Date: APR 22 2016

This letter is a partial records response to your Freedom of Information Act (FOIA) request dated March 27, 2016. Your request was referred to us from our Washington, DC FOIA Service Center and received by the Forest Products Laboratory's (FPL's) FOIA Coordinator, Judy Terrell, on March 28, 2016. You requested a copy of the following records:

"A printout or listing of Forest Products Laboratory research reports or contractor reports that are designated as NOT for public use or release, extracted from the FPL reports database. These might include such types of records as restricted reports, internal use only reports, proprietary reports, limited distribution reports, etc. [You] would like to get these records from all years in the bibliographic/reports database."

A thorough search was conducted by the FPL Assistant Directors of Research and Development, the Supervisory Librarian and the Acquisitions Group Leader. The search occurred during the time period of March 29, 2016 to April 3, 2016.

The FOIA does not require agencies to answer questions or create records such as reports or extract them from databases. However, as a courtesy, the FPL Librarian searched the bibliographic/reports database. She ran a data base report, resulting in a document containing 1575 pages. Attached are the responsive records, in the form of an electronic zip file. The documents in the report are being released in entirety. You may find further information by visiting the link to the FPL library catalog <http://cybertoolsforlibraries.com/cgi-bin/CyberHTML?USDAFSHO>.

Regarding your request for contractor reports, the Acquisition Group Leader provided a statement that "no report exists for both Procurement and Grants and Agreement staffs." For this portion of the request, we reply with a no records response.

Your request letter stated you are willing to pay fees up to the amount of \$30.00. The search turned up 1575 pages of responsive records at a duplication cost of \$597.20 and a search cost of \$4.00 (total cost of \$601.20). Because the records will be provided to you in an electronic format, the cost was minimal. Therefore, a decision was made to discretionarily release them to you at no charge.

The FOIA provides you the right to appeal the partial records response. Any appeal must be made in writing to the Chief, USDA, Forest Service, 1400 Independence Avenue, SW, Mail Stop 1143, Washington, DC 20250-1143, and be received by the Chief within 45 days of the date of this letter. You may also choose to send your appeal: (1) via email to [wo\\_foia@fs.fed.us](mailto:wo_foia@fs.fed.us), (2) via fax to (202) 260-3245, or (3) via Federal Express or UPS to 201 14th Street, SW, Washington, DC 20250-1143. The term "FOIA APPEAL" should be placed in capital letters on the subject line of the email or on the front of the envelope. To facilitate the processing of your appeal, please include a copy of this letter and/or the FOIA control number assigned to your FOIA request 2016-FS- FPL-03063.

Sincerely,

TONY L. FERGUSON  
Director, Forest Products Laboratory

Main Entry: Spinar, F. J.  
Title: The effect of accelerated aging on the physical  
characteristics of  
various types of moisture-vaporproof barriers and  
waterproof barriers /  
by Frank J. Spinar and C.E. Hrubesky.

Imprint: Madison, WI : U.S. Forest Service, Forest Products Laboratory, [1946?]

Physical Description: 30, [37] leaves

General Note: Project no: 207-17J80

Not for publication.

In cooperation with Army Air Forces.

Local Note: FPL Library has manuscripts only.

Topical Term: Accelerated aging.

Packaging materials.

Testing.

Personal Name: Hrubesky, C. E.

Corp. Name: Forest Products Laboratory (U.S.)

Main Entry: Millett, Merrill Albert.

Title: Exploratory investigations of factors affecting the low-temperature

properties of cellulose nitrate / by Merrill A. Millett, Richard C. Weatherwax and Ira T. Clark.

Imprint: Madison, WI : USDA Forest Service, Forest Products Laboratory, 1958-1961.

Physical Description: 1 v. (nos.1-7 + final) : ill. ; 26 cm. + Proposal for research and literature survey in same bound volume

General Note: Project no. TB-5-21.  
Not for publication.  
This work was performed by R. C. Weatherwax under the supervision of M. A. Millett in cooperation with Army Ordnance under technical supervision by the Picatinny arsenal. The objectives were (1) to obtain basic data relative to the behavior and properties of nitrocellulose in the temperature range between -60 degrees and +160 degrees F., and (2) to relate the properties studied to the physical and chemical nature of the basic cellulose and the resulting nitrocellulose.

Bibliography: Includes bibliographical references.

Added title page tit: Studies relating to the thermal variation of the physical properties of nitrocellulose : a literature survey taken from Chamical Abstracts 1929-1956

Topical Term: Nitrocellulose  
Cellulose  
Nitrocellulose--Thermal properties  
Low temperatures

Title: Fundamental studies on the characterization of  
 nitrating pulps  
 Imprint: Madison, WI : USDA Forest Service, Forest Products  
 Laboratory,  
 1952-1958.  
 Physical Description: nos. 1-19 + final in 4 v. : ill. ; 26 cm.  
 General Note: Work under this title was conducted in cooperation  
 with Army Ordnance  
 over the period beginning July 1, 1952 and ending  
 January 1, 1959.  
 Twenty-five quarterly progress reports were  
 prepared. All phases of the  
 research effort were assembled into a comprehensive  
 final report dated  
 November 24, 1958.  
 Total funding of the investigations under the above  
 title was  
 approximately \$350,000. Project designations and  
 dates were: TAI-5006B,  
 item v, July 1, 1952 to June 30, 1956. TAI-3603,  
 item i, July 1, 1956  
 to June 30, 1958. OAC 56-28, 57-14, C57-0014, July  
 1, 1955 to June 30,  
 1958.  
 An additional report series was produced in 1959  
 under another project  
 designation but same title.  
 "Not for publication" -- On covers.

Title: Hardening of wood with chemicals, particularly urea  
resins / by John

M. McMillen.

Imprint: Madison, WI : U.S. Forest Service, Forest Products  
Laboratory, [1943?]

Physical Description: 12 leaves

General Note: Project no: 300

Not for publication.

Vault copy includes appended Memio Reports : no.

1277, "Forest Products

Laboratory plastic wood" ; no. 1383, "Effect of

resin treatment and

compression upon the properties of wood" ; no.

1380, "Forest Products

Laboratory resin-treated wood (impreg)."

Local Note: FPL Library has manuscripts only.

Topical Term: Chemical modification of wood.

Corp. Name: Forest Products Laboratory (U.S.)

MARC# 92430 OPAC sort year value=1943

Added via EXPORT 2002/07/24.

Title: Production of high alpha prehydrolysis-sulfate pulp from French beech

wood / by F.A. Simmonds...[et al.]

Imprint: Madison, WI : U.S. Forest Service, Forest Products Laboratory, [1956?]

Physical Description: [20] leaves, [9] p.

General Note: Former class. no: PU 5-2-2 Si4P

Not for publication.

In cooperation with Army Ordnance, Washington, D.C.

Appendix is reprint titled "Purified hardwood pulps for chemical

conversion. II. Sweetgum prehydrolysis-sulfate pulps" by F.A. Simmonds,

R.M. Kingsbury, and J.S. Martin, published in TAPPI  
38(3):178-186, March 1953.

Local Note: FPL Library has manuscripts only.  
Topical Term: Fagus.

Sulfate pulping.

Geographic Name: France.

Personal Name: Simmonds, F. A.  
Martin, J. S.  
Kingsbury, R. M.  
Fahey, D. J.

Corp. Name: Forest Products Laboratory (U.S.)

Related Title: Purified hardwood pulps for chemical conversion.
