wind Power Monthly* contacted BLM-WY to talk about the TransWest Express (TWE) project and FEIS release date, as well as the federal process for developing transmission lines. Publishing date and tone are unknown.

*E&E EnergyWire* contacted BLM-Alaska regarding the FEIS for the ConocoPhillips Alaska, Inc., Greater Mooses Tooth development proposal in the National Petroleum Reserve in Alaska. Hobson thought that the document would be available this month (September). She was advised that the document is still under development.

The *Arctic Sounder*, which serves Northwest Alaska, contacted BLM regarding the Alaska Native Claims Settlement Act land patents to NANA Regional Corporation, Inc. for three villages. The conveyances were announced in a BLM-Alaska Sept. 16 news release (14-37). Rogers was briefed on the conveyance process. A report may run in the Sept. 26 edition of the newspaper, and tone is expected to be positive.

Ray Ring, a reporter with *High Country News*, spoke with BLM-AZ about an article being written entitled "Defusing the West." The article will encounter faced by BLM and Forest Service law enforcement officer, including a 2010 incident in Bowia, AZ when 2 BLM rangers were shot at. Tracy Thibodeux is serving a 16-year sentence after being convicted of attempted murder and aggravated assault as a result of his actions in that case. The BLM Washington Office is coordinating with DOI Communication on the story.

#### **Items of Note/Expected Legislative, Legal, Policy Issues**

BLM has received a **FOIA request** from Ann Burns, Vice President at the American Forest Resource Council, for information regarding the **Oregon-California Land Grant proposal of 2014** and communication between the BLM and Sen. Wyden's office.

### **30-60 Day Look Ahead**

The BLM is preparing a *Federal Register Notice* to announce the **2014 oil and gas lease sale for the NPR-A**. The Notice will publish at least 30 days in advance of the November 19 sale. The BLM will open sealed bids submitted on the offered tracts at 1 p.m., following the State of Alaska's lease sale scheduled for that morning.

BLM-NM expects to release the **Prehistoric Trackways National Monument PRMP/FEIS** in 4-6 weeks. The 5,280 acre Monument is recognized for its Permian era fossils. Key issues in the 4 plan alternatives address OHV damage to fossils; livestock grazing; target shooting; and the level of visitor services, interpretation, and education.

BLM-OR anticipates release the **ROD for the John Day Basin RMP** covering public lands in north-central OR. It updates previous RMPs, covers newly acquired lands in the North Fork John Day River as a result of the Oregon Land Exchange Act of 2000, and provides interim management direction for the Spring Basin Wilderness, designated in 2009.

**Oct. 7-9:** BLM Idaho will begin scoping on the Supplemental EIS for the Gateway West transmission project, which will analyze new information presented in the updated right-of-way application and plan of development for Segments 8 and 9. A Draft EIS is anticipated by June 2015, Final EIS in May of 2016 and a ROD by early 2017.

**Oct. 8-11:** The **Society of American Foresters** will meet in Salt Lake City, UT, along with the Canadian Institute of Forestry and the International Union of Forestry Research Organizations World Congress. Deputy Director Steve Ellis will speak Oct. 11; the BLM will lead a panel on pinyon-juniper restoration.

**Oct. 14:** The nomination period for the Wild Horse and Burro Advisory Board, which published Aug. 29, will close. Nominations are being sought for three of the 9 positions: 1) Wild Horse and Burro Advocacy; 2) Veterinary Medicine; and 3) Public Interest (with special knowledge about protection of wild horses and burros, management of wildlife, animal husbandry, or natural resource management).

**Oct. 18:** BLM has authorized a test run Oct. 6 to evaluate an SRP application for **RiSE Lantern Festival**, a mass sky-lantern-releasing on Jean Dry Lake south of Las Vegas. The EA public comment focused on trash and fire danger. Pending the test run, up to 20,000 biodegradable lanterns will be released on the Dry Lake Bed Oct. 18. If approved, the BLM plans to promote the event via social media.

**Oct. 21:** BLM-MT/DK will hold an oil and gas lease sale offering 28 parcels totaling 14,988 acres, including 23 BLM parcels totaling 9,637 acres in MT and 5 Forest Service parcels totaling 5,351 acres in ND. WildEarth Guardians submitted a protest that will be dismissed because one of the protested parcels is deferred and others have stipulations for sage-grouse.

**Oct. 20-25:** The **Honey Bee Nutrition and Forage Summit** will be Oct. 20-21 in Alexandria. The BLM, FWS, NPS, FS and DOD are planning a panel discussion on access to honey bees on federally managed lands. BLM and FS hope to sign an **MOU on native pollinator habitat** on public lands at an Oct. 21 reception preceding the **North American Pollinator Protection Campaign** annual meeting in Washington, DC Oct. 22 - 25, hosted by USDA.

**Oct. 21 – 23:** The BLM's Executive Leadership Team meets at the National Conservation Training Center in Shepherdstown, WV.

**Oct. 21:** BLM-Montana/Dakotas will hold a quarterly oil and gas lease sale.

**Oct. 21 & 28:** Respective dates for the BLM-OR/WA Roseburg District **release of Timber Sale Notice and Notice of Decision for the Thundering Herd Timber Sale**. The sale will implement a thinning prescription on 333 acres of second-growth forest stands that are approximately 49-62 years old and will provide approximately 5.6 million board feet of timber available for auction. The project has not been controversial and no protest is anticipated.

**Oct. 22:** BLM-New Mexico will hold a quarterly oil and gas lease sale.

**Oct. 25:** Sen. Carl Levin (D-MI) has tentative plans to attend an BLM Eastern States event celebrating the **conveyance of the Thunder Bay Island Lighthouse**, near Alpena, Michigan from the Coast Guard to the BLM.

**Oct. 29:** BLM-OR/WA will participate in a consultation meeting with the Shoshone Paiute for the **Boardman to Hemingway Transmission Line Project**. The Draft EIS release date has been moved to November 14, 2014. Government-to-Government consultation meetings are being planned with the Confederated Tribes of the Umatilla Indian Reservation and the Shoshone-Bannock Tribes in October 2014.

## WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT

October 1, 2014 – October 11, 2014

### Highlights of Travel, Meetings, and other Public Events

On September 30 – October 3, BOEM will be representing DOI as part of the U.S. delegation to the Arctic Council Science Coordination Task Force. The Task Force is in the process of negotiating an agreement on scientific cooperation between members of the Arctic Council. The meeting is taking place in Tromso, Norway.

On October 10, at the request of the office of Rep. Steve Israel (D-NY), BOEM will brief Congressional staff from the Mid-Atlantic States on its role in regional ocean planning and the Mid-Atlantic Regional Council on the Ocean.

On October 9-10, the BOEM Gulf of Mexico Region will be hosting a workshop for approximately 10 members of Mexico's National Hydrocarbons Commission (CNH) on best practices for assessing exploration and development plans.

### Public Announcements

**Week of September 29:** Note to Stakeholders to announce the Office of Renewable Energy Programs' Fisheries Best Management Practices (BMP) report. This report is a culmination of nine workshops with commercial and recreational fishers and offshore wind developers from Maine to North Carolina. BOEM and Atlantic renewable energy lessees will use the recommendations in this report to develop BMPs specific to individual offshore wind development plans.

**October 2:** Joint press release from BOEM, NASA and NOAA announcing a prototype system to gauge national marine biodiversity at scales ranging from microbes to whales. Three pilot projects for the marine biological observation networks will be deployed to diverse U.S. marine environments - the Florida Keys, Monterey Bay and the Santa Barbara Channel, and the Chukchi Sea. They will integrate existing observations, ranging from satellite observations to DNA sampling, and fill data gaps. The study contracts are expected to total \$22 million dollars.

**Week of October 6:** Publication of *Federal Register* notice and Notice to Stakeholders announcing a thirty day extension for the Advanced Notice of Proposed Rulemaking on Risk Management, Financial Assurance, and Loss Prevention. .

**October TBD:** Publication of *Federal Register* notice on proposed modifications to BOEM's oil and gas bid adequacy procedures to better ensure receipt of fair market value for OCS leases.

**October TBD:** Press release announcing availability of a Gulf of Mexico study report documenting the discovery of more than 100 new species of marine life in deep waters on the Lower Continental Slope. The research was conducted under a partnership with NOAA, with some USGS involvement, as well as 17 U.S. and international research organizations.

**October TBD:** Press release announcing publication of the Limits of Liability final rule.

### Major Press Inquiries

Southern California Public Radio – KPCC: Provided background on submersible surveys being conducted as part of BOEM's regional study on effects of submarine cables (electromagnetic fields) on marine life.

Right Whale News: Seeking a graphic of the Atlantic planning areas for G&G seismic surveys. Other questions on the planning areas.

National Journal: Seeking background interview on energy outlook for the Bureau. Discussing with DOI Comms before responding.

ECO Magazine: October 2014 issue published a 2-page spread of BOEM Chief Environmental Officer Bill Brown's recent "Science Note" on the science behind the Atlantic ROD decision.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Advanced Notice of Proposed Rulemaking (ANPR) for Risk Management:** BOEM is preparing a *Federal Register* notice to extend the comment period on the ANPR for an additional 30 days in response to several requests for an extension. The ANPR's initial comment period was for 60 days, ending on Oct. 20. It will be extended to Nov. 17.

**Maryland Offshore Wind Lease Sale:** US Wind Inc. was the provisional winner of both lease areas with a combined bid of \$8.7 million. DOJ signed off on the auction results on September 19. On September 22, BOEM sent the lease documents to US Wind Inc., which has until Oct. 7 to sign the lease documents, submit its financial assurance, and pay the balance of its bonus bid.

**Changes in Bid Adequacy Procedures:** In early October, BOEM plans to announce its intent to change a criterion in its existing bid adequacy procedures for ensuring receipt of Fair Market Value on Outer Continental Shelf oil and gas leases. BOEM proposes to remove the Number of Bids Rule in Phase 1 of the Post Sale Evaluation Procedures, which is a bid adequacy provision used in the first step of the process to determine whether to accept a tract's high bid without further BOEM evaluation. BOEM is also proposing to revise several bid adequacy definitions for clarity, which will not alter the fundamental meaning or application of the terms to the bid adequacy procedures. The announcement will have a 60-day comment period. BOEM will consider all comments, and then intends to publish the revised Bid Adequacy Procedures with the Central Gulf of Mexico CPA 235 Final Notice of Sale.

**Limits of Liability Final Rule:** In October, BOEM will publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Central Gulf of Mexico Planning Area Sale 235 (CPA Sale 235):** BOEM expects to publish the Proposed Notice of Sale for CPA Sale 235 in mid-October. The sale is scheduled for March 2015.

**Cook Inlet Lease Sale 244:** BOEM is preparing to issue a Notice of Intent to prepare an EIS in late October for the potential lease sale. The bureau will hold scoping meetings in November.

### **30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In October or early November, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in October. The Report will be published on the BOEM website, along with a Request for Comments published in the *Federal Register*.

**Virginia Research Lease (offshore wind):** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted a Research Activities Plan for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Dec. 6. BOEM tentatively plans to publish an environmental assessment for public comment in late October and hold a public meeting in mid-November.

**WEEK-AHEAD REPORT: BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT**  
**October 1 – October 10, 2014**

**Highlights of Travel, Meetings, and other Public Events**

October 1: The third anniversary of the formation of BSEE. Director Salerno released a video message to all employees and the Bureau held an open house on the 5400 corridor of MIB.

October 2: Director Salerno is scheduled to participate in a meeting of stakeholders with the Center for Offshore Safety in Washington, DC.

October 6: Director Salerno is scheduled to meet with Anadarko to discuss the company's plans for development and installation of 20,000 psi drilling, completions, intervention and subsea equipment at a site in the Gulf of Mexico.

October 7: Director Salerno is scheduled to meet with representatives from Conoco-Phillips to discuss Arctic OCS regulations and the company's operations in the Chukchi Sea.

October 8-9: Director Salerno, Deputy Director Schneider and Assistant Secretary Schneider are scheduled to visit BSEE's Ohmsett oil spill research facility on US Naval Weapons Station Earle in Leonardo, NJ. The purpose of the trip is to tour the facility, observe equipment testing and meet with Navy officials.

October 14: Director Salerno is scheduled to meet with representatives from Nobel Drilling Services to discuss incident investigation and emergency management.

October 20: Director Salerno is scheduled to receive a briefing from industry representatives on Best Available and Safest Technology.

October 21-22: Director Salerno is scheduled to participate in the next meeting of the Liquid Pipeline Advisory Committee in Arlington, VA. This will be his first meeting since being officially designated as a member of the committee.

October 24: BSEE is planning to host the next meeting of High Reliability Organizations in Washington, DC. The group is composed of federal organizations that manage programs with low probability of catastrophic failure, but high consequences if a failure occurs. The Nuclear Regulatory Commission, Department of Transportation and several other government agencies are expected to participate.

**Public Announcements:**

October 2: BSEE Public Affairs plans to post a news brief on the Director's participation in the Center for Offshore Safety stakeholders meeting in Washington, DC.

October 8: BSEE Public Affairs plans to post a news brief on Director Salerno's and Assistant Secretary Schneider's trip to the BSEE Ohmsett National Oil Spill Response Test Facility in Leonardo, NJ.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Call with Representative Cedric Richmond:** At the request of Representative Cedric Richmond, he and the Director held a phone call to discuss the Taylor Energy remediation program at Mississippi Canyon site 20 in the Gulf of Mexico. The Director informed the congressman that an ongoing BSEE analysis is expected to be completed this fall. Department of Justice has assumed the lead in this case and is coordinating the efforts of BSEE, USCG, BOEM, and NOAA.

**Conference Call with Exxon-Mobil:** Director Salerno continued his dialogue with representatives from Exxon-Mobil regarding environmental analysis in support of pipeline work at Platform Harmony in the Pacific. BSEE is working with BOEM and National Marine Fisheries Service (NMFS) to process a permit for conductor pipeline installation activities including pile driving. NMFS has approved an Incidental Harassment Authorization subject to mitigation to avoid impact to whales. BOEM is performing environmental analysis on the proposed activity. BSEE will use information provided by BOEM and NMFS in making a decision on the permit request. We expect to complete the process by October 10, 2014.

**Proposed Rule for Arctic Standards:** This proposed rule will contain standards for oil and gas development and production in the Arctic environment. The rule has been formally accepted by the Office of Management and Budget for interagency review and BSEE/BOEM have received initial feedback from interagency review.

**Proposed Well Control Rule (AKA Blowout Preventer Rule):** A proposed rule to establish standards for controlling a well including the use of blowout preventers is undergoing Departmental review. It incorporates industry standards and revises existing regulations. The proposed rule also includes critical reforms in the areas of well design, well-control, casing, cementing, real-time well monitoring, and subsea containment. The proposed rule will be submitted to the DOI Executive Secretariat during the week of September 29.

### **30-60 Day Look Ahead**

October 28: Director Salerno is scheduled to be the keynote speaker at an International Energy Symposium hosted by Texas A&M University, College Station, TX. He is also planning to visit a Baker Hughes research facility in Houston, TX, during the trip.

November 3-4: BP will be conducting an operator-initiated oil spill response tabletop exercise in New Orleans, LA. The exercise is designed to test their oil spill response plan, incident management team, and well containment plan. Over 100 BP personnel will be involved, including other operators, response contractors, federal and state representatives, two people from BSEE. Deputy Director Schneider is tentatively scheduled to attend the event.

November 3-4: Director Salerno is scheduled to travel to Camarillo, CA, to conduct an all-hands meeting with BSEE employees in the Pacific Region.

November 13: Director Salerno has been invited to speak at a meeting of the Canada Petroleum Board in St. John's, Canada.

November 18-22: Director Salerno is scheduled to attend a meeting of the International Regulators Forum in Cancun, Mexico.

Early December: Director Salerno is planning to travel to New Orleans, LA, to conduct an all-hands meeting with BSEE employees in the Gulf of Mexico Region.

**WEEK-AHEAD REPORT  
OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT**

**Items of Note/Expected Legislative, Legal, Policy Issues**

Mining Plan Modification for North Dakota Surface Coal Mine:

On September 26, OSMRE's Western Region sent to OSMRE HQ a mine plan decision document for Dakota Westmoreland Corporation's Beulah Mine, Revision 27, located in Mercer County, North Dakota. The mine plan will be reviewed in the Director's office before it is submitted to ASLM for approval or disapproval. If approved, the modification will allow the mine operator to remove an additional 37.5 million tons of coal from a Federal lease. The company has indicated that it needs to begin mining this coal by mid-October to avoid shutting down the mine.

### **30-60 Day Look Ahead**

#### OSMRE to Present 2014 Excellence in Surface Coal Mining Reclamation Awards:

On Oct. 27, OSMRE will recognize the winners of the bureau's 2014 Excellence in Surface Coal Mining Reclamation Awards at an event in Washington, DC. OSMRE gives the awards to coal mining companies that achieve the most exemplary mining and reclamation in the nation. Typically, winners demonstrate a commitment to using sound mining practices and executing effective reclamation plans designed to enhance post-mining beneficial use of the land. This year features three winners overall: two in the National Award category, which recognizes the highest-quality project in active-mine reclamation; and one Good Neighbor Award, given to a company that has demonstrated commitment to the community in which the mine operates.

**WEEK-AHEAD REPORT: BUREAU OF RECLAMATION**  
**October 1 – October 10, 2014**

**Highlights of Travel, Meetings, and other Public Events:** *I have no travel plans, no meetings with external stakeholders and will be in the Washington office through October 10th.*

**Public Announcements**

**Windy Gap Excess Capacity Contract Announcement (CO):** Reclamation will announce the proposed Windy Gap Firming Project, a non-federal project that will use excess capacity in the federal Colorado-Big Thompson Project to store and convey water. The contract is between Reclamation and the Municipal Subdistrict of the Northern Water Conservancy District.

**Navajo-Gallup Water Supply Project Representative Tour (NM):** Reclamation will join project participants of the Navajo-Gallup Water Supply Project in a tour of the Aztec and Lower Valley water treatment plants on the San Juan River to gain insight into the facilities' operation and maintenance programs.

**Deputy Secretary Connor in Albuquerque (NM):** Reclamation representatives will join Deputy Secretary Connor on a tour of Santa Clara Pueblo to view damage from a forest fire that has caused continuous flooding in the canyon into the Pueblo's main village. The Deputy Secretary will speak with Mark Oswald of the Albuquerque Journal after the tour.

**Draft Environmental Documents Released on Proposed Long-Term Water Transfers (CA):** Reclamation and the San Luis & Delta-Mendota Water Authority are releasing the Draft Environmental Impact Statement/Environmental Impact Report on the effects of water transfers from 2015 to 2024. The Draft EIS/EIR evaluates water transfers that originate from willing sellers in Northern California to buyers south of the Sacramento-San Joaquin Delta and in the San Francisco Bay Area. Public hearings are scheduled for Oct. 15 in Sacramento, Oct. 16 in Los Banos, and Oct. 21 in Chico, California.

**New Diversion Rate at Columbia River Diversion Keys Plant (WA):** With the agreement of the Columbia Basin Irrigation Districts, the PN Region has established the five-year cost of water for irrigators to take water out of the Columbia River and divert it through the John Keys III Pump-Generating Plant at (Keys PGP). The new diversion rate of \$2.6472/acre-foot represents a 43 percent increase over the preceding rate. This is the first diversion rate set in three rate periods (15 years) that did not require establishing an interim rate or setting a rate without the Irrigation Districts' agreement. This rate increase occurs during the most significant overhaul of the Keys plant since its construction.

**Karuk and Yurok Tribes to Request Additional Releases from PacifiCorp's Klamath Hydroelectric Project Reservoirs (OR):** Reclamation will participate in a call to discuss an informal request by the Karuk and Yurok Tribes for additional releases from PacifiCorp's Klamath Hydroelectric Project reservoirs. A formal request is pending. Call topics include the quantity of water the tribes intend to request and how repayment of any water borrowed from PacifiCorp's reservoirs would be handled.

**Update on Reclamation Releases from Trinity Reservoir to the Lower Klamath River (CA):** The lower Klamath River flow rate has gradually decreased from the 5,000 cubic feet per second-level augmented by additional releases from Trinity Reservoir, which began ramping down on September 22. The Klamath Basin received substantial rainfall on September 23 and 24, sustaining flows temporarily, driving water temperatures down, and enabling fish to complete their return into the Shasta and Scott Rivers. On September 29, the flow rate in the lower Klamath River was 2,630 cfs. Biologists report that as of last week, daily numbers of adult Chinook salmon entering the river have peaked and are now declining. They also report that the fish sampled

appear reasonably healthy, although many do have the parasitic infection “Ich” present but generally at lower levels. For the first time, it was reported that a high prevalence of “Metacercaris” (a parasite contracted in the ocean) is present in many of the fish sampled. Information on this initial detection is still being gathered. There have been no requests for additional releases from Trinity Reservoir for flow augmentation.

**Possible Additional Releases From PacifiCorp’s Klamath Hydroelectric Reservoirs (OR):** In August 2014, PacifiCorp committed to coordinate the operation of its Klamath hydroelectric reservoirs to provide approximately 20,000 acre-feet of storage from their reservoirs to augment constrained water supplies in the Klamath River Basin. To date, approximately 4,000 acre-feet of storage from the hydroelectric reservoirs was used to provide flows below Iron Gate Dam to support the Yurok Tribe’s 2014 Boat Dance Ceremony, held on September 14. At this time, no decision has been made if or how the additional 16,000 acre-feet in PacifiCorp’s reservoirs may be used. If utilized, the remaining water could help mitigate fish disease issues currently in the Klamath River, or ongoing irrigation demands. Reclamation is coordinating with the U.S. Fish and Wildlife Service, National Marine Fisheries Service, tribes, and Klamath Project water users to evaluate potential options and strategies.

### **Wednesday, October 1**

**Navajo-Gallup Water Supply Project Key Meetings (NM):** Reclamation representatives will meet with Jicarilla Apache Nation representatives to discuss the prepayment memorandum of understanding. The Jicarilla Apache Nation has elected to prepay their allocated costs and construction features prior to their repayment obligation, beginning in early 2015. Reclamation representatives will also meet with the cultural resources contractor to continue the review of the Cutter and San Juan lateral alignments with respect to the completed cultural resources class III surveys.

**Elephant Butte Reservoir Land Management Meeting (NM):** Reclamation will meet with the New Mexico State Parks and local New Mexico government officials regarding options for the future management of the land area around Elephant Butte Reservoir. Local congressional delegation staff has also been invited to participate. Part of the focus for this meeting is to prepare for an upcoming (date has not been set) public meeting.

**Trinity River Restoration Program (TRRP) to View Proposed Rehabilitation Sites for 2016-2017 (CA):** The TRRP’s interagency integrated Design Team will tour a portion of the Trinity River to view proposed rehabilitation sites for 2016 and 2017. The tour will familiarize the design team with current conditions and potential constraints on designs that will be developed over the next year. On Oct. 2, the Federal, State, Yurok Tribe, and Hoopa Valley Tribe Design Teams will meet to select the projects they will develop for the 2016 sites and will review the designs for the 2015 sites.

**Lake Roosevelt Forum Tour (WA):** Reclamation will participate in the Lake Roosevelt Forum tour of the northern end of Lake Roosevelt. There will be a brief presentation on the relationship between lake levels and operation of Grand Coulee Dam. The tour is designed to educate the public and various agencies about Lake Roosevelt and provides an opportunity for networking among participants.

### **Thursday, October 2**

**Safety of Dams Video:** Reclamation will release a video about the evolution of its Dam Safety Program. It begins with the failure of Teton Dam and interviews key employees and retirees. It describes the issues that led to the failure and what Reclamation’s Dam Safety Program is doing today.

### **Friday, October 3**

**Final Environmental Assessments Released for Proposed Salinity Projects (CO):** Reclamation will issue a news release announcing the availability of final environmental assessments and findings of no significant impact for two proposed salinity projects; the Bostwick Park Water Conservancy District's Siphon Lateral Salinity Control Project in Montrose County, Colo., and the Forked Tongue/Holman Ditch Company's Salinity Control Project in Delta, Colo. The purpose of both projects is to improve the efficiency of water delivery to canal users and reduce salinity loading in the Colorado River Basin.

**Tribal Remains to be Lay to Rest (NE):** In 2005, remains from two individuals estimated to be 500-1000 years old were found on an island in Pueblo Reservoir on the Fryingpan-Arkansas Project in southern Colorado. Since that time and in compliance with NAGPRA, the Eastern Colorado Area Office has identified the Pawnee Nation of Oklahoma and the Wichita and Affiliated Tribes as the closest cultural affiliations. The remains will be moved on October 3. On behalf of both Tribes, the Pawnee Nation will rebury the remains near Grand Island, Nebraska, in a private ceremony this weekend.

#### **Saturday, October 4**

**Bear Creek Salmon Festival (OR):** Reclamation will attend the Bear Creek Salmon Festival in Ashland, Oregon. The annual festival is a chance for Reclamation staff to meet stakeholders and discuss proposed habitat restoration work under the Rogue River Biological Opinion.

**See Spot Walk Event (ID):** Reclamation will participate in the annual See Spot Walk event in Boise, Idaho. The event provides an opportunity for Reclamation to focus its message of canal safety with pet owners.

**C.A.S.T. for Kids/Let's Move Outside Event at Lake Mead National Recreation Area (NV):** Reclamation will host its annual C.A.S.T. for Kids/Let's Move Outside event at Hemenway Harbor at Lake Mead National Recreation Area. The annual event typically attracts 30 to 40 special needs and disadvantaged kids and their families.

#### **Sunday, October 5**

Nothing to report.

#### **Monday, October 6**

**Climate Adaptation Strategy:** Reclamation its Climate Adaptation Strategy This is Reclamation's strategy and response to global climate change as it relates to managing water and power in the West.

#### **Tuesday, October 7**

**Updated Mussel Coatings Research Report:** Reclamation will release the six year update to the mussel coatings research that began in 2008. The release will include the report and a video summary of research and findings. While no commercially available foul-release coating has been found that prevents mussel attachments, several products have shown promise.

#### **Wednesday, October 8**

Nothing to Report.

#### **Thursday, October 9**

**Meeting with Karuk Tribe (OR/CA):** On Oct. 9-10, Reclamation staff plans to visit the Karuk Tribe in Happy Camp, California. The visit will include a meeting with tribal council members along with site visits to

Reclamation-funded field projects that are being undertaken to benefit fisheries, including federally listed species in the Klamath River. The meeting is primarily a meet-and-greet session and an opportunity for the Karuk Tribe to inform Reclamation of issues important to the tribe.

### **Friday, October 10**

**Design Criteria Technical Workshop (NM):** Reclamation will host a workshop with representatives of the four Aamodt Indian Water Rights Settlement pueblos, Santa Fe County, Bureau of Indian Affairs and the Indian Health Service at Tesuque Pueblo. The purpose of the workshop is to gather input from the stakeholders and reach consensus on design and performance criteria for the Pojoaque Basin Regional Water System.

**Minidoka Dam Spillway Celebration (ID):** Reclamation will host a celebration of the final concrete block placement at the newly rebuilt Minidoka Dam Spillway which replaces the 102-year old spillway. Reclamation has invited the Minidoka and Burley Irrigation Districts, the contractor, and Congressional and local representatives. Construction of the replacement spillway began in November of 2011 and was completed without interrupting irrigation deliveries or power production. Local media coverage is anticipated.

### **Saturday, October 11**

**C.A.S.T. for Kids/Let's Move Outside event at New Melones Lake (CA):** Reclamation will host a C.A.S.T. for Kids/Let's Move Outside event at New Melones Lake in Northern California.

### **Major Press Inquiries**

**Grand Coulee Dam Laser Light Show Media Interest (WA):** On September 26, *The Star* reporter Roger Lucas interviewed Reclamation staff about the schedule for the Grand Coulee Dam Laser Light Show and dam tours for the remainder of the fall season. He also asked if Reclamation had plans to do anything else with the show. Mr. Lucas was told that Reclamation was looking at adding a short cartoon prior to the show which would lighten up the tone of the presentation.

### **Items of Note/Expected Legislative, Legal, and Policy Issues:**

Ich disease update

Columbia River Diversion rates

### **30-60 Day Look Ahead**

**Public Access at Imperial Dam Locations Closed for Facility Upgrades (AZ):** On October 13, Reclamation will close public access to several locations at Imperial Dam to accommodate the upgrade of electrical systems and telecommunications service at the facility. The Imperial Irrigation District, which operates and maintains the facility on behalf of Reclamation and other water district entities, will oversee the infrastructure improvement projects over the next two years.

**American Water Resources Association (ID):** On October 14, Reclamation will participate on a panel at the Idaho State Section of the American Water Resources Association in Boise, Idaho. The topic of discussion is "Responding to Climate Change – What We Know and What We Are Doing?"

**Middle Rio Grande Endangered Species Collaborative Program Executive Committee Meeting:** On October 16, Reclamation will participate in the Middle Rio Grande Endangered Species Collaborative Program Executive Committee meeting in Albuquerque. Discussions will include updates on the current Middle Rio

Grande consultation, summer water operations, the Middle Rio Grande Biological Opinion and the transition process of the collaborative program to a recovery implementation program.

**The Columbia Basin 2014 Conference (WA):** On October 21-23, Reclamation will participate in the Columbia Basin 2014 Conference – Learning from Our Past to Shape Our Future held in Spokane, Washington. This is an international conference that will explore the future of the Columbia River in an innovative format with breakout sessions, graphic facilitation and inspirational arts and culture activities as they relate to the Columbia River.

**Signing Ceremony for a Hydropower MOU Action Plan:** In Mid-October, Reclamation, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan that they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new interagency Sustainable Hydropower Action Plan (Phase II) to be released details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing.

**WaterSMART Ceremony with Three Sisters Irrigation District (OR):** In mid-to-late October, WaterSMART recipient Three Sisters Irrigation District will celebrate the completion of a four-year project to up-convert their irrigation system to pressurized pipe and added low-head hydropower capability. The event will be attended by districts, the contractor and Congressional and local representatives. Deputy Secretary Mike Connor has been invited.

**Long-Term North to South Water Transfers Draft EIS/EIR Public Hearings (CA):** On Reclamation and the San Luis & Delta-Mendota Water Authority will conduct public hearings on the Long-Term North to South Water Transfers Draft Environmental Impact Statement/Environmental Impact Report. The public hearings are scheduled for Oct. 15 in Sacramento, Oct. 16 in Los Banos, and Oct. 21 in Chico, California. The Draft EIS/EIR evaluates water transfers from 2015 to 2024 that originate from willing sellers in Northern California to buyers south of the Sacramento-San Joaquin Delta and in the San Francisco Bay Area.

**FY 2015 WaterSMART Grant Funding Announcement:** In October, Reclamation will begin announcing FY 2015 WaterSMART funding, beginning with the WaterSMART Water and Energy Efficiency Grants and Title XVI Project funding. Selection of the FY 2015 Basin Studies will begin.

**Get Outdoors Nevada Day (NV):** On October 25, Reclamation will support Get Outdoors Nevada Day at Craig Ranch Regional Park in Las Vegas by staffing an exhibit.

**Reasonable and Prudent Alternatives Annual Science Review (CA):** The Reasonable and Prudent Alternatives (RPA) Annual Science Review is scheduled in Sacramento for November 6-7. This event, which will focus on the drought and drought operations, is a requirement stated within the 2008 and 2009 National Marine Fisheries Service Biological Opinion (BiOp) for the Coordinated Long-term Operation of the federal Central Valley Project and the California State Water Project. Each year, the meeting evaluates how the RPA actions were implemented and their effectiveness for Endangered Species Act-listed species during the past year. The conference is held with NMFS and the U.S. Fish and Wildlife Service, and the public is invited to attend but not participate.

**WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY**  
**October 1-10, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On **October 1**, USGS Acting Director, Suzette Kimball, will participate in a media day to highlight USGS oral sylvatic plague vaccine developed for black-footed ferrets at Espee Ranch, Arizona.

On **October 10**, Suzette will be on Annual Leave.

**Public Announcements**

Wednesday, October 1

**Media Day for Prairie Dog Plague Vaccine:** On **October 1**, the USGS, along with FWS, BLM, NPS, Arizona Game and Fish Department and others, will participate in a media day on private lands in Arizona, where black-footed ferrets will be released as part of a Safe Harbor Agreement. The event highlights the experimental sylvatic plague vaccine (SPV) developed by the USGS and University of Wisconsin that shows promise as a preemptive method to control plague in prairie dogs. Prairie dogs are the primary prey for the endangered black-footed ferret and targeted application of the SPV may help to stabilize prairie dog populations and aid in the recovery of the black-footed ferret. USGS Acting Director, Suzette Kimball, will participate in the event.

**News Release—USGS to Release Study on Invasive American bullfrogs:** In the coming week, USGS will announce an upcoming publication on invasive American bullfrogs in the Yellowstone floodplain. In the paper, to be published in the journal *Aquatic Invasions*, scientists with the USGS, Montana Natural Heritage Program, BLM, and Montana Fish Wildlife and Parks concluded that this invasive species is now thriving and rapidly spreading in the Yellowstone River. A news release will be distributed locally.

**News Release–USGS to Release Study on Disease Virulence Evolution:** In the **coming weeks**, a news release will announce new research, led by the USGS, that finds that diseases that cause debilitating symptoms are expected to evolve lower virulence along the epidemic front compared to the epidemic origin. Motivated by real-world observations of a new disease in songbirds, a mathematical investigation shows that disease virulence—the increased death rate of infected individuals—is expected to evolve to lower levels along the epidemic front compared to the disease origin. The paper will be published in *The American Naturalist*.

**News Release–Freshwater Fisheries and Global Food Security:** In the **coming weeks**, Michigan State University will distribute a news release describing the importance of inland fisheries to global food security, the challenges faced due to competing demands for freshwater and possible solutions. USGS scientists contributed to the publication and will be identified in the news release. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–Characterization of Groundwater Quality in the Bakken Area:** In the **coming weeks**, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for future groundwater quality monitoring as energy development activities expand in the basin. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–NC Baseline Study for Hydraulic Fracturing:** In the **coming weeks**, USGS will announce a new study that examined groundwater quality samples collected in a potential shale gas production area in North Carolina. This report can be considered as baseline information for groundwater quality in the aquifers of the study area because the natural gas industry is not yet active in the state. The results showed that dissolved methane concentrations were low. The study will be published as a USGS Open-File Report. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–Seal flu virus:** In the **next few weeks** the USGS National Wildlife Health Center will issue a national news release announce a new report showing that the avian flu virus that caused widespread harbour seal deaths in 2011 can easily spread to and infect other mammals and potentially humans. The release will likely be joint with the St. Jude's Children's Memorial Hospital. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–The impact of road salt on watersheds:** In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–Upper Klamath ET Maps:** At the **end of September**, USGS will distribute a press release for upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area. *[THIS WAS IN LAST WEEK'S REPORT]*

### **Major Press Inquiries**

**Similarities between Titan and Earth:** USGS Geophysicist Randall Kirk was quoted in the October 2014 issue of *National Geographic* magazine in a short piece, “Lakes of Methane,” about the similarity of Saturn’s moon Titan to Earth. Titan, like Earth, has an atmosphere, seasons, a rocky surface, and seas, but says Randy, “What’s cool about Titan is that the physics are the same as on Earth, but the chemistry is completely different.” Titan’s seas are composed of methane and ethane at minus 300°F, and are believed to contain compounds that were precursors to life on Earth.

**National Geographic Yellowstone Feature:** USGS Supervisory Wildlife Biologist Mark Haroldson was interviewed by *National Geographic* magazine, scoping story ideas for an upcoming feature on Yellowstone in

2015. Haroldson provided background information on several grizzly bear topics, including ecosystem trends in estimates of females with cubs of the year, population trends from known fates modeling, trends in grizzly bear mortalities, changes in food habitats, and grizzly bear use of moth sites.

**Inquiries on Recent “Mega-Drought” Paper:** USGS Research Ecologist Greg Pederson spoke with the Union-Tribune San Diego about the recently released "mega-drought" study he co-authored in the *Journal of Climate*.

**National Geographic Interview on Gold:** On **October 2**, USGS Mineral Resources Program Coordinator Larry Meinert will be interviewed by National Geographic for an upcoming feature program "Gold: The Eternal Quest." The interview request was made by the films producer last week.

#### **Items of Note/Expected Legislative, Legal, Policy Issues**

Nothing to report.

#### **30-60 Day Look Ahead**

**Forthcoming USGS Polar Bear Research Papers:** In the **coming months**, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. *[THIS WAS IN LAST WEEK'S REPORT]*

**USGS Afghanistan Research to be Featured in *EARTH Magazine*:** For **late summer**, USGS is preparing a feature article that will appear in *EARTH Magazine* about USGS hydrologic research and capacity building activities in Afghanistan. A decade of work conducted by scientists in Afghanistan will be highlighted. *[THIS WAS IN LAST WEEK'S REPORT]*

In **October**, USGS will release a report prepared for EPA that discusses the hydrogeology of glacial drift deposits beneath a proposed chemical waste landfill near Clinton, Illinois with emphasis on vulnerability of the regional water-supply aquifer beneath the area. Data will be used by EPA to guide permitting decisions for the landfill. *[THIS WAS IN LAST WEEK'S REPORT]*

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY–INDIAN AFFAIRS  
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION  
October 1 to October 10, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On October 1, the Assistant Secretary-Indian Affairs, Principal Deputy Assistant Secretary and Deputy Assistant Secretary-Indian Affairs for Policy and Economic Development will meet with a delegation from the Government of Finland led by Finland’s Minister of Justice. The Minister specifically requested a meeting with Assistant Secretary Washburn as Finland has significant influence on international indigenous issues due to their relationship with Sami indigenous people.

On October 2, BIA Office of Justice Services Director is scheduled to meet with Navajo Nation Council Delegate Edmund Yazzie regarding jurisdictional problems at the Fort Wingate school site and ways that the Navajo Nation and BIA may partner to solve problems pending a legislative fix to the problem.

On October 2, the Office of Self-Governance will meet with the Solicitor’s Office, the Bureau of Education, and the Department of Justice regarding the *Ramah Navajo Chapter v Jewell* litigation and Contract Support Costs. On October 3, the Assistant Secretary-Indian Affairs will present at the Symposium on the Future of Trust Administration at the Seattle University of Law & the Intertribal Timber Council in Seattle, WA.

On October 6, the Deputy Assistant Secretary-Management and AS-IA staff will meet with the Navajo Indian Irrigation Project Federal Policy Team in Washington, D.C.

On October 7, the Assistant Secretary-Indian Affairs will meet with Senator Harry Reid (Nevada) potentially on Tohono O’odham Nation’s gaming in Glendale, AZ. The Senator has related legislation to prohibit such gaming. Senate bill S. 2670 and House bill HR 1410 are both known as “Keep the Promise Act.”

On October 7, Indian Affairs staff will join EPA, USDA and other agencies to consult with tribes and non-governmental organizations about environmental issues and US progress made in addressing recommendations made by the UN Human Rights Council in 2010. The consultation will be hosted by the University of California-Berkeley School of Law. Such consultations are conducted by each of the ten interagency groups formed to maintain an ongoing process for domestic advancement of human rights under the UN Universal Periodic Review.

On October 8, the Assistant Secretary-Indian Affairs will present at the Self-Governance Advisory Committee quarterly meeting in Washington, D.C.

On October 9, Congressman Tom Reed will call the Assistant Secretary-Indian Affairs on the Cayuga Indian Nation leadership dispute.

On October 9, the Assistant Secretary-Indian Affairs will be on a video teleconference with the Denver Office of Natural Resources Revenue on an Indian Gas Valuation Regulations presentation.

**Public Announcements**

Wednesday, October 1

Nothing to report

Thursday, October 2

BIA Office of Justice Services - Emergency Response will participate in the California Statewide Consultation Policy meeting. The meeting could have lasting impacts on the way the state of California works with Tribes, local and federal partners during disasters to Tribes in California.

New deadline for comments on BIA proposed rule to revise regulations (25 CFR Part 169) governing rights-of-way on Indian lands. 40 comments have been received to date. There are additional requests to extend the deadline.

Members of the Advisory Board for Exceptional Children will be in Washington, D.C. from 8:30 a.m. to 4:30 p.m. The meeting takes place at the South Interior Building and is open to the public.

Friday, October 10

Members of the Advisory Board for Exceptional Children will continue to meet in Washington, D.C. from 8:30 a.m. to 4:30 p.m. The meeting takes place at the South Interior Building and is open to the public. The Public Comment portion of the meeting is scheduled for today from 1:00-1:30 p.m.

### **Major Press Inquiries**

Cronkite News (AZ) requests an on-camera interview with AS-IA Washburn after the hearing on Senate Bill 2670.

A freelance writer for gamblingcompliance.com requests a 15-minute interview with PDAS-IA Roberts on statements made during the consultations on the proposed changes to the federal acknowledgment regulations.

National Native News and Native America Calling want to create an awareness campaign for the Land Buy-Back Program (LBBP) for Tribal Nations to highlight individual communities as the LBBP moves to their areas.

The Syracuse (NY) Post-Standard is asking for information on a leadership dispute between two factions within the Cayuga Nation, and which leaders the BIA currently recognizes.

WSTM-TV (cnycentral.com), the NBC affiliate in Syracuse, NY, notes there's been a lot of police activity at the Cayuga Nation and wants to know the BIA's stance on the Nation's leadership conflict and if the BIA is working to mediate or find solutions to the situation.

Forbes magazine wants a list of all hotel properties owned by Native Americans in the U.S.

US Coal & Energy Price Report wants to know how coal rights play a role in the recent settlement with the Navajo Nation.

The New York Times wants to talk with AS-IA Washburn to get details about the settlement with the Navajo Nation and what its significance is.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

The BIA Climate Change Coordinator will support the DOI Office of Policy Analysis, at the Environmental Protection Agency's Environmental Justice Meeting. The Department would like to have a BIA representative on hand should there be questions on BIA efforts to address climate change in tribal communities.

GAO issued the draft report Bureau of Indian Education Needs to Improve Oversight of School Spending (GAO-14-795) on August 29, 2014. The report contains four recommendations for the Assistant Secretary-Indian Affairs action. Our request of a two week extension to respond was approved and the new response date is October 7, 2014.

The "Trial Balance Verification Letter" is being prepared for signature. This letter is a representation to the accuracy of the trial balance for Indian Affairs and is part of the Annual Financial Report package that is presented as required by OMB. The financial audit team of KPMG is mandating the letter be signed by the CFO and both Director BIA, Mike Black and Director BIE, Charles Roessel. This is due on Oct. 14, 2014.

A draft Housing and Improvement Program rule (25 CFR 256) has been developed, and is under review with the BIA. We anticipate publishing the rule in the coming months.

The office of the Assistant Secretary is working on a draft Johnson O'Malley Contracts rule (25 CFR 273) to codify past practice and a Federal District Court ruling regarding degree of Indian blood for eligibility. We expect this rule to enter the surname process in October.

The Division of Economic Development (DED) is in the process of updating its list of Native food vendors capable of meeting large procurement demands. There are now ten vendors that can be considered "truck ready." DED has added the Navajo Nation farm (NAPI), and will furnish this list to BIA contracting officers in charge of procurement for the BIE school lunch program.

The BIA, Office of Justice Services/Tribal Justice Support (TJS) has a contract with the Center of Indigenous Research and Justice operated by Professor Ron Whitener to re-draft the Tribal Model Juvenile Code to incorporate provisions of the Affordable Care Act, intended to assist tribal courts in providing health and substance abuse counseling to juveniles.

The proposed Tribal Transportation Program rule is under development with a goal for publication in the Federal Register in time for consultation at the October National Congress of American Indians (NCAI) meeting in Atlanta.

The proposed Secretarial Elections (25 CFR 81) rule is under development with a goal for publication in the Federal Register in time for consultation at the October NCAI meeting in Atlanta.

### **30-60 Day Look Ahead**

Between October 14 and 17 in Denver, Indian Affairs' Office of Indian Energy and Economic Development will co-sponsor the 2014 Native Convening at the Opportunity Finance Network (OFN) conference. It will bring together approximately 100 Native Community Development Financial Institutions (CDFIs) for purposes

of education, networking and mutual support. CDFIs, both Native and non-Native, are expected to become a growing source of lenders for the Loan Guarantee, Insurance and Interest Subsidy Program.

On October 15, the United States Interagency Council on Homelessness will hold its quarterly meeting. The Council is led by Chair Secretary Thomas Perez and Vice-Chair Sylvia Burwell.

On October 15-18, BIE Director Roessel, SIPI President Allison and Haskell President Venida Chenault will participate in the National Indian Education Association's conference in Anchorage, Alaska.

On October 16, 20, 22, 27, and 29, BIE will hold tribal consultations, in person and through webinars, on the preliminary discussion draft of revised regulations regarding funding to Tribally Controlled Colleges and Universities including Diné College.

Between October 26 and November 3, ASIA, BIA, and BIE leadership, and the Haskell and SIPI Presidents, will attend the NCAI's 71st Convention in Atlanta.

On October 28, Deputy Undersecretary Dr. Ann Bartuska, U.S. Department of Agriculture is touring 1994 land-grant institutions (Institute of American Indian Arts (IAIA), SIPI, Navajo Technical College, and Diné College); she will be on the SIPI campus in the afternoon.

On November 4-5, the next quarterly Tribal Interior Budget Council (TIBC) will take place at the Washington Plaza Hotel at Thomas Circle in Washington, DC.

On November 6, the BIE American Indian Language Summit will take place in Albuquerque, NM.

On November 6, the DOI/IA National Native American Heritage Month event will take place at the OPM headquarters. The theme is "Native Pride and Spirit: Yesterday, Today and Forever."

**WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)  
October 1<sup>st</sup> –October 10<sup>th</sup>, 2014**

**Highlights of Travel, Meetings, and other Public Events**

None to report.

**Public Announcements**

Friday, October 3

On October 3, the Pawnee Fiduciary Trust Officer (FTO) will assist the Oklahoma City University Law School with a Will writing clinic at the Otoe-Missouria Tribe Community building in Red Rock, Oklahoma. [THIS WAS IN LAST WEEK'S REPORT]

October 3-4, the Tulsa Fiduciary Trust Officer (FTO) and staff from the Chickasaw Agency will participate in the 26<sup>th</sup> Annual Chickasaw Festival in Tishomingo, Oklahoma. Information on Office of the Special Trustee for American Indians (OST) services, the Land Buy-Back Program (LBBP), financial literacy educational services, and credit counseling will be provided. [THIS WAS IN LAST WEEK'S REPORT]

Saturday, October 4

On October 4, the Rapid City Urban Office Fiduciary Trust Officer (FTO) will attend the Omniciya First Saturday Community Information Fair and staff an outreach booth at the Rapid City-Mother Butler Center in Rapid City, South Dakota.

Sunday, October 5- Wednesday, October 8

None to report.

Thursday, October 9

On October 9-10, Cherokee Agency Fiduciary Trust Officer (FTO) will attend the Five Civilized Tribes Inter-Tribal Council Meeting scheduled to be held in Durant, Oklahoma. The FTO regularly attends these meetings to maintain accountability to tribal leaders and beneficiaries.

Friday, October 10

On October 10, 2014, Rosebud Agency Fiduciary Trust Officer (FTO) will participate in the quarterly South Dakota Indian Business Alliance (SDIBA) meeting in Pierre, South Dakota. The meeting will concentrate on policy in Indian Country and SDIBA members will meet with South Dakota Governor, Dennis Daugaard; South Dakota Secretary of Tribal Relations, J.R. LaPlante; Director of Governor's Office of Economic Development, Kim Easland; and South Dakota House Representative, Kevin Killer. Topics of conversation will be Uniform Commercial Codes and the Community Reinvestment Act which was enacted by Congress in 1977 to encourage banks to help meet the credit needs of communities with low to moderate incomes.

On October 10-12 the Pine Ridge Agency Fiduciary Trust Officer (FTO) and staff will provide outreach at the 7<sup>th</sup> Annual Lakota Dakota Nakota Language Summit and Black Hills Powwow in Rapid City, South Dakota.

**Major Press Inquiries**

None to report.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**U.S. District Court for the District of Columbia (DDC) Tribal Litigation for**

## **Quinn-Leinbach, Settlement Proposal to the Obama Administration (SPOA) Tribes, and other Litigating Tribes**

The Office of Historical Trust Accounting (OHTA) is actively supporting the Office of the Solicitor (SOL) and The Department of Justice (DOJ) tribal litigation team's efforts to reach a settlement on the remaining cases.

**Chickasaw & Choctaw:** A two day face-to-face mediation session for Plaintiffs and the Government is scheduled for October 16-17, 2014, in Washington, DC.

**Fletcher:** The Office of Historical Trust Accounting (OHTA) will update the draft Osage Annuity Payment presentation with the Office of the Solicitor (SOL) and the Office of the Special Trustee for American Indians (OST) requested changes and adjustments.

**Navajo:** The Office of Historical Trust Accounting (OHTA) will complete its closeout reports and lessons learned report.

### **Cobell: Settlement Payout Process:**

On September 25, 2014, District Court Judge Hogan approved a three week extension for the Government's Appeal to the U.S. District Court of the Special Master's September 11, 2014 grant of Plaintiffs Motion asking that Stage 2 award money be held in trust in IIM accounts on behalf of now deceased plaintiff beneficiaries

### **30-60 Day Look Ahead**

Office of the Special Trustee for American Indians (OST) – Trust Services (TS) is expected to be a full Central Accounting Reporting System (CARS) reporter by October 1, 2014. This is a significant Treasury modernization initiative that TS have been working on for the last year.

**WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS**  
**September 24-October 3, 2014**

**Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events**

**Public Announcements**

**Northern Marianas Grant** – On September, a grant of \$269,000 was awarded for infrastructure improvements to the Northern Marianas College, which will use the funds to renovate existing classroom and office buildings, thereby providing a more conducive environment for learning. Currently the Northern Marianas College is housed in what was once the Doctor Torres Memorial Hospital, which the Government of the Trust Territory of the Pacific Islands (TTPI) built in 1962, when the President transferred from the Department of the Navy to DOI the TTPI's administration.

## **DOI in the News:**

**TRUSTEES IN BP PAYOUT APPROVE \$627M IN GULF OIL SPILL RECOVERY PROJECTS.** The AP (10/3, Amy) reported that on Friday trustees in the BP 2010 Deepwater Horizon settlement approved \$627 million in spending on 44 projects in Gulf Coast states. The bulk of the funds, \$318 million, will be awarded to a program to "restore land and marsh on four barrier islands off Louisiana's" coast. Alabama, Florida, and Mississippi received \$65 million for "living shorelines" projects designed to restore marshes, create oyster reefs, and reduce erosion. The five Gulf states awarded funds in the case as well as four Federal agencies "had to reach consensus" on the projects, the AP noted.

The Hill (10/4, Cama, 241K) reports that Interior Secretary Sally Jewell said, "The trustees have done a

comprehensive job of identifying projects to help the Gulf Coast recover from the devastating Deepwater Horizon spill and have given careful consideration to the many insightful public comments received through the process.” She added, “Now we can move forward with these projects that will help restore the natural resources of the region, improve resiliency to hurricanes and other catastrophic weather events and provide an economic boost to local communities.”

The New Orleans Times-Picayune (10/6, 596K) and the New Orleans (LA) Times-Picayune (10/5, 596K) also covered the story.

**BP Urges Judge To Amend “Gross Negligence” Ruling.** The AP (10/3, McGill) reported that Thursday evening BP attorneys filed a motion urging US District Judge Carl Barbier to amend his Sept. 4 ruling that found the company guilty of “gross negligence” in the 2010 Deepwater Horizon spill. BP said the judgment should be amended or a new trial should be held because the Sept. 4 ruling “was based on testimony that had been excluded from the trial.”

FuelFix (10/3, 7K) noted that BP’s argument “hinges on its legal and scientific challenge to the testimony of one expert” and is an effort “to cast more blame for the disaster on cement contractor Halliburton.” During the trial, Judge Barbier “sustained three of BP’s objections to certain testimony by Gene Beck, Halliburton’s expert, because Beck had not written his conclusions about the compressive forces in his expert report submitted as evidence.” BP is arguing that “a lesser degree of comparative fault” should be assigned to it in the case and more should be assigned to Halliburton. The New Orleans Times-Picayune (10/5, Larino, 596K), CBC News (CAN) (10/3, 272K), the International Business Times (10/3, Mathew, 655K), and BBC News (10/3, 1.37M) also covered the story.

**PA Law Firm Replaces BP Oil Spill Claims Investigator As Chair.** The New Orleans Times-Picayune (10/5, Freeh, 596K) reported that according to a story in the Centre Daily Times, on Thursday former FBI director and appointee investigating BP oil spill claims fraud Louis Freeh, was replaced as chair of Philadelphia law firm Pepper Hamilton. Freeh’s work on spill claims fraud “is being challenged in court,” the Times-Picayune noted.

**Judge Rules Former BP Engineer Can Travel To China Pending Trial.** The AP (10/5) reported that on Thursday a Federal judge said that former BP engineer Kurt Mix can travel to China next month despite awaiting a new trial on charges of obstruction of justice in the BP Deepwater Horizon spill.

**PA LAW FIRM REPLACES BP OIL SPILL CLAIMS INVESTIGATOR AS CHAIR.** The New Orleans Times-Picayune (10/5, Freeh, 596K) reported that according to a story in the Centre Daily Times, on Thursday former FBI director and appointee investigating BP oil spill claims fraud Louis Freeh, was replaced as chair of Philadelphia law firm Pepper Hamilton. Freeh’s work on spill claims fraud “is being challenged in court,” the Times-Picayune noted.

**OBAMA: MEMORIAL FOR DISABLED VETERANS REMINDS AMERICANS NOT TO “RUSH INTO WAR.”** Covering President Obama’s appearance at the dedication of the American Veterans Disabled for Life Memorial, on NBC Nightly News (10/5, story 7, 0:20, Holt, 7.86M), Lester Holt reported that on Sunday, President Obama “paid tribute to the country’s disabled veterans” as he “spoke at the dedication of a new memorial to the veterans, saying the country needs to move heaven and earth to make sure they get every benefit, every single bit of care they have earned and deserved.”

The AP (10/6, Thomas) reports that the President was “mark[ing] the opening of the American Veterans Disabled for Life Memorial, which honors disabled veterans both living and deceased from conflicts throughout the nation’s history.” According to the AP, the new \$80 million memorial “was organized by philanthropist Lois Pope, former Veterans Affairs secretary Jesse Brown and Art Wilson, who retired as CEO and national adjutant of the Disabled American Veterans organization in 2013.”

Katie Zezima of the Washington Post (10/6, Zezima, 4.9M) noted that “Obama was flanked onstage by VA Secretary Robert McDonald, Interior Secretary Sally Jewell and actor Gary Sinise, who played Lt. Dan in ‘Forrest Gump’ and has become a veterans advocate.”

The Washington Post (10/6, Kennicott, 4.9M) has an architectural review of the new memorial.

Also providing coverage are the Los Angeles Times (10/4, Zarembo, 4M), the Daytona Beach (FL) News-Journal (10/5, 157K), and the Daily Mail (UK) (10/6, 4.35M).

**SECRETARY JEWELL VISITS LAKE COUNTY.** The Lake County (OR) Examiner (10/3) reports that “a weeklong multi-state west coast tour by” Interior Secretary Sally Jewell “included a stop in Lakeview on Thursday, Sept. 25 to meet with BLM and USFS staff and visit several ranches to speak with locals about land use, renewable energy, wildlife habitat, climate action plans and much more.” Jewell discussed “many relevant issues affecting land management and residents today including preservation of sage-grouse habitat, wild horse management, juniper removal, water conservation and a strong focus on youth initiatives.” She also “shared President Barack Obama’s concerns in getting youth involved in land management and conservation programs, particularly urban youth, through various programs to address an ever-widening generation gap in land management work.”

**SECRETARY JEWELL SUPPORTS ASSISTANCE FOR RENEWABLE ENERGY INDUSTRY.** The Palm Springs (CA) Desert Sun (10/3, 86K) reports that “the Rice solar project has been all but abandoned due to insufficient financing, the latest in a series of blows for large-scale solar development in Riverside County.” The article notes that “solar companies and industry trade groups have urged Congress to extend the 30 percent investment tax credit, or at least to modify its language so that projects that begin construction by the end of 2016 can qualify.” Interior Secretary Sally Jewell “echoed those calls at an event in North Palm Springs last week.” She said, “Most energy industries, including the oil and gas industry, have had help over time. It’s not unique to the renewable energy industry. The broad energy industry has enjoyed many supports from the federal government.”

**Hearings Set For Desert Renewable Energy Plans.** The Riverside (CA) Press Enterprise (10/6, 396K) reports that “an environmental study for an 8,000-page California desert land-use plan designed to balance renewable energy development needs with conservation will be the subject of several public meetings.” According to officials, “the 10 meetings between Oct. 20 and Nov. 13 about the draft Desert Renewable Energy Conservation Plan will educate people about the complicated document.”

**NPS AWARDS GRANTS TO GROUPS.** The Washington Blade (10/3, 89K) reports that the NPS has “given a \$25,000 grant to the LGBT Heritage of Kentucky Project, a group that supports adding Louisville’s Henry Clay Hotel and Whiskey Row Historic District to the National Register of Historic Places.” Also, “the LGBT Sites in New York City Project, which seeks to survey and document ‘historic and cultural sites associated with LGBT heritage’ in the five boroughs, received a \$49,999 grant.” Furthermore, “Latino, Asian, African and Native American groups in Maryland, Virginia, California, Idaho, Massachusetts, Montana, Rhode Island, South Dakota, Utah and Washington also received matching grants from the National Park Service that total \$500,000.” Interior Secretary Sally Jewell said, “Our American heritage is a tapestry made up of threads from many nations and communities, and we are working with public and private partners to help ensure that our National Register of Historic Places reflects this remarkable diversity. These matching grants will enable us to add important sites that haven’t yet been recognized and more fully tell the story of our country.”

**ASSISTANT SECRETARY CASTLE LEAVING.** Politico (10/3, Guillén, 977K) reports that “Assistant Interior Secretary for Water and Science Anne Castle is leaving the administration after more than five years.” Jennifer Gimbel will “step in as principal deputy assistant secretary and acting head of Interior’s Water and Science office, according to a memo from Interior Secretary Sally Jewell.”

**ADDITIONAL COVERAGE OF GLEN CANYON DAM’S 50 YEARS OF POWER CELEBRATION.** Additional coverage of Glen Canyon Dam’s 50 Years of Power Celebration was provided by the Navajo Times (AZ) (10/6, 66K).

## **America’s Great Outdoors:**

### ***National Park Service:***

**NO INJURIES IN FIRE AT FLIGHT 93 MEMORIAL IN PENNSYLVANIA.** Reuters (10/4) reports that firefighters were working to extinguish flames Friday in at least two administrative buildings at the Flight 93 National Memorial in a Shanksville, Pennsylvania field. No injuries were reported, a National Park Service spokesman was cited as saying. The park is on the site of the crash of United Airlines Flight 93, which went down in Shanksville on September 11, 2001 after being hijacked by Al Qaeda militants. All 44 people on board, including the four hijackers, were killed.

Additional coverage was provided by CBS News (10/6, 3.8M), CNN (10/3, 14.29M), NPR (10/3, 2.22M), Reuters (10/3), Reuters (10/4), the US News & World Report (10/3, 661K), the Washington Post (10/3,

Hermann, 4.9M), the Washington Times (10/3, 373K), the Washington Times (10/3, Ernst, 373K), the Boston Globe (10/3, 1.78M), the Boston Herald (10/6, 640K), the Boston Herald (10/6, 640K), the Charlotte (NC) Observer (10/3, 572K), the Houston Chronicle (10/3, 2.47M), the Atlanta Journal-Constitution (10/6, 1.21M), the Sacramento (CA) Bee (10/3, 646K), the Denver Post (10/6, 1.12M), the Pittsburgh Post-Gazette (10/4, Schaarsmith, Belculfine, 538K), the Pittsburgh Post-Gazette (10/4, Gannon, 538K), the New York Daily News (10/6, 3.52M), the New York Post (10/6, 2.55M), and WTAJ-TV Johnstown, PA (10/6, 3K).

**9/11 Flag At Flight 93 National Memorial Is Destroyed In Pennsylvania Fire.** The AP (10/5) reports that, according to the National Park Service, the flag that flew over the US Capitol on 9/11 was destroyed in the fire at the Flight 93 National Memorial in Shanksville, Pennsylvania. Park staff said that, "in addition to the flag, the losses included a handful of personal items of passengers and crew, DVD copies of the annual commemoration ceremony and meetings of the Flight 93 National Memorial Federal Advisory Commission, and about 100 tribute items left by visitors since 2001." The park service said that they are working with state police to investigate the cause of the fire, which has not been determined yet.

The CBS Evening News (10/4, story 10, 0:15, Miller, 5.08M) briefly covered the story on its broadcast. Also providing coverage are CNN (10/4, 14.29M), Roll Call (10/6, 90K), Reuters (10/4), the US News & World Report (10/4, 661K), USA Today (10/4, 5.6M), the Huffington Post (10/4, 11.54M), the Washington Post (10/4, 4.9M), the Washington Times (10/4, 373K), the Washington Times (10/4, 373K), the Charlotte (NC) Observer (10/4, 572K), the Boston Herald (10/6, 640K), the Denver Post (10/6, 1.12M), the Houston Chronicle (10/4, 2.47M), the Killeen (TX) Daily Herald (10/6, 40K), the Richmond (VA) Times-Dispatch (10/6, 323K), the Sacramento (CA) Bee (10/4, 646K), the Atlanta Journal-Constitution (10/6, 1.21M), the New York Daily News (10/6, 3.52M), Newsday (10/6, 1.38M), KHOU-TV Houston (10/5, 419K), WRC-TV Washington (10/6, 367K), and WJLA-TV Washington (10/6, 119K).

**Investigation Finds No Sign Of Arson.** The AP (10/6) reports that "investigators say they've found no indication of arson or other foul play in the fire that damaged buildings at the Flight 93 National Memorial in Pennsylvania." A NPS spokesman said Sunday "the investigation isn't over, and it may be weeks before officials determine the cause of the blaze that destroyed its headquarters."

Also providing coverage are the Washington Post (10/5, 4.9M), the Charlotte (NC) Observer (10/5, 572K), the Houston Chronicle (10/6, 2.47M), the Sacramento (CA) Bee (10/5, 646K), the US News & World Report (10/5, 661K), the Los Angeles Times (10/6, Raab, 4M), and Reuters (10/6).

**BARRIER STILL AT WHITE HOUSE TWO WEEKS AFTER JUMPER.** The AP (10/3, Zongker) reports that "before an intruder jumped the White House fence two weeks ago, sightseers could lean into the black iron bars and snap an unobstructed photograph," but "now, a temporary fence keeps people several feet back, spoiling a picture-perfect moment for some." Officials with the NPS said "the new barriers are temporary, but it's not clear when they might come down."

Coverage by the AP was also picked up by the [Washington Post](#) (10/3, 4.9M).

**TITLE SOUGHT FOR RUSHMORE CARVER.** The AP (10/6, Walker) reports that "family members and supporters of an Italian immigrant seeking more recognition for his role in the carving of Mount Rushmore National Memorial have been unable to persuade the National Park Service to honor him as chief carver." The article notes that "sculptor Gutzon Borglum is credited with memorializing Presidents George Washington, Abraham Lincoln, Thomas Jefferson and Theodore Roosevelt in the Black Hills." But Gloria Del Bianco, "the only surviving child of carver Luigi Del Bianco," and "others behind the effort cite Borglum's own words as proof that her father played a more vital role than other workers who contributed to the massive undertaking of the 1930s and earned the moniker." However, the NPS said Del Bianco has "received the credit he is due." Mount Rushmore Superintendent Cheryl Schreier said, "Luigi Del Bianco was one of the skilled carvers that traveled from the East to work on the sculpture. Mr. Del Bianco is recognized for his contributions to the sculpture both in our museum and on our Workers Wall. His work is also noted in publications sold in the park bookstore."

**MAN FINED FOR FLYING DRONE IN YELLOWSTONE NATIONAL PARK.** The AP (10/6) reports that "an Oregon man has acknowledged flying an unmanned aircraft near bison and over Yellowstone's crowded Midway Geyser Basin." According to park officials, "Donald Criswell of Molalla, Oregon, pleaded guilty Thursday to violating a closure when he flew a drone in the park Aug. 19." Criswell was "fined \$1,000 and ordered to pay court costs."

**HIKER DISCOVERS AN ABANDONED TOWN INSIDE GREAT SMOKY MOUNTAINS NATIONAL PARK.**

The [Huffington Post](#) (10/3, 11.54M) reports that hiker Jordan Liles discovered an abandoned town in the middle of the Great Smoky Mountains National Park

**PAISLEY FIVE MILE POINT CAVES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES.** The [AP](#) (10/6) reports that the NPS has “added a Lake County cave complex to the National Register of Historic Places, after researchers find evidence of human occupation in Oregon beginning 12,300 years ago.” Paisley Five Mile Point Caves are managed by the BLM. Stan McDonald, state archaeologist for Oregon and Washington for the BLM, said, “BLM is pleased to see the Paisley Five Mile Points officially listed in the National Register of Historic Places. The site’s listing underscores the importance of Oregon’s archaeological heritage to understanding the full breadth of the human experience.”

Additional coverage was provided by the [AP](#) (10/3), the [Washington Post](#) (10/3, 4.9M), the [Albany \(OR\) Tribune](#) (10/6), [The Oregonian](#) (10/6, 690K), and [Reuters](#) (10/3, Sherwood).

**PORTAGE PARK ADDED TO NATIONAL REGISTER OF HISTORIC PLACES.** The [Chicago Tribune](#) (10/3, 2.26M) reports that “an 11th neighborhood of Chicago bungalows has been named to the National Register of Historic Places.” The article notes that “the designation of homes in Portage Park follows designations during the past decade of Chicago’s Wrightwood Boulevard, Schorsch Irving Park, South Park Manor, Rogers Park Manor, North Mayfair, Falconer, Talman West Ridge, South Shore, West Chatham and Auburn Gresham neighborhoods.”

**KENSINGTON PARK ADDED TO NATIONAL REGISTER OF HISTORIC PLACES.** The [AP](#) (10/6, Bynum) reports that Kensington Park, a “1950s suburban enclave tucked away amid strip malls and shopping centers on Savannah’s less glamorous south side” has been added to the National Register of Historic Places

Also reporting on the story is the [Summit County \(CO\) Citizens Voice](#) (10/4, 506).

**ADDITIONAL COVERAGE: VISITORS TO NATIONAL PARKS COULD SEE HIGHER ENTRANCE FEES NEXT YEAR.** Additional coverage of possible higher entrance fees to national parks was provided by the [Columbus \(IN\) Republic](#) (10/6, 81K), the [Washington Times](#) (10/6, 373K), the [Daily Astorian \(OR\)](#) (10/6, 23K), the [Seattle Times](#) (10/6, 1.03M), [The Oregonian](#) (10/6, 690K), [The Oregonian](#) (10/6, 690K), and the [Houston Chronicle](#) (10/6, 2.47M).

### ***Bureau of Land Management:***

**BLM TOUTS PLANNING 2.0 DURING PUBLIC LISTENING SESSION.** For the [High Country \(CO\) News](#) (10/3, 74K), Sarah Gilman writes that the BLM on Wednesday “held a public listening session in Golden, Colorado to introduce the effort to change planning rules and practices, which would include setting ‘landscape level priorities’ and tiering all management to them.” According to BLM planning and environmental analyst Shasta Ferranto, “the agency is hoping to institutionalize and make system-wide things that have worked well in individual innovative planning efforts.” Gilman notes that “for many attendees, the key test of this effort’s value will be whether the BLM uses it to better balance the current explosion of oil and gas development with other land uses and values, from wildlife conservation to protecting air and water quality.”

**IG REPORT: BLM EMPLOYEES ABUSED CHARGE CARDS.** [Fox News](#) (10/5, 6.72M) reports that “wildfire management employees at the Bureau of Land Management (BLM) used government charge cards to by \$799,000 worth of gift cards from vendors such as REI, American Express, FredMeyer and Visa, according to a report released Sept. 30 by the Interior Department’s Office of the Inspector General.” According to the report, “when investigators requested supporting documentation such as purchase orders, receipts, and authorizing signatures, BLM staff claimed that they were ‘missing.’”

Also reporting on the story is the [CNS News](#) (10/6, 337K).

**FORT CARSON SEEKS LONG-TERM AGREEMENT FOR HELICOPTER TRAINING.** The [Colorado Springs \(CO\) Gazette](#) (10/6, 143K) reports that the BLM will “hold a public meeting Tuesday to discuss an extended proposal from Fort Carson to use public land for high-altitude helicopter training.”

**IDAHO RANCHER SEEN AS ANTI-CLIVEN BUNDY.** The [National Journal](#) (10/6, Subscription Publication, 626K) reports on “Merrill Beyeler, a 69-year-old Lemhi Valley cattle rancher,” who “has been described as the anti-Cliven Bundy: Instead of trying to start a range war with the federal government, he’s sought to solve

conflicts by cooperating with officials, and closely.” The article notes that “Beyeler’s work won him the Bureau of Land Management’s Rangeland Stewardship Award for 2013.” But “when told of Beyeler’s work with the BLM, Bundy didn’t think much of it, describing partnering with the feds as a form of government subsidy.”

### ***Fish and Wildlife Service:***

**DETROIT ZOO CARES FOR TURTLES FOUND AT AIRPORT.** The AP (10/3) reports that “the Detroit Zoo is caring for more than 1,000 turtles that it says authorities believe are tied to an international smuggling ring.” According to the zoo, “some turtles were found stuffed into rubber snow boots and cereal boxes inside a Canadian man’s luggage at Detroit Metropolitan Airport last week.” The zoo says “the incident is connected to a smuggling ring that authorities say is led by another Canadian who attempted in August to cross the border with 51 turtles in his pants.”

Coverage by the AP was also picked up by the Washington Post (10/3, 4.9M), the Charlotte (NC) Observer (10/3, 572K), the Houston Chronicle (10/3, 2.47M), the Sacramento (CA) Bee (10/3, 646K), and WWJ-TV Detroit (10/3, 34K).

Also reporting on the story are the Lansing (MI) State Journal (10/3, 131K) and WXYZ-TV Detroit (10/6, 101K).

**SNOWY PLOVER REBOUNDING ON PACIFIC COAST.** The AP (10/6) reports that “a tiny shorebird that nearly went extinct is making a comeback thanks to a \$150 million habitat restoration effort.” According to the article, “officials in Washington counted a record high 67 western snowy plovers in their last count in January.” The article notes that “Oregon and Washington together, which are counted as a single recovery unit by the US Fish and Wildlife Service, had more than 250 breeding pairs this year.”

Coverage by the AP was also picked up by the Everett (WA) Herald (10/5, 127K) and the Houston Chronicle (10/6, 2.47M).

**GROUP SEEKS LISTING FOR SPOT-TAILED EARLESS LIZARD.** The AP (10/6) reports that “a petition seeking to protect a little-known lizard that makes its home in large portions of an area leading the way in the new Texas oil boom remains in limbo.” An environmental group has asked the FWS “to list the spot-tailed earless lizard as an endangered or threatened species.” Austin attorney Alan Glen, “who specializes in environmental law, says attention on the plight of the lizard has been ‘something of a sleeping issue.’” The article notes that “much of the public’s attention to potential endangered species in Texas has zeroed in on a bird — the lesser prairie chicken.”

Coverage by the AP was also picked up by the Houston Chronicle (10/5).

**FWS IDENTIFIES 23 MARIANAS SPECIES IN DANGER.** The Pacific (GUM) Daily News (10/5, 61K) reports that the FWS has “identified 23 species of plants and animals in Guam and the Commonwealth of the Northern Mariana Islands that are in danger of becoming extinct in the foreseeable future.” The agency “recently released a proposed list of species to be listed as either endangered or threatened under the federal Endangered Species Act.” The FWS is “accepting public comment until Dec. 1 to allow residents to review and comment on the proposal and provide additional information.” Kristi Young, the Service’s acting field supervisor for the Pacific Islands Fish and Wildlife Office, said, “We encourage the people of Guam and the CNMI to actively participate in the public comment process to help us determine if protection is warranted for these rare species.”

**NEW MEXICANS BLAST WOLF DEAL.** The Cibola (NM) Beacon (10/6, 10K) reports that “many New Mexicans were outraged to learn that the U.S Fish & Wildlife Service (FWS) and the Arizona Game & Fish Department (AGFD) have entered into a deal to accept an unpublished plan for Mexican wolf management in Arizona and New Mexico, according to Jose Varela Lopez, New Mexico Cattle Growers’ Association President, La Cieneguilla.” The article notes that “a dozen sportsmen and livestock organizations in New Mexico put FWS Director Dan Ashe on notice that the actions of the federal and state agency are pre-decisional and recommended withdrawal of the entire process with a letter on Sept 25.”

**ENVIRONMENTALISTS CRITICIZE ENERGY GROUP’S ESA REPORT.** The Washington Examiner (10/6, 346K) reports that “an environmental activist nonprofit blasted earlier this week for alleged abuses of Endangered Species Act litigation claimed Friday that the energy industry group’s critical report is ‘riddled with errors and false claims.’” The study “researched and released by the Western Energy Alliance and criticizing

the Center for Biological Diversity and the WildEarth Guardians was made public Monday.” Noah Greenwald, CBD’s endangered species director, said the WEA report “is either exceptionally sloppy or utterly cynical. Either way it’s ginning up fairytales in the hopes of hiding its opposition to helping wildlife that are being pushed to the brink of extinction.”

**SCIENTISTS HOPE TO SAVE DEVILS HOLE PUPFISH.** The [Los Angeles Times](#) (10/4, Sahagun, 4M) reports that scientists at the Ash Meadows Fish Conservation Facility are “trying to establish a captive colony of the fish in a tank built as a replica of the nearby natural rock tub known as Devils Hole, where the species has existed since the Ice Age.” However, “over the last year, only five newborns have been detected in the tank, which is home to all 29 of the adult Devils Hole pupfish now in captivity.” Yet, “the newborns represent a biological milestone: They are the first hatched from eggs produced by fish that were born and raised in captivity.” The article notes that “federal biologists are experimenting with new care and feeding techniques they hope will boost reproduction rates in the \$4.5-million tank.”

**OHIO RIVER ISLANDS NATIONAL WILDLIFE REFUGE SEEKS TO HELP OHIO RIVER MUSSELS RECOVER.** The [AP](#) (10/6, Steelhammer) reports that “to acquaint the public with the wide array of wildlife that lives beneath the surface of the Ohio,” the Ohio River Islands National Wildlife Refuge has “hosted several ‘Under the Waves’ programs at its visitor center near Williamstown.” The article notes that “on Sept. 23, a group of about 35 attended the most recent session, sponsored by the Friends of the Ohio River Islands Wildlife Refuge.” There, they learned about the refuge’s mission to help Ohio River mussels recover.

**CENTRAL MICHIGAN UNIVERSITY RESEARCH INSTITUTE RECEIVES \$274,157 IN GRANTS.** The [Midland \(MI\) Daily News](#) (10/6, 27K) reports that “scientists from Central Michigan University’s Institute for Great Lakes Research recently received \$274,157 in combined grant monies from the US Fish and Wildlife Service and the Illinois-Indiana-Wisconsin Sea Grant.” The funds will “be used to enhance current research of a basin-wide Great Lakes coastal wetlands monitoring program, the first study of its kind.” The article notes that “as part of a 5-year, \$10 million EPA grant, IGLR researchers are taking the lead and using collected data to develop a mathematical decision-making tool to monitor and assess the health of Great Lakes coastal wetlands.”

**EGYPTIAN MUMMY RELEASED FROM CUSTOMS AT MIAMI AIRPORT.** The [Sacramento \(CA\) Bee](#) (10/3, 646K) reports that “the 3,000-year-old Egyptian mummy stuck at US Customs has moved on – to West Palm Beach.” On Wednesday, “the mummified girl, whom scientists believe was between 4 and 8, was put in a warehouse by the US Fish and Wildlife Service.” According to officials, “it wasn’t the mummy tying up things, but pieces of ivory that were boxed up with it on the flight to Miami.” Tom MacKenzie, a spokesman for the FWS, said “stricter rules were placed on imported ivory earlier this year to protect endangered elephants.”

**STUDY: HELPING SAGE GROUSE ALSO AIDS MULE DEER.** The [AP](#) (10/3) reports that “efforts to protect sage grouse in northwest Wyoming also benefit mule deer that migrate through areas of sagebrush along the Upper Green River, according to new research.” Biologist Holly Copeland “wrote in a September entry in the academic journal *Ecosphere* that the unintended benefits of sage grouse protections are an ‘important step toward the conservation of migratory mule deer.’”

**ADDITIONAL COVERAGE OF OREGON OFFICIAL’S MOVE TO FWS.** Additional coverage of Roy Elicker’s move from the Oregon Department of Fish and Wildlife to the FWS was provided by [The Oregonian](#) (10/6, 690K).

**PROPOSAL OF “CREDIT SYSTEM” TOUTED AS BETTER METHOD FOR SPECIES CONSERVATION.** For the “Congress Blog” of [The Hill](#) (10/6, Norton, Baier, 241K), Gale Norton, who was secretary of the Interior under president George W. Bush, and Lowell Baier, president emeritus of the Boone and Crockett Club, write that “a credit system” offers “hope for a better, more cooperative approach to species conservation – a welcome change.” They note that “it is critical that the FWS work with state and local governments to be sure the policy change will be well-designed and that revisions continue to be made to help species and promote a vibrant economy.” The authors conclude that “the proposal may be a first step toward a better way of protecting species – and Americans’ livelihoods.”

**TEXAS COMPTROLLER WELCOMES COURT’S DECISION IN DUNES SAGEBRUSH LIZARD CASE.** In an op-ed for the [Houston Chronicle](#) (10/2, Combs, 2.47M), Susan Combs, the state comptroller in Texas, writes that “Texans scored a significant victory this week when the US District Court in Washington D.C. soundly rejected claims by plaintiffs asserting that the dunes sagebrush lizard should have been listed as an endangered species over two years ago.” According to Combs, “what was clear in the judge’s opinion was that

sound science, protecting the economy and species and protecting landowner confidentiality are mutually compatible.” She claims that the Texas Conservation Plan for the dunes sagebrush lizard “just goes to show that a wide range of stakeholders can work together to establish and implement a science-based plan that keeps the economy moving, while also providing conservation benefits to the lizard.”

**STAMP CAN HELP CONSERVATION EFFORTS.** For the Charleston (WV) Gazette (10/5, 44K), Scott Shalaway writes that the Save Vanishing Species stamp is “an easy and inexpensive way that everyone can help prevent future extinctions of wildlife by simply mailing a letter.”

### ***US Geological Survey:***

**EROS PLAYS ROLE IN STUDY OF CLIMATE CHANGE.** KELO-TV Sioux Falls, SD (9/27, 8K) reports that President Barack Obama “addressed the United Nations on climate change and the United States’ pledge to do what it can to combat it.” The article notes that “part of that commitment includes the release of detailed elevation maps for most of the African continent taken from a NASA space shuttle, which until now was classified information.” The maps are “being stored and distributed from the EROS Data Center right here in South Dakota.”

**BIOLOGISTS COLLECT TURTLE CARCASSES NEAR LOS ANGELES COUNTY LAKE.** The Los Angeles Times (10/4, Sahagun, 4M) reports that “biologists strode along the cracked, dry mud surrounding this evaporating north Los Angeles County lake last week, pausing periodically to pick up an emaciated turtle and wash alkaline dust off its head and carapace.” According to the article, “after three years of drought, this natural 2-mile-long lake, about 15 miles west of Lancaster, has become a smelly, alkaline death trap for one of the largest populations of state-protected Western pond turtles in Southern California.” USGS biologist Jeff Lovich said that “many of the lake’s estimated 300 turtles — shy, aquatic reptiles that are 4 to 8 inches long and live to be 60 years old — are gathering along the receding shoreline with nothing to eat, no place to take refuge and ‘looking like they’ve been dipped in wet cement.’”

## **Securing America’s Energy Future:**

### ***Onshore Energy Development:***

**RESIDENTS PROTEST DRILLING PLANS IN WYOMING TOWN.** The Pittsburgh Post-Gazette (10/5, 538K) reports on the concerns raised by Orvie Stoneking regarding drilling in Rolling Hills, a community in Wyoming. The Stonekings “sent a petition to the BLM protesting the sale,” and “it was signed by people living in 72 of the 90 residences in Rolling Hills.” They wrote that “drilling beneath their homes might pollute their water wells.” But “the BLM refused to accept the Stonekings’ petition” because “only individual letters of protest are accepted.”

### ***Offshore Energy Development:***

**PETITIONERS OPPOSE OFF-SHORE DRILLING.** WSAV-TV Savannah, GA (10/6, 19K) reports that “after speaking-out against off-shore oil exploration in the Atlantic Outer Continental Shelf (OCS), some residents of the Beaufort area are petitioning against it.” According to the article, “a petition on change.org is gaining momentum, with nearly 400 signatures.”

**OFFICIAL OFFERS ANALYSIS OF SHELL’S DRILLING PLAN.** In an op-ed for the Arctic (AK) Sounder (10/6, 6K), Rex Allen Rock Sr., is president of Arctic Iñupiat Offshore, LLC, writes that “there could be other contingencies, but the plans developed by Shell and tested by the agencies are world class.” He claims that “the response plan with its associated vessels is the most robust that has ever been deployed.” According to Rock, “by having the two drilling rigs on site, drilling simultaneously, they can save time by not having to transit a relief rig between Dutch Harbor and the drill site.”

The piece also appears at the Dutch Harbor (AK) Fisherman (10/6, 2K) and the Bristol Bay (AK) Times (10/6, 4K).

## **Tackling America’s Water Challenges:**

**INVASIVE QUAGGA MUSSELS FOUND IN ANGOSTURA RESERVOIR.** The AP (10/3, Burbach) reports that

“the larva of an invasive mussel species closely related the zebra mussel has been found for the first time in South Dakota, in a reservoir in the Black Hills, state officials said Friday.” According to the article, “the quagga mussel, a small invasive mollusk, was identified in the Angostura Reservoir in the southern Black Hills in September by the US Bureau of Reclamation, which manages the reservoir with the state.” The state Department of Game, Fish and Parks is “working with the federal government to try and obtain a second positive sample of the mussels, which it’ll need before it lists the reservoir as positive for the invasive species that have become problematic in other states.”

Coverage by the AP was also picked up by the [Houston Chronicle](#) (10/3, Burbach, 2.47M).

Also reporting on the story is the [Rapid City \(SD\) Journal](#) (10/6, 150K).

**OFFICIALS TRY GIANT WATER COOLERS TO SAVE FISH IN CALIFORNIA.** The [AP](#) (10/3, Knickmeyer) reports that “state and federal wildlife officials are resorting to installing giant water chillers in some of California’s fish hatcheries, as drought, over-allocation of water and climate change all combine this year to make temperatures too warm for some baby salmon and other fish to survive.” FWS workers “installed the coolers at the Livingston Stone National Fish Hatchery at the foot of northern California’s Shasta Dam this summer when water temperatures hit the mid-60s – too tepid for the half-million winter-run baby salmon growing there, said Scott Hamelberg, a federal hatchery manager.” And “at the American River hatchery east of Sacramento, the US Bureau of Reclamation and the California Department of Fish and Wildlife also are installing giant coolers to bring down water temperatures for the hatchery’s young salmon and trout, hatchery manager Gary Novak said.”

Coverage by the AP was also picked up by the [Erie \(PA\) Times-News](#) (10/5, 167K).

Also reporting on the story is the [Fresno \(CA\) Bee](#) (10/4, 337K).

**REP. HUFFMAN URGES LEGAL OPINION ON TRINITY RELEASES.** The [Eureka \(CA\) Times Standard](#) (10/6, 55K) reports that “a day after a federal judge ruled on reservoir releases for Klamath River salmon, North Coast Congressman Jared Huffman demanded immediate clarification of Humboldt County’s water rights from federal officials.” He “wrote Thursday to acting Bureau Commissioner Lowell Pimley, requesting a prompt legal response.” Huffman wrote, “It is imperative that Reclamation release the Interior Solicitor’s opinion regarding Humboldt County’s contract for 50,000 acre feet of water annually from Trinity Reservoir, which dates to the same 1955 Act authorizing the Trinity River division.”

## **Empowering Native American Communities:**

**INTERIOR AWARDS MORE THAN \$2.2 MILLION TO FIVE MONTANA TRIBES.** The [AP](#) (10/6) reports that “the US Department of the Interior has awarded more than \$2.2 million in grants to five Montana tribes to help them develop energy and mineral resources.” The article notes that “the grants were awarded as part of a broader program distributing a total of \$9.4 million to 46 tribal projects nationwide.”

Coverage by the AP was also picked up by the [Franklin \(IN\) Daily Journal](#) (10/6, 51K), the [Washington Times](#) (10/6, 373K), and [KECI-TV](#) Missoula, MT (10/6, 4K).

Also reporting on the story is the [Great Falls \(MT\) Tribune](#) (10/5, 77K).

**Additional Coverage: Interior Awards More Than \$2.8 Million In Grants To New Mexico Tribes.** Additional coverage that “the Interior Department has awarded more than \$2.8 million to 13 tribal energy and mineral development projects in New Mexico” was provided by the [Albuquerque \(NM\) Business First](#) (10/6) and the [AP](#) (10/3). Coverage by the AP was also picked up by [KOB-TV](#) Albuquerque, NM (10/6, 59K).

**Additional Coverage: North Dakota Indian Reservation Receives \$90,000 In Federal Funds For Wind Energy.** Additional coverage that “a wind turbine project on North Dakota’s Turtle Mountain Band of Chippewa Indian Reservation is getting \$90,000 in federal funds” was provided by the [AP](#) (10/3) and the [Bismarck \(ND\) Tribune](#) (10/4, 3K).

**ASSISTANT SECRETARY WASHBURN ATTENDS UN INDIGENOUS CONFERENCE.** The [Indian Country Today Media Network](#) (9/25, 78K) reports that Kevin Washburn, Assistant Secretary of Indian Affairs, “met with Ray Halbritter, Oneida Indian Nation Representative and CEO, and ICTMN editorial staff in New York City on

Monday to discuss land and water rights as well as the convoluted process by which tribes receive federal recognition.” Washburn was also “invited to the UN World Indigenous Conference in New York during the UN General Assembly where President Barack Obama and world leaders also convened.” Washburn said “he endeavors to build and maintain a constructive relationship with Native American sovereign nations and, he hopes to ‘restore the trust’ with all tribal nations.”

**CROW JUDGE HOLDS OFFICIALS IN CONTEMPT OVER WATER.** The AP (10/3) reports that “a Crow tribal judge has found officials with the town of Lodge Grass in contempt of a court order that said the town couldn’t shut off water to residents of a subdivision on the Crow Indian Reservation, despite nonpayment of bills.” According to the article, “the town had been negotiating with the Crow Housing Authority for more than a year in an effort to collect about \$70,000 in delinquent water bills,” and “town employees began shutting off water at the residences furthest behind on their bills in early September.” BIA officers “ordered them off the reservation and the tribal court backed them up.”

Coverage by the AP was also picked up by the Houston Chronicle (10/3, 2.47M) and the Great Falls (MT) Tribune (10/3, 77K).

**PAPER OPPOSES CHANGES TO FEDERAL RECOGNITION PROCESS.** In an editorial, the Hartford (CT) Courant (10/3, 554K) opposes changes in the federal recognition process. It claims that “for 35 years, the existing federal recognition process has worked,” and “under the current system, hundreds of American Indian tribes have been recognized.” The paper argues that “there’s no need to weaken the rules for recognition.”

## Top National News:

**OFFICIALS DOWNPLAY FEARS ABOUT EBOLA OUTBREAK IN US.** Because CBS’s evening news broadcast was preempted by football, ABC and NBC were the only evening newscasts to air on Sunday. Both networks led with coverage of the Ebola case in Texas, including efforts to monitor anyone who may have come in contact with the patient, Thomas Eric Duncan. The two networks spent 11 minutes and 20 seconds on the story. Meanwhile, print coverage this morning focuses primarily on appearances by health officials on the Sunday talk shows, where they sought to downplay fears of an outbreak of the disease in the US.

The Wall Street Journal (10/6, Portlock, Zibel, Subscription Publication, 5.62M) reports that health officials continued to downplay the chances if a widespread Ebola outbreak in the US and again rejected calls for a travel ban on countries impacted by the disease. The Christian Science Monitor (10/5, Knickerbocker, 426K) noted that amid mounting public concern about the disease health officials “have one basic message meant to address public fears.” The AP (10/6, Cass) reports that although there were “some initial missteps in Dallas, tried-and-true methods are underway: tracking everyone who came into contact with the infected man and isolating anyone who shows symptoms.”

CDC Director Tom Frieden said on CNN’s State Of The Union with Candy Crowley (10/5, 420K), “Contact tracing is the core public health activity that is stopping Ebola in its tracks in Dallas. It’s a hard job. It’s an intense job. We’ve got about 50 people, including about 10 who definitely had contact [with diagnosed Ebola patient Thomas Eric Duncan ] and about 40 who might have had contact [with the Duncan], and every one of them will be monitored every day to see if they have fever. If they do, they will be promptly isolated. That’s how you stop Ebola in its tracks. That’s why we’re confident we won’t see a large number of cases from this.” Frieden also said on CNN’s State Of The Union with Candy Crowley (10/5, 420K), “We remain deeply concerned about what is happening in Africa. ... Our top priority is to work 24/7 to protect Americans from this treats. We can only do that by making sure we get it under control in Africa.” The Washington Times (10/6, Klimas, 373K) reports the Frieden told CNN that the CDC “is working to address how the hospital in Dallas missed the diagnosis as well as how they fumbled disposing of infected medical waste.”

Politico (10/5, Levine, 977K) reported that since Duncan’s diagnosis, the CDC “is getting 800 calls a day from health care facilities and other sources with concerns that a sick individual might have Ebola symptoms, up from 50 calls daily before” Duncan was diagnosed. All of the calls “have been false alarms.” Frieden told a news briefing Sunday that “the high-alert attention — ‘making sure Ebola remains top of mind’ — is exactly what public health officials need to help contain spread of the virus here.”

NIAID Director Anthony Fauci said on Fox News Sunday (10/5, Wallace), “The crux of preventing an outbreak in Dallas or any place else is to do exactly what the CDC and Dallas are doing – monitoring patients twice a day. If they get febrile, you isolate them.” The Hill (10/5, Needham, 241K) reported that Fauci told Fox News

Sunday (10/5, Wallace), that while he “wouldn’t be surprised if someone who came into close contact with a Dallas Ebola patient comes down with the disease,” he “stressed the U.S. ‘won’t have an outbreak.’” Fauci said, “Because of our healthcare system and our ability to do the contact tracing and isolation we won’t have an outbreak. ... West Africa is not the United States. Unfortunately, those people there, because of the weaknesses of their health system, are having an outbreak. That won’t happen.”

The Los Angeles Times (10/6, Puzanghera, 4M) highlights Fauci’s claim that one of the people who had close contact with Duncan could contract the disease, and notes that as Fauci spoke, “authorities announced that a homeless person who may have had contact with [Duncan] has gone missing – prompting an unusual medical manhunt.” The unidentified person “was considered at low risk for contracting the virus after officials took his temperature Saturday, officials said.” r. David Lakey, commissioner of the Texas Department of State Health Services said that the missing homeless person “was told to stay where he was, but ‘he left.’”

**Pfeiffer Says US Government Is Prepared To Deal With Ebola.** Politico (10/5, Herb, 977K) reported in its “Politico Live” blog that White House Senior Adviser Dan Pfeiffer said Sunday that the US government is prepared to deal with Ebola, telling NBC’s Meet the Press (10/5, Todd, 3.08M), “We’re very confident of the procedures we have in place.” Politico noted that Pfeiffer “did not indicate whether the Obama administration was considering more aggressive measures to prevent any additional cases of Ebola in the U.S.” following Duncan’s diagnosis.

The Daily Caller (10/5, Weaver, 475K) reports that on NBC’s “Meet the Press,” Joe Scarborough “slammed the White House Sunday,” saying that “no one believes them regarding the recent Ebola scare after a man in Dallas was diagnosed with the virus.” Scarborough said, “Right now a lot of Americans are seeing what happened in Dallas and looking at the laundry list, with what happened Secret Service, with the IRS, with the VA, with ISIS being A JV team. ... So when any member of the government says relax, everything’s gonna be okay, Americans don’t believe that.”

**Besser Stresses Importance Of Stopping Ebola In Africa.** Dr. Richard Besser, who just returned from Liberia, was asked on ABC World News (10/5, story 2, 2:05, Vega, 5.84M) if Ebola can be stopped at the US border. Besser said, “The amount of screening is incredible. ... People who are sick are not getting on the plane. If I were taking Tylenol or something to reduce my fever, that wouldn’t show up. And it would be another slip in the system. That is why it’s so incredibly important we knock the disease out in West Africa so that we are safer here.”

**Duncan’s Condition Downgraded To “Serious.”** Ryan Owens reported in the lead story for ABC World News (10/5, lead story, 3:15, Vega, 5.84M) that Duncan’s condition “is worse than ever.” Duncan “is struggling to survive tonight. His family says he is unconscious, on a ventilator and on dialysis after his kidneys failed.” Mark Potter reported in the lead story for NBC Nightly News (10/5, lead story, 3:15, Holt, 7.86M) that Duncan’s condition is “a far cry from last week when he could talk to relatives by phone from the isolation unit.” Frieden: “We understand his situation has taken a turn for the worse. We know that Ebola is a very serious disease and we’re hoping for his recovery.” The Washington Post (10/6, Sullivan, 4.9M) reports that Frieden said Duncan is “fighting for his life.” Texas Health Presbyterian Hospital in Dallas, where Duncan is being treated, said that his “condition worsened from serious to critical Saturday afternoon.” The New York Times (10/6, Subscription Publication, 9.9M) reports that Frieden described Duncan’s condition as “quite critical,” and said that “medical personnel were striving to support Mr. Duncan’s fluid and electrolyte levels, both crucial to recovery in a disease that causes bleeding, vomiting and diarrhea.”

**CDC Has Identified Nine-High Risk Patients Who Had Contact With Duncan.** Ryan Owens reported in the lead story for ABC World News (10/5, lead story, 3:15, Vega, 5.84M) that the CDC “has identified nine high risk patients in Dallas, people who came in direct contact with Duncan. About 40 others are also being watched, considered low risk.” Mark Potter reported in the lead story for NBC Nightly News (10/5, lead story, 3:15, Holt, 7.86M) that health officials “are regularly testing 38 people who may have had contact Duncan.”

**Dallas Prosecutor Considering Whether To Bring Charges Against Duncan.** In a lengthy story that traces Duncan’s journey to the US from Liberia, the New York Times (10/6, Sack, Subscription Publication, 9.9M) notes that according to a Liberian official, when he was leaving the country, Duncan lied on a form which asked “whether he had been exposed to anyone with Ebola in the past 21 days,” adding that Texas prosecutors say they are “considering whether to bring charges against Mr. Duncan.” Dallas County District Attorney Craig Watkins said Sunday, “We are actively having discussions as to whether or not we need to look into this as it relates to a criminal matter. ... We’re working with all the different agencies to get to the bottom of it.” AFP (10/6, Cooper) reports that the story of how Duncan contracted the disease “has exposed the multiple failings

in his home country of Liberia, where poverty, an overloaded healthcare system and an unresponsive government have deepened the crisis.”

**Infected NBC Cameraman To Arrive in US Monday.** Ryan Owens reported in the lead story for ABC World News (10/5, lead story, 3:15, Vega, 5.84M) that the fourth American infected with Ebola “will soon be on his way home.” A freelance cameraman for NBC News “is expected to arrive in Nebraska tomorrow morning.” Kate Snow reported on NBC Nightly News (10/5, story 2, 2:45, Holt, 7.86M) reported that the cameraman, Ashoka Mukpo, “is doing pretty well. He is walking and eating and drinking on his own, all good signs and the team at the bio containment here, about 40 in the staff, are ready to treat him.”

**Sacra Back In Hospital For Testing To Rule Out A Relapse.** Ryan Owens reported in the lead story for ABC World News (10/5, lead story, 3:15, Vega, 5.84M) that “the third American diagnosed Dr. Rick Sacra is back in the hospital to make sure he doesn’t have a relapse. Doctors are confident it’s just a respiratory infection, he’s isolated until they’re sure.”

**Frieden: It Is “Hard To Keep Up” With Ebola’s Spread In Africa.** The Hill (10/5, Joseph, 241K) reported that on the Sunday shows, Frieden “admitted that Ebola was spreading fast enough in Africa that it was ‘hard to keep up.’” Frieden told CNN’s “State of the Union” that “the U.S. and other nations were achieving a ‘more rapid, more effective response’ to the disease in West Africa, the only sure way to keep it from spreading internationally.” Frieden said, “But it’s going to take time. The virus is spreading so fast that it’s hard to keep up. ... That’s why it’s terrific the president has deployed the Department of Defense there in support of the disease control efforts. This is exactly what’s needed and it’s going to make a difference, but it’s going to take time.”

On ABC’s This Week (10/5, Stephanopoulos, 2.73M), Frieden said, “The virus [in West Africa] is moving very fast, but our response is moving very fast, as well. The Defense Department is on the ground. They’re working with 135 CDC staffers, USAID [officials], and others. The challenge is that putting up a treatment unit isn’t easy. It’s not a question about construction. It’s about training, supervision, supply chains and all of that. It’s moving, but we wish it would move faster.” Frieden said on NBC’s Meet the Press (10/5, Todd, 3.08M), “The drug pipeline is slow. ... Even without drugs or vaccines, meticulous clinical care, just restoring a patient’s fluid balance can save lives. We’re seeing some of the makeshift hospitals [in West Africa] providing that good fluid care, which is doubling survival rates there.”

On CNN’s State Of The Union with Candy Crowley (10/5, 420K), Senate Armed Services Committee member Lindsey Graham said, “It seems to be that the President is all in when it comes to Ebola. I want to compliment him for sending troops to help get ahead of this in Africa.”

House Majority Leader Kevin McCarthy said on CBS’ Face The Nation (10/5, Schieffer, 2.64M), House Majority Leader Kevin McCarthy said, “We are working on with the Administration [on their response to Ebola]. We provided more funding in the Continuing Resolution that actually speeds up the process of developing a vaccine and we are working on how to treat it. But we cannot ignore Africa. We have money to go forward with those troops, but we want to make sure there is a plan out there that [ensures] their safety.”

**Shipment Of Medial Supplies For Sierra Leone Remains At Docks.** The New York Times (10/6, Nossiter, Subscription Publication, 9.9M) reports that a shipping container holding “more than \$140,000 worth of medical equipment” to aid Sierra Leone’s fight against Ebola “has been sitting idly on the docks for nearly two months.” Chernoh Alpha Bah, who organized the shipment, “is an opposition politician,” and a government official said that “political tensions may have contributed to the delay, to prevent the opposition from trumpeting the donations.” Bah said that “three other containers of similar value await shipment from the United States...halted by the government’s long refusal to pay” a fee to the shipping company. The Times notes that the delay “reflects what some in the growing ranks of international officials pouring into this nation to fight Ebola describe as a chaotic, disorganized government response to the epidemic.”

**Conflicts And Ebola Hamper US Efforts To Build Economic Ties With Africa.** The Wall Street Journal (10/6, Wonacott, Subscription Publication, 5.62M) reports that while the US-Africa Leaders’ Summit in August focused on expanding commerce between the two, shifting from relationships centered on conflict, terrorism, and disease, such a change is hampered by the current crises involving Africa, including South Sudan’s efforts to remain intact, US drone flights fighting terrorism, and the Ebola outbreak. However in contrast to the insurgencies and dictators, Africa has a young population and new middle class seeking business and democracy. Not engaging Africa’s business opportunities means leaving the market to China, which has already become the continent’s largest trade partner.

**INTERIM SECRET SERVICE DIRECTOR IS CLOSE TO THE FIRST FAMILY.** NBC Nightly News (10/5, story 5, 2:35, Holt, 7.86M) profiles Joseph Clancy, the “30-year [Secret Service] veteran” who will lead the agency starting this week. Kristen Welker. Reported that Julia Pierson “was brought in after that to clean up the agency, but...resigned this week under pressure.” According to Welker, Clancy “was the President and First Lady’s top pick” after “heading Mr. Obama’s security detail for more than two years.”

On NBC’s Meet the Press (10/5, Todd, 3.08M), White House Senior Adviser Dan Pfeiffer said: “Joe Clancy is someone who President Obama knows very well and is the right person to come in on an interim basis.” On Fox News Sunday (10/5, Wallace), Sen. Kelly Ayotte said “there is clearly a leadership problem” at the Secret Service that “goes beyond the head of the agency” and “to the culture of the agency, the command structure.”

**Cummings: “85%” Of African-Americans Believe Racism Is Behind Secret Service Lapses.** Politico (10/5, Warmbrodt, 977K) reported that on CBS’ Face The Nation (10/5, Schieffer, 2.64M), Rep. Elijah Cummings (D-MD) claimed that “85 percent’ of the African-Americans who have talked to him about the Secret Service have raised the idea that President Barack Obama is not being protected as well as previous presidents because of his race.” Politico notes that Cummings said he does not share those concerns.

The Washington Times (10/6, Chasmar, 373K) reported that CBS’s Bob Schieffer “suggested” to Cummings “that many members of the black community are worried the Secret Service would better protect a white president,” and Cummings replied, “Eighty-five percent of all African-Americans that come to me mention what you just said, and I don’t agree with it.”

**LEW SAYS ECONOMY IS “MOVING STRONGLY IN THE RIGHT DIRECTION.”** Bloomberg News (10/6, Katz, 1.94M) reports that on ABC’s “This Week,” Treasury Secretary Lew said that the economy “is moving strongly in the right direction” after months of “pretty sustained evidence” that “the jobs outlook is improving.”

**Greenspan: Slowing Productivity Is Causing Economic Problems.** On Fox News Sunday Morning Futures with Maria Bartiromo (10/5), former Federal Reserve chairman Alan Greenspan weighed in on the state of the US economy, saying: “The critical issue in the intermediate and longer term for our economy is productivity. ... Our productivity rate is slowing down very dramatically. That is what it causing slow growth in wages and that’s causing a lot of the problems in the economy over the long run. What concerns me most is that unless and until we can rectify that problem, our economy’s long-term outlook is not very propitious.”

**Dionne: Democrats Not Getting Credit For Improving Economy.** In his column for the Washington Post (10/6, Dionne, 4.9M), E.J. Dionne questions why Democrats are not getting credit for the improving economy, noting that one “could not ask for much more from economic numbers than the Democrats got in Friday’s jobs report.” The President, Dionne notes, “is clearly frustrated that having inherited an economy that was at death’s door, he is getting remarkably little credit for getting it back on its feet.” Dionne argues that “the very improvement in the economy means that it is a less central concern to voters than it was when Obama took office — or in 2010,” and voters “who are still concerned about the economy tend to be focused not on its successes but on what it is failing to do for them.”

**CEO Says Obama’s Minimum Wage Hike Will Cost Jobs.** In an op-ed for the Wall Street Journal (10/6, Subscription Publication, 5.62M), Andy Puzder, chief executive officer of CKE Restaurants, criticizes the President’s call to increase the Federal minimum wage to \$10.10, arguing that while this would provide a raise for those currently earning the minimum wage, it would deny employment opportunities to other people because middle-class business owners will be forced to cut jobs and rely on technology to perform certain tasks.

**Krugman: Voodoo Economics Is Making A Comeback.** In his column for the New York Times (10/6, Krugman, Subscription Publication, 9.9M), Paul Krugman writes that so-called voodoo economics appear to be “making a comeback” at the state level as GOP governors “have been going all in on tax cuts despite troubled budgets, with confident assertions that growth will solve all problems.” While that is “not happening,” the “true believers show no sign of wavering.” Krugman argue that “facts won’t stop the voodoo comeback,” because “voodoo economics has dominated the conservative movement for so long that it has become an inward-looking cult,” and “the nature of the budget debate means that Republican leaders need to believe in the ways of magic.”

**Samuelson: Economics Is In “Disarray.”** In his column for the Washington Post (10/6, Samuelson, 4.9M), Robert Samuelson says that his “takeaway” from Martin Wolf’s “The Shifts and the Shocks,” which provides “a detailed analysis of the 2008-2009 financial crisis and its aftermath,” is that “economics is in disarray.” There is

“no consensus on how to proceed.” Samuelson notes that while we once “believed we had a basic control over our economic environment; now we acknowledge a loss of control.”

## **Editorial Wrap-Up:**

**NEW YORK TIMES. “Yes To Marijuana Ballot Measures.”** The New York Times (10/6, Subscription Publication, 9.9M), in an editorial urges voters in Alaska, Oregon, and Washington, DC to approve measures on their ballots this fall that would legalize recreational use of marijuana saying that it is “far less dangerous than alcohol.”

**“India And America, Beginning Again.”** In an editorial, the New York Times (10/6, Subscription Publication, 9.9M) says that the President and Indian Prime Minister Modi “have done the minimum needed to infuse new energy into a bilateral relationship that had run aground,” and are “going to have to work harder, so relations don’t atrophy or become more strained.” The Times notes that in their meeting last week, the two leaders “failed to break an impasse on two major irritants: trade and taxes.” In addition, “there was no sign of progress” on a number of “strategic concerns,” and there remain “serious questions about whether Mr. Modi...will defend the rights of all Indians.”

**“The First To Fear Gunplay.”** The New York Times (10/6, Subscription Publication, 9.9M) in an editorial praises California’s new law that allows family members to seek a court order “to seize the firearms of a family member they fear is on the verge of harming himself or others.” The Times says the law may not only help “prevent mass shootings,” but may also help prevent suicide. The paper concludes that while the law “is not a total cure” yet it does offer “some progress against the gun scourge.”

**“Bad Credit? Big Problem.”** In an editorial, the New York Times (10/6, Subscription Publication, 9.9M) argues in favor of a NYC city council measure banning “employment discrimination based on someone’s credit history.” The Times says that the bill has “wide support,” but its author “fears it may be weakened by the addition of exceptions and loopholes for certain industries or occupations, as has been done in some states.” The Times says that a clean bill is necessary to undue the “damage” for “millions who are hobbled by bad credit.”

**WASHINGTON POST. “Paying For Our Wars.”** The Washington Post (10/6, 4.9M), in an editorial, says it is an “undeniable reality...that the 2011 budget plan was a ‘serious strategic misstep’ that has hamstrung the Pentagon’s ability to respond to the multiple international crises of this year,” and, according to the Post, “the problem will surely worsen as the war against” ISIL, “which [president] Obama and military leaders have said is likely to last for years...deepens.” The Post says “the price could soar past \$20 billion” a year “if the fighting intensifies and a larger ground contingent is needed.” The Post goes on to urge Congress to “follow the recommendation of the National Defense Panel and restore the defense budget to the levels [former Defense Secretary] Gates recommended in 2011.”

**“Inflexible.”** An editorial in the Washington Post (10/6, 4.9M) criticizes Russia’s decision to suspend its “participation in a highly respected, 21-year-old student exchange program that brings Russian teenagers to the United States for a year of study.” The Post calls the move “another chapter in the state-led campaign to close the Russian mind,” and argue that it “will be Russia’s people who suffer.”

**“For D.C. Attorney General.”** In an editorial, the Washington Post (10/6, 4.9M) endorses Karl Racine in the District’s first election for attorney general. Racine’s “25 years of experience as a lawyer is noteworthy for its depth and range,” and he “knows the city and the operations of its government.”

**WALL STREET JOURNAL. “Regulatory Capture 101.”** In an editorial, the Wall Street Journal (10/6, Subscription Publication, 5.62M) says that the journalistic response to the leaked audio recordings that allegedly show that NY Fed regulators went east on Goldman Sachs is a sign of the naivete. The Journal says that big firms generally get softer handling from regulators are ultimately co-opted by those that they regulate, as suggested by George Stigler 43 years ago. The Journal says that the solution is have simple, straightforward regulations that can’t be gamed.

**“Brazil Gets A Choice.”** An editorial in the Wall Street Journal (10/6, Subscription Publication, 5.62M) says that in Brazil’s Oct. 26 run off election, centrist candidate Acéio Neves has a chance against President Dilma Rousseff if he can convince voters that Rousseff’s policies are the cause of Brazil’s problems and he offers a better program.

**“The Nine Years Of DeLay.”** The Wall Street Journal (10/6, Subscription Publication, 5.62M) in an editorial on former Rep. Tom DeLay says that his prosecution for violation of campaign finance laws had been a political effort, and notes that last week the Texas Court of Criminal Appeals in an 8-1 decision overturned his conviction, finding that the prosecution did not demonstrate that he violated the law. The Journal regrets that DeLay had to wait nine years for his vindication and that the prosecutors will not be punished.

**“Choosing Time In Hong Kong.”** A Wall Street Journal (10/6, Subscription Publication, 5.62M) editorial says that Hong Kong Chief Executive Leung Chun-ying Chinese supreme leader Xi Jinping can rebuild public support and avoid violence by reopening consultations on Hong Kong’s political system and compromising on plans to elect its next Chief Executive. A violent crackdown and mass arrests, the Journal argues, will alter world opinion about whether a peaceful, modern China is possible.

**Washington Schedule:****TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Meets with the lead financial regulators at the White House for a discussion on the economy and to receive an update on implementation of Wall Street Reform; meets with members of his national security team and senior staff to receive an update on the Ebola outbreak in West Africa and the Administration's response efforts.

VICE PRESIDENT BIDEN — Travels to Los Angeles for an event on the economy and to attend political events.

US Senate: The Senate is not scheduled to reconvene again until Oct. 15 for a pro forma session.

US House: The House stands in recess until 2 p.m. Wednesday, Nov. 12.

Other: Oct. 6 – 9. HOMELAND SECURITY WEEK — A three-day exhibition featuring over 65 exhibitors, presented by the International Quality and Productivity Center. <http://www.homelandsecurityexpo.com/DynamicHtml.aspx?pageid=187351&eventid8487> 5:45 p.m. Science and Technology Directorate (S&T) Office of Support Anti-terrorism by Fostering Effective Technologies (SAFETY) Act Implementation Director Bruce Davidson will deliver remarks entitled "The SAFETY Act – Achieving Your Target State of Readiness." Location: Walter Washington Convention Center, 801 Mt. Vernon Place, NW.

FSOC – LEW, YELLEN, OTHERS — Treasury Secretary Jacob J. Lew will preside over an open session of the Financial Stability Oversight Council. Participants: Jacob J. Lew, Secretary, Department of the Treasury (Chairperson of the Council); Janet L. Yellen, Chair, Board of Governors, Federal Reserve System; Thomas Curry, Comptroller of the Currency; Richard Cordray, Director, Consumer Financial Protection Bureau; Mary Jo White, Chair, SEC; Martin J. Gruenberg, Chairman, FDIC; Timothy G. Massad, Chairman, Commodity Futures Trading Commission; Melvin L. Watt, Director, Federal Housing Finance Agency; Debbie Matz, Chairman, National Credit Union Administration; S. Roy Woodall, Jr., Independent Member with Insurance Expertise; Richard Berner, Director, Office of Financial Research (non-voting member); Michael T. McRaith, Director, Federal Insurance Office (non-voting member); Adam Hamm, Commissioner, North Dakota Insurance Department (non-voting member); John Ducrest, Commissioner, Louisiana Office of Financial Institutions (non-voting member); David Massey, Deputy Securities Administrator, North Carolina Department of the Secretary of State, Securities Division (non-voting member). Open press. Live webcast at: [www.treasury.gov/press-center/Video-Audio-Webcasts/Pages/Webcasts.aspx](http://www.treasury.gov/press-center/Video-Audio-Webcasts/Pages/Webcasts.aspx). Media without Treasury press credentials must email Ronda Buckmon at [Ronda.Buckmon@treasury.gov](mailto:Ronda.Buckmon@treasury.gov) with the following information: full legal name, Social Security number, date of birth, and country of citizenship. RSVP DEADLINE: Friday, October 3, at 12:00 PM. Location: U.S. Department of the Treasury, Cash Room, 1500 Pennsylvania Avenue, NW.

**Last Laughs:****LATE NIGHT POLITICAL HUMOR.**

**Jimmy Fallon:** "Of course, the other big news this week is that Secret Service Director Julia Pierson stepped down after two major security breaches at the White House. And listen to this – it turns out Pierson's first job was actually as a costume character at Disney World."

**Jimmy Fallon:** "Bill Clinton will headline four events in his home state of Arkansas to rally the Democratic base. When asked why, Clinton said, 'Cause you know, I'm all about that bass, 'bout that bass, no treble.'"

## Week Ahead + Items of Notes

1 message

Beyer, Emily &lt;emily\_beyer@ios.doi.gov&gt;

Thu, Oct 9, 2014 at 5:39 PM

Bcc: os\_oco@ios.doi.gov

On October 14, Secretary Jewell will travel to Twin Falls, Idaho, to tour sagebrush steppe ecosystem conservation efforts, meet with local ranchers, private landowners, employees, and other stakeholders. The visit comes on the heels of a similar visit to Lakeview, Oregon, last week and a visit to Craig, Colorado, earlier this year. A [recent report](#) found that visitors to BLM sagebrush lands in the 11 western states spent approximately \$623 million within 50 miles of the recreation sites in 2013, which yielded an economic output of over \$1 billion. Reporters will join the tour, including Rocky Barker from the Idaho Statesman.

On October 15, Secretary Jewell will travel to Pinedale, Wyoming with Governor Mead and FWS Director Dan Ashe to tour sagebrush conservation efforts on a local ranch and attend a signing ceremony for nine Candidate Conservation Agreements with Assurances with local ranchers to protect Greater sage-grouse habitat. While there, the Secretary will also meet with local oil and gas stakeholders. We expect the AP and local WY reporters to cover the tour and signing ceremony.

On October 16, Secretary Jewell will attend the National Wilderness Conference, to be held in Albuquerque, New Mexico from October 15-19. This year's conference celebrates the 50<sup>th</sup> anniversary of The Wilderness Act. Senior staff from USDA Forest Service and DOI Bureaus will be in attendance and speaking. During her remarks, Jewell will discuss the economic impacts of conservation, including that the value provided by the 407 million annual visits to Interior sites, which was estimated to be \$25 billion, while economic output was estimated to be \$41 billion and approximately 355,000 jobs were supported. The remarks are open press.

Next week, DOI staff will hold one on one meetings with states on Greater sage grouse conservation efforts. The meetings are closed press.

APPOINTED DOI EMPLOYEES**

***PRIVILEGED AND CONFIDENTIAL***

**WEEK-AHEAD REPORT: NATIONAL PARK SERVICE  
October 8 – October 18, 2014**

**Highlights of Travel, Meetings, and other Public Events**

*Legislative Testimony:*

None.

*Meetings:*

None.

*Travel:*

October 8, Jon will be in Baltimore for a meeting focusing on the Susquehanna River Watershed and its future.

October 10, Jon will meet with Coca-Cola executives in Atlanta to discuss the NPS Centennial.

October 11, Jon will participate in the World Heritage site dedication at Poverty Point in Louisiana.

October 14, Jon will speak on the NPS Centennial at the National Recreation and Park Association meeting in Charlotte, NC.

October 17, Jon will speak on the NPS's role in wilderness at the Wilderness Conference in Albuquerque, NM.

October 18, Jon will speak at Chicago Ideas Week on the importance of place.

**Public Announcements**

October 8

On October 8, Jon will attend a joint meeting with USFWS Director Ashe, nonprofit partners, and philanthropic foundations in Baltimore to explore the funding potential for *Envision the Susquehanna*. The goal of this meeting is to engage foundations in the initiative's large landscape, community-based conservation work in the Susquehanna River watershed and along the Captain John Smith Chesapeake Historic Trail (John Smith NHT). *Envision the Susquehanna* will provide a focused, community-based conservation effort that leverages the best available technology to protect the natural, cultural and recreational resources along the river and in the watershed. In order to realize this large landscape effort and ensure the long-term sustainability of the Susquehanna and the John Smith NHT, we will need to create a more robust and collaborative vision and funding strategy.

On October 7 and 8, Colorado National Monument (CO) will hold public meetings to discuss safety issues along the park's East Hill Road public right-of-way over vehicle size, cargo, speed and other concerns. The listening sessions arise from local criticism over the park's decision in June (superintendent's compendium revision), since rescinded, to restrict hazardous cargo vehicles (propane delivery trucks, primarily) in winter over a portion of the road. The road is the main travel route between greater Grand Junction and Glade Park, a growing rural community southwest of the monument. An alternate, unpaved route is 2 miles longer.

On October 7-9, Devils Tower National Monument (WY) staff will hold a consultation meeting with 24 affiliated tribes. The primary topic will be the desire of Lakota tribe members to have the name of the monument changed. Tribal members hold strong feelings that the name is disrespectful and offensive to the core values that the area holds within their culture. They want the name to reflect a more positive image of the monument. The monument's name has long been an item of contention with the Tribes and is consistently brought up as offensive during consultation meetings, technical meetings; in media interviews and social media.

October 4-19, The Wilderness Inquiry Canoemobile will be delivering programming along the Lower Delaware River and its tributaries. Canoemobile is a fleet of vans, each with six 24' Voyageur canoes, that delivers place-based education on urban rivers and waterways nationwide. As many as 2,400 minority and underserved youth in the four largest cities along the Lower Delaware River (Camden, NJ; Philadelphia, PA; Chester, PA; and Wilmington, DE) will experience, enjoy, and learn about the Delaware and its tributaries. On October 7, there will be a press event on the Camden Waterfront at Wiggins Park Marina. A second Canoemobile fleet will be visiting the Harlem River and other locations in New York City from October 6th through 17th.

#### October 9

Nothing to report

#### October 10

On October 10, the EPA notice of availability for the George Washington Memorial Parkway (VA) Dyke Marsh Wetland Restoration and Long-term Management Plan/Final Environmental Impact Statement (FEIS) will be published. The NPS has identified Alternative C as the preferred alternative. Under this alternative, up to 180 acres of various wetland habitats would be restored within the historic boundaries of the marsh and a breakwater would be installed on the southern edge of the historic promontory to help stabilize the marsh.

During Columbus Day weekend, October 10 – 13, Biscayne National Park (FL) will partner with other agencies to protect park resources and the safety of visitors. Traditionally many boaters gather in the park to celebrate the holiday weekend. Because a large number of the attendees become inebriated, this weekend has become the most dangerous of the year in the park. Safety inspections and boating under the influence checks will be conducted throughout the weekend and special regulations are in force, including a marked anchorage and restrictions on boats being rafted together.

#### October 11

On October 11, Jon will speak at the inscription ceremony for the Poverty Point World Heritage Site (LA). He will be joined by Lt. Governor Jay Dardenne and US Senator Landrieu. Poverty Point is the 1,001<sup>st</sup> property on the World Heritage List. It is a 3,400 year old group of mound works. The NPS administers the World Heritage Program by identifying and nominating U.S. sites to the World Heritage List.

#### October 12

On October 12, at an event in Phoenix, the National Trust for Historic Preservation will officially announce its designation of the Painted Desert Community Complex as a National Treasure – a designation of the Trust's own making designed to focus on preservation fundraising and raise awareness. The Trust and Petrified Forest National Park (AZ) will be raising the profile of the preservation effort and seeking to accomplish some rehabilitation projects through raised funds or volunteer work. The effort is expected to last 18-24 months.

#### October 13

The week of October 13, Florissant Fossil Beds National Monument (CO) plans to implement a prescribed burn on approximately 180 acres along the northern boundary adjacent to Teller County Road 1. The primary goal of the project is to reduce accumulated hazardous forest fuels and to create a buffer near the monument's northern boundary to help protect adjacent neighbors and communities. If prescribed conditions are not met within the scheduled week, burning may be delayed until later in the month or until next spring. Extensive outreach and publicity regarding the proposed burn has been conducted, including local agencies and congressional staff. Public outreach meetings are scheduled for October 6, 8 and 10.

#### October 14

On October 14, the National Capital Parks-East (DC/MD) will begin a turf improvement project in Lincoln and Stanton Parks with closures lasting through June 30, 2015. The National Mall and Memorial Parks turf specialist developed a special seed mixture and germination timeline especially for the conditions at Lincoln and Stanton Parks with the goal of creating a dense lawn that will remain healthy at high temperatures and low soil moisture, while also being able to tolerate heavy use. In addition, the park has been working closely with the community and the United States Park Police to address numerous calls and complaints of illegal activity brought on by homeless visitors to Stanton Park; arrests have been made.

#### October 15

On or around October 15, sand replenishment is scheduled to begin at Riis Beach in the Jamaica Bay Unit of Gateway National Recreation Area (NY). The park, in conjunction with the National Parks of New York Harbor (NPNH), plans to do a news release with photo and possibly a video clip. Media interest will likely involve local outlets such as the Rockaway Wave and the Rockaway Times. There is a reporter from the NY Daily News whose beat is Jamaica Bay, and has covered the park on numerous occasions. The Rockaway Times editor has already raised questions as to why the NPS is not doing additional sand replenishment at Fort Tilden. The Army Corps of Engineers notes that there is a proposed media event by Rep. Gregory Meeks focusing on the sand replenishment on the Rockaway beaches managed by NYC Parks. The Corps is finishing the work on the city beaches and then moving on to Jacob Riis Park Beach. The Corps has suggested that the NPNH participate the media event. There may be substantial news interest, which could include local network affiliates, NY 1, the NY Times and NY Post.

On October 15, the NPS will participate in events celebrating National Fossil Day. The flagship event is being hosted by the Smithsonian Museum of Natural History. National Fossil Day promotes awareness and stewardship of fossils, and fosters greater appreciation of their value. More than 185 partners in 48 states, including museums, federal and state agencies, fossil sites, universities, and professional organizations, are joining forces to support this nationwide celebration.

#### October 16

On October 16, the second NPS town hall meeting has been tentatively scheduled by Congresswoman Eleanor Holmes Norton to discuss issues related to National Capital Parks – East (DC/MD).

On October 16, 21 and 27, public meetings and workshops will be conducted for the feasibility study on The September 11<sup>th</sup> National Memorial Trail (PA). The September 11th National Memorial Trail will provide a physical linkage for the three memorials commemorating the 9/11 events at the Pentagon, the Flight 93 crash site, and the World Trade Center. The northern Pennsylvania trail route from the Delaware River to the Flight 93 National Memorial and the Great Allegheny Passage will span 300 miles, connecting communities, significant sites, and local memorials along the way.

#### October 17

Nothing to report

October 18

On October 18, Big Bend National Park (TX) will host a Good Neighbor Day event inviting many local school children as part of a National Park Foundation-funded *Ticket to Ride* grant. The park is expecting 500-700 children at the event.

### **Major Press Inquiries**

Everglades National Park (FL) -

- Greenwire Articles on Park Issues. In the next few weeks Greenwire will publish feature stories on the invasive exotic fish problem in the park, and on fire management and prescribed burns in the park.
- Web Film Featuring Park Firefighter. A production company recently filmed a short web video for a series called, *Unsung: A Day in the Life of Hard Work* that will feature Everglades National Park firefighter Katherine Corrigan. It will be available to the public sometime in late November.
- New York Times Article on Historic Nike Missile Site Tour. The New York Times is planning a travel story highlighting the Historic Nike Missile Site tour in the park. It is expected to run in December.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Delaware Water Gap National Recreation Area (PA, NJ) – Closure to Hunting on Park Lands within Lehman Township Pennsylvania.** On October 1, 2014, the Pennsylvania Game Commission closed all hunting and trapping seasons within seven townships in northeastern Pennsylvania, where the search continues for a fugitive wanted in the shooting death of state police trooper. This state closure applies to Lehman Township, Pike County, Pennsylvania, and affects 7,067 acres of park land within the Township. Appropriately, the park, using the discretionary authority under 36 CFR 1.5, issued a closure to hunting within the park boundaries of Lehman Township. The closure was necessitated after the Pennsylvania State Police uncovered explosive devices that were apparently left behind in (non-park) wooded areas by the fugitive. The discovery of the devices, and the danger associated with the search effort in general, were deemed as posing too great a risk to hunters, trappers and members of the general public. The park has maintained close liaison with the FBI and State Police during the course of this investigation. Presently there have been no indications that the fugitive is located anywhere near or within the park boundaries.

**Historic Tax Credits - FY14 Program Statistics.** Preliminary figures for the fiscal year that just ended show that, for the fourth year in a row, the number of applications submitted for proposed projects (Part 1 and Part 2 applications) has continued to rise over the prior year. Also, Part 2 application activity in FY14 surpassed the pre-recession highs for the program.

**Hawai'i Volcanoes National Park (HI) – Emergency Access Road for Local Residents.** Emergency environmental compliance has been approved that will allow the NPS to work with state and county officials to begin design and construction of a 5.4 mile section of primitive, one-lane road following the alignment of the old Chain of Craters Road within Hawai'i Volcanoes National Park. The NPS, county, and state of Hawai'i have been evaluating all viable options that would allow for emergency ingress and egress for local residents impacted by the recent lava flow that is expected to sever access to the southeast corner of the Big Island of Hawai'i. The proposal for this route was approved in accordance with federal law. The Kalapana-Chain of Craters Road has been blocked by lava for 37 of its 49-year existence. To protect park resources, the proposed emergency route would follow the old lava-covered road alignment as much as practicable. The road will not be open to visitor use. Should the function of the road change after the emergency period, the NPS will

complete additional compliance, as appropriate, to evaluate impacts not already accounted for in the emergency approval. Administration and funding of the project has not yet been determined. However, the park will monitor compliance with all anticipated environmental impacts and mitigations identified in the emergency activities approval.

**Glen Canyon National Recreation Area (UT/AZ) – Consultation with Navajo Nation Regarding Access to Antelope Point.** NPS staff has been consulting with the Navajo Nation since late 2012 regarding access within the joint Antelope Point Project area for all Commercial Use Authorization (CUA) holders. Glen Canyon NRA and the Navajo Nation developed a Memorandum of Agreement (MOA) that was signed by the Regional Director. The MOA will provide access to Antelope Point to all CUA holders, consistent with the Glen Canyon NRA Commercial Services Plan, terms of the concession contract, and Antelope Point project agreements in place. This MOA will provide consistency in business practices throughout Glen Canyon NRA, resulting in improved visitor services, increased opportunities for locally-owned businesses (including Navajo owned businesses), and additional employment opportunities for Navajo Nation tribal members in the area. It will also allow Navajo Nation the opportunity to better regulate and benefit from the increased business to Antelope Point. The Navajo Nation President has not yet signed due to political issues within the Tribe and concerns raised by the concessioner. The NPS is preparing a letter to the Navajo Nation President requesting his signature and implementation of this MOA.

**Glen Canyon National Recreation Area (UT/AZ) – Submittal of Notice of Availability for Off-road Vehicle Management Plan.** The Glen Canyon Off-road Vehicle Management Plan and Final Environmental Impact Statement (Plan/FEIS) analyzes a range of alternatives and actions for managing off-road use of motor vehicles and on-road use of off-highway vehicles (OHVs) and street-legal all-terrain vehicles (ATVs). The Plan/FEIS assesses the environmental impacts that could result from continuing current management (the no-action alternative) or implementing any of the four action alternatives. The recommended action in the final plan would allow OHV/ATV use on 7 miles of road presently closed to OHV/ATV use. These seven miles would complete a loop on an existing roads network on NPS and BLM lands. Local and national interest in the Plan/FEIS is expected.

**Trico Plant #1, Buffalo, NY.** A decision denying the Part 2 application (description of proposed work) is expected to be issued in early October. The applicant can revise the project to address the reasons for denial or appeal the decision to the NPS. The Trico Plant is a long-vacant industrial complex in downtown Buffalo proposed to be converted into hotel and residential uses. The applicant proposes to demolish the oldest portion of the complex, which is in deteriorated condition, but the demolition of which will impact the historic character of the property. There may be inquiries from the New York delegation or media about the project.

**Cape Hatteras National Seashore (NC) –** In October, a Notice of Intent for a county prepared EIS for beach nourishment near Highway 12 is expected to be published in the Federal Registers. The Seashore has received a permit application from Dare County, NC, to conduct beach nourishment activities to mitigate erosion near Highway 12, which runs the length of the Seashore. To determine if a Special Use Permit can be issued, the County is preparing an Environmental Impact Statement (EIS) for the NPS. The application and EIS process are expected to receive local media coverage and stir controversy. There are strongly differing views about the proposed activity – some local residents are concerned that the highway will be damaged prior to completion of the EIS, and conservation groups are concerned about the precedent being set that beach nourishment may occur in a National Seashore. The North Carolina delegation has been briefed.

**Lake Clark National Park and Preserve (AK) – Finding of No Significant Impact (FONSI).** The Lake Clark National Park and Preserve General Management Plan Amendment/Environmental Assessment should be signed soon. The plan updates the park's 1984 GMP, and includes direction on wilderness, coastal, and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement, open houses, and ongoing tribal consultation and state engagement per Section 1301 of

ANILCA. Public meetings held in February and March at several cities and villages near the park were lightly attended.

**CLOSE HOLD: Golden Gate National Recreation Area (CA) – Ruling Expected in Taser Incident.** U.S. Magistrate Judge Jacqueline Scott Corley is presiding over the Hesterberg civil lawsuit against the NPS stemming from the January 29, 2012, incident that caused an NPS law enforcement ranger to deploy her Taser. The judge is expected to make a ruling in the next two to five weeks. Last year, federal officials rejected a \$500,000 claim filed on behalf of Hesterberg for his damages and the judge found that the ranger was within the law and did not falsely imprison the complainant. This judgment is specifically about damages. The NPS is working on draft statements and communication plan for after the ruling is made public.

**Lewis and Clark National Historic Trail (NE) – Public workshop and meeting on Eastern Legacy Special Resource Study for the Potential Extension of the Trail**

A public workshop and meeting are scheduled for October 24 and 25, 2014, at Natural Bridge, Virginia, to review and collect feedback from participants regarding Trail extension feasibility criteria specific to Botetourt, Rockbridge, Augusta, and Albemarle Counties in Virginia. The meeting and workshop are being held as a follow up to public workshops held at Natural Bridge in March 2012. Considerable participation by interested members of the public, Trail extension advocates, elected officials, and public employees is anticipated at the events.

**Gates of the Arctic National Park and Preserve (AK) – GMP Amendment EA.** On October 29, the General Management Plan Amendment / Environmental Assessment is slated for release for a 60-day comment period. The plan updates the park's 1986 GMP, and includes direction on wilderness and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement and ongoing tribal consultation and state engagement. Public meetings will be held in Anchorage, Fairbanks (a public hearing, per ANILCA), and Anaktuvuk Pass, plus several other venues tied to other related meetings.

**Great Sand Dunes National Park and Preserve (CO) – Public Scoping for Ungulate Management Plan.** A public comment period on draft preliminary alternatives for the Ungulate Management Plan/EIS will close on November 2. Two public open houses have been held and park staff is also making formal presentations to agencies, organizations and groups throughout the San Luis Valley. The final plan will determine the appropriate future management of bison and elk within the park and preserve. Elk and bison are currently on the landscape; elk range throughout and bison are owned and managed by The Nature Conservancy (TNC) on the Medano Ranch, an inholding within the park. In addition to a no-action alternative, the park is considering three action alternatives. Bison options under consideration include no bison, retention of a smaller number of the existing bison owned by TNC, and introduction of a small conservation herd of outside origin. Elk management options include the use of non-lethal tools and limited lethal removal for dispersal and population reduction purposes. There is interest in this planning effort from TNC, Colorado Parks & Wildlife, Colorado Department of Agriculture, and the US Fish & Wildlife Service. The park is working closely with these entities. A key consideration in this effort is wilderness and potential impacts. More than eighty percent of the park and preserve are either designated or proposed wilderness. Minimum requirements analysis will be done for all alternatives.

**Hecht's Company Warehouse, Washington, DC – The former Hecht's Company Warehouse on New York Avenue, NE, is being redeveloped by Douglas Development as a mixed-use residential and commercial project. The developer contacted the DC State Historic Preservation Office after the project was well underway, including the demolition of a contributing portion of the building, out-of-scale new construction, and other changes that are problematic relative to the project meeting the Secretary's Standards. The developer has indicated that he still intends to submit a tax incentives application for the project.**

**30-60 Day Look Ahead**

This fall, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between the NPS and Indian tribes and subject to annual permits. Appropriate levels of NEPA and NHPA review and compliance would be required. Collection for commercial uses would be prohibited. This rule change would provide reasonable, resource protection based use of park resources while assisting in support of the continued lifeways of American Indian tribes. National tribal consultations indicate that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

In mid-October, Everglades National Park (FL) plans to release a new Fire Management Plan/EA for a 30-day public comment period. Current fire management at the park is based on the 1995 Fire Management Plan.

In October, Valley Forge National Historical Park intends to conduct a test prescribed fire in a 17-acre meadow at the southwestern edge of the park. The date of the burn will be determined by environmental conditions. The purpose of the burn is to test the effectiveness of prescribed fire in controlling invasive species and promoting native meadow plant species for wildlife habitat. The burn location was selected based on its plant community, existing fire containment features, few archaeological or historical resources, and distance from park neighbors, recreation areas, and major roadways. The prescribed fire will be implemented by the NPS Northeast Regional Fire Team in coordination with local emergency response; outreach to neighbors, stakeholders and media is underway.

On October 22, there will be an announcement and celebration of the listing of NYS Barge Canal on National Register of Historic Places. Erie Canalway National Heritage Corridor (ERCA) was the preparer of the nomination after years of research and preparation. ERCA has a very strong history and relationship with the NPS.

On October 25, 2014, Abraham Lincoln Birthplace National Historical Park (KY) will hold a groundbreaking ceremony for facility improvements at the Boyhood Home unit, also known as Knob Creek. This is the first major improvement to that unit since the property was donated to the NPS in 2001. The land was acquired by private and public entities using money donated by individuals and organizations in the community and funds from the Commonwealth of Kentucky. It was donated to the NPS in 2001. The Boyhood Home unit is Knob Creek Farm, the home of the Lincoln family from 1811 to 1816.

This fall, Grand Canyon National Park (AZ) expects to issue the Backcountry Management Plan/Draft Environmental Impact Statement (Plan/DEIS) for public review and comment. The Plan/DEIS addresses management of over 1.1 million acres of the park's backcountry, most of which is proposed for wilderness designation. The Plan/DEIS is needed to address immediate backcountry issues and provide an adaptable framework to manage backcountry use into the future while protecting natural and cultural resources. Public scoping including public meetings occurred in 2011 and agency and tribal consultation has been on-going.

On November 20, proposals are due in response to a business opportunity to operate overnight accommodations, food and beverage, retail service, fuel and auto services, and other related services within Yosemite National Park (CA). The new 15-year contract is scheduled to begin on March 1, 2016. This is the park's primary concession operation and the largest concession contract in the NPS.

## **FWS SECRETARIAL WEEK-AHEAD REPORT**

**October 8, 2014**

### **Highlights of Travel, Meetings and other Public Events**

October 10: FWS will issue Enhancement of Survival permits to nine Wyoming ranchers who have applied for the Greater Sage-Grouse Candidate Conservation Agreements with Assurances. A press event in Sublette County will celebrate this achievement and highlight the ongoing sage-grouse conservation campaign. R6

October 13: FWS will attend a meeting with local hunters and representatives from the Hawaii Department of Land and Natural Resources on the island of Hawaii. The purpose of the meeting is to identify areas for game management and conservation. Potential for controversy. R1

October 15: Bernalillo County, New Mexico, will announce \$8 million in federal funding through the Federal Lands Access Program for improved access to Valle de Oro NWR in Albuquerque. Funding will be used to improve pedestrian and bike safety and mobility along Albuquerque's 2nd Street corridor, which is the primary access route to the refuge. Coordinated outreach with Bernalillo County planned. R2

October 15-19: The National Wilderness Conference will be held in Albuquerque, New Mexico, celebrating the 50<sup>th</sup> anniversary of The Wilderness Act. Field activities are planned for attendees. FWS will also host activities for the 50<sup>th</sup> anniversary "Get Wild Festival" scheduled during the conference (October 18) at Albuquerque's Civic Center Plaza. Outreach planned. R2

October 15-17: Northeast Climate Science Center Consortium Member College of Menominee Nation Sustainable Development Institute will be hosting the *Shifting Seasons Summit* that will provide climate change adaptation training for northeast tribes in Keshena, Wisconsin. R5

October 15-16: FWS staff and other private lands conservation practitioners working on greater sage-grouse conservation are meeting to promote an integrated and efficient approach to conserving sage-grouse on private lands. Partners for Fish and Wildlife program biologists and state coordinators, Ecological Services collaboration biologists, and project leaders from refuges with sage-grouse as a priority species will attend. R6

October 16: The FWS Midwest Regional Director will participate in the grand opening celebration and ribbon cutting of the visitor center at Port Louisa NWR in Wapello, Iowa. The building is LEED gold certified. R3

### **Public Announcements**

#### **Thursday October 9**

FWS will announce announcing the final translocation of unwanted captive Mojave desert tortoises from the Desert Tortoise Conservation Center (DTCC) near Las Vegas the week of October 6. The DTCC is closing in December, generating continued media interest. Planned outreach is local to the Las Vegas area market and political staff. R8

October 9 to October 27 Sheldon NWR will gather approximately 120 feral horses within Sheldon NWR as part of its ongoing management actions to protect native wildlife and habitat on the refuge. Members of the public and media who have RSVP'd will be allowed to observe with a FWS escort. The gather was originally scheduled to begin on October 6 but was delayed to accommodate the contractor's schedule. Potentially controversial. R1

#### **Friday, October 10**

Nothing to report

Monday, October 13

Nothing to report

Tuesday, October 14

Nothing to report

Wednesday, October 15

The Landscape Conservation Cooperatives (LCC) Network strategic plan, an internal document that articulates goals, objectives and example tactics for the next five years, will be distributed electronically within the LCC Network in mid-October, tentatively on Wednesday, October 15<sup>th</sup>. The strategic plan will be posted online on the LCC Network website in anticipation of the National Workshop on Large Landscape Conservation from October 23-24. A copy will also be submitted to the National Academy of Sciences. No outreach planned. HQ

Thursday, October 16

Nothing to report

Friday, October 17

Nothing to report

TBD

The Mexican Wolf/Livestock Coexistence Council's first 26 payments to Arizona and New Mexico livestock operators are anticipated in October. Outreach is planned (news release). R2

In mid-late October, FWS will announce a proposed rule to list four native turtle species (common snapping turtle and three softshell turtles) under Appendix III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These listings would ensure that these turtle species were lawfully obtained before export is approved, and would provide important information to assess the impacts of trade and the potential need for additional protections in the future. HQ

### **Major Press Inquiries**

Oregon Public Broadcasting inquired about the Sheldon NWR feral horse gather (see above). It will likely air after the gather. Potentially controversial. R1

High Country News magazine is researching a story on the reintroduction of bull trout in the Clackamas River, Oregon. Chris Allen was interviewed and will be accompanied by the reporter on surveys October 15. Publication expected in November or December. R1

The Oregonian: Editorial page editor requested updated information on the barred owl removal experiment for an opinion column. Printed Sept. 30. Controversial. R1

KGW and KOIN (Portland, OR): Interviewed Tualatin River NWR Refuge Manager and several local community members regarding a proposed youth hunt plan at the refuge. R1

Cronkite News and KJZZ Phoenix-NPR contacted FWS for information on lead exposure in condors in Arizona and Utah, which appear to have declined to the lowest levels since 2005 following voluntary efforts by Arizona hunters to use lead-free ammunition. R2

Arizona Republic contacted FWS regarding the proposed designation of critical habitat for the Western yellow-billed cuckoo and a pilot captive breeding program at the Phoenix Zoo for the endangered Mount Graham red squirrel. R2

Cronkite News Service, KJZZ (Phoenix NPR), KNAU (Northern Arizona NPR), Associated Press, Arizona Republic, Fox 10 and the Prescott Daily Courier attended a joint FWS, Arizona Game and Fish, and Babbitt Ranches media event at Espee Ranch in northern Arizona highlighting the release of black-footed ferrets under a programmatic Safe Harbor Agreement, and demonstrated a sylvatic plague prairie dog inoculation. R2

Frequent media inquiries continue into the Mexican wolf recovery program, including from authors and documentary film makers. The majority of coverage has focused on proposed changes to the 10(j) rule and draft environmental impact statement. R2

Media inquiries have followed the application for a temporary restraining order filed in the U.S. District Court in Albuquerque by New Mexico ranchers regarding the U.S. Forest Service's fencing off riparian areas in the Lincoln and Santa Fe national forests to protect the habitat of the recently listed New Mexico meadow jumping mouse. R2

NPR/North Country Public Radio and camera man from CBS recorded FWS and state biologists from New York and Vermont capturing 300 bats and attaching tracking tags at Aeolus Cave in Dorset, Vermont on October 2. AP is also expected to do a story. R5

Greenwire/E&E Publishing inquired about enforcement of the ivory ban and will visit wildlife inspectors at Newark Liberty International Airport. R5

The large number of Pacific walrus hauled out on shore at Point Lay, Alaska, gained significant national and international media attention. FWS partnered with NOAA and USGS to hold a media teleconference to address media questions. R7

French24 TV is planning a story on the California drought. The reporter is also looking to cover efforts to "save" salmon, particularly operations to truck salmon to release sites. R8

AP, Stockton Record and Sacramento Bee wanted to know if FWS has made a decision on the Golden Gate Salmon Association's request to inject fertilized hatchery salmon eggs into the Sacramento River later this year to help avoid mortality associated with high temperatures. R8

KRCR News Channel 7 in Redding, California, visited the Coleman fish hatchery to cover the beginning on the spawning season and interview the hatchery manager. R8

*The Los Angeles Times*, *Bakersfield Californian* and *Stockton Record* asked about an op-ed and video by Assemblywoman Shannon Grove in Kern County that claimed 1.2 million acre feet of water was lost last year due to delta smelt. These restrictions were actually due to salmon and a state water quality regulation. R8

KQED Radio in San Francisco interviewed Special Agent in Charge Jill Birchell for a "California Report" radio story on elephant and rhino trafficking in advance of a march in San Francisco to bring attention to the costs of the illegal wildlife trade. R8

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Hurricane Odile resulted in several severe storms in Arizona that could impact the size of catchable trout released next spring. The storm activity also impacted water quality at Alchesay National Fish Hatchery and delayed the annual transfer of fish from the Williams Creek facility to the hatchery. The delayed fish transfer will resume this week. R2

Hurricane Odile also brought an enormous volume of water into the San Bernardino Valley watershed, causing significant damage to roads, fences, ponds, dikes and the border patrol bridge at San Bernardino NWR. Repair work is scheduled to begin October 20. R2

In FY14, the U.S. Air Force provided \$7,452,255 to FWS to reimburse for assistance in the conservation and management of wildlife and natural resources on military lands. These funds deliver landscape-level conservation on 9.8 million acres of land, including 235,000 acres of wetlands, and habitat to 111 federally listed species. The majority of these funds just became available over the past 30 days, and serve to support personnel and projects. HQ

On October 3, the State of South Dakota announced young quagga mussels have been found in Angostura Reservoir, near Hot Springs, South Dakota. Angostura is a Bureau of Reclamation irrigation reservoir on the Cheyenne River, which feeds into the Missouri River. This is a major range expansion for the invasive mussel into a previously uninfected portion of the country. R6

FWS, Wildlands, Inc., and Wildlife Heritage Foundation have established a conservation bank for the federally endangered San Bernardino kangaroo rat and Santa Ana River woolly star. The conservation bank includes 182 acres of suitable habitat for both species. Approval of this bank will provide an opportunity to conserve and manage a large block of habitat in the Lytle Creek wash area in San Bernardino County, California. It is downstream from the existing Vulcan Cajon Creek Mitigation Bank, which enhances the conservation value of both banks. R8

The U.S. District Court for the District of Columbia ruled in favor of DOI regarding the withdrawal of a proposal to list the Dunes sagebrush lizard. The Court found that "FWS's withdrawal decision was neither arbitrary and capricious under the ESA and APA, nor contrary to ESA requirements governing listing decisions." R2

San Francisco Mayor Ed Lee and EPA Region 9 Administrator Jared Blumenfeld have requested a trip to Farallon NWR in October to learn about FWS proposals for eradicating invasive house mice from the refuge. R8

Congressman Herrera-Buetler's staff has requested Ridgefield NWR and FWS R1 staff meet with the Washington Waterfowl Association, Lower Columbia Chapter at the Congresswoman's office. This meeting (date TBD) is a part of a series of ongoing conversations with the group. R1

Congressman Bordallo's staff requested additional information of the proposed listing of 23 species on Guam and CNMI. Awaiting clarification on type of information and/or briefing that is being requested. R1

Senator Schatz's office asked for an update on the Habitat Conservation Plan for Puuanahulu Game Mammal Management Area and the Puuwaawaa Cooperative Game Management Area in North Kona, Hawaii. R1

A tour of at the Laguna Atascosa is tentatively planned for staff of Rep. Filemon Vela (D-TX 34<sup>th</sup> District) on October 21. The tour was requested based on the Congressman's interest in learning more about the Refuge's efforts to conserve ocelots. R2

### **30-60 Day Look Ahead**

FWS staff will be in Gabon during the week of October 20 to discuss year two of the five-year cooperative agreement between FWS and the Gabonese Parks Authority (ANPN). The agreement, supported by an MOU between the two government partners, will provide \$20 million over five years so that ANPN can develop the adaptive capacity needed to conserve its elephants and other wildlife. HQ

October 20: The Midwest Regional Director will be participating in a signing event in Ogema, Minnesota, to commemorate the completion of a joint memorandum of understanding between Tamarac NWR and the White Earth Nation pertaining to conservation law enforcement activities occurring on the refuge. R3

October 23: Secretary Jewell will give a keynote address at the FWS-sponsored National Workshop on Large Landscape Conservation in Washington, DC, where conservation practitioners and policy makers will discuss opportunities for implementing large landscape conservation. HQ

October 24: FWS will deliver to the *Federal Register* a proposed rule to list the African lion subspecies as threatened under the ESA. Also proposed is a 4(d) rule allowing for importation of sport-hunted trophies provided they are permitted by FWS as originating from countries with effective lion conservation programs. Announcement date TBD. Controversial. HQ

October 24: FWS will make a final decision on its proposal to list two butterflies – the Dakota skipper & Poweshiek skipperling – under the ESA along with a 4(d) rule for the Dakota skipper. Finalization on proposed critical habitat is expected within several months. Controversial. R3

In late October, Kenai NWR will propose to amend its public use regulations through publication of a draft rule that would: clarify the existing regulations; implement management decisions from the refuge's June 2010 Revised Comprehensive Conservation Plan; establish regulations for managing wildlife attractants, including food, refuse and retained fish in order to decrease the potential for negative human-bear interactions; and revise regulations for hunting and trapping, including those governing these activities within the Skilak Wildlife Recreation Area. R7

FWS anticipates publishing the Strategic Growth Policy for the National Wildlife Refuge System and response to public comments in the *Federal Register* in late October/early November. This policy instructs FWS to focus on acquiring interests in lands and waters that support the following three priorities: recovery of threatened and endangered species, implementation of the North American Waterfowl Management Plan, and conservation of migratory birds of conservation concern. HQ

FWS will announce the availability of the draft environmental impact statement (DEIS) and draft regional habitat conservation plan (DRHCP) for the Southern Edwards Plateau in the next several weeks. Led by the City of San Antonio, Texas, and Bexar County, Texas, the DRHCP is an effort to address the potential impacts of infrastructure and commercial and residential development on nine federally endangered species including the golden-cheeked warbler, black-capped vireo, Government Canyon Bat Cave spider, Madla Cave meshweaver, Braken Cave meshweaver, Government Canyon Bat Cave meshweaver, two beetles with no common name (*Rhadine exilis* and *Rhadine infernalis*) and the Helotes mold beetle. The DEIS describes potential impacts of issuing a 30-year permit under section 10(a)(1)(B) of the ESA to authorize incidental take of these species. Strong local interest expected. Outreach planned to coincide with publication of the DEIS in the *Federal Register* Reading Room. R2

In mid- to late October, FWS will announce approval of the Lesser Prairie-Chicken Programmatic Conservation Bank Agreement (PCBA) submitted by Common Ground Capital and finalized May 1. This is the first PCBA to be approved by FWS, with the goal of streamlining the process for lands to be approved as conservation banks to provide for the conservation of the lesser prairie-chicken and its habitat. Outreach planned. R2

In the coming weeks, FWS will announce public scoping on a request from the Schlitterbahn Water Park on the Comal River, Texas, for an incidental take permit under the ESA for the incidental take of the endangered fountain darter from activities associated with operation of water rides in the park. A habitat conservation plan will be prepared by the park that will include measures to minimize and mitigate the impacts of potential taking. A public scoping meeting is tentatively scheduled for November. Local interest expected. R2

In late October/early November, FWS will publish a notice of intent to prepare a joint environmental impact statement and environmental impact report for the proposed Yuba-Sutter Regional Conservation Plan (a joint habitat conservation plan and natural community conservation plan). The plan outlines strategies to avoid, minimize and offset potential indirect effects to 18 plant and animal species expected from development of 35,000 acres in Yuba and Sutter Counties, California. R8

FWS staff will join a ceremony November 3, in Alameda, Calif., recognizing the transfer of the former Naval base at Alameda Point to the Veterans Administration, including the parcel of land managed by FWS to preserve a tern colony. R8

FWS will announce its 90-finding on a petition to list the yellow cedar as threatened or endangered under the ESA in November. R7

The draft of the polar bear conservation management plan is scheduled to be released to the public November 17 for a 60-day review and comment period. R7

Following a 60-day extension to the deadline granted by the courts, FWS is now scheduled to make a final listing decision on whether the rufa red knot warrants listing under the Endangered Species Act by November 30. Outreach planned. R5

-----

The following endangered species actions are scheduled to be sent to the *Federal Register* in October and November (announcement dates TBD but most will coincide with the date each notice is placed on public inspection in in the reading room):

- Washington ground squirrel, 12-month finding (not warranted), October 17. R1
- Dakota Skipper & Poweshiek, Final Listing, October 24, R3
- African lion, proposed listing, October 24, HQ
- Arroyo toad, reopen comment, October 29, R8
- White-haired goldenrod, proposed delisting, October 31, R4
- Spring Pygmy Sunfish, final critical habitat, October 31, R4
- Gunnison Sage Grouse final listing, November 12, R6
- Rufa red knot, final listing, November 28, R5

## **WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT**

**Oct. 12 - 18, 2014**

### **Highlights of Travel, Meetings, and other Public Events**

Neil Kornze will be in Washington D.C. until the afternoon of Oct. 16 when he flies to Albuquerque for the National Wilderness Conference. Steve Ellis will be in Boise, ID, attending the sage-grouse tour with the Secretary, returning to the office Thursday, Oct. 16, and Linda Lance will be in Washington D.C. all week.

### **Public Announcements**

#### Monday, Oct. 13 (Columbus Day)

Nothing to report.

#### Tuesday, Oct. 14

The nomination period closes for the Wild Horse and Burro Advisory Board. The Aug. 29 announcement seeks nominations for three of the nine positions: 1) Wild Horse and Burro Advocacy; 2) Veterinary Medicine; and 3) Public Interest (with special knowledge about protection of wild horses and burros, management of wildlife, animal husbandry, or natural resource management).

19th Annual Hunter Fest -- Held at the base of the Big Horn Mountains in Ten Sleep, WY, the event draws hundreds of hunters and vendors selling hunting equipment. BLM, USFS, WY Game & Fish and commercial outfitters participate.

#### Wednesday, Oct. 15

National Wilderness Conference, Albuquerque, NM, through Oct. 19.

National Fossil Day, organized by the National Park Service; many BLM sites participate.

The Alaska Federal South-Central Subsistence Regional Advisory Council meets through Oct. 16 in Kenai. The BLM will provide background on federal subsistence caribou harvest for an area recently opened for federal subsistence uses.

The BLM-MT Lewistown Field Office has scheduled two socio-economic workshops to provide information on the Lewistown RMP. The first will be held in Lewistown Oct. 15 and the second in Great Falls, Oct. 16. Interested publics, including the media, were notified.

#### Thursday, Oct. 16

Nothing to report.

#### Friday, Oct. 17

The BLM will host two public tours at its Indian Lakes Road Short-Term Wild Horse and Burro Holding Facility in Fallon, NV, to accommodate up to 40 members of the public and media. The group will learn about the facility, the animals and the BLM's Wild Horse and Burro Program.

#### Sat. Oct. 18

The RiSE Lantern Festival will release up to 20,000 biodegradable lanterns on the Jean Dry Lake bed south of Las Vegas.

Anticipated:

In mid-Oct., the BLM-UT Monticello Field Office will release for a 30-day public comment period an EA analyzing the Indian Creek ATV Trail proposal, which is intended to enhance recreation and ATV experiences in the Indian Creek Basin. The BLM has worked with San Juan County, NPS, and others to draft a proposal for analysis.

### **Major Press Inquiries**

*High Country News* will run mid-Oct. a lengthy article on threats against federal law enforcement officers, including BLM and USFS personnel. The BLM has provided documents to *High Country News* in response to a FOIA. The BLM is providing identical documents in response to a FOIA from *Federal Times* for a similar story.

*Minneapolis Star Tribune* reporter Mike Hughlett contacted BLM-AK Oct. 1 regarding the minimum age for ATV use, required training and machine size restrictions for those under age 16 on BLM lands in Alaska. The BLM responded that there are no such restrictions. Hughlett is preparing an article comparing the policies of land management agencies in a number of states.

Richard Kessler, a reporter with *Recharge News*, contacted BLM-WY on the status of the Chokecherry & Sierra Madre Wind Energy Project and BLM's role in the project and planning process. BLM-WY is responding; publication date is unknown.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Seven candidate species have recently been precluded from ESA listing in large part due to the BLM's conservation efforts. These include an August withdrawal of a proposed rule to protect Graham's and White River beardtongue of the Uintah Basin in Utah and Colorado, an August withdrawal of the least chub from the candidate list, September not warranted determinations for two species of buckwheat in NV and the Tucson shovel-nosed snake in AZ, and an Oct. 1 not warranted finding for the yellow-billed loon, a migratory bird that breeds on the Arctic tundra.

DOI's Office of the Executive Secretariat has sent appointment letters signed by the Secretary to members of BLM Resource Advisory Committees in Albuquerque, NM and in Eastern Montana, which may result in local press since these are Secretarial appointments.

The State of Utah is completing its FERC license application for the Lake Powell Pipeline Project in southern Utah and northern Arizona with a deadline of spring 2015. This project would transport water from Lake Powell to Washington and Kane counties in southwestern Utah, crossing BLM lands under a federal right of way (ROW). Both the BLM (ROW) and FERC (Permit) must complete consultation and Section 106 compliance under the National Historic Preservation Act. However, FERC has taken a less rigorous approach to this than what is necessary for the BLM. Therefore, the BLM is conducting separate reviews, and must make eligibility determinations for over 400 sites for the National Register of Historic Places, to include Tribal consultations, this month in order to meet the deadline. The State will likely seek to expedite this review process, but the BLM considers thorough reviews and appropriate tribal consultation essential for this controversial water project that is likely to be litigated.

The BLM is working with the Ft. McDermitt Paiute-Shoshone Tribe and the Forest Service to address a longstanding domestic horse trespass situation on public lands bordering Oregon and Nevada. The Forest Service will initiate a 30-day public comment period with a removal scheduled to start Nov. 12. Additionally, the BLM-OR plans to conduct an emergency wild horse gather in the Cold Springs HMA in southeastern Oregon due to the Saddle Draw Fire, part of the Buzzard Complex.

### **30-60 Day Look Ahead**

BLM-NM anticipates publication of the **Prehistoric Trackways National Monument PRMP/FEIS** in 4-6 weeks. The 5,280 acre Monument is recognized for its Permian era fossils. Key issues in the 4 alternatives address OHV damage to fossils; livestock grazing; target shooting; and the level of visitor services, interpretation, and education.

BLM-OR anticipates release of the **ROD for the John Day Basin RMP** covering public lands in north-central OR. It updates previous RMPs, covers newly acquired lands in the North Fork John Day River as a result of the 2000 Oregon Land Exchange Act, and provides interim management direction for the Spring Basin Wilderness, designated in 2009.

**Oct. 21:** BLM-MT/DK will hold an oil and gas lease sale offering 28 parcels totaling 14,988 acres, including 23 BLM parcels totaling 9,637 acres in MT and 5 Forest Service parcels totaling 5,351 acres in ND. WildEarth Guardians submitted a protest that will be dismissed because one of the protested parcels is deferred and others have stipulations for sage-grouse.

**Oct. 20-21: The Honey Bee Nutrition and Forage Summit** in Alexandria, VA. The BLM, FWS, NPS, FS and DOD are planning a panel discussion on access to honey bees on federally managed lands. BLM and FS hope to sign an **MOU on native pollinator habitat** on public lands at an Oct. 21 reception preceding the **North American Pollinator Protection Campaign** annual meeting in Washington, DC Oct. 22 - 25, hosted by USDA.

**Oct. 21-23:** The BLM's Executive Leadership Team meets at the National Conservation Training Center in Shepherdstown, WV.

**Oct. 22:** BLM-New Mexico will hold a quarterly oil and gas lease sale.

**Oct. 25:** Sen. Carl Levin (D-MI) has tentative plans to attend a BLM Eastern States event celebrating the **conveyance of the Thunder Bay Island Lighthouse**, near Alpena, Michigan from the Coast Guard to the BLM.

**Oct. 25-30: The 21st Annual Conference of the Wildlife Society** in Pittsburgh, PA, includes the plenary session, **Powerful Landscapes: Wildlife and Energy in North America**. Presentations will examine historic patterns of energy development and associated landscape change, current trends in energy development and effects on wildlife across North America.

**Oct. 29:** BLM-OR/WA will participate in a consultation meeting with the Shoshone Paiute for the **Boardman to Hemingway Transmission Line Project**. The Draft EIS release date has been moved to November 14, 2014. Government-to-Government consultation meetings are being planned with the Confederated Tribes of the Umatilla Indian Reservation and the Shoshone-Bannock Tribes in October.

**Nov. 4:** BLM-WY will hold an oil and gas lease sale.

**Nov. 4:** BLM-CA will host the **3<sup>rd</sup> Annual Youth Summit at California State University**, Sacramento. The focus will be on connecting youth to the outdoors and expanding opportunities through partnerships. BLM Deputy Director will attend the opening of the summit.

**November 5-6:** The Advisory Council on Historic Preservation annual fall meeting in Washington D.C. BLM staff will attend.

**Nov. 8:** Coronado National Forest Supervisor Jim Upchurch signed an interagency (BLM, FS, NPS, and FWS) invitation to five southeastern Arizona members of the congressional delegation to speak at "**Wild for Wilderness, Arizona's 50<sup>th</sup> Wilderness Anniversary Celebration**" at the Coronado National Forest's Sabino Canyon Recreation Area in Tucson. Invited were the Tucson offices of Sens. McCain and Flake; as well as Reps. Grijalva, Barber and Kirkpatrick. AZ is one of only five states with wilderness managed by all four

agencies. Other partners include the Friends of Sabino Canyon, the Arizona Wilderness Coalition and the Sierra Club. The free event is expected to draw thousands of participants.

**Nov. 14:** The anticipated release date for the **draft EIS for the Boardman to Hemingway (B2H) Transmission Line Project**, initiating a 90- day public review. Government-to-Government consultation meetings are being planned with area tribes in October.

## **WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT**

**October 8, 2014 – October 18, 2014**

### **Highlights of Travel, Meetings, and other Public Events**

October 9 – 10: The Gulf of Mexico Region will host a delegation of five senior members of the Mexican National Hydrocarbons Commission (CNH) for a technical workshop on offshore exploration and development plans.

October 18 – 22: Mike Celata, Deputy Director Gulf of Mexico Region, will speak at the Interstate Oil and Gas Compact Commission Meeting.

October 21 – 23: Bill Brown, BOEM's Chief Environmental Officer, will travel to California to speak at seminars at the Scripps Institution of Oceanography in La Jolla and UC Santa Barbara and to visit the rocky intertidal network environmental study areas.

October 23: Jill Lewandowski and Stanley Labak from BOEM's Office of Environmental Programs will speak at the LinkedIn "Leaders in Energy" event in Washington, DC on Atlantic G&G activities and related science and misperceptions.

November 6 – North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, governors from Mid-Atlantic states, and NC Members of Congress have been invited. It's a closed press event to bring together state and Federal representatives to better understand concerns and opportunities associated with offshore exploration and development. Walter Cruickshank and others from BOEM will attend.

### **Public Announcements**

**First Full Week in October:** Alaska Region sending a Note to Stakeholders as a preliminary step to opening government-to-government consultations with local governments and tribes related to the draft 193 SEIS.

**Week of October 13:** Publication of *Federal Register* notice on proposed modifications to BOEM's oil and gas bid adequacy procedures to better ensure receipt of fair market value for OCS leases.

**October 17:** Note to Stakeholders announcing Proposed Notice of Sale for Central Gulf Sale 235.

**Mid-October:** Press release announcing publication of the Limits of Liability final rule.

**End of October:** Press release on Notice of Availability of an EA related to the Virginia Offshore Wind Technology Advancement Project.

**End of October:** Chukchi Sea Lease Sale 193 Draft Supplemental EIS will be posted. Press release will be issued.

**End of October:** Publication of the Notice of Intent to prepare an EIS for Cook Inlet Sale 244. The bureau will hold scoping meetings in November.

**November (TBD):** Press release related to right-of-way grant for the Block Island Transmission System.

### **Major Press Inquiries**

**Coastal Review Online:** Seeking information regarding North Carolina offshore wind efforts (e.g., how wind energy areas were identified).

**Chesapeake Bay Magazine:** Request for information on G&G permits.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Advanced Notice of Proposed Rulemaking (ANPR) for Risk Management:** On October 9, BOEM will publish an extension of the ANPR comment period for an additional 30 days. The ANPR's initial comment period was for 60 days, ending on Oct. 20. It will be extended to Nov. 17.

**Maryland Offshore Wind Lease Sale:** US Wind Inc. was the provisional winner of both lease areas during the August auction, with a combined bid of \$8.7 million. DOJ signed off on the auction results on September 19. On September 22, BOEM sent the lease documents to US Wind Inc. At the request of US Wind Inc, BOEM extended the date in which it needs to return the signed lease documents, submit its financial assurance, and pay the balance of its bonus bid from October 7 to October 27.

**Changes in Bid Adequacy Procedures:** In October, BOEM plans to announce its intent to change a criterion in its existing bid adequacy procedures for ensuring receipt of Fair Market Value on Outer Continental Shelf oil and gas leases. BOEM proposes to remove the Number of Bids Rule in Phase 1 of the Post Sale Evaluation Procedures, which is a bid adequacy provision used in the first step of the process to determine whether to accept a tract's high bid without further BOEM evaluation. BOEM is also proposing to revise several bid adequacy definitions for clarity, which will not alter the fundamental meaning or application of the terms to the bid adequacy procedures. The announcement will have a 60-day comment period. BOEM will consider all comments, and then intends to publish the revised Bid Adequacy Procedures with the Central Gulf of Mexico CPA 235 Final Notice of Sale.

**Limits of Liability Final Rule:** In October, BOEM will publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Central Gulf of Mexico Planning Area Sale 235 (CPA Sale 235):** BOEM expects to publish the Proposed Notice of Sale for CPA Sale 235 in mid-October. The sale is scheduled for March 2015.

**Chukchi Sea Lease Sale 193:** At the end of October, BOEM will post the draft supplemental EIS for public review. BOEM will hold scoping meetings during early November.

**Restricted Joint Bidders List:** The list identifies companies that are prohibited from jointly bidding on lease blocks, in order to promote competition. Companies are included on the list if they had an average daily production in excess of 1.6 million barrels per day over the prior 6-months. The List is scheduled to be published in the Federal Register by Oct. 31, 2014.

**Virginia Research Lease (offshore wind):** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted a Research Activities Plan for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Dec. 6. BOEM tentatively plans to publish an environmental assessment for public comment in late October and hold a public meeting in mid-November.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In November, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November. The Report will be published on the BOEM website, along with a Request for Comments published in the *Federal Register*.

## **WEEK-AHEAD REPORT: BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT**

### **October 8 – October 17, 2014**

#### **Highlights of Travel, Meetings, and other Public Events**

October 8-9: Director Salerno, Deputy Director Schneider and Assistant Secretary Schneider are scheduled to visit BSEE's Ohmsett oil spill research facility on US Naval Weapons Station Earle in Leonardo, NJ. The purpose of the trip is to tour the facility, observe equipment testing and meet with Navy officials.

October 14: Director Salerno is scheduled to meet with representatives from Nobel Drilling Services to discuss incident investigation and emergency management.

October 14: Director Salerno is scheduled to meet with Mary Massey, outgoing CEO, and Don Armijo, incoming CEO, for Marine Well Containment Company. Assistant Secretary Schneider and Chief of Staff Beaudreau have also been invited to the meeting.

October 20: Director Salerno is scheduled to receive a briefing from industry representatives on Best Available and Safest Technology.

October 21-22: Director Salerno is scheduled to participate in the next meeting of the Liquid Pipeline Advisory Committee in Arlington, VA. This will be his first meeting since being officially designated as a member of the committee.

October 23: Director Salerno will be providing opening remarks for the Gas and Oil Technologies meeting hosted by the International Energy Association at the Canadian Embassy. Deputy Assistant Secretary David Haines will be providing keynote remarks.

October 24: BSEE is planning to host the next meeting of High Reliability Organizations in Washington, DC. The group is composed of federal organizations that manage programs with low probability of catastrophic failure, but high consequences if a failure occurs. The Nuclear Regulatory Commission, Department of Transportation and several other government agencies are expected to participate.

October 27: Director Salerno is scheduled to visit a Baker Hughes research facility in Houston, TX,

October 28: Director Salerno is scheduled to be the keynote speaker at an International Energy Symposium hosted by Texas A&M University, College Station, TX. He is planning to conduct a recruiting visit at Texas A&M during the trip.

October 29: Associate Director Anderson will accompany Chief of Staff Beaudreau to attend and speak at a meeting titled, "Oil Spill Response 25 Years After the Exxon Valdez and in the Wake of Deepwater Horizon: What We Learned and What are We Missing?". The event will be held at the University of New Hampshire.

November 3-4: BP will be conducting an operator-initiated oil spill response tabletop exercise in New Orleans, LA. The exercise is designed to test their oil spill response plan, incident management team, and well containment plan. Over 100 BP personnel will be involved, including other operators, response contractors, federal and state representatives, two people from BSEE. Deputy Director Schneider is tentatively scheduled to attend the event.

November 3-4: Director Salerno is scheduled to travel to Camarillo, CA, to conduct an all-hands meeting with BSEE employees in the Pacific Region.

#### **Public Announcements:**

October 8: BSEE Public Affairs plans to post a news brief on Director Salerno's and Assistant Secretary Schneider's trip to the BSEE Ohmsett National Oil Spill Response Test Facility in Leonardo, NJ.

October 9: BSEE is planning a joint press release with Department of Justice regarding the ATP settlement.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Conference Call with Exxon-Mobil:** Director Salerno continued his dialogue with representatives from Exxon-Mobil regarding environmental analysis in support of work at Platform Harmony in the Pacific. BSEE is working with BOEM and National Marine Fisheries Service (NMFS) to process a permit for conductor pipeline installation activities including pile driving. NMFS has provided a biological opinion in response to BSEE's request for consultation. BOEM is performing environmental analysis on the proposed activity. BSEE will use information provided by BOEM and NMFS in making a decision on the permit request. We are working on a final outstanding issue regarding potential impact to the Marbled Murrelet.

**Proposed Rule for Arctic Standards:** This proposed rule, which contains standards for exploratory drilling operations in the Arctic, is currently under review at OMB. BSEE and BOEM staff are working to address interagency comments (USCG, EPA, NOAA) and to respond to questions from OIRA. After OMB completes its review, DOI will finalize any changes to the proposed rule and will work to get it published in the *Federal Register* at a date to be determined. A public comment period will follow.

**Proposed Well Control Rule (AKA Blowout Preventer Rule):** A proposed rule to establish standards for well control including the use of BOPs will be submitted to the Executive Secretariat on October 8. It incorporates industry standards, revises existing regulations, and also includes critical reforms in the areas of well design, well-control, casing, cementing, real-time well monitoring, and subsea containment.

### **30-60 Day Look Ahead**

November 13: Director Salerno has been invited to be the luncheon speaker at a meeting of the Canada Petroleum Board in St. John's, Canada.

November 18-22: Director Salerno is scheduled to attend a meeting of the International Regulators Forum in Cancun, Mexico.

December 4-5: The Director is tentatively scheduled to travel to Charleston, SC, to provide remarks at a Federal Law Enforcement Training Center (FLETC) training class being conducted for BSEE investigators.

Early December: Director Salerno is planning to travel to New Orleans, LA, to conduct an all-hands meeting with BSEE employees in the Gulf of Mexico Region.

**WEEK-AHEAD REPORT**

**30-60 Day Look Ahead**

Assistant Secretary, Land and Minerals Management (ASLM) to Visit West Virginia Mine Sites

On Oct. 27-29, OSMRE's Appalachian Region will host a tour for the ASLM. The tour will involve site visits to large mining complexes and the nearby communities that are impacted by them. ASLM will also visit with OSMRE staff and be briefed on some of the challenges related to mining in the region.

OSMRE to Present 2014 Excellence in Surface Coal Mining Reclamation Awards:

On Oct. 27, OSMRE will recognize the winners of the bureau's 2014 Excellence in Surface Coal Mining Reclamation Awards at an event in Washington, DC. OSMRE gives the awards to coal mining companies that achieve the most exemplary mining and reclamation in the nation. Typically, winners demonstrate a commitment to using sound mining practices and executing effective reclamation plans designed to enhance post-mining beneficial use of the land. This year features three winners overall: two in the National Award category, which recognizes the highest-quality project in active-mine reclamation; and one Good Neighbor Award, given to a company that has demonstrated commitment to the community in which the mine operates.

House Committee on Appropriations Staff Member to Visit Kentucky Mine Sites:

During the week of Nov. 3, House Committee on Appropriations staff will visit active and reclaimed coal mine sites in Kentucky to better understand mining and reclamation activities required by SMCRA.

## WEEK-AHEAD REPORT: BUREAU OF RECLAMATION

October 8 – October 17, 2014

**Highlights of Travel, Meetings, and other Public Events:** *Reclamation's leadership will be hosting a regional stakeholders meeting in Salt Lake City on the morning of October 15. This event will be webcast on the internet. This event will be followed by a meeting of Reclamation's leadership team on the afternoon of the 15<sup>th</sup> and the 16<sup>th</sup>. It is our expectation that Estevan will attend both meetings.*

### **Public Announcements**

Tuesday, October 7

**Updated Mussel Coatings Research Report:** Reclamation will release the six-year update to the mussel coatings research that began in 2008. The release will include the report and a video summary of research and findings. While no commercially available foul-release coating has been found that prevents mussel attachments, several products have shown promise.

**Sixth Collaborative Adaptive Management Network 2014 Rendezvous (CA):** On October 6-8, at the Trinity River Restoration Program (TRRP) offices in Weaverville, California, the TRRP will host the Sixth Collaborative Adaptive Management Network (CAMnet) Rendezvous. Sponsored by Reclamation's Research & Development Office, Environmental and Social Systems Analysts Technologies, and the Platte River Recovery Implementation Program, the Rendezvous will gather natural resource scientists, managers, policy makers, and interested citizens from across the country to share on-the-ground successes and challenges from programs and projects that are conducting collaborative adaptive management.  
<http://www.adaptivemanagement.net/content/camnet-rendezvous-2014>.

**Public Tour of Trinity River Restoration Areas (CA):** The public is invited to raft through the restoration reach and enjoy short technical presentations by Trinity River Restoration Program technical staff from across the partnership, including staff from the Trinity County Resource Conservation District as well as other federal, state, county, and Tribal experts. The staff will describe the ecological and geomorphic benefits of particular rehabilitation site features; the functions of side channels, wetlands and riparian re-vegetation will be major areas of emphasis.

**Klamath Stakeholder Meetings (OR/CA):** Reclamation representatives are meeting with the Klamath Water Users Association and the Klamath Tribes on October 6-7 in Klamath Falls and Chiloquin, Oregon. The purpose of the meetings is to discuss ongoing concerns related to the end-of-season water operations.

Wednesday, October 8

**Pueblo of Zuni Discussions (NM):** At their request, Reclamation is meeting with the Pueblo of Zuni at their tribal headquarters in Zuni Pueblo, New Mexico, to discuss several topics, including the updated draft Programmatic Agreement and the hybrid alternative for the Long-Term Experimental and Management Plan Environmental Impact Statement for Glen Canyon Dam.

**News Release for Pilot System Conservation Plan (AZ, CA, NV):** A joint news release by the partners involved in the Pilot System Conservation Plan will announce the call for proposals. Reclamation is a major funding partner.

**Climate Change Webinar Offered by Pacific Northwest Region in (ID):** Reclamation is offering the second of a five-part webinar series on the Columbia River Basin Impacts Assessment for employees and affected stakeholders. The Assessment data will become the basis for future Basin Studies in the region. The two-hour webinar events will run through November 5. [www.usbr.gov/pn/climate/crbia/webinar.html](http://www.usbr.gov/pn/climate/crbia/webinar.html)

**Windy Gap Excess Capacity Contract with Colorado Municipal Subdistrict (CO):** Reclamation's Great Plains Region and Colorado Area Staff will be announcing the proposed Windy Gap Firming Project, a non-Federal project that would use excess capacity in the Federal Colorado-Big Thompson (C-BT) Project to store and convey water. The contract will be between Reclamation and the Municipal Subdistrict of the Northern Water Conservancy District.

Thursday, October 9

**Meeting with Karuk Tribe (OR/CA):** On October 9-10, Reclamation staff will visit the Karuk Tribe in Happy Camp, California. The visit will include a meeting with tribal council members, along with site visits to Reclamation-funded field projects that are being undertaken to benefit fisheries, including federally-listed species in the Klamath River. The meeting is primarily a meet-and-greet session and an opportunity for the Karuk Tribe to inform Reclamation of issues important to the tribe.

Friday, October 10

**Design Criteria Technical Workshop (NM):** Reclamation will host a workshop with representatives of the four Aamodt Indian Water Rights Settlement pueblos, Santa Fe County, Bureau of Indian Affairs and the Indian Health Service at Tesuque Pueblo. The purpose of the workshop is to gather input from the stakeholders and reach consensus on design and performance criteria for the Pojoaque Basin Regional Water System.

**Minidoka Dam Spillway Celebration (ID):** Reclamation will host a celebration of the final concrete block placement at the newly rebuilt Minidoka Dam Spillway which replaces the 102-year old spillway. A time capsule including signed photos, documents, and other memorabilia will be sealed at the site. Minidoka and Burley Irrigation Districts and the contractor have been invited. Construction of the replacement spillway began in November of 2011 and was completed without interrupting irrigation deliveries or power production. Local media coverage is anticipated.

Saturday, October 11

**C.A.S.T. for Kids Event at New Melones Lake (CA):** Reclamation will host a C.A.S.T. for Kids/Let's Move Outside event at New Melones Lake in Central California.

Sunday, October 12

**Let's Move Outside Paddle with a Park Ranger Activity at Lake Berryessa (CA):** Reclamation will host a Let's Move Outside Paddle With a Park Ranger–Oak Shores Exploration at Lake Berryessa in Central California. A Park Ranger will lead participants on a paddling adventure where they will gain a unique perspective of beautiful Lake Berryessa.

Monday, October 13

**Public Access at Imperial Dam Locations Closed for Facility Upgrades (AZ):** Reclamation will close public access to several locations at Imperial Dam to accommodate the upgrade of electrical systems and telecommunications service at the facility. The Imperial Irrigation District, which operates and maintains the facility on behalf of Reclamation and other water district entities, will oversee the infrastructure improvement projects over the next two years.

Tuesday, October 14

**Long-Term Experimental and Management Plan Environmental Impact Statement (LTEMP EIS) for**

**Glen Canyon Dam (AZ):** Reclamation's leads and co-lead representatives from the National Park Service will meet with the Basin States via webinar to continue discussions on a preferred alternative for the LTEMP EIS. A primary function of the LTEMP EIS will be to continue the successful experiments completed under the Glen Canyon Dam Adaptive Management Program. Dam operations and other actions under the jurisdiction of the Secretary of the Interior will be considered for inclusion in alternatives in the LTEMP EIS, in keeping with the scope of the Grand Canyon Protection Act.

**Texas v. New Mexico Water Lawsuit:** The U.S. Supreme Court will potentially release orders on this issue today. The United States has joined the case regarding the Rio Grande Project water operations. The Court had previously accepted the case, but gave New Mexico another chance to seek dismissal. Parties in the lawsuit are awaiting an order from the Court on whether the case will proceed and the direction.

**American Water Resources Association (ID):** Reclamation will participate on a panel at the Idaho State Section of the American Water Resources Association in Boise, Idaho. The panel is entitled "Responding to Climate Change – What We Know and What We Are Doing."

Wednesday, October 15

**Technical Management Team Tour (WA):** The Technical Management Team will meet at Grand Coulee Dam and tour parts of the facility. The Technical Management Team is an inter-agency technical group responsible for making recommendations on dam and reservoir operations in the Columbia River Basin.

**Public Hearings on Draft EIS/EIR for Long-Term Water Transfers (CA):** On September 30, Reclamation and the San Luis & Delta-Mendota Water Authority released the Long-Term North-to-South Water Transfers Draft Environmental Impact Statement/Environmental Impact Report for public review. Public hearings will be conducted October 15 in Sacramento, October 16 in Los Banos, and October 21 in Chico, California. The Draft EIS/EIR addresses transfers of Central Valley Project and non-CVP water supplies that require the use of CVP or State Water Project facilities to convey the transferred water. Public comments are due by December 1.

Thursday, October 16

**Middle Rio Grande Endangered Species Collaborative Program Executive Committee Meeting (NM):** Reclamation will participate in the Middle Rio Grande Endangered Species Collaborative Program Executive Committee meeting in Albuquerque. Discussions will include updates on the current Middle Rio Grande consultation, summer water operations, the Middle Rio Grande Biological Opinion and the transition process of the collaborative program to a recovery implementation program.

**Methow Valley Irrigation District Instream Flow Improvement Project (WA):** Reclamation will participate in a celebration to begin the construction on the Methow Valley Irrigation District Instream Flow Improvement Project. The construction will include converting two aging open canals to a ground water source enclosed system and a surface supplied pressurized pipe system. The \$10 million project is funded by the Office of the Columbia River, Salmon Recovery Fund, and Priest Rapids Coordinating Committee and was designed by Reclamation. MVID is located in north central Washington state.

**Students to Visit Trinity River Restoration Program Sites (CA):** Staff from the Trinity River Restoration Program will host a field day for 7-8 graders as part of the TRRP educational outreach activities. Students will visit a newly constructed restoration project and learn how the physical features provide habitat, increase geomorphic complexity, and provide riparian cover for fish and wildlife species of the Trinity River.

Friday, October 17

Nothing to report

## Major Press Inquiries

Steve Baragona of *Voice of America* called Friday, October 3, inquiring about base operating water levels for power generation at Hoover Dam.

Jim Carlton of the *Wall Street Journal* has inquired as to Reclamation's processes/programs on urban to urban water transfers. Questions were based on a recent Phoenix-Tucson water agreement. An interview is pending on further details.

The German partner of CNN International, *N-TV*, is interested in doing a story on Hoover Dam regarding highlights as a tourist destination for their magazine show called "N-TV Knowledge". Proposed film date is November 13-15.

Brandon Loomis of the *Arizona Republic* is requesting interviews and B-roll of water management, Hoover Dam and Lake Mead. Proposed dates are Oct 16-20.

On Oct 2, *High Country News* requested a photo of Grand Coulee Dam. The monthly environmental magazine has published an online story about the Columbia River Treaty written by HCN Intern Marshall Swearingen.

On October 10, a film crew from the *History Channel's "American Truck Restoration"* series will be shooting a film segment about a half mile downstream of Teton Dam near Rexburg, Idaho. Pilgrim Operations of Los Angeles, California, says their series host will describe how a refurbished 1949 Power Wagon and its owner helped the community recover after the 1976 dam failure.

Stephanie Ogburn, a freelance writer based in Colorado, is developing a story for the University of Wyoming's publication called *Western Confluence*. The story is about how scientists are working to predict the future of water in the West, particularly focused on the Colorado River. She will be speaking with Reclamation's Science Advisor David Raff on October 14. Reclamation is scheduling an interview with staff from the Colorado River Basin Study. It is not known when it will be published.

## Items of Note/Expected Legislative, Legal, and Policy Issues:

### **Klamath River Flow Increase and Fish Health Concerns (Oregon/California):**

On October 3, after coordinating with a technical team of Federal and Tribal experts, Reclamation determined that additional water would be released from PacifiCorp's Iron Gate Dam to address ongoing fish health concerns resulting from an *Ichthyophthirius multifiliis* (also known as "Ich") parasite outbreak affecting coho and Chinook salmon in the Klamath River. Findings of Ich have been observed in fish collected from the mainstem Klamath River over the past several weeks, with most of the cases classified as severe. As a result, on October 4, flows at Iron Gate Dam began to increase from 1,000 cubic feet per second (cfs) to 1,750 cfs for approximately 10 days. Consistent with the 2013 Biological Opinions on the operation of the Klamath Project, this flow event is anticipated to use 16,000 acre-feet from PacifiCorp's reservoirs and will have no effect on Upper Klamath Lake elevations.

**Drainage Meetings with Stakeholders (California):** Reclamation representatives will continue to brief key stakeholder interests on the principles of agreement for a potential settlement between the United States and the Westlands Water District regarding the United States' obligation to provide drainage service for the San Luis Unit of the Central Valley Project. Reclamation will reach out to several state agencies, the U.S. Geological Survey, the San Joaquin River Exchange Contractors Water Authority, and other local stakeholder groups. Additional outreach briefings are expected later this month.

**Court Ruling on Orr Ditch Decree - Truckee River Operating Agreement (California/Nevada):** Although the Truckee River Operating Agreement (TROA) was signed in September 2008, it could not become effective until the Orr Ditch Court (Court) approved necessary modifications to the Orr Ditch Decree (Decree) that would substitute TROA as the operating agreement for the Decree. On September 30, 2014, the Court issued an order approving and modifying the Decree. Several contingencies still need to be completed but are not expected to cause any significant delays. TROA was set to terminate on December 31, 2014, unless it became effective or the Signatory Parties extended the date. The Department of the Interior may still be required to agree to an extension of the date by one year in order to complete the final contingencies before TROA can become effective. Some TROA-related litigation activities involving the Truckee-Carson Irrigation District are ongoing.

**2014 High Flow Experiment (HFE) Release at Glen Canyon Dam:** Sediment conditions in the Colorado River below Glen Canyon Dam are sufficient to trigger a HFE release of 37,500 cubic-feet-per-second (cfs) from the dam for 96 hours. The proposed release is tentatively targeted for the week of November 9, 2014. The release will consist of 22,500 cfs of full power-plant capacity and a bypass release of 15,000 cfs through the river outlets. It is designed to take advantage of recent sediment inputs by redepositing the sediment for the benefit of downstream resources including camping beaches, sandbars, backwater habitat, riparian vegetation, and archeological sites. Reclamation is coordinating with Department of the Interior agencies and the Western Area Power Administration. Reclamation is also consulting with the Basin States, Tribes, and other stakeholders on the proposed release. This will mark the third HFE conducted under the 2012 Environmental Assessment for Development and Implementation of a Protocol for High-flow Experimental Releases from Glen Canyon Dam.

### **30-60 Day Look Ahead**

**Let's Move Outside/Nature Hike at Lake Berryessa (CA):** On October 18, Reclamation will host a Let's Move Outside/Nature Hike–Fall Foray at Lake Berryessa in Central California. Participants will join a Park Ranger for a hike on the Smittle Creek Trail along the western shoreline, exploring the unique Blue Oak woodland and the beauty and tranquility of Lake Berryessa.

**Let's Move Outside/Mormon Creek Paddle at New Melones Lake (CA):** On October 19, Reclamation will host a Let's Move Outside Mormon Creek Paddle adventure led by a Park Ranger at New Melones Lake in Central California. Participants will experience the beauty of New Melones from a unique perspective while on the outlook for river otters, bald eagles, osprey, and other wildlife.

**Drought Contingency Planning for the Colorado River (UT):** On October 20, Reclamation will present preliminary modeling results at a meeting with Upper Basin states and other stakeholder representatives in Salt Lake City, Utah. Reclamation has been working with the Upper Basin States and stakeholders on drought contingency planning for the Colorado River. The region is currently conducting modeling of potential scenarios of Extended Operations that, within existing operational and environmental commitments, would move water from higher Colorado River Storage Project reservoirs to Lake Powell to prevent Powell elevations dropping below critical elevations for delivery and power generation.

**Reclamation at the Interagency Steering Committee for Multimedia Environmental Modeling (CA):** On October 20-24, staff from Reclamation's Trinity River Restoration Program will represent the Reclamation Science and Technology Program at the Interagency Steering Committee for Multimedia Environmental Modeling in Baltimore, Maryland.

**The Columbia Basin 2014 Conference (WA):** On October 21-23, Reclamation will participate in the Columbia Basin 2014 Conference – Learning from Our Past to Shape Our Future held in Spokane, Washington. This is an international conference that will explore the future of the Columbia River in an innovative format with breakout sessions, graphic facilitation and inspirational arts and culture activities as they relate to the Columbia River.

**Brazos River Demonstration Wetland Gets Final Approval (TX):** On October 21, the proposed Brazos River Pilot Wetland is expected to get final construction approval from the City of Waco. If approved, construction is anticipated to begin in a month. This pilot will investigate the ability of an innovative constructed wetland design to attenuate endocrine disrupting chemicals from reclaimed wastewater. A Federal-state-local partnership was formed to design, construct and monitor the demonstration wetland among Reclamation's Technical Service Center and Oklahoma-Texas Area Office, U.S. Geological Survey, Texas Water Development Board, Waco Water Utilities Services Department, and Baylor University. Reclamation and USGS are working together to provide information to the City of Waco for a joint news release.

**Signing Ceremony for a Hydropower MOU Action Plan:** In late October, Reclamation, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new interagency Sustainable Hydropower Action Plan (Phase II) to be released details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing. (Updated from last week).

**WaterSMART Ceremony with Three Sisters Irrigation District (OR):** In mid-to-late October, WaterSMART recipient Three Sisters Irrigation District will celebrate the completion of a four-year project to up-convert their irrigation system to pressurized pipe and added low-head hydropower capability. The event will be attended by districts, the contractor and Congressional and local representatives. Deputy Secretary Mike Connor has been invited.

**FY 2015 WaterSMART Grant Funding Announcement:** In early November, Reclamation will begin announcing FY 2015 WaterSMART funding, beginning with the WaterSMART Water and Energy Efficiency Grants and Title XVI Project funding. Selection of the FY 2015 Basin Studies will begin. (Updated from last week)

**Get Outdoors Nevada Day (NV):** On October 25, Reclamation will support Get Outdoors Nevada Day at Craig Ranch Regional Park in Las Vegas by staffing an exhibit.

**Colorado River Basin Salinity Control Advisory Council and Forum Meetings (NM):** Reclamation will participate in a meeting of the Colorado River Basin Salinity Control Advisory Council and Colorado River Basin Salinity Control Forum on October 29-30, 2014, in Santa Fe, New Mexico. The purpose of the meetings is to discuss the accomplishments of federal agencies and make recommendations on future activities to control salinity. Participating agencies on the advisory council include Bureau of Land Management, U.S. Fish and Wildlife Service, U.S. Geological Survey, Natural Resources Conservation Service, and the Environmental Protection Agency.

**Reasonable and Prudent Alternative Annual Science Review (CA):** The Reasonable and Prudent Alternative Annual Science Review is scheduled in Sacramento on November 6-7. This event, which will focus on the drought and drought operations, is a requirement stated within the 2008 and 2009 National Marine Fisheries Service Biological Opinion for the Coordinated Long-term Operation of the federal Central Valley Project and the California State Water Project. Each year, the meeting evaluates how the RPA actions were implemented and their effectiveness for Endangered Species Act-listed species during the past year. The conference is held with NMFS and the U.S. Fish and Wildlife Service, and the public is invited to attend but not participate.

**WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY**  
**October 8-17, 2014**

**Message to the Secretary**

Nothing to report.

**Highlights of Travel, Meetings, and other Public Events**

On **October 14**: USGS Acting Director Suzette Kimball will speak at a The Great ShakeOut press event held at the Designing for Disaster Exhibit at the National Building Museum in Washington, DC. The event is being coordinated with FEMA, CDC, the Central U.S. Earthquake Consortium, local officials, and Louisa County Public Schools.

On **October 10**, Suzette will be on Annual Leave.

**Public Announcements**

Wednesday, October 8

Nothing to report.

Thursday, October 9

Nothing to report.

Friday, October 10

**Senator Leahy to Headline Federal Partners for Lake Champlain Meeting:** On **October 10**, Sen. Patrick Leahy (D-VT), EPA Administrator Gina McCarthy, and Vermont Governor Peter Shumlin will participate in a Federal Partners for Lake Champlain meeting in Burlington, Vermont. The will serve as a forum for federal partners to share the results of their work in Lake Champlain addressing topics such as phosphorus pollution, invasive species, fisheries, disaster response and climate resilience. USGS Vermont/New Hampshire Water Science Center Director Keith Robinson, will represent USGS research at the meeting.

Saturday & Sunday, October 11 & 12

Nothing to report.

Monday, October 13

Nothing to report.

Tuesday, October 14

**News Release–Baseline Groundwater Quality Study in Pennsylvania:** On **October 14**, the USGS will locally announce two reports that document baseline groundwater quality in Wayne and Pike Counties, Pennsylvania, prior to the development of shale-gas resources in the Marcellus Shale. The reports are available online and a local news release is planned. *[THIS IS UPDATED FROM FROM LAST WEEK'S REPORT]*

Wednesday, October 15

Nothing to report.

Thursday, October 16

**USGS Participation in the Great ShakeOut:** At 10:16 a.m. (local time) on **October 16**, the worldwide ShakeOut earthquake drill will take place. The ShakeOut began in California in 2008 and has since spread to other states and regions, including the Southeast which held the first SouthEast ShakeOut in 2012, after the 2011 Virginia earthquake. This year 43 states and U.S. territories, and several other countries, are officially involved. The USGS will participate in a number of events and activities in support of the ShakeOut drill and to

promote earthquake preparedness. USGS Acting Director will participate in a press event in Washington, DC; a number of online products, information and presentations will be made available; USGS scientists will participate in the opening ceremony for Thomas Jefferson Elementary School, which was damaged in the 2011 Virginia earthquake; and a USGS Top Story about the ShakeOut will be posted.

Friday, October 17

Nothing to report.

TBD

**News Release—City Votes on USGS Research Project:** During the week of **October 20**, USGS and Reclamation will issue a joint news release about the Waco Treatment Wetlands project. On **October 21**, the City of Waco, Texas City Council is scheduled to vote on final construction approval of the Waco Treatment Wetlands, a multi-disciplinary/partner research project to demonstrate whether an innovative constructed wetlands design can remove endocrine disrupters that occur in reclaimed wastewater. USGS, Reclamation the City of Waco and Baylor University are all involved. Once approved, construction of the wetlands could start in the next month. Media coverage is anticipated.

**News Release—USGS to Release Study on Disease Virulence Evolution:** In the **coming weeks**, a news release will announce new research, led by the USGS, that finds that diseases that cause debilitating symptoms are expected to evolve lower virulence along the epidemic front compared to the epidemic origin. Motivated by real-world observations of a new disease in songbirds, a mathematical investigation shows that disease virulence—the increased death rate of infected individuals—is expected to evolve to lower levels along the epidemic front compared to the disease origin. The paper will be published in *The American Naturalist*.

**News Release—Freshwater Fisheries and Global Food Security:** In the **coming weeks**, Michigan State University will distribute a news release describing the importance of inland fisheries to global food security, the challenges faced due to competing demands for freshwater and possible solutions. USGS scientists contributed to the publication and will be identified in the news release. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Characterization of Groundwater Quality in the Bakken Area:** In the **coming weeks**, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for future groundwater quality monitoring as energy development activities expand in the basin. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—NC Baseline Study for Hydraulic Fracturing:** In the **coming weeks**, USGS will announce a new study that examined groundwater quality samples collected in a potential shale gas production area in North Carolina. This report can be considered as baseline information for groundwater quality in the aquifers of the study area because the natural gas industry is not yet active in the state. The results showed that dissolved methane concentrations were low. The study will be published as a USGS Open-File Report. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Seal flu virus:** In the **next few weeks** the USGS National Wildlife Health Center will issue a national news release announce a new report showing that the avian flu virus that caused widespread harbour seal deaths in 2011 can easily spread to and infect other mammals and potentially humans. The release will likely be joint with the St. Jude's Children's Memorial Hospital. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—The impact of road salt on watersheds:** In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper

is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release–Upper Klamath ET Maps:** In the **coming weeks**, USGS will distribute a press release for upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area. *[THIS WAS IN LAST WEEK'S REPORT]*

### **Major Press Inquiries**

**Inquiry about Missouri River Basin trends:** USGS South Dakota Water Science Center Director, Mark Anderson, spoke with *National Geographic Magazine* about Missouri River Basin trends and answered question about whether the Missouri River is changing its channel. Publication plans are unknown and *National Geographic* plans to follow up with Anderson soon.

**AP Interest in Fire Island Sand Dunes EA:** *Associated Press* interviewed USGS research geologist Cheryl Hapke and geophysicist Bill Schwab about USGS input to the draft Environmental Assessment on rebuilding sand dunes on Fire Island following Superstorm Sandy. Both scientists walked the reporter through USGS' role in the draft EA process. Questions focused on USGS input to the draft EA and on USGS research demonstrating that storm surge in that area will impact the mainland whether the project is built or not.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Nothing to report.

### **30-60 Day Look Ahead**

**Forthcoming USGS Polar Bear Research Papers:** In the **coming months**, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. *[THIS WAS IN LAST WEEK'S REPORT]*

**USGS Afghanistan Research to be Featured in *EARTH Magazine*:** For **late summer**, USGS is preparing a feature article that will appear in *EARTH Magazine* about USGS hydrologic research and capacity building activities in Afghanistan. A decade of work conducted by scientists in Afghanistan will be highlighted. *[THIS WAS IN LAST WEEK'S REPORT]*

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY–INDIAN AFFAIRS  
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION  
October 8 to October 17, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On October 8, the Assistant Secretary, Principal Deputy Assistant-Indian Affairs, and Deputy Assistant Secretary-Indian Affairs for Policy and Economic Development will present at the Self-Governance Advisory Committee quarterly meeting in Washington, D.C.

On October 8, Assistant Secretary Washburn will meet with Senator Harry Reid, (D-Nevada) to discuss Indian Gaming issues. AS-IA Washburn appeared before the Senate Committee on Indian Affairs last month to provide testimony on S.2670, the Keep the Promise Act. It is very likely that the AZ Senators (McCain and Flake) have reached out to Reid to move the bill when they reconvene in mid-November. There is the potential that this bill could be attached to other legislative vehicles such as an Omnibus.

On October 9, Congressman Tom Reed (R-NY) will call Assistant Secretary Washburn on the Cayuga Indian Nation leadership dispute. Congressman Reed sent a letter to the Assistant Secretary on July 1 regarding the dispute and has not received a response. Mr. Reed is concerned that the leadership dispute is causing unrest in his district and he wants to make sure that the BIA is aware of the severity of the issue.

On October 14, the AS-IA will call Chairman Armenta of the Santa Ynez Band of Chumash Indians to discuss the Tribe's petition for the Department to take its Camp 4 property into trust. The Department determined that Camp 4 was part of a Tribal Consolidation Plan and does not require the high level of scrutiny required by off-reservation acquisitions. The Tribe will be issuing a FONSI (Finding of No Significant Impact) this week about this land. The Chairman would like to discuss this finding and its implications with the Assistant Secretary.

On October 15, the BIA Director Black will be the keynote speaker at the 2014 Tribal/State Indian Child Welfare Act (ICWA) Conference in Oregon.

On October 15-16, the AS-IA will present at the 8th Annual Rennard Strickland Lecture at the University of Oregon law school.

On October 15-16, the BIA Rocky Mountain Region is scheduled to meet with the Water Board and Eastern Shoshone Business Council and the Northern Arapaho Business Council regarding Wind River Irrigation Project. A staff member from Senator Barrasso's Office, Senator Committee on Indian Affairs, will attend the meeting. A site tour is also planned for the staffer.

On October 15-18, BIE Director Roessel, SIPI President Allison and Haskell President Venida Chenault will participate in the National Indian Education Association's conference in Anchorage, Alaska.

On October 16, the BIA Director Black will participate in the Southwest Conservation Legacy youth project with Fish & Wildlife Service as part of the Department's Youth Initiative.

**Public Announcements**

Wednesday, October 8

Nothing to report

Thursday, October 9

Members of the Advisory Board for Exceptional Children will be in Washington, D.C. from 8:30 a.m. to 4:30 p.m. The meeting is open to the public and will be held at the South Interior Building, 1951 Constitution Ave. NW, Washington, DC 20240.

Friday, October 10

Members of the Advisory Board for Exceptional Children will continue to meet in Washington, D.C. from 8:30 a.m. to 4:30 p.m. The meeting takes place at the South Interior Building and is open to the public. The Public Comment portion of the meeting is scheduled for today from 1:00-1:30 p.m. Eastern Time.

Saturday & Sunday October 11 & 12

Nothing to report

Monday, October 13

Nothing to report

Tuesday, October 14

BIE Director Roessel will be interviewed by KQRE-TV in Albuquerque, NM regarding issues at the Pine Hill School located in NM.

Thursday, October 16

Nothing to report

Friday, October 17

Nothing to report

**Major Press Inquiries**

The Danbury (CT) News-Times wants to know the status of proposed changes to the federal recognition requirements and if a DOI decision is expected in the near future.

Colorlines (colorlines.com), a New York-based daily online news site covering race and justice issues, is inquiring about the proposed federal acknowledgment rules.

Al Jazeera in Chicago is requesting unemployment rates for the Fort Berthold Reservation.

Dailey Caller News Foundation requests information on the timing of DOI's decision on the Pamunkey tribe's federal recognition and if the tribe has discarded its prohibition against marriages with African Americans.

Police Chief Magazine requests that our BIA Office of Justice Services submit a "From the Director" column for November's issue. Police Chief Magazine is sent to all the members of the International Police Chiefs' Association.

The Billings (MT) AP wants to know if the BIA is working with the Two Rivers Detention Center, that is operated by a third party, Emerald Corrections, on the placement of tribal inmates into Two Rivers' private jail in Hardin, MT. The AP also has questions on how placement works and who pays Emerald Corrections.

The Barnsdall (OK) Bigheart Times is seeking confirmation that the BIA Osage Agency superintendent and her staff "stormed out early" after a Q& A session at the Osage Nation's Oil and Gas Summit (on Oct. 1 and 2 in Tulsa) "turned awkward."

### **Items of Note/Expected Legislative, Legal, Policy Issues**

October 18 is the AS-IA's deadline to approve or disapprove the gaming compacts for Karuk Tribe, Te-Moak Tribe of Western Shoshone, and Yerington Paiute Tribe. The compacts will be deemed approved if not disapproved by that date. The AS-IA office is working on the decisions and notification plans.

Following a meeting with DOI Budget office, AS-IA, and BIE, it was agreed that we would request an extension of time to continue gathering the 2014 Johnson-O'Malley student count as directed by Congress. The BIE continues to place calls to schools and contractors to ensure that those Tribal entities presently receiving funds, as well as the contractors and public schools, are given ample opportunities to provide numbers for the report. If the House appropriators agree to the extension, the report will be submitted on December 31 rather than September 30. We are working closely with staff in the Department's Office of Policy, Management and Budget.

Ramona Ukestine, a citizen of the United Keetoowah Band of Cherokee Indians (UKB), submitted a Freedom of Information Act (FOIA) request to the Bureau of Indian Education (BIE) to send a copy of the current Cherokee Nation of Oklahoma Compact of the higher education program. Ms. Ukestine has contacted the Office of Self-Governance (OSG) with regard to her FOIA request and complains of unequal treatment by the Bureau of Indian Affairs (BIA) to the UKB, indicating that the Secretary of the Interior was not meeting the statutory requirement to treat Tribes equally. She promised to bring this to her congressional delegation and to contact policy officials within the DOI to discuss her concerns.

The BIA, Office of Justice Services/Tribal Justice Support (TJS) has a contract with the Center of Indigenous Research and Justice to re-draft the Tribal Model Juvenile Code to incorporate provisions of the Affordable Care Act. This will assist tribal courts in providing health and substance abuse counseling to juveniles.

The proposed Rights-of-Way (25 CFR 169) rule comment deadline has been extended to November 3.

The AS-IA's office of Regulatory Affairs and Collaborative Action is working with BIE on developing a call for nominations to a negotiated rulemaking (25 CFR 30) committee to address adequate yearly progress (AYP) in Bureau schools, as well as school transportation and school consolidation and closure.

### **30-60 Day Look Ahead**

We have three gaming compact decisions due next week, including two in Nevada likely to be approved and one in California, for the Karuk Tribe, in which we are working through some problems.

The Alaska Land into Trust rule is nearly ready for finalization. We expect to have additional communication with DOJ and some final touches on the draft final rule, but we will soon begin preparing rollout materials.

On October 20, 22, 27, and 29, BIE will hold tribal consultations, in person and through webinars, on the preliminary discussion draft of revised regulations regarding funding to Tribally Controlled Colleges and Universities including Diné College.

On October 23-25, the Alaska Federation of Natives (AFN) 2014 annual conference will take place in Anchorage, Alaska.

Between October 26 and November 3, ASIA, BIA, and BIE leadership, and the Haskell and SIPI Presidents, will attend the NCAI's 71st Convention in Atlanta.

On October 26 and 27, DOI will hold the following tribal consultations and listening sessions at the NCAI conference in Atlanta: Secretarial Elections, Indian Water Rights Settlement Program, and Indian Child Welfare Act compliance. There will also be roundtable discussion on Sacred Sites.

On October 28, Deputy Undersecretary Dr. Ann Bartuska, U.S. Department of Agriculture, is touring 1994 land-grant institutions (Institute of American Indian Arts (IAIA), SIPI, Navajo Technical College, and Diné College); she will be on the SIPI campus in the afternoon.

On November 4-5, the next quarterly Tribal Interior Budget Council (TIBC) will take place at the Washington Plaza Hotel at Thomas Circle in Washington, D.C.

On November 6, the BIE American Indian Language Summit will take place in Albuquerque, NM.

On November 6, the DOI/IA National Native American Heritage Month event will take place at the OPM headquarters. The theme is "Native Pride and Spirit: Yesterday, Today and Forever."

On December 1-5, the 24th Annual BIA Tribal Providers Conference will be held in Anchorage, AK.

On December 9, Southwestern Indian Polytechnic Institute's President will present to the New Mexico Legislative Finance Committee.

On December 9-10, the American Indian Chamber of Commerce Conference will take place in Washington, D.C. The Division of Economic Development (DED) is helping the Chambers of Commerce plan and implement this event, the first-ever conference organized by all of the American Indian Chambers in the U.S.

**WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)  
October 8<sup>th</sup> –October 17<sup>th</sup>, 2014**

**Highlights of Travel, Meetings, and other Public Events**

None to report.

**Public Announcements**

Wednesday, October 8

October 8, the Concho Agency Fiduciary Trust Officer (FTO) is working with the Northern Cheyenne Land Buy-Back Program (LBBP) to provide a LBBP outreach. They are working with the Northern Cheyenne LBBP because there were over 200 offers in the Oklahoma area. They are working together to make sure individuals were provided an informational presentation regarding the LBBP.

October 8, the Pima Agency Fiduciary Trust Officer (FTO) and staff will be participate in the final Gila River Land Buy-Back Program outreach event at the District 3 Boys and Girls Club in Sacaton, Arizona.

Thursday, October 9

October 9-10, Cherokee Agency Fiduciary Trust Officer (FTO) will attend the Five Civilized Tribes Inter-Tribal Council Meeting scheduled to be held in Durant, Oklahoma. The FTO regularly attends these meetings to maintain accountability to tribal leaders and beneficiaries. [THIS WAS IN LAST WEEK'S REPORT]

Friday, October 10

October 10, the Concho Agency Fiduciary Trust Officer (FTO) will assist the Oklahoma Indian Legal Services (OILS) Will writing clinic at the Cheyenne-Arapaho Nutrition Center in Clinton, Oklahoma. Information regarding land titles will be distributed.

October 10, the Rosebud Agency Fiduciary Trust Officer (FTO) will participate in the quarterly South Dakota Indian Business Alliance (SDIBA) meeting in Pierre, South Dakota. The meeting will concentrate on policy in Indian Country and SDIBA members will meet with South Dakota Governor, Dennis Daugaard; South Dakota Secretary of Tribal Relations, J.R. LaPlante; Director of Governor's Office of Economic Development, Kim Easland; and South Dakota House Representative, Kevin Killer. Topics of conversation will be Uniform Commercial Codes and the Community Reinvestment Act which was enacted by Congress in 1977 to encourage banks to help meet the credit needs of communities with low to moderate incomes. [THIS WAS IN LAST WEEK'S REPORT]

October 10-12 the Pine Ridge Agency Fiduciary Trust Officer (FTO) and staff will provide outreach at the 7<sup>th</sup> Annual Lakota Dakota Nakota Language Summit and Black Hills Powwow in Rapid City, South Dakota. [THIS WAS IN LAST WEEK'S REPORT]

Saturday, October 11

October 11, the Southern Plains Region Fiduciary Trust Officer (FTO) will host an informational outreach meeting in Shawnee, Oklahoma. The Absentee Shawnee Tribe landowners will have the opportunity to review and discuss the proposed Atoka waterline right-of-way.

October 11, the Pima Agency Fiduciary Trust Officer (FTO) will assist the Will clinic at the Arizona Summit Law School at OST's Pima Agency in Sacaton, Arizona.

Sunday, October 12

None to report.

Monday, October 13

October 13, the Cherokee and Eastern Oklahoma Fiduciary Trust Officer (FTO) will attend the Cherokee Nation Tribal Council Meeting scheduled to be held in Tahlequah, Oklahoma. The FTO regularly attends these monthly meetings to maintain accountability to tribal leaders and beneficiaries.

Tuesday, October 14

October 14, 2014, Winnebago Agency FTO, Eileen McBride and Ms. Jessica James, Activities Program Director at the Lincoln Indian Center, have scheduled an information presentation about the Land Buy Back Program by the Office of the Special Trustee for American Indians at the Lincoln Indian Center in Lincoln, Nebraska.

Wednesday, October 15

October 15, the Cherokee and Eastern Oklahoma Fiduciary Trust Officer (FTO) will attend the Inter-Tribal Council Meeting of the Miami Area Tribes held in Miami, Oklahoma. The FTO regularly attends these monthly meetings to maintain accountability to tribal leaders and beneficiaries.

Thursday, October 16-Friday, October 17

None to report.

**Major Press Inquiries**

None to report.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**U.S. District Court for the District of Columbia (DDC) Tribal Litigation for Quinn-Leinbach, Settlement Proposal to the Obama Administration (SPOA) Tribes, and other Litigating Tribes**

The Office of Historical Trust Accounting (OHTA) is actively supporting the Office of the Solicitor (SOL) and The Department of Justice (DOJ) tribal litigation team's efforts to reach a settlement on the remaining cases.

**Colorado River Indian Tribes:** To support settlement evaluation efforts, the Department of Justice (DOJ) requested that the Office of Historical Trust Accounting (OHTA) prepare a natural resource revenue under-collection model similar to models previously prepared in the Navajo Nation and Chickasaw/Choctaw cases. OHTA informed DOJ that we will compare the models from those other cases with Plaintiff's model, have internal discussions about our recommendations for a model for this case, and then follow-up with DOJ regarding model options and next steps.

**Fletcher:** The Office of Historical Trust Accounting (OHTA) continues work on the draft Osage Annuity Payment presentation with the Office of the Special Trustee for American Indians (OST) and the Office of the Solicitor (SOL) comments and suggestions. SOL will advise OHTA of the next Court briefing on the scope of the accounting in this case.

**Navajo:** The Office of Historical Trust Accounting (OHTA) completed the lessons learned and closeout report for this case. No further work for this case is expected.

**Cobell: Settlement Payout Process:**

None to report.

**30-60 Day Look Ahead**

Office of the Special Trustee for American Indians – Trust Services is working with the Bureau of Indian Affairs (BIA) to issue annual statements to Individual Indian Money (IIM) account beneficiaries that only hold surface/subsurface assets (no monetary assets). The transition is anticipated to be completed by December 31, 2014.

## WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS

October 1-10, 2014

### Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events

**October 6** – Meeting with Human Resources to establish paid summer internship program to promote capacity building among youth from the insular areas.

**October 6-** Conference Call with Dave Helweg, Director of the USGS Pacific Islands Climate Science Center regarding improved collaboration on climate change issues in the insular areas

**October 7** – Meeting with the New Zealand Deputy Secretary for International Development and the New Zealand Ambassador to the United States to discuss New Zealand’s approach to regional aid delivery, the engagement with the Northwest Pacific through the new New Zealand Consulate in Honolulu and recent regional developments such as the Pacific Islands Forum and the Small Island Developing States Conference

**October 10** – Meeting with the Director of the Bureau of Economic Analysis (Department of Commerce) on Gross Domestic Product releases for the U.S. Virgin Islands, American Samoa and the Commonwealth of the Northern Mariana Islands (CNMI); Briefing by Janice Schneider, Assistant Secretary for Land and Minerals Management, on offshore wind energy and issues related to the Outer Continental Shelf in the insular areas

### Public Announcements

### Press Inquiries/Reports

### Items of Note/Expected Legislative, Legal, Policy Issues

**Climate Change** – AS-IN has directed all OIA Directors to review their grant programs to take into climate change. That includes CIP funds, Coral Reef Funding, and Energy Development funding. Already, OIA’s Technical Assistance Program has modified its grant process to prioritize climate change in its applications. In addition, while seeking supplemental funding of \$3 million from OMB for climate change initiatives, OIA will be using carry over funds to establish this year a Climate Change Coordinator to better coordinate federal policies and funding opportunities within DOI and with other federal agencies to the insular areas, particularly with the territorial/Freely Associated governments.

**Typhoon Vongfong** – As of 5 a.m., EDT (7 p.m., ChST), October 7, located approximately 573 miles north-northwest of Yap, Federated States of Micronesia (FSM), and moving west-northwesterly at 12 miles per hour. This general motion expected to continue through 5 a.m., EDT (7 p.m., ChST), October 9. Maximum sustained winds are 140 miles per hour; additional strengthening likely to continue through 5 a.m., EDT (7 p.m., ChST), October 8. Large trees have fallen in parts of Saipan, CNMI, blocking access to power facilities; restoration activities underway. There are reports of many downed trees in Rota. Prior to hitting the CNMI, Typhoon Vongfong struck the FSM State of Pohnpei, where downed trees caused some power outages and schools were closed.

**OIA-Funded Projects in the Marshall Islands** – On October 3 Aquaculture Technologies of the Marshall Islands (ATMI) graduated the first generation of aquaculturists in the Marshall Islands. The six month-program took place at ATMI’s hatchery in the Ajeltake section of southwestern Majuro Atoll (the Marshall Islands’ capital) and graduated a class of twenty-five men and two women. The course was funded by the National Training Council of the Marshall Islands (supported by a Supplemental Education Grant through OIA), the College of the Marshall Islands, ATMI and Rongelap Atoll Local Government, whose *moi* fish program OIA also has funded. On October 1 *Waan Aelōñ in Majel* (Canoes of the Marshall Islands) graduated eighteen young men and four young women between the ages of 18 and 24 in a National Training Council of the Marshall Islands program supported by a Supplemental Education Grant through OIA. The students received training in math, English, carpentry and traditional Marshall Islands canoes and culture. Certificates of

Achievement were awarded for excellence in carpentry, improvement in math or English and perfect attendance.

### **30-60 Day Look Ahead**

**AS-IN Travel to the Northern Marianas, Guam, and American Samoa** - AS-IN works with OIA staff and DOI Communications team on upcoming courtesy trips as follow:

- **Commonwealth of the Northern Mariana Islands** – Week of October 13<sup>th</sup>
- **Guam** – Week of October 20<sup>th</sup>. Keynote speech to be delivered on Oct. 23<sup>rd</sup> at the Guam Economic Development Authority symposium.
- **American Samoa** – Week of November 10<sup>th</sup>

*Priority Agenda*

## EXECUTIVE SUMMARY

In November 2013, a few days after the first anniversary of Hurricane Sandy, President Obama issued Executive Order 13653 calling on Federal agencies to work with states, tribes, and local governments to improve preparedness for the impacts of a changing climate.

Agencies with a responsibility for natural resources were given a specific charge, outlined in Section 3 of the Order, titled, *Managing Lands and Waters for Climate Preparedness and Resilience*. The Order directed Federal agencies with responsibility for managing natural resources to:

“[C]omplete an inventory and assessment of proposed and completed changes to their land- and water-related policies, programs, and regulations necessary to make the Nation's watersheds, natural resources, and ecosystems, and the communities and economies that depend on them, more resilient in the face of a changing climate. Further, recognizing the many benefits the Nation's natural infrastructure provides, agencies shall, where possible, focus on program and policy adjustments that promote the dual goals of greater climate resilience and carbon sequestration, or other reductions to the sources of climate change. The assessment shall include a timeline and plan for making changes to policies, programs, and regulations.”

The interagency Council on Climate Change Preparedness and Resilience, established by Section 6 of the Order, convened a Climate and Natural Resources Working Group (CNRWG) to complete the inventory, assessment, and plan called for in Section 3 of the Order. The CNRWG includes Departments of Defense, Interior, and Agriculture, the Environmental Protection Agency, the National Oceanic and Atmospheric Administration, the Federal Emergency Management Agency, and the U.S. Army Corps of Engineers.

Through the first half of 2014, the CNRWG conducted an interagency process to inventory and assess current policies, programs, and regulations, as directed by the Executive Order. A variety of stakeholders were informally consulted throughout the process, including close collaboration with the State, Local, and Tribal Leaders Task Force for Climate Preparedness and Resilience. This work considered several existing interagency strategies addressing climate change adaptation and natural resources, particularly the *National Ocean Policy*, the *National Action Plan: Priorities for Managing Freshwater Resources in a Changing Climate*, and the *National Fish, Wildlife and Plants Climate Adaptation Strategy*.

This document, the *Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources*, is the result of this deliberation. The *Agenda* builds upon the robust climate change adaptation work already accomplished by Federal agencies and identifies significant actions moving forward.

## Key Themes and Commitments Moving Forward:

This *Agenda* identifies four priority strategies to make the Nation's natural resources more resilient to a changing climate. For each strategy, the *Agenda* documents significant progress and provides a roadmap for action moving forward. Highlights of the key actions agencies will undertake in the near term to implement each of the four strategies are described below and in Table 1.

- 1. Foster climate-resilient lands and waters** – Protect important landscapes and develop the science, planning, tools, and practices to sustain and enhance the resilience of the Nation's natural resources.

Key actions include the development of a Resilience Index<sup>1</sup> to measure the progress of restoration and conservation actions and other new or expanded resilience tools to support climate-smart natural resource management. Agencies will identify and prioritize landscape-scale conservation opportunities for building resilience; fight the introduction and spread of invasive species; and partner internationally to promote resilience within the Arctic. Throughout, agencies will evaluate resilience efforts to inform future actions.

- 2. Manage and enhance U.S. carbon sinks** – Conserve and restore soils, forests, grasslands, wetlands, and coastal areas that store carbon. Maintain and increase the capacity of these areas to provide vital ecosystem services alongside carbon storage such as clean air and water, wildlife habitat, food, fiber, and recreation.

Key actions include the development of improved inventory, assessment, projection and monitoring systems for important carbon sinks and the development of estimates of baseline carbon stocks and trends to inform resource management. A number of actions will secure the continued health of the Nation's natural resources that provide carbon biosequestration, including forests, agricultural lands, and inland and coastal wetlands.

- 3. Enhance community preparedness and resilience by utilizing and sustaining natural resources** – Harness the benefits of nature to protect communities from harm and build innovative 21st century infrastructure that integrates natural systems into community development.

Federal agencies will take action to encourage investment in natural infrastructure to improve resilience and enhance natural defenses through new federal guidance on ecosystem services assessment, an actionable research agenda, rigorous program evaluation, and expanded decision support tools and services. Federal agencies will increase assistance to states, tribes and localities interested in pursuing green stormwater management solutions and will expand partnerships that reduce wildfire risk and protect critical drinking water supplies, promote irrigation efficiency and water efficiency,

---

<sup>1</sup> See page 19.

launch coastal resilience research projects and create decision support tools for local communities to manage their coastal resources.

**4. Modernize Federal programs, investments, and delivery of services to build resilience and enhance sequestration of biological carbon** – Ensure that Federal programs, policies, trainings, and investments consider climate resilience and carbon sequestration, and organize the delivery of Federal science, tools and services to help resource managers, landowners, and communities optimize their natural resource management decisions in a changing climate.

Agencies will incorporate resilience into natural resources planning and management across all existing operations and programs. Climate-smart practices will be reflected in land acquisition programs and financial assistance programs. Agencies will develop agency-specific principles and guidance for considering biological carbon in management and planning decisions. Agencies will enhance coordination among existing regional resilience information and services operations to better meet the needs of American communities, and strengthen the Federal workforce through training to build the climate literacy and capability of natural resource managers. Targeted training and grant assistance to tribes will help prepare indigenous communities for the impacts of climate change and support the development of tribal climate adaptation plans to enhance community resilience.

**Implementation**

Under the direction of the interagency Council on Climate Preparedness and Resilience, the CNRWG will track the implementation of this *Priority Agenda* in coordination with the existing efforts to implement the *National Ocean Policy*, the *National Action Plan: Priorities for Managing Freshwater Resources in a Changing Climate*, and the *National Fish, Wildlife and Plants Climate Adaptation Strategy*. In 2015, Federal agencies will conduct a 12 month appraisal of implementation.

**Table 1: Summary of Strategies and Priority Actions**

<b>STRATEGY I: FOSTER CLIMATE-RESILIENT LANDS AND WATERS</b>	
<b>STRATEGIES AND PRIORITY ACTIONS</b>	<b>Page</b>
<b>1. Develop an Ecosystem Resilience Index</b>	<b>19</b>
<b>2. Develop and Provide Decision Support Tools for Climate-Smart Natural Resource Management</b>	<b>19</b>
<b>3. Identify Landscape Conservation Priorities to Build Resilience</b>	<b>19</b>

4. Fight the Introduction and Spread of Invasive Species	20
5. Evaluate and Learn from Ongoing Resilience Efforts to Inform Future Actions	20
6. Work with International Partners to Foster Resilience in the Arctic, U.S. Territories, and Freely Associated States	21

<b>STRATEGY II: MANAGE AND ENHANCE U.S. CARBON SINKS</b>	
<b>STRATEGIES AND PRIORITY ACTIONS</b>	<b>Page</b>

1. Improve Inventory, Assessment, Projection, and Monitoring Systems for Carbon Sinks	28
2. Develop Estimates of Baseline Carbon Stocks and Trends to Inform Federal Natural Resources Management	29
3. Promote Forest Conservation and Restoration, Complementary Markets for Sustainably Harvested Wood Products, and Urban Forestry	29
4. Support Forest Conservation and Investment Tax Provisions as a Means to Retain and Restore Forests	30
5. Support Voluntary, Incentive-driven Emissions Reductions from Working Agricultural Lands that Provide Co-benefits for Farm Productivity and Resilience	30
6. Assess, Restore, and Protect Coastal Habitats to Understand and Enhance the Storage of Blue Carbon	31

<b>STRATEGY III: ENHANCE COMMUNITY PREPAREDNESS AND RESILIENCE BY UTILIZING AND SUSTAINING NATURAL RESOURCES</b>	
<b>STRATEGIES AND PRIORITY ACTIONS</b>	<b>Page</b>

1. Partner with Communities to Enhance Resilience to Natural Hazards Risks	40
--	----

<b>2. Address Performance Measurement and Benefits Assessment Challenges to Natural Infrastructure</b>	<b>41</b>
<b>3. Expand Collaboration and Technical Assistance to Help Communities Implement Green Infrastructure for Stormwater Solutions</b>	<b>42</b>
<b>4. Promote Drought Resilience and Enhance Water Use Efficiency, Water Reuse, and Water Supply</b>	<b>42</b>
<b>5. Establish Federal Agency Support Teams for Climate Resilient Water Resources Based on the WestFAST Model</b>	<b>43</b>
<b>6. Build Regional Capacity for Natural Resource Disaster Recovery and Restoration in the Pacific Islands</b>	<b>44</b>
<b>7. Strengthen the Resilience of Coastal Resources and Communities to Extreme Events</b>	<b>44</b>
<b>8. Prepare for Climate Impacts on Fish Stocks and Fishing-dependent Communities</b>	<b>44</b>
<b>9. Foster Innovation and Recognize Leadership</b>	<b>45</b>
<b>10. Provide Policies, Data, and Tools to Facilitate Smart Restoration and Conservation Investments</b>	<b>45</b>

<b>STRATEGY IV: MODERNIZE FEDERAL PROGRAMS, INVESTMENTS, AND DELIVERY OF SERVICES TO BUILD RESILIENCE AND ENHANCE CARBON SEQUESTRATION</b>	
<b>STRATEGIES AND PRIORITY ACTIONS</b>	<b>Page</b>

<b>1. Modernize Federal Programs</b>	<b>51</b>
<b>2. Provide Regional Resilience Information and Services to Meet the Needs of American communities</b>	<b>52</b>
<b>3. Identify Science and Service Regional Priorities to Build Resilience</b>	<b>53</b>
<b>4. Train and Inform Resource Managers and Stakeholders on Climate Resilience</b>	<b>54</b>
<b>5. Prepare Indigenous Communities for the Impacts of Climate Change</b>	<b>55</b>

## Chapter I: Introduction

### Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources

---

*"The herd with its carbon pollution has built up in our atmosphere for decades now. And even if we Americans do our part, the planet will slowly keep warming for some time to come. The seas will slowly keep rising and storms will get more severe, based on the science. It's like tapping the brakes of a car before you come to a complete stop and then can shift into reverse. It's going to take time for carbon emissions to stabilize. ... So in the meantime, we're going to need to get prepared."*

President Obama, June 25, 2013

#### America's Natural Bounty

From the Gulf Coast bayous to the East Coast beaches, from Western sagebrush steppes to Pacific Northwest rain forests, Chesapeake Bay to Puget Sound and the rich ecosystems off our coasts, America's lands and waters have shaped our history, traditions, and way of life. When healthy, these ecosystems also deliver valuable goods and services and stimulate our economy; they provide food, jobs, building materials, medicines, clean water, outdoor recreation, and

wildlife habitat, while also protecting our communities from extreme events such as flooding, storm-surge, drought, heat waves, and wildfire.

These benefits have enormous value - for example, America's forests, farms, and ranches provide 87 percent of the surface supply of drinking water in America, and the economic value of the outdoor recreation economy is substantial, with spending estimates ranging as high as \$646 billion.<sup>2</sup> Spending on wildlife-related recreation alone was estimated at \$145 billion in the United States in 2011.<sup>3</sup> Agriculture, forestry and related industries contributed \$775.8 billion to the U.S. gross domestic product (GDP) in 2012 and 16.5 million full-and part-time jobs - about 9.2 percent of total U.S. employment.<sup>4</sup>

<sup>4</sup> "Ag and Food Sectors from the Economy." USDA ERS. <http://ers.usda.gov/data-products/ag-and-food-statistics-charting-the-essentials/ag-and-food-sectors-and-the-economy.aspx>.

Commercial and recreational domestic fishing activities in coastal and ocean areas supports approximately 1.7 million jobs, \$199 billion in sales, and \$69 billion in income annually.<sup>5</sup> In addition, coastal habitats reduce storm impacts, maintain water quality, support tourism and recreation, and provide other services that increase resilience of communities and businesses in coastal shoreline counties - home to 39 percent of the United States population and the economic engine of the U.S. economy (roughly half-or \$6.6 trillion-of the U.S. Gross Domestic Product).<sup>6</sup>

### **Natural Resources in Peril**

Climate change is already altering the structure and function of ecosystems, changing the distribution and abundance of plants and animals, and in many cases limiting the ability of lands and waters to provide services to communities. As described in the 2014 *National Climate Assessment*,<sup>7</sup> drought is contributing to record low flows in many streams, more widespread and intense wildfires, and the drying of many lakes in the South and West. Caribbean coral cover, important for fishing and tourism, has decreased by 80 percent in less than three decades. Arctic permafrost decline and sea ice retreat are leading to rapid coastal erosion, disrupting onshore infrastructure and traditional livelihoods. Many commercial and recreational fish stocks have exhibited shifts in distribution associated with changes in ocean temperatures. Roughly 81 million acres of the Nation's forests are at risk due to pests, pathogens, and drought stress associated with increased temperature and/or changes in precipitation. Wetlands and dunes that buffer communities are declining at the same time that more severe storms and increased flooding threaten roads, bridges, and businesses around the country and rising sea levels threaten coastal communities, ecosystems, and ports. These impacts to our lands and waters are amplified by many other existing stressors, such as pollution and land conversion. The carbon pollution that is driving these impacts continues to increase in the atmosphere, raising temperatures and acidifying the ocean, with serious implications for the health of both natural and human systems. However, the ecosystems that support our economy and provide extensive services to communities are also very good at reducing carbon levels in the atmosphere. Natural systems like forests, wetlands, grasslands, and sea grasses use the carbon in the atmosphere to grow, thereby pulling harmful pollution from the air and converting it into carbon in soils, leaves, seaweed, and grasses. Essentially, these ecosystems do double duty by both providing us with essential services *and* mitigating the damage of carbon pollution.

7 Melillo, Jerry M., Terese (T.C.) Richmond, and Gary W. Yohe, eds. *Climate Change Impacts in the United States: The Third National Climate Assessment*. U.S. Global Change Research Program, 2014. 841 pp.

For these reasons, it is essential that the impacts of climate change be minimized to assure the health of these ecosystems. Addressing climate impacts to natural resources and the communities that depend upon them will require innovation and a national commitment, to not only limit the carbon pollution in the air, but also to modernize the Nation’s natural resource management agenda. This modernized agenda reflects the need to adapt to these changes and enhance the resilience of our natural resources while also boosting the capacity of ecosystems to reduce carbon levels in the atmosphere. Success will require efforts at every scale, from private lands to tribal lands, from local government to the Federal government. A more coordinated, forward-thinking and inclusive management approach is necessary, now more than ever, to address the scope of impacts being felt across the Nation.

### Strategies for Resilience

Increasing “resilience” – the ability to anticipate, prepare for, and adapt to changing conditions and withstand, respond to, and recover rapidly from disruptions<sup>8</sup> – is a complex endeavor. Many cities, states,<sup>9</sup> tribes, and landowners have already begun to tackle the challenge of building resilience to the changing climate. Federal agencies are supporting these efforts with data and information, tools, strategies, incentives, and expertise.

Over the past several years, Federal agencies have advanced comprehensive strategies to address important natural resource resilience issues.

- The *National Ocean Policy* was developed in 2010 to encourage a coordinated, inclusive approach to meeting the needs of the many communities and stakeholders that depend upon ocean resources. Under the *National Ocean Policy Implementation Plan*, released in 2013, Federal agencies are taking specific actions to address key ocean challenges, give states, tribes, and communities greater input in Federal decisions, streamline Federal operations, save taxpayer dollars, and promote economic growth. The *Implementation Plan* also includes a series of actions that Federal agencies are taking to improve resilience and prepare communities for the impacts of climate change, sea level rise, more frequent or severe extreme weather, and ocean acidification.
- Biological diversity is essential to ecosystem resilience; fish, wildlife, and plant resources provide Americans with important benefits and services, including jobs, income, food, clean water and air, building materials, storm protection, tourism, and recreation. Federal

---

<sup>8</sup> Executive Order 13653, November 1, 2013, Preparing the United States for the Impacts of Climate Change. 78 FR 66817: 66817 - 66824.

<sup>9</sup> Instances of “state” in this report inclusively refer to U.S. States, the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa.

agencies partnered with state, tribal and local representatives to develop a *National Fish, Wildlife and Plants Climate Adaptation Strategy*, released in 2013, that describes goals and actions to adapt to the impacts that climate change is having on fish and wildlife resources and the people and economies that depend on these resources. A Joint Implementation Working Group was formed in late 2013 to promote, track, and report on implementation of the *Strategy*. An initial implementation progress report was published in September 2014.

- The *National Action Plan: Priorities for Managing Freshwater Resources in a Changing Climate*, released in 2011, describes actions that Federal agencies are taking to help freshwater resource managers ensure adequate water supplies and protect water quality and public health as the climate changes. Realizing the challenges associated with water resource management in a changing climate, the Administration also formed the *National Drought Resilience Partnership* (NDRP), a partnership of seven Federal agencies announced in 2013, to help communities better prepare for droughts and to reduce the impact of drought events on families and businesses.<sup>10</sup>

These three initiatives (on oceans, fish and wildlife, and freshwater resources) are important vehicles for coordinating and implementing the *Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources*. In addition to these interagency strategies, each Federal agency has developed a Climate Adaptation Plan, to be updated every four years following the National Climate Assessment. Climate Adaptation Plans will be implemented in coordination with the three interagency strategies and this *Priority Agenda*.

Successful implementation of resilience strategies depends on access to, and integration of, the best-available scientific information. Multiple Federal agencies with science and stewardship responsibilities invest in observations, research, modeling, data and information services, and tools to advance understanding and consideration of the impacts of climate change on natural resources. Through the U.S. Global Change Research Program (USGCRP), thirteen Federal agencies collaboratively help the United States better understand global change and its impacts. The USGCRP advances the scientific knowledge of the integrated natural and human components of the Earth's climate system, translates this knowledge into information that can enable timely decisions, conducts sustained assessments, such as the quadrennial National Climate Assessment, and advances communication and education to broaden public understanding of global change. The Third National Climate Assessment emphasized the impacts of climate change on biodiversity and ecosystem services in the United States.

Other Federal science investments include observing systems located in space, in the oceans, on land, and in the atmosphere; research on climate impacts and vulnerability; and development of climate-

---

<sup>10</sup> For more information on the three national strategies, see <http://www.whitehouse.gov/administration/eop/ceq/initiatives/resilience>. For more information on NDRP, see <http://www.whitehouse.gov/blog/2013/11/15/introducing-national-drought-resilience-partnership>.

relevant indicators and other information to support decision-making. Through the National Plan for Civil Earth Observations and the Big Earth Data Initiative, both led by the U.S. Group on Earth Observations, agencies are working to enhance coordinated and sustained observations of the planet and its natural resources to better track, predict, and respond to climate impacts on ecosystems and the people who depend on them. Agencies are also working to enhance access to data and tools associated with climate and ecosystems through the Climate Data Initiative and Climate Resilience Toolkit, as called for in the President’s Climate Action Plan.<sup>11</sup> Collectively, these efforts, among others, help to provide the information that is needed to support sustainable natural resource investments and management in a changing climate.<sup>12</sup>

### **Moving Forward**

Recognizing the need to build upon these efforts, President Obama signed Executive Order 13653 – *Preparing the United States for the Impacts of Climate Change* – on November 1, 2013. This Order established the State, Local, and Tribal Leaders Task Force on Climate Preparedness and Resilience and the Federal interagency Council on Climate Preparedness and Resilience, which has several working groups, including the Climate and Natural Resources Working Group, the Climate Data and Tools Working Group, the Infrastructure Resilience Working Group, and the Agency Adaptation Working Group. These Working Groups have been collaborating to address the needs expressed in the Order.

Section 3 of the Executive Order, *Managing Lands and Waters for Climate Preparedness and Resilience*, asked Federal agencies to:

“[C]omplete an inventory and assessment of proposed and completed changes to their land- and water-related policies, programs, and regulations necessary to make the Nation’s watersheds, natural resources, and ecosystems, and the communities and economies that depend on them, more resilient in the face of a changing climate. Further, recognizing the many benefits the Nation’s natural infrastructure provides, agencies shall, where possible, focus on program and policy adjustments that promote the dual goals of greater climate resilience and carbon sequestration, or other reductions to the sources of climate change.”

The agencies that comprise the Climate and Natural Resources Working Group<sup>13</sup> prepared this *Priority Agenda: Enhancing the Climate Resilience of America’s Natural Resources* in response to the direction in Section 3 of the Executive Order and in coordination with the State, Local, and Tribal Leaders Task Force. This *Priority Agenda* provides a strategy with specific actions that Federal agencies are doing to enhance the climate resilience of natural resources and the communities that depend on them. These actions fall into four focal areas:

---

11 “The President’s Climate Action Plan.” Executive Office of the President. <http://www.whitehouse.gov/sites/default/files/image/president27sclimateactionplan.pdf>.

12 For more information on the USGCRP see <http://www.globalchange.gov>.

13 See Appendix B for list of Climate Natural Resources Working Group members.

- **Foster climate-resilient lands and waters** – Protect important landscapes and develop the science, planning, tools, and practices to sustain and enhance the resilience of the Nation’s natural resources.

- **Manage and enhance U.S. carbon sinks** – Conserve and restore soils, forests, grasslands, wetlands, and coastal areas that store carbon. Maintain and increase the capacity of these areas to provide vital ecosystem services alongside carbon storage such as clean air and water, wildlife habitat, food, fiber, and recreation.

- **Enhance community preparedness and resilience by utilizing and sustaining natural resources** – Harness the benefits of nature to protect communities from harm and build innovative 21<sup>st</sup> century infrastructure that integrates natural systems into community development.

- **Modernize Federal programs, investments, and delivery of services to build resilience and enhance sequestration of biological carbon** – Ensure that Federal programs, policies, training, and investments consider climate resilience and carbon sequestration, and organize the delivery of Federal science, tools and services to help resource managers, landowners, and communities optimize their natural resource management decisions in a changing climate.

The actions described in this document and summarized in Appendix A, are concrete commitments that the Federal government is undertaking to support these four major goals. Much of the work described is already under way. Other actions, such as future commitments to begin work in 2015, will depend on the appropriation of funding and effective leveraging of resources and partnerships. Together these actions comprise a priority agenda for building on the tremendous progress made over the past several years to ensure that America’s natural resources continue to enrich the lives of Americans, support the economy, and prepare communities for the impacts of a changing climate.

## **Chapter II: Foster Climate-Resilient Lands and Waters** **Protect important landscapes and develop the science, planning, tools, and practices to sustain and enhance the resilience of the Nation's natural resources.**

---

*"... most of all, I think about our obligation to be good stewards of our blessings – to make sure that our children's children get the same chance to experience these natural wonders."*

President Obama, May 21, 2014

### **The Challenge**

America is blessed with a wide diversity of rich ecosystems, from Pacific Northwest rainforests to the river of grass known as the Everglades, to tropical coral reefs. These places are more than just awe-inspiring and beautiful; they support every aspect of American life. They comprise the natural bounty that brought prosperity to a young Nation and today still provides the foundation for national, state, tribal, and local economies. When healthy they bless us with clean water, protect communities from flooding or drought, ensure that crops can grow and reproduce, and provide recreational and cultural opportunities for all Americans.

As described in the 2014 *National Climate Assessment*, climate-related changes to the structure and function of these ecosystems are already taking place and are limiting the ability of these lands and waters to provide services to communities and economies. To ensure that these threatened land and water resources will thrive, we must learn to anticipate future changes and adapt our management approaches and actions to build resilience.

Executive Order 13653 defines "resilience" as the ability to anticipate, prepare for, and adapt to changing conditions and withstand, respond to, and recover rapidly from disruptions. A "resilient" landscape or ecosystem may be characterized as an area with sufficient options to enable species and ecosystems to rebound in the face of great stresses without transforming into an undesirable condition. Such options, or characteristics that foster resilience, include a high diversity of species, multiple core habitat areas with redundant linkages among them, topographic and elevation diversity that provides a range of habitat types and microclimates, and minimal barriers that restrict adaptive movement of species or ecosystems. Just as a diversified stock portfolio is more resilient to dramatic financial swings, this diversity of form and function ensures that these landscapes, and those who manage them, are better able to cope with future change. A landscape or species without such options would be considered vulnerable in the face of climate change.

By planning and implementing management at the landscape scale,<sup>14</sup> rather than only focusing narrowly on a local scale or an individual project, natural resource managers, planners, and landowners can more effectively consider, avoid, and minimize a broader range of impacts that compromise resilience; more accurately evaluate cumulative impacts upon priority resources;<sup>15</sup> and minimize risk for project proponents and other stakeholders. This forward-looking approach, in contrast to managing for historical conditions, fosters resilience because it anticipates and prepares for disruptions to the system.

To be effective at the landscape scale, natural resource managers at the Federal, state, tribal, and local levels must better understand resilience as it applies to each resource they address, what actions will build resilience for those resources, what places are most important to protect and restore, and then incorporate relevant information into decision-making. This will require new information, tools, and policy approaches to ensure these considerations are systematically taken into account. The following sections describe some of the ongoing and new efforts that Federal agencies are implementing to build resilience at the landscape scale and sets an agenda for a) establishing and building upon partnerships; b) identifying resilience objectives; c) developing the tools necessary for landowners and managers to foster resilient landscapes; and d) establishing protocols to monitor and adaptively manage for resilience going forward.

## **Progress to Date**

The Administration has made significant progress through landscape-scale partnerships that bring together Federal, state, tribal, and private interests to address habitat fragmentation, wildlife protection, and the continued productivity of farms, ranches, and the Nation's forests, coasts, and oceans. These partnerships are now beginning to bear fruit and foster resilience. Continued commitment to these efforts and the partnerships to guide them is a key part of building resilience going forward. Key examples include:

- **Advance Landscape-Scale Initiatives:** Through existing initiatives like America's Great Outdoors and place-based investments in locations such as the Chesapeake Bay, Klamath Basin, the Crown of the Continent, the Everglades, and the sagebrush steppe of the arid West, Federal agencies are partnering with states, tribes, and communities across the country to catalyze and bolster local conservation and management

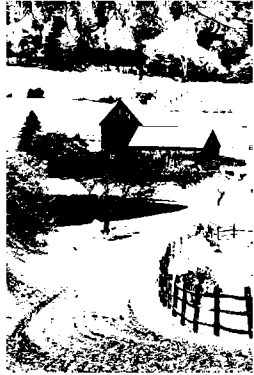

---

<sup>14</sup> The term “landscape-scale” can represent many different spatial scales depending on the resource values being managed. For the purposes of this report, a “landscape” is defined as a large area encompassing an interacting mosaic of ecosystems and human systems that is characterized by a set of intersecting management concerns. The landscape is not defined by the size of the area, but rather by the interacting elements that are meaningful to the management objectives. In addition, for the purposes of this report, the term “landscape” encompasses watersheds and marine environments that match the above description.

<sup>15</sup> The term “cumulative impacts” refers to the combined, incremental effects of human activity on a resource, ecosystem, or human community. Impacts of an action may be relatively insignificant on their own, but as they accumulate over time and combine with the impacts from other sources, they can lead to significant overall degradation of resources (EPA, 1999).

efforts and demonstrate the power of these collaborators to more effectively align, target, and leverage resources to accomplish shared goals and objectives.

Continued support for existing landscape initiatives, and broader application of this approach, is essential for building landscape resilience. Other examples of successful landscape-scale efforts include the Department of the Interior's (DOI) Landscape Conservation Cooperatives (LCCs) and Climate Science Centers (CSCs); ocean-focused Regional Planning Bodies in the Northeast, mid-Atlantic, Caribbean and Pacific; the Great Lakes Restoration Initiative; Hurricane Sandy recovery investments; coordinated Gulf of Mexico investments and vulnerability studies; U.S. Department of Agriculture's (USDA) Collaborative Forest Landscape Restoration Program; Bureau of Reclamation's Basin Studies; National Park Service's Scaling Up initiative; National Oceanic and Atmospheric Administration's (NOAA) Habitat Focus Areas; and Environmental Protection Agency's (EPA) Preserving Healthy Watersheds program.

- **Target Conservation Practices on Farms, Ranches and Forests:** The President advanced and is implementing more than \$1 billion in unprecedented conservation investments in the 2014 *Farm Bill* to sustain the productivity and resilience of America's farms, ranches, and working lands. New provisions in the *Farm Bill* such as the Regional Conservation Partnerships Program (RCPP) will support and build off of past Landscape Initiative and partnership successes, such as the Working Lands for Wildlife, Sentinel Landscapes, and Sage Grouse initiatives. 
- **Implement a Landscape Approach to Mitigation to Improve Private Investments for Resilience:** The DOI developed a comprehensive strategy for implementing a landscape-scale approach to the offsets and mitigation that are frequently required when permitting development or other human activities. This approach will improve the effectiveness of billions of dollars of private investment in habitat protection and restoration each year to offset development activities, and will leverage those dollars with public sector investments to improve the resilience of the landscapes upon which communities and livelihoods depend.
- **Develop Tools for Tracking and Assessing Climate Impacts on Landscapes and Habitats:** The Administration has prioritized developing tools and research to better track and assess current and anticipated impacts of climate change on natural resources, enabling climate-smart decisions by resource managers. Developing these types of tools will continue to be a key priority. An example that serves the fishing community is the NOAA Fisheries and The Environment (FATE) program's research to increase understanding of the impacts of climate variability and change on U.S. marine ecosystems and the distribution and abundance of valuable fish stocks. Another example is the National Drought Mitigation Center's decision support series, "Managing Drought Risk on the Ranch," which, with support from NOAA's Coping with Drought initiative, provides ranchers and consultants

with the tools they need to develop near- and long-term management strategies at the landscape scale.

---

## WE'VE MADE GREAT PROGRESS

Significant progress has been made through landscape-scale partnerships, bringing together Federal, state, tribal, and private interests to address habitat fragmentation, wildlife protection, and the continued productivity of farms, ranches and the Nation's forests and coasts.

### PROGRESS:

Through landscape initiatives such as America's Great Outdoors, Federal agencies are partnering with communities across the country to catalyze local conservation and management efforts in order to more effectively accomplish shared goals and objectives.

### PROGRESS:

The President is implementing more than \$1 billion in unprecedented conservation investments in the Farm Bill in order to sustain the productivity and resilience of America's farms, ranches, and working lands.

### PROGRESS:

The Administration is prioritizing the development of tools that track and predict the impact of climate change on natural resources. Examples include NOAA Fisheries and The Environment (FATE) Program's research and the National Drought Mitigation Center's decision-support series, 'Managing Drought Risk on the Ranch, supported by NOAA's Coping with Drought' initiative.

## MOVING FORWARD

- Identify and map priority areas for conservation, restoration, or other investments to build resilience within flagship geographic landscapes or regions
- Design a Resilience Index tool to measure progress in building resilience through restoration, conservation, and other investments
- Produce decision support tools for climate-smart natural resources management
- Develop a program that helps fight the introduction and spread of invasive species
- Evaluate and learn from ongoing resilience efforts
- Work with interNational partners to foster resilience in the Arctic

---

## Moving Forward

Despite all of the progress described above, management at the landscape scale is not yet the norm, and decision-makers do not always have the information or tools necessary to set management objectives for resilience and take necessary actions to achieve them. Building the information base, developing management tools, and refining approaches to decision-making will help ensure that our investments are durable and that landscape resilience is enhanced over time. The following actions will build on existing efforts and add important capacity and direction for mainstreaming resilience efforts:

➤ **Design an Ecosystem Resilience Index:** In 2015, Federal agencies, to include DOI, NOAA, the Federal Emergency Management Agency (FEMA), the Army Corps of Engineers (USACE), and the Department of Transportation (DOT), will design a framework for a decision-support tool that will provide baseline resilience data and measure the progress of restoration, conservation, and other resilience-enhancing management approaches. Experts will work toward developing common metrics, monitoring protocols, modeling approaches, and valuation methodologies to establish baseline conditions and provide measures of increased ecosystem resilience from cost-effective restoration. This work will be coordinated with other Federal projects, including the Community Resilience Index under development by FEMA, NOAA and the National Institute of Standards and Technology (NIST), the Disaster Resilience Framework under development by NIST (see Chapter IV), the efforts of the Data and Tools Working Group described in Chapter I, the Climate Resilience Toolkit, and emerging efforts to develop indicators through the *National Climate Assessment* conducted by the U.S. Global Change Research Program.

➤ **Develop and Provide Decision Support Tools for Climate-Smart Natural Resource Management:** Within one year, Federal agencies will develop and provide decision support tools to improve the ability of agencies and landowners to manage for resilience. Examples include:

- By the end of calendar year 2014, the U.S. Geological Survey (USGS) will initiate, through pilot projects with the Fish & Wildlife Service (and other DOI bureaus if funding permits), production of a tool to help resource managers consider the impacts of management decisions on carbon stocks and flux as well as impacts on resilience and ecosystem services, such as water quality, flood risk reduction, wildlife viewing, cultural heritage, and nutrient cycling.

Nutrient cycling is a biogeochemical process by which nutrients are transferred from plant to soil to air and back to plant again through processes such as decomposition.

Source: <http://pubs.usgs.gov/fs/2009/3078/>

- Over the next year, NOAA will deploy new or expanded resilience tools, including a Northeast climate and marine ecosystem dashboard for information on current and future conditions; an expanded Coastal Flood Exposure Mapper for coastal states on the East Coast and Gulf of Mexico; a Climate Change Vulnerability Assessment tool for Coastal Habitats; and a new performance support tool for GIS professionals working with agencies and organizations on natural infrastructure planning for coastal resilience. These resources and tools will be developed with a goal of future incorporation into the Climate Resilience Toolkit.

➤ **Identify Landscape Conservation Priorities to Build Resilience:** The first goal of the *National Fish, Wildlife, and Plants Climate Adaptation Strategy* is to build or maintain ecologically connected network of terrestrial, coastal, and marine conservation areas that are

likely to be resilient to climate change and support a broad range of fish, wildlife, and plants under changing conditions. Identifying such priority areas also benefits wildfire management, mitigation investments, restoration efforts, and water and air quality. Within six months, Federal agencies working to address ecosystem management issues through LCCs and other multi-stakeholder bodies will work with partners to select flagship geographic regions for which they will identify priority areas for conservation, restoration, or other investments to build resilience in vulnerable regions, enhance carbon storage capacity, and support management needs. Within 24 months, these agencies and their partners will have identified and mapped the initial list of priority areas within each of the selected geographic landscapes or regions.

➤ **Fight the Introduction and Spread of Invasive Species:** One of the most pervasive threats

The zebra mussel is considered one of the most damaging invasive species in the United States.  
Source: <http://www.nwf.org/Wildlife/Threats-to-Wildlife/Invasive-Species/Invasive-Mussels.aspx>

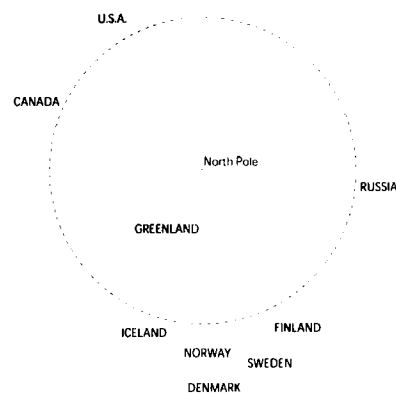

to resilience is the establishment and spread of invasive species – these non-native plants, animals, and pathogens not only displace native species and disrupt ecosystems, but also cause economic harm. A program designed to identify and find invasive species before they have spread, and eliminate them before they have caused significant harm, is both ecologically effective and cost effective.

Within twelve months, the Secretary of the Interior, working with other members of the National Invasive Species Council, including

Department of Commerce (NOAA), EPA, and USDA, will work with states and tribes to develop a framework for a national Early Detection and Rapid Response (EDRR) program that will build on existing programs to assist states and tribes in forestalling the stress caused by the establishment and spread of additional invasive species populations, thereby improving the resilience of priority landscapes and aquatic areas. This will include the development of a plan for creating an emergency response fund to increase the capacity of interagency and inter-jurisdictional teams to tackle emerging invasive species issues across landscapes and jurisdictions.

➤ **Evaluate and Learn from Ongoing Resilience Efforts to Inform Future Actions:** Within six months of the release of this agenda, agencies to include DOI, USDA, NOAA, U.S. Army Corps of Engineers (USACE), Department of Defense (DOD), and EPA will identify programs for resilience evaluation. Such evaluations will include a) developing resilience metrics and b) evaluating whether investments produce resilience benefits for the resources and surrounding communities. An example is the third-party evaluation of DOI's \$300 million Sandy Supplemental resilience investments, initiated in September 2014. These efforts will be used to inform the Resilience Index over time.

- **Work with International Partners to Foster Resilience in the Arctic, U.S. Territories, and Freely Associated States:** While the impacts of climate change are being felt everywhere, some communities and ecosystems are particularly vulnerable due to geological, geographic, or climatic factors. The circumpolar Arctic, an area of the globe that is warming twice as fast as the rest of the planet, is particularly vulnerable. Disappearing sea ice has accelerated erosion under coastal communities now exposed to storm-driven seas, terrestrial infrastructure is undermined by melting permafrost, and the subsistence way of life is compromised by disruptions in wildlife migratory patterns. Alaska Natives are, by virtue of isolated location, culture, and economic status, the most subsistence-dependent population in the United States. Federal agencies that have partnered to advance a landscape-scale approach to management, called Integrated Arctic Management, will work closely with the Department of State to promote a suite of community and ecosystem resilience measures as part of the program for the United States Chairmanship of the Arctic Council, a two-year term to begin in April, 2015. In addition, the Department of Interior will update funding programs to the U.S. Territories and Freely Associated States – islands with acute vulnerability to sea level rise – to enhance climate resilience through the development of climate adaptation plans and other efforts.

## **Chapter III: Manage and Enhance U.S. Carbon Sinks** **Conserve and restore soils, forests, grasslands, wetlands, and coastal areas that store carbon. Maintain and increase the capacity of these areas to provide vital ecosystem services alongside carbon storage such as clean air and water, wildlife habitat, food, fiber, and recreation.**

---

*“My Administration is committed to cutting carbon pollution in the United States, and safeguarding and restoring our forests will help us fulfill that mission. We also continue to advance community-driven conservation, preservation, and outdoor recreation initiatives that are strengthening local economies and contributing to the well-being of lands, waters, and wildlife.”*

President Obama, October 18, 2013

### **The Challenge**

The Nation’s forests, grasslands, soils, wetlands and coastal areas play a critical role in buffering the impacts of carbon pollution by offsetting more than 14 percent of total U.S. greenhouse gas emissions every year—an amount equivalent to roughly half of the annual emissions from the nation’s electric power sector. The capacity of these areas to continue to serve as beneficial “sinks” for carbon is at risk—primarily due to development and land-use change, but also as a result of increased frequency and

severity of climate-driven disturbances such as catastrophic wildfire, insects and disease outbreaks, drought, severe storms, flooding, and changing sea levels.

The trends indicate that carbon sinks may be in jeopardy—urban land area in the United States is projected to nearly triple over the next several decades placing some 34 million acres of privately owned forest land at risk of development by 2060. Nearly 82 million acres of the Nation’s forests are vulnerable to high levels of climate-induced insect and disease mortality over the next 15 years. Fire seasons are presently 60 to 80 days longer, and forest fires have approximately doubled in extent over the last three decades. In many Western States, catastrophic wildfire is causing particulate matter emissions that are degrading air quality in the places many Americans live and recreate. Vast Alaska forest and tundra ecosystems are at risk of tipping from a carbon sink to a carbon source. Coastal wetlands, important contributors to carbon storage (“blue carbon”), are being lost at a rate of approximately 80,000 acres per year from development and climate-related impacts,

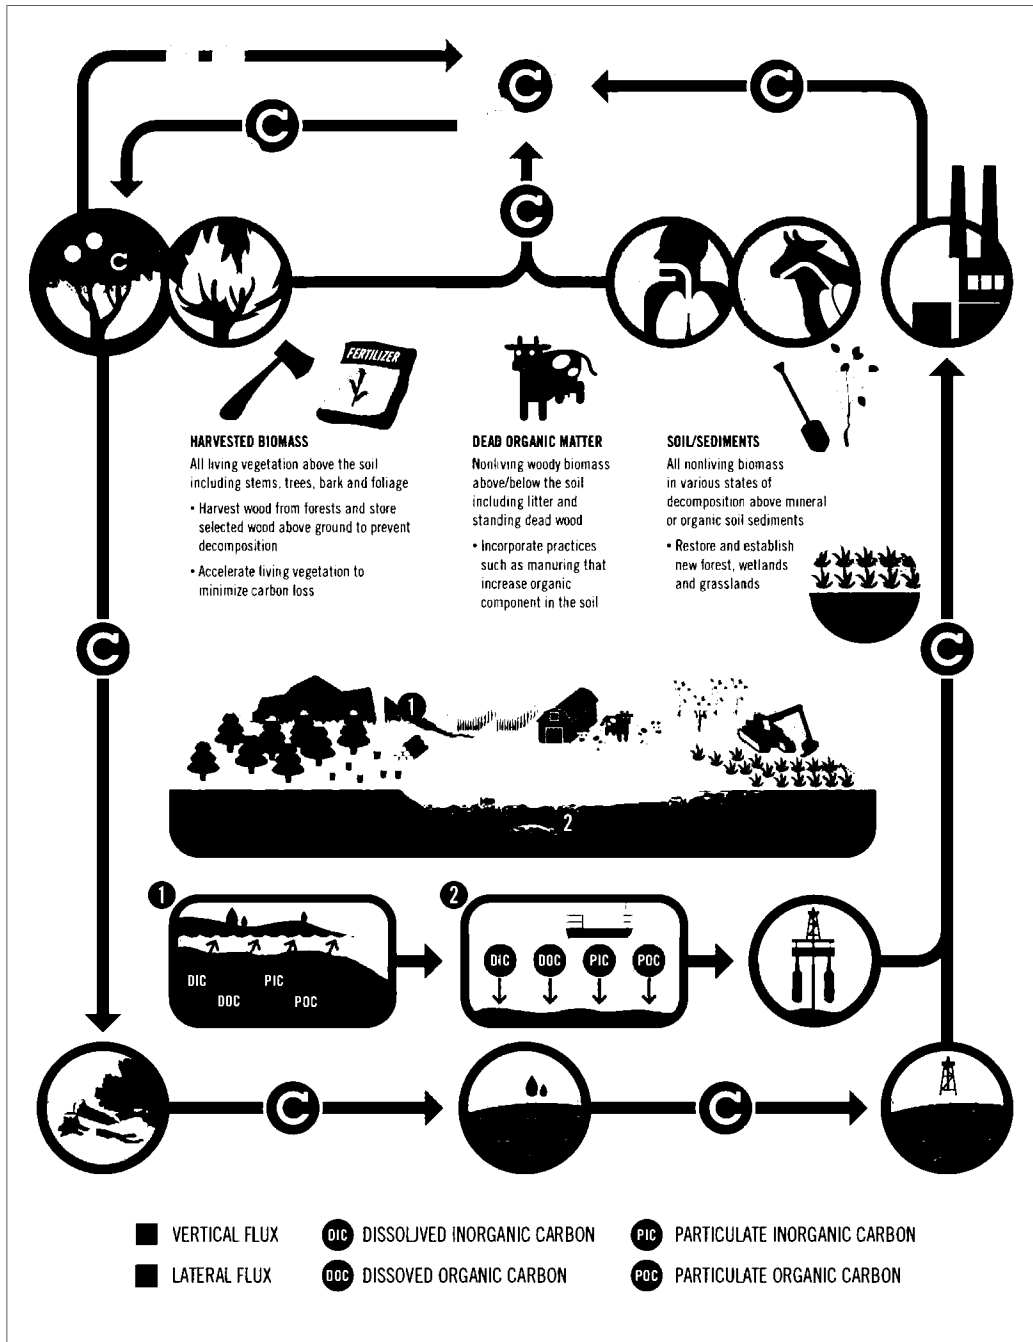

such as severe coastal storms and changing sea levels.

By protecting key carbon storage areas and building the capacity of natural systems and working lands to store carbon in the future, we can strengthen the Nation’s capacity to fight carbon pollution. These actions also ensure that the Nation’s natural resources—public and private, terrestrial and aquatic—continue to provide important co-benefits such as clean air and water, wildlife habitat, food, fiber, energy, and recreation opportunities that foster social and economic resilience in the face of climate change.

**Figure 1: Carbon Cycle and Sequestration**

## **Progress to Date**

The Administration has made progress measuring and incorporating carbon into management strategies through the strengthening of science, policy, and assessment activities. This work has helped a variety of agencies to pursue initial strategies to retain important carbon sinks and restore the health and resiliency of natural systems, so they continue to buffer carbon pollution. Agencies have also developed a suite of tools to help private landowners and natural resource managers make informed decisions, and have launched a diverse suite of voluntary carbon mitigation demonstration projects to meet emerging offset needs of the private sector.

Accomplishments include:

- **Measuring Greenhouse Gas Emissions and Storage and Developing User Friendly Tools:** Natural resource managers and private landowners require access to easy-to-use decision support tools based on the best-available science to incorporate greenhouse gas considerations into management decisions. Agencies have made progress developing methods and tools to inform management, including:
  - USDA has issued a science-based and peer-reviewed compendium of methods for quantifying changes in greenhouse gas emissions and carbon storage for farms, ranches and forest operations. The methods in the report are comprehensive, addressing a wide variety of cropland, grazing land, livestock, and forest management practices. USDA will use the methods in the report to assess the greenhouse gas performance of current and future conservation programs and initiatives.
  - In addition, USDA has developed several user-friendly tools for assessing the greenhouse gas impacts of forest and agricultural practices. COMET-Farm<sup>16</sup> allows farmers, ranchers, and forest landowners to enter information about their current management practices and compare the greenhouse gas storage and emissions under alternative management scenarios. Moving forward, COMET-Farm will be updated to reflect the latest comprehensive methods for measurement. I-Tree<sup>17</sup>, a USDA-Forest Service tool which helps communities of all sizes to strengthen their urban forest management and advocacy efforts by quantifying the structure of community trees and the environmental services that trees provide, including carbon storage and emissions avoided as a result of building energy savings.
  - USDA has developed a statistically reliable estimate of the Nation's soil carbon stocks. The Rapid Assessment of U.S. Soil Carbon (RaCA) involved more than 144,000 samples, 300 soil scientists and assistance from 24 universities. The RaCA data provides a snapshot of the coterminous U.S. soil carbon stocks at one meter resolution, to inform computer modeling and assessment tools, carbon stock inventories, emerging carbon markets, and the ongoing Soil Health Campaign.

---

<sup>16</sup> USDA Natural Resources Conservation Service released the Carbon Evaluation and Management Online Tool, called COMET-Farm, in 2013. The tool allows growers to calculate carbon mitigation through certain conservation efforts, like reducing tillage or planting grasses.

<sup>17</sup> I-Tree is a suite of software tools for measuring and modeling the benefits individual trees and urban forests provide to communities, such as stormwater management, shading and cooling, air quality, and more.

- The USACE is conducting carbon sequestration disturbance pilot studies encompassing diverse climate, land-cover, and land-use characteristics and variable disturbance regimes and response characteristics. The pilots address the effects of common disturbances such as drought, floods, hurricanes, land-cover change, fire, and insect outbreaks on carbon sequestration rates, and include the development of a geospatial assessment tool.
  - USGS LandCarbon is a national assessment focusing on improving our understanding of carbon sequestration and greenhouse gas fluxes in and out of ecosystems related to land use. It covers all major terrestrial and aquatic ecosystems and provides estimates of baseline as well as future potential carbon storage and greenhouse gas fluxes.
  - As part of the Santa Ana River Basin Study, completed in FY 2013, the Bureau of Reclamation developed a Greenhouse Gas Emissions Calculator that can be used by water managers in California to analyze the carbon footprint of potential water management decisions in order to comply with California Assembly Bill 32, the Global Warming Solutions Act.
  - The North American Carbon Program (NACP) and the Ocean Carbon and Biogeochemistry Program (OCB), under the auspices of USGCRP's U.S. Carbon Cycle Science Program, have been conducting a major North American Coastal Carbon Synthesis for 7 years. In 2014, scientists convened to refine coastal carbon budget numbers and initiate a Science Plan for the North American Coastal Carbon Budget. This work has been funded by members of USGCRP's Carbon Cycle Interagency Working Group/U.S. Carbon Cycle Science Program.
  - In 2014, NASA made grants to advance the development of a carbon monitoring system (CMS). Emphasis is directed towards continued development of CMS pilot studies and acquisition, field sampling, quantification, and development of prototype Monitoring Reporting and Verification (MRV) system capabilities.
  - In 2013, four agencies from the Carbon Cycle Interagency Working Group (NASA, USDA, DOE, NOAA) collaborated to make awards to research institutions to improve the understanding of changes in the distribution and cycling of carbon among the active land, ocean, and atmospheric reservoirs and how that understanding can be used to establish a scientific foundation for societal responses to global environmental change. These awards will also help in advancing the science to support ecosystem resilience.
- **Forest Service Planning Rule, Roadmap and Scorecard for Climate Change:** The USDA-Forest Service is considering forest carbon in land management policies, programs, and activities such as the 2012 Planning Rule, the Climate Change Roadmap and Scorecard, USDA Strategic Plan, and internal guidance for planning and project-level decisions. Under the 2012 Planning Rule, forest units must "...identify and evaluate existing information relevant to the plan area for ...baseline assessment of carbon stocks."

All National Forests are working on strategies to adjust and prepare for new conditions created by changing climate and to consider carbon stocks and emissions in management decisions. To guide the Forest Service in achieving these goals, the agency developed a Roadmap for Responding to Climate Change and a companion Scorecard. Since 2011, each National Forest and Grassland has used a 10-point scorecard to report accomplishments and plans for improvement on ten questions in four dimensions – organizational capacity, engagement, adaptation, and mitigation. By 2015, each is expected to answer yes to at least seven of the scorecard questions, with at least one yes in each dimension. The goal is to create a balanced approach to climate change that includes managing forests and grasslands to adapt to changing conditions, mitigating climate change, building partnerships across boundaries, and preparing our employees to understand and apply emerging science.

The National Park Service has also modernized its policies and now requires park management plans -- which direct land management, facility construction and visitor services -- to include climate change considerations. A policy providing guidance on how to take climate change into consideration for facility design and construction will soon be completed.

The Fish and Wildlife Service has adopted a Climate Change Strategic Plan that outlines the agencies response to climate change, including its work on carbon biosequestration..

➤ **Voluntary Carbon Mitigation Partnership Pilots:** Through research, the development of offset protocols, and demonstration projects, Federal agencies are paving the way for private investment in land and water based carbon by developing high quality, quantifiable and verifiable offset projects. For example:

- The U.S. Fish and Wildlife Service (FWS), in partnership with such groups as The Conservation Fund (TCF), has undertaken forest restoration projects on nearly 75,000 acres in the Lower Mississippi Valley that provide substantial carbon sequestration benefits. These projects have been privately funded for carbon credits through nonprofit organizations, public utilities, and private companies, as well as through The Conservation Fund’s Go Zero Program. With its partners, the FWS has planted more than 22 million trees that will capture more than 33 million tons of carbon over the next 90-plus years.

- NOAA, through the Waquoit Bay National Estuarine Research Reserve (NERR) is leading an effort to generate science and management tools with the potential to bring coastal wetlands into international carbon markets and incentivize investment in tidal wetland restoration and preservation. This three-year project (FY11-FY14), which incorporates broad stakeholder input, is examining the relationship between salt marshes, climate change, and nitrogen pollution.
- In 2011, USDA’s Natural Resources Conservation Service (NRCS) awarded \$7.4 million to support large-scale demonstration projects that will accelerate the adoption of new and innovative approaches to leverage carbon markets, reduce greenhouse gas emissions, and promote carbon sequestration on private lands. In partnership with the Coalition on Agricultural Greenhouse Gases (C-AGG), USDA has helped develop protocols to meet voluntary carbon credit registry standards and California’s regulatory carbon credit registry requirements for a wide range of voluntary private lands conservation practices. For example:

- The Delta Institute, The Climate Trust, and their partners have worked with Midwest corn growers to maintain yield while reducing nitrogen fertilizer rate, timing, and placement to reduce nitrous oxide emissions. Quantified and verified credits will be retired in an

effort to partially offset the emissions of a fossil fuel-fired electric utility.

- Rice growers in Arkansas and California, in partnership with Environmental Defense Fund, California Rice Commission, White River Irrigation District, and Terra Global Capital are more precisely managing water and nitrogen to reduce methane and nitrous oxide emissions from rice production.
- The Nature Conservancy (TNC) is pursuing a partnership that builds on USDA’s Conservation Reserve Program (CRP) and Wetland Reserve Easement Program (WRE) to retain conservation values through the sale of carbon offsets.
- In the Prairie Pothole Region, Ducks Unlimited, TNC, and The Climate Trust are partnering with USDA to enable grassland producers to receive compensation through the sale of voluntary carbon offsets by protecting the carbon sequestered by prairie grasslands.
- In Marin County, California, the Marin Carbon Project is working with NRCS and local producers to enhance carbon sequestration while building a more drought-resilient farmscape through diverse conservation practices.

## WE’VE MADE GREAT PROGRESS

Significant progress has been made measuring and incorporating carbon into management strategies through strengthening science, policy, and assessment activities.

### PROGRESS:

USDA has developed user-friendly tools, such as COMET-Farm and I-Tree, for assessing the greenhouse gas impacts of forest and agricultural practices. USACE is conducting carbon sequestration disturbance studies. USGS’ LandCarbon assessment improves understanding of carbon processes.

### PROGRESS:

U.S. Fish and Wildlife Service (FWS) has provided substantial carbon sequestration benefits through its forest restoration projects in the Lower Mississippi Valley with private sector and NGO partners. FWS has planted more than 22 million trees that will capture more than 33 million tons of carbon over the next 90-plus years.

### PROGRESS:

USDA Natural Resources Conservation Service supported large-scale demonstration projects that will accelerate the adoption of new and innovative approaches to leverage carbon markets by awarding \$7.4 million in financial support. Other USDA programs partner with farmers, NGOs, and local and regional organizations to enhance sequestration.

## MOVING FORWARD

- Use the best information and methods available from agencies with Federal natural resource stewardship responsibilities to develop initial baseline estimates of carbon stocks and trends at local or regionally appropriate levels for lands and waters within their jurisdiction within 18 months
- Improve inventory, assessment, projection and monitoring systems for important carbon sinks
- Develop estimates of baseline carbon stocks and trends to inform Federal natural resources management
- Provide support for programs that foster forest conservation and retention to advance carbon mitigation and adaptation in the context of management objectives
- Support voluntary, incentive-driven emissions reductions from working agricultural lands that benefit productivity and resilience
- Continue to support key tax provisions for maintaining forest carbon
- Build a North American community of practice for advancing understanding and management of blue carbon ecosystems and valuing the sequestration potential of coastal habitats

## **Moving Forward**

Despite significant progress developing the research, tools, and demonstrations needed to incorporate and incentivize carbon considerations into natural resource management, work still remains to strengthen our understanding of carbon stocks and emissions and to better link that information with policy. Improvements to the national inventory, assessment, projection, and monitoring systems for carbon will better equip the Nation to evaluate the drivers of emissions and carbon storage and improve the ability to track the impact of specific policy and practice changes aimed at sustaining and enhancing U.S. carbon sinks. Moving forward, agencies will take actions consistent with their authorities to better measure and incorporate carbon into natural resource management practices, and will continue to build incentives and support investments aimed at emissions reductions and carbon storage from the land use, land-use change, and forestry sectors. Additional efforts will seek to assess, restore, and protect the carbon services of coastal ecosystems.

- **Improve Inventory, Assessment, Projection, and Monitoring Systems for Important Carbon Sinks:** USDA, in coordination with EPA, the State Department, and DOI, will establish a robust capacity to provide projections of greenhouse gas emissions and carbon sequestration from agricultural lands, forests, and grasslands on a biennial basis to support planning, analysis, and reporting under the United Nations Framework Convention on Climate Change. USDA, with input from EPA and other agencies (DOI, NASA, and NOAA), will reduce uncertainties in land-use related emission and sink estimates in the Nation's annual greenhouse gas inventory and better link these estimates to projections through:
  - Strengthening the collection, coordination and assessment of field inventory data through the Forest Inventory and Analysis (FIA) Program, the Natural Resources Inventory (NRI), and other surveys of terrestrial condition; and
  - Integrating survey information with satellite-based land cover products, where appropriate, to improve estimation of land cover and land-use change and improve attribution of carbon stock change to management activities or natural disturbance.

USDA will also work collaboratively with EPA, DOI, and other agencies to address potential missing anthropogenic emissions and sinks in the national greenhouse gas inventory. USDA will evaluate the current carbon sequestration contribution of Federal grasslands and

agroforestry systems (wind breaks, shelter belts, riparian buffers, etc.). The USGS, USACE, and USDA will support efforts toward completion of the first-ever assessment of the ecosystem carbon stocks and anthropogenic emission rates in Alaska. NOAA will assess the role that coastal ecosystems play in terms of their anthropogenic emissions and carbon sink potential including an initial assessment of land cover for salt marsh, mangroves, and seagrasses.

All of the above improvements will be consistent with applicable methodological guidelines from the Intergovernmental Panel on Climate Change (IPCC) and reporting requirements under the United Nations Framework Convention on Climate Change (UNFCCC).

- **Develop Estimates of Baseline Carbon Stocks and Trends to Inform Federal Natural Resources Management:** Within 18 months, agencies with Federal natural resource stewardship responsibilities will use the best-available information and methods to develop initial baseline estimates of carbon stocks and trends at local or regionally-appropriate levels for lands and coastal wetlands within their jurisdiction. Stock and trend information will better enable managers and the public to consider the relationships between carbon storage and other management objectives. Methods will be consistent with applicable methodological guidelines from the IPCC and reporting requirements under the UNFCCC.

By the end of calendar 2015, the USGS will enhance landcarbon.org by covering all 50 states and including a new carbon calculator that allows for interactive tradeoff analysis. Further, USGS will complete a study for the Greater Yellowstone Ecosystem that examines the effects of protected areas and conservation policies on long-term carbon sequestration. The USGS, in cooperation with University of California at Berkeley, is also developing a large data management and visualization tool for delivering biological carbon sequestration data to users at the national scale. This effort, highlighted in the President's Climate Action Plan, focuses on enhancing data delivery and communication using advanced web-based visualization tools. The tool allows users to interactively estimate carbon management tradeoffs in an online and downloadable format.

- **Promote Forest Conservation and Restoration, Complementary Markets for Sustainably Harvested Wood Products, and Urban Forestry:**

USDA and the DOI will provide support for programs that foster forest conservation and retention, and where possible, align these programs around “climate-smart” projects that advance carbon mitigation and adaptation in the context of management objectives. The agencies will incorporate climate resilience evaluation criteria for relevant forest and land and water conservation programs such as the Forest Legacy Program, Land and Water Conservation Fund (LWCF), Community Forest Program, the Agricultural Land Easement Program, Wetlands Reserve Program, and the Healthy Forest Reserve Program.

USDA will continue to make investments to advance wood in building, wood energy use, and other wood products - bolstering incentives for retaining and restoring forests - through providing life cycle analysis and technical and financial assistance. Within six months, USDA will launch the U.S. Tall Wood Building Competition to spur increased sustainability in construction and will give priority to applicants that source materials from rural domestic

manufacturers and domestic, sustainably-managed forests. Incorporation of wood building systems in buildings 7-15 stories tall could potentially offset meaningful levels of carbon emissions while also supporting healthy forests and manufacturing opportunities.

Urban trees store over 708 million tons of carbon and can help further reduce emissions by lowering electricity demand for summer air conditioning and winter heating, while also improving air quality, reducing runoff, buffering high winds, and controlling erosion. In 2015, the Forest Service will work with the Federal Urban Waters Partnership, states, and local partners to target urban forestry investments that support: increased carbon sequestration; reduced energy consumption and greenhouse gas emissions; enhanced urban air quality; resilience from insects and disease; clean water quality and quantity needs; and bioenergy from urban wood waste to off-set fossil fuel usage.

- **Support Forest Conservation and Investment Tax Provisions as a Means to Retain and Restore Forests:** America's privately owned forests account for roughly 59 percent of the Nation's forest carbon stores. Tax incentives are a tool that can encourage continued forest landownership and stewardship of these resources. The Administration will evaluate key tax provisions for maintaining forest carbon, including provisions such as:
  - *Federal Tax Deduction for Conservation Easements:* Federal tax incentives for conservation easements are a critical tool for retaining important privately owned carbon sinks, especially grasslands, forests, and forested wetlands. From 2006-2013, incentives for donations of conservation easements were enhanced, allowing most individuals to deduct up to 50 percent of their income for contributions of easements, and up to 100 percent for contributions of easements on many working lands. Making these provisions permanent, while reforming the conservation easement rules to ensure better targeting, will support retention of important carbon sinks.
- **Support Voluntary, Incentive-driven Emissions Reductions from Working Agricultural Lands that Provide Co-benefits for Farm Productivity and Resilience:** USDA will target Farm Bill conservation programs to provide incentives for voluntary emissions reductions from America's farmers and ranchers that also support other important co-benefits for landowners and the public. While the agriculture sector makes a relatively small contribution to total annual U.S. greenhouse gas emissions, the sector is capable of offering low-cost, verifiable emissions reductions through the voluntary implementation of conservation practices. Many of these conservation practices also improve efficiency and productivity, reduce operation costs, foster resilience for businesses and natural resources, and alleviate pressures on other land-uses. USDA will improve conservation technical assistance and delivery of practices that reduce emissions and build resilience through programs such as the Environmental Quality Incentives Program (EQIP), the Agricultural Conservation Easement Program (ACEP), and Conservation Innovation Grants (CIG). Specific practices include:

- Prioritizing farming systems and conservation practices that build soil organic matter, increase carbon sequestration, and prevent denitrification;
- Encouraging practices that reduce methane emissions, especially in livestock systems;
- Prioritizing conservation easement and restoration programs on lands that currently provide climate and other resilience benefits (e.g., prairie grasslands, wetlands, rangelands)
- Promoting on-farm energy conservation, increased energy efficiency, and renewable energy production;
- Encouraging transition to systems that keep the land in sod and other perennial vegetation, and support sustainable rangeland management practices that enhance carbon sequestration; and
- Partnering with states, farmer groups, the private sector, and non-governmental organizations to facilitate investments in agricultural-based emission reductions that are additional, quantifiable, and verifiable.

**Denitrification is an ecologically important bacterial process that converts reactive nitrogen compounds to inert nitrogen gas.**

Source: <http://water.usgs.gov/hawqa/sparrow/biogeochem/>

- **Assess, Restore, and Protect Coastal Habitats to Understand and Enhance the Storage of Blue Carbon:** Coastal ecosystems, particularly mangroves, tidal marshes, and seagrasses, (collectively referred to as coastal blue carbon) sequester and store large amounts of carbon. However, the benefits provided by coastal ecosystems historically have not been recognized. Thus, coastal ecosystems have typically not been managed in order to maintain or enhance these important climate services. There are many opportunities through existing scientific programs to advance understanding of carbon cycling in these ecosystems and to use existing management policies and practices to maintain and increase our coastal carbon stores. Over the next two years, the United States will improve its understanding of carbon storage and cycling in coastal ecosystems, as well as the value of protecting coastal habitats to safeguard these important services:

- **Improve understanding of carbon storage and cycling in coastal ecosystems:** NOAA will generate baseline information on the role that coastal ecosystems play in terms of their emissions and carbon sink potential. This baseline would include an initial assessment of land cover for salt marsh, mangroves, and seagrasses, as well as best estimates of sequestration and storage in these different ecosystem types. NOAA and partners will quantify marsh soil organic carbon content at eight NERRS sites across the United States to fill critical gaps in estimates of current carbon storage across a range of marsh types, and to improve the methodology upon which many of these existing estimates are made. NOAA and EPA, working through the

Commission for Environmental Cooperation, will build a North American community of practice for advancing understanding and management of blue carbon ecosystems by supporting the development of methodologies to measure carbon, compile maps, and conduct scientific studies to improve our understanding of the current and future role of coastal systems in the North American carbon cycle. NOAA and EPA will coordinate participation by other Federal agencies with coastal resource management responsibilities in this effort. Reporting standards will be developed to be consistent with Intergovernmental Panel on Climate Change guidelines.

○ **Determine the value of protecting coastal habitats to safeguard carbon services:**

Photo of downtown Tampa Bay, the location for a pilot demonstration project that seeks to demonstrate the value of different blue carbon habitats in various regions of the United States.

NOAA and FWS, working with other Federal, state, and other partners, will identify and support key restoration projects that can increase coastal blue carbon sinks, both terrestrial and aquatic. For example, NOAA is supporting a pilot demonstration project in Tampa Bay, Florida to demonstrate the value of different blue carbon habitats in various regions of the United States. NOAA will also support up to four local landscape assessments, and associated workshops, on different blue carbon habitats to demonstrate the added benefits of coastal carbon values to specific

restoration and protection goals. EPA will build on the pilot project in Tampa Bay – one of 28 National Estuary Programs – and support assessment of GHG benefits associated with carbon sequestration with the goal of sharing algorithms and methods with estuaries that are part of the National Estuary Program. USGS will collaborate with DOI resource management agencies to provide science support for wetland management and restoration actions. As more wetlands are restored and protected, the USGS will be able to measure and estimate the effects of management to enhance carbon sequestration and resilience of the ecosystems to climate change.

## **Chapter IV: Enhance Community Preparedness and Resilience by Utilizing and Sustaining Natural Resources** **Harness the benefits of nature to protect communities from harm and build innovative, 21st century infrastructure that integrates natural systems into community development.**

---

*"And we'll partner with communities seeking help to prepare for droughts and floods, reduce the risk of wildfires, and protect the dunes and wetlands that pull double duty as green space and as natural storm barriers."*

President Obama, June 25, 2013

### **The Challenge**

Managing for the effects of climate change means that communities must anticipate and plan for future impacts, which include sea-level rise and storm surges, increased storm intensity bringing high winds and flooding, higher air and water temperatures that shift habitats for fish wildlife and plants, drought, and other impacts. Ensuring the continued productivity, biodiversity, and sustainability of natural resources requires managing for climate change in addition to other stressors on these systems. Today's challenge is to minimize these risks, reduce vulnerability, and prepare communities to thrive, grow, and adapt to a changing climate.

Ecosystems, such as forests, wetlands, and oceans provide a variety of benefits to human and natural systems including shoreline protection from erosion and inundation, flood and storm damage reduction, habitat for commercially and recreationally important species, opportunities for recreation and commerce, jobs, improved water quality and conservation, and carbon sequestration. The benefits provided by this "natural infrastructure"<sup>18</sup> also can play an important role in strengthening ecosystem resilience to the impacts of climate variability and change. Increasing the resilience of fisheries and other natural resources is also key to enhancing the resilience of communities and businesses. As states, tribes, and local communities work toward enhancing resilience to weather and climate related impacts, there is increasing demand to build their capacity to integrate natural and traditional infrastructure solutions.

Improved, climate-resilient resource management provides opportunity to address a wide range of challenges, including:

**Water Supply Availability:** In conjunction with traditional infrastructure, natural infrastructure can improve reliability of water supply for both ecosystem and human uses.

---

<sup>18</sup> Barbier, Edward B., Sally D. Hacker, Chris Kennedy, Evamaria W. Koch, Adrian C. Stier, and Brian R. Silliman, "The value of estuarine and coastal ecosystem services," *Ecological Monographs*, 81(2), 2011, pp. 169–193. <http://www.esajournals.org/doi/pdf/10.1890/10-1510.1>.

USEPA. 2013 Case Studies Analyzing the Economic Benefits of Low Impact Development and Green Infrastructure. [http://water.epa.gov/polwaste/green/upload/lid-gi-programs\\_report\\_8-6-13\\_combined.pdf](http://water.epa.gov/polwaste/green/upload/lid-gi-programs_report_8-6-13_combined.pdf).

As climate change results in reduced precipitation in some areas and population increases alter water uses, the capacity of natural systems to improve reliability of water supplies (e.g. groundwater recharge, water reuse, wetlands protection/restoration for water retention on site) can supplement investments in water conservation and built infrastructure.

**Managing Municipal Stormwater:** Expanded use of low-impact development (“green infrastructure”) practices in urban stormwater management that retain and infiltrate water on site can complement more conventional built infrastructure systems that channel stormwater directly to water bodies. For example, urban forests and rooftop gardens can be used to intercept precipitation, slow runoff, and mitigate heat island effects. By weaving natural processes into the built environment, green infrastructure provides not only stormwater management, but also improved water quality, greenhouse gas reduction, flood mitigation, and recreational opportunities.

By intercepting airborne pollutants, leaves help to improve air quality.

**Air Quality Improvements:** Increased vegetation on the landscape serves as a natural filter for ambient air pollutants like particulate matter. Leaves and vegetative matter intercept airborne pollutants, and also interrupt winds and reduce wind speeds, limiting the amount of particulate matter that can become airborne and improving air quality.

**Coastal Storm Surges and Sea-Level Rise:** Expanded use of natural infrastructure systems – such as dunes, coastal estuaries, wetlands, mangrove forests, and even oyster reefs – can help reduce impacts of storm surges and sea level rise on communities and existing natural systems.

**Flood Risk Management:** Preserving or restoring natural systems to retain precipitation where it falls across a watershed is a natural infrastructure technique that can be integrated with conventional “gray” or engineered flood management structures, such as levees and seawalls. Land-use management that strategically conserves natural infrastructure can also reduce the damaging impacts of flooding on human infrastructure and natural systems.

**Wildlife Protection:** Ensuring a diversity of well-connected natural areas or corridors along rivers and elsewhere to support the movement of species in response to climate change, and to sustain healthy populations into the future.

Community resilience will require the smarter use of traditional infrastructure integrated with natural infrastructure. The business case for expanded use of natural infrastructure in conjunction with, or in place of, more conventional built, or gray, infrastructure has been made in numerous studies<sup>19</sup>. Benefits of natural infrastructure may include cost savings compared to

---

<sup>19</sup> World Resources Institute. Investing in Forested Landscapes for Source Water Protection in the United States. <http://www.wri.org/publication/natural-infrastructure>.

built infrastructure, particularly over time, as well as a rich stream of additional benefits including recreation, habitat protection, and biological carbon sequestration. Federal agencies are striving to implement natural infrastructure where appropriate but are, in a number of cases, limited by both policy and law.

Understanding and quantifying the ecosystem services and benefits provided by natural infrastructure to communities is fundamental to sound decision-making, long-term community resilience, and climate adaptation. The development of consistent, analytically robust, and well-tested methodologies and tools for ecosystem services assessment and valuation remains a major challenge. While progress can be made through enhanced efforts and coordination at all levels of government, the public sector cannot meet this challenge alone. Federal programs, policies, and incentives are critical drivers for private investment. The Administration can help scale private investments in promoting climate resilience, encouraging voluntary GHG reductions and increasing the adoption of natural infrastructure by aligning market and non-market drivers and supporting replicable investments already occurring in isolated parts of the country. Similarly, there are numerous opportunities for retail and institutional investors, fund managers, and members of the financial services industry to expand private investment in these areas.

To enhance community preparedness and the resilience of natural resources, the Federal government is focused on developing the information and tools necessary to support smart infrastructure investment (whether traditional or natural) and target the highest priority resilience needs, enhancing partnerships with communities to accomplish high priority preparedness needs, and highlighting innovation and sharing best practices among all stakeholders.

### **Progress to Date**

The Administration has advanced creative solutions that utilize natural and traditional infrastructure to reduce community risk while also enhancing natural resources resilience. As communities prepare for climate impacts, well-managed natural resources play a critical role in moderating risk and in providing communities with fundamental ingredients to sustain current and future generations, such as clean abundant water, robust wildlife populations and living marine resources, and healthy soils. Key examples include:

- **Resilience Grants to Communities:** Announced in July 2014, HUD's National Disaster Resilience Competition will make \$1 billion available to communities that have been struck by natural disasters. The competition will promote risk assessment and planning and will fund the implementation of innovative resilience projects to better prepare communities for future storms and other extreme events. Focused on the needs of vulnerable lower-income people, and targeting the most impacted and distressed areas, this program addresses a wide range of community development objectives. Projects that incorporate natural infrastructure

into recovery are eligible for support, where shown to be an effective and competitive approach to rebuilding for resilience.

- **Strengthening Coastal Resilience:** Federal agencies are providing coastal inundation and sea-level change decision support tools to help communities reduce risks and increase the effectiveness of adaptation efforts. For example, in the aftermath of Hurricane Sandy, NOAA, USACE, and FEMA released a sea-level rise planning tool that includes interactive maps and a sea-level rise calculator to help inform decisions about how to rebuild in disaster-affected areas. In addition, HUD and DOI awarded grants to communities to incentivize innovative approaches to preparing for future storms through the use of natural infrastructure.
- **Enhancing Capacity to Manage Wildland Fire:** Climate change is leading to longer and more intense wildland fire seasons: fire season lengths have increased by 60-80 days over the last three decades and the annual acreages burned have more than doubled to over 7 million acres annually. That dynamic increases the danger to urban communities and erodes landscape integrity, which is critical to water supply, wildlife, and other important values. In 2014, the Administration announced the *Cohesive Wildland Fire Management Strategy*, a collaborative, inter-governmental strategy to tackle the wildland fire risks facing the Nation. The *Strategy* coordinates and integrates the efforts of Federal, state, tribal, and local partners and private property owners, to better restore and maintain landscapes, improve community resilience to wildfire, and implement safe, effective, and efficient risk-based wildfire management decisions.

However, the escalating cost of fighting wildfire remains a challenge to implementing the *Strategy*. Fire costs on Federal lands have increased significantly in real terms, from \$2.0 billion in 2000 to \$3.3 billion in 2014. As the suppression budget grows, it crowds out critical forest management and resilience priorities that decrease fire risk – including assistance provided to states, tribes, and

communities – and it threatens to make fire danger worse as land managers lack resources for essential prevention and restoration work. The President’s Fiscal Year 2015 budget proposes a new approach to addressing suppression costs by budgeting for extreme fires like other natural disasters – treating them as catastrophic costs that are funded outside of budget caps.

- **National Drought Resilience Partnership:** Launched in 2013, the National Drought Resilience Partnership (USDA, NOAA, DOI, USACE, FEMA, EPA and DOE, with participation from NASA) coordinates and integrates Federal activities to promote long-term

drought resilience, and leverages important capabilities of the National Integrated Drought Information System (NIDIS). As one example, the partnership is working with the State of Montana to develop a demonstration project in the Upper Missouri River watershed that will inform a joint Federal-State strategy to enhance drought resilience.

➤ **Assessing Climate Impacts on U.S. Oceans and Fish Stocks:**

In 2014, NOAA completed two new tools to help fisheries managers better understand and prepare for impacts of changing climate and ocean conditions on the Nation's valuable marine fish stocks. The Ocean Climate Web Portal provides easy access to information on past and projected changes in regional ocean conditions, while the Fish Stock Climate Vulnerability Assessment Methodology enables fishery scientists and managers to assess the relative vulnerability of fish stocks. In May 2014, NOAA used this methodology to assess the vulnerability of 80 East Coast fish stocks.

➤ **Increasing Water Supply Sustainability:** Through the Water SMART Program, DOI's Bureau of Reclamation is working with non-Federal partners to improve water management and sustainability. Reclamation is working with its partners through the Basin Studies to assess basin-wide impacts of climate change and to develop strategies to meet future water demands. The Bureau is advancing innovative water and energy efficiency projects through WaterSMART Grants. Through the Title XVI Water Reclamation and Reuse Program, the Bureau supports water recycling projects that diversify water supply, provide a drought resistant supply, and reduce the pressure to transfer water from agricultural to urban uses. The Drought Response Program incentivizes drought contingency planning and incorporation of climate change information in planning. Since the establishment of WaterSMART in 2010, Reclamation has provided more than \$200 million to non-federal partners through the program. Funded projects are expected to conserve 730,000 acre-feet of water per year once complete – about the amount of water needed for household use in Denver, Colorado and the surrounding metropolitan area. Five Basin Studies have now been completed, with an additional six Basin Studies expected to be finished by the end of 2014 and eleven others underway.

➤ **Integrating Climate Considerations into Water Resources Planning and Tools:** The Administration is incorporating climate change science into technical assumptions for major water resources planning and projects. In 2014, USACE instituted its *Preparedness and Resilience Policy*, which states that “it is the policy of USACE to integrate climate change preparedness and resilience planning and actions in all activities for the purpose of enhancing the resilience of our built and natural water-resource infrastructure and the effectiveness of our military support mission, and to reduce the potential vulnerabilities of that infrastructure

and those missions to the effects of climate change and variability.” This policy permeates USACE’s activities, including the consideration of potential climate change impacts when undertaking long-term planning, setting priorities, and making decisions affecting its resources, programs, policies, and operations.

DOI’s Bureau of Reclamation is incorporating climate change information into planning activities for infrastructure investments and safety, reservoir operations, and drought preparedness. Reclamation requires climate change be considered in all feasibility studies, and, beginning in FY 2015, Reclamation will develop a framework for considering climate change in prioritizing investments in infrastructure repair, replacement, and renovations. Reclamation is also developing the science and tools needed to apply climate change information to decisions about infrastructure safety through pilot projects within the Safety Evaluation of Existing Dams program. Separately, Reclamation began a pilot initiative in FY 2014 to identify methods to incorporate climate information in reservoir operations planning. The President’s Fiscal Year 2015 budget also supported Reclamation’s new Drought Response Program, which will prioritize drought contingency planning that includes consideration of climate change information to build long-term resiliency to drought.

**Weather-Ready Nation:** To mitigate the impacts of extreme weather, water, and climate events on communities, ecosystems, and other natural resources, NOAA’s National Weather Service (NWS) is translating its products and services into formats for use by stakeholders and communities. For example, the NWS Tampa Forecast Office and the National Ocean Service are working with external partners to expand a suite of services, including public health services; storm surge/coastal inundation services, ecological and environmental services for water temperature, salinity, currents and red tide; hydrologic runoff forecasts to mitigate development and transport of harmful algal blooms (HAB); and air quality forecasts.

**Collaborative Research for Resilience:** In 2012-2013, USDA National Institute for Food and Agriculture (NIFA) launched four climate-related grant areas: Agriculture and Natural Resources Science for Climate Variability (\$5M) Challenge Area; the Carbon Cycle Science (\$26.5M, in a joint NASA-ROSES CCIWG-U.S. Carbon Cycle Science Program with NASA, DOE and NOAA); Water Sustainability and Climate (\$25M, in a joint effort with National Science Foundation); and Decadal and Regional Climate Prediction using Earth System Models (\$15 M in a joint effort with NSF). The grant areas further understanding of the interaction between the water system, human activities, ecosystems and climate change; advance the science behind climate predictions, adaptation and resilience; reduce greenhouse gas emissions; increase carbon sequestration in agricultural and forest production systems; and prepare the Nation’s agriculture and forests to adapt to variable climates.

## WE'VE MADE GREAT PROGRESS

Significant progress has been made in the advancement of creative solutions that capitalize on natural infrastructure to reduce community risk while also enhancing natural resources resilience.

### PROGRESS:

HUD is promoting risk assessment and planning through its National Disaster Resilience Competition which is making \$1 billion available to communities that have been struck by natural disasters.

### PROGRESS:

The Administration is tackling the wildland fire risks facing the Nation through the development of a collaborative, inter-governmental strategy called the Cohesive Wildland Fire Management Strategy. The National Drought Resilience Partnership (USDA, NOAA, DOI, USACE, FEMA, EPA and DOE, with participation from NASA) is promoting drought resilience.

### PROGRESS:

WaterSMART grants awarded by DOI's Bureau of Reclamation have improved water supply sustainability. Water resources managers, including USACE and Reclamation, are incorporating climate change considerations in water resources planning and projects. NOAA is expanding services to support a weather-ready Nation.

## MOVING FORWARD

- Strengthen Federal support to improve state, local, and Tribal flood preparedness and reduce wildfire risks
- Strengthen FEMA grant guidance to encourage use of natural infrastructure to reduce flood risk after developing methods to measure performance and value benefits
- Develop tools to support smart development decisions within floodplains and along coasts
- Continue to address the Hurricane Sandy Rebuilding Strategy
- Develop a broad-based, multi-sector Green Infrastructure Collaborative for stormwater management
- Work with communities to enhance water use efficiency and reuse, and improve drought resilience
- Improve the resilience of coastal areas to extreme events, including preparedness for climate impacts to fish stocks
- Establish interagency support teams for climate-resilient water resources on a regional basis
- Establish a Climate Resilience Leaders award and conduct competitions to spur creative solutions
- Identify or develop a community resilience index that considers environmental, economic, and social resilience
- Implement new Principles, Requirements, and Guidelines (PR&G) for Federal investments in water resources

## Moving Forward

While significant progress has been made to integrate climate change science into Federal programs and services, there is more to be done to strengthen natural resource resilience and prepare communities for a changing future. There are continued opportunities to update existing programs and operations to integrate climate change science and to align objectives to support and enhance climate resilient communities and natural systems. Understanding the performance of natural infrastructure and how to integrate nature-based solutions into built infrastructure is an area ripe for early adoption of proven approaches, greater research, and enhanced cooperation and collaboration. Key actions moving forward include:

- **Partner with Communities to Enhance Resilience to Natural Hazards Risks:** Well-managed natural resources can enhance community resilience to hazards and threats. The following actions will help communities prepare for risks while integrating climate resilient natural resources considerations into operations:

- **Strengthen support for state, tribal and local flood preparedness:** Flood preparedness is widely recognized as more cost-effective than post-flood response and recovery, yet many communities lack the resources, tools, and training to take preventive actions that could dramatically reduce flood losses, save lives – and reduce

outlays by the National Flood Insurance Program and the Federal disaster relief and recovery programs. In 2015, FEMA will strengthen its grant guidance to encourage use of natural infrastructure to reduce flood mitigation risk, while NOAA, USGS, and other agencies will develop tools to support smart development decisions within floodplains and along coasts.

- **Expand partnerships to reduce wildfire risk and protect community infrastructure:** USDA and DOI will restore resilience of priority landscapes where critical resource values are at high risk from wildfire. Advancing the *National Cohesive Wildland Fire Strategy*, Federal land managers will expand multi-jurisdictional partnerships, such as the Western Watershed Partnership and the Joint Chiefs’ Initiative, aimed at reducing hazardous fuels and protecting community water supplies and other critical infrastructure. The Forest Service will partner with states to implement new provisions in the 2014 Farm Bill that reduce threats from wildfire, insects and disease and bolster forest restoration, across all land ownerships. Additionally, through the 21st Century Conservation Service Corps, USDA and DOI will engage nearly 10,000 youth and veterans to accomplish critical restoration work on public lands through watershed restoration, hazardous fuel reduction, and other important projects.

The wildfire cap adjustment included in the President’s Fiscal Year 2015 budget (noted on p. 37) would allow for more pro-active forest restoration work that has been severely delayed and constrained in order to pay for wildfire emergencies. For example, the USFS Vegetation and Watershed Management program, which performs post-fire restoration to achieve healthy watershed and ecological conditions after a fire, has experienced a 22 percent reduction since 2001 due to this structural budget challenge. Other investments in National Parks and Forests that Americans

expect – to simply maintain roads, trails and facilities – have been similarly severely impacted as catastrophic fire events squeeze out other operations, in some cases reduced as much as 95 percent since 2001. The President’s proposed wildfire cap adjustment would prevent suppression from subsuming a greater share of the budget moving forward.

➤ **Address Performance Measurement and Benefits Assessment Challenges to Natural Infrastructure:** In 2015, the Administration will address barriers to investment in and implementation of natural infrastructure solutions by improving measurement and evaluation of these approaches. All of the following actions address *Hurricane Sandy Rebuilding Strategy - Recommendation #22*:

- Develop an Actionable Research Agenda: The EOP will lead the development of a research agenda to address emerging and persistent methodological challenges and other barriers for the Federal government’s integration of ecosystem services into resilience efforts. The research agenda will identify key knowledge gaps, particularly those associated with valuation, and outline needs and opportunities for addressing these gaps.
- Issue Federal Guidance on Ecosystem Services Assessment: The Administration will develop guidance to bring high-level visibility and support for the use of ecosystem services assessment methods where appropriate and practicable. By providing this guidance to Federal agencies, the Administration will encourage the use of sound approaches to assessing ecosystem services and integration of assessment into Federal decision making.
- Launch Natural Infrastructure Tools and Resources Website: CEQ, NOAA, and USGS will partner with Federal agencies to populate the Climate Resilience Toolkit existing online tools and resources on natural infrastructure to support Federal, state, tribal and local decision-makers. This website will leverage other agency and interagency efforts.
- Conduct Program Evaluation of Resilience Investments: As noted on page 20, DOI will verify performance metrics and evaluate the performance of \$300 million in Hurricane Sandy Supplemental resilience investments, which includes \$100 million in external grants for natural infrastructure and other nature-based solutions. NOAA

is also providing \$300,000 toward a trade-off analysis to develop estimates of the economic value associated with Sandy-related restoration work. This will inform future Federal community resilience investments in natural infrastructure.

- **Expand Collaboration and Technical Assistance to Help Communities Implement Green Infrastructure for Stormwater Solutions:** EPA, along with HUD, DOT, USDA, DOI, DOD, and DOE recently announced the development of a broad-based, multi-sector Green Infrastructure Collaborative. The Collaborative will help communities better manage stormwater and more rapidly adopt low impact development techniques. In support of this initiative, in 2015 EPA will provide technical assistance to at least 25 communities while also disseminating information to support local adoption of such stormwater practices. This initiative will:

- Provide on-the-ground support to communities to more fully realize their green infrastructure objectives;
- Create a network of public, private, and NGO participants to leverage the full range of information and resources;
- Align Federal resources to help local communities integrate green infrastructure planning into broader community development efforts, including through transportation systems (e.g., complete streets) and parks/open spaces;
- Provide tools and training for communities to build local capacity around resiliency and sustainable water infrastructure;
- Recognize innovative green infrastructure projects and foster information sharing about innovative approaches;
- Lead by example by installing and supporting green infrastructure to demonstrate the suite of benefits that these approaches can provide; and
- Create a network of organizations that can mobilize resources and develop the strategies for implementing green infrastructure for a range of community objectives.

- **Promote Drought Resilience and Enhance Water Use Efficiency, Water Reuse, and Water Supply:** Climate change can impact the duration and severity of drought. Drought events can have major environmental, social, and economic consequences. For example, damages from the 2012 drought totaled approximately \$30 billion, and the severe drought currently affecting the West is impacting critical sectors, including agriculture, ranching, cities, industry, recreation, and the environment. Federal agencies will work with communities to protect and extend limited water supplies; actions include:

- USDA will invest in irrigation efficiency and management strategies to address groundwater depletion and will improve drought and snowpack monitoring.

- The EPA WaterSense program will promote water use efficiency to sustain water supplies, which will have the added benefit of reducing the use of energy to move and heat water by 23 million metric tons per year by 2018.
  - USACE will incorporate climate considerations into any planned or ongoing water reallocation actions.
  - Bureau of Reclamation will continue to incorporate climate change considerations throughout its programs and policies as it carries out its mission to develop, manage and protect water and related resources in an environmentally and economically sound manner. Reclamation's WaterSMART Program is well positioned to address near-term impacts of climate change via the competitive grants provided to non-Federal partners under the program. The Basin Study component of the WaterSMART Program provides an effective process through which Reclamation will continue to work with study partners to identify and develop adaptation strategies to meet future water supply needs. In addition to this effort, Reclamation will assist its study partners with the technical expertise, planning support, science, and tools needed to advance adaptation strategies that can be implemented by non-Federal stakeholders.
  - USGS will begin a series of projects to understand the impacts of drought on fish and wildlife species.
  - In 2015, NOAA's National Weather Service National Water Center, with partners, will begin development of a national water model that will improve water prediction capability to optimize communities' use of increasingly limited water resources.
  - In 2015, USDA will use Farm Bill programs to support conservation practices and technologies that build drought resilience. Through planned research, USDA will also enhance food security through analyzing improved crops and plant breeding tools with increased resilience to heat and drought; developing systems to model and test climate change scenarios' impact on animal, food, and waterborne diseases and pests; and by researching drought impacts to nutritional composition and quality of food.
  - The interagency National Integrated Drought Information System (NIDIS) will work to ensure that its regional drought early-warning information capabilities in partnership with Federal agencies, states, tribes, and communities across the Nation.
- **Establish Federal Agency Support Teams for Climate Resilient Water Resources Based on the WestFAST Model:** Federal agencies will work with state, tribal and local partners to identify appropriate regional associations dealing with water resources management and develop Federal agency support teams, comparable to the existing WestFAST partnership wherein Federal agencies embed a dedicated Federal liaison to work with the Western states on issues of common concern. This highly efficient approach saves both Federal and state partners time and money and ensures that a high level of coordination takes place.

- **Build Regional Capacity for Natural Resource Disaster Recovery and Restoration in the Pacific Islands:** Within 18 months, NOAA, USGS, and FWS will produce a regional handbook for natural resource and emergency managers for the Pacific Islands Region. To be developed in collaboration with Pacific Islands partners, the handbook will document recent policy and capacity developments and lessons learned to address challenges associated with managing natural resources in the context of more frequent and severe extreme events.
- **Strengthen the Resilience of Coastal Resources and Communities to Extreme Events:** In 2014, NOAA will launch new coastal resilience research projects to provide coastal communities and businesses with better information and tools to identify risks and increase resilience, and in 2015, proposes to create a new competitive grants program to fund collaborative projects that increase coastal communities' and economies' resilience. In coordination with USACE and other relevant Federal agencies, NOAA will provide resources and technical assistance to state, tribal, local, and private sector partners to enhance the use of natural infrastructure to address storm surge, sea-level rise, and other stressors on coastal communities and ecosystems; NOAA plans to pilot a water-level inundation "dashboard" to facilitate decision-making concerning flooding and storm events through scenarios that include how the flooding will impact the natural and built environment.
- **Prepare for Climate Impacts on Fish Stocks and Fishing-dependent Communities:**

In 2015, NOAA will help fishing-dependent communities prepare for climate impacts on fish stocks by completing climate vulnerability assessments for major commercial and recreational marine fish stocks; helping communities undertake risk assessment and adaptation planning; supporting collaborative research on the impacts of climate variability and change on fish

stocks and fisheries in the U.S. Northeast Shelf Large Marine Ecosystem; and establishing Resilient Fishing Communities Pilot Projects to provide technical assistance to fishing-dependent communities in risk assessment and adaptation planning. NOAA also proposes to increase investment in its Ecological Forecasting Roadmap to include resilience related activities, such as connecting how living marine resources respond to changes in coastal and marine habitats, and to launch a new coastal ocean acidification modeling initiative to help resource managers and coastal communities better understand and prepare for impacts of changing chemical conditions on commercially important fishery species.

➤ **Foster Innovation and Recognize Leadership:**

- **Prize competitions:** Under the authority of the America Competes Reauthorization Act of 2010, the Administration will provide incentives and opportunities for the private sector and public to share creative solutions to natural resource and community resilience challenges through one or more prize competitions focused on flooding, storm surge, wildfire, drought, or other key challenges. Past examples of this approach are challenges issued through the Climate Data Initiative and the Wood in Green Building competition. As noted on page 29, within 6 months, USDA will launch a U.S. Tall Wood Building Competition to spur use of sustainable forest products in construction. In 2015, Bureau of Reclamation will launch several challenges focused on infrastructure sustainability, ecosystem restoration, and water supply and drought management under a changing climate.
- **Leadership awards:** To point to success and encourage replication of climate smart practices, the Administration will also establish a Climate Resilience Leaders award to recognize Federal, tribal, state, and local leadership in advancing the resilience of natural resources and the communities that depend on them.

➤ **Provide Policies, Data, and Tools to Facilitate Smart Restoration and Conservation Investments:**

- **Develop a Community Resilience Index:** In 2014, FEMA will begin work in coordination with NOAA, NIST, and insurers to identify or develop a community resilience index that considers environmental, economic, and social resilience. This work will focus on economic and social components, in particular infrastructure, and will incorporate data and ecosystem information developed through DOI and NOAA efforts to measure progress on resilience through restoration. By 2015, this work will produce a set of key indicators and an initial index methodology for implementation. Products of this effort will be incorporated into the Climate Resilience Toolkit as appropriate in the future.
- **Disaster Resilience Framework:** In 2015, NIST will deliver a Disaster Resilience Framework to establish a community-based approach to resilience, including performance goals for classes of buildings and infrastructure systems based on their importance to the function of the community as defined by its purpose. NIST is conducting a series of stakeholder workshops to inform the development of the Disaster Resilience Framework. NIST is coordinating with a number of Federal agencies, including, but not limited to NOAA, DHS, FEMA, HUD, as well as state and local governments, private sector stakeholders, and academia. This is part of a long-term program to provide guidance and tools that communities can use to establish priorities and prepare plans to improve their resilience. Products of this effort will be incorporated into the Climate Resilience Toolkit as appropriate in the future.

- **Implement Modernized Principles, Requirements, and Guidelines (PR&G) for Federal Investments in Water Resources:**

In 2009, the Administration began a major effort to update 30-year-old criteria that guide national investments in water resource projects. These new criteria encourage more responsible taxpayer investment by bringing a smarter, more balanced approach to planning. Under the new PR&G, agencies will evaluate the full range of costs and benefits of proposed actions, to more broadly consider how water resource investments impact the economy, environment, and local communities. By considering the environmental impacts of proposed actions, this improved approach to cost benefit analysis will better account for the benefits nature-based solutions provide. The Administration is nearing the implementation of the new PR&G, to the extent permissible under current law. In 2014, the Administration will release Interagency Guidelines (IG), followed by the finalization of Agency Specific Procedures to implement the PR&G. Agencies will lead an effort in 2015 to fully implement these modernized criteria for climate-resilient water resource investments.

## **Chapter V: Modernize Federal Programs, Investments, and Delivery of Services to Build Resilience and Enhance Sequestration of Biological Carbon development**

---

*“But what I also know is, is that when you take those first steps, even if they’re hard and even if they’re halting sometimes, that you start building momentum and you start mobilizing larger and larger communities. And when it comes to a challenge as far-reaching and important as protecting our planet, every step makes a difference.”*

President Obama June 25, 2014

### **The Challenge**

Climate change poses new challenges for Federal agencies, both operationally as well as for the management programs they administer and the services they provide. Though much progress has been made, most Federal natural resource management programs, investments, and grant programs lack clear guidelines to ensure that Federal efforts and investments are informed by climate-smart principles or prioritize regional strategies.

Climate change also poses new challenges for stakeholders with unique needs and interests including farmers, ranchers, fishermen, foresters, wildlife professionals, city managers, water utility managers, and others. These challenges are not limited to one region or scale and cannot be addressed by any single Federal science or extension program. Federal agencies are increasingly working with partners to deliver regional programs and services to provide context-specific data, user-friendly tools, and information to help people make climate-sensitive decisions.

These regional programs rely on partnerships between scientists and stakeholders to identify and refine science and information needs in specific regions, at scales most useful for decision-makers at all levels. In the rapidly changing arena of climate science, there is increased demand for information and tools to support local decision-making by an array of users with diverse interests and questions. Organizing the delivery of information, services, and products to better serve state, tribal, local, and working landowner needs is an ongoing challenge that Federal agencies are working to meet.

Federal agencies are also committed to providing training in the use of new data and tools to ensure that decision-makers at all levels have the knowledge they need. Federal agencies also recognize the importance of tribal governments in building climate resilience and will expand effort to support tribes in this work.

## **Progress to Date**

Federal agencies have been making great strides toward building the resilience of natural resources and the communities that depend upon them, improving the ability of our ecosystems to fight carbon pollution, and adapting policies and procedures to more effectively anticipate and address climate impacts and build resilience. Agencies have also begun to incorporate resilience considerations into resource management, financial assistance, and other programs.

As directed by Executive Order 13653 (November 1, 2013), *Preparing the United States for the Impacts of Climate Change*, Federal agencies are required to develop or continue to develop, implement, and update comprehensive plans that integrate consideration of climate change into agency operations and overall mission objectives. To support the efforts of regions, states, local communities, and tribes, the Executive Order also requires all agencies, consistent with their missions, to:

- identify and seek to remove or reform barriers that discourage investments or other actions to increase the Nation's resilience to climate change while ensuring continued protection of public health and the environment;
- reform policies and Federal funding programs that may, perhaps unintentionally, increase the vulnerability of natural or built systems, economic sectors, natural resources, or communities to climate change related risks; and
- identify opportunities to support and encourage smarter, more climate-resilient investments by states, local communities, and tribes, including by providing incentives through agency guidance, grants, technical assistance, performance measures, safety considerations, and other programs, including in the context of infrastructure.

In March 2014, the Administration launched the Climate Data Initiative, bringing together extensive open government data and innovation competitions to develop data-driven resilience tools for communities. In addition, Federal agencies are working together to develop a Toolkit for Climate Resilience that centralizes access to new and existing data-driven resilience tools, services, and best practices, including those developed through the Climate Data Initiative.

Many programs have already made efforts to include resilience criteria, such as land acquisition and easements supported through the Land and Water Conservation Fund, support for sustainable water supplies through Reclamation's WaterSMART grants, as well as EPA's Underground Injection Control Grants program and Wetlands Program Development Grants. Federal agencies are also

working cooperatively with states and tribes to help them incorporate climate resilience considerations into programs on a voluntary basis (e.g., State and Tribal Wildlife Grants, Coastal Zone Management Grants, Clean Water State Revolving Fund, Drinking Water State Revolving Loan Fund).

Federal agencies have also organized a number of regional climate science and service approaches for delivering information, tools, and training to better serve state, local, tribal, and regional needs. For example, NOAA Regional Climate Partnerships provide integrated science, climate data and information products, and partnership building efforts to local, state, tribal, and Federal entities seeking to manage climate- and weather-related risks. For almost 20 years Regional Integrated Science and Assessment (RISA) teams have worked with a diverse range of sectors (e.g. public health) as a research engine for partnership-driven science. Through Regional Climate Hubs, USDA delivers tailored information to help farmers, ranchers, and private forestland owners adapt to the impacts of climate change and weather variability and to promote sustainable agriculture/forestry production through development of adaptation responses. LCCs have convened major conservation stakeholders in each bioregion to work on developing resilient landscape designs to help maintain fish, wildlife, and plant resources. DOI Climate Science Centers, working with many of the same stakeholders, are identifying the related LCC science needs and directing their resources to meet those needs. Each of EPA's ten regional offices have developed a climate adaptation plan defining support they will provide to state, tribal, and local governments, and stakeholders, such as water utilities. There are also other Federal agency and interagency efforts, including USACE, FEMA, and the interagency Climate Change and Water Working Group,<sup>20</sup> that have regional organizations that participate in supporting resilience activities.

Agencies are working internally and with external partners to enhance climate literacy of the conservation workforce. Specific examples include:

- The National Park Service developed staff training based on its 2011 assessment to identify the highest priority climate change training needs. Now in its fourth year, the Interpreting Climate Change in National Parks training program provides the knowledge, skills and abilities needed by front line interpreters to actively engage the public in climate change education. The NPS New Superintendents Academy Climate Change Leadership Series (in its 3rd year), is a multi-week course in which experienced managers share their insights, resources, tools, and tested response options about climate change with new superintendents. To enhance these training courses, fourteen place-

<sup>20</sup> The Federal Climate Change Water Working Group (CCAWWG) provides engineering and scientific collaborations in support of water management under a changing climate. It fosters communication and research partnerships around these needs across the water and science communities of practice. <http://www.ccawwg.us/index.php/home>.

based climate change videos are available online, which explore management actions on topics such as sea level rise, glacial melting, and species shifts.<sup>21</sup>

- The Department of the Interior’s Bureau of Indian Affairs launched a new \$10 million Federal-Tribal Climate Resilience Partnership and Technical Assistance Program that will help tribes prepare for climate change by developing and delivering adaptation training, providing tribes with data and information, improving Federal collaboration, and assisting with climate change adaptation and mitigation efforts.
- Many RISA teams work with indigenous communities to prepare for the effects of climate variability and change. For example, the Climate Assessment for the Southwest, working with the Hopi Department of Natural Resources in Arizona, co-produced the first ever Quarterly Hopi Drought Status Report in 2014. The Southern Climate Impacts Planning Program is working with the Chickasaw Nation and the South Central CSC to develop climate science training for tribal environmental professionals in Oklahoma and Texas. The Alaska Center for Climate Assessment & Policy worked with the City of Dillingham, the Bristol Bay Native's Association, and the Bristol Bay Borough to complete an initial assessment of health vulnerability and environmental security around the issue of water security in Bristol Bay. The Pacific RISA is providing scientific support to Hawaii, the Republic of the Marshall Islands, and other Pacific islands regarding the sustainability of fresh water resources in a changing climate.
- The National Integrated Drought Information System (NIDIS) is developing training, drought early warning and preparedness plans with tribal communities in the Missouri, Colorado, and Columbia River Basins.

## WE'VE MADE GREAT PROGRESS

Significant progress has been made toward building the resilience of natural resources and the communities that depend upon them, improving the ability of our ecosystems to fight carbon pollution, and adapting policies and procedures to more effectively anticipate and address climate impacts and build resilience.

### PROGRESS:

Numerous programs have made efforts to include resilience criteria including EPA's Underground Injections Control Grant program and Wetlands Program Development Grants, and Reclamation's WaterSMART grants.

### PROGRESS:

DOI's Bureau of Indian Affairs launched a \$10M program to help tribes prepare for climate change through advances in data and information supporting adaptation and mitigation as well as enhanced technical assistance.

### PROGRESS:

NOAA Regional Integrated Science and Assessment (RISA) teams are working with a diverse range of sectors, such as public health, as a research engine for partnership-driven science.

## MOVING FORWARD

- Incorporate climate smart practices in Federal land acquisition programs and natural resource grant and financial assistance programs
- Develop agency-specific principles and guidance for considering biological carbon in management and planning decisions
- Identify exemplary facilities and resource management activities that demonstrate cutting edge resiliency efforts
- Provide the Council on Climate Preparedness and Resilience with a status update on progress-to-date in modernizing programs
- Provide an online "front door" to the array of regional information, services, and tools available
- Increase support for NOAA's Regional Integrated Sciences and Assessments (RISA) teams
- Use Climate Smart Conservation Guide to train hundreds of natural resource managers across the country in climate smart conservation
- Place tribal Climate Extension Support Liaisons in the DOI Climate Science Centers
- Develop at least one flagship tribal partnership in every Forest Service Region

## Moving Forward

- **Modernize Federal Programs:** Many Federal programs have already made efforts to update existing operations to promote climate resilience and carbon sequestration considerations. Federal agencies will build on this momentum through the following actions:
  - **Incorporate resilience into natural resources planning and management:** Within 12 months, Federal agencies with natural resources responsibilities or whose activities impact natural resources will identify best practices for applying resilience criteria to program management, practices, training, and investments, and institute policies that ensure such practices are implemented and updated on a regular basis.

- **Modernize land acquisition, and natural resource financial assistance programs to address resilience needs:** Climate-smart practices should also be reflected in Federal land acquisition programs and natural resource grant and financial assistance programs. Within 12 months, Federal agencies that administer these programs will identify best practices for applying resilience criteria to them, and develop policies for implementing these practices, as well as mechanisms for updating those policies.
  - **Implement policies, procedures, and performance metrics for considering biological carbon in Federal natural resource management practices:** In addition to actions outlined in Chapter III, within 12 months Federal land, water and coastal management agencies will develop agency-specific principles and guidance for considering biological carbon in management and planning decisions. Such guidance shall acknowledge the importance of sustaining long-term ecosystem function and resilience over short-term accounting for carbon changes, consider carbon within the context of other management objectives and ecosystem service goals, and integrate carbon considerations as part of a balanced and comprehensive program of sustainable management and climate change adaptation.
  - **Lead by example at Federal facilities:** Federal agencies own or manage many properties and facilities that are vulnerable to the impacts of climate change. Federal agencies will lead by example by employing best practices in ensuring resilient natural systems and built infrastructure at Federal facilities and lands. Within 12 months, each Federal agency will identify a small number of exemplary facilities and resource management activities that demonstrate cutting edge resiliency efforts, such as use of natural infrastructure, documenting the "best of best practices". Where appropriate, Federal agencies will enhance their visitation, education, and outreach activities to encourage emulation of these practices more broadly in the public and private sectors.
  - **Status update:** Within 12 months, Federal agencies will provide the Council on Climate Preparedness and Resilience with a status update on progress-to-date in modernizing programs as described above.
- **Provide Regional Resilience Information and Services to Meet the Needs of American Communities:** Despite progress to date, there is a need to better communicate and coordinate regional Federal efforts, to make it easier for people, communities, and tribal, state, and local governments to get access to resilience services, and to identify the decision support infrastructure that will be needed in the future. There is also a call for greater awareness and coordination of existing decision support tools available to support resilience planning at various scales. The following actions moving forward will build on existing efforts to enhance the delivery of regional resilience services.

- Within 12 months, NOAA, USDA, and DOI, in coordination with other Federal agencies that support regional resilience, will improve customer service by providing an online “front door” to the array of regional information, services, and tools available, using the National Climate Assessment regions as a consistent framework or “inroad” for communities and the public. These agencies will also develop a networked approach whereby access to any one agency’s regional services will provide a clear path to the others. This will include an online directory of regional experts, services, and tools. This work will include coordinated development of priorities and plans for investments in research and tools in each region that will assure effective use of limited resources. Products of this effort will be disseminated through the Climate Resilience Toolkit as appropriate.
- Within 12 months, each USDA Hub will pursue a set of partnerships with Cooperative Extension university partners and other stakeholders to better understand the local and regional challenges posed by climate change and to develop and deliver guidance on climate resilient management strategies to farmers, ranchers, and other landowners.
- In 2015, NOAA plans to increase support for its RISA teams who work with resource managers and planners to develop and utilize new information about the impacts of climate on communities, natural and managed resources, infrastructure, transportation, and health. Now serving eleven regions, two new regions would be competitively awarded funding to expand services to the Mid-Atlantic and the Midwest.

The National Climate Assessment collects, integrates, and assesses observations and research from around the country, helping us to see what is actually happening and understand what it means for our lives, our livelihoods, and our future. In addition to providing an analysis of impacts on seven sectors, the report assesses key impacts on eight major U.S. regions: Northeast, Southeast and Caribbean, Midwest, Great Plains, Southwest, Northwest, Alaska, Hawai'i and Pacific Islands, as well as the country's coastal areas, oceans, and marine resources. These regions provide a framework from which the delivery of Federal regional services can be better understood and accessed by regional, state, tribal, and local decision-makers, stakeholders, and the public.

➤ **Identify Regional Priorities for Science and Services to Enhance Resilience:** By early 2015, following the methods of drought outlook forums convened by NIDIS, NOAA, USDA, and DOI, Federal agencies will convene at least three regional collaborative discussions with resource managers, decision-makers, and others, to identify and anticipate science and service priorities in light of unfolding climate related events, such as droughts and floods resulting from the potential El Niño, or disasters such as Atlantic hurricanes and tropical storms. Partners will work collaboratively to develop tools, provide information and planned engagement, and inform investment around these unfolding climate-related events.

➤ **Train and Inform Resource Managers and Stakeholders on Climate Resilience:**

Generating needed data and tools is an important step, but Federal agencies also need to bolster climate-smart education and develop training programs to help decision-makers, resource managers, stakeholders, and others get the most value from information resources.

- By 2015, NOAA, USDA, and DOI, in cooperation with other Federal agencies, will define a framework for education and training to build climate literacy and capability among relevant Federal agency staff and technical service providers, such as planners, engineers, and consultants. The framework should include assessing climate literacy in Federal agencies,<sup>22</sup> and developing partnerships with non-profit or professional groups to promote climate resilience outreach, education, training, certification, and engagement of academic training capability.
- In 2014, a coalition of Federal and state agencies and nongovernmental partners released a *Climate Smart Conservation Guide*<sup>23</sup> that describes practices to safeguard vital natural resources in a changing climate. The guide provides natural resource managers with state-of-the-art information and tools to assess risks and design effective resource management efforts that incorporate and respond to climate-related changes in U.S. ecosystems. Over the next year and beyond, the guide will be used by the FWS National Conservation Training Center to train hundreds of natural resource managers across the country in climate smart conservation.
- Building off these efforts, Federal natural resource agencies will work to enhance their efforts to integrate climate information and communications into place-based stewardship. This will provide enhanced and informed visitor education on the impacts of climate change upon the lands and waters managed by the Federal government, including National Parks, National Wildlife Refuges, National Forests, National Marine Sanctuaries, and other sites

---

<sup>22</sup> This effort should build off of the “Climate-Smart Conservation: Putting Adaptation Principles into Practice” manual and training program developed by the National Wildlife Federation in cooperation with the USGS, FWS, NPS, EPA, USACE, USFS, NOAA and several other state and stakeholder partners.

<sup>23</sup> NWE, *Climate Smart Conservation*. [http://www.nwf.org/pdf/Climate-Smart-Conservation/NWF-Climate-Smart-Conservation\\_5-08-14.pdf](http://www.nwf.org/pdf/Climate-Smart-Conservation/NWF-Climate-Smart-Conservation_5-08-14.pdf).

which collectively receive 938 million visits a year.<sup>24</sup>

- In 2014, the National Park Service will complete development of a Natural Resource Career Field Academy online climate change module to help resource professionals understand key climate change related issues and explore adaptation and planning options.

➤ **Prepare Indigenous Communities for the Impacts of Climate Change:** As described in

Photo of a Tlingit man, a member of an indigenous people group who live in southeast Alaska.

Source:

<http://www.pbs.org/harriman/1899/native.html>

the National Climate Assessment, “[t]he peoples, lands, and resources of indigenous communities in the United States, including Alaska and the Pacific Rim, face an array of climate change impacts and vulnerabilities that threaten many Native communities. The consequences of observed and projected climate change have and will undermine indigenous ways of life that have persisted for thousands of years. Key vulnerabilities include the loss of traditional knowledge in the face of rapidly changing ecological conditions, increased food insecurity due to reduced availability of traditional foods, changing water availability, Arctic sea ice loss, permafrost thaw, and relocation from historic homelands”.<sup>25</sup> Federal agencies

have a variety of existing and upcoming national and regional programs, and initiatives that provide information, training, technical assistance, financial support, and other services to support

community capacity to bolster resilience and prepare for the impacts of climate change. Federal agencies are also integrating traditional knowledge into technical assistance and assessments to inform decision-making.

- DOI will place five tribal Climate Extension Support Liaisons in the Climate Science Centers, as part of its Federal-Tribal Climate Resilience Partnership and Technical Assistance Program. These liaisons will work at the regional level with tribes to identify climate information and science needs of tribes and coordinate Federal assistance across agencies to address those needs. The five regional tribal liaisons

will also support tribal workshops, practitioner working groups, and regional training needs. Liaisons will be contracted to tribal organizations to ensure strong ties to tribal practitioners and to further enhance tribal capacity.

- Within 12 months, the USDA-Forest Service will create at least one flagship tribal partnership in every Forest Service Region to develop and implement climate adaptation strategies for tribal lands and adjacent National Forests.
- In 2015, NOAA proposes to increase efforts to provide fisheries and other decision makers in the Alaska region with information on climate impacts on major fish stocks and protected species and to implement a distributed biological observatory to improve understanding of how climate and human-induced change are affecting subsistence cultures and the environment in the Arctic.

## Chapter VI: Conclusion

---

Climate change is the challenge of our time. We can take action now to improve climate resilience of our land and water resources, as well as to take action that will help improve the ability of our land and water to absorb more carbon.

Recognizing the importance and urgency of taking action, in November 2013, the President asked Federal agencies to complete an inventory and assessment of proposed and completed changes to their land- and water-related policies, programs, and regulations necessary to make the Nation's watersheds, natural resources, and ecosystems, and the communities and economies that depend on them, more resilient in the face of a changing climate (Section 3 of EO 13653). This effort convened the Departments of Defense, Interior, Agriculture, Environmental Protection Agency, National Oceanic and Atmospheric Administration, Federal Emergency Management Agency, the U.S. Army Corps of Engineers, working with the Chair of the Council on Environmental Quality and the Director of the Office of Management and Budget (OMB).

This inventory and assessment led to the development of this *Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources*. This *Agenda* identifies significant actions to foster climate-resilient lands and waters, manage biological carbon sinks associated with Federal lands and waters, use natural infrastructure to strengthen community resilience, and provide agency support to regional, state, local, and tribal resilience efforts. The *Agenda* builds off of the robust climate and natural resource efforts of the Administration to date, internal reviews of existing efforts, and feedback from partners and the State, Local, and Tribal Leaders Task Force for Climate Preparedness and Resilience to improve the resilience of America's natural resources and the communities that rely upon them. In 2015, Federal agencies intend to conduct a twelve month appraisal of implementation to date.

In the course of conducting the inventory and assessment, a number of substantial challenges and opportunities were identified that require further attention beyond the actions described in this *Agenda*. The challenges and opportunities fall generally into three categories:

**Science and Information:** Developing and providing access to the relevant information and tools to support decision-making is among the greatest ongoing challenges in protecting and enhancing the resilience of natural resources, and therefore the resilience of the communities and economies that rely upon them. Efforts are underway to: collect information on the changes that are happening and that will occur in the future, integrate data and information into research and analysis that supports our understanding of possible outcomes for human and natural systems, ensure that science is effectively translated and delivered, and train decision makers in utilizing this information in a highly uncertain environment, where

climate is only one of a number of factors that are being experienced. To meet this demand, Federal agencies have established several networks of science and data providers, developed multiple classes of climate tools and services, and provided numerous innovations in modeling and prediction. Additional work is needed to improve translation, utility, and delivery of existing knowledge – and to address key information needs that have been identified by user communities.

- Collaboration and Capacity: The Federal government alone cannot address all of the implications of climate impacts on our natural resources. Addressing climate change and fostering the resilience of our natural resources will require leveraging the skills, tools, and innovations of the entire Nation, from residents of vulnerable coastal towns and villages, to innovative county leaders intent on solving emerging challenges, to state and tribal officials who are having to adapt quickly to changing resource conditions that are happening over a matter of years, not decades or centuries. Fostering this level of innovation and adaptive capacity to address these changes will require improved collaboration. And building such partnerships will also strengthen the ability of all parties to bring resources to the table to help the Nation sustain and restore our natural resources.
  
- Funding Resilience: Increasing wildfires, droughts, floods, and severe storms, are all reminders that climate related costs are rapidly on the rise. Because the scale is immense and the well-being of many American communities is so closely linked to the many services ecosystems and landscapes provide, Federal, state, tribal, and local governments must share responsibility to foster the resilience of the Nation's natural resources. With constrained resources at all levels of government, we must re-think how we fund and finance investments by identifying and removing barriers that can impede the ability of all parties to invest in resilience, and through providing incentives to move forward with important investments in natural resources.

With these challenges ahead, the Federal agencies involved in this exercise recognize more investment is needed and would welcome continued dialogue around:

- Innovative financing mechanisms that leverage private sector investment

- Increasing support for existing landscape scale restoration as well as land acquisition and easement programs
- Expanding support through the tax code for retaining working forests
- Reducing wildfire risk and restoring fire-impacted landscapes
- Innovative ways to encourage proven water conservation and efficiency investments
- Building support for regional climate services (CSCs, LCCs, Hubs, RISAs, etc.)
- Increasing state and local climate and natural resources resilience planning and implementation capacity through existing mechanisms like the Fish & Wildlife Service State Wildlife Action Grants, and the Forest Service Cooperative Forestry Programs

We have to act now to make our communities and ecosystems more resilient in the face of climate impacts. It will take more than “re-thinking” how we spend the resources available today, it will take the kind of financial and community commitment that this Nation has directed in the past for recovery in the wake of natural disasters. Building the resilience of our natural resources and the communities across this nation that depend on them will take up-front, thoughtful, strategic investment and increased ambition at the local, state and Federal level. This agenda highlights the significant work that’s been done and that will be done to implement the President’s Climate Action Plan and prepare the Nation’s natural resources for the impacts of climate change. It is a historic and important start.

# Appendix A: Strategies and Priority Actions

## STRATEGY I: FOSTER CLIMATE-RESILIENT LANDS AND WATERS

### STRATEGIES AND PRIORITY ACTIONS

Lead Federal Agency and Supporting Agencies

Target Completion Date

Page

#### 1. Resilience Index

- a. In 2015, Federal agencies, to include DOI, NOAA, the Federal Emergency Management Agency (FEMA), the Army Corps of Engineers (USACE), and the Department of Transportation (DOT), will design a framework for a decision-support tool that will provide baseline resilience data and measure the progress of restoration, conservation, and other resilience-enhancing management approaches.
- b. Experts will work toward developing common metrics, monitoring protocols, modeling approaches, and valuation methodologies to establish baseline conditions and provide measures of increased resilience from cost-effective restoration.
- c. This work will link with a broader Community Resilience Index, which FEMA, NOAA and the National Institute of Standards and Technology (NIST) are developing (see Chapter IV), as well as the efforts of the Data and Tools Working Group described in Chapter I.

DOI, NOAA, FEMA, DOT, USACE

Within 2015

19

#### 2. Decision Support Tools for Climate-Smart Natural Resource Management

- a. Within one year, Federal agencies will develop and provide decision-support tools to improve the ability of agencies and landowners to manage for resilience. Examples include:
  - By the end of calendar year 2014, the U.S. Geological Survey (USGS) will initiate, through pilot projects with the Fish & Wildlife Service (and other DOI bureaus if funding permits), production of a tool to help resource managers consider the impacts of management decisions upon carbon stock and flux as well as impacts on resilience and ecosystem services, such as water quality, flood risk reduction, wildlife viewing, cultural heritage, and nutrient cycling.
  - Over the next year, NOAA will deploy new or expanded resilience tools, including a Northeast climate and marine ecosystem dashboard for predicting future conditions; an expanded Coastal Flood Exposure Mapper for coastal states on the East Coast and Gulf of Mexico; a Climate Change Vulnerability Assessment tool for Coastal Habitats; and a new performance support tool for GIS professionals working with agencies and organizations on natural infrastructure planning for coastal resilience.

USGS, FWS, NOAA

Within 2015

## STRATEGY I: FOSTER CLIMATE-RESILIENT LANDS AND WATERS

### STRATEGIES AND PRIORITY ACTIONS

Lead Federal Agency and Supporting Agencies

Target Completion Date

Page

### 3. Identify Landscape Conservation Priorities to Build Resilience

- a. Goal 1 of the *National Fish, Wildlife, and Plants Climate Adaptation Strategy* is to build or maintain ecologically connected network of terrestrial, coastal, and marine conservation areas that are likely to be resilient to climate change and support a broad range of fish, wildlife, and plants under changing conditions. Identifying such priority areas also benefits wildfire management, mitigation investments, restoration efforts, and water and air quality.
- b. Within 6 months, Federal agencies working to address ecosystem management issues through LCCs and other multi-stakeholder bodies will work with partners to select flagship geographic regions for which they will identify priority areas for conservation, restoration, or other investments to build resilience in vulnerable regions, enhance carbon storage capacity, and support management needs.
- c. Within 24 months, these agencies and their partners will have identified and mapped the initial list of priority areas within each of the selected geographic landscapes or regions.

FWS, NOAA

Within Two Years

19

### 4. Fighting the Introduction and Spread of Invasive Species

- a. Within 12 months, the Secretary of the Interior, working with other members of the National Invasive Species Council, including Department of Commerce (NOAA), EPA, and USDA, will work with states and tribes to develop a framework for a national Early Detection and Rapid Response (EDRR) program that will build on existing programs to assist states and tribes in forestalling the stress caused by the establishment and spread of additional invasive species populations, thereby improving the resilience of priority landscapes and aquatic areas.
  - This will include the development of a plan for creating an emergency response fund to increase the capacity of interagency and inter-jurisdictional teams to tackle emerging invasive species issues across landscapes and jurisdictions.

Secretary of the Interior, National Invasive Species Council (DOC/NOAA, EPA, USDA)

Within 12 months

20

## STRATEGY I: FOSTER CLIMATE-RESILIENT LANDS AND WATERS

### STRATEGIES AND PRIORITY ACTIONS

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

#### 5. Evaluate and Learn from Ongoing Resilience Efforts to Inform Future Actions

- a. Within 6 months of the release of this agenda, agencies to include DOI, USDA, NOAA, U.S. Army Corps of Engineers (USACE), Department of Defense (DOD), and EPA will identify programs for resilience evaluation. Such evaluations will include:
- Developing resilience metrics and,
  - Evaluating whether investments produce resilience benefits for the resources and surrounding communities.

**DOI, USDA, NOAA, USACE, DOD, EPA**

**Within 6 months**

**20**

#### 6. Working with International Partners to Foster Resilience in the Arctic, U.S. Territories and Freely Associated States

- a. Federal agencies that have partnered to advance a landscape-scale approach to management, called Integrated Arctic Management, will work closely with the Department of State to promote a suite of community and ecosystem resilience measures as part of the program for the United States Chairmanship of the Arctic Council, a two-year term to begin in April 2015.
- b. DOI will update funding programs to the U.S. Territories and Freely Associated States - islands with acute vulnerability to sea level rise - to enhance climate resilience through the development of climate adaptation plans and other efforts.

**Department of State, DOI**

**April 2017**

#### 1. Improve Inventory, Assessment, Projection and Monitoring Systems for Important Carbon Sinks

- a. USDA, with input from and review by EPA, the State Department, and DOI, will establish a robust capacity to provide projections of greenhouse gas emissions and carbon sequestration from agricultural and forest lands on a biennial basis to support planning, analysis, and reporting under the United Nations Framework Convention on Climate Change.
- b. USDA, with input from EPA and other agencies (DOI, NASA, and NOAA), will reduce uncertainties in land-use related emission and sink estimates in the Nation's annual greenhouse gas inventory and better link these estimates to projections through:
  - Strengthening the collection, coordination and assessment of field inventory data through the Forest Inventory and Analysis (FIA) Program, the Natural Resources Inventory (NRI), and other surveys of terrestrial condition, and
  - Integrating the latest Multi-Resolution Land Characteristics (MRLC) consortium land-cover and land-area change estimates and other surveys of terrestrial condition, as appropriate.
- c. USDA will also work collaboratively with EPA, DOI, and other agencies to address potential missing anthropogenic emissions and sinks in the national greenhouse gas inventory.
- d. USDA will evaluate the current carbon sequestration contribution of Federal grasslands and agroforestry systems (wind breaks, shelter belts, riparian buffers, etc.).
- e. The USGS, USACE, and USDA will support efforts toward completion of the first-ever assessment of the ecosystem carbon stocks and anthropogenic emissions and sequestration rates in Alaska.
- f. NOAA will assess the role that coastal ecosystems play in terms of their anthropogenic emissions and carbon sink potential including an initial assessment of land cover for salt marsh, mangroves, and seagrasses.
- g. All of the above improvements will be consistent with applicable methodological guidelines from the Intergovernmental Panel on Climate Change (IPCC) and reporting requirements under the United Nations Framework Convention on Climate Change (UNFCCC).

## STRATEGY II: MANAGE AND ENHANCE U.S. CARBON SINKS

### STRATEGIES AND PRIORITY ACTIONS

Lead Federal  
Agency and  
Supporting  
Agencies

Target  
Completion  
Date

Page

### 2. Develop Estimates of Baseline Carbon Stocks and Trends to Inform Federal Natural Resources Management

- a. Within 18 months, agencies with Federal natural resource stewardship responsibilities will use the best-available information and methods to develop initial baseline estimates of carbon stocks and trends at local or regionally-appropriate levels for lands and waters within their jurisdiction. Stock and trend information will better enable managers and the public to consider the relationships between carbon storage and other management objectives. Methods will be consistent with applicable methodological guidelines from the IPCC and reporting requirements under the UNFCCC.
- b. By the end of calendar 2015, the USGS will enhance landcarbon.org by covering all 50 states and including a new carbon calculator that allows for interactive tradeoff analysis.
- c. Further, USGS will complete a study for the Greater Yellowstone Ecosystem that examines the effects of protected areas and conservation policies on long-term carbon sequestration.
- d. The USGS, in cooperation with University of California at Berkeley, is also developing a large data management and visualization tool for delivering carbon sequestration data to users at the national scale. This effort, highlighted in the President's Climate Action Plan, focuses on enhancing data delivery and communication using advanced web-based visualization tools. The tool allows users to interactively estimate carbon management tradeoffs in an online and downloadable format.

**3. Promote Forest Conservation and Restoration, Complementary Markets for Sustainably Harvested Wood Products, and Urban Forestry**

- a. USDA and the DOI will provide support for programs that foster forest conservation and retention, and where possible, align these programs around “climate-smart” projects that advance carbon mitigation and adaptation in the context of management objectives. The agencies will incorporate climate resilience evaluation criteria for relevant forest and land and water conservation programs such as the Forest Legacy Program, Land and Water Conservation Fund (LWCF), Community Forest Program, the Agricultural Land Easement Program, Wetlands Reserve Program, and the Healthy Forest Reserve Program.
- b. USDA will also continue to make investments to advance wood in building and wood energy use—bolstering incentives for retaining and restoring forests—through providing life cycle analysis and technical and financial assistance.
- c. Within 6 months, USDA will launch the U.S. Tall Wood Building Competition to spur increased sustainability in construction and will give priority to applicants that source materials from rural domestic manufacturers and domestic, sustainably-managed forests. By some estimates, incorporation of wood building systems in buildings 7-15 stories tall could offset the equivalent of 1.6-2.5 million passenger vehicles off the road for one year, while also supporting healthy forests and rural manufacturing opportunities.
- d. In 2015, the Forest Service will work with the Federal Urban Waters Partnership, states, and local partners to target urban forestry investments that support: increased carbon sequestration; reduced energy consumption and greenhouse gas emissions; enhanced urban air quality; resilience from insects and disease; clean water quality and quantity needs; and bioenergy from urban wood waste to off-set fossil fuel usage.

**USDA, DOI**

**Within 2015**

**29**

## STRATEGY II: MANAGE AND ENHANCE U.S. CARBON SINKS

### STRATEGIES AND PRIORITY ACTIONS

Lead Federal Agency and Supporting Agencies

Target Completion Date

#### 4. Support Forest Conservation and Investment Tax Provisions as a Means to Retain and Restore Forests

- a. The Administration will continue to support key tax provisions for maintaining forest carbon, including provisions such as:
- Deduction for Forest Management Expenses as Means to Retain and Restore America's Forests
  - Tax Incentive for Reforestation
  - Capital Gains Treatment of Timber Income as an incentive to Retain Working Forests
  - Federal Tax Deduction for Conservation Easements

Administration

30

#### 5. Support Voluntary, Incentive-driven Emissions Reductions from Working Agricultural Lands that Provide Co-benefits for Farm Productivity and Resilience

- a. USDA will target Farm Bill conservation programs to provide incentives for voluntary emissions reductions from America's farmers and ranchers that also support other important co-benefits for landowners and the public. While the agriculture sector makes a relatively small contribution to total annual U.S. greenhouse gas emissions, the sector is capable of offering low-cost, verifiable emissions reductions through the voluntary implementation of conservation practices. Many of these conservation practices also improve efficiency and productivity, reduce operation costs, foster resilience for businesses and natural resources, and alleviate pressures on other land-uses.
- b. USDA will improve conservation technical assistance and delivery of practices that reduce emissions and build resilience through programs such as the Environmental Quality Incentives Program (EQIP), the Agricultural Conservation Easement Program (ACEP), and Conservation Innovation Grants (CIG). Specific practices include:
- Prioritizing farming systems and conservation practices that build soil organic matter, increase carbon sequestration, and prevent denitrification;
  - Encouraging practices that reduce methane emissions, especially in livestock systems;
  - Prioritizing conservation easement and restoration programs on lands that currently provide climate and other resilience benefits (e.g., prairie grasslands, wetlands, rangelands)
  - Promoting on-farm energy conservation, increased energy efficiency, and renewable energy production;
  - Encouraging transition to systems that keep the land in sod and other perennial vegetation, and support sustainable rangeland management practices that enhance carbon sequestration; and
  - Partnering with states, farmer groups, the private sector, and non-governmental organizations to facilitate investments in agricultural-based emission reductions that are additional, quantifiable, and verifiable.

USDA

30

## STRATEGY II: MANAGE AND ENHANCE U.S. CARBON SINKS

### STRATEGIES AND PRIORITY ACTIONS

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

#### 6. Assess, Restore, and Protect Coastal Habitats to Understand and Enhance the Storage of Blue Carbon

- a. Improve understanding of carbon storage and cycling in coastal ecosystems:
  - NOAA will generate baseline information on the role that coastal ecosystems play in terms of their emissions and carbon sink potential. This baseline would include an initial assessment of land cover for salt marsh, mangroves, and seagrasses, as well as best estimates of sequestration and storage in these different ecosystem types.
  - NOAA and partners will quantify marsh soil organic carbon content at eight NERRS sites across the United States to fill critical gaps in estimates of current carbon storage across a range of marsh types, and to improve the methodology upon which many of these existing estimates are made.
  - NOAA and EPA, working through the Commission for Environmental Cooperation, will build a North American community of practice for advancing understanding and management of blue carbon ecosystems by supporting the development of methodologies to measure carbon, compile maps, and conduct scientific studies to improve our understanding of the current and future role of coastal systems in the North American carbon cycle.
  - NOAA and EPA will coordinate participation by other Federal agencies with coastal resource management responsibilities in this effort.
- b. Determine the value of protecting coastal habitats to safeguard carbon services:
  - NOAA and FWS, working with other Federal, state, and other partners, will identify and support key restoration projects that can increase coastal blue carbon sinks, both terrestrial and aquatic. For example, NOAA is supporting a pilot demonstration project in Tampa Bay, Florida to demonstrate the value of different blue carbon habitats in different regions of the United States.
  - NOAA will also support up to four local landscape assessments, and associated workshops, on different blue carbon habitats to demonstrate the added benefits of coastal carbon values to specific restoration and protection goals.
  - EPA will build on the pilot project in Tampa Bay – one of 28 National Estuary Programs – and support assessment of GHG benefits associated with carbon sequestration with the goal of sharing algorithms and methods with estuaries that are part of the National Estuary Program.
  - USGS will collaborate with DOI resource management agencies to provide science support for wetland management and restoration actions. As more wetlands are restored and protected, the USGS will be able to measure and estimate the effects of management to enhance carbon sequestration and resilience of the ecosystems to climate change.

**Target Completion Date**

**Page**

**1. Partner with Communities to Enhance Resilience to Natural Hazards Risks**

- a. Strengthen support for state, tribal and local flood preparedness:
  - In 2015, FEMA will strengthen its grant guidance to encourage use of natural infrastructure to reduce flood mitigation risk, while NOAA, USGS, and other agencies will develop tools to support smart development decisions within floodplains and along coasts.
- b. Expand partnerships to reduce wildfire risk and protect community infrastructure:
  - USDA and DOI will restore resilience of priority landscapes where critical resource values are at high risk from wildfire.
  - Advancing the National Cohesive Wildland Fire Strategy, Federal land managers will expand multi-jurisdictional partnerships, such as the Western Watershed Partnership and the Joint Chiefs' Initiative, aimed at reducing hazardous fuels and protecting community water supplies and other critical infrastructure.
  - The Forest Service will partner with states to implement new provisions in the 2014 Farm Bill that reduce threats from wildfire, insects and disease and bolster forest restoration, across all land ownerships.
  - Additionally, through the 21st Century Conservation Service Corps, USDA and DOI will engage nearly 10,000 youth and veterans to accomplish critical restoration work on public lands through watershed restoration, hazardous fuel reduction, and other important projects.

### 2. Address Performance Measurement and Benefits Assessment Challenges to Natural Infrastructure

- a. In 2015, the Administration will address barriers to investment and implementation of natural infrastructure solutions by improving measurement and evaluation of natural infrastructure. All of the following actions address *Hurricane Sandy Rebuilding Strategy - recommendation #22*:
- Develop an Actionable Research Agenda:
    1. The EOP will lead the development of a research agenda to address emerging and persistent methodological challenges and other barriers for the Federal government's integration of ecosystem services into resilience efforts. The research agenda will identify key knowledge gaps, particularly those associated with valuation, and outline needs and opportunities for addressing these gaps.
  - Issue Federal Guidance on Ecosystem Services Assessment:
    1. The Administration will develop guidance to bring high-level visibility and support for the use of ecosystem services assessment methods where appropriate and practicable. By providing this guidance to Federal agencies, the Administration will encourage the use of sound approaches to assessing ecosystem services and integration of assessment into Federal decision making.
  - Launch Natural Infrastructure Tools and Resources Website:
    1. CEQ, NOAA, and USGS will partner with Federal agencies to develop a single web portal that would collect existing online tools and resources on natural infrastructure to support Federal, State, tribal and local decision-makers. This website will leverage other agency and interagency efforts.
  - Conduct Program Evaluation of Resilience Investments:
    1. As noted on page ##, DOI will verify performance metrics and evaluate the performance of \$300 million in Hurricane Sandy Supplemental resilience investments, which includes \$100 million in external grants for natural infrastructure and other nature-based solutions.
    2. NOAA is also providing \$300,000 toward a trade-off analysis to develop estimates of the economic value associated with Sandy-related restoration work. This will inform future Federal community resilience investments in natural infrastructure.

EOP, CEQ, NOAA, USGS, DOI, Administration

**3. Expand Collaboration and Technical Assistance to Help Communities Implement Green Infrastructure for Stormwater Solutions**

- a. EPA, along with HUD, DOT, USDA, DOI, DOD, and DOE recently announced the development of a broad-based, multi-sector Green Infrastructure Collaborative. The Collaborative will help communities better manage stormwater and more rapidly adopt low impact development techniques. In support of this initiative, in 2015 EPA will provide technical assistance to at least 25 communities while also disseminating information to support local adoption of such stormwater practices. This initiative will:
  - Provide on-the-ground support to communities to more fully realize their green infrastructure objectives;
  - Create a network of public, private, and NGO participants to leverage the full range of information and resources;
  - Align Federal resources to help local communities integrate green infrastructure planning into broader community development efforts, including through transportation systems (e.g., complete streets) and parks/open spaces;
  - Provide tools and training for communities to build local capacity around resiliency and sustainable water infrastructure;
  - Recognize innovative green infrastructure projects and foster information sharing about innovative approaches;
  - Lead by example by installing and supporting green infrastructure to demonstrate the suite of benefits that these approaches can provide; and
  - Create a network of organizations that can mobilize resources and develop the strategies for implementing green infrastructure for a range of community objectives.

**EPA, HUD, DOT, USDA, DOI, DOD, DOE**

#### 4. Promote Drought Resilience and Enhance Water Use Efficiency, Water Reuse and Water Supply

- a. Federal agencies will work with communities to protect and extend limited water supplies; actions include:
- USDA will invest in irrigation efficiency and management strategies to address groundwater depletion and will improve drought and snowpack monitoring.
  - The EPA WaterSense program will increase the efficient use of water so that the greenhouse gas reductions resulting from the reduced use of energy to move and heat water increase from 7 million metric tons of CO2 equivalent per year in 2011 to 23 million metric tons per year in 2018.
  - USACE will incorporate climate considerations into water reallocation strategies.
  - Bureau of Reclamation will continue to incorporate climate change considerations throughout its programs and policies as it carries out its mission to develop, manage and protect water and related resources in an environmentally and economically sound manner. Reclamation's WaterSMART Program is well positioned to address near-term impacts of climate change via the competitive grants provided to non-Federal partners under the program. The Basin Study component of the WaterSMART Program provides an effective process through which Reclamation will continue to work with study partners to identify and develop adaptation strategies to meet future water supply needs. In addition to this effort, Reclamation will assist its study partners with the technical expertise, planning support, science, and tools needed to advance adaptation strategies that can be implemented by non-Federal stakeholders.
  - USGS will begin a series of projects to understand the impacts of drought on fish and wildlife species.
  - In 2015, NOAA's National Weather Service National Water Center, with partners, will begin development of a national water model that will improve water prediction capability to optimize communities' use of increasingly limited water resources.
  - In 2015, USDA will use Farm Bill programs to support conservation practices and technologies that build drought resilience. Through planned research, USDA will also enhance food security through analyzing improved crops and plant breeding tools with increased resilience to heat and drought, developing systems to model and test climate change scenarios' impact on animal, food, and waterborne diseases and pests; and by researching drought impacts to nutritional composition and quality of food.
  - The interagency National Integrated Drought Information System (NIDIS) will work to broaden its regional drought early-warning information capabilities in partnership with Federal agencies, states, tribes, and communities across the Nation.

USDA, EPA,  
USACE, DOI,  
NOAA, NIDIS

2015-2018

**5. Establish Federal Agency Support Teams for Climate Resilient Water Resources Based on the WestFAST Model**

- a. Federal agencies will work with state, tribal and local partners to identify appropriate regional associations dealing with water resources management and develop Federal agency support teams, comparable to the existing WestFAST partnership wherein Federal agencies embed a dedicated Federal liaison to work with the Western states on issues of common concern. This highly efficient approach saves both Federal and state partners time and money and ensures that a high level of coordination takes place.

**43**

**6. Build Regional Capacity for Natural Resource Disaster Recovery and Restoration in the Pacific Islands**

- a. Within 18 months, NOAA, USGS, and FWS will produce a regional handbook for natural resource and emergency managers for the Pacific Islands Region. Developed in collaboration with Pacific Islands partners, the handbook will document recent policy and capacity developments and lessons learned to address challenges associated with managing natural resources in the context of more frequent and severe extreme events.

**NOAA,  
USGS, FWS**

**Within 18  
months**

**44**

**7. Strengthen the Resilience of Coastal Resources and Communities to Extreme Events**

- a. In 2014, NOAA will launch new coastal resilience research projects to provide coastal communities and businesses with better information and tools to identify risks and increase resilience, and in 2015, proposes to create a new competitive grants program to fund collaborative projects that increase coastal communities' and economies' resilience.
- b. In coordination with USACE and other relevant Federal agencies, NOAA will provide resources and technical assistance to state, tribal, local, and private sector partners to enhance the use of natural infrastructure to address storm surge, sea-level rise, and other stressors on coastal communities and ecosystems; NOAA plans to pilot a water-level inundation "dashboard" to facilitate decision-making concerning flooding and storm events through scenarios that include how the flooding will impact the natural and built environment.

#### 8. Prepare for Climate Impacts on Fish Stocks and Fishing-dependent Communities

- a. In 2015, NOAA will help fishing-dependent communities prepare for climate impacts on fish stocks by:
- Completing climate vulnerability assessments for major commercial and recreational marine fish stocks;
  - Helping communities undertake risk assessment and adaptation planning;
  - Conducting collaborative research on climate variability and change on fish stocks and fisheries in the U.S. Northeast Shelf Large Marine Ecosystem; and,
  - Establishing Resilient Fishing Communities Demonstration Projects to provide technical assistance to fishing-dependent communities in risk assessment and adaptation planning.
- b. NOAA also proposes to increase investment in its Ecological Forecasting Roadmap to include resilience related activities, such as connecting how living marine resources respond to changes in coastal and marine habitats, and to launch a new coastal ocean acidification modeling initiative to help resource managers and coastal communities better understand and prepare for impacts of changing chemical conditions on commercially important fishery species.

NOAA

Within 2015

#### 9. Foster Innovation and Recognize Leadership

- a. Prize competitions
- Under the authority of the America Competes Reauthorization Act of 2010, the Administration will provide incentives and opportunities for the private sector and public to share creative solutions to natural resource and community resilience challenges through one or more prize competitions focused on flooding, storm surge, wildfire, drought, or other key challenges
  - Within six months, USDA will launch a U.S. Tall Wood Building Competition to spur use of sustainable forest products in construction
  - In 2015, Bureau of Reclamation will launch its Water and Power Solutions Technology Challenges program, including a water purification technology challenge
- b. Leadership awards
- To point to success and encourage replication of climate smart practices, the Administration will also establish a Climate Resilience Leaders award to recognize Federal, tribal, state, and local leadership in advancing the resilience of natural resources and the communities that depend on them.

**STRATEGY III: ENHANCE COMMUNITY PREPAREDNESS AND RESILIENCE BY UTILIZING AND SUSTAINING NATURAL RESOURCES**

**STRATEGIES AND PRIORITY ACTIONS**

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

**Page**

**10. Provide Policies, Data, and Tools to Facilitate Smart Restoration and Conservation Investments**

- a. Develop a community resilience index
  - In 2014, FEMA will begin work with NOAA, NIST, and insurers to identify or develop a community resilience index that considers environmental, economic, and social resilience. This work will focus on economic and social components, in particular infrastructure, and will incorporate data and ecosystem information developed through DOI and NOAA efforts to measure progress on resilience through restoration. By 2015, this work will produce a set of key indicators and an initial index methodology for implementation.
- b. Implement modernized Principles, Requirements, and Guidelines (PR&G) for Federal investments in water resources
  - Under the new PR&G, agencies will evaluate the full range of costs and benefits of proposed actions, to more broadly consider how water resource investments impact the economy, environment, and local communities. By considering the environmental impacts of proposed actions, this improved approach to cost benefit analysis will better account for the benefits nature-based solutions provide. The Administration is nearing the implementation of the new PR&G, to the extent permissible under current law.
  - In 2014, the Administration will release Interagency Guidelines (IG), followed by the finalization of Agency Specific Procedures to implement the PR&G. Agencies will lead an effort in 2015 to fully implement these modernized criteria for climate-resilient water resource investments.

**STRATEGY IV: MODERNIZE FEDERAL PROGRAMS, INVESTMENTS, AND DELIVERY OF SERVICES TO BUILD RESILIENCE AND ENHANCE CARBON SEQUESTRATION**

**STRATEGIES AND PRIORITY ACTIONS**

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

**Page**

**1. Modernizing Federal Programs:**

- a. Incorporate resilience into natural resources planning and management:
  - Within 12 months, Federal agencies with natural resource responsibilities or whose activities impact natural resources will develop best practices for applying resilience criteria to program management, practices, training, and investments, and institute policies that ensure such practices are implemented.
- b. Modernize land acquisition, and natural resource financial assistance programs to address resilience needs:
  - Within 12 months, Federal agencies that administer these programs will develop best practices for applying resilience criteria to them, and develop policies for implementing these practices.
- c. Implement policies, procedures, and performance metrics for considering biological carbon in Federal natural resource management practices:
  - In addition to actions outlined in Chapter #, , within 12 months Federal land, water and coastal management agencies will develop agency-specific principles and guidance for considering biological carbon in management and planning decisions. Such guidance shall acknowledge the importance of sustaining long-term ecosystem function and resilience over short-term accounting for carbon changes, consider carbon within the context of other management objectives and ecosystem service goals, and integrate carbon considerations as part of a balanced and comprehensive program of sustainable management and climate change adaptation.
- d. Lead by example at Federal facilities:
  - Federal agencies will lead by example by employing best practices in ensuring resilient natural systems and built infrastructure at Federal facilities and lands.
  - Within 12 months, each Federal agency will identify a small number of exemplary facilities and resource management activities that demonstrate cutting edge resiliency efforts, such as use of natural infrastructure, documenting the "best of best practices".
  - Where appropriate, Federal agencies will enhance their visitation, education, and outreach activities to encourage emulation of these practices more broadly in the public and private sectors.
- e. Status update:
  - Within 12 months, Federal agencies will provide the Council on Climate Preparedness and Resilience with a status update on progress-to-date in modernizing programs as described above.

**Within 12 months**

**STRATEGY IV: MODERNIZE FEDERAL PROGRAMS, INVESTMENTS, AND DELIVERY OF SERVICES TO BUILD RESILIENCE AND ENHANCE CARBON SEQUESTRATION**

**STRATEGIES AND PRIORITY ACTIONS**

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

**Page**

**2. Provide Regional Resilience Information and Services to Meet the Needs of American Communities**

- a. Within 12 months, NOAA, USDA, and DOI, in coordination with other Federal agencies that support regional resilience, will improve customer service by providing an online "front door" to the array of regional information, services, and tools available, using the National Climate Assessment regions as a consistent framework or "inroad" for communities and the public.
  - These agencies will also develop a networked approach whereby access to any one agency's regional services will provide a clear path to the others. This will include an online directory of regional experts, services, and tools. This work will include coordinated development of priorities and plans for investments in research and tools in each region that will assure effective use of limited resources.
- b. Within 12 months, each USDA Hub will pursue a set of partnerships with Cooperative Extension university partners and other stakeholders to better understand the local and regional challenges posed by climate change and to develop and deliver guidance on climate resilient management strategies to farmers, ranchers and other landowners.
- c. In 2015, NOAA plans to increase support for its RISA teams who work with resource managers and planners to develop and utilize new information about the impacts of climate on communities, natural and managed resources, infrastructure, transportation, and health. Two new regions, the Mid-Atlantic and the Midwest, adding to the current number of eleven, would be competitively awarded funding under this augmentation.

**NOAA, USDA, DOI**

**Within 12 months**

**52**

**3. Identify Science and Service Regional Priorities to Build Resilience**

- a. By early 2015, following the methods of drought outlook forums convened by NIDIS, NOAA, USDA, and DOI will convene at least three regional collaborative discussions with resource managers, decision-makers, and others, to identify and anticipate science and service priorities in light of unfolding climate related events, such as droughts and floods resulting from the potential El Niño, or disasters such as Atlantic hurricanes and tropical storms.
- b. Partners will work collaboratively to develop tools, provide information and planned engagement, and inform investment around these unfolding climate-related events.

**STRATEGIES AND PRIORITY ACTIONS**

**Lead Federal Agency and Supporting Agencies**

**Target Completion Date**

**Page**

**4. Train Inform Resource Managers and Stakeholders on Climate Resilience**

- a. By 2015, NOAA, USDA, and DOI, in cooperation with other Federal agencies, will define a framework for education and training to build climate literacy and capability among relevant Federal agency staff and technical service providers, such as planners, engineers, and consultants.
  - The framework should include assessing climate literacy in Federal agencies, and developing partnerships with non-profit or professional groups to promote climate resilience outreach, education, training, certification, and engagement of academic training capability.
- b. In 2014, a coalition of Federal and State agencies and nongovernmental partners released a *Climate Smart Conservation Guide* to safeguarding vital natural resources in a changing climate.
  - The guide provides natural resource managers with state-of-the-art information and tools to assess risks and design effective resource management efforts that incorporate and respond to climate-related changes in U.S. ecosystems.
  - Over the next year and beyond, the guide will be used by the FWS National Conservation Training Center to train hundreds of natural resource managers across the country in climate smart conservation.
- c. Building off these efforts, Federal natural resource agencies will work to enhance their efforts to integrate climate information and communications into place-based stewardship.
  - This will provide enhanced and informed visitor education on the impacts of climate change upon the lands and waters managed by the Federal government, including National Parks, National Wildlife Refuges, National Forests, National Marine Sanctuaries, and other sites which collectively receive 938 million visits a year.
- d. In 2014, the National Park Service will complete development of a Natural Resource Career Field Academy online climate change module to help resource professionals understand key climate change related issues and explore adaptation and planning options.

**5. Prepare Indigenous Communities for the Impacts of Climate Change**

- a. DOI will place five tribal Climate Extension Support Liaisons in the Climate Science Centers, as part its Federal Tribal Climate Resilience Partnership and Technical Assistance Program
- b. The five regional tribal liaisons will also support tribal workshops, practitioner working groups, and regional training needs. Liaisons will be contracted to tribal organizations to ensure strong ties to tribal practitioners and further enhance tribal capacity
- c. Within 12 months, the USDA-Forest Service will develop at least one flagship tribal partnership in every Forest Service Region, to develop and implement climate adaptation strategies for tribal lands and adjacent National Forests
- d. In 2015, NOAA proposes to increase efforts to provide fisheries and other decision makers in the Alaska region with information on climate impacts on major fish stocks and protected species, and implement a distributed biological observatory to improve understanding of how climate and human-induced change are affecting subsistence cultures and the environment in the Arctic

## Week Ahead + Items of Note

1 message

**Beyer, Emily** <emily\_beyer@ios.doi.gov>  
Bcc: doi\_opa\_bureau\_contacts@ios.doi.gov

Fri, Oct 17, 2014 at 6:20 PM

On October 23, Secretary Jewell will provide keynote remarks at the National Workshop on Large Landscape Conservation (LCC) in Washington, D.C., where conservation practitioners and policy makers will discuss opportunities for implementing large landscape conservation. During her remarks, Jewell will likely discuss the new LCC Network strategic plan (an internal document that articulates goals, objectives and example tactics for the next five years), which was released last week, as well as highlight the Priority Agenda for Climate and Natural Resources, recently released as part of the President's Climate Action Plan. The event is open press.

On October 22-24, Deputy Secretary Connor will attend the Alaska Federation of Natives (AFN) Convention in Anchorage, AK. It is anticipated that there will be more than 4,000 attendees at the AFN convention. The remarks are open press, and Interior may issue a press release following his remarks. Connor also is scheduled to attend a ceremony where he will sign land conveyance patents transferring over 10,000 acres to the Nunamiut Corporation, Inc., the ANCSA corporation for the village of Anaktuvuk Pass in the Gates of the Arctic National Park. This is the only ANCSA village corporation with lands entirely within the boundaries of a National Park. The ceremony is open to the press, and BLM-Alaska may issue a press release following the event.

# **WEEKLY REPORT**

**October 13-17, 2014**

***PRIVILEGED AND CONFIDENTIAL***

**WEEK-AHEAD REPORT: NATIONAL PARK SERVICE  
October 15 – October 24, 2014**

**Highlights of Travel, Meetings, and other Public Events**

*Legislative Testimony:*

None.

*Meetings:*

None.

*Travel:*

October 18, Deputy Director Christy Goldfuss will speak in the place of Director Jarvis, who was invited to participate at a Chicago Ideas Week session entitled "Places and Spaces: Location, Location, Location." Her remarks will focus on the role of NPS in telling America's stories through place.

October 17, Associate Director for Visitor and Resource Protection Cam Sholly will replace Director Jarvis, who was scheduled to participate on a panel with other land management agency and organization leaders at the National Wilderness Conference in Albuquerque, NM.

October 20, Jon will participate in an NPS workshop on Envisioning Biodiversity Conservation and Discovery in the 21st Century. Director Jarvis and Harvard professor EO Wilson will discuss next steps to advance biodiversity, conservation and discovery beyond the Call to Action at the American Horticultural Society in Alexandria, VA.

**Public Announcements**

**October 15**

October 4-19, The Wilderness Inquiry Canoemobile will be delivering programming along the Lower Delaware River and its tributaries. Canoemobile is a fleet of vans, each with six 24' Voyageur canoes, that delivers place-based education on urban rivers and waterways nationwide. As many as 2,400 minority and underserved youth in the four largest cities along the Lower Delaware River (Camden, NJ; Philadelphia, PA; Chester, PA; and Wilmington, DE) will experience, enjoy, and learn about the Delaware and its tributaries. A second Canoemobile fleet is visiting the Harlem River and other locations in New York City from October 6th through 17th.

On or around October 15, sand replenishment is scheduled to begin at Riis Beach in the Jamaica Bay Unit of Gateway National Recreation Area (NY). The park, in conjunction with the National Parks of New York Harbor (NPNH), plans to do a news release with photo and possibly a video clip. Media interest will likely involve local outlets such as the Rockaway Wave and the Rockaway Times. There is a reporter from the New York Daily News whose beat is Jamaica Bay, and has covered the park on numerous occasions. The Rockaway Times editor has already raised questions as to why the NPS is not doing additional sand replenishment at Fort Tilden. The Army Corps of Engineers notes that there is a proposed media event by Rep. Gregory Meeks (D-NY-5) focusing on the sand replenishment on the Rockaway beaches managed by New York City Parks and Recreation. There may be substantial news interest, which could include local network affiliates, NY 1, the New York Times and New York Post.

On October 15, the NPS will participate in events celebrating National Fossil Day. The flagship event is being hosted by the Smithsonian Museum of Natural History. National Fossil Day promotes awareness and

stewardship of fossils, and fosters greater appreciation of their value. More than 185 partners in 48 states, including museums, federal and state agencies, fossil sites, universities, and professional organizations, are joining forces to support this nationwide celebration.

#### October 16

Nothing to report

#### October 17

Nothing to report

#### October 18

On October 18, Big Bend National Park (TX) will host a Good Neighbor Day event inviting many local school children as part of a National Park Foundation-funded *Ticket to Ride* grant. The park is expecting 500-700 children at the event.

On October 18 and 19, the White House will open its gardens and grounds to visitors from 10:00 am to 4:30 pm. Visitors can see the Jacqueline Kennedy Garden, Rose Garden and South Lawn of the White House. The White House Kitchen Garden – the first vegetable garden at the White House since Eleanor Roosevelt’s Victory Garden – will be accessible to guests. NPS will distribute free, timed tickets on a first-come, first-served basis on each tour day.

#### October 19

Nothing to report

#### October 20

Nothing to report

#### October 21

On October 21 and 27, public meetings and workshops will be conducted for the feasibility study on The September 11<sup>th</sup> National Memorial Trail (PA). The September 11th National Memorial Trail will provide a physical linkage for the three memorials commemorating the 9/11 events at the Pentagon, the Flight 93 crash site, and the World Trade Center. The northern Pennsylvania trail route from the Delaware River to the Flight 93 National Memorial and the Great Allegheny Passage will span 300 miles, connecting communities, significant sites, and local memorials along the way.

#### October 22

On October 22, there will be an announcement and celebration of the listing of New York State Barge Canal on National Register of Historic Places. Erie Canalway National Heritage Corridor (ERCA) was the preparer of the nomination after years of research and preparation. ERCA has a very strong history and relationship with the NPS.

On October 22, a public meeting is scheduled for the Kennedy Center Expansion Project Environmental Assessment. The expansion will facilitate greater pedestrian and bicycle access to and from the Kennedy Center, the National Mall, the Rock Creek Paved Recreation Trail, and the Potomac River waterfront.

## October 23

On October 23, a public scoping meeting to identify locations for a proposed Peace Corps Memorial in the National Mall and Memorial Parks/Rock Creek Park (DC) will be held. The Peace Corps Commemorative Foundation (PCCF) has been authorized to establish a permanent memorial commemorating the founding of the Peace Corps and its ideals. The NPS and the PCCF are preparing an Environmental Assessment (EA) to identify potential sites and to assess the potential impacts from the overall proposal. A 30-day public scoping focused on site selection is currently underway and will close November 11, 2014.

## October 24

On October 24 and 25, a public workshop and meeting are scheduled as part of a resource study for the potential expansion of the Lewis and Clark National Historic Trail (NE). The meeting will be held at Natural Bridge, Virginia, to review and collect feedback from participants regarding Trail extension feasibility criteria specific to Botetourt, Rockbridge, Augusta, and Albemarle Counties in Virginia. The meeting and workshop are being held as a follow up to public workshops held at Natural Bridge in March 2012. Considerable participation by interested members of the public, Trail extension advocates, elected officials, and public employees is anticipated at the events.

## October 25

On October 25, 2014, Abraham Lincoln Birthplace National Historical Park (KY) will hold a groundbreaking ceremony for facility improvements at the Boyhood Home unit, also known as Knob Creek. This is the first major improvement to that unit since the property was donated to the NPS in 2001. The land was acquired by private and public entities using money donated by individuals and organizations in the community and funds from the Commonwealth of Kentucky.

## **Major Press Inquiries**

### Everglades National Park (FL) -

- Greenwire Articles on Park Issues. In the next few weeks, Greenwire will publish feature stories on the invasive exotic fish problem in the park, and on fire management and prescribed burns in the park.
- Web Film Featuring Park Firefighter. A production company recently filmed a short web video for a series called, *Unsung: A Day in the Life of Hard Work* that will feature Everglades National Park firefighter Katherine Corrigan. It will be available to the public sometime in late November.
- New York Times Article on Historic Nike Missile Site Tour. The New York Times is planning a travel story highlighting the Historic Nike Missile Site tour in Gateway National Recreation Area (NY). It is expected to run in December.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

**Court Decision on Taser Incident in Golden Gate National Recreation Area** – On Friday, October 9, the United States District Court of Northern California released their opinion on Gary Hesterberg v. United States of America. The Court found in favor of Mr. Hesterberg and awarded \$50,000 in damages. The NPS, DOI Solicitors and DOJ are reviewing the court's decision. The Park received several media inquiries but gave no comment as the decision is still under review. On January 29, 2012, Mr. Hesterberg was tased by an NPS ranger as a result of 3 violations: 1) failure to obey a lawful order, 2) providing false information, and 3) walking his dogs off-leash in a national park where leashes are required.

**Colorado National Monument (CO) – Facilitated Public Meetings Held Regarding Public Safety Concerns on the East Hill.** The National Park Service sponsored two community public meetings during the week of October 6 in Glade Park and Grand Junction, CO to discuss overall safety concerns, including the transporting of fuel and/or hazardous materials on the East Hill road inside Colorado National Monument. A report of the comments from the meetings will be finalized mid-November. The East Hill road and the access it provides residents beyond the monument, along with their commercial traffic deliveries, has roots in a decades-long conflict and a 1986 court decision, *Wilkenson v. DOI*. Dave Wilkenson, the brother of the man who

brought the lawsuit, attended both public meetings and handed out literature about the lawsuit and residents' rights to their road at the entrance areas of the meeting venues. At the Grand Junction, CO, meeting, Mr. Wilkenson was asked by non-NPS staff at the convention center meeting location to stand outside in the venue's designated First Amendment area where literature is allowed to be distributed. The local newspaper is investigating this, asking if individual rights were being denied and by whose authority Mr. Wilkenson was asked to leave the premises.

**\$75.5 million in LWCF State and Local Assistance Grants Awarded** – In FY 2014, the LWCF State and Local Assistance Program awarded \$75.5 million in grants for 350 new projects and increased support for 20 existing projects to support the development or acquisition of public lands for close-to-home outdoor recreation opportunities. In partnership with the States, the NPS funded projects ranging from the development of a \$10,000 playground in a local park in Jackson, MO to the \$1.1M acquisition of 19 acres on Barnegat Bay in Brick Township, NJ to create a marina.

**Everglades National Park (FL) - Fire Management Plan Environmental Assessment.** On October 27, a new Fire Management Plan / Environmental Assessment will be released for a 30-day public comment. Current fire management is based on the existing 1995 Fire Management Plan. A new plan is needed to implement all current policies and requirements for managing fire in National Park System units.

**Kennedy Center (National Mall and Memorial Parks) – Release of Environmental Assessment** – The NPS, The National Capital Planning Commission, and the John F. Kennedy Center for the Performing Arts (Kennedy Center) have released an Environmental Assessment and are accepting comments from the public on the environmental impacts of a proposal to expand the Kennedy Center and provide greater pedestrian and bicycle access to and from the Kennedy Center, the National Mall, the Rock Creek Paved Recreation Trail, and the Potomac River waterfront. Comments are being accepted through November 10, 2014.

**Glen Canyon National Recreation Area (UT/AZ) – Consultation with Navajo Nation Regarding Access to Antelope Point.** NPS staff has been consulting with the Navajo Nation since late 2012 regarding access within the joint Antelope Point Project area for all Commercial Use Authorization (CUA) holders. Glen Canyon NRA and the Navajo Nation developed a Memorandum of Agreement (MOA) that was signed by the Regional Director. The MOA will provide access to Antelope Point to all CUA holders, consistent with the Glen Canyon NRA Commercial Services Plan, terms of the concession contract, and Antelope Point project agreements in place. This MOA will provide consistency in business practices throughout Glen Canyon NRA, resulting in improved visitor services, increased opportunities for locally-owned businesses (including Navajo owned businesses), and additional employment opportunities for Navajo Nation tribal members in the area. It will also allow Navajo Nation the opportunity to better regulate and benefit from the increased business to Antelope Point. The Navajo Nation President has not yet signed due to political issues within the Tribe and concerns raised by the concessioner. The NPS is preparing a letter to the Navajo Nation President requesting his signature and implementation of this MOA.

**Glen Canyon National Recreation Area (UT/AZ) – Submittal of Notice of Availability for Off-road Vehicle Management Plan.** The Glen Canyon Off-road Vehicle Management Plan and Final Environmental Impact Statement (Plan/FEIS) analyzes a range of alternatives and actions for managing off-road use of motor vehicles and on-road use of off-highway vehicles (OHVs) and street-legal all-terrain vehicles (ATVs). The Plan/FEIS assesses the environmental impacts that could result from continuing current management (the no-action alternative) or implementing any of the four action alternatives. The recommended action in the final plan would allow OHV/ATV use on 7 miles of road presently closed to OHV/ATV use. These seven miles would complete a loop on an existing roads network on NPS and BLM lands. Local and national interest in the Plan/FEIS is expected.

**Cape Hatteras National Seashore (NC)** – In October, a Notice of Intent for a county prepared EIS for beach nourishment near Highway 12 is expected to be published in the Federal Register. The Seashore has received a

permit application from Dare County, NC, to conduct beach nourishment activities to mitigate erosion near Highway 12, which runs the length of the Seashore. To determine if a Special Use Permit can be issued, the County is preparing an Environmental Impact Statement (EIS) for the NPS. The application and EIS process are expected to receive local media coverage and stir controversy. There are strongly differing views about the proposed activity – some local residents are concerned that the highway will be damaged prior to completion of the EIS, and conservation groups are concerned about the precedent being set that beach nourishment may occur in a National Seashore. The North Carolina delegation has been briefed.

**Gates of the Arctic National Park and Preserve (AK) – GMP Amendment EA.** On October 29, the General Management Plan Amendment / Environmental Assessment is slated for release for a 60-day comment period. The plan updates the park's 1986 GMP, and includes direction on wilderness and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement and ongoing tribal consultation and state engagement. Public meetings will be held in Anchorage, Fairbanks (a public hearing, per ANILCA), and Anaktuvuk Pass, plus several other venues tied to other related meetings.

**Lake Clark National Park and Preserve (AK) – Finding of No Significant Impact (FONSI).** The Lake Clark National Park and Preserve General Management Plan Amendment/Environmental Assessment should be signed soon. The plan updates the park's 1984 GMP, and includes direction on wilderness, coastal, and backcountry management, commercial services, and visitor opportunities. The project included multiple phases of public involvement, open houses, and ongoing tribal consultation and state engagement per Section 1301 of ANILCA. Public meetings held in February and March at several cities and villages near the park were lightly attended.

**Potomac Heritage National Scenic Trail (POHE)/Washington-Rochambeau Revolutionary Route National Historic Trail Multi-Bureau Trailhead Dedication** – On November 1, 2014, the NPS and local, regional, state and federal agency partners (BLM is the lead agency), will dedicate a new trailhead, parking area, and orientation kiosk at BLM's Meadowood Special Recreation Management (SRMA) area on Mason Neck in southern Fairfax County, VA. The kiosk will serve as a prominent trailhead within the POHE network and along the Washington-Rochambeau Revolutionary Route. The project increases opportunities for close-to-home outdoor recreation, history lessons, and large landscape conservation. It was funded from the state/federal Transportation Enhancements Program, POHE Operations, and the NPS National Capital Region Federal Lands Transportation Program; and managed by the FHWA Eastern Lands Highways Division.

**Great Sand Dunes National Park and Preserve (CO) – Public Scoping for Ungulate Management Plan.** On November 2, a public comment period on draft preliminary alternatives for the Ungulate Management Plan/EIS will close. Two public open houses have been held and park staff is also making formal presentations to agencies, organizations and groups throughout the San Luis Valley. The final plan will determine the appropriate future management of bison and elk within the park and preserve. Elk and bison are currently on the landscape; elk range throughout and bison are owned and managed by The Nature Conservancy (TNC) on the Medano Ranch, an inholding within the park. In addition to a no-action alternative, the park is considering three action alternatives. Bison options under consideration include no bison, retention of a smaller number of the existing bison owned by TNC, and introduction of a small conservation herd of outside origin. Elk management options include the use of non-lethal tools and limited lethal removal for dispersal and population reduction purposes. There is interest in this planning effort from TNC, Colorado Parks & Wildlife, Colorado Department of Agriculture, and the US Fish & Wildlife Service. The park is working closely with these entities. A key consideration in this effort is wilderness and potential impacts. More than eighty percent of the park and preserve are either designated or proposed wilderness. Minimum requirements analysis will be done for all alternatives.

**Natchez National Historical Park (MS) – Collection Management Center.** A Cooperative Agreement has been signed that creates the Natchez Collection Management Center inside the nonprofit Historic Natchez Foundation building in Natchez, MS. In accordance with the Southeast Region's Museum Storage Strategy, this multi-park storage facility will accommodate museum collections from several at-risk parks along the Gulf Coast under the oversight of the Natchez National Historical Park museum curator. Gulf Islands National Seashore will begin to move museum collections into the facility by the end of the 2014 calendar year.

### 30-60 Day Look Ahead

This fall, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between the NPS and Indian tribes and subject to annual permits. Appropriate levels of NEPA and NHPA review and compliance would be required. Collection for commercial uses would be prohibited. This rule change would provide reasonable, resource protection based use of park resources while assisting in support of the continued lifeways of American Indian tribes. National tribal consultations indicate that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

On October 28, the Collier County Commission is issuing a proclamation to highlight the spirit of cooperation that enabled the creation of Big Cypress National Preserve (FL) as the National Park Service's first national preserve on October 11, 1974. In honor of the Preserve's 40<sup>th</sup> Anniversary, the day will be used to announce other events commemorating the anniversary. These include the *Big Cypress Birthday Bash*, a fund-raising event hosted by the Preserve's non-profit partner, the South Florida National Parks Trust, on Friday, December 5, and the 4th annual *Big Cypress Swamp Heritage Festival* on Saturday, December 6.

This fall, Grand Canyon National Park (AZ) expects to issue the Backcountry Management Plan/Draft Environmental Impact Statement (Plan/DEIS) for public review and comment. The Plan/DEIS addresses management of over 1.1 million acres of the park's backcountry, most of which is proposed for wilderness designation. The Plan/DEIS is needed to address immediate backcountry issues and provide an adaptable framework to manage backcountry use into the future while protecting natural and cultural resources. Public scoping including public meetings occurred in 2011 and agency and tribal consultation has been on-going.

In late fall, the NPS and the Federal Aviation Administration (FAA) plan to publish a joint Notice and Request for Public Comment in the Federal Register announcing an incentive for air tour operators utilizing quiet aircraft technology at Grand Canyon National Park (AZ). Air tours are conducted over the park under limited allocations determined and distributed by the FAA. Under the incentive operators would not be required to use allocations for flights conducted with quiet technology aircraft in the popular Dragon-Zuni flight corridor from January through March. The 2012 Moving Forward for Progress in the 21<sup>st</sup> Century Act (MAP-21), P.L. 112-141, requires the NPS and FAA to work together to develop incentives for Grand Canyon air tour operators who convert to quiet aircraft technology provided that the cumulative impacts of the incentives do not increase noise at the park. On November 5, 2014, Director Jarvis and principals from other Federal agencies will hold the Bi-annual Federal Interagency Council on Outdoor Recreation (FICOR) meeting at the Main Interior Building. Director Jarvis will become chairperson of FICOR for the next two years. The meeting will focus discussions on issues relating to coordination, outdoor recreation, and the future direction of FICOR.

On November 20, proposals are due in response to a business opportunity to operate overnight accommodations, food and beverage, retail service, fuel and auto services, and other related services within Yosemite National Park (CA). The new 15-year contract is scheduled to begin on March 1, 2016. This is the park's primary concession operation and the largest concession contract in the NPS.

## **FWS SECRETARIAL WEEK-AHEAD REPORT**

**Oct. 15, 2014**

### **Highlights of Travel, Meetings and other Public Events**

Oct. 15-19: National Wilderness Conference will be held in Albuquerque, N.M., celebrating the 50<sup>th</sup> anniversary of the Wilderness Act. Field activities are planned for attendees. FWS will also host activities for the 50<sup>th</sup> anniversary Get Wild Festival scheduled during the conference (Oct. 18) at Albuquerque's Civic Center Plaza. Outreach planned. R2

Oct. 15-17: FWS Assistant Director-Fish and Aquatic Conservation will represent FWS at the Sportfishing Summit hosted by the American Sportfishing Association. The summit is one of the leading policy meeting gatherings of the nation's recreational fishing leaders from private industry, government and non-governmental organizations. HQ

Oct. 15-16: FWS staff and private lands conservation practitioners working on greater sage-grouse conservation are meeting in Denver, CO, to promote an integrated and efficient approach to conserving sage-grouse on private lands. Partners for Fish and Wildlife program biologists and state coordinators, Ecological Services collaboration biologists, and project leaders from refuges with sage-grouse as a priority species will attend. R6

Oct. 16: The FWS Midwest Regional Director will participate in the grand opening celebration and ribbon cutting of the visitor center at Port Louisa National Wildlife Refuge (NWR) in Wapello, IA. The building is LEED gold certified. R3

Oct. 19-22: FWS' Southeast Regional leadership team will participate in the Southeastern Association of Fish and Wildlife Agencies' fall meeting in Florida. They will meet and work with state directors from 15 southeastern states and the Caribbean to advance progress on several conservation partnerships with SEAFWA including the region's At-Risk initiative and Gulf restoration. R4

Oct. 20: The Midwest Regional Director will participate in a signing event in Ogema, MN, to commemorate the completion of a joint memorandum of understanding between Tamarac NWR and the White Earth Nation pertaining to conservation law enforcement activities occurring on the refuge. R3

Oct. 21: A tour of at the Laguna Atascosa NWR is planned for staff of Rep. Filemon Vela (D-TX 34<sup>th</sup> District). The tour was requested based on the congressman's interest in learning more about the refuge's efforts to conserve ocelots. R2

Oct. 23: Secretary Jewell will give a keynote address at the FWS-sponsored National Workshop on Large Landscape Conservation in Washington, DC, where conservation practitioners and policy makers will discuss opportunities for implementing large landscape conservation. FWS leadership will attend the workshop (Oct. 23-24). HQ

### **Public Announcements**

Thursday, Oct. 16

FWS will reopen the comment period on the proposal to reclassify the arroyo toad as threatened under the ESA. R8

Friday, Oct. 17

FWS will issue an incidental take permit for Canada lynx to Maine Department of Inland Fisheries and Wildlife to cover the incidental capture of lynx in state-regulated trapping programs. Not controversial. Outreach planned. R5

Monday, Oct. 20

FWS staff will be in Gabon during the week of Oct. 20 to discuss year two of the five-year cooperative agreement between FWS and the Gabonese Parks Authority (ANPN). The agreement, supported by an MOU between the two government partners, will provide \$20 million over five years so ANPN can develop the adaptive capacity needed to conserve its elephants and other wildlife. HQ

Tuesday, Oct. 21

Nothing to report

Wednesday, Oct. 22

Nothing to report

Thursday, Oct. 23

FWS is publishing a final rule to list the Dakota skipper as threatened and Poweshiek as endangered under the ESA. The Dakota skipper is endemic to MN, SD and ND while the Poweshiek is endemic to IA, MI, MN, ND, SD and WI. FWS is also finalizing a 4(d) rule for the Dakota skipper that exempts take resulting from grazing and other routine livestock ranching activities. The 4(d) rule applies to all non-federal lands where the Dakota skipper occurs. The target for sending the rule to the *Federal Register* is Oct. 17; the rule must publish by Oct. 24. Outreach planned for the day before publication. Locally controversial. R3

Friday, Oct. 24

FWS is sending to the *Federal Register* a proposed rule to list as threatened the African lion throughout its range under the ESA. FWS is also announcing a 4(d) rule requiring permits for all imports, including sport-hunted trophies. FWS expects this rule to be controversial, attracting attention from both the animal rights community and the sport-hunting community. Announcement date TBD. Controversial. HQ

FWS is sending to the *Federal Register* its annual update of species that have been identified as candidates for listing under the ESA, either through an assessment process we initiate or as a result of a 12-month petition finding that listing is "warranted but precluded" by higher priority listing actions. FWS is changing the listing priority for one candidate, removing one species from candidate status, and providing updated findings for each current candidate species for which FWS previously has made a 12-month petition finding that listing is warranted but precluded; this annual update of such previous petition findings is required by the act. Because of the environment created by the MDL settlement agreements, FWS has, for the last several years, been able to steadily reduce the number of candidate species awaiting listing determinations. This year only 146 species remain on the candidate list, down from 251 in 2010. The FWS does not anticipate significant issues related to this action. Announcement date TBD. HQ

TBD

The Mexican Wolf/Livestock Coexistence Council's first 26 payments to Arizona and New Mexico livestock operators are anticipated in Oct. Outreach is planned (news release). R2

In mid-late Oct., FWS will announce a proposed rule to list four native turtle species (common snapping turtle and three softshell turtles) under Appendix III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). These listings would ensure these turtle species were lawfully obtained before export is approved and would provide important information to assess the impacts of trade and the potential need for additional protections in the future. HQ

### **Major Press Inquiries**

FWS coordinated closely with Michigan DNR staff on an Oct. 7 joint news release announcing silver carp eDNA was discovered during testing of the Kalamazoo River. Extensive local media coverage and some Congressional interest followed the announcement. R3

On Oct. 7, FWS responded to a letter from scientists critical of gray wolf management and monitoring in the Western Great Lakes region from January 2012 through December 2013. The FWS response, requested by several media representatives, including Associated Press, Wisconsin Public Radio and Wisconsin State Journal, provided information on FWS' role in post-delisting monitoring and affirmed FWS confidence that states are responsibly managing and monitoring wolf populations in the western Great Lakes. R3

Vanessa Youngmun (NAZ Today, KNAZ News/TV, Flagstaff, AZ) interviewed Arizona Ecological Services biologist regarding the Flagstaff Watershed Protection Project. Interview focused on the Mexican spotted owls. Expected to air soon. R2

Cronkite News contacted FWS in preparation of a video piece and a live interview for PBS World regarding the pilot captive breeding program at the Phoenix Zoo for the endangered Mount Graham red squirrel. FWS provided video of captures to Cronkite News and is arranging for an on-site interviews. R2

AP contacted FWS with questions regarding a letter sent out to sportsmen by Arizona Game and Fish Department outlining their concerns about items not specifically defined in the Mexican wolf 10(j) proposal draft EIS alternatives. R2

CBS Sunday morning plans to air the segment about bats at Aeolus Cave in Vermont on Oct. 26. R5

Boston Globe reporter visited Great Bay and Parker River NWRs for two stories, one regarding a Sandy project (Great Marsh restoration) and the other regarding bat monitoring. R5

Baltimore Sun is expected to run a story in the coming week on a Partners for Fish and Wildlife Service and Stream/Coastal Program restoration project in Maryland where volunteers were planting riparian trees, shrubs and ferns. R5

Dave Litman, the Toronto-based producer of the Discovery Channel show "Daily Planet," contacted FWS to arrange for a crew to visit Devils Hole and the Ash Meadows Fish Conservation Facility (AMFCF) in late Oct.

FWS is coordinating with the National Park Service (Devils Hole) and AMFCF staff to accommodate the Discovery Channel crew on one day between Oct. 24 and 28. R8

NPR is doing a story on southern sea otter populations based on the recently released southern sea otter count announcement by USGS. R8

Several media outlets, including Associated Press, Capitol Public Radio, Oregon Public Broadcasting, the Washington Times, Vox.com, Eureka Times-Standard, Siskiyou Daily News, KCBS in San Francisco) contacted FWS following announcement of the our proposal to list the West Coast fisher population as a threatened species. In addition to these direct inquiries dozens of news organizations picked up this story and issued additional by-lined articles, including NBC News, Newsweek, Washington Post, New York Magazine, the American Spectator and Mother Jones. R8

The Associated Press contacted FWS and DOI regarding a lawsuit filed by eight conservation groups challenging the FWS' decision to withdraw a proposal to list the wolverine as threatened under the ESA. The coalition of conservation groups, represented by Earthjustice, is suing to overturn that decision and filed the lawsuit Oct. 13 in federal district court in Missoula, MT. R6

#### **Items of Note/Expected Legislative, Legal, Policy Issues**

Todd Ungerecht, staffer from Congressman Hastings office, contacted our Washington Field Office regarding the FWS proposal to protect the West Coast population of fisher as threatened under the ESA. Ungerecht wanted to know when FWS will propose Critical Habitat. R1

FWS met with staff from the offices of Senator Wyden and Congressman DeFazio on Oct. 7 to discuss the northern spotted owl in relation to the proposed Oregon and California Lands bill. R1

Congressman Sablan's local staff requested and received a meeting with FWS leadership on Saipan Oct. 10 for a general discussion on ESA concerns. Congressman Sablan's DC staff requested information on the status of the permit that Saipan International Real Estate Developer Corp. submitted to FWS for development of a hotel on Saipan. R1

Congressional interest remains high in the proposal to list the northern long-eared bat as endangered, with the most recent letter coming on Oct. 7, from Representatives from Michigan, Minnesota and Wisconsin. R3

FWS is considering whether a final listing for Gunnison sage-grouse as threatened is appropriate. It's also evaluating, in the event that a threatened designation is warranted, if a 4(d) special rule to tailor prohibitions of take is necessary and advisable for conservation of the species. After a court-granted extension, the listing decision is due Nov. 12. The court order allowed FWS to publish a proposed 4(d) rule and finalize it with the final listing determination Nov. 12, if appropriate. The continuing evaluation of a potential 4(d) rule precludes the opportunity to finalize it prior to Nov. 12. R6

FWS and National Park Service are in a settlement process with the owner of a proposed aggregate mine in the Arbuckle-Simpson Aquifer in south-central Oklahoma. Operation of the proposed mine could potentially reduce critically needed water supplies at three management units (Tishomingo NWR, Tishomingo NFH and

the Chickasaw NRA). A settlement agreement is being developed among all vested parties that will provide monitoring access in the immediate vicinity of the proposed mine, if approved. R2

On Oct. 1, WildEarth Guardians (WEG) filed a lawsuit against the U.S. Forest Service in U.S. District Court in Albuquerque for allowing livestock grazing in streamside areas in the Santa Fe National Forest thought to be critical habitat for the endangered New Mexico meadow jumping mouse. In another suit brought by ranchers, a federal judge denied a request for a temporary restraining order to prevent the Forest Service from putting up fences to protect riparian areas in the Lincoln and Santa Fe national forests. The ranchers claim the Forest Service has no legal right to erect fences without first conducting an environmental assessment. While FWS is not named in either suit, the litigation may impact our ability to manage for the jumping mouse (listed June 2014). R2

On Oct. 7, the Center for Biological Diversity (CBD) provided notice (NOI) that they intend to file suit for the FWS's failure to make mandatory 90-day and 12-month findings on CBD's 2012 petition to list 16 species of amphibians and reptiles in Region 8. These species are a subset of the total of 53 species CBD included in their "mega petition." CBD has requested a schedule of completion for these findings if the FWS wishes to avoid litigation. FWS is coordinating with regional solicitors. R8

On Oct. 8, FWS met with Kyle Lombardi, Legislative Director for Rep. Kevin McCarthy (CA-23), and officials from the U.S. Forest Service and representatives from cattleman organizations from Kern and Tulare counties about the Programmatic Biological Opinion for the 3 Sierra amphibians (3SA). The teleconference addressed concerns about potential impacts to grazing actions on national forests as a result of the 3SA listing. FWS explained how the Programmatic Biological Opinion will work and cover existing activities so that activities like grazing can continue uninterrupted. R8

On Oct. 13, eight conservation groups represented by Earthjustice filed a lawsuit challenging the FWS' decision to withdraw a proposal to list the wolverine as threatened under the ESA. The groups are suing to overturn that decision and filed the lawsuit in federal district court in Missoula, MT. R6

National Marine Fisheries Service has reported the verified the incidental take of two short-tailed albatross in the hook-and-line groundfish fishery of the Bering Sea/Aleutian Islands Management Area (BSAI). The short-tailed albatross is protected in Alaska waters by the ESA. An incidental take statement issued by FWS allows for a maximum of four birds to be taken in the on BSAI and Gulf of Alaska hook-and-line groundfish fisheries within the two year period, starting Sept. 16, 2013. The NMFS Alaska Regional Office, NMFS North Pacific Groundfish Observer Program, and the FWS are actively coordinating efforts and communicating with each other in response to this take incident. R7

### **30-60 Day Look Ahead**

FWS will announce the availability of the draft environmental impact statement (DEIS) and draft regional habitat conservation plan (DRHCP) for the Southern Edwards Plateau in the next several weeks. Led by the City of San Antonio, TX, and Bexar County, TX, the DRHCP is an effort to address the potential impacts of infrastructure and commercial and residential development on nine federally endangered species including the golden-cheeked warbler, black-capped vireo, Government Canyon Bat Cave spider, Madla Cave meshweaver,

Braken Cave meshweaver, Government Canyon Bat Cave meshweaver, two beetles with no common name (*Rhadine exilis* and *Rhadine infernalis*) and the Helotes mold beetle. The DEIS describes potential impacts of issuing a 30-year permit under section 10(a)(1)(B) of the ESA to authorize incidental take of these species. Strong local interest expected. Outreach planned to coincide with publication of the DEIS in the *Federal Register* Reading Room. R2

In Nov., FWS will announce approval of the Lesser Prairie-Chicken Programmatic Conservation Bank Agreement (PCBA) submitted by Common Ground Capital and finalized May 1. This is the first PCBA to be approved by FWS, with the goal of streamlining the process for lands to be approved as conservation banks to provide for the conservation of the lesser prairie-chicken and its habitat. Outreach planned. R2

Texas Mid-coast Refuge Complex has been working with a variety of partners in Houston to develop five nature gardens funded by a \$25,000 Connecting People with Nature grant. On Oct. 28, FWS Regional Director travels to Houston to meet with major partners in the Houston Urban Wildlife Refuge Partnership. A kick-off Event will be held Nov. 12. On Dec. 6, Bank of America volunteers will assist FWS and city of Houston with planting the garden in Buffalo Bayou. Coordinated outreach is planned. R2

In the coming weeks, FWS will announce public scoping on a request from the Schlitterbahn Water Park on the Comal River, TX, for an incidental take permit under the ESA for the incidental take of the endangered fountain darter from activities associated with operation of water rides in the park. A habitat conservation plan will be prepared that will include measures to minimize and mitigate the impacts of potential taking. A public scoping meeting is tentatively scheduled for Nov. Local interest expected. R2

FWS will make decisions by the end of Oct. for seven eagle permit applications--four applications for nest removal permits and three applications for eagle disturbance permits. Permit applications are associated with Department of Defense installations, housing developments, transmission structures and transportation development. Local outreach is planned. R5

Following a 60-day extension to the deadline granted by the courts, FWS is now scheduled to make a final listing decision on whether the rufa red knot warrants listing under the ESA by Nov. 30. Outreach planned. R5

In late Oct., Kenai NWR will propose to amend its public use regulations through publication of a draft rule that would: clarify the existing regulations; implement management decisions from the refuge's June 2010 Revised Comprehensive Conservation Plan; establish regulations for managing wildlife attractants, including food, refuse and retained fish to decrease the potential for negative human-bear interactions; and revise regulations for hunting and trapping, including those governing these activities within the Skilak Wildlife Recreation Area. R7

FWS anticipates publishing the Strategic Growth Policy for the National Wildlife Refuge System and response to public comments in the *Federal Register* in late Oct./early Nov. This policy instructs FWS to focus on acquiring interests in lands and waters that support the following three priorities: recovery of threatened and endangered species, implementation of the North American Waterfowl Management Plan, and conservation of migratory birds of conservation concern. HQ

In early Nov., FWS will publish a notice of intent to prepare a joint environmental impact statement and environmental impact report for the proposed Yuba-Sutter Regional Conservation Plan (a joint habitat conservation plan and natural community conservation plan). The plan outlines strategies to avoid, minimize and offset potential indirect effects to 18 plant and animal species expected from development of 35,000 acres in Yuba and Sutter counties, CA. R8

The deadline to complete a peer-reviewed evaluation of FWS's Red Wolf Recovery Program and its nonessential experimental population of red wolves in Eastern North Carolina has been extended to Nov. 14 to provide additional time as a result of more than 47,600 comments FWS received from interested citizens and organizations. Under FWS's contract with Wildlife Management Institute, an evaluation will be peer reviewed and then used to help FWS determine the program's future by early 2015. R4

The draft of the polar bear conservation management plan is scheduled to be released to the public Nov. 17 for a 60-day review and comment period. R7

-----

The following endangered species actions are scheduled to be sent to the *Federal Register* in Oct. and Nov. (announcement dates TBD but most will coincide with the date each notice is placed on public inspection in in the reading room):

- Dakota Skipper & Poweshiek, Final Listing, Oct. 24, R3
- African lion, proposed listing, Oct. 24, HQ
- Arroyo toad, reopen comment, Oct. 29, R8
- White-haired goldenrod, proposed delisting, Oct. 31, R4
- Spring Pygmy Sunfish, final critical habitat, Oct. 31, R4
- Gunnison Sage Grouse final listing, Nov. 12, R6
- Washington ground squirrel, 12-month finding (not warranted), Nov. 14. R1
- 2 Pine Rockland Plants (Carter's Small-Flowered Flax, Florida Brickell-Bush), final critical habitat, Nov.14, R4
- Borax Lake Chub, downlisting from Endangered to Threatened, Nov. 17, R1
- New Mexico Meadow Jumping Mouse, final critical habitat, Nov. 20, R2
- Rufa red knot, final listing, Nov. 28, R5

**WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT**  
**Oct. 19 - 25, 2014**

**Highlights of Travel, Meetings, and other Public Events**

Neil Kornze, Steve Ellis and Linda Lance will be at the BLM's Executive Leadership Team meeting Oct. 20-23 at the National Conservation Training Center in Shepherdstown, WV.

**Public Announcements**

Monday, Oct. 20

**The Honey Bee Nutrition and Forage Summit** in Alexandria, VA, through Oct. 21. The BLM, FWS, NPS, FS and DOD are participating in a panel discussion regarding honey bees on federally managed lands. BLM and FS anticipate signing an **MOU on native pollinator habitat** on public lands at an Oct. 21 reception preceding the **North American Pollinator Protection Campaign** annual meeting in Washington, DC Oct. 22 - 25, hosted by USDA.

Tuesday, Oct. 21

BLM-MT/DK will hold an **oil and gas lease sale** offering 28 parcels totaling 14,988 acres, (23 BLM parcels totaling 9,637 acres in MT and 5 FS parcels totaling 5,351 acres in ND). Nine of the 23 nominated MT lease parcels have stipulations for Greater Sage-Grouse in General Habitat. The BLM deferred all parcels in priority habitat. A protest by WildEarth Guardian is being dismissed because one of the protested parcels is deferred and the others already have stipulations for sage-grouse.

Wednesday, Oct. 22

BLM-NM will offer 13 parcels totaling 19,788 acres of FS subsurface estate in San Juan and Rio Arriba Counties at its quarterly **oil and gas lease sale**. The BLM deferred an additional 13 parcels of BLM lands in Rio Arriba and Sandoval Counties due to protests. The BLM received 106 protest letters filed by individuals, 4 protest letters from established groups, and a protest petition signed by 64 individuals citing concerns over water quality, fracking and NEPA.

The BLM will initiate a 30-day public scoping period, with a public meeting in Cody, Wyo., prior to analyzing a **proposed bentonite mine**. Wilson Brothers Construction, Inc., proposes to mine bentonite about 8 miles southwest of Cody. The plan of operations includes up to 80 acres of mining disturbance and a new access/haul road. Cultural resource issues are a primary concern. Media is likely to attend.

Thursday, Oct. 23

**Deputy Secretary Mike Connor will address the annual Alaska Federation of Natives (AFN)** convention in Anchorage. The AFN convention is the largest representative annual gathering in the U.S. of Native peoples, drawing about 5,000 attendees. Proceedings are broadcast live statewide, and through webcasts to 70 countries. Connor also is scheduled to **sign land conveyance patents transferring over 10,000 acres to the Nunamiut Corporation, Inc.**, the ANCSA corporation for the village of Anaktuvuk Pass in the Gates of the Arctic National Park. This is the only ANCSA village corporation with lands entirely within the boundaries of a National Park.

Friday, Oct. 24

Nothing to report.

Sat. Oct. 25

Sen. Carl Levin (D-MI) plans to attend a celebration of **the conveyance of the Thunder Bay Island Lighthouse** (near Alpena, Michigan) from the Coast Guard to the BLM. BLM Eastern States Director John Ruhs will participate.

### **Major Press Inquiries**

In response to an AP FOIA for information about grazing permittees in arrears, the BLM provided two "snapshot" tables of livestock operators in arrears, one from March 31, 2014, and the other from Oct. 2, 2014. The figures illustrate that the vast majority of permittees pay their fees on time and arrears are minimal.

Dylan Brown with E&E Publishing contacted the BLM for technical information about geothermal leasing and industry claims that the program is not as streamlined as it is for other industries such as oil and gas. The tone is expected to be neutral and will publish online in the next several weeks.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Sens. Orrin Hatch and Mike Lee and Rep. Chris Stewart sent a letter dated Sept. 23 to the BLM Director requesting release of the NOA for the **Alton Coal Tract Lease by Application** Supplemental Draft EIS, citing economic benefits to Utah and to Kane County. The BLM is preparing a response.

BLM Nevada State Director Amy Lueders and Deputy State Director Raul Morales will meet with Rep. Amodei (R-2-NV) in his Reno office Oct. 16 to discuss issues related to **grazing and drought**. On Oct. 17, Rep. Amodei plans to attend the BLM public tour of the Indian Lakes Road Short-Term Holding Facility in Fallon, NV.

BLM staff will provide a **briefing on the BLM and its energy programs** for staff of Rep. McIntyre (D-7-NC) at the BLM's M Street office in Washington DC October 17.

The BLM is working on a project that would transfer 1,400 acres to the **State of Oregon to satisfy a statehood claim**. During scoping, BLM received a letter from the Siletz Tribe asserting the Tribe's right to acquire these lands. A solicitor's opinion was requested on the Siletz claims.

A private citizen, a **"Constitutionalist," has trespassed onto BLM land** near the city of LaPine, OR and has cut fence, removed vegetation, brought in a cabin and erected an anti-BLM sign visible from the nearby highway. This individual has a history of taking similar actions since 1995 on other Federal lands in OR. BLM district law enforcement is developing a suitable response, in coordination with WO.

Coos Bay, OR, County Commissioner Bob Main recommends establishing a committee to **review receipt payments specific to the Coos Bay Wagon Road Act**. The BLM Coos Bay District is discussing the matter with Commissioner Main.

**The BIA has identified two solar energy projects in NV** as potential priority projects for 2014/2015. These are the First Solar 100-MW Paiute Snow Mountain Solar project (adjacent to Red Rock National Conservation Area) and the First Solar 100-MW Moapa Aiya Solar project. Both projects potentially involve BLM connected-actions for transmission authorizations on public land.

### **30-60 Day Look Ahead**

**Oct. 28**, BLM Deputy Director Steve Ellis will meet with Rep. Amodei (R-2-NV) to discuss issues of concern, including **drought management in NV, sage-grouse** and the Nevada Fire Safe Council (also participating will be a U.S. Forest Service Chief Financial Officer).

The new **San Juan Islands National Monument Advisory Committee** will hold its first meeting **Oct. 29 - 30**. The committee was chartered to provide information and advice regarding development of the Monument's resource management plan. The meeting is open to the public.

**Oct. 29:** BLM-OR/WA will participate in a consultation meeting with the Shoshone Paiute for the **Boardman to Hemingway Transmission Line Project**. The Draft EIS release date has been moved to Nov. 14, 2014. Government-to-Government consultation meetings are being planned for October with the Confederated Tribes of the Umatilla Indian Reservation and the Shoshone-Bannock Tribes.

**Oct. 30:** BLM-MT/DK staff will meet with Cooperating Agencies (MT DEQ, Montana Department of Natural Resources and Conservation, OSMRE) and **Spring Creek Coal, LLC staff to initiate the review process for the EIS on four applications** (Lease By Application, Lease By Modification, Land Use Permit amendment, and Land Use Lease amendment). The meeting, at the Spring Creek Coal Mine in Decker, MT, is open to media and the public. The proposals will likely be controversial.

**Nov. 4:** BLM-WY will hold an **oil and gas lease sale** offering 90 parcels totaling 114,385 acres in Carbon, Lincoln, Sublette, Sweetwater and Uinta counties. The BLM received 5 protests: one each from 3 NGOs about a parcel near the Wyoming Range; one from an NGO regarding lands with wilderness characteristics; and one from two NGOs regarding sage-grouse. All protests will be resolved prior to the sale.

**Nov. 4:** BLM-CA will host the **3<sup>rd</sup> Annual Youth Summit at California State University**, Sacramento. The focus will be on connecting youth to the outdoors and expanding opportunities through partnerships. Linda Lance will attend the opening of the summit.

**November 5-6:** The Advisory Council on Historic Preservation annual fall meeting in Washington D.C. BLM staff will attend.

**Nov. 8:** "**Wild for Wilderness,**" **Arizona's 50<sup>th</sup> Wilderness Anniversary Celebration** at the Coronado National Forest's Sabino Canyon Recreation Area in Tucson. The Arizona Congressional delegation is invited, along with state and local officials. AZ is one of only 5 states with wilderness managed by all 4 land-management agencies (BLM, FWS, NPS and USFWS). Other partners include the Friends of Sabino Canyon, the Arizona Wilderness Coalition and the Sierra Club. The free event is expected to draw thousands of participants.

The BLM is working with the **Ft. McDermitt Paiute-Shoshone Tribe and the FS to address a longstanding domestic horse trespass** situation on public lands bordering OR and NV. The FS will initiate a 30-day public comment period with a removal scheduled to start **Nov.12**. Additionally, the BLM-OR plans to conduct an emergency wild horse gather in the Cold Springs HMA in southeastern Oregon due to the Saddle Draw Fire, part of the Buzzard Complex.

**Nov. 12 – 13:** BLM-AZ will hold a **stakeholders meeting on the regional mitigation planning process for 3 SEZs in Arizona** (Aqua Caliente SEZ, Brenda SEZ and Gillespie SEZ). This follows a public workshop in April and a webinar in July. The AZ regional mitigation planning effort is targeted for completion in March 2015.

**Nov. 13:** BLM-CO will hold an oil and gas lease sale.

**Nov. 14:** The anticipated release date for the **draft EIS for the Boardman to Hemingway (B2H) Transmission Line Project**, initiating a 90- day public review. Government-to-Government consultation meetings are being planned with area tribes in October.

**Nov. 18:** BLM-UT will hold an oil and gas lease sale.

**WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT**  
**October 15, 2014 – October 25, 2014**

**Highlights of Travel, Meetings, and other Public Events**

October 16: Acting Director Cruickshank will brief the House and Senate Appropriations staff on the Risk Management Program.

October 18 – 22: Mike Celata, Deputy Director Gulf of Mexico Region, will speak at the Interstate Oil and Gas Compact Commission Meeting.

Week of October 20: BOEM's Alaska Region is planning outreach in several Cook Inlet communities. The purpose of the meetings is to inform community leaders and the public about BOEM, the lease sale process, and scientific information on Cook Inlet prior to scoping meetings for the Lease Sale 244 EIS, which are expected to occur in November.

October 21 – 23: Bill Brown, BOEM's Chief Environmental Officer, will travel to California to speak at seminars at the Scripps Institution of Oceanography in La Jolla and UC Santa Barbara and to visit the rocky intertidal network environmental study areas.

October 23: Jill Lewandowski and Stanley Labak from BOEM's Office of Environmental Programs will speak at the LinkedIn "Leaders in Energy" event in Washington, DC on Atlantic G&G activities and related science and misperceptions.

October 31: BOEM's Marine Minerals Program Branch Chief Jeffrey Reidenauer will deliver a presentation at the Environmental Business Council of New England's (EBC) Ocean and Coastal Resources Program. His topic will be Shoreline Resiliency – Sand & Gravel Mining.

November 5: Acting Director Cruickshank will speak at the National Ocean Industries Association Fall Meeting in Naples, FL. He will focus on BOEM's efforts to modernize its risk management program. This event is closed press.

November 6: North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, governors from Mid- and South Atlantic states, and NC Members of Congress have been invited. It's a closed press event to bring together state and Federal representatives to better understand concerns and opportunities associated with offshore exploration and development. Walter Cruickshank and others from BOEM will attend. Walter will also attend an OCS Governors Coalition Breakfast earlier in the day.

**Public Announcements**

**October 16:** Note to Stakeholders on the proposed modifications to BOEM's oil and gas bid adequacy procedures to better ensure receipt of fair market value for OCS leases.

**October 17:** Note to Stakeholders announcing Proposed Notice of Sale for Central Gulf Sale 235.

**Week of October 20:** Note to Stakeholders to inform about recent updates to renewable energy Construction and Operations Plan Guidelines.

**October 24 (tentative):** Publication of the Notice of Intent to prepare an EIS for Cook Inlet Sale 244. The bureau will hold scoping meetings in November.

**Late October:** Press release announcing publication of the Limits of Liability final rule.

**End of October:** Chukchi Sea Lease Sale 193 Draft Supplemental EIS will be posted. Press release will be issued.

**October TBD:** Alaska Region will send Note to Stakeholders on Government to Government consultation on Lease Sale 193 Supplemental EIS with local governments and tribes.

**October TBD:** Press Release announcing the availability of a report on the discovery of 100 new species of marine life through BOEM collaborative research on chemosynthetic communities in the Gulf of Mexico.

**October TBD:** Note to Stakeholders on a Request for Information on the development of a Long-Term Monitoring Plan for marine mammals in the Gulf of Mexico.

### **Major Press Inquiries**

**SOCO Magazine:** Answered media query (from <http://www.socomagazine.info>) on Cape Wind's request to change staging areas to New Bedford. Article to publish week of Oct. 13.

**Subsea Engineering News:** BOEM's conditional approval of LLOG's Initial Exploration Plan for MC252.

**Alabama Business News:** Upcoming Central of Gulf of Mexico sales.

**E&E News Climate Wire:** Called for additional background on the Marine Biodiversity Observing Network press release.

**Sea-Technology Magazine:** Invited BOEM to submit a short article for the January 2015 Annual Review and Forecast issue with government officials, industry and academic leaders involved in the marine sector. BOEM plans to submit a piece by Walter Cruickshank.

**Wall Street Journal:** Answered media query on oil and gas activities, including Five Year program, the Arctic rule, and the Eastern Gulf moratorium.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Maryland Offshore Wind Lease Sale:** US Wind Inc. was the provisional winner of both lease areas during the August auction, with a combined bid of \$8.7 million. DOJ signed off on the auction results on September 19. On September 22, BOEM sent the lease documents to US Wind Inc. At the request of US Wind Inc, BOEM extended the date in which it needs to return the signed lease documents, submit its financial assurance, and pay the balance of its bonus bid from October 7 to October 27.

**Changes in Bid Adequacy Procedures:** On October 15, BOEM will announce its intent to change a criterion in its existing bid adequacy procedures for ensuring receipt of Fair Market Value on Outer Continental Shelf oil and gas leases. BOEM proposes to remove the Number of Bids Rule in Phase 1 of the Post Sale Evaluation Procedures, which is a bid adequacy provision used in the first step of the process to determine whether to accept a tract's high bid without further BOEM evaluation. BOEM is also proposing to revise several bid adequacy definitions for clarity, which will not alter the fundamental meaning or application of the terms to the bid adequacy procedures. The announcement will have a 60-day comment period. BOEM will consider all

comments, and then intends to publish the revised Bid Adequacy Procedures with the Central Gulf of Mexico CPA 235 Final Notice of Sale.

**Central Gulf of Mexico Planning Area Sale 235 (CPA Sale 235):** On October 15, BOEM plans to announce the Proposed Notice of Sale for CPA Sale 235, which will publish on October 17. The sale is scheduled for March 2015.

**Limits of Liability Final Rule:** In late October, BOEM will publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Chukchi Sea Lease Sale 193:** At the end of October, BOEM will post the draft supplemental EIS for public review. BOEM will hold scoping meetings during early November.

**Restricted Joint Bidders List:** The list identifies companies that are prohibited from jointly bidding on lease blocks, in order to promote competition. Companies are included on the list if they had an average daily production in excess of 1.6 million barrels per day over the prior 6-months. The List is scheduled to be published in the Federal Register by Oct. 31, 2014.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In November, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November. The Report will be published on the BOEM website, along with a Request for Comments published in the *Federal Register*.

**Rhode Island Offshore Wind:** In November, BOEM may be prepared to issue a right-of-way grant for the Block Island Transmission System (BITS). On September 4, the U.S. Army Corps of Engineers (USACE) approved Deepwater Wind's (DWW) permit request to construct five wind turbine generators in state waters off Block Island and a transmission cable to the Rhode Island mainland. BOEM has drafted a Finding of No Significant Impacts that adopts the USACE EA, along with a right-of-way grant and a decision document with conditions of approval for DWW's General Activities Plan for the portion of BITS in Federal waters.

**Massachusetts Offshore Wind:** In late November, BOEM plans on issuing a Final Sale Notice for the Massachusetts Wind Energy Area. The Final Sale Notice is on an expedited surnaming track in order to hold the sale by the end of the year, as requested by the Commonwealth.

**Virginia Research Lease (offshore wind):** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted revisions to its Research Activities Plan for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Oct. 6. BOEM tentatively plans to publish an environmental assessment for public comment in late November and hold a public meeting in December.

**WEEK-AHEAD REPORT: BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT**  
**October 15 – October 24, 2014**

**Highlights of Travel, Meetings, and other Public Events**

October 16: Director Salerno is scheduled to meet with Deputy Assistant Secretary Don Schregardus and Rear Admiral White of the Navy to discuss the proposed Arctic rulemaking.

October 20: Director Salerno is scheduled to receive a briefing from industry representatives on their proposal for a workable Best Available and Safest Technology (BAST) process.

October 21-22: Director Salerno is scheduled to participate in the next meeting of the Liquid Pipeline Advisory Committee in Arlington, VA. This will be his first meeting since being officially designated as a member of the committee.

October 23: Director Salerno will be providing opening remarks for the Gas and Oil Technologies meeting hosted by the International Energy Association at the Canadian Embassy. Deputy Assistant Secretary David Haines will be providing keynote remarks.

October 23: Director Salerno is scheduled to deliver remarks at an orientation for new BSEE employees in Herndon, VA.

October 24: BSEE is planning to host the next meeting of High Reliability Organizations in Washington, DC. The group is composed of federal organizations that manage programs with low probability of catastrophic failure, but high consequences if a failure occurs. The Nuclear Regulatory Commission, Department of Transportation and several other government agencies are expected to participate.

October 27: Director Salerno is scheduled to visit a Baker Hughes research facility in Houston, TX.

October 28: Director Salerno is scheduled to be the keynote speaker at an International Energy Symposium hosted by Texas A&M University, College Station, TX. He is planning to conduct a recruiting visit at Texas A&M during the trip.

October 29: Associate Director Anderson will accompany Chief of Staff Beaudreau to attend and speak at a meeting titled, "Oil Spill Response 25 Years After the Exxon Valdez and in the Wake of Deepwater Horizon: What We Learned and What are We Missing?". The event will be held at the University of New Hampshire.

November 3-4: BP will be conducting an operator-initiated oil spill response tabletop exercise in New Orleans, LA. The exercise is designed to test their oil spill response plan, incident management team, and well containment plan. Over 100 BP personnel will be involved, including other operators, response contractors, federal and state representatives, two people from BSEE. Deputy Director Schneider is tentatively scheduled to attend the event.

November 3-4: Director Salerno is scheduled to travel to Camarillo, CA, to conduct an all-hands meeting with BSEE employees in the Pacific Region.

**Public Announcements:**

October 15 or 16: BSEE, Department of Justice, and US Environmental Protection Agency (EPA) are planning a joint press release regarding a settlement agreement with the United States. Under the agreement, ATP Infrastructure Partners, LP (ATP-IP) will pay a \$1 million civil penalty and perform corrective measures to resolve claims by the U.S. under the Clean Water Act (CWA) and the Outer Continental Shelf Lands Act (OCSLA) of unauthorized discharges of oil and chemicals from an oil platform into the Gulf of Mexico. This is

the first joint judicial enforcement action involving BSEE and EPA claims in response to alleged violations of both the CWA and OCSLA.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Conference Call with Exxon-Mobil:** Director Salerno had a conference call with representatives from Exxon-Mobil on September 19, 2014, to discuss environmental analysis in associated with a permit to perform work at Platform Harmony in the Pacific. BSEE worked with BOEM and National Marine Fisheries Service (NMFS) to complete environmental actions needed to process the permit. NMFS signed a biological opinion to complete consultation for marine mammals and BOEM prepared an environmental assessment. BSEE signed a Finding of No Significant Impact on October 9 and issued the permit on October 10.

**Proposed Rule for Arctic Operations:** This proposed rule, which addresses exploratory drilling operations in the Arctic, is currently under review at OMB. BSEE and BOEM staff are working to address interagency comments (USCG, EPA, NOAA) and to respond to questions from OIRA. After OMB completes its review, DOI will finalize any changes to the proposed rule and will work to get it published in the *Federal Register* at a date to be determined. A public comment period will follow.

**Proposed Well Control Rule (AKA Blowout Preventer Rule):** A proposed rule for well control including the use of BOPs was submitted to the Executive Secretariat. It incorporates industry standards, revises existing regulations, and also includes critical reforms in the areas of well design, well-control, casing, cementing, real-time well monitoring, and subsea containment.

### **30-60 Day Look Ahead**

November 13: Director Salerno has been invited to be the luncheon speaker at a meeting of the Canada Petroleum Board in St. John's, Canada.

November 18-22: Director Salerno is scheduled to attend a meeting of the International Regulators Forum in Cancun, Mexico.

December 4-5: The Director is tentatively scheduled to travel to Charleston, SC, to provide remarks at a Federal Law Enforcement Training Center (FLETC) training class being conducted for BSEE investigators.

Early December: Director Salerno is planning to travel to New Orleans, LA, to conduct an all-hands meeting with BSEE employees in the Gulf of Mexico Region.

**WEEK-AHEAD REPORT**  
**OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT**  
**October 15 – 25, 2014**

**Highlights of Travel, Meetings, and other Public Events**

**Public Announcements**

Wednesday, October 15

Nothing to report

Thursday, October 16

We will meet with the Interstate Mining Compact Commission states. The meeting will focus on the recommendations three government efficiency work groups (composed of OSMRE staff and state representatives) made to the director. We will provide preliminary feedback and seek additional input from the states and tribes.

**Major Press Inquiries**

A reporter from the Alaska Dispatch News called about the status of the determination regarding Usibelli Coal Mine, Inc.'s Wishbone Hill permit located near Palmer and Sutton, AK. In early 2011 OSMRE received a citizen complaint that Usibelli was mining without a valid permit. OSMRE found that the permit had expired by operation of law because the mine was not activated within three years of when the permit was issued in 1991. The state appealed OSMRE's 2011 determination and the matter is with the department for decision. On October 3, 2014, the state renewed and revised the permit which is why the reporter called.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

### House Committee on Appropriations Staff Member to Visit Kentucky Mine Sites:

During the week of Nov. 3, House Committee on Appropriations staff will visit active and reclaimed coal mine sites in Kentucky to better understand mining and reclamation activities required by SMCRA.

### Director Travels to Oklahoma:

The week of October 20, the director will be Oklahoma. He will visit several coal mines where restoration of the land after mining to its approximate original contours is an issue. He will meet with citizens, industry and state officials. Senator Inhofe also plans to meet with him at the mines. He will also meet with Cherokee officials at a former dangerous abandoned coal mine on tribal land that OSMRE restored to productive use. There might be press.

## **30-60 Day Look Ahead**

### OSMRE to Release Mine Pool Reports:

On Nov. 14, OSMRE will release two hydrologic characterization reports of underground mine pool systems. A mine pool develops after mining ceases, and the mine voids are allowed to fill with ground water. The two large, complex underground mine-pool systems involve both pre- and post-SMCRA underground mines and, multiple coal beds that straddle the borders of Maryland and West Virginia. One mine pool underlies the head waters of the North Branch of Potomac River that lies in Maryland and West Virginia, a study area that encompasses more than 25,000 acres. The other — the Fairmont Mine pool — encompasses 52,000 acres in West Virginia. The reports present findings of current conditions and the need to prevent impacts to river systems by pumping and treating water from the mines. They also demonstrate OSMRE's efforts to develop good science for regulating a complex industry. These reports may generate interest from citizens and environmental groups.

### Assistant Secretary, Land and Minerals Management (ASLM) to Visit West Virginia Mine Sites:

On Oct. 27-29, OSMRE's Appalachian Region will host a tour for the ASLM. The tour will involve site visits to large mining complexes and the nearby communities that are impacted by them. ASLM will also visit with OSMRE staff and be briefed on some of the challenges related to mining in the region.

### OSMRE to Present 2014 Excellence in Surface Coal Mining Reclamation Awards:

On Oct. 27, OSMRE will recognize the winners of the bureau's 2014 Excellence in Surface Coal Mining Reclamation Awards at the National Mining Association meeting in Washington, DC. OSMRE gives the awards to coal mining companies that achieve the most exemplary mining and reclamation in the nation. Typically, winners demonstrate a commitment to using sound mining practices and executing effective reclamation plans designed to enhance post-mining beneficial use of the land. This year features three winners overall: two in the National Award category, which recognizes the highest-quality project in active-mine reclamation; and one Good Neighbor Award, given to a company that has demonstrated commitment to the community in which the mine operates.

**WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY**  
**October 15-24, 2014**

**Highlights of Travel, Meetings, and other Public Events**

From **October 16-18**, USGS Acting Director, Suzette Kimball, will participate with students and scientists at the 2014 SACNAS (Society for Advancement of Hispanics/Chicanos and Native Americans in Science) National Conference in Los Angeles, Calif. SACNAS is a society of scientists dedicated to fostering the success of Hispanic/Chicano and Native American scientists—from college students to professionals—to attain advanced degrees, careers, and positions of leadership in science.

From **October 19-21**, Suzette will participate in a panel discussion on oil transport at the 2014 GSA (Geological Society of America) Annual Meeting in Vancouver, B.C. (CANADA).

From **October 21-23**, Suzette will update members on USGS Great Lakes research and budget at the Council of Lake Committees Meeting in Romulus, Mich.

From **October 23-24**, Suzette will meet with USGS Northwest Region Center Directors in Golden, Colo. and visit staff and facilities at the Denver Federal Center.

**Public Announcements**

Wednesday, October 15

Nothing to report.

Thursday, October 16

**USGS Participation in the Great ShakeOut:** At 10:16 a.m. (local time) on **October 16**, the worldwide ShakeOut earthquake drill will take place. The ShakeOut began in California in 2008 and has since spread to other states and regions, including the Southeast which held the first SouthEast ShakeOut in 2012, after the 2011 Virginia earthquake. This year 43 states and U.S. territories, and several other countries, are officially involved. The USGS will participate in a number of events and activities in support of the ShakeOut drill and to promote earthquake preparedness. USGS Acting Director will participate in a press event in Washington, DC, a number of online products, information and presentations will be made available, USGS scientists will participate in the opening ceremony for Thomas Jefferson Elementary School, which was damaged in the 2011 Virginia earthquake, and a USGS Top Story about the ShakeOut will be posted. *[THIS WAS IN LAST WEEK'S REPORT]*

Friday, October 17

Nothing to report.

Saturday & Sunday, October 18 & 19

Nothing to report.

Monday, October 20

**News Release—City Votes on USGS Research Project:** During the week of **October 20**, USGS and Reclamation will issue a joint news release about the Waco Treatment Wetlands project. On **October 21**, the City of Waco, Texas City Council is scheduled to vote on final construction approval of the Waco Treatment Wetlands, a multi-disciplinary/partner research project to demonstrate whether an innovative constructed wetlands design can remove endocrine disrupters that occur in reclaimed wastewater. USGS, Reclamation the City of Waco and Baylor University are all involved. Once approved, construction of the wetlands could start in the next month. Media coverage is anticipated. *[THIS WAS IN LAST WEEK'S REPORT]*

Tuesday, October 21

Nothing to report.

Wednesday, October 22

Nothing to report.

Thursday, October 23

Nothing to report.

Friday, October 24

**News Release–USGS at The Wildlife Society:** On **October 24**, USGS will issue a tip sheet to the media about USGS science being presented at The Wildlife Society Annual Conference, October 25-30, in Pittsburgh, Penn. Presentation topics include wildlife disease, conservation genetics and genomics, climate change, amphibian declines, effects of wastewater discharges from oil and gas drilling on wildlife, using unmanned aerial systems for studying wildlife populations, polar bear movement, wind energy and birds, invasive species, and more.

TBD

**News Release–New Reports of Floridan Aquifer:** In the **coming weeks**, USGS will release two reports as part of an assessment of groundwater availability of the Floridan aquifer, one of the Nation's principal aquifer systems, which serves Florida and parts of Georgia, Alabama and South Carolina. A news release will announce the availability of the new reports.

**News Release–Wichita's water-use strategy helps preserve the Equus Beds aquifer:** **Next week**, USGS will release a new report, prepared in cooperation with the city of Wichita, Kan., that describes the water-use strategy employed by Wichita that has helped preserve the Equus Beds aquifer during the recent drought of 2011-12. The Equus Beds aquifer is one of the primary water-supply sources for the city. A news release is planned.

**News Release–Funding for new Gages in Minnesota:** In the **coming weeks**, USGS will announce NSIP funding for new streamgages in Minnesota. The announcement will be similar to the September 9 announcement for new streamgage funding in Idaho and distributed to Minnesota media outlets.

**News Release–Climate Change Effects in the Lake Michigan Basin:** In the **next month**, USGS will release a new report that discusses likely hydrological effects of climate change on the Lake Michigan Basin through 2099. Findings suggest increased streamflow throughout the basin and late growing seasons. A news release is planned.

**News Release–Drought Impacts on Mojave Bird Species:** In the **coming weeks**, USGS will announce a new paper to be published in the journal *Auk*. The study, led by the University of Arizona, finds that drought-caused delays in nesting, coupled with the effects of nest depredation and parasitism, will have a negative effect on birds in the Mojave Desert. A news release is being planned.

**News Release–Updates Alabama Maps Available:** **Next week**, USGS will announce the availability of 840 new US Topo map quadrangles for Alabama. The revised maps feature a new design that was launched earlier this year and replace the first edition US Topo maps for those states. A news release is planned.

**News Release–National Scenic Trails Added to Maine Maps:** **Next week**, USGS will announce new maps released for Maine which include segments of the Appalachian National Scenic Trail. Produced in partnership with The National Park Service and the Appalachian Trail Conservancy, several of the 715 new US Topo quadrangles for the state now display parts of the Trail. A news release is planned.

**News Release—US Topo Features Mountain Bike Trails:** At the **end of October**, USGS plans to announce the inclusion of mountain bike trails to upcoming US Topo map quadrangles. The first state maps to feature mountain bike trails are projected to be in Arizona. The mountain bike trail data is provided through a partnership with the International Mountain Biking Association and MTB Project, which collects and verifies data collected by local IMBA chapters, IMBA members, and the public. A news release is planned.

**News Release—2014 CSC Project Award Announcement:** During the **first week of November**, USGS will distribute several press releases announcing the 2014 research projects funded by the 8 Climate Science Centers and USGS National Wildlife and Climate Change Science Center. Each CSC will have a separate, locally distributed news release and a comprehensive release will be distributed nationally.

**News Release—Marcellus Development Impacts on Salamander Ranges:** In the **coming weeks**, USGS will announce a new paper that indicates that habitat loss may be significant for terrestrial salamanders in the Marcellus Shale region as a result of oil and gas development activities. USGS researchers modeled losses of forest habitat in the Marcellus shale play, and estimated the corresponding reduction in forest-dependent salamander ranges based on a variety of shale gas development scenarios. All scenarios showed forest loss and potentially large range restriction for the salamanders. Despite the uncertainty in the species' distribution modeling, the results indicate that habitat loss may be significant, implying a real potential impact on terrestrial salamander populations. Given other threats facing terrestrial, range-restricted species, such an impact from a single source would be concerning. A full assessment of extinction risk will require better and more extensive data, and though the scenarios are insufficient to fully assess this risk, the results from our simulations are a first step. The paper will be published in the journal *Biological Conservation*, and a news release is planned.

**News Release—USGS to Release Study on Disease Virulence Evolution:** In the **coming weeks**, a news release will announce new research, led by the USGS, that finds that diseases that cause debilitating symptoms are expected to evolve lower virulence along the epidemic front compared to the epidemic origin. Motivated by real-world observations of a new disease in songbirds, a mathematical investigation shows that disease virulence—the increased death rate of infected individuals—is expected to evolve to lower levels along the epidemic front compared to the disease origin. The paper will be published in *The American Naturalist*.

**News Release—Freshwater Fisheries and Global Food Security:** In the **coming weeks**, Michigan State University will distribute a news release describing the importance of inland fisheries to global food security, the challenges faced due to competing demands for freshwater and possible solutions. USGS scientists contributed to the publication and will be identified in the news release. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Characterization of Groundwater Quality in the Bakken Area:** In the **coming weeks**, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for future groundwater quality monitoring as energy development activities expand in the basin. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—NC Baseline Study for Hydraulic Fracturing:** In the **coming weeks**, USGS will announce a new study that examined groundwater quality samples collected in a potential shale gas production area in North Carolina. This report can be considered as baseline information for groundwater quality in the aquifers of the study area because the natural gas industry is not yet active in the state. The results showed that dissolved methane concentrations were low. The study will be published as a USGS Open-File Report. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Seal flu virus:** In the **next few weeks** the USGS National Wildlife Health Center will issue a national news release announce a new report showing that the avian flu virus that caused widespread harbour

seal deaths in 2011 can easily spread to and infect other mammals and potentially humans. The release will likely be joint with the St. Jude's Children's Memorial Hospital. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—The impact of road salt on watersheds:** In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Upper Klamath ET Maps:** During **October**, USGS will distribute a press release for upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area. *[THIS WAS IN LAST WEEK'S REPORT]*

### **Major Press Inquiries**

**NPR Interview on VOCs from Produced Waters Pits:** USGS scientist Bill Orem was interviewed by *NPR* regarding research he is conducting on occurrence of volatile organic compounds emitted from an open water storage pit in West Virginia used to store produced waters from natural gas production. The interview was in response to a story recently published in *Inside Climate News* on the same subject.

**Washington Post Series on Alaska Mapping and 3DEP:** *Washington Post* reporter Lori Montgomery recently completed a series of in-depth interviews with USGS scientists and Alaska state representatives about the numerous applications and benefits of the national 3D Elevation Program (3DEP). The feature articles are expected to be published within the **next two weeks**.

**NY Times Joins Change Arctic Ecosystems Seminar:** James Gorman with the NY Times *ScienceTake* Video Channel joined a recent USGS Changing Arctic Ecosystems (CAE) seminar which presented CAE program results and research plans for the next 5 years.

**Newsday Inquiry on Fire Island Research:** USGS geologist Cheryl Hapke was interviewed by *Newsday* about natural beach recovery after storms and the measurements USGS is taking related to Fire Island, N.Y. The interview did not address plans to rebuild sand dunes on Fire Island or the lawsuit that is currently delaying that project.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Nothing to report.

### **30-60 Day Look Ahead**

**Forthcoming USGS Polar Bear Research Papers:** In the **coming months**, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. *[THIS WAS IN LAST WEEK'S REPORT]*

## WEEK-AHEAD REPORT: BUREAU OF RECLAMATION

October 15 – October 24, 2014

**Highlights of Travel, Meetings, and other Public Events:** *Principal Deputy Commissioner Estevan Lopez will be attending Reclamation's regional stakeholders meeting in Salt Lake City on the morning of October 15. This event will be webcast on the internet. This event will be followed by a meeting of Reclamation's leadership team on the afternoon of the 15<sup>th</sup> and on the 16<sup>th</sup>.*

### **Public Announcements**

Tuesday, October 14

**Long-Term Experimental and Management Plan Environmental Impact Statement (LTEMP EIS) for Glen Canyon Dam (AZ):** Representatives from Reclamation and its co-lead from the National Park Service will meet with the Colorado River Basin States via webinar to continue discussions on a preferred alternative for the LTEMP EIS. A primary function of the LTEMP EIS will be to continue the successful experiments completed under the Glen Canyon Dam Adaptive Management Program. Dam operations and other actions under the jurisdiction of the Secretary of the Interior will be considered for inclusion in alternatives in the LTEMP EIS, in keeping with the scope of the Grand Canyon Protection Act.

**American Water Resources Association (ID):** Reclamation will participate on a panel at the Idaho State Section of the American Water Resources Association in Boise, Idaho. The panel is entitled "Responding to Climate Change – What We Know and What We Are Doing."

**Release of a Final Environmental Assessment and Finding of No Significant Impact for Salinity Projects (CO):** Reclamation will announce the release of a final environmental assessment (EA) and Finding of No Significant Impact (FONSI) for the Bostwick Park Water Conservation District's Siphon Lateral Salinity Control Project in Montrose County, Colorado, and the Forked Tongue/Holman Ditch Company's Salinity Control Project located in Delta County, Colorado. The purpose of both projects is to improve the efficiency of water delivery to canal users and reduce salinity loading in the Colorado River Basin.

**New Mexico Summit on Water (NM):** Reclamation will participate in a summit on water hosted by Representative Michelle Lujan Grisham, D-N.M., at the University of New Mexico. Representatives will participate on panels on New Mexico's Water Resources and Technological Solutions to Water Scarcity – Produced and Brackish Water. Media is invited.

**Public Hearings on Upper San Joaquin River Basin Storage Investigation (CA):** Reclamation will conduct public hearings on October 14 in Sacramento and October 16 in Fresno on environmental documents for a proposed dam on the upper San Joaquin River at Temperance Flat, about 25 miles northeast of Fresno in California's Central Valley. The Draft Environmental Impact Statement and Notice of Availability were released on September 5.

**Public Comment Period Open on Windy Gap Excess Capacity Contract with Colorado Municipal Subdistrict (CO):** Reclamation, along with the Northern Water Conservancy District and Northern Water's Municipal Subdistrict, opened the 30-day comment period for the Windy Gap Excess Capacity Contract. The contract would allow the Subdistrict to use excess, or unused, capacity in Reclamation's Colorado-Big Thompson Project for the Windy Gap Project and future Windy Gap Firming Project. The comment period closes November 7.

**Crow Irrigation Project Rehabilitation and Improvement (MT):** The Crow Tribe has submitted a Draft Programmatic Environmental Assessment (Draft EA) for Reclamation to make available for public review and comment. The comment period closes November 21.

**Texas v. New Mexico Water Lawsuit:** The U.S. Supreme Court will potentially release orders on this issue today. The United States has joined the case regarding the Rio Grande Project water operations. The Court had previously accepted the case, but gave New Mexico another chance to seek dismissal. Parties in the lawsuit are awaiting an order from the Court on whether the case will proceed and the direction.

Wednesday, October 15

**Tour of El Vado Dam and San Juan-Chama Project (NM):** Reclamation will lead a tour for members of the Middle Rio Grande Conservancy District Board of Directors on October 15-16. Board members will see areas of the dam and projects in need of repair and receive a general briefing on the workings of the project.

**Columbia River Basin Technical Management Team Tour (WA):** The Columbia River Basin Technical Management Team will meet at Grand Coulee Dam and tour parts of the facility. The Technical Management Team is an inter-agency technical group responsible for making recommendations on dam and reservoir operations in the Columbia River Basin.

**Public Hearings on Draft EIS/EIR for Long-Term Water Transfers (CA):** On September 30, Reclamation and the San Luis & Delta-Mendota Water Authority released the Long-Term North-to-South Water Transfers Draft Environmental Impact Statement/Environmental Impact Report for public review. Public hearings will be conducted Oct. 15 in Sacramento, Oct. 16 in Los Banos, and October 21 in Chico, California. The Draft EIS/EIR addresses transfers of Central Valley Project (CVP) and non-CVP water supplies that require the use of CVP or State Water Project facilities to convey the transferred water. Public comments are due by December 1.

**Submittal of the Initial 2015 Water Plan to the State Board (CA):** Reclamation and the California Department of Water Resources will submit an initial Water Year 2015 Drought Contingency Plan to the State Water Resources Control Board outlining planned operations from October 15, 2014, through January 15, 2015. The plan will be updated as necessary based on changing circumstances that could include additional conditions in SWRCB regulatory approvals as well as federal Endangered Species Act and California Endangered Species Act requirements. Most importantly, the Plan is based upon hydrologic conditions as of the end of September 2014. A plan for the remainder of the 2015 water year will be submitted by January 15, 2015.

Thursday, October 16

**Middle Rio Grande Endangered Species Collaborative Program Executive Committee Meeting (NM):** Reclamation will participate in the Middle Rio Grande Endangered Species Collaborative Program Executive Committee meeting in Albuquerque. Discussions will include updates on the current Middle Rio Grande consultation, summer water operations, the Middle Rio Grande Biological Opinion and the transition process of the collaborative program to a recovery implementation program.

**Methow Valley Irrigation District Instream Flow Improvement Project (WA):** Reclamation will participate in a celebration to kick off construction of the Methow Valley Irrigation District Instream Flow Improvement Project in north central Washington State. The construction will include converting two aging open canals to a ground water source enclosed system and a surface supplied pressurized pipe system. The \$10 million project is funded by the Office of the Columbia River, Salmon Recovery Fund, and Priest Rapids Coordinating Committee and was designed by Reclamation.

**Students to Visit Trinity River Restoration Program Sites (CA):** Staff from the Trinity River Restoration Program will host a field day for 7-8 graders as part of the TRRP educational outreach activities. Students will visit a newly constructed restoration project and learn how the physical features provide habitat, increase geomorphic complexity, and provide riparian cover for fish and wildlife species of the Trinity River.

**Prehistoric Remains Discovered in Reservoir (ID):** On October 8, a volunteer working in the drawn

down areas of American Falls Reservoir discovered mastodon or mammoth fossils. A cultural resources inventory of the site will be performed on October 16. Reclamation cultural resource staff is working with a private landowner and Power County Sheriff's Department to protect and restrict site access. American Falls Reservoir is part of the Minidoka Project and is located 180 miles southeast of Boise, Idaho.

#### Friday, October 17

**Updated Mussel Coatings Research Report:** Reclamation will release a report and video summary of research and findings on mussel coatings. While no commercially available foul-release coating has been found that prevents mussel attachments, several products have shown promise. This is an update to research that began in 2008.

#### Saturday, October 18

**Return of the Salmon Festival (CA):** Reclamation will participate in the 23<sup>rd</sup> annual Return of the Salmon Festival at the Coleman National Fish Hatchery in Anderson, California. Visitors will be able to view large numbers of fall-run Chinook salmon returning to Battle Creek and the hatchery and all aspects of day-to-day hatchery operations. Reclamation's booth will focus on the importance of water conservation and how to "Use Water Wisely."

**Let's Move Outside/Nature Hike at Lake Berryessa (CA):** Reclamation will host a Let's Move Outside/Nature Hike–Fall Foray at Lake Berryessa in Central California. Participants will join a Park Ranger for a hike on the Smittle Creek Trail along the western shoreline, exploring the unique Blue Oak woodland and the beauty and tranquility of Lake Berryessa.

#### Sunday, October 19

**Let's Move Outside/Mormon Creek Paddle at New Melones Lake (CA):** Reclamation will host a Let's Move Outside Mormon Creek Paddle adventure led by a Park Ranger at New Melones Lake in Central California. Participants will experience the beauty of New Melones from a unique perspective while on the outlook for river otters, bald eagles, osprey, and other wildlife.

#### Monday, October 20

**Drought Contingency Planning for the Colorado River (UT):** Reclamation will present preliminary modeling results at a meeting with Upper Basin states and other stakeholder representatives in Salt Lake City, Utah. Reclamation has been working with the Upper Basin States and stakeholders on drought contingency planning for the Colorado River. The region is currently conducting modeling of potential scenarios of Extended Operations that, within existing operational and environmental commitments, would move water from higher Colorado River Storage Project reservoirs to Lake Powell to prevent Powell elevations dropping below critical elevations for delivery and power generation.

#### Tuesday, October 21

**The Columbia Basin 2014 Conference (WA):** Reclamation will participate in the Columbia Basin 2014 Conference – Learning from Our Past to Shape Our Future, held in Spokane, Washington from October 21-23. This is an international conference that will explore the future of the Columbia River in an innovative format with breakout sessions, graphic facilitation and inspirational arts and culture activities as they relate to the Columbia River.

**Brazos River Demonstration Wetland Gets Final Approval (TX):** The proposed Brazos River Pilot Wetland is expected to get final construction approval from the City of Waco. If approved, construction is anticipated to begin in November. This pilot will investigate the ability of an innovative constructed wetland design to

attenuate endocrine disrupting chemicals from reclaimed wastewater. A Federal-state-local partnership was formed to design, construct and monitor the demonstration wetland among Reclamation's Technical Service Center and Oklahoma-Texas Area Office, U.S. Geological Survey, Texas Water Development Board, Waco Water Utilities Services Department, and Baylor University. Reclamation and USGS are working together to provide information to the City of Waco for a joint news release.

**Damsite Recreational Area at Elephant Butte Public Meeting (NM):** A public meeting on the plans for New Mexico State Parks to turn the land-based portion of the Elephant Butte's Damsite Recreational Area back over to Reclamation is tentatively scheduled in Elephant Butte. Reclamation's Albuquerque Area Office and New Mexico State Parks continue to iron out the details of the transfer.

Wednesday, October 22 - Friday, October 24

Nothing to report

Saturday, October 25

**Let's Move Outside/"Creepy Crawlies of Natural Bridges" Hike at New Melones Lake (CA):** Reclamation will host a "Creepy Crawlies of Natural Bridges" 2-mile hiking adventure at New Melones Lake in Central California. Led by a Park Ranger, participants will learn about some of the "scary critters" at New Melones Lake, their importance in our ecosystem, and why they're really not scary at all.

### Major Press Inquiries

Stephanie Ogburn, a freelance writer based in Colorado, is developing a story for the University of Wyoming's publication called *Western Confluence*. The story is about how scientists are working to predict the future of water in the West, particularly focused on the Colorado River. She will be speaking with Reclamation's Science Advisor David Raff on October 14. Reclamation is scheduling an interview with staff from the Colorado River Basin Study. It is not known when it will be published.

On October 6, *Mail Tribune* reporter Mark Freeman reported that record draw down at Emigrant Reservoir revealed artifacts from an old filling station. Oil-based hazardous materials may be present, but Reclamation believes the likelihood is small. A retired Forest Service employee has been hired to inventory possible archaeological resources. The reservoir, part of the Rogue River Project, is located in Medford, Oregon, near the California border. The area, known as Klamath Junction was inundated when Emigrant Dam was doubled in height in the 1960s. Also, on October 9, *Reuters* reporter Courtney Sherwood interviewed Bend Field Office Manager Doug DeFlitch on the subject.

### Items of Note/Expected Legislative, Legal, and Policy Issues:

#### **Klamath River Flow Increase and Fish Health Concerns (Oregon/California):**

On October 3, after coordinating with a technical team of Federal and Tribal experts, Reclamation determined that additional water would be released from PacifiCorp's Iron Gate Dam to address ongoing fish health concerns resulting from an *Ichthyophthirius multifiliis* (also known as "Ich") parasite outbreak affecting coho and Chinook salmon in the Klamath River. Findings of Ich have been observed in fish collected from the mainstem Klamath River over the past several weeks, with most of the cases classified as severe. As a result, on October 4, flows at Iron Gate Dam began to increase from 1,000 cubic feet per second (cfs) to 1,750 cfs for approximately 10 days. Consistent with the 2013 Biological Opinions on the operation of the Klamath Project, this flow event is anticipated to use 16,000 acre-feet from PacifiCorp's reservoirs and will have no effect on Upper Klamath Lake elevations. (UNCHANGED FROM LAST WEEK)

**Supreme Court Hears Republican River Compact Case (NE/KS):** On Tuesday, October 14, the U.S. Supreme Court heard oral arguments related to a longstanding dispute in the Republican River basin. Approved by Congress in 1943, the Republican River Compact (Compact) apportioned waters of the Republican River basin among the states of Colorado, Kansas, and Nebraska. In May 2010, Kansas filed a complaint with the U.S. Supreme Court that Nebraska was violating both the Compact and the 2002 Final Settlement Stipulation by failing to administer groundwater pumping in a meaningful way and by failing to take actions to avoid future violations. In 2013, a Special Master recommended that Kansas be awarded damages of \$5.5 million for Nebraska's overuse of water in 2005 and 2006; and recommended changes in accounting procedures for computing consumption of imported water supply credit. For the past two years, Nebraska has issued closing notices to Reclamation's reservoirs in the Republican River basin as Nebraska administers surface water to comply with the Compact. Reclamation views surface water users were disproportionately impacted in Nebraska and would like to see hydrologically connected waters in the Republican River basin managed so that surface and groundwater users equitably bear the burden of Compact compliance.

**Structural Safety at Steinaker Dam (UT):** On September 24, a slope failure was observed at Steinaker Dam near Vernal, Utah. As a result, a Response Level 1 alert, which is the lowest level of risk alert and is used when an immediate threat is not present, was declared for the Dam, pending further investigation. On October 6, an underwater inspection of the slide area and outlet works was conducted and did not find any impacts to the outlet works. Then on October 9, a risk analysis of the dam and slide area was performed and a decision was reached to terminate the Response Level 1 alert. As part of that decision, it was also determined that Uintah Water Conservancy District could resume filling the reservoir with an allowable rise of 0.2 feet per day and instrumentation monitoring of the dam was reduced from daily to 3 times per week. Reclamation's Dam Safety staff will produce a decision document of these actions.

**Lawsuit filed by EDC/CalTrout (California):** On October 6, 2014, the Environmental Defense Center (EDC), on behalf of California Trout, Inc. (CalTrout) filed suit against Interior and Reclamation regarding alleged Endangered Species Act violations associated with the Cachuma Project and listed steelhead fish in Hilton Creek, located in Santa Barbara County, California. On or about May 30, 2014, EDC/CalTrout issued a 60-day notice of its intent to sue. In June, Reclamation and the Solicitors Office held a conference call with EDC and CalTrout to apprise them of the various remedies and ongoing actions Reclamation is taking to improve the durability and reliability of the watering system intended to provide continuous flows into Hilton Creek, an otherwise ephemeral stream. On September 11, EDC/CalTrout issued a demand letter and request to engage in binding settlement. In consultation with Interior, Reclamation declined the request. Reclamation has taken a number of actions to improve the reliability and durability of the Hilton Creek watering system including certain replacements, repairs and upgrades. In addition, a contract for an emergency backup system was awarded on September 3, and is expected to be operational before the end of this calendar year.

### **30-60 Day Look Ahead**

**Signing Ceremony for a Hydropower MOU Action Plan:** In late October, Reclamation, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new interagency Sustainable Hydropower Action Plan (Phase II) to be released details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing.

**WaterSMART Ceremony with Three Sisters Irrigation District (OR):** In late October, WaterSMART recipient Three Sisters Irrigation District will celebrate the completion of a four-year project to up-convert their irrigation system to pressurized pipe and added low-head hydropower capability. The event will be attended by districts, the contractor and Congressional and local representatives. Deputy Secretary Mike Connor has been

invited.

**Get Outdoors Nevada Day (NV):** On October 25, Reclamation will support Get Outdoors Nevada Day at Craig Ranch Regional Park in Las Vegas by staffing an exhibit.

**Colorado River Basin Salinity Control Advisory Council and Forum Meetings (NM):** Reclamation will participate in a meeting of the Colorado River Basin Salinity Control Advisory Council and Colorado River Basin Salinity Control Forum on October 29-30, in Santa Fe, New Mexico. The purpose of the meetings is to discuss the accomplishments of federal agencies and make recommendations on future activities to control salinity. Participating agencies on the advisory council include Bureau of Land Management, U.S. Fish and Wildlife Service, U.S. Geological Survey, Natural Resources Conservation Service, and the EPA.

**Provo Reservoir Canal Enclosure Project Title Transfer Ceremony (UT):** On October 31, Reclamation and the Provo River Water Users Association will hold the title transfer ceremony for Provo Reservoir Canal (now piped and renamed the Provo River Aqueduct) with the passage of the amendment to the Provo Reservoir Canal Enclosure Project Title Transfer Act. Invitations have been extended to the Principal Deputy Commissioner Estevan López and Principal Deputy Assistant Secretary Jennifer Gimbel.

**FY 2015 WaterSMART Grant Funding Opportunity Announcement:** In early November, Reclamation will begin announcing FY 2015 WaterSMART funding, beginning with the WaterSMART Water and Energy Efficiency Grants and Title XVI Project funding. Selection of the FY 2015 Basin Studies will begin. (Included in last week's report)

**Reasonable and Prudent Alternative Annual Science Review (CA):** The Reasonable and Prudent Alternative Annual Science Review is scheduled in Sacramento on Nov. 6-7. This event, which will focus on the drought and drought operations, is a requirement stated within the 2008 and 2009 National Marine Fisheries Service Biological Opinion for the Coordinated Long-term Operation of the federal Central Valley Project and the California State Water Project. Each year, the meeting evaluates how the RPA actions were implemented and their effectiveness for Endangered Species Act-listed species during the past year. The conference is held with NMFS and the U.S. Fish and Wildlife Service, and the public is invited to attend but not participate.

**Reclamation's Climate Adaptation Strategy:** Reclamation is addressing Departmental feedback on its Climate Adaptation Strategy, and anticipates finalizing the strategy by early November. This is Reclamation's strategy and response to global climate change as it relates to managing water and power in the West. The strategy builds upon Reclamation's ongoing activities to incorporate climate adaptation more comprehensively across mission areas, programs and decision making. [UPDATED FROM LAST WEEK'S REPORT]

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY–INDIAN AFFAIRS  
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION  
October 15 to October 24, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On October 15, the BIA Director Black will provide the keynote at the 2014 Tribal/State Indian Child Welfare Act (ICWA) Conference in Oregon.

On October 15-16, the AS-IA will present at the 8th Annual Rennard Strickland Lecture at the University of Oregon law school.

On October 15-16, the BIA Rocky Mountain Region is scheduled to meet with the Water Board and Eastern Shoshone Business Council and the Northern Arapaho Business Council regarding Wind River Irrigation Project. A staff member from Senator Barrasso's Office, Senator Committee on Indian Affairs, will attend the meeting and tour the site.

On October 15-17, the Deputy Assistant Secretary-Management will attend the listening session of the U.S. Department of Justice's 9th Annual Government-to-Government Violence Against Women Tribal Consultation in Rapid City, SD.

On October 16, the BIA Director Black will participate in the Southwest Conservation Legacy youth project with Fish & Wildlife Service as part of the Department's Youth Initiative.

On October 17, the Chief of Staff to AS-IA and BIE Director Roessel will attend the 2014 National Indian Education (NIEA) convention in Anchorage, Alaska. SIPI President Allison and Aleta Suazo also will be there.

On October 22, the AS-IA will meet with the Chairwoman of the Menominee Indian Tribe of Wisconsin on the status of the two-part determination and compact issues.

On October 22, Indian Affairs leadership and the BIA Chief of Human Services will meet with Deputy Commissioner - Department of Health and Human Services, Administration for Child and Families (ACF), and the Casey Family Programs to follow up on action items at the Spirit Lake Reservation.

On October 23, the AS-IA will be attending Yale Law School's Alumni Week to receive the 2014 Yale NALSA Alumni Achievement Award.

On October 23-25, the Alaska Federation of Natives (AFN) 2014 annual conference will take place in Anchorage, Alaska. AS-IA staff will attend.

**Public Announcements**

Wednesday, October 15

Nothing to report

Thursday, October 16

BIE staff will hold a consultation with Tribes and Tribal College stakeholders on the draft rewrite of the Tribally Controlled Colleges and Universities Act regulations (25 CFR Parts 41.1-69) at the NIEA conference in Alaska.

Friday, October 17

Nothing to report

### Saturday & Sunday October 18 & 19

We have three gaming compact decisions due on October 18, including two in Nevada likely to be approved and one in California, for the Karuk Tribe, in which we have been working through some problems. The AS-IA office is working on the decisions and notification plans.

### Monday, October 20

Nothing to report

### Tuesday, October 21

Nothing to report

### Wednesday, October 22

Nothing to report

### Thursday, October 23

The Special Education program will send memoranda and letters to 60 high school programs to announce that the SY 2014-15 Indicator 13 Desk Audit that will begin the week of November 17. The program will provide training to help prepare schools for the Desk Audit.

### Friday, October 24

The SIPI Board of Regents will meet at the SIPI campus in Albuquerque, NM. Dr. Roessel may attend this meeting.

### **Major Press Inquiries**

Biomass Magazine requests information on tribal energy and mineral development grants in New Mexico.

KMJ (Fresno, CA) requests a statement regarding the Chukchansi Casino armed takeover attempt.

WKRK-TV (AL) requests an interview with the BIA Office of Justice Services to confirm that the Poarch Creek Law Enforcement has suspended an officer accused of sexual misconduct.

Viacom requests information on the Secretary's Youth Program for a documentary with MTV about Native Americans and music.

The Press Enterprise (CA) requests information for a story about Proposition 48, the initiative on the California ballot in November involving the North Fork Rancheria gaming compact.

LA Times (CA) requests an interview to discuss the proposal to change the federal recognition process.

The Riverside (CA) Press-Enterprise wants information about fee-to-trust for off-reservation gaming, including answers to the following: how many fee-to-trust applications were approved under the Bush Administration and the Obama Administration, how many applications are pending, and when will the BIA issue decisions on the Los Coyotes and North Fork Rancheria applications.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

DOI staff plan to meet with staff from the Passamaquoddy Tribe to discuss protection of the alewife fishery in the St. Croix River Watershed, Maine. At issue is whether the US and Canada will ask the U/S Canada International Joint Commission (IJC) to regulate St. Croix River fishway structures for the protection of the alewife fishery and other marine species.

Indian Affairs and the Department of State are drafting guidance to US embassies regarding the repatriation of sacred objects and human remains from foreign museums.

The AS-IA's office of Regulatory Affairs and Collaborative Action is working with BIE on developing a call for nominations to a negotiated rulemaking (25 CFR 30) committee to address adequate yearly progress (AYP) in Bureau schools, as well as school transportation and school consolidation and closure.

### **30-60 Day Look Ahead**

On October 27, the BIA Director will roll out its first trial run of the Superintendent Boot Camp Course in Albuquerque, NM. The boot camp will introduce BIA Superintendents to the basic knowledge and key survival skills needed to carry out their duties and functions effectively.

Between October 26 and November 3, ASIA, BIA, and BIE leadership, and the Haskell and SIPI Presidents, will attend the NCAI's 71st Convention in Atlanta.

On October 26 and 27, DOI will hold the following tribal consultations and listening sessions at the NCAI conference in Atlanta: Secretarial Elections, Indian Water Rights Settlement Program, and Indian Child Welfare Act compliance. There will also be roundtable discussion on Sacred Sites.

On November 4-5, the next quarterly Tribal Interior Budget Council (TIBC) will take place at the Washington Plaza Hotel at Thomas Circle in Washington, D.C.

On November 6, the BIE American Indian Language Summit will take place in Albuquerque, NM.

On November 6, the DOI Indian Affairs National Native American Heritage Month event will take place at the OPM headquarters. The theme is "Native Pride and Spirit: Yesterday, Today and Forever."

On December 1-5, the 24th Annual BIA Tribal Providers Conference will be held in Anchorage, AK.

On December 9, Southwestern Indian Polytechnic Institute's President Allison and Vice President Christensen will present to the New Mexico Legislative Finance Committee.

On December 9-10, the American Indian Chamber of Commerce Conference will take place in Washington, D.C. The Division of Economic Development (DED) is helping the Chambers of Commerce plan and implement this event, the first-ever conference organized by all of the American Indian Chambers in the U.S.

**WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)  
October 15<sup>th</sup> –October 24<sup>th</sup>, 2014**

**Highlights of Travel, Meetings, and other Public Events**

October 20-22 – Vincent G. Logan, Special Trustee will travel to Minneapolis, Minnesota to promote financial education.

**Public Announcements**

Wednesday, October 15

October 15, 2014, Eastern Navajo Fiduciary Trust Officer (FTO) will be present at the Land Buy-Back Program meeting at the Southwest Regional Bureau of Indian Affairs (BIA) Office in Albuquerque, New Mexico.

October 15, the Papago Agency FTO will be present at the Southern Arizona Water Rights Settlement Act implementation meeting at the Tohono O’odham Nation San Xavier District in Tucson, Arizona.

October 15, the Cherokee and Eastern Oklahoma FTO will attend the Inter-Tribal Council Meeting of the Miami Area Tribes held in Miami, Oklahoma. The FTO regularly attends these monthly meetings to maintain accountability to tribal leaders and beneficiaries. [THIS WAS IN LAST WEEK’S REPORT]

Thursday, October 16-Monday, October 20

None to report.

**WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS**  
**October 8-17, 2014**

**Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events**

October 15-17 - Travel to the Commonwealth of the Northern Mariana Islands (CNMI) for first courtesy visits as AS-IN

October 15 – Meetings with Commonwealth of the Northern Mariana Islands (CNMI) Lt. Governor Jude Hofshneider ; CNMI Capitol Improvement Project Team; CNMI House and Senate Leaders (Majority and Minority); CEO of Commonwealth Healthcare Corporation; Saipan Chamber of Commerce; Chief NPS Ranger for tour of American Memorial Park

October 16 – Meetings with Commonwealth Utilities Corporation Officials; President of the Northern Marianas College; Acting Secretary for the CNMI Department of Land and Natural Resources; and Director of the Division of Coastal Resource Management

October 17 – Visit to Tinian Island. Tour of historical sites and Capitol Improvement Projects and meeting with Tinian Mayor Ray DelaCruz.

October 17 – Visit with CNMI Coral Reef Management Team and OIA Coral Reef Initiative Project at Laulau Bay.

**Public Announcements**

**Press Release Issued by AS-IN** – On October 13, in connection with her first official visit to the Northern Mariana Islands and Guam, AS-IN issued a press release concerning her delivering the keynote remarks at an October 23 symposium which the Guam Economic Development Authority will host. Underscoring her role in improving the quality of life of the peoples of the territories and the freely associated states (FAS), AS-IN stressed in her press release that she supports programs that create economic opportunity and promote government efficiency in the territories and the FAS.

**Press Inquiries/Reports**

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Marshall Islands Government Budget** – On October 13 the Marshall Islands Government released the details of its appropriations bill for fiscal year 2015. Of the increase of \$28,500,000 from fiscal year 2014, about \$7,500,000 will go to the General Fund-Special Appropriations category, likely sourced from the Marshall Islands Marine Resource Authority's rising income associated with tuna fisheries. Compact funding increased by \$2,800,000, attributed to inflation adjustments in the Kwajalein Atoll landowner payments and the Marshall Islands Trust Fund. All other Compact Sectors include grants, mainly for health and education, totaling \$12,500,000.

**30-60 Day Look Ahead**

**AS-IN Travel to Guam and American Samoa** - AS-IN works with OIA staff and DOI Communications team on upcoming courtesy trips as follow:

**Guam** – Week of October 20<sup>th</sup>. Keynote speech to be delivered on Oct. 23<sup>rd</sup> at the Guam Economic Development Authority economic symposium.

**American Samoa** – Week of November 10<sup>th</sup>

Attached. And caveat: bureaus sometimes list multiple congressional districts in their project data sheets though it's clear we're not planning to acquire land in all of the districts, so I made some educated guesses about which district the funding would actually land in. Our partners who are more familiar with these projects might more correctly locate certain projects with different/adjacent districts - would love to know if they catch anything that needs correcting.

**Subject:** Briefing Assignment: Remarks at the National Workshop on Large Landscape Conservation - 10/23

Joel: You have been assigned the briefing materials for the Secretary's Remarks at the National Workshop on Large Landscape Conservation on 10/23. Also looping Comms per the attached chain to provide remarks.

Your briefing memo should provide context for why the event is taking place, important background information, your top-line message, participants/bios where available and relevant, and a tick-tock agenda.

Please submit your materials as soon as possible (we will include them in the Secretary's briefing materials as soon as we can after we receive them from you), with a deadline of **Tuesday, 10/14 at noon**, to dailybriefingbinder@ios.doi.gov so we can get it to the Secretary while she is on travel before the Internal Pre-brief on 10/17.

Thank you!

Elizabeth

## EVENT MEMORANDUM FOR THE SECRETARY

### INTERNAL PRE-BRIEF FOR REMARKS AT THE NATIONAL WORKSHOP ON LARGE LANDSCAPE CONSERVATION

DATE: October 16, 2014  
LOCATION: Office of the Secretary  
TIME: 2:00PM – 2:30PM

### REMARKS NATIONAL WORKSHOP ON LARGE LANDSCAPE CONSERVATION

DATE: October 23, 2014  
LOCATION: Atrium Hall, Ronald Reagan Building, 1300 Pennsylvania Ave NW  
TIME: 12:10PM - 1:05PM  
FROM: Emily Beyer, Deputy Press Secretary, OCO (202)568-0168

#### I. PURPOSE

You will be delivering keynote remarks at the National Workshop on Large Landscape Conservation, hosted by the Chesapeake Conservancy. The Workshop is a product of the Practitioner's Network for Large Landscape Conservation, an ongoing collaboration sponsored by Harvard's Lincoln Land Institute, FWS, NPS, U.S. Forest Service, and several academic and non-governmental institutes (*Note: A list of workshop sponsors is included as an attachment*). The goals of this Network, and by extension this Workshop, are to build the capacity and improve the policy framework for implementing large landscape conservation.

The Practitioner's Network has been developing this event for over a year in close collaboration with several Interior bureaus – in particular FWS, BLM, and NPS – and has been briefing Department leadership along the way. There are currently 480 registered attendees including practitioners from NGOs as well as state and federal agencies (including BLM, FWS, USGS, and NPS). Over two days, more than 75 sessions will touch on climate resilience, engaging and training the next generation of conservation leaders, geospatial data tools, indigenous cultural landscapes, farmland preservation, the Landscape Conservation Cooperatives and Climate Science Centers, the Western Governors' Crucial Habitat Assessment Tool (CHAT), traditional ecological knowledge, place-based conservation visions, urban conservation, and more.

Your speech will take place during Thursday's luncheon, and is the only scheduled event in its time slot. Your remarks are open to the press and will be recorded with the intent of posting them online.

#### II. PARTICIPANTS – NOTE: This list is subject to change.

- Lynn Scarlett, Managing Director, Public Policy, The Nature Conservancy; former Deputy Secretary of the Interior (2005 – 2009); former acting Secretary of the Interior (March 2006 – May 2006)

- DOI Staff: Liz Klein, Associate Deputy Secretary; Joel Clement, Director, Office of Policy Analysis; Emily Beyer, Deputy Press Secretary

### **III. AGENDA – NOTE: This agenda is subject to change.**

12:10 pm – You arrive at the Ronald Reagan Building and are greeted by Kerry McNellis who will lead you to the luncheon space

12:15 pm – You are greeted by Lynn Scarlett and led to the head table (*NOTE: you may need to be mic'ed backstage with a lavalier*)

12:30 pm – Lynn Scarlett begins the program by introducing you

12:31 pm – You give remarks (20 minutes suggested)

12:51 pm – Lynn Scarlett returns to the podium to begin moderating the Q&A (*NOTE: Lynn will call on those who indicate they have questions; staff will hand mics to those who are selected*)

12:56 pm – Lynn Scarlett closes the program; you depart en route to MIB

### **IV. TALKING POINTS**

*Suggested remarks will be forthcoming, and attached separately.*

### **V. BACKGROUND**

#### **Biography information on Lynn Scarlett**

Lynn Scarlett was named The Nature Conservancy's first Managing Director for Public Policy in September 2003. In her role, Scarlett oversees worldwide government relations and public policy efforts at the Conservancy and "helps align existing efforts at the international, federal and local levels, as well as further advance the Conservancy's global policy priorities." She is also charged with "building new capacity within the organization for policy research, innovation and advocacy."

Scarlett came to the Conservancy from Resources for the Future, where she served as Co-director at the Center for Management of Ecological Wealth since 2009. She has also been a visiting lecturer at the Bren School of Environmental Science and Management at the University of California at Santa Barbara, her alma mater.

Previously, Scarlett served two terms in the U.S. Department of the Interior under President George W. Bush, first as Assistant Secretary for Policy, Management and Budget and then as Deputy Secretary and Chief Operating Officer. Before her government service, she spent over 15 years at the Reason Foundation, a leading public policy research institute, where she served as Research Director, Vice President for Policy, and finally as President and Executive Director. In addition, Scarlett has led or served on numerous government and non-government task forces and working groups, including service as a lead author on the U.S. National Climate Assessment.

She has bachelors and master's degrees from the University of California, Santa Barbara, and has received the university's Alumni of the Year Award. Scarlett is also the author of many

published works on conservation, climate change and other topics. She is active in a variety of civic endeavors as well, including service on the National Parks Conservation Association Board of Trustees, the National Wildlife Refuge Association Board of Trustees, the American Hiking Society Board of Trustees, the Consensus-Building Institute and as Co-chair of the Large Landscape Conservation Practitioners Network.

In addition to her professional capabilities, Scarlett is passionate about the Conservancy's mission and spends much of her free time hiking, canoeing, bird-watching and creating pen-and-ink nature illustrations.

## **Background on the Chesapeake Conservancy**

*From their website:*

The Chesapeake Conservancy is dedicated to ensuring conservation, stewardship and access of the Chesapeake Bay, its lands and rivers. The Conservancy was created out of a merger between the Friends of the John Smith Chesapeake Trail and Friends of Chesapeake Gateways.

In the five years since the Friends of the John Smith Chesapeake Trail was first founded, we've come to realize that there is a need for a strong organization that can advocate, marshal new resources and forge new partnerships to increase public access to the Chesapeake and its great rivers, ensure conservation of the region's most treasured landscapes and waterways, and promote stewardship and enjoyment of the region's natural, cultural, and historic treasures.

The Chesapeake Conservancy fills this role and is this new organization.

**WEEKLY REPORT  
TO THE  
SECRETARY OF THE  
INTERIOR**

**November 3-7, 2014**

**CLOSE HOLD – DO NOT COPY – DO NOT DISTRIBUTE  
BEYOND PRESIDENTIALLY APPOINTED DOI EMPLOYEES**

**WEEK-AHEAD REPORT: Office of the Deputy Secretary**  
**November 3-7, 2014**

**Highlights of Travel, Meetings, and other Public Events**

**Buy-Back Program:** To date 44,573 offers have been sent to landowners with fractional interests at the Pine Ridge, Rosebud, Makah, Quapaw, Fort Belknap, Gila River, Northern Cheyenne, Flathead, Umatilla, Crow, and Lake Traverse Reservations. Since December 2013, the Program has mailed \$754 million in purchase offers, and more than 15,400 landowners have accepted offers. The total number of sales has reached nearly \$193 million, with nearly 333,000 equivalent acres purchased.

**Travel:** On November 5, I spoke at the BLM Sage Grouse and Rangeland Fire Conference in Boise, ID. November 6 – 8, I traveled to New Orleans, LA. On November 6, I took a tour of restoration efforts at Big Branch National Wildlife Refuge and Point Platte/Bonfouca Marsh creation project. On November 7, I traveled offshore to tour a Deepwater drilling rig and a production platform. Lastly, on November 8 I attended the National Park Foundation Board Meeting.

**White House Treaty Event:** On Monday, November 9, the White House Office of Intergovernmental Affairs and the White House Domestic Policy Council will host an event honoring the treaties between the United States Government and Native American tribes. This event will serve as the White House's cornerstone Native American Heritage Month event and will be hosted in collaboration with the Haudenosaunee Nation and the Smithsonian's National Museum of the American Indian. I will be making remarks to a group of approximately 50 tribal leaders and community members to reaffirm the strong government-to-government relationship between the US Government and tribes.

**Public Announcements**

**30-60 Day Look Ahead**

On November 13, the Deputy Secretary will lead a call with tribal leaders followed by a press call regarding the release of the Status Report on the Buy-Back Program.

On December 11, the Deputy Secretary will attend CRWUA in Las Vegas.

## MEMORANDUM

November 5, 2014

TO: Secretary Jewell  
FR: Interior Communications  
RE: Media Report

### **II. Highlights of Travel, Meeting, Speeches, and other Public Events:**

#### **Monday, November 10**

- VIDEO: Veterans Day message

#### **Tuesday, November 11**

- FYI: *Veterans Day*
- FYI: NPS: HBO's Concert for Valor on the National Mall

#### **Thursday, November 13**

- REMARKS: World Parks Congress opening plenary session

#### **Friday, November 14**

- REMARKS: World Parks Congress world leaders dialogue
- TBD: RELEASE: Kiribati Statement of Cooperation

#### **Saturday, November 15**

- FYI: POTUS in Australia for G-20 Summit

### **III. Digital Strategy Report**

- Conducted two meetings with the White House OSTP and the recreation.gov team to ensure the next contract for the site incorporates everything the public is looking for in a public lands reservation tool.

### **IV. Employee/Internal Communications Report**

- Memos from Senior Officials to DOI Employees:
  - (Nationwide) National Native American and Alaska Native Heritage Month - November 2014 - John W. Burden, Director, Office of Civil Rights
  - (D.C. Metro Area) Veterans Day Celebration - November 6 - Thomas Mulhern, Director, Office of Human Resources
- Examples of stories from DOI's Offices/Bureaus in [doi.gov/employees](http://doi.gov/employees):

### **V. Snapshot of Press Clips**

## **INTERIOR PARTNERS WITH NORTH FACE TO PROMOTE PUBLIC LANDS**

The North Face latest campaign promoting and protecting America's public lands

The Washington Examiner // Erica Jessop // November 4, 2012

The North Face launched their largest campaign in their company's history last week as they joined forces with the U.S. Department of the Interior to protect, preserve and celebrate public lands in support of the 21st Century Conservation Service Corps (21CSC).

Larry's Look: Getting kids involved at national parks

WCNC.com // Larry Sprinkle // November 3, 2014

CHARLOTTE, N.C. -- The U.S. Department of the Interior and The North Face are joining forces to help celebrate national public lands and aid young people and returning vets with jobs. On Larry's Look this morning, we were joined by U.S. Department of the Interior Secretary Sally Jewell and Global VP of The North Face, Aaron Carpenter.

Out on a ledge for Fashion

The Wall Street Journal // Ralph Gardner Jr. // November 2, 2014

When North Face offered to take me on an "adventure" to an undisclosed location, I didn't exactly jump at the idea. These days, I find being left alone adventure enough. If I really feel like pushing the envelope, I'll take a walk in the woods.

## **FYI: EVERGLADES FLOW EXPERIMENT**

Big green blob invades Everglades in water test

Miami Herald // Jenny Staletovich // November 4, 2014

Scientists trying to unravel the mystery of Everglades plumbing turned a marsh west of Miami neon green Tuesday after releasing millions of gallons of dyed water into a swath left parched for the last half century.

## **FYI: SEN. FEINSTEIN THREATENS TO BYPASS CONGRESS TO PROTECT MOJAVE SITES**

Feinstein may ask Obama to protect Mojave sites

The Washington Times // AP // November 4, 2014

LOS ANGELES (AP) - Sen. Dianne Feinstein wants to create two national monuments in the Mojave Desert, and she's considering asking the White House to act without approval of Congress.

**WEEK-AHEAD REPORT: CONGRESSIONAL AND LEGISLATIVE AFFAIRS**  
**November 10th – November 14th**

**Personal Message to the Secretary**

The House will not be in session next week.  
The Senate will be in session next week.

**Highlights of Travel, Meetings, and other Public Events**

Jonodev Chaudhuri's nomination hearing to head the National Indian Gaming Commission will be held before the Senate Indian Affairs Committee on Wednesday, November 12.

OCL and External Affairs will meet with the Major Conservation groups to discuss the lame duck and 114<sup>th</sup> Congress on November 12<sup>th</sup>.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Oversight Requests Update**

***House Natural Resources Committee***

**Brinkerhoff Lodge**

- Original request (via email): October 29, 2014
- Documents provided by DOI to date: 2 – 103 page
- Last document production on November 3, 2014
- **Status:** On October 29, 2014, the Department responded to Committee questions and produced the COS Memorandum directing an NPS review of Brinkerhoff Lodge policies. On November 3, 2014, after receiving a 2<sup>nd</sup> email inquiry from the Committee, the Department made an additional document production, including the Brinkerhoff scheduling records which were released to *Time* magazine via FOIA. On November 3, 2014, the Department received a follow up letter from Chairman Hastings and Subcommittee Chairman Bishop regarding the NPS Brinkerhoff review and a potential OIG inquiry. No additional documents were requested.

**Use of Paid Administrative Leave (Hastings)**

- Original request (via email): October 21, 2014
- Documents provided by DOI to date: none
- Relevant Report: GAO, *Federal Paid Administrative Leave: Additional Guidance Needed to Improve OPM Data*, October 20, 2014
- **Status Update:** Jason accompanied Mary Pletcher, DAS for Human Resources and Diversity, to the Hill to provide a briefing for committee staff on October 29, 2014. Committee staff asked several follow-up questions which are being assessed.

**WEEK-AHEAD REPORT: OFFICE OF INTERGOVERNMENTAL & EXTERNAL AFFAIRS (OIEA)**  
**November 5 - 14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On Wednesday, November 5, John and Vicki will participate in a IPW Team Planning meeting.

On Wednesday, November 5, Vicki will meet with Dorian Dickinson with National Scenic Byways to help develop their outreach plan to attract international visitors.

On Wednesday, November 5, Vicki will meet with Aaron Wodin-Schwartz with Brand USA to discuss their partnership with the National Parks Promotion Council and the funding BUSA will provide to support Federal Row at IPW.

On Wednesday, November 5, Francisco is participating in the ACHP Communications, Education and Outreach Committee meeting to discuss education and communications efforts around Federal preservation and diverse heritage initiatives.

On Thursday, November 6, Steven will participate in a Affordable Care Act (ACA) interagency meeting at the White House.

On Thursday, November 6, Steven will participate in a Martin Luther King, Jr. Day of Service Interagency Planning meeting hosted by the Corporation for National and Community Service (CNCS).

On Wednesday, November 12, John and Vicki will participate in the TTAB, Federal Government Working Group to prepare for the full TTAB Meeting.

On Thursday, November 13, John and Vicki will participate in the TTAB Meeting.

On Thursday, November 13, John and Sarah Neimeyer are hosting a meeting with 20 key stakeholder organizations to discuss the lame duck session and the 114th Congress.

On Friday, November 14, Vicki will participate in the Federal Row Marketing Subcommittee conference call to finalize the Marketing/Communications strategy for IPW 2015.

## WEEK-AHEAD REPORT: SPECIAL ASSISTANT FOR ALASKA AFFAIRS

November 5-Nov. 14, 2014

### Highlights of Travel, Meetings, and other Public Events

Wed. Nov. 5. I will be participating in ANILCA training course for state and federal agencies.

Friday. Nov. 7. **Tommy Beaudreau** and Walter Cruickshank in AK for BOEM meeting.

Mon. Nov. 10-Friday Nov. 14. On leave.

### Public Announcements

None.

### Major Press Inquiries

None.

### Items of Note/Expected Legislative, Legal, Policy Issues

Canadian barge adrift in Beaufort Sea. A barge which broke loose of a tug in Canadian waters has now drifted west off the Arctic coast of Alaska about 50 miles NW of Prudhoe Bay. It is not in imminent danger of foundering along the coast, is being monitored by USCG, and will probably be frozen in place in the next several days.

Barrow heats up. A recent University of Alaska study showed Barrow, AK temperatures to have risen an average of 2.7 degrees Celsius from 1979-2012. But fall temperatures had risen even greater for the period—6-7 degrees Celsius. Rising temperatures are both enhanced by delayed ice formation in the Arctic Ocean and in turn retard ice formation. Delayed ice formation is having significant influence on the severity of fall storms and coastal erosion, and subsistence activities.

Gulf of Alaska heats up. Meanwhile in the southern waters of AK the Gulf of Alaska is 5 degrees (F.) warmer this fall than over the past 17 years.

### 30-60 Day Look Ahead

**NPR-A oil and gas lease sale set for November 19.**

**WEEK-AHEAD REPORT: OFFICE OF THE SOLICITOR**  
**November 5 – 14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

None.

**Public Announcements**

None.

**Major Press Inquiries**

None.

**Items of Note/Expected Legislative, Legal, Policy Issues**

*Appointment of Special Master in Texas v. New Mexico*

On November 3, the U.S. Supreme Court referred to a Special Master this lawsuit between Texas and New Mexico. The case concerns the dispute between Texas and New Mexico over whether an interstate compact ensures that a specific quantity of water stored in the Bureau of Reclamation's Lower Rio Grande Project in southern New Mexico should reach Texas without first being intercepted by wells in New Mexico. The Special Master will now move forward to conduct proceedings on New Mexico's motion to dismiss Texas' complaint and the United States' complaint in intervention.

*Use of Reclamation Water/Facilities to Provide Water for the Production of Marijuana*

In light of recent actions in Washington and Colorado legalizing the commercial cultivation of marijuana, Reclamation has received inquiries as to whether Reclamation water may be delivered to marijuana growers who are acting in compliance with state law. The Solicitor's Office has coordinated with the Criminal Division at DOJ and has advised that Reclamation facilities should not be used to deliver water for an activity that remains illegal under federal law.

*Gunnisons Sage-Grouse*

Facing a deadline of November 12 under the MDL settlement, we are working with FWS to complete the final rules to list Gunnison's Sage-Grouse and designate critical habitat. OMB review of the critical habitat rule is also pending and has been complicated by a last minute request from USDA to exclude from critical habitat lands for which its Natural Resource Conservation Service has entered agreements with landowners.

*Northern Spotted Owl Litigation - Carpenters Industrial Council v. Jewell (D.D.C.)*

On November 7, DOJ will file the U.S. reply brief on summary judgment in this merits challenge by the timber industry and three counties to the Northern Spotted Owl critical habitat designation.

**30-60 Day Look Ahead**

None.

## **WEEK-AHEAD REPORT: FISH AND WILDLIFE AND PARKS**

**November 5, 2014**

### **Highlights of Travel, Meetings, and other Public Events**

Potential submission of new World Heritage nomination. This week the Federal Interagency Panel for World Heritage recommended nominating a series of ten architectural works by Frank Lloyd Wright for designation as a World Heritage site. The Department will be working with the Frank Lloyd Wright Building Conservancy to finalize the nomination in time for submission to the UNESCO World Heritage Committee by February 15. The ten works include the Guggenheim Museum in New York, Fallingwater in Pennsylvania, and buildings in five other states.

November 5: Advisory Council on Historic Preservation Committee meetings: Communications, Education and Outreach.

November 6: The Advisory Council on Historic Preservation meets. Michael Bean will attend and represent the Department.

November 12: Michael Bean will give brief remarks at the “National Bison Day” Capital Hill Reception sponsored by the Wildlife Conservation Society. The Society was instrumental in preventing the extinction of the bison in the early 20<sup>th</sup> century (when it was then call the New York Zoological Society).

November 13: Michael Bean will chair the rescheduled meeting of the Migratory Bird Conservation Commission. The meeting is the last that John Dingell, who has served on the Commission for 45 years, will attend.

November 18: South Florida Ecosystem Restoration Task Force meets in Florida. Michael Bean will chair this meeting for the first time.

## WEEK-AHEAD REPORT: NATIONAL PARK SERVICE

November 5 – November 15, 2014

### Highlights of Travel, Meetings, and other Public Events

#### *Legislative Testimony:*

None.

#### *Meetings:*

November 5, the NPS will host the bi-annual meeting of the Federal Interagency Council on Outdoor Recreation (FICOR) at Main Interior.

November 5, Jon will participate in a webchat on diversity in the National Park Service.

#### *Travel:*

November 6-8, Jon, Peggy, and Christy will attend the National Park Foundation Board meeting in New Orleans.

November 8-24, Jon will participate in the World Parks Congress.

### Public Announcements

#### November 5

On November 5, Director Jarvis and principals from other Federal agencies will hold the Bi-annual Federal Interagency Council on Outdoor Recreation (FICOR) meeting at the Main Interior Building. Director Jarvis will become chairperson of FICOR for the next two years. The meeting will focus discussions on issues relating to coordination, outdoor recreation, and the future direction of FICOR.

On November 5, the NPS is hosting a public webchat about NPS efforts to attract diverse audiences to parks and diverse applicants to NPS jobs. Director Jarvis, Associate Director for Workforce, Relevancy and Inclusion Mike Reynolds, and Professor Nina Roberts from San Diego State University will make remarks and take questions from the public.

#### November 6

On November 6, the Federal trial of a protester arrested during marijuana rally at Independence National Historical Park (PA) may draw attention. Emily Yates was arrested in the park during a public assembly organized by pro marijuana groups. Ms. Yates repeatedly refused the directions of law enforcement to leave a small area of the park that was temporarily closed to the public for law enforcement purposes. She had to be removed and resisted, kicking and striking the rangers. Ms. Yates was arrested and charged with assaulting/impeding/resisting a federal officer, interfering with agency functions, and disorderly conduct. Since her arrest, Ms. Yates has been actively promoting her position regarding this case on YouTube and other social media and the park has received complaints about her arrest.

On November 6, Equality Forum, the City of Philadelphia, and Independence National Historical Park (PA) will hold a press conference to announce plans for the July 2015 celebration of the 50th anniversary of the Annual Reminders. From 1965-1969, gay-rights groups hosted Annual Reminders in front of Independence Hall each July 4, reminders that members of the LGBT community were still being treated as second-class citizens.

Equality Forum, the nonprofit organizing the events in the park and elsewhere in Philadelphia, is a Philadelphia-based LGBT civil rights organization.

#### November 7

Nothing to report.

#### November 8

Nothing to report.

#### November 9

Nothing to report.

#### November 10

On November 10, the public review period will begin for the Chronic Wasting Disease Management Plan/Environmental Assessment at Shenandoah National Park (VA). This non-native disease is now within 12 miles of the park. The single alternative EA, a Department of Interior-authorized but rarely used NEPA approach in the NPS, amends the approved 2013 Chronic Wasting Disease Detection and Assessment Plan. The 2013 CWD detection and assessment plan approves lethal sampling of deer. This amendment proposes lethal density reductions in key front-country, high deer abundance areas of the park to slow disease transmission and spread through the white tailed deer population. The park anticipates that between sampling and density reductions 250-350 animals could be taken by qualified federal employees or authorized agents over a five-year period. Park managers are exploring options for donating the meat to local charitable organizations.

On November 10, the comment period closes on an EA to examine the environmental impacts of the proposed Kennedy Center expansion project to improve the facilities and provide greater pedestrian and bicycle access to and from the Kennedy Center, the National Mall and Memorial Parks (DC), the Rock Creek Paved Recreation Trail, and the Potomac River waterfront.

On November 10, a high flow event (HFE) for the Glen Canyon Dam will begin. Current resource conditions support an HFE of approximately 37,500 cfs (using bypass tubes as well as releases through the power plant), and 96 hours in duration (to be completed on November 15). The Bureau of Reclamation has conducted consultation with tribes, and notification and coordination is occurring between river rangers, concessionaires and private boaters. After the 2014 HFE occurs, a workshop will be convened in 2015 to review the results of the HFEs from the last three years.

On November 10, the NPS and the Federal Aviation Administration (FAA) expect a joint Notice and Request for Public Comment to publish in the Federal Register announcing an incentive for air tour operators utilizing quiet aircraft technology at Grand Canyon National Park (AZ). Air tours are conducted over the park under limited allocations determined and distributed by the FAA. Under the incentive operators would not be required to use allocations for flights conducted with quiet technology aircraft in the popular Dragon-Zuni flight corridor from January through March. The 2012 Moving Forward for Progress in the 21st Century Act (MAP-21), P.L. 112-141, requires the NPS and FAA to work together to develop incentives for Grand Canyon air tour operators who convert to quiet aircraft technology provided that the cumulative impacts of the incentives do not increase noise at the park.

#### November 11

On November 11, the Concert for Valor will be held on the National Mall. HBO and Starbucks are sponsoring this free concert in honor of American veterans and their families. The event will take place from 7:00 to 10:00 p.m. As a permitted event, HBO is responsible for communicating information about the event, including the lineup and details for the concert, as well as logistical information such as road closures, access points, prohibited items, etc. However, because this is a large event on park land, the NPS/USPP will amplify the logistics messages through press releases, social media, and the Nixle community awareness network. The National Mall and Memorial Parks and USPP are coordinating the event with the assistance of numerous state and local law enforcement, transportation and emergency services agencies.

On November 11, the NPS will create a social media gallery to salute current employees who are also veterans. Parks and programs are asked to see if veterans working in their parks would like to participate. Parks will post photos with their veteran employees on social media, and the Washington Office will use that to populate a gallery.

#### November 12

On November 12, the Town of Marana Planning Commission will hold a public hearing on a proposal to rezone and transform the historic Lazy K Bar Guest Ranch, contiguous to Saguaro National Park (AZ), into a 178-unit gated community. Park managers will attend the hearing in opposition to the proposal. Neighborhood groups and the Coalition for Sonoran Desert Protection are also in opposition to the proposal. The parcel is located in a scenic, remote area on the north boundary of the West District; the proposed zoning change would significantly compromise wildlife corridors and scenic viewsheds. It would also require an amendment to Marana's own General Plan, and reduce its targeted 80 percent Natural Undisturbed Open Space to just 25 percent. If the Planning Commission and Town Council vote to approve the proposal, some neighbors and other opponents have vowed to file a referendum petition to override the council's vote.

#### November 13

Nothing to report.

#### November 14

Nothing to report.

#### November 15

Nothing to report.

### **Major Press Inquiries**

**Everglades National Park (FL)** – In the next few weeks, *Greenwire* will publish feature stories on the invasive exotic fish problem in the park, and on fire management and prescribed burns in the park. A production company recently filmed a short web video for a series called *Unsung: A Day in the Life of Hard Work* that will feature park firefighter Katherine Corrigan. It will be available to the public sometime in late November.

**Gateway National Recreation Area (NY/NJ)** – The *New York Times* is planning a travel story highlighting the Nike Missile Radar Site tour that is expected to run in December.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Dinosaur National Monument (UT/CO) – Removal of Damaged Dinosaur Bone from Popular Trail.** In November, a juvenile sauropod leg bone is planned to be excavated, collected, and preserved in the monument's collections. In September, rangers discovered that this exposed dinosaur bone fossil on the popular Fossil Discovery Trail had been damaged and portions stolen. No suspects were identified. The story garnered national and international media attention. It was determined that the damage will rapidly accelerate the deterioration of the fossil so it must be removed to protect it. The removal is likely to draw attention, given previous interest and the recent graffiti/vandalism case at parks throughout the west.

**Saguaro National Park (AZ) – Proposed Bike Ranch Resort.** On November 18, park managers will attend a Pima County Board of Supervisors meeting to provide comments on a proposed "Bike Ranch Resort," located directly across the street from the park's East District Visitor Center. The property is currently zoned as Suburban Ranch that would allow up to 13 single family homes. The landowners are requesting a conditional use permit for a minor resort to include 49 lodging units, a professional bicycle facility, a performance lab, and a restaurant on the eastern half of the 45-acre parcel. In addition, they are requesting to develop the western half of the property with seven single family homes. Park neighbors are overwhelmingly opposed to the development, and were very vocal when the proposal was presented to the Pima County Hearing Administrator in May. The park also opposed the proposal at that time; the measure was subsequently not recommended to go forward to the Board of Supervisors. Despite this, the landowners are continuing with their proposal to the Board of Supervisors. Park staff has met with both the landowners and County officials in an attempt to find resolution to this situation.

**White House and President's Park (DC) – Winners of the 2014 National Christmas Tree Lighting Ceremony ticket lottery have been notified.** News releases and advisories in the coming weeks will announce the process for media to request event credentials and the talent line-up.

**National Mall and Memorial Parks (DC) – Interpretive Transportation Services.** The NPS has issued a prospectus to solicit proposals for guided vehicle-based tour services within the National Mall and Memorial Parks. This service is currently provided by Big Bus Tours. Proposals are due December 12 in response to the prospectus that identifies a 10-year contract period, with an anticipated start date of March 31, 2015.

**Rock Creek Park (DC) – Parking Meters.** The park is currently working with National Capital Region contracting officials to award a new contract to manage 81 coin-operated parking meters at Thompson Boat Center by December 31. In March, the park issued a Request for Information (RFI) to learn about more modern options for managing fee-based parking, and is currently evaluating the responses to the RFI. Since 1997 Rock Creek Park has had 81 metered parking spaces in a paved lot adjacent to Thompson Boat Center. The purpose of the meters is to encourage turnover in the small parking lot and to discourage use by commuters.

**Hot Springs National Park (AR) – Proposed Increase of Thermal Water Rates Charged to Bathhouse Operators.** The park proposes to increase the rate which it charges bathhouse operators for the thermal water provided to them. The rate will be tied to the Consumer Price Index (CPI) annually starting in 2015, raising the rate from \$2.70 to \$3.41 per thousand gallons. The current rate has been in place since 2005. Currently, the sale of thermal water to the bathhouses provides a little over \$75,000 a year out of the \$200,000 which it costs the NPS to maintain the infrastructure that delivers the thermal water to the bathhouse operators. Thermal water will continue to be provided free of charge to the general public for drinking at the jug fountains located throughout the park.

**Jefferson National Expansion Memorial (MO) – Removal/Replacement of Trees from Gateway Arch Grounds.** A contractor has begun to remove trees from the Gateway Arch grounds as part of the CityArchRiver project. The park completed an Environmental Assessment in 2012. The park grounds currently have 1,895 trees, 1,223 will be removed, and 3,457 new trees will be planted, increasing the total number of trees on the grounds to 4,102.

**Organ Pipe Cactus National Monument (AZ) – Ecological Restoration Plan – Notice of Finding of No Significant Impact.** The park, in collaboration with Cabeza Prieta National Wildlife Refuge and the Bureau of Land Management, prepared a programmatic Ecological Restoration Plan (ERP)/Environmental Assessment that analyzes the impacts of restoration efforts on disturbed lands. Environmental impacts to these lands have increased due to border-related activities. The ERP will restore degraded natural areas, improve habitat conditions, reduce and remove invasive plants, restore wilderness character, and stabilize cultural sites. A Finding of No Significant Impact will be finalized in November, and restoration efforts will begin for the three land management agencies.

**Glen Canyon National Recreation Area (UT/AZ) – Public Lands Initiative.** The San Juan County Lands Council will present three alternatives for changes in the management of federal lands within the county, including Glen Canyon National Recreation Area, at a series of open houses through November. This effort is part of Rep. Rob Bishop's Public Lands Initiative, a locally-driven effort to resolve challenging land disputes involving conservation and economic use through the development of an Eastern Utah public lands bill. The alternatives propose several designated wilderness areas and a National Conservation Area which would overlay NPS-managed lands along the San Juan River. The alternatives are mute with regards to which federal agency would manage these lands should the proposal come to pass.

**Alaska National Preserves (AK) – Public Hearings on Sport Hunting.** Through November 20, the NPS is hosting public hearings across Alaska to gather comments on proposed regulations related to sport hunting in national preserves in Alaska. The proposals would dial back several recent regulatory allowances by the State of Alaska which liberalized the methods, seasons and bag limits for taking predators. A total of 17 hearings will be held around the state.

**Valley Forge National Historical Park (PA) – White-tailed Deer Management Plan.** The NPS will conduct the fifth year of lethal reduction of the white-tailed deer herd from November 2014 through March 2015. The action addresses the over browsing of vegetation by an abundant deer population which prevents native forests from regenerating and reduces habitat for native wildlife species. The Record of Decision for the White-tailed Deer Management Plan/Environmental Impact Statement was completed in 2009 and withstood subsequent legal challenge. After the first four winters of the lethal reduction phase of the plan, the estimated deer density in spring 2014 was 49 deer per square mile (260 deer). Although still above the plan's target level of 31-35 deer per square mile, this represents a significant reduction from the estimated 241 deer per square mile (1,277 deer) present in 2009. 1,433 deer have been removed and 44,369 pounds (over 22 tons) of venison have been donated to regional food banks to date.

**Glen Canyon National Recreation Area (UT/AZ) – Consultation with Navajo Nation Regarding Access to Antelope Point.** NPS staff has been consulting with the Navajo Nation since late 2012 regarding access within the joint Antelope Point Project area for all Commercial Use Authorization (CUA) holders. Glen Canyon NRA and the Navajo Nation developed a Memorandum of Agreement (MOA) that was signed by the Regional Director. The MOA will provide access to Antelope Point to all CUA holders, consistent with the Glen Canyon NRA Commercial Services Plan, terms of the concession contract, and Antelope Point project agreements in place. This MOA will provide consistency in business practices throughout Glen Canyon NRA, resulting in improved visitor services, increased opportunities for locally-owned businesses (including Navajo owned businesses), and additional employment opportunities for Navajo Nation tribal members in the area. It will also allow Navajo Nation the opportunity to better regulate and benefit from the increased business to Antelope Point. The Navajo Nation President has not yet signed due to political issues within the Tribe and concerns raised by the concessioner. The NPS is preparing a letter to the Navajo Nation President requesting his signature and implementation of this MOA.

**Glen Canyon National Recreation Area (UT/AZ) – Notice of Availability for Off-road Vehicle Management Plan.** The Glen Canyon Off-road Vehicle Management Plan and Final Environmental Impact Statement (Plan/FEIS) analyzes a range of alternatives and actions for managing off-road use of motor vehicles

and on-road use of off-highway vehicles (OHVs) and street-legal all-terrain vehicles (ATVs); it should publish soon in the Federal Register. The Plan/FEIS assesses the environmental impacts that could result from continuing current management (the no-action alternative) or implementing any of the four action alternatives. The recommended action in the final plan would allow OHV/ATV use on seven miles of road presently closed to OHV/ATV use. These seven miles would complete a loop on an existing roads network on NPS and BLM lands. Local and national interest in the Plan/FEIS is expected.

**Cape Hatteras National Seashore (NC) – Beach Nourishment.** A Notice of Intent for a county-prepared EIS for beach nourishment near Highway 12 will soon publish in the Federal Register. The Seashore has received a permit application from Dare County, NC, to conduct beach nourishment activities to mitigate erosion near Highway 12, which runs the length of the Seashore. To determine if a Special Use Permit can be issued, the county is preparing an Environmental Impact Statement (EIS) for the NPS. The application and EIS process are expected to receive local media coverage and stir controversy. There are strongly differing views about the proposed activity – some local residents are concerned that the highway will be damaged prior to completion of the EIS, and conservation groups are concerned about the precedent being set that beach nourishment may occur in a National Seashore. The North Carolina delegation has been briefed.

**Palo Alto Battlefield National Historical Park (TX) – Environmental Protection Agency (EPA) to Release Public Notice for the Issuance of a Green House Gas Permit.** The EPA has released Public Notice regarding the issuance of a Greenhouse Gas Permit for the Tenaska Brownsville Generating Station. The public comment period ends November 28. Construction of the natural gas power plant will be less than one mile from Palo Alto Battlefield National Historical Park and National Historic Landmark. A second Public Notice period is also planned for the purpose of addressing adverse effects related to the park and National Historic Landmark under Section 106 of the National Historic Preservation Act.

### **30-60 Day Look Ahead**

On November 19, the Tuskegee Airmen National Historic Site (AL) video, *The Tuskegee Airmen: Sacrifice and Triumph*, will receive an award for best video from the National Association of Interpreters. As the park's centerpiece attraction, the film provides visitors with a big-picture view of the Tuskegee Airmen story, including the origins of the program, the recruitment and training of the Airmen, their heroism in combat, their post-war accomplishments and struggles, their pivotal role in the desegregation of the military and the civil rights movement of the 1950s and 1960s, and their broader contributions to our national identity.

On November 20, proposals are due in response to a business opportunity to operate overnight accommodations, food and beverage, retail service, fuel and auto services, and other related services within Yosemite National Park (CA). The new 15-year contract is scheduled to begin on March 1, 2016. This is the park's primary concession operation and the largest concession contract in the NPS.

This fall, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between the NPS and Indian tribes and subject to annual permits. Appropriate levels of NEPA and NHPA review and compliance would be required. Collection for commercial uses would be prohibited. This rule change would provide reasonable, resource protection based use of park resources while assisting in support of the continued lifeways of American Indian tribes. National tribal consultations indicate that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

This fall, Grand Canyon National Park (AZ) expects to issue the Backcountry Management Plan/Draft Environmental Impact Statement (Plan/DEIS) for public review and comment. The Plan/DEIS addresses

management of over 1.1 million acres of the park's backcountry, most of which is proposed for wilderness designation. The Plan/DEIS is needed to address immediate backcountry issues and provide an adaptable framework to manage backcountry use into the future while protecting natural and cultural resources. Public scoping including public meetings occurred in 2011 and agency and tribal consultation has been on-going.

## FWS SECRETARIAL WEEK-AHEAD REPORT

Nov. 5, 2014

### Highlights of Travel, Meetings and other Public Events

Nov. 5-7: Fire, invasive species and sage-grouse will be topics at a BLM-led workshop called The Next Steppe Fire Workshop in Boise, Idaho. FWS Director Ashe and other senior FWS leadership will attend. R1

Nov. 7 and 12: FWS Alaska Regional Director will hold consultations with tribes and Alaska Native Claims Settlement Act corporations regarding potential statewide changes for Alaska refuges. Changes that are being considered would: prohibit activities involving predator control for the purpose of increasing hunting opportunities on Alaska Refuges; clarify prohibited practices, methods and means related to sport hunting and trapping that are inconsistent with federal laws and FWS policies; clarify the allowable practices related to the collection of natural resources on refuges in Alaska; and update the procedures for closing an area or restricting an activity on refuges in Alaska. No changes will be made to federal subsistence regulations or restrictions on the taking of fish or wildlife for subsistence uses under federal subsistence regulations. Anticipated draft rule publication will be in early 2015. R7

Nov. 10: FWS will host a meeting in Key Largo, Florida, to provide the public with information on efforts to conserve federally protected species through control of feral and free-roaming cats at Florida Keys NWR Complex. The Complex is actively controlling and removing non-native species, including feral and free-roaming cats, from refuges as part of the implementation of its 2013 Integrated Pest Management Plan. The meeting was scheduled at the request of U.S. Rep. Joe Garcia (D-FL-27). R4

Nov. 12: A kick-off event will be held to launch an effort by the Texas Mid-coast NWR Complex and a variety of partners in Houston, Texas, to develop five nature gardens funded by a \$25,000 Connecting People with Nature grant. On Dec. 6, Bank of America volunteers will assist FWS and the city of Houston with planting the garden in Buffalo Bayou. Coordinated outreach is planned. R2

Nov. 13-14: FWS and the New Mexico Fire District Training Group are hosting tribal partners at Sevilleta NWR (NM) for a two-day leadership training course (*Followership to Leadership*). The course focuses on that fundamental leadership principles and is designed as a self-assessment opportunity for individuals preparing to step into a leadership role. R2

Nov. 14: Senior staff from FWS and the U.S. Air Force will discuss a shared vision for interagency support for a natural resource conservation partnership, as well as USAF's participation in landscape-level ecosystem conservation. HQ

Nov. 14-21: A joint FWS/U.S. Air Force Sikes Act coordination meeting will provide the first annual, in-person opportunity to discuss interagency coordination on all matters relating to activities under the Sikes Act. Expected outcomes of the meeting are enhanced knowledge of each agency's respective mission and organizational structure; glean lessons learned from the past year of interagency support; and the development of standard operating procedures to guide both agencies toward greater success in this important natural resource conservation partnership. Over the past decade, The Air Force has provided \$17,900,551 in reimbursable funds to FWS to support personnel and on-the-ground natural resource projects. HQ

### Public Announcements

Thursday, Nov. 6

Nothing to report

Friday, Nov. 7

Nothing to report

Monday, November 10

Nothing to report

Tuesday, Nov. 11

Wednesday, Nov. 12

Between November 12-19 (exact date TBD), at the International Union for Conservation of Nature's 2014 World Parks Congress in Sydney, Australia, Secretary of the Interior Sally Jewell will sign a Statement of Cooperation between the Phoenix Islands Protected Area in the Republic of Kiribati and the newly expanded Pacific Remote Islands Marine National Monument. Connecting these two marine protected areas will magnify the efforts of both governments in strengthening scientific research, and exploration and management of nearly 648,000 square miles of fully protected marine areas. Outreach planned. DOI/R1

Thursday, Nov. 13

Nothing to report

Friday, Nov. 14

FWS will send to the *Federal Register* two 90-day findings (batched together in one notice): the first on its Aug. 26 petition from the Center for Biological Diversity, Center for Food Safety, Xerces Society and monarch scientist Lincoln Brower requesting that the Monarch butterfly be listed as a threatened species under the ESA; and the second on its Apr. 12 petition from Pacific Legal Foundation requesting to delist the coastal California gnatcatcher on the basis that it is not a valid subspecies and does not qualify for listing. FWS determined that both petitioned actions may be warranted and is initiating a 12-month status review. Both findings are expected to generate significant public interest. Outreach planned to coincide with appearance of these rules in the Reading Room. HQ

FWS will send to *Federal Register* a notice amending the List of Endangered and Threatened Wildlife by adding 20 species of coral based on previously published determinations by the National Marine Fisheries Service, which has jurisdiction for these species. Outreach planned, date TBD. HQ

FWS will reopen the public comment period for the final listing determination of the northern long-eared bat in order to accept and make available to the public a report from range state natural resource agencies. The report is expected to be delivered to FWS around Nov. 5. This reopening of the public comment period will also notify the public of a public hearing that is planned in Wyoming. The northern long-eared bat is found in 38 states. The deadline for the final listing decision is April 2, 2015. Outreach planned. R3

TBD

FWS is finalizing a final rule to list the Gunnison sage-grouse as a threatened species and to designate 1,429,551 acres in Colorado and Utah as critical habitat. After a court-granted extension, the listing decision is due Nov. 12. FWS intends to announce this decision at an event with the Director in Gunnison, Colorado prior to publication in the *Federal Register*. The event is currently scheduled to take place on Monday, Nov. 17. Controversial. R6

FWS will reopen the public comment period for the proposed critical habitat designation of the western yellow-billed cuckoo following congressional and tribal requests. A 60-day extension is anticipated to publish in early November. Plans are underway to schedule information meetings and public hearings in Texas and California. Outreach planned. R8

In early November, FWS will publish a notice of intent to prepare a joint environmental impact statement and environmental impact report for the proposed Yuba-Sutter Regional Conservation Plan (a joint habitat

conservation plan and natural community conservation plan). The plan outlines strategies to avoid, minimize and offset potential indirect effects to 18 plant and animal species expected from development of 35,000 acres in Yuba and Sutter counties, CA. R8

FWS anticipates publishing the Strategic Growth Policy for the National Wildlife Refuge System and response to public comments in the *Federal Register* in early November. This policy instructs FWS to focus on acquiring interests in lands and waters that support the following three priorities: recovery of threatened and endangered species, implementation of the North American Waterfowl Management Plan, and conservation of migratory birds of conservation concern. HQ

FWS has received two applications to import sport-hunted black rhino trophies from Namibia. One is from the winner of the Dallas Safari Club auction, which received considerable media attention in January 2014. The Namibian government grants only five permits to hunt black rhino annually in accordance with the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The Service is currently evaluating both applications to determine if they meet the requirements for import, and will be seeking public comments, particularly with regard to new information on the biological needs of the species, management plans, and the other factors described above.

As part of a Natural Resource Damage Assessment and Restoration project to restore mussels in the Ohio River following a chemical spill, FWS, the U.S. Army Corps of Engineers and Tennessee Tech University will release 628 black sandshell mussels into the Ohio River.

The mussels were raised at the Natchitoches National Fish Hatchery in Louisiana and the Dale Hollow National Fish Hatchery in Tennessee. Outreach planned. R4

The ACE Basin Task Force, is celebrating its 25th Anniversary in November. Protecting the Ashepoo, Combahee, and Edisto Rivers, this partnership is in the heart of South Carolina's historic rice country, important to waterfowl and millions of other migratory birds. The Task Force was instrumental in the establishment of the ACE Basin NWR, a conservation cornerstone in this geography. No outreach planned R4

### **Major Press Inquiries**

Herald and News (Klamath Falls, OR, Pat Bushey): Reporter requested a photo of Paul Henson, Project leader of the Oregon Fish and Wildlife Office. They plan to run Henson's Sage Grouse Op-Ed in the paper. Not controversial. R1

The Oregonian (Portland, Oregon, Lynne Terry): Reporter interviewed wolf biologist John Stephenson about his unsuccessful efforts to re-collar gray wolf OR7. Story posted Oct. 30. Controversial. R1

Multiple media outlets have inquired about a collared wolf found dead in Washington. FWS is issuing a blanket response that only acknowledges the wolf's death, and then notes further details will be released as the investigation allows. R1

FWS responded to inquiries from WMDT News TV and the Baltimore Sun regarding impacts at Chincoteague NWR from the Antares rocket explosion in Virginia on Oct. 28. FWS responded that preliminary reports showed no significant impacts to wildlife or government assets on the refuge. Refuge was closed until 3 p.m. on Oct. 29. R5

To mark the second anniversary of Hurricane Sandy on Oct. 29, FWS pitched a series of stories about restoration and resilience projects underway using Hurricane Sandy disaster appropriations. In addition to the Blog at Huffington Post publishing FWS Regional Director Wendi Weber's post: *Strong After Sandy: Healing the Past, Investing in the Future* ([http://www.huffingtonpost.com/wendi-weber/strong-after-sandy-healin\\_b\\_6074938.html](http://www.huffingtonpost.com/wendi-weber/strong-after-sandy-healin_b_6074938.html)), reporters from ClimateWire (Elizabeth Harball), Chesapeake Bay Journal (Rona

Kobell), and local media outlets are working on stories. Outreach campaign on Sandy continues through Nov. 7. R5

John McCormack (San Antonio Express) inquired about how law enforcement responds to a take of an endangered species on designated critical habitat and information on proposed critical habitat for several south Texas species. R2

Staff from Aransas NWR in Austwell, TX, accompanied Dallas Morning News reporter Alan Peppard and a staff photographer to Matagorda Island to view the historical private space launch sites and the former Wynne Ranch house. The reporter is working on a story to highlight the Wynne family and its impact on the local area, including construction of the first private space launch sites on their private property, now part of Aransas NWR. The story is expected to be published sometime next year. R2

A rape occurred on the Lower Rio Grande Valley (TX) NWR in June. The FBI is handling the case and last week released a composite sketch of the suspect. A Refuge Law Enforcement agent immediately investigated this incident when it occurred and, in compliance with protocol, turned the case over to the FBI. It is just now reaching the media. Press statement available. R2

FWS provided a short statement to the New York Times on a new strain of the chitrid fungus that could prove very detrimental to native salamanders if it becomes reaches U.S. shores. HQ

Following news releases put out by NGOs, there has been extensive media interest in the sighting by an NPS employee of a canid that appears to be a gray wolf on the north rim of Grand Canyon National Park. The animal appears to be wearing a radio collar similar to those used in the Northern Rocky Mountain Recovery Area, but it is not transmitting. FWS laid traps for the canid to re-collar the animal, but so far without luck. Biologists have collected feces for analysis, but the lab results will take a couple of weeks. R2

#### **Items of Note/Expected Legislative, Legal, Policy Issues**

The death of a cow is being investigated by FWS and Oregon Department of Fish and Wildlife. Initial biologist comments indicate it was NOT wolf depredation; however that is pending the final report expected in the next week. No media calls have been received at this time. R1

Rep. Hanabusa's office inquired about maps for the critical habitat designation (proposed and final) for Kapolei, Hawaii. R1

The State of Alaska is disputing the western boundary of the Arctic NWR and seeking priority conveyance of nearly 20,000 acres of uplands. The state recently awarded two Beaufort Sea oil and gas leases along the western boundary of the refuge based on the state's assertion that it owns roughly 3,000 acres of tidal and submerged lands along the Beaufort Sea coastline that were improperly mapped as falling within the refuge boundary. R7

#### **30-60 Day Look Ahead**

The 2014 Candidate Notice of Review, the annual determination of species added to and removed from the list of species on the ESA Candidate List, will be sent to the *Federal Register* by Nov. 21. This year, 23 species from Hawaii were added to the candidate list, one species was removed from candidate status, and one has a change in priority from the 2013 review. There are now 146 species recognized by the Service as candidates for ESA protection but precluded due to higher priorities. Public outreach is planned for late November.

The notice of availability for the final environmental impact statement analyzing the proposed revisions to the regulations for the experimental population of the Mexican wolf is scheduled to be available in the *Federal*

*Register* Reading Room on Nov. 24. The Service will post the information on the Service's Mexican wolf website and initiate outreach to congressional and other key stakeholders that day, with broader media outreach distributed on Nov. 25 when the notice publishes in the *Federal Register*. R2

To meet a court-ordered deadline, FWS must send to the *Federal Register* by Nov. 30 its final decision on whether the *rufa* red knot warrants listing under the Endangered Species Act. A provisional date of Nov. 10 has been selected, with outreach planned for later in the month (prior to Thanksgiving). R5

FWS will propose to delist the eastern puma (aka cougar) due to extinction within the next 30-60 days. In 2011, FWS conducted a five-year status review and recommended this course of action due to scientific evidence that the species is no longer present and reproducing in the wild. The eastern puma was originally listed in 1973. Occasional sightings of eastern pumas are believed to be escaped captive animals or transient animals from populations in the Mid-West. Outreach planned. R5

FWS will publish a notice of intent to prepare an environmental assessment for a pending habitat conservation plan and incidental take permit application from Duke Energy at its North Allegheny 35-turbine wind energy facility in Blair and Cambria counties, Pennsylvania, within the next 30-60 days. The company seeks to minimize effects from the project on federally endangered Indiana bats and proposed endangered northern long-eared bats. On Sept. 26, 2011, a dead Indiana bat was found at the wind facility. Since that time, Duke Energy has adapted turbine operations to avoid additional take of Indiana bats while they prepared this plan. Local outreach planned. R5

In late November/early December, Kenai NWR will propose to amend its public use regulations through publication of a draft rule that would: clarify the existing regulations; implement management decisions from the refuge's June 2010 Revised Comprehensive Conservation Plan; establish regulations for managing wildlife attractants, including food, refuse and retained fish to decrease the potential for negative human-bear interactions; and revise regulations for hunting and trapping, including those governing these activities within the Skilak Wildlife Recreation Area. R7

FWS is preparing an environmental assessment for public review and comment that will examine options to reduce impacts related to increasing visitation at Three Sisters Springs, part of the Crystal River NWR. The assessment will propose options and steps that could be taken to minimize impacts related to increasing visitation at the refuge and maintain opportunities to observe the charismatic Florida manatee in the warm springs there. The assessment is expected to be released for public comment for at least two weeks by the end of November. The Three Sisters Springs unit of Crystal River National Wildlife Refuge is owned by the City of Crystal River and the Southwest Florida Water Management District, and is administered by FWS under a management agreement. R4

FWS will announce the availability of the draft EIS and the Southern Edwards Plateau Draft Regional Habitat Conservation Plan (DRHCP) for the Southern Edwards Plateau in November. Led by the City of San Antonio and Bexar County, Texas, the DRHCP is an effort to address the potential impacts of infrastructure and commercial and residential development. The DEIS describes potential impacts of issuing a 30-year permit under section 10(a)(1)(B) of the Endangered Species Act to authorize incidental take of nine federally endangered species including the golden-cheeked warbler, black-capped vireo, Government Canyon Bat Cave spider, Madla Cave meshweaver, Braken Cave meshweaver, Government Canyon Bat Cave meshweaver, two beetles with no common name (*Rhadine exilis* and *Rhadine infernalis*) and the Helotes mold beetle. Outreach planned to coincide with availability of the documents in the *Federal Register* Reading Room. R2

In late November/early December, FWS will announce approval of the Lesser Prairie-Chicken Programmatic Conservation Bank Agreement (PCBA) submitted by Common Ground Capital and finalized May 1. This is the first PCBA to be approved by FWS, with the goal of streamlining the process for lands to be approved as

conservation banks to provide for the conservation of the lesser prairie-chicken and its habitat. Outreach planned. R2

The draft of the polar bear conservation management plan is scheduled to be released to the public in early December for a 60-day review and comment period. R7

The Water Resources Reform and Development Act of 2014 requires that the Director of FWS provide an annual report to Congress about strategies, expenditures and progress made in addressing the threat of Asian carp in the Upper Mississippi River and Ohio River basins. The first report is due Dec. 31. R3

-----

The following endangered species actions are scheduled to be sent to the *Federal Register* in Nov. and Dec. (announcement dates TBD but most will coincide with the date each notice is placed on public inspection in in the reading room):

- Gunnison Sage Grouse final listing and critical habitat, Nov. 12, R6
- 20 species of coral, final listing, Nov. 14, HQ
- Monarch Butterfly and California Gnatcatcher, 90-day findings, Nov. 14, HQ
- Candidate Notice of Review, Nov. 24, HQ
- Rufa red knot, final listing, Nov. 28, R5
- Black Pine Snake, proposed critical habitat, Nov. 28, R4
- Final EIS for Mexican wolf 10j revision, EIS Availability, Nov. 28, R2
- Borax Lake Chub, downlisting from Endangered to Threatened, Dec. 5, R1
- Spring Pygmy Sunfish, final Critical Habitat, Dec. 5, R4
- 2 Arkansas Mussels (Neosho Mucket and Rabbitsfoot), final Critical Habitat, Dec. 5, R4
- Chimpanzee, final listing, Dec. 5, HQ

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY FOR  
LAND AND MINERALS MANAGEMENT  
November 5 – November 14**

**Highlights of Travel, Meetings, and other Public Events**

November 4<sup>th</sup> - 7<sup>th</sup>: Jim, Lauren and I are participating in the Sage-grouse Rangeland Fire workshop in Boise, ID.

November 4<sup>th</sup> – 7<sup>th</sup>: David is speaking at and participating in the Canada – United States Oil and Gas Research Forum in Yellowknife, Canada.

November 10: I will participate in a call with other members of the Department and OMB to discuss the status of the Department's efforts to address recommendations that resulted in the Department's inclusion in GAO's 2011 High Risk Report. This is a pre-meeting in advance of a larger meeting with OMB and GAO on November 14, which is discussed below.

November 12: I will join Mike Connor, Tommy Beaudreau, Neil Kornze, Liz Klein, Pat Porchot and Bud Cribley in a meeting with Kuukpik Corporation President Isaac Nukapigak and other members of the Kuukpik Corporation to discuss the Greater Moose's Tooth Supplemental EIS.

November 12: I will join Tommy Beaudreau and Liz Klein in a meeting with Athan Manuel of the Sierra Club to discuss reforms to the Federal coal leasing program.

November 13: David Haines, Letty Belin and Lauren Bogard will join me in a meeting with Ashley Korenblat, Managing Director of Public Land Solutions and members of the Moab (UT) City Council and business owners to discuss BLM's Moab Master Leasing Plan.

November 13: I will participate with Sarah Greenberger and others in a meeting of the Hurricane Sandy Executive Council.

November 14: I will meet with Mark Shuster, Shell's Executive Vice President for Upstream Americas Exploration to discuss the proposed 2017 – 2022 OCS Oil and Gas Leasing Program.

November 14: I will participate in a meeting at OMB with Mike Connor, Kris Sari, various senior career Departmental employees as well as GAO representatives to discuss the status of the Department's efforts to address recommendations that resulted in the Department's inclusion in GAO's 2011 High Risk Report. We will detail efforts to address issues identified in onshore and offshore oil and gas programs involving production verification, fair return, and recruitment, training and retention in certain key positions.

**Public Announcements**

Wednesday, November 5:

The Northern Great Basin Rapid Ecoregional Assessment (REA), led by BLM-ID, is scheduled for release. Director Kornze plans to make this announcement in his opening remarks at the rangeland fire conference in Boise, ID. The Northern Great Basin REA encompasses the Northern Basin and Range and Snake River Plains Ecoregions, which span from Utah, across southern Idaho and northern Nevada, and into southeastern Oregon and northeastern California. This REA has an area of 75,708 square miles and includes public land managed by 24 BLM field offices.

Thursday, November 6:

BLM-CO will hold a public meeting in Parachute regarding the Roan Plateau SEIS, which addresses previously issued leases on the White River NF as well as oil and gas consolidation in the Northwest Colorado District. The public meeting will coincide with the West Slope Colorado Oil and Gas Association Southern Task Force meeting in Parachute.

Friday, November 7:

The BLM will publish in the Federal Register the Notice of Availability (NOA) for the Final SEIS for the Greater Mooses Tooth 1 oil and gas development project in the NPR-A.

The NOA for the Draft Supplemental EIS in connection with Chukchi Lease Sale 193 will be published in the Federal Register, initiating a 45-day comment period.

BOEM expects to publish a Request for Information with a 30-day comment period to seek public input on the development of a Long-Term Monitoring Plan (LTMP) for Marine Mammals in the Gulf of Mexico. The LTMP will support BOEM's petition for a 5-year Marine Mammal Protection Act (MMPA) rulemaking from the National Marine Fisheries Service (NMFS) for incidental harassment of marine mammals associated with geological and geophysical survey activities in the Gulf of Mexico.

Monday, November 10:

Nothing to report.

Tuesday, November 11:

Nothing to report.

Wednesday, November 12:

BOEM will publish the Final Notices of Sale for commercial wind leasing for wind power on the OCS offshore Massachusetts. The Final Sale Notice must be published a minimum of 30 days before the lease sale. Accordingly, BOEM currently plans for the lease sale to take place on or before the December 15, 2014.

Thursday, November 13:

Nothing to report.

Friday, November 14:

OSMRE will release two hydrological characterization reports of underground mine pool systems. The systems involve both pre- and post-SMCRA underground mines and multiple coal beds crossing the borders of Maryland and West Virginia. One mine pool underlies the head waters of the North Branch of the Potomac River that lies in Maryland and West Virginia, a study area that encompasses more than 25,000 acres. The other, the Fairmont Mine pool, encompasses 52,000 acres in West Virginia. The reports present findings of current conditions and the need to prevent impacts to river systems by pumping and treating water from the mines. They also demonstrate OSMRE's efforts to develop good science for regulating a complex industry. These reports may generate interest from citizens and environmental groups.

**Major Press Inquiries**

A reporter with *High Country News* contacted BLM-UT regarding the release date for the Moab Master Leasing Plan Draft EIS (expected early 2015), impacts and mitigation efforts relating to oil and gas in northeastern Utah and air quality impacts in the Uintah Basin. The BLM is working to arrange field visits near Vernal and Price at the reporter's request. The reporter also is visiting with SUWA and other external groups. The publication date is unknown.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

On November 7, FERC, in cooperation with BLM-OR and the FS, plans to release the DEIS for the proposed 232-mile long Jordan Cove LNG/Pacific Connector Gas Pipeline from Malin to Coos Bay, OR, for the export of up to 1 billion cfd of natural gas. The release of FERC's draft will initiate a 97-day comment period. In addition, the BLM/FS plan to release their NOA for the DEIS on November 14, initiating a 90-day comment period. The proponent is Williams Pacific Connector Gas Operator, L.L.C. FERC is the lead agency for the overall pipeline project and the BLM, Bureau of Reclamation and U.S. Forest Service are cooperating agencies. The DEIS is for FERC and the cooperating agencies, and opens the comment period for the proposed land use plan amendment necessary for the pipeline ROW grant. These proposed amendments could be controversial and the release of the DEIS will likely generate significant public interest. Public meetings are scheduled for the winter. [THIS WAS IN LAST WEEK'S REPORT]

On November 19, the BLM will conduct the 2014 oil and gas lease sale for the NPR-A. President Obama directed the Secretary of the Interior in 2011 to conduct annual oil and gas lease sales in the NPR-A. This lease sale, the fourth since 2011, will include 270 tracts that cover about three million acres. [THIS WAS IN LAST WEEK'S REPORT]

### **30-60 Day Look Ahead**

The BLM has revised its Manual and Handbook on inspection, enforcement, and production verification on Federal coal licenses and leases. The revisions incorporate existing policy on continuing education and safety requirements for BLM's Mineral Mine Inspectors and establish new policies responsive to the OIG audit on BLM's Coal Program (CR-EV-BLM-0001-2012). The revisions replace 1990 guidance and plans to post the new guidance on the web in the near future. The BLM and DOI Communications offices are coordinating on the roll-out. [THIS WAS IN LAST WEEK'S REPORT]

BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in mid-December. The Report will be published on the BOEM website, along with a request for comments published in the Federal Register. [THIS WAS IN LAST WEEK'S REPORT]

The BLM anticipates publication of an NOI to prepare an EIS and a Notice of Public Meeting for the Spring Creek Coal EIS related to Spring Creek Coal Company's ongoing mining operations in Big Horn County, MT. The EIS will analyze the impacts of four coal mining applications. Scoping is expected to start in November and run for 60 days. The BLM will hold public meetings in Dec. in Sheridan, WY and Colstrip, MT. The project is expected to be controversial. [THIS WAS IN LAST WEEK'S REPORT]

This fall, BOEM will publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA) and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since the OPA was enacted 24 years ago and is necessary to keep pace with the 78 percent increase in inflation since 1990. [THIS WAS IN LAST WEEKS REPORT]

Later this year, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act. [THIS WAS IN LAST WEEK'S REPORT]

The supporting material for the Draft Proposed Program for the 2017-2022 OCS Oil and Gas Program is currently in surnaming in BOEM. ASLM is planning an accelerated review to enable the finalization of this document by early December.

BLM-OR anticipates releasing the ROD for the John Day Basin RMP covering public lands in north-central OR in the near future. It updates previous RMPs, covers newly acquired lands in the North Fork John Day River as a result of the Oregon Land Exchange Act of 2000, and provides interim management direction for the Spring Basin Wilderness, designated in 2009. [THIS WAS IN LAST WEEK'S REPORT]

The BLM plans to release the Draft EIS for the Boardman to Hemingway Transmission Line Project on December 19, 2014. This date has been moved back from November 14, 2014. Government-to-Government consultation meetings are being planned with the Confederated Tribes of the Umatilla Indian Reservation and the Shoshone-Bannock Tribes starting on October 29 and continuing through the fall.

## WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT

Nov. 9 – 15, 2014

### Highlights of Travel, Meetings, and other Public Events

**Neil Kornze** will be in Washington D.C. all week. **Steve Ellis** be on annual leave Nov. 10, returning to Washington, DC Nov. 12. Linda Lance will be on annual leave Nov. 13-14.

### Public Announcements

Monday, Nov. 10

*Nothing to report*

Tuesday, Nov. 11

*Nothing to report*

Wednesday, Nov. 12

The BLM is working with the **Ft. McDermitt Paiute-Shoshone Tribe and the FS to address a longstanding domestic horse trespass** on public lands bordering OR and NV. The FS will initiate a 30-day public comment period with a removal scheduled to start Nov.12. Additionally, BLM-OR plans to conduct an emergency wild horse gather in the Cold Springs HMA in southeastern OR due to the Saddle Draw Fire.

Nov. 12–13, BLM-AZ will hold a **stakeholders meeting on the regional mitigation planning process for 3 SEZs in Arizona** (Aqua Caliente SEZ, Brenda SEZ and Gillespie SEZ). This follows a public workshop that was held in April and a webinar in July. The AZ regional mitigation planning effort is targeted for completion in March 2015.

Thursday, Nov. 13

BLM-CO will hold an offer 24 parcels totaling 6,797 acres during the **quarterly competitive oil and gas lease sale** scheduled for 9 a.m, at the CO State Office in Lakewood. About 481 acres are located on BLM-managed land with the remaining 6,316 acres on private lands with BLM-managed subsurface minerals - all within the boundaries of the Royal Gorge Field Office. The parcels are spread among El Paso, Elbert, Kiowa, Kit Carson, Lincoln, Washington and Weld counties. BLM Colorado posted the sale notice for these parcels on Aug. 15, 2014, and did not receive any protests.

Nov. 13-14, **International Sage-grouse Forum**, sponsored by the Univ. of Utah in Salt Lake City. The purpose of the forum is to “develop ‘seamless’ plans for designated Utah geographic areas that contribute to the conservation of sage-grouse and other wildlife species that inhabit Utah’s sagebrush-steppe and desert shrub ecosystems and enhance the economic sustainability of local communities.” BLM Assistant Director Ed Roberson will represent the BLM.

Friday, Nov. 14

Sat. Nov. 15

*Nothing to report*

### Major Press Inquiries

*CBS Evening News* contacted BLM WO requesting the 2013 statistics on oil and gas site inspections, broken down by state (CO, MT, NV, NM, ND, UT and WY). WO Public Affairs will coordinate all responses with DOI Communications.

*Harper's Magazine* contacted BLM-WO to verify 2 BLM-related numbers in the recent OIG report on the BLM Wildland Fire Program: The total amount of gift card purchases from the fire suppression program, which the report puts at \$799,000, and the amount of those charges coming from BLM Idaho, which the report puts at about \$70,000. The BLM referred the reporter to the OIG.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Steve Ellis will meet with Rep. Amodei (R-2-NV) and his staff on Nov. 13 to discuss the Nevada Fire Safe Council, Argenta allotment and drought management in Nevada

### **30-60 Day Look Ahead**

**Nov. 18:** BLM-UT will hold an oil and gas lease sale.

**Nov. 18-19: Fort Berthold Oil & Gas Partners Meeting:** the Three Affiliated/Mandan, Hidatsa, Arikara Tribal Energy Department and newly elected Tribal Chairman, will present energy-related topics and issues for discussion with Federal agency partners in Bismarck, N.D. Agencies will also be providing reports regarding ongoing oil and gas business respective to their areas of responsibility. The BLM, ONRR, BIA, BuRec and the U.S. Army Corps of Engineers are invited.

**Dec. 1:** The 60-day public comment period ends on the proposed rule, **Competitive Processes, Terms, and Conditions for Leasing Public Lands for Solar and Wind Energy Development**. Released Sept. 30, the proposed rule establishes competitive leasing processes for ROWs to receive fair market value and promote preferred areas for solar and wind development on public lands.

**Dec. 8:** BLM OR will hold the **Thompson Strip Land Sale** selling about 80 acres in Polk County -- south of the Grand Ronde Reservation -- at a public auction. These parcels are considered "hiatuses" -- small slivers of unpatented lands resulting from 19<sup>th</sup> century surveying errors. Adjoining landowners have expressed interest in purchasing these slivers. A Federal Register notice was published on October 8, 2014.

**Dec. 9:** BLM-NV will hold an oil and gas lease sale.

**Dec. 9:** BLM-NV expects to release EAs for **3 solar projects within the Dry Lake SEZ** by this date. They are the 200-MW First Solar Dry Lake Solar project, 150-MW NV Energy Dry Lake Solar project, and the 134-MW Invenergy Harry Allen Solar project. A 30-day public comment period will follow.

**Early Dec.:** The notice of availability for the BLM-WY Lander Field Office **Sheep Mountain Uranium Project DEIS is scheduled to publish in the Federal Register**. Public meetings will be held during the 45-day scoping period. The Sheep Mountain project area, located in the Crooks Gap uranium district 60 miles east of Lander, Wyoming, is approximately 3,611 acres, of which approximately 64 percent are BLM-administered lands. The project is largely supported by state and local governments and many members of the public because of the anticipated economic benefits to the region and its location in a previously mined area. A final EIS is expected to be released in August 2015.

**Mid-Dec. to early Jan.:** The **FEIS for the 350-MW Soda Mountain Solar PV project (CA)** is expected to be with an anticipated ROD signed in March. NPS concerns over potential impacts to groundwater, bighorn sheep, and visual resources to the adjacent Mohave National Preserve have been addressed.

## WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT

November 5, 2014 – November 13, 2014

### Highlights of Travel, Meetings, and other Public Events

November 5 – 18: The Mid-Atlantic Regional Planning Body (RPB), for which BOEM is the Federal co-lead, is holding a series of public listening sessions hosted by the Mid-Atlantic Regional Council on the Ocean. The public listening sessions will take place in Delaware, Virginia, Maryland, New York, and New Jersey from Nov. 5 – 18 to receive comments on a variety of draft materials developed by the RPB.

November 5: Acting Director Cruickshank will speak at the National Ocean Industries Association Fall Meeting in Naples, FL. He will focus on BOEM's efforts to modernize its risk management program. This event is closed press.

November 6: North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, representatives from Mid- and South Atlantic state governments, and NC Members of Congress will attend. Walter Cruickshank and others from BOEM will attend. Walter will also attend an OCS Governors Coalition Breakfast, and meet with Governor McCrory earlier in the day. Part of the event may be open press.

November 7: Acting Director Cruickshank will travel to Anchorage Alaska for meetings with staff and leadership from the BOEM Alaska Regional Office, focusing on planning for upcoming activities in the region and the Lease Sale 193 SEIS.

November 14: Acting Director Cruickshank will speak at the International Offshore Partnering Forum, organized by the Business Network for Maryland Offshore Wind in Baltimore, MD. While at the conference, U.S. Wind and DOI will hold a press event to execute its Maryland offshore leases.

### Public Announcements

**November 14:** Press event to execute the Maryland Wind Lease at the Maryland Offshore Wind Conference in Baltimore, MD.

**Early November:** Note to Stakeholders on a Request for Information on the development of a Long-Term Monitoring Plan for marine mammals in the Gulf of Mexico.

**November TBD:** Press release on the issuance of right-of-way grant for the Block Island Transmission System.

**November TBD:** Press release on Limits of Liability rulemaking.

**November TBD:** DOI press release on Final Sale Notice for Massachusetts Wind Energy Area.

**November TBD:** The Pacific Region will release the 2011 National Assessment of Oil and Gas Resources of the Pacific OCS. This document does not contain any new resource estimates since the release of the 2011 assessment; rather it includes more detailed information on specific geological plays in the region.

### Major Press Inquiries

**Multiple Queries:** Reporters requesting background information regarding South Carolina wind energy planning efforts following the Oct 29 Offshore Wind Symposium at Coastal Carolina.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

**Chukchi Sea Lease Sale 193:** On October 31, BOEM posted the draft supplemental EIS for public review. On November 7, the Notice will publish in the *Federal Register*, initiating a 45-day comment period. Public hearings and Government-to-Government consultations will take place between Nov. 17 and Dec. 4 in several communities bordering the Chukchi Sea, Anchorage and Fairbanks, AK.

**Maryland Offshore Wind Lease Sale:** BOEM plans to execute two offshore wind leases with US Wind Inc., the provisional winner of both lease areas during the August auction with a combined bid of \$8.7 million, on November 14 at a public event at the Maryland Offshore Wind Conference in Baltimore, MD.

**Request for Information on the Development of a Long-Term Monitoring Plan (LTMP) for Marine Mammals in the Gulf of Mexico:** BOEM is seeking public input on the development of a LTMP for marine mammals in the Gulf of Mexico. BOEM expects to publish the Request for Information in early Nov. with a 30-day comment period. The LTMP will support BOEM's petition for a 5-year rulemaking from NMFS for incidental harassment of marine mammals associated with geological and geophysical survey activities in the Gulf of Mexico.

**Limits of Liability Final Rule:** In November, BOEM may publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Rhode Island Offshore Wind:** In November, BOEM may be prepared to issue a right-of-way grant for the Block Island Transmission System (BITS). On September 4, the U.S. Army Corps of Engineers (USACE) approved Deepwater Wind's (DWW) permit request to construct five wind turbine generators in state waters off Block Island and a transmission cable to the Rhode Island mainland. BOEM has drafted a Finding of No Significant Impacts that adopts the USACE EA, along with a right-of-way grant and a decision document with conditions of approval for DWW's General Activities Plan for the portion of BITS in Federal waters.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November.

**Massachusetts Offshore Wind:** In November, BOEM plans on issuing a Final Sale Notice for the Massachusetts Wind Energy Area. The Final Sale Notice is on an expedited surnaming track in order to hold the sale by the end of the year.

**Virginia Research Lease:** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted revisions to its Research Activities Plan (RA) for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Oct. 6 and Oct. 31, and expects to submit a complete, updated RAP in November. BOEM tentatively plans to publish an environmental assessment for public comment in late November and hold a public meeting in December.

**Arctic Rule:** Since August 2014, when BOEM and BSEE delivered the rule to OMB for review, the bureaus have been working to address comments from the interagency review. In early November, DOI will complete its review of the updated draft rule and plans on sending it to OMB. OMB will once again circulate for interagency review and let DOI know if there any major issues that need to be resolved before they complete their review and return it to the Department for publication. On November 14, OMB will have had the rule for

90 days.

**Risk Management Advance Notice of Proposed Rulemaking (ANPR):** On November 17, 2014, the comment period on the ANPR will close. BOEM is tentatively planning on holding workshops on the ANPR in mid-December. Once the comment period closes, BOEM will review comments and finalize topics for the workshop based on the comments.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In December, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT**  
**November 5, 2014 – November 13, 2014**

**Highlights of Travel, Meetings, and other Public Events**

November 5 – 18: The Mid-Atlantic Regional Planning Body (RPB), for which BOEM is the Federal co-lead, is holding a series of public listening sessions hosted by the Mid-Atlantic Regional Council on the Ocean. The public listening sessions will take place in Delaware, Virginia, Maryland, New York, and New Jersey from Nov. 5 – 18 to receive comments on a variety of draft materials developed by the RPB.

November 5: Acting Director Cruickshank will speak at the National Ocean Industries Association Fall Meeting in Naples, FL. He will focus on BOEM's efforts to modernize its risk management program. This event is closed press.

November 6: North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, representatives from Mid- and South Atlantic state governments, and NC Members of Congress will attend. Walter Cruickshank and others from BOEM will attend. Walter will also attend an OCS Governors Coalition Breakfast, and meet with Governor McCrory earlier in the day. Part of the event may be open press.

November 7: Acting Director Cruickshank will travel to Anchorage Alaska for meetings with staff and leadership from the BOEM Alaska Regional Office, focusing on planning for upcoming activities in the region and the Lease Sale 193 SEIS.

November 14: Acting Director Cruickshank will speak at the International Offshore Partnering Forum, organized by the Business Network for Maryland Offshore Wind in Baltimore, MD.

**Public Announcements**

**Early November:** Note to Stakeholders on a Request for Information on the development of a Long-Term Monitoring Plan for marine mammals in the Gulf of Mexico.

**November TBD:** Press release on the issuance of right-of-way grant for the Block Island Transmission System.

**November TBD:** Press release on Limits of Liability rulemaking.

**November TBD:** DOI press release on Final Sale Notice for Massachusetts Wind Energy Area.

**November TBD:** The Pacific Region will release the 2011 National Assessment of Oil and Gas Resources of the Pacific OCS. This document does not contain any new resource estimates since the release of the 2011 assessment; rather it includes more detailed information on specific geological plays in the region.

**Major Press Inquiries**

**Multiple Queries:** Reporters requesting background information regarding South Carolina wind energy planning efforts following the Oct 29 Offshore Wind Symposium at Coastal Carolina.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Chukchi Sea Lease Sale 193:** On October 31, BOEM posted the draft supplemental EIS for public review. On November 7, the Notice will publish in the *Federal Register*, initiating a 45-day comment period. Public hearings and Government-to-Government consultations will take place between Nov. 17 and Dec. 4 in several communities bordering the Chukchi Sea, Anchorage and Fairbanks, AK.

**Request for Information on the Development of a Long-Term Monitoring Plan (LTMP) for Marine Mammals in the Gulf of Mexico:** BOEM is seeking public input on the development of a LTMP for marine mammals in the Gulf of Mexico. BOEM expects to publish the Request for Information in early Nov. with a 30-day comment period. The LTMP will support BOEM's petition for a 5-year rulemaking from NMFS for incidental harassment of marine mammals associated with geological and geophysical survey activities in the Gulf of Mexico.

**Limits of Liability Final Rule:** In November, BOEM may publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Rhode Island Offshore Wind:** In November, BOEM may be prepared to issue a right-of-way grant for the Block Island Transmission System (BITS). On September 4, the U.S. Army Corps of Engineers (USACE) approved Deepwater Wind's (DWW) permit request to construct five wind turbine generators in state waters off Block Island and a transmission cable to the Rhode Island mainland. BOEM has drafted a Finding of No Significant Impacts that adopts the USACE EA, along with a right-of-way grant and a decision document with conditions of approval for DWW's General Activities Plan for the portion of BITS in Federal waters.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November.

**Massachusetts Offshore Wind:** In November, BOEM plans on issuing a Final Sale Notice for the Massachusetts Wind Energy Area. The Final Sale Notice is on an expedited surnaming track in order to hold the sale by the end of the year.

**Virginia Research Lease:** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted revisions to its Research Activities Plan (RAP) for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Oct. 6 and Oct. 31, and expects to submit a complete, updated RAP in November. BOEM tentatively plans to publish an environmental assessment for public comment in late November and hold a public meeting in December.

**Arctic Rule:** Since August 2014, when BOEM and BSEE delivered the rule to OMB for review, the bureaus have been working to address comments from the interagency review. In early November, DOI will complete its review of the updated draft rule and plans on sending it to OMB. OMB will once again circulate for interagency review and let DOI know if there any major issues that need to be resolved before they complete their review and return it to the Department for publication. On November 14, OMB will have had the rule for 90 days.

**Risk Management Advance Notice of Proposed Rulemaking (ANPR):** On November 17, 2014, the comment period on the ANPR will close. BOEM is tentatively planning on holding workshops on the ANPR in mid-December. Once the comment period closes, BOEM will review comments and finalize topics for the workshop based on the comments.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In December, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**WEEK-AHEAD REPORT**  
**OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT**  
**November 5 – November 15, 2014**

**Highlights of Travel, Meetings, and other Public Events**

OSMRE Briefing to Committee Staff with the U.S. House Subcommittee on Energy and Mineral Resources:  
On October 30, OSMRE briefed House Committee Staffers regarding the petition from Wild Earth Guardians seeking that OSMRE promulgate a rule prohibiting the production of visible Nitrogen Oxide (NO<sub>x</sub>) emissions during blasting. Questions asked included the length of the public comment period, the number of public comments received, cloud and fume monitoring techniques after blasting, and the use of drones in West Virginia, which monitor air quality after blasting.

OSMRE to Release Mine Pool Reports:

OSMRE will release two hydrologic characterization reports regarding underground mine pool systems in West Virginia and Maryland. A mine pool develops after mining ceases and the mine voids are allowed to fill with ground water. The two large, complex underground mine pool systems involve both pre- and post- SMCRA underground mines, multiple coal beds, pool areas of 25,000 and 53,000 acres, which cross the State borders. The reports present findings of current conditions and the need to prevent impacts to river systems by pumping

and treating water from the mines. They also demonstrate OSMRE's efforts in developing good science for regulating a complex industry. These two reports may generate interest from citizens and environmental groups.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

#### **Four Corners Power Plant and Navajo Mine Energy Project EIS:**

On October 29, OSMRE conducted a government-to-government consultation meeting with the Hopi Tribe regarding an Environmental Impact Statement (EIS) that OSMRE and other agencies are drafting in connection with a SMCRA permit application, for the Pinabete Mine in New Mexico. The Pinabete Mine is located south of the Navajo Mine, which is the sole supplier of coal to the Four Corners Power Plant (FCPP). The Pinabete Mine is expected to supply coal to the FCPP for an additional 25 years. OSMRE is the lead agency for preparation of the EIS, a draft that was published in the *Federal Register* earlier this year. The draft generated public controversy, as will the final EIS upon its publication, which is planned for March 2015.

#### **House Committee on Appropriations Staff Member Visited Kentucky Mine Sites:**

On November 3, 4 and 5, House Appropriations staff, along with OSMRE and DOI staff visited active and reclaimed coal mine sites in Kentucky to gain a better understanding of mining and reclamation activities required by SMCRA.

### **30-60 Day Look Ahead**

**WEEK-AHEAD REPORT: AS Water & Science**  
**November 5-14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

**Jennifer Gimbel** – will be in DC Nov 5-14.

**Lori Caramanian** will be on personal leave Nov 5-14.

**Tom Iseman** will travel to NREL near Denver, CO, Nov 4-6 for the DOE Hydropower Vision Senior Peer Review Group fall meeting; is in DC Nov 7-14.

**Camille Touton** will be in DC Nov 5-14.

**Public Announcements**

Wednesday, November 5

**Reclamation's Climate Adaptation Strategy:** Reclamation will release its Climate Adaptation Strategy. This is Reclamation's strategy and response to global climate change as it relates to managing water and power in the West. The strategy builds upon Reclamation's ongoing activities to incorporate climate adaptation more comprehensively across mission areas, programs and decision making.

**News Release–USGS 2010 Water Use Report:** On November 5, the USGS will release the Estimated Use of Water in the United States in 2010. Every five years, data at the county level are compiled into a national water-use data system and state-level data are published in a national circular. According to the latest report, national water use withdrawals have reached their lowest levels since before 1970. Total estimated withdrawals in 2010 in the U.S. were 355 billion gallons per day, or 13% less than total estimated withdrawals in 2005. This represented the lowest level of total withdrawals for all uses in the last 45 years. Thermoelectric power, irrigation, public supply, and self-supplied industrial water use cumulatively represented 94% of total withdrawals, however withdrawals for all of these uses declined in 2010. [THIS IS UPDATED FROM LAST WEEK'S REPORT]

Thursday, November 6

**USGS to Release Climate Data Initiative Water Theme:** On November 6, USGS on behalf of the White House and in cooperation with interagency partners, is announcing the release of the Climate Data Initiative Water Theme. The Climate Data Initiative was announced by President Obama in March 2014. USGS science has contributed to over 40 water and climate datasets within the Initiative, extending the range of software tools available to help analyze and assess impacts of a changing climate on the water cycle. These tools provide users with convenient data access capabilities, common data transformation utilities, and analysis methods for data and related information. A news release is planned in conjunction with the American Water Resources Association conference.

**Urban Waters Federal Partnership:** On Nov 6, EPA and Lisa Pelstring will meet with the National Association of Clean Water Agencies, a "New Partner for Urban Waters" signatory, to discuss specific projects and partnering opportunities in the 18 Urban waters locations.

Friday, November 7

**News Release–Characterization of Groundwater Quality in the Bakken Area:** Within the next week, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for future groundwater quality monitoring as energy development activities expand in the basin. [THIS IS UPDATED FROM LAST WEEK'S REPORT]

Monday, November 10

**2014 High Flow Experiment (HFE) Release at Glen Canyon Dam (AZ):** The Department of the Interior will conduct the third high flow experimental release from Glen Canyon Dam under the innovative science-based HFE Protocol approved in 2012. The protocol calls for conducting more frequent high flow experimental releases from the dam timed to occur following sediment inputs to the Colorado River from the Paria River. The HFE will provide resource benefits in the near term and will also provide scientific information to be used in future decision making. The third such release based on the HFE Protocol will begin on Monday, November 10, 2014 and last until Saturday, November 15, 2014. The maximum release during this period will be 37,500 cubic feet per second. [UPDATED FROM LAST WEEK'S REPORT]

**Federal Columbia River Power System (FCRPS) Annual Progress Report (ID) (New):** The Action Agencies, which consist of Reclamation, U.S. Army Corps of Engineers and Bonneville Power Administration, will roll out the FCRPS Biological Opinion Annual Progress Report the week of November 10.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Build America:** On July 17, 2014, the President released a Memorandum on public-private collaboration in infrastructure development. The Build America initiative is working to identify ways to increase public-private collaboration in infrastructure development, with a report due to the President around November 17, 2014. Interior's primary interests are around water infrastructure, energy development, and tribal infrastructure needs. Secretary Jewell and Deputy Secretary Connor have been involved in several principals meeting, and there are two principals events over the next two weeks in anticipation of the report to the President. [INCLUDED IN

## LAST WEEK'S REPORT]

**Klamath Basin Restoration Agreement (California):** On November 10, the Klamath Basin Coordinating Council's Executive Committee and others will hold a meeting in Redding, CA to initiate regular informal meetings to discuss the future of the Klamath Basin Restoration Agreement (KBRA) in relation to the mid-term elections, and the status of the federal legislation currently under review by the Senate. Reclamation's Mid-Pacific Deputy Regional Director, Jason Phillips, plans to attend. A second meeting is scheduled for December 18 in Redding, for the purpose of developing an action plan for furthering the goals of the KBRA as impacted by the 2014 elections.

### 30-60 Day Look Ahead

**Forthcoming USGS Polar Bear Research Papers:** In the coming months, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. [INCLUDED IN LAST WEEK'S REPORT]

**Signing Ceremony for a Hydropower MOU Action Plan:** In November, Reclamation/Interior, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new to be released interagency Sustainable Hydropower Action Plan (Phase II details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing. [INCLUDED IN LAST WEEK'S REPORT]

**Draft Central Valley Project Municipal and Industrial Water Shortage Policy (CA):** On November 21, Reclamation will release a Draft Environmental Impact Statement (EIS) for the Central Valley Project's (CVP) Municipal and Industrial (M&I) Water Shortage Policy for public comment. Four public meetings will be held in December to receive additional comments. Finalization of the EIS will result in implementation of guidelines addressing the allocation of limited CVP water supplies during periods of shortage.

**National Urban Waters Federal Partnership news release planned:** In late November, DOI and EPA will take the lead on a multi-agency and NGO news release regarding the 25 national NGOs and associations that are formally signing onto the Urban Waters Federal Partnership. [INCLUDED IN LAST WEEK'S REPORT]

**National Urban Waters Federal Partnership workshop:** EPA, USDA, and Interior will host the national Urban Waters Federal Partnership (UWFP) workshop in Arlington, VA, December 2-4. A similar workshop was held two years ago, and Interior is encouraging Bureau representatives from USGS, Reclamation, FWS, and NPS working on the 19 pilot locations to attend. Representatives from the 30 national NGOs whose Presidents have signed an endorsement statement offering to align resources with UWFP sites will attend for the first time. [INCLUDED IN LAST WEEK'S REPORT]

## WEEK-AHEAD REPORT: BUREAU OF RECLAMATION

November 5 – November 14, 2014

**Highlights of Travel, Meetings, and other Public Events:** *From Tuesday, November 11 through Friday the 17<sup>th</sup>, I will be attending the National Water Resources Association (NWRA) Conference in San Diego, CA. NWRA is an advocacy group comprised primarily of water and irrigation districts from the Western United States. In addition to giving the keynote address, I will, as has been done by my predecessors hold a series of about 50 one-on-one meetings with water district leaders who attend the conference.*

### **Public Announcements**

Wednesday, November 5

**Climate Adaptation Strategy:** Reclamation will release its Climate Adaptation Strategy. This is Reclamation's strategy and response to global climate change as it relates to managing water and power in the West. The strategy builds upon Reclamation's ongoing activities to incorporate climate adaptation more comprehensively across mission areas, programs and decision making.

**WaterSMART Pecos Basin Study Stakeholder Meeting (NM):** The stakeholders meeting for the WaterSMART Pecos Basin Study will be held in Roswell, New Mexico, to discuss model scenarios.

**Climate Change Webinar Offered by Pacific Northwest Region in (ID):** Reclamation is offering the last of a five-part webinar series on the Columbia River Basin Impacts Assessment for employees and affected stakeholders. The Assessment data will become the basis for future Basin Studies in the region. The two-hour webinar events will run through November 5. [www.usbr.gov/pn/climate/crbia/webinar.html](http://www.usbr.gov/pn/climate/crbia/webinar.html)

**Federal Interagency Council on Outdoor Recreation (DC):** Acting Deputy Commissioner for External and Intergovernmental Affairs Dionne Thompson will participate in the Federal Interagency Council on Outdoor Recreation Principals' Meeting in Washington, D.C.

Thursday, November 6

**Reasonable and Prudent Alternative Annual Science Review (CA):** The Reasonable and Prudent Alternative Annual Science Review is scheduled in Sacramento on Nov. 6-7. This event, which is a requirement stated within the 2008 and 2009 National Marine Fisheries Service Biological Opinion for the Coordinated Long-term Operation of the Federal Central Valley Project and the California State Water Project, will focus on the drought and drought operations. Each year, the meeting evaluates how the RPA actions were implemented and their effectiveness for Endangered Species Act-listed species during the past year. The conference is held with NMFS and the U.S. Fish and Wildlife Service, and the public is invited to attend but not participate. There is no anticipated discussion of water year 2015 drought operations at this event.

**Resource Speaker on Water Education Foundation Tour (CA):** Reclamation's San Joaquin River Restoration Program manager will be a resource speaker on the Water Education Foundation's San Joaquin River Restoration tour November 6-7. The tour starts and ends in Fresno, Calif.

Friday, November 7

**CalLite 3.00 (Beta) Model (CA):** Reclamation and the California Department of Water Resources will jointly release the CalLite 3.00 (Beta) Model, which is a Central Valley Project and State Water Project management screening tool. CalLite will serve as a screening level model that runs faster and provides results within 5

percent of the former CalSim II model. CalLite is an improved educational resource for stakeholders and provides powerful analytical capabilities for more experienced modelers. It has a user-friendly interface, faster simulation time, and options for evaluating the impact of different regulations, facilities, and operational strategies on Federal and State reservoirs in the Central Valley. Improvements since the previous version of the CalLite model allows us to run more detailed models and simulations about the implications of actions required under specific State regulations and Federal statutes such as the Central Valley Project Improvement Act (CVPIA). It also allows for more accurate climate change analysis.

**Public Comment Period Open on Windy Gap Excess Capacity Contract with Colorado Municipal Subdistrict (CO):** The 30-day public comment period, which opened October 8, closes. Reclamation, Northern Water Conservancy District and Northern Water's Municipal Subdistrict have been negotiating a contract that would allow the subdistrict to use excess or unused capacity in Reclamation's Colorado-Big Thompson Project for the Windy Gap Project and Future Windy Gap Firming Project.

Saturday, November 8

**Let's Move Outside/Capell Cove Cruise (CA):** Reclamation will host a Let's Move Outside/ Capell Cove Cruise paddling tour led by a Park Ranger at Lake Berryessa in Central California.

**Salmon Festival at Lost Lake (CA):** Reclamation will have a booth about the implementation of the San Joaquin River Restoration Program, including reintroduction of fall and spring-run Chinook salmon, at the salmon festival hosted by Trout Unlimited at Lost Lake Park near Friant, Calif. The festival is a fun event for the community to better understand the restoration and reintroduction of chinook salmon into the San Joaquin River.

Sunday, November 9

**Let's Move Outside/Geocaching Tuttle town's Trails (CA):** Reclamation will host a Let's Move Outside/Geocaching Tuttle town's Trails activity at New Melones Lake's Tuttle town Recreation Area in Central California. A Park Ranger will hide trinkets along the trails in Tuttle town then lead a 3-mile roundtrip hike with participants using their GPS units or an app on their phones to "cash in" on the geocaching craze and find the prizes.

Monday, November 10

**2014 High Flow Experiment (HFE) Release at Glen Canyon Dam (AZ):** The Department of the Interior will conduct the third high flow experimental release from Glen Canyon Dam under the innovative science-based HFE Protocol approved in 2012. The protocol calls for conducting more frequent high flow experimental releases from the dam timed to occur following sediment inputs to the Colorado River from the Paria River. The HFE will provide resource benefits in the near term and will also provide scientific information to be used in future decision making. The third such release based on the HFE Protocol will be on Monday, November 10, 2014 and last until Saturday, November 15, 2014. The maximum release during this period will be 37,500 cubic feet per second.

**Federal Columbia River Power System (FCRPS) Annual Progress Report (ID) (New):** The Action Agencies, which consist of Reclamation, U.S. Army Corps of Engineers and Bonneville Power Administration, will roll out the FCRPS Biological Opinion Annual Progress Report the week of November 10.

Tuesday, November 11

Nothing to report

Wednesday, November 12

**Reclamation's FY 2015 Science and Technology Program Research Awards:** Reclamation will announce the Science and Technology Program Research Awards for FY 2015. Reclamation has selected 131 projects totaling \$9.2 million. The program is focused on providing innovative solutions for Reclamation water and power facility managers and stakeholders.

Thursday, November 13

Nothing to report

Friday, November 14

**High Schoolers Tour of Trinity Powerplant (CA):** Students from Trinity High School will tour the Trinity Powerplant for an introduction to hydro-electric generation and maintenance. The students will be accompanied by several adults and a representative from the City of Redding. The purpose is for students to consider careers in the power generation industry.

### **Major Press Inquiries**

Tony Davis of the *Arizona Star* (Tucson, AZ) is asking for the level of responses to the solicitation letters for the Colorado River System Conservation Pilot Program and the names of those individuals. Discussions on release of information remain in progress.

### **Items of Note/Expected Legislative, Legal, and Policy Issues:**

**Klamath Basin Restoration Agreement (California):** On November 10, the Klamath Basin Coordinating Council's Executive Committee and others will hold a meeting in Redding, CA to initiate regular informal meetings to discuss the future of the Klamath Basin Restoration Agreement (KBRA) in relation to the mid-term elections, and the status of the federal legislation currently under review by the Senate. Reclamation's Mid-Pacific Deputy Regional Director, Jason Phillips will be attending. A second meeting is scheduled for December 18 in Redding, to develop an action plan for furthering the goals of the KBRA as impacted by the 2014 elections.

**Delta Cross Channel Gates Closed (California):** On November 2, at approximately 9 a.m., Reclamation closed the Delta Cross Channel Gates to protect young winter-run salmon migrating out of the Sacramento River towards San Francisco Bay. This is based on the Reasonable and Prudent Alternatives in the National Marine Fisheries Service Biological Opinion. The gates will be closed until further notice.

### **30-60 Day Look Ahead**

**Jensen Unit Block Notice (UT):** A Block Notice has been approved for the sale of 3,300 acre-feet (AF) of Jensen Unit water to the Uintah Water Conservancy District. As part of this decision, Reclamation will continue to convey up to 780 AF of water into Stewart Lake when the water is called for. Reclamation prepared an environmental assessment to examine the potential environmental impacts of this action, which resulted in a Finding of No Significant Impact. It is anticipated that a prepayment ceremony will be scheduled for some time in January, 2015.

**Draft Central Valley Project Municipal and Industrial Water Shortage Policy (CA):** On November 21, Reclamation will release a Draft Environmental Impact Statement (EIS) for the Central Valley Project's (CVP)

Municipal and Industrial (M&I) Water Shortage Policy for public comment. Four public meetings will be held in December to receive additional comments. Finalization of the EIS will result in implementation of guidelines addressing the allocation of limited CVP water supplies during periods of shortage.

**Signing Ceremony for a Hydropower MOU Action Plan:** In November, Reclamation/Interior, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new interagency Sustainable Hydropower Action Plan (Phase II) to be released, details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing. [INCLUDED IN LAST WEEK'S REPORT]

**Oregon Water Resources Congress Annual Conference:** On December 2-5, Principal Deputy Commissioner Lopez is scheduled to participate in the Oregon Water Resources Congress Annual Conference in Hood River, Oregon.

**U.S. Chamber of Commerce Corporate Citizenship Center Conference:** On December 2-4, the Chamber of Commerce Corporate Citizenship Center has invited Reclamation hydrologist Dagmar Llewellyn to speak in McLean, Virginia, about climate change due to her work on the Upper Rio Grande Impacts Assessment at the Water-Energy-Food Nexus. The Corporate Citizenship Center is a 501C3 non-profit affiliate of the Chamber of Commerce, but the conference is co-hosted with Lockheed Martin, the contractor operating Sandia National Laboratories, a partner on the study. Forms are being processed to determine Dagmar's participation.

**Washington State Water Resources Association Conference (WA):** On December 3-5, Reclamation will participate in the Washington State Water Resources Association Conference in Spokane, Washington.

**Colorado River Water Users Association Meeting (NV):** In early December, Reclamation will attend the annual Colorado River Water Users Association meeting in Las Vegas, Nevada.

**Congressional Western Caucus (NV):** Jonathan Shuffield, Executive Director of the Congressional Western Caucus and staff for Congressman Steve Pearce (NM-2) is requesting a tour of Hoover Dam for December 5<sup>th</sup>. The total number of attendees is unknown at this time.

**Grand Coulee Dam Visit (WA):** On December 2-5, Reclamation's Principal Deputy Commissioner Estevan Lopez will visit Grand Coulee Dam.

**Idaho Water Users Association (ID):** On January 20-22, Reclamation will attend the Idaho Water Users Association Annual Convention in Boise, Idaho.

**WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY**  
**November 5-14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On **November 11-14**, USGS Acting Director Suzette Kimball will be participating at the Eleventh Plenary Session of the Group on Earth Observations (GEO-XI), in Geneva, Switzerland.

During **November 5-10**, Suzette Kimball will be in Reston, Va. and Washington, D.C. No travel.

**Public Announcements**

Wednesday, November 5

**News Release–USGS 2010 Water Use Report:** On **November 5**, the USGS released the Estimated Use of Water in the United States in 2010. Every five years, data at the county level are compiled into a national water-use data system and state-level data are published in a national circular. According to the latest report, national water use withdrawals have reached their lowest levels since before 1970. Total estimated withdrawals in 2010 in the U.S. were 355 billion gallons per day or 13% less than total estimated withdrawals in 2005. This represented the lowest level of total withdrawals for all uses in the last 45 years. Thermoelectric power, irrigation, public supply, and self-supplied industrial water use cumulatively represented 94% of total withdrawals. However, withdrawals for all of these uses declined in 2010.

**Technical Announcement–Tracking the Nitrate Pulse to the Gulf of Mexico: Yesterday** (Nov 4), USGS announced a new paper published in the journal *Environmental Science & Technology* that describes how cutting edge optical sensor technology is being used in the Mississippi River basin to accurately track the nitrate pulse to the Gulf of Mexico. Excessive springtime nitrate runoff from agricultural land and other sources in the Mississippi drainage flows into the Mississippi River and downstream to the Gulf of Mexico. This excess nitrate contributes to the Gulf of Mexico hypoxic zone, an area with low oxygen known commonly as the "dead zone." NOAA-supported researchers reported that the summer 2014 dead zone covered about 5,052 square miles, an area the size of Connecticut.

**News Release–Effects of Climate & Land Use Changes on Birds:** On **November 5**, a new USGS paper will be published in the journal *PLOS ONE* describing the likely impacts of climate and land use change on bird species in the United States, over the period from 2001-2075. A news release is planned. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

Thursday, November 6

**USGS to Release Climate Data Initiative Water Theme:** On **November 6**, USGS, on behalf of the White House and in cooperation with interagency partners, is announcing the release of the Climate Data Initiative Water Theme. The Climate Data Initiative was announced by President Obama in March 2014. USGS science has contributed to over 40 water and climate datasets within the Initiative, extending the range of software tools available to help analyze and assess impacts of a changing climate on the water cycle. These tools provide users with convenient data access capabilities, common data transformation utilities, and analysis methods for data and related information. A news release is planned in conjunction with the American Water Resources Association conference.

Friday, November 7

**News Release–Characterization of Groundwater Quality in the Bakken Area:** Within the **next week**, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for

future groundwater quality monitoring as energy development activities expand in the basin. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

Saturday & Sunday, November 8 & 9

Nothing to report.

Monday, November 10

Tuesday, November 11

Nothing to report.

Wednesday, November 12

Nothing to report.

Thursday, November 13

Nothing to report.

Friday, November 14

Nothing to report.

TBD

**News Release–USGS to Release California Drought Visualization Program:** In the **coming weeks**, the USGS will announce the California Drought Visualization Program, a web resource developed by the USGS Center for Integrated Data Analytics. The application, currently available online, was released as part of the White House's climate change and open water data initiatives to provide the general public with a timeline of statewide drought coverage, related news articles, and the economic impacts of the drought on California's crops. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Release–2014 CSC Project Award Announcement:** In the **coming weeks**, USGS will distribute several press releases announcing the 2014 research projects funded by the 8 Climate Science Centers and USGS National Wildlife and Climate Change Science Center. Each CSC will have a separate news release and a comprehensive release will be distributed nationally. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Releases–Idaho Studies on Mine Drainage:** In the **coming weeks**, USGS will announce two studies analyzing long-term water-quality monitoring results on mine-influenced drainages in Idaho. One report describes temporal and spatial trends in selenium concentrations at the outlet of the Blackfoot River and the second assesses the status, transport, and long-term trends in the concentrations and loads of selected nutrients and trace metals in specific stream reaches in the Coeur d'Alene and Spokane Rivers. Local news releases are planned.

**News Release–US Topo Features Mountain Bike Trails:** In early **December**, USGS plans to announce the inclusion of mountain bike trails to upcoming US Topo map quadrangles. The first state maps to feature mountain bike trails are projected to be in Arizona. The mountain bike trail data is provided through a partnership with the International Mountain Biking Association and MTB Project, which collects and verifies data collected by local IMBA chapters, IMBA members, and the public. A news release is planned and a media event and roll-out are being considered. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Release–City Votes on USGS Research Project:** In **early November**, USGS and Reclamation will issue a joint news release about the Waco Treatment Wetlands project. Next month, the City of Waco (Texas) City Council is scheduled to vote on final construction approval of the Waco Treatment Wetlands, a multi-disciplinary/partner research project to demonstrate whether an innovative constructed wetlands design can

remove endocrine disrupters that occur in reclaimed wastewater. USGS, Reclamation the City of Waco and Baylor University are all involved. Once approved, construction of the wetlands could start in the next month. Media coverage is anticipated. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Climate Change Effects in the Lake Michigan Basin:** In the **next month**, USGS will release a new report that discusses likely hydrological effects of climate change on the Lake Michigan Basin through 2099. Findings suggest increased streamflow throughout the basin and late growing seasons. A news release is planned. *[THIS WAS IN LAST WEEK'S REPORT]*

### **Major Press Inquiries**

**Youth blogger to visit USGS Science Center:** On **November 13**, youth science blogger Terry Jennings will visit the USGS Eastern Geology and Paleoclimate Science Center in Reston, Va. to learn about the center's work and tour the labs. Her blog is *KC's Wild Facts*.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Oversight Hearing on Volcano Hazards:** The USGS has been invited to testify at a House Natural Resources Energy and Mineral Resources Subcommittee oversight hearing on volcano hazards. The hearing is tentatively scheduled for the week of November 17. USGS Volcano Hazards Program Coordinator, Charlie Mandeville, will likely serve as the USGS witness.

### **30-60 Day Look Ahead**

**Forthcoming USGS Polar Bear Research Papers:** In the **coming months**, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—New Findings on Polar Bear Genetic Structure and Diversity:** In the **coming weeks**, USGS will announce a new paper to be published in the journal *PLOS One* that shares new findings on the circumpolar genetic structure of polar bears. USGS scientists led an international team to share data on polar bear genetics, in order to determine how genetic diversity and structure have changed in response to dramatic declines in the sea-ice habitat of polar bears, how current genetic patterns compare with past patterns, and how genetic demography changed with historical fluctuations in climate. This major analysis on subpopulation connectivity during recent sea ice decline provides a substantially updated baseline for the conservation framework currently under development by the 5 nations (U.S., Canada, Greenland, Norway, and Russia) with polar bears. A news release is planned and briefings are planned for FWS in Alaska and Alaska Native co-management partners. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Funding for new Gages in Minnesota:** In the **coming weeks**, USGS will announce NSIP funding for new streamgages in Minnesota. The announcement will be similar to the September 9 announcement for new streamgage funding in Idaho, distributed to the Minnesota media outlets. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Drought Impacts on Mojave Bird Species:** In the **coming weeks**, USGS will announce a new paper to be published in the journal *Auk*. The study, led by the University of Arizona, finds that drought-caused delays in nesting, coupled with the effects of nest depredation and parasitism, will have a negative effect on birds in the Mojave Desert. A news release is being planned. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Marcellus Development Impacts on Salamander Ranges:** In the **coming weeks**, USGS will announce a new paper that indicates that habitat loss may be significant for terrestrial salamanders in the Marcellus Shale as a result of oil and gas development activities. USGS researchers modeled losses of forest habitat in the Marcellus shale play, and estimated the corresponding reduction in forest-dependent salamander ranges based on a variety of shale gas development scenarios. All scenarios showed forest loss and potentially large range restriction for the salamanders. Despite the uncertainty in the species' distribution modeling, the results indicate that habitat loss may be significant, implying a real potential impact on terrestrial salamander populations. Given other threats facing terrestrial, range-restricted species, such an impact from a single source would indeed be concerning. A full assessment of extinction risk will require better and more extensive data, and though the scenarios are insufficient to fully assess this risk, the results from our simulations are a first step. The paper will be published in the journal *Biological Conservation*, and a news release is planned. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—USGS to Release Study on Disease Virulence Evolution:** In the **coming weeks**, a news release will announce new research, led by the USGS, that finds that diseases that cause debilitating symptoms are expected to evolve lower virulence along the epidemic front compared to the epidemic origin. Motivated by real-world observations of a new disease in songbirds, a mathematical investigation shows that disease virulence—the increased death rate of infected individuals—is expected to evolve to lower levels along the epidemic front compared to the disease origin. The paper will be published in *The American Naturalist*. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Freshwater Fisheries and Global Food Security:** In the **coming weeks**, Michigan State University will distribute a news release describing the importance of inland fisheries to global food security, the challenges faced due to competing demands for freshwater and possible solutions. USGS scientists contributed to the publication and will be identified in the news release. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—NC Baseline Study for Hydraulic Fracturing:** In the **coming weeks**, USGS will announce a new study that examined groundwater quality samples collected in a potential shale gas production area in North Carolina. This report can be considered as baseline information for groundwater quality in the aquifers of the study area because the natural gas industry is not yet active in the state. The results showed that dissolved methane concentrations were low. The study will be published as a USGS Open-File Report. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Seal flu virus:** In the **next few weeks** the USGS National Wildlife Health Center will issue a national news release announce a new report showing that the avian flu virus that caused widespread harbor seal deaths in 2011 can easily spread to and infect other mammals and potentially humans. The release will likely be distributed jointly with the St. Jude's Children's Memorial Hospital. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—The impact of road salt on watersheds:** In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Upper Klamath ET Maps:** In the **coming weeks**, USGS will distribute a press release for upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**Upcoming Fact Sheet on Produced Waters:** In the **coming months**, USGS will publish a new fact sheet that will provide an overview of USGS activities and information from published sources regarding produced waters from hydrocarbon production.

**Upcoming Analysis of Permafrost Gas Hydrate:** In the **coming months**, a new USGS paper to be published in *Journal of Chemical Engineering Data* reveals where permafrost-associated gas hydrates are most likely to occur, concluding that Arctic Alaska and the West Siberian Basin are the best prospects.

**Upcoming Paper on Fate of Injected CO<sub>2</sub> in Louisiana:** In the **coming months**, a new USGS paper is scheduled for publication in an outside journal that evaluates the ultimate fate of carbon dioxide that is injected into Louisiana's Wilcox Group formation of the Gulf Coast Basin.

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY–INDIAN AFFAIRS  
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION**

**November 5 to November 14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On November 5, the AS-IA will give remarks at the DOI/IA National Native American Heritage Month event at the Office of Personnel Management Alan Campbell Auditorium. Theme: “Native Pride and Spirit: Yesterday, Today and Forever.”

On November 5, the AS-IA, DAS-M, BIE Director, BIE Deputy Bureau Director, Office of Self Governance and Office of Budget and Performance Management will meet with the Tribal Interior Budget Council (TIBC) on budget issues.

On November 5, the AS-IA and Principal Deputy Assistant Secretary will meet with the Tanana Chiefs Conference Director to discuss the process of becoming a TIBC representative for the Alaska Region.

On November 6, the AS-IA will present at the Special Institute on Energy and Mineral Development in Indian Country for the Rocky Mountain Mineral Law Foundation in Tucson, AZ.

On November 10, the AS-IA will meet with Pueblo of Acoma’s Gaming Task Force to discuss a gaming compact with the State of New Mexico for a class III tribal-state gaming compact.

On November 13, BIE Director Roessel will lead a discussion in Albuquerque, NM on American Indian languages to develop a BIE policy on Native languages for BIE schools.

**Public Announcements**

**Wednesday, November 5**

The DOI/Indian Affairs National Native American Heritage Month event will take place at the OPM headquarters building in Washington, D.C. The theme is “Native Pride and Spirit: Yesterday, Today, and Forever.”

Southwestern Indian Polytechnic Institute (SIPI) will host the Tribal Geologic Information System (GIS) Conference on campus through November 7.

Dr. Roessel’s interview with the New Mexico reporter on the Pine Hill School will air today.

**Thursday, November 6**

The BIE American Indian Language Summit will take place in Albuquerque, NM.

The AS-IA will approve the Northern Cheyenne Tribe’s probate code and announce the approval in a press release today. Codes such as Northern Cheyenne’s allow tribes to determine how trust or restricted land within the reservation passes to heirs upon an individual’s death. The AS-IA will notify the Tribe.

**Friday, November 7**

Today is the deadline for submission of comments on Revision of Agency Information Collection for Indian Child Welfare Quarterly and Annual Report (FR Notice published 9-8-14) to the BIA Office of Indian Services Division of Human Services.

**Saturday & Sunday, November 8 & 9**

Nothing to report

**Monday, November 10**

Nothing to report

Tuesday, November 11

Nothing to report

Wednesday, November 12

Nothing to report

Thursday, November 13

The Department will host a tribal consultation on the Indian Water Rights Settlement Program in Lakewood, CO.

Friday, November 14

Training and technical assistance will be provided in Albuquerque, NM to the six tribal project directors of the Sovereignty in Indian Education Enhancements.

### **Major Press Inquiries**

Indianz.com requests confirmation that Byron McDonald is a BIA Law Enforcement officer.

Native America Calling requests someone from OJS to appear on their program about Highway Safety in Indian Country.

Phoenix, AZ, public radio station KJZZ requests a telephone interview with someone on the Sovereignty in Indian Education Enhancement Initiative funding and details on the program's goals. The station also will be contacting tribes that received SIE funding for their insights.

The New York Times requests information on the Pamunkey Tribe and their pursuit of federal recognition.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Sovereignty in Indian Education Award letters are in the Data Tracking System for simultaneous surname.

Department of State staff will host a conference call with federal interagency staff and Navajo Nation representatives to discuss Navajo's request for U.S. assistance in compelling France to repatriate sacred objects that were sold at a June 2014 auction in Paris.

AS-IA's Office of Regulatory Affairs is compiling the comments received on the Proposed Rule on Federal Acknowledgment (Part 83).

The Department's Office of Hearings and Appeals is compiling comments received on the Proposed Rule on Hearings for Federal Acknowledgment.

The Proposed Rule on Housing and Improvement Program (25 CFR 256) is currently in the surname process with the Office of the Solicitor. The goal is to publish the rule this month.

The Paperwork Reduction Act package for the Proposed Rule on Tribal Transportation Program (25 CFR 170) is being reviewed by the Department Information Collection Clearance Officer. The next step will be to put the rule into surname.

The Proposed Rule on Secretarial Elections (25 CFR 81) has already been published in the Federal Register. Consultation on this rule was held at the NCAI meeting on October 26 in Atlanta. Additional consultations will be held this month in northern California and Oklahoma City.

The BIE is planning numerous consultations on the Draft Rule on Tribal Colleges and Universities (25 CFR 41).

The AS-IA office and BIE have drafted a Proposed Rule on Johnson O'Malley Contracts (25 CFR 273). The AS-IA office of Regulatory Affairs is working on the associated Paperwork Reduction Act request.

Indian Affairs and the Department of State continue to draft guidance to U.S. embassies regarding the repatriation of sacred objects and human remains from foreign museums.

### **30-60 Day Look Ahead**

On November 18, the Office of Inspector General will initiate its inspection of the DOI's Occupational Safety and Health and Workers' Compensation Programs with an interview meeting with Division of Safety and Risk Management (DSRM) staff. The purpose of this inspection is to assess the current conditions by analyzing data to identify the main contributing factors behind reported safety incidents, workers' compensation costs, and lost productivity.

November 15 is the deadline for comments to BIE on the preliminary discussion draft of revised regulations regarding grants to Tribally Controlled Colleges and Universities, Diné College, and Tribally Controlled Postsecondary Career and Technical Institutions.

On November 17, BIE Director Roessel and Don Yu will hold the first in a series of meetings with Tribes and Tribal leaders to explain the Blueprint for Reform and the locations of the Education Resource Centers (ERCs). These meetings are to secure support for the Blueprint and the ERCs. The first meeting will be in Flagstaff, AZ with the Navajo Nation.

On November 18, the Department will hold a Tribal Consultation on Secretarial Elections in Oklahoma City, OK.

On November 19, staff will attend an all-day program at the National Museum of the American Indian titled: "25 Years of Repatriation under the NMAI Act." Several expert panels will discuss the repatriation of human remains, as well as sacred objects. Australia's Ambassador to the US will discuss his experiences with international repatriation projects.

On November 20, the Department will hold a Tribal Consultation on Secretarial Elections in Rocklin, CA.

November 28, 2014 is Native American Day.

On November 20, the AS-IA will be a Keynote Speaker at the 2014 Indigenous Law Conference: Dismantling Barriers in American Indian Education at Michigan State University in Lansing, MI.

On December 1-5, the 24th Annual BIA Tribal Providers Conference will be held at the Dena'ina Civic and Convention Center in Anchorage, AK.

On December 3, 2014 the White House Tribal Nations Conference will be held at the Capital Hilton in Washington, D.C.

On December 9, SIPI President Allison and Vice President Christensen will present to the New Mexico Legislative Finance Committee.

On December 9-10, the American Indian Chamber of Commerce Conference will take place in Washington, D.C. The Indian Affairs Division of Economic Development (DED) is helping the Chambers of Commerce plan and implement this event, the first-ever conference organized by all of the American Indian Chambers in the U.S.

On January 1, the Department of State will file a report with the UN Human Rights Committee (HRC) on the status of human rights in the US during the period 2011-2014. This will be the second time the U.S. has made such a report. The first report was in 2010. A U.S. delegation will be formed in early 2015 to make an oral presentation before the HRC in late April/early May 2015.

**WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)  
November 5<sup>th</sup> –November 14<sup>th</sup>, 2014**

**Highlights of Travel, Meetings, and other Public Events**

November 3-4 – Vincent G. Logan, Special Trustee will travel to Albuquerque, New Mexico to meet with the OST Investment Review workgroup staff.

**Public Announcements**

**November 5, 2014**

The Director of Financial Education will attend the public meeting of the Financial Literacy and Education Commission (FLEC) in Washington, DC. FLEC was established under the Fair and Accurate Credit Transactions Act of 2003 and was tasked to develop a national financial education web site (MyMoney.gov) plus a national strategy on financial education. It is chaired by the Secretary of the Treasury and vice chaired by the Director of the Consumer Financial Protection Bureau and is made up of the heads of 19 additional federal agencies. The Commission is coordinated by the Department of the Treasury's Office of Financial Education within the Office Consumer Policy. *[THIS WAS IN LAST WEEK'S REPORT]*

The Deputy Special Trustee-Field Operations will present OST's budget and probate initiatives at the Tribal Interior Budget Council (TIBC) meeting in Washington, D.C. *[THIS WAS IN LAST WEEK'S REPORT]*

**November 6, 2014**

The Concho Agency FTO and staff will provide a presentation on trust related matters at the tribal sponsored conference and co-sponsored by the Diabetes Wellness Program and the Elders Day Out Programs of the Cheyenne-Arapaho Tribes of Oklahoma. OST will provide a 45-minute presentation and an informational booth on topics regarding Whereabouts Unknown (WAU), Direct Deposit, the Jodi Marquette Wills Project and LBBP. *[THIS WAS IN LAST WEEK'S REPORT]*

**November 7, 2014**

No outreach to report.

**November 8, 2014**

The Pima Agency FTO and Colorado River Agency FTO will meet with beneficiaries and students at the Hualapai Lodge on the Hualapai Reservation to assist in "will signing" for individual landowners. Wills were prepared by Arizona Summit Law School Indian Wills Clinic students under the guidance of Professor Betsy Hollingsworth.

**November 9, 2014**

No outreach to report.

**November 10, 2014**

The Cherokee and Eastern Oklahoma Region FTO will attend the Cherokee Nation Tribal Council Meeting Tahlequah, Oklahoma. The FTO regularly attends these meetings to maintain accountability to tribal leaders and beneficiaries.

**November 11, 2014**

The Tulsa FTO will attend the Choctaw Nation Veterans Day Ceremony at Tuskahoma, Oklahoma. OST staff will provide information on OST services, the Land Buy-Back Program (LBBP), financial literacy educational services, and credit counseling.

**November 12, 2014**

No outreach to report.

**November 13, 2014**

The Papago Agency FTO will attend a meeting with the Tohono O'odham Nation Finance Committee and Treasurer regarding tribal accounts.

**November 14, 2014**

No outreach to report.

**Major Press Inquiries**

None to report.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**U.S. District Court for the District of Columbia (DDC) Tribal Litigation for Quinn-Leinbach, Settlement Proposal to the Obama Administration (SPOA) Tribes, and other Litigating Tribes**

The Office of Historical Trust Accounting (OHTA) is actively supporting the Office of the Solicitor (SOL) and the Department of Justice (DOJ) tribal litigation team's efforts to reach a settlement on the remaining cases.

**Alabama-Quassarte Tribal Town:** On October 23, 2014, the Interior Board of Indian Appeals (IBIA) issued a final reconsidered decision on remand from the Court regarding whether Plaintiff is the legal beneficiary of what is referred to as the Surface Lease Income Trust (the Trust). The IBIA concluded that the Trust is not held in trust for Plaintiff.

**Chickasaw & Choctaw:** The discovery is currently scheduled to end November 15, 2014 pending a response to the government's request for an extension.

**Colorado River Indian Tribes:** The DOJ requested support settlement efforts. OHTA provided SOL and DOJ with updated natural resource revenue under-collection model results for an additional discount scenario.

**Quapaw, Goodeagle/Bear & Bear:** The discovery deadline has been extended until February 19, 2015.

**WEEK-AHEAD REPORT:  
ASSISTANT SECRETARY FOR POLICY MANAGEMENT AND BUDGET  
November 5-14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

This week, the Principal Deputy Assistant Secretary - Policy, Management, and Budget, Deputy Assistant Secretary - PRE, and OWF Director are in Boise, ID participating in the Bureau of Land Management's *The Next Steppe: Sage Grouse and Rangeland Wildfire Conference*.

DAS Faeth and International Policy Analyst Ryan Close are on travel to Sydney, Australia Nov. 3-16 in support of the Secretary's trip, where the Secretary will serve as the U.S. Head of Delegation for the *World Parks Congress*.

**Public Announcements**

**ONRR to Issue Civil Penalty.** ONRR will issue a press release the week of November 3, 2014, announcing a civil penalty of \$46,772 to Jack J. Grynberg (Grynberg). ONRR investigated Grynberg's failure to submit production reports (Form ONRR-4054) and found 52 violations dating back to July 2006. ONRR issued a Notice of Noncompliance (NONC) to Grynberg, giving the company 20 days to correct the violations; however, Grynberg failed to correct those violations, consequently civil penalties will continue to accrue until Grynberg provides the reports to ONRR.

**ONRR to Announce FY 2014 Disbursement.** ONRR will announce the annual Fiscal Year 2014 disbursement data through a DOI press release in the mid-November timeframe. ONRR will forward the draft press release and potential questions and answers to the Secretary's Office of Communications the week of November 3, 2014, for review and coordination regarding the timing of the release. That coordination includes final validation of the disbursement data and loading the information on ONRR's Statistics Web Page for public release.

**ONRR Public Meetings.** ONRR continues outreach with individual Indian mineral owners which allow us to listen to concerns and suggestions for royalty accounting improvement, answer questions, and identify and resolve mineral-related problems in partnership with BIA, BLM, and OST. ONRR scheduled meetings with mineral owners at the Nenahnezad Chapter House in Fruitland, New Mexico, on November 13, 2014.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**FY 2015 Appropriations:** DOI is currently operating under a CR through Dec. 11. POB issued guidance to Bureau offices providing allocations of available funding under the CR as well as the requirements and limitations in the legislation. OMB has approved all pending apportionments to provide the availability of carryover balances in FY 2015.

**FY 2016 Budget:** The Department has completed program briefings for OMB and will continue to provide follow-on information as they prepare recommendations for consideration by senior leadership. OMB has indicated agencies should expect passback shortly after Thanksgiving.

**New GAO Audits and Reviews:**

- GAO held the entrance conference regarding its review of *Decommissioning of Offshore Wells*. This review is being done pursuant to a request from Ranking Member DeFazio of the House Natural Resources Committee. GAO's objectives are to assess the types, amount, and coverage of bonds to ensure the decommissioning of oil and gas wells in the Gulf of Mexico; as well as, review DOI's

policies for managing federal liability for decommissioning. GAO plans to visit regional offices in the next couple of months.

- GAO plans a new engagement on *Federal Oversight and Compliance of the Low Income Housing Tax Credit* as requested by Senator Grassley. GAO is not conducting an audit of this program, but is interested in collecting information regarding the administration and oversight of the NPS' Historic Preservation Tax Incentive Program.
- GAO held the entrance conference on *Indian Housing Block Grant (IHBG) Program Funding Data*. U.S Housing and Urban Development is the focus of this review; however, GAO discussed the current practice of using census population data and the strengths and weaknesses of utilizing census data in determining the IHBG allocations with Indian Affairs.

#### **New OIG Audits and Reviews:**

- The OIG held the entrance conference regarding their evaluation of *BLM's Idle Wells Program*. The OIG's focus is on the oil and gas wells managed by BLM as well as those located on lands managed by BIA and the Forest Service. OIG plans to visit Washington, D.C. next week and Wyoming the third week of November to conduct interviews.
- The OIG held the entrance conference regarding their evaluation of *BIA Funded/Operated Detention Programs*. This is in response to a congressional request to discuss the progress and improvements made since the issuance of the report in 2004 by the OIG. The OIG plans to visit both adult and juvenile jails in Billings; Hardin, Montana; Crow; and Northern Cheyenne. OIG expects to issue their report by the end of the Fiscal Year.
- The OIG plans a new audit of *DOI's Purchase Cards* under the Integrated Charge Card Program. The entrance conference has been scheduled for the week of November 3.

**OIG Exit Conferences/Pending Reports:** The OIG held the exit conference regarding their evaluation of *BLM's Recreation Fee Program*. The OIG discussed the draft report that was just issued with five recommendations to BLM. Their focus was on revenue opportunities for BLM where opportunities for improvement existed. The response to this draft report is due to the OIG by Dec 5.

#### **Recent Final GAO Reports:**

- PFM processed the final report issued by GAO on *Federal Customer Service* with four recommendations to NPS. The Department's Statement of Actions is due by Dec 24.
- PFM processed the final report issued by GAO on *Federal Real Property* without recommendations to the Department.
- The final report issued by GAO on *Energy Policy* did not have any recommendations.

**Climate Action Champions.** The Office of Policy Analysis is reviewing applications from tribal and local governments with proposals for reducing greenhouse gas emissions. The proposals are part of the Department of Energy's merit review process.

#### **30-60 Day Look Ahead**

**Office of Enforcement and Appeals to Issue Civil Penalty.** The Office of Enforcement and Appeals (OEA) anticipates issuing a civil penalty of about \$7,280 to Spyglass Cedar Creek L.P. (Spyglass) the week of November 17. ONRR investigated Spyglass's failure to submit production reports (Form ONRR-4054) and found 8 violations dating back to May 2012. ONRR issued a Notice of Noncompliance (NONC) to Spyglass, giving the company 30 days to correct the violations, which Spyglass failed to do. Civil penalties will continue to accrue until Spyglass provides the reports to ONRR. Also, Spyglass' record of prior violations required OEA to prepare the civil penalty assessment using escalated rates.

**USEITI Meeting.** On December 10-11, the twelfth meeting of the USEITI Multi-Stakeholder Advisory Committee will be held in the Department of the Interior Steward Lee Udall Building. The meeting is open to

the public. The agenda for the December meeting will include a presentation of the Independent Administrator's Inception Report, a review of the work-plan to meet all EITI requirements, and planning for 2015 activities.

**ONRR Proposed Rule.** In December, ONRR plans to publish a proposed rule concerning valuing Federal oil and gas, and Federal and Indian coal. This proposed rule clarifies and reforms outdated valuation criteria for consistency with current industry and market practices, and improves the Secretary's ability to more effectively manage Oil, Gas, and Coal revenue valuation on Federal and Indian lands. The package currently resides at OMB for their review (90-day window).

## WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS October 29-November 7, 2014

### Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events

- November 3 – Meeting on OIA’s outreach to the freely associated state communities in Hawaii
- November 5 – Briefing on the Draft Environmental Impact Statement for military training on Tinian and Pagan, Commonwealth of the Northern Mariana Islands
- November 6 – Briefing on the status of the National Renewable Energy Laboratory’s work in the territories and the freely associated states and meetings on climate change and Native Hawaiian affairs
- November 9 – Departure for official travel to American Samoa

### Public Announcements

#### Press Inquiries/Reports: Coverage of AS-IN’s Official Travel

- KIA’AINA TO VISIT AMERICAN SAMOA BEGINNING NOVEMBER 10.  
<http://www.samoanews.com/content/en/newest-doi-assistant-secretary-insular-affairs-visit>
- U.S. SUPREME COURT: STATE OF HAWAII NEED NOT PROVIDE MEDICAID TO CITIZENS OF FREELY ASSOCIATED STATES – BUT HAWAII OFFICIALS SIGNAL THAT SOME HEALTH COVERAGE WILL CONTINUE UNDER HAWAII STATE RULES. <http://insurancenewsnet.com/oarticle/2014/11/04/us-supreme-court-decision-allows-reduction-of-healthcare-coverage-to-noncitizen-a-571563.html>
- MAYOR OF TINIAN (NORTHERN MARIANA ISLANDS) ASKS KIA’AINA FOR TECHNICAL ASSISTANCE FOR TINIAN TO DEVELOP POSITIONS ON INCREASED MILITARY PRESENCE ON TINIAN.

- CONGRESSMAN ENI FALEOMAVAEGA (DEM.-AM. SAMOA) SUED IN U.S. DISTRICT COURT BY FORMER CAPITOL HILL STAFF MEMBER FOR CIVIL RIGHTS VIOLATIONS, INTIMIDATION AND VIOLATIONS OF FEDERAL FAMILY LEAVE ACT. <http://www.samoanews.com/content/en/fai%E2%80%99ivae-lawsuit-vs-eni%E2%80%99s-office-baseless-without-merit>

#### Items of Note/Expected Legislative, Legal or Policy Issues

#### **Results of Territorial Congressional Elections –**

- **American Samoa** – Amata Coleman Radewagen (Republican) unseated the Democratic incumbent, Congressman Eni Faleomavaega, 42% to 26%, who has served in Congress since January 1989. A former Governor (Togiola Tulafono) secured 11%. The other five challengers totaled 16%. Over 3000 registered voters failed to go to the polls. A member of the Republican National Committee, Congresswoman-elect Radewagen is the daughter of Peter Tali Coleman, the first locally elected Governor of American Samoa, and will be only the third Member of Congress from American Samoa since the Congress established the seat as of the November 1980 election.
- **Guam** – The Democratic incumbent (Madeleine Bordallo) defeated her Republican opponent 58% to 42%.
- **U.S. Virgin Islands** – In an uncontested race, the Democrat Stacey Plaskett won the race with over 90% of the vote. Her Republican challenger (Vince Danet) secured just 9%.
- **Commonwealth of the Northern Mariana Islands** – Incumbent (Gregorio Kilili Sablan, a Democrat) won with 63% of the votes cast in a race with one challenger.

#### **Results of Territorial Gubernatorial Elections –**

- **Guam** – The Republican incumbents, Governor Eddie Baza Calvo and Lieutenant Governor Ray Tenorio, beat their Democratic challengers 64% to 36%.
- **U.S. Virgin Islands** – Kenneth Mapp and Osbert Potter (Independent) are leading the Democratic Party’s Donna Christensen (incumbent Member of Congress) and Basil Ottley (former OIA employee). However, neither team gained a clear majority, and so the race appears to be headed for a run-off.
- **Commonwealth of the Northern Mariana Islands** – Incumbent (Eloy Inos, a Republican) garnered 44% of the votes cast against three other challengers; Governor Inos will now square off in a run-off (date yet to be determined) against Heinz Hofschneider (Independent), who received 33% of the votes cast.

**Grant Awards of Nearly \$3,100,000 to Palau** – On October 22 OIA notified the President of Palau (Tommy Remengesau Jr.) that OIA was awarding the Government of Palau \$2,593,000 for economic assistance under the Compact relationship between the United States and Palau. On October 29 OIA notified the President of Palau that OIA was awarding the Government of Palau \$504,000 to reimburse Palau for the actual costs incurred in the fiscal year 2014 single audit.

**Grant Awards of Nearly \$31,000,000 to the Marshall Islands** – On October 21 OIA notified the Mayor of Enewetak/Ujelang Local Government (Jackson Ading) that OIA was awarding \$1,511,640 to provide food and support to the people of Enewetak and to help rehabilitate their atoll's soil in order to support agriculture. On October 21 OIA notified the Marshall Islands Ambassador to the United States (Charles Paul) that OIA was awarding \$29,434,442 to the Marshall Islands Government as assistance in health, education, environmental affairs and public-sector infrastructure under the Amended Compact between the United States and the Marshall Islands.

**Grant Awards of Nearly \$58,000,000 to the Federated States of Micronesia (FSM)** – On October 21 OIA notified the FSM Ambassador to the United States (Asterio Takesy) that OIA was awarding \$57,973,184 to the FSM Government as assistance in health, education, environmental affairs, private-sector development and public-sector capacity building under the Amended Compact between the United States and the FSM.

**Completion of OIA-funded Project for the People of Bikini Atoll** – A state-of-the-art, reverse-osmosis (RO), water-treatment plant, powered entirely by wind and solar energy, has been completed for the people of Bikini Atoll living on Kili Island in the southern Marshall Islands. The RO building houses water-making units that now supply the people of Bikini with 2800 to 5600 gallons per day of pure, PH-balanced, mineral-enhanced drinking water. The solar array and wind turbine combination provide enough energy to run the RO machines, pumps and ultra-violet sterilization, while feeding excess power back into the community's power grid. The RO water-treatment plant purifies brackish well water. The Director of OIA has been invited to attend the dedication of the water-treatment plant.

### **30-60 Day Look Ahead**

- **November 9-15** – Accompanied by the Director of OIA, AS-IN makes her first visit to American Samoa, during which AS-IN will deliver the Veterans' Day address at the Daniel K. Inouye Industrial Park in Tafuna (Tutuila) and will visit the Manu'a Islands<sup>1</sup>.
- **November 16-22** – As Chair of the Chuuk Advisory Group on Education Reform and accompanied by the OIA Budget Director, the Director of OIA attends in the State of Chuuk, Federated States of Micronesia, the third annual meetings of the Advisory Group, whose principal purpose is to enhance and to accelerate the implementation of education reform in the FSM State of Chuuk.

---

<sup>1</sup> This will be only the second visit to the Manu'a Islands by an Assistant Secretary of the Interior in twenty years.

Androff, Blake <blake\_androff@ios.doi.gov>

## Week Ahead + Items of Note

1 message

**Beyer, Emily** <emily\_beyer@ios.doi.gov>

Fri, Nov 7, 2014 at 5:12 PM

Bcc: os\_oco@ios.doi.gov

On November 10-16, Secretary Jewell will travel to Australia for the World Parks Congress and other meetings. She will give remarks at an open plenary session (which will be live streamed) as well participate in a world leaders dialogue. Secretary Jewell's remarks are expected to focus on the President's climate action plan, as well as discuss the need for landscape-level planning related to conservation and balanced development. International press coverage of the conference is expected.

While in Sydney, Jewell is expected to hold a press conference at the World Parks Congress to announce a Statement of Cooperation with the Republic of Kiribati. The Statement of Cooperation will strengthen mutual cooperation and coordinate management between the U.S.'s Pacific Remote Islands Marine National Monument and PIPA by establishing the "Phoenix Ocean Arc." Connecting these two marine protected areas will magnify the collaboration of governments to strengthen existing mutual cooperation in scientific research and exploration and management of nearly 648,000 square miles of fully protected marine areas. Together the U.S. and Kiribati will lead a new approach to ocean conservation by creating the first international trans-boundary tropical marine managed area that encompasses conservation of entire island ecosystems, coral reefs, seamounts, and deepwater and oceanic habitat. Director of the National Park Service Jon Jarvis will also attend. Interior will issue a press release in conjunction with the signing.

**20141107 Week Ahead.doc**

1050K

# **WEEKLY REPORT**

**November 3-7, 2014**

**WEEK-AHEAD REPORT: NATIONAL PARK SERVICE**  
**November 5 – November 15, 2014**

**Highlights of Travel, Meetings, and other Public Events**

*Legislative Testimony:*

None.

*Meetings:*

November 5, the NPS will host the bi-annual meeting of the Federal Interagency Council on Outdoor Recreation (FICOR) at Main Interior.

November 5, Jon will participate in a webchat on diversity in the National Park Service.

*Travel:*

November 6-8, Jon, Peggy, and Christy will attend the National Park Foundation Board meeting in New Orleans.

November 8-24, Jon will participate in the World Parks Congress.

**Public Announcements**

November 5

On November 5, Director Jarvis and principals from other Federal agencies will hold the Bi-annual Federal Interagency Council on Outdoor Recreation (FICOR) meeting at the Main Interior Building. Director Jarvis will become chairperson of FICOR for the next two years. The meeting will focus discussions on issues relating to coordination, outdoor recreation, and the future direction of FICOR.

On November 5, the NPS is hosting a public webchat about NPS efforts to attract diverse audiences to parks and diverse applicants to NPS jobs. Director Jarvis, Associate Director for Workforce, Relevancy and Inclusion Mike Reynolds, and Professor Nina Roberts from San Diego State University will make remarks and take questions from the public.

November 6

On November 6, the Federal trial of a protester arrested during marijuana rally at Independence National Historical Park (PA) may draw attention. Emily Yates was arrested in the park during a public assembly organized by pro marijuana groups. Ms. Yates repeatedly refused the directions of law enforcement to leave a small area of the park that was temporarily closed to the public for law enforcement purposes. She had to be removed and resisted, kicking and striking the rangers. Ms. Yates was arrested and charged with assaulting/impeding/resisting a federal officer, interfering with agency functions, and disorderly conduct. Since her arrest, Ms. Yates has been actively promoting her position regarding this case on YouTube and other social media and the park has received complaints about her arrest.

On November 6, Equality Forum, the City of Philadelphia, and Independence National Historical Park (PA) will hold a press conference to announce plans for the July 2015 celebration of the 50th anniversary of the Annual Reminders. From 1965-1969, gay-rights groups hosted Annual Reminders in front of Independence Hall each July 4, reminders that members of the LGBT community were still being treated as second-class citizens.

Equality Forum, the nonprofit organizing the events in the park and elsewhere in Philadelphia, is a Philadelphia-based LGBT civil rights organization.

#### November 7

Nothing to report.

#### November 8

Nothing to report.

#### November 9

Nothing to report.

#### November 10

On November 10, the public review period will begin for the Chronic Wasting Disease Management Plan/Environmental Assessment at Shenandoah National Park (VA). This non-native disease is now within 12 miles of the park. The single alternative EA, a Department of Interior-authorized but rarely used NEPA approach in the NPS, amends the approved 2013 Chronic Wasting Disease Detection and Assessment Plan. The 2013 CWD detection and assessment plan approves lethal sampling of deer. This amendment proposes lethal density reductions in key front-country, high deer abundance areas of the park to slow disease transmission and spread through the white tailed deer population. The park anticipates that between sampling and density reductions 250-350 animals could be taken by qualified federal employees or authorized agents over a five-year period. Park managers are exploring options for donating the meat to local charitable organizations.

On November 10, the comment period closes on an EA to examine the environmental impacts of the proposed Kennedy Center expansion project to improve the facilities and provide greater pedestrian and bicycle access to and from the Kennedy Center, the National Mall and Memorial Parks (DC), the Rock Creek Paved Recreation Trail, and the Potomac River waterfront.

On November 10, a high flow event (HFE) for the Glen Canyon Dam will begin. Current resource conditions support an HFE of approximately 37,500 cfs (using bypass tubes as well as releases through the power plant), and 96 hours in duration (to be completed on November 15). The Bureau of Reclamation has conducted consultation with tribes, and notification and coordination is occurring between river rangers, concessionaires and private boaters. After the 2014 HFE occurs, a workshop will be convened in 2015 to review the results of the HFEs from the last three years.

On November 10, the NPS and the Federal Aviation Administration (FAA) expect a joint Notice and Request for Public Comment to publish in the Federal Register announcing an incentive for air tour operators utilizing quiet aircraft technology at Grand Canyon National Park (AZ). Air tours are conducted over the park under limited allocations determined and distributed by the FAA. Under the incentive operators would not be required to use allocations for flights conducted with quiet technology aircraft in the popular Dragon-Zuni flight corridor from January through March. The 2012 Moving Forward for Progress in the 21st Century Act (MAP-21), P.L. 112-141, requires the NPS and FAA to work together to develop incentives for Grand Canyon air tour operators who convert to quiet aircraft technology provided that the cumulative impacts of the incentives do not increase noise at the park.

#### November 11

On November 11, the Concert for Valor will be held on the National Mall. HBO and Starbucks are sponsoring this free concert in honor of American veterans and their families. The event will take place from 7:00 to 10:00 p.m. As a permitted event, HBO is responsible for communicating information about the event, including the lineup and details for the concert, as well as logistical information such as road closures, access points, prohibited items, etc. However, because this is a large event on park land, the NPS/USPP will amplify the logistics messages through press releases, social media, and the Nixle community awareness network. The National Mall and Memorial Parks and USPP are coordinating the event with the assistance of numerous state and local law enforcement, transportation and emergency services agencies.

On November 11, the NPS will create a social media gallery to salute current employees who are also veterans. Parks and programs are asked to see if veterans working in their parks would like to participate. Parks will post photos with their veteran employees on social media, and the Washington Office will use that to populate a gallery.

#### November 12

On November 12, the Town of Marana Planning Commission will hold a public hearing on a proposal to rezone and transform the historic Lazy K Bar Guest Ranch, contiguous to Saguaro National Park (AZ), into a 178-unit gated community. Park managers will attend the hearing in opposition to the proposal. Neighborhood groups and the Coalition for Sonoran Desert Protection are also in opposition to the proposal. The parcel is located in a scenic, remote area on the north boundary of the West District; the proposed zoning change would significantly compromise wildlife corridors and scenic viewsheds. It would also require an amendment to Marana's own General Plan, and reduce its targeted 80 percent Natural Undisturbed Open Space to just 25 percent. If the Planning Commission and Town Council vote to approve the proposal, some neighbors and other opponents have vowed to file a referendum petition to override the council's vote.

#### November 13

Nothing to report.

#### November 14

Nothing to report.

#### November 15

Nothing to report.

### **Major Press Inquiries**

**Everglades National Park (FL)** – In the next few weeks, *Greenwire* will publish feature stories on the invasive exotic fish problem in the park, and on fire management and prescribed burns in the park. A production company recently filmed a short web video for a series called *Unsung: A Day in the Life of Hard Work* that will feature park firefighter Katherine Corrigan. It will be available to the public sometime in late November.

**Gateway National Recreation Area (NY/NJ)** – The *New York Times* is planning a travel story highlighting the Nike Missile Radar Site tour that is expected to run in December.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Dinosaur National Monument (UT/CO) – Removal of Damaged Dinosaur Bone from Popular Trail.** In November, a juvenile sauropod leg bone is planned to be excavated, collected, and preserved in the monument's collections. In September, rangers discovered that this exposed dinosaur bone fossil on the popular Fossil Discovery Trail had been damaged and portions stolen. No suspects were identified. The story garnered national and international media attention. It was determined that the damage will rapidly accelerate the deterioration of the fossil so it must be removed to protect it. The removal is likely to draw attention, given previous interest and the recent graffiti/vandalism case at parks throughout the west.

**Saguaro National Park (AZ) – Proposed Bike Ranch Resort.** On November 18, park managers will attend a Pima County Board of Supervisors meeting to provide comments on a proposed "Bike Ranch Resort," located directly across the street from the park's East District Visitor Center. The property is currently zoned as Suburban Ranch that would allow up to 13 single family homes. The landowners are requesting a conditional use permit for a minor resort to include 49 lodging units, a professional bicycle facility, a performance lab, and a restaurant on the eastern half of the 45-acre parcel. In addition, they are requesting to develop the western half of the property with seven single family homes. Park neighbors are overwhelmingly opposed to the development, and were very vocal when the proposal was presented to the Pima County Hearing Administrator in May. The park also opposed the proposal at that time; the measure was subsequently not recommended to go forward to the Board of Supervisors. Despite this, the landowners are continuing with their proposal to the Board of Supervisors. Park staff has met with both the landowners and County officials in an attempt to find resolution to this situation.

**White House and President's Park (DC) – Winners of the 2014 National Christmas Tree Lighting Ceremony ticket lottery have been notified.** News releases and advisories in the coming weeks will announce the process for media to request event credentials and the talent line-up.

**National Mall and Memorial Parks (DC) – Interpretive Transportation Services.** The NPS has issued a prospectus to solicit proposals for guided vehicle-based tour services within the National Mall and Memorial Parks. This service is currently provided by Big Bus Tours. Proposals are due December 12 in response to the prospectus that identifies a 10-year contract period, with an anticipated start date of March 31, 2015.

**Rock Creek Park (DC) – Parking Meters.** The park is currently working with National Capital Region contracting officials to award a new contract to manage 81 coin-operated parking meters at Thompson Boat Center by December 31. In March, the park issued a Request for Information (RFI) to learn about more modern options for managing fee-based parking, and is currently evaluating the responses to the RFI. Since 1997 Rock Creek Park has had 81 metered parking spaces in a paved lot adjacent to Thompson Boat Center. The purpose of the meters is to encourage turnover in the small parking lot and to discourage use by commuters.

**Hot Springs National Park (AR) – Proposed Increase of Thermal Water Rates Charged to Bathhouse Operators.** The park proposes to increase the rate which it charges bathhouse operators for the thermal water provided to them. The rate will be tied to the Consumer Price Index (CPI) annually starting in 2015, raising the rate from \$2.70 to \$3.41 per thousand gallons. The current rate has been in place since 2005. Currently, the sale of thermal water to the bathhouses provides a little over \$75,000 a year out of the \$200,000 which it costs the NPS to maintain the infrastructure that delivers the thermal water to the bathhouse operators. Thermal water will continue to be provided free of charge to the general public for drinking at the jug fountains located throughout the park.

**Jefferson National Expansion Memorial (MO) – Removal/Replacement of Trees from Gateway Arch Grounds.** A contractor has begun to remove trees from the Gateway Arch grounds as part of the CityArchRiver project. The park completed an Environmental Assessment in 2012. The park grounds currently have 1,895 trees, 1,223 will be removed, and 3,457 new trees will be planted, increasing the total number of trees on the grounds to 4,102.

**Organ Pipe Cactus National Monument (AZ) – Ecological Restoration Plan – Notice of Finding of No Significant Impact.** The park, in collaboration with Cabeza Prieta National Wildlife Refuge and the Bureau of Land Management, prepared a programmatic Ecological Restoration Plan (ERP)/Environmental Assessment that analyzes the impacts of restoration efforts on disturbed lands. Environmental impacts to these lands have increased due to border-related activities. The ERP will restore degraded natural areas, improve habitat conditions, reduce and remove invasive plants, restore wilderness character, and stabilize cultural sites. A Finding of No Significant Impact will be finalized in November, and restoration efforts will begin for the three land management agencies.

**Glen Canyon National Recreation Area (UT/AZ) – Public Lands Initiative.** The San Juan County Lands Council will present three alternatives for changes in the management of federal lands within the county, including Glen Canyon National Recreation Area, at a series of open houses through November. This effort is part of Rep. Rob Bishop’s Public Lands Initiative, a locally-driven effort to resolve challenging land disputes involving conservation and economic use through the development of an Eastern Utah public lands bill. The alternatives propose several designated wilderness areas and a National Conservation Area which would overlay NPS-managed lands along the San Juan River. The alternatives are mute with regards to which federal agency would manage these lands should the proposal come to pass.

**Alaska National Preserves (AK) – Public Hearings on Sport Hunting.** Through November 20, the NPS is hosting public hearings across Alaska to gather comments on proposed regulations related to sport hunting in national preserves in Alaska. The proposals would dial back several recent regulatory allowances by the State of Alaska which liberalized the methods, seasons and bag limits for taking predators. A total of 17 hearings will be held around the state.

**Valley Forge National Historical Park (PA) – White-tailed Deer Management Plan.** The NPS will conduct the fifth year of lethal reduction of the white-tailed deer herd from November 2014 through March 2015. The action addresses the over browsing of vegetation by an abundant deer population which prevents native forests from regenerating and reduces habitat for native wildlife species. The Record of Decision for the White-tailed Deer Management Plan/Environmental Impact Statement was completed in 2009 and withstood subsequent legal challenge. After the first four winters of the lethal reduction phase of the plan, the estimated deer density in spring 2014 was 49 deer per square mile (260 deer). Although still above the plan’s target level of 31-35 deer per square mile, this represents a significant reduction from the estimated 241 deer per square mile (1,277 deer) present in 2009. 1,433 deer have been removed and 44,369 pounds (over 22 tons) of venison have been donated to regional food banks to date.

**Glen Canyon National Recreation Area (UT/AZ) – Consultation with Navajo Nation Regarding Access to Antelope Point.** NPS staff has been consulting with the Navajo Nation since late 2012 regarding access within the joint Antelope Point Project area for all Commercial Use Authorization (CUA) holders. Glen Canyon NRA and the Navajo Nation developed a Memorandum of Agreement (MOA) that was signed by the Regional Director. The MOA will provide access to Antelope Point to all CUA holders, consistent with the Glen Canyon NRA Commercial Services Plan, terms of the concession contract, and Antelope Point project agreements in place. This MOA will provide consistency in business practices throughout Glen Canyon NRA, resulting in improved visitor services, increased opportunities for locally-owned businesses (including Navajo owned businesses), and additional employment opportunities for Navajo Nation tribal members in the area. It will also allow Navajo Nation the opportunity to better regulate and benefit from the increased business to Antelope Point. The Navajo Nation President has not yet signed due to political issues within the Tribe and concerns raised by the concessioner. The NPS is preparing a letter to the Navajo Nation President requesting his signature and implementation of this MOA.

**Glen Canyon National Recreation Area (UT/AZ) – Notice of Availability for Off-road Vehicle Management Plan.** The Glen Canyon Off-road Vehicle Management Plan and Final Environmental Impact Statement (Plan/FEIS) analyzes a range of alternatives and actions for managing off-road use of motor vehicles

and on-road use of off-highway vehicles (OHVs) and street-legal all-terrain vehicles (ATVs); it should publish soon in the Federal Register. The Plan/FEIS assesses the environmental impacts that could result from continuing current management (the no-action alternative) or implementing any of the four action alternatives. The recommended action in the final plan would allow OHV/ATV use on seven miles of road presently closed to OHV/ATV use. These seven miles would complete a loop on an existing roads network on NPS and BLM lands. Local and national interest in the Plan/FEIS is expected.

**Cape Hatteras National Seashore (NC) – Beach Nourishment.** A Notice of Intent for a county-prepared EIS for beach nourishment near Highway 12 will soon publish in the Federal Register. The Seashore has received a permit application from Dare County, NC, to conduct beach nourishment activities to mitigate erosion near Highway 12, which runs the length of the Seashore. To determine if a Special Use Permit can be issued, the county is preparing an Environmental Impact Statement (EIS) for the NPS. The application and EIS process are expected to receive local media coverage and stir controversy. There are strongly differing views about the proposed activity – some local residents are concerned that the highway will be damaged prior to completion of the EIS, and conservation groups are concerned about the precedent being set that beach nourishment may occur in a National Seashore. The North Carolina delegation has been briefed.

**Palo Alto Battlefield National Historical Park (TX) – Environmental Protection Agency (EPA) to Release Public Notice for the Issuance of a Green House Gas Permit.** The EPA has released Public Notice regarding the issuance of a Greenhouse Gas Permit for the Tenaska Brownsville Generating Station. The public comment period ends November 28. Construction of the natural gas power plant will be less than one mile from Palo Alto Battlefield National Historical Park and National Historic Landmark. A second Public Notice period is also planned for the purpose of addressing adverse effects related to the park and National Historic Landmark under Section 106 of the National Historic Preservation Act.

### **30-60 Day Look Ahead**

On November 19, the Tuskegee Airmen National Historic Site (AL) video, *The Tuskegee Airmen: Sacrifice and Triumph*, will receive an award for best video from the National Association of Interpreters. As the park's centerpiece attraction, the film provides visitors with a big-picture view of the Tuskegee Airmen story, including the origins of the program, the recruitment and training of the Airmen, their heroism in combat, their post-war accomplishments and struggles, their pivotal role in the desegregation of the military and the civil rights movement of the 1950s and 1960s, and their broader contributions to our national identity.

On November 20, proposals are due in response to a business opportunity to operate overnight accommodations, food and beverage, retail service, fuel and auto services, and other related services within Yosemite National Park (CA). The new 15-year contract is scheduled to begin on March 1, 2016. This is the park's primary concession operation and the largest concession contract in the NPS.

This fall, the NPS intends to publish a proposed gathering rule, which would provide the authority for permitting the gathering of plant resources within units of the National Park System by members of federally recognized Indian tribes, as defined in the rule. The proposed rule would apply to Indian tribes with traditional associations to specific park units. It would be implemented through agreements between the NPS and Indian tribes and subject to annual permits. Appropriate levels of NEPA and NHPA review and compliance would be required. Collection for commercial uses would be prohibited. This rule change would provide reasonable, resource protection based use of park resources while assisting in support of the continued lifeways of American Indian tribes. National tribal consultations indicate that the approach in the proposed rule would be constructive and respectful of tribal sovereignty while continuing to respect the NPS mission to protect and conserve park resources.

This fall, Grand Canyon National Park (AZ) expects to issue the Backcountry Management Plan/Draft Environmental Impact Statement (Plan/DEIS) for public review and comment. The Plan/DEIS addresses

management of over 1.1 million acres of the park's backcountry, most of which is proposed for wilderness designation. The Plan/DEIS is needed to address immediate backcountry issues and provide an adaptable framework to manage backcountry use into the future while protecting natural and cultural resources. Public scoping including public meetings occurred in 2011 and agency and tribal consultation has been on-going.

## FWS SECRETARIAL WEEK-AHEAD REPORT

Nov. 5, 2014

### Highlights of Travel, Meetings and other Public Events

Nov. 5-7: Fire, invasive species and sage-grouse will be topics at a BLM-led workshop called The Next Steppe Fire Workshop in Boise, Idaho. FWS Director Ashe and other senior FWS leadership will attend. R1

Nov. 7 and 12: FWS Alaska Regional Director will hold consultations with tribes and Alaska Native Claims Settlement Act corporations regarding potential statewide changes for Alaska refuges. Changes that are being considered would: prohibit activities involving predator control for the purpose of increasing hunting opportunities on Alaska Refuges; clarify prohibited practices, methods and means related to sport hunting and trapping that are inconsistent with federal laws and FWS policies; clarify the allowable practices related to the collection of natural resources on refuges in Alaska; and update the procedures for closing an area or restricting an activity on refuges in Alaska. No changes will be made to federal subsistence regulations or restrictions on the taking of fish or wildlife for subsistence uses under federal subsistence regulations. Anticipated draft rule publication will be in early 2015. R7

Nov. 10: FWS will host a meeting in Key Largo, Florida, to provide the public with information on efforts to conserve federally protected species through control of feral and free-roaming cats at Florida Keys NWR Complex. The Complex is actively controlling and removing non-native species, including feral and free-roaming cats, from refuges as part of the implementation of its 2013 Integrated Pest Management Plan. The meeting was scheduled at the request of U.S. Rep. Joe Garcia (D-FL-27). R4

Nov. 12: A kick-off event will be held to launch an effort by the Texas Mid-coast NWR Complex and a variety of partners in Houston, Texas, to develop five nature gardens funded by a \$25,000 Connecting People with Nature grant. On Dec. 6, Bank of America volunteers will assist FWS and the city of Houston with planting the garden in Buffalo Bayou. Coordinated outreach is planned. R2

Nov. 13-14: FWS and the New Mexico Fire District Training Group are hosting tribal partners at Sevilleta NWR (NM) for a two-day leadership training course (*Followership to Leadership*). The course focuses on that fundamental leadership principles and is designed as a self-assessment opportunity for individuals preparing to step into a leadership role. R2

Nov. 14: Senior staff from FWS and the U.S. Air Force will discuss a shared vision for interagency support for a natural resource conservation partnership, as well as USAF's participation in landscape-level ecosystem conservation. HQ

Nov. 14-21: A joint FWS/U.S. Air Force Sikes Act coordination meeting will provide the first annual, in-person opportunity to discuss interagency coordination on all matters relating to activities under the Sikes Act. Expected outcomes of the meeting are enhanced knowledge of each agency's respective mission and organizational structure; glean lessons learned from the past year of interagency support; and the development of standard operating procedures to guide both agencies toward greater success in this important natural resource conservation partnership. Over the past decade, The Air Force has provided \$17,900,551 in reimbursable funds to FWS to support personnel and on-the-ground natural resource projects. HQ

### Public Announcements

Thursday, Nov. 6

Nothing to report

Friday, Nov. 7

Nothing to report

Monday, November 10

Nothing to report

Tuesday, Nov. 11

Wednesday, Nov. 12

Between November 12-19 (exact date TBD), at the International Union for Conservation of Nature's 2014 World Parks Congress in Sydney, Australia, Secretary of the Interior Sally Jewell will sign a Statement of Cooperation between the Phoenix Islands Protected Area in the Republic of Kiribati and the newly expanded Pacific Remote Islands Marine National Monument. Connecting these two marine protected areas will magnify the efforts of both governments in strengthening scientific research, and exploration and management of nearly 648,000 square miles of fully protected marine areas. Outreach planned. DOI/R1

Thursday, Nov. 13

Nothing to report

Friday, Nov. 14

FWS will send to the *Federal Register* two 90-day findings (batched together in one notice): the first on its Aug. 26 petition from the Center for Biological Diversity, Center for Food Safety, Xerces Society and monarch scientist Lincoln Brower requesting that the Monarch butterfly be listed as a threatened species under the ESA; and the second on its Apr. 12 petition from Pacific Legal Foundation requesting to delist the coastal California gnatcatcher on the basis that it is not a valid subspecies and does not qualify for listing. FWS determined that both petitioned actions may be warranted and is initiating a 12-month status review. Both findings are expected to generate significant public interest. Outreach planned to coincide with appearance of these rules in the Reading Room. HQ

FWS will send to *Federal Register* a notice amending the List of Endangered and Threatened Wildlife by adding 20 species of coral based on previously published determinations by the National Marine Fisheries Service, which has jurisdiction for these species. Outreach planned, date TBD. HQ

FWS will reopen the public comment period for the final listing determination of the northern long-eared bat in order to accept and make available to the public a report from range state natural resource agencies. The report is expected to be delivered to FWS around Nov. 5. This reopening of the public comment period will also notify the public of a public hearing that is planned in Wyoming. The northern long-eared bat is found in 38 states. The deadline for the final listing decision is April 2, 2015. Outreach planned. R3

TBD

FWS is finalizing a final rule to list the Gunnison sage-grouse as a threatened species and to designate 1,429,551 acres in Colorado and Utah as critical habitat. After a court-granted extension, the listing decision is due Nov. 12. FWS intends to announce this decision at an event with the Director in Gunnison, Colorado prior to publication in the *Federal Register*. The event is currently scheduled to take place on Monday, Nov. 17. Controversial. R6

FWS will reopen the public comment period for the proposed critical habitat designation of the western yellow-billed cuckoo following congressional and tribal requests. A 60-day extension is anticipated to publish in early November. Plans are underway to schedule information meetings and public hearings in Texas and California. Outreach planned. R8

In early November, FWS will publish a notice of intent to prepare a joint environmental impact statement and environmental impact report for the proposed Yuba-Sutter Regional Conservation Plan (a joint habitat

conservation plan and natural community conservation plan). The plan outlines strategies to avoid, minimize and offset potential indirect effects to 18 plant and animal species expected from development of 35,000 acres in Yuba and Sutter counties, CA. R8

FWS anticipates publishing the Strategic Growth Policy for the National Wildlife Refuge System and response to public comments in the *Federal Register* in early November. This policy instructs FWS to focus on acquiring interests in lands and waters that support the following three priorities: recovery of threatened and endangered species, implementation of the North American Waterfowl Management Plan, and conservation of migratory birds of conservation concern. HQ

FWS has received two applications to import sport-hunted black rhino trophies from Namibia. One is from the winner of the Dallas Safari Club auction, which received considerable media attention in January 2014. The Namibian government grants only five permits to hunt black rhino annually in accordance with the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). The Service is currently evaluating both applications to determine if they meet the requirements for import, and will be seeking public comments, particularly with regard to new information on the biological needs of the species, management plans, and the other factors described above.

As part of a Natural Resource Damage Assessment and Restoration project to restore mussels in the Ohio River following a chemical spill, FWS, the U.S. Army Corps of Engineers and Tennessee Tech University will release 628 black sandshell mussels into the Ohio River.

The mussels were raised at the Natchitoches National Fish Hatchery in Louisiana and the Dale Hollow National Fish Hatchery in Tennessee. Outreach planned. R4

The ACE Basin Task Force, is celebrating its 25th Anniversary in November. Protecting the Ashepoo, Combahee, and Edisto Rivers, this partnership is in the heart of South Carolina's historic rice country, important to waterfowl and millions of other migratory birds. The Task Force was instrumental in the establishment of the ACE Basin NWR, a conservation cornerstone in this geography. No outreach planned R4

### **Major Press Inquiries**

Herald and News (Klamath Falls, OR, Pat Bushey): Reporter requested a photo of Paul Henson, Project leader of the Oregon Fish and Wildlife Office. They plan to run Henson's Sage Grouse Op-Ed in the paper. Not controversial. R1

The Oregonian (Portland, Oregon, Lynne Terry): Reporter interviewed wolf biologist John Stephenson about his unsuccessful efforts to re-collar gray wolf OR7. Story posted Oct. 30. Controversial. R1

Multiple media outlets have inquired about a collared wolf found dead in Washington. FWS is issuing a blanket response that only acknowledges the wolf's death, and then notes further details will be released as the investigation allows. R1

FWS responded to inquiries from WMDT News TV and the Baltimore Sun regarding impacts at Chincoteague NWR from the Antares rocket explosion in Virginia on Oct. 28. FWS responded that preliminary reports showed no significant impacts to wildlife or government assets on the refuge. Refuge was closed until 3 p.m. on Oct. 29. R5

To mark the second anniversary of Hurricane Sandy on Oct. 29, FWS pitched a series of stories about restoration and resilience projects underway using Hurricane Sandy disaster appropriations. In addition to the Blog at Huffington Post publishing FWS Regional Director Wendi Weber's post: *Strong After Sandy: Healing the Past, Investing in the Future* ([http://www.huffingtonpost.com/wendi-weber/strong-after-sandy-healin\\_b\\_6074938.html](http://www.huffingtonpost.com/wendi-weber/strong-after-sandy-healin_b_6074938.html)), reporters from ClimateWire (Elizabeth Harball), Chesapeake Bay Journal (Rona

Kobell), and local media outlets are working on stories. Outreach campaign on Sandy continues through Nov. 7. R5

John McCormack (San Antonio Express) inquired about how law enforcement responds to a take of an endangered species on designated critical habitat and information on proposed critical habitat for several south Texas species. R2

Staff from Aransas NWR in Austwell, TX, accompanied Dallas Morning News reporter Alan Peppard and a staff photographer to Matagorda Island to view the historical private space launch sites and the former Wynne Ranch house. The reporter is working on a story to highlight the Wynne family and its impact on the local area, including construction of the first private space launch sites on their private property, now part of Aransas NWR. The story is expected to be published sometime next year. R2

A rape occurred on the Lower Rio Grande Valley (TX) NWR in June. The FBI is handling the case and last week released a composite sketch of the suspect. A Refuge Law Enforcement agent immediately investigated this incident when it occurred and, in compliance with protocol, turned the case over to the FBI. It is just now reaching the media. Press statement available. R2

FWS provided a short statement to the New York Times on a new strain of the chitrid fungus that could prove very detrimental to native salamanders if it becomes reaches U.S. shores. HQ

Following news releases put out by NGOs, there has been extensive media interest in the sighting by an NPS employee of a canid that appears to be a gray wolf on the north rim of Grand Canyon National Park. The animal appears to be wearing a radio collar similar to those used in the Northern Rocky Mountain Recovery Area, but it is not transmitting. FWS laid traps for the canid to re-collar the animal, but so far without luck. Biologists have collected feces for analysis, but the lab results will take a couple of weeks. R2

#### **Items of Note/Expected Legislative, Legal, Policy Issues**

The death of a cow is being investigated by FWS and Oregon Department of Fish and Wildlife. Initial biologist comments indicate it was NOT wolf depredation; however that is pending the final report expected in the next week. No media calls have been received at this time. R1

Rep. Hanabusa's office inquired about maps for the critical habitat designation (proposed and final) for Kapolei, Hawaii. R1

The State of Alaska is disputing the western boundary of the Arctic NWR and seeking priority conveyance of nearly 20,000 acres of uplands. The state recently awarded two Beaufort Sea oil and gas leases along the western boundary of the refuge based on the state's assertion that it owns roughly 3,000 acres of tidal and submerged lands along the Beaufort Sea coastline that were improperly mapped as falling within the refuge boundary. R7

#### **30-60 Day Look Ahead**

The 2014 Candidate Notice of Review, the annual determination of species added to and removed from the list of species on the ESA Candidate List, will be sent to the *Federal Register* by Nov. 21. This year, 23 species from Hawaii were added to the candidate list, one species was removed from candidate status, and one has a change in priority from the 2013 review. There are now 146 species recognized by the Service as candidates for ESA protection but precluded due to higher priorities. Public outreach is planned for late November.

The notice of availability for the final environmental impact statement analyzing the proposed revisions to the regulations for the experimental population of the Mexican wolf is scheduled to be available in the *Federal*

*Register* Reading Room on Nov. 24. The Service will post the information on the Service's Mexican wolf website and initiate outreach to congressional and other key stakeholders that day, with broader media outreach distributed on Nov. 25 when the notice publishes in the *Federal Register*. R2

To meet a court-ordered deadline, FWS must send to the *Federal Register* by Nov. 30 its final decision on whether the *rufa* red knot warrants listing under the Endangered Species Act. A provisional date of Nov. 10 has been selected, with outreach planned for later in the month (prior to Thanksgiving). R5

FWS will propose to delist the eastern puma (aka cougar) due to extinction within the next 30-60 days. In 2011, FWS conducted a five-year status review and recommended this course of action due to scientific evidence that the species is no longer present and reproducing in the wild. The eastern puma was originally listed in 1973. Occasional sightings of eastern pumas are believed to be escaped captive animals or transient animals from populations in the Mid-West. Outreach planned. R5

FWS will publish a notice of intent to prepare an environmental assessment for a pending habitat conservation plan and incidental take permit application from Duke Energy at its North Allegheny 35-turbine wind energy facility in Blair and Cambria counties, Pennsylvania, within the next 30-60 days. The company seeks to minimize effects from the project on federally endangered Indiana bats and proposed endangered northern long-eared bats. On Sept. 26, 2011, a dead Indiana bat was found at the wind facility. Since that time, Duke Energy has adapted turbine operations to avoid additional take of Indiana bats while they prepared this plan. Local outreach planned. R5

In late November/early December, Kenai NWR will propose to amend its public use regulations through publication of a draft rule that would: clarify the existing regulations; implement management decisions from the refuge's June 2010 Revised Comprehensive Conservation Plan; establish regulations for managing wildlife attractants, including food, refuse and retained fish to decrease the potential for negative human-bear interactions; and revise regulations for hunting and trapping, including those governing these activities within the Skilak Wildlife Recreation Area. R7

FWS is preparing an environmental assessment for public review and comment that will examine options to reduce impacts related to increasing visitation at Three Sisters Springs, part of the Crystal River NWR. The assessment will propose options and steps that could be taken to minimize impacts related to increasing visitation at the refuge and maintain opportunities to observe the charismatic Florida manatee in the warm springs there. The assessment is expected to be released for public comment for at least two weeks by the end of November. The Three Sisters Springs unit of Crystal River National Wildlife Refuge is owned by the City of Crystal River and the Southwest Florida Water Management District, and is administered by FWS under a management agreement. R4

FWS will announce the availability of the draft EIS and the Southern Edwards Plateau Draft Regional Habitat Conservation Plan (DRHCP) for the Southern Edwards Plateau in November. Led by the City of San Antonio and Bexar County, Texas, the DRHCP is an effort to address the potential impacts of infrastructure and commercial and residential development. The DEIS describes potential impacts of issuing a 30-year permit under section 10(a)(1)(B) of the Endangered Species Act to authorize incidental take of nine federally endangered species including the golden-cheeked warbler, black-capped vireo, Government Canyon Bat Cave spider, Madla Cave meshweaver, Braken Cave meshweaver, Government Canyon Bat Cave meshweaver, two beetles with no common name (*Rhadine exilis* and *Rhadine infernalis*) and the Helotes mold beetle. Outreach planned to coincide with availability of the documents in the *Federal Register* Reading Room. R2

In late November/early December, FWS will announce approval of the Lesser Prairie-Chicken Programmatic Conservation Bank Agreement (PCBA) submitted by Common Ground Capital and finalized May 1. This is the first PCBA to be approved by FWS, with the goal of streamlining the process for lands to be approved as

conservation banks to provide for the conservation of the lesser prairie-chicken and its habitat. Outreach planned. R2

The draft of the polar bear conservation management plan is scheduled to be released to the public in early December for a 60-day review and comment period. R7

The Water Resources Reform and Development Act of 2014 requires that the Director of FWS provide an annual report to Congress about strategies, expenditures and progress made in addressing the threat of Asian carp in the Upper Mississippi River and Ohio River basins. The first report is due Dec. 31. R3

-----

The following endangered species actions are scheduled to be sent to the *Federal Register* in Nov. and Dec. (announcement dates TBD but most will coincide with the date each notice is placed on public inspection in in the reading room):

- Gunnison Sage Grouse final listing and critical habitat, Nov. 12, R6
- 20 species of coral, final listing, Nov. 14, HQ
- Monarch Butterfly and California Gnatcatcher, 90-day findings, Nov. 14, HQ
- Candidate Notice of Review, Nov. 24, HQ
- Rufa red knot, final listing, Nov. 28, R5
- Black Pine Snake, proposed critical habitat, Nov. 28, R4
- Final EIS for Mexican wolf 10j revision, EIS Availability, Nov. 28, R2
- Borax Lake Chub, downlisting from Endangered to Threatened, Dec. 5, R1
- Spring Pygmy Sunfish, final Critical Habitat, Dec. 5, R4
- 2 Arkansas Mussels (Neosho Mucket and Rabbitsfoot), final Critical Habitat, Dec. 5, R4
- Chimpanzee, final listing, Dec. 5, HQ

## WEEK-AHEAD REPORT: BUREAU OF LAND MANAGEMENT

Nov. 9 – 15, 2014

### Highlights of Travel, Meetings, and other Public Events

Neil Kornze will be in Washington D.C. all week. Steve Ellis be on annual leave Nov. 10, returning to Washington, DC Nov. 12. Linda Lance will be on annual leave Nov. 13-14.

### Public Announcements

Monday, Nov. 10

*Nothing to report*

Tuesday, Nov. 11

*Nothing to report*

Wednesday, Nov. 12

The BLM is working with the **Ft. McDermitt Paiute-Shoshone Tribe and the FS to address a longstanding domestic horse trespass** on public lands bordering OR and NV. The FS will initiate a 30-day public comment period with a removal scheduled to start Nov.12. Additionally, BLM-OR plans to conduct an emergency wild horse gather in the Cold Springs HMA in southeastern OR due to the Saddle Draw Fire.

Nov. 12–13, BLM-AZ will hold **a stakeholders meeting on the regional mitigation planning process for 3 SEZs in Arizona** (Aqua Caliente SEZ, Brenda SEZ and Gillespie SEZ). This follows a public workshop that was held in April and a webinar in July. The AZ regional mitigation planning effort is targeted for completion in March 2015.

Thursday, Nov. 13

BLM-CO will hold an offer 24 parcels totaling 6,797 acres during the **quarterly competitive oil and gas lease sale** scheduled for 9 a.m, at the CO State Office in Lakewood. About 481 acres are located on BLM-managed land with the remaining 6,316 acres on private lands with BLM-managed subsurface minerals - all within the boundaries of the Royal Gorge Field Office. The parcels are spread among El Paso, Elbert, Kiowa, Kit Carson, Lincoln, Washington and Weld counties. BLM Colorado posted the sale notice for these parcels on Aug. 15, 2014, and did not receive any protests.

Nov. 13-14, **International Sage-grouse Forum**, sponsored by the Univ. of Utah in Salt Lake City. The purpose of the forum is to “develop ‘seamless’ plans for designated Utah geographic areas that contribute to the conservation of sage-grouse and other wildlife species that inhabit Utah’s sagebrush-steppe and desert shrub ecosystems and enhance the economic sustainability of local communities.” BLM Assistant Director Ed Roberson will represent the BLM.

Friday, Nov. 14

Sat. Nov. 15

*Nothing to report*

### Major Press Inquiries

*CBS Evening News* contacted BLM WO requesting the 2013 statistics on oil and gas site inspections, broken down by state (CO, MT, NV, NM, ND, UT and WY). WO Public Affairs will coordinate all responses with DOI Communications.

*Harper's Magazine* contacted BLM-WO to verify 2 BLM-related numbers in the recent OIG report on the BLM Wildland Fire Program: The total amount of gift card purchases from the fire suppression program, which the report puts at \$799,000, and the amount of those charges coming from BLM Idaho, which the report puts at about \$70,000. The BLM referred the reporter to the OIG.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Steve Ellis will meet with Rep. Amodei (R-2-NV) and his staff on Nov. 13 to discuss the Nevada Fire Safe Council, Argenta allotment and drought management in Nevada

### **30-60 Day Look Ahead**

**Nov. 18:** BLM-UT will hold an oil and gas lease sale.

**Nov. 18-19: Fort Berthold Oil & Gas Partners Meeting:** the Three Affiliated/Mandan, Hidatsa, Arikara Tribal Energy Department and newly elected Tribal Chairman, will present energy-related topics and issues for discussion with Federal agency partners in Bismarck, N.D. Agencies will also be providing reports regarding ongoing oil and gas business respective to their areas of responsibility. The BLM, ONRR, BIA, BuRec and the U.S. Army Corps of Engineers are invited.

**Dec. 1:** The 60-day public comment period ends on the proposed rule, **Competitive Processes, Terms, and Conditions for Leasing Public Lands for Solar and Wind Energy Development**. Released Sept. 30, the proposed rule establishes competitive leasing processes for ROWs to receive fair market value and promote preferred areas for solar and wind development on public lands.

**Dec. 8:** BLM OR will hold the **Thompson Strip Land Sale** selling about 80 acres in Polk County -- south of the Grand Ronde Reservation -- at a public auction. These parcels are considered "hiatuses" -- small slivers of unpatented lands resulting from 19<sup>th</sup> century surveying errors. Adjoining landowners have expressed interest in purchasing these slivers. A Federal Register notice was published on October 8, 2014.

**Dec. 9:** BLM-NV will hold an oil and gas lease sale.

**Dec. 9:** BLM-NV expects to release EAs for **3 solar projects within the Dry Lake SEZ** by this date. They are the 200-MW First Solar Dry Lake Solar project, 150-MW NV Energy Dry Lake Solar project, and the 134-MW Invenergy Harry Allen Solar project. A 30-day public comment period will follow.

**Early Dec.:** The notice of availability for the BLM-WY Lander Field Office **Sheep Mountain Uranium Project DEIS is scheduled to publish in the Federal Register**. Public meetings will be held during the 45-day scoping period. The Sheep Mountain project area, located in the Crooks Gap uranium district 60 miles east of Lander, Wyoming, is approximately 3,611 acres, of which approximately 64 percent are BLM-administered lands. The project is largely supported by state and local governments and many members of the public because of the anticipated economic benefits to the region and its location in a previously mined area. A final EIS is expected to be released in August 2015.

**Mid-Dec. to early Jan.:** The **FEIS for the 350-MW Soda Mountain Solar PV project (CA)** is expected to be with an anticipated ROD signed in March. NPS concerns over potential impacts to groundwater, bighorn sheep, and visual resources to the adjacent Mohave National Preserve have been addressed.

## WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT

November 5, 2014 – November 13, 2014

### Highlights of Travel, Meetings, and other Public Events

November 5 – 18: The Mid-Atlantic Regional Planning Body (RPB), for which BOEM is the Federal co-lead, is holding a series of public listening sessions hosted by the Mid-Atlantic Regional Council on the Ocean. The public listening sessions will take place in Delaware, Virginia, Maryland, New York, and New Jersey from Nov. 5 – 18 to receive comments on a variety of draft materials developed by the RPB.

November 5: Acting Director Cruickshank will speak at the National Ocean Industries Association Fall Meeting in Naples, FL. He will focus on BOEM's efforts to modernize its risk management program. This event is closed press.

November 6: North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, representatives from Mid- and South Atlantic state governments, and NC Members of Congress will attend. Walter Cruickshank and others from BOEM will attend. Walter will also attend an OCS Governors Coalition Breakfast, and meet with Governor McCrory earlier in the day. Part of the event may be open press.

November 7: Acting Director Cruickshank will travel to Anchorage Alaska for meetings with staff and leadership from the BOEM Alaska Regional Office, focusing on planning for upcoming activities in the region and the Lease Sale 193 SEIS.

November 14: Acting Director Cruickshank will speak at the International Offshore Partnering Forum, organized by the Business Network for Maryland Offshore Wind in Baltimore, MD. While at the conference, U.S. Wind and DOI will hold a press event to execute its Maryland offshore leases.

### Public Announcements

**November 14:** Press event to execute the Maryland Wind Lease at the Maryland Offshore Wind Conference in Baltimore, MD.

**Early November:** Note to Stakeholders on a Request for Information on the development of a Long-Term Monitoring Plan for marine mammals in the Gulf of Mexico.

**November TBD:** Press release on the issuance of right-of-way grant for the Block Island Transmission System.

**November TBD:** Press release on Limits of Liability rulemaking.

**November TBD:** DOI press release on Final Sale Notice for Massachusetts Wind Energy Area.

**November TBD:** The Pacific Region will release the 2011 National Assessment of Oil and Gas Resources of the Pacific OCS. This document does not contain any new resource estimates since the release of the 2011 assessment; rather it includes more detailed information on specific geological plays in the region.

### Major Press Inquiries

**Multiple Queries:** Reporters requesting background information regarding South Carolina wind energy planning efforts following the Oct 29 Offshore Wind Symposium at Coastal Carolina.

## **Items of Note/Expected Legislative, Legal, Policy Issues**

**Chukchi Sea Lease Sale 193:** On October 31, BOEM posted the draft supplemental EIS for public review. On November 7, the Notice will publish in the *Federal Register*, initiating a 45-day comment period. Public hearings and Government-to-Government consultations will take place between Nov. 17 and Dec. 4 in several communities bordering the Chukchi Sea, Anchorage and Fairbanks, AK.

**Maryland Offshore Wind Lease Sale:** BOEM plans to execute two offshore wind leases with US Wind Inc., the provisional winner of both lease areas during the August auction with a combined bid of \$8.7 million, on November 14 at a public event at the Maryland Offshore Wind Conference in Baltimore, MD.

**Request for Information on the Development of a Long-Term Monitoring Plan (LTMP) for Marine Mammals in the Gulf of Mexico:** BOEM is seeking public input on the development of a LTMP for marine mammals in the Gulf of Mexico. BOEM expects to publish the Request for Information in early Nov. with a 30-day comment period. The LTMP will support BOEM's petition for a 5-year rulemaking from NMFS for incidental harassment of marine mammals associated with geological and geophysical survey activities in the Gulf of Mexico.

**Limits of Liability Final Rule:** In November, BOEM may publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Rhode Island Offshore Wind:** In November, BOEM may be prepared to issue a right-of-way grant for the Block Island Transmission System (BITS). On September 4, the U.S. Army Corps of Engineers (USACE) approved Deepwater Wind's (DWW) permit request to construct five wind turbine generators in state waters off Block Island and a transmission cable to the Rhode Island mainland. BOEM has drafted a Finding of No Significant Impacts that adopts the USACE EA, along with a right-of-way grant and a decision document with conditions of approval for DWW's General Activities Plan for the portion of BITS in Federal waters.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November.

**Massachusetts Offshore Wind:** In November, BOEM plans on issuing a Final Sale Notice for the Massachusetts Wind Energy Area. The Final Sale Notice is on an expedited surnaming track in order to hold the sale by the end of the year.

**Virginia Research Lease:** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted revisions to its Research Activities Plan (RA) for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Oct. 6 and Oct. 31, and expects to submit a complete, updated RAP in November. BOEM tentatively plans to publish an environmental assessment for public comment in late November and hold a public meeting in December.

**Arctic Rule:** Since August 2014, when BOEM and BSEE delivered the rule to OMB for review, the bureaus have been working to address comments from the interagency review. In early November, DOI will complete its review of the updated draft rule and plans on sending it to OMB. OMB will once again circulate for interagency review and let DOI know if there any major issues that need to be resolved before they complete their review and return it to the Department for publication. On November 14, OMB will have had the rule for

90 days.

**Risk Management Advance Notice of Proposed Rulemaking (ANPR):** On November 17, 2014, the comment period on the ANPR will close. BOEM is tentatively planning on holding workshops on the ANPR in mid-December. Once the comment period closes, BOEM will review comments and finalize topics for the workshop based on the comments.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In December, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**WEEK-AHEAD REPORT: BUREAU OF OCEAN ENERGY MANAGEMENT**  
**November 5, 2014 – November 13, 2014**

**Highlights of Travel, Meetings, and other Public Events**

November 5 – 18: The Mid-Atlantic Regional Planning Body (RPB), for which BOEM is the Federal co-lead, is holding a series of public listening sessions hosted by the Mid-Atlantic Regional Council on the Ocean. The public listening sessions will take place in Delaware, Virginia, Maryland, New York, and New Jersey from Nov. 5 – 18 to receive comments on a variety of draft materials developed by the RPB.

November 5: Acting Director Cruickshank will speak at the National Ocean Industries Association Fall Meeting in Naples, FL. He will focus on BOEM's efforts to modernize its risk management program. This event is closed press.

November 6: North Carolina is hosting a meeting on the development of the Five Year Program. BOEM, BSEE and other Federal agencies will present. Governor Pat McCrory will attend. Members of the OCS Governors Coalition, representatives from Mid- and South Atlantic state governments, and NC Members of Congress will attend. Walter Cruickshank and others from BOEM will attend. Walter will also attend an OCS Governors Coalition Breakfast, and meet with Governor McCrory earlier in the day. Part of the event may be open press.

November 7: Acting Director Cruickshank will travel to Anchorage Alaska for meetings with staff and leadership from the BOEM Alaska Regional Office, focusing on planning for upcoming activities in the region and the Lease Sale 193 SEIS.

November 14: Acting Director Cruickshank will speak at the International Offshore Partnering Forum, organized by the Business Network for Maryland Offshore Wind in Baltimore, MD.

**Public Announcements**

**Early November:** Note to Stakeholders on a Request for Information on the development of a Long-Term Monitoring Plan for marine mammals in the Gulf of Mexico.

**November TBD:** Press release on the issuance of right-of-way grant for the Block Island Transmission System.

**November TBD:** Press release on Limits of Liability rulemaking.

**November TBD:** DOI press release on Final Sale Notice for Massachusetts Wind Energy Area.

**November TBD:** The Pacific Region will release the 2011 National Assessment of Oil and Gas Resources of the Pacific OCS. This document does not contain any new resource estimates since the release of the 2011 assessment; rather it includes more detailed information on specific geological plays in the region.

**Major Press Inquiries**

**Multiple Queries:** Reporters requesting background information regarding South Carolina wind energy planning efforts following the Oct 29 Offshore Wind Symposium at Coastal Carolina.

**Items of Note/Expected Legislative, Legal, Policy Issues**

**Chukchi Sea Lease Sale 193:** On October 31, BOEM posted the draft supplemental EIS for public review. On November 7, the Notice will publish in the *Federal Register*, initiating a 45-day comment period. Public hearings and Government-to-Government consultations will take place between Nov. 17 and Dec. 4 in several communities bordering the Chukchi Sea, Anchorage and Fairbanks, AK.

**Request for Information on the Development of a Long-Term Monitoring Plan (LTMP) for Marine Mammals in the Gulf of Mexico:** BOEM is seeking public input on the development of a LTMP for marine mammals in the Gulf of Mexico. BOEM expects to publish the Request for Information in early Nov. with a 30-day comment period. The LTMP will support BOEM's petition for a 5-year rulemaking from NMFS for incidental harassment of marine mammals associated with geological and geophysical survey activities in the Gulf of Mexico.

**Limits of Liability Final Rule:** In November, BOEM may publish a final rule to administratively increase the limit of liability for oil-spill removal costs and related damages from \$75 million to approximately \$134 million. The increase would apply to offshore facilities in Federal and state waters under the Oil Pollution Act of 1990 (OPA), and is consistent with recommendations from the National Commission on the BP Deepwater Horizon Spill and other studies that called for a statutory increase in the limit of liability. The change will be the first administrative increase to the cap since OPA came into effect 24 years ago, and is necessary to keep pace with the 78 percent increase in inflation since 1990.

**Rhode Island Offshore Wind:** In November, BOEM may be prepared to issue a right-of-way grant for the Block Island Transmission System (BITS). On September 4, the U.S. Army Corps of Engineers (USACE) approved Deepwater Wind's (DWW) permit request to construct five wind turbine generators in state waters off Block Island and a transmission cable to the Rhode Island mainland. BOEM has drafted a Finding of No Significant Impacts that adopts the USACE EA, along with a right-of-way grant and a decision document with conditions of approval for DWW's General Activities Plan for the portion of BITS in Federal waters.

**2012-2017 Five Year Program, 2014 Annual Progress Report:** BOEM expects to publish the 2014 Annual Progress Report on the current Five Year OCS Oil and Gas Leasing Program in November.

**Massachusetts Offshore Wind:** In November, BOEM plans on issuing a Final Sale Notice for the Massachusetts Wind Energy Area. The Final Sale Notice is on an expedited surnaming track in order to hold the sale by the end of the year.

**Virginia Research Lease:** A consortium led by the Virginia Department of Mines, Minerals, and Energy (DMME) submitted revisions to its Research Activities Plan (RAP) for the Virginia Offshore Wind Technology Assessment Project (VOWTAP) on Oct. 6 and Oct. 31, and expects to submit a complete, updated RAP in November. BOEM tentatively plans to publish an environmental assessment for public comment in late November and hold a public meeting in December.

**Arctic Rule:** Since August 2014, when BOEM and BSEE delivered the rule to OMB for review, the bureaus have been working to address comments from the interagency review. In early November, DOI will complete its review of the updated draft rule and plans on sending it to OMB. OMB will once again circulate for interagency review and let DOI know if there any major issues that need to be resolved before they complete their review and return it to the Department for publication. On November 14, OMB will have had the rule for 90 days.

**Risk Management Advance Notice of Proposed Rulemaking (ANPR):** On November 17, 2014, the comment period on the ANPR will close. BOEM is tentatively planning on holding workshops on the ANPR in mid-December. Once the comment period closes, BOEM will review comments and finalize topics for the workshop based on the comments.

**30-60 Day Look Ahead (Please note that this will NOT be included in the Secretary's report)**

**Final Leasing Rule:** In December, BOEM may publish a final rule to update and streamline the existing Outer Continental Shelf leasing regulations and clarify implementation of the Federal Oil and Gas Royalty Simplification and Fairness Act.

**WEEK-AHEAD REPORT**  
**OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT**  
**November 5 – November 15, 2014**

**Highlights of Travel, Meetings, and other Public Events**

OSMRE Briefing to Committee Staff with the U.S. House Subcommittee on Energy and Mineral Resources:  
On October 30, OSMRE briefed House Committee Staffers regarding the petition from Wild Earth Guardians seeking that OSMRE promulgate a rule prohibiting the production of visible Nitrogen Oxide (NO<sub>x</sub>) emissions during blasting. Questions asked included the length of the public comment period, the number of public comments received, cloud and fume monitoring techniques after blasting, and the use of drones in West Virginia, which monitor air quality after blasting.

OSMRE to Release Mine Pool Reports:

OSMRE will release two hydrologic characterization reports regarding underground mine pool systems in West Virginia and Maryland. A mine pool develops after mining ceases and the mine voids are allowed to fill with ground water. The two large, complex underground mine pool systems involve both pre- and post- SMCRA underground mines, multiple coal beds, pool areas of 25,000 and 53,000 acres, which cross the State borders. The reports present findings of current conditions and the need to prevent impacts to river systems by pumping

and treating water from the mines. They also demonstrate OSMRE's efforts in developing good science for regulating a complex industry. These two reports may generate interest from citizens and environmental groups.

Saturday, November 15

### **Major Press Inquiries**

Nothing to report

### **Items of Note/Expected Legislative, Legal, Policy Issues**

#### **Four Corners Power Plant and Navajo Mine Energy Project EIS:**

On October 29, OSMRE conducted a government-to-government consultation meeting with the Hopi Tribe regarding an Environmental Impact Statement (EIS) that OSMRE and other agencies are drafting in connection with a SMCRA permit application, for the Pinabete Mine in New Mexico. The Pinabete Mine is located south of the Navajo Mine, which is the sole supplier of coal to the Four Corners Power Plant (FCPP). The Pinabete Mine is expected to supply coal to the FCPP for an additional 25 years. OSMRE is the lead agency for preparation of the EIS, a draft that was published in the *Federal Register* earlier this year. The draft generated public controversy, as will the final EIS upon its publication, which is planned for March 2015.

#### **House Committee on Appropriations Staff Member Visited Kentucky Mine Sites:**

On November 3, 4 and 5, House Appropriations staff, along with OSMRE and DOI staff visited active and reclaimed coal mine sites in Kentucky to gain a better understanding of mining and reclamation activities required by SMCRA.

### **30-60 Day Look Ahead**

Nothing to report

**WEEK-AHEAD REPORT: BUREAU OF RECLAMATION**  
**November 5 – November 14, 2014**

**Highlights of Travel, Meetings, and other Public Events:** *From Tuesday, November 11 through Friday the 17<sup>th</sup>, I will be attending the National Water Resources Association (NWRA) Conference in San Diego, CA. NWRA is an advocacy group comprised primarily of water and irrigation districts from the Western United States. In addition to giving the keynote address, I will, as has been done by my predecessors hold a series of about 50 one-on-one meetings with water district leaders who attend the conference.*

**Public Announcements**

Wednesday, November 5

**Climate Adaptation Strategy:** Reclamation will release its Climate Adaptation Strategy. This is Reclamation's strategy and response to global climate change as it relates to managing water and power in the West. The strategy builds upon Reclamation's ongoing activities to incorporate climate adaptation more comprehensively across mission areas, programs and decision making.

**WaterSMART Pecos Basin Study Stakeholder Meeting (NM):** The stakeholders meeting for the WaterSMART Pecos Basin Study will be held in Roswell, New Mexico, to discuss model scenarios.

**Climate Change Webinar Offered by Pacific Northwest Region in (ID):** Reclamation is offering the last of a five-part webinar series on the Columbia River Basin Impacts Assessment for employees and affected stakeholders. The Assessment data will become the basis for future Basin Studies in the region. The two-hour webinar events will run through November 5. [www.usbr.gov/pn/climate/crbia/webinar.html](http://www.usbr.gov/pn/climate/crbia/webinar.html)

**Federal Interagency Council on Outdoor Recreation (DC):** Acting Deputy Commissioner for External and Intergovernmental Affairs Dionne Thompson will participate in the Federal Interagency Council on Outdoor Recreation Principals' Meeting in Washington, D.C.

Thursday, November 6

**Reasonable and Prudent Alternative Annual Science Review (CA):** The Reasonable and Prudent Alternative Annual Science Review is scheduled in Sacramento on Nov. 6-7. This event, which is a requirement stated within the 2008 and 2009 National Marine Fisheries Service Biological Opinion for the Coordinated Long-term Operation of the Federal Central Valley Project and the California State Water Project, will focus on the drought and drought operations. Each year, the meeting evaluates how the RPA actions were implemented and their effectiveness for Endangered Species Act-listed species during the past year. The conference is held with NMFS and the U.S. Fish and Wildlife Service, and the public is invited to attend but not participate. There is no anticipated discussion of water year 2015 drought operations at this event.

**Resource Speaker on Water Education Foundation Tour (CA):** Reclamation's San Joaquin River Restoration Program manager will be a resource speaker on the Water Education Foundation's San Joaquin River Restoration tour November 6-7. The tour starts and ends in Fresno, Calif.

Friday, November 7

**CalLite 3.00 (Beta) Model (CA):** Reclamation and the California Department of Water Resources will jointly release the CalLite 3.00 (Beta) Model, which is a Central Valley Project and State Water Project management

screening tool. CalLite will serve as a screening level model that runs faster and provides results within 5 percent of the former CalSim II model. CalLite is an improved educational resource for stakeholders and provides powerful analytical capabilities for more experienced modelers. It has a user-friendly interface, faster simulation time, and options for evaluating the impact of different regulations, facilities, and operational strategies on Federal and State reservoirs in the Central Valley. Improvements since the previous version of the CalLite model allows us to run more detailed models and simulations about the implications of actions required under specific State regulations and Federal statutes such as the Central Valley Project Improvement Act (CVPIA). It also allows for more accurate climate change analysis.

**Public Comment Period Open on Windy Gap Excess Capacity Contract with Colorado Municipal Subdistrict (CO):** The 30-day public comment period, which opened October 8, closes. Reclamation, Northern Water Conservancy District and Northern Water's Municipal Subdistrict have been negotiating a contract that would allow the subdistrict to use excess or unused capacity in Reclamation's Colorado-Big Thompson Project for the Windy Gap Project and Future Windy Gap Firming Project.

Saturday, November 8

**Let's Move Outside/Capell Cove Cruise (CA):** Reclamation will host a Let's Move Outside/ Capell Cove Cruise paddling tour led by a Park Ranger at Lake Berryessa in Central California.

**Salmon Festival at Lost Lake (CA):** Reclamation will have a booth about the implementation of the San Joaquin River Restoration Program, including reintroduction of fall and spring-run Chinook salmon, at the salmon festival hosted by Trout Unlimited at Lost Lake Park near Friant, Calif. The festival is a fun event for the community to better understand the restoration and reintroduction of chinook salmon into the San Joaquin River.

Sunday, November 9

**Let's Move Outside/Geocaching Tuttle town's Trails (CA):** Reclamation will host a Let's Move Outside/Geocaching Tuttle town's Trails activity at New Melones Lake's Tuttle town Recreation Area in Central California. A Park Ranger will hide trinkets along the trails in Tuttle town then lead a 3-mile roundtrip hike with participants using their GPS units or an app on their phones to "cash in" on the geocaching craze and find the prizes.

Monday, November 10

**2014 High Flow Experiment (HFE) Release at Glen Canyon Dam (AZ):** The Department of the Interior will conduct the third high flow experimental release from Glen Canyon Dam under the innovative science-based HFE Protocol approved in 2012. The protocol calls for conducting more frequent high flow experimental releases from the dam timed to occur following sediment inputs to the Colorado River from the Paria River. The HFE will provide resource benefits in the near term and will also provide scientific information to be used in future decision making. The third such release based on the HFE Protocol will be on Monday, November 10, 2014 and last until Saturday, November 15, 2014. The maximum release during this period will be 37,500 cubic feet per second.

**Federal Columbia River Power System (FCRPS) Annual Progress Report (ID) (New):** The Action Agencies, which consist of Reclamation, U.S. Army Corps of Engineers and Bonneville Power Administration, will roll out the FCRPS Biological Opinion Annual Progress Report the week of November 10.

Tuesday, November 11

Nothing to report

Wednesday, November 12

**Reclamation's FY 2015 Science and Technology Program Research Awards:** Reclamation will announce the Science and Technology Program Research Awards for FY 2015. Reclamation has selected 131 projects totaling \$9.2 million. The program is focused on providing innovative solutions for Reclamation water and power facility managers and stakeholders.

Thursday, November 13

Nothing to report

Friday, November 14

**High Schoolers Tour of Trinity Powerplant (CA):** Students from Trinity High School will tour the Trinity Powerplant for an introduction to hydro-electric generation and maintenance. The students will be accompanied by several adults and a representative from the City of Redding. The purpose is for students to consider careers in the power generation industry.

### Major Press Inquiries

Tony Davis of the *Arizona Star* (Tucson, AZ) is asking for the level of responses to the solicitation letters for the Colorado River System Conservation Pilot Program and the names of those individuals. Discussions on release of information remain in progress.

### Items of Note/Expected Legislative, Legal, and Policy Issues:

**Klamath Basin Restoration Agreement (California):** On November 10, the Klamath Basin Coordinating Council's Executive Committee and others will hold a meeting in Redding, CA to initiate regular informal meetings to discuss the future of the Klamath Basin Restoration Agreement (KBRA) in relation to the mid-term elections, and the status of the federal legislation currently under review by the Senate. Reclamation's Mid-Pacific Deputy Regional Director, Jason Phillips will be attending. A second meeting is scheduled for December 18 in Redding, to develop an action plan for furthering the goals of the KBRA as impacted by the 2014 elections.

**Delta Cross Channel Gates Closed (California):** On November 2, at approximately 9 a.m., Reclamation closed the Delta Cross Channel Gates to protect young winter-run salmon migrating out of the Sacramento River towards San Francisco Bay. This is based on the Reasonable and Prudent Alternatives in the National Marine Fisheries Service Biological Opinion. The gates will be closed until further notice.

### 30-60 Day Look Ahead

**Jensen Unit Block Notice (UT):** A Block Notice has been approved for the sale of 3,300 acre-feet (AF) of Jensen Unit water to the Uintah Water Conservancy District. As part of this decision, Reclamation will continue to convey up to 780 AF of water into Stewart Lake when the water is called for. Reclamation prepared an environmental assessment to examine the potential environmental impacts of this action, which resulted in a Finding of No Significant Impact. It is anticipated that a prepayment ceremony will be scheduled for some time in January, 2015.

**Draft Central Valley Project Municipal and Industrial Water Shortage Policy (CA):** On November 21, Reclamation will release a Draft Environmental Impact Statement (EIS) for the Central Valley Project's (CVP) Municipal and Industrial (M&I) Water Shortage Policy for public comment. Four public meetings will be held in December to receive additional comments. Finalization of the EIS will result in implementation of guidelines addressing the allocation of limited CVP water supplies during periods of shortage.

**Signing Ceremony for a Hydropower MOU Action Plan:** In November, Reclamation/Interior, Department of Energy and the U.S. Army Corps of Engineers will host a signing ceremony for a Hydropower MOU Action Plan they are in the process of developing. The Action Plan continues the collaboration of the three agencies under the Hydropower MOU signed in March 2010. The new interagency Sustainable Hydropower Action Plan (Phase II) to be released, details the joint action items under the MOU that the agencies intend to work on in coming years, in the general areas of: (1) Advancing Technology Development and Performance Testing, (2) Addressing Environmental Issues, (3) Conducting Hydro Systems Analysis, and (4) Promoting Information Sharing. [INCLUDED IN LAST WEEK'S REPORT]

**Oregon Water Resources Congress Annual Conference:** On December 2-5, Principal Deputy Commissioner Lopez is scheduled to participate in the Oregon Water Resources Congress Annual Conference in Hood River, Oregon.

**U.S. Chamber of Commerce Corporate Citizenship Center Conference:** On December 2-4, the Chamber of Commerce Corporate Citizenship Center has invited Reclamation hydrologist Dagmar Llewellyn to speak in McLean, Virginia, about climate change due to her work on the Upper Rio Grande Impacts Assessment at the Water-Energy-Food Nexus. The Corporate Citizenship Center is a 501C3 non-profit affiliate of the Chamber of Commerce, but the conference is co-hosted with Lockheed Martin, the contractor operating Sandia National Laboratories, a partner on the study. Forms are being processed to determine Dagmar's participation.

**Washington State Water Resources Association Conference (WA):** On December 3-5, Reclamation will participate in the Washington State Water Resources Association Conference in Spokane, Washington.

**Colorado River Water Users Association Meeting (NV):** In early December, Reclamation will attend the annual Colorado River Water Users Association meeting in Las Vegas, Nevada.

**Congressional Western Caucus (NV):** Jonathan Shuffield, Executive Director of the Congressional Western Caucus and staff for Congressman Steve Pearce (NM-2) is requesting a tour of Hoover Dam for December 5<sup>th</sup>. The total number of attendees is unknown at this time.

**Grand Coulee Dam Visit (WA):** On December 2-5, Reclamation's Principal Deputy Commissioner Estevan Lopez will visit Grand Coulee Dam.

**Idaho Water Users Association (ID):** On January 20-22, Reclamation will attend the Idaho Water Users Association Annual Convention in Boise, Idaho.

**WEEK-AHEAD REPORT: U.S. GEOLOGICAL SURVEY**  
**November 5-14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On **November 11-14**, USGS Acting Director Suzette Kimball will be participating at the Eleventh Plenary Session of the Group on Earth Observations (GEO-XI), in Geneva, Switzerland.

During **November 5-10**, Suzette Kimball will be in Reston, Va. and Washington, D.C. No travel.

**Public Announcements**

Wednesday, November 5

**News Release—USGS 2010 Water Use Report:** On **November 5**, the USGS released the Estimated Use of Water in the United States in 2010. Every five years, data at the county level are compiled into a national water-use data system and state-level data are published in a national circular. According to the latest report, national water use withdrawals have reached their lowest levels since before 1970. Total estimated withdrawals in 2010 in the U.S. were 355 billion gallons per day or 13% less than total estimated withdrawals in 2005. This represented the lowest level of total withdrawals for all uses in the last 45 years. Thermoelectric power, irrigation, public supply, and self-supplied industrial water use cumulatively represented 94% of total withdrawals. However, withdrawals for all of these uses declined in 2010.

**Technical Announcement—Tracking the Nitrate Pulse to the Gulf of Mexico: Yesterday** (Nov 4), USGS announced a new paper published in the journal *Environmental Science & Technology* that describes how cutting edge optical sensor technology is being used in the Mississippi River basin to accurately track the nitrate pulse to the Gulf of Mexico. Excessive springtime nitrate runoff from agricultural land and other sources in the Mississippi drainage flows into the Mississippi River and downstream to the Gulf of Mexico. This excess nitrate contributes to the Gulf of Mexico hypoxic zone, an area with low oxygen known commonly as the "dead zone." NOAA-supported researchers reported that the summer 2014 dead zone covered about 5,052 square miles, an area the size of Connecticut.

**News Release—Effects of Climate & Land Use Changes on Birds:** On **November 5**, a new USGS paper will be published in the journal *PLOS ONE* describing the likely impacts of climate and land use change on bird species in the United States, over the period from 2001-2075. A news release is planned. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

Thursday, November 6

**USGS to Release Climate Data Initiative Water Theme:** On **November 6**, USGS, on behalf of the White House and in cooperation with interagency partners, is announcing the release of the Climate Data Initiative Water Theme. The Climate Data Initiative was announced by President Obama in March 2014. USGS science has contributed to over 40 water and climate datasets within the Initiative, extending the range of software tools available to help analyze and assess impacts of a changing climate on the water cycle. These tools provide users with convenient data access capabilities, common data transformation utilities, and analysis methods for data and related information. A news release is planned in conjunction with the American Water Resources Association conference.

Friday, November 7

**News Release—Characterization of Groundwater Quality in the Bakken Area:** Within the **next week**, the USGS will announce a new paper to be published in the journal *Groundwater*, which uses data for a broad suite of inorganic and organic chemical constituents, and groundwater-age, noble-gas, and isotopic tracers, to characterize the quality and age of shallow groundwater in the region. The data can serve as a baseline for

future groundwater quality monitoring as energy development activities expand in the basin. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Release–USGS to Release California Drought Visualization Program:** In the **coming weeks**, the USGS will announce the California Drought Visualization Program, a web resource developed by the USGS Center for Integrated Data Analytics. The application, currently available online, was released as part of the White House's climate change and open water data initiatives to provide the general public with a timeline of statewide drought coverage, related news articles, and the economic impacts of the drought on California's crops. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Release–2014 CSC Project Award Announcement:** In the **coming weeks**, USGS will distribute several press releases announcing the 2014 research projects funded by the 8 Climate Science Centers and USGS National Wildlife and Climate Change Science Center. Each CSC will have a separate news release and a comprehensive release will be distributed nationally. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Releases–Idaho Studies on Mine Drainage:** In the **coming weeks**, USGS will announce two studies analyzing long-term water-quality monitoring results on mine-influenced drainages in Idaho. One report describes temporal and spatial trends in selenium concentrations at the outlet of the Blackfoot River and the second assesses the status, transport, and long-term trends in the concentrations and loads of selected nutrients and trace metals in specific stream reaches in the Coeur d'Alene and Spokane Rivers. Local news releases are planned.

**News Release–US Topo Features Mountain Bike Trails:** In early **December**, USGS plans to announce the inclusion of mountain bike trails to upcoming US Topo map quadrangles. The first state maps to feature mountain bike trails are projected to be in Arizona. The mountain bike trail data is provided through a partnership with the International Mountain Biking Association and MTB Project, which collects and verifies data collected by local IMBA chapters, IMBA members, and the public. A news release is planned and a media event and roll-out are being considered. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**News Release–City Votes on USGS Research Project:** In **early November**, USGS and Reclamation will issue a joint news release about the Waco Treatment Wetlands project. Next month, the City of Waco (Texas) City Council is scheduled to vote on final construction approval of the Waco Treatment Wetlands, a multi-disciplinary/partner research project to demonstrate whether an innovative constructed wetlands design can

remove endocrine disrupters that occur in reclaimed wastewater. USGS, Reclamation the City of Waco and Baylor University are all involved. Once approved, construction of the wetlands could start in the next month. Media coverage is anticipated. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Climate Change Effects in the Lake Michigan Basin:** In the **next month**, USGS will release a new report that discusses likely hydrological effects of climate change on the Lake Michigan Basin through 2099. Findings suggest increased streamflow throughout the basin and late growing seasons. A news release is planned. *[THIS WAS IN LAST WEEK'S REPORT]*

### **Major Press Inquiries**

**Youth blogger to visit USGS Science Center:** On **November 13**, youth science blogger Terry Jennings will visit the USGS Eastern Geology and Paleoclimate Science Center in Reston, Va. to learn about the center's work and tour the labs. Her blog is *KC's Wild Facts*.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

**Oversight Hearing on Volcano Hazards:** The USGS has been invited to testify at a House Natural Resources Energy and Mineral Resources Subcommittee oversight hearing on volcano hazards. The hearing is tentatively scheduled for the week of November 17. USGS Volcano Hazards Program Coordinator, Charlie Mandeville, will likely serve as the USGS witness.

### **30-60 Day Look Ahead**

**Forthcoming USGS Polar Bear Research Papers:** In the **coming months**, the USGS will be releasing several new journal papers related to polar bear conservation in a warming Arctic. The papers range from medium to high interest and cover topics including implications of polar bear genetic structure, female polar bear diet and foraging strategies, polar bear population dynamics, effects of polar bear capture and polar bear resource selection patterns to inform energy resource development in the Arctic. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—New Findings on Polar Bear Genetic Structure and Diversity:** In the **coming weeks**, USGS will announce a new paper to be published in the journal *PLOS One* that shares new findings on the circumpolar genetic structure of polar bears. USGS scientists led an international team to share data on polar bear genetics, in order to determine how genetic diversity and structure have changed in response to dramatic declines in the sea-ice habitat of polar bears, how current genetic patterns compare with past patterns, and how genetic demography changed with historical fluctuations in climate. This major analysis on subpopulation connectivity during recent sea ice decline provides a substantially updated baseline for the conservation framework currently under development by the 5 nations (U.S., Canada, Greenland, Norway, and Russia) with polar bears. A news release is planned and briefings are planned for FWS in Alaska and Alaska Native co-management partners. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Funding for new Gages in Minnesota:** In the **coming weeks**, USGS will announce NSIP funding for new streamgages in Minnesota. The announcement will be similar to the September 9 announcement for new streamgage funding in Idaho, distributed to the Minnesota media outlets. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Drought Impacts on Mojave Bird Species:** In the **coming weeks**, USGS will announce a new paper to be published in the journal *Auk*. The study, led by the University of Arizona, finds that drought-caused delays in nesting, coupled with the effects of nest depredation and parasitism, will have a negative effect on birds in the Mojave Desert. A news release is being planned. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Marcellus Development Impacts on Salamander Ranges:** In the **coming weeks**, USGS will announce a new paper that indicates that habitat loss may be significant for terrestrial salamanders in the Marcellus Shale as a result of oil and gas development activities. USGS researchers modeled losses of forest habitat in the Marcellus shale play, and estimated the corresponding reduction in forest-dependent salamander ranges based on a variety of shale gas development scenarios. All scenarios showed forest loss and potentially large range restriction for the salamanders. Despite the uncertainty in the species' distribution modeling, the results indicate that habitat loss may be significant, implying a real potential impact on terrestrial salamander populations. Given other threats facing terrestrial, range-restricted species, such an impact from a single source would indeed be concerning. A full assessment of extinction risk will require better and more extensive data, and though the scenarios are insufficient to fully assess this risk, the results from our simulations are a first step. The paper will be published in the journal *Biological Conservation*, and a news release is planned. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—USGS to Release Study on Disease Virulence Evolution:** In the **coming weeks**, a news release will announce new research, led by the USGS, that finds that diseases that cause debilitating symptoms are expected to evolve lower virulence along the epidemic front compared to the epidemic origin. Motivated by real-world observations of a new disease in songbirds, a mathematical investigation shows that disease virulence—the increased death rate of infected individuals—is expected to evolve to lower levels along the epidemic front compared to the disease origin. The paper will be published in *The American Naturalist*. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Freshwater Fisheries and Global Food Security:** In the **coming weeks**, Michigan State University will distribute a news release describing the importance of inland fisheries to global food security, the challenges faced due to competing demands for freshwater and possible solutions. USGS scientists contributed to the publication and will be identified in the news release. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—NC Baseline Study for Hydraulic Fracturing:** In the **coming weeks**, USGS will announce a new study that examined groundwater quality samples collected in a potential shale gas production area in North Carolina. This report can be considered as baseline information for groundwater quality in the aquifers of the study area because the natural gas industry is not yet active in the state. The results showed that dissolved methane concentrations were low. The study will be published as a USGS Open-File Report. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Seal flu virus:** In the **next few weeks** the USGS National Wildlife Health Center will issue a national news release announce a new report showing that the avian flu virus that caused widespread harbor seal deaths in 2011 can easily spread to and infect other mammals and potentially humans. The release will likely be distributed jointly with the St. Jude's Children's Memorial Hospital. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—The impact of road salt on watersheds:** In the **coming weeks**, the USGS plans to announce new research about increasing chloride concentrations in streams associated with the use of road salt. The paper is pending journal approval, but approval is expected within the next week or two. A news release will be coordinated with the publication date. *[THIS WAS IN LAST WEEK'S REPORT]*

**News Release—Upper Klamath ET Maps:** In the **coming weeks**, USGS will distribute a press release for upcoming evapotranspiration maps of the upper Klamath Basin. The announcement will be coordinated with other local activities in the Klamath area. *[THIS IS UPDATED FROM LAST WEEK'S REPORT]*

**Upcoming Fact Sheet on Produced Waters:** In the **coming months**, USGS will publish a new fact sheet that will provide an overview of USGS activities and information from published sources regarding produced waters from hydrocarbon production.

**Upcoming Analysis of Permafrost Gas Hydrate:** In the **coming months**, a new USGS paper to be published in *Journal of Chemical Engineering Data* reveals where permafrost-associated gas hydrates are most likely to occur, concluding that Arctic Alaska and the West Siberian Basin are the best prospects.

**Upcoming Paper on Fate of Injected CO<sub>2</sub> in Louisiana:** In the **coming months**, a new USGS paper is scheduled for publication in an outside journal that evaluates the ultimate fate of carbon dioxide that is injected into Louisiana's Wilcox Group formation of the Gulf Coast Basin.

**WEEK-AHEAD REPORT: ASSISTANT SECRETARY–INDIAN AFFAIRS  
AND THE BUREAUS OF INDIAN AFFAIRS AND INDIAN EDUCATION  
November 5 to November 14, 2014**

**Highlights of Travel, Meetings, and other Public Events**

On November 5, the AS-IA will give remarks at the DOI/IA National Native American Heritage Month event at the Office of Personnel Management Alan Campbell Auditorium. Theme: “Native Pride and Spirit: Yesterday, Today and Forever.”

On November 5, the AS-IA, DAS-M, BIE Director, BIE Deputy Bureau Director, Office of Self Governance and Office of Budget and Performance Management will meet with the Tribal Interior Budget Council (TIBC) on budget issues.

On November 5, the AS-IA and Principal Deputy Assistant Secretary will meet with the Tanana Chiefs Conference Director to discuss the process of becoming a TIBC representative for the Alaska Region.

On November 6, the AS-IA will present at the Special Institute on Energy and Mineral Development in Indian Country for the Rocky Mountain Mineral Law Foundation in Tucson, AZ.

On November 10, the AS-IA will meet with Pueblo of Acoma’s Gaming Task Force to discuss a gaming compact with the State of New Mexico for a class III tribal-state gaming compact.

On November 13, BIE Director Roessel will lead a discussion in Albuquerque, NM on American Indian languages to develop a BIE policy on Native languages for BIE schools.

**Public Announcements**

Wednesday, November 5

The DOI/Indian Affairs National Native American Heritage Month event will take place at the OPM headquarters building in Washington, D.C. The theme is “Native Pride and Spirit: Yesterday, Today, and Forever.”

Southwestern Indian Polytechnic Institute (SIPI) will host the Tribal Geologic Information System (GIS) Conference on campus through November 7.

Dr. Roessel’s interview with the New Mexico reporter on the Pine Hill School will air today.

Thursday, November 6

The BIE American Indian Language Summit will take place in Albuquerque, NM.

The AS-IA will approve the Northern Cheyenne Tribe’s probate code and announce the approval in a press release today. Codes such as Northern Cheyenne’s allow tribes to determine how trust or restricted land within the reservation passes to heirs upon an individual’s death. The AS-IA will notify the Tribe.

Friday, November 7

Today is the deadline for submission of comments on Revision of Agency Information Collection for Indian Child Welfare Quarterly and Annual Report (FR Notice published 9-8-14) to the BIA Office of Indian Services Division of Human Services.

Saturday & Sunday, November 8 & 9

Nothing to report

Monday, November 10

Nothing to report

Tuesday, November 11

Nothing to report

Wednesday, November 12

Nothing to report

Thursday, November 13

The Department will host a tribal consultation on the Indian Water Rights Settlement Program in Lakewood, CO.

Friday, November 14

Training and technical assistance will be provided in Albuquerque, NM to the six tribal project directors of the Sovereignty in Indian Education Enhancements.

### **Major Press Inquiries**

Indianz.com requests confirmation that Byron McDonald is a BIA Law Enforcement officer.

Native America Calling requests someone from OJS to appear on their program about Highway Safety in Indian Country.

Phoenix, AZ, public radio station KJZZ requests a telephone interview with someone on the Sovereignty in Indian Education Enhancement Initiative funding and details on the program's goals. The station also will be contacting tribes that received SIE funding for their insights.

The New York Times requests information on the Pamunkey Tribe and their pursuit of federal recognition.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

Sovereignty in Indian Education Award letters are in the Data Tracking System for simultaneous surname.

Department of State staff will host a conference call with federal interagency staff and Navajo Nation representatives to discuss Navajo's request for U.S. assistance in compelling France to repatriate sacred objects that were sold at a June 2014 auction in Paris.

AS-IA's Office of Regulatory Affairs is compiling the comments received on the Proposed Rule on Federal Acknowledgment (Part 83).

The Department's Office of Hearings and Appeals is compiling comments received on the Proposed Rule on Hearings for Federal Acknowledgment.

The Proposed Rule on Housing and Improvement Program (25 CFR 256) is currently in the surname process with the Office of the Solicitor. The goal is to publish the rule this month.

The Paperwork Reduction Act package for the Proposed Rule on Tribal Transportation Program (25 CFR 170) is being reviewed by the Department Information Collection Clearance Officer. The next step will be to put the rule into surname.

The Proposed Rule on Secretarial Elections (25 CFR 81) has already been published in the Federal Register. Consultation on this rule was held at the NCAI meeting on October 26 in Atlanta. Additional consultations will be held this month in northern California and Oklahoma City.

The BIE is planning numerous consultations on the Draft Rule on Tribal Colleges and Universities (25 CFR 41).

The AS-IA office and BIE have drafted a Proposed Rule on Johnson O'Malley Contracts (25 CFR 273). The AS-IA office of Regulatory Affairs is working on the associated Paperwork Reduction Act request.

Indian Affairs and the Department of State continue to draft guidance to U.S. embassies regarding the repatriation of sacred objects and human remains from foreign museums.

### **30-60 Day Look Ahead**

On November 18, the Office of Inspector General will initiate its inspection of the DOI's Occupational Safety and Health and Workers' Compensation Programs with an interview meeting with Division of Safety and Risk Management (DSRM) staff. The purpose of this inspection is to assess the current conditions by analyzing data to identify the main contributing factors behind reported safety incidents, workers' compensation costs, and lost productivity.

November 15 is the deadline for comments to BIE on the preliminary discussion draft of revised regulations regarding grants to Tribally Controlled Colleges and Universities, Diné College, and Tribally Controlled Postsecondary Career and Technical Institutions.

On November 17, BIE Director Roessel and Don Yu will hold the first in a series of meetings with Tribes and Tribal leaders to explain the Blueprint for Reform and the locations of the Education Resource Centers (ERCs). These meetings are to secure support for the Blueprint and the ERCs. The first meeting will be in Flagstaff, AZ with the Navajo Nation.

On November 18, the Department will hold a Tribal Consultation on Secretarial Elections in Oklahoma City, OK.

On November 19, staff will attend an all-day program at the National Museum of the American Indian titled: "25 Years of Repatriation under the NMAI Act." Several expert panels will discuss the repatriation of human remains, as well as sacred objects. Australia's Ambassador to the US will discuss his experiences with international repatriation projects.

On November 20, the Department will hold a Tribal Consultation on Secretarial Elections in Rocklin, CA.

November 28, 2014 is Native American Day.

On November 20, the AS-IA will be a Keynote Speaker at the 2014 Indigenous Law Conference: Dismantling Barriers in American Indian Education at Michigan State University in Lansing, MI.

On December 1-5, the 24th Annual BIA Tribal Providers Conference will be held at the Dena'ina Civic and Convention Center in Anchorage, AK.

On December 3, 2014 the White House Tribal Nations Conference will be held at the Capital Hilton in Washington, D.C.

On December 9, SIPI President Allison and Vice President Christensen will present to the New Mexico Legislative Finance Committee.

On December 9-10, the American Indian Chamber of Commerce Conference will take place in Washington, D.C. The Indian Affairs Division of Economic Development (DED) is helping the Chambers of Commerce plan and implement this event, the first-ever conference organized by all of the American Indian Chambers in the U.S.

On January 1, the Department of State will file a report with the UN Human Rights Committee (HRC) on the status of human rights in the US during the period 2011-2014. This will be the second time the U.S. has made such a report. The first report was in 2010. A U.S. delegation will be formed in early 2015 to make an oral presentation before the HRC in late April/early May 2015.

## **WEEK-AHEAD REPORT: OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS (OST)**

**November 5<sup>th</sup> –November 14<sup>th</sup>, 2014**

### **Highlights of Travel, Meetings, and other Public Events**

November 3-4 – Vincent G. Logan, Special Trustee will travel to Albuquerque, New Mexico to meet with the OST Investment Review workgroup staff.

### **Public Announcements**

#### **November 5, 2014**

The Director of Financial Education will attend the public meeting of the Financial Literacy and Education Commission (FLEC) in Washington, DC. FLEC was established under the Fair and Accurate Credit Transactions Act of 2003 and was tasked to develop a national financial education web site (MyMoney.gov) plus a national strategy on financial education. It is chaired by the Secretary of the Treasury and vice chaired by the Director of the Consumer Financial Protection Bureau and is made up of the heads of 19 additional federal agencies. The Commission is coordinated by the Department of the Treasury's Office of Financial Education within the Office Consumer Policy. *[THIS WAS IN LAST WEEK'S REPORT]*

The Deputy Special Trustee-Field Operations will present OST's budget and probate initiatives at the Tribal Interior Budget Council (TIBC) meeting in Washington, D.C. *[THIS WAS IN LAST WEEK'S REPORT]*

#### **November 6, 2014**

The Concho Agency FTO and staff will provide a presentation on trust related matters at the tribal sponsored conference and co-sponsored by the Diabetes Wellness Program and the Elders Day Out Programs of the Cheyenne-Arapaho Tribes of Oklahoma. OST will provide a 45-minute presentation and an informational booth on topics regarding Whereabouts Unknown (WAU), Direct Deposit, the Jodi Marquette Wills Project and LBBP. *[THIS WAS IN LAST WEEK'S REPORT]*

#### **November 7, 2014**

No outreach to report.

#### **November 8, 2014**

The Pima Agency FTO and Colorado River Agency FTO will meet with beneficiaries and students at the Hualapai Lodge on the Hualapai Reservation to assist in "will signing" for individual landowners. Wills were prepared by Arizona Summit Law School Indian Wills Clinic students under the guidance of Professor Betsy Hollingsworth.

#### **November 9, 2014**

No outreach to report.

#### **November 10, 2014**

The Cherokee and Eastern Oklahoma Region FTO will attend the Cherokee Nation Tribal Council Meeting Tahlequah, Oklahoma. The FTO regularly attends these meetings to maintain accountability to tribal leaders and beneficiaries.

#### **November 11, 2014**

The Tulsa FTO will attend the Choctaw Nation Veterans Day Ceremony at Tuskahoma, Oklahoma. OST staff will provide information on OST services, the Land Buy-Back Program (LBBP), financial literacy educational services, and credit counseling.

#### **November 12, 2014**

No outreach to report.

### **November 13, 2014**

The Papago Agency FTO will attend a meeting with the Tohono O'odham Nation Finance Committee and Treasurer regarding tribal accounts.

### **November 14, 2014**

No outreach to report.

### **Major Press Inquiries**

None to report.

### **Items of Note/Expected Legislative, Legal, Policy Issues**

#### **U.S. District Court for the District of Columbia (DDC) Tribal Litigation for Quinn-Leinbach, Settlement Proposal to the Obama Administration (SPOA) Tribes, and other Litigating Tribes**

The Office of Historical Trust Accounting (OHTA) is actively supporting the Office of the Solicitor (SOL) and the Department of Justice (DOJ) tribal litigation team's efforts to reach a settlement on the remaining cases.

**Alabama-Quassarte Tribal Town:** On October 23, 2014, the Interior Board of Indian Appeals (IBIA) issued a final reconsidered decision on remand from the Court regarding whether Plaintiff is the legal beneficiary of what is referred to as the Surface Lease Income Trust (the Trust). The IBIA concluded that the Trust is not held in trust for Plaintiff.

**Chickasaw & Choctaw:** The discovery is currently scheduled to end November 15, 2014 pending a response to the government's request for an extension.

**Colorado River Indian Tribes:** The DOJ requested support settlement efforts. OHTA provided SOL and DOJ with updated natural resource revenue under-collection model results for an additional discount scenario.

**Quapaw, Goodeagle/Bear & Bear:** The discovery deadline has been extended until February 19, 2015.

## WEEK-AHEAD REPORT: OFFICE of INSULAR AFFAIRS October 29-November 7, 2014

### Highlights (Chronologically) of Travel (AS-IN), Meetings and other Public Events

- November 3 – Meeting on OIA’s outreach to the freely associated state communities in Hawaii
- November 5 – Briefing on the Draft Environmental Impact Statement for military training on Tinian and Pagan, Commonwealth of the Northern Mariana Islands
- November 6 – Briefing on the status of the National Renewable Energy Laboratory’s work in the territories and the freely associated states and meetings on climate change and Native Hawaiian affairs
- November 9 – Departure for official travel to American Samoa

### Public Announcements

### Press Inquiries/Reports: Coverage of AS-IN’s Official Travel

- KIA’AINA TO VISIT AMERICAN SAMOA BEGINNING NOVEMBER 10.  
<http://www.samoanews.com/content/en/newest-doi-assistant-secretary-insular-affairs-visit>
- U.S. SUPREME COURT: STATE OF HAWAII NEED NOT PROVIDE MEDICAID TO CITIZENS OF FREELY ASSOCIATED STATES – BUT HAWAII OFFICIALS SIGNAL THAT SOME HEALTH COVERAGE WILL CONTINUE UNDER HAWAII STATE RULES. <http://insurancenewsnet.com/oarticle/2014/11/04/us-supreme-court-decision-allows-reduction-of-healthcare-coverage-to-noncitizen-a-571563.html>
- MAYOR OF TINIAN (NORTHERN MARIANA ISLANDS) ASKS KIA’AINA FOR TECHNICAL ASSISTANCE FOR TINIAN TO DEVELOP POSITIONS ON INCREASED MILITARY PRESENCE ON TINIAN.  
[HTTP://WWW.SAIPANTRIBUNE.COM/INDEX.PHP/TINIAN-MAYOR-ASKS-KIAAINA-MILITARY-EXPERTS-ASSISTANCE/](http://www.saipantribune.com/index.php/tinian-mayor-asks-kiaaina-military-experts-assistance/)
- CONGRESSMAN ENI FALEOMAVAEGA (DEM.-AM. SAMOA) SUED IN U.S. DISTRICT COURT BY FORMER CAPITOL HILL STAFF MEMBER FOR CIVIL RIGHTS VIOLATIONS, INTIMIDATION AND VIOLATIONS OF FEDERAL FAMILY LEAVE ACT. <http://www.samoanews.com/content/en/fai%E2%80%99ivae-lawsuit-vs-eni%E2%80%99s-office-baseless-without-merit>

### Items of Note/Expected Legislative, Legal or Policy Issues

### Results of Territorial Congressional Elections –

- **American Samoa** – Amata Coleman Radewagen (Republican) unseated the Democratic incumbent, Congressman Eni Faleomavaega, 42% to 26%, who has served in Congress since January 1989. A former Governor (Togiola Tulafono) secured 11%. The other five challengers totaled 16%. Over 3000 registered voters failed to go to the polls. A member of the Republican National Committee, Congresswoman-elect Radewagen is the daughter of Peter Tali Coleman, the first locally elected Governor of American Samoa, and will be only the third Member of Congress from American Samoa since the Congress established the seat as of the November 1980 election.
- **Guam** – The Democratic incumbent (Madeleine Bordallo) defeated her Republican opponent 58% to 42%.
- **U.S. Virgin Islands** – In an uncontested race, the Democrat Stacey Plaskett won the race with over 90% of the vote. Her Republican challenger (Vince Danet) secured just 9%.
- **Commonwealth of the Northern Mariana Islands** – Incumbent (Gregorio Kilili Sablan, a Democrat) won with 63% of the votes cast in a race with one challenger.

### Results of Territorial Gubernatorial Elections –

- **Guam** – The Republican incumbents, Governor Eddie Baza Calvo and Lieutenant Governor Ray Tenorio, beat their Democratic challengers 64% to 36%.
- **U.S. Virgin Islands** – Kenneth Mapp and Osbert Potter (Independent) are leading the Democratic Party’s Donna Christensen (incumbent Member of Congress) and Basil Ottley (former OIA employee). However, neither team gained a clear majority, and so the race appears to be headed for a run-off.
- **Commonwealth of the Northern Mariana Islands** – Incumbent (Eloy Inos, a Republican) garnered 44% of the votes cast against three other challengers; Governor Inos will now square off in a run-off (date yet to be determined) against Heinz Hofschneider (Independent), who received 33% of the votes cast.

**Grant Awards of Nearly \$3,100,000 to Palau** – On October 22 OIA notified the President of Palau (Tommy Remengesau Jr.) that OIA was awarding the Government of Palau \$2,593,000 for economic assistance under the Compact relationship between the United States and Palau. On October 29 OIA notified the President of Palau that OIA was awarding the Government of Palau \$504,000 to reimburse Palau for the actual costs incurred in the fiscal year 2014 single audit.

**Grant Awards of Nearly \$31,000,000 to the Marshall Islands** – On October 21 OIA notified the Mayor of Enewetak/Ujelang Local Government (Jackson Ading) that OIA was awarding \$1,511,640 to provide food and support to the people of Enewetak and to help rehabilitate their atoll's soil in order to support agriculture. On October 21 OIA notified the Marshall Islands Ambassador to the United States (Charles Paul) that OIA was awarding \$29,434,442 to the Marshall Islands Government as assistance in health, education, environmental affairs and public-sector infrastructure under the Amended Compact between the United States and the Marshall Islands.

**Grant Awards of Nearly \$58,000,000 to the Federated States of Micronesia (FSM)** – On October 21 OIA notified the FSM Ambassador to the United States (Astero Takesy) that OIA was awarding \$57,973,184 to the FSM Government as assistance in health, education, environmental affairs, private-sector development and public-sector capacity building under the Amended Compact between the United States and the FSM.

**Completion of OIA-funded Project for the People of Bikini Atoll** – A state-of-the-art, reverse-osmosis (RO), water-treatment plant, powered entirely by wind and solar energy, has been completed for the people of Bikini Atoll living on Kili Island in the southern Marshall Islands. The RO building houses water-making units that now supply the people of Bikini with 2800 to 5600 gallons per day of pure, PH-balanced, mineral-enhanced drinking water. The solar array and wind turbine combination provide enough energy to run the RO machines, pumps and ultra-violet sterilization, while feeding excess power back into the community's power grid. The RO water-treatment plant purifies brackish well water. The Director of OIA has been invited to attend the dedication of the water-treatment plant.

### **30-60 Day Look Ahead**

- **November 9-15** – Accompanied by the Director of OIA, AS-IN makes her first visit to American Samoa, during which AS-IN will deliver the Veterans' Day address at the Daniel K. Inouye Industrial Park in Tafuna (Tutuila) and will visit the Manu'a Islands<sup>1</sup>.
- **November 16-22** – As Chair of the Chuuk Advisory Group on Education Reform and accompanied by the OIA Budget Director, the Director of OIA attends in the State of Chuuk, Federated States of Micronesia, the third annual meetings of the Advisory Group, whose principal purpose is to enhance and to accelerate the implementation of education reform in the FSM State of Chuuk.

---

<sup>1</sup> This will be only the second visit to the Manu'a Islands by an Assistant Secretary of the Interior in twenty years.

Androff, Blake <blake\_androff@ios.doi.gov>

## Release: NCAI Responds to AG Report on Native Youth and Violence; Cladoosby Calls for National Action to Protect Native Children

1 message

### FOR IMMEDIATE RELEASE

November 18, 2014

### CONTACT

ncaipress@ncai.org

## NCAI Responds to AG Report on Native Youth and Violence; Cladoosby Calls for National Action to Protect Native Children

*NCAI Statement in response to Attorney General Advisory Committee Report on American  
Indian/Alaska Native Children Exposed to Violence*

WASHINGTON, DC – Today, the National Congress of American Indians called for a national mobilization of government and civil society resources to address high rates of violence experienced by American Indian and Alaska Native children. The organization's swift response comes on the heels of the release of the report - *Ending Violence So Children Can Thrive* – authored by the Attorney General's Advisory Committee on American Indian/Alaska Native Children Exposed to Violence. Former NCAI President Jefferson Keel, Lt. Governor of the Chickasaw Nation, served as a member of the committee, along with a diverse group of nine tribal leaders and scholars, and chair of the Committee, former Senator Byron Dorgan (ND).

NCAI's current President Brian Cladoosby released the following statement:

“The report provides a very strong set of recommendations for action by the Obama Administration and by Congress. This grabs the heart. We call on the federal government, and tribal governments, as well as civil society to ensure that we are putting our children's needs first.

“NCAI calls on Congress to hold hearings in early 2015 to address the Report’s recommendations. Additionally, the challenges and opportunities facing our Native youth should be a central focus during the President’s upcoming Tribal Nations Conference this December.

“Without action, our Native youth will remain vulnerable and they will continue to be exposed to harm. We must address this severe problem as an American family of governments – federal governments, state and local governments, and tribal governments. Even more importantly, we must address this as communities, families, parents and grandparents, and as adults, who know all too well the challenges of growing up in difficult environments. “

Over the past two years, the Attorney General and the Advisory Committee on American Indian and Alaska Native Children Exposed to Violence examined the current epidemic of violence facing Indian Country and in their report advanced recommendations to heal and protect American Indian and Alaska Native children—to create environments where they can thrive and reach their full potential. At the core of the matter is the need to reduce the barriers that restrict tribal sovereignty in the protection of Native children.

The Advisory Committee has identified the following areas of need:

#### *A Permanent Voice for Native Children*

- The Committee recommends that no later than May 2015 that a permanent fully staffed Native American Affairs Office within the White House Domestic Policy Council, including a staff person focused on Native youth.

#### *Supporting Tribal Self-Determination in Combating Violence*

- Tribal self-government must form the foundation for protecting Native children. The Advisory Committee recommends that Congress should restore the inherent authority of tribal governments to assert full criminal jurisdiction over all persons who commit crimes against children in Indian Country. It is important to build on the success of the Violence Against Women Act, and extend the law to protect Native children.

#### *Intergovernmental Cooperation in Child Welfare Provision*

- Encourage tribal-state ICWA collaborations- ICWA provisions seek to keep Native children safely in their homes and provide AI/AN children with civil protections as members of their respective tribes.

#### *Building Legal Infrastructure in Indian Country*

- Tribal courts must be enhanced and sustained; where absent, they must be developed.
- There is an identified need to fund tribal criminal and civil justice systems. This is a crucial investment for our children.

###

#### ***About The National Congress of American Indians:***

*Founded in 1944, the National Congress of American Indians is the oldest, largest and most representative American*

*Indian and Alaska Native organization in the country. NCAI advocates on behalf of tribal governments and communities, promoting strong tribal-federal government-to-government policies, and promoting a better understanding among the general public regarding American Indian and Alaska Native governments, people and rights. For more information visit [www.ncai.org](http://www.ncai.org)*

**EVENT MEMORANDUM FOR THE SECRETARY**  
**WHITE HOUSE TRIBAL NATIONS CONFERENCE**

DATE: December 1 - 3, 2014  
LOCATION: White House, DOI, and Capital Hilton Hotel  
FROM: Ann Marie Bledsoe Downes, 208-2875

**I. PURPOSE**

The purpose of this memorandum is to provide an overview of the various activities scheduled around the Sixth White House Tribal Nations Conference (TNC), which is co-sponsored by the National Congress of American Indians (NCAI) this year. As of November 28, there are 280 Tribal Leaders and 40 Tribal Youth Ambassadors registered to attend, which exceeds registration levels from previous years. We expect approximately 300 tribal leaders to attend.

**II. BACKGROUND**

There are a number of activities scheduled around TNC. On Monday, you will participate in a small tribal leader roundtable at DOI to discuss energy and landscape level conservation priorities as we discussed during our pre-meetings. The meeting is scheduled to occur from 4:30pm – 6:00pm in your office.

On Tuesday, you will participate in a meeting with the President and tribal leaders at 10:50 am in the West Wing. In the afternoon, you will co-lead the breakout session, “The Next Generation: Education and Supporting Native Youth” from 2:00pm – 4:00pm at the Capitol Hilton. You will then host an invitation-only White House Council on Native American Affairs (WHCNAA) reception in the South Penthouse from 4:30pm – 6:30pm. An expected guest list for each event is attached for your review.

On Wednesday, you will give brief opening remarks, attend numerous breakout sessions, and participate in two afternoon Cabinet Panels on Energy and Climate Change, and Youth/Education. At the conclusion of TNC, NCAI is hosting a closing reception at the Capitol Hilton, which you might want to attend.

Several other agencies will also host small tribal leader roundtables to discuss such topics as healthcare, sacred sites, tax policies, and transportation on both Monday and Tuesday. You will not attend any of those meetings.

**Tribal Nations Conference Schedule of Events**

**Monday, December 1, 2014**

- DOI Tribal Roundtable – You will host a listening session in your office from 4:30pm – 6:00pm. Deputy Secretary Connor, Assistant Secretary Washburn, and senior AS-IA staff will also attend this meeting. The invited tribal leaders were asked to discuss

specific projects relating to renewable energy development or opportunities for tribes to work with multiple agencies within the Department to advance landscape level management of special places.

The following tribal leaders will attend this roundtable. Bios for this group are attached.

<b>Name</b>	<b>Tribe</b>	<b>Title</b>	<b>Region</b>
Jefferson Keel	Chickasaw	Lieutenant Governor	Southern Plains
Karen Diver	Fond du Lac Band of Lake Superior Chippewa	Chairwoman	Midwest
Victor Joseph	Tanana Chiefs	Chief	Alaska
Ned Norris	Tohono O'odham	Chairman	Western
Robert Shepherd	Sisseton Wahpeton Oyate	Chairman	Great Plains
Mike Wiggins	Bad River Band of Lake Superior Chippewa	Chairman	Midwest

**Tuesday, December 2, 2014**

- **White House Meeting** – The President is holding an Oval Office meeting on Tuesday, December 2 at 10:50am with tribal leaders and senior administration members to discuss supporting tribal youth and economic growth in tribal communities. Likely areas of discussion include education, workforce development, access to capital, tribal taxation, health care, energy development and the budget. YOU and AS-IA Kevin Washburn will attend.
- **TNC Breakout Session** – YOU will co-lead the panel, “The Next Generation: Education and Supporting Native Youth” with Chief Phyliss Anderson (Mississippi Band of Choctaw) at the Capitol Hilton from 2:00pm – 4:00 pm. This panel will run both Tuesday and during the TNC afternoon session on Wednesday. Other federal officials will be on the panel with YOU from Departments of Education, Justice, Agriculture, Energy, and the FCC. More detail on this event, including opening remarks, hot topics, talking points, is attached.
- **White House Council Reception** – YOU will host an invitation-only reception in the South Penthouse from 4:30pm-6:30pm. The White House put together the invitation list that includes tribal leaders, Cabinet members, senior White House staff, among others. A list of confirmed attendees is attached.

**Wednesday, December 3, 2014**

- **White House Tribal Nations Conference**

YOU will act as emcee throughout the morning and afternoon plenary sessions of TNC. The agenda is below.

The **Morning Session** (8:30am-10:30am) The morning session will include opening remarks from you followed by a presentation of colors by a Navajo Code Talkers and Women Warriors Veterans group, an invocation, flag song, and youth ambassadors video. Remarks will be given by VP Biden and Attorney General Holder. Tentatively, Secretary Burwell will also attend to give prepared remarks during the morning. The Economic Development panel participants include SBA Administrator Contreras-Sweet, Secretary Castro, Secretary Vilsack, and Secretary Foxx.

The **Midday Session** (11:00am-1:15pm) will consist of 6 breakout sessions. The breakouts will be run by moderators, a designated tribal leader, and executive branch officials. As you know, the White House requested tribal leaders to submit their preferred topics for discussion, and these sessions reflect their interests. Box lunches will be served (courtesy of NCAI) to the tribal leaders and breakout participants. YOU will not be assigned to a specific breakout session but will spend your time moving around to various discussions.

At the conclusion of the breakout sessions, all attendees will need to go through security, which will take 30-45 minutes.

The **Afternoon Session** (2:00pm-4:00pm) will begin with brief remarks from you welcoming everyone back and thanking them for their participation in the breakout sessions. There will be two Cabinet panels, and you will participate in both. The Energy and Climate Change panel participants include Administrator McCarthy and CEQ Acting Director Mike Boots. The Youth panel participants include Director Archuleta, Secretaries Duncan and Perez and Director Munoz.

At the end of the Youth panel, YOU will move to greet the President along with other DOI officials as well as San Carlos Apache Chairman Terry Rambler. At this time, all Cabinet members will depart the stage and the auditorium will be set up for the President's remarks.

Chairman Terry Rambler will deliver brief remarks to introduce the President. POTUS will deliver remarks for approximately 10-14 minutes and shake hands on a rope-line to conclude TNC.

The Reception (4:30pm-6:00pm) will be held at the Capitol Hilton. After the President departs, Jodi Gillette and Raina Thiele will remind guests about the reception and thank the tribal leaders for their participation in the 2014 Tribal Nations Conference.

List of Agency Meetings with Tribal Leaders from December 1-4, 2014

Draft TNC Opening Remarks

NCAI Article: Lame Duck Session Priorities

**Information Memo: Tribal Leader Roundtable To Discuss  
Energy and Landscape Scale Management of Public Lands and Natural Resources**

DATE: Monday, December 1, 2014  
LOCATION: Your Office  
Time: 4:30pm – 6:00pm  
FROM: Kevin K. Washburn, Assistant Secretary-Indian Affairs

**INTRODUCTION**

On Monday, December 1, 2014 YOU will meet with six tribal leaders to discuss specific projects relating to renewable energy development or opportunities for these tribes to work with multiple agencies within the Department to advance landscape level management of special places. As described more fully below, the projects range from management of tribally important areas in Arizona and Oklahoma to development of a wind farm by eight Sioux Tribes in South Dakota to protection of on-reservation and treaty reserved off-reservation resources from potential mining in Wisconsin.

**A. CHICKASAW NATION REQUEST TO CO-MANAGE CHICKASAW NATION  
RECREATION AREA WITH NPS**

In the early 1900's the Federal government purchased two parcels of land from the Chickasaw Nation that ultimately became the Chickasaw National Recreation Area (CNRA). The parcels included a natural spring and sat on an aquifer that remains one of the Chickasaw Nation's highest priorities. The Chickasaw Nation explains that the protection of the natural springs and aquifer is what prompted the Tribe to sell the property to the United States.

In 2009, the Chickasaw Nation and the National Park Service (NPS) entered into negotiations for management and operation of the Chickasaw National Recreation Area. On April 4, 2013, NPS sent a draft self-governance annual funding agreement to the Chickasaw Nation to sub-contract certain functions. The Chickasaw Nation desires to co-manage the area with NPS. The Nation believes that the story of Native peoples deserves more than an explanation of culture – it should highlight statesmanship, endurance, perseverance, and re-growth. The Tribe's Cultural Center is located next door to the CNRA.

The Nation has already developed a visitor center with its own funds, and is working to improve its relationships with local governments to promote tourism for the area. The Nation is interested in working with NPS to:

- Compact with NPS for the comprehensive management and operation of CNRA—while ensuring the unit remains a part of the NPS system.
- Develop active cooperation with NPS to ensure all federal regulations and guidelines are enforced.
- Enhance the experience of visitors to CNRA through the appropriate addition of Chickasaw and other Native American cultural aspects to programs and displays.
- Provide a new and expansive visitor center at no cost to the federal government.

- Provide office space for the entire CNRA staff with minimal cost to the federal government.
- Work with the NPS to provide a physical link (pedestrian bridge) between the CNRA and the Chickasaw Nation Cultural Center.
- Address longstanding NPS concerns about a lack of marketing to potential visitors to CNRA.

#### **B. TOHONO O’ODHAM’S REQUEST TO CO-MANAGE BABOQUIVARI PEAK WITH BLM**

The Tohono O’odham live on a large reservation in Arizona that includes a border with Mexico and is contiguous with BLM land designated as protected under the Wilderness Act of 1964. For the Tohono O’odham Nation, Baboquivari Peak represents “the center of Mother Earth” and “the dwelling place of P’itoyi, the Creator.” The area is of immense religious and cultural importance to the Nation. When the relevant portion of the Tribe’s Reservation was established by executive order on February 1, 1917, the eastern portion of Baboquivari Peak was left outside of the boundaries of the Reservation. This means that the Nation has control and jurisdiction only over the western portion of Baboquivari Peak, amounting to one-half of its most sacred place.

On November 28, 1990, Congress enacted the Arizona Desert Wilderness Act of 1990, which designated the eastern portion of Baboquivari Peak (2,065 acres) as the Baboquivari Peak Wilderness. Like other wilderness areas, Baboquivari Peak Wilderness is administered for the use and enjoyment of the American people with an eye toward protection and preservation of the area’s wilderness character.

The Tohono O’odham Nation has sought to restore Baboquivari Peak as part of its homelands in various ways. In 1996, the Arizona Senate and House of Representatives called on the U.S. Congress to enact legislation to transfer in trust that portion of Baboquivari peak consisting of federal lands for inclusion in the Tohono O’odham Indian reservation. In 1998, Congressman Ed Pastor (D-AZ) sponsored H.R. 4119, the Tohono O’odham Religious Area Restoration Act. The bill directed Interior to take the Baboquivari Peak Wilderness in trust for the benefit of the Tohono O’odham Nation as part of its reservation and would have authorized the Nation to manage the area, in cooperation with BLM. Opponents of the bill expressed concern that the Tribe would severely limit access to the peak for recreational purposes, ban climbing, and mismanage the land.

BLM continues to manage the eastern portion of Baboquivari Peak. The Nation asserts that it has the capacity to manage the eastern portion of Baboquivari, pointing to its own comprehensive environmental plans, standards and laws. The Nation seeks to co-manage the area with BLM.

#### **C. SIX CHIPPEWA TRIBES’ REQUEST TO WORK WITH ADMINISTRATION TO PROTECT ON-RESERVATION AND OFF-RESERVATION RESOURCES**

Gogebic Taconite, LLC (GTAC) is proposing a 4.5 mile long, 1,000’ wide, 900’ deep, open-pit taconite mine in the Bad River Watershed, in the Penokee Mountain region of Ashland and Iron Counties, Wisconsin. (See attached slide 1) The proposed open pit mine would likely impact on

reservation resources for the Bad River Band of Lake Superior such as the Kakagon sloughs (designated a National Natural Landmark in 1973 and a wetland of international importance in 2012) as well as off-reservation treaty reserved resources held by a number of tribes in the region. (See Attached slide 2)

Tribes also believe that the potential mine could have detrimental impacts on areas administered by the National Park Service such as the Apostle Islands National Lakeshore, the North Country National Scenic Trail and Isle Royale National Park. (See attached slides 3, 4 and 5). The Fish and Wildlife Service has concerns about potential impacts to critical habitat for the Piping Plover.

In 2013, the Bad River Band of Lake Superior, the Red Cliff Band of Lake Superior, the Lac du Flambeau Tribe, the St. Croix Tribe, the Sokaogon Tribe and the Lac Courte Oreilles Tribe wrote to President Obama requesting that Interior prepare litigation to protect on-reservation and off-reservation treaty reserved resources from potential mining impacts. Earlier this year, the tribes requested that EPA utilize its authority under section 404(c) of the Clean Water Act to prohibit the disposal of dredged or fill material, including mining wastes based on unacceptable adverse effects on fisheries, wildlife and recreational areas. EPA rarely invokes this authority – it most recently initiated the public process to identify appropriate options to protect the world's largest sockeye salmon fishery in Bristol Bay, Alaska.

While EPA is unlikely to utilize its 404(c) authority here, it is working with federal, state and tribal partners to promote collaborative monitoring and study of the Lake Superior Basin. On November 19-20, 2014, EPA hosted a meeting in Duluth, Minnesota to kick off the Lake Superior Environmental Monitoring Collaborative. Ten tribes, eight federal agencies and the states of Michigan, Minnesota and Wisconsin participated in the meeting. Technical experts from state and federal agencies and tribes made presentations describing ongoing environmental monitoring work in the Lake Superior Basin and discussed opportunities to improve access to this information. DAS Larry Roberts attended this meeting.

Indian Affairs has provided funding to the Bad River Band to study surface water and groundwater both on reservation and in relation to the site of the proposed mine. The Bad River Band has engaged the USGS to prepare studies for the tribe on potential impacts from the mine. Indian Affairs has also provided litigation support funding to the Bad River Band.

Under the leadership of Governor Scott Walker, the State of Wisconsin has amended its ferrous mining laws. "Wisconsin's seal and the state flag both depict mining in our great state," Walker said in a statement after he signed the bill[.] "In light of our mining tradition, I'm thrilled to sign legislation into law protecting environmental safeguards, while providing certainty to the mine permitting process. ... I am hopeful today's actions will result in the creation of thousands of private sector jobs in the coming years." The Wisconsin Department of Natural Resources (WDNR), issued GTAC exploratory permits in Spring 2013 which are valid through June 30, 2015. In February 2014 the WDNR issued GTAC Bulk Sampling permits. GTAC has not applied for any federal permits as of yet from either EPA or the Army Corps of Engineers.

**D. ALASKA TRIBES' REQUEST TO WORK WITH FWS ON CO-MANAGEMENT OF SUBSISTENCE RESOURCES IN ALASKA.**

A subsistence way of life is one of the central components of Alaska Native culture and identity. As such, protecting the subsistence way of life necessarily incorporates climate change concerns, regulatory jurisdiction, and – more broadly – the Magnuson-Stevens Fishery Conservation Act (MSA) which governs primarily the management of commercial fisheries but also subsistence fisheries in the United States' exclusive economic zone (EEZ).

At the AFN Conference in mid-October 2014, Deputy Secretary Mike Connor announced that the Kuskokwim River drainage would host a pilot project in Federal/tribal fishery co-management. A substantial part of the drainage is within the Yukon Delta NWR where the subsistence Chinook salmon fishery was recently under federal management and where cooperation among user groups and land managers has been demonstrated. AFN and AVCP as well as other entities have proposed a cooperative fishery management council.

In your meeting with Victor Joseph and AFN, they asked for the pilot project to be expanded to include the Yukon River. The request is to move the needle as far as possible during this Administration on co-management for the subsistence fishery. AFN and Tanana Chiefs advocate that creating and authorizing a co-management regime for salmon management for both the Yukon and Kuskokwim rivers will produce greater cooperation and better management that is critical for the future of the Yukon Chinook salmon stocks. Co-management will unify management of the river, thereby removing management based on jurisdictional boundaries that have nothing to do with the best salmon management practices.

The Secretary's Alaska Regional Office is working with FWS Subsistence Office in AK and with Yukon regional and local entities to advance a subsistence demonstration project for the Kuskokwim River drainage to include local tribes and others into the subsistence fishery management decision-making.

**E. EIGHT SIOUX TRIBES REQUEST TO WORK WITH ADMINISTRATION TO DEVELOP UTILITY-SCALE GIGAWATT WIND PROJECT ACROSS THEIR RESERVATIONS.**

In 2013, the Cheyenne River Sioux Tribe, the Crow Creek Sioux Tribe, the Oglala Sioux Tribe, the Rosebud Sioux Tribe, the Sisseton Wahpeton Oyate and the Yankton Sioux Tribe committed to the formation of the Oceti Sakowin Power Authority, a Multi-Tribal Power Authority, with the purpose of designating Tribally-owned land for a utility scale Gigawatt wind farm and transmission facilities across their reservations. As of January 2014 two additional tribes, the Standing Rock Sioux and the Flandreau Santee Sioux joined the original six founding tribes. The Tribes have already secured some funding from non-federal sources and need the administration's help in coordinating the federal funding sources and support for this project.

The Oceti Sakowin Power Project (OSPP) is anticipated to be funded by \$2-3 billion in public power revenue bonds issued by the Oceti Sakowin Power Authority owned by the tribes and operated by professionals hired by the tribes.

Senator Dorgan has provided services to the OSPP on a pro bono basis. Sponsors for the Oceti Sakowin project include the Clinton Global Initiative, the Rockefeller Philanthropy Advisors, the Northwest Area and the Bush Foundation. OSSP is currently in discussions with the Ford Foundation, GE Energy/GE Capital and others about potential funding. Because the project is still in development phase, it doesn't qualify for most loan guaranty programs, including the USDA's Rural Infrastructure Opportunity Fund.

The OSSP is currently structured as a 501(c)(3) but as such it cannot incur debt that would bind the Rockefeller Philanthropy Advisors so the tribes are now forming the Oceti Sakowin Power Authority as a Corporation under the Indian Reorganization Act.

Unique benefits of OSPP include that it will be Indian-owned and controlled by the tribes; it is being funded with non-government source of sustainable financial support; the tribes will maintain ownership and majority of revenues; the project features a new political model which insulates projects from fluctuations of tribal politics and could be a model for multi-tribe joint endeavors; public power bond financing is low cost of capital with large demand from investors; public power is vested in promoting public interest.

As you know, the White House Council on Native American Affairs Energy Subgroup has highlighted this energy and economic development project as one that needs interagency cooperation. Permitting processes will include several agencies: BIA, FWS, BLM and possibly others.

After 2 years of effort, it is clear the project requires support of the federal government to reach its pre-development budget requirements.

#### OSPP Specific Requests:

1. Start-up funding including grants and loan guarantees
2. Coordinated, streamlined and expedited reviews and approvals
  - a. Section 17 Corporation Charter (BIA)
  - b. NEPA and other permitting (BIA, Army Corps, BLM, FWS)
  - c. Technical Support (NREL, BIA and others)
  - d. Transmissions and Interconnections
3. Power Purchase Agreements: May ask that Indian energy = 2x credit toward renewable energy goals in President Obama's Climate Action Plan
4. Holistic Funding Approach

#### **F. FOND DU LAC REQUEST TO WORK WITH ADMINISTRATION TO DEVELOP WOOD PELLET RENEWABLE ENERGY PROJECT.**

The Fond du Lac Band of Lake Superior Chippewa (FDL) has been extremely proactive in pursuing a wood pellet manufacturing co-generation project in northern Minnesota. The facility will make use of local woody biomass fuel, sourced via sustainable harvesting methods, to provide electricity and district heating services to the Tribal Community and also power a renewable, zero carbon wood pellet manufacturing facility. The tribe has completed a business plan, successfully engaged outside governmental agencies and universities to assist with marketing and financial feasibility studies and has completed a preliminary engineering study.

Additional assistance from the White House Council Energy Subgroup to promote community scale projects would help bring this and similar projects to market.

The project will integrate three complimentary business entities owned and operated by FDL:

1. The FDL District Heat Plant will consist of a biomass thermal oil heater, back-up natural gas hot water boilers, co-generation system waste heat recovery and buried hot water distribution piping. Hot water from the plant will heat the dry pellet feedstock. Eventually piping may be extended to cover Tribal buildings and homes or service new businesses and industrial developments.
2. The FDL Co-Generation 2.5 MW Organic Rankine Cycle (ORC) System fueled by waste wood will produce the electricity needed for the DH system and pellet plant. Producing electricity sequentially with heating (co-generation) is one of the most efficient means of converting fuel into electricity. At about 75% efficiency, co-generation is roughly 2.5 times as efficient as conventional utility produced power. The waste heat produced in the facility will be used to heat tribal buildings and dry pellet feedstock.
3. The FDL Wood Pellet Plant will be a 100,000+ ton per year manufacturing plant which will also use waste heat from the co-generation plant for pellet feedstock drying. 100,000 tons per year of high quality pellets that can displace up to 12 million gallons of oil or 18 million gallons of propane. Pellets will be sold to Tribal members, other Tribes, retailers, wholesalers and institutions (schools).

The new CHP biomass plant is a \$32 million dollar investment in the Fond du Lac reservation. Expected benefits include:

- Creation of 75+ Green Jobs (40 logging and trucking, 23 plant, and at least 12 in distribution of wood pellets and sales of wood pellet stoves).
- Annual revenue stream in excess of \$15 million at full capacity.
- Production of wood pellet production, retaining 75% biomass within the community, promoting heightened efficiency of fuel use.
- Reduction of the Tribal carbon footprint
- Further economic diversification to improve economic and energy self-sufficiency and security.

In 2014, Indian Affairs' awarded over \$380,000 in grants toward the Fond Du Lac Woody Biomass project. \$250,000 was awarded to perform studies to determine the best way to dry the biomass for chipping and the viability of utilizing biomass microchips in pellet appliances as well as the change in boiler efficiency with air dried microchips. \$132,400 was awarded to support feasibility assessment and business planning of the woody bio-fuel supply enterprise and a biomass appliance distribution enterprise.

**Jefferson Keel, Lieutenant Governor of the Chickasaw Nation**

Lieutenant Governor Keel is a retired U.S. Army officer with over 20 years active duty service. His combat experience included three years' service in Viet Nam as an Infantryman, where he received the Bronze Star with "V" for valor, two purple hearts and numerous other awards and decorations for heroism. He is a former Airborne Ranger, and served as an instructor in the elite US Army Rangers. He has a Bachelor's degree from East Central University and a Master of Science degree from Troy University. He also completed post graduate studies at East Central and East Texas Universities.

Lt. Governor Keel formerly served two terms as the President of the National Congress of American Indians, the nation's oldest and largest tribal organization. He was appointed by Senator Harry Reid to serve as a Commissioner on the Tribal Law and Order Commission. He also served as Chair for the Tribal Interior Budget Committee, the Department of Health and Human Services Secretary's Tribal Advisory Committee, the Indian Health Service (IHS) Advisory committee, and the Centers for Disease Control (CDC) Tribal Consultation Advisory Committee.

Lt. Governor Keel also serves on the Board of Regents for Bacone College, East Central University the Foundation Board of Directors, the Self-Governance Advisory Committee, and the National Indian Child Welfare Association Board of Directors.

**Victor Joseph, President/Chairman of the Tanana Chiefs Conference**

Victor Joseph was elected to the position of TCC President/Chairman in March of 2014. Chairman Joseph has worked for TCC for 20 years serving as the TCC Health Director for the past seven. He is a tribal member of the Native Village of Tanana, and is an experienced leader with extensive experience building strong working relationships with tribal leaders, colleagues, staff, funding agencies and corporate beneficiaries.

Chairman Joseph's entire career has been driven by a strong belief that healthy people will lead to empowered people.

**Mike Wiggins, Jr., Bad River Band of Lake Superior Chippewa**

Mike Wiggins Jr. serves as Chairman of the Bad River Band of Lake Superior Chippewa. Raised on the Bad River Reservation, Chairman Wiggins learned how hunting, fishing and harvesting were essential to the Tribe's cultural and spiritual traditions and why the Tribe's ceded territory rights were important to protect for this generation and the next. Chairman Wiggins has been a vocal advocate against mining in Penoque County, Wisconsin, where the Bad River Band is located, citing environmental costs and health risks, as well as loss and contamination to tribal lands and resources.

**Ned Norris, Tohono O'odham Nation**

Chairman Norris began working for the government of the Tohono O'odham Nation in 1978 as a non-attorney tribal judge. He served as a trial judge until 1993. He also served on the school board of the Sunnyside Unified School District in Pima County, Arizona, from 1997 until 2000.

Additionally, Chairman Norris was employed as the director of public relations and marketing for the Tohono O'odham Gaming Authority. He resigned from this position in 2003 when he was elected the Vice Chairman of the Tohono O'odham Nation. He served as Vice-Chairman from 2003 to 2007, when he was elected Chairman.

**Karen Diver, Fond Du Lac Band of Lake Superior Chippewa**

Karen Diver is in her third term as Chairwoman of the Fond du Lac Band of Lake Superior Chippewa. This position serves as chair of the tribal government and CEO of the reservation's corporate boards. The Fond du Lac Reservation is the 2<sup>nd</sup> largest employer in northern Minnesota with over 2,200 employees. She is currently serving as Vice-President of the Minnesota Chippewa Tribe (MCT), comprised of six members Bands, and Chair of its Finance Corporation. Karen is a founder of the American

Indian Supportive Housing Initiative, and serves on the Board of Directors for the Corporation for Supportive Housing (CSH). She has previously represented area tribes on the Indian Health Service Tribal Self-Governance Committee. Karen served for three years as the Director of Special Projects for Fond du Lac and for eleven years as the Executive Director of the YWCA of Duluth. Karen attended Harvard as a 2002 Bush Foundation Leadership Fellow. Karen has extensive board experience in the nonprofit sector including six years on the Minnesota Council of Nonprofits Board of Directors and the Women's Foundation of Minnesota, serving two terms as chair of both boards. Karen was a founding member of American Indian Community Housing Organization, the Duluth Community Action Program, Duluth Family Services Collaborative and the Duluth Human Rights Commission. She has a Bachelors in Economics from the University of Minnesota, Duluth, and a Masters in Public Administration from the Kennedy School of Government at Harvard University.

**Robert Shepard, Chairman, Sisseton Wahpeton Oyate (Dakota Sioux)**

Robert Shepherd is the Tribal Chairman of Sisseton Wahpeton Oyate on the Lake Traverse Reservation near Sisseton, South Dakota. Robert graduated from Tiospa Zina Tribal School and then joined the U.S. Navy and became an honorably discharged combat veteran. Robert holds a Bachelor's Degree from the University of North Dakota and a Master's Degree in Business Administration from the University of Mary. He then working for his Tribal government in Planning and Economic Development. Robert currently holds the positions of Regional Vice-President of NCAI, Co-Chair of the Tribal Interior Budget Council, Vice-President of the Great Plains Chairmans Association and Secretary of United Tribes Technical College.

## EVENT MEMORANDUM FOR THE SECRETARY

### THE NEXT GENERATION: EDUCATION AND SUPPORTING NATIVE YOUTH, TRIBAL NATIONS CONFERENCE, BREAKOUT SESSION

DATE: December 2, 2014  
LOCATION: Capital Hilton, Congressional Room (Capacity 250), Washington, DC  
TIME: 2:00PM – 4:00PM CDT  
FROM: Don Yu (202-821-8591)

#### I. PURPOSE

This is one of two breakout sessions that will be held during the WH Tribal Nations Conference focusing on issues affecting Native youth. The two sessions are identical in scope, will be held on different days and are intended to provide opportunities to tribal leaders to engage federal officials on any Native youth related issues. YOU will co-moderate the December 2 session with Chief Phyllis Anderson of the Mississippi Band of the Choctaw and will be supported by federal officials from across the Administration (WH, ED, DOJ, USDA, DOE and FCC).

#### II. PARTICIPANTS

- Phyllis Anderson, Tribal Chief, Mississippi Band of the Choctaw (co-moderator)
- Roberto Rodriguez, Special Assistant to the President for Education, WH DPC
- Monty Roessel, Director, BIE, DOI
- William Mendoza, Executive Director, WH Initiative on American Indian and Alaskan Native Education, ED
- LaDoris “Dot” Harris, Director, Office of Economic Impact and Diversity, DOE
- Robert Listenbee, Administrator, Office of Juvenile Justice and Delinquency Prevention, DOJ
- Tracy Toulou, Director, Office of Tribal Justice, DOJ
- Joy Silvern, Deputy Chief of Staff to the Secretary, ED
- Irene Flannery, Deputy Chief, Office of Native Affairs and Policy, FCC

#### III. AGENDA

- Introduction and greetings from YOU and Phyllis Anderson (10 mins).
- Introductions and greetings from federal officials (2 mins each).
- Discussion with tribal leaders facilitated by YOU and Phyllis Anderson (90 mins). Federal officials have been directed to be in listening mode, allow tribal leaders to drive the content of the session, and avoid dominating the conversation. Potential topics of discussion include:
  - DOI’s Blueprint for Reform for the Bureau of Indian Education
  - Issues Facing Native Students attending Public Schools
  - Proposed Native Youth Community Projects (ED / DPC place-based initiative)

- Understanding and Addressing Impact of Exposure to Violence on Native Youth
  - Health, Wellness, Food and Nutrition
  - STEM Education: Building a Workforce Pipeline for the 21st Century Economy
- Closing comments from YOU and Phyllis Anderson (10 mins)

#### **IV. KEY FACTS/BACKGROUND/HOT TOPICS**

##### **Mississippi Band of the Choctaw**

- Chief Anderson’s biography is attached below in Section VI. Importantly, she has a good relationship with Senator Thad Cochran (R-MS). Senator Cochran will be the Ranking Member of the Senate Appropriations Committee when the next Congress is seated. In 2014, the Mississippi Band of the Choctaw donated \$5000 to Senator Cochran’s campaign (maximum contribution under campaign law for tribes) and \$63,200 to the National Republican Senatorial Committee. According to Politico, Cochran will “want to find common ground with Democrats on a couple of big spending bills and figure out a way to handle controversial amendments. While he’ll bring a softer tone to the panel compared with its current chair, Democratic Sen. Barbara Mikulski, he’s also no pushover.”
- The Choctaw Indian Reservation consists of 35,000 acres of trust land scattered over seven counties in east central Mississippi. Over 10,000 members of the Mississippi Band of Choctaw Indians live in the eight reservation communities. The Tribe directly operates eight BIE-funded schools, the largest unified reservation school system in the country – six elementary schools, a middle school, and a high school. The Choctaw School System is unique within the BIE-funded system due to its unified governance structure.
- The primary purpose of the Sovereignty in Indian Education (SIE) enhancements is to provide incentives to other tribal nations with BIE-funded schools to adopt a governance structure similar to the Choctaw’s.

##### **Implementation of the BIE Blueprint for Reform**

- A two-page update re: implementing the Blueprint is attached below in Section VI. BIE Director Monty Roessel will participate in the session with you.

##### **ED’s Native Youth Community Partnerships (NYCP)**

- The NYCP initiative is the place-based initiative that Secretary Duncan first raised during the principals meeting re: Native youth in July 2014. ED has designed the proposal and will issue a Notice of Proposed Rule-Making (NPRM) regarding the NYCP in December 2014. ED has begun its outreach and Bill Mendoza and Joy Silvern will likely mention the NPRM during the December 2 breakout session.
- The NYCP is designed to improve college and career readiness for Native youth, recognizing that tribal communities are best positioned to identify the barriers and opportunities for youth as well as the most impactful strategies.

- The NYCP will allow communities to identify in-and-out of school barriers and opportunities for youth, and design strategies to improve outcomes.
- The grants will support a coordinated and focused intervention strategy chosen by a community partnership that includes a tribe, local schools (public or BIE), and other optional service providers or organizations.
- Applicants would need to conduct a local assessment of pre-existing efforts, barriers, and opportunities related to student success; select one or more barriers or opportunities as the project focus; plan strategies to address the focus, with clear and measurable objectives; and enter a partnership agreement designed to achieve objectives.

### **DOJ's Taskforce Report on American Indian and Alaska Native Children Exposed to Violence**

- At last year's WH Tribal Nations Conference, Attorney General Eric Holder announced the creation of the Attorney General's Task Force on American Indian and Alaska Native Children Exposed to Violence. This Task Force published its findings and recommendations in a report published in November 2014.
- Major recommendations contained in the Report that involve DOI include that:
  - Leaders at the highest levels of the executive and legislative branches of the federal government should coordinate and implement the recommendations in this report consistent with three core principles—Empowering Tribes, Removing Barriers, and Providing Resources—identified by the Advisory Committee.
  - WH should establish—no later than May 2015—a permanent fully-staffed Native American Affairs Office within the WH DPC. This new Native American Affairs Office should include a senior position specializing in AI/AN children exposed to violence. This office should be responsible for coordination across the executive branch of all services provided for the benefit and protection of AI/AN children and the office lead should report directly to the Director of the DPC as a Special Assistant to the President. The Native American Affairs Office should have overall executive branch responsibility for coordinating and implementing the recommendations in this report including conducting annual tribal consultations.
  - Congress should restore the inherent authority of American Indian and Alaska Native (AI/AN) tribes to assert full criminal jurisdiction over all persons who commit crimes against AI/AN children in Indian country.
  - DOJ and DOI should, within one year, conduct tribal consultations to determine the feasibility of implementing Indian Law and Order Commission (ILOC) Recommendation 3.8, to consolidate all DOI tribal criminal justice programs and all DOJ Indian country programs and services into a single “Indian country component” in the DOJ, then report to the President and AI/AN Nations on how tribes want to move forward.
  - The Secretaries of Interior and Health and Human Services should compel BIA and Administration for Children and Families (ACF) to work together collaboratively to collect data regarding compliance with Indian Child Welfare Act in state court systems.

- BIA, the ACF in HHS, and tribes, within one year of the publication of this report, should develop and submit a written plan to the WH DPC, to work collaboratively and efficiently to provide trauma-informed, culturally appropriate tribal child welfare services in Indian country.
- Congress should direct DOJ and DOI to determine which agency should provide funding for both the construction and operation of jails and juvenile detention facilities in AI/AN communities, require consultation with tribes concerning selection process, ensure the trust responsibilities for these facilities and services are assured, and appropriate the necessary funds.

## V. TALKING POINTS

- **Acknowledgments:**

- Phyllis Anderson, Chief of the Mississippi Band of the Choctaw
  - I visited Mississippi Band of Choctaw in October. Chief Anderson is doing a tremendous job there for children attending the Choctaw's federally funded schools. In our opinion, the Choctaw School System is a model for others to follow. Monty Roessel, the Director of the BIE, was so impressed that he provided funding to five other tribes to replicate the Choctaw School System.
- YOUR federal colleagues from WH DPC, ED, DOJ, DOE and FCC.
- President Obama is committed to working with Indian Country to promote strong, prosperous and resilient communities. Under his Administration, our **North Star has been self-determination and self-governance** for tribal nations. The Obama Administration will leave Indian Country in a better place than where we found it, but we still have so much work to do.
- As chair of the White House Council on Native American Affairs, working to improve **interagency coordination and efficiency** across the federal government.
- Ensuring that Native youth receive the comprehensive supports they need are top priorities for the Council and is of paramount concern to tribal leaders and to this Administration.
  - Today, you have leaders across the Administration here to listen to your concerns and discuss how we can all partner with one another to ensure that your children receive the services they need to be successful.
  - There is some great work underway. Today, you'll hear from officials who are leading our efforts to improve education for Native youth at public schools and BIE-funded schools; protect Native youth from exposure to violence; and ensure that they receive comprehensive supports and wraparound services.

- This is some of the work that I'd like to highlight for you today, but let me be clear – we're going to take a back seat today. This is your opportunity to raise the issues you'd like to discuss and for us to listen and to learn.

## **VI. ATTACHMENTS**

- Q & A – Education *[below]*
- Biographies *[below]*
- Update re: Implementation of BIE Blueprint for Reform *[separate attachment]*

## Q & A's – Topline Education

- 1. What is the federal government doing to ensure American Indian students receive a high-quality education that honors their cultures, their languages, and identities as Indian people?**

We are working together across the federal government to revitalize Indian Education. Through these efforts, we conducted significant consultation and listening sessions to hear from you how we can best do that with respect for and in line with the traditions and cultures of American Indian and Alaska Native people.

We are doing this through Secretarial Order 3334, Presidential Executive Order 13592- White House Initiative on American Indian and Alaska Native Education, intense focus and support for culture, language and tribal self-determination.

- 2. Why does the President support Native Youth in the rollout, but his budget doesn't reflect this commitment in terms of investments in BIE school infrastructure?**

We have a huge problem on our hands. As identified in various reports, the price tag to bring all BIE-funded schools into good condition is well over \$1 billion dollars. Some of these schools are not safe and cannot meet the demands of 21<sup>st</sup> century teaching and learning. In spite of this tremendous need, since 2011, Congress has cut discretionary funding that provides critical services to tribes. DOI and the whole Federal Government are working to balance priorities across its mission in this very challenging budget climate. The need for greater funding for BIE schools highlights why Congress needs to work with the Administration to replace sequestration with balanced deficit reduction. It's important that we not promise what we cannot deliver on; however, we will do whatever we can administratively, work across the Administration, the Hill and with tribal leaders to see what we can do to make a real difference for Indian children attending these schools.

- 3. The GAO report states that BIE schools operated by tribes have been mispending funding and even losing track of large amounts of cash to overseas accounts. How are you addressing this and at the same time looking to provide more investments to help Native American Youth?**

DOI agrees with nearly all the GAO's recommendations – in fact, many of the fiscal issues raised in the recent GAO report were already identified by the BIE Study Group convened by Secretaries Jewell and Duncan. In response to the Study Group's Blueprint, Secretary Jewell directed Indian Affairs to restructure in a way that would address many of the issues raised by the GAO report. For example, DOI is strengthening its School Operations Division to ensure that BIE staff is well trained to ensure compliance with annual audit requirements at its schools. In turn, Indian Affairs will provide the BIE and the BIA with overall guidance and direction and ultimately hold both Bureaus accountable for programs to ensure there is a greater focus on fiscal monitoring and accountability. This work will include ensuring that both Bureaus have an adequate number of staff with the requisite knowledge and skills to effectively oversee expenditures.

**4. If BIE schools do better with student scores than BIE schools operated by tribes in the BIE Blueprint, doesn't that contradict what your report says as far as tribes performing functions better and thus we should give them more control?**

No, not at all. With sufficient resources and support, tribal nations do a better job of operating their own local governments. This has proven to be in the case in other areas of government, and we believe the same will hold true with education. However, importantly, the federal government hasn't provided tribes with the resources and support they need to be successful; for instance, many school facilities are in poor condition and lack broadband success. Further, in previous fiscal years, we have only provided tribally controlled grant schools with two-thirds of their contract support costs, forcing schools to cut back on desperately need administrative support. Finally, many grant schools aren't truly tribally controlled; we believe once tribal governments are fully engaged in overseeing their own schools, this partnership will lead to improvements in student achievement.

**5. What is the DOI doing to recruit and retain highly qualified teachers and principals?**

We know that effective and qualified teachers are vital to providing quality education. In light of this, we are establishing a position of Recruiter within the BIE and refining HR's ability to identify effective teachers and principals. We are also working to provide high-quality professional development for our existing teachers we already have working in BIE schools and grant schools.

**6. What is the DOI-BIE doing to support and empower teachers to refine their knowledge and skills through professional development?**

BIE is working to partner with the National Board for Professional Teaching Standards (NBPTS) so we can encourage and provide all BIE teachers with the opportunity to attain their National Board Certification. We've awarded an initial contract to NBPTS and hope to begin our work with them soon. We hope to build a network of mentors and instructional coaches through highly effective teachers.

**7. What is being done at the federal level to promote tribal control and sovereignty as it relates to Indian education?**

On July 23, BIE announced that it would be providing enhancement funding to build the capacity of tribal nations (as opposed to locally controlled school boards) to operate BIE-funded schools located on their reservations. The purpose of the Sovereignty in Indian Education enhancement funding is to support tribal capacity to fully manage and operate tribally controlled, BIE-funded schools in their communities. Enhancement funding will support development of a tribal school reform plan with the goals of improved educational outcomes for students and improved efficiencies and effectiveness in operating schools. Just last week, we announced that six tribal nations will receive enhancement funding for planning purposes during Year One.

**8. What will it take to transform the BIE and Indian Education into a world-class education system?**

Answer: In order to achieve the Administration's goal of ensuring a world-class education for all BIE students, the Blueprint for Reform calls for fundamental reforms in five areas: (1) Educational Self-Determination for Tribal Nations; (2) Highly Effective Teachers and Principals; (3) Agile Organizational Environment; (4) Comprehensive Supports through Partnerships; and (5) Budget Aligned to Support Priorities. To achieve these goals, it will require a collaborative and cooperative effort between BIE, DOE and the tribes with a shared commitment to do whatever it takes to provide American Indian students the best education opportunities.

**9. What is the status of a new Johnson O'Malley (JOM) count?**

Answer: A Dear Tribal Leader letter was sent out and school superintendents were notified of a new count that is currently being done. The BIE has established a JOM position to work specifically with this program.

## **Biographies of Panelists**

### **Phyllis Anderson, Tribal Chief, Mississippi Band of the Choctaw**

- Phyllis Anderson serves as the Tribal Chief of the Mississippi Band of Choctaw Indians. Chief Anderson was officially sworn in as the first woman chief in Choctaw history during an inauguration ceremony on October 4, 2011. Chief Anderson, fluent in the Choctaw language, has more than 26 years of experience with tribal government management, including eight years as tribal council representative and four years as Secretary-Treasurer of the Tribe. She is committed to building tribal financial stability; operating an accountable, responsible and transparent government; and building the quality of life on the reservation. Chief Anderson is married to Ricky Anderson, Sr., and is mother to three, stepmother to four, and grandmother to four.

### **Roberto Rodriguez, Special Assistant to the President for Education, WH DPC**

- Roberto J. Rodríguez serves in the White House Domestic Policy Council as Special Assistant to the President for Education. Previously, Rodríguez was Chief Education Counsel to United States Senator Edward M. Kennedy (D-MA), Chairman of the Health, Education, Labor and Pensions (HELP) Committee. In this capacity, he managed the Democratic education agenda for the Committee and led policy development and strategy for legislation addressing early childhood education, elementary and secondary education, higher education, and adult education. Rodríguez began his tenure on Capitol Hill working for the Senate HELP Committee on the development of the No Child Left Behind Act. He has worked on various reauthorizations of federal legislation, including the Elementary and Secondary Education Act, the Individuals with Disabilities Education Act, Head Start, Child Care, Higher Education, and the America COMPETES Act. Prior to working on Capitol Hill, Rodríguez worked as Senior Education Specialist at the National Council of La Raza, where he conducted research and analysis of federal and state education reform issues, as well as the development and evaluation of community-based education programs. He is a graduate of the University of Michigan and of the Harvard Graduate School of Education in Cambridge, Massachusetts.

### **William Mendoza, Executive Director, WH Initiative on American Indian and Alaskan Native Education, ED**

- William (Bill) Mendoza was appointed as Executive Director of the White House Initiative on American Indian and Alaska Native Education in December 2011. Bill, Oglala-Sicangu Lakota, grew up on the Pine Ridge and Rosebud Sioux reservations in South Dakota. Bill has experienced, firsthand, through his professional and personal experiences, the multitude of challenges facing American Indian students, educators, and tribes. In addition to being a teacher and principal, Bill has worked at the school, professional and community level to help foster leadership development and civic engagement among American Indians. Integral to his professional and academic capacity have been his experiences as a tribal college student at Haskell Indian Nations University, Sinte Gleska University, and Oglala Lakota College. Bill previously served as the Deputy Director and Executive Director for the White House Initiative on Tribal Colleges. Since

his appointment in January 2011, he has provided leadership to key administration initiatives including: Executive Order 13592, Tribal Leaders Speak – The State of Indian Education 2010 Report; State-Tribal Education Partnership Pilot; and 2012 ED-DOI Memorandum of Understanding. Before coming to Washington, DC, Bill was working towards a Doctorate in Education Leadership at Montana State University (MSU). He earned his Bachelor of Arts in Humanities from Fort Lewis College in 2005 and a Master of Education from MSU in 2010.

**Tracy Toulou, Director, Office of Tribal Justice, DOJ**

- Tracy Toulou is the Director of the Office of Tribal Justice (OTJ) at the Department of Justice. OTJ is the primary point of contact for the Department of Justice's government-to-government relationship with Indian tribes. The Office also serves as a source of Indian law expertise for the Department. Prior to his current position, Mr. Toulou served as an Assistant U.S. Attorney for the District of Montana where his duties included tribal outreach and the prosecution of violent crime in Indian country. He began his career with the Department as an attorney in the Criminal Division. Mr. Toulou attended law school at the University of New Mexico, during which time he had the opportunity to clerk for DNA Legal Services on the Navajo Nation and for the Laguna Pueblo Tribal Court. Before attending law school Mr. Toulou worked for the U.S. Agency for International Development and the U.S. Peace Corps in Africa, Central America and the Caribbean. He is a descendant of the Colville Confederated Tribes located in Washington State.

**LaDoris “Dot” Harris, Director, Office of Economic Impact and Diversity, DOE**

- LaDoris “Dot” Harris brings over 30 years of management and leadership experience as the Director of the Office of Economic Impact and Diversity at the U.S. Department of Energy (DOE). She ensures that minorities and historically underrepresented communities are afforded opportunities to fully participate in the Department’s programs. Nominated by President Obama and confirmed by the U.S. Senate on March 29, 2012, Director Harris serves in an Assistant Secretary level position at the Department of Energy. She leads the agency’s offices of Minority Economic Impact, Minority Education and Community Development, Minority Business and Economic Development, Diversity and Inclusion, and Civil Rights. Director Harris also leads the Department’s Minorities in Energy Initiative, serves on the White House Council on Women and Girls, oversees a corporate funding strategy for minority institutions, works closely to develop minority business contracting opportunities at the Department, and protects the civil rights of employees and recipients of multi-billion dollar funding from DOE. Prior to her appointment, Director Harris was co-founder, President and CEO of Jabo Industries, LLC, a successful minority-woman owned management consulting firm concentrated primarily in the energy, information technology and healthcare industries.

**Robert Listenbee, Administrator, Office of Juvenile Justice and Delinquency Prevention**

- Robert L. Listenbee serves as the Administrator of the Office of Juvenile Justice and Delinquency Prevention. He was appointed to the position by President Obama in

February 2013, and was sworn in to the position on March 25, 2013. Mr. Listenbee played a central role in the Attorney General's Defending Childhood Initiative. As co-chair of the National Task Force on Children Exposed to Violence, he was instrumental in the development of recommendations for launching a coordinated national response to address children's exposure to violence. He also served as a member of the Federal Advisory Committee on Juvenile Justice, which advises the President and Congress on juvenile justice policy. The committee is administered by OJJDP. Before his appointment to OJJDP, Mr. Listenbee was Chief of the Juvenile Unit of the Defender Association of Philadelphia for 16 years and was a trial lawyer with the association for 27 years. In this capacity, he created a specialized unit to deal with juvenile sexual assault cases and was instrumental in developing three specialty court programs that divert youth from juvenile justice system and reduce their risk of residential placement.

**Joy Silvern, Deputy Chief of Staff to the Secretary, ED**

- Joy serves as the Deputy Chief of Staff for Operations and advises Secretary Duncan on strategic communications and policy; serves as primary liaison with the White House on agency activities; and coordinates American Indian policy initiatives across the Department from the Secretary's Office. She was instrumental in designing the Administration's new place-based initiative, and Native Youth Community Partnerships. Prior to joining the Administration, Joy served as education advisor to Senator Michael Bennet (D-CO).

**Irene Flannery, Deputy Chief, Office of Native Affairs and Policy, FCC**

- Ms. Flannery assists in managing FCC's efforts to develop and drive FCC's agenda to create regulations and policies promoting the deployment of broadband and communications technologies in tribal nations and Native communities. She was previously Deputy Chief of the Wireline Competition Bureau's Telecommunications Access Policy Division (TAPD), the division responsible for universal service matters. She managed the Low Income Program (Lifeline and Link Up), Eligible Telecommunications Carrier designations and Tribal related matters. Formerly, Flannery was Vice-President of the High Cost and Low Income Division at the Universal Service Administrative Company. She has also served in other senior management positions at the FCC, as Chief of TAPD and Associate Chief of the Enforcement Bureau's Investigations and Hearings Division. Flannery is a graduate of Duke University, the University of Virginia, and Georgetown University Law Center.

## Additional Background Information

### **BIE Reform Accomplishments**

In partnership with tribal nations, the Administration has identified and promoted critical reforms that will prepare American Indian students attending schools funded by the Bureau of Indian Education (BIE) for success in the 21st century. On June 13, 2014, a Study Group convened by the Secretaries of the Interior and Education released a “Blueprint for Reform,” a comprehensive plan to redesign the BIE to achieve one overarching goal: for tribes to deliver a world-class education to all students attending BIE-funded schools.

The Administration then took immediate action on several of the Blueprint’s key recommendations, including:

- ***Implementing the Secretarial Order to transform the BIE.*** The Order aimed to transform the BIE from a direct operator of schools into a school improvement organization. Signed on June 12, 2014, once fully implemented, the order will promote tribal control of schools and ensure that tribally controlled schools receive the resources and support they need in order to be successful. Since the signing of the Secretarial Order, Indian Affairs has:
  - Developed draft functional analyses and workforce plans;
  - Prepared a draft and preliminary design for BIE’s reformed School Operations Division which will address concerns raised by tribal leaders and other BIE stakeholders regarding poor operational and administrative supports provided to schools;
  - Taken steps to reduce reporting burdens on schools and make the reporting structure more efficient and effective; and
  - Developed a draft plan that would ensure support services are moved closer to schools to provide better services.
- ***Awarded Sovereignty in Indian Education Grants.*** On October 23, 2014, Sovereignty in Indian Education (SIE) enhancements were awarded to six tribes (Standing Rock Sioux Tribe, Tohono O’odham Nation, Turtle Mountain Band of Chippewa, Navajo Nation, Gila River Indian Community, Oglala Sioux). These tribes each received award amounts of \$200,000 to research, assess and develop an implementation plan to establish a tribally managed school system. Tribes will conduct a comprehensive analysis and complete an aligned implementation plan of their tribal education departments and school systems in four areas of school reform: Finance, Academics, Governance, and Human Resources. These funds respond to recommendations to increase tribal control over BIE schools. Initial training was completed on November 14, 2014. The tribes will work together and share best practices and challenges. A webinar was held to provide technical assistance to the tribes and BIE employees, and others are being planned. Topics for the trainings include governing authority of tribes versus not-for-profit organizations, alternative definitions of Adequate Yearly Progress (AYP), 21st century HR functions, and overview of BIE funding to schools.
- ***Held workshops to provide customized technical assistance.*** This technical assistance helps develop the schools’ educational leadership skills, and delivering

resources informed by best practices in student supports, instruction, financial management, organizational management, and teacher training, recruitment, and retention. These meetings included:

- In September 2014, education consultants provided initial training for all BIE-funded Principals and ERC staff on school improvement and school turnaround
- BIE hired a Director of Communications who will coordinate all communications within BIE and facilitate the transfer of best practices amongst schools.

- ***Visited tribal governments and BIE schools to learn and share best practices and continue dialogue.*** Secretary Jewell and other senior officials have visited seven schools, including: Pine Hill, Choctaw School System, Bug-O-Nay-Ge-Shig and Beatrice Rafferty. These visits have raised national awareness for the issues faced at BIE schools. Additionally, senior leadership has continued its dialogue with tribal leaders and other BIE stakeholders during past five months, including sessions held in Montana, South Dakota and Arizona. Finally, BIE has participated in two webinars hosted by the National Indian Education Association regarding implementation of the Blueprint. A third webinar has been scheduled for December.

- ***Prioritized Right of Way Permits.*** DOI issued a directive that prioritizes right of way permits for broadband reaching BIE schools for the next two years. [Note: This may happen just before TNC, if not, we should move this to “Next Steps” (below)]

- ***Increased Connectivity at BIE Dorms.*** DOI announced a project to bring connectivity to more than 1,000 Native children who live in federally-funded dormitories while attending public schools outside of their reservation. These dorms have historically been burdened with limited and aged technology. Verizon, working with Alcatel-Lucent and Cross Wireless, has begun the process of wiring all 10 dorms with wireless broadband connectivity. Teams have assessed the needs at each of the sites; and designs and specifications for construction activities are being readied.

- ***Created college readiness program for BIE students.*** Identified 20 tribal colleges and universities (TCUs) to create or expand bridge programs for BIE students. Each TCU will receive \$50k to help increase the number of low-income students who are prepared to enter and succeed in postsecondary education.

- ***Issued School Funding Guidance.*** On October 31, 2014, in response to questions from principals and school board members at BIE-funded schools regarding restrictions on the use of federal education funds, ED issued spending guidance to tribally-controlled grant schools that provided technical assistance to grant schools about how funds may be spent and outlined ways to maximize the effectiveness of certain grants by identifying resources and flexibilities.

- ***Held a Native Language Summit.*** In November 2014, BIE held a second Native Language Summit for BIE-funded schools. Schools and tribes came together to draft a policy statement requesting BIE to assist in providing Native language guidance to all BIE-funded schools. The draft language policy is currently being distributed to participants for comment and edits.

## BIE Reform Next Steps

- ***DOI will appoint a Chief Schools Technology Officer.*** This Officer will provide technical assistance to increase the competitiveness of E-Rate applications from BIE-funded schools, advocate for BIE's educational technology needs, and ensure, to the greatest extent possible, that BIE has access to other broadband programs at other federal agencies.

- ***Partner with the National Board for Professional Teaching Standards to support teachers at BIE-funded schools interested in obtaining National Board Certification (NBC).*** BIE will pay for NBC training for any teacher interested in pursuing their NBC certification. Obtaining this certification is a rigorous, peer-reviewed process that provides high-quality professional development to teachers and ensures they have the skills necessary to improve student achievement. Nationally Board Certified teachers often extend their impact in a role as instructional leaders in their schools and communities so they can provide the support and resources necessary to help colleagues in their schools improve. Work on the first component of this partnership begins January 1, 2015.

- ***Broadband Service.*** Once the BIE dorms have Internet connectivity, Verizon and Microsoft will also provide broadband service at no cost for up to two years. The companies will also provide each student with a wireless device like a laptop or tablet, to ensure that learning does not stop at the classroom door. We anticipate all wireless network enhancements to be complete and the tablets to be distributed to students during 2015.

- ***Train the Trainers.*** In January, BIE employees, who staff BIE's Education Resource Centers (ERCs), will be trained for six months. These ERC staff members will form the core of the BIE's new School Support Solutions Teams.

- ***School Facility Improvements.*** BIE is updating the School Construction Prioritization Listing, which will identify the schools, in priority order, in need of modernization/new construction. Tribes collaborated on the development of the ranking criteria. Further, BIE is developing a six year plan that will provide a recommended funding schedule to raise the facility condition standard of all schools to the "good" condition level. When completed, tribal consultations will begin to assure the views of tribes are considered in the final plans.

- ***Support tribes in meeting key priorities with carryover spending flexibility.*** ED recently released guidance on allowable use of funds to help tribes identify opportunities to address key priorities with existing funds. DOI and ED are scheduling webinars to provide technical assistance regarding this spending guidance. As a follow up to those webinars, ED and DOI will gauge whether demand exists for increased flexibility regarding spending of carryover funds. If demand exists, ED and DOI will work with those schools seeking additional flexibility and may issue limited waivers on a case-by-case basis if certain criteria are met.

- ***ED and DOI will issue a revised set of legislative amendments.*** DOI and ED have been discussing potential legislative amendments to statutes that affect American Indian students, including those attending BIE-funded schools. These proposed amendments would likely streamline the funding relationship between ED and DOI and

more ambitious and comprehensive than the original set of “technical” amendments that DOI prepared and then sent to OMB LRM.

November 28, 2014

## **INFORMATION MEMORANDUM FOR THE SECRETARY**

**FROM:** Sarah Harris, Chief of Staff

**SUBJECT:** Memorandum of Understanding between White House, Department of Interior and Center for Native American Youth

### **I. INTRODUCTION**

Following the President's visit to Standing Rock Sioux in June, the President directed his Senior Advisors to develop and execute a strategy to improve the lives and opportunities for Native youth. At the White House Tribal Nations Conference (TNC) the President will announce a new Native youth initiative that the White House (WH) has dubbed Generation Indigenous (Gen I, for short). The goal of the Gen I initiative is to find solutions to change the conditions of Native youth so that they have the opportunity to succeed. Gen I takes a multi-prong approach (briefly discussed below), which includes a Memorandum of Understanding (MOU) between The White House, the Department of Interior (DOI) and the Aspen Institute's Center for Native American Youth (CNAY) (background paper on CNAY attached).

Pursuant to the MOU, the WH, DOI and CNAY would jointly launch a national network of American Indian and Alaska Native youth. The WH and CNAY anticipate working with DOI to support leadership development, provide peer support through an interactive online portal that link resources and tools, and empower youth to become leaders within their communities. It is also anticipated that DOI, in close collaboration with CNAY, will expand federal outreach on youth internships and employment opportunities across the federal agencies.

### **II. BACKGROUND**

#### **Generation Indigenous Initiative**

The White House has shared the following details regarding the components of the Gen I initiative that will be announced at TNC. The launch of the President's Gen I includes the following new actions:

- The Department of Education will administer the Native Youth Community Projects, which will provide funding for a demonstration program in a select number of Native communities (this would be similar to a "place based" initiative). The money will fund culturally relevant strategies designed to improve the college-and-career readiness of children and youth in Native American communities. The White House will release a report on Native youth that will be a call-to-action and will highlight both the challenges facing Native youth and provide recommendations for a path forward;
- The Cabinet will embark on a listening tour to engage directly with Native youth and tribal leaders in order to bolster federal policies to improve youth outcomes;

- The White House will launch a new National Tribal Youth Network (Network) created in partnership with the Aspen Institute’s Center for Native American Youth (CNAY). Gen I will support leadership development, provide peer support through an interactive online portal that link resources and tools, and empower youth to become leaders within their communities. Gen I will include the following outreach and initiatives: Expand federal outreach on youth internships and employment opportunities across the federal agencies; and
- The White House designated 37 White House Youth Ambassadors to join the Tribal Nations Conference and participate in leadership development programming to help launch the national network.

At this time, WH has not provided additional information on Gen I but we have requested and will share any additional information when it is made available to us.

### **MOU between WH, DOI and CNAY launching the National Tribal Youth Network**

As mentioned above, the President charged his Senior Advisors with developing and executing a strategy to improve the lives and opportunities for Native youth. One proposed strategy was the development of the Network, also mentioned above. The WH identified CNAY as the non-profit partner to spearhead the Network and drafted an MOU identifying a non-binding partnership between WH, DOI and CNAY. Initially, we understood DOI’s role under the MOU to be limited to facilitating the MOU itself. However, the current draft of the MOU assigns DOI a much more substantive role by providing that DOI will work with CNAY (with “advisory support” from WH) to launch and run the Network.

Discussions between WH, DOI and CNAY indicate that DOI and CNAY must hammer out details governing the working relationship between and respective responsibilities of DOI and CNAY outside of the MOU. That said, it seems that the Network will build upon CNAY’s current work and, in theory, DOI will assist CNAY in scaling up programs they already successfully operate.

The MOU will be signed by WH and DOI. The WH has yet to identify who will sign on behalf of WH. Consequently, it is unclear whether ASIA will be asked to sign on behalf of DOI (initially this option was identified as preferable) or if YOU will be asked to sign. Regardless, the MOU is making its way through the surname process and will be ready for signature by Monday, December 1.

### **National Tribal Youth Network**

CNAY has developed a draft concept paper (attached) that provides a rough sketch of the Network. CNAY envisions that the Native youth engagement strategy will (1) ensure Native American youth have new access to resources and support that help them succeed and (2) inform national decision-makers and compel their prioritization of Native youth, whose lives are deeply impacted by federal policy and programs. The goal of the National Native Youth Network is to help the youngest First Americans reach their full potential by: 1) Building a platform to voice youth challenges and successes, 2) Increasing Native youth access to educational and economic resources and opportunities, including scholarships, training, mentors, and support; and 3) Connecting Native youth with each other in a leadership

network. It is important to note that Aspen Institute's President and CEO, Walter Isaacson, intends to launch a major fundraising campaign in support of the Network.

Center for Native American Youth  
National Native Network Overview  
Memorandum of Understanding

## **Attachment 1**

### **Center for Native American Youth**

CNAY is dedicated to improving the health, safety and overall well-being of Native American youth through communication, policy development and advocacy. Founded by former US Senator Byron Dorgan, CNAY is a policy program within the Aspen Institute, headquartered in Washington, DC. While a part of the Aspen Institute, CNAY is also overseen by a Board of Advisors. The goal of CNAY is to bring greater national attention to the issues facing Native American youth and to foster solutions, with special emphasis on youth suicide prevention.

The Center for Native American Youth fulfills its mission through four priority strategies: youth inspiration, advocacy, policy change, and serving as a resource platform. In order to address the needs and improve the social and physical well-being of Native youth CNAY aspires to develop meaningful partnerships with tribal governments and organizations. CNAY focuses its work on four key areas: 1) Youth Inspiration, 2) Advocacy, 3) Policy Change and 4) Resource Platform.

CNAY's cornerstone program is the Champions for Change initiative, falls within the first key issue area "Youth Inspiration." The Champions of Change initiative is aimed at recognizing and encouraging Native American youth (ages 14 to 24) working in their tribal or urban Indian communities to make a positive impact. Champions are individuals who initiate programs, events, or other efforts to improve the lives of fellow Native youth and Indian Country. By enabling them to tell their stories on the national level, they provide their peers with positive examples of embracing life and pursuing opportunities. Champions for Change youth leaders are exposed to leadership development opportunities, participate in CNAY's Youth Advisory Board, and become engaged in other significant national events, like the White House Tribal Nations' Conference, to share their message of positive change and hope.

CNAY has an outstanding reputation in Indian country is widely viewed as being the most successful program currently working with Native youth. This is in no small part due to CNAY's stellar Executive Director Erin Bailey, who is well known in Indian Country for her dedication to Indian youth and her tireless efforts on their behalf. CNAY also has a Board of Advisors which includes prominent political figures, journalists, entrepreneurs, athletes, and Native American leaders and advocates, as well as three Native youth. A few of the notable Board Members include former Senator Byron Dorgan, former Senator Tom Daschle, Senator Lisa Murkowski, Senator Gordon H. Smith, Chairman of the Swinomish Tribal Community and President of the National Congress of American Indians Brian Cladoosby and Tom Brokaw.

CENTER FOR NATIVE  
AMERICAN YOUTH  
AT THE ASPEN INSTITUTE

THE ASPEN INSTITUTE

### National Native Youth Network Overview

The White House and Center for Native American Youth at the Aspen Institute (CNAY) are partnering to launch a National Native Youth Network (NNYN) and engagement strategy. CNAY and the NNYN will provide a sustainable platform to engage and provide educational and economic opportunities to Native American youth across the United States. Resources will include support for educational scholarships, entrepreneurship training, and mentors, and create a platform to integrate Native youth voices into the national dialogue.

President Obama has made Indian affairs and investing in the lives of Native American youth a priority for his Administration. After a visit to the Standing Rock Sioux Tribe in June 2014, that commitment was further emphasized. The President and First Lady are dedicated to improving the lives of Native American youth, and to using their influence to raise awareness of Indian Country and advance efforts to improve the lives of Native children.

The Native youth engagement strategy will (1) ensure Native American youth have new access to resources and support that help them succeed and (2) inform national decision-makers and compel their prioritization of Native youth, whose lives are deeply impacted by federal policy and programs.

**Goal:** The goal of the National Native Youth Network is to help the youngest First Americans reach their full potential by:

- 1) Building a platform to voice youth challenges and successes,
- 2) Increasing Native youth access to educational and economic resources and opportunities, including scholarships, training, mentors, and support; and
- 3) Connecting Native youth with each other in a leadership network.

The Network's goal will be announced by the White House in December 2014, followed by an official launch with funding commitments in February 2015. This will include a high-level briefing at the White House with donors and other partners.

**Invitation:** CNAY is seeking partners and financial support to create and build this new effort. The impact of this network will require collaboration across the many organizations and community programs that currently work to serve Native American youth. Further, capacity is needed on a national level to manage the network and more importantly, to build out the resources for youth programs and services. Below is an outline of the projects associated with the National Native Youth Network.

**Partners:** Funding partners of the National Native Youth Network will be invited to participate in the development of the NNYN by serving on a Donor Advisory Committee that meets semiannually to review outcomes and strategically plan future components of the initiative in a way that aligns with the Committee's goals. Donors will be listed in communication and outreach materials and in branding at events. Further, for top educational and leadership scholarship donors, naming opportunities will be considered.

**Target Population:** CNAY's work and focus of the NNYN will be on the 2.1 million Native youth under the age of 24 currently living on reservations or in urban settings within the United States. The target audience is middle school, high school, and college students. Centuries of failed policies, chronic underfunding, and intergenerational trauma have led to intolerable inequities in health, high rates of poverty, and other sub-standard life conditions that impact Native youth's likelihood of achieving their full potential. Native American youth are the most at-risk population in our nation and face serious disparities in a number of areas, including high school graduation rates hovering around 50%; one-third of Native youth being obese at four years of age; and Native youth being arrested at three times the national average. Tragically Native youth experience the highest rate of suicide of any group in the US – reaching 3.5 times the national average in recent years and even higher in some tribal communities.

**Funding:** The total estimate of funding needed is \$4,825,000 over the next 5 years.

**Details:** The National Native Youth Network involves two major components to support and encourage Native American youth – *Native Youth Engagement* and *Resources for Success*.

#### ***NATIVE YOUTH ENGAGEMENT.***

With financial support, the NNYN will designate Native youth as Ambassadors and expose these youth to a myriad of experiences, connections, and opportunities that foster leadership development. The NNYN will also facilitate exchange of scalable solutions to address Native youth challenges and successes. These activities will include deliberate collaboration and a national conference. **CNAY seeks financial support to help develop and invest in educational outreach, youth network infrastructure and youth ambassador toolkits, regional symposiums, a national conference, and youth travel scholarships.**

#### ***RESOURCES FOR SUCCESS.***

In addition to building a network of connections, the network will expand resources available to the Native youth improving lives in Indian Country. Like all leaders, those creating positive change require encouragement, guidance, and access to support and leadership development resources. CNAY will work as a resource platform to disseminate available funding for services and programming for educational scholarships, entrepreneurship and job training and economic development programs, and for additional resources to support Native youth across Indian Country. **CNAY seeks financial support to help develop and invest in grants for entrepreneurship efforts, education scholarships, and technical assistance.**

**Impact:** The National Native Youth Network (NNYN) will change the lives of youth participants, creating a network of influential young Native leaders, and will raise national awareness of Native American youth, their communities, and all of Indian Country. The NNYN

does not seek to replace direct service, on-the-ground efforts, but rather give those programs access to additional support and resources.

## **Attachment 3**

### **I. MEMORANDUM OF UNDERSTANDING**

This MEMORANDUM OF UNDERSTANDING (“MOU”) is entered into by and between the U.S. Department of the Interior (“DOI”), the Center for Native American Youth (“CNAY”), a program within the Aspen Institute, a non-profit 501(c)(3) corporation, and the White House (collectively the “Parties”), and constitutes a non-binding expression of intent between the Parties in connection with the National Tribal Youth Network (“Network”), a program that will be launched by DOI and CNAY, with advisory support from the White House.

#### **I. BACKGROUND**

WHEREAS, the White House is announcing a Presidential Initiative to support American Indian and Alaska Native (“AI/AN”) youth that focuses on improving life outcomes through cradle-to-career strategies, building ladders of opportunity, and elevating youth voices;

WHEREAS, the Network will be a nationwide engagement mechanism aimed at enhancing opportunity for AI/AN youth, including through creation of an online information portal, a social media strategy, and a series of associated tribal youth events; and

WHEREAS, the Network will provide AI/AN youth with information and tools to support their achievement and increase opportunities for their success.

NOW, THEREFORE, the Parties agree as follows:

#### **II. STATEMENT OF PURPOSE**

The Parties enter into this MOU for the purposes of:

- (a) acknowledging that the Parties share a mutual interest in supporting opportunity for AI/AN youth and strengthening their path to success;
- (b) establishing that the Parties intend to promote these interests by collaboratively building the Network because their combined efforts, knowledge, and resources can better help them to achieve their common goals; and
- (c) defining the Parties’ roles and responsibilities in connection with establishing the Network.

#### **III. AUTHORITY**

Each Party represents that it has the requisite legal authority to enter into this MOU. For its part, DOI enters into the MOU pursuant to the Snyder Act, 25 U.S.C. § 13.

## **IV. DEFINITIONS**

As used in this MOU, the following terms have the meanings set forth below.

1. “CNAY” means the Center for Native American Youth, a program within the Aspen Institute, a non-profit 501(c)(3) corporation.
2. “DOI” means the U.S. Department of the Interior.
3. “Federal Partners” means the White House and DOI, individually and collectively.
4. “Network” means the National Tribal Youth Network, a project established by DOI and CNAY, with advisory support provided by the White House, and designed to support opportunity for AI/AN youth and pathways to success. This will include:
  - Native youth engagement, elevate youth voices and priorities, and develop resources for success.
5. “Non-Federal Partner” means CNAY.
6. “Party” means any party to this MOU (collectively, the “Parties”).
7. “White House” means the Executive Office of the President of the United States
8. “Written consent” means consent provided in writing by an authorized individual, including by electronic mail, if such electronic mail is sent by an authorized individual.

## **V. RESPONSIBILITIES AND PROCEDURES**

### **A. Activities**

1. The Parties may undertake a range of activities, both separately and jointly, to further the purposes and goals of the Network, including but not limited to:
  - a. Participate in planning and evaluation meetings by telephone or in person, and carry out additional activities or services in connection with the Network in a mutually agreed upon manner;
  - b. Jointly or individually prepare resources for youth participants to use as part of the Network;
  - c. Collaborate on the design of an online portal, social media strategy, and toolkits for youth participants;
  - d. Collaborate on promotion of the Network, including through social media channels, and may work both separately and jointly to reach appropriate audiences and stakeholders; and

- e. Collaborate on the drafting and review of all materials published on behalf of the Network.
2. In carrying out the Network program to achieve its desired goals, the Parties anticipate that the following activities, among others, may occur:
    - a. **December 2014:** AI/AN youth may be invited to join the Network through a website.
    - b. **January-Summer 2015:** The Parties may host events, independently or jointly, to promote the Network, encourage participation, and build coalitions with other tribal and non-tribal entities to increase resources for AI/AN youth. CNAY may release Network brand materials used to encourage youth participation in the Network.
    - c. **February 2015:** The White House may host a high-level event convening on challenges facing Native American youth.
    - d. **Summer 2015:** The Parties may convene a Network and AI/AN youth summit in cooperation with the White House.
    - e. **Fall 2015- January 2016:** The Parties will continue to promote and support the Network and develop it into a sustainable platform to achieve its goals and objectives.

The Parties agree and acknowledge that the above-referenced activities and timeframes are illustrative and non-binding.

## **B. Roles of the Parties**

### **II.**

#### **1. DOI**

- a. DOI intends to participate in the development of the Network and associated materials and to help engage AI/AN youth in this effort, including soliciting support and involvement of other federal agencies. DOI will use the Network as a means to promote innovative cradle-to-college and career strategies to improve educational attainment and outcomes among AI/AN youth.
- b. DOI intends to coordinate efforts of the Federal Partners, where needed, and be responsible for final review and approval of all public Network materials, including all materials posted to the Network online portal.
- c. DOI intends to host or co-host informational and promotional events related to the Network.

- d. DOI intends to promote the Network, including by posting information about the Network and a link to the Network portal on DOI's public internet page, and through other communications activities.
- e. The Parties understand that DOI's participation in the Network is subject to certain conditions and limitations, including that:
  - i. DOI may only expend resources on projects that further DOI's mission;
  - ii. DOI may not generally endorse or advertise a non-government service, product, or enterprise, provided, however, that the Parties may use the products and services of any signatory to the MOU provided acquisition of the same complies with all applicable requirements including (without limitation) the Federal Acquisition Regulations (FAR) and relevant ethics laws and regulations; and
  - iii. DOI may not, on the basis of this MOU, exercise direction, control, or supervision over any curriculum or program of instruction at any educational institution, school, or school system; and
  - iv. eligibility for any program or benefit sponsored by DOI depends on the specific terms and requirements of each such program or benefit, and in some cases, further application processes may be required for participation in DOI opportunities offered to Network participants.

2. The White House:

- a. The White House intends to participate in the development of the Network by providing advisory support as needed by the Parties in the creation of Network materials and use of the Network as a means to promote innovative cradle-to-college and career strategies to improve educational attainment and outcomes among AI/AN youth.
- b. The Parties understand that the White House's participation in the Network is subject to certain conditions and limitations, including that the White House:
  - i. may only expend resources on projects that further its mission; and
  - ii. may not generally endorse or advertise a non-government service, product, or enterprise, provided, however, that the Parties may use the products and services of any signatory to the MOU provided acquisition of the same complies with all applicable requirements including (without limitation) the Federal Acquisition Regulations (FAR) and relevant ethics laws and regulations.

3. CNAY:

- a. CNAY intends to participate in the development of the Network and associated materials and to use the Network as a means to promote innovative cradle-to-college and career strategies to improve educational attainment and outcomes among AI/AN youth.
- b. In consultation with the Federal Partners, CNAY intends to develop and host an online portal for the Network and other internet properties for the Network.
- c. Subject to the conditions in **Section V.D. Public Statements and Written Materials about the Network**, CNAY intends to develop content and materials, in consultation with the Federal Partners, for use on the online portal and to support the Network.
- d. CNAY intends to establish and maintain a primary point of contact for the Network, including an e-mail inbox and telephone line, and resources necessary to support the development, implementation, and sustainability of the Network.
- e. CNAY intends to host information and promotional events individually and/or in collaboration with the Federal Partners to strengthen opportunities available to AI/ youth participating in the Network and encourage Native youth participation in the Network.
- f. CNAY intends to make available informational resources to Network participants, including information provided through CNAY partners and affiliates, in addition to those provided by the Federal Partners.
- g. Subject to the conditions in **Section V.C. Intellectual Property**, CNAY intends to procure or create a design of a Network logo and associated brand assets, in consultation with the Federal Partners.
- h. The Parties understand that CNAY's participation in the Network is subject to certain conditions and limitations, including that CNAY:
  - i. May only expend resources on projects that further its mission; and
  - ii. May only expend resources that have been obligated to the Network.

**C. Intellectual Property**

1. **Logos of the Parties.** Except as provided in paragraph 3. of this Section V.C., no Party shall make public use of any other Party's name, logo, official seal, or logos associated with any Party without obtaining prior written consent of such Party within

a reasonable period of time before any materials and publications including such name(s), logo(s), and/or official seal(s) are to be published and distributed.

2. **Network Logo.** The terms and conditions of this paragraph V.C.2. shall survive the termination of this MOU in perpetuity. The Network logo and related branding assets procured and/or created by CNAY, in collaboration with the Federal Partners, will be the sole property of CNAY. CNAY hereby grants the Federal Partners a, royalty-free nonexclusive, sub-licensable worldwide right to reproduce, distribute, modify, publish, and otherwise use the Network logo and all other associated brand assets created, for the term of this MOU.
  
3. **Use of Logos.** Each Party may use the other Parties' logo only in the forms provided electronically or in hard copy by the owning or controlling Party of such logo. Except for the size and subject to the restriction herein, such logos may not be altered in any manner, be it in proportion, color, movement, element, etc., or animated, morphed, or otherwise distorted in perspective or dimensional appearance. Any changes in the size of a Party's logo made by another Party shall retain the full graphical integrity of the original image. The Parties agree that the logos of the Federal Partners and Network logo shall not be used in any of the following situations:
  - a. Attempting to influence legislation;
  - b. Organizing or engaging in protest, petitions, boycotts or strikes;
  - c. Assisting, promoting, or deterring union organizing;
  - d. Impairing existing contracts for services or collective bargaining agreements;
  - e. Engaging in partisan political activities, or other activities designed to influence the outcome of an election to any public office;
  - f. Participating in, or endorsing, events or activities that are likely to include advocacy for or against political parties, political platforms, political candidates, proposed legislation or elected officials;
  - g. Conducting worship services, engaging in religious proselytization;
  - h. Supporting or endorsing for-profit, commercial goods or services;
  - i. Soliciting funds or other contributions of monetary value, without express written consent from the Parties in each instance;
  - j. In a product name or publication title not owned, controlled or approved by the Party with rights to the brand(s), trademark(s) or logo(s) used;
  - k. In, as, or as part of each Party's own trademarks;
  - l. To identify products or service not owned, controlled or approved by the other Parties;
  - m. In a manner likely to cause confusion;
  - n. In a manner that disparages the other Parties;
  - o. In any manner that expresses or might imply another Party's affiliation, sponsorship, endorsement, certification, or approval, other than as contemplated by this MOU;
  - p. In association with any third-party trademarks in a manner that might suggest

co-branding with the third-party or is otherwise likely to create confusion as to the source or sponsorship of any Party's web pages, or ownership of any Party's trademarks;

- q. Incorporated into or used as part of any trade name, business name, domain name, product or service name, log, trade dress, design, slogan, or other trademark not owned, controlled or approved by the other Parties. This restriction applies whether each Party's trademarks are used alone or are combined with any other symbols, be they words, logos, icons, graphics, photos, slogans, numbers or other design elements.

4. **Transfer of Intellectual Property.** Except as may expressly be provided in this MOU, no right, property, license, permission, or interest of any kind in, or to the use of, any trademark, trade name, logo, insignia, or device owned by any Party is, or is intended to be, given, assigned or otherwise transferred to any Party by the execution, performance, or non-performance of this MOU or any part thereof. To the extent expressly provided in this MOU, CNAY affirms that any intellectual property it transfers or licenses pursuant to this MOU does not infringe any copyright or trademark, violate any property rights, or contain any scandalous, libelous, or unlawful material.

#### **D. Public Statements and Written Materials about the Network**

1. The Parties agree to strive to make the materials created pursuant to this MOU intended for release to the public compliant with the requirements of Section 508 of the Rehabilitation Act of 1973 (29 U.S.C. § 794d) as amended. The Parties further agree that the Network online portal will be tested and must be deemed Section 508 compliant by DOI.
2. CNAY shall have the right to publicize its collaboration in the Network but shall obtain written consent from the Federal Partners within a reasonable period prior to undertaking any of the following activities:
  - a. issuing any press release, publications, or other materials regarding the Network;
  - b. participating in any project or event conducted in association with the Network;
  - c. providing any links on the CNAY or any third-party's website directing viewers to the websites of the Federal Partners or the Network's online portal.
3. CNAY will not imply that the Federal Partners endorse any products or services of CNAY or any other entity.
4. CNAY may solicit funds or in-kind support to help carry out its responsibilities under this MOU. CNAY shall obtain written consent from the Federal Partners prior to identifying the Network, the Federal Partners, or the Federal government in any solicitation for funds or in-kind support for activities associated with the Network. If CNAY solicits funds or in-kind support for activities associated with the Network, it shall do so only on behalf of itself. CNAY will not solicit funds or in-kind support for

the Network from manufacturers of tobacco products, firearms, or alcoholic beverages. CNAY will communicate in writing to any third party contributing funds or in-kind support to the Network that any acknowledgment of such a contribution of does not constitute an endorsement of the third party by the Federal Partners.

5. The Parties understand that any information furnished between the Parties under this MOU or in establishing and carrying out activities for the Network is potentially subject to disclosure, among other things, pursuant to the terms of the Freedom of Information Act, 5 U.S.C. § 552, et seq. (FOIA). The Federal Partners agree to consult one another prior to releasing documents which may be exempt under FOIA or otherwise potentially privileged.
6. The Parties agree that any information protected under the Privacy Act of 1974, 5 U.S.C. §552a, will be treated in a manner consistent with that Act.

## **VI. ADMINISTRATIVE PROVISIONS**

### **A. General Terms**

1. Nothing in this MOU constitutes a requirement that any Party obligate or transfer any Federal funds. Each Party to this MOU agrees to handle its own activities and bear its own costs from respective resources as available, in carrying out the responsibilities and pursuing the objectives set forth in this MOU. If the Parties decide at some later date to transfer funds, services or property among the Parties in order to accomplish some objective, that transfer of funds between the Parties shall be done by separate agreement in accordance with applicable Federal laws and regulations and independently authorized by appropriate statutory authority.
2. No Party shall be authorized to bind any other Party without specific prior written consent of the Party to be bound.
3. Nothing in this MOU shall create or imply a legally cognizable partnership, agency, or joint venture agreement between the Parties.
4. This MOU is not intended to, and does not create, any right, benefit, or responsibility, substantive or procedural, enforceable at law or equity against any Party, its agencies or instrumentalities, its officers or employees, or any other person.
5. Nothing in this MOU will restrict the Parties from participating in similar activities or arrangements with other public or private agencies, organizations or individuals. Nothing in this MOU precludes separate activities being undertaken by each of the Parties separately or together, and such activities will not undermine the intent and purpose of the MOU.

6. All data gathered, associated with, or shared among the Parties in establishing and maintaining the Network shall be used for the sole purpose of carrying out services and activities in support of the Network. All Parties agree to maintain appropriate confidentiality over all such data consistent with applicable laws, regulations and respective policies. The Parties agree to properly dispose of such data upon termination of this Agreement, consistent with applicable laws, regulations and respective policies.
7. No member or delegate to Congress may benefit from this MOU either directly or indirectly.

## **B. Entire Understanding**

This MOU constitutes the entire understanding of the Parties with respect to their individual and collective roles and responsibilities in carrying out the terms of this MOU, and supersedes any prior or contemporaneous agreements or understandings.

## **C. Duration, Modification, and Termination**

1. With the exception of Section V.C.2., this MOU shall be effective for a period from the date of the last signature until January 1, 2016, unless terminated by the Parties as described herein. The MOU may be extended for a further period of time by a written agreement among the Parties.
2. Upon termination of this MOU, the ownership of the Network, along with the online portal, branded assets, intellectual property and related materials, shall be the sole property of CNAY. CNAY may continue to develop and operate the Network as a sustainable element of its programming and activities to support AI/AN youth. Notwithstanding the foregoing, CNAY shall not use or continue use of materials bearing logos or endorsements of the Federal Partners, absent express written authorization. Any references to the Federal Partners will refer solely to their participation in the launch of the Network, but shall not imply a current partnership. The parties acknowledge that, generally under U.S. copyright law, works of the U.S. Government are not subject to copyright. DOI retains full rights to re-use the content and material that it develops for any and all DOI purposes, and/or to share with other collaborators or requestors. In the event that CNAY incorporates materials prepared by DOI into other works and claims copyright therein, such parties shall explicitly exclude the federal-prepared materials in the copyright notice, pursuant to 17 U.S.C. § 403.
2. Signatures to this MOU or to any modification or amendment of this MOU may be executed in any number of counterparts and may be transmitted by facsimile or via email as a scanned PDF file. Each such signature shall be deemed an original and together shall be deemed part of one and the same MOU.

3. At any point after the original execution of the MOU, new parties may be added to the MOU by executing an addendum to the MOU with all Federal Partners. Except as may be specified in an addendum, new parties will have the same rights and obligations and be subject to the same term as set forth above as if that party had been an original signatory to this MOU.
4. Except as set forth in Paragraph 3. of Section VI.C. above, this MOU may be amended only by a written agreement signed by all Parties.
5. Any Party may terminate its participation in this MOU for any reason by providing 14 days written notice to all other Parties.
6. In the event a Party terminates its participation in this MOU, that Party shall cease use and promotion of the Network prior to or on the effective date of termination.

*[Remainder of page intentionally left blank – signature page follows.]*

The individuals whose signatures appear below attest to having the authority to enter into this MOU and agree that this MOU shall become effective upon the date of the last signature.

**BACKGROUND MEMO FOR CABINET PANEL ON ENERGY AND CLIMATE  
CHANGE  
BUREAU OF INDIAN AFFAIRS TRIBAL CLIMATE RESILIENCY PROGRAM  
DECEMBER 3, 2014 PANEL**

DATE: December 3, 2014  
LOCATION: Capitol Hilton  
TIME: 2:05pm – 2:50pm  
FROM: Ann Marie Bledsoe Downes 208-2875

**I. PURPOSE**

**II. PARTICIPANTS**

- Gina McCarthy, Administrator, Environmental Protection Agency
- Mike Boots, Acting Chair, White House Council on Environmental Quality

**III. TALKING POINTS**

**Top Line Messages:**

- Climate change is increasingly evident for American Indian and Alaska Native communities.
- In some cases, climate change is threatening the ability of tribal nations to carry on their cultural traditions and beliefs.
- Tribal leaders have voiced growing concerns about effects on coasts, water supplies and wildlife. Tribes have been hit the hardest; we have a moral obligation to act.
- WHCNA – Subgroup on Environment and Climate Change
  - Pleased to work with Administrator McCarthy on the new WHCNA subgroup on the Environment and Climate Change.
  - Co-chaired by EPA and DOI.
  - The Climate Change Subgroup will be reaching out to tribal leaders in the coming months for feedback and input as they look to focus cross-agency efforts to build and support tribal climate resiliency.
  - We certainly will be building off the Task Force on Climate Preparedness and Resilience recommendations to the President.
  - We look forward to receiving your input when we begin our outreach efforts in early 2015.
- DOI has dedicated nearly \$10 million to help tribes prepare for climate change through adaptation and mitigation techniques.
  - Announcement of funding to specific tribes will be made in the coming weeks along with a notice announcing opportunity for additional tribes to submit funding requests.

**Additional Talking Points:**

- The DOI/BIA Tribal Climate Initiative

- The Obama Administration is committed to providing the means and measures to help tribes in their efforts to protect and mitigate the effects of climate change on their land and natural resources
- The Administration has dedicated nearly \$10 million to this Program to help tribes prepare for climate change through adaptation and mitigation techniques such as:
  - offering funding for tribes, tribal consortia & tribal organizations to develop science-based information and tools
  - these tools will enable adaptive resource management as well as the ability to plan for climate resiliency
  - offering national climate adaptation planning sessions
  - offering funding for tribal engagement and outreach
- The Program will provide direct tribal support through a climate adaptation funding. Funding will be awarded in four categories:
  - development and delivery of climate adaptation training
  - adaption planning, vulnerability assessments and monitoring
  - capacity building through travel support for climate change training, technical sessions, and cooperative management forums
  - travel support for participation in ocean and coastal planning
- The Program will also increase staffing to ensure coordination with tribes across the federal government and to ensure tribal engagement in climate conversations at the federal level.
- Five tribal Climate Extension Support Liaisons will be placed in the Department of the Interior's Climate Science Centers (CSC) while building tribal capacity by contracting the positions to tribal organizations to ensure strong ties to tribal practitioners
- The Program will empower and educate youth to become climate leaders by enabling them to participate in climate conferences, as well as independent research projects.

**Potential Questions:**

Q: Why is DOI considering using Grants.gov to issue DOI climate change funding? Funding for such impacts is a trust obligation and Tribes are governments, not entities that should have to apply for grants from the federal government.

A: I certainly understand the trust obligations of the federal government and we have heard from Tribes that Grants.gov is not their preferred mechanism for issuing this funding. I know that Assistant Secretary Washburn is working with the Solicitor's Office to issue this funding as efficiently as possible, in compliance with the law and we are actively considering options such as utilizing the 638 contracting mechanism to deliver these funds.

**INFORMATION MEMO ON TOPICS DISCUSSED  
IN THE BREAKOUT SESSIONS**

DATE: December 3, 2014  
Location: Capitol Hilton  
TIME: 11:15AM – 1:15PM

Within this section you will find information on various topics that may be discussed during the breakout sessions. You will be circulating through as many sessions as you can. Below is brief background material on the major topics you likely to hear being discussed:

**Key Topics on Budget**

**Background:** The budget for Indian Country always underrepresents the needs of the 566 Indian tribes, each with their own unique needs for programs and services. The work of the Tribal – Interior Budget Council (TIBC) helps communicate to Interior the many needs of tribes so we can develop an informed budget proposal for the President.

**Talking Points:**

- Despite budget shortcomings, tribes have consistently shown themselves to be valued partners in helping the Administration develop a detailed budget where their needs are addressed as best as possible. The Tribal – Interior Budget Council, or TIBC, has been critical to assisting in this endeavor and we wanted to take this time to thank tribal leaders by continuing to work with us year in and year out on our budget.
- Also, we realize that the congressional budget is directly tied to our trust obligations to Indian tribes, as reflected in numerous treaties, statutes, executive orders and directives.
- That being said, we are currently embargoed from sharing information from our upcoming budget proposal. But we are always able to listen to tribal needs, and promise to work diligently in trying to incorporate those suggestions into a comprehensive budget recommendation for Indian Affairs that reflects your needs as best as possible.
- We have also heard your requests, and support those requests, for a more robust budget for Indian Affairs from Congress. But we also pledge to work with what we are given as best we can, and with your guidance.

**Possible Q & As**

How does the Administration intend to implement the Tribal General Welfare Exclusion Act?

As you know the tribal GWE bill is a very recent bill, signed by the President in late September. We understand that this bill has been a key issue for tribes, making its implementation all the more critical. But as you know, Treasury is in the driver's seat with respect to this bill and I trust that they will work diligently, as they have in recent years on the

GWE guidance and the per capita and bonds issue, on trying to address the requirements under the Act.

Specifically, with respect to the Tribal Advisory Committee – this committee will be tasked with assisting Treasury with tax policy affecting tribes, including developing key definitions under the Act, such as determining what meets the definition of “lavish and extravagant.” That being said, I imagine the selection for this committee will be a priority for Treasury, and will also require serious consideration and thought. Treasury had a listening session this past Tuesday (December 2, 2014) to address some of these questions on the tribal GWE and tribal tax policy in general.

NCAI Briefing Book Position: urges the White House, OMB, and the White House Council on Native American Affairs to allocate and budget sufficiently increased federal funding for all Indian programs to fully satisfy all essential and ongoing Indian country needs under applicable treaties, statutes, Executive Orders, and agreements. Tribal leaders have provided direction through the IHS Tribal Budget Formulation Workgroup, Department of Health and Human Services Budget Consultations, the Tribal Interior Budget Council, and other agency consultations with specific recommendations on program levels. Tribes urge the Administration to provide equitable support for core tribal governmental services in future budget requests.

### **Key Topics on Economic Development, Infrastructure, & Jobs**

#### WORKFORCE DEVELOPMENT

**Background:** Job growth in Indian Country is a top priority for tribal leaders. American Indians and Alaska Natives have one of the youngest populations in the nation, with 42% of tribal members under the age of 25. Importantly, job growth is heavily dependent on sound federal policies that promote job creation – such as the Indian Employment Tax Credit which is routinely included in Congress’ tax extenders package – and improving access to capital opportunities for business development on tribal lands.

**Hot Topics:** The 11-year absence of a Workforce Investment Act reauthorization finally ended in July 2014 when Congress passed the Workforce Innovation and Opportunity Act (WIOA) and President Obama signed the bill into law.

The Native American Program under WIOA has the following revisions:

- Primary Performance Indicators were placed on all programs, including the Native American Program;
- Programs are being funded at their current level and will increase incrementally until Fiscal Year 2020, with the Native American program being funded at its current level of \$46,082,000 for FY 2015 to a funding level of \$54,137,000 by FY 2020;
- Alaska Native descendants are defined as eligible for services provided;
- Every 4 years the Secretary of Labor will make grants or enter in contracts or cooperative agreements with tribal grantees, instead of every 2 years; and
- Entrepreneurial skills are included in the purpose of the program.

**Talking Points:**

- Job creation in Indian Country requires removing barriers to economic development, which was the intent behind the recent streamlining of the leasing regulations to help facilitate quicker lease approval by the BIA.
- Also, tribes need better access to capital opportunities. New Markets Tax Credits have been successful, but not many credits have been awarded to projects being financed by Indian tribes or on tribal lands. Similarly, tax-exempt bonding has been difficult for tribes that lack natural resources or large revenue streams to back their bonds on the market.
- Job creation also requires the federal government to support legislation and regulatory frameworks that incentivize businesses to hire local tribal members, such as the Indian Employment Tax Credit and the tribal preference provision in the recently amended BIA surface leasing regulations, which clarifies that tribes can include provisions in leases that provide for tribal preference in employment.
- Also, we are aware of the requests put forth by tribes for the Secretary of Labor to provide a blanket waiver for performance measures for American Indian and Alaska Native workforce programs. Also, to include tribal leaders on any Secretary-level Advisory Council in the Department of Labor.

**ACCESS TO CAPITAL**

**Background:** Tribal governments lack the access to capital necessary for business development and basic infrastructure projects, such as broadband deployment, on tribal lands. The Administration should work to include tribal governments in successful programs, such as the New Markets Tax Credit (NMTC) program, in order to assist tribes in accessing revenue for development projects.

**Hot Topics:** Since the inception of the NMTC program in 2000, the Community Development Financial Institutions (CDFI) Fund has made 836 competitive awards allocating \$40 billion in tax credit authority to specialized financial institutions called Community Development Entities (CDEs) to spur new or increased investments into operating businesses and real estate projects located in low-income communities. Yet, in the last two funding cycles of 2013 and 2014, no tax credit allocations were given to Native CDEs, leaving Indian Country behind.

Also, Indian tribes remain subject to an ‘essential government function’ test that states and local governments are not subjected to when using tax-exempt bond financing for projects. This, despite a 2011 Treasury Report to Congress recommending that Congress omit the ‘essential government function’ test and allow tribes be to use tax-exempt bonds on par with state governments and local governments.

**Talking Points:**

- Earlier this year, President Obama selected the Choctaw Nation as one of five promise zones, which is aimed to provide resources such as grants and tax

incentives for development in communities with high need. While this initiative is only able to reach one tribal community currently, the hope is that there will be other communities selected in the future.

- Also, we are aware of the recommendation that Treasury work to ensure that Indian Country is included in future funding cycles of the NMTC program. We think this makes sense and we are open to begin the dialogue and explore how we can ensure increased participation from tribes in the NMTC program.
- In general, accessing capital to finance development on tribal and individual Indian lands remains a significant challenge due to unique factors, such as the status of the land as well as the lack of sufficient assets to back bonds or other instruments. Federal agencies should learn more about the barriers to investment and attempt to find alternative mechanisms to secure debt and equity investments in Indian Country.

## TRIBAL TAX POLICY

**Background:** Tribal tax authority assists many tribes in supplementing federal programs and services for tribal members, and is the most fundamental, inherent manner of generating a revenue stream on tribal lands. The Supreme Court’s landmark decision *McCullough v. Maryland*, it was noted that “the power to tax is the power to destroy.” However, in Indian Country, the power to tax more accurately represents the power to build.

**Hot Topics:** Congress recently passed, and the President has signed into law, the Tribal General Welfare Exclusion Act, which acknowledges tribal programs and benefits designed to meet the needs of tribal members as non-taxable. The bill also mandates that Treasury form a tribal advisory committee to assist in implementing the bill and with tax policies affecting Indian tribes.

Also, the taxing provisions of the BIA’s recently amended leasing regulations have proven to be an additional tool for tribes to use while advocating on behalf of their regulatory jurisdiction over neighboring states or local counties. The tax provisions, which clarify that permanent improvements on tribal lands fall exclusively within the taxing jurisdiction of the Indian tribe, are currently a focal point of review by several courts in varying circuits. While the tax provisions do not represent a new concept, their inclusion in the leasing regulations provides a strong federal interpretation of the taxing jurisdiction on tribal lands which will need to be included in future regulatory revisions where applicable.

### Talking Points:

- The Administration is aware that tribes are extremely interested in consulting with Treasury on the recently passed Tribal General Welfare Exclusion bill, and there was a listening session earlier this week on the GWE as well as other tax issues affecting tribes. One of the primary requests we have heard from tribes is that Treasury needs to select a Tribal Advisory Committee, as mandated in the bill, which will help in implementation of the bill. While we understand that tribes want quick action, selecting an advisory committee is a time intensive process, as

it should be. After all, the Committee will have a true impact on tax policy for Indian tribes and therefore the selection process should be conducted with care and the utmost duty.

- Also, with respect to the GWE legislation, we know there will be a need to consult on implementing regulations for the bill. Over the past several years, the IRS and Treasury have worked with tribes to develop a finalized agency guidance on GWE. Until those implementing regulations are promulgated, the finalized guidance may still be relied upon by tribes.
- We have also heard that tribes are requesting to schedule a Tribal Meeting with the Commissioner of the Internal Revenue Service, John Koskinen, to discuss what tribes perceive as a pattern of policymaking through field audits. While we can certainly reach out to our federal colleagues and relay the request, the IRS is an independent agency and our influence there is somewhat limited in comparison to other agencies. As we did in the 2013 Tribal Leaders Briefing Book, we request a direct tribal

NCAI Briefing Book Position: Invest in Tribal Self Determination. Tribal leaders applaud the visits by President Obama and many of the Cabinet Secretaries to Indian Country. Visits to various reservations demonstrate that while some tribes have made a lot of progress with self-determination, there are other tribes who continue to struggle. We urge the White House Council on Native American Affairs to consider the development of a multi-agency pilot project to focus resources on reservations that have the greatest needs and the greatest opportunities to benefit from increased tribal control and administration of programs and services.

### **Key Topics on Education**

**Background:** Over the past year, the Bureau of Indian Education has worked to reform how Indian education is provided through the BIE, implementing policies meant to give tribes more control over schools in their community.

**Hot Topics:** The BIE recently issued its Blueprint for Reform, which outlines key areas where Indian education can be improved. Together, in partnership with the U.S. Department of Education, this Administration aims to improve the learning environment for children attending BIE schools in order to better meet the federal government's trust responsibility to provide Indian education.

### **Talking Points:**

- President Obama is committed to working with Indian Country to promote strong, prosperous and resilient communities. Under his Administration, our **North Star has been self-determination and self-governance** for tribal nations. The Obama Administration will leave Indian Country in a better place than where we found it, but we still have so much work to do.
- As chair of the White House Council on Native American Affairs, working to improve **interagency coordination and efficiency** across the federal government.

- Ensuring that Native youth receive the comprehensive supports they need are top priorities for the Council and is of paramount concern to tribal leaders and to this Administration.
- Today, you have leaders across the Administration here to listen to your concerns and discuss how we can all partner one another to ensure that your children receive the services they need to be successful.
- Tribal governments and their tribal education agencies must be authorized to assume a greater role in providing education to their children.
- The Administration must assist by providing policy initiatives and appropriations requests that support tribal capacity to administer and provide quality, community-based, education.
- This will ensure all education systems serving Indian students, whether BIE, charter, or public schools, address academic and cultural needs and help develop successful graduating classes.
- There is some great work underway. Today, you'll hear from officials who are leading our efforts to improve education for Native youth at public schools and BIE-funded schools; protect our youth from exposure to violence; and ensure that they receive comprehensive supports and wraparound services.
- This is some of the work that I'd like to highlight for you today, but let me be clear – we're going to take a back seat today. This is your opportunity to raise the issues you'd like to discuss and for us to listen and to learn.

NCAI Briefing Book Position: The White House Council on Native American Affairs must place at the core of its work ways that each agency can provide current and future possibilities for Native youth. The Council is uniquely equipped to launch such an Administration-wide effort to identify and coordinate how every agency in the Administration can support and build a lasting legacy on addressing the needs of Native youth. All agencies must come together to leverage their resources for a truly comprehensive approach to building a stronger, more vibrant and healthy future for Native youth.

### **Key Topics on Energy**

**Background:** Tribal lands sit atop some of the United States' largest mineral reserves, but lack the necessary tools, and in some instances – the authority to develop those resources in a reasonable manner. Also, tribal lands are often remote in location, separate from transmission grids, which often means that while tribes have significant mineral reserves on their lands, those resources are effectively stranded and difficult to get to market.

**Hot Topics:** In early October 2014, Assistant Secretary – Indian Affairs, Kevin Washburn, announced that more than \$9.4 million has been awarded to tribal projects to assist in developing energy and mineral resources. The grants were awarded as part of the Energy and Mineral Development Program administered by the Office of Indian Energy and Economic Development (IEED), a division of the Office of the Assistant Secretary.

Earlier this year, the Department announced the approval of the 200-megawatt Moapa Solar Energy Center Project, which is expected to generate enough power to run approximately 60,000 homes and will support up to 500 jobs at peak production while creating 10 permanent jobs.

### **Talking Points:**

- The Administration is committed to helping tribes develop both conventional and renewable energy resources in Indian Country.
- In the past few years, our work in this area has noticeably improved. However, much more needs to be accomplished – the need in Indian Country continues to exceed our capacity to assist.
- Despite our limited resources, be assured that a top priority of this Administration is the Increase of renewable and conventional energy development on Indian lands as part of an “all-of-the-above” energy strategy.
- In addition, as Chair of White House Council on Native American Affairs, I want you to know I’m working to improve federal interagency coordination, and speed up energy projects on Tribal lands
- We also know the Climate Change implications for this type of work – Tribes hit hardest; we have a moral obligation to act
- Energy and mineral development on federal Indian lands plays critical role in economic development and generating income in Indian Country.
- Renewable energy cuts carbon pollution, creates jobs and helps move our economy toward a clean energy future
- 

### **Possible Q and A**

How are some ways the Administration can improve its provisions of technical assistance for energy and mineral development on tribal lands?

For starters, we have some really great programs. The IEED with the Assistant Secretary – Indian Affairs’ Office does great work, but is greatly underfunded – with respect to the overall need for tribes. So the budget process, as with many other issues, always helps. But also, I think as we do more projects, we are also developing various approaches for different tribes, that – in the end – will enable us to be more efficient and more creative in the future. For instance:

Recently, IEED’s Division of Energy and Mineral Development recently helped the Pueblo de Cochiti repair roads, flood prevention infrastructures, diversion dams, levees and other facilities that were destroyed by wildfires in 2011 by providing technical assistance that helped the Pueblo use tribally-sourced gravel to make the repairs. In this instance, the Pueblo received \$2 million from the Federal Emergency Management Agency.

Also, DEMD helped the Crow Tribe develop new housing through use of local sand and clay for the manufacture of compressed earthen blocks (CEB).

DEMD estimates that 53% of the funds used to build a CEB home stayed on the Crow Reservation (DEMD solution employed local resources and labor to build energy efficient houses, allowing funding from HUD/HIP housing grants to remain in the local economy while

fostering local jobs, and creating a sustainable, scalable business model.), whereas just 14% of these funds would have stayed in the community had they been used to construct a prefabricated home or trailer.

Calculated at an average home cost of \$110,000, CEB construction enabled \$58,300 per house to remain in the local economy versus only \$15,400 for an alternative house.

- Each of the examples represents new approaches that look at tribes individually, and help maximize the amount of investment in their community – while meeting mineral development, energy or infrastructure needs.

NCAI Briefing Book Position: 1. Invest in the development of both conventional and renewable energy resources in Indian Country. In the past few years, there has been notable improvement in federal efforts to develop renewable energy in Indian Country; however much more needs to be accomplished. The Department of Energy's new tribal leader and staff training programs need to be expanded. Additionally, the Department of Interior's resources should be focused to support tribe's evaluation of, and entrance into Tribal Energy Resource Agreements (aka TERAs), as well as tribal capacity evaluations and related governance needs for TERA programs. DOI should also engage in a parallel effort to support HEARTH Act applications relating to renewable energy projects on tribal lands.

2. Include tribes in clean energy development under Executive Order 13423. As the largest energy consumer in the US economy, the federal government was directed to lead by example and support clean energy development when President Bush signed Executive Order 13423 on January 24, 2007, enacted into law as part of the 2009 Omnibus Appropriations Act. Agencies must include tribes when working to achieve the goals outlined in Executive Order 13423. Federal agencies should include tribal renewable energy products as part of their annual sustainability plans and identify how they will utilize their authority to prefer tribal energy products to meet those goals. Additionally, the Department of Defense and cooperating agencies should identify plans to engage tribes with potential energy products that meet their procurement goals.

3. Increase tribal energy funding. The Administration must request and advocate for the maximum statutory amount available under the 2005 Energy Policy Act for the DOE Office of Indian Energy and the Indian energy loan guaranty programs.

4. Support legislation providing tribes with new options for energy development. The Administration should support initiatives in the House of Representatives and the Senate that provide tribes with greater control and flexibility in developing their conventional and/or renewable energy resources—such as S. 2132, the Indian Tribal Energy Development and Self-Determination Act, and H.R. 1548, the Native American Energy Act. These bills represent serious efforts to facilitate tribal efforts to develop their energy resources and bring jobs and economic development to Indian Country.

## **Key Topics on Climate Change**

### **Background**

In April 2014, the EPA began initial work with Interior to find ways to specifically work to help tribal communities combat and minimize climate change effects. This work coincides with the newly announced DOI climate change program that began in July that will work with tribes to strengthen and expand the use and development of traditional ecological knowledge when developing mitigation and landscape strategies. Currently, we see six pillars to address when finding solutions to the impacts of climate change:

- (1) natural resources and agriculture;
- (2) disaster recovery and resilience;
- (3) community health and development;
- (4) cross-cutting agency programs;
- (5) infrastructure/built systems (i.e., transportation, water, and energy systems); and
- (6) greenhouse gas mitigation and carbon sequestration.

### **Top Line Messages:**

- Climate change is increasingly evident for American Indian and Alaska Native communities
- In some cases, climate change is threatening the ability of tribal nations to carry on their cultural traditions and beliefs.
- Tribal leaders have voiced growing concerns about effects on coasts, water supplies and wildlife. Tribes have been hit the hardest; we have a moral obligation to act.
- **WHCNA – Subgroup on Environment and Climate Change**
  - Pleased to work with Administrator McCarthy on the new WHCNA subgroup on the Environment and Climate Change.
  - Co-chaired by EPA and DOI
  - The Climate Change Subgroup will be reaching out to tribal leaders in the coming months for feedback and input as they look to focus cross-agency efforts to build and support tribal climate resiliency.
  - We certainly will be building off the Task Force on Climate Preparedness and Resilience recommendations to the President.
  - We look forward to receiving your input when we begin our outreach efforts in early 2015.
- DOI has dedicated nearly \$10 million to help tribes prepare for climate change through adaptation and mitigation techniques.
  - Announcement of funding to specific tribes will be made in the coming weeks along with a notice announcing opportunity for additional tribes to submit funding requests.

### **Additional Talking Points:**

- The DOI/BIA Tribal Climate Initiative
  - The Obama Administration is committed to providing the means and measures to help tribes in their efforts to protect and mitigate the effects of climate change on their land and natural resources

- The Administration has dedicated nearly \$10 million to this Program to help tribes prepare for climate change through adaptation and mitigation techniques such as:
  - offering funding for tribes, tribal consortia & tribal organizations to develop science-based information and tools
  - these tools will enable adaptive resource management as well as the ability to plan for climate resiliency
  - offering national climate adaptation planning sessions
  - offering funding for tribal engagement and outreach
- The Program will provide direct tribal support through a climate adaptation funding. Funding will be awarded in four categories:
  - development and delivery of climate adaptation training
  - adaption planning, vulnerability assessments and monitoring
  - capacity building through travel support for climate change training, technical sessions, and cooperative management forums
  - travel support for participation in ocean and coastal planning
- The Program will also increase staffing to ensure coordination with tribes across the federal government and to ensure tribal engagement in climate conversations at the federal level.
- Five tribal Climate Extension Support Liaisons will be placed in the Department of the Interior's Climate Science Centers (CSC) while building tribal capacity by contracting the positions to tribal organizations to ensure strong ties to tribal practitioners
- The Program will empower and educate youth to become climate leaders by enabling them to participate in climate conferences, as well as independent research projects.

**Potential Questions:**

Q: Why is DOI considering using Grants.gov to issue DOI climate change funding? Funding for such impacts is a trust obligation and Tribes are governments, not entities that should have to apply for grants from the federal government.

A: I certainly understand the trust obligations of the federal government and we have heard from Tribes that Grants.gov is not their preferred mechanism for issuing this funding. I know that Assistant Secretary Washburn is working with the Solicitor's Office to issue this funding as efficiently as possible, in compliance with the law and we are actively considering options such as utilizing the 638 contracting mechanism to deliver these funds.

NCAI Briefing Book Position: Establish a high level interagency-tribal government task force to examine existing problems and propose solutions to help address climate change. This group could be a working group of the White House Council on Native American Affairs or could function as a stand-alone effort. This task force would: (1) recommend, develop, and implement tribal-specific solutions, enabling the agencies to support and foster tribal climate-resilient planning and investment; (2) work to ensure that there is meaningful funding and technical support to implement recommendations; and (3) provide oversight/connectivity to the President's Climate Action Plan to ensure that implementation of the Plan is addressing tribal concerns.

In order to ensure federal government commitment, the Administration must support the task force in efforts to:

- A. Ensure equitable financial resources for tribes to carry out assessments and implementation of preparedness planning;
- B. Provide assistance to tribes for climate vulnerability assessments; and
- C. Recognize the role and interaction of multiple knowledge systems. Traditional Knowledge can be useful in defining earlier environmental baselines, identifying impacts that require mitigation, providing observational evidence for modeling, and identifying culturally appropriate values for protection from direct impacts of adaptation measures.

### **Key Topics on Healthcare**

**Background:** American Indians and Alaska Natives continue to experience the greatest health disparities in the United States. Physical and mental well-being in tribal communities is dependent upon the collective health of the community. For instance, family support systems in Indian homes, a safe learning and living environment, as well as healthy lifestyle habits, all contribute toward the well-being of a community member. For this reason, tribes need the federal government to work across agencies to help develop services and programs that institute a holistic approach toward health care in tribal communities.

**Hot Topics:** The ACA includes an employer shared responsibility mandate for employers that do not offer affordable health coverage that provides a minimum level of coverage to their full-time employees. Tribes believe the ACA mandate violates the federal trust responsibility because it would require tribal employers to subsidize IHS services, and Native people to pay for the cost of their own health insurance. Further, tribal employers would be forced to use limited resources for either insurance premiums or shared responsibility payments.

### **Talking Points:**

- Addressing health disparities in Indian Country requires programs that support tribal governments in improving the health of entire communities. For this reason, it seems necessary to encourage agencies to coordinate with one another to improve the quality of life for American Indians and Alaska Natives. Many times several programs aim to achieve
- Another way we can be supportive of Indian health care issues is to continue to support and request increased funding for IHS. The President's budget has consistently supported increased funding for IHS. These increases improve access to care locally and support efforts by tribes and the agency to modernize the health care delivery system in tribal communities. Continued increases are necessary to close the gap in services and curb disturbing health disparities.
- Also, this Administration supports legislation to permanently reauthorize the Special Diabetes Program Initiative (SDPI), which has been shown to lower rates of diabetes and heart-related diabetes in tribal communities. Also, we support the Domestic Violence Prevention Initiative (DVPI), which has significantly increased screenings for domestic violence, and improved treatment and intervention services.

## **Possible Q and A**

How can you work to improve health care for tribal members?

Each year, the President's budget request to Congress has included increased budget requests for Indian Health Service. We recognize the unique needs for tribes, with respect to mental and physical well-being, and promise to work to improve the delivery of vital programs, such as child health care services, domestic violence and sexual assault response programs, diabetes prevention programs, as well as continuing to support more preventative measures, such as continuing to broaden the reach of our tribal youth programs.

NCAI Briefing Book Position: In direct response to tribal feedback and in fulfillment of the goals of the Council, a new subgroup on health was recently created. The Council's health subgroup held its inaugural meeting on Friday, November 14th, 2014. The subgroup is focused on the Affordable Care Act outreach now and making further improvements towards the health of Tribal communities.

Consistent with the Executive Order and under the leadership of President Obama the Council and subgroups will work to improve coordination and communication among federal agencies in order to promote and sustain prosperous and resilient Native American tribal governments. Each subgroup holds regular meetings to discuss current initiatives as well as to support in inter-agency solutions to tribal issues.

### **Key Topics on Cultural and Sacred Sites**

On December 4, 2012, the United States Departments of Defense, the Interior, Agriculture, Energy, and the Advisory Council on Historic Preservation entered into a Memorandum of Understanding, "Regarding Interagency Coordination and Collaboration for the Protection of Indian Sacred Sites" (MOU). Since then, the MOU Working Group has developed discussion drafts on confidentiality and cultural sensitivity training for federal employees. Actions like these demonstrate a continued commitment by the Obama Administration to protect the cultural and religious resources of Native peoples; however, there is still much work that remains to be done.

NCAI Briefing Book Position: 1. Urge the Department of the Interior, and the US Fish & Wildlife Service to consult with tribes before taking actions that threaten eagle populations. In December 2013, the US Fish & Wildlife Service adopted regulatory changes that extended the maximum term for programmatic "eagle take" permits from a five year period to a 30 year term. For the entire year the regulatory changes were proposed no formal consultation was held with tribal governments, tribal religious and spiritual leaders, and tribal conservation and environmental experts.

2. Ensure tribal participation in the implementation of the interagency Memorandum of Understanding for the "Protection of Indian Sacred Sites." Since the MOU was adopted December 4, 2012, tribes have been eager to participate in providing input and guidance for the protection of sacred places. In October and November of this year, the MOU Working Group has solicited applications for subject matter experts, but as of November 2014, the selection of these

individuals has not been announced. The MOU signatories should also draft an accurate context statement, explaining the need for the MOU and the policy changes, which includes an explanation of past failings in protection, confidentiality, communication, and violations of applicable laws. This policy statement will serve as a base to explain and evaluate ongoing policy changes to protect tribal sacred places.

3. Identify existing confidentiality standards and develop actual policies and guidance to address their lack of effectiveness. To protect and ensure the confidentiality of culturally sensitive information, the federal government should develop guidance for staff to protect sacred places without requiring specific information; develop detailed guidance on applicable disclosure laws and exceptions; direct staff to explain such laws prior to collecting information; and develop an overarching policy of a presumption to protect the confidentiality of information.

4. Revise Executive Order 13007 “Indian Sacred Sites” to replace the phrase, “Where appropriate,” with language stating “to the maximum extent” in the sentence referring to confidentiality. This was initially recommended by the USDA Office of Tribal Relations and USDA Forest Service Draft Report to the Secretary of Agriculture USDA Policy and Procedures Review and Recommendations: Indian Sacred Sites in 2011.

5. Require that all federal staff attend a mandatory training on working effectively with tribal governments. This effort to ensure effective collaboration should include the development of a comprehensive training on sacred places protection with the assistance of Native subject matter experts and extensive Native involvement within the timeline presented in the draft.

6. Sustain tribal consultation alongside streamlined energy projects. As the United States continues to focus on job creation and growth through the extraction of natural resources and the production of clean energy, the federal government must maintain consultation with tribes. Additionally, the Administration must continue to adhere to the laws, policies, and regulations already in place. The Administration must stay actively engaged with tribes that may be affected by proposed developments, especially if those areas hold cultural significance. Tribes must be guaranteed a seat at the table early and often so they can weigh in on all development proposals which may affect their citizens or their lands. The Administration should amend Executive Order 13604, “Improving Performance of Federal Permitting and Review of Infrastructure Projects,” to affirm its commitment to government-to-government consultation and recognition of tribal sovereignty. Executive Order 13604 expedites energy projects and places tremendous burdens on tribes by precluding government-to-government consultation, and thereby endangering tribal sacred places, burial grounds, and other cultural rights.

List of Agency Meetings with Tribal Leaders from December 1-4, 2014

Draft TNC Opening Remarks

NCAI Article: Lame Duck Session Priorities

Agency Meetings Taking Place During the Week of the White House Tribal Nations Conference

**Monday, December 1, 2014**

Advisory Council on Historical Preservation (ACHP)-- Roundtable Discussion

When/Where: 2:00-4:00PM / 401 F. St, NW, Room 337

Who's invited: Open to Tribal Leaders / Agency contact: Valerie Hauser 202-517-0194

ACHP, DOI, DOD, USDA, Energy-- Listening Session on Sacred Sites

When/ Where: 4:00-5:00PM / 401 F. St, NW, Room 337

Who's invited: Open to Tribal Leaders / Agency Contact: Valerie Hauser / 202-517-0194

USDA--Youth—Preparing for internships and jobs

When/ Where: 1:00-1:30PM / TBD—CNAY a possibility

Who's invited: Gen-I Youth Ambassadors/ Agency Contact: Leslie Wheelock / 202-294-1729

EPA-Listening Session

When/ Where: 2:30-3:30PM / 13th and Pennsylvania, NW William Jefferson Clinton South Entrance

Who's invited: Open to tribal leaders

Agency Contact: Marissa McInnis/ 202-564-2467

**Tuesday, December 2, 2014**

Treasury Department—Consultation

When/Where: 5:00-6:00PM / 1500 Pennsylvania Ave. NW, Room 3327

Who's invited: Tribal Leaders Only / Agency Contact: Elaine Buckberg / 202-666-2220

**Thursday, December 4, 2014**

Department of Labor - Workforce Innovation and Opportunity Act (WIOA) Tribal Consultation

When/Where: 3:00-4:30PM / DOL - 200 Constitution Avenue NW

Who's invited: public/ Agency Contact: Jeremy Bishop / 202-693-4607

Department of Transportation – Coffee and Listening Session

When/Where: 9:00-11:00AM / DOT-Media Center 1200 New Jersey Avenue, SE

Who's invited: open to the public/ Agency Contact: Maria Elena Juarez / 202-366-5687

USDA - Open House - with national Tribal Liaisons from Federal Land Management Agencies - FWS-DOI, BIA-DOI, USGS-DOI, BLM-DOI, NPS-DOI, USFS-USDA, plus NIFA-USDA, RD-USDA, NRCS-USDA, OTR-USDA, FEMA, and DoD

When/Where: 10:00AM-12:00PM / USDA Forest Service 201 14<sup>th</sup> Street, SW

Who's invited: public / Agency Contact: Steve Hart / [steve.hart@osec.usda.gov](mailto:steve.hart@osec.usda.gov)

IRS- Listening Session

When/Where: 4:30-5:30PM/ 1111 Constitution Ave. NW, Room 3313

Who's invited: Invite Only / Agency Contact: Christie Jacobs/ 303-570-9860

Department of Health and Human Services, Department of Justice, Department of Homeland Security- Interagency Listening Session on Human Trafficking

When/Where: 2:00-4:00PM / Administration for Children and Families, 901 D Street SW (Room 8W1)

Agency Contact: Katherine Chon / 202-401-9372

Department of Health and Human Services - Secretary's Tribal Advisory Committee Meeting

Thursday and Friday, December 4-5 / HHH 200 Independence Ave SW Washington DC 20201

Agency Contact: Stacey Ecoffey / (202) 690-6060 [Stacey.Ecoffey@hhs.gov](mailto:Stacey.Ecoffey@hhs.gov)

**Draft Talking Points for Secretary Sally Jewell  
2014 White House Tribal Nations Conference  
Wednesday, December 3, 2014**

*Suggested length: 8-10 minutes*

**I. WELCOME! (2 mins)**

- Honored to **welcome** you to 6<sup>th</sup> annual **White House Tribal Nations Conference!**
  - **Thank you** for traveling from near and far to share your voice with us
- Different look this year (Interior Bldg. under construction), but it's **still the same underlying principal** bringing us together: a **nation-to-nation relationship**
  - President Obama wanted opportunity for all 566 federally recognized tribes to come together and have **face-to-face dialogues** with him and his cabinet
  - **Conference is true reflection of the spirit & strength of the Obama Administration's commitment to Indian Country**
- Proud that this year's Conference has a **special focus – Supporting Native Youth** – our next generation of tribal leaders
  - Hope you'll recognize we've **worked to incorporate your feedback from last year** to make this year's conference even more meaningful (Ex: double break outs sessions, separated panel discussions, multiple days of program)
- **Importantly, we all understand that it's not just Conference Day** that we need to focus on the health, success and future of tribal communities – **it's every day.**

**II. Shared Commitment to Indian Country (1 min)**

- In past 20 some months, honored to visit over **20 tribes** around the nation
- Every visit, every day in this job – has **deepened my respect and admiration for you, the First Americans** – your spirit, wisdom and resilience
- Time spent in Indian Country **deepens my commitment** to making sure Interior is doing everything we can to **support your vision for a strong and prosperous future**

- Commitment I **share with the President**
- **Historic** visit to **Standing Rock Sioux Tribal Nation**
  - At 5<sup>th</sup> annual **White House Tribal Nations Conference**, made a promise to visit Indian Country this year – **he delivered**
  - I know he looks forward to addressing you later today on his reflections from that special trip.

### III. **UPDATE: White House Council on Native American Affairs** (6 mins)

- Obama Administration has made incredible **strides** in strengthening our **government-to-government** relationship ... but **more work to be done**
- President established White House Council on Native American Affairs last year
- As chair, held **4 meetings** – convening high number of cabinet members and senior White House officials
  - Continually refining council work to **respond to tribal concerns**
  - Can attest **Cabinet is fully and personally engaged** on issues
- Has already **increased interagency cooperation**

**Example: Education (one of my top priorities as Secretary)**

  - Working w/**Sec. Duncan** to transform/**redesign BIE**
  - This fall **announced \$1.2 million** to several tribes to begin researching, assessing and developing a plan **to establish a tribally managed school system, if that's what you want to do**
  - Using **whole-of-government** approach to respond to **multifaceted problem** - housing, healthcare, transportation
