These employees reported to the Jackson, Mich., office to receive assignments, basic orientation, personal protective gear and truck assignments where needed. They will be mainly based out of Jackson, but will also work out of Ypsilanti and Battle Creek, Mich., to enable quicker responses to emergency situations.

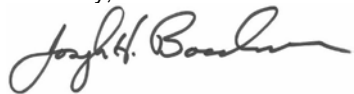

This transition to Amtrak maintenance will not come without future challenges. As our maintenance crews access this territory we anticipate learning more and future slow orders may be required to operate trains safely.

Regardless of these challenges, we are very excited about this opportunity as it will extend a long relationship with the state of Michigan for at least the next 20 years following the completion of the High Speed Rail projects. These projects include the replacement of the old signal system and upgrade of current track conditions. In addition, new track will be installed between Ypsilanti and Dearborn to address capacity issues between passenger and freight services in that area.

I am sure you will be happy to join me in congratulating MDOT for their vision and commitment to High Speed Rail. We are proud to be their partner and we are proud of our excellent team in Jackson.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
CEO and President

A Message from Joe Boardman

Dear Co-workers,

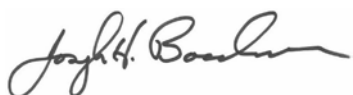

You have probably been hearing about sequestration discussions in Washington and some of you are wondering if it will impact our service. Congress and the Administration have to agree on how to resolve these across the board cuts that will impact our federal funding.

I want to assure you that we've been planning for this reduction in our operating and capital budgets and do not anticipate immediate cuts to service. We will continue to tighten our belts and focus on the bottom line. Hopefully, the sequestration debate will not last long. The continued lack of predictable federal appropriations makes proper budgeting and future planning extremely difficult for us.

I will let you know if our situation should change.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

I am very pleased to let you know of the successful negotiations which have resulted in ongoing agreements with both Maryland Transit Administration (MTA) and Connecticut Department of Transportation (CTDOT).

Amtrak and the MTA concluded negotiations of two new agreements taking effect on July 1, 2013 for a period of five years.

Under the new Northeast Corridor Access Agreement, MARC trains will continue to access the Northeast Corridor (NEC) between Perryville and Washington Union Station, including the use of Amtrak-owned stations. This agreement also allows for continuation of existing weekday service levels. The MTA may also request service expansions, which we will evaluate based on our current and future intercity needs. The access agreement will once again continue to support recapitalization on the NEC via the Joint Benefits Program. Additional capital support in the form of new storage fees and on-time performance incentive payments will now provide even greater financial contribution to recapitalization than in past agreements.

The MTA has agreed to have us continue to provide train crews and mechanical servicing for MARC Penn Line trains under the recently negotiated MARC Commuter Operating Agreement. This also covers other Amtrak services such as ticket selling, car washing, claims handling and Quik-Trak machine usage.

The Northeast Corridor Infrastructure and Investment Development business line (NEC IID) has also recently concluded negotiations with CTDOT related to Shore Line East commuter rail service. The amendment to the Shore Line East Commuter Operating Agreement will have Amtrak continue to provide train crews and mechanical servicing for Shore Line East trains, as well as continues to allow for access to Amtrak's infrastructure between New Haven and New London. This agreement is a three-year extension of the existing agreement, which expired yesterday.

Combined, these agreements will provide Amtrak with total payments of approximately \$370 million by these two state agencies, and keep over 150 Amtrak employees in service, dedicated to the operation of MARC and Shore Line East service.

The Amtrak negotiating team consisted of representatives of the NEC business line, Northeast Corridor business line, and the Finance and Legal departments. This coordinated effort is an example of the evolving corporate structure within Amtrak and highlights the successful collaboration of the recently-formed business lines.

Both of these agencies demonstrated real confidence in Amtrak by extending these agreements. In both cases, Amtrak was able to show consistent value and win the confidence of our state partners. These agreements not only strengthen Amtrak's bottom line, they strengthen important and valued relationships.

I would like to recognize our managers and employees for the excellent job you have done over the past five years. We are depending upon you to continue the professional and dedicated service you demonstrate on a daily basis.

Thank you for everything you do for Amtrak

Sincerely,

A Message from Joe Boardman

Dear Co-workers,

On July 26, 1990, the Americans with Disabilities Act (ADA) was signed into law to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” We are proud to recognize the 23-year anniversary of the ADA and are proud to serve as an important mode of travel for people with disabilities.

Accessibility for passengers with disabilities has historically placed Amtrak at a competitive advantage over other travel modes. With input from national disability advocacy groups and a robust program supported by collaborative teams throughout the company, we have taken significant steps to improve the travel experience for passengers with disabilities from trip planning, to purchasing tickets, to stations, to equipment and on-board services.

Over the past four years, Amtrak has:

- Held disability customer service training for front line employees.
- Begun planning initiatives that are underway for level-boarding and gap bridge plate projects at many stations.
- Installed wheelchair lifts or replaced aging and obsolete lifts where needed so that we now have in excess of 500 wheelchair lifts at our stations.
- Made accessibility improvements at more than 200 stations including repairs and upgrades to platforms, ramps and sidewalks and renovated entrance ways and restrooms.
- Either replaced or installed accessible Quik-Trak ticket kiosks in stations.
- Made improvements to Amtrak.com to allow passengers with disabilities to book online.

All Amtrak trains have accessible seating and restrooms, all long-distance trains have accessible bedrooms and Amtrak is the only mode of intercity transportation that provides a discount to passengers with disabilities and their companions.

Our advancements are reflected in part by the ridership growth of passengers with disabilities. Through June 2013, this segment has grown by 20 percent over the same period last year.

July 19, 2013 • Page 2 of 2

Since 2006, through our Great American Stations Project, Amtrak has been working to educate communities on the benefits of redeveloping train stations and making improvements to ensure stations are accessible for all. We have sponsored 10 Civic Conversations around the system touching over 200 Amtrak-served communities across the country. The purpose of these meeting is to bring together city officials, civic leaders and state officials to discuss station redevelopment, accessibility requirements and how Amtrak can serve as a partner in the process.

However, for all the progress we have made, there is still work that needs to be done. Upgrading stations and making them fully accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements.

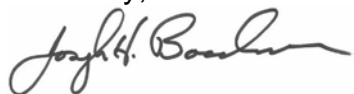

We own only a small percentage of the nearly 500 stations that are required to become ADA-compliant. We need to find a way to overcome the length of time it takes to work through the complexity of station ownership issues and we remain committed to working with all of the owners of the stations, platforms and parking facilities to create a nationwide rail system that is accessible to each and every employee and customer.

We are confident that we can build on the progress made to date and we plan to advance a robust program of station accessibility improvements in Fiscal Year 2014 if sufficient federal funding continues to be available. Making Amtrak service accessible to all individuals aligns with our Strategic Plan, specifically the goals of customer focus, safety and security and mobility and connectivity.

Providing accessibility to our trains, facilities and workplace is the right thing to do as a company because all of our customers and employees must be treated equally and without differentiation.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I wanted to update you on Amtrak's federal funding request.

Today, the House Appropriations Committee issued its FY 2014 budget numbers for transportation, including Amtrak.

The Amtrak number in the draft bill comes in at \$950 million: \$350,000 for operating and \$600,000 for capital and debt service. This represents a one third cut from our 2013 number of \$1.344 billion and is the lowest number since 2002.

This amount is just not workable and we believe that many members of Congress understand this.

We are not alone in this. The essential air service and Federal Aviation Administration facilities and equipment also received cuts and the High-Speed Rail and Intercity Passenger Rail Program were unfunded.

It is expected that the full House will vote on the bill after the July 4th recess.

This is a lengthy process and we have been down this road before. It is important that we continue to focus on running America's Railroad in the safest, most customer-focused and professional manner possible. I will continue to keep you posted as this process continues.

Thank you for everything you do for Amtrak.

special employee advisory

June 27, 2013 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

There are two pieces of news that I would like to share with you today.

Funding

In my advisory of June 19, I promised to keep you updated on Amtrak's federal funding request.

On Wednesday, the Senate Appropriations Subcommittee proposed a FY 2014 funding level for Amtrak of \$1.45 billion. This is a realistic and workable number. It recognizes the need for federal investment to operate and maintain the Amtrak national network, and to keep the Northeast Corridor the safe and reliable economic engine that it is today.

Even at this funding level, however, there is a significant amount of critical backlog infrastructure work that will not get done. In order for the nation's intercity passenger rail system to reach its full potential, Amtrak will need higher and sustained levels of federal capital funding.

Secretary of Transportation Anthony Foxx

The U. S. Senate confirmed Anthony Foxx as our next Secretary of Transportation. Amtrak Board of Directors Chairman Tony Coscia and I believe that Secretary Foxx will play a pivotal role in providing critical federal investments for advancing intercity and high-speed passenger rail projects that enhance service, improve reliability, expand capacity, reduce trip-times and increase speeds.

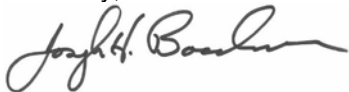

Tony and I welcome Secretary Foxx to the Amtrak board of directors where he will help shape the future of America's Railroad and further improve our record-breaking financial and operational performance.

As a former mayor of Charlotte, N.C., an Amtrak-served community, we believe Secretary Foxx understands that intercity passenger rail is a vital and necessary part of the national transportation network and provides mobility, connectivity and economic development across America in rural communities, small and medium sized towns, and major cities.

We look forward to working with him to deliver more and better intercity and high-speed passenger rail service to the nation.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

Last week the Amtrak board of directors elected Anthony R. Coscia to be its next chairman to help guide the future of America's Railroad® and carry out initiatives to increase ridership and improve operational and financial performance. In addition, the Amtrak board elected Jeffrey R. Moreland as vice-chairman.

An Amtrak board member since June 2010, and current chairman of its Audit and Finance committee, Coscia succeeds departing board chairman Thomas C. Carper whose term on the board expires this month.

"During my five years on the board of directors, Amtrak has made undeniable progress and all board members have worked together successfully, and in bipartisan fashion, to improve our nation's intercity passenger rail service," said Carper.

"I am confident Tony and Jeff will provide effective leadership, continue what is working while promoting new initiatives and work closely with President and CEO Joe Boardman to further transform Amtrak so it better delivers on its national mission to provide connectivity and mobility across the country," Carper added.

"It is an honor to serve as Amtrak's next chairman and I thank the Obama administration and many members from both houses of Congress whose support for Amtrak has been invaluable," Coscia said. "On behalf of the Board and Amtrak's employees I also want to thank Tom Carper and Nancy Naples for their exemplary service as their terms as board members come to an end.

"As chairman, I am committed to increasing ridership, strengthening Amtrak's operational performance and improving its financial position," he explained. "Over the many years that I have been involved in infrastructure, and especially over my last three years on Amtrak's board, I have come to recognize that passenger rail is vital to America's economic growth and to addressing our nation's growing need for mobility and connectivity."

Since joining Amtrak's board, Coscia has strongly supported investments in America's national rail network. In particular, he is a strong advocate for making improvements to rail corridors that link the nation's urban centers, such as the Northeast Corridor, and that

Produced by
Employee Communications

special employee advisory

March 18, 2013 • Page 2 of 2

connect parts of the country underserved by other modes of transit. He also supports investments in rail infrastructure so it can handle more trains and carry more passengers at higher speeds.

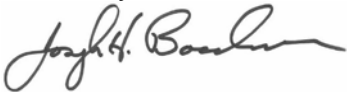

Coscia brings to the position an extensive background, including previously serving as chairman of the Board of Commissioners of the Port Authority of New York and New Jersey, and experience in redevelopment finance and corporate governance. Currently, he is a partner at the law firm of Windels Marx Lane & Mittendorf, LLP.

Jeffrey Moreland also has been an Amtrak board member since June 2010 and is the chairman of its Government Affairs and Legal & Corporate Affairs committee. He succeeds Nancy Naples as vice-chairman. He enjoyed a long career at BNSF Railway including several senior management positions in law and government affairs, and most recently as executive vice president for public affairs.

"I look forward to continuing to work with Tony, the other board members and Joe Boardman and his management team. I believe all of us working together will allow Amtrak to continue to make progress in achieving our goals," said Moreland.

I believe that the success of Amtrak is, in part, a result of the strong and collaborative relationship between management and the board of directors. Tony and Jeff have always brought passion and solutions to the discussion and their leadership will help carry Amtrak into the future and to continued improvements.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am pleased to announce the establishment of the corporate safety advocate position within the Office of the President. Mark McKeon will serve in that role effective May 14.

Mr. McKeon will report directly to me and will serve as my trusted advisor on safety programs. In partnership with the Corporate Communications department, the chief safety advocate will ensure that a consistent corporate safety message is communicated across all media platforms, highlighting success stories and emphasizing the human aspect of safety. This role will collaborate with key business line leaders, especially the chief safety officer and appropriate subject matter experts in the Safety department, to plan and implement strategies that embody Amtrak's commitment to safety. The corporate safety advocate will identify safety areas of concern, will assess relative safety risks and rewards of emerging safety technologies and solutions and will be an advocate for safety in the corporation, with our external partners and the public.

Mark has extensive experience in the rail transportation industry spanning over 40 years and most notably spent 30 of those years at the Federal Railroad Administration (FRA). Most recently, he was employed at the FRA as the special assistant to the associate administrator and chief safety officer. In that role, Mark implemented major provisions of the Railroad Safety Improvement Act of 2008. He chaired and managed the Railroad Safety Advisory Committee Passenger Hours of Service Working group, the Conductor Certification Working group, the Hours of Service Recordkeeping Working group and served as a senior advisor to the associate administrator and chief safety officer on safety and security issues having nationwide application. Prior to that, Mr. McKeon served as FRA's regional administrator in Cambridge, Mass., for 18 years. There he managed the federal and state Railroad Safety Oversight program in eight states and was responsible for federal safety oversight of the Northeast Corridor between Boston and Trenton. In addition, he served interim assignments as regional administrator in Chicago and Fort Worth. Mark was chairman of the Locomotive Engineer Review Board from 1992 to 2000 and a member of the Railroad Safety Board from 2000 to 2011.

Please join me in welcoming Mark. I look forward to your support of his efforts to continue Amtrak's goal to become North America's safest railroad for our employees and our passengers.

Sincerely,

Joe Boardman

A Message from Amtrak Board Chairman Anthony Coscia

Dear Employees,

On behalf of the Amtrak board of directors, I am pleased to report that we have approved a two-year renewable contract extension for Joe Boardman to serve as president and CEO of the company. Our decision recognizes Joe's achievements in improving the operational and financial performance of America's Railroad®, and helps ensure continuity of leadership critical to the ongoing implementation of the company's strategic plan.

Joe has been able to bring results and build considerable confidence among Amtrak's employees, passengers and supporters since he became president and CEO in November, 2008. We believe that he will continue to make progress and strengthen the company.

Joe's tenure as president and CEO has been marked by significant accomplishments by the company. Amtrak has increased ridership and revenue to record levels, reduced our need for federal operating support, began infrastructure upgrades, achieved the best ever system-wide on-time performance, championed the Safe-2-Safer program, introduced the Wi-Fi service and eTicketing, created and implemented a corporate strategic plan, made the decision to acquire new equipment, continues to proactively move ahead with the development of next-generation high-speed rail program in the Northeast Corridor in addition to completing numerous capital projects across the Amtrak network.

Joe is often seen greeting passengers and talking with employees and it is not uncommon for him to visit crew bases, commissaries, stations, yards and maintenance facilities. He has travelled over 200,000 miles on Amtrak trains since joining the company.

The board looks forward to continuing to work with Joe Boardman, his leadership team and the entire Amtrak family.

Sincerely,

Tony Coscia
Chairman, Amtrak Board of Directors

A Message from Joe Boardman

Dear Co-workers,

May 27 is Memorial Day, a time for us to commemorate all those whose lives have been lost in wars at home and abroad. Traditionally, the American flag is flown at half-staff from sunrise until noon, when it is quickly raised in honor of the fallen.

We often mark the day by attending hometown parades, planting flags in cemeteries and yards and attending family gatherings. But we all know that war affects many—mothers and fathers, siblings, children and friends—who lose a loved one fighting on behalf of our country.

For me and other veterans, Memorial Day offers an opportunity for quiet reflection and remembrance of those who did not return.

At 3:00 p.m. local time on Monday, we encourage all Amtrak employees to participate in the National Moment of Remembrance by taking a moment to observe, each in our own way, the Americans who have died while defending our nation. This year, as in the past, all of the engines on our system will sound one long whistle at this time, where safe operation permits, as a salute to those who died for our country.

Our thoughts also remain with our Amtrak employees who are currently on active duty and are deployed away from their families and friends.

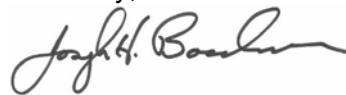

American railroads have long witnessed dedicated employees ship off to the front lines of battle, and have warmly welcomed them back in peacetime.

Skills in heavy machinery, electronics and other specialized fields often carry over well from a position in the armed forces to a railroad career. Today, Amtrak employs more than 1,500 veterans, and we have a goal of recruiting qualified veterans as 25 percent of all new hires by 2015.

As you enjoy the traditional start of summer, a season known for fun and relaxation, join me in taking a moment to remember those who fought and died in defense of our nation and its founding principles. Their ultimate sacrifice made possible our present and future—and the liberty to choose our own paths in life.

I wish you a happy, a safe, and above all, a peaceful Memorial Day.

Sincerely,

Joe Boardman
President and CEO

May 22, 2013 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

Yesterday afternoon I testified before the House of Representatives Subcommittee on Railroads, Pipelines and Hazardous Materials on understanding the cost drivers of passenger rail.

The operation of long-distance trains has been a core federal responsibility since 1971 and a federally-funded national system is the best way to keep costs low and provide customer choices that build ridership and develop economies of scale is part of the message I delivered.

Congress is clearly 100 percent in charge in directing how long-distance train service is provided in the United States and has been ever since it created Amtrak 42 years ago. Should Congress again decide in the next passenger rail reauthorization to continue a national system, Amtrak is dedicated to ensuring that long-distance trains are sustained and run as efficiently and effectively as possible.

Federal law requires Amtrak to operate a national passenger rail system that includes long-distance routes. The current law also includes a "Sense of Congress" statement that declares "long-distance passenger rail is a vital and necessary part of our national transportation system and economy."

Long-distance trains are a public service, provide national connectivity and mobility, feed riders onto the rapidly growing state-supported corridor services and deliver about half a million passengers to the Northeast Corridor each year. Since 2006, ridership on long distance trains is up nearly 27 percent and in FY 2012, six of the 15 routes set new ridership records. In addition, our long-distance trains serve 40 percent of America's rural population and are the only remaining scheduled intercity transportation in many places as intercity bus and airline service continue to disappear from smaller communities.

A focus on improving financial performance is achieving results for America's Railroad®, including: setting new records for ridership, revenue and on-time performance; covering 88 percent of operating costs with ticket sales and other revenues; reducing federal operating support to just 12 percent and significantly paying down debt.

Making Amtrak better is not solely about controlling and cutting costs. In FY 2012, about 50 percent of our expenses were for labor costs—an

amount not unique for the service industry and lower than the 55 percent average for the manufacturing sector in our country.

It is very important to understand that the national intercity passenger rail network delivers a huge public benefit and that every penny made is reinvested in Amtrak with an overwhelming majority of revenues and funding spent in America.

And much of this could not be done without everything that you do every day for Amtrak.

A complete copy of my testimony can be found at <http://www.amtrak.com/ccurl/605/21/Amtrak-Operates-LD-Trains-Direction-of-Congress-ATK-13-044.pdf>

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

Yesterday afternoon I testified before the House of Representatives Subcommittee on Railroads, Pipelines and Hazardous Materials on understanding the cost drivers of passenger rail.

The operation of long-distance trains has been a core federal responsibility since 1971 and a federally-funded national system is the best way to keep costs low and provide customer choices that build ridership and develop economies of scale is part of the message I delivered.

Congress is clearly 100 percent in charge in directing how long-distance train service is provided in the United States and has been ever since it created Amtrak 42 years ago. Should Congress again decide in the next passenger rail reauthorization to continue a national system, Amtrak is dedicated to ensuring that long-distance trains are sustained and run as efficiently and effectively as possible.

Federal law requires Amtrak to operate a national passenger rail system that includes long-distance routes. The current law also includes a "Sense of Congress" statement that declares "long-distance passenger rail is a vital and necessary part of our national transportation system and economy."

Long-distance trains are a public service, provide national connectivity and mobility, feed riders onto the rapidly growing state-supported corridor services and deliver about half a million passengers to the Northeast Corridor each year. Since 2006, ridership on long distance trains is up nearly 27 percent and in FY 2012, six of the 15 routes set new ridership records. In addition, our long-distance trains serve 40 percent of America's rural population and are the only remaining scheduled intercity transportation in many places as intercity bus and airline service continue to disappear from smaller communities.

A focus on improving financial performance is achieving results for America's Railroad®, including: setting new records for ridership, revenue and on-time performance; covering 88 percent of operating costs with ticket sales and other revenues; reducing federal operating support to just 12 percent and significantly paying down debt.

A Message from Joe Boardman

Dear Co-workers,

The numbers are in, and I'm happy to announce that FY13 proved to be another record-breaking year for ridership and revenue. Amtrak carried 31.6 million passengers and earned \$2.1 billion in ticket revenue; these figures represent increases of one percent and 4.2 percent, respectively, over FY12. They also follow on positive trends witnessed earlier this year: in March, we saw the best ridership month in the company's history, only to surpass it in July.

Amtrak services set new annual ridership records on 20 of 45 routes. Long-distance routes combined had the best year in two decades, while state-supported routes had the best year ever with 15.4 million passengers. Although Hurricane Sandy caused unprecedented damage to the Northeast Corridor (NEC) last fall, it still had its second best year in history and the popular *Northeast Regional* service set a new ridership record.

In ten of the last 11 years, we have marked new ridership records, and since ridership has risen by 50 percent since FY2000, This great accomplishment is not solely ours, but was made possible through strong, collaborative relationships with our state partners and the federal government. With their help, Amtrak will pursue the resources necessary to rebuild and enhance the passenger rail system for the next generation, including infrastructure to support high-speed rail.

I believe that all of these records point to our success in creating and marketing a product desired by the traveling public. In growing metropolitan areas, passenger rail is clearly a viable alternative to crowded roads and skies, while in many rural areas, Amtrak often is the only means of regularly scheduled, public intercity transportation. Amtrak also contributes to local economies along the routes we serve through the purchase of goods and services needed to maintain, operate and improve the national network. In addition, states and communities realize stations served by Amtrak are anchors for economic development, catalysts for historic preservation and tourism growth, sites for commercial and cultural uses and points of civic pride.

The success of the past few years can also be attributed to our five-year Strategic Plan, which ensures all major initiatives align with our long-term goals. Recently, we focused on the customer by introducing technologies such as eTicketing that appeal to changing travel habits, and worked out new cost-sharing agreements with 18 of our state

partners; enhanced the safety and security of the railroad through the continuation of Safe-2-Safer; increased mobility and connectivity with route extensions and expanded Thruway bus connections; evaluated methods to lessen our environmental footprint and encouraged financial and organizational excellence by using limited resources wisely.

On behalf of myself, our board of directors and management team, I appreciate all you do for the company, our partners and most importantly, our passengers. The records attained this year highlight your dedication to Amtrak. Sometimes, in a large organization like ours that spans the country, it can be hard to understand how all the pieces fit together. But your individual efforts build upon one another and contribute to our positive growth and good reputation. Whether you are in a station, corporate office, maintenance facility or on board the trains, your work ultimately impacts the health of Amtrak. By drawing on our collective strengths, I am confident we can lay a foundation on which America's Railroad will thrive for years to come.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

Late last week we announced that we are moving forward with a plan to eliminate our food and beverage losses over five years. This builds on successful initiatives implemented since FY 2006 that have increased the cost recovery rate from 49 percent to 65 percent.

Most of these initiatives involved providing our dining car staff with enhanced inventory management systems which permit closer tracking and deliver customer service improvements.

In inflation adjusted dollars, the Amtrak food and beverage loss declined \$31 million, from \$105 million in FY 2006 to a projected \$74 million in FY 2013; about a 30 percent move in the right direction.

Approximately 99 percent of the food and beverage loss is reported from long-distance trains that Congress requires Amtrak to operate, specifically costs associated with dining car service. Café car services across the system, on the other hand, essentially break even or make a positive contribution to the bottom line.

I believe it is time to commit ourselves to end food and beverage losses. We have a plan to expand successful initiatives, add new elements and evolve as technology leads us to better solutions.

The centerpiece of this plan is an improved management structure that has been put into place over the past year. It consolidates operations and accountability for food and beverage into a single department. This new organization also established a long-distance services general manager and route directors responsible for profit and loss on specific trains and they will identify opportunities for further cost savings and efficiencies.

Some of these opportunities will involve examining labor productivity and revenue performance, reducing spoilage, enhancing inventory controls and close tracking of onboard stock levels and exploring new pricing and revenue management options to align with customer needs and enhance cost recovery.

Recently, we started a pilot on the *Silver Meteor* to test the use of a touch-screen tablet-based solution to replace the manner in which dining car service attendants' take passenger meal orders and print receipts. We are using technology onboard trains aimed at improving customer service, automating financial and other reporting and eliminating the error prone and time consuming method of manual data entry.

Amtrak is involved in two other very important food and beverage programs 2014. We will roll out our Point of Sale (POS) system across our national

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 11, 2013 • Page 2 of 2

network. Currently in operation on *Acela Express*, *Surfliners*, *San Joaquins* and the *Capitol Corridor* trains, POS technology improves the customer experience by streamlining the check-out and receipt printing process in café and lounge cars, and allows onboard employees more time to focus on sales and customer service. It also provides real-time inventory status, better decision support and more flexibility to introduce targeting pricing and discounts.

“Cashless” sales for food and beverage will be tested on certain routes. The elimination of cash reduces transaction time and significantly reduces accounting expenses and the risk of fraud or abuse. Some department stores and the airline industry have been following this or similar models and have seen increased sales results.

This is going to take a while and I will keep you informed about our progress. I know how important dining car service is to you and the overall customer experience on our long-distance trains. The goal is to end our losses and improve our service quality and I look forward to hearing your feedback on how we are doing.

It is an exciting time and I am confident that we will succeed in these efforts just as we have in setting new revenue, ridership and on-time performance records these past years.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

It is with great pleasure that I am writing you today to let you know that all states covered by Section 209 of PRIIA have now signed agreements to share the costs of all affected routes. As a result of reaching agreement with 19 affected states and agencies, our 28 state-supported routes will continue to operate in the coming fiscal year.

As you know, Section 209 of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA) calls for states to share costs with Amtrak under a consistent formula for all routes less than 750 miles in length outside of the Northeast Corridor. We began preparing for Section 209 almost four years ago, and I know many of you have been working hard on it since then.

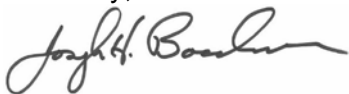

We didn't make Section 209 a reality by ourselves. Section 209 required us to work with our state partners to develop this formula, and we were fortunate to sit down with a group of committed state partners from California, Maine, North Carolina, Virginia and Wisconsin to figure out the details. Now that all states are paying under the same formula, we have created a level playing field where all state partners are being treated fairly under the same rules.

I wish I could tell you our work here is done, but in many ways it is just beginning. Our state partners have told us that in exchange for these new payments under Section 209, they are expecting Amtrak to continue to improve the services we provide them. It will be a challenge, but it is a challenge I know that Jay Commer, the general manager of our state-supported business line, and his team are ready to meet, and I know he has the support of all of you.

Thanks to all of you who played a part in this effort of developing the Section 209 policy, preparing the forecasts and the agreements and showing our state partners the value of what we offer their communities. I would also like to welcome our new state partners – Connecticut, Indiana and Massachusetts – and we look forward to many years of successful partnership with them.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

As you know, safety and security of our railroad, passengers and our employees is our number one corporate goal. The Safe-2-Safer (S2S) program represents our effort to drive the culture change in our company and to make it a safer place to work. One of the measures of our success is the contact rate – the number of individual conversations that Safe-2-Safer observers have with their peers every month. Since each one of those conversations is an opportunity to change someone's life, doing them frequently and well is important to our success.

The contact rate is a simple calculation – it is the number of total observations divided by the total number of people in Amtrak who are covered by S2S observers. I set an FY13 goal that by the end of the year Amtrak would achieve a 0.75 contact rate. We exceeded that goal by achieving a 0.84 contact rate and I want to congratulate you on this milestone.

This represents a significant achievement for us. Overall, Amtrak increased observations from 77,000 at the end of FY12 to more than 160,000 at the end of this past year. That means that in one year we more than doubled the total number of contacts that we had done in the past three years combined. I know this was a stretch goal, but you made it.

The importance of achieving this goes far beyond a number – it represents one-on-one, face-to-face conversations about safe behavior every day of the year. Every one of those conversations helps someone work more safely. And, every one of those conversations has the potential to change someone's life. If you point out to friends how they are putting themselves at risk, and they change what they are doing, they have just reduced their chance of being hurt. If what they were doing was something serious, you may have just saved lives – something you can't even measure, but definitely worth doing.

Being an observer is a noble calling and I realize not everyone can do it. I am truly grateful to all of you who are observers, and to all of you who will become observers in the future. Together we are changing this company and moving closer to our goal of being the safest and most secure railroad in North America. That's a goal worth pursuing, and we are getting there together.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Amtrak is now into our fifth year of the Safe-2-Safer process. We did a baseline survey of our culture in the fall of 2009, and a mid-term survey in the fall of 2011. During October we will be administering the third Organizational Culture Diagnostic Instrument (OCDI) to all of our employees. This survey gives you a chance to tell us how Safe-2-Safer is going, and whether it's changing the culture as we intend.

At Amtrak, we are striving to create a culture focused on reducing risk, a culture that prevents accidents and injuries. The first survey told us that injuries were not being reported due to the culture we had at the time so we changed some things. Since that time, injuries initially went up, as we expected, and have now begun to come down as a result of the Safe-2-Safer process really takes hold.

You told us in the two earlier surveys that we still had a lot of work to do to become a company that emphasizes collaboration and communication. I hope you'll agree we are turning a corner on those issues.

The purpose of this new OCDI is to assess and benchmark our organization as we exist in 2013. The survey administration will begin on October 1 and end on October 31. If you have questions about the survey, please contact your manager or your union leader.

The OCDI is again voluntary, but I'm asking that all of you to please participate in the survey. I need to hear from each of you to fully understand our strengths and where we need to improve. As with all of the surveys so far, I assure you that all of your responses will be anonymous.

Every employee in Amtrak will have a couple of ways to complete the survey. You may prefer pencil and paper, so we will have paper surveys available at all Amtrak locations. Or you may prefer to take it online, so that option will also be available.

After data from the survey is collected, it will be analyzed and a report written and presented to the Amtrak board of directors. The results will be used by Amtrak to continue moving toward an environment that will result in zero injuries. As in the past, the formal OCDI report will be posted on the company Intranet so all employees can read it and I will let you know when that happens.

September 4, 2013 • Page 2 of 2

We said at the outset of the Safe-to-Safer process that in order for it to be successful we needed to work together without fear of retribution. Over 110,000 peer-to-peer observations have been completed, and no one has received any kind of discipline from them. Hundreds of barriers identified and discussed in those observations have been removed.

Each of those observations and the feedback from peers has enabled an employee somewhere to change from an at-risk behavior to a safe one. For most of us, that is a life-changing event. While peer observers never know the injuries they have prevented, we can see that these changes are occurring all across our railroad. That is certainly a different culture than we had before Safe-2-Safer was introduced.

Your participation in this survey process is important. Your responses will help us plan the next steps in continuing the process of strengthening of our culture and safety climate.

Thank you for everything you do for Amtrak and for your participation in the OCDI.

Sincerely,

Joe Boardman
President and CEO

Amtrak-Issued Identification Cards

In light of this week's events at the Washington, D.C., Navy Yard it is appropriate to remind employees and contractors of the requirement and importance of wearing your Amtrak- issued photo identification cards (Smart IDs). The mandatory display of these Smart IDs enhances security capabilities for the safety of our employees, facilities and customers.

All Amtrak employees and contractors are to display your badges at all times, protect your Smart IDs and encourage those around you to visibly wear your Smart ID on Amtrak property.

Please remind your fellow employees and contractors to visibly display their Smart IDs. Please help set the example and make an important contribution by politely and professionally asking individuals to visibly display their Smart IDs while on Amtrak property.

Avoid "piggybacking" by being aware of who is around you when entering secure locations. If an individual does follow closely behind you through a secured door and does not visibly show the Amtrak-issued Smart ID, let them know that you can escort him/her to a security desk for assistance. If that is met with refusal, please call **Amtrak Police at 1-800-331-0008**.

The Smart ID is Amtrak property and must be protected by each of us. Employees are not to lend or give their Smart ID to anyone, nor alter it in any way. Help safeguard Amtrak employees, customers and assets by properly protecting your Smart ID.

If your Smart ID is lost or stolen, please immediately report this loss or theft to your supervisor and the Smart ID administration office via email (SmartID@amtrak.com) or phone (202-906-3639/777-3639). If you believe that your Smart ID is stolen, please also immediately notify the **Amtrak Police at 1-800-331-0008**.

Working together we can make a difference.

A Message from Joe Boardman

Dear Co-workers,

As many of you know, October 1, 2013, is the implementation date for Section 209 of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA). Section 209 calls for states to share costs with Amtrak under a consistent formula for all routes less than 750 miles in length outside of the Northeast Corridor.

There are 19 states and 28 routes affected by Section 209, and we have been working closely with these states to have them begin funding a portion of the full costs of these routes under the Section 209 formula beginning on October 1.

In an April 25 Special Employee Advisory, I said that we had sent letters to the governors of these states letting them know that if we did not have agreements in place by October 1, Amtrak would be forced to end service on the affected routes. This letter also notified the governors that under that scenario, the last day of service would be October 16, 2013.

As of today, **we have final agreements with seven states.** They are Virginia, Missouri, Oklahoma, Texas, Wisconsin, Oregon and Washington.

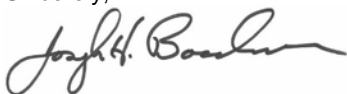

We are still working to finalize agreements with Connecticut, Maine, Massachusetts, New York, Pennsylvania, Vermont, North Carolina, Illinois, Indiana, Michigan and California before the start of the new fiscal year on Oct. 1. In several of these states, we are very close to completing negotiations.

I know that everyone at Amtrak and in these states where we do not yet have agreements is working diligently to conclude them as soon as we can. However, in cases where we do not have a signed agreement in the near future, we must begin planning for the possibility that some service will end. For many of these trains, we have been working closely with our state partners for years in developing the routes, and it is hard to imagine any interruption in service. Nevertheless, the law prohibits us from running these services without financial support from the states, and we are required to plan for this outcome.

Many of the routes in question have received significant investments from our federal and state partners, and all have seen tremendous growth in ridership in recent years. Beginning next week, employee notices must go out to locations directly affected by any potential service suspensions. I am aware that sending out these notices will be a distraction to all of us. We will continue doing everything we can to conclude these negotiations and get agreements signed.

Please continue to show our state partners and passengers the value of the services that are at stake. Thank you for everything you do, and we will continue to keep you informed.

Sincerely,

Joe Boardman
CEO and President

A Message from Joe Boardman

Dear Co-workers,

Amtrak is now into our fifth year of the Safe-2-Safer process. We did a baseline survey of our culture in the fall of 2009, and a mid-term survey in the fall of 2011. During October we will be administering the third Organizational Culture Diagnostic Instrument (OCDI) to all of our employees. This survey gives you a chance to tell us how Safe-2-Safer is going, and whether it's changing the culture as we intend.

At Amtrak, we are striving to create a culture focused on reducing risk, a culture that prevents accidents and injuries. The first survey told us that injuries were not being reported due to the culture we had at the time so we changed some things. Since that time, injuries initially went up, as we expected, and have now begun to come down as a result of the Safe-2-Safer process really takes hold.

You told us in the two earlier surveys that we still had a lot of work to do to become a company that emphasizes collaboration and communication. I hope you'll agree we are turning a corner on those issues.

The purpose of this new OCDI is to assess and benchmark our organization as we exist in 2013. The survey administration will begin on October 1 and end on October 31. If you have questions about the survey, please contact your manager or your union leader.

The OCDI is again voluntary, but I'm asking that all of you to please participate in the survey. I need to hear from each of you to fully understand our strengths and where we need to improve. As with all of the surveys so far, I assure you that all of your responses will be anonymous.

Every employee in Amtrak will have a couple of ways to complete the survey. You may prefer pencil and paper, so we will have paper surveys available at all Amtrak locations. Or you may prefer to take it online, so that option will also be available.

After data from the survey is collected, it will be analyzed and a report written and presented to the Amtrak board of directors. The results will be used by Amtrak to continue moving toward an environment that will result in zero injuries. As in the past, the formal OCDI report will be posted on the company Intranet so all employees can read it and I will let you know when that happens.

September 4, 2013 • Page 2 of 2

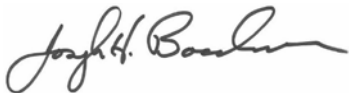

We said at the outset of the Safe-to-Safer process that in order for it to be successful we needed to work together without fear of retribution. Over 110,000 peer-to-peer observations have been completed, and no one has received any kind of discipline from them. Hundreds of barriers identified and discussed in those observations have been removed.

Each of those observations and the feedback from peers has enabled an employee somewhere to change from an at-risk behavior to a safe one. For most of us, that is a life-changing event. While peer observers never know the injuries they have prevented, we can see that these changes are occurring all across our railroad. That is certainly a different culture than we had before Safe-2-Safer was introduced.

Your participation in this survey process is important. Your responses will help us plan the next steps in continuing the process of strengthening of our culture and safety climate.

Thank you for everything you do for Amtrak and for your participation in the OCDI.

Sincerely,

Joe Boardman
President and CEO

Amtrak-Issued Identification Cards

In light of this week's events at the Washington, D.C., Navy Yard it is appropriate to remind employees and contractors of the requirement and importance of wearing your Amtrak- issued photo identification cards (Smart IDs). The mandatory display of these Smart IDs enhances security capabilities for the safety of our employees, facilities and customers.

All Amtrak employees and contractors are to display your badges at all times, protect your Smart IDs and encourage those around you to visibly wear your Smart ID on Amtrak property.

Please remind your fellow employees and contractors to visibly display their Smart IDs. Please help set the example and make an important contribution by politely and professionally asking individuals to visibly display their Smart IDs while on Amtrak property.

Avoid "piggybacking" by being aware of who is around you when entering secure locations. If an individual does follow closely behind you through a secured door and does not visibly show the Amtrak-issued Smart ID, let them know that you can escort him/her to a security desk for assistance. If that is met with refusal, please call **Amtrak Police at 1-800-331-0008**.

The Smart ID is Amtrak property and must be protected by each of us. Employees are not to lend or give their Smart ID to anyone, nor alter it in any way. Help safeguard Amtrak employees, customers and assets by properly protecting your Smart ID.

If your Smart ID is lost or stolen, please immediately report this loss or theft to your supervisor and the Smart ID administration office via email (SmartID@amtrak.com) or phone (202-906-3639/777-3639). If you believe that your Smart ID is stolen, please also immediately notify the **Amtrak Police at 1-800-331-0008**.

Working together we can make a difference.

A Message from Joe Boardman

Dear Co-workers,

Monday is Veterans' Day, which some of our older relatives and friends may still refer to as "Armistice Day."

The holiday, first observed in 1919, originally marked the end of fighting—the armistice—in the First World War, which took place at the eleventh hour of the eleventh day of the eleventh month of 1918.

The largest, most brutal war the world had ever known was over. Although the following weeks and months were a time of joy in celebration of newfound peace, they were also a period of sorrow and reflection as family and friends remembered the loved ones who would not return from across the Atlantic.

In a Congressional resolution passed in 1926, it was noted that November 11 "should be commemorated with thanksgiving and prayer and exercises designed to perpetuate peace through good will and mutual understanding between nations." Americans were encouraged to honor those who fought in the war with parades and community gatherings.

Following World War II and the Korean War, President Eisenhower signed a law in 1954 to broaden the holiday to honor all veterans of American wars.

To my fellow veterans, thank you for your service to our nation, for

defending the right to liberty and democratic traditions upon which it was founded.

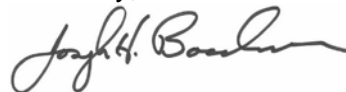

To those who have not served in the armed forces, I encourage you to look around you. Amtrak employs more than 1,500 veterans in all areas of the company, and one of your co-workers has likely served in the Army, Navy, Marine Corps, Air Force or Coast Guard.

Specialized skills in heavy machinery, electronics and other fields often carry over from a career in the armed forces to one in railroading. This spring, Amtrak established a goal of recruiting qualified veterans as 25 percent of all new hires by 2015. To date, we've partnered with numerous companies to hold veterans' hiring fairs across the country.

If you've been out on the system recently, you may have seen our Veterans' Locomotive, whose red, white and blue paint scheme and 50 stars commemorate the 50th anniversary of the Vietnam War and also honors all those who have served in our nation's armed forces.

I wish you a happy, peaceful Veterans' Day.

Sincerely,

Joe Boardman
CEO and President

AMTRAK CONTINUES TO MONITOR BOSTON MARATHON EXPLOSIONS UPDATES; EMPLOYEES ASKED TO REMAIN VIGILANT

- Amtrak continues to monitor the developments surrounding the explosions this week. The testing of the structural fasteners, as part of the ceiling repair project, has been rescheduled for 4:30AM, Thursday, April 18 (tomorrow).
- All testing will be completed prior to 7AM.
-
- The tests will involve shooting several metal “nails” into steel in the attic area above the Main Hall with a powder-actuated tool. In addition to testing the strength and adequacy of various fastener sizes, another aspect of this test is to judge how audible the popping sound of this tool will be to Union Station patrons and to make any necessary adjustments for construction. Previous versions of this tool have been quite loud, not unlike a large pistol, although we’re told the newer version is somewhat quieter.
-
- Please pass on this information on to any concerned parties not included in this distribution.
-

A Message from Joe Boardman

Dear Co-workers,

Fiscal Year 2013 marked another strong year for Amtrak thanks to the hard work and collaboration of our employees. Together, we improved on customer satisfaction system-wide, achieved record revenue and ridership and reduced our operating ratio as the gap between our operating expenses and revenues continued to shrink.

As a result, in FY13 we beat our targeted reduction in our net operating loss by \$11 million.

We also successfully reorganized our Operations department into three business lines: Northeast Corridor, Long-Distance and State-Supported Services, and appointed experienced, capable leaders for each of the new business lines.

All of these things would not be possible without the dedication, perseverance and performance of our people. Throughout the system, we made hard decisions about where to reduce expenses, found new ways to enhance the customer experience and we embraced the challenges and changes inherent in one of the largest reorganizations Amtrak has ever experienced.

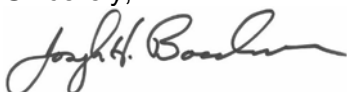

It is with great pride that I announce that due to our hard work and achieved results, we will be awarding performance-based incentives under our new Short Term Incentive (STI) program for our eligible non-agreement employees. The STI payment will be made in a separate payment on December 20.

In the next two weeks, you will receive a personalized statement at home outlining our final financial results, achievement of our corporate goals and the level of your individual award.

Together we have placed Amtrak in an excellent position to make additional progress and improvement over the coming years in providing the safest and most enjoyable transportation to our customers. Thank you for all you do to make our success possible.

I wish you and your families a healthful and happy holiday season and wonderful New Year.

Sincerely,

Joe Boardman
President and CEO

Mr. Boardman Named “Railroader of the Year”

Yesterday, *Railway Age* named Joe Boardman, our president and CEO, as their 51st Railroader of the Year.

“Joe Boardman, who came to Amtrak after his tenure as Federal Railroad Administrator, has been chief executive for the past five years, far longer than any of his post-Graham Claytor predecessors,” said *Railway Age* editor-in-chief William C. Vantuono. “Under his watch, Amtrak has posted record ridership and revenues, ordered a new fleet of electric locomotives for the Northeast Corridor and new single-level long-distance cars, developed a long-term strategy for additional new rolling stock acquisitions and is effectively administering major capital programs. Boardman has a sustainable vision for the future of U.S. intercity passenger rail, which includes higher-speed services. As such, he is a deserving recipient of our Railroader of the Year award.”

Mr. Boardman is the first Amtrak chief executive to be given this honor since 1989 when W. Graham Claytor Jr. was the recipient.

“My selection for this award is really a tribute to the men and women of Amtrak who are responsible for the safe operation of our trains, transforming our business culture, improving our customer service, enhancing our safety and security, planning for our future and strengthening our focus on the bottom line,” said Mr. Boardman. “We are accomplishing a great many things and I am proud of all Amtrak employees in helping to make it happen.”

Mr. Boardman will be honored on March 11, 2014, at Chicago’s Union League Club. *Railway Age* will feature Mr. Boardman in the January 2014 cover story

We will post video highlights of the interview and provide a link to the online article when available.

A Message from Joe Boardman

Dear Co-workers,

I am pleased to announce that Jason D. Molfetas is joining Amtrak today as chief information officer (CIO) to lead the company's information technology (IT) team, and develop and implement world-class state-of-the art systems to support customer service initiatives, enhance business operations and improve financial performance. He will report directly to me.

Mr. Molfetas brings to Amtrak more than 28 years of experience in the IT industry. He most recently served as senior vice president and CIO for Recall, an Australian-based global company involved in secure information management and logistics, digital media and data protection. He simultaneously held the position of general manager for its Brazilian operations.

Prior to joining Recall, Mr. Molfetas served as CIO at Westcon Group and has held global executive positions at Xerox Corporation and Pearson, Publishing, PLC.

His leadership skills and expertise in the IT field will allow us to continue building the partnerships and the new technology systems to advance Amtrak into our bright future.

I would like to express my appreciation to Dee Waddell, acting chief information officer. Being in an acting position is not easy and Dee's leadership and technical knowledge has served us well.

Please join me in thanking Dee and welcoming Jason to America's Railroad.

Sincerely,

Joe Boardman
President and CEO

Amtrak Policy Prohibiting Harassment and Intimidation for Injury and Illness Reporting

Amtrak is committed to complying with the Federal Railroad Administration's accident reporting regulations as set forth in 49 CFR Part 225 and the Federal Rail Safety Act's whistleblower protections set forth in 49 U.S.C. 20109.

Accordingly, Amtrak requires the accurate reporting of all accidents, incidents, injuries and occupational illnesses arising from the operation of the railroad completely and in a timely manner. Amtrak will, under no circumstances, tolerate harassing or intimidating conduct by any employee that is calculated to discourage or prevent any individual from receiving proper medical treatment or from reporting an accident, incident, injury or occupational illness. Amtrak will not tolerate retaliation for accident, incident, injury or occupational illness or avoidance (or attempted avoidance) of the Federal Railroad Administration (FRA) reportability through coercion, medical interference or other improper means.

Any employee who engages in harassment, intimidation, retaliation, interference or other prohibited conduct described above will be subject to discipline, up to and including termination. In addition, civil monetary penalties can be assessed, by the FRA, against any railroad employee, executive, manager or supervisor, who willfully causes a violation of or non-compliance with any part of 49 CFR Part 225. Furthermore, Amtrak will take immediate disciplinary action, up to and including termination, against any employee who disciplines an individual in retaliation for reporting an injury or who makes any attempt to deny, delay or interfere with medical treatment, which are both prohibited activities under the FRSA, 49 U.S.C. 20109.

Any employee who has reasonable grounds to believe this policy statement has been violated should contact the toll-free Amtrak Helpline at 866-908-7231. The Equal Employment Opportunity Compliance office (EEOC) will conduct an inquiry immediately following the receipt of the complaint.

If the assigned investigator finds that sufficient evidence exists to support the complaint, a comprehensive investigation will be initiated. Should the inquiry determine that insufficient information exists to support the complaint, the employee will be notified and the case administratively closed.

Employees will be provided whistleblower protection from any retaliatory action taken as the result of reporting conduct they reasonably believe violates this policy. Employees shall be free from restraint, interference, coercion or reprisal for communicating directly or indirectly, information that they believe indicates violation of law or company policy.

A Message from Joe Boardman

Dear Co-workers,

I am very pleased to announce that Gerald Sokol, Jr. is joining Amtrak on December 3 as our new chief financial officer (CFO) reporting directly to me.

As CFO, Mr. Sokol will be responsible for corporate finance, business forecasting and development of growth strategies to help secure the long-term viability of our company. I believe that Jerry's talent and experiences are valuable assets that will further improve our financial performance with the goal of strengthening our bottom line. I would expect that he will assist us further in advancing our significant progress in financial performance and improving our financial metrics.

He comes to us with 27 years of consecutively responsible executive-level experience most recently as president and CEO of Vertis Corporation, a \$1.2 billion revenue direct mail and newspaper insert printing company. His prior experience encompassed several leadership roles at AOL, including executive vice president of AOL Access Finance, Operations and Strategy; executive vice president, AOL International Finance and Strategy and senior vice president, AOL International Finance and Operations.

From 1997 to 1999, Jerry held various positions with NTN Communications, Inc. including CFO, CEO and acting chairman of the board. He also spent nine years in various positions at Tele-Communications, Inc., at the time the nation's largest cable TV company.

Please join me in welcoming Jerry to America's Railroad.

Dan Black has been the acting CFO since May 2013 and has performed most admirably in this capacity. He has been a very collaborative and engaged member of the Executive Committee and I thank him for his service, especially his contributions during the PRIIA Section 209 process. Dan will assume his former position as assistant vice president of financial analysis and I am glad that we can still turn to him for guidance.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman

Message from Corporate Medical Director Dr. Paul McCausland

We have been made aware that a passenger has been diagnosed with a communicable disease.

Amtrak is collaborating with both the Centers for Disease Control and Prevention (CDC) and New York health authorities to investigate this matter.

Amtrak employees who are considered likely to have had significant contact with the passenger have been identified and referred for medical evaluation and this evaluation is ongoing.

To date, none of our employees who were evaluated have been found to have any active disease, none are contagious and all may continue to work normally.

Based on discussions with the CDC and New York health authorities, no other Amtrak employees are presently considered to be at risk of infection from incidental exposures to the passenger while in transit.

Our employees will be notified promptly if the situation changes due to the ongoing investigations by the CDC and New York health authorities.

Amtrak's protocol for dealing with communicable disease can be found on the corporate Intranet by clicking the following link:

[http://wiki.corp.nrpc/display/PublicHealth/Serious+Communicable+Disease+Protocol+\(SCD\)](http://wiki.corp.nrpc/display/PublicHealth/Serious+Communicable+Disease+Protocol+(SCD)).

Thank you.

A Message from Chief of Police Polly Hanson

Amtrak Colleagues,

Amtrak is partnering with Operation Lifesaver (www.oli.org) and other agencies across the United States to celebrate International Level Crossing Awareness Day (ILCAD) on May 7.

Since 2009, the International Union of Railways has been coordinating the ILCAD, and in 2012 more than 40 countries around the world participated in this celebration.

Amtrak, Operation Lifesaver state program leaders and safety partners from the railroad industry, state government agencies, local law enforcement, communities and other groups will participate in activities across the country during this week, in conjunction with ILCAD. This year, 45 countries worldwide are holding events in observance of ILCAD.

A variety of events will occur at Amtrak stations and other locations in 25 participating states to illustrate the importance of safe behavior at grade crossings and around train tracks.

Events include crossing safety community activities, state proclamations, posters and banners, special trains, commuter rail station displays, positive reinforcement exercises, outreach to professional truck drivers, school safety presentations, special training events, media interviews, news releases and involvement of social media.

The full list of events and locations is included with this advisory.

Sincerely,

Chief Polly Hanson
Amtrak Police Department

A Message from Chief of Police Polly Hanson

Amtrak Colleagues,

Human trafficking is a terrible crime of modern-day slavery where criminals profit from control and exploitation of their victims. Human trafficking is also often hidden in plain sight. Have you observed human trafficking while at work, or in your local community? Would you know the indicators of human trafficking if you witnessed it first-hand?

Amtrak partnered with the Department of Homeland Security (DHS) and the Department of Transportation (DOT) and made a commitment to educate all Amtrak employees on how to identify and report suspected cases of human trafficking. While there is no evidence that human traffickers are making particular use of our trains, we can be valuable partners in identifying and reporting potential cases.

Amtrak has worked closely with DHS and DOT to prepare educational materials for distribution to all employees across our national network. The flyer attached to this message contains valuable information that outlines the definition of human trafficking, defines who is at risk, and assists you in identifying important indicators.

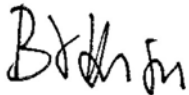

Human trafficking computer-based training has also been available online, and can be accessed via the Amtrak Intranet, through the Employee Information Portal under the Training section. All employees are encouraged to review the interactive online training as well.

You can access the human trafficking computer-based training course by following the links below:

[Course Catalog](#) > [Security Awareness](#) > [DHS Human Trafficking General Awareness](#) > Human Trafficking General Awareness CBT

Please take the time to familiarize yourself with the information in the attached flyer, and online if possible. Remember that if you suspect that you are a witness to the crime of human trafficking, contact the Amtrak Police Department at **(800) 331-0008**.

Sincerely,

Chief Polly Hanson
Amtrak Police Department

Winter Storm Impacting Amtrak Operations

As weather conditions deteriorate along the Northeast Corridor, we continue to adjust service in order to best accommodate passengers with travel plans in and around New England this weekend. Due to high winds and heavy snowfall, Amtrak is reducing service between New York and Boston.

There will be no *Acela Express* service between New York and Boston on Saturday, February 9. *Acela Express* service between New York and Washington will operate as scheduled.

Southbound *Northeast Regional* service out of Boston South Station will operate a limited schedule starting with the 11:40 a.m. departure of train # 163.

Northbound *Northeast Regional* service out of New York Penn Station will operate a limited schedule starting with the 10:00 a.m. departure of train # 162.

In addition, the following service adjustments have been made for Saturday:

- Most *Springfield Shuttle* service (New Haven, Conn. - Springfield, Mass.) is cancelled.
- *Vermont* service will not operate between Springfield, Mass. and St. Albans, Vt.
- *Lake Shore Limited* train # 449 will not operate between Boston and Albany, N.Y.
- *Empire Service* will operate on a reduced schedule between Albany, N.Y. and New York Penn Station.

A determination about service on the *Downeaster* (Brunswick, Maine - Boston) will be updated later and passengers notified.

Northeast Regional and *Acela Express* service south of New York, as well as *Keystone Service* are not affected at this time.

Amtrak crews continue to monitor the progress of this major winter storm and are working to restore full service as quickly as possible.

Information about Sunday service will be made available tomorrow.

During this weather event, arrangements have been made with the local law enforcement agencies that Amtrak **employees with proper company identification**, going to or coming from work, or responding

We will continue to keep you advised about any important developments as they are known.

Please be safe.

special employee advisory

February 13, 2013 • Page 1 of 1

Message from Corporate Medical Director Dr. Paul McCausland

We have been made aware that a New York-based employee was hospitalized on Tuesday, February 12, 2013, with a serious illness.

Amtrak has been in contact with the New York Department of Health and has received assurance that our employees are unlikely to contract this illness. We have been advised by the Department of Health that no medical evaluation or treatment is recommended for our employees. We will notify you if additional information becomes available that changes this recommendation.

The following information is being provided to answer questions that you may have about the situation:

How is the disease spread?

The disease is spread by ***prolonged close contact with respiratory and throat secretions, like spit***, from an infected person. Examples of prolonged contact include living in the same household or engaging in intimate activities, such as kissing and sexual contact. Fortunately, the infection is not as contagious as the common cold or the flu. Also, it is not spread by casual contact or by simply breathing the air where a person has been.

Should people who have been in contact with an infected individual receive treatment?

Casual contact, as might occur in an office, factory or other work setting is not usually sufficient enough to cause concern.

Only people who have been in ***prolonged close contact*** (household members, intimate contacts, health care personnel performing mouth-to-mouth resuscitation, day care center playmates, etc.) need to be considered for preventive treatment. Such individuals should contact their health care provider. Individuals who are immunocompromised have a higher risk of disease and should discuss this with their health care provider.

What are the symptoms I should be aware of?

As noted above, the risk of contracting the disease in the workplace is low. However, contact your health care provider as soon as possible if you experience a high fever, headache, stiff neck or rash. Other symptoms could include nausea, vomiting, sensitivity to light and mental confusion.

When do symptoms appear?

The symptoms may occur two to 10 days after exposure, but usually within five days.

AMTRAK HONORED TO CARRY SEN. LAUTENBERG BACK TO WASHINGTON, D.C.

WASHINGTON -- Amtrak Chairman Tony Coscia and President and CEO Joe Boardman made the following statement:

With the passing of U.S. Senator Frank Lautenberg, the nation has lost a dedicated public servant who valiantly served the American people in time of war and peace. A World War II veteran, successful businessman and national leader, Amtrak is honored to be chosen to carry him back to Washington, D.C. one final time.

During his long career, he championed many causes and provided essential leadership to improve the country's transportation infrastructure in order to advance economic growth, increase mobility and connect the nation. In his eyes, passenger rail was equally important as all other modes of transportation.

He was a true friend of Amtrak who deeply believed in the national mission of America's Railroad and in the people who do every facet of work to make this railroad run. Time and time again he fought for and delivered what was needed to maintain and grow the Amtrak national network, particularly for the Northeast Corridor which runs through his beloved New Jersey.

While we mourn his passing, intercity rail passengers today, and generations of Americans yet to come, will benefit from his leadership on rail transportation issues.

Thank you, Sen. Lautenberg, for your service to the nation.
You have arrived at your final station.

Amtrak Participates in International Level Crossing Day

Amtrak is partnering with Operation Lifesaver (www.oli.org) and other agencies across the United States to celebrate International Level Crossing Awareness Day (ILCAD) on May 7.

Since 2009, the International Union of Railways has been coordinating the ILCAD, and in 2012 more than 40 countries around the world participated in this celebration.

Amtrak, Operation Lifesaver state program leaders and safety partners from the railroad industry, state government agencies, local law enforcement, communities and other groups will participate in activities across the country during this week, in conjunction with ILCAD. This year, 45 countries worldwide are holding events in observance of ILCAD.

A variety of events will occur at Amtrak stations and other locations in 25 participating states to illustrate the importance of safe behavior at grade crossings and around train tracks.

Events include crossing safety community activities, state proclamations, posters and banners, special trains, commuter rail station displays, positive reinforcement exercises, outreach to professional truck drivers, school safety presentations, special training events, media interviews, news releases and involvement of social media.

The full list of events and locations is included with this advisory.

Message from Corporate Medical Director Dr. Paul McCausland **Follow-up to April 11, 2013 Special Employee Advisory**

Amtrak was previously notified by the Centers for Disease Control and Prevention (CDC) that a passenger had been diagnosed with a communicable disease.

Amtrak employees who were considered likely to have had significant contact with the passenger were identified and referred for medical evaluation. Those evaluations have been completed.

None of our employees who were evaluated were found to have any active disease, none are contagious and all may continue to work normally.

Both the CDC and the New York City Department of Health and Mental Hygiene have completed their reviews, and neither recommend any further investigation or medical evaluations of additional employees. Amtrak agrees with those recommendations, and no further actions will be taken.

Thank you.

Message From Joe Boardman

Dear Co-workers,

I am writing to let you know that as of November 15, Jeff Martin is no longer with Amtrak.

Effective November 18, Paul Vilter, assistant vice president host railroads, has assumed the role of acting chief logistics officer as the company begins its search for a permanent replacement.

Please join me in giving Paul our full support as he serves in this acting capacity.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Over the past few months there have been several reported incidents of employee harassment. Let me be perfectly clear. We have a policy of **ZERO** tolerance of any form. We will not permit a hostile work environment. This is very basic and a fundamental of the way we do business.

We will not allow discrimination or harassment of any kind by our employees toward our customers or co-workers, including but not limited to racial, ethnic, religious or sexual slurs. Anyone with information regarding such despicable behavior is required to report it, starting with one's supervisor. Additionally, Amtrak has established the Amtrak Help Line, a toll-free number and website which offers a safe and (if you wish) anonymous reporting venue. The Help Line is operated by an outside vendor to guarantee anonymity. I encourage the reporting of any concerns by calling the Help Line at 866-908-7231 or by visiting www.reportlineweb.com/Amtrak.

We at Amtrak hold all employees up to high ethical and behavioral standards and I personally hold managers and supervisors accountable for the behaviors, actions and outcomes of our teams. It is very simple, if you break the rules you will be held accountable for that behavior.

Healthy and enduring companies succeed on the foundation of core values and appropriate business behaviors. We hold Amtrak's business behaviors as vital to our success and aim for all employees to uphold the following:

- Commitment to safety
- Integrity
- Spirit of service
- Desire to improve
- Respect
- Entrepreneurial Spirit
- Accountability
- Humility
- Forgiveness

Employees who cannot internalize and model these behaviors will find that they are no longer part of the company.

This is an important time in our company's history: record ridership, improved revenues and strong customer satisfaction numbers. These are all achievements we have made together. As we approach the busiest travel time of the year, I want to thank you for all you do and encourage you to help continue to make us great.

Please have a safe and Happy Thanksgiving.

Sincerely,

Joe Boardman
President and CEO

National Preparedness Month

Emergency Contact Card

September is National Preparedness Month and that means we want to make sure that you have the "right stuff" for an emergency. This year the Amtrak Police Department and the Amtrak Emergency Management and Corporate Security department (EMCS) have developed an emergency contact card that, when completed, may provide potentially lifesaving information. This card may be the single most important item to carry in your wallet, briefcase or backpack, as it provides family members, friends, police and/or emergency personnel what they need to know about you during a disaster or emergency.

The card can be accessed on the company Intranet by going to the home page and clicking the Safety tab>Safety page>emergency contact card. Please fill in the blood type, allergies, medicines and telephone numbers for you and your family members along with two emergency meeting places, and the name and contact number for your physician, children's schools (if appropriate) and designated safe zone contact person. Space has also been provided for your own personal notes and reminders.

Once the card is filled out, please print it and bring it with you to one of our Amtrak Safety or Employee Appreciation events (listed below) that will be held during September. At these events (held at Amtrak stations unless otherwise noted) Amtrak volunteers will laminate the card on site and return it to you for safe keeping. When printing the card, make sure you select the option to "shrink oversize pages," to ensure that the card is no larger than 5.5" X 4.5".

We encourage all employees to make one of these cards for themselves and family members. It is easy and one of the best things you can do to protect yourself and your family.

Safety and/or Employee Appreciation Events

September 4 – Boston South Station, Mass. 11 a.m. - 4 p.m.
September 6 – Santa Barbara, Calif. 11 a.m. - 4 p.m.
September 7 – Lacey, Wash. 10 a.m. - 2 p.m.
September 10-12 – BWI Station, TBD
September 10 – Emeryville, Calif. 6 a.m. - 10 a.m.
September 13 – Fullerton, Calif. 11 a.m. - 4 p.m.
September 16 – Raleigh, N.C. 8 a.m. - 12 p.m.
September 17 – Wilmington, Del. TBD
September 17 – CNOC/CETC, TBD
September 18 – Jacksonville, Fla., 8 a.m. - 12 p.m.
September 20 – Washington, D.C. TBD
September 20 – Philadelphia Penn. 10 a.m. - 2 p.m.
September 20 – Miami, Fla. 8 a.m. - 12 p.m.
September 20 – Rensselaer, N.Y. 9 a.m. - 2 p.m.
September 20 – Los Angeles, Calif. 9 a.m. - 1 p.m.
September 21 – Eugene, Ore., 10 a.m. - 2 p.m.
September 24 – Chicago, Ill. 7 a.m. - 3pm
September 25 – New Orleans, La. 8 a.m. - 1:30 p.m.
September 25 – New York, N.Y. 9 a.m. - 2 p.m.
September 28 - Salem, Ore. 10 a.m. - 2 p.m.

End-of-Year Performance Conversations: A Quick Checklist

The end-of-year performance conversations are an important part of your career development. They provide you the opportunity to work with your rating managers to evaluate your work accomplishments, outline progress toward previously established goals and highlight areas you would like to develop in the upcoming year. Below is a quick checklist of what you will need to do in order to complete the process:

<input checked="" type="checkbox"/>	Deadline	FY13 End-of-Year Performance Conversations Activity
 <input type="checkbox"/>	Now – September 30, 2013	Self-assess: Employee prepares self-assessment using NRPC Form 3378. This form is accessible on the company Intranet at http://apps.nrpc/forms/
<input type="checkbox"/>	September 30, 2013	Submit: Employee submits completed form to rating manager.
<input type="checkbox"/>	October 25, 2013	Assess: Rating manager performs employee assessment using form and enters preliminary rating into <i>My CareerTrak</i> tool.
	October 28 - November 8, 2013	Amtrak-wide rating calibration occurs.
	November 19, 2013	Executive Committee conducts calibration review.
<input type="checkbox"/>	November 20 - December 13, 2013	Discuss: Employee and rating manager hold end-of-year performance conversations.
<input type="checkbox"/>	December 13, 2013	Sign-off: Employee and rating manager sign-off on the form.
<input type="checkbox"/>		Create Digital Record: Rating manager uploads final signed form into <i>My CareerTrak</i> tool.
<input type="checkbox"/>	December 1-31, 2013	Hold merit conversations: Employee and rating manager hold merit conversations.

If you have any questions or feedback about the end-of-year performance conversations or this checklist, please email performanceconversations@amtrak.com. Thank you.

Memorial Day Safety

The Memorial Day weekend is usually regarded as the beginning of the summer season. It often signifies time with family and friends, outdoor activities and the end of junior and senior proms in our local communities.

The safety and health of our employees remains a key corporate goal. We have been told that as our Safe-2-Safer program becomes even more integrated into our safety culture, the lessons learned are extending into our lives outside Amtrak. For those of us who are fortunate to be with family and friends over the holiday weekend, it would be a good idea to remind them that:

- When going fishing, please never walk, sit or stand on any railroad bridge.
- With an increase in automobile traffic, make sure all precautions are taken at grade crossings. Stop, Look and Listen.
- Never trespass onto railroad tracks as every step on the tracks could be your last.
- The human eye cannot accurately judge a train's speed or distance. A train will always appear to be farther away and traveling slower than it is. The train **always** wins.
- Most crashes occur within 25 miles from home.
- Approximately every two hours either a vehicle or a pedestrian is struck by a train in the United States.

Please have a safe and enjoyable weekend.

October 7, 2013

Security Awareness Training Course Updated

Amtrak created an updated interactive self-paced training course for employees that provides information on identifying and reporting suspicious activity, and includes a segment on responding to an active shooter incident. This course is specifically designed for office personnel, but its lessons are applicable to all employees.

The training course is accessed via the Amtrak Intranet through the Employee Information Portal (EIP) by selecting Training>Course Catalog>Security Awareness>Amtrak Security Awareness – CBT. Employees who have already completed the training program are also encouraged to revisit the new material as a refresher course. Please email emcs@amtrak.com if you have any questions.

When Something Seems Suspicious: Employees can remain alert, and protect themselves and fellow employees by reporting suspicious items, persons or activity immediately to the Amtrak Police Department at (800) 331-0008, or by calling 911.

Thank you for your cooperation and commitment to safety and security.

25th Anniversary of the Historic Grand Reopening of Union Station

On Monday, September 30, Union Station Redevelopment Corporation (USRC), Amtrak, Ashkenazy Acquisition Corporation (AAC), and Federal City Council will mark the 25th anniversary of the historic grand reopening of Washington Union Station with select activities throughout the station, including:

- Photo displays of the station's evolution, along with artifacts and station restoration facts placed throughout the West Hall and Main Hall.
- An interactive model of the station's master plan, highlighting the future vision to further expand the station and rail yard into a greater multimodal and commercial hub. Amtrak and Akridge (our development partner) representatives will be onsite from 8:00 a.m. to 6:30 p.m. to present the model and answer questions.
- The Union Station Preservation Coalition will be onsite to provide information on the station's history and architecture.
- Select Union Station retail and food merchants will offer exclusive one-day promotions. A list of participating retailers can be picked up in the Main Hall.
- A video display of the "Union Station 25th Anniversary", developed by The Federal City Council with an introduction by Mr. Boardman. You can also view the video on our [Great American Stations](#) website next week

Washington Union Station reopened its doors on September 29, 1988, with a full-day of celebration capped with a gala dinner after a three-year transformative rehabilitation project. The largest public/private partnership of its kind at that time funded the \$160 million restoration effort as a result of the Union Station Redevelopment Act of 1981 establishing the effort to restore the station to its historic grandeur.

"This collaborative rehabilitation project provided Amtrak with a home for its national corporate headquarters, served as the catalyst for neighborhood development, and helped spark a renaissance of national passenger rail service," said Amtrak President and CEO, Joe Boardman. "Since the station's reopening, Amtrak ridership in Washington, D.C., has more than doubled and we continue to see record growth."

Today, the station serves over 32 million visitors annually, and there is a continued focus on station enhancements. Future plans to improve and expand the station are on the horizon guided by the Union Station Master Plan.

Got Questions? Ask Cigna

Do you have questions about your Cigna coverage? Cigna is here to help. Cigna will be hosting two one-on-one sessions in Washington, D.C., to help address employee's individual questions regarding their medical plan. Topics of discussion may include claim issues, network problems, the appeal process and pre-authorization requirements.

The sessions will be held on **August 7** and **August 28**. All sessions will be held at 60 Massachusetts Avenue in Conference Room C. Additional times and locations may be added after evaluating the initial sessions.

Schedule your one-on-one session with a Cigna representative by sending an email to: **totalrewards@amtrak.com**. Be sure to include your desired date and time.

Winter Storm

We are actively following the weather advisories and wanted to remind Washington area employees that tomorrow will be business as usual. We will let you know if there are any changes to normal business schedules.

Please remember to drive safely and be careful when shoveling.

Thank you.

July 22, 2013

New Exterior Smoking Policy for Washington Union Station

Please be advised that a new non- smoking policy for the West Porch and Front Colonnade at Washington Union Station will was enacted last Friday.

Due to the challenges of locating adequate exterior space in appropriate areas around the building, it has been determined that creating a smoking “area” would not be achievable. All exterior ash urns will be removed once the signage is in place.

This policy does not extend to the train platforms or other exterior areas North of the wall to the train gates. Amtrak may consider creating a smoking area for their train passengers between the train platforms and the North entrances to the building (the “blacktop” area) contingent upon approval by the Union Station Redevelopment Corporation.

Thank you.

Amtrak to Participate in “The Great ShakeOut”

On October 17 at 10:17 a.m., thousands of people throughout the country will “Drop, Cover and Hold On” in The Great ShakeOut, the nation’s largest earthquake drill ever held. The Great ShakeOut is held on October 17 to serve as a reminder of the Loma Prieta earthquake of 1989, where the San Francisco region was rocked by a magnitude 6.9 earthquake. Amtrak’s Emergency Management and Corporate Security department has coordinated involvement across the nation to help prepare our employees for an earthquake.

Why is a “Drop, Cover and Hold On” drill important? Major earthquakes may happen anywhere you live, work or travel. You must practice often in order to respond quickly. You may have only seconds to protect yourself in an earthquake before strong shaking knocks you down, or something falls on you. The Great ShakeOut is your chance to practice how to protect yourself. The goal is to prevent a major earthquake from becoming a catastrophe for you.

The following are some helpful tips in practicing earthquake preparedness:

If you are inside when the shaking starts:

- Drop, cover and hold on.
- If you are in bed, stay there, curl up and hold on. Protect your head with a pillow.
- If at work stop what you are doing, drop to the floor and cover yourself by getting under your desk or another sturdy object and hold on.
- Stay away from windows to avoid being injured by shattered glass.
- Stay indoors until the shaking stops and it is safe to exit. Use stairs to exit the building rather than an elevator.
- Be aware that fire alarms and sprinkler systems frequently go off in buildings during an earthquake, even if there is no fire.
- Check in with your supervisor for additional instructions if you are at work.

If you are outside when the shaking starts:

- Find a clear spot away from buildings, power lines, trees and streetlights and drop to the ground until the shaking stops.
- If you are in a vehicle, pull over to a clear location and stop. Avoid bridges, overpasses and power lines if possible. Stay inside with your seatbelt fastened until the shaking stops.
- If a power line falls on your vehicle, do not get out. Wait for assistance.
- If you are in a mountainous area or near unstable slopes or cliffs, be alert for falling rocks and other debris. Landslides are often triggered by earthquakes.

- Amtrak crews should ensure the safety of all members, and check in with their supervisor

If you are inside a train when the shaking starts:

- The engineer will stop as soon as it is safe.
- Stay where you are and hold on.
- Protect your head and neck.
- Train crews should check on the wellbeing of passengers and report any injuries.

For more information about earthquake drills visit <http://www.shakeout.org>.

Railroad Retirement Board Announces Tax Increases for 2013

The Railroad Retirement Board (RRB) is responsible for administering retirement/survivor benefit programs for railroad workers and their families. Each year, the RRB announces payroll tax rates for the coming year. Effective January 1, 2013, the payroll tax rates increased as follows:

- Tier I tax increased to 6.2 percent in 2013 from 4.2 percent in 2012. The maximum Tier I earnings increased from \$110,100 to \$113,700 (the same amount as the Social Security tax).
- Tier II tax increased to 4.4 percent from the 2012 rate of 3.9 percent. The maximum Tier II earnings will increase from \$81,900 to \$84,300.

You can review the announcement for 2013 at the RRB website:

www.rrb.gov/AandT/pl/pl1302.asp

Both you and Amtrak pay a Tier I and a Tier II tax which contributes to financing railroad retirement benefit payments. The Tier II tax rates are determined annually from a tax rate schedule based on the current railroad retirement fund levels.

For more information on your railroad retirement annuities benefit, contact the U.S. Railroad Retirement Board at **877-772-5772** or www.rrb.gov.

Human Capital Branding Contest

This fall the Human Capital department (HC), in collaboration with Information Technology (IT) and with input from all Amtrak departments, will be introducing a new online tool to provide an easier process for managers and their teams to address goal setting and managing performance. This new tool needs a name that will be easily recognized by all of us. HC really wants your input in creating the name for the tool.

The contest guidelines are:

- The name should reflect the concept of career development at Amtrak
- Should reinforce an Amtrak brand
- Please be short and sweet; three words or less (think of good advertising you have seen)

Please click the link or copy/paste into your internet browser in order to submit your entry. <https://www.surveymonkey.com/s/SFbrandcontest>

If your idea is selected, you will win an iPad Mini. Two randomly selected participants will receive an iPod Touch. We know that we have some amazingly creative employees and look forward to seeing your ideas.

All suggestions must be submitted by Tuesday, July 16, 2013.

The winning suggestion will be announced in a future issue of *Amtrak This Week*.

Best of luck!

June 21, 2013

Please join Amtrak President and CEO Joe Boardman, invited dignitaries and co-workers at a special unveiling of our Veteran's Locomotive, designed to serve as a company-wide tribute to the men and women who have served in the United States Armed Forces.

Unveiling of the Veteran's Locomotive

Wednesday, June 26 at 1:00 p.m.
Washington Union Station - Track 17
Enter through Gate G

All employees are welcome to attend

Amtrak Employee Veterans Appreciation Celebration

Area Amtrak employees who are also veterans are welcome to attend the Veterans Appreciation Celebration. Please join representatives from the Railroad Retirement Board (RRB), Fidelity Investments, our health care partners Cigna and Aetna, Every Day Wellness, various Amtrak departments and more for information and give-aways. Light refreshments will be served.

Wednesday, June 26, 9:00 a.m. - 2:00 p.m.
Starlight Room - Washington Union Station
Entrance at Gate B

**Admittance valid only for Amtrak employees who are veterans, ID Required.*

Veteran's Locomotive Viewing

The Veteran's Locomotive will be available for viewing on:

Thursday and Friday, June 27 - 28
Washington Union Station - Track 9

All employees are welcome

October 18, 2013

Organizational Culture Diagnostic Instrument Available

The OCDI is part of our Safe-2-Safer process and will not single out and/or punish any employee or groups of employees. Your totally anonymous answers will help to determine and examine our management practices, systems and cultural issues that influence safety. The results of the survey will provide a basis for planning and recommending possible solutions related to safety.

The month-long opportunity to complete our Organizational Culture Diagnostic Instrument (OCDI) is has reached the half-way point. The survey opened on October 1 and will be available until October 31. Both paper surveys and an online link are available.

There is a question on demographics at the beginning of the survey. This is the section where employees check the appropriate boxes for work location. Checking these boxes enables us to determine response rates by location and make the proper decisions on future actions by geography. For example, if you are in Mechanical support you need to first check that box under department, then your division/geographic location and finally your actual site (Beech Grove, Hialeah).

There is access to the survey from the WMS kiosks and on the Citrix desktop. It is available on the company Intranet >Safety>Safe2Safer> 2013 OCDI. Or [click here to begin the survey](#). If this link does not work, copy and paste <https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP> into your web browser. Please answer the questions for your current situation. And try to answer every question.

We are asking everyone to please participate and provide your feedback. You can contribute to change.

December 12, 2013

New Corporate Travel Policy Now in Effect

As noted in the November 12th Employee Update, the new Corporate Travel Policy, FI 8.35.2, **is now in effect**. There have been significant changes made to Amtrak's Corporate Travel Policy in order to reduce company-wide travel expenditures. Employees should now begin following the new policy. The eTrax system changes needed to support the new policy are now in place.

Some of the new changes include the following:

- It is required that employees utilize virtual conferences as a first option for any meetings. Please confirm in the comments section of the Travel Authorization that that this option was considered (Ref. 5.4).
- Travel authorization approvers are responsible for ensuring that the travel is necessary, the number of employees traveling to the same meeting /destination is necessary and the expenses are reasonable (Ref. 5.4).
- Travel by rail is corporate policy however, the most cost effective mode of transportation should be selected (Ref. 6.1). If the lowest air fare is not chosen, a detailed explanation and price difference **MUST** be stated.
- Employees **MUST** use the Corporate Travel Agency. Arrangements made otherwise will **NOT** be reimbursed. A copy of the itinerary from our travel provider must be included with your expense report.
- Reimbursement for lodging, meals and incidentals will be based on **actual** expenses incurred not to exceed the GSA per diem. Maximum allowable amounts are calculated separately for lodging and for meals and incidentals. The "per diem" maximum for meals and incidentals will be adjusted downward by 25 percent on the first and last day of travel. Employees and approvers are responsible for this calculation. Rates are different for each destination city and can change monthly. Current rates for a given destination can be found on the GSA website www.gsa.gov/perdiem. The link to the GSA website can also be found on the Travel Authorization eform. A screen print of the relevant rates **MUST** be included with your faxed documentation for the expense report. If the hotel you have booked through the Corporate Travel Agency is above the per diem rate for lodging, please contact the hotel to see if a government rate is available to you. If you cannot obtain the government rate please note this in the comments section of your expense report. If a Corporate Lodging Card is being used, please capture this expense on the Travel Authorization and mark as company paid on your expense report.
- If any daily meals are provided at no cost to the employee such as in departmental staff meetings, conferences, included in hotel rate, etc., only the actual cost of each of the remaining meals for that day paid by the employee are to be input on the employee's expense report for reimbursement and the cost of that meal shall not exceed GSA rate. Please see the M&IE (Meals and Incidental Expenses) Breakdown on www.gsa.gov/perdiem for more information on meal allowances and other helpful calculations.

- Employees are now required to provide an itemized receipt for all expenses, with the exception of some minor categories, instead of the previous \$10.00 threshold.

Employees should also take this opportunity to update their travel profiles and ensure that their accounting information is correct. To do this log into eTrax – click on the Search tab – then Catalog then click on to the Worldspan/Trip Manager Punchout Catalog. Click on the Profile tab (fill in) – then click on Custom Fields and fill in your accounting information (cost center, internal order and WBS element (no dots) then click submit.

These are some of the significant noted changes; employees should familiarize themselves with the entire policy and the Frequently Asked Questions (FAQ) which are available for reference at <http://wiki.corp.nrpc/display/Bustravel/Home>. The FAQs on the GSA website also provide some helpful answers.

Amtrak® Employee Update

February 7, 2013

It's Not Too Late – Amtrak Relief Fund

The Trustees of the Amtrak Employee Relief Fund would like to remind you that it is not too late to help your co-workers who were so severely impacted by the devastating effects of Hurricane Sandy. Many of the hardest hit Amtrak employees lost everything they owned and these families received little or not compensation from anyone. Many of these losses are not covered by insurance and even when they are covered, the insurance does not begin to compensate them for their actual losses. They are literally starting over and needing to replace everything they owned.

There are many tragic examples and here are but three involving our craft employees from T&E, C&S and Passenger Services. One family of four, including two school-age children, lost everything when their home was flooded by four feet of water. This family has already moved twice since the storm, requiring the children to attend two different schools and causing major disruption to the normal family existence. Another co-worker and family lived in their home for 26 years and also lost everything. After Hurricane Sandy, this family of three was forced to split up to live with family and friends. The third example involves an employee who had just purchased his home less than a year ago using his 401K savings. After the storm, the Federal Emergency Management Agency declared his house uninhabitable. He is using the rest of his savings to try to repair his home.

These stories so clearly demonstrate the substantial needs of our co-workers. Please try for a moment to put yourself in their position. It is almost unimaginable. Please consider helping by donating to the Amtrak Employee Relief Fund by Friday, February 15. Contributions may be made by payroll deduction by filling out *NRPC 3238 Amtrak Relief Fund Payroll Deduction Form* (attached). You have the choice of donating a one-time amount or choosing an amount to be deducted from each paycheck until the desired amount is reached. Please know that contributions via payroll deductions need to be completed by September 30, 2013. Checks can be made out to the National Railroad Passenger Corporation Employee Relief Fund and sent to the Amtrak Employee Relief Fund, 26462 Network Place, Chicago, IL 60672-1264.

Thank you.

Amtrak® Employee Update

January 23, 2013

Amtrak Employees' Relief Fund Update

This past November Amtrak established the Amtrak Employees' Relief Fund to enable all employees to make monetary contributions to other employees who have been impacted as a result of Hurricane Sandy. The total collected as of January 18, 2013, is **\$17,762**. This breaks down to **\$15,212** in payroll pledges and one-time payroll deductions. We expect that payroll deductions left to be received will bring in an additional **\$3,715** through September. Employees have sent **\$2,550** in check contributions to the lockbox set up for this fund.

The need is great and the deadline for contributions has been changed to February 15 so there is still time for those who have not yet had an opportunity to contribute. Please know that contributions via payroll deductions need to be completed by September 30, 2013.

Checks can be made out to the National Railroad Passenger Corporation Employee Relief Fund and sent to the lockbox at:

National Railroad Passenger Corporation Employee Relief Fund
26462 Network Place
Chicago, IL 60672-1264

Donations may be made by payroll deduction by filling out *NRPC 3238 Amtrak Relief Fund Payroll Deduction Form* (attached). You have the choice of donating a one-time amount or choosing an amount to be deducted from each paycheck until the desired amount is reached.

Applications for the Relief Fund closed on January 18 and 49 applications were received. The committee has reviewed 42 of those applications thus far. Sadly, 10 of our employees who applied for funds lost everything in Hurricane Sandy. All employees affected are really in need of our assistance.

Thank you for your generosity.

May 30, 2013

Operations Department Intranet Site Available

An Amtrak Intranet wiki site has been created to keep employees informed about various aspects of the Operations department reorganization and to assist us through the transition.

The sections include:

- [A Message from DJ Stadtler, Vice President of Operations](#)
- [Frequently Asked Questions \(FAQs\)](#)
- New Positions within Operations to be Posted (*available 6/5/13*)
- Position Descriptions (*available starting 6/5/13 with regular updates*)
- Future Operations Department Organization Charts (*available 6/5/13*)
- Tips for the Application Process (*available 6/5/13*)
- [Employee Assistance Information \(EAP\)](#)

The site can be located on the Amtrak Intranet home page>Employee Information>Operations Reorganization. Please check the site frequently for content updates.

Thank you.

November 12, 2013

New Corporate Travel Policy Approved

There have been significant changes made to Amtrak's Corporate Travel Policy in order to reduce company-wide travel expenditures. Please note the revised travel policy while approved, is not yet in effect. A copy of the updated policy is attached.

Employees should begin familiarizing themselves with the policy. eTrax system changes needed to support the new policy are being programmed and an employee communication will be distributed when it is completed.

Some of the new changes include the following:

- It is required that employees utilize virtual conferences as a first option for any meetings.
- Travel authorization approvers are responsible for ensuring that the travel is necessary, the number of employees traveling to the same meeting/destination is necessary and expenses are reasonable (reference 5.4).
- Travel by rail is corporate policy. However, the most cost effective mode of transportation should be selected (reference 6.1). If the lowest air fare is not chosen, a detailed explanation and price difference must be stated.
- Employees **MUST** use the Corporate Travel Agency. Arrangements made otherwise will **NOT** be reimbursed. A copy of the itinerary from our travel provider must be included with your expense report.
- Reimbursement for lodging, meals and incidentals will be based on **actual** expenses incurred not to exceed the GSA per diem. Maximum allowable amounts are calculated separately for lodging and for meals and incidentals. "On the Right Track" Legal Newsletter Now Available

The latest edition of "On the Right Track," the Amtrak Law Department's quarterly labor and employment law newsletter, is now available for viewing on the Law department page on the company Intranet. The newsletter features articles on current legal topics to make you aware of new and emerging issues that may impact the work you do every day. Topics of interest in the latest issue include:

- What You Should Know About the New FMLA Regulations
- Can Employees on Military Leave Be Terminated?
- Must an Employer Establish a Fragrance-Free Workplace to Accommodate an Employee With Chemical Sensitivities?
- Victims of Domestic Violence in the Workplace.
- Can You Express Concern About a Pregnant Employee's Welfare?
- Is Bullying in the Workplace Legal?

To view this issue and past issues of "On the Right Track," visit the company Intranet → How We Work → Law Department → Law Department Publications.

Make Everyday Earth Day

Earth Day, held annually on April 22, is a day dedicated with events to inspire environmental protection. Visit the [U.S. Environmental Protection Agency's Earth Day Take Action](#) website to find out what you can do to make every day Earth Day. You can find local opportunities to volunteer, read daily environmental tips, and even pledge to commit five actions to help protect the environment.

National Train Day Trivia Challenge

Congratulations to last week's Trivia Challenge winner, Allen Lewis, senior analyst in Chicago, Ill. Check out this week's train trivia questions on [TrainDay411.com](#) and enter for your chance to win exciting prizes.

On This Day in Amtrak History...

On April 1, 1975, Amtrak purchased most of the Beech Grove, Ind., maintenance facility from Penn Central and soon embarked on a five year, \$22 million improvement plan to modernize the early 20th century facility. Today, more than 500 employees at Beech Grove rebuild and overhaul Amtrak's Superliner, Viewliner, Surfliner, Heritage and Horizon car fleets, as well as P32, P42 and F59 locomotives. Visit our Amtrak History website for a [short history](#) of the Beech Grove shops.

Hope, Arkansas Added to Texas Eagle Route

Effective April 4, the *Texas Eagle* will serve the city of Hope, Ark., serving the Hempstead County seat, a Southwestern Arkansas community of more than 10,000 that is also the location of former President Bill Clinton's birthplace, now an historic site under the National Park Service. A major celebration is being planned in Hope with local and Amtrak officials later this spring.

The westbound *Texas Eagle* (Train 21) is scheduled to depart Hope at 5:09 every morning, with arrivals that morning in Dallas, that afternoon in Fort Worth and that evening in Austin and San Antonio. The eastbound *Texas Eagle* (Train 22) is schedule to depart Hope at 9:18 every evening, with arrivals in Little Rock that night, St. Louis the following morning and Chicago that afternoon.

Connections to other Amtrak trains can be made in Fort Worth, San Antonio, St. Louis and Chicago to Oklahoma City, Kansas City and more than 500 locations in the Amtrak network.

Hurricane Sandy Employee Relief Fund

Hurricane Sandy affected a number of our Amtrak families. To date, \$19,800 has been disbursed. The additional funds that will be received in 2013 through payroll deductions will be disbursed at the end of this fiscal year.

A receipt for tax purposes has been sent to the homes of individuals acknowledging their monetary donations.

In addition to cash donations, many employees from across our network contributed 800 boxes of requested items including clothing, games and home goods through the efforts of New York Penn Station leadership.

Many of the hardest hit Amtrak employees lost everything they owned, and these families received little or no compensation from anyone. Many of these losses were not covered by insurance. Even when they are covered, the insurance did not begin to compensate them for their actual losses. They literally started over and needed to replace everything they owned.

To all who donated to our fellow colleagues in need, thank you.

VP of Operations to Visit New England Employees

DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees in New England on April 3-5. Employees are invited to attend the meeting, which includes a brief presentation by Mr. Stadtler followed by a question and answer session. The meetings are scheduled for:

- April 3-**New Haven Station**, 2:00 p.m. – 2:45 p.m. in the 4th Floor Conference Room
- April 4-**Boston South Hampton Street Yard**, 9:30 a.m. – 10:15 a.m. in the S & I Facility Lunch Room
- April 4-**Boston South Station**, 11:30 a.m. – 12:15 p.m. in the 5th Floor Conference Room
- April 5- **Providence Maintenance of Way Base**, 7:30 a.m. – 8:15 a.m.

Start Earning Incentives with Amtrak's Every Day Wellness Program

April 9 marks the start of Amtrak's newest program for non-agreement employees – Every Day Wellness. Through Amtrak's Every Day Wellness program, we'll help you achieve your health goals by providing the tools and resources you need to make better healthcare decisions, lead healthier lifestyles and maximize your healthcare dollars – every day.

In partnership with Cigna, we'll help you:

***Know Your Health Status** – Gain valuable insights on your personal health through a biometric screening and online health assessment. Cigna's biometric screenings provide immediate measurement, analysis, and results for the following:

- Total cholesterol
- HDL (healthy cholesterol)
- Coronary risk ratio
- Glucose level
- Blood pressure
- Height, weight and waist circumference
- Body mass index (BMI)

***Make a Change** – Access Cigna's personalized programs to help you reach your goals and maintain better health based on your health assessment results

***Find a Partner in Health** – Take advantage of Cigna's wellness coaching program for one-on-one support

And if better health is not enough of an incentive, when you participate in Every Day Wellness, you earn points that can be redeemed for up to \$150 in gift cards from leading retailers.

Get started today: Log on to myCigna.com, click on “Manage My Health,” then select **Incentive Awards Program** from the dropdown.

National Train Day Trivia Challenge

Congratulations to last week's Trivia Challenge winner, Diane Dillon, lead ticket agent in Jackson, Miss. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Earth Month: Disposing of Household Hazardous Waste

Unused household products such as paint, cleaners, oil, batteries, and pesticides that may contain ingredients harmful to the environment are known as household hazardous waste (HHW). Products that contain potentially hazardous ingredients require special care when you dispose of them. Improper disposal of these wastes can pollute the environment and pose a threat to human health. Many communities in the United States offer a variety of options for conveniently and safely managing HHW. Check your municipal or county web pages or visit Earth911.com to find a drop off location near you.

Priority Vehicle Offloading Now Available on Auto Train

Effective for sale April 9 and for travel on April 29, a new upgrade option for passengers riding on the Auto Train and wishing to speed up their journey is available. For a \$50 fee, passengers who reserve *Priority Vehicle Offloading* are guaranteed that their vehicle will be one of the first 20 offloaded from the train. While vehicle counts on board can total 200-300 per trip, being on the road faster allows passengers to get to their destination sooner.

“Amtrak is pleased to provide this exciting new service offering to our passengers,” said Chief of Product Development, Brian Rosenwald. “With this upgrade option, we hope to improve the service experience for select Auto Train passengers by reducing the amount of time spent waiting for their vehicle.” said Rosenwald.

This “Priority” upgrade is available by calling 1-877-SKIP-I-95 or for purchase at a staffed station. This new service is limited to automobiles and vans. Motorcycles and pass riders are not eligible for *Priority Vehicle Offloading*.

Bronze Telly Award Given to Employee Communications

Employee Communications won a bronze Telly Award for the Safe-2-Safer video produced earlier this year. The video was done in conjunction with Safe-2-Safer facilitators and featured a number of employees from across the country.

The Telly Awards, in their 34th year, honor the very best film & video productions, online video content and outstanding local, regional and cable television commercials and programs. The video can be viewed on the company Intranet by going to Amtrak Safety →Home→Safe-2-Safer.

All Aboard! Volunteers Needed for National Train Day

National Train is May 11. This year's theme is “Trains Matter” and celebrations will be held across the system. To ensure their success, volunteers are vital. To register as a volunteer at a National Train Day event near you, visit TrainDay411.com. All volunteers will receive a complimentary T-shirt and lunch.

Station in the Spotlight...

The two-story red brick station in Ashland, Ky., was built as a freight depot in 1906 by the Chesapeake and Ohio Railway. In 1997, the city of Ashland, using more than \$500,000 in federal funds, purchased the building and restored it to serve as an intermodal center. Once the work was finished, Amtrak moved the local *Cardinal* stop from nearby Catlettsburg to downtown Ashland in March 1998. For country music fans, Ashland is best known as the hometown of Wynonna and Naomi Judd and Billy Ray Cyrus.

https://www.greatamericanstations.com/Stations/AKY/Station_view

United Transportation Union (UTU) Ratifies Agreements

Last week, notice was received from the UTU announcing the ratification of the three tentative UTU agreements covering Conductors, Yardmasters and Stewards. The wage increases and benefit changes through January 1, 2015 are the same as those with all settled groups and have previously been offered to Brotherhood of Maintenance of Way Employees (BMWE) and Brotherhood of Railroad Signalmen (BRS). It also provides for retroactive wage adjustments which will be processed in accordance with the terms of the agreement.

With this ratification, 85 percent of employees are covered under new wage and rule settlements through January 1, 2015. BMWE and BRS remain in mediation under the auspices of the National Mediation Board.

eTicketing System Promoted During the Masters Golf Tournament

Golf fans watching the Masters Golf Tournament were treated to an AT&T commercial shot on an *Acela Express* train highlighting our eTicketing system. Amtrak collaborated with AT&T to launch the eTicketing system to replace the century-old paper-ticket system. The eTicketing system uses an application enabled through AT&T's Mobile Enterprise Application Platform. Conductors now use a smartphone to validate electronic tickets by scanning bar codes instead of punching and collecting paper tickets for manual accounting. Ticket lift information is synchronized between the Conductor's smartphone and central systems, allowing for real-time revenue accounting and passenger manifests.

eTickets provide passengers with the convenience of skipping the line at the ticket window and going straight to the gate by printing their tickets beforehand on their home or office printer – or by simply by presenting their eTicket barcode to the Conductor using their smartphone. It also allows passengers to change reservations themselves, even on the way to the station in the taxi.

The AT&T/Amtrak commercial ran more than 60 times during coverage of the Masters Golf Tournament on ESPN, ESPN Classic and CBS. Check out the commercial online (through the link below) and our passenger Conductor Chuck Wetzberger, in action!

<http://yourbusiness.att.com/transform/story/amtrak>

A More Secure Amtrak Network

IT Network Operations is working to upgrade the security on our data network. When completed, only Amtrak-authorized computers with a special agent – Junos Pulse – will be granted full access to resources on the network such as email and business applications. Other devices such as personal laptops, iPhones and Androids may only be able to access certain network destinations, such as out to restricted parts of the Internet.

The heightened security of the network will have substantial benefit to Amtrak, including conservation of network resources and enhanced protection against computer viruses and other malicious software.

Railroad Retirement Board (RRB) vs. Social Security: What's the better benefit?

Amtrak employees may sometimes wonder if the benefit provided by the RRB is the same, less or better than Social Security. The RRB recently released data indicating that it is a much better benefit, especially for career employees. That's because both Amtrak and employees who are covered by the Railroad Retirement act pay higher retirement taxes than those covered by Social Security. In 2013, Amtrak and our employees will pay the same rate as Social Security (Tier I) and then our employees contribute an additional 4.4 percent on earnings up to \$84,300 and Amtrak contributes an additional 12.6 percent (Tier II). And that adds up over time.

For example, the RRB states: "the average age annuity **being paid** by the Railroad Retirement Board (RRB) at the end of fiscal year 2012 to career rail employees was \$2,975 a month, and for all retired rail employees the average was \$2,365. The average age retirement benefit **being paid** under Social Security was over \$1,235 a month. Spouse benefits averaged \$880 a month under railroad retirement compared to \$590 under Social Security."

Read more about it at: www.rrb.gov/pdf/opa/pub_1303.pdf

National Train Day Trivia Challenge

Congratulations to last week's Trivia Challenge winner, Patrick Kidd, senior officer, Corporate Communications, in Washington, D.C. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Save Energy at Home

Did you know conserving energy not only helps save money, but also contributes to a healthier environment by reducing the release of carbon dioxide into the air? Some energy comes from natural sources that could eventually be depleted. For these reasons, it is important to save energy at work and at home. For tips on saving energy and money at home, visit the U.S. Department of Energy's website: <http://energy.gov/energysaver/articles/energy-savers-guide-tips-saving-money-and-energy-home>.

Amtrak Trivia...

On April 19, 1971, the National Railroad Passenger Corporation unveiled its new marketing name—"Amtrak." Developed by the marketing firm Lippincott & Margulies, Inc., "AMTRAK is a contraction and a blending of the concepts 'American' and 'track'...a short, powerful name, easy to pronounce and remember, with high visual impact..." Click here to see the [original news release](#) on the Amtrak History website.

Drug & Alcohol Policy Reminder

Amtrak is a drug- and alcohol-free workplace and it is the responsibility of all employees to be knowledgeable of Amtrak's policy and procedures for maintaining a safe work environment for employees and our customers. Please read the following documents found on the company Intranet under "Safety" → "Health" → "Health and Medical Services":

- Amtrak Drug and Alcohol Policy 7.3.0 and Guidelines
- 49 CFR Part 40 Procedures for Transportation
- 49 CFR Part 219 - Control of Alcohol and Drug Use (Federal Railroad Administration)
- 49 CFR Part 382- Controlled Substance (Federal Motor Carrier Safety Administration)
- Workplace Drug and Alcohol Testing Programs

In addition, Amtrak encourages employees to support the Drug Enforcement Administration's *National Prescription Drug Take-Back Day* on Saturday, April 27. On this day government, community, public health and law enforcement partners will work together to collect expired, unused and unwanted prescription drugs. To locate local community prescription drug collection sites, visit www.GetSmartAboutDrugs.com and click the "Got Drugs?" icon, or call 1-800-882-9539. The service is free and anonymous.

As a reminder, employees taking prescription medications that have the potential to interfere with the safe performance of their job duties must complete form NRPC 3133 "Authorization to Work with Medications," and submit it to Health Services Medical. For more information, call 215-728-2389 or leave a message on Health Services Drug and Alcohol Program's confidential Employee Hotline at 202-906-2255. Information can also be found on the Intranet under "Safety" → "Health" → "Health and Medical Services" → "Over-The-Counter and Prescription Drugs."

Keep it Clean

Litter and trash are among the many common stormwater pollutants that can degrade water quality. Besides being unsightly, litter and trash can block stormwater pipes and cause flooding. Trash and litter can also harm aquatic life. What can you do to help? Dispose of all trash and recyclables in proper receptacles. If the receptacles are full or unavailable, take your trash and recyclables home with you. Never place trash or recyclables next to a full container. Keep a small bag for trash and recyclables in your car.

Visit this U.S. Environmental Protection Agency website to learn what actions you can take to help keep our waters clean: http://water.epa.gov/type/oceb/marinedebris/what_index.cfm

All Aboard! Volunteers Needed for National Train Day!

National Train Day is May 11. Your help is needed to make this year's National Train Day the best yet. Register to volunteer at an event near you at TrainDay411.com

Crime Prevention Message from Chief Polly Hanson

I want to thank all of our Amtrak employees for the outstanding job we do making our passengers feel safe and comfortable, in our stations, and onboard our trains.

The level of customer service we provide is so exceptional that passengers often feel secure enough to visit the Café car and leave their laptop behind in their seat unattended, or drop their bags in the waiting room of a station while they run over to purchase a newspaper or a cup of coffee.

The unintended consequence of this sense of security is that unattended items can leave our passengers vulnerable to criminals that take advantage of a situation that provides the opportunity for a quick and easy theft.

So, I am asking for your assistance in continuing to educate our riders through onboard and station messaging, reminders to passengers to take their personal items with them when they leave their seats aboard a train or in a station and to keep their eye on their luggage whenever possible.

Through our efforts, we can continue to build positive customer experiences and further improve the security of our passengers. Thank you for all you do everyday to make Amtrak secure. Please don't hesitate to contact me AmtrakChief@Amtrak.com to share any questions, concerns or comments you may have about security.

Chief Polly Hanson
Amtrak Police Department

Ridership Growth Continues- March Sets Record as Single Best Month in Amtrak History

Amtrak ridership increased in the first half of FY 2013 (October 2012 – March 2013) and March set a record as the single best month ever in our company history. In addition, October, December and January each set individual monthly records.

Rebounding strongly from service disruptions caused by Superstorm Sandy and other severe weather, Amtrak ridership grew 0.9 percent in the first six months of FY 2013 as compared to the same period the prior year. In all, 26 of our 45 routes posted ridership increases and we expect to end the fiscal year at or above last year's record of 31.2 million passengers.

"The continued ridership growth on routes across the country reinforces the need for dedicated, multi-year federal operating and capital funding to support existing intercity passenger rail services and the development of new ones," said Amtrak President and CEO Joe Boardman.

Northeast Corridor ridership took a significant hit from Superstorm Sandy, now seeing a solid recovery and is predicted to show gains for the full fiscal year despite being down 1.2 percent for this six-month period. Ridership on state-supported and other short distance routes is up 2.7 percent and long-distance ridership grew 0.5 percent.

Three for One: Save Gas, Money and Reduce Air Pollution

You can improve your gas mileage by following a few simple tips such as properly inflating your tires and using cruise control on the highway. By reducing the amount of fuel you use, you not only save money but also help reduce harmful air emissions. Visit the U.S. Department of Energy's website on fuel economy for more tips to reduce the amount of gas you use.

United Airlines and US Airways Raise Change Fees

United Airlines and US Airways have increased the change fee penalties and many airlines are expected to follow as well. Most domestic ticket changes now incur a \$200 fee (up from \$150). International flight change fees vary, but have also increased in some cases to as much as \$250 - \$350. In order to avoid these costly fees, please confirm your schedule before you book, and only book through the corporate travel website for Travel Leaders in eTrax. Travel Leaders can cancel your flights if you've made a mistake within 24- hours of booking without incurring the penalty.

NEC FUTURE Road Show

NEC FUTURE, a comprehensive planning effort to define, evaluate and prioritize future investments in the Northeast Corridor (NEC), was launched by the Federal Railroad Administration (FRA) in February 2012. The FRA's work includes new ideas and approaches to grow the region's intercity, commuter and freight rail services and the completion of an environmental evaluation of proposed transportation alternatives.

Through May 11 (National Train Day), representatives of the FRA's NEC FUTURE team will be visiting rail stations along the NEC to inform the public about NEC FUTURE and seek customer input. If you are interested in learning more about this planning effort or sharing your thoughts, visit <http://www.necfuture.com/> and look for the NEC FUTURE booth on the appropriate date.

Amtrak Trivia...

Amtrak only accepted one credit card—the Rail Travel Credit Card—when it began operations in 1971. By negotiating contracts with major companies such as American Express and Master Charge, Amtrak credit sales more than doubled from \$4 million to \$9 million for 1972. Amtrak touted this new customer convenience in a February 1972 advertisement in *LIFE Magazine*: "We're pleased that Amtrak can now offer you the two surest ingredients for a pleasant trip. Trains and credit." See the original ad in the Amtrak Archives or aboard our refreshed Amtrak Exhibit Train.

Save the Date –Amtrak Total Rewards Road Shows Continue for Non-Agreement Employees

Amtrak Total Rewards represents the broad spectrum of plans and programs designed to reward, recognize, motivate and develop our **non-agreement** employees throughout their careers. Want to find out more about what this means for you? Join representatives from Amtrak's Human Capital Management team, Cigna, CVS Caremark, Fidelity and the Railroad Retirement Board to learn how to make the most of this new program. Each session will last approximately 40 minutes with opportunities for you to ask questions (and get free stuff, too).

- May 2- **Miami, Fla.**, Conference Room, 2nd floor at 9:00 a.m. and 11:00 a.m.
- May 3- **New Orleans, La.**, Annex Training Room at 10:00 a.m.
- May 9- **Beech Grove Maintenance Facility**, Administration Building - Large Conference Room at 9:00 a.m. and 11:00 a.m.

Help Make the 6th Annual National Train Day a Success!

National Train Day is fast approaching and volunteers are still needed at events across the country. Visit TrainDay411.com from your mobile phone, tablet or desktop computer to sign up for an event near you.

Employees are asked to volunteer for specific shifts, and can also participate for the entire day. Available volunteer shifts include:

Saturday, May 11th

10:00 a.m. – 2:00 p.m.

1:00 p.m. – 5:00 p.m.

All volunteers will receive a **complimentary** National Train Day polo shirt and a free meal during their shift.

Every year, it is the dedication, loyalty and pride demonstrated by Amtrak employees that make National Train Day a success – together, we can make this the best National Train Day yet!

National Train Day Trivia Challenge

Congratulations to last week's Trivia Challenge winner, Jane Brophy, senior officer, Host Railroads in Philadelphia, Pa. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

This Week in Amtrak History: [Amtrak service began on May 1, 1971.](http://history.amtrak.com/archives/we-take-your-credit-cards-advertisement-1972)

United Transportation Union (UTU) Ratifies Agreements

Last week, notice was received from the UTU announcing the ratification of the three tentative UTU agreements covering Conductors, Yardmasters and Stewards. The wage increases and benefit changes through January 1, 2015 are the same as those with all settled groups and have previously been offered to Brotherhood of Maintenance of Way Employees (BMWE) and Brotherhood of Railroad Signalmen (BRS). It also provides for retroactive wage adjustments which will be processed in accordance with the terms of the agreement.

With this ratification, 85 percent of employees are covered under new wage and rule settlements through January 1, 2015. BMWE and BRS remain in mediation under the auspices of the National Mediation Board.

eTicketing System Promoted During the Masters Golf Tournament

Golf fans watching the Masters Golf Tournament were treated to an AT&T commercial shot on an *Acela Express* train highlighting our eTicketing system. Amtrak collaborated with AT&T to launch the eTicketing system to replace the century-old paper-ticket system. The eTicketing system uses an application enabled through AT&T's Mobile Enterprise Application Platform. Conductors now use a smartphone to validate electronic tickets by scanning bar codes instead of punching and collecting paper tickets for manual accounting. Ticket lift information is synchronized between the Conductor's smartphone and central systems, allowing for real-time revenue accounting and passenger manifests.

eTickets provide passengers with the convenience of skipping the line at the ticket window and going straight to the gate by printing their tickets beforehand on their home or office printer – or by simply by presenting their eTicket barcode to the Conductor using their smartphone. It also allows passengers to change reservations themselves, even on the way to the station in the taxi.

The AT&T/Amtrak commercial ran more than 60 times during coverage of the Masters Golf Tournament on ESPN, ESPN Classic and CBS. Check out the commercial online (through the link below) and our passenger Conductor Chuck Wetzberger, in action!

A More Secure Amtrak Network

IT Network Operations is working to upgrade the security on our data network. When completed, only Amtrak-authorized computers with a special agent – Junos Pulse – will be granted full access to resources on the network such as email and business applications. Other devices such as personal laptops, iPhones and Androids may only be able to access certain network destinations, such as out to restricted parts of the Internet.

The heightened security of the network will have substantial benefit to Amtrak, including conservation of network resources and enhanced protection against computer viruses and other malicious software.

Railroad Retirement Board (RRB) vs. Social Security: What's the better benefit?

Amtrak employees may sometimes wonder if the benefit provided by the RRB is the same, less or better than Social Security. The RRB recently released data indicating that it is a much better benefit, especially for career employees. That's because both Amtrak and employees who are covered by the Railroad Retirement act pay higher retirement taxes than those covered by Social Security. In 2013, Amtrak and our employees will pay the same rate as Social Security (Tier I) and then our employees contribute an additional 4.4 percent on earnings up to \$84,300 and Amtrak contributes an additional 12.6 percent (Tier II). And that adds up over time.

For example, the RRB states: "the average age annuity **being paid** by the Railroad Retirement Board (RRB) at the end of fiscal year 2012 to career rail employees was \$2,975 a month, and for all retired rail employees the average was \$2,365. The average age retirement benefit **being paid** under Social Security was over \$1,235 a month. Spouse benefits averaged \$880 a month under railroad retirement compared to \$590 under Social Security."

Read more about it at: www.rrb.gov/pdf/opa/pub_1303.pdf

National Train Day Trivia Challenge

Congratulations to last week's Trivia Challenge winner, Patrick Kidd, senior officer, Corporate Communications, in Washington, D.C. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Save Energy at Home

Did you know conserving energy not only helps save money, but also contributes to a healthier environment by reducing the release of carbon dioxide into the air? Some energy comes from natural sources that could eventually be depleted. For these reasons, it is important to save energy at work and at home. For tips on saving energy and money at home, visit the U.S. Department of Energy's website: <http://energy.gov/energysaver/articles/energy-savers-guide-tips-saving-money-and-energy-home>.

Amtrak Trivia...

On April 19, 1971, the National Railroad Passenger Corporation unveiled its new marketing name—"Amtrak." Developed by the marketing firm Lippincott & Margulies, Inc., "AMTRAK is a contraction and a blending of the concepts 'American' and 'track'...a short, powerful name, easy to pronounce and remember, with high visual impact..." Click here to see the [original news release](#) on the Amtrak History website.

Pilot Program Explores Local Travel on Trains 89, 91 and 19

Following up on a pilot program from last November, Amtrak is again accepting Northeast Corridor (NEC) local travel (board and discharge) on Trains 89 (*Palmetto*), 91 (*Silver Star*) and 19 (*Crescent*) for the test period July 20 – September 30. This includes all the stations that these three trains stop at from New York through Washington, D.C., for Amtrak passengers only. No commuter tickets (e.g. MARC) will be honored. The number of passengers involved is expected to be modest.

The limited test period will allow us to seek additional revenue and explore our ability to better utilize existing capacity.

Mark Your Calendar: Wellness Wednesday Webinars

Cigna will be offering a series of Wednesday webinars that focus on your health and wellness. The webinars will be held from 12:30 p.m. – 1:00 p.m., EST. You can join the online meetings which cover a variety of topics including:

August 7 - Incentive Points Overview

August 21 - Choose My Plate

September 4 - Weight Loss Fundamentals

September 18 - Exercise (Getting Started), Nutrition and Hydration

October 2 - Exercising Safely with Chronic Conditions and Know Your Numbers

October 16 - Preventive Exams

Watch your email for details on how to login to each of the sessions.

People.....Performance.....Progress Total Rewards Update – Short Term Incentive (STI) Notifications

Non-agreement employees should be on the look out for STI notifications being mailed to their homes this week.

As promised, individualized STI notifications are being mailed to the homes of all eligible non-agreement employees. These notifications provide individuals with an overview of their specifics for the 2013 STI program.

Remember, we must first achieve our organizational financial goals for there to be funding and then achieve our corporate goals which include our Customer Satisfaction Index (CSI) scores and Operational reorganization achievements.

You can find all the details of the plan and how we are doing through June by reading the July update found on the Amtrak Benefits Intranet site [here](https://www.amtrakbenefits.com/safe/) or at <https://www.amtrakbenefits.com/safe/>.

New Locomotive Testing in Progress

Our new Amtrak Cities Sprinter (ACS-64) electric locomotives are now in a comprehensive and rigorous testing program before entering into Northeast service this fall.

Two of the locomotives are being tested at the U.S Department of Transportation (DOT) Transportation Technology Center (TTC) facility in Pueblo, Colo., undergoing a series of tests, including maximum speed runs, acceleration and braking, operating with Amtrak passenger coach cars attached and testing the overall performance capabilities of the locomotive. A variety of tests and validation exercises are also being conducted as part of the commissioning process to ensure the locomotive is operating and performing as designed.

In addition to the vigorous testing regime at TTC, a third locomotive will run field tests on the Northeast Corridor and Keystone Corridor this summer and be used for training Amtrak locomotive engineers and mechanical crews. A fourth locomotive will be tested in a climate-controlled chamber to determine how well it performs in extreme heat and cold temperatures.

Seventy next-generation electric locomotives will provide improved reliability, efficiency and mobility for intercity rail passengers traveling on the Northeast and Keystone Corridors. The new locomotives will operate at speeds up to 125 mph along the Washington – New York – Boston route and at speeds up to 110 mph on our Keystone Corridor from Philadelphia to Harrisburg Pa. Once the locomotives are commissioned in the fall, production of the remaining units will ramp up for monthly delivery through 2016. The new locomotives are part of the comprehensive Amtrak Fleet Strategy Plan to modernize and expand our equipment.

Appropriations Bill Update

Last week, the Senate and the House of Representatives considered their respective transportation Appropriations bills which contain the federal portion of our operating support and capital investment. Neither side was able to pass their version. The Senate version of the bill contains \$1.45 billion for Amtrak and the House of Representatives version contains \$950 million for Amtrak.

The Senate and House will be in recess for five weeks without having passed our appropriations bill. When Congress returns in September, attention will turn to negotiating the terms of a continuing resolution (CR) required to keep the government operating beyond September 30. Updates will be reported as received.

This Week in Amtrak History...

The first of the new single-level Amfleet cars manufactured by the Budd Company went into revenue service on August 7, 1975. Four days earlier, Amtrak officials and invited guests took the cars on a maiden run between Washington, D.C., and Philadelphia. To mark the occasion, Amtrak issued a [commemorative ticket](#) with a line drawing of the new cars. Early advertisements touted the cars' "dual temperature control system...plush carpeting...and wider, more comfortable reclining seats to relax in."

Live Event Captioning Now Available for Webinars

Live Event Captioning (CC) is now a fee-for-service addition to our AT&T teleconference services. We now have the capability for live caption text to appear on the screen during a webinar or conference call. The purpose of this important enhancement is to provide the ability for those who are deaf or hard-of-hearing to participate in our meetings with ease. An AT&T moderator is required for any Live Captioning Event to help facilitate. This service can be used for internal and external webinar participants and differs from a regularly scheduled web conference.

To set up a Live Caption Event visit <http://www.attces.com/scheduling>. Please provide event information as needed and submit your request (Live Captioning should be noted in the comment section). Forty-eight hours notice is required to set up a conference and 24-hours are needed to postpone or cancel an event.

New Name for Human Capital's Employee Development Mailbox

The Employee Development mailbox has been renamed as the Human Capital Training and Development (HCTD) mailbox. The new address is TrainingandDevelopment@amtrak.com

HCTD supports all technical skills training for employees in the Customer Services, Engineering and Mechanical departments. HCTD also provides core training programs that ensure compliance with regulatory training mandates and improve employee performance.

If you have any questions, or need information about how to use the Training section of the Employee Information Portal, please contact HCTD at their new address.

Station in the Spotlight...Kingston, Rhode Island

A South County landmark, the 1875 Kingston depot was erected by the New York, Providence and Boston Railroad. It holds a special distinction as one of the first historic rail stations rehabilitated using funds issued under the 1991 Intermodal Surface Transportation Efficiency Act (ISTEA).

This spring, the "[Friends of the Kingston Station](#)," an all volunteer group that works to preserve, protect and promote the building, celebrated its 40th anniversary.

Performance Overview

We are all vital team members whose efforts to support the goals of improving financial and customer service excellence are measured by our monthly revenue and ridership performance, Customer Satisfaction Indices (CSI) and a reduction in the FY13 net operating loss to the target set by our board. Our July total Amtrak ridership of 2.91 million trips and ticket revenues of \$198.4 million were both the best monthly ridership and revenue figures ever and reflect how when work together, we can reach our goals. Our July achievements also included:

- The best month in company history for ridership for 10 of our train routes.
- The best month in company history for ticket revenue on 17 train routes.
- The best month in company history in both sleeper class ridership and ticket revenues.

As a team, we continue to grow and strive to accomplish more and we all should be proud, especially as we continue to face challenging times and look for ways to reduce Amtrak's operating loss to \$336 million, the net operating loss target for FY13 Short-Term Incentive (STI) pay approved by our board of directors.

As we remain focused on continuing to build customer loyalty and repeat ridership by meeting or exceeding our customers' expectations, our efforts are measured through CSI. Through June, total scores for all business lines were reported at 83 percent, equal to or ahead of our June FY12 scores. In spite of all of our achievements this year, the CSI score still remains below our FY13 goal of 85 percent.

Recently, non-agreement employees should have received a personalized outline of the STI plan. This group of employees has a defined target incentive award which is then adjusted up or down based on our results against our corporate objectives. The STI plan recognizes contributions to the achievement of Amtrak's financial results and the corporate initiatives that support Amtrak's Strategic Plan. Funding will only be available if we achieve our goal of reducing the net operating loss to that \$336 million financial target.

The funding is then allocated to employees based on our 2013 performance. The two measurements used are weighted evenly and will be used in determining how much of the pool will be allocated. The achievements are then used to adjust the incentive awards either up or down.

Reduce FY2013 Budgeted Net Operating Loss

When Finance reviewed our performance against our STI target of \$336 million with the April 2013 forecast, we were projected to miss the target by \$74 million. However, the last forecast available from June now shows that we are only missing the target by \$23 million, a \$51 million improvement. We all need to continue to focus on our customers and closely monitor our costs so that we can reduce the budgeted net operating loss.

Meet Organizational Performance Targets

We must reach a CSI score of at least 85 percent to meet 100 percent of achievement. If we improve, but do not quite reach the full target of 85 percent, there is a 50 percent achievement level if we make 80 percent of the target.

We need to complete the Operations department reorganization by the end of this fiscal year and we appear to be on target. This is measured as concluding the definition of the departmental structure and having the leadership team in place. This is also a sliding achievement with a minimum achievement of 80 percent and is also weighted at 50 percent of the targeted funding.

Please remember, we must have the funding to pay for the STI award. Even if we achieve the organizational performance targets, without achieving our financial target there will be no funding for the plan, which is prorated for nine months of FY13.

Our July total Amtrak ridership of 2.91 million trips and ticket revenues of \$198.4 million were both the best monthly ridership and revenue figures ever and reflect how when work together, we can reach our goals. Our July achievements also included:

- The best month in company history for ridership for 10 of our train routes.
- The best month in company history for ticket revenue on 17 train routes.
- The best month in company history in both sleeper class ridership and ticket revenues.

As a team, we continue to grow and strive to accomplish more and we all should be proud, especially as we continue to face challenging times and look for ways to reduce Amtrak's operating loss to \$336 million, the net operating loss target for FY13 Short-Term Incentive (STI) pay approved by our board of directors.

As we remain focused on continuing to build customer loyalty and repeat ridership by meeting or exceeding our customers' expectations, our efforts are measured through CSI. Through June, total scores for all business lines were reported at 83 percent, equal to or ahead of our June FY12 scores. In spite of all of our achievements this year, the CSI score still remains below our FY13 goal of 85 percent.

Recently, non-agreement employees should have received a personalized outline of the STI plan. This group of employees has a defined target incentive award which is then adjusted up or down based on our results against our corporate objectives. The STI plan recognizes contributions to the achievement of Amtrak's financial results and the corporate initiatives that support Amtrak's Strategic Plan. Funding will only be available if we achieve our goal of reducing the net operating loss to that \$336 million financial target.

The funding is then allocated to employees based on our FY13 performance. The two measurements used are weighted evenly and will be used in determining how much of the pool will be allocated.

Reduce FY13 Budgeted Net Operating Loss

When Finance reviewed our performance against our STI target of \$336 million with the April 2013 forecast, we were projected to miss the target by \$74 million. However, the last forecast available from June now shows that we are only missing the target by \$23 million, a \$51 million improvement. We all need to continue to focus on our customers and closely monitor our costs so that we can reduce the budgeted net operating loss.

Meet Organizational Performance Targets

We must reach a CSI score of at least 85 percent to meet 100 percent of achievement. If we improve, but do not quite reach the full target of 85 percent, there is a 50 percent achievement level if we make 80 percent of the target.

We also need to complete the Operations department reorganization by the end of this fiscal year and we appear to be on target. This is measured as concluding the definition of the departmental structure and having the leadership team in place. This is also a sliding achievement with a minimum achievement of 80 percent and is also weighted at 50 percent of the targeted funding.

Please remember, we must have the funding to pay for the STI award. Even if we achieve the organizational performance targets, without achieving our financial target there will be no funding for the plan, which is prorated for nine months of FY13.

August 14, 2013

Live Event Captioning Now Available for Webinars

Live Event Captioning (CC) is now a fee-for-service addition to our AT&T teleconference services. We now have the capability for live caption text to appear on the screen during a webinar or conference call. The purpose of this important enhancement is to provide the ability for those who are deaf or hard-of-hearing to participate in our meetings with ease. An AT&T moderator is required for any Live Captioning Event to help facilitate. This service can be used for internal and external webinar participants and differs from a regularly scheduled web conference.

To set up a Live Caption Event visit <http://www.attces.com/scheduling>. Please provide event information as needed and submit your request (Live Captioning should be noted in the comment section). Forty-eight hours notice is required to set up a conference and 24-hours are needed to postpone or cancel an event.

New Name for Human Capital's Employee Development Mailbox

The Employee Development mailbox has been renamed as the Human Capital Training and Development (HCTD) mailbox. The new address is TrainingandDevelopment@amtrak.com

HCTD supports all technical skills training for employees in the Customer Services, Engineering and Mechanical departments. HCTD also provides core training programs that ensure compliance with regulatory training mandates and improve employee performance.

If you have any questions, or need information about how to use the Training section of the Employee Information Portal, please contact HCTD at their new address.

Station in the Spotlight...Kingston, Rhode Island

A South County landmark, the 1875 Kingston depot was erected by the New York, Providence and Boston Railroad. It holds a special distinction as one of the first historic rail stations rehabilitated using funds issued under the 1991 Intermodal Surface Transportation Efficiency Act (ISTEA).

This spring, the "[Friends of the Kingston Station](#)," an all volunteer group that works to preserve, protect and promote the building, celebrated its 40th anniversary.

Performance Overview

We are all vital team members whose efforts to support the goals of improving financial and customer service excellence are measured by our monthly revenue and ridership performance, Customer Satisfaction Indices (CSI) and a reduction in the FY13 net operating loss to the target set by our board. Our July total Amtrak ridership of 2.91 million trips and ticket revenues of \$198.4 million were both the best monthly ridership and revenue figures ever and reflect how when work together, we can reach our goals. Our July achievements also included:

- The best month in company history for ridership for 10 of our train routes.
- The best month in company history for ticket revenue on 17 train routes.
- The best month in company history in both sleeper class ridership and ticket revenues.

As a team, we continue to grow and strive to accomplish more and we all should be proud, especially as we continue to face challenging times and look for ways to reduce Amtrak's operating loss to \$336 million, the net operating loss target for FY13 Short-Term Incentive (STI) pay approved by our board of directors.

As we remain focused on continuing to build customer loyalty and repeat ridership by meeting or exceeding our customers' expectations, our efforts are measured through CSI. Through June, total scores for all business lines were reported at 83 percent, equal to or ahead of our June FY12 scores. In spite of all of our achievements this year, the CSI score still remains below our FY13 goal of 85 percent.

Recently, non-agreement employees should have received a personalized outline of the STI plan. This group of employees has a defined target incentive award which is then adjusted up or down based on our results against our corporate objectives. The STI plan recognizes contributions to the achievement of Amtrak's financial results and the corporate initiatives that support Amtrak's Strategic Plan. Funding will only be available if we achieve our goal of reducing the net operating loss to that \$336 million financial target.

The funding is then allocated to employees based on our FY13 performance. The two measurements used are weighted evenly and will be used in determining how much of the pool will be allocated.

Reduce FY13 Budgeted Net Operating Loss

When Finance reviewed our performance against our STI target of \$336 million with the April 2013 forecast, we were projected to miss the target by \$74 million. However, the last forecast available from June now shows that we are only missing the target by \$23 million, a \$51 million improvement. Please remember, we must have the funding to pay for the STI award. Even if we achieve the organizational performance targets, without achieving our financial target there will be no funding for the plan, which is prorated for nine months of FY13.

Anniversary Milestones

Employees' years-of-service awards are a cause for celebration and recognition. We are proud that we have so many employees who have been with us for decades and contributed to our 42-year longevity. The current budget situation has resulted in some significant financial reductions across the company. One outcome of these reductions is that departments will no longer host 30, 35 and 40 year off-site anniversary luncheons.

We will continue the practice of rewarding these anniversary milestones with employee service awards and trips. Any employee with at least 10 years of Amtrak service may take one service award trip on their tenth anniversary, and every fifth year thereafter (15th, 20th, etc. anniversary) of their Amtrak hire date. Policy details for milestone recognition can be found on the company Intranet>Library>Policy.

Employee anniversary milestones will continue to be recognized in *Amtrak Ink*, our monthly employee newsletter

Station Upgrades Planned for Rochester, New York

A \$15 million Transportation Investment Generating Economic Recovery (TIGER) grant awarded to the New York State Department of Transportation (NYSDOT) has been obligated for the design and construction of a new intermodal center in Rochester, N.Y. The grant to NYSDOT is for the final design and construction of a new 12,000 square foot station which will be fully compliant with the Americans with Disabilities Act (ADA). It includes a high-level island passenger platform, a tunnel for pedestrians and baggage access to the new platform, two new passenger sidings, and additional track and signal work. In addition, it will improve access to our *Empire Service*, *Maple Leaf*, *Lake Shore Limited* routes and improve connections to other modes of transportation, such as Greyhound and Trailways bus services, the Rochester Regional Transit Service buses, and taxis.

NYSDOT is contributing \$7.5 million to the project and the city of Rochester is contributing \$500,000. Construction is slated to begin in spring 2014.

Financial Progress Chart Now Available

Each full-time and part-time non-agreement job within Amtrak has a defined target award outlined under the Short-Term Incentive (STI) Plan. This target award is adjusted, either up or down, based on Amtrak's results against its corporate objectives. Funding for the plan will be available if Amtrak achieves its goal of reducing the net operating loss of the financial target set by the board of directors. For FY13, the Amtrak board of directors set the adjusted loss metric at \$336 million.

As we continue towards achieving the established goals, a new feature located on the home page of the company Intranet allows us to monitor our progress. An enhancement to the Tools and Performance Information display follows our progress towards reaching the financial portion of the STI plan and will be updated monthly. In addition, Customer Satisfaction Index (CSI) scores, also used as a measurement towards target awards, continue to be available for viewing. For more information, visit <http://intranet.corp.nrpc/index.jsp>.

September 2013 Safe-2-Safer Contact Rate Goal

Safe-2-Safer is a multi-year risk-reduction approach to safety and security that involves every level of management and hands-on employees. It was instituted at Amtrak in 2009 not as replacement for current and effective safety and security practices, but as an approach to make them even more effective. The program aims to reduce injuries by creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

The foundation of Safe-2-Safer is based on employing success and guidance feedback to change behavior. Each Safe-2-Safer observer recognizes those behaviors that are done safely to encourage repetition. Observing someone at-risk will lead to a positive conversation about changing to a safe behavior.

Several months ago, our company President and CEO, Joe Boardman, challenged all employees to attain a Contact Rate (CR) of 0.75 by FY13 under the Safe-2-Safer program. Contact Rate is a measure of how often feedback is provided on average to each employee in one month. Frequent peer-to-peer contacts coupled with feedback discussions serve as continuous reminders, stimulating changes from at-risk to safe behavior. Reaching this goal is important because it moves us toward our ideal CR of 1.0. By achieving this ideal, everyone is observed once per month. We have made excellent progress toward that goal, but a final push is needed.

A contact is a simple but powerful thing – two people talking about safety – about where there is exposure and risk and about how those two people can change what they do to reduce their exposure. That's what the "2" in Safe-2-Safer is about – two people talking about safety.

Sometimes the exposure is bigger than just those two people, and those issues are raised so that more than just two people can address them – sometimes it takes the whole corporation to reduce the risk and eliminate the exposure. But we can't work on these things if we don't make the contacts nor have the feedback after each contact that reveals the risk.

A recent refinement of the Safe-2-Safer process has resulted in a dramatic reduction in personal injuries in just three months, according to Senior Director, Safety, Peter Hall. "We asked our 28 Safe-2-Safer Steering Committees to look at their last three to six months of injury data and evaluate what specific behavior was causing injuries in their work group, then use the Safe-2-Safer observation process to attack that behavior and drive the injuries out of Amtrak."

The results have been impressive for the three month period from April to June. During the baseline month of March, the identified behaviors resulted in 30 injuries. That number dropped to 19 in April, eight in May and nine in June.

"Our next step is to move on to another behavior for each Steering Committee and attempt to reduce those injuries," Hall continued. "At the end of the fiscal year in September, we'll look back and see if we were able to sustain our progress in the identified behaviors. The Safe-2-Safer process involves every Amtrak employee and all our facilitators are agreement people with great leadership skills. There is every reason to believe that we'll be able to continue."

As we practice Safe-2-Safer, we are doing more than reaching a specific number – we are changing the way we work, our work culture, our work environment and the work processes we use that get the job done. The number is just the measure of what we've done. The real value is in the one-on-one conversations. It is essential that every one of us do all we can during the remaining days in August and September to push toward achieving this important target.

For more information on Amtrak's Safe-2-Safer process, visit <http://wiki.corp.nrpc/display/SAFETY/Safe-2-Safer>.

Dress for Success- New Uniform Policy Catalog Available Soon

Uniformed employees are the face of Amtrak. They are often the first person our customers see and a neat, polished and professional appearance enhances the customer experience and provides a lasting impression.

Effective September 1, a new catalog, “*Dress for Success*” that showcases Amtrak uniforms, will be available to all uniformed Train Service, On -Board Service (OBS) and Station Service employees. The catalog highlights uniform requirements for each craft, as well as recent program enhancements and proper uniform compliance.

The evolving catalog was designed by Monika Lukens, director, Service Standards and Operations and Tom Wiley, program manager, National Uniform Standards. The cover photograph features our employees modeling their uniforms at Los Angeles Union Station.

Recent changes to the program include new styles of black belts (all crafts), cargo pants (baggage handlers and red caps), a new windbreaker (Station Service and OBS), a light blue dress shirt (Train Service, OBS, and Station Services) and a new light blue polo shirt (Station Service /Customer Service Representatives). New male and female neckwear will be available in the fall.

Over the next few weeks, the new catalog will be distributed through local uniform coordinators and available to managers and supervisors to use as a reference tool for compliance purposes. Train Service and On-Board Service Employees Uniform Program details can be found in Chapter Five (Uniforms & Grooming) of the *Service Standards Manual*. Station Employees Uniform Program can be found on the Intranet under How We Work→ Station Support→ Policies→ Uniforms. The entire policy and a PDF of the catalog are located on the Intranet under Library→Service Standards→Uniforms.

Tom Carper Reappointed to Board of Directors

Tom Carper rejoined the Amtrak board of directors on August 9, following his recent nomination by President Obama and confirmation by the U.S. Senate. He will serve a five-year term.

Mr. Carper had previously served as a member of the board from March 2008 through March 2013. He was elected chairman of the board in January 2009 and served in that capacity until his term on the board expired.

Mr. Carper was originally nominated by President George W. Bush as a director of the Amtrak board of directors in May 2007 and was confirmed by the U.S. Senate in March 2008. He was a small business owner from Macomb, Ill., and served as mayor of Macomb from 1991 to 2003. In 2003, he was named regional director of the West Central region for Opportunity Returns by the Illinois governor. He retired from that position in 2010.

Mr. Carper received his Bachelor of Arts degree from Western Illinois University and served in the U.S. Army from 1967 to 1970 in both Thailand and Vietnam.

End-of-Year Performance Conversations: A Quick Checklist

As summer comes to an end, it's time for non-agreement employees to think about the FY13 end-of-year performance management process. Do you know what is required of you to prepare? Below is a quick checklist of what you will need to do in order to complete the process.

1. Now –September 30	<ul style="list-style-type: none"> Employee prepares self-assessment using NRPC Form 3378
2. Deadline: September 30	<ul style="list-style-type: none"> Employee submits form to rating manager
3. Deadline: October 25	<ul style="list-style-type: none"> Rating manager performs employee assessment using form Rating manager enters preliminary rating into <i>My CareerTrak</i> tool
4. October 28 – November 4	<ul style="list-style-type: none"> Amtrak-wide rating calibration occurs
5. November 19	<ul style="list-style-type: none"> Executive Committee conducts calibration review
6. November 20 – December 13	<ul style="list-style-type: none"> Employee and rating manager hold end-of-year performance conversations
7. Deadline: December 13	<ul style="list-style-type: none"> Employee and rating manager sign-off on form Rating manager uploads final form into <i>My CareerTrak</i> tool
8. December 1–31	<ul style="list-style-type: none"> Employee and rating manager hold merit conversations

Preparing your self-assessment is the first step in the process. Completed forms are due to your rating manager by September 30. More details are to come. If you have any questions or feedback about the Performance Conversations or this checklist, please email

performanceconversations@amtrak.com.

Shop for Amtrak Merchandise and Save!

Looking for the perfect gift for the train enthusiast in your life? Check out www.amtrak.com/store today for Amtrak merchandise and collectibles. Just in time for the holidays, new t-shirts, caps and posters are available with their... or your... favorite Amtrak route! Other collectibles include Amtrak model trains, children's items and an exclusive K5LA whistle, allowing you to recreate the sound of Amtrak. Be sure to check back soon for our new, limited-edition, holiday ornament will be posted shortly. This year's ornament features our *Cardinal* service, the first in a long-distance series.

And best of all, Amtrak employees get a 15 percent discount on merchandise items only at the Amtrak Online Store all year long. Simply enter the Promotion Code EMP15 and be prepared to enter your Employee ID if requested. The employee discount does not apply to Travel Gift Certificates or Merchandise Gift Certificates.

Departments can also order from the Amtrak Online Store by going through eTrax. Go to eTrax and click on "Catalogs" under the Search tab drop-down menu. Once there click on the copy (Amtrak punchout catalog) below the "Staples Promotional Website Catalog" header. Proceed to order items and during the check-out procedure use Promotion Code RWD15 to receive a 15 percent discount on merchandise items only.

Toys for Tots Campaign

In conjunction with the U.S. Marine Corps, toy donations for the Toys for Tots campaign will take place throughout the system. If you would like to donate a new, unwrapped toy (no stuffed animals please) to a child in need, the following donation points are available to receive your items.

Washington Union Station- Dec. 11-12 from 6:00 a.m. – 6:00 p.m., outside Gates A and B. Amtrak employees will join forces with the U.S. Marines fostering donations in the station and on the platforms.

Chicago, Ill area -Through Dec. 23 at 5:00 p.m. Drop off points include:

- Chicago Crew Base-1500 S. Lumber -Room 202
- Chicago Passenger Services
- Chicago Ticket Office
- Chicago Run-Thru Department
- Chicago Union Station 2nd Floor Lunchroom

PHL 30th Street Station: Through Dec. 20, drop off points will be located throughout the main concourse.

Albany, N.Y. - Dec. 7- 8, the 15th Annual Toys for Tots Train, in cooperation with Canadian Pacific (CP) Railway, will run daily between Albany – Binghamton, N.Y. Those attending will be greeted by volunteers from Amtrak, CP and the U.S. Marines, who will help distribute over 1,000 bundles of collected toys, hats and assorted clothing items to underprivileged children at 12 station stops along the route. As an added bonus, Santa Claus will be riding on-board each trip to greet children and volunteers along the way. Donations may be placed in the collection bins available at the Albany station through Dec.7.

Holiday Happenings Around the System

Each year, holiday celebrations abound throughout the Amtrak system. Sparked by communities and by Amtrak employees, each celebration is designed to be enjoyed by all. Here are some examples of merriment and charitable efforts taking place around the country.

Seattle, Wash. - Through Dec. 21, canned food donations will be accepted at King Street Station and in the break room at our Holgate crew base. Donations will be given to the local food bank, Northwest Harvest. On **Dec. 21**, Amtrak employees dressed as Santa Claus and elves will be at the station accepting food donations and visitors will have the opportunity to have their pictures taken with them.

Niles, Mich. - On Dec. 7 from 4:30 to 6:00 p.m., the Four Flags Garden Club will host its 22nd Annual Hometown Christmas celebration at the historic Amtrak Depot. Enjoy the beautiful holiday decorations, visit with Santa and Mrs. Claus, and enjoy homemade cookies, cider and candy as well as local entertainment.

Leavenworth, Wash. - It's always the holiday season in the Bavarian Village of Leavenworth and throughout the first three weekends in December, a variety of holiday activities and entertainment will be held. Visitors and residents can enjoy the official Christmas Lighting Festival. The entire town comes alive with holiday cheer and dazzling illumination. Visit <http://www.leavenworth.org>.

Fayetteville, N.C. – On Dec. 14 from 11:30 a.m. – 1:00 p.m., the annual Rotary Christmas Parade will make its way down Person Street to the Market House and on to Hay Street ending at the Fayetteville Amtrak station. The festive holiday event will showcase over 100 parade entries.

Washington, D.C. - Through Jan. 1, 2014, visitors to the National Christmas Tree in Washington, D.C., can enjoy watching an Amtrak model train circle the 28-foot evergreen located at President's Park, just south of the White House. This is the fifth year Amtrak has participated in this national tradition in conjunction with the National Park Service, the National Park Foundation (the official charity of America's national parks) and the National Christmas Tree Railroad.

The Amtrak model train is a G scale (1:22.5) and includes two GE Genesis P42 diesel locomotives, four single-level Amfleet passenger cars, plus a café car. The model represents Amtrak's Midwest corridor service, as well as our *Northeast Regional* service south of Washington, D.C., where the trains operate with this type of equipment. For more information visit www.NCTRR.org.

New York Penn Station (NYP) - From Dec. 2 – Dec. 18, canned food donations will be accepted at the station and donated to various community programs. Collection sites will include the Customer Services office, the NYP Crew Base and the Information Booth located in the rotunda.

Also at **NYP, from Dec. 2 – Dec. 21**, warm winter coats can be donated to those in need. In addition to donations, over 30 coats left in the station Lost and Found will be donated. Coats to be donated do not need to be cleaned in advance however they should be in good repair so that they can be distributed quickly to individuals when they are most needed.

Lancaster, Pa., - Dec. 10 from 5:30 p.m. – 7:00 p.m., the Lancaster Chamber Singers will be having a Holiday Caroling Celebration at the Lancaster Train Station.

Philadelphia 30th Street Station, Dec. 11 at 3:30 p.m., all are welcome to come out and enjoy the annual Christmas tree lighting ceremony.

December 9, 2013

New Self-Service Tool to be introduced for Train and Engine and On Board Service Personnel

Amtrak is pleased to announce that Quintiq, a global leader in supply chain planning and optimization (SCP&O), will act as our workforce planning platform to optimize crew scheduling for more than 5,000 Train and Engine (T&E) and On Board Services (OBS) personnel. In addition, the solution is being considered for clerical and other employees not currently using a fully automated system.

The Quintiq platform supports crew planning and scheduling, verifies position assignment and tracks the hours and earnings for T&E crews and OBS staff on trains. In addition, it provides a self-service tool for employees to allow more efficient access to information for certain pre-defined tasks, replacing the old legacy technology and optimizing labor management processes by providing enhanced tracking, data accuracy, planning and reporting of labor activities, automation of bid and bump, vacation requests, paper timesheets and more. It also ensures adherence to Federal Railroad Administration (FRA) rules and regulations that govern work hours.

This new integrated labor management system (iLMS) will be a modern system that has a single user interface that is flexible and configurable enabling a self-directed workforce that can be easily integrated into systems such as payroll and other Amtrak systems, advancing organizational and financial excellence. A team is in place to lead this effort: Mike Kates, senior director, iLMS; Adrienne Andersen-Ferrell, project director, iLMS and Max Saricyan, technical director, iLMS.

Did You Know ...

Many important communications and personal documents, such as W2's, are mailed directly to employee's homes. But if your address is wrong you won't receive the information.

All employees need to double check their mailing address in the Employee Information Portal (EIP)
<http://cip.corp.nrpc/iri/go/km/docs/amtrak/eimhelp/Index.htm> prior to Dec. 15, 2013. Make updates to your:

- Permanent Address (Actual street address of your primary residence – no P.O. boxes)
- Mailing Address
- Bank Information
- Tax Withholding
- Emergency Contact

Employees must make these changes as the HCESC cannot make changes to these items over the phone.

Holiday Dinner in the Diner...

Special holiday dinners are a railroad tradition. On this menu, which probably dates to the 1970s, Christmas dinner entrees included native Tom turkey with apple-pecan stuffing or baked sugar cured ham with raisin sauce. Pumpkin pie Chantilly made for a classic holiday dessert. The decorative background incorporates a star-topped Christmas tree under which are found gifts such as a drum, doll and, of course, a steam locomotive.
<http://history.amtrak.com/archives/christmas-dinner-menu>

Weekend MARC Service Now Running

On Dec. 7, weekend MARC Penn Line train service began from Martin Airport, north of Baltimore, Md., to Washington, D.C., stopping at points in between including, Baltimore (Penn Station), West Baltimore, Halethorpe, Baltimore Washington Thurgood Marshall International Airport (BWI), Odenton, Bowie and New Carrollton, Md.

The agreement between the Maryland Transit Administration (MTA) and Amtrak results in the first time that MARC will operate weekend service. All Penn Line trains (which run on the NEC) are supported with Amtrak crews and by the Amtrak Mechanical department. MARC also provides commuter service on the Camden and Brunswick lines into Washington Union Station. Those trains are operated by Bombardier and will continue to provide only weekday service.

The new service fills a void in weekend public transit alternatives for passengers visiting or commuting between Baltimore and Washington, D.C., while enhancing access to BWI Marshall Airport. Saturday service includes nine round-trips and Sunday service includes six round-trips daily. There will be no MARC service operating on New Year's Day, Memorial, Labor, Thanksgiving or Christmas days.

SunRail to Become Newest Business Partner for Amtrak

Amtrak and the Florida Department of Transportation (FDOT) have recently entered into an agreement allowing us an opportunity to use excess capacity at our Sanford, Fla., *Auto Train* maintenance facility for Central Florida Commuter Rail Service (SunRail) maintenance and repairs.

SunRail will ultimately operate between Poinciana and Deland, and is slated to begin in early 2014. The project would allow periodic and heavy maintenance on SunRail equipment as well as the opportunity to perform heavy repair and wreck repair work. To meet the contract requirements, four fully reimbursable positions will be created to augment the existing shop force.

This contract exemplifies our ongoing efforts to generate revenue through the effective use of our existing asset base. By capitalizing on this opportunity, nearly \$10 million in revenue will be generated for Amtrak over a seven year period.

Reminder: Register to Have Employee Communications Sent to Your Email Address

As we continue to identify measures to preserve the environment and our financial resources, Amtrak employees now have the option to receive messages and publications sent from the Employee Communications department to an email address of their choice.

Messaging and publications from Employee Communications include *Amtrak Ink*, *Amtrak This Week* and Special Employee Advisories. To receive any of these items electronically, please visit <http://apps.nrpc/EmailOptIn/> and register by Jan. 31, 2014.

The current and past issues of *Amtrak Ink*, *Amtrak This Week* and Special Employee Advisories are available on the company Intranet >"News & Info". To access the company Intranet from a home internet connection, visit Amtrak.com and click on "About Amtrak" > "Employees" > "Log In".

December 16, 2012

Changes Coming to Amtrak Refund Policy

Effective March 1, 2014, changes will be made to the Amtrak refund policy. For most *Acela Express* Business class reservations and reserved Coach class reservations, passengers must cancel their reservation at least 24 hours prior to the train's scheduled departure in order to be eligible for a full refund.

If the reservation is canceled within 24 hours of departure, a refund fee will apply. If the reservation is not canceled prior to scheduled departure ("no show"), the entire amount paid for the reservation will be forfeited and will not be stored in an eVoucher nor applied toward future travel.

Customers who require more flexibility with their travel plans may purchase a fully refundable fare which will allow refunds without penalty even after departure. Customers may select the "Flexible" fare on Amtrak.com or request a fully refundable fare when purchasing from a contact center or station agent.

The new policy will effect both existing reservations already made and all new reservations for travel beginning March 1, 2014.

To see the full refund policy, visit Amtrak.com/refund.

Amtrak Metropolitan LoungeSM to Open in Los Angeles Union Station

On Dec. 19, Amtrak Vice President of Operations D.J. Stadtler will officially open the Amtrak Metropolitan LoungeSM at Los Angeles Union Station. The new lounge, partially funded by Caltrans, will be available to sleeping car passengers, *Pacific Surfliner* Business Class passengers with same-day tickets and Amtrak Guest Rewards members (Select Plus and Select Executive levels). The project was managed by Marcos Gonzalez, assistant superintendent, Stations and Peter Zavala, program manager, Operations. The lounge replaces the pre-boarding area that was adjacent to TRAXX restaurant.

Open daily from 5:00 a.m. – 10:00 p.m., passengers will be able to relax and enjoy complimentary non-alcoholic beverages, Internet access, newspapers, conference room facilities, comfortable seating, ticketing assistance and priority boarding from the lounge to the train via Red Cap service. Original train-themed art work can be seen throughout the area.

Amtrak Metropolitan Lounges are also located in Chicago Union Station and Union Station in Portland, Ore. Other Amtrak private lounges include Club Acela in Boston, New York City, Philadelphia and Washington, D.C. First Class Lounges (separate waiting rooms) are located in St. Paul/Minneapolis, St. Louis, New Orleans and Raleigh, N.C.

EAP Assistance Available to All Employees

During this holiday season, employees are reminded that the Employee Assistance Program (EAP) is available. While this time of the year can be very exciting and rewarding, its added activities and expectations can bring on extra stress both at work and at home. For some, it can raise challenging memories or past behaviors that can leave us feeling less than celebratory. The EAP is aware and is here to help.

The EAP is a confidential program that is staffed by counselors who can help with issues that affect you at home or work. You can reach an EAP counselor by calling the following offices: Boston (617) 345-7738, New York/Philadelphia, (215) 349-1487, Washington, D.C., (202) 906-3447, Jacksonville, (904) 766-5133, Chicago, (312) 544-5354 and Los Angeles, (213) 891-3438. EAP wishes you their best during this special time of the year.

Please note the following changes were issued by the Railroad Retirement Board (RRB) for 2014.

The amounts of compensation subject to railroad retirement tier I and tier II payroll taxes will increase in 2014, while the tier I and tier II tax rates will remain the same on both railroad employers and employees. Also, railroad unemployment insurance contribution rates paid by employers will not include a surcharge in 2014.

Tier I and Medicare Tax--The railroad retirement tier I payroll tax rate on covered rail employers and employees for the year 2014 remains at 7.65 percent. The railroad retirement tier I tax rate is the same as the Social Security tax, and for withholding and reporting purposes is divided into 6.20 percent for retirement and 1.45 percent for Medicare hospital insurance. The maximum amount of an employee's earnings subject to the 6.20 percent rate increases from \$113,700 to \$117,000 in 2014, but there is no maximum on earnings subject to the 1.45 percent Medicare rate.

An additional Medicare payroll tax of 0.9 percent applies to an individual's income exceeding \$200,000, or \$250,000 for a married couple filing a joint tax return. While employers will begin withholding the additional Medicare tax as soon as an individual's wages exceed the \$200,000 threshold, the final amount owed or refunded will be calculated as part of the individual's federal income tax return.

Tier II Tax--The railroad retirement tier II tax rate on employees will remain 4.4 percent in 2014, and the employers' rate will stay at 12.6 percent. The maximum amount of earnings subject to railroad retirement tier II taxes will increase from \$84,300 to \$87,000 in 2014. Since 2004, tier II tax rates are based on an average account benefits ratio reflecting railroad retirement fund levels. Depending on this ratio, the tier II tax rate for employees can be between 0 percent and 4.9 percent, while the tier II rate for employers can range between 8.2 percent and 22.1 percent.

For more information about railroad retirement visit www.rrb.gov.

Record Breaking: Nov. 7, 2013, *Acela Express* ridership peaked at more than **15,000 riders**, making it the **single best day** in the **13-year** *Acela Express* history.

Enjoying the Holidays Onboard the Train...

Fresh evergreens bundled with red ribbons usher in the holiday season in this photo taken aboard one of the famous Pacific Parlour Cars that make up the regular *Coast Starlight* consist. Originally built by the Budd Company for the Santa Fe Railway in the mid-1950s, the cars were configured as Lounges for use on *El Capitan*, an all-coach train running between Los Angeles and Chicago. Amtrak refurbished the Pacific Parlour Cars in the mid-1990s to provide a casual, yet elegant space for Sleeping car passengers to relax.

Changes Coming to Amtrak Refund Policy

Effective March 1, 2014, changes will be made to the Amtrak refund policy. For most *Acela Express* Business class reservations and reserved Coach class reservations, passengers must cancel their reservation at least 24 hours prior to the train's scheduled departure in order to be eligible for a full refund.

If the reservation is canceled within 24 hours of departure, a refund fee will apply. If the reservation is not canceled prior to scheduled departure ("no show"), the entire amount paid for the reservation will be forfeited and will not be stored in an eVoucher nor applied toward future travel.

Customers who require more flexibility with their travel plans may purchase a fully refundable fare which will allow refunds without penalty even after departure. Customers may select the "Flexible" fare on Amtrak.com or request a fully refundable fare when purchasing from a contact center or station agent.

The new policy will effect both existing reservations already made and all new reservations for travel beginning March 1, 2014.

To see the full refund policy, visit Amtrak.com/refund.

Amtrak Metropolitan LoungeSM to Open in Los Angeles Union Station

On Dec. 19, Amtrak Vice President of Operations D.J. Stadtler will officially open the Amtrak Metropolitan LoungeSM at Los Angeles Union Station. The new lounge, partially funded by Caltrans, will be available to sleeping car passengers, *Pacific Surfliner* Business Class passengers with same-day tickets and Amtrak Guest Rewards members (Select Plus and Select Executive levels). The project was managed by Marcos Gonzalez, assistant superintendent, Stations and Peter Zavala, program manager, Operations. The lounge replaces the pre-boarding area that was adjacent to TRAXX restaurant.

Open daily from 5:00 a.m. – 10:00 p.m., passengers will be able to relax and enjoy complimentary non-alcoholic beverages, Internet access, newspapers, conference room facilities, comfortable seating, ticketing assistance and priority boarding from the lounge to the train via Red Cap service. Original train-themed art work can be seen throughout the area.

Amtrak Metropolitan Lounges are also located in Chicago Union Station and Union Station in Portland, Ore. Other Amtrak private lounges include Club Acela in Boston, New York City, Philadelphia and Washington, D.C. First Class Lounges (separate waiting rooms) are located in St. Paul/Minneapolis, St. Louis, New Orleans and Raleigh, N.C.

EAP Assistance Available to All Employees

During this holiday season, employees are reminded that the Employee Assistance Program (EAP) is available. While this time of the year can be very exciting and rewarding, its added activities and expectations can bring on extra stress both at work and at home. For some, it can raise challenging memories or past behaviors that can leave us feeling less than celebratory. The EAP is aware and is here to help.

The EAP is a confidential program that is staffed by counselors who can help with issues that affect you at home or work. You can reach an EAP counselor by calling the following offices: Boston (617) 345-7738, New York/Philadelphia, (215) 349-1487, Washington, D.C., (202) 906-3447, Jacksonville, (904) 766-5133, Chicago, (312) 544-5354 and Los Angeles, (213) 891-3438. EAP wishes you their best during this special time of the year.

December 23, 2012

Deadline for Accepting Picture Rail Travel Privilege Cards Extended through February 28, 2014

Due to production issues involving the new non-picture Rail Travel Privilege Cards that were issued to Amtrak retirees and to all spouses and dependents, the former Amtrak picture Rail Travel Privilege Cards will now be honored through **Friday, Feb. 28, 2014**. Effective March 1, 2014, this former picture card will no longer be honored to “flash pass” on trains or for any other purpose, and employees and pass riders should no longer carry them.

Reminder: Opt In to Receive Select Employee Communications via Email Continues

Amtrak employees without an Amtrak email address now have the option to receive messages and publications sent from the Employee Communications department at an email address of their choice. Messaging and publications from the Employee Communications department include *Amtrak Ink*, *Amtrak This Week* and Employee Advisories.

In addition, as we continue to identify measures to preserve the environment and our financial resources, Amtrak employees can choose to stop receiving a print edition of *Amtrak Ink* at their home and start receiving an electronic version via email. To select any of these options, visit <http://apps.nrpc/EmailOptIn/> and register by Jan. 31, 2014.

The current and past issues of *Amtrak Ink*, *Amtrak This Week* and Employee Advisories are available on the company Intranet >“News & Info”. To access the company Intranet from a home internet connection, visit Amtrak.com and click on “About Amtrak” > “Employees” > “Log In”.

Change Notice: Effective Jan. 1, 2014, the reimbursable automobile mileage rate will be 56 cents per mile.

2014 Calendars Now Available

Available in two sizes, wall and desk, the Amtrak 2014 calendar features our recently unveiled Veterans’ Locomotive which was designed to salute our service men and women and support our company initiative that 25 percent of new hires be from the military by 2015.

On the desk calendar, the locomotive leads the *Coast Starlight* as it passes close to the shore of Puget Sound in Steilacoom, Wash. Following the Veterans’ Locomotive is locomotive number 156 which wears a Heritage scheme dating from the early 1970s.

The wall calendar captures the Veterans’ Locomotive as it leads the westbound *Empire Builder* in Berne, Wash., as it crosses Gaynor Trestle on its way to the summit at Cascade Tunnel.

Both calendars were photographed by Steve Ostrowski, Special Duty Road Foreman, Albany, N.Y., and are available for purchase on Amtrak.com.

Please note that a Rail Travel Privilege Card is required **only** for use as a flash pass on eligible corridor trains; the card is not necessary when obtaining a ticket for train travel. If the person traveling is active in an Arrow pass file, that person has pass privileges and may make reservations and obtain tickets, whether or not he or she has a pass card.

Acceptable identification (driver’s license, state/provincial ID card, passport or high school picture ID) must be presented when obtaining tickets and when flash passing. Active Amtrak employees may also use the Smart ID card as the required identification.

“Flash Pass” Riders Must Allow Swiping of Smart ID Cards

Active duty Amtrak employees use their Smart ID cards (with the blue stripe) as the Rail Travel Privilege Card. To flash pass on eligible corridor trains, this card **must** be physically removed from its holder and presented to the Conductor or Assistant Conductor, who will swipe it in the eTicketing Mobile Device to add the employee to the train manifest. Employees not willing to do this may not flash pass, and must make reservations and obtain eTicket Travel Documents in order to ride trains.

It is the responsibility of the employee to remove the card prior to presenting the card for swiping. Noncompliance can result in suspension or revocation of pass privileges with the issuance of a “Pass Abuse Incident Report” (NRPC 1502).

If a retiree, spouse or eligible dependent is not active in an Arrow pass file, contact Amtrak Benefits. If such a person is active in an Arrow pass file, but has not yet received the new non-picture Rail Travel Privilege Card, contact the Amtrak Pass Bureau at passbureau@amtrak.com or 202-906-3745.

***Amtrak This Week will be returning
January 7, 2014.***

***Employee Communications wishes you a safe and
happy holiday season.***

Amtrak Celebrates Black History Month

Black History Month (BHM) is an annual celebration recognized by the U.S. government in 1976 and has been celebrated during the month of February ever since. This year, numerous radio and print advertising promotions as well as Amtrak employee-orchestrated celebrations are being held throughout the system. Some activities include:

Washington, D.C.: On February 16, the Washington, D.C., based station staff will host their annual BHM program featuring dance and vocal performers as well as a presentation by keynote speaker B. Doyle Mitchell, Jr., president and CEO of Industrial Bank, N.A., and a presentation from Amtrak Police Officer Naomi Stratton and 'Levi' from Amtrak's K9 Unit. The program will be held in the Starlight Room, Gate C from 11:00 a.m. – 3:00 p.m.

New York: Beginning February 17, the annual BHM program at New York Penn station will feature a series of cultural performances. There will also be vendors specializing in African American arts and crafts, jewelry and more. This program is coordinated by the NYP passenger services and station management teams, national advertising and field sales and marketing colleagues. Planned events include:

- *February 17 - Jean Chardavoine Contemporary Jazz and cultural vendors*
- *February 19 - Ebony Hillbillies and cultural vendors (internationally acclaimed Blue Grass Quartet)*
- *February 21 - Ebony Hillbillies and cultural vendors*
- *February 24 - Cultural vendors*
- *February 26 - Ebony Hillbillies and cultural vendors*
- *February 28 - Jean Chardavoine Contemporary Jazz and cultural vendors*

Albany, N.Y.: Local television station My 4 Albany and Amtrak are launching a BHM promotion in the Capital Region of New York State with WNYA, a local cable channel. WNYA will run a series of educational vignettes throughout February, giving Amtrak a full four-week promotion to celebrate Black History Month. Visit www.MY4Albany.com for details.

Milwaukee, Wis.: Throughout February, an Amtrak sponsored BHM vignette program is running on V100.7 radio. The radio spots will highlight a wide range of African American history.

Baltimore, Md.: On February 21 from 11:00 a.m. – 3 p.m., a BHM program will be held at Baltimore Penn station. Exhibit participants include the Tuskegee Airmen, The Negro League Museum and the National Great Blacks in Wax Museum among others.

Station in the Spotlight...Edmonds, Washington (EDM)

Originally built by the Great Northern Railroad (GN) in 1956, the Modernist style [Edmonds depot](#) is now part of a larger multimodal complex serving the residents of Snohomish County. Served by the **Empire Builder** and Amtrak **Cascades**, as well as Sounder commuter rail, it is also in close proximity to numerous local and regional bus lines and ferry service across Puget Sound.

A cabinet in the waiting room contains mementos of the GN, while the former freight room is occupied by a model railroad club.

VP of Operations to Visit Washington, D.C., Area Employees

DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees in Washington, D.C., on February 8. All employees are invited to attend the meetings, which include a brief presentation by Mr. Stadtler followed by a question and answer session. The meetings are scheduled for:

- 10:00 a.m. – 10:45 a.m. at Washington Union Station, Starlight Room, Gate D
- 1:00 p.m. - 1:45 p.m. at the Ivy City Maintenance Facility, Employee Cafeteria

Va. Governor Announces Plan to Increase Passenger Rail Service

Continuing on the success of Amtrak Virginia's intercity passenger rail service, Virginia Governor Bob McDonnell announced a plan last week to return passenger rail service to Roanoke.

"Amtrak applauds Governor McDonnell for continuing to offer a true vision and tangible support of intercity passenger rail as a relief to the growing problems of highway congestion. Passenger rail is a vital alternative in Virginia's overall transportation solution and will be a contributor to Virginia's future economic success," said Amtrak president and CEO Joe Boardman.

Service to Roanoke would be the fourth expansion of intercity passenger rail in the Commonwealth since 2009 following new or additional service to Lynchburg, Richmond and Norfolk. This is made possible through a partnership between Virginia's Department of Rail and Public Transportation, Amtrak and the host railroads along the routes.

Newark Museum Welcomes Amtrak Employees

Nestled within one mile from the Amtrak train station in Newark, N.J., the Newark Museum is a hidden oasis filled with fun and informative activities for the entire family. The museum features permanent science exhibits, interactive galleries, a one-room school house and a planetarium. In addition, the museum offers teen workshops and adult programs.

As part of an ongoing marketing promotion, Amtrak employees can receive free admission for themselves and up to three guests to explore the museum (admission does not include planetarium admission). The museum is open Wednesday – Sunday from Noon – 5 p.m. and is located at 49 Washington Street.

Learn more about the Newark Museum and its upcoming exhibitions at www.newarkmuseum.org.

Meet the Board of Directors

On January 29, the U.S. Senate confirmed the two newest members of the Amtrak board of directors, Christopher Beall and Yvonne Brathwaite Burke. This action creates a full ten- member board.

Each board member's photograph and profile is now on Amtrak.com. To learn more about the [Amtrak Board of Directors](#) visit Amtrak.com → About Amtrak → Board of Directors.

Upgrade to Windows 7 and Office 2010

The IT department will soon be upgrading all desktops, laptops and other computers that currently have the Windows XP operating system to the Windows 7 operating system. At the same time, an upgrade from Microsoft Office 2003 to Microsoft Office 2010 will occur and a new email solution will be deployed. These upgrades will provide Amtrak users a better desktop experience, better security and control and various other improvements offered in the Windows 7 platform.

Upgrades for the station users have started. We expect to begin the upgrades for general business users in early April this year. Below is the current high-level deployment schedule:

- Station Users..... January – April 2013
- Call Center Users.....April – June 2013
- General Business Users.....April – September 2013
- WMS and PTT Kiosks.....March – August 2013

During the actual upgrades, Amtrak IT will be sending out notices to users who should then expect their migration to start within the next several days. Individual workstations should take about a day to migrate; however the impact to the user should be minimal with the migrations being done after 4 p.m. and completed before the next work day.

In addition to the enterprise-wide training webinars which will be provided at regular intervals, Amtrak's IT training department will be providing webinars and quick reference guides to the users before the upgrades. A repository of the training material and helpful hints/tips will be available on a share point site accessible on the company Intranet.

For further information, please contact the Amtrak IT Enterprise Service Management Department at ITServiceManagement@Amtrak.com.

Amtrak Trivia...

Teletrak, a computerized telecommunications program, was introduced in September 1984 to ease communication between travel agents and Amtrak sales consultants. With a simple phone call, agents could learn about ticketing, discounts, advertising and other topics. See an early Teletrak brochure on the [Amtrak History](#) website.

National Train Day - "Trains Matter" TrainDay411.com Launching February 12

Coming off of a record-breaking year of 31.2 million riders and \$2 billion in sales, Amtrak is preparing to celebrate its sixth Annual National Train Day on May 11. This year's National Train Day campaign titled "Trains Matter," is about expanding the awareness of the services and positive impact Amtrak and other operators have on hundreds of towns and communities nationwide. Starting with the launch of our employee-only site, TrainDay411.com, we want to know why "Trains Matter" to our employees. Access this newly designed site from your desktop, tablet or mobile and tell us "why trains matter" to you.

As part of the new "Trains Matter" platform, we are excited to announce a geographic expansion of our efforts; this year's goal is to hold more than 225 events in local communities. Employee participation will be the key to reaching this goal and TrainDay411.com has been redesigned to accommodate employee volunteer sign-ups for more than 100 stations nationwide.

Also on the website, exceptional volunteers will be showcased under the "Employee Spotlight" section, highlighting the good work employees have done and continue to do – you could be one of them! Other popular features such as the Trivia Challenge have been enhanced, so remember to log on to test your knowledge of trains, routes and Amtrak history for the chance to win exclusive rewards each week. Log on to TrainDay411.com on February 12.

Hats Off to Dr. Seuss

What do you get when you invite a cat, a lorax, an elephant and a grinch into your home? It's a celebration 75 years in the making with a cast of characters that only the imagination of Dr. Seuss can bring to life. To help celebrate timeless tales such as *Horton Hears a Who!*, *Green Eggs and Ham* and *The Cat in the Hat*, Amtrak has partnered with Warner Bros. Home Entertainment for a special promotion. During the month of February, customers can get a \$5 rebate by mail when they purchase *Hats off to Dr. Seuss*, featuring five classic television specials on Blu-ray™ or DVD.

In addition to the rebate, Amtrak will be featured in 50,000 DVDs with an insert on our Kids Ride Half-Off fare. Counter cards and seatbacks will be available in over 100 Amtrak stations, while placemats with the Amtrak children's menu will be placed on long-distance trains. For more information, visit www.amtrak.com/drseuss.

It's a Great Time to Know Your Numbers!

In our busy lives, taking time for our health often does not get the priority it deserves. Cigna has partnered with Amtrak to provide our employees with five on-site Health Station kiosks to monitor our blood pressure and pulse rates.

The kiosks are available at:

- Washington, D.C.: Fourth floor crosswalk between 40 and 60 Massachusetts Ave., N.E.
- Beech Grove Maintenance Facility: Administration Building Lobby
- Ivy City Maintenance Facility: Main Entrance Lobby
- Bear, Del., Maintenance Facility: Lunch Room
- Riverside, Calif., Call Center: Health Maintenance Room

Each kiosk features a fully automated blood pressure cuff which is easy to use and available to you anytime. While this is a great way to monitor your blood pressure, it's not intended to replace a visit with your doctor.

Operations Reorganization Update

Two more high-level positions in the Operations department were filled last week. Thomas J. Hall has been named chief of customer service and Jay Commer as general manager of state-supported services. Both will report directly to vice president of Operations DJ Stadtler.

In his new position, Mr. Hall will be in charge of ensuring that Amtrak provides service that meets the wants, needs and expectations of our customers. He will oversee system operations functions, including the Consolidated National Operations Center, crew management services, intermodal connectivity, administration of special trains and food and beverage services. In addition, he is responsible for setting and maintaining station and on-board service standards. He will be based in Wilmington, Del.

As general manager of state-supported services, Mr. Commer is responsible for providing our state partners with excellent service, while meeting financial goals, productivity enhancements and other performance targets. These are both critical positions that support the corporate goals of Amtrak's Strategic Plan.

Station Groundbreaking in Winter Park, Florida

On February 13, Amtrak joined the city of Winter Park, the Florida Department of Transportation, the Federal Transit Administration and community leaders for a groundbreaking ceremony for the new Winter Park train station. The planned 2,400 square-foot building will feature craftsman-style architecture and include ADA-compliant restrooms and a lobby that will serve Amtrak and SunRail.

Since Fiscal Year 2002, this station has seen a 40 percent increase in passenger counts with more than 33,400 customers last year. The new station will provide a long-term viable solution for continued growth in ridership and bring many benefits to the community including economic development and tourism growth. Construction is expected to conclude in late 2013.

New Acela Advertising Campaign to Launch Today

Today marks the launch of the *Acela Express* winter/spring advertising campaign. The new high-impact campaign is designed to garner new customers while reinforcing product benefits with our current customers. The goal is to bring *Acela Express* to the attention of business travelers who typically fly, by communicating a superior travel experience, conveying a greater sense of modernity and speed while also highlighting the unique product benefits and attributes. In addition, the *Acela* logo will be more prominent than in past campaigns to help drive brand recognition. The campaign targets business travelers with a multi-channel media approach; utilizing print, online, mobile, out-of-home and television advertising.

In Fiscal Year 2012, *Acela* revenue increased 3.3 percent to \$508 million and ridership grew 0.5 percent to 3.4 million passengers.

New E-mail System Arriving Soon

Amtrak's IT department will soon be migrating to a new e-mail system in order to improve performance and reduce operating costs. Due to technical limitations, the initial timeframe of purging old e-mail messages was delayed. The purge is now able to be executed during the migration of mailboxes to the new e-mail system. Changes with the new migration include:

- Migration to the latest Microsoft e-mail system: Exchange 2010
- Replacement of the e-mail archive system
- Addition of integrated instant messaging

Actual migrations are expected to begin in early June of this year. Due to the number of mailboxes and the number of messages being migrated, the process is expected to run until June 2014. As the project timeline gets closer to the start of mailbox migrations, the IT department will send out a high-level migration schedule. During the actual migrations, those people whose mailboxes will be migrating soon will receive notices with enough lead time to allow them to make plans for minimizing any impact.

In accordance with Amtrak's records retention policy, all messages older than 90 days that have NOT been moved into one of the user-directed archive folders will be purged at the time of migration, and they will not be able to be recovered. If you have questions regarding this policy, please contact the Records and Information Management department at RIM@amtrak.com

Coast Starlight Car Transformed into San Francisco Cable Car

We are part of a promotion with the San Francisco Travel Association titled "49 Hours of SF: Arts & Culture" which encourages visitors to plan a 49-hour getaway with a special package offer. Through the end of April, visitors staying three or more nights at participating hotels booked at www.49hoursofsf.com can receive 25 percent off their entire stay.

For this partnership, the San Francisco Travel Association has decorated an entire Amtrak car as one of the city's famous people-movers. This is the first time that Amtrak's *Coast Starlight* route has featured a wrapped car. The "cable car" wrapped car will travel the route (Los Angeles – Seattle) through Ventura, San Luis Obispo, Oakland and other destinations through April 30.

Station in the Spotlight...McComb, Mississippi

In October 2012, the city of McComb won a \$100,000 Mississippi Makeover grant from Entergy Mississippi, Inc., that will be used to improve the downtown area around the [historic 1901 Illinois Central Railroad depot](#). Volunteers, including many Entergy Mississippi employees, will clean, clear and landscape the rail yard boundaries and public lands along the approaches to the building.

In addition to a waiting room for *City of New Orleans* passengers, the depot houses the Pike County Chamber of Commerce, the Industrial Development Foundation and the McComb Railroad Museum.

Maintenance Responsibilities Gained in Michigan

Effective February 16, we assumed maintenance responsibilities for the rail line (former Norfolk Southern route) owned by the state of Michigan on behalf of the Michigan Department of Transportation (MDOT). This line is used by the *Wolverine Service* and *Blue Water* trains from Kalamazoo to Central and Eastern Michigan. It confirms the vision MDOT has for High Speed Rail and their commitment to bring it to fruition.

As announced in December 2012, MDOT used a grant from the Federal Railroad Administration to purchase 135 miles of Norfolk Southern railroad for \$140 million. This line is directly connected to the Amtrak-owned Michigan District, which runs 97 miles from Kalamazoo to Porter, Ind. The result is that nearly 80 percent of the route between Detroit and Chicago is now publically owned and will be maintained for passenger trains at higher speeds.

To conduct daily maintenance of way responsibilities our Engineering department has employed 46 people including:

- 14 Communications and Signal employees, seven of whom transferred from Norfolk Southern to work at Amtrak
- 31 Track employees, five of whom transferred from Norfolk Southern to work at Amtrak and
- 23 Amtrak employees we were able to bring back from furlough status

These employees reported to the Jackson, Mich., office to receive assignments, basic orientation, personal protective gear and truck assignments where needed. They will be mainly based out of Jackson, but will also work out of Ypsilanti and Battle Creek, Mich., to enable quicker responses to emergency situations.

This transition to Amtrak maintenance will not come without future challenges. As our maintenance crews access this territory we anticipate learning more and future slow orders may be required to operate trains safely. Regardless of these challenges, this is an exciting opportunity as it will extend a long relationship with the state of Michigan for at least the next 20 years following the completion of the High Speed Rail projects. These projects include the replacement of the old signal system and upgrade of current track conditions. In addition, new track will be installed between Ypsilanti and Dearborn to address capacity issues between passenger and freight services in that area.

Update: New Orleans Union Passenger Terminal

New Orleans Union Passenger Terminal (NOUPT) was recently linked to the city's streetcar system via Loyola Avenue and the central business district. NOUPT is also undergoing a multi-year rehabilitation with projects to bring the public areas into ADA compliance, restore the waiting room murals and reinstall the original tile ceiling. As of early 2013, completed ADA projects include the installation of new doors at the entrances and improvements to the restrooms. The Amtrak ticket counter and other related support areas have also been refurbished. In Fiscal Year 2012, NOUPT welcomed 228,828 passengers.

http://www.greatamericanstations.com/Stations/NOL/Station_view

VP of Operations Visits Beech Grove Maintenance Facility

Today, DJ Stadtler, vice president of Operations, continued his Town Hall meetings, explaining the Operations reorganization to employees at our Beech Grove Maintenance Facility.

Mr. Stadtler gave a brief presentation and then answered questions. The Wilmington, Del., area hosts the next series of Operations reorganization Town Hall meetings on March 11. Details will be announced soon.

IAMAW signs onto ORB and Safe-2-Safer

We are pleased to announce that during the month of February, the International Association of Machinists and Aerospace Workers (IAMAW) have signed onto Operation RedBlock (the Rule "G" Bypass and Prevention Program Companion Agreements) and Amtrak's Safe-2-Safer Program.

Please welcome our team members from the IAMAW into these important programs.

Update: National Train Day

This year, National Train Day (NTD) is May 11. Celebrations will be taking place within communities around the system and volunteers are vital to help make all festivities a success. Please visit our employee microsite, www.TrainDay411.com, and register to volunteer at a location near you. While on the microsite, test your train knowledge by entering the weekly Trivia Challenge for your chance to win exciting prizes. Good luck!

In addition to our employee microsite, last week the 2013 National Train Day website, www.NationalTrainDay.com launched. On the website, visitors can register their community's NTD event, explore other NTD celebrations throughout the system and share their thoughts on why trains matter to them. "Trains Matter" is this year's National Train Day theme.

Amtrak Trivia...

What would you prefer for breakfast--a Baggage Car or a Silver Spike? Early Amtrak children's menus used fun railroad-themed names to describe meal options. Join the "Fun Food Train" and check out a kids' menu from the 1970s at the Amtrak History website.

January 7, 2013

New Board Members Confirmed by Senate

The nominations of Yvonne B. Burke and Christopher R. Beall to Amtrak's Board of Directors were confirmed by the U.S. Senate on January 1. President Barack Obama nominated Burke in March and Beall in September 2012.

Burke, a former U.S. Congresswoman (D-CA) and a former Los Angeles County Supervisor, serves on the California Transportation Commission. Beall, hailing from Oklahoma, is a partner at infrastructure investment firm Highstar Capital, L.P., and previously was at Aslan Group and Lehman Brothers.

Senior Operations Positions Filled

Matt Hardison has been named as our new chief marketing and sales officer (CMSO). Matt will be responsible for sales distribution and customer service, field marketing, advertising and sales promotion, Amtrak Guest Rewards, market research and analysis, reservation sales, on-board systems, pricing and revenue management, eTicketing and eCommerce.

Joining Amtrak in 1999 as senior director, commercial partnerships, Matt designed and built our loyalty marketing program (Amtrak Guest Rewards) and created new service and product partnerships with a number of airlines, AOL, Yahoo, and MBNA Chase.

Magdy El-Sibaie has been named as our new chief safety officer. Dr. El-Sibaie will be responsible for planning, directing and overseeing the safety activities and standards of Amtrak departments to achieve continuous improvement in employee and passenger safety, including the railroad's Safe-2-Safer behavior-based cultural safety program. In addition, he will provide oversight of Amtrak's compliance with safety regulations and participation in current and emerging industry safety programs.

Prior to coming to Amtrak, Magdy's work experience includes serving as director, office of research and development for the Federal Railroad Administration, and senior engineer, track and vehicle/track interaction for the Association of American Railroads.

Robin McDonough has been named chief, business operations. In her new role, Robin will be responsible for collecting and analyzing operations performance metrics, performance improvement planning, budgeting and administration and operations technology oversight to ensure integration across the new Operations business lines being established under the Amtrak Strategic Plan.

Robin has been with Amtrak since 1981 and has held a variety of senior positions, most recently as chief, business operations and technology.

401(k) Loan Procedure Change

On February 1, 2013, a change in obtaining a loan from the agreement and non-agreement 401(k) savings plan will be implemented. Under the revised procedure, a plan participant must wait 15 calendar days after repaying a loan before applying for a new loan. This change will completely automate the process and eliminate the need to manually update loan information in SAP. If you have any questions please call Fidelity Investments on 1-877-477-2685.

Acela Express Service to Expand in 2013

A 16th weekday Washington-New York *Acela Express* round-trip will be added into service effective January 28. The addition of train 2128, the northbound 8:00 p.m. departure from Washington to New York, plus the extension of Boston to New York train 2193 (to be renumbered as train 2175) to Washington helps satisfy increasing consumer demand along the heavily traveled Northeast Corridor.

New System Timetable Due to Arrive

Beginning January 14, a new system timetable will go into effect. Changes to the system include the expansion of *Downdeer* service and Northeast Regional service to Norfolk, Va. In addition, new *Acela Express* enhancements and new eastern North Carolina thruway services will be among the changes.

2013 Calendars Now Available

North Carolina locomotive 1797, "City of Asheville," and Amtrak locomotive 120 are pictured with Raleigh as the backdrop on the official 2013 Amtrak calendar. The calendar captures the long standing and progressive partnership between Amtrak and the state of North Carolina to provide an expanded intercity passenger rail service in the region.

The state-supported *Carolinian* trains 79 and 80 operate daily between New York and Charlotte, and the *Piedmont* trains 73, 74, 75 and 76, operate daily between Raleigh and Charlotte. Ridership in North Carolina increased four percent in Fiscal Year 2012 to more than 940,000 ons and offs. Amtrak partners with 15 states to provide intercity passenger rail service.

Available in two sizes - desk and wall; the calendars can be purchased on Amtrak.com.

Pre-Tax Transit Limits Increased

The new tax law that was passed by Congress last week has increased the mass transit commuter pretax limit from \$125 to \$240 per month. Amtrak's Benefit Service Center is working to update the benefit system to allow the increased election amount. We will inform you when you can update your election amounts at Amtrakbenefits.com. The increased pretax limit is retroactive back to 2012. At this point, guidance is needed from the U.S. Department of the Treasury and the IRS about how to apply the retroactive increased limits back to 2012. More information will be coming.

Station in the Spotlight...Winnemucca, Nevada (WNN)

In early 2012, a new red brick shelter and ADA compliant concrete platform with tactile edging were completed at Winnemucca, Nev. Inspired by late 19th century depots; the shelter has an enclosed, one-story waiting room flanked by recessed canopies. Travelers with an eye for detail might notice that it is similar to new shelters at Okeechobee, Fla., and Alliance, Ohio. Winnemucca is a stop along the *California Zephyr* and is famous for its annual Tri-County Fair and Rodeo. To learn more, visit GreatAmericanStations.com.

January 14, 2013

Pre-Tax Transit Limits Increased

The recently enacted American Taxpayer Relief Act of 2012 included a provision that increased the monthly transit limit to \$245. The Amtrak Benefits Service Center website, www.AmtrakBenefits.com, is ready to accept your changes to the mass transit commuter accounts. Changes made from the first to the fifteenth of the month are effective the following month. Changes after the fifteenth are effective the second month following the new election.

If you have questions, please contact the Benefits Service Center at 1-800-481-4887.

Business Travel Policy and Procedure Changes

Many employees are required to travel for Amtrak business purposes throughout the year. Amtrak has a Duty of Care responsibility to its employees so as a reminder, all Amtrak business travel, except rail, must be reserved through Travel Leaders, the contracted Amtrak Travel Services provider, which can be accessed in the eTravel Worldspan/Travel Leaders Trip Manager Catalog located in eTrax. Employees are advised not to reserve directly with any airline, hotel or car rental organization. In addition, a Travel Authorization form must be completed and approved before travel reservations are made.

For more information on Amtrak's Business Travel Policy please visit the company Intranet → How We Work → Mgmnt. Employee Business Travel or <http://wiki.corp.nrpc/display/Bustravel/Home>.

Please note: the reimbursable mileage rate for the use of personal vehicles as of January 1, 2013 is \$.56½ per mile.

Volunteers Needed For 2013 Presidential Inauguration

Volunteers are needed to assist our customers at Washington Union Station on January 21. Areas in need of assistance include: line monitors, Quik-Trak machines, gate assistance and general information. Volunteer sessions are 7 a.m. – noon or noon – 7 p.m. To register, contact Crystal Mack at 202-906-3080/ATS 777-3080 or email Crystal.Mack@Amtrak.com. Meeting location is Gate A, Suite 100. Attire is business casual. Your participation is appreciated.

VP of Operations to Visit New Orleans Employees

DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees in New Orleans on January 16. Employees are invited to attend the meeting, which includes a brief presentation by Mr. Stadtler followed by a question and answer session. The meetings are scheduled for:

11:30 a.m. - 12:15 p.m. in the Magnolia Room and
1:00 p.m. - 1:45 p.m. in the Mechanical Lunch and Safety Briefing Room.

Special Ticket Discount Offer at Arena Stage

Amtrak employees located in or visiting the Washington, D.C., area can now take advantage of a special offer to see *Metamorphoses*, a play directed and written by Tony Award winner Mary Zimmerman. Zimmerman's magical interpretation of Ovid's *Metamorphoses* proves myths about romance, family, loss and redemption never go out of style. Playing February 8 through March 17 in-the-round at Arena Stage, a special \$20* ticket is available for the following performances:

- Friday, 2/8/13 at 8:00 p.m.
- Saturday, 2/9/13 at 8:00 p.m.
- Sunday, 2/10/13 at 2:00 p.m.
- Sunday, 2/10/13 at 7:30 p.m.
- Tuesday, 2/12/13 at 7:30 p.m.
- Wednesday, 2/13/13 at 7:30 p.m.

To take advantage of this \$20 ticket offer for *Metamorphoses*, please visit <http://www.ArenaStage.org> and purchase your tickets online. Enter AMTRAKTIX promo code in the promo code box and click "go" before continuing with your purchase. Even though the website reads "\$40.00 tickets available", click through on the "Purchase" link for the requested performance date and the \$20.00 Amtrak employee discount will appear. If you have any questions, please call the Arena Stage Sales Office at 202-488-3300 (Tuesday – Sunday, 12 noon - 8pm EST).

**Plus applicable fees; does not apply to previously purchased tickets. This \$20 ticket offer is limited to four tickets per employee and subject to availability.*

Station in the Spotlight....Reno, Nevada (RNO)

The former Southern Pacific Railroad station in Reno, Nev., was recently added to the National Register of Historic Places. Erected in 1926, the Mediterranean Revival style building features terrazzo flooring and a wood-paneled ceiling. The Reno City Council has approved plans to renovate the station to serve as a heritage center with exhibits on local history. Amtrak is the primary user of the recent addition to the building.

To learn more about stations throughout the Amtrak system, visit GreatAmericanStations.com.

Changes Made to Superliner Transition Sleeping Car Travel

Over the last few years, revenue passenger sales in Superliner Transition Sleeping Cars have increased. A number of systems in the Transition Car differ from other Sleeping Cars. In order to support our goal of increased customer focus and to effectively serve our passengers and employees traveling in Business Travel (BT) space, several changes are now in effect and include:

- Train Attendants should introduce themselves by name to passengers (including BT passengers), and provide the location where the Train Attendant can be found in the event of an emergency.
- All beds should be made-up and ready in both revenue and BT rooms.
- Employees traveling in BT space are expected to remove any used and unused linen and place the items in the designated linen bag. Accommodations are to be left neat and clean.

For more information visit the company Intranet → Library → Policies → Employee Pass, Voucher, and Service Award Trip Policies.

Influenza Season

Amtrak is committed to the well-being of our employees and our passengers. While the length and severity of influenza seasons are difficult to predict, so far this year the season has been moderate and arrived a little earlier than usual. The Center for Disease Control and Prevention (CDC) recommends efforts to reduce the spread of influenza virus. These preventative actions include:

- If you haven't done so, get vaccinated. Over 3,000 employees took advantage of complimentary flu shots that were recently offered by Amtrak. While the program is over, check with your physician or local pharmacy for vaccination availability.
- Wash your hands often with soap and water. If soap and water is not available, use an approved hand sanitizer.
- Cover your nose and mouth by coughing or sneezing into your sleeve or into a tissue. In addition, dispose of any used tissues in a proper trash receptacle.
- Avoid contact with sick people. Recommended distance is three to six feet.
- Stay home and postpone travel if you are sick.

For more information about influenza, visit <http://www.cdc.gov/flu> or the company Intranet at Safety → Health → Public Health → Pandemic Flu Contingency Plan.

2013 Holiday Schedule

Holidays observed at Amtrak vary depending on an employee's status. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each agreement can be found on the home page of the Intranet under Employee Info → Holidays.

Amtrak will observe the following 2013 dates as holidays for non-agreement employees:

- New Year's Day, January 1
- Martin Luther King, Jr. Day, January 21
- President's Day, February 18
- Memorial Day, May 27
- Independence Day, July 4
- Labor Day, September 2
- Veterans Day, November 11
- Thanksgiving Day, November 28
- Christmas Day, December 25

Non-agreement employees hired in 2013 will receive personal days based on their date of hire. Employees hired between January 1 and May 31 will receive two personal days, while those hired June 1 through August 31 are entitled to one personal day. Employees hired September 1 or after will not have any personal days.

For further information regarding holidays and personal days, please refer to the company Intranet under Library → Policies → Human Capital Management Policies → Holiday Schedule.

Amtrak Trivia...

Name the four new stops that were added to the Amtrak system in 2012.

- Brunswick, Maine
- Freeport, Maine
- Norfolk, Va.
- Santa Clara University, Calif.

Amtrak and California Partner in Pursuit of New High-Speed Train Sets

Amtrak and the California High-Speed Rail Authority (CHSRA) announced that they are joining forces in the search for proven high-speed rail (HSR) train sets currently being manufactured and in commercial service that are capable of operating safely at speeds up to 220 mph on both Amtrak's Northeast Corridor (NEC) and on California's developing HSR corridor.

Due to the consistently strong and record setting NEC ridership over the past 10 years, new and additional HSR equipment is needed. The plan envisions an initial acquisition of up to 12 new HSR train sets to supplement current *Acela Express* service and add seating capacity in the near term. We would then look to replace the 20 current *Acela* train sets in the early 2020s. Specifically, Amtrak is seeking a HSR train set able to operate at the current NEC maximum speed of 150 mph and can ultimately operate at up to 220 mph as the tracks and other infrastructure is improved to support the higher speeds.

In addition, the preferred train set should have electric multiple unit (EMU) power distribution among all cars, operate bi-directionally with a cab car on each end that would allow for passenger occupancy and has a seating capacity of 400 to 600 passengers.

CHSRA is seeking a HSR train set able to operate up to 220 mph and have electric multiple unit (EMU) power distribution among all cars, operates bi-directionally with a cab on each end that allows for passenger occupancy with a seating capacity of 450 to 500 passengers per train set. California plans a first order of 27 HSR train sets.

Last week, in conjunction with California, a Request for Information (RFI) was formally issued to start the process. This partnership advances both HSR programs, and could create efficiencies by ordering trains of similar specifications and develop a U.S. standard for HSR train equipment that can be manufactured and supplied domestically and produced for the rest of the world. A Request for Proposal could be issued by September 2013 with an order placed during 2014.

Amtrak Chief of Police Named to Operation Lifesaver Inc., Board of Directors

Polly Hanson, our new chief of police, has been named to the board of directors for Operation Lifesaver Inc., (OLI). Operation Lifesaver is a national, non-profit safety education group whose goal is to eliminate deaths and injuries at railroad crossings and along railroad rights of way. With programs in all 50 states, OLI has trained volunteers who provide free safety talks to community groups, school bus drivers, truck drivers and student drivers to raise awareness of the dangers around railroad tracks and trains.

VP of Operations to Visit Auto Train Terminal in Lorton, Va.

DJ Stadler, vice president of Operations, will continue his Town Hall meetings explaining the Operations reorganization to employees at the Auto Train terminal in Lorton, Va., on February 1. Employees are invited to attend the meeting, which includes a brief presentation by Mr. Stadler followed by a question and answer session. The meeting is scheduled for:

11:00 a.m. – 11:45 a.m. in the Employee Lunch Room, Administration Building

Amtrak Employee Discount Tickets Extended at Arena Stage

Arena Stage in Washington, D.C., has extended another special offer to Amtrak employees to see *Good People*, a play written by Pulitzer Prize winner David Lindsay-Abaire. Named the Best Play by the New York Dramas Critics' Circle during its Broadway run, *Good People* is a poignant drama about life in a broke and broken American town. Arena Stage is offering a special \$20* ticket for the following performances:

- Sunday, 2/3/13 at 2:00 p.m.
- Sunday, 2/3/13 at 8:00 p.m.
- Sunday, 2/10/13 at 2:00 p.m.
- Sunday, 2/10/13 at 8:00 p.m.
- Sunday, 2/17/13 at 7:30 p.m.

To take advantage of this \$20 ticket offer, please visit <http://www.ArenaStage.org> and purchase your tickets online. Enter AMTRAKTIX promo code in the promo code box and click "go" before continuing with your purchase. Additional show information can be found at <http://www.arenastage.org/shows-tickets/the-season/>.

**Plus applicable fees; does not apply to previously purchased tickets. This \$20 ticket offer is limited to four tickets per employee and subject to availability. Even though the website reads "\$40.00 tickets available," click through on the "Purchase" link for the requested performance date and the \$20.00 Amtrak employee discount will appear.*

Station in the Spotlight....Tucson, Ariz. (TUS)

Originally built in 1907, the Tucson, Ariz., depot underwent a dramatic facelift in 1941, which it retains today. Originally surrounded with elaborate sculptural ornamentation in the Spanish Churrigueresque style, the Southern Pacific Railroad later modernized the facility by stripping the fancy decoration and creating a streamlined Art Moderne façade.

The main waiting room, decorated with colorful blue and yellow tiles and handsome wooden benches, is the version of the depot that the Duke and Duchess of Windsor experienced when they visited Tucson in 1959. The city bought the station and associated buildings in 1998 and undertook a \$2.8 million restoration. To learn more, visit GreatAmericanStations.com

Amtrak RSS Feed Now Available

On January 13, the eCommerce and IT departments completed the successful launch of Amtrak RSS feeds as an additional online communication channel. The Amtrak RSS feeds allow subscribers the opportunity to receive the latest Amtrak information delivered to their web browser or newsreader. Topics of interest include regional Hot Deals, Station News, regional Service Alerts and Passenger Services Notices and News Releases. To subscribe to this free service visit Amtrak.com/RSS.

Free Amtrak Route Podcasts on Select Train Routes

Amtrak, the National Park Service's Trails and Rails Program and the Department of Recreation, Park and Tourism Sciences at Texas A&M University have created audio podcasts to enhance our passengers' travel experience on the *Sunset Limited* (New Orleans - Los Angeles) and *Texas Eagle* trains (Chicago - San Antonio - Los Angeles). The podcasts act as a trip guide, providing information on the travel experience and points of interest. Podcasts are free and available on Amtrakrailguide.com.

eTicketing Launching on San Francisco Bay Thruway Buses

As a continuation of our eTicketing deployment in California, Print Anywhere tickets are scheduled to launch on the Transbay (San Francisco-Emerlyville, San Francisco-Oakland and Oakland-Emerlyville) Thruway bus services on February 1. On February 4, eTicketing deployment will begin on the San Jose-Stockton Thruway bus services. This launch is limited to one-way tickets only; multi-ride tickets will continue to be issued and processed as "value tickets" as has been the case with previous deployments.

Print Anywhere tickets will be launched on the San Francisco-Stockton Thruway buses later this year.

Transportation Reimbursement Account Changes

We encourage all employees to take advantage of the tax savings offered through the Transportation Reimbursement Account. The monthly transit limit was just increased to \$245. The Amtrak Benefits Service Center website, www.AmtrakBenefits.com, is ready to accept your changes to the mass transit commuter accounts. Please contact the Benefits Service Center at 1-800-481-4887 should you have any questions.

2013 Presidential Inauguration

There was higher than usual ridership on many Northeast Corridor trains arriving to and departing from Washington Union Station for last week's Presidential Inauguration. There was also increased station traffic from Metro, Greyhound and other intercity bus riders passing through the station en route to inaugural activities. Amtrak employee volunteers were on hand throughout the day assisting with crowd control, and provided general information and directions to attendees.

Our appreciation and thanks to the employees who volunteered their time and assistance at Washington Union Station.

Rental Bicycles Now Available in Portland, Maine

Amtrak *Downeaster* passengers disembarking at the Portland Transportation Center can now tour the city and the surrounding area on a rented bicycle available at the station. Effective June 1, self-serve bikes became available for rent for up to a 24-hour period for \$20.00. Each bicycle is outfitted with a basket and a bike lock. The key is stored inside a lock box.

To reserve a bicycle, riders must register at www.zagster.com. This program adds a new dimension for rail passengers and employees looking for a fun, healthy and environmentally-friendly way to experience Portland.

New Voluntary Benefits Now Available

Beginning July 1, Amtrak Total Rewards brings you access to affordable voluntary benefits including pet insurance, identity theft coverage and auto and home insurance. These options provide access to preferred providers and offer competitive, discounted rates for Amtrak non-agreement employees. View program details at www.AmtrakBenefits.com and enroll anytime directly with the partners below:

Car and Home Insurance—Liberty Mutual

Get exclusive group savings on Liberty Mutual's competitive rates. Save even more when you combine your car and home insurance.

www.libertymutual.com/amtrak or 1-855-948-6267

Identity Theft Insurance—InfoArmor

Deter identity theft and detect fraud early with identity theft coverage at reduced rates. If you do become a victim of identity theft, your coverage provides you with a dedicated representative who will manage your case from start to finish—saving you time, money and stress.

www.infoarmor.com/amtrak or 1-800-789-2720

Pet Insurance—Trupanion

Access to one, simple plan for your pet – you cover routine care and your Trupanion insurance covers 90% of actual veterinary costs for approved accident and illness claims, less the exam fee and optional deductible. Rates are discounted with no enrollment fee for Amtrak employees.

www.trupanion.com/amtrak or 1-877-589-1848

Amtrak & You

In an effort to recruit new employees in the early years, Amtrak created a full-color brochure describing the company's efforts to improve the nation's passenger rail system. Sections are devoted to the passenger, Amtrak image and training. "Amtrak depends on high quality service, and only you can provide that."

<http://history.amtrak.com/archives/amtrak-you-brochure-1970s>

Veterans Hiring Initiative Unveiled

Last week, our new Veterans Hiring Initiative was officially launched as part of a special ceremony that also unveiled our Veteran's Locomotive. The initiative is part of our company's continued effort to support our nation's service men and women and sets a goal of recruiting 25 percent of new hires from the military by 2015.

To meet our goal, Amtrak is partnering with recruiting groups that focus on veteran hiring including the U.S. Chamber of Commerce's Hiring our Heroes, the Wounded Warrior Project, RecruitMilitary, and ArmyPaYs. In addition, our Human Capital department is participating in military job fairs across the country.

In 2012, 14 percent of new hires were veterans. Coupled with our current employees who are also veterans, our company-wide commitment to U.S. veterans is further strengthened.

Employee Business Travel Program Now Available on United Airlines

Effective July 1, we are pleased to announce the launch of an upfront discount for Amtrak employees traveling for business on United Airlines on all domestic and international routes.

To take advantage of the savings, employees flying for Amtrak business must book through the corporate travel website Travel Leaders in eTrax. All Amtrak travelers must also have a complete and accurate profile in Worldspan/Trip Manager to book travel, which includes their cost center, internal order and WBS element.

Niantic River Bridge Replacement Complete

The three-year Niantic River Bridge Replacement Project, which provides improved operational reliability for rail passengers along the Northeast Corridor with increased train speeds, less disruption to the boating community and expanded beach access to area residents is now complete. The new bridge continues to serve as a key link for passenger and freight rail traffic between New York and Boston, carrying 54 trains daily (38 Amtrak intercity trains, two freight trains and 14 commuter trains).

The work involved the construction of a new two-track electrified movable bascule bridge (commonly referred to as a draw bridge), across the Niantic River, 58 feet south of its previous location between East Lyme and Waterford, Conn., realignment of the track along west and east approaches to the bridge, track embankment construction, scour (sediment) protection, new retaining walls and the creation of new electrification and signaling systems. The boating community is also benefiting from the project.

*Employee Communications Wishes Everyone a
Safe & Happy July 4th Holiday*

Amtrak Labor and Employment Law Newsletter Now Available

Employees can read the latest edition of the Amtrak Labor and Employment Law Newsletter--"On the Right Track" -- as well as past editions, under Law department Publications on the Law department Intranet page, located on the company Intranet → How We Work→ Law Department.

Featured in this Issue

- Can I Craft the Job Description to Fit the Person I Want to Hire?
- How Many Leave Extensions is Too Many?
- Can Assignment of Boring and Unnecessary Tasks be Harassment?
- Co-Worker Telling Supervisor Employee Was "Sick" Not Sufficient FMLA Notice

- New York City Latest to Prohibit Unemployment Discrimination

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter. They are available to provide you with answers to your labor and employment law questions.

Share Your Ideas for a Chance to Win an iPad Mini---- Deadline is July 16

Calling all Creative Amtrakers – This fall, Human Capital will provide employees with an easier process for goal setting and performance management.

We have a challenge - the tool, to be used to help managers and their teams 'get on the same page', needs a name that is appreciated and recognized by Amtrak employees. To get us there, we need your suggestions for a name – one that works for you.

Here are the contest guidelines:

- 1) Your name idea should reflect the concept of career development specifically at Amtrak
- 2) Think short and sweet - three words or less

If your idea is selected, you will win an iPad Mini. As an added bonus, just for participating in this contest you are entered to be randomly selected to receive an iPod Touch! **Let your creative juices flow!**

TO PARTICIPATE: Please click the link below or copy/paste into your internet browser:

<https://www.surveymonkey.com/s/SFbrandcontest>

Make a Healthy Choice Every Day: Choose a Heart Healthy Diet

It's important to balance the amount of food you ingest with the energy (amount of calories) that you burn. Follow the American Heart Association's guidelines for a balanced, nutritious diet. It recommends that you try to meet the following goals (based on a 2,000 calorie a day diet):

- 4.5 cups of fruits and vegetables per day
- Two 3.5 ounce servings of fish per week
- Three 1-ounce servings of fiber-rich whole grains per day
- Less than 1,500 milligrams of sodium per day
- Less than 450 calories of sugar-sweetened beverages per week
- Include unsalted nuts, legumes and seeds
- Limit processed meats
- Choose fat-free or low-fat dairy products

As part of the Every Day Wellness program, you have access to discount programs to help you manage a healthy diet.

Cigna participants can partner with a registered dietician at discounted rates. To get started, log on to **myCigna.com** and select **Review My Coverage**. Then go to: **Discount Programs – Healthy Rewards** and select **Weight and Nutrition**.

Aetna participants can access the Aetna Weight Management discount program by logging on to **www.aetna.com**. Once you log on, choose **Health Programs**, then **See the Savings**. Follow the steps for each program you want to use.

Reminder: Operation RedBlock is Here to Help

Operation RedBlock is a labor-developed, company-adopted drug and alcohol prevention and intervention program offered to all Amtrak employees. Please remember Operation RedBlock is here to help. Labor Coordinators are available 24/7 to provide assistance. For **CONFIDENTIAL** mark-offs please call 1-800-44R-BLOC (1-800-447-2562).

Station in the Spotlight...Albuquerque, New Mexico

Opened in 2002, the [Alvarado Transportation Center](#) is a busy intermodal hub served by Amtrak, Rail Runner Express commuter rail and intercity and local buses. Located between the historic downtown and the University of New Mexico campus, the transportation center is recognized for its Mission Revival architecture, which references the famous Fred Harvey [Alvarado Hotel](#) that stood on the same site until 1970. Every October, the city hosts the world's largest hot air balloon festival.

Exhibit Train Heads West

The Amtrak Exhibit Train heads West this week, and will be available for viewing at the following locations:

- July 19-21 Havre Amtrak Station
- July 27 Seattle King Street Station (Seattle Rail Day)
- August 3-4 Spokane Intermodal Center

Visitors can climb aboard and tour a free exhibit to learn about Amtrak's history and catch a glimpse into our company's future. Displays include vintage advertising, past menus and dinnerware, period uniforms, photograph and other items of memorabilia from Amtrak's creation in 1971 to a model of today's modern sleeping accommodations and high-speed rail service displays. Interactive displays include railroad horns, trivia questions, workable signals and an engineer's stand.

In addition, the Exhibit Train will be coupled with our new Veteran's Locomotive #42, allowing us to showcase our Veteran's Hiring Initiative and company goal of recruiting 25 percent of new hires from the military by 2015.

An updated Exhibit Train schedule can be found at <http://history.amtrak.com>. We hope all employees have an opportunity to tour the train when it's in a community near you.

Make a Healthy Choice Every Day: Control Cholesterol

If you eat a diet high in saturated fat, trans fat and cholesterol, your arteries may be more likely to become clogged with cholesterol. Your total cholesterol should be less than 200 milligrams per deciliter. A simple biometric screening can measure your total cholesterol. Schedule a biometric screening with your doctor today. With your Amtrak medical coverage, it's free!

You can lower your cholesterol with dietary changes, regular exercise, weight loss and/or drug therapy. Set a daily goal of consuming less than 300 milligrams of dietary cholesterol. Check food labels to help you select foods low in saturated fat, trans fat and cholesterol. Limit your saturated fat intake to less than 7 percent and trans fat to less than 1 percent of your total calories.

If you do have high cholesterol, be sure to talk with your doctor about the best approach to managing your condition.

Traveling in Style

Stylish 1970s fashions abound in the [colorful sketches](#) illustrating this booklet that describes the various accommodations and public spaces found on Amtrak long- and short-distance trains. In addition to the fun art work, the pages also contain basic layouts for Parlor, Tavern Lounge, Dome Coach and other types of cars Amtrak had purchased from the predecessor railroads.

eTicketing Starts on Amtrak Thruway Trains

Effective July 15 and for the first time, four Amtrak Thruway trains will be converted to print-anywhere eTicketing. The Thruway trains will be those running between San Jose and Stockton, Calif., and connecting to Amtrak *San Joaquin* trains, operated by Altamont Corridor Express (ACE).

The ACE Thruway train service is represented by the Amtrak California Thruway system as their Route 56 (San Jose-Stockton: *ACE trains*), consisting of service numbers: 3204, 3218, 3278 and 3288.

Summer/Fall System Timetable in Effect

Our new Summer/Fall system timetable becomes effective on July 15. The majority of schedule revisions are minor, reflecting changes of up to a total of 15 minutes. Seasonal train stops are resumed.

The timetable cover, photographed by Amtrak employee Matt Donnelly, features the *Carolynian* in early April as it is about to cross the Potomac River minutes after making its morning departure from Washington Union Station. The *Carolynian* operates daily in each direction between New York City and its namesake state of North Carolina.

Bicycle Rentals Now Available at Chicago Union Station

Bike sharing programs continue to be a major environmentally-friendly trend around the country. Divvy, Chicago's new bike sharing system, has launched and aims to offer access to 4,000 bikes at 400 stations across the city. Intended to provide Chicagoans with an additional transportation option for getting around the city, now Amtrak passengers can enjoy renting a bicycle at Chicago Union Station as a fun and economical way to tour the city. For \$7.00, program users can buy a 24-hour pass, with unlimited 30-minute trips.

The Divvy Station is located outside Chicago Union Station at 500 W. Jackson Blvd. For more information visit [Divvybikes.com](http://divvybikes.com).

Amtrak in the Community

This year marks the seventh year that Amtrak will be a sponsor at the National Council of La Raza's (NCLR) annual conference being held July 20-23 in New Orleans, La. NCLR is the largest national Hispanic civil rights and advocacy organization in the U.S., whose goal is to improve opportunities for Hispanic Americans through its network of nearly 300 affiliated community-based organizations.

With an expected attendance of 25,000 ranging from elected officials to college students, Amtrak will use this opportunity to engage this vital community at a booth during the Family Expo. During the Awards Gala, Liliana Lopez, senior officer, Corporate Communications, will deliver remarks focusing on the benefits of Amtrak's services and our commitment to diversity.

Immediately following NCLR, Amtrak will participate in the National Urban League Convention (NUL) being held in Philadelphia on July 24-26. This historic civil rights organization is dedicated to economic empowerment to elevate the standard of living in underserved urban communities. The organization spearheads the efforts of nearly 100 local affiliates through development programs, public policy research and advocacy. The four-day convention is expecting a turnout of 10,000 attendees this year.

July 22, 2013

New Ridership & Revenue Records Set

Latest reports indicate that our fiscal year to date (FYTD) 2013 ticket revenue has jumped 3.6 percent to \$1.548 billion with June 2013 ticket revenue totaling \$191.7 million, making it the best single month in our company's history.

In addition, FYTD 2013 ticket revenue on state-supported and other short-distance routes has increased 3.8 percent to \$346.9 million and long-distance ticket revenue has increased 0.9 percent to \$372.5 million. Revenue on the Northeast Corridor is up 4.8 percent to \$829.3 million.

FYTD 2013 ridership is up 0.7 percent to 23.3 million riders, with increased ridership on six of our 15 long-distance routes. Ridership on the Northeast Corridor remains near the FYTD 2012 level, down just 0.1 percent to 8.59 million riders and state-supported and short-distance ridership realized an increase of 1.6 percent to 11.29 million riders.

Year-End Performance Conversation Process - What You Need to Know About FY13

Last week Chief Human Capital Officer Barry Melnkovic sent an email to all non-agreement employees outlining the FY13 year-end performance conversation process.

His message included the points that there will not be any procedural changes from the mid-year process for most employees and the evaluations will be completed on the same form (NRPC 3378) that was used for the mid-years.

Managers with direct reports will have two additional steps: enter the final employee rating into the online tool and scan and upload the paper form to the online tool in order to create the digital record.

In the coming weeks, you will hear additional details about the FY13 year-end wrap up including information on training and other activities designed to support you in this process. If you have any questions, ideas or feedback, please do not hesitate to email performanceconversations@amtrak.com.

Bicycle Racks Being Tested in New England

In close partnership with Vermont and the New York State Department of Transportation, Amtrak is hosting a series of carry-on bicycle demonstrations in the Northeast region.

The tests took place on-board the *Vermont* on July 17 and will occur on the *Ethan Allen Express* on July 24.

The goal of the demonstrations is to test the new prototype bicycle racks that have been developed by Amtrak for our Café car equipment and to obtain written feedback from bicyclists, passengers and our state partners for potential long-term service.

Restoring a GG-1

Manufactured for the Pennsylvania Railroad (PRR) in the 1930s and 1940s, electric GG-1 locomotives were used by Amtrak in the Northeast until the arrival of the new AEM-7s. In the mid-1970s, a group of rail fans known as the "Friends of the GG-1" raised funds to restore [Amtrak-owned GG-1 #4935](#) to the original PRR paint scheme of dark Brunswick Green with gold pinstripes.

Refurbishment was undertaken at the Wilmington, Del., shops. No. 4935 returned to revenue service on May 15, 1977, leading the *Murray Hill* between Washington and New York.

Corporate Branding Guideline Updates Now Available

Corporate branding is not just a logo placed at the top of the company stationery. At Amtrak, it's the employee that answers the phone, it's the directional signage to the trains, it's the Red Cap who carries the bags and it's the hot coffee in the Café car. It's the total customer experience and the responsibility of our brand lies with all Amtrak employees.

To ensure the proper use of branding assets such as Amtrak wordmarks, logos and taglines and to support a consistent corporate brand identity, two helpful documents, [Amtrak Brand Identity Guidelines](#) and the [Amtrak Brand Approval Checklist](#), are now available on the company Intranet.

The use of Amtrak marks should be reviewed and approved by Corporate Communications and Marketing. Please contact Marlon Sharpe, principal graphic designer at SharpeM@amtrak.com or Debbie Varnado, director, branding and promotions at Varnadd@amtrak.com for review and approval of these valuable corporate assets.

Tourism Marketing Group Riding the Rails to Promote Louisiana Tourism

Southeast Louisiana Gumbo (SELA GUMBO), a Baton Rouge marketing consortium that works to promote Louisiana tourism throughout the U.S., is traveling on the SELA Gumbo Express on July 22 – 24. Representatives from ten Louisiana parishes will travel from Slidell, La., to Birmingham, Atlanta and Washington D.C., along the *Crescent* route where travel and tourism professionals as well as print and broadcast media will be treated to Louisiana food and music in each city. Bruce Mitchell of the History Channel's "Swamp People" will accompany the group on the entire trip.

This is the second year that Amtrak has partnered with SELA to promote Louisiana tourism and the second year that the group has held a tourism and media event along an Amtrak route. Last year, the SELA Gumbo Express traveled on the *City of New Orleans* between Jackson, Miss., and Chicago.

Windows7/Office2010 “Enterprise” Migration –Don’t Get Left Behind!

Amtrak’s IT department has kicked off the “mandatory” migration of all (approximately 10,000) corporate desktops, laptops and other business machines from the Windows XP operating system to Windows 7 operating system and to Microsoft Office2010. In addition to ensuring compliance with Microsoft OS version support requirements, these upgrades will provide us with a better desktop experience, better security and control and various other improvements offered in the Windows 7 platform.

End-user migrations have begun in Washington, D.C., Philadelphia, Chicago and some smaller and more remote locations. Individual workstations should take a few hours to migrate. This is a labor intensive project that we are challenged to complete by September 30 of this year. In order to make the most of this very large labor expenditure, we need everybody to be responsive to attempts to get their upgrades scheduled and to make their machines available to the IBM field tech teams when they are onsite. At some sites, the available scheduling window may be as small as two days.

Remember, these are mandatory migrations. After Microsoft ends support on Windows XP, non-upgraded machines will no longer be secure and will not be allowed on the network.

For more information on schedules, training information and the latest newsletters, visit our company Intranet → Information Technology → ITSservices. Please send questions or feedback to ITServiceManagement@Amtrak.com

Amtrak Careers Recognized for Social Media Recruiting

Using social media to recruit employees continues to be a fast-growing trend. By utilizing social media tools such as Twitter, Facebook, YouTube and Pinterest, Amtrak Careers is at the forefront of social recruiting and was recently recognized as a new social media recruiting superstar by BRANDEblog, an electronic communiqué dedicated to branding, advertising and communications.

Savvy job seekers can also view topics on the Amtrak Career Facebook tab, which features sub-tabs such as Interview Advice, Interview Fashion and Words of Wisdom. On YouTube, there are seven videos with the main video being “*Your Career at Amtrak*,” hosted by Amtrak President and CEO Joe Boardman. In addition, our Veteran’s Hiring Initiative with a goal that 25 percent of newly hired employees be recruited from the military by 2015 is also highlighted.

An effort such as this reinforces our strategic goal of organizational excellence.

New Passenger Amenity Comfort Kit Available for Sale

Effective August 1, Amtrak will discontinue the current practice of providing mini-pillows for Coach class passengers on all long-distance trains and offer a new product to enhance the passenger travel experience. On *Auto Train*, mini-pillows and blankets will no longer be provided. A passenger comfort kit containing several comfort amenity items in a keepsake tote will become available for purchase. Items inside the kit include an inflatable pillow, earplugs, eye shades and a blanket.

A limited number of passenger comfort kits will be available for sale on a first-come, first-served basis on each train and can be purchased for \$8.00 from the Lounge or Café car during operating hours, while traveling. In addition, work is underway to have the amenity kits available for sale on Amtrak.com.

This initiative will save Amtrak approximately \$500,000 annually.

Amtrak Rail Day in Seattle

On July 27, Amtrak Rail Day took place at our newly refurbished King Street Station in Seattle, Wash. During the day, visitors were able to tour the Exhibit Train and view our Veterans’ Locomotive #42 and Amtrak Cascades train sets.

Several Amtrak partners were also present to showcase their organizations and included representatives from the Washington Department and Oregon Departments of Transportation, Talgo, Operation Lifesaver, National Park Service and various passenger rail advocacy groups. Event goers also had an opportunity to sample regional cuisine served on board Amtrak Cascades service, enroll in our Guest Rewards program which is currently offering double points on select Amtrak Cascades travel from July 17 – August 31 and enter a sweepstakes for their chance to win two round-trip coach tickets between Seattle and Leavenworth, Wash.

The Exhibit Train and Veteran’s Locomotive will remain in Washington with a stop at our Spokane station on August 3-4.

New Exterior Smoking Policy for Washington Union Station

Please be advised that a new non-smoking policy for the West Porch and Front Colonnade at Washington Union Station was enacted by the building management company Jones Lang LaSalle (JLL).

JLL has placed signage around these areas and all ash urns have been removed.

Passing of Canine (K9) Kay

It is with great sadness that we report the passing of K9 Kay. He was a seven year-old bomb detection dog, served in the Amtrak Police Department’s Mid-Atlantic South Division and was a partner to Amtrak Police Officer Dennis Welch.

K9 Kay will be greatly missed by his Amtrak family.

Amtrak Employee Store Refreshed for Business

Traveling to New York this summer and want to catch a Mets game? Or, maybe you'd prefer seeing a Monday night magic show. If you're looking for fun-family attractions and theme-parks while in California or looking for a rental car in St. Louis, check out the Amtrak Employee Store. Whether you're looking for a deal or simply want to browse, the online store is now updated....chock-full of special discounts and savings available to current Amtrak employees.

Thanks to the efforts of our IT department, the Amtrak Employee Store has a new look. To browse the store, visit the company Intranet →Employees →Employee Store. Once there, you'll find offerings listed in categories such as Gifts, Amtrak Merchandise, Travel and Entertainment, Discount Memberships and more.

In addition to the already available savings, your input and suggestions for new offers available to Amtrak employees, whether a national program or in a local station, are welcome. Simply click on the prompt and submit your suggestions for review. Please check back often as offers will be updated frequently.

Walk this Way to Better Health

As you take the Amtrak Keep Walking challenge, make every step count. Maximize the burn, with these three form fixes:

Chin Up – Focus on a point about 10 feet ahead of you. This will keep your stride longer and your neck in line with your spin.

Activate Your Abs – Make it a total body workout. When you brace your core – pulling your belly button toward your spine – you automatically trigger good posture.

Squeeze Your Glutes – To get the most power – so you can go longer and faster – keep your glutes tight.

Amtrak Trivia...Into the Internet Era

Amtrak was a leader in the transportation industry when it launched Amtrak.com in 1997; within a few years, the site was one of the most bookmarked on the web.

View the original homepage at
<http://history.amtrak.com/archives/amtrak.com-first-site>

Operations Department Intranet Site Available

As we move forward with the Operations department reorganization, an Amtrak Intranet wiki site has been created to keep employees informed about various aspects of the reorganization and to assist us through the transition. Information on the site includes:

- Frequently Asked Questions (FAQs)
- New Positions within Operations to be Posted (*available 6/5/13*)
- Position Descriptions (*available starting 6/5/13 with regular updates*)
- Future Operations Department Organization Charts (*available 6/5/13*)
- Tips for the Application Process (*available 6/5/13*)
- Employee Assistance Information (EAP)

To locate the site, visit our company Intranet home page → Employee Information →Operations Reorganization. Please check the site frequently for content updates.

Animated Children's Safety Video Now Available

The Amtrak Police Department recently unveiled an animated children's video, designed to educate children about rail safety and security. The K9 video features animated talking dog characters explaining the ability of K9 teams to use their heightened sense of smell to detect suspicious vapors. In addition, the video teaches kids how to be safer around trains, railroad tracks and stations.

The eight-minute video is available at Amtrak.com, YouTube or on our company Intranet → Police → Useful Links → Amtrak Police Department and can be used as an educational outreach tool.

President's Service & Safety Awards Submissions due June 9

Nominations are being accepted for the 2013 President's Service and Safety Awards (PSSA). Nomination forms are located in the "Forms Library" on our company Intranet and must be submitted by this Sunday, **June 9**.

This year, three new categories have been added:

- The Excellence in Customer Service Award, which will recognize our frontline passenger-facing employees for the outstanding work they do to wow our customers.
- The Innovation Award will recognize new and unique accomplishments, projects, programs and inventions that our employees develop.
- The Excellence in Leadership Award will recognize our top managers and supervisors for their leadership and dedication to Amtrak and their team members.

Questions may be sent to 2013PSSA@Amtrak.com.

Amtrak Sponsors Capital Pride Event

For the third straight year, Amtrak was a presenting sponsor of the Green Village at the Capital Pride Festival. The Capital Pride Festival is the largest annual one-day event held in Washington, D.C., and attracts over 150,000 festival visitors.

This year, festival attendees learned about energy-efficient travel and our sustainability efforts to preserve the environment. In addition, visitors who stopped by the Amtrak booth enjoyed family activities and games, learned about Amtrak service to our over 500 destinations, and had the opportunity to win free round-trip travel vouchers to experience Amtrak travel on the Northeast Corridor.

Successful events are due in large part to our employee volunteers. Thank you to those that volunteered at the Washington, D.C., event. On June 30, Amtrak will be a sponsor of Pridefest in New York City. If you are interested in volunteering at this event, please contact Ann Owens at owensa@amtrak.com or 202.906.4404- AT 777.4404.

Make a Healthy Choice Every Day: Don't Smoke

Tobacco smoke is the single-most preventable cause of death in the U.S. The risk of heart disease and stroke increases with smoking and with constant exposure to the smoke of others. If you're a smoker, now is the time to quit. Once you stop, your risk of heart disease and stroke will begin to drop immediately.

Help is available. Talk with your doctor about available options. Cigna participants can access smoking cessation programs by calling **866-417-7848** or logging on to **myCigna.com**. Once you log on, go to the **Manage My Health** tab and select **My Health Programs & Resources**. Under **Leave Tobacco Behind for Good** select **Quit Today**.

Station in the Spotlight...Brookhaven, Miss., (BRH)

In Brookhaven, Miss., the Godbold Transportation Center opened in August 2011, replacing a small shelter adjacent to the former Illinois Central Railroad (ICRR) depot. Rather than build a new facility, the town chose to rehabilitate an abandoned former municipal power plant dating to 1890. The design for the station retained the soaring smokestack, a reminder of the building's industrial heritage. Wooden benches in the light-filled waiting room were once used in the old ICRR depot.

Every year, Brookhaven hosts the popular Ole Brook Festival, which includes arts and crafts, live music, a food court and kids' area.

To learn more about the Godbold Transportation Center, visit http://www.greatamericanstations.com/Stations/BRH/Station_view

IT Windows7/Office2010 "Enterprise" Migration Reminder

Amtrak's IT department has kicked off the migration of all (approximately 10,000) corporate desktops, laptops, and other business machines from the Windows XP operating system to Windows 7 operating system and to Microsoft Office2010. In addition to ensuring compliance with Microsoft OS version support requirements, these upgrades will provide you with a better desktop experience, better security and control, and various other improvements offered in the Windows 7 platform.

End-User migrations are being scheduled, and targeted emails and notifications are currently being sent to users scheduled within a one to two week timeframe. Individual workstations should take a few hours to migrate. It is expected that the impact to each user will be minimal since the migrations will be performed mostly after work hours.

For more information on schedules, training information, and the latest newsletters visit our company Intranet → Information Technology → ITServices or <http://wiki.corp.nrpc/pages/viewpage.action?pageId=295013754>

Please send questions or feedback to ITServiceManagement@Amtrak.com

10th Civic Conversation Held in Portland, Oregon

Last week, our Government Affairs department hosted their 10th Civic Conversation in Portland, Ore. The conference was attended by local city, state and federal officials.

As part of the Great American Stations project, Amtrak hosts Civic Conversations in an effort to inform communities about station renovation and to build partnerships with those considering and working to revitalize the stations Amtrak serves. The focus of the Portland event was the *Empire Builder*, *Coast Starlight* and Amtrak Cascades routes to include Amtrak-served communities in Montana, Idaho, Washington, Oregon and northern California.

Discussions at Civic Conversations typically include:

- How to get started with a project and introduction to Amtrak contacts
- Compliance with the Americans with Disabilities Act (ADA)
- Possible federal and private funding sources
- Case studies of successful station projects
- Amtrak station planning guidelines and
- Historic preservation regulations

These forums serve as an invaluable tool to educate attendees on the importance of Amtrak as an economic driver in communities across the country.

President's Service & Safety Awards Nomination Period Extended

Nominations for the President's Service and Safety Awards (PSSA) are now being accepted through June 19. Nomination forms are located in the "Forms Library" on our company Intranet. Please direct any questions to 2013PSSA@Amtrak.com.

Organizational Excellence Issue

In 2011, *The Amtrak Strategic Plan* was created as a company-wide vision for excellence in fiscal management and customer service. Propelled by our diverse and talented team of employees, the framework of the *Strategic Plan* consists of five primary goals.

As we continue to build upon our efforts and seize new opportunities, here's a glimpse of some of our accomplishments supporting our primary goals to further build an organization that is best equipped to provide the rail transportation America needs.

Safety and Security

Our company goal is to become North America's safest, most secure railroad by creating a collaborative, team-oriented workplace culture that minimizes risks and maximizes passenger and employee safety.

- ✓ While investigating a wire theft report at milepost 61 in Lancaster County, Pa., Amtrak Police Officer Andrew Shahade saw a rather nondescript piece of paper on the ground near the scene.

Upon further investigation of the crime scene, that piece of paper proved to be a receipt from a local scrap yard, apparently left behind by one of the perpetrators. It had a name on it, and that name led to the resolution of approximately \$68,000 worth of wire theft that had been plaguing Mid-Atlantic North along the main line west for over six months. In addition, the suspect admitted to cutting wire at least 15 times and showed investigators locations where he had previously stolen wire.

The theft of signal and catenary wire, as well as material along the right-of-way, impacts Amtrak financially and can create hazards that may put our passengers and employees at risk. Congratulations to Officer Shahade for a job well done.

Customer Focus

Our company goal is to advance customer service quality by responding to the wants, needs and expectations of our customers in order to improve their experience and maximize passenger and partner satisfaction.

- ✓ In response to our customers, and in collaboration with Caltrans, the \$5.00 bicycle reservation fee was recently eliminated on *Pacific Surfliner* trains. Amtrak California passengers traveling with bicycles can now reserve onboard bike rack space free of charge.

Previously, without a bicycle reservation system in place, when bike racks became full, passengers had to store bikes next to luggage storage areas or walkways. At times, if bike traffic became too heavy, bike passengers would not be allowed to board at all. Now, passengers booking travel with bicycles can choose an alternate train should their first choice be fully booked, enhancing the customer booking experience.

Mobility and Connectivity

Our company goal is to improve national mobility and connectivity by growing Amtrak's business through new partnerships, routes and frequencies to increase ridership system-wide.

- ✓ This past April, the *Texas Eagle* began service to the city of Hope, Ark., serving the Hempstead County seat, a Southwestern Arkansas community of more than 10,000 that is also the location of former President Bill Clinton's birthplace, now an historic site under the National Park Service.

From Hope, connections to other Amtrak trains can be made in Fort Worth, San Antonio, St. Louis and Chicago to Oklahoma City, Kansas City and more than 500 locations in the Amtrak network.

Environment and Energy

Our company goal is to contribute to the nation's environmental health by attracting automobile and air travelers to trains, while improving Amtrak's efficiency and reducing transportation-related carbon emissions and fossil fuel consumption.

- ✓ Amtrak recently joined the Carbon Disclosure Project (CDP) in order to report on our sustainability initiatives. CDP is an international, not-for-profit organization providing the only global system for companies and cities to measure, disclose, manage and share vital environmental information. The report to CDP covers our annual greenhouse gas inventory information as well as our climate change strategy, targets and initiatives, and risk and opportunity assessment. Amtrak's first submission to CDP will be for activities conducted during calendar year 2012.

Financial and Organizational Excellence

Our company goal is to attain a standard of organizational excellence by aligning our products, services, processes and culture with stakeholder expectations to improve financial performance and overall business results.

- ✓ Congratulations to Josh Raymond, principal officer, Corporate Strategy, for being named one of 20 "Rising Stars" by *Progressive Railroad Magazine*.

The magazine defines a "Rising Star" as someone under the age of 40 who has made, or is making, a positive impact on his or her company, organization, department or team, and is viewed by others — peers, colleagues, supervisors, clients or associates — as an up-and-coming leader in the rail industry. Josh was selected for his work on the Amtrak Strategic Plan; defining the strategies we follow to achieve organizational excellence.

Human Capital Updates Available on our Company Intranet

Quarterly updates providing information on our short-term incentive (STI) plan, Every Day Wellness and a few new voluntary benefits available to employees in July are now posted on our company Intranet → Employees → Benefits. In addition, there is a guide to the [2013 STI plan](#) which provides details on how the STI will be calculated as well as answers to frequently asked questions.

These documents will also be available on www.AmtrakBenefits.com.

In late July, every non-agreement employee at Amtrak will receive a personalized statement detailing their potential payout as part of the short-term incentive. Human Capital will host a series of conference calls over the next few weeks to prepare managers to answer employee questions and use the launch of this performance-based plan to facilitate conversations with their teams to strengthen alignment between each employee's individual contributions and the achievement of our shared goals.

Human Capital is very interested in your feedback so please let them know what you think. Send any questions you may have about Amtrak Total Rewards or the implementation of the short-term incentive for 2013 to totalrewards@amtrak.com.

Make a Healthy Choice Every Day: Maintain a Healthy Weight

Too much body fat, especially at the waist, increases your risk for health problems, including heart disease, stroke, high blood pressure, high cholesterol and diabetes. Excess weight increases the heart's work.

A waistline considered high risk for women is 35 inches or more; for men it's 40 inches or more. A BMI between 18.5 and 25 indicates a healthy weight. To calculate your BMI, multiply your weight in pounds by 703, divide that number by your height in inches and then divide again by your height in inches.

Losing as few as 10 pounds can lower your heart disease risk. With the Amtrak Every Day Wellness program, you have access to weight management programs to support you.

Cigna participants can call **866-417-7848** or log on to **myCigna.com** and go to the **Manage My Health** tab and select **My Health Programs & Resources**. Select **Healthy Steps to Weight Loss**.

Aetna participants can access the Aetna Weight Management discount program by logging on to **www.aetna.com**. Once you log on, choose **Health Programs**, then **See the Savings**. Follow the steps for each program you want to use.

Amtrak Salutes our Veterans

On June 26, Amtrak will salute our veterans with a company-wide tribute and unveiling of our Veteran's Locomotive, dedicated to the men and women of the United States Armed Forces. The locomotive features a red, white and blue paint scheme, 50 reflective stars and a specially designed logo with an illustration of the service ribbons given to recognize a military member's career. Work on the locomotive was done at our Beech Grove maintenance facility.

The diesel-electric powered P42 locomotive is the backbone of our company's fleet and is used in a variety of passenger services. Able to reach a top speed of 110 mph, the Veteran's Locomotive will be utilized across the Amtrak system and for special events. It will remain at Washington Union Station on Track 9 from June 27 -28 for all employees to view before it runs in regular service.

At the unveiling, invited dignitaries and co-workers will join Amtrak President and CEO Joe Boardman as our Veterans Hiring Initiative is also showcased. This initiative represents our continued effort to support the nation's service men and women.

There are more than 800,000 unemployed veterans in the U.S., and thousands more will join the unemployment ranks when combat operations end in Afghanistan, according to veterans' advocates reports. Amtrak has a history of hiring veterans; in fact, 14 percent of new hires in 2012 were veterans. Amtrak's commitment to U.S. veterans begins with our current employees who have bravely served and continue to serve our country.

In addition to the unveiling ceremony, our Human Capital department will be holding an Employee Veteran's Appreciation Event from 9:00 a.m. – 2:00 p.m., in the Starlight Room at Washington Union Station. At this event, Amtrak employees in the Washington, D.C., area who are also veterans are welcome to meet with representatives from the Railroad Retirement Board (RRB), Fidelity Investments, the U.S. Department of Veteran Affairs, members of various Amtrak departments and more. Health care screenings and light refreshments will be available.

Part of Amtrak's organizational excellence goal under our Strategic Plan is to develop, acquire and retain talent that's the best fit for our vision and veterans play a big part in our Amtrak's recruitment goals. We value the leadership, reliability and high-tech skills veterans bring to Amtrak. Their ability to adapt to a dynamic environment, their dedication and focus to safety and their experience gained while on military duty directly contributes to meeting our goal.

VP of Operations to Visit Wilmington, Del., Area Employees

DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to Wilmington, Del., area employees on March 11. All employees are invited to attend the meetings, which include a brief presentation by Mr. Stadtler followed by a question and answer session. The meetings are scheduled for:

- 9:00 a.m. – 9:45 a.m., at the **Wilmington Maintenance Facility**, North End, Shop Floor
- 11:45 a.m. – 12:30 p.m., at the **Bear Maintenance Facility**, Shop Floor at the fire lane, Track 27
- 2:30 p.m. – 3:15 p.m. at the **Wilmington Train Station**, Men's Waiting Room, Track 1

Changes to Family and Medical Leave Act to be Posted

Recent changes to the Family and Medical Leave Act (FMLA) require new informational posters to be displayed in areas frequented by employees (usually with other labor compliance postings in break rooms, interview areas, near time clocks, etc). These postings will be sent to the appropriate managers via email this week, and should be printed and posted by recipients no later than Friday, March 8. Please email Karen Broadwater, HC Compliance, (Karen.Broadwater@amtrak.com) with questions or for additional information.

TrainDay411.com Trivia Challenge Winner: Week One

Congratulations to Passenger Conductor Eric Larson, the first winner of the TrainDay411.com Trivia Challenge! Test your train knowledge and enter for your chance to win a weekly prize now through May 11 on TrainDay411.com, the employee microsite for National Train Day.

Amtrak Trivia...

The *Southwest Chief* has had a few name changes over the years. When Amtrak took over this route from the Atchison, Topeka and Santa Fe Railway in 1971, it retained the original *Super Chief* name. In 1974, Amtrak rebranded it as the *Southwest Limited*; ten years later, the train gained its current name. Check out the Amtrak History website for a 1974 route guide from the *Southwest Limited* era.

Illinois Office of Tourism Debuts Lincoln Awards

To kick off the 2013 Illinois Governor's Conference on Travel & Tourism, the Illinois Office of Tourism rolled out the red carpet for the state's brightest stars in its first ever "Lincoln Awards." The nominees are those "behind the scenes stars" that go above and beyond for the Illinois tourism industry.

Amtrak Conductor Patrick Bracken, assigned to the *Lincoln Service* route between Chicago and St. Louis, was nominated for Best Supporting Actor in Illinois. The award was presented during a special program on February 27 at the Excellence in Tourism Awards. Congratulations Patrick!

Save the Date –Amtrak Total Rewards Road Shows for Non-Agreement Employees

Amtrak Total Rewards represents the broad spectrum of plans and programs designed to reward, recognize, motivate and develop our non-agreement employees throughout their careers. Want to find out more about what this means for you? Join representatives from Amtrak's Human Capital Management team, Cigna, CVS Caremark, Fidelity and the Railroad Retirement Board to learn how to make the most of this new program. Each session will last approximately 40 minutes with opportunities for you to ask questions (and get free stuff, too).

- March 12- **New York Penn Station**, Superintendent's Conference Room at 12:00 p.m. and 2 p.m.
- March 13- **CNOC**, CTEC Conference Room, Wilmington, Del., at 10:00 a.m., 12:00 p.m. and 2:00 p.m.
- March 14- **30th Street Station**, Philadelphia, Pa., Chapel, Second Floor North at 10:00 a.m., 12:00 p.m. and 2:00 p.m.
- March 18- **Washington Union Station**, Starlight Room, Gate D at 10:00 a.m. and 2:00 p.m.
- March 20- **Boston South Station**, Executive Conference Room, 5th Floor at 9:00 a.m., 11:00 a.m. and 2:00 p.m.
- March 21- **Chicago Union Station**, Human Capital Classroom at 9:00 a.m. and 11:00 a.m. and at the **Chicago 14th Street Yards**, 1400 S. Lumber St., Car Shop Building, Room 205 at 1:00 p.m.
- March 28- **Los Angeles Union Station**, Large Conference Room, 3rd Floor at 9:00 a.m., 11:00 a.m. and 2:00 p.m.

If you can't attend one of the meetings, a webcast will be available in late March so you can find out more about Amtrak Total Rewards. Look for an email in the coming weeks.

Need a New Prescription? Ask for a Generic

Each time you fill a prescription, you could save money by asking for the lower-cost generic version. That could add up to big savings in just a short time – especially if you take a medication on a regular basis or have multiple prescriptions to fill.

A recent *Consumer Reports* survey found that the cost of medication and medical bills is the number one financial problem Americans face. And, using an expensive brand-name drug when a low-cost generic is available only adds to the problem. Generic drugs can provide huge savings, sometimes priced as much as 95 percent less than brand-name medication, according to *Consumer Reports*.

What You Can Do:

1. When your doctor prescribes a drug, ask if there is a generic version that would be just as safe and effective, but less expensive.
2. If a generic for your specific medication isn't available, say for a newer brand-name drug, ask if a generic version of an older drug in the same class would work as well.
3. If a generic isn't available, use one of the preferred select brands covered by your CVS Caremark plan. These are available at a lower cost to you than non-preferred brands.
4. If you're concerned about the safety or effectiveness of generic drugs, ask your doctor.
5. Always fill your prescription through a pharmacy in the CVS Caremark network (find one at www.caremark.com), as you generally will pay less than if you use a pharmacy outside the network.

Learn more ways to save on your prescriptions at www.caremark.com or call 1-855-271-6604.

IT Awareness Event to be Held at Washington Union Station

The Information Technology Windows7/Office2010 upgrade and email migration project teams are sponsoring an IT awareness event highlighting the two projects, their objectives, impacts to users and overall strategies. The first event will be held on Tuesday, March 12, in the Starlight Room at Washington Union Station from 9:30 a.m. to 2:30 p.m. All Union Station and Washington, D.C., end-users are welcome to stop by.

Future events are being planned for select cities around the system and will be announced shortly.

For additional information contact
ITServiceManagement@amtrak.com.

42 Days of 42 Fare Promotion

Amtrak has teamed up with Warner Brothers Pictures for the release of *42*, a biopic about baseball legend Jackie Robinson, the first black player to integrate Major League Baseball. We are honoring Jackie Robinson and celebrating the release of this upcoming film with a special fare offer titled "42 Days of 42". Valid for sale through April 14, this promotion will extend an exclusive 42 percent off companion rail offer to customers and be valid for a 42-day travel period, April 11 – May 22, 2013. Travel is valid on all Amtrak service except *Acela Express*, *Piedmont*, *Carolinian* and *Missouri River Runner*.

The extensive campaign includes marketing components from both Amtrak and Warner Brothers, such as e-mail blasts, radio mentions in key markets and social media inclusions. In addition, there will be select in-station advertising including banners and Quik-Trak machine toppers, Amtrak.com placement, and select sports arena advertising. Full details are available at Amtrak.com/42.

Trivia Challenge Winner: Week Two

Congratulations to last week's Trivia Challenge winner, Barbara Rutowicz, ticket and accounting clerk in Chicago Union Station. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Amtrak Trivia...

In May 1985, NBC's *Today Show* hosted by Bryant Gumbel and Jane Pauley took a five -day trip across the central United States via a special Amtrak train billed as the *Today Express*. Beginning in Houston and ending in Cincinnati, the tour traveled 2,500 miles and also included stops in New Orleans, Memphis and Indianapolis. See a promotional button from the tour at the Amtrak History website.

<http://history.amtrak.com/archives/amtrak-today-show-button>

Amtrak President and CEO Testifies Before Congress

Last week, Amtrak President and CEO Joe Boardman told a Congressional committee that Amtrak is leveraging record ridership to reduce dependence on federal operating subsidies. He announced that in FY 2012, the federal government paid just 12 percent of Amtrak's operating costs while Amtrak covered 88 percent with ticket sales and other revenue.

Boardman explained that while the railroad has taken actions to chip away at operating costs and increase revenue, a vital component of its success has been the federal government's willingness to invest in the Amtrak national network. Federal capital investment helps to reduce operating costs, supports the existing system, funds solutions to reduce future costs and provides the infrastructure and equipment to sustain ridership and revenue growth.

"Previous federal capital investment levels have sufficed to keep the system going, but they are not going to be adequate in the future," Boardman stressed. "If we are to realize rail's potential, we will need much higher levels of federal capital funding."

He added that the Amtrak long-distance trains are an important part of a larger national network connecting rural communities to larger cities and major urban areas. They serve passengers with disabilities, the elderly and rural populations that are losing scheduled intercity air and bus service. Long-distance trains bring one million riders a year to the Northeast Corridor.

Day Wellness Program Kicks Off at Beech Grove

On February 21, Amtrak's new *Every Day Wellness Program* was unveiled at our Beech Grove Maintenance Facility in Indiana. Employees in the Beech Grove facility enthusiastically participated in a variety of activities that encouraged them to incorporate healthy habits into their lives. The day's activities focused on a variety of wellness topics such as healthy eating, effective sleep, beneficial exercise and managing life stress. Beech Grove employees also shared wellness goals that ranged from losing a few pounds, getting eight hours of sleep per night to running a marathon.

Because the facility is one of five Amtrak locations that recently received a blood pressure machine, hundreds of employees also took the opportunity to check their blood pressure. Blood pressure machines were recently installed at our Bear, Del., Maintenance Facility; Riverside, Calif., Call Center; Ivy City Maintenance Facility and in Washington Union Station. John Grey, superintendent, said that *Every Day Wellness* was a huge success in Beech Grove.

So what's wellness got to do with Amtrak? EVERYTHING! The *Every Day Wellness Program* is a new Human Capital program that creates opportunities for Amtrak employees to seek out healthier habits that lead to feeling better at work and home. The program recognizes that in our fast-paced society making time to take care of ourselves can be challenging, but nothing is as important as the wellbeing of our employees. Be on the lookout for *Amtrak Every Day Wellness* activities at your Amtrak location!

Non-Agreement Employees - Read All About Our Investment in You: Your Amtrak Total Rewards Portfolio Will Arrive Soon

At Amtrak, our people make our success possible through their service and dedication to our customers. We are committed to creating a work environment that recognizes and rewards your efforts and empowers you with the tools, resources and skills you need to make high performance and progress possible – both professionally and personally.

So, what does that mean for you? Amtrak Total Rewards for non-agreement employees:

- Offers you competitive pay and incentives to recognize your performance;
- Helps you develop your skills through on-the-job, classroom and online learning opportunities;
- Creates a stronger connection between the work you do every day and the achievement of Amtrak's business goals and
- Represents our investment in you.

We want your work at Amtrak to be more than just a job – we want it to be a fulfilling experience where you find challenging and rewarding opportunities, respect among colleagues, competitive pay, benefits that protect you and your family and a high performance culture that recognizes and values your contributions and helps you reach your career goals. Learn more in your Amtrak Total Rewards Portfolio – arriving at your home in the next week and available online at www.AmtrakBenefits.com.

Trivia Challenge Winner: Week 3

Congratulations to last week's Trivia Challenge winner, Kevin Graham, crew assignment clerk in Portland, Ore. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Station in the Spotlight...Staples, Minnesota

The two-story brick Classical Revival style station in Staples, Minn., was built by the Northern Pacific Railway Company in 1910. Originally, the ground floor served passenger needs; the second floor contained railroad offices; and the attic had a dormitory for train crews. In February 2008, BNSF Railway sold the depot. It is now owned and managed by the Staples Historical Society (SHS) which has overseen improvement projects such as the installation of a new roof and the restoration of numerous windows. In mid-2012, the Staples-Motley Chamber of Commerce moved into the renovated ticket office; ultimately, the SHS hopes to restore the second floor to house a museum.

Vermont Service Schedule Reflects Increased Speed

Along with our partners, the Vermont Agency of Transportation and the New England Central Railroad, a revised schedule for the *Vermont* service between St. Albans, Vt., and Washington, D.C., will go into effect today, March 18.

The new timetable is highlighted by a reduction in overall travel time by up to 28 minutes and is the direct result of a recently completed two-year, federally funded program which provided for the upgrade and repair of a 190-mile stretch of track, signal and other key infrastructure equipment owned and maintained by the New England Central Railroad.

Track speeds along the route within Vermont will increase, from 55 mph to a maximum of 59 mph north of White River Junction, Vt., and from 59 mph to a maximum of 79 mph south of that location. Below the Vermont border, track speeds will remain unchanged. These efforts not only will reduce overall travel times, but will result in a more reliable operation for all parties involved.

Amtrak Launches Official Blog "All Aboard"

Today the company is launching an official blog, entitled "All Aboard," which can be accessed at www.blog.amtrak.com. The blog will include regular updates of user-generated content, company announcements and frequently asked customer questions. This new use of technology will support each of the company's five strategic goals and help humanize our company for those unfamiliar with all Amtrak has to offer.

The launch of the blog was the result of a multi-departmental effort that included Government Affairs & Corporate Communications, Marketing, and Operations. Those interested in sharing news on the blog should contact social@amtrak.com.

West Coast Dates and Locations Added to Amtrak Total Rewards Road Shows for Non-Agreement Employees

If you want to find out what Amtrak Total Rewards for non-agreement employees means for you, join representatives from Amtrak's Human Capital Management team, Cigna, CVS Caremark, Fidelity and the Railroad Retirement Board (RRB) to learn how to make the most of this new program. Each session will last approximately 40 minutes with opportunities for you to ask questions (and get free stuff, too).

- March 25 - Oakland Mechanical Yard, Conference Room, at 10:00 a.m. and Port of Oakland Building, 530 Water Street, Conference Room, 5th Floor at 1:00 p.m.
- March 27 - Seattle Maintenance Facility, Columbia River Conference Room, 2nd Floor North at 8:30 a.m. and 10:30 a.m.
- March 28 - Los Angeles Union Station, Harvey House, Large Conference Room, 3rd Floor at 9:00 a.m., 11:00 a.m. and 2:00 p.m.
- March 29 - Riverside Call Center, Riverside Conference Room at 10:00 a.m.

Introducing: Generic Step Therapy for Non-Agreement Employees

Beginning **April 1, 2013**, the CVS Caremark prescription plan will implement a generic step therapy program to help you and Amtrak manage prescription costs. Generic step therapy requires the use of generic prescriptions to treat conditions first, unless your physician requests an exception for medical purposes.

It always makes sense to consider generic drugs for your prescription needs. A few things you should know:

- Before a generic drug can be labeled as equivalent to the brand name drug, it must meet stringent standards set by the U.S. Food and Drug Administration (FDA) and must provide the same therapeutic effects.
- A generic drug is made with the same active ingredients and is available in the same strength and dosage as the equivalent brand name drug.
- Research indicates that generic drugs work just as well as brand name drugs.
- **When it comes to price, there is a significant difference between generic and brand name drugs. The FDA indicates that, on average, the cost of a generic drug is 80 to 85 percent lower than the brand name product.**
- The decision to use generic medications should be made in consultation with your doctor and pharmacist.

For questions on your prescription benefit, please visit the CVS Caremark website at www.caremark.com or call **855-271-6604**.

Amtrak Launches Official Blog "All Aboard"

Last week, we launched our official blog, entitled "All Aboard," accessible at <http://blog.amtrak.com/>. Those interested in sharing news on the blog should contact social@amtrak.com.

Trivia Challenge Winner: Week 5

Congratulations to last week's Trivia Challenge winner, Bob Booth, manager, Service Desk in Wilmington, Del. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

Amtrak Trivia...

In 1978, the Broadway premiere of "*On the Twentieth Century*" was used to advertise the *Lake Shore Limited* in a Marketing "route blitz." A "Twentieth Century Week" on the train included special touches such as discount theater tickets for Amtrak passengers and napkins emblazoned with images from the musical's streamlined Art Deco sets. In the Fiscal Year 1978 **Annual Report**, it was noted that the brief tie-in increased business on the *Lake Shore Limited* by \$50,000. See [memorabilia from the route blitz](#) on the Amtrak History website.

New Amtrak Chairman of the Board of Directors Elected

Anthony R. Coscia has been elected to be the next chairman of the Amtrak board of directors and to help guide the future of our company by carrying out initiatives to increase ridership and improve operational and financial performance. In addition, the Amtrak board elected Jeffrey R. Moreland as vice-chairman.

An Amtrak board member since June 2010, and current chairman of its Audit and Finance committee, Coscia succeeds departing board chairman Thomas C. Carper whose term on the board expires this month.

"It is an honor to serve as Amtrak's next chairman, and I thank the Obama administration and many members from both houses of Congress whose support for Amtrak has been invaluable," Coscia said. "On behalf of the board and Amtrak's employees, I also want to thank Tom Carper and Nancy Naples for their exemplary service as their terms as board members come to an end."

Coscia brings to the position an extensive background, including previously serving as chairman of the Board of Commissioners of the Port Authority of New York and New Jersey, and experience in redevelopment finance and corporate governance. Currently, he is a partner at the law firm of Windels Marx Lane & Mittendorf, LLP.

Jeffrey Moreland also has been an Amtrak board member since June 2010, and is the chairman of its Government Affairs and Legal & Corporate Affairs committee. He succeeds Nancy Naples as vice-chairman. He enjoyed a long career at BNSF Railway including several senior management positions in law and government affairs, and most recently as executive vice president for public affairs.

"I look forward to continuing to work with Tony, the other board members, and Joe Boardman and his management team. I believe all of us working together will allow Amtrak to continue to make progress in achieving our goals," said Moreland.

Jesup, Georgia Station Renovation Complete

Earlier this month, a dedication ceremony was held to celebrate the completed renovation of the Amtrak station in Jesup, Ga. After a ceremony that included speeches by Jesup Mayor Herb Shaw and Todd Stennis, director, Amtrak Government Affairs, townspeople and visitors were welcome to tour the building and enjoy refreshments.

The 1903 brick combination depot, originally built by the Atlantic Coast Line Railroad (ACL), was severely damaged during an electrical fire in February 2003. Following the accident, the depot was boarded up while the city sought resources for a full rehabilitation. In 2005, Jesup received more than \$800,000 in federal funds to restore the building after it was designated a High Priority Project by the Federal Highway Administration.

Working with an architectural firm, the city returned the depot to its early 20th century appearance, which includes a hipped roof with generous, deep eaves supported by brackets to shelter passengers from inclement weather as they wait outside for the arrival of the train. In addition to a passenger waiting room, the depot also includes a community meeting space, offices and a welcome center.

The New Amtrak Exhibit Train Debuts

This past weekend, the Amtrak Exhibit Train debuted at Railroad Days 2013 in Fullerton, Calif. The Exhibit Train is the former 40th anniversary Exhibit Train originally designed to celebrate this 2011 milestone. The train toured the system stopping in 43 communities over the course of one year and also appeared at special events.

Now refurbished, the Exhibit Train allows visitors to once again take a free, self-guided tour and catch glimpses of Amtrak's past, present and future and its importance in communities across America. New displays have been added such as an interactive video sleeper tour, workable train signals and video trivia questions while former favorites remain such as the horn display and locomotive stand.

At Fullerton, approximately 10,000 visitors toured the train.

The Exhibit Train will be in Albuquerque, N.M., for National Train Day on May 11 and in Hope, Ark., on May 18 to help celebrate our new Amtrak stop.

We hope that every employee gets the opportunity to tour the train when it's at a location near you. Updated stops will be added to and listed in *Amtrak This Week* and on our history site, history@Amtrak.com.

Get Ready, Get Set...Get Walking

As part of Amtrak's Every Day Wellness program, we are excited to announce the return of the Amtrak Keep Walking program. This year, the walking challenge will run from May 8 through June 18, 2013. Team up with your colleagues and join the challenge as you walk towards better health.

To participate in the Amtrak Keep Walking program, you will need the Omron pedometer issued to you last year. If you do not have the pedometer, you will need to purchase one that is compatible with the program. You may purchase the pedometer through Amazon.com. The pedometer you need is **Omron, Model #HJ720ITC**.

Be sure to check the battery! If your battery is not working, you will need to replace it. New batteries can be purchased at most drug stores, watch shops, dollar stores or online at Amazon.com. The battery size is **CR2032**.

To participate, you must email your completed application to KeepWalking@amtrak.com.

Don't forget...if you are a Cigna participant you can also enter your monthly activity for wellness incentive points. Go to myCigna.com and click on **Manage My Health**. Select **Incentive Awards Program** from the dropdown.

Smoking Policy Change on Auto Train

For the health and safety of our employees and passengers, effective June 1, smoking will be prohibited on *Auto Train* including Lounge cars, Food Service cars, Coach cars and Sleeping cars. This policy also prohibits the use of medical marijuana and electronic smoking devices such as electronic cigarettes aboard the train. With this change, Amtrak will become a completely smoke-free railroad.

Passengers may be permitted to get off the train and smoke when the train stops for servicing in Florence, S.C., if time and operational conditions permit.

The scheduled smoking stop times at Florence, S.C., are:

- Northbound Train 52: From approximately 12:30 a.m. - 12:45 a.m.
- Southbound Train 53: From approximately 11:45 p.m. - 11:59 p.m.

This new policy has been communicated to passengers via Amtrak.com, station signage, a press release, Amtrak social media channels and call backs to passenger with current reservations. Passengers are also being informed when they book a reservation with an agent at 1-800-USA-Rail.

Southwest Airlines to Implement a No Show Policy

Employees traveling on Southwest Airlines should be mindful of a new policy. Southwest Airlines is implementing a No Show policy that applies to Wanna Get Away and DING! fares that are not canceled by travelers prior to travel. If you have booked a Wanna Get Away or DING! fare anywhere in your itinerary and that portion of the flight is not used and not canceled at least 10 minutes prior to scheduled departure, all funds on the unused portion of the reservation will be lost and the remaining itinerary will be canceled by Southwest.

This new No Show policy will go into effect for fares booked on or after Friday, May 10, 2013, for travel on or after Friday, September 13, 2013. The policy will not impact travelers who simply cancel a Wanna Get Away or DING! fare prior to scheduled departure; in this case, travelers may reuse their funds toward future travel on Southwest, without a change fee, as they have always done.

All Aboard! Volunteers Needed for National Train Day!

National Train Day is May 11. Your help is needed to make this year's National Train Day the best yet. Please register to volunteer at an event near you at TrainDay411.com.

National Train Day Trivia Challenge

- Congratulations to last week's Trivia Challenge winner, Glenn Lawhorne, relief ticket clerk in Lynchburg, Va. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

May 13, 2013

Federal Funding Received to Aid in Hurricane Sandy Recovery Costs

Hurricane Sandy resulted in unprecedented damage to Amtrak Northeast Corridor infrastructure, including the first ever flooding of century-old tunnels that access New York Penn Station. Last week, the federal government announced a 30 million dollar grant to Amtrak to help alleviate our efforts to rebuild and recover from the storm damage. The federal reimbursement of recovery costs will be designated for work to clean up, make repairs and restore intercity passenger rail service so critical for the entire Northeast region.

PSSA Nomination Period is Underway

Nominations are currently being accepted for the 2013 President's Service and Safety Awards (PSSA). We are excited to announce the addition of three new categories to this year's awards.

- The Excellence in Customer Service Award will recognize our frontline passenger-facing employees for the outstanding work they do to wow our customers.
- The Innovation Award will recognize new and unique accomplishments, projects, programs and inventions that our employees develop.
- The Excellence in Leadership Award will recognize our top managers and supervisors for their leadership and dedication to Amtrak and their team members.

Now is a great time to get started on your nomination forms. As some of the categories are new and some others have been updated, you may need more time to complete the forms this year. The PSSA nomination period runs through **Sunday, June 9** and will not be extended beyond that date. Nominations must be submitted by the deadline and must be complete in order to be considered.

PSSA Committee members may reach out to you for assistance as they research nominations. The committee, which is comprised of agreement-covered and non-agreement employees from all departments, needs your help to ensure we chose the absolute most deserving winners. Please support the committee members as they work diligently to select this year's award recipients. The winners will be honored in November at a ceremony in Washington, D.C.

Nomination forms are posted on the company Intranet and can be found in the Forms Library which is available by clicking "Library" → "Forms." Questions can also be directed to 2013PSSA@amtrak.com.

Five Ways to Keep Walking

The challenge is on! Walk your way to the top of the leader board of Amtrak's Walking Program. Here are five ideas to add some extra steps to your day:

- 1) **Every Step Counts** – Wear your pedometer from the time you wake up until you go to bed.
- 2) **Go the Extra Distance** – Forget about shortcuts – take the stairs instead of the elevator and skip the closest parking spot for the farthest.
- 3) **Walking Lunch** – Grab your colleagues and step outside for a few extra steps on your lunch break.
- 4) **Walking Hour** – Instead of meeting your friends for coffee or cocktails after work, schedule a walking date.
- 5) **Meet on the Move** – Step out of the conference room and take your meeting on the move.

National Train Day Celebrated Across the Country

This past weekend, 259 communities in 50 states and the District of Columbia held activities celebrating the sixth annual National Train Day. This year's theme, "Trains Matter," championed the importance of trains - freight, commuter and long-distance passenger service - across the country.

Attendees enjoyed touring train equipment displays at 20 event celebrations. Also, at Washington Union Station, for the first time attendees had the opportunity to experience a short excursion on *Acela Express* and in Albuquerque, N.M., the recently launched Exhibit Train was available for self-guided tours. Additionally, in 21 cities a local or state dignitary was on site to kick-off their community's event.

Especially important at each celebration was our employee volunteers. This year, over 500 employees volunteered, a 21 percent increase over last year. Thank you to everyone that made this year's National Train Day a huge success.

Employee Travel on Southwest Airlines

Employees flying for Amtrak business should be mindful of more recent airline policy changes. In order to avoid costly fees, please confirm your schedule before you book, and only book through the corporate travel website Travel Leaders in eTrax. Travel Leaders can cancel your flights if you've made a mistake within 24 hours of booking without incurring the penalty.

Please note, when booking flights on Southwest Airlines, Amtrak business travelers have a few options:

1. You can go to the Worldspan Punchout catalog in eTrax and click on the Southwest Airlines link on the Daily Briefing Page;
2. You can go to the Worldspan Punchout catalog in eTrax and click on the Flights tab and select Southwest Airlines in the upper left hand corner;
3. You can call Travel Leaders directly at 800-892-1911 and they will book it for you and charge it to the Amtrak Master Charge Card.

For options 1 & 2, you must provide a credit card and there is a \$11.00 service charge. If you choose option 3, there is a \$31.00 service charge. Please note that Travel Leaders also has access to all airline inventories and will search other airlines as well for lower fares, as Southwest Airlines does not always have the lowest fares. All Amtrak travelers must also have a complete and accurate profile in Worldspan/Trip Manager to book travel, which includes their cost center, internal order and WBS element.

2012 Amtrak Police Officer of the Year Chosen

Congratulations to Francesco (Frank) McBride for being named the 2012 Amtrak Police Officer of the Year. Based in Philadelphia, Investigator McBride was assigned several high-profile cases, many of which involved the theft of copper wire from the Amtrak infrastructure, along the right-of-way. Copper wire theft can disrupt train operations and damage railroad systems, putting passenger and crew safety at risk.

Chief of Police Polly Hanson, Board of Directors Vice Chairman Jeffrey Moreland, and Safety, Security and Environmental Affairs Committee Chairman Albert DiClemente presented the award to Investigator McBride for his significant contributions to the Amtrak community, including the successful resolution of 52 cases assigned to him. Forty-eight of those cases resulted in arrest.

Investigator McBride began his career with the Amtrak Police on August 30, 2001, and has worked as a patrol officer and K-9 officer, in addition to his current role as investigator. He is also a member of this department's Pipe & Drum Unit, Peer Support Program and helped create the Mid-Atlantic Division North Safety Committee.

The Officer of the Year award is a prestigious honor, presented this year during National Police Week which was created by President John F. Kennedy in 1962 to honor law enforcement officers who have paid the ultimate sacrifice protecting others.

Amtrak Total Rewards Answers Your Questions

Amtrak Total Rewards represents the broad spectrum of plans and programs designed to reward, recognize, energize and develop our non-agreement employees throughout their careers. Past, current and future initiatives include:

- Mid-year performance training for managers
- Work with leadership to design a new Performance Management and Merit system
- Short Term Incentive (STI) targets
- Everyday Wellness incentive plan and
- New voluntary benefits

To introduce the program, Total Rewards Road Shows were held at employee locations across the country. Many insightful questions were received from employees. These questions and their answers have been compiled in a single document - the Total Rewards Frequently Asked Questions (FAQs) - which can be found on the company Intranet along with a copy of the Total Rewards presentation under "Employee" → "Benefits." As you read through the updated FAQs and the presentation, your comments and questions are welcome and can be sent to TotalRewards@amtrak.com.

New Locomotives Received and Enter Testing Phase

A new era of more reliable and energy efficient Amtrak service for Northeast intercity rail passengers is nearing. The first of 70 advanced technology electric locomotives being built by Siemens began rolling off the assembly line last week, further supporting our company's commitment to preserving the environment.

Using Siemens' innovative and proven rail technology, the Amtrak Cities Sprinter (ACS-64) locomotives are being assembled in Siemens' Sacramento, Calif., rail manufacturing plant powered by renewable energy, with parts built from its plants in Norwood, Ohio, Alpharetta, Ga., and Richland, Miss., and nearly 70 suppliers, representing more than 60 cities and 23 states.

The new locomotives will operate on *Northeast Regional* trains at speeds up to 125 mph on the Northeast Corridor (NEC) along the Washington – New York – Boston route and on *Keystone Service* trains at speeds up to 110 mph from Philadelphia to Harrisburg, Pa. In addition, all long-distance trains operating on the NEC will be powered by these new locomotives.

Designed for easier maintenance, the new locomotives will improve energy efficiency by using a regenerative braking system that will feed energy back into the power grid and will enhance mobility for the people, businesses and economy of the entire Northeast region. They also meet the latest federal rail safety regulations.

The new locomotives are part of a comprehensive Amtrak Fleet Strategy Plan to modernize and expand our equipment. The new units will replace electric locomotives that have between 25 and 35 years of service and average mileage of more than 3.5 million miles traveled with some approaching 4.5 million miles.

In Memoriam- Amtrak Canine K69, "The Bleckey"

It is with deep sadness that we report the passing of "The Bleckey," K69. "The Bleckey" was a dedicated K-9 to his partner, Amtrak Police Officer Daniel Scanlon of the Mid-Atlantic South Division and will be missed by his partner and the Amtrak community.

Amtrak Trivia...

In the late 1980s, illustrator Nathan Davies, working with E. James White and Company, developed a series of stylized and imaginative travel-themed graphics for Amtrak. Showing trains in all parts of the country during the four seasons, these [scenes](#) appeared on posters, postcards and the covers of our national timetables. For more Amtrak history, visit <http://history.amtrak.com>.

Know Your Numbers

Thirty-three percent of adults in the U.S. have high blood pressure. And since high blood pressure doesn't have any symptoms, many people don't even know they are at risk. High blood pressure is a serious condition, but if you know you have it, it can be managed with lifestyle changes, medication and the support of your doctor. A simple biometric screening can detect high blood pressure and other high-risk factors. Just by measuring:

- Height
- Weight
- Waist circumference
- Blood Pressure
- Body Mass Index
- Blood Glucose Measurement
- Total Cholesterol

Do you know your numbers? Find out by scheduling a biometric screening with your doctor today. With your Amtrak medical coverage, it's free!

Later this summer, Cigna participants will have the opportunity to participate in free, confidential onsite biometric screenings. Watch for more information.

New Carrollton Station Sets Safety Milestone

Congratulations to Elliott Benton, Earl Downs, Margie Maynard, Tishawn Thomas, Troy Chadwick, Deloris Jackson and Marcel White at our New Carrollton Station in Maryland for their continued focus on working safely.

Today marks 6,469 days without an injury due to their strong commitment to safety on the job and constantly being aware of any potential safety hazards.

Station in the Spotlight... Whitefish, Mont., (WFH)

Erected by the Great Northern Railway, the Whitefish depot was designed in a romantic Alpine style reminiscent of the buildings in nearby Glacier National Park. In the early 1990s, the Stumptown Historical Society acquired the depot from the Burlington Northern Railroad and subsequently undertook a full restoration. Today, it houses the Whitefish Museum, an Amtrak waiting room and offices for the historical society, BNSF Railway and other organizations. A major hub for outdoor recreation and sports, Whitefish is the most popular Amtrak stop in Montana.

http://www.greatamericanstations.com/Stations/WFH/Station_view

Onboard Wi-Fi Service Upgrades to 4G

AmtrakConnect, our cellular-based Wi-Fi service, has been upgraded, taking advantage of 4G technologies, improving performance and enhancing the passenger experience.

The 4G upgrade is already complete on *Acela Express* and the California-supported *Capitol Corridor*, *Pacific Surfliner*, and *San Joaquin* services, and will be rolled out to all remaining Wi-Fi equipped Amtrak trains by late summer, including the *Northeast Regional*.

"We continue to place a strong focus on improving customer satisfaction, and this upgrade is delivering the improved speeds and connectivity required to maintain a competitive edge," said Deborah Stone-Wulf, Amtrak chief, sales distribution and customer service.

Stone-Wulf explained that AmtrakConnect continues to be provided at no additional cost, is available on trains that serve 75 percent of Amtrak passengers, and routinely supports between 30 and 50 percent of passengers on a given train.

While cellular upgrades to 4G are improving the service, the onboard demand for data continues to grow. To maximize the Wi-Fi experience for passengers, data-heavy activities that can slow everyone down, such as streaming video and music, and file downloads larger than 10MB, will continue to be restricted. This will ensure high-volume data users onboard our trains are not able to degrade the Internet experience for others.

President's Service and Safety Awards

Nominations are currently being accepted for the 2013 President's Service and Safety Awards (PSSA). Nomination forms are located in the "Forms Library" on our company Intranet and must be submitted by June 9.

Questions may be sent to 2013PSSA@Amtrak.com.

Amtrak's History Website and Safe-2-Safer Video Receive Honors

Two Amtrak submissions, the third Safe-2-Safer video and Amtrak's history and archives website have received the Silver Award of Distinction at the 19th Annual Communicator Awards. The Communicator Awards honor excellence in Marketing and Communications. This year, over 6,000 entries were received from around the world in various categories.

The Silver Award was awarded to those projects the judges deemed made a lasting impact, and exceeded industry standards in quality and achievement.

To view our award winning history website featuring company archives, historic timelines and a blog, visit <http://history.Amtrak.com>. To view our award winning Safe-2-Safer video, visit our company Intranet → "Safety" → 'Safe-2-Safer.'

The New Amtrak Exhibit Train Debuts

This past weekend, the Amtrak Exhibit Train debuted at Railroad Days 2013 in Fullerton, Calif. The Exhibit Train is the former 40th anniversary Exhibit Train originally designed to celebrate this 2011 milestone. The train toured the system stopping in 43 communities over the course of one year and also appeared at special events.

Now refurbished, the Exhibit Train allows visitors to once again take a free, self-guided tour and catch glimpses of Amtrak's past, present and future and its importance in communities across America. New displays have been added such as an interactive video sleeper tour, workable train signals and video trivia questions while former favorites remain such as the horn display and locomotive stand.

At Fullerton, approximately 10,000 visitors toured the train.

The Exhibit Train will be in Albuquerque, N.M., for National Train Day on May 11 and in Hope, Ark., on May 18 to help celebrate our new Amtrak stop.

We hope that every employee gets the opportunity to tour the train when it's at a location near you. Updated stops will be added to and listed in *Amtrak This Week* and on our history site, history@Amtrak.com.

Get Ready, Get Set...Get Walking

As part of Amtrak's Every Day Wellness program, we are excited to announce the return of the Amtrak Keep Walking program. This year, the walking challenge will run from May 8 through June 18, 2013. Team up with your colleagues and join the challenge as you walk towards better health.

To participate in the Amtrak Keep Walking program, you will need the Omron pedometer issued to you last year. If you do not have the pedometer, you will need to purchase one that is compatible with the program. You may purchase the pedometer through **Amazon.com**. The pedometer you need is **Omron, Model #HJ720ITC**. We are no longer giving them out?

Be sure to check the battery! If your battery is not working, you will need to replace it. New batteries can be purchased at most drug stores, watch shops, dollar stores or online at **Amazon.com**. The battery size is **CR2032**.

To participate, you must email your completed application to KeepWalking@amtrak.com.

Don't forget...if you are a Cigna participant you can also enter your monthly activity for wellness incentive points. Go to **myCigna.com** and click on **Manage My Health**. Select **Incentive Awards Program** from the dropdown.

Smoking Policy Change on Auto Train

For the health and safety of our employees and passengers, effective June 1, smoking will be prohibited on *Auto Train* including Lounge cars, Food Service cars, Coach cars and Sleeping cars. This policy also prohibits the use of medical marijuana and electronic smoking devices such as electronic cigarettes aboard the train. With this change, Amtrak will become a completely smoke-free railroad.

Passengers may be permitted to get off the train and smoke when the train stops for servicing in Florence, S.C., if time and operational conditions permit.

The scheduled smoking stop times at Florence, S.C., are:

- Northbound Train 52: From approximately 12:30 a.m. - 12:45 a.m.
- Southbound Train 53: From approximately 11:45 p.m. - 11:59 p.m.

This new policy has been communicated to passengers via Amtrak.com, station signage, a press release, Amtrak social media channels and call backs to passenger with current reservations. Passengers are also being informed when they book a reservation with an agent at 1-800-USA-Rail.

Southwest Airlines to Implement a No Show Policy

Employees traveling on Southwest Airlines should be mindful of a new policy. Southwest Airlines is implementing a No Show policy that applies to Wanna Get Away and DING! fares that are not canceled by travelers prior to travel. If you have booked a Wanna Get Away or DING! fare anywhere in your itinerary and that portion of the flight is not used and not canceled at least 10 minutes prior to scheduled departure, all funds on the unused portion of the reservation will be lost and the remaining itinerary will be canceled by Southwest.

This new No Show policy will go into effect for fares booked on or after Friday, May 10, 2013, for travel on or after Friday, September 13, 2013. The policy will not impact travelers who simply cancel a Wanna Get Away or DING! fare prior to scheduled departure; in this case, travelers may reuse their funds toward future travel on Southwest, without a change fee, as they have always done.

All Aboard! Volunteers Needed for National Train Day!

National Train Day is May 11. Your help is needed to make this year's National Train Day the best yet. Please register to volunteer at an event near you at TrainDay411.com.

National Train Day Trivia Challenge

- Congratulations to last week's Trivia Challenge winner, Glenn Lawhorne, relief ticket clerk in Lynchburg, Va. Check out this week's train trivia questions on TrainDay411.com and enter for your chance to win exciting prizes.

New Intranet Page: "HC ESC Leave Management Administration"

The Human Capital Employee Service Center (HC ESC) has created a Leave Management Administration page on the Amtrak Intranet. This team was created in Aug. 2013 with a goal of encompassing various aspects of this program to include Family and Medical Leave (FMLA), short and long-term disability income processing and processing of all other leaves and returns.

In order to better service the organization; this page will be a location to provide information and updates about Leave Management Administration, links to up-to-date FMLA and Department of Labor forms and helpful hints.

To view the HC ESC Leave Management Administration page please go to the Amtrak Intranet, click on Employees → Human Capital Management → HC ESC Leave Management Administration.

Amtrak Programs Honored at 2013 World Employee Assistance Professionals Conference

On Oct. 19, Operation RedBlock (ORB) along with our Employee Assistance Program (EAP) were awarded the Ross Von Weigand Award which recognizes EAPs along with labor programs that demonstrate excellent cooperation between management and unions.

Amtrak EAP Counselor Joe Torres was also honored with the John J. Hennessy Award which recognizes an Employee Assistance Professionals Association member who exemplifies leadership in the employee assistance profession and has contributed significantly to organized labor/peer assistance programs.

Amtrak Launches Multicultural Microsites

Last week, Amtrak launched three microsites targeting multicultural travelers – DescubreNorteAmerica.com, a bilingual site for Hispanic consumers; MyBlackJourney.com for African American consumers and AmtrakRideWithPride.com for the lesbian, gay, bisexual, transgender (LGBT) community.

While Amtrak's main website, Amtrak.com, is a travel-planning resource for all travelers, the microsites are culturally- focused travel sites that host the unique, original multicultural voices of a rotating set of featured bloggers, another way that Amtrak is striving to enhance the customer experience.

Station in the Spotlight...Toledo, Ohio

In keeping with its hometown's nickname, the Glass City, this station features a variety of glass, including plate, block, double-glazed and tempered, as well as a colorful Vitrolite mural with a map of the world. When the station opened in 1950, the celebration stretched over a week and included remarks by Admiral Chester Nimitz, commander-in-chief of the combined American forces in the Pacific during World War II. Following a \$6 million renovation, the building now houses an Amtrak waiting room and various offices. Learn more about the Toledo, Ohio station at <http://www.greatamericanstations.com/Stations/TOL>

Register to Have Employee Communications Sent to Your Email Address

As we continue to identify measures to preserve the environment and our financial resources, Amtrak employees now have the option to receive messages and publications sent from the Employee Communications department to an email address of their choice.

Messaging and publications from Employee Communications include *Amtrak Ink*, *Amtrak This Week* and Special Employee Advisories.

To receive any of these items electronically, please visit <http://apps.nrpc/EmailOptIn/> and register by Jan. 31, 2014.

The current and past issues of *Amtrak Ink*, *Amtrak This Week* and Special Employee Advisories are available on the company Intranet >"News & Info". To access the company Intranet from a home internet connection, visit Amtrak.com and click on "About Amtrak" >"Employees" > "Log In".

Focus Groups Being Held to Support Customer Service Initiative

In fulfillment of strategic corporate goals and criteria mandated by the Passenger Railroad Investment and Improvement Act of 2008 (PRIIA), Amtrak's Operations Department is developing a multi-year comprehensive customer service program and associated training for all front line employees.

As part of this initiative, market research is being conducted with employees to:

- Understand employee perceptions of the quality of customer service delivery at Amtrak including strengths, weaknesses and areas for improvement.
- Gain insight into employee perceptions of what good customer service includes and the internal barriers that inhibit delivery.
- Explore the perceived differences about customer service delivery between front line employees, mid-level managers and senior managers.
- Explore employee ideas for enhancing customer service training approaches (content, method, media etc.).

For this research, Amtrak has retained the Greener Group who, among other studies, led the 2010 Total Amtrak Experience Exploratory Research with passengers. Telephone interviews have begun last week with business line general managers, as well as their senior and mid-level managers. In addition, three union leaders have also participated in these discussions and have provided their feedback.

The Greener Group will moderate 27 mini- focus groups among front line employees representing long-distance, short-distance and state- supported business lines. Focus group markets will include Boston, New York, Lorton, Va., Washington, D.C., Miami, Chicago, New Orleans, Los Angeles, Oakland and Seattle.

Importantly, in order to obtain honest and candid feedback, all discussions are completely confidential. The collective findings and recommendations will be used to develop a front line employee training and development program slated for 2014.

Change of Address:

Amtrak Materials Management Plant 177 has moved. Their new mailing address is:

Amtrak Materials Management
175 Industrial Drive
Groton, CT 06340

Northeast Corridor Thanksgiving Holiday Timetable Now Available

A special Thanksgiving holiday timetable for the Northeast Corridor (NEC) effective Nov. 26 – Dec. 2, is now available in print and online. The special timetable also includes *Empire* and *Keystone* service holiday schedules.

The Thanksgiving holiday is the busiest travel period of the year, and in the NEC we will serve more than 300,000 passengers during the holiday week. On the two busiest days -Wednesday and Sunday-NEC trains serve twice as many people as on an average day. To support the increased demand and customer service, "Holiday Extra" trains will be added.

In addition, a special Thanksgiving holiday timetable is now available online for *Wolverine* service. Amtrak will operate 18 extra trains in Michigan to supplement regularly scheduled *Wolverine* service. These extra trains will operate between Chicago, Ill., and Kalamazoo/Ann Arbor, Mich. This is the second time that a special holiday timetable is being produced for *Wolverine* service.

As always, volunteers are needed at our most heavily trafficked stations during this holiday period to ensure a positive and upbeat customer experience. Volunteer posts may include:

- Line Monitors
- Quik- Trak Machines
- Gate Assistance
- Information, i.e., directions, train schedules, etc.

Please consider volunteering at a station near you.

Hurricane Sandy Employee Relief Fund Update

Approximately one year ago, Hurricane Sandy affected a number of our Amtrak families. There were many Amtrak employees who stepped up to donate to their co-workers who suffered tremendous loss.

In Feb. 2013, \$19,800 was disbursed to 38 employees. As the fund continued to receive donations made through payroll deductions, the fund's trustees made another disbursement of \$5,408 in Oct. 2013 to 16 Amtrak employees who had the most need.

The trustees will be distributing the balance of the fund early next year after all payroll deductions cease. To all who donated to our fellow colleagues in need, thank you.

Radio City Christmas Spectacular®

Amtrak employees qualify for a 25 percent discount on tickets for select performances to see the Rockettes® at the Radio City Christmas Spectacular in New York City from Nov. 8 – Dec. 30.

For more information and to purchase tickets, go to www.radiocitychristmas.com/offer/amemp. Type in the code "AMEMP" on the purchase page to receive the discount. Terms and conditions apply.

Open Enrollment Deadline Extended to Nov. 21 for Non-Agreement Employees

The deadline for enrollment in your 2014 benefits has been extended to Thursday, Nov. 21. Take action today:

1. **Review your personalized Enrollment Worksheet** in your enrollment packet or online at www.AmtrakBenefits.com to know your options and related costs.
2. **Talk to someone with answers** at the Amtrak Benefits Service Center. Call **800-481-4887**.
3. **Check your dependent's eligibility for coverage** in 2014. Eligibility requirements are included in your 2014 Employee Benefits Enrollment Guide.
4. Enroll at www.AmtrakBenefits.com.

Remember, enrollment is mandatory for non-agreement employees for 2014. If you don't enroll, you won't have medical benefits in 2014.

Select New Rail Pass Cards to be Reissued

The Pass Bureau has identified a problem with the new pass cards for those spouses and/or dependents who have a different last name than that of the primary pass holder (employee). The actual spouse and/or dependent last name printed on the face of the card is correct, but the last name embedded in the bar code is that of the employee rather than the spouse or dependent named on the card. Accordingly, when the conductor scans the new pass card with the eTicket Mobile Device, an incorrect last name appears on the device. For example:

- Name of employee printed on pass card is Andrew Smith
- Name of spouse printed on pass card is Robin Jones
- The name that displays on the conductor device when the bar code is scanned is RSmith.

The name discrepancy will only be encountered by spouses and/or dependent pass riders who do not have the same last name as the Amtrak employee pass owner and who "flash pass" on trains. Pass riders who obtain tickets, or who have the same last name as the employee pass owner, will not encounter this issue. Conductors are aware of the problem and know that the printed name on the face of the pass card should be used when performing ID checks for non-employee "flash pass" riders.

Beginning this week, replacement pass cards will be sent to those employees affected by this problem. Upon receipt of the replacement pass cards, the card recipients should destroy the old pass cards and begin using the replacement cards. Questions may be directed to the Amtrak Pass Bureau at 202-906-3745.

Preserving the Past...In the late 1970s, cars undergoing conversion to head-end power at Beech Grove were fumigated and completely stripped, but "special features that individualize certain cars... [were] retained to remind passengers of the cars' rich heritage." Click on this [image](#) of a carman-trimmer installing newly-upholstered seats in a coach. In a nod to the car's Santa Fe Railway lineage, wall panels featuring Mimbrenño-style birds were put back in place.

Fiscal Year 2014 Starts Off with Record Ridership Results

There's strength in numbers and so far Fiscal Year 2014 (FY14) has started off with stellar ridership statistics across the Amtrak system, mirroring the strong commitment our employees make every day to run the railroad.

Oct. 2013 resulted in our best October ever for ridership with 2,625,820 passengers nation-wide. October also proved significant for our *Acela Express* service on the Northeast corridor. Four of the ten best single days in *Acela's* history prior to November occurred in October. These top *Acela* days realized total ridership each day of over 14,000 passengers. Such totals have only occurred 13 times in the 13 years *Acela* has been in operation.

November is also promising to be a strong travel month for *Acela* service. As of this writing, there have been six 14,000 plus passenger days in November, with an all-time high *Acela* ridership record expected for Nov. 7.

California Thruway Bus eTicketing Program Complete

Effective Oct. 29, Amtrak Thruway bus service between Merced, Calif., and Yosemite National Park became eTicket eligible, completing the eTicketing program in California.

eTicketing allows for an entire one-way or roundtrip reservation to connect to train reservations on most California Connecting Thruway buses. Employed for added customer convenience, eTickets can be displayed for free via the iPhone app or as a PDF depending on the mobile device.

Only four California Thruway services will continue to not be eTicket eligible. These non-dedicated Thruway routes in California will remain as legacy value ticket services (paper tickets) for the foreseeable future:

- **Suisun/Fairfield – Rio Vista:** Transit bus service operated by Delta Breeze
- **San Jose – Santa Cruz:** Transit bus service operated by Santa Cruz Metro
- **San Jose – Monterey:** Transit bus service operated by Monterey-Salinas Transit
- **Los Angeles – Las Vegas:** Intercity bus service operated by Greyhound Lines

401(k) Deferral Process Change

As a participant in the Amtrak 401(k) Retirement Savings Plan, you are able to suspend, change or resume your 401(k) payroll deduction amounts through Fidelity Investments. **Amtrak is pleased to announce that, effective immediately, you no longer need to wait 30 days between deferral changes. To change your deferral you may call Fidelity at 1-877-477-2685 or on-line at www.NetBenefits.com.**

Fidelity transmits your deferral changes to Amtrak for a payroll system update and deferral changes will be made through payroll as soon as administratively practicable and according to the provisions of the plan. It may take a pay period or two for your deferral change to be in effect in our payroll system. Please plan accordingly when making these updates.

--Enjoy a Safe & Happy Thanksgiving Holiday--

Amtrak Exhibit Train- 2013 Overview

The Amtrak Exhibit Train ended its 2013 tour welcoming over 32,000 visitors in 12 communities. Formally our 40th Anniversary Train, the Exhibit Train was repurposed at our Bear, Del., shops and began its 2013 tour in May. The train champions the Amtrak message of the importance of passenger train travel connecting communities across America and the economic impact it brings to the region.

This year, chosen stops included those that helped strengthen state-partner relations such as Pa., Calif., Wash., and N.C., strengthened ties with host railroads such as CSX, Norfolk Southern and BNSF and generated increased awareness for our long-distance routes such as the *Crescent*, *Empire Builder*, *Southwest Chief*, *Texas Eagle* and *Coast Starlight*. At ten locations, our Veterans' Locomotive led the train, drawing attention to our veterans hiring initiative that 25 percent of new hires be from the military by 2015 and also serving as a rolling salute to our country's service men and women.

At six Exhibit Train stops, city officials were on hand to tour the train and receive "Amtrak Served Community" signage, a Government Affairs initiative throughout the system. At select locations, our national partners such as Operation Lifesaver and the National Park Service were showcased and when space permitted, grass roots efforts included inviting local community attractions such as museums, libraries and transit systems to promote their organizations.

Plans are now underway to develop the 2014 schedule which will be available soon at Amtrak.com/exhibit-train.

Safe-2-Safer by the Numbers....Highlights for October 2013

Safe-2-Safer, the multiyear risk-reduction approach to safety and security, aims to reduce injuries by creating a more collaborative environment in which employees are shown how to change at-risk behavior to safe behaviors. Highlights for October include:

- Total Number of Observations: 10,383
- Total Number of Contacts: 12,583
- There were 1,098 active observers participating in Safe-2-Safer and the Participation Rate was seven percent.

Since the inception of Safe-2-Safer in 2009, **200,214** contacts have taken place. There were **1,722,233** safe behaviors noted and **61,031** at risk behaviors noted.

What's in a Name?

Before the [Superliner](#), there was the Vistaliner—well, at least on paper. In a 1977 employee contest to name the new bi-level cars, "Vistaliner" was the winning choice. Close contenders included "Amcruiser," "Vistalevel," "USA Cruiser," "Astroliner" and "Bi-liner." Unfortunately, after a precautionary copyright search, it was determined that none of these entries could be used because they were held by other corporations.

Ultimately, Needham, Harper & Steers, Amtrak's advertising agency developed the name "Superliner."

Ron Baklarz Named C/CISO of the Year

Each year, the International Council of Electronic Commerce Consultants holds the Global CISO (Chief Information Security Officer) Forum, to gather the most brilliant minds found worldwide to focus on serious information security threats to nations, companies and networks.

This year, the Global CISO Forum officially launched the Certified Chief Information Security Officer (C/CISO) Program and held the CISO awards ceremony to honor the best and brightest information security executives from around the world.

At the ceremony, Ron Baklarz, Amtrak chief information security officer, was the recipient of 2013 C/CISO of the Year award, which recognizes an individual's outstanding work in information security, including his or her contributions to the information security industry, their personal growth and achievement, and their promotion of strong, innovative security practices.

Ron was recognized for his contributions in the Information Security field developing "first-of-a-kind" information security programs within government, military, and private sector organizations.

Reminder: Organizational Culture Diagnostic Instrument Available

As part of the Safe-2-Safer process, the Organizational Culture Diagnostic Instrument (OCDI) is happening now – both paper surveys and an on-line link are available.

The totally anonymous survey will take approximately 30 minutes to complete and will be active through Oct. 31. [Please click here to begin the survey.](https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP) If this link does not work, copy and paste <https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP> into your web browser.

New Amtrak Labor and Employment Law Newsletter Now Available

The latest edition of the Amtrak Labor and Employment Law newsletter, *On the Right Track*, is now available. You can find this and past editions of the newsletter under Law Department Publications on the [Law Department](#) Intranet page, located under the How We Work tab on our company Intranet. Features in this issue include:

- Accessing company data for non-business purposes may be a violation of federal law.
- How shying away from tough conversations can result in liability for the company.
- If it's in the job description, they have to do it, right?
- But I only repeated what she said! Was "senior moment" comment innocuous or proof of discrimination?
- If you have a pregnant or post-childbirth employee in your department, here's what you should know.
- Maryland passes new law requiring leave for employees whose family members are deployed abroad.

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter. Their job is to provide you with answers to your labor & employment law questions so that you can get on with doing your job running the railroad.

Amtrak Recognizes October as Domestic Violence Awareness Month

Beginning in 1987, Domestic Violence Awareness Month has been observed every October to shed light on an issue that affects millions around the U.S. and around the world. As a company, Amtrak is recognizing Domestic Violence Awareness Month in an effort to send a powerful message to our employees and the communities we serve, that there is a way out, and help is available. The Amtrak Employee Assistance Program (EAP) is committed to providing confidential assistance to any employee or family member who feels that he/she is a victim of domestic violence.

Domestic violence happens when one person exerts power or control over a current or past intimate partner or family member. Victims often feel fear and are intimidated. Domestic violence affects people of every age, gender, sexual orientation, race, religion, income and education. Nearly one in four women and 11.5 percent of men have reported at least one episode of domestic violence in their lifetime. Help is available. To get help or find out more information, contact the National Domestic Violence Hotline, 1-800-799-SAFE (7233) or www.thehotline.org.

In recognition of Domestic Violence Month, Amtrak is pleased to take action by making information available on ways to get help. Brochures and posters will be available beginning today in facilities. Information about how to contact EAP can be found on the EAP website on our company Intranet at <http://wiki.intranet.nrpc/display/EAP/Home>.

There will also be awareness ribbons distributed nationally to allow employees to participate in supporting this important cause.

Amtrak Total Rewards Employee Road Shows Continue for Non-Agreement Employees

Want to learn more about the upcoming benefits changes for 2014? Interested in an update on Amtrak Total Rewards and Integrated Talent Management? Join us for the upcoming employee Road Shows.

During each session, the Human Capital team will:

- Review the progress of Amtrak Total Rewards to date.
- Update you on Amtrak's compensation philosophy and salary structure.
- Preview benefits changes and new medical options for 2014.
- Answer your questions.

Amtrak Total Rewards Employee Road Shows will be in the following locations on the following dates and times.

October 7	12:00 p.m.	Miami , Miami Station, 2 nd Floor Conference Room, Miami, Fla.
October 8	11:00 a.m. & 2:00 p.m.	New Orleans , 1001 Loyola Ave., Annex Training Room, New Orleans, La.
October 10	11:00 a.m. & 3:00 p.m.	Philadelphia - 30th Street Station, Chapel Conference Room
October 11	10:00 a.m. & 2:00 p.m.	Philadelphia - 30th Street Station, Chapel Conference Room

Amtrak Pass Policy Changes: Please direct any questions regarding the recent policy changes to the Pass Bureau at passbureau@amtrak.com or call the Amtrak Pass Bureau at 202-906-3745.

New Amtrak Labor and Employment Law Newsletter Now Available

The latest edition of the Amtrak Labor and Employment Law newsletter, *On the Right Track*, is now available. You can find this and past editions of the newsletter under Law department publications on the [Law department](#) Intranet page, located under the How We Work tab on our company Intranet. Features in this issue include:

- Accessing company data for non-business purposes may be a violation of federal law.
- How shying away from tough conversations can result in liability for the company.
- If it's in the job description, they have to do it, right?
- But I only repeated what she said! Was "senior moment" comment innocuous or proof of discrimination?
- If you have a pregnant or post-childbirth employee in your department, here's what you should know.
- Maryland passes new law requiring leave for employees whose family members are deployed abroad.

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter. Their job is to provide you with answers to your labor and employment law questions so that you can get on with doing your job running the railroad.

Amtrak Recognizes October as Domestic Violence Awareness Month

Beginning in 1987, Domestic Violence Awareness Month has been observed every October to shed light on an issue that affects millions around the U.S. and around the world. As a company, Amtrak is recognizing Domestic Violence Awareness Month in an effort to send a powerful message to our employees and the communities we serve, that there is a way out, and help is available. The Amtrak Employee Assistance Program (EAP) is committed to providing confidential assistance to any employee or family member who feels that he/she is a victim of domestic violence.

Domestic violence happens when one person exerts power or control over a current or past intimate partner or family member. Victims often feel fear and are intimidated. Domestic violence affects people of every age, gender, sexual orientation, race, religion, income and education. Nearly one in four women and 11.5 percent of men have reported at least one episode of domestic violence in their lifetime. Help is available. To get help or find out more information, contact the National Domestic Violence Hotline, 1-800-799-SAFE (7233) or www.thehotline.org.

In recognition of Domestic Violence Month, Amtrak is pleased to take action by making information available on ways to get help. Brochures and posters will be available beginning today in facilities. Information about how to contact EAP can be found on the EAP website on our company Intranet at <http://wiki.intranet.nrpc/display/EAP/Home>.

There will also be awareness ribbons distributed nationally to allow employees to participate in supporting this important cause.

Amtrak Total Rewards Employee Road Shows Continue for Non-Agreement Employees

Want to learn more about the upcoming benefits changes for 2014? Interested in an update on Amtrak Total Rewards and Integrated Talent Management? Join us for the upcoming employee Road Shows.

During each session, the Human Capital team will:

- Review the progress of Amtrak Total Rewards to date.
- Update you on Amtrak's compensation philosophy and salary structure.
- Preview benefits changes and new medical options for 2014.
- Answer your questions.

Amtrak Total Rewards Employee Road Shows will be in the following locations on the following dates and times.

October 7	12:00 p.m.	Miami , Miami Station, 2 nd Floor Conference Room, Miami, Fla.
October 8	11:00 a.m. & 2:00 p.m.	New Orleans , 1001 Loyola Ave., Annex Training Room, New Orleans, La.
October 10	11:00 a.m. & 3:00 p.m.	Philadelphia - 30th Street Station, Chapel Conference Room
October 11	10:00 a.m. & 2:00 p.m.	Philadelphia - 30th Street Station, Chapel Conference Room

Amtrak Pass Policy Changes: Please direct any questions regarding the recent policy changes to the Pass Bureau at passbureau@amtrak.com or call the Amtrak Pass Bureau at 202-906-3745.

Ron Baklarz Named C/CISO of the Year

Each year, the International Council of Electronic Commerce Consultants holds the Global CISO (Chief Information Security Officer) Forum, to gather the most brilliant minds found worldwide to focus on serious information security threats to nations, companies and networks.

This year, the Global CISO Forum officially launched the Certified Chief Information Security Officer (C/CISO) Program and held the CISO awards ceremony to honor the best and brightest information security executives from around the world.

At the ceremony, Ron Baklarz, Amtrak chief information security officer, was the recipient of 2013 C/CISO of the Year award, which recognizes an individual's outstanding work in information security, including his or her contributions to the information security industry, their personal growth and achievement, and their promotion of strong, innovative security practices.

Ron was recognized for his contributions in the Information Security field developing "first-of-a-kind" information security programs within government, military, and private sector organizations.

Reminder: Organizational Culture Diagnostic Instrument Available

As part of the Safe-2-Safer process, the Organizational Culture Diagnostic Instrument (OCDI) is happening now – both paper surveys and an on-line link are available.

The totally anonymous survey will take approximately 30 minutes to complete and will be active through Oct. 31. Best Ever Ridership and Ticket Revenue Announced

Fiscal Year 2013, ending Sept. 30, marked the highest annual ridership total in Amtrak history with over 31.6 million passengers traveling across the Amtrak system. A year-over-year comparison of FY 2013 to FY 2012 shows ridership grew one percent to a new record of 31,559,945 passengers.

Ticket revenue jumped four percent to a best ever \$2.105 billion. Long-distance ticket sales increased 1.9 percent, state-supported and other short-distance corridors increased 4.4 percent and Northeast Corridor ticket sales increased 5.3 percent.

Stellar ridership and revenue sales could not be achieved without the dedication, focus and hard work of all Amtrak employees. Your role is important in our success and in making Amtrak America's Railroad.

Amtrak to Participate in "The Great ShakeOut"

On Oct. 17 at 10:17 a.m., thousands of people will "Drop, Cover, and Hold On" in the Great ShakeOut, the nation's largest earthquake drill ever held. All businesses are encouraged to participate in the drill.

Major earthquakes may happen anywhere you live, work or travel. The Great ShakeOut is our chance to practice how to protect ourselves, and for everyone to become prepared. The goal is to prevent a major earthquake from becoming a catastrophe for you, our organization and our community.

Why is a "Drop, Cover, and Hold On" drill important? To respond quickly you must practice often. You may only have seconds to protect yourself in an earthquake before strong shaking knocks you down, or something falls on you.

Here are some helpful tips in practicing earthquake preparedness:

If you are inside when the shaking starts:

- Drop, cover and hold on.
- If you are in bed, stay there, curl up and hold on. Protect your head with a pillow.
- Stay away from windows to avoid being injured by shattered glass.
- Stay indoors until the shaking stops and it is safe to exit. Use stairs to exit the building rather than an elevator.
- Be aware that fire alarms and sprinkler systems frequently go off in buildings during an earthquake, even if there is no fire.
- Check in with your supervisor for additional instructions if you are at work.

If you are outside when the shaking starts:

- Find a clear spot away from buildings, power lines, trees and streetlights and drop to the ground until the shaking stops.
- If you are in a vehicle, pull over to a clear location and stop. Avoid bridges, overpasses and power lines if possible. Stay inside with your seatbelt fastened until the shaking stops.
- If a power line falls on your vehicle, do not get out. Wait for assistance.
- If you are in a mountainous area or near unstable slopes or cliffs, be alert for falling rocks and other debris. Landslides are often triggered by earthquakes.
- Amtrak crews should ensure the safety of all members, and check in with their supervisor.

If you are inside a train when the shaking starts

- The conductor will stop as soon as it is safe.
- Stay where you are and hold on.
- Protect your head and neck.
- Train crews should check on the wellbeing of passengers and report any injuries and report any injuries.

Visit <http://www.shakeout.org> for additional information.

Progress Continues on New Viewliner® II Equipment

For most of our rail passengers traveling east of the Mississippi, a new generation of rail passenger cars is soon approaching! With the first delivery expected this winter, our new Viewliner II equipment combines the traditional rail car with interior design enhancements, supplementing the Viewliner I sleeping cars delivered in 1996. The new equipment is being built by CAF USA at their facility located in Elmira, N.Y., and delivery includes 130 cars over the next two years. This equipment will go on all single-level long-distance eastern routes.

A deployment planning effort, led by Lenetta McCampbell of our Sales and Marketing department, is being developed to determine when and where the equipment will be placed into service. The first set of equipment will be used largely as a demonstration and test set and will travel the east where comments will be sought and some employees will have the opportunity to evaluate and test the equipment for railroad readiness. Additional scenarios for using the equipment are being evaluated to determine whether or not Amtrak can capitalize on the added sleeper capacity.

On Oct. 24, a media event will be held at the Elmira facility to publicize our new Viewliner II equipment, the first new equipment Amtrak has purchased since the acquisition of our Acela train sets in the early 2000s.

Amtrak Total Rewards Employee Road Shows Continue for Non-Agreement Employees

Amtrak Total Rewards Employee Road Shows continue through November throughout the Amtrak system offering non-agreement employees the opportunity to learn more about the upcoming benefits changes for 2014 as well as hear updates on Amtrak Total Rewards and Integrated Talent Management.

During each session, the Human Capital team will:

- Review the progress of Amtrak Total Rewards to date.
- Update you on Amtrak's compensation philosophy and salary structure.
- Preview benefits changes and new medical options for 2014.
- Answer your questions.

Amtrak Total Rewards Employee Road Shows will be in the following West coast locations on the following dates and times.

<u>Seattle:</u>	Oct. 18 at 10:00 a.m. and 2:00 p.m. in the Columbia River conference room, 2 nd floor, north
<u>Oakland:</u>	Oct. 21 at 9:00 a.m. at the Oakland Yard training room, 303 3 rd Street
<u>Oakland:</u>	Oct. 21 at 2:00 p.m. in the Port of Oakland training room, 530 Water Street, 3 rd Floor
<u>Los Angeles:</u>	Oct. 22 at 10:00 a.m. and 2:00 p.m. at Los Angeles Union Station, 810 Alameda Street, 3 rd Floor, large conference room
<u>Los Angeles:</u>	Oct. 23 at 9:00 a.m. at the Los Angeles Yard, Mechanical department, Preventative Maintenance Facility, 2468 East 16th Street, Building 25, 2 nd floor conference room
<u>Riverside:</u>	Oct. 23 at 2:00 p.m. at the Riverside Contact Center, Riverside conference room

Automated Annual Certificate of Compliance Process to Launch in eTrax for Non-Agreement Employees

On an annual basis, non-agreement employees are required to disclose relationships that might present a conflict of interest with Amtrak's business and operations. This year's process will be automated via eTrax, saving paper and printing costs while preserving the environment.

On **Monday, Oct. 28**, all non-agreement employees will receive a communication via email from COC@amtrak.com detailing the revised process and how to electronically submit information for 2013. The deadline by which this year's disclosure process must be completed is **Friday, Nov. 15**. As a reminder, **participation in this certification process is an annual requirement for all non-agreement employees**.

Any questions can be emailed to the Certificate of Compliance email box at COC@amtrak.com.

2014 Open Enrollment Information Now Available for Non-Agreement Employees

Amtrak is introducing new medical plans for our **non-agreement** covered employees as part of this year's Open Enrollment being held Nov. 4 – 15. For the 2014 plan year, two Consumer Directed Health (CDH) Plan options will be offered, as well as a more traditional Open Access Plan (OAP), similar to the plans currently being offered.

To have medical coverage, you must enroll in a medical plan during Open Enrollment. **You will not have medical coverage for 2014 if you don't enroll.** In the coming months, you will have a number of opportunities to learn more about these new plans and how they may work for you and your family.

The decision to offer new medical plan options for 2014 is part of our larger Amtrak Total Rewards and Integrated Talent Management initiative. Amtrak's goal is to provide our employees with access to benefits that are comprehensive and valuable, but also financially viable and sustainable.

Information about the [2014 Amtrak Total Rewards](#) medical plan options can be found on the company Intranet under Employee Information → Employees → Employee Benefits Online or at myCignaplans.com (User ID: Amtrak 2014 and Password: cigna). In addition, employees may call CIGNA at 1-800-401-4041.

For prescription care information visit www.caremark.com or call CVS Caremark at 1-855-271-6604.

This Week in Amtrak History... On Oct. 23, 1980, the [BWI Rail Station](#) opened along the Northeast Corridor. Hailed as the nation's "first intercity air-rail-ground transportation" facility, the station ushered in a new era of intermodal transportation centers. Those who attended the ribbon cutting enjoyed music, a gala reception, as well as tours of the station, airport and Baltimore's revitalized Inner Harbor. See a [program and other memorabilia](#) from the ceremony.

Amtrak Police Department Launches APD11 "Txt-a-Tip"

On Oct. 16, the [Amtrak Police Department](#) (APD) launched a new method for passengers and employees to report suspicious activity, crime or emergencies by introducing APD11 "Txt-a-Tip," a program that allows contacting the Amtrak Police Department's National Communications Center via SMS text messaging.

"Txt-a-Tip" will follow similar response procedures that are in place when a report is called into the Amtrak Police 800 number. Passengers can now simply report suspected criminal or suspicious activity by sending a text to APD11 from a smartphone or to 27311 from a standard cell phone. When a text is received, the sender will receive a message acknowledging the report, and will then be connected to a live Amtrak Police Communications Officer who will correspond directly via text message with the person to learn more about the situation and determine the appropriate action.

This initiative is part of a continued effort to provide additional communication options for our passengers and employees who are deaf or may have hearing loss, allowing easy and efficient communication of emergency information to the APD.

Amtrak's On-Site Employee Flu Vaccination Clinics Delayed

Amtrak will again offer free flu vaccinations to all employees as an effort to maintain a healthy work environment. On-site immunization clinics, originally scheduled to begin this September, have been postponed due to the sudden and unexpected announcement of our current provider's inability to provide on-site flu vaccinations this flu season. A replacement provider has been secured and we are in the process of rescheduling on-site visits. While scheduling of flu shots has started at some locations, please [click here](#) for more information or check the company Intranet under Safety → Health → Health & Medical Services → Work Site Flu Clinics.

Reminder: Organizational Culture Diagnostic Instrument Available

As part of the Safe-2-Safer process, the Organizational Culture Diagnostic Instrument (OCDI) is happening now – both paper surveys and an on-line link are available.

The totally anonymous survey will take approximately 30 minutes to complete and will be active through Oct. 31. [Please click here to begin the survey.](#) If this link does not work, copy and paste <https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP> into your web browser.

Consider Donating Your Amtrak Memorabilia

During our 40th Anniversary celebration in 2011-2012, Amtrak employees and the public demonstrated a strong interest in our company's history, especially our formative years. The Amtrak Archives was subsequently established in an effort to create a central repository for historical memorabilia. The [Amtrak History](#) website includes digitized archival items, a blog tracing our history and a useful timeline of key company milestones.

Ultimately, an archive is only as strong as its contents; thus, the Amtrak Archives is now accepting donations to include:

- Photographs and slides of trains, stations, maintenance facilities and landscapes.
- Brochures and posters for existing and retired services.
- Menus, maps, buttons china and more!

Donations will be properly stored and preserved, as well as made available on-line. We will also list you as the donor. For more information or to discuss your collection, contact Patrick Kidd, Amtrak Archivist, at history@amtrak.com. We're also interested in hearing your Amtrak-related stories or ideas for future blog posts.

New and Improved Annual Certificate of Compliance Process Now Available in eTrax for Non-Agreement Employees

The new and improved annual Certificate of Compliance process officially launched today, **Monday, Oct. 28**. This is the process by which all non-agreement employees are required to disclose relationships that might present a conflict of interest with Amtrak's business and operations. All non-agreement employees should have received a communication via email from COC@amtrak.com detailing the revised process and how to electronically submit information for 2013.

The deadline for this year's disclosure process is **Friday, Nov. 15**. As a reminder, **participation in this certification process is an annual requirement for all non-agreement employees**.

Any questions regarding this process can be emailed to the Certificate of Compliance email box at COC@amtrak.com.

Final Reminder: Organizational Culture Diagnostic Instrument Available

As part of the Safe-2-Safer process, the Organizational Culture Diagnostic Instrument (OCDI) is happening now – both paper surveys and an on-line link are available.

The totally anonymous survey will take approximately 30 minutes to complete and will be active through **Oct. 31**. Please click here to begin the survey. If this link does not work, copy and paste <https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP> into your web browser.

Quik-Trak Machines in the Pacific Surfliner Corridor Now Accepting Bicycle Reservations

Amtrak recently developed the capability for passengers to add a bicycle to their reservation at Quik-Trak machines in the *Pacific Surfliner* corridor. Bicycle reservation service began in this corridor in June, and since then we are averaging 2,500 bicycle reservations a month. Previously, passengers were required to see a station agent or call the Contact Center in order to reserve bicycle space.

This customer-focused initiative simplifies the passenger reservation process. In the future, this option will be available on Quik-Trak machines in other corridors.

From the Amtrak Archives... If you can't get a seat on the "Great Dome" car this fall, you can still see some colorful foliage in this [advertising artwork](#) depicting an Amtrak train passing through a typical New England scene complete with covered bridge and white farmhouse. Done by illustrator Nathan Davies, it was one of a series of stylized and imaginative travel-themed graphics used on postcards and posters; it also appeared on the cover of the system timetable released on Oct. 28, 1990.

Amtrak Total Rewards Road Shows Continue in New England- Virtual Road Shows Now Available

Amtrak Total Rewards Employee Road Shows continue through November throughout the Amtrak system offering non-agreement employees the opportunity to learn more about the upcoming benefits changes for 2014 as well as hear updates on Amtrak Total Rewards and Integrated Talent Management.

For those who cannot make it to a 2014 Total Rewards Road Show, join the virtual Road Show: [2014 Virtual Total Rewards Road Show](#). Once you've had an opportunity to review the presentation, please tell us what you think. A survey is available at the end of the presentation.

Amtrak Total Rewards Employee Road Shows continue in the following **New England** locations on the following dates and times.

- Boston: Oct. 29, at 8:00 a.m., Boston Yard (Café), 2 Frontage Road
- Boston: Oct. 29, at 11:00 a.m. and 2:00 p.m. at Boston South Station, Executive Conference room, 5th floor
- New Haven: Oct. 30 at 8:00 a.m. and 11:00 a.m. at Union Station, 50 Union Avenue

During each session, the Human Capital team will:

- Review the progress of Amtrak Total Rewards to date.
- Update you on Amtrak's compensation philosophy and salary structure.
- Preview benefits changes and new medical options for 2014.
- Answer your questions.

Arrive Magazine Honored with Award

We always knew that *Arrive* Magazine, Amtrak's on board publication was trendy, but now it's hip and trendy as *Arrive* Magazine was awarded the History in Pennsylvania (HIP) Award.

The HIP Award is presented by History Affiliates, a program created by the Historical Society of Pennsylvania and supported by The Barra Foundation. History Affiliates includes more than 350 small and mid-sized organizations across Southeastern Pennsylvania dedicated to preserving local history. The HIP Awards honor exceptional educational and public programs, community partnership projects and stewardship and collections care.

On-Site Flu Shot Locations Added

In a continued effort to maintain a healthy work environment, Amtrak is again offering free flu vaccinations to all employees. While scheduling of flu shots has started at some locations, new locations are being added. Please [click here](#) for more information and to view the on-site locations or check the company Intranet under Safety → Health → Health & Medical Services → Work Site Flu Clinics.

Daylight Savings Time to End on Nov. 3

At 2:00 a.m. on Sunday, Nov. 3, all clocks (except in Arizona) will be set back one hour in accordance with the Uniform Time Standards Act. Amtrak trains en route at that time will protect departures and operate on current schedules to final destinations.

Employee Appreciation Day

This year Employee Appreciation Day will be celebrated from September 9 – 20. The purpose is for managers to thank their employees for the work they do day in and day out.

While celebrations will be held across the country, we have included a way you can thank your employees and co-workers for a job well done or wish them a happy Employee Appreciation Day with an e-card. Visit <http://mtmrecognition.com/ecards/amtrak> to view the e-card selection and for instructions.

"Autumn Express" Offers Rare Mileage Opportunity

On Saturday, November 2, passengers can experience the splendor of fall aboard the inaugural "Autumn Express." Tickets are now on sale for this one-day-only special train, which departs from and returns to Philadelphia 30th Street Station and affords scenic views of historic railroad sites throughout Delaware, Maryland and Pennsylvania.

The train will travel the Northeast Corridor to Perryville, Md., then make a rare trip up the historic Port Road Branch (usually off limits to passenger traffic) along the Susquehanna River, passing through Enola Yard, crossing the Shocks Mill and Rockville bridges before continuing over the Columbia Secondary and back to Philadelphia via Amtrak's Keystone Corridor through scenic Lancaster County spanning approximately 254 miles.

"This unique excursion is an exciting opportunity for passengers and a new venture for Amtrak," explained DJ Stadler, vice president of Operations. "In addition to exploring rare mileage, the 'Autumn Express' is a first of its kind charter train which we'll test as a potential new revenue source for America's Railroad."

The train will consist of a P-42 locomotive, Horizon coach cars and a café car. Tickets cost \$89.00 for adults and are half-priced for children ages two-15. All tickets include a boxed lunch and free souvenir tote bag emblazoned with the special "Autumn Express" inaugural logo. Other commemorative merchandise will be available for purchase aboard the train and special announcements will be made highlighting key landmarks along the route. Visit Amtrak.com/autumnexpress for more details.

Hazard Communication Standard Changes

In March 2012, the Occupational Safety and Health Association published significant changes to the Hazard Communication Standard. The changes were made to align chemical safety information provided on labels and in material safety data sheets (MSDS) in the United States with the globally harmonized system (GHS) of classifying and labeling chemicals.

All employees working with or around hazardous chemicals must be trained in the new GHS labeling and safety data sheets (SDS) format by December 1. A 30 minute training module has been developed by Employee Development to supplement the basic Hazard Communication training. If you have not completed this training, consult with your facility's Safety Officer.

Expansion of Confidential Close Call Reporting System

On September 1, the Confidential Close Call Reporting System (C³RS) took a significant step forward by expanding the geographic coverage for Transportation and Engineering (T&E) employees from ten Amtrak yard facilities to all Amtrak owned and dispatched territory throughout the system.

Although the greatest impact will be on the Northeast Corridor (NEC), the Amtrak dispatched portion of the Michigan Line, New Orleans Union Passenger Terminal and a few other yards and tracks throughout the country will also be affected. The expansion will also include any tracks or facilities acquired by Amtrak in the future.

In addition to the geographical expansion, there are two other important extensions of coverage. Coverage will now be available for incidents that result in damage below the Federal Railroad Administration (FRA) monetary reporting threshold and which do not involve an injury, as long as there is compliance with the other provisions of the Implementing Memorandum of Understanding (IMOU), the overall agreement between all parties involved.

Also, for the first time in any of the current or past pilot projects, employees from a foreign road will be covered by the host, i.e., New Jersey Transit T&E will be covered by Amtrak's IMOU while working in Sunnyside Yard.

Americans with Disabilities Act (ADA) Reasonable Accommodation at Amtrak

Amtrak embraces its diverse employee population and is committed to the employment and advancement of all qualified individuals with disabilities. If you meet the definition of an individual with a disability under the ADA, and a reasonable accommodation would help you in the performance of your job, you are invited to submit a completed NRPC 3107 (Americans with Disabilities Act Request for Reasonable Accommodation Form, found on the Amtrak Intranet). Once submitted along with supporting medical documentation as instructed on the form, the Amtrak ADA Panel will engage with you in an interactive process toward a reasonable accommodation. Accommodations have been made for numerous Amtrak applicants and employees, and your reasonable accommodation request is most welcome.

If you have questions about reasonable accommodation, please refer to any (or all) of the following resources:

--Amtrak Policy 7.23.0, Reasonable Accommodation for Persons with Disabilities--Amtrak Policy 5.1.1, Equal Employment/Affirmative Action

--Amtrak Policy 5.2.3, Anti-Discrimination and Anti-Harassment

--Amtrak Medical Services at MedicalServices@amtrak.com

--Amtrak ADA Panel representative Karen Broadwater at karen.broadwater@amtrak.com.

Remember, Amtrak is committed to the employment and advancement of all qualified individuals with disabilities and does not tolerate discrimination, harassment or retaliation. If you believe this policy is not being followed, please report this immediately to your supervisor, seek assistance from your department manager, or file a complaint by calling the Amtrak Helpline at 866-908-7231.

Organizational Culture Diagnostic Instrument (OCDI) Survey

At Amtrak, we continue to develop a culture focused on reducing risk that prevents accidents and injuries. As we enter into our fifth year of the Safe-2-Safer process, we will be administering the third Organizational Culture Diagnostic Instrument (OCDI) to all employees. This survey provides an opportunity for everyone to tell us how well Safe-2-Safer is being accepted and the progress we are making on changing the culture as we continue to go forward.

The OCDI survey administration will take place from October 1 – 31, and is again voluntary. It is important for all employees to participate so we can fully understand our strengths and help us plan the next steps in continuing the process of strengthening of our culture and safety climate. As in the past, all responses will be anonymous.

Every employee in Amtrak will have several ways to complete the survey. Employees will be informed as to how and where the survey will be administered at their work site.

Of importance to note: there is a Demographics section on the OCDI where you can “check the box” to indicate your department, division, function, and in some cases, location. This information is vital because it enables the analysts to tell us what the culture is like in various places around our company. Therefore, we will be using the same demographics this year as we did in the past – even though a reorganization of the Operations department takes place on October 1. We must use the same demographics this year as we did in 2009 and 2011 in order to be able to compare “apples to apples.” Please check the boxes for your departments and functions just as you did a couple of years ago. Once the data is analyzed, the formal OCDI report will be posted on the company Intranet under Safe-2-Safer.

As Safe-2-Safer continues to grow, the observations and the feedback from peers have enabled employees to change at-risk behaviors to safe ones all across our railroad.

Reminder: Employee Appreciation Day

This year Employee Appreciation Day is being celebrated from September 9 – 20. You can thank your employees and co-workers for a job well done or wish them a happy Employee Appreciation Day with an e-card. Visit <http://mtmrecognition.com/ecards/amtrak> to view the e-card selection and for instructions.

Patriot Day and National Day of Service and Remembrance

The U.S. Congress has designated September 11 as Patriot Day and a National Day of Service and Remembrance. This initiative encourages all Americans to pause at 8:46 a.m., Eastern Daylight Time (EDT) on September 11 to remember all the men and women who lost their lives during the terrorist attacks on our nation that occurred on September 11, 2001.

We will support this initiative and *where practicable*, Amtrak employees should cease their normal activities from 8:46 a.m. to 8:47 a.m. (EDT), to observe one minute of silence and reflection. This includes, but is not limited to, all ticket collection and food service activities on-board trains, and ticket sales activity at stations. All Engineers will sound their locomotive horns where safe train operation permits at 8:46 a.m. (EDT) for a duration not to exceed five (5) seconds.

Changes to Rail Travel Privilege Cards (Pass Cards)

To reduce costs and processing time, effective September 20, a new pass card will be issued to all active employee **spouses**, all **dependents** (regardless of age provided they are in the employee's pass file) and to all **retirees**. This card replaces all prior pass cards issued and contains a bar code, but no picture. Effective January 1, 2014, prior pass cards will no longer be accepted on trains or at ticket offices; please destroy those cards and securely dispose of them.

Active Amtrak employees will not receive a new pass card. Amtrak employees continue to use the current Amtrak employee ID card (with the horizontal blue stripe) as the pass card. Upon retirement, a new pass card will be sent automatically.

In addition, the new card does not display and the bar code does not contain your pass number or correlating three-digit index number. You must know those numbers to make reservations and obtain tickets. If you do not know your index number, provide your pass number to a contact center or station agent and that agent will give it to you. This information is needed for all reservations, including those made at Quik-Trak kiosks.

All pass riders 16 or over must also present current government-issued identification with a photo: driver's license, state ID card, passport or high school issued picture ID (high school students only). If using Amtrak employee ID card to obtain tickets for dependents 15 and younger, the employee or spouse must obtain those tickets and display his or her own identification.

Complete pass policy details can be found on the company Intranet under Library → Policies → Employee Pass Policy.

Conductor Willie Bates Named To Two Safety Positions

Amtrak Conductor Willie Bates of our Richmond crew base has been named by Federal Railroad Administrator Joseph Szabo to serve on the Stakeholder Review Panel for the agency's new Clear Signal for Action safety program.

A pilot program funded by the Federal Railroad Administration (FRA), Clear Signal for Action seeks to reduce accidents and injuries by changing railroad safety culture through the use of peer-to-peer coaching and feedback and by safety leadership training. Many of its key elements mirror the Amtrak Safe-2-Safer process.

Bates was also named by his union to serve as co-chairperson/coordinator of the International Association of Sheet Metal, Air, Rail and Transportation Workers (SMART) Transportation Division Safety Team. Safety team members are selected by the SMART Transportation Division international president based on their knowledge of operating rules and expertise in general railroad operations, train movements and dispatching. In addition to his new assignments, Bates continues to serve as a member of Federal Transit Administration's Transit Rail Advisory Committee for Safety, which drafts federal regulations for transit systems that previously set their own safety rules and procedures. He was named to the committee by then Transportation Secretary Ray LaHood.

Bates has more than 25 injury-free years with Amtrak and has never had a rules violation. A former chairman of the Richmond Safety Team, he has served on the Mid-Atlantic Division Safe-2-Safer Steering Committee since its inception.

In 2011, the governor of Virginia awarded Bates the Governor's Transportation Safety Award for rail transportation. In 2009, he won Amtrak's highest safety honor, the Charles Luna Memorial Safety Award.

End-of-Year Performance Conversations: Countdown for FY13 Self-Assessment Submission for Non-Agreement Employees!

There's 14 days to go until non-agreement employees complete their FY13 end-of-year self-assessment for their rating managers. Where are you in the process?

1. **Have you reviewed your mid-year form?** By now you should have reviewed the form you used for your mid-year review as a starting point to assess and update your progress. If a mid-year form was not completed, discuss your goals with your rating manager (the manager who conducts your review) before completing the FY13 self-assessment.
2. **Have you prepared your self-assessment?** Next you should prepare your self-assessment using the NRPC Form 3378 which is accessible at <http://apps.nrpc/forms/>. Please note you are only required to complete the introduction and part I on the NRPC form 3378. Completing the overall comments section (part IV) is optional.
3. **Have you submitted your signed form?** Once you have completed your form, sign it and submit it to your rating manager either in person or scanned and submitted by e-mail.

As you prepare for your FY13 end-of-year self-assessment, Human Capital is committed to providing you with all of the resources you need for your performance conversations. Please refer to our Human Capital wiki link at <http://wiki.corp.nrpc/display/HR/Home> for answers to *Frequently Asked Questions (FAQs)*, a step-by-step *End-of-Year Performance Conversations checklist* and other helpful information.

To submit any questions or feedback about performance conversations, please send an email to performanceconversations@amtrak.com.

Operation RedBlock Classes Being Offered in New York

Operation RedBlock is a proactive prevention program for dealing primarily with alcohol and drugs in the workplace. Amtrak is conducting nation-wide training to ensure uniform application of the program. A one-day training program has been specifically designed to educate employees on their rights and responsibilities and is currently being offered to New York-based Amtrak employees in Rensselaer, New York Penn Station and at Sunnyside Yard.

It is imperative that we all know exactly how this beneficial program works and how to activate those benefits for yourself or a co-worker in need. This class will tackle tough questions and provide employees with a safe venue to be heard.

Interested New York-area Amtrak employees are invited to attend this one-day training. Please e-mail Barry.Eveland@amtrak.com for class dates and enrollment information. Class size is limited and trainees will be accepted on a first come basis. Lunch will be provided. Please indicate any special needs.

Amtrak Offers Improved Online Booking Options

Beginning Sept. 15, passengers visiting Amtrak.com to book travel will notice increased booking options and an improved online booking process, allowing passengers to select one of four fare types that best fit their travel needs.

The new booking options offer four different fare selections: Saver Fare, Value Fare, Flexible Fare and Premium Service. In addition, passengers will be alerted when available seating is low for the train and fare they are searching.

The four fare options are:

- **Saver Fare:** Deeply-discounted Saver Fares are the lowest available fares. Any applicable sale fares are reflected in the displayed prices. These fares are non-refundable and not available on all trains. Passengers who modify travel plans will be eligible to receive full credit in the form of a voucher for future Amtrak travel. For complete details visit the [eVoucher page](#).
- **Value Fare:** Value Fares are refundable for full credit (minus a ten percent fee) in the form of a voucher for future Amtrak travel. For complete details visit the [eVoucher page](#).
- **Flexible Fare:** Flexible Fares are 100 percent refundable.
- **Premium Service:** Premium Services include Business class, First class and Sleeper service accommodations where applicable. Prices for these upgrades are now included in the total fare, including bookings for multiple passengers.

Once a fare option is selected, the improved booking process displays the total itinerary price, including any price adjustments such as discounts, accommodation charges, applied promotion codes or special web-only fares.

Contact Center Safety/Employee Appreciation Events Added

The Riverside Contact Center will be holding a Safety/Employee Appreciation Day event on September 17 from 10:00 a.m. – 5:00 p.m. in the employee cafeteria and in the large conference room.

The Mid-Atlantic Contact Center will be holding a Safety/Employee Day Appreciation event on September 23 in the cafeteria and the large conference room from 9:00 a.m. – 6:30 p.m.

Veteran Events at Los Angeles Union Station

On Sept. 19, employees are invited to join Amtrak and city officials at a ceremony to showcase our goal of recruiting 25 percent of new hires from the military by 2015. The ceremony will begin at 10:30 a.m. in the historic Fred Harvey Restaurant in Los Angeles Union Station. Following the ceremony, our Veterans' Locomotive will be on display until 4:00 p.m. on Track 15. Both events are open to the public.

In addition, Human Capital, in partnership with Hiring Our Heroes, will be holding a job fair. The job fair is for registered veterans seeking employment in the rail or in a rail-related industry. Corporations and applicants must be pre-registered to attend. At the job fair, attendees will also be offered assistance with resume writing.

Montrealer Dinner Menu... The exterior of this 1977 bilingual [English/French menu](#) was designed to resemble a newspaper. Feature articles cover the new RTL Turboliners, U.S.A. Rail Pass, Week-of-Wheels program and reviews of railroad-themed books. Having worked up an appetite from all that reading, passengers could choose from entrees such as veal cordon bleu and poached filet of sole with cream sauce.

IT Windows7/Office2010 "Enterprise" Migration – Final Days!!

The Amtrak IT department has almost completed the mandatory migration of all corporate desktops, laptops and other business machines from the Windows XP operating system to Windows 7 operating system and to Microsoft Office2010. In addition to ensuring compliance with Microsoft OS version support requirements, these upgrades will provide you with a better desktop experience, better security and control and various other improvements.

End-user migrations have been completed in the Chicago area, Wilmington area, most of Washington, D.C., Philadelphia and New York City, as well as our smaller and remote locations. IT will be scheduling final make-up days for some areas, and work with remote team members to schedule final upgrades at those locations.

Please remember, this labor intensive project is to be completed by September 30, and we need everybody to be responsive to attempts to get their upgrades scheduled and to make their machines available to the IBM field tech teams when they are onsite. At some sites, the available window may be as small as two days.

These are mandatory migrations. After Microsoft ends support on Windows XP, non-upgraded machines will no longer be secure, and will not be allowed on the network.

For more information on schedules, training information, and the latest newsletters visit our company Intranet → Information Technology → IT Services or
<http://wiki.corp.nrpc/pages/viewpage.action?pageId=295013754>.

If you have not been upgraded, please contact ITServiceManagement@Amtrak.com immediately.

Non-Agreement Employees: One Week Left to Submit Your FY13 Self-Assessments

All **non-agreement employees** have exactly **seven days** remaining until their completed and signed FY13 end-of-year self-assessments are due to their rating managers.

1. **Have you reviewed your mid-year form?** If a mid-year form was not completed, discuss your goals with your rating manager (the manager who conducts your review) before completing the FY13 end-of-year self-assessment.

2. **Have you prepared your self-assessment?** Next you should prepare your self-assessment using the NRPC Form 3378 which is accessible at <http://apps.nrpc/forms/>. Please note that you are only required to complete the introduction and part I on the NRPC form 3378. Completing the overall comments section (part IV) is optional.

3. **Have you submitted your signed form?** Once you have completed your form, sign it and submit it to your rating manager either in person or scanned and submitted by e-mail.

To submit any questions or feedback about the end-of-year performance conversations, please send an email to performanceconversations@amtrak.com. Please refer to our Human Capital Wiki link at <http://wiki.corp.nrpc/display/HR/Home> for answers to *Frequently Asked Questions (FAQs)*, a step-by-step *end-of-year Performance Conversations checklist* and other helpful information.

Amtrak Solidifies MARC Weekend Service Expansion with Maryland Transit Administration (MTA) Extensions

Maryland Governor Martin O'Malley recently announced a plan to start weekend MARC Penn Line service beginning December 7. MARC train service is the commuter rail service within the state of Maryland. The new service will operate on Amtrak-owned Northeast Corridor (NEC) trackage, and be operated by Amtrak train crews and mechanical employees. The governor thanked Amtrak for accommodating this service expansion, which will add nine daily round-trips between Baltimore and Washington, D.C., on Saturdays and six daily round-trips on Sundays.

The MARC service expansion was one component of the recently extended MTA-Amtrak operations and access agreements which were executed in June. The access agreement will continue to support recapitalization on the NEC via the Joint Benefits Program. MTA also chose Amtrak to continue to provide train crews and mechanical servicing for MARC Penn Line trains.

These are both examples of Amtrak's close working relationship with commuter agencies, encouraging the growth of passenger rail service on the NEC while also allowing for future Amtrak intercity growth. Amtrak's efforts in negotiating and implementing this service were jointly led by the NEC Infrastructure & Investment Development and NEC Operations business lines, with critical support from Amtrak's Legal and Finance teams.

Reminder: Changes to Rail Travel Privilege Cards (Pass Cards)

On September 20, Amtrak began issuing new pass cards to all **spouses and all dependents** (regardless of age provided they are in the employee's pass file) of active Amtrak employees, and to all **retirees**. This card replaces all prior pass cards issued and contains a bar code, but no picture. The new cards may be used as soon as they are received. The old picture pass cards may be used until December 31, 2013, after which they will no longer be accepted on trains or at ticket offices; please destroy those cards and securely dispose of them.

Active Amtrak employees will not receive a new pass card. Amtrak employees continue to use the current Amtrak employee ID card (with the horizontal blue stripe) as the pass card. Upon retirement, employees will receive a new pass card automatically.

The card issued to spouses and dependents of active Amtrak employees and retirees will not include the employee pass number or correlating three-digit index number. Those numbers need to be known to make reservations and obtain tickets. If an index number is not known, provide the pass number to a contact center or station agent and that agent will provide it. This information is needed for all reservations, including those made at Quik-Trak kiosks.

All pass riders 16 or over must also present current government-issued identification with a photo: driver's license, state ID card, passport or high school issued picture ID (high school students only). If using Amtrak employee ID card to obtain tickets, the employee or spouse must obtain tickets for dependents 15 and younger and display his/her own identification.

Complete pass policy details can be found on the company Intranet under Library → Policies → Employee Pass Policy.

Station in the Spotlight....Earlier this month, the Windsor Art Center (WAC) opened five new artists' studios and a classroom in the historic [Windsor, Conn.](#), depot, which has recently stood vacant. Dedicated to promoting visual and performing arts, the non-profit WAC created an exhibition space five years ago in a former freight house located across the tracks. Over time, it also recognized a need for dedicated working space for local artists, and the 1870 depot was a perfect fit.

Organizational Culture Diagnostic Instrument Implementation to Begin

As part of our initiative to improve safety performance, Amtrak will be implementing the Organizational Culture Diagnostic Instrument (OCDI). This tool will assist in evaluating our organizational culture and safety climate and key factors that affect employee engagement

The totally anonymous survey will take approximately 30 minutes to complete and will be active from Oct. 1 - 31. [Please click here to begin the survey.](#) It can also be found on the Intranet under Safety>Safe-2-Safer>OCDI.

If the above link does not work, copy and paste it into your web browser: <https://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?H8WQKP>.

Survey Note: For those sharing computers, only one person at a time can take the survey. You must finish the survey in order for the next person to participate. The survey link will not refresh until the survey has been checked finish.

Upgrades to WAS Passenger Information Display System

Upgrades have been added to the Passenger Information Display System (PIDS) at Washington Union Station to provide visual messaging capability. This initiative complements the public address (PA) system upgrade that was completed last year and enhances the customer experience by providing our customers with the opportunity to hear and see messages simultaneously, converting PA announcements to in-station electronic text displays. Public address announcements typically include boarding, paging and station announcements in addition to emergency messaging.

Other customer-focused enhancements include increased signage delivering passenger information visually and the replacement of existing gate LED signs with wall mounted LCD gate displays.

"The train station is often our passenger's first impression of Amtrak and this upgrade in messaging creates a more customer-friendly atmosphere," said James Hengst, program director, Passenger Experience.

The new PIDS system was brought online after-hours on the evening of Sept. 25 and final demolition of inactive displays and punch list items will be completed in the station during the remainder of this month. This initiative also supports our customer focus goal of treating all employees and customers equally and without differentiation.

Southwest Airlines New "No Show" Policy in Effect

Amtrak employees traveling on Southwest Airlines need to be aware that on Friday, Sept.13, Southwest Airlines new "no show" policy took effect. The new "no show" policy applies to nonrefundable fares that are not canceled or changed by customers prior to a flight's scheduled departure. If such fares or a portion of those fares are not used, changed or canceled at least ten minutes before departure, travelers will lose the unused portion of full fares and the remaining reservation will be canceled.

Amtrak Total Rewards Employee Road Shows to Begin for Non-Agreement Employees

Want to learn more about the upcoming benefits changes for 2014? Interested in an update on Amtrak Total Rewards and Integrated Talent Management? Join us for the upcoming employee Road Shows. During each session, we will:

- Review the progress of Amtrak Total Rewards to date;
- Update you on Amtrak's compensation philosophy and salary structure;
- Preview benefits changes and new medical options for 2014; and
- Answer your questions.

Can't Make a Meeting? Watch the Webcast

A webcast will be available in late October so you can find out more about Amtrak Total Rewards. Look for an email in the coming weeks.

More information can be found at <http://wiki.corp.nrpc/display/BEN/Home>. This week, we will be in the following locations on the following dates and times:

- Chicago: Sept.30 at 2:30 p.m.at 3rd floor lunchroom
- Chicago: Oct. 1 at 10:00 a.m. at 3rd floor lunchroom
- Chicago: Oct. 1 at 2:00 p.m. at Lumber Street Yards, Car Shop building, Room 205
- Wilmington: Oct. 2 at 10:00 a.m. at Renaissance Centre, 405 N. King Street, Baltimore and Philadelphia training room, 7th floor
- Wilmington: Oct. 2 at 1:00 p.m. at Wilmington Riverfront, 946 Justison Street, Delaware conference room
- Wilmington: Oct. 2 at 2:00 p.m. at CNOC/CTEC, 15 South Poplar Street, 1st floor
- Wilmington: Oct. 3 at 10:00 a.m. at Maintenance Facility, 4001 Vandever Avenue, 1st floor conference room
- Bear: Oct. 3 at 2:00 p.m. at Bear Administration Building, 258 E. Scotland Drive, small conference room
- Wilmington: Oct. 3 at 7:00 p.m., CNOC/CTEC, 15 South Poplar Street, Signal Room, 2nd floor

Reminder for Non-Agreement Employees: End-of-Year Performance Conversations, Self-Assessments and Training Completion!

TODAY is the deadline all **non-agreement employees** to submit their **FY13 self-assessment forms** to their rating managers.

If rating managers have completed the two mandatory web-based training courses, they can begin using *My CareerTrak* to complete their direct reports' self-assessments tomorrow, Oct. 1.

The **deadline** to complete training is **Oct. 18**. Please refer to the Human Capital wiki link at <http://wiki.corp.nrpc/display/HR/Home> for helpful resources. For any questions, please send an email to performanceconversations@amtrak.com.

Ding-Dong-Ding....In this electronic [image](#), a steward in white uniform plays a chime to call passengers to dinner. He walks down the aisle of an ex-Southern Pacific, ¾ Dome Lounge car, of which Amtrak owned five.

AMTRAK is a registered service mark of the
National Railroad Passenger Corporation.

August 8, 2013 • Page 1 of 1

Dear Co-workers,

I am pleased to announce the selection of our deputy general managers (DGM) for all regions except the Central; that selection will be made in concert with the general manager, long-distance services when that position is filled.

The Northeast Corridor deputy general managers are Fred Fournier (Boston), Steve Young (New York) and Mike Sherlock (Washington). They will be reporting to business line General Manager Mike DeCataldo.

Deputy general managers Mike Chandler (Southwest) and Tom Kirk (Southeast) will be reporting to the general manager, long-distance services.

These gentlemen will be directly responsible for the financial, operational, customer satisfaction, ridership and revenue, safety and overall business goals in their region as well as commuter services were applicable in their specific territory. The DGMs are also accountable for profit and loss of their routes by overseeing all field operations and directing business planning and decision-making.

Lou Bellotti is the new deputy general manager, California state-supported services (Oakland) and Kurt Laird was named DGM for the Pacific Northwest (Seattle). They will both report to Jay Commer, GM of the state-supported services

As with the other deputy general managers, Lou and Kurt are responsible for overall safety excellence, contract adherence and oversight of business line goal management of state-supported and commuter services. They are also accountable for profit and loss of the state-supported and contracted commuter routes by overseeing all field operations, working with state and local agencies to optimize performance and making sound business decisions.

All DGMs are responsible for demonstrating Amtrak's values and leadership philosophy while providing customers with excellent service and meeting performance targets that are driven by and aligned with the goals of the Strategic Plan. They have the experience and motivation to bring us to the next level in service delivery and financial performance.

Please join with me in welcoming Fred, Steve, Mike, Tom, Mike, Lou and Kurt to these new roles and I know you will continue to give them your full support.

Sincerely,

DJ Stadtler
Vice President of Operations

OPERATIONS

Business Line Communication

August 2, 2013 • Page 1 of 1

Dear Co-workers,

Armando Silva, the chief of operations research and planning, will join us on Monday, August 5. Mr. Silva will be based in Washington, D.C., and will be reporting directly to me.

As head of this group, Armando will be responsible for leading the operations research and planning team in the development of Amtrak's schedules, fleet plans, terminal operating plans and operations processes. His team, in collaboration with Operations managers, will analyze problems, develop and implement solutions and track performance. Working with the business lines, key responsibilities include creating more efficient operating plans that maximize the productivity of assets and minimize costs as well as streamlining and improving operations at terminals, stations, yards and facilities. Customer safety and satisfaction are key missions of this organization.

Armando has 30 years of experience in the transportation industry with a concentration in aviation. He comes to us from American Airlines where he has served as managing director, operations research and decision support, vice president, Sabre decision Technologies/Sabre Technology Solutions, Sabre, Inc., senior director/director of decision technologies in Paris and senior consultant/director decision technologies.

Prior to joining American, Armando was on the technical staff of The Mitre Corporation and spent time as a research assistant in the flight transportation laboratory at the Massachusetts Institute of Technology (MIT).

He holds a Master's of science degree in aeronautics and astronautics from MIT and a Bachelor's of science in electrical engineering from the Universidad Nacional De Ingenieria in Lima, Peru.

I consider us very fortunate to have been able to bring on board someone of Armando's caliber and I am sure that you will welcome him warmly.

Sincerely,

DJ Stadtler
Vice President of Operations

August 13, 2013 • Page 1 of 1

Dear Co-workers,

I have been spending some time with my senior leadership team and reviewing the division of responsibilities that were previously announced. It is important that we are all given a chance of success and overwhelming one position with both too many direct reports and too many critical responsibilities is not in keeping with some of the basic reasons for this Operations reorganization.

Once again, various Congressional committees are going to be focusing on our long-distance services and our food and beverage costs and delivery systems.

Our Chief of Customer Service Tom Hall is going to need to concentrate even more on these critical issues. The review and the knowledge of what is upcoming have led me to alter the job description of the chief of customer service position, a position that Tom has held since February. Tom will remain in charge of ensuring that Amtrak provides the quality of service that meets the wants, needs and expectations of our customers. He will continue to oversee food and beverage services and is still responsible for setting and maintaining standards for station service and on-board service standards in conjunction with the business line general managers for consistent delivery across the Amtrak system.

I know that you will continue to give Tom and his team your full support in what may be very challenging times.

As a result of this change, the chief of systems operation position has been created and will be posted later this week. This chief will oversee system operations functions, including the Consolidated National Operations Center (CNOC), crew management services, intermodal connectivity and administration of special trains. The chief will also direct and lead the coordination of activities during major service disruptions and will ensure continuity of service during such instances.

Other duties include the responsibility for the development and implementation of a comprehensive strategic program to maximize the yield through the effective utilization of Amtrak's fleet assets, including locomotive and fleet allocation. He/she will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with our Strategic Plan. As a result, a

clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory authorities.

Sincerely,

DJ Stadtler
Vice President of Operations

Business Line Communication

August 14, 2013 • Page 1 of 1

Dear Co-workers,

My senior leadership team and I have been reviewing the division of responsibilities within the Customer Service area that were previously announced. It is important that the goals and responsibilities of each organization be properly aligned to provide focus on critical operational activities.

Once again, various Congressional committees are increasing their focus on the profit and loss of our long-distance and food and beverage services and delivery systems

Due to these increasing pressures our Chief of Customer Service Tom Hall is going to need to concentrate and devote more time and resources to these critical issues. The upcoming work in these areas has led me to alter the job description of the chief of customer service position, a position that Tom has held since February. Tom will remain in charge of ensuring that Amtrak provides the quality of service that meets the wants, needs and expectations of our customers. He will continue to oversee and drive improvements in our food and beverage services and is still responsible for setting and maintaining standards for both station service and on-board service in conjunction with the business line general managers for consistent delivery across the Amtrak system.

I know that you will continue to give Tom and his team your full support in what may be very challenging times.

As a result of this change, the chief of systems operation position has been created and will be posted later this week. This chief, reporting to me, will oversee system operations functions, including the Consolidated National Operations Center (CNOC), crew management services and administration of special trains. The chief will also direct and lead the coordination of activities during major service disruptions and will ensure continuity of service during such instances.

Other duties include the responsibility for the effective utilization of Amtrak's fleet assets, including locomotive and fleet allocation. He/she will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with our Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory authorities.

This new structure will become effective upon the appointment of the chief of system operations.

Sincerely,

DJ Stadler
Vice President of Operations

Dear Co-workers,

My senior leadership team and I have been reviewing the division of responsibilities within the Customer Service area that were previously announced. It is important that the goals and responsibilities of each organization be properly aligned to provide focus on critical operational activities.

Once again, various Congressional committees are increasing their focus on the profit and loss of our long-distance and food and beverage services and delivery systems

Due to these increasing pressures our Chief of Customer Service Tom Hall is going to need to concentrate and devote more time and resources to these critical issues. The upcoming work in these areas has led me to alter the job description of the chief of customer service position, a position that Tom has held since February. Tom will remain in charge of ensuring that Amtrak provides the quality of service that meets the wants, needs and expectations of our customers. He will continue to oversee and drive improvements in our food and beverage services and is still responsible for setting and maintaining standards for both station service and on-board service in conjunction with the business line general managers for consistent delivery across the Amtrak system.

I know that you will continue to give Tom and his team your full support in what may be very challenging times.

As a result of this change, the chief of systems operation position has been created and will be posted later this week. This chief, reporting to me, will oversee system operations functions, including the Consolidated National Operations Center (CNOC), crew management services and administration of special trains. The chief will also direct and lead the coordination of activities during major service disruptions and will ensure continuity of service during such instances.

Other duties include the responsibility for the effective utilization of Amtrak's fleet assets, including locomotive and fleet allocation. He/she will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with our Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuing that operations meet the standards and policies set by Amtrak, federal and regulatory authorities.

This new structure will become effective upon the appointment of the chief of system operations.

Sincerely,

DJ Stadler
Vice President of Operations

Dear Co-workers,

Please join me in welcoming Jay Commer as Amtrak's new general manager of state-supported services, effective immediately. In this position Jay will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will continue to be based in Oakland, Calif. and will report directly to me.

Many of you know and have worked with Jay. He brings 27 years of Amtrak experience to this new position most recently as general superintendent, Pacific division. Prior to that role, Jay was a principal officer for state contracts with direct responsibility for the contracts, operating agreements and relationships with the Washington and Oregon state Departments of Transportation. Those established relationships will be critical for this new position and he will use this experience to bring a total business focus to all the state-supported trains and will work closely with other general managers to lead business planning and implement service improvements and productivity enhancements for state-supported routes.

Jay attended Chabot College with a major in mechanical engineering. He began with the Southern Pacific in 1976 and worked as a trainman, switchman and locomotive engineer for that road. He joined Amtrak in 1986 and has assumed positions of increasing responsibility throughout the years.

I am confident Jay exhibits the Amtrak values of respect, entrepreneurial spirit and accountability. He also brings an important perspective to this position. I know that you join me in welcoming Jay to this role and will give him your full support.

Sincerely,

DJ Stadler
Vice President of Operations

Dear Co-workers,

I am pleased to announce that Thomas J. Hall has accepted the position of chief of customer service, effective immediately and reporting directly to me. In his new role, Tom is in charge of ensuring that Amtrak provides the quality of service that meets the wants, needs and expectations of our customers. He will oversee system operations functions, including the Consolidated National Operations Center (CNOC), crew management services, intermodal connectivity, administration of special trains and food and beverage services. In addition, he is responsible for setting and maintaining station and on-board service standards. And he will work with the business line general managers to ensure that those standards are consistently met across the Amtrak system. Tom will be based in Wilmington, Del.

Tom has 33 years of Amtrak experience most recently as chief, food and beverage service. Previously, he served in a variety of customer service and operations roles including management experience in terminal services, on-board services, crew base management, station services, contract management and other duties.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with our Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory authorities.

Tom attended California State Polytechnic University in Pomona where he majored in business administration.

Please join me in welcoming Tom to this new and vital role at Amtrak.

Sincerely,

DJ Stadtler
Vice President of Operations

January 2, 2013 • Page 1 of 2

Dear Co-workers,

Please join me in welcoming Magdy El-Sibaie as our new chief safety officer and Robin McDonough as chief, business operations. Both will report directly to me.

As chief safety officer, Mr. El-Sibaie will be responsible for planning, directing and overseeing the safety activities and standards of Amtrak departments to achieve continuous improvements in employee and passenger safety, including the railroad's Safe-2-Safer behavior-based cultural safety program. In addition, he will represent Amtrak during Federal Railroad Administration (FRA) inquiries and investigations, and at the FRA Railroad Safety Advisory Committee and other similar industry venues.

Magdy has over 20 years of experience in railroad transportation engineering and the application of technology to maintain and improve rail safety and operational efficiency. He currently serves as the associate administrator for hazardous materials transportation safety in the U.S. Department of Transportation Pipelines and Hazardous Materials Safety Administration where he manages and directs programs to issue, revise and enforce federal safety regulations for hazardous material transportation by rail and other modes.

His prior work experience includes serving as FRA director, office of research and development, and senior engineer, track and vehicle/track interaction for the Association of American Railroads. He holds a Ph.D. in engineering mechanics and a Masters degree in civil engineering from the University of Delaware. He earned his Bachelor's degree in civil engineering at the University of Kuwait. Mandy will be based in Washington, D.C., effective January 7, 2013.

As chief, business operations, Ms. McDonough is responsible for collecting and analyzing operations performance metrics, ensuring planning, budgeting and administration remain integrated across the new Operations business lines being established under our Strategic Plan and supporting improvements that drive financial and operating performance.

Robin has been with Amtrak since 1981 and has held a variety of senior positions including most recently as chief, business operations and technology. In that position she was responsible for a diverse portfolio including budget management, crew management services, the Amtrak fuel management program and the planning and analysis of on-board service initiatives to increase productivity and improve customer service, among other duties.

Produced by
Employee Communications
ecom@amtrak.com

Prior to coming to Amtrak she worked at Consolidated Rail Corporation (Conrail) in a variety of field and office positions including crew dispatcher and yard clerk. She holds both a Bachelor of Science degree in business management and a Masters of Business Administration from the University of Baltimore. Robin is based in Washington, D.C., and started in her new role on December 17, 2012.

Dear Co-workers,

Please join me in welcoming Michael Logue as our new chief safety officer reporting directly to me.

As chief safety officer, Mr. Logue will be responsible for planning, directing and overseeing the safety activities and standards of Amtrak departments to achieve continuous improvements in employee and passenger safety, including the railroad's Safe-2-Safer behavior-based cultural safety program. In addition, he will provide oversight of Amtrak's compliance with safety regulations and participation in current and emerging industry safety practices.

Michael has 36 years of experience in the railroad industry with the last 30 years at the Federal Railroad Administration (FRA). He currently serves as the acting associate administrator for railroad safety and chief safety officer at FRA where he is responsible for providing regulatory oversight for rail safety in the United States and overseeing the development and enforcement of safety regulations and programs related to the rail industry. Mr. Logue simultaneously holds the position of associate administrator for administration where he is responsible for human resources, information technology, acquisitions and support services. His many achievements at FRA include being instrumental in cost savings initiatives.

Prior to joining the FRA, Michael worked for Conrail as a yard clerk, yardmaster, fireman, locomotive engineer and trackman. He holds both a Master's degree in general administration and a Bachelor's degree in science from the University of Maryland University College. He has also attended programs at Harvard University and the Federal Executive Institute.

Michael will be based in Washington, D.C., effective July 29, 2013.

Dear Co-workers,

Effective today, the State Government Contracts team will officially report into the State-Supported Services business line. Michael Franke, chief, State Government Contracts has been reporting to Joe McHugh, vice president, Government Affairs and Corporate Communications. Mike and his team will now report to Jay Commer, general manager, State-Supported Services. Given the direct tie between contracts and state services, this change of reporting line is an example of moving decision-making and business line accountability closer to our customers and state partners. There is no impact to any employees in this group as a result of this change.

We have been reporting on the progress of agreements with states as a result of the implementation of PRIIA Section 209, which takes effect today. This was a unique year in contract negotiations given the changes with this law. This team has worked diligently on these contracts and we continue to make progress on agreements with the few states remaining.

We thank Mike and his entire team for their hard work in these negotiations.

DJ Stadtler
Vice President of Operations

Dear Co-workers,

General Manager – Long-Distance Services

Please join me in welcoming Mark Murphy as Amtrak's new long-distance general manager, effective immediately. In this position Mark will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will have accountability for Amtrak's safety, customer satisfaction, ridership, on-time performance and financial results for all long-distance trains. Reporting directly to me, Mark will be based in Chicago and will be relocating there.

Mark brings decades of Amtrak experience to this position, having joined the company in 1976 and most recently serving as the deputy chief mechanical officer, Terminal Operations, in Wilmington. Mark will leverage his experience and strong business principles to bring operational, financial and operational excellence to our long-distance services.

A number of excellent candidates applied for this critical and challenging position. Mark has the leadership skills, experience and vision for this job.

Mark has held a series of consecutively responsible positions in his 37 years with Amtrak including terminal superintendent, Washington division; assistant vice president, Service Operations; superintendent, Equipment Standards and Compliance and master mechanic, Central division.

He pursued studies in business at Madison College and is a certified safety instructor for our Safe-2-Safer program. He has also completed coursework in electronics.

Route Directors

I am also pleased to announce the selection of our route directors for the long-distance business line. Our new route directors are:

- Jim Brzezinski for the *California Zephyr* and *Empire Builder*, reporting to Deputy General Manager (DGM) Moe Savoy in the Central region.
- Michael Dwyer for the *Coast Starlight* and *Southwest Chief*, reporting to DGM Mike Chandler in the Southwest region.

Produced by
Employee Communications

ecom@amtrak.com

- Eric Hosey for the *Texas Eagle* and *Sunset Limited*, reporting to DGM Mike Chandler.
- Anella Popo for the *Crescent* and *City of New Orleans*, reporting to DGM Tom Kirk in the Southeast region.
- Karen Shannon for the *Silver Service*, also reporting to DGM Tom Kirk.
- Cynthia Winslow for the East which includes the *Cardinal*, *Palmetto*, *Lake Shore Limited* and *Capitol Limited*. She will be reporting to DGM Moe Savoy.

The route director position for *Auto Train* will be reposted and I encourage all qualified candidates to apply. All those who have already applied do not need to reapply.

Jim, Mike, Eric, Anella, Karen and Cynthia are directly responsible for one or more long-distance train routes including financial, customer satisfaction, ridership and revenue, safety and overall business line goals. The route directors are fully responsible for profit and loss of their route(s) by directing business planning and decision-making.

We are all responsible for demonstrating Amtrak's values and leadership philosophy while providing customers with excellent service and meeting performance targets that are driven by and aligned with our Strategic Plan goals.

I know that you will support this dynamic team in their new roles. Please help me congratulate them in their new positions.

DJ Stadtler
Vice President of Operations

Dear Co-workers,

The NEC business line structure includes the functions of the Transportation, Mechanical and Engineering departments within a common business line. I am looking forward to building this business line with you.

As some of you may know, I am holding a series of Operations reorganization Town Halls (schedule attached) within the Northeast Corridor (NEC) to discuss the business line and address issues which you may have.

The topics will include safety, how to deliver a higher level of customer service to one another and our passengers, how to contribute to the improvement of our financial accountability, and how to work with one another in a matrix organization. I am also looking for some ideas that can help us improve in these areas.

If you are in the area, you are welcome to attend. Please look for local communications for additional follow-up on these Town Halls.

I look forward to meeting and talking with you.

Michael DeCataldo
General Manager, Northeast Corridor

Dear Co-workers,

Some of you have inquired about the process for filling the general manager, long-distance business line vacancy. This job will be reposted very soon.

As I alluded to on Monday, Amtrak is in a very tight budget situation and all departments have had to re-evaluate our proposed FY14 budgets and make some difficult decisions in order to close the gap between our corporate goal and what was collectively submitted by the departments. The Operations department recently cut \$150 million in order to achieve the targeted budget number. Carefully controlling budgets is the responsible course as we strive for financial and organizational excellence.

This budget situation results in our decision to make changes to the Operations organization with the majority of these changes in the long-distance business line. There were 88 new positions created at the outset of the reorganization. We are eliminating 18 of these. Six new positions will be consolidated for a total net loss of 24 positions. This was not the intention at the outset, but we have learned a lot during this process and these adjustments make sense.

We are consolidating the six deputy general manager positions into three which will now include the Southeast, Central and Southwest areas of responsibility.

Ten route director positions are now consolidated into seven with the *California Zephyr/Empire Builder* routes being combined under one route director, the *Cardinal/Palmetto/Pennsylvanian/Capitol Limited/Lake Shore Limited* consolidated into the route director, East position and the *Coast Starlight/Southwest Chief* routes also being combined.

Terminal services are also changing. *Auto Train*/New Orleans/Hialeah terminal services will remain under the master mechanic in Sanford reporting to the deputy general manager, Southeast. And Chicago terminal services will now report to the deputy general manager, Central.

Please note that if you have previously applied for one of these positions there is NO need to reapply.

The revised list of available positions and organization charts reflecting these changes will be posted on Monday on the Amtrak Intranet Home page>Employee Information>Operations Reorganization.

Change is difficult for all of us, but the end of this reorganization is in sight. I know that I can count on all of you to remain focused on safety, customer service and our bottom line.

Sincerely,

DJ Stadtler
Vice President of Operations

August 2, 2013 • Page 1 of 1

Dear Co-workers,

Some of you have inquired about the process for filling the general manager, long-distance business line vacancy. This job will be reposted very soon.

As I alluded to on Monday, Amtrak now faces a very tight federal funding situation and we have had to re-evaluate our proposed FY14 budgets and make some difficult decisions in order to close the gap between our corporate goal and the departmental budget requests. The Operations department recently cut \$150 million in order to achieve the targeted budget number. In an environment where federal funding is increasingly uncertain, carefully controlling budgets is the responsible course as we strive to realize our goals of financial and organizational excellence in a prudent manner.

The majority of the necessary reductions will come in the long-distance business line. There were 88 new management positions created at the outset of the reorganization. Eighteen of these will be eliminated and six positions will be consolidated making for a total net saving of 24 positions. This was not the intention at the outset, but we have learned a lot during this process and these adjustments make fiscal and operational sense.

The six planned deputy general manager positions will be reduced to three, overseeing the Southeast, Central and Southwest regions.

The ten route director positions will be reduced to seven. The *California Zephyr/Empire Builder* routes will be combined under one route director, the *Cardinal/Palmetto/Pennsylvanian/Capitol Limited/Lake Shore Limited* consolidated under a second, while the *Coast Starlight/Southwest Chief* routes are combined under a third.

Our plans for terminal services will also change. *Auto Train*/New Orleans/Hialeah terminal services will remain under the master mechanic in Sanford who will report to the deputy general manager, Southeast. Chicago terminal services will now report to the deputy general manager, Central.

Please note that if you have previously applied for one of these positions there is NO need to reapply.

The revised list of available positions and organization charts reflecting these changes will be posted on Monday on the Amtrak Intranet Home page>Employee Information>Operations Reorganization.

I know that periods of change like this one are difficult for everyone, but the end is in sight, and I expect to complete this reorganization in the fall. Once it's done, we will be able to turn our full effort to the task of improving our services and our financial return; in the meantime, I appreciate the way everyone has continued to stay focused on customer service, the bottom line and the most important element of our jobs – safety.

Sincerely,

DJ Stadtler
Vice President of Operations

August 2, 2013 • Page 1 of 1

Dear Co-workers,

Some of you have inquired about the process for filling the general manager, long-distance business line vacancy. This job was posted yesterday.

As I alluded to on Monday, Amtrak now faces a very tight federal funding situation and we have had to re-evaluate our proposed FY14 budgets and make some difficult decisions in order to close the gap between our corporate goal and the departmental budget requests. The Operations department must cut \$65.5 million in order to achieve the targeted budget number. In an environment where federal funding is increasingly uncertain, carefully controlling budgets is the responsible course as we strive to realize our goals of financial and organizational excellence in a prudent manner.

While the necessary reductions are being made across various organizations within Operations, the majority will come in the long-distance business line. This was not the intention at the outset, but we have learned a lot during this process and these adjustments make fiscal and operational sense. In addition, we will continue to review and refine the Operations organization in line with our business objectives.

One of the major changes in the long distance business line is the reduction of the six planned deputy general manager positions to three, overseeing the Southeast, Central and Southwest regions.

The ten route director positions will be reduced to seven. The *California Zephyr/Empire Builder* routes will be combined under one route director, and the *Coast Starlight/Southwest Chief* routes are combined under a second. In addition, the *Cardinal/Palmetto/Pennsylvanian/Capitol Limited/Lake Shore Limited* are consolidated under a route director, East. There will also be a new route director established for *Auto Train* reporting to the deputy general manager, Southeast.

Our plans for terminal services will also change. The mechanical functions in Lorton, Sanford, New Orleans and Hialeah will report through a master mechanic in Sanford to the deputy general manager, Southeast. Chicago terminal services will now report to the deputy general manager, Central.

The deputy general manager, Central and all the route director positions will be reposted by early next week. Please note that if you have previously applied for either one of the deputy general manager

Produced by
Employee Communications

ecom@amtrak.com

positions in Chicago that are now combined or the route director positions there is NO need to reapply. You will automatically be considered an applicant for the realigned positions. However, interested candidates must apply for the route director, *Auto Train*, as this is a new position.

The revised list of available positions and organization charts reflecting these changes will be posted by early next week on the Amtrak Intranet Home page>Employee Information>Operations Reorganization.

I know that periods of change like this one are difficult for everyone, but the end is in sight, and I expect to complete this reorganization in the fall. Once it's done, we will be able to turn our full effort to the task of improving our services and our financial return; in the meantime, I appreciate the way everyone has continued to stay focused on customer service, the bottom line and the most important element of our jobs – safety.

Sincerely,

DJ Stadtler
Vice President of Operations

Business Line Communication

August 13, 2013 • Page 1 of 1

Dear Co-workers,

I have been spending some time with my senior leadership team and reviewing the division of responsibilities that were previously announced. It is important that the goals and responsibilities of each organization be properly aligned to provide focus on critical operational activities.

Once again, various Congressional committees are going to be focusing on our long-distance services and our food and beverage costs and delivery systems.

Our Chief of Customer Service Tom Hall is going to need to concentrate even more on these critical issues. The upcoming work in these areas has led me to alter the job description of the chief of customer service position, a position that Tom has held since February. Tom will remain in charge of ensuring that Amtrak provides the quality of service that meets the wants, needs and expectations of our customers. He will continue to oversee food and beverage services and is still responsible for setting and maintaining standards for both station service and on-board service in conjunction with the business line general managers for consistent delivery across the Amtrak system.

I know that you will continue to give Tom and his team your full support in what may be very challenging times.

As a result of this change, the chief of systems operation position has been created and will be posted later this week. This chief, reporting to me, will oversee system operations functions, including the Consolidated National Operations Center (CNOC), crew management services and administration of special trains. The chief will also direct and lead the coordination of activities during major service disruptions and will ensure continuity of service during such instances.

Other duties include the responsibility for the effective utilization of Amtrak's fleet assets, including locomotive and fleet allocation. He/she will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with our Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory authorities.

[This new structure will become effective upon the appointment of the chief of system operations.](#)

Sincerely,

DJ Stadtler
Vice President of Operations

FREQUENTLY ASKED QUESTIONS

- **What is the Operations Department Reorganization?**
A realignment of the management structure to create business line accountability, dissolve departmental silos and improve customer focus. Manager reporting lines and certain management positions will be adjusted into a new structure.
- **How is this change actually happening?**
A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The vice president of Operations held Town Hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. Drawing from this process, a new management organization structure has been developed. As a result of these changes, over 80 positions will be posted throughout the Operations organization in the next three to four weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.
- **What does it mean to be impacted?**
When the scope of a position is significantly changed or phased out and superseded by a new position, then the employee is impacted. The employee will meet with someone from his/her leadership team and also a Human Capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he/she is qualified. When the reorganization is complete, and the new management structure is in place, then the positions being phased out will be eliminated.
- **What are the best ways for me to benefit from this reorganization?**
The new management structure will help to foster teamwork and customer focus at the facility and route level. New management positions with greater accountability and responsibility are closer to the field and the front line. What this means for each employee is the opportunity to help build a stronger Amtrak through greater collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.
- **If someone receives an impact letter, what is the process for finding another suitable position?**
Positions will be posted on the Employee Information Portal (EIP) career and job section throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he/she feels qualified and willing to serve.
- **What is the schedule for the reorganization roll-out?**
Beginning in June, open positions will be posted each week in batches on the EIP career and jobs section (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased to ensure that safety, security and quality of service will not be affected during the transition.

Operations Department Reorganization

Safety and security are our highest priorities.

We operate as **One Amtrak** to serve our customers.

We are **accountable** for performance.

The new organization is an **opportunity** to improve our performance and for employees to advance professionally.

From the desk of Mr. DJ Stadler

AMTRAK is a registered service mark of the National Railroad Passenger Corporation

- **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- **If I'm feeling stressed by the changes due to the Operations reorganization; what should I do?**

It is understandable that this change could be stressful. It is strongly encouraged that employees contact the Employee Assistance Program (EAP), a local Human Capital representative, or a supervisor to discuss.

- **If I have additional questions about the changes, to whom should I go?**

The reorganization team is committed to information access for employees. There is a page on the Amtrak Intranet that describes the reorganization in some greater detail. Open lines of communication are encouraged during this change. Supervisors are being equipped with information they need to stay up-to-date and answer your questions. Please talk with your manager about your questions, concerns and comments during this transition. They can then direct any issues to the appropriate channels. In addition, the Human Capital business partners are also a resource for you as they will be working closely with the Operations leadership team throughout this reorganization.

- **What are the ultimate goals of this reorganization?**

- Safety and security remains our highest priority.
- One Amtrak.
- Accountability for performance.
- Dissolving the silos between operating departments.
- Greater ability for managers to make decisions with greater autonomy in order to make adjustments faster and better serve our customers.
- Fewer organizational layers to the front line.

February 8, 2013 • Page 1 of 1

Dear Co-workers,

Dear Co-workers,

Some of you have inquired about the process for filling the general manager, long-distance business line vacancy. This job was posted yesterday.

As I alluded to on Monday, Amtrak now faces a very tight federal funding situation and we have had to re-evaluate our proposed FY14 budgets and make some difficult decisions in order to close the gap between our corporate goal and the departmental budget requests. The Operations department must cut \$65.5 million in order to achieve the targeted budget number. In an environment where federal funding is increasingly uncertain, carefully controlling budgets is the responsible course as we strive to realize our goals of financial and organizational excellence in a prudent manner.

While the necessary reductions are being made across various organizations within Operations, the majority will come in the long-distance business line. This was not the intention at the outset, but we have learned a lot during this process and these adjustments make fiscal and operational sense. In addition, we will continue to review and refine the Operations organization in line with our business objectives.

One of the major changes in the long distance business line is the reduction of the six planned deputy general manager positions to three, overseeing the Southeast, Central and Southwest regions.

The ten route director positions will be reduced to seven. The *California Zephyr/Empire Builder* routes will be combined under one route director, and the *Coast Starlight/Southwest Chief* routes are combined under a second. In addition, the *Cardinal/Palmetto/Pennsylvanian/Capitol Limited/Lake Shore Limited* are consolidated under a route director, East. There will also be a new route director established for *Auto Train* reporting to the deputy general manager, Southeast.

Our plans for terminal services will also change. The mechanical functions in Lorton, Sanford, New Orleans and Hialeah will report through a master mechanic in Sanford to the deputy general manager, Southeast. Chicago terminal services will now report to the deputy general manager, Central.

OPERATIONS

Business Line Communication

January 3, 2013 • Page 2 of 2

The deputy general manager, Central and all the route director positions will be reposted by early next week. Please note that if you have previously applied for either one of the deputy general manager positions in Chicago that are now combined or the route director positions there is NO need to reapply. You will automatically be considered an applicant for the realigned positions. However, interested candidates must apply for the route director, *Auto Train*, as this is a new position.

The revised list of available positions and organization charts reflecting these changes will be posted by early next week on the Amtrak Intranet Home page>Employee Information>Operations Reorganization.

I know that periods of change like this one are difficult for everyone, but the end is in sight, and I expect to complete this reorganization in the fall. Once it's done, we will be able to turn our full effort to the task of improving our services and our financial return; in the meantime, I appreciate the way everyone has continued to stay focused on customer service, the bottom line and the most important element of our jobs – safety.

Sincerely,

DJ Stadler
Vice President of Operations

~~This week the Chief of Operations Research and Planning position within Operations was posted on Amtrak's career page. This new senior manager function, reporting directly to me, will lead the operations research and planning team in the development of Amtrak's schedules, fleet plans, terminal operating plans and operations processes. This team, in collaboration with Operations managers, will analyze problems, develop and implement solutions, and track performance. Key tasks include creating more efficient operating plans that maximize the productivity of assets and minimize costs as well as streamlining and improving operations at terminals, stations, yards, and facilities. Customer safety and satisfaction are key missions of the organization.~~

~~The ideal candidate for the Chief of Operations Research and Planning is a leader with a professional understanding of operations research who will be a role model for our values of commitment to safety, integrity, desire to~~

~~improve, accountability, respect, humility, entrepreneurial spirit, spirit of service and forgiveness. Technical skills needed to be successful include expertise in statistical analysis, linear and non-linear optimization studies, simulations, modeling, analytical methods and railroad operations planning and research.~~

I welcome all qualified candidates to apply. We will also be looking externally to make sure that we get the best possible leader for this critical position.

More personnel updates should be coming in the next few weeks.

Thank you for your support as we continue moving forward.

DJ Stadtler
Vice President of Operations

July 29, 2013 • Page 1 of 1

Dear Co-workers,

I wanted to let you know that Doug Varn has retired from Amtrak after 34 years of service. The position of general manager, long- distance services, is now vacant and we will begin recruiting for a replacement shortly. No one will act in his place, though Chris Jagodzinski will continue to oversee operations there, as he has been.

Additionally, the tight budget situation and the experience we are gaining as we complete the reorganization leads us to make some changes to the new business line organization charts which include deferring a few positions until FY14 and consolidating a few others. The revised charts will be posted on the Operations Reorganization Intranet site later this week and I will let you know when this posting is completed. These changes **DO NOT** put at risk having the new organization in place by October 1.

Later this week we will begin to announce some of the new deputy general managers within the business lines. The route director interviews are moving forward.

Thanks for your patience and support as we move through this process. The end of the fiscal year will be here soon and I am confident we will all continue to work together to have the new structure in place.

DJ Stadtler
Vice President of Operations

June 13, 2013 • Page 1 of 1 ROUTE DIRECTOR POSTING

Dear Co-workers,

Do you want to own a train? Are you ready to bet your job on your ability to improve its service level and its finances? If you are, then keep reading. If you're not, the route director position is not for you.

The first thing it is important to understand is that it's really not so much about your personal ability to change things as it is about your willingness to help the other people working on your train change things. You have to be able to recognize good ideas, wherever they come from, champion those good ideas and let someone else take credit for them. You're going to be measured on how the train does, not how many good ideas you take credit for. The only way real improvement is possible is if every single person working on a train owns it too. Your job is about leadership and using all of your energies to help your people be successful. If this is who you are, keep reading. If this is too much for you, then thanks for taking the time to read this far, but this job may not be for you.

If you're still with me, you're part of a small group I'd like to talk to.

We are at a critical point in our history and how we manage the long-distance trains in the next couple of years could well determine their survival. As the country begins to make some very hard decisions about where its tax dollars are spent, there will be painful trade-offs and some very popular programs may lose out. Our long-distance network has to be performing at a level of financial responsibility and offering services that are a relevant segment of the national transportation network in order to earn the country's continuing support. That's the big picture, that's our job.

If you share this vision, if you have the energy and commitment, if you're willing to put it all out there, then I'd like to talk to you. Please apply through the Intranet Employee Information Portal > Career and Jobs and please include a short statement (200 words) telling us why you should be considered. The long-distance business route director position description is available on the Amtrak Intranet > Employee Information > Operations Reorganization > Position Descriptions for June 12 postings.

Sincerely,

Doug Varn
General Manager
Long-Distance Service

May 28, 2013 • Page 1 of 2

Dear Co-workers,

The comprehensive reorganization of the Operations department has taken longer than expected. As I have said in prior communications, creating a structure that brings front-line, mechanical, engineering and transportation activities in line with our Strategic Plan to run Amtrak like a business, focused on higher levels of customer satisfaction, safety and financial accountability takes time and we wanted to do it thoughtfully and with input from employees across the system. I wanted to get this organization right and I believe that we achieved the goals that we set out to accomplish.

This new organizational structure was developed by senior Operations leadership based on employee comments from the Town Halls, employee comments I received during my travels and the work of the Operations Reorganization Transition Team. We also sought feedback from long-serving employees about what worked in prior reorganizations and what did not work.

At its core, the Operations reorganization is a realignment of the management structure to create business line accountability, dissolve departmental silos and move decision-making and accountability closer to our customers. Manager reporting lines and certain management positions will be adjusted into a new structure.

Over 80 positions will be posted through the Employee Information Portal in the next four to six weeks. Fewer than 60 current positions will be impacted in order to accomplish a more streamlined organization and appropriately align positions across the entire Operations organization. You will receive more information about that in coming days.

The vast majority of the more than 17,000 Operations employees will see no changes in daily tasks and responsibilities. Promotions and movements to positions with new responsibilities will require going through the application process and interviews. That is standard operating procedure throughout the company.

There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization. And while we will be looking both internally and externally for business leaders, I firmly believe that this will help some star employees rise through the ranks.

The Operations department is not broken. We remain a national unified department managed as a coordinated unit, but with greater empowerment and accountability for the performance of the routes. We are transitioning to business lines for the national network of long-distance trains, state-supported trains operated under contract with state business partners and Northeast Corridor (NEC) trains. Business lines do not change the way we operate trains.

General managers are accountable for the performance of the business lines. Each general manager oversees a portion of the oval national route structure, and each general manager has some responsibility to each business line. They will hold their managers and employees accountable for performance. And they will be counting on all of us to do our part.

Engineering, the Consolidated National Operations Center, the Mechanical department, Customer Service Business Operations and Operations Research and Planning are the core Operations support organizations that will work on behalf of

Produced by
Employee Communications

ecom@amtrak.com

Business Line Communication

May 28, 2013 • Page 2 of 2

and be accountable to the business lines they serve. The Northeast Corridor Infrastructure and Investment Development business line will work with Engineering and other stakeholders to oversee development and management of Amtrak's NEC infrastructure.

There are changes to terminal operations as well. A terminal is a complex of facilities that originate, terminate and perform major servicing of trains. Within each terminal, many different roles are performed including mechanical servicing and inspection, switching, management of crew bases, commissaries and customer service.

Previously, each terminal organization was managed separately reporting through the Transportation, Mechanical and Engineering departments. Employees stressed the need for all the departments to work together to deliver superior service. This is one of the primary reasons we are placing major terminals under a single manager – to ensure collaboration and accountability. The business lines will hold the terminal manager accountable for performance. And the terminal manager will work to ensure that employees are working as a team to prevent and solve problems, for maximum safety, efficiency, productivity and customer service in the terminal.

Mechanical services for each terminal currently reports through a regional master mechanic. Amtrak is going to transition to a new organization in which mechanical services at each terminal will report into the terminal manager who is accountable for all service components within the terminal.

The terminal manager and the terminal mechanical team are directly accountable to the business lines for mechanical performance and reliability. There will be more collaboration across functions locally within the terminal in order to facilitate teamwork and greater accountability and responsibility closer to the front line and route level. The Mechanical department will still be responsible and accountable for managing the fleet (pending changes in terminal ops key points), defining work standards, processes, initiatives, process improvements, and financial management.

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

As these changes unfold we will continue to provide you regular updates about this transition as well as how we plan to evolve the way service is delivered to our customers.

Thank you for your support as we progress through this transition.

Sincerely,

DJ Stadtler
Vice President of Operations

Dear Co-workers,

I am pleased to announce the selection of Scot Naparstek to fill the newly-created role of assistant vice president, Operations (AVPO) reporting directly to me. Scot will become a member of the Amtrak Operations leadership team effective December 3.

The AVPO supplements the responsibilities of the Vice President, Operations (VPO) and has complimentary responsibility and authority to ensure that the objectives and goals of the Operations leadership team are met or exceeded. The AVPO also has delegation of authority for the VPO during any absence. Scot will collaborate with business leadership and provide guidance and direction as necessary in creating and executing business and strategic plans focusing on key elements that align with the Amtrak Strategic Plan. Specific areas of focus include increasing revenues, decreasing costs, increasing productivity, managing risk and reducing at risk behaviors

Mr. Naparstek has extensive experience developing strategic goals, building consensus and teamwork and leading execution strategies for desired results. He is a proven business partner, leader, change agent and problem solver with demonstrated ability to set and execute high-level strategic business plans and improvement initiatives.

Scot began his career at Amtrak in 2012 as the director, corporate human capital business partners, employee relations and labor relations. As a member of the Human Capital management team he provided strategic direction and support in leading the transformation of Amtrak to "run like a business" in a "one Amtrak way". Scot is also a member of the Safe-2-Safer Executive Steering Committee and the headquarters management sponsor for Safe-2-Safer.

From 2006 to 2012, he was human resources director for several business units at Titan America, LLC where he spearheaded programs to drive cultural change initiatives, re-engineered processes and restructured the business units to operate profitably. Key activities included labor and employee relations, staffing, succession planning, employee development, compensation, policy administration, legal compliance and management guidance to other staff leaders. From 2002 to 2005 Scot was plant manager responsible for operations at the \$125 million High-Voltage Dead Tank Circuit Breaker Manufacturing facility with profit and loss responsibility for complimentary service business. He also developed and executed strategic operational direction that provided outstanding operational results for cycle time, quality, profit margins and customer satisfaction. In addition, Mr. Naparstek has held plant manager and human resources director roles at other manufacturing companies.

Scot holds a Master of Business Administration from Saint Bonaventure University and a Bachelor of Science degree in mechanical engineering from Columbia University.

Kathy Brewer will assume the position of *Auto Train* route director effective immediately and will report to Deputy General Manager Tom Kirk in the Southeast region. In her new role, Kathy will be directly responsible for the financial, customer satisfaction, ridership and revenue, safety and overall business line goals for the *Auto Train*. In addition, she will be fully responsible for profit and loss of her route by directing business planning and decision-making.

Please join with me in warmly welcoming Scot and Kathy to these new roles and I know you will continue to give them your full support.

Sincerely,

DJ Stadtler
Vice President of Operations

Business Line Communication

October 1, 2013 • Page 1 of 2

Dear Co-workers,

As we begin fiscal year 2014, the new Operations organizational structure has been officially instituted. There has been a great deal of work to get us to this point. Moving forward, it will take the effort of all of us to bring this new organizational structure to life. Moving into the future, the driving factors of the Operations reorganization need to be kept in mind. They are:

- To create business line accountability.
- To dissolve departmental silos.
- To move decision-making and accountability closer to our customers.

We all need to adjust how we think about and manage the business at every level. There are three fundamental business principles driving this change.

A MATRIX ORGANIZATION

What is a matrix organization, and how will it work in the new Amtrak structure?

Previously, Amtrak has been structured in siloed business groups organized by function, geography and tasks. In contrast, our vision is to manage our business using cross-functional teams.

We are 'One Amtrak.' All the specialized areas in Operations work together as one team to deliver Amtrak's Strategic Plan, committed to Safety and Security, Customer Focus and Financial Excellence.

What are the advantages of a matrix organization?

- Organizational silos are dissolved to increase cooperation, and improve information flow.
- By sharing talent and expertise, communication across all organizations is improved, and decisions can be made by employees closer to the situation.
- Changes in markets and priorities are responded to more flexibly and quickly.
- Employees are exposed to new career opportunities because they have more interaction with various parts of the business.

The intent is to drive stronger communication, collaboration and a unified purpose across business disciplines to positively impact our customers' satisfaction and loyalty to Amtrak.

PROFIT & LOSS (P&L)

What does it mean to manage to Profit and Loss?

In the past, when it came to financial management, Operations tended to focus mostly on expenses. As a result of the reorganization, our focus has expanded to include revenue in order to create a full P&L outlook. This means we need to start thinking differently about how we manage our business by ensuring that we make the best use of scarce resources to improve the bottom line while exceeding our customers' expectations.

Managing under a full P&L is new to many here at Amtrak. We are committed to educating leaders and employees in FY14. Job aids will be created that describe available business reports. Training is available to learn how to use the Amtrak Performance Tracking (APT) system so that the business lines can understand the allocation of costs and revenues.

Produced by
Employee Communications
ecom@amtrak.com

ACCOUNTABILITY:

Why is there such a re-emphasis on accountability?

The over-arching success of Amtrak will be driven by accountability of individuals and teams. Teams are most successful when each individual is accountable for his or her actions and contribution to the progress of the team.

Beginning in FY14, non-agreement employees will have incentive targets based on their individual goals. Managers and individual team members should be having performance conversations about their individual goals and how they fit into the overall Amtrak strategy.

A key part of team accountability is to understand how the team contributes to meeting the company-wide goals. Each business line will use the appropriate metrics for its services. If each business line's goals are set and measured correctly, then by achieving them Amtrak will achieve its overall company-wide goals.

Going forward, each business line will create a plan with clear objectives, responsibilities and performance metrics. We will keep each other informed on a regular basis about our progress and work together to overcome any obstacles to success.

I encourage you to think about your *individual* role in the success of our new matrix organization, and how *you* can help your team, business line, and our company to achieve our goals.

As we begin working within the new Operations structure, everyone needs to continue to focus on their responsibilities as we transition. Here are two things I'm asking of you as we move forward:

1. Nobody said change/transition was easy. Please do your best to have a positive attitude, and bring it to your work and your team. Make collaboration a normal part of your daily routine.
2. Managers, talk to your employees. Employees, talk to your managers. Get clear on your individual goals, team goals and Amtrak strategy and determine how to measure success.

Business line kick-off meetings will be held later this month; a schedule of which will be released shortly.

Thank you for your support, patience and encouragement. I look forward to our collective success as we move into a new Amtrak chapter.

DJ Stadtler
Vice President of Operations

September 20, 2013 • Page 1 of 2

Dear Co-workers,

I am pleased to announce the selection of our chief of systems operations and the deputy general manager (DGM) for the Central region in the long- distance business line.

Chief of Systems Operations Tom Connolly, reporting to me, has the responsibility and oversight for directing the Consolidated National Operations Center (CNOC) and crew management services in the coordination, support and communication of nationwide passenger, commuter rail and freight railroad operations. The chief leads the coordination of activities during major service disruptions and ensures continuity of service during such instances.

This position is also responsible for effectively managing the day-to-day utilization of Amtrak's fleet assets, including locomotive and fleet allocation. The chief of system operations will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

Tom will also oversee the system-wide operation of all charters, private car and special moves (special trains) including development of policies and procedures, coordination with field operations and host railroads and accurate costing. A clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory agencies.

Mr. Connolly has 37 years of railroad experience and his recent Amtrak positions include superintendent of the Empire District, superintendent of PCS in San Jose and General Superintendent of the Central division. He completed the Cabrini College course for organizational management.

The deputy chief of systems operation position will be reposted next week and I encourage all qualified candidates to apply.

Morrell (Moe) Savoy will be assuming the duties of the DGM for the Central region, reporting to the general manager long- distance. Similar to the other DGMs already in place, Moe will be directly responsible for the financial, operational, customer satisfaction, ridership and revenue, safety and overall business goals in his area of responsibility. This includes accountability for profit and loss of the *California Zephyr*, *Empire Builder* and several eastern routes by overseeing all field operations and directing business planning and decision-making.

Produced by
Employee Communications

ecom@amtrak.com

All DGMs are responsible for demonstrating Amtrak's values and leadership philosophy while providing customers with excellent service and meeting performance targets that are driven by and aligned with the goals of the Strategic Plan.

Moe brings 20 years of Amtrak experience to this position. Most recently he was the superintendent, road operations for the Central division and the acting deputy master mechanic for the Central division. He holds a Bachelor's of science degree in economics from West Point.

I know that you will support Tom and Moe in their new positions.

DJ Stadtler
Vice President of Operations

Business Line Communication

September 20, 2013 • Page 1 of 1

Dear Co-workers,

I am pleased to announce the selection of our chief of systems operations and the deputy general manager (DGM) for the Central region.

Chief of Systems Operations Tom Connolly, reporting to me, has the responsibility and oversight for directing the Consolidated National Operations Center (CNOC) and crew management services in the coordination, support and communication of nationwide passenger, commuter rail and freight railroad operations. The chief leads the coordination of activities during major service disruptions and ensures continuity of service during such instances.

This position is also responsible for developing a strategic program that will effectively utilize Amtrak's fleet assets, including locomotive and fleet allocation. The chief of system operations will also be the focal point to coordinate efforts of the business lines and the Mechanical and Engineering departments to properly balance project resources, resolve issues and enhance productivity.

Tom will also oversee the system-wide operation of all charters, private car and special moves (special trains) including development of policies and procedures, coordination with field operations and host railroads and accurate costing. A clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory agencies.

Mr. Connolly has 37 years of railroad experience and his recent Amtrak positions include superintendent of the Empire District, superintendent of PCS in San Jose and General Superintendent of the Central division. He holds a degree in organizational management from Cabrini College.

The deputy chief of systems operation position will be reposted next week and I encourage all qualified candidates to apply.

Morrell (Moe) Savoy will be assuming the duties of the DGM for the Central region, reporting to the general manager for that region. Similar to the other DGMs already in place, Moe will be responsible for overall safety excellence, contract adherence and oversight of business line goal management of state-supported and commuter services and will be accountable for profit and loss of the states-supported and contracted commuter routes by overseeing all field operations, working with state and local agencies to optimize performance and making sound business decisions.

All DGMs are responsible for demonstrating Amtrak's values and leadership philosophy while providing customers with excellent service and meeting performance targets that are driven by and aligned with the goals of the Strategic Plan.

Moe brings 20 years of Amtrak experience to this position. Most recently he was the superintendent, road operations for the Central division and the acting deputy master mechanic for the Central division. He holds a Bachelor's of science degree in economics from West Point.

I know that you will support these Tom and Moe in their new positions.

DJ Stadtler
Vice President of Operations

FREQUENTLY ASKED QUESTIONS

- **What is the Operations Department Reorganization?**
A realignment of the management structure to create business line accountability, dissolve departmental silos and improve customer focus. Manager reporting lines and certain management positions will be adjusted into a new structure.
- **How is this change actually happening?**
A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The vice president of Operations held Town Hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. Drawing from this process, a new management organization structure has been developed. As a result of these changes, over 80 positions will be posted throughout the Operations organization in the next three to four weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.
- **What does it mean to be impacted?**
When the scope of a position is significantly changed or phased out and superseded by a new position, then the employee is impacted. The employee will meet with someone from his/her leadership team and also a Human Capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he/she is qualified. When the reorganization is complete, and the new management structure is in place, then the positions being phased out will be eliminated.
- **What are the best ways for me to benefit from this reorganization?**
The new management structure will help to foster teamwork and customer focus at the facility and route level. New management positions with greater accountability and responsibility are closer to the field and the front line. What this means for each employee is the opportunity to help build a stronger Amtrak through greater collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.
- **If someone receives an impact letter, what is the process for finding another suitable position?**
Positions will be posted on the Employee Information Portal (EIP) career and job section throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he/she feels qualified and willing to serve.
- **What is the schedule for the reorganization roll-out?**
Beginning in June, open positions will be posted each week in batches on the EIP career and jobs section (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased to ensure that safety, security and quality of service will not be affected during the transition.

Operations Department Reorganization

Safety and security are our highest priorities.

We operate as **One Amtrak** to serve our customers.

We are **accountable** for performance.

The new organization is an **opportunity** to improve our performance and for employees to advance professionally.

From the desk of Mr. DJ Stadtler

AMTRAK is a registered service mark of the National Railroad Passenger Corporation.

- **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- **If I'm feeling stressed by the changes due to the Operations reorganization; what should I do?**

It is understandable that this change could be stressful. It is strongly encouraged that employees contact the Employee Assistance Program (EAP), a local Human Capital representative, or a supervisor to discuss.

- **If I have additional questions about the changes, to whom should I go?**

The reorganization team is committed to information access for employees. There is a page on the Amtrak Intranet that describes the reorganization in some greater detail. Open lines of communication are encouraged during this change. Supervisors are being equipped with information they need to stay up-to-date and answer your questions. Please talk with your manager about your questions, concerns and comments during this transition. They can then direct any issues to the appropriate channels. In addition, the Human Capital business partners are also a resource for you as they will be working closely with the Operations leadership team throughout this reorganization.

- **What are the ultimate goals of this reorganization?**

- Safety and security remains our highest priority.
- One Amtrak.
- Accountability for performance.
- Dissolving the silos between operating departments.
- Greater ability for managers to make decisions with greater autonomy in order to make adjustments faster and better serve our customers.
- Fewer organizational layers to the front line.

Dear Co-workers,

Thanks to the input of more than 100 front-line employees and managers, we are moving forward with a comprehensive reorganization that I believe will make the company more financially competitive and operationally efficient. You asked many important questions throughout my travels. I'd like to address two of those directly here. First, of the more than 17,000 Operations employees, the vast majority of you will see no changes to your daily tasks and responsibilities. Also, no one will have to reapply for their current positions. Promotions and movements to positions with new responsibilities will require new interviews, and that is standard operating procedure throughout the company.

of a transition toward a new, more accountable Amtrak focused on its business lines. The general managers will be working with the Transportation, Mechanical, and Engineering forces to improve operations and hold managers and employees accountable for performance. The general managers are business executive roles who will be accountable for achieving improved results. They will be counting on all of us to do our part.

We're now four months into the company-wide reorganization that brings front-line, mechanical, engineering and transportation activities in line with our Strategic Plan to run Amtrak like a business, focused on higher levels of customer satisfaction, safety and financial accountability.

It is important to remember that this reorganization does not mean employees must reapply for their current positions.

Instead we are creating positions within senior management that will be fully responsible for delivering a safe, on-time, enjoyable experience to our customers. In my search for the right individuals for these roles, I'm taking my time with the goal of getting this reorganization right.

This reorganization seems to be taking a while." That is because at the heart of this reorganization is the idea that the resulting improvements and management structure will transcend not just me but all of Amtrak's management and the nation's political changes as well. We're creating a structure that focuses us on our bottom line and providing great customer service. Doing that correctly takes time, and I want to get it right.

That's why we'll be looking both inside and outside the company for business leaders. This is the first of many changes that this reorganization will bring to Amtrak. While change can be daunting, I'm confident these changes are achievable and will be effective because of the input we have received from employees like you. I believe these improvements will help star employees rise through the ranks and allow our customers to enjoy America's Railroad even more than they do today.

As these changes unfold we will continue to provide you regular updates about this transition as well as how we plan to evolve the way service is delivered to our customers. Thank you for your support as we progress through this transition.

- **What is the Operations Reorganization?**

A realignment of the management structure to create business line accountability, dissolve departmental silos, and move decision making and accountability closer to the customer. Manager reporting lines and certain management positions will be adjusted into a new structure.

A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The Vice President of Operations held town hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. Drawing from this process, a new management organization structure has been developed. As a result of these changes, over 80 positions will be posted throughout the Operations organization in the next 4-6 weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.

- What is the business case for the reorg
- Question states, "why should employees want to participate" but in this case there is no choice
- What is the impact on the Ops employees?
- How will this change actually happen?
- What are the details?

When the scope of a position is significantly changed or phased out and superseded by a new position, then the employee is impacted. The employee will meet with someone from their leadership team and also a human capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he or she is qualified. When the reorganization is complete, and the new management structure is in place, then the positions being phased out will be eliminated.

■ **What are the best ways for me to benefit from this reorganization?**

The new management structure will help to foster teamwork and customer focus at the facility and route level. New management positions with greater accountability and responsibility are closer to the field and the front line. What this means for each employee is the opportunity to help build a stronger Amtrak through greater collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.

■ **If someone receives an impact letter, what is the process for finding another suitable position?**

Positions will be posted on the Amtrak career website throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he or she feels qualified and willing to serve.

■ **How many people are being impacted?**

It is expected that fewer than 60 current employees across the entire Operations organization have positions that will be directly impacted in this reorganization.

■ **What is the schedule for the reorganization roll-out?**

Beginning in June, open positions will be posted each week in batches on the career portal (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased to ensure that Operation safety, security, and quality will not be affected during the transition.

Comment [01]: See if this makes sense/is correct

■ **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- Each train is part of a business line for performance reporting. The business lines are accountable for overall results.
 - This reorganization is NOT a reestablishment of strategic business units.
-

- Operations remains a national, unified department with greater integration of management within facilities.
- Business lines do not change the way we operate train service.
- We are accountable for the performance of each train we operate.
- Over 80 positions will be available for interested applicants.
- All employees have the opportunity to apply for any position(s) for which they feel they are qualified.

Operations is not broken.

Explaining the Reorganization

OPERATIONS

Business Line Communication

June 11, 2012 • Page 4 of 1

- We are not reinventing the wheel. We are transitioning to business lines in order to “Operate like a business,” to better serve our customers and increase our overall performance.
- This is an opportunity to become a stronger business – reducing cost, improving safety, and structuring the organization to provide improved service to customers.
- The goal is to establish business lines by the end of the fiscal year. DJ Stadler has traveled the country to meet with local Amtrak employees to gain their perspectives.
- The opinions, feedback, and suggestions from employees have been taken into consideration when designing the reorganization. This process has not been taken lightly.
- The reorganization asked long-serving employees to share their knowledge; what worked in the past, and what did not work.
- Employees shared the best and worst parts of previous Amtrak organizations and reorganizations, in order to generate this new structure.
- The reorganization is not driven to reduce headcount. The goal is to improve performance, including financial performance. Most management positions are not changing, and employees do not need to reapply for a job that is not changing.
- Even though we report our results by business line, previously there was no management structure within Amtrak that was directly related to business line performance — there was no accountability within the company for each business line.
- Therefore, the new structure is focused on creating management positions with greater accountability for the business line performance., , General managers are accountable for business line performance. There will be a route director for each long- distance train accountable for the individual performance of his or her rout The business lines also hold each other accountable for performance, and they hold the supporting components of Operations and Amtrak, such as terminals, backshops, and other support services accountable for the roles they perform on behalf of the business.

Significant time and resources are being dedicated to this reorganization in order to get it right.

special employee advisory

April 26, 2012 • Page 5 of 7

- This is very different from the old Strategic Business Units (SBUs). The SBUs were mini-companies that operated trains within a particular region of the country. The theory was that this would produce better accountability, customer focus, and management decisions, but in practice it resulted in rising costs, internal competition for resources, and fragmentation of the company. We are not going to split up Amtrak again. Operations will still be managed as a coordinated unit, but there will be greater empowerment and accountability for the performance of the routes.
- A terminal is a complex of facilities that originate, terminate, and perform major servicing of trains. Examples include Boston, New York, Albany, Philadelphia, Washington, Miami, New Orleans, Chicago, Los Angeles, Oakland, and Seattle.
- Within each terminal, many different roles are performed including mechanical servicing and inspection, switching, crew bases, commissaries, and customer service, among others.
- Previously, each terminal organization was managed separately, reporting through the Transportation, Mechanical, and Engineering departments.
- New management positions are being created to lead operations within each terminal. These positions are fully accountable for all the service components within the terminal. The business lines will hold the terminal manager accountable for performance. The terminal manager will work to ensure that employees are working as a team to prevent and solve problems, for maximum safety, efficiency, productivity, and customer service in the terminal.
- Previously, mechanical services for each terminal reported to the Mechanical department through a regional master mechanic. Amtrak is going to transition to a new organization in which mechanical services at each terminal will report into the terminal manager.
- The Mechanical department will still be responsible and accountable for managing the fleet, defining work standards, processes, initiatives, programs, process improvement, financial management, and accountabilities.

How will terminal organizations with integrated be managed?

Comment [A2]: Accountable for accountabiities?

special employee advisory

April 26, 2012 • Page 6 of 7

- The terminal manager and the terminal mechanical team are directly accountable to the Mechanical department for the work to be performed, that the engineering processes and specifications are adhered to, and to meet Amtrak's standards. The terminal team is also accountable to the business lines for mechanical performance and reliability. Delays, breakdowns, and other operating statistics are tracked for accountability.

The reason that the terminal workforce will report to the terminal manager instead of a master mechanic is to have more collaboration across functions locally within the terminal, in order to facilitate teamwork and better

FREQUENTLY ASKED QUESTIONS

- **What is the Operations Reorganization?**
A realignment of the management structure to create business line accountability, dissolve departmental silos, and improve customer focus. Manager reporting lines and certain management positions will be adjusted into a new structure.
- **How were the changes developed?**
A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The Vice President of Operations held town hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. One of the key themes from Amtrak employees across the country was "One Amtrak." Everyone needs to be working for the same goal — to please every customer — not working just on behalf of their own terminal or their own train. Employees stressed the need for all the departments to work together to deliver superior service. This is one of the primary reasons we are placing major terminals under a single manager — to ensure collaboration and accountability.
- **How is this change actually happening?**
A new organization structure was developed by senior Operations leadership based on employee comments and the work of the Transition Team. Over 80 positions will be posted throughout the Operations organization in the coming weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.
- **What does it mean to be impacted?**
When the scope of a position is significantly changed or phased out, then the employee is impacted. The employee will meet with someone from their leadership team and also a human capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he or she is qualified. collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.

- **If someone receives an impact letter, what is the process for finding another suitable position?**

Positions will be posted on the Amtrak career website throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he or she feels qualified and willing to serve.

- **What is the schedule for the reorganization roll-out?**

Beginning in June, the initial group of open positions will be posted each week in batches on the career portal (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased in, with a focus on safety and superior service in daily operations.

- **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- **If I'm feeling stressed by the changes due to the operations reorganization, what should I do?**

It is understandable that this change could be stressful. It is strongly encouraged that employees contact the Employee Assistance Program (EAP), a local Human Capital representative, or a supervisor to discuss.

- **If I have additional questions about the changes, to whom should I go?**

The reorganization team is committed to information access for employees. We are working on a dedicated will hold information, messages, FAQs, and links related to this reorganization. More information will be forthcoming when the site is opened in the next few weeks.

Open lines of communication are encouraged during this change. Please talk with your manager about your questions, concerns, and comments during this transition. They can then direct any issues to the appropriate channels. In addition, the Human Capital Business Partners are also a resource for you as they will be working closely with the Operations leadership team throughout the reorganization.

- **What are the ultimate goals of this reorganization?**

- Safety and Security is our highest priority.
- One Amtrak.
- Accountability for performance.
- Customer focus.
- Dissolving the "silos" between operating departments.
- Fewer organizational layers to the front line.

Employee Appreciation

We received this heartwarming email last week and we were asked to share it with you.

*"Unless you have experienced it, and I know many of you did when Katrina hit New Orleans, you cannot fathom the devastation and utter hopelessness you feel seeing your house and your belongings washed away. For many days after Hurricane Sandy hit the New York/New Jersey area, most of us walked around in a daze, trying to understand the loss and not knowing what to do. The support and donations given by our fellow Amtrak employees was amazing, words cannot express the gratitude and appreciation that was felt by those hit hard by the hurricane. We know we speak for everyone when we say **thank you from the bottom of our hearts!** You helped make a traumatic situation that much better with your love and support. **THANK YOU!!!***

Amtrak employees, Penn Station NY - Debbi Hoeler, Felix Martinez, Ellen Rizzo, Tom McClinchy, Dan Borisuck, Jessica Guastella, Naomi Miller and the many others who fell victim to Sandy's rage.

We would like to continue easing the pain that this hurricane produced.

Amtrak Employee's Relief Fund

A month ago our company established the Amtrak Employee's Relief Fund, a peer-to-peer fund, allowing you to make donations via payroll deductions to help our colleagues impacted by Hurricane Sandy. We have collected close to \$11,000 to date in payroll pledges. Donations may be made by completing *NRPC 3238 Amtrak Relief Fund Payroll Deduction* (attached) or sending a check to our lockbox.

Relief Fund Application

The Amtrak Employees' Relief Fund application form (*NRPC 3382 A*) for those employees affected by Hurricane Sandy, is now available on the Intranet and is attached. Please note that applications are due by January 18.

We know that you have numerous questions regarding how the funds will be disbursed, how this fund is administered and deadline and contact information. Explanations are attached in the FAQ document.

Thanks for all of your generosity and concern.

A Message from Joe Boardman

Dear Co-workers,

We are a “can do” company. So many of you work so hard to deliver great customer service and world class safety. Your work is helping to increase ridership and improve our financial position.

We are a private company that receives payments from, and has important relationships with, nearly 50 sovereign governments. The largest is the United States government, but we also receive very large payments from California, Illinois, Michigan, New York, Virginia, North Carolina, Washington, Oregon and 38 other states for which we provide some level of service.

Our bosses – our customers, the states who hire us to provide service, the Congress, the administration, our board of directors and ultimately the taxpayers - expect us to run the corporation as much like a business as we can. We’ve made progress in that direction, but more needs to be done.

Here’s the problem. Our expenses are too high and our revenue is too low. We have great opportunities to become better as a place to work, better in the service we deliver and better in our control of our own future. However, we continue to struggle with overhead costs, overtime costs and lack of efficiencies.

Our average hourly wage for agreement employees is \$28.86. That’s a just wage, a living wage, and whenever possible, an annual wage. I’m proud that we are able to offer wages that attract well qualified employees, often multiple generations from the same family looking for a career with our company.

Last year we paid agreement employees and non-agreement employees \$1.3 billion in straight time pay and salary. Eligible employees earned another \$184 million in overtime. This does not include health insurance, payroll taxes or retirement. Through February of FY14, Amtrak’s total payroll (including all benefits and taxes) is 93.6 percent of Amtrak’s ticket revenue. The company cannot sustain this level of payroll or overtime going forward

Corporate overhead costs of \$508 million are high as well and we need to find a way to slow the pace of spending. Corporate overhead includes departments such as Marketing, Information Technology, Procurement, Real Estate, Finance and even my department, Office of the President and CEO.

We will lose our position as the preferred provider of rail passenger service in this nation if we do not find better solutions to reduce our costs and increase our revenues.

Everyone is accountable, agreement and non-agreement. You and me.

It was not so long ago that Amtrak had nearly a dozen contracts to operate or maintain equipment to support service for commuter rail agencies, including

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

March 28, 2014 • Page 2 of 2

large ones like MBTA in Boston. Today we have five. In 2009, we lost VRE in Virginia. Was that a wake-up call? It was for me and I was only here a short time at that point. Then in we lost Caltrain in California.

We have a full round of 19 state supported service contracts coming up soon. I'm not sure right this minute how we will do on those. Recently the state of Connecticut was questioning if it would be Amtrak or Metro-North Railroad that would operate the Springfield Line when their new service begins in 2015-- and we own the track.

We need to examine and look at everything. We need to ensure that we are doing the right things at the right times. We need to be lean and compete because I hate to lose. I like to win, and I know you do too. I believe we owe it to our future to win. We can continue to upgrade our equipment and our facilities and add good jobs, but in order to do that we need to look at every cost and look for every opportunity to increase revenue. We need to follow our Strategic Plan.

It is time for all of us to wake up and understand that we are in a very competitive environment. We will not only survive, but we will clearly win with the strategy we have and by embracing and living our values to each other and to all of our customers.

Thank you for all you do to help this railroad serve our customers. Please take part in ensuring that we pay our debt to the future by engaging in the vision and the hard work it will take to stay in front of the growing list of competitors who would like to take away our business and jobs.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Amtrak will once again celebrate Why Trains Matter with events across the country at our seventh annual National Train Day on May 10, 2014. This event continues to reinforce the value of train travel in bringing people and communities together and remind the public that trains play a vital part in the economy and infrastructure of our nation. Passenger and freight service continues to be on the rise and this is our annual event where we pay tribute to the railroad industry and passenger rail service in the U.S.

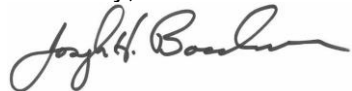

Marking 145 years of connecting travelers coast-to-coast, National Train Day commemorates the day the first transcontinental railroad was created and looks toward the future of rail travel with events nationally.

Your involvement and enthusiasm is what drives the success of these events. Last year we had over 79,000 visitors to 259 events in all 50 states, and 514 Amtrak employee volunteers. You are vital to the success of National Train Day. Our goal for National Train Day 2014 is to have over 530 employee volunteers across the nation. Depending upon the location, you can volunteer to give equipment tours, run the merchandise stores and information booths, staff the Chuggington Kids' Area and answer questions. Employee volunteers help keep everything on track while sharing their love of trains and our rich history with their communities.

I ask you to visit our employee-only site, www.TrainDay411.com, today to register to volunteer at an event near you. This site has all the information regarding what is in store for the 2014 celebrations. You can also participate in the Trivia Challenge for your chance to win Amtrak-branded prizes, tell us why you believe Trains Matter, visit the gallery of Amtrak employees' favorite photos of their stations from all across the country and check out which of your fellow employees was awarded the Employee Spotlight of the week.

I am confident that with your assistance, we can make this the best National Train Day ever.

Sincerely,

Joe Boardman
President and CEO

National Train Day activities will be held on May 3 in Los Angeles, Huntington, W.Va., and Toledo, Ohio.

A Message from Jerry Sokol

Dear Co-workers,

This week there has been a series of top level changes in the Finance department leadership.

Yesterday Dale Stein, corporate treasurer, retired from Amtrak. Dale was with Amtrak for 13 years and led the effort to reduce Amtrak's debt, restore Amtrak's management pension plan to full funding and put an award-winning banking system into place. Scott Veldman, currently our assistant treasurer, has been named acting treasurer.

Bernard 'Bud' Reynolds (deputy logistics officer) will assume the role of chief logistics officer in our Procurement department on May 1. Paul Vilter has done a great job acting in this role for the past few months and we appreciate his efforts as the interim head of Procurement.

Carol Hanna will begin as the Amtrak controller on May 6. Carol joins us with 29 years of experience in the finance sector most recently as the senior vice president and controller with CACI International Inc. There Carol upgraded the team, created and improved processes and brought the controllers' organization forward to better serve the business. Prior to joining CACI, she was the senior director of finance and accounting for Hughes Network Systems, senior vice president and chief financial officer at Capital Technology Information Services, and began her career as a tax manager with Arthur Andersen & Co.

Carol holds a Bachelor's degree in accounting from the George Washington University.

I know that you will welcome Scott, Bud and Carol warmly as they assume their new roles at Amtrak.

Sincerely,

Jerry Sokol
Chief Financial Officer

Drug and Alcohol Policy Expansion

On April 15 Chief Human Capital Officer Barry Melnkovic sent a letter to all non-agreement employees regarding the expansion of random drug testing to non-agreement employees in “safety sensitive” positions. Amtrak is committed to providing a safe work environment, fostering the well-being of our employees and our customers. A component of this commitment is Amtrak’s policy which requires all employees remain alcohol and drug-free while on duty.

Illegal drug use jeopardizes our commitment to safety. Drug abuse not only affects individual users and their families, but also presents dangers for the workplace. The expansion of random drug testing ensures a safe work environment for all.

Please see the attached documents which include the April 15 notification, the Over-the-Counter drug policy, the Oral-Eze collection system, the Authorization to Work with Medication(s) form (NRPC 3133) and information about the Employee Assistance Program. It is the responsibility of the employee to submit NRPC 3133 for review and concurrence prior to working with medications that may interfere with safe job performance.

We would also like to remind you that you should not take medications that are not specifically prescribed to you or take medications in excess of the prescribed dosage.

We run a safe railroad today and want to continue to make Amtrak the safest railroad it can be.

August 26, 2014 • Page 1 of 2

A Message from Barry Melnkovic and Jerry Sokol

Dear Colleagues,

To acquire employee talent that supports the needs of our organizational structure and establishes hiring accountability to secure the long-term viability of Amtrak, we are establishing a new Headcount Approval Committee (HAC).

The HAC will oversee a standardized process for reviewing and approving all Amtrak headcount requests, with the exception of safety critical roles, as defined and approved by the Vice President, Operations (VPO). On Board Services, Train & Engine, and Mechanical new hire training classes are also exempt from the HAC process. This means interviews and offers and hiring into these roles will continue without first receiving HAC approval; however, the HAC will monitor hiring into these roles. The VPO will report and justify any of these "exempt" hires to the HAC, even if it is after the fact. Agreement positions that are filled internally through the Bulletin & Assignment (bid/bump) process are also exempt from the HAC.

The HAC consists of all CEO direct reports who are members of the Company Operating Team (COT), as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. They will meet on a bi-weekly basis beginning September 9, 2014.

Starting August 25, all existing open and budgeted headcount (FY 14 and FY 15) requisitions must flow through the HAC before an offer can be extended. The attached Headcount Request form will be implemented as a standard protocol for submitting headcount requests for review by the HAC. The form was designed to drive strategic consideration of headcount by requiring documented business justification that takes into account the return on investment for every position.

The process for gaining HAC approval is as follows:

HAC Process:

1. Hiring manager completes Headcount Request Form and sends completed Headcount Request Form to HAC mailbox: headcountapprovalcommittee@amtrak.com (see attached examples of completed Headcount Request Forms)
 - a. For requisitions that cover multiple positions, the hiring manager must justify the need for the proposed number of positions on a single Headcount Request Form
2. HAC reviews requests according to bi-weekly schedule and approves/rejects based on documented business justification
3. HAC informs hiring manager of decision via email
4. If Headcount Request Form is
 - a. Approved: Proceed to Employee Information Portal (EIP) to begin requisition process, and attach approved Headcount Request Form to the EIP Create/Post Requisition Request eForm

special employee advisory

August 26, 2014 • Page 2 of 2

- b. Rejected: Do not proceed to create/post requisition

Note: COT members may provide additional guidance to their department managers for a coordinated review and submittal process.

For requisitions approved/posted before August 25, 2014:

1. Continue to source/interview for these positions, including interviews to fill pre-planned training class schedules; however, the number of approved attendees for these classes may change as a result of the HAC review process
2. **Before extending an offer of employment** hiring managers must obtain HAC approval using the attached form and prescribed HAC approval process

For all new requisition requests created on/after August 25, 2014:

1. **Before creating new requisitions**, hiring managers must obtain HAC approval using the attached form and prescribed HAC approval process

If you have questions or need additional information:

1. Consult with your COT HAC representative or department head
2. Contact your designated Human Capital Business Partner

The HAC will provide a fair process supportive of our Financial Excellence goal. We appreciate your prompt attention to familiarizing yourself with the new HAC process and Headcount Request Form. As always, we thank you for your support and continued collaboration.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

Jerry Sokol
Chief Financial Officer (CFO)

Incident on Train 364 at Niles, Mich.

We are saddened that three passengers and an Amtrak employee, were injured in a stabbing incident Friday night on Train 364 at Niles, Mich. The four individuals aboard the Blue Water train were taken to local hospitals for treatment, with one of the passengers released from the hospital on Saturday morning. Those still hospitalized are in stable condition.

The suspect, who was also a passenger on the train, was taken into custody by the Niles Police Department. The incident is under investigation and we are cooperating fully with local law enforcement personnel.

Members of our Amtrak team immediately went to the scene and the local hospitals to visit those who were injured. We continue to ensure we are doing everything we can to assist those affected.

The SMART-Transportation Division, the union representing the injured Amtrak employee, issued a statement Saturday calling this "a senseless and random act of violence involving an Amtrak family member who was faithfully performing his duties." Their full statement is attached.

The safety and security of our passengers and Amtrak employees remains our highest priority. We will fully review this incident and take every step to learn from it and improve our processes where appropriate. Let's continue to encourage passengers and each other to be aware of our surroundings and notify the Amtrak Police by calling 911, 800-331-0008 or texting to APD11 (27311) if something seems suspicious.

Our Employee Assistance Program counselors are available to speak with you should the need arise. Assistance is always available by going to <http://wiki.intranet.nrpc/display/EAP/Home> and finding a counselor located near you. You can also call 844-Amtrak1 (1-844-268-7251) or go to www.achievesolutions.net/AmtrakEAP.

Please continue to be vigilant and keep those who were injured in your thoughts and prayers as they receive treatment for their injuries.

**Bob Guy-State Director, SMART-Transportation Division
Statement regarding member assault on Amtrak Train 364 on 12/5/14**

The SMART-Transportation Division (formerly UTU) is deeply saddened this evening after receiving the disturbing news that one of our members, while faithfully performing his duties aboard AMTRAK Train #364, was seriously injured in a seemingly senseless and random act of violence.

Our thoughts and prayers go out to our fellow member and the other passengers that were injured during this inconceivable attack. I would like to express my personal appreciation to our other crew members, passengers aboard Train #364, and local law enforcement for any assistance that led to the apprehension of the subject.

SMART-Transportation Division will stand ready to assist AMTRAK and local law enforcement as the investigation into this rare act of violence moves forward, and we will do everything in our power to ensure that the person responsible for these acts is prosecuted to the full extent of the law.

**Bob Guy
State Director
Illinois Legislative Board

A Message from Joe Boardman

Dear Co-workers,

I am delighted to announce the results of Amtrak's Short-Term Incentive Plan (STI) for all eligible non-agreement employees. For the second straight year, Amtrak has achieved its financial target, which for Fiscal Year 2014 was to reduce Amtrak's net operating loss to \$305 million. As the result of strong revenue growth and fiscal discipline across all of Amtrak's operating departments, Amtrak has achieved an unaudited net operating loss of \$214 million. This represents a \$91 million achievement over Amtrak's target loss of \$305 million and as a result, Amtrak will be paying an STI award to all eligible non-agreement employees who have met their personal commitments to the organization in FY14.

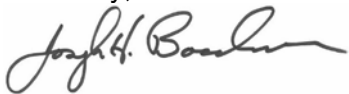

Unfortunately, with all the challenges we have faced with off-corridor delays and inclement weather, we did not achieve our customer service index (CSI) STI target of 84.25 percent; the actual achieved was 81 percent. Therefore, the payout for FY 14 will be 50 percent of your individual STI targets. Even though we did not achieve this goal, we must continue to focus on meeting or exceeding the needs of each and every one of our customers.

We operate in a very competitive environment with other travel options available to many of our customers. They will simply choose other means of travel unless we continue to make a concerted effort to focus on the customer experience. I know many of you feel that CSI is heavily influenced by forces beyond our control particularly when passengers are traveling on track we don't own, but we still need to strive to make that travel as enjoyable as possible for our customers by providing them with timely information and excellent customer service. We are doing everything we can to resolve the unacceptable delays that have been plaguing our network this past year.

Overall, I'm pleased with our performance for 2014 and am encouraged that we will be paying a STI award for the second straight year to all eligible non-agreement employees who have met their commitments through the fiscal year ending September 30, 2014. We've come far in the last year towards achieving our vision of moving America where it wants to go and I know that we can be even more successful in FY15. All of us want to achieve 100 percent of our STI targets next year.

Thank you for all that you do and please stay safe this holiday season.

Sincerely,

Joe Boardman
President and CEO

DRAFT Ebola Virus Update

Our Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in West Africa and the small number of cases identified in the United States. As news about Ebola spreads via the news media and social media, it is important that all Amtrak employees be aware of facts about the virus.

Managers and supervisors are strongly encouraged to regularly share the information below at crew briefings, roll calls and team meetings since not all employees have access to company email or the Amtrak Intranet while on the job. Amtrak will provide future updates to employees as needed. Amtrak operations at this time are not affected.

The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person. Ebola is not spread through the air; however, it can be potentially droplet borne and transmitted if an infected symptomatic individual coughs or sneezes and saliva or mucus comes in contact with another individual's eyes, nose, mouth or scratched skin. Symptoms of Ebola include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Make sure to wet your hands and then lather all parts—including the backs, between fingers and under nails. Once you've worked up a good lather, scrub your hands for at least 20 seconds (Tip: Sing "Happy Birthday" to yourself twice), rinse and dry.

Hands should be cleaned before preparing food, eating or touching one's face and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger or employee develops the symptoms described above, and has a history of travelling to West Africa or has had contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill individual separated from the other passengers as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill individual or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should

be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.

- Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

Protocols and Resources. Amtrak has plans and strategies in place for addressing contagious disease outbreaks. They provide detailed instructions on how employees should interact with sick passengers and outline the steps for notifying appropriate parties within Amtrak. These documents, along with other information, are available on a new Ebola Update webpage located on the homepage of the Amtrak Intranet. This site will be updated regularly with current information and answers to common questions.

A Message from Joe Boardman, Anthony Coscia and Jeffrey Moreland

Dear Co-workers,

Amtrak Inspector General Ted Alves advised the Board of Directors and President and CEO Joe Boardman that he intended to resign from Amtrak early in 2014 to pursue other professional opportunities. Mr. Alves told the board and Joe Boardman that he believed he had accomplished the goals he set out to achieve when he came to Amtrak in 2009 which included professionalizing the Office of Inspector General's (OIG) execution of its statutory duties to promote economy, efficiency and effectiveness in Amtrak's programs and operations through audits and investigations, restoring the OIG's relationship with the company and helping the company achieve the goals of our Strategic Plan. We agree completely with Ted Alves' assessment of what has been accomplished under and through his leadership; we thank him for his extraordinary and valuable contributions to the OIG, the company and the working relationships between the two and we wish him the very best in his future endeavors. Ted Alves' resignation was effective with the close of business on February 3, 2014.

The Board of Directors has appointed Deputy Inspector Tom Howard as Inspector General, effective today. Based on Tom's more than 36 years in responsible and ever senior positions with the Government Accountability Office, the U.S. Department of Transportation Inspector General and the NASA Inspector General and his 3 ½ years as Amtrak's Deputy Inspector General and partnership with Ted in the accomplishments noted above, we have every confidence that Tom will lead the Office of Inspector General to the standards he and Ted have set and continue its effective relationship with the company.

Please welcome Tom Howard to his new position and continue to respond to and work with the Inspector General's Office in accordance with the Amtrak Office of Inspector General policy approved November 1, 2011.

Thank you.

Joe Boardman
President and CEO

Anthony Coscia
Chairman
Board of Directors

Jeffrey Moreland
Vice President
Board of Directors

A Message from Joe Boardman

Dear Co-workers,

I want to take the occasion of the appointment of Amtrak's new Inspector General Tom Howard to remind all of us about the federal statutory mission of the Office of Inspector General (OIG) and our obligation fully to cooperate with the OIG in any audit, evaluation or investigation the OIG may conduct.

The OIG serves as an independent and objective unit within Amtrak, playing an important role in preventing and rooting out fraud, waste, mismanagement and abuse in Amtrak programs and operations. The OIG also works to improve the efficiency of our programs and operations through the performance of audits, evaluations and inspections. To carry out its statutorily required function, the OIG necessarily requires, on a regular basis, information and assistance from Amtrak managers and staff. It is essential that we not only fully cooperate with the OIG when asked, but also, bring any matter that we believe may constitute, waste, fraud and/or abuse to the OIG.

Specifically, I want to emphasize the responsibility of those who work for or with Amtrak and who observe or become aware of crime, fraudulent acts, gross waste of funds, abuse of authority, violations of rules or regulations or significant mismanagement by an Amtrak employee, contractor, or vendor or receive an allegation concerning such conduct. It is necessary that any Amtrak employee, contractor or vendor who observes such conduct or receives an allegation make a report personally by:

- contacting any OIG employee;
- calling the OIG Hotline at (800) 468-5469, which has been established specifically for receiving confidential reports;
- mailing information to the Amtrak Inspector General, P.O. Box 76654, Washington, D.C. 20013; or
- sending a message to the Amtrak OIG through its website: www.amtrakoig.gov.¹

In order to ensure free and open access to the OIG, an employee, contractor or vendor may ask for confidentiality, which will be provided under the terms of the Inspector General Act. Amtrak employees are not required to report their contacts with the OIG to their supervisors.

I ask each department, function and business line to make sure that each and every manager and supervisor within your organization reviews this

¹ If you have questions on ethical or safety related matters, or believe that you are a victim of discrimination or harassment, please in such cases follow the company's process of reporting to your supervisor, Human Capital, the EEO Compliance Unit in the Law department or the Amtrak Help-Line at (866) 908-7231, or www.reportlineweb.com/Amtrak.

memorandum with his or her staff, including noting the Amtrak - OIG relationship policy link, which is on our Intranet under "OIG", and that a copy of this memorandum be posted on all Amtrak information bulletin boards in our facilities.

http://www.amtrakoig.gov/sites/default/files/reports/ig-amtrak_relatt_policy_01-2012.pdf

If you have any questions about this guidance, please contact Amtrak's General Counsel, Eleanor D. Acheson, at ATS 777-2198, or the OIG General Counsel, Colin Carriere, at ATS 777-4355.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

A Message from Joe Boardman

Dear Co-workers,

Last fall, we all had the opportunity to complete the Organization Culture Diagnostic Instrument (OCDI), a survey used to assist us in evaluating our organizational culture and safety climate. The OCDI results are in and I wanted to take this opportunity to share with you a brief summary of what it revealed about our successes and our challenges. As in the past, the formal OCDI report will soon be posted on the company Intranet so all employees can read it and I will let you know when that happens. Here are some of the successes:

- A record-breaking 58 percent of the organization responded to the survey and offered their input about the current state of Amtrak's culture and safety climate.
- As an organization, Amtrak's culture and safety climate is stronger in 2013 than it was in 2011.
- Agreement employees' perceptions of the organization have improved considerably since 2011.
- All groups within the Operations department made improvements on each of the employee-to-supervisor scales.
- Survey results suggest employees in the Operations department are more likely to report injuries and incidents than in 2011.
- The Transportation department made significant improvements in all aspects of its culture and safety climate.

Here are some of the challenges:

- We need to ensure that every department and every location has effective leadership support for Safe-2-Safer.
- We need to provide effective support throughout our workforce so that all employees know that their co-workers, supervisors and managers "have their back." Supervisors and foremen continue to have poor perceptions of their leaders' credibility and support for the workforce.
- More work needs to be done in specific departments at specific locations to improve our organizational culture and safety climate.

Here are some of the steps we plan to take to improve our overall organizational culture and safety climate:

- We will continue to clearly communicate that Safe-2-Safer is here to stay.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

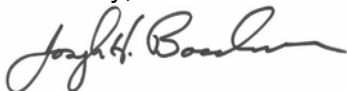

February 19, 2014 • Page 2 of 2

- We will increase and improve safety-related communication from senior leaders.
- We will find ways to address the underlying causes in areas with lower OCDI scores
- We will continue to develop supervisors' and managers' capabilities in safety leadership best practices.
- We will define each level of the organization's role in safety, and drive accountability for specific safety-supporting activities.
- We will continue to expand participation in and the effectiveness of the behavior-based safety processes.
- We will allow zero-tolerance for manipulating numbers related to safety programs.
- We will improve safety recognition systems.

Like you, I don't particularly enjoy hearing about things we could be doing better, but I know that our company, our customers and our fellow employees will be safer and more secure if we face our challenges head on instead of sweeping them under a rug. Improving safety and security on the railroad is our duty, and everyone is expected to participate. I've asked Chief Safety Officer Michael Logue to work with our senior leadership team to take advantage of what we learned from the OCDI.

I want to thank those of you who understand the importance of taking the time to complete the survey. We value your feedback. I appreciate all you do every day to make America's Railroad the safest and best it can be.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am pleased to let you know that in addition to his responsibilities as chief financial officer, I have appointed Jerry Sokol as the new corporate ethics officer, a position formerly held by DJ Stadler.

As stated in the Ethical Conduct and Conflict of Interest Policy (P/I Number 1.3.6), Jerry will have the ultimate responsibility for the consistent administration and interpretation of our policy and approval of any exceptions from it.

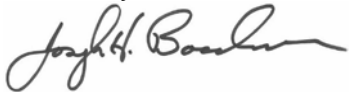

Amtrak requires all employees to observe the highest standards of business ethics. We must not only conduct the business and operation of Amtrak in a manner that complies with applicable law and high moral and ethical standards, we must also avoid any prohibited conflict of interest or appearance of a conflict of interest. We consider any violation of the policy to be a very serious infraction that may result in disciplinary action, up to and including immediate termination of employment. The corporate ethics officer is available to answer any questions so that there is no confusion over what is the appropriate course to follow.

I would recommend that all employees become familiar with this policy which can be found on the company Intranet >Library>Policies>Amtrak Policy and Instruction Manual or click on this link.

Drug and Alcohol Policy

As you may recall, this past November, Washington and Colorado voters legalized the recreational use of marijuana, making them the first U.S. states to decriminalize the practice. Last week, certain jurisdictions in Colorado began selling the drug for recreational use.

It is important to re-emphasize that these state initiatives will have no bearing on Amtrak's drug testing program. Amtrak's policy and the Department of Transportation's Drug and Alcohol Testing Regulation (49 CFR Part 40) with which we comply does not authorize the use of Schedule I drugs, including marijuana, for any reason.

The drug and alcohol testing examiners will **not** verify a drug test as negative based upon learning that our employee used "recreational marijuana" when states have passed "recreational marijuana" initiatives.

We also need to reiterate that drug and alcohol testing examiners will **not** verify a drug test as negative based upon information that a physician recommended that the employee use "medical marijuana" when states have passed "medical marijuana" initiatives.

Marijuana remains a drug listed in Schedule I of the Controlled Substances Act. It is still a controlled substance barred from Amtrak property by company policy and it remains unacceptable for use by any employee subject to drug testing under Amtrak's or the Department of Transportation's drug testing regulations.

Any employees who test positive for marijuana will be dealt with in accordance with Amtrak's drug testing policy and federal law.

We run a safe railroad today and want to continue to make Amtrak the safest railroad it can be.

FY14 Appropriations

Last week President Obama signed the omnibus appropriations package that will fund the government, including Amtrak's federal appropriation through Sept. 30, 2014.

The total amount for Amtrak's operating, capital and debt service grants is \$1.39 billion.

The chart below outlines the designated amounts included in the package for Amtrak. The legislation also repeals the restrictive language from the Hurricane Sandy supplemental bill that will now allow us to access the approximately \$80 million in capital appropriated during FY13.

The legislation also includes \$10 million in Department of Homeland Security Funds for us and \$23.5 million for our Inspector General.

Amtrak Funding Categories (\$ millions)	FY13 Final	FY14 Final (b)	Difference between FY13 Final and FY14 Final
Operating	442	340	-102
General Capital (a)	566	781	215
Debt Service	271	199	-72
ADA	50	50	0
NEC Programs (c)	15	20	5
Capital subtotal	902	1,050	148
Grand Total	1,344	1,390	46

- (a) Includes capital to be retained by Federal Railroad Administration.
- (b) Of capital, \$40 million may be used for operating, if needed.
- (c) Northeast Corridor (NEC) funds for use by DOT to implement Section 212 and Gateway. Section 212 of PRIIA calls for commuter railroads on the NEC to develop a uniform cost-sharing methodology for use of the NEC.

Dear Co-workers,

This week, the disability community around the country celebrates the 24-year anniversary of the signing into law of the Americans with Disabilities Act (ADA). The law was passed in 1990 to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak serves as an important mode of travel for people with disabilities, and we continue to improve our services, facilities and program to ensure accessibility for all.

Accessibility for passengers with disabilities has historically placed Amtrak at a competitive advantage over other travel modes. With input from national disability advocacy groups and a robust program supported by collaborative teams throughout the company, we have taken significant steps to improve the travel experience for passengers with disabilities from trip planning, to purchasing tickets, to stations, to equipment and on-board services.

Over the past five years, Amtrak has:

- Held disability customer service training for front line employees.
- Advanced design and development efforts for setback boarding platforms that utilize a gap mitigation device and put forth efforts to improve the existing Amtrak stock of bridgeplates (used at level boarding platforms) and the ramp used on board the Superliner cars.
- Installed wheelchair lifts or replaced aging and obsolete lifts where needed; approximately 350 stations now have a mobile station
- Made accessibility improvements at more than 200 stations including repairs and upgrades to platforms, ramps and sidewalks and renovated entrance ways and restrooms.
- Developed new standards for Passenger Information Display Systems (PIDS) in stations to include both audio and visual communication.
- Either replaced or installed accessible Quik-Trak ticket kiosks in stations.
- Made improvements to Amtrak.com to allow passengers with disabilities to book online; further updates will take effect in the fall.

All Amtrak trains have accessible seating and restrooms, all long-distance trains have accessible bedrooms and Amtrak is the only mode of intercity transportation that provides a discount to passengers with disabilities and their companions.

Our advancements are reflected in part by the ridership growth of passengers with disabilities. Through June 2014, this segment has grown by 2.8 percent over the same period last year.

Since 2006, through our Great American Stations Project, Amtrak has been working to educate communities on the benefits of redeveloping train stations and making improvements to ensure stations are accessible for all. We have sponsored 10 Civic Conversations around the system touching over 200 Amtrak-served communities across the country. The purpose of these meetings is to bring together city officials, civic leaders and state officials to discuss station redevelopment, accessibility requirements and how Amtrak can serve as a partner in the process.

However, despite the progress we have made, there is still work that needs to be done. Upgrading stations and making them accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements.

We own only a small percentage of the nearly 500 stations that are required to become ADA-compliant. We need to find a way to overcome the length of time it takes to work through the complexity of station ownership issues, and we remain committed to working with all of the owners of the stations, platforms and parking facilities to create a nationwide rail system that is accessible to each and every customer and employee.

We are confident that we can build on the progress made to date, and we plan to advance a robust program of station accessibility improvements in Fiscal Year 2015. Making Amtrak service accessible to all individuals aligns with our Strategic Plan, specifically the goals of customer focus, safety and security and mobility and connectivity.

Providing greater accessibility to our trains and Thruway buses, in facilities and stations and on Amtrak.com is the right thing to do as a company because all of our customers must be treated equally and without differentiation, even our customers who happen to have a disability.

Comment [A1]: David suggests we rephrase as "equally, regardless of whether they have a disability or not."

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

July 25, 2014 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

This week marks the 24th anniversary of the signing into law of the Americans with Disabilities Act (ADA). The law was passed in 1990 to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak serves as an important mode of travel for people with disabilities, and we are committed to improving our services, facilities and program to ensure accessibility for all.

The passage of the ADA was preceded by many years of advocacy before Congress, state governments and many municipal governments by members of the disability community. Its passage was a triumph of their hard work and dedication, but it was also recognition by society that all of us have the right to accessibility. When President Bush signed this measure into law, he said “The Americans with Disabilities Act presents us all with a historic opportunity. It signals the end to unjustified segregation and exclusion of persons with disabilities from the mainstream of American life.”

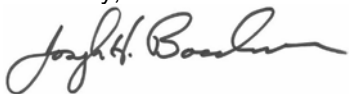

While Amtrak has made progress in bringing its equipment and facilities into a higher level of accessibility, we still have much work to do. It is my view that creating greater levels of accessibility and accommodation is something that never really ends. The work we do to advance the spirit and intent of the ADA is more than improving stations and building better vehicles, it is also how we treat each other and the level of service we bring to all of our passengers but especially those who have special needs.

Earlier this year I met with representatives of the disability community and heard from them some of the frustrations they have with Amtrak. They understand that the challenges we face are both difficult and complex but they expect us to advance accessibility and accommodations throughout our system. I told them that we would work very hard to address these issues whether they are in our stations, on our equipment or in the ways we communicate with our passengers. I pledged to them that they would see tangible progress in meeting these needs.

We operate a vast national system of service, touch many different communities and serve a broad share of the American public. As such we all have a role to play in advancing ADA. Some of you will do so by making our vehicles and facilities more open and accessible; some of you will help by advancing technology to make accessibility to our reservation and communications systems easier. However, every one of us can advance the spirit of this landmark law by treating each other with kindness and decency and I would ask you to reflect on that as we recognize the anniversary of this important law.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Barry Melnkovic and Jerry Sokol

Dear Colleagues,

In response to Mr. Boardman's call to action regarding the immediate need for managing headcount at Amtrak, we carefully weighed feedback from the Executive Leadership Team (ELT) and Company Operating Team (COT) to address this pressing matter. Beginning on September 9, 2014, a newly established Headcount Approval Committee (HAC) will govern a standardized process for reviewing and approving all Amtrak headcount requests that are related to non-strategic initiatives (i.e., approved company-wide strategic initiatives are exempt). The HAC will ~~occur-meet~~ on a bi-weekly schedule and consist of all CEO direct reports ~~that who~~ are members of the COT, as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. ELD in Human Capital. Effective ~~Monday August 25th 2014~~today, all existing open and budgeted headcount (FY14 and FY15) requisitions must flow through the HAC before an offer can be extended.

Beginning ~~Monday August 25th 2014~~today, the attached Headcount Request Form will be implemented as a standard protocol for submitting headcount requests for review by the HAC (see the attachments for an overview of the Headcount Approval Process and examples of completed Headcount Request Forms). The form was designed to drive strategic consideration of headcount by requiring documented business justification that takes into account the return on investment for every position.

The process for gaining HAC approval is as follows:

HAC approval flow:

1. Hiring ~~Manager-manager~~ completes Headcount Request Form and sends completed Headcount Request Form to HAC mailbox (headcountapprovalcommittee@amtrak.com)
 - a. For requisitions that cover multiple positions, the ~~Hiring-hiring Manager-manager~~ must justify the need for the proposed number of positions on a single Headcount Request Form
2. HAC reviews requests according to bi-weekly schedule and approves/rejects based on documented business justification
 - a. The HAC begins meeting on September 9th 2014, which means ~~Hiring-hiring Managers-managers~~ may have to wait up to two ~~(2)~~-weeks to receive approval/rejection
3. HAC informs ~~Hiring-hiring Manager-manager~~ of decision via email
4. If Headcount Request Form is
 - a. Approved: ~~Proceed-proceed~~ to Employee Information Portal (EIP) to begin requisition process, and attach approved Headcount Request Form to the EIP Create/Post Requisition Request eForm
 - b. Rejected: Do not proceed to create/post requisition

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

August 25, 2014 • Page 2 of 2

For requisitions approved/posted before August 25th 2014:

1. Continue to source/interview for these positions
2. **Before extending an offer of employment** ~~Hiring-hiring Managers~~ managers must obtain HAC approval using the prescribed HAC approval process
3. Use the attached Headcount Request Form to complete this process

For all new requisition requests created on/after August 25th-25th 2014:

1. **Before creating new requisitions** ~~Hiring-hiring Managers-managers~~ must obtain HAC approval using the prescribed HAC approval process
2. Use the attached Headcount Request Form to complete this process

~~In summary, we~~ We believe establishment of the HAC will provide a fair process supportive of our Financial Excellence goal. Given Mr. Boardman's directive to swiftly address headcount and related expenditures, please give immediate attention to familiarizing yourself with the new HAC process and Headcount Request Form. As always, we thank you for your support and continued collaboration.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

A Message from Joe Boardman and Barry Melnkovic

Dear Co-workers,

At Amtrak, succession planning is critical for securing our legacy as America's Railroad. It enables us to identify and grow future leaders who will drive our company to achieve its strategic objectives of safety and security, customer focus and financial excellence. All three provide the foundation to sustain Amtrak in the future; our talent is at the core of achieving these goals.

You are receiving this message because you play a vital part in the succession planning process. Whether you will be hosting a talent review session or you will be the focus of future leadership planning efforts, your role is important in developing great leadership talent at Amtrak.

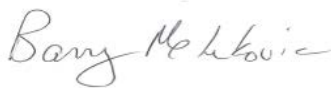

In the coming weeks, you will receive additional information from your department leadership related to our succession planning process. I, along with Barry Melnkovic, our Chief Human Capital Officer, want to thank you for your continued efforts in investing in our greatest resource—our people. I look forward to embarking on this journey with you as we create a workforce of the future and continue to transform our organization.

Thank you for your support.

Sincerely,

Joe Boardman

A Message from Susan Reinertson

Dear Co-workers,

Current Amtrak identification badges will begin expiring in January 2015. I wanted to let all Amtrak employees and contractors know that we will be updating **all** identification badges for both security purposes and increased efficiency onboard our trains. The new updated design will have a bar code on the front which will simplify the onboard scanning procedure. The badges will be produced in house and allow us an opportunity to update employee photographs.

All employees are required to submit an updated photo in order to receive the new ID badge. Please note that most smart phones can take acceptable passport quality photos.

The photo requirements are simple:

- All photos must be passport quality.
- All photos must have a white background and display a clear shot of the employee's/contractor's face (please no hats, sunglasses, etc.).
- Photos should include the full face view with a neutral facial expression and both eyes should be open.
- If you regularly wear glasses, please wear them in your photo.

All photos should be emailed or texted to the Smart ID team at IDrefresh@amtrak.com. All emails should include SAP number and full name in the subject line. Please submit photos by July 15, 2014.

Please watch for continued email communications, posters, an article in *Ink* and reminders in *Amtrak This Week* regarding the Smart ID rollout and distribution of the new badges.

Thank you for your support.

Change in Crew Lodging Contract

Amtrak is pleased to introduce a new partnership with **Travelliance**, a full-service accommodations and transportation administration company with over 35 years of experience specializing in crew and employee travel. Travelliance will be replacing Corporate Lodging (CLC), our current vendor, starting October 1, 2014. CLC has been a good partner for many years and Amtrak is appreciative of that relationship.

Travelliance has been selected by Amtrak to provide lodging and transportation services for Train and Engine and Onboard Services crews and other employees. This will mean some changes that will simplify the hotel booking and check-in processes. Initially we will not change any hotels and the vendor change should be nearly seamless to the vast majority of our employees who currently use CLC.

As the October 1, 2014, start date for Travelliance gets closer, additional information will be provided regarding booking hotels and checking into rooms.

In the meantime, please continue to utilize CLC.

Amtrak welcomes Travelliance aboard.

A Message from Joe Boardman

Dear Co-workers,

Since implementing our 2011 Strategic Plan our accomplishments have been significant. We set the groundwork necessary to build a stronger Amtrak. We must continue to make bold changes to help secure our future and improve intercity passenger rail's value as a national asset. To do so, we have refreshed our Strategic Plan for the next four years. I would like you to use this plan as our guide to future success – a tool for pointing us along our journey.

If you have not already seen it, I would like to introduce you to the highlights of the refreshed Strategic Plan.

- We have an **updated vision** that directs what we want to do: *"Moving America where it wants to go."* Our **updated mission** tells us how we will achieve this: *"Deliver intercity transportation with superior safety, customer service and financial excellence."*
- We have narrowed our **corporate themes and refined the strategic goals**. We have sharpened our focus to three themes and aligned goals that will make the greatest difference for Amtrak: *Safety and Security, Customer Focus and Financial Excellence*. These goals are highly integrated -- the success in all of them is crucial to sustaining Amtrak's future. Two previous goals, Mobility and Connectivity and Environment and Energy, have now become ways in which we can achieve our goals, rather than be goals in-and-of themselves.
- In my next communication, I will explain how our business line strategies will result in better results for our customers.
- Although there have been changes in our strategy our **values** and **leadership philosophy** have not changed.

The refreshed Strategic Plan will ensure a successful Amtrak tomorrow. We are all aware that it will take time for the plan to show the results that we aim to obtain. However, I am confident that if we are united, with shared focus and aligned action, we will continue to transform Amtrak into a world-class passenger transportation company.

For the FY14-FY18 plan to work successfully, I need each of you to learn and help others learn our new strategy. To support you in that

effort, I am committed to providing resources to help you understand how our strategy affects you, your team and your business line/department and how you can contribute towards the achievement of our business goals. I encourage you to review the [Reference Summary](#), the Strategy Refresh [Frequently Asked Questions \(FAQs\)](#) and a full copy of the [Strategic Plan](#) all of which can be found on our company [Intranet home page](#). If you have any questions regarding the strategic plan, please contact Amtrak.StrategicPlan@amtrak.com.

While you are reviewing the Strategic Plan please remember that we are developing new initiatives that will help each business line meet our strategic goals. More information will come to you soon. In the meantime, thank you for your support and for your hard work.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

March 28, 2014 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

We are a “can do” company. So many of you work so hard to deliver great customer service and world class safety. Your work is helping to increase ridership and improve our financial position.

We are a private company that receives payments from, and has important relationships with, nearly 50 sovereign governments. The largest is the United States government, but we also receive very large payments from California, Illinois, Michigan, New York, Virginia, North Carolina, Washington, Oregon and 38 other states for which we provide some level of service.

Our bosses – our customers, the states who hire us to provide service, the Congress, the administration, our board of directors and ultimately the taxpayers - expect us to run the corporation as much like a business as we can. We’ve made progress in that direction, but more needs to be done.

Here’s the problem. Our expenses are too high and our revenue is too low. We have great opportunities to become better as a place to work, better in the service we deliver and better in our control of our own future. However, we continue to struggle with overhead costs, overtime costs and lack of efficiencies.

Our average hourly wage for agreement employees is \$28.86. That’s a just wage, a living wage, and whenever possible, an annual wage. I’m proud that we are able to offer wages that attract well qualified employees, often multiple generations from the same family looking for a career with our company.

Last year we paid agreement employees and non-agreement employees \$1.3 billion in straight time pay and salary. Eligible employees earned another \$184 million in overtime. This does not include health insurance, payroll taxes or retirement. Through February of FY14, Amtrak’s total payroll (including all benefits and taxes) is 93.6 percent of Amtrak’s ticket revenue. The company cannot sustain this level of payroll or overtime going forward

Corporate overhead costs of \$508 million are high as well and we need to find a way to slow the pace of spending. Corporate overhead includes departments such as Marketing, Information Technology, Procurement, Real Estate, Finance and even my department, Office of the President and CEO.

We will lose our position as the preferred provider of rail passenger service in this nation if we do not find better solutions to reduce our costs and increase our revenues.

Everyone is accountable, agreement and non-agreement. You and me.

It was not so long ago that Amtrak had nearly a dozen contracts to operate or maintain equipment to support service for commuter rail agencies, including

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

March 28, 2014 • Page 2 of 2

large ones like MBTA in Boston. Today we have five. In 2009, we lost VRE in Virginia. Was that a wake-up call? It was for me and I was only here a short time at that point. Then in we lost Caltrain in California.

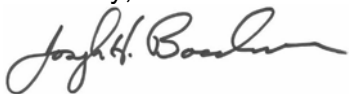

We have a full round of 19 state supported service contracts coming up soon. I'm not sure right this minute how we will do on those. Recently the state of Connecticut was questioning if it would be Amtrak or Metro-North Railroad that would operate the Springfield Line when their new service begins in 2015-- and we own the track.

We need to examine and look at everything. We need to ensure that we are doing the right things at the right times. We need to be lean and compete because I hate to lose. I like to win, and I know you do too. I believe we owe it to our future to win. We can continue to upgrade our equipment and our facilities and add good jobs, but in order to do that we need to look at every cost and look for every opportunity to increase revenue. We need to follow our Strategic Plan.

It is time for all of us to wake up and understand that we are in a very competitive environment. We will not only survive, but we will clearly win with the strategy we have and by embracing and living our values to each other and to all of our customers.

Thank you for all you do to help this railroad serve our customers. Please take part in ensuring that we pay our debt to the future by engaging in the vision and the hard work it will take to stay in front of the growing list of competitors who would like to take away our business and jobs.

Sincerely,

A Message from Joe Boardman

Dear Co-workers,

This week there have been a series of top level changes in the organization.

On Monday, Dale Stein, corporate treasurer, retired from Amtrak. Dale was with Amtrak for 13 years and led the effort to reduce Amtrak's debt, restore Amtrak's management pension plan to full funding and put an award-winning banking system into place. Scott Veldman, currently our assistant treasurer, has been named interim treasurer. A search to fill the position of corporate treasurer, an officer of the corporation, is in progress.

The treasurer is responsible for managing the company's cash flow in the most efficient and profitable fashion possible. The position also involves forecasting future needs for funding and seeking the best alternatives for obtaining it.

Scott has been serving as our assistant treasurer since joining Amtrak in 2011. Prior to coming to Amtrak, he was the vice president and treasurer of Mohawk Industries, Inc., the largest floor covering manufacturer, distributor and marketer in the United States. He has a Master of Business Administration from the University of Chicago and a Bachelor of Science in finance from the University of Illinois.

Carol Hanna will begin as the Amtrak controller on May 6. This position, also an officer of the corporation, is the top accounting officer of the organization and is responsible for instituting and overseeing all of the accounting policies and procedures and related financial controls of the organization. The controller is the senior leader responsible for supervising external audits conducted by various entities which include state governments, banking institutions, federal regulators, our state partners and the external auditor hired by Amtrak to review our financial statements.

Carol joins us with 29 years of experience in the finance sector most recently as the senior vice president and controller with CACI International Inc. There Carol created and improved processes and brought the controllers' organization forward to better serve the business. Prior to joining CACI, she was the senior director of finance and accounting for Hughes Network Systems, senior vice president and chief financial officer at Capital Technology Information Services, and began her career as a tax manager with Arthur Andersen & Co.

Carol holds a bachelor's degree in accounting from the George Washington University.

Bernard 'Bud' Reynolds will assume the role of chief logistics officer in our Procurement department on May 1 and he will be directly responsible for managing the logistics function for Amtrak. Bud began his career at Amtrak in

2000 as a senior contract manager in Procurement and moved into a series of more responsible positions, most recently as our deputy chief logistics officer. He is admired for his outstanding institutional knowledge of Amtrak and the industry, as well as his deep knowledge of the procurement process, agreement contracts and the talent within the Logistics team.

Bud has a master's degree in organization leadership from Immaculata University and a bachelor's degree from St. Joseph's University, both in Pennsylvania.

Paul Vilter has done great job acting in this role for the past few months and we appreciate his efforts as the interim head of Procurement

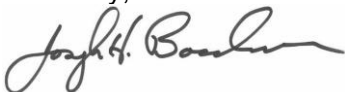

Scott and Carol will be located in Washington, D.C. and Bud will remain in Philadelphia. All three will report directly to Chief Financial Officer Jerry Sokol.

Mark Yachmetz, currently chief, corporate research and strategy, is immediately moving into the newly created position of chief, strategic fleet rail initiatives. Mark will continue to play an integral leadership role within the Office of the President and CEO and will be directly involved and responsible for the alignment of Amtrak's rail fleet initiatives with the overall corporate strategic goals and objectives. This role includes coordinating the development of business cases to support corporate decisions on the acquisition and deployment of the rail fleet, developing financing strategies and sponsoring research for the improvement of our existing rail fleet assets. Mark will be a member of the Company Operating Team (COT) and continue reporting directly to me. A search is in progress to fill the opening created by Mark assuming this new role.

In his most recent position, Mark led the development and roll out of the Amtrak Strategic Plan and previously was the associate administrator for railroad policy and development at the Federal Railroad Administration.

I know that you will warmly welcome Scott, Bud, Carol and Mark to their new roles at Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

This week there have been a series of top level changes in the organization.

On Monday, Dale Stein, corporate treasurer, retired from Amtrak. Dale was with Amtrak for 13 years and led the effort to reduce Amtrak's debt, restore Amtrak's management pension plan to full funding and put an award-winning banking system into place. Scott Veldman, currently our assistant treasurer, has been named interim treasurer. A search to fill the position of corporate treasurer, an officer of the corporation, is in progress.

The treasurer is responsible for managing the company's cash flow in the most efficient and profitable fashion possible. The position also involves forecasting future needs for funding and seeking the best alternatives for obtaining it.

Scott has been serving as our assistant treasurer since joining Amtrak in 2011. Prior to coming to Amtrak, he was the vice president and treasurer of Mohawk Industries, Inc., the largest floor covering manufacturer, distributor and marketer in the United States. He has a Master of Business Administration from the University of Chicago and a Bachelor of Science in finance from the University of Illinois.

Carol Hanna will begin as the Amtrak controller on May 6. A Message from Joe Boardman and Barry Melnkovic

Dear Co-workers,

As you know, our Strategic Plan has been updated for FY14-FY18. Our plan is designed to make progress towards our strategic goals, which focus on three business themes: Safety and Security, Customer Focus and Financial Excellence. It is a good, solid plan, but like any plan it is meaningless without people willing and able to take the necessary steps to act on it. In short, we power our success.

Whether you work directly or indirectly with the customers we serve, as Amtrak employees we are responsible for our collective success. Knowing this, we needed to ask an important question regarding what actions employees must take to ensure we are successful. To address this question, in FY13 Human Capital partnered across the business lines and departments to identify a collection of knowledge, skills and abilities required to drive both individual and organizational success. That effort resulted in the development of our eight Amtrak Core Competencies. These competencies are considered “core” because they represent the essential behaviors that all non-agreement employees at Amtrak must competently demonstrate to be successful in their role and in turn, drive the success of Amtrak.

The Amtrak Core Competencies spotlight the importance of “how” we do business. This is important because how we do business affects our ability to provide competitive advantage to our customers and our employees. How we work also affects our ability to attract, develop, engage and retain best fit talent. While many of you already demonstrated the Core Competencies before they were recognized as such, these key talent requirements needed to be more clearly defined and demonstrated with greater consistency across the organization. They are the very core of the work that we do on a daily basis and form the very foundation of our talent strategy. So to address the need for greater clarity and consistency in defining how to be successful in one’s role, the Amtrak Core Competencies will gradually be factored into how people are recruited, selected, developed, evaluated and rewarded.

The Amtrak Core Competencies are the golden thread tying together all Human Capital practices. They provide a clear and consistent framework for employees to successfully manage their careers and collectively power the success of Amtrak. Implementation of the Core Competencies began in early FY14 as part of the Performance Conversations process. They have since been included in the new recruitment management tool launched in early April.

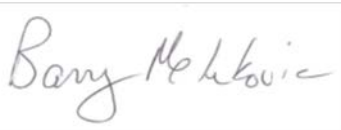

You are asked to learn the Amtrak Core Competencies and begin to demonstrate them as you accomplish your daily responsibilities – our success depends on it. We whole heartedly believe that wide-spread adoption and demonstration of the Amtrak Core Competencies will help us achieve our strategic goals. They will help us be successful in our roles, which will satisfy our customers and help Amtrak to succeed. Information about the Amtrak Core Competencies can be found on the Human Capital page of the company [Intranet](#). If you have any questions about our Core Competencies, please contact HumanCapital@amtrak.com.

Thank you for your support.

Sincerely

Joe Boardman
President and CEO

Amtrak Core Competencies: 3 Key Components

Each of our Amtrak Core Competencies consists of three components:

1. **Title** – The name of each Core Competency (e.g., Drive Safety and Security).
2. **Definition** – Description of each associated title (e.g., Controls exposures for self and others).
3. **Key Themes** – Examples of what each Core Competency looks like in action (see *Amtrak Core Competencies table below*). It is important to note that there are many other ways that each Core Competency could be demonstrated, but these are the behavioral examples that were agreed upon by Amtrak leaders and other employees from across the organization as behaviors that all non-agreement employees should consistently demonstrate to be successful within their roles and to propel the success of Amtrak.

AMTRAK® CORE COMPETENCIES								
Core Competency	Drive Safety and Security	Put Customers First	Maximize Business Results	Deliver with Accountability	Collaborate for Results	Lead and Develop People	Lead and Manage Change	Embrace Diversity
Competency Definition	Controls exposures for self and others	Builds loyalty through positive relationships within and outside the company	Uses knowledge of the company, industry, market, and government stakeholders to increase Amtrak profitability	Accomplishes tasks with excellence and holds self and others accountable for delivering high-quality results	Partners with others to reach shared goals	Supports the Amtrak mission by positively influencing others to grow	Grows and adapts through continuous improvement and change	Demonstrates respect for and inclusion of others within and outside the company
Key Themes	<ul style="list-style-type: none"> • Considers the safety and security impact of decisions • Observes and reports things and people that seem out of place • Identifies and removes safety and security barriers • Applies safety and security metrics • Promotes safety education 	<ul style="list-style-type: none"> • Creates positive customer experiences • Anticipates and exceeds customer needs • Demonstrates and reinforces altruism • Owns customer service concerns • Builds customer and partner loyalty 	<ul style="list-style-type: none"> • Reinforces business acumen • Knows the competition • Develops and applies business knowledge • Manages company resources • Evaluates risk and makes sound decisions • Develops and executes strategy 	<ul style="list-style-type: none"> • Produces quality results • Adheres to high standards and correct processes • Uses a data-driven approach to solve problems • Manages project and program resources • Develops strengths and manages opportunities 	<ul style="list-style-type: none"> • Promotes teamwork and builds trust and positive relationships • Facilitates two-way communication • Shares resources • Resolves conflict • Recognizes and celebrates individual and team successes 	<ul style="list-style-type: none"> • Clarifies expectations, roles, and responsibilities • Enables others to be successful • Builds and demonstrates organizational capability • Coaches and mentors others • Models professional excellence 	<ul style="list-style-type: none"> • Recognizes why change is necessary • Identifies and considers innovative alternatives • Motivates others to change • Seeks personal growth to support organizational change • Holds self and others responsible 	<ul style="list-style-type: none"> • Creates a positive, respectful environment • Seeks and welcomes different views • Educates and includes others • Operates with self- and social-awareness • Recognizes, accepts, and appreciates differences

A Message from Joe Boardman

Dear Co-workers,

Recently I announced that Mark Yachmetz moved from his position as chief, corporate research and strategy into the new role of chief, strategic fleet rail initiatives and that we were in the process of filling the opening created by this move. I am pleased to let you know that Jeffrey K. Clements has accepted the position of chief, corporate research and strategy effective on May 27.

Mr. Clements will play an integral leadership role within the Office of the President and CEO and will lead the development of our corporate strategy and the corporate goals that support it. Jeff will work with Amtrak's operations and business support functions to ensure their alignment with our corporate strategy and that the appropriate goals and measures are in place to measure success and to ensure effective strategy execution.

Jeff is a seasoned business executive with extensive leadership experience in a number of business areas including operations, finance, marketing, business development and management consulting. He most recently served as a managing director at the Palladium Group, a leading business strategy consulting firm that advocates the balanced scorecard approach to business execution. Amtrak was one of his clients. Prior to joining Palladium, Jeff was an executive vice president of business development at Alexander Proudfoot, a business consulting firm focused on operational efficiency. He has also held leadership positions at a number of for-profit companies and a non-profit.

He holds a Master of Business Administration with distinction from the Keller Graduate School of Management, a master's degree in teaching from National Louis University and a bachelor's degree in marketing from Northwestern University.

Please join me in welcoming Jeff to this very important position at America's Railroad.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

It's always great when spring comes, but somehow, it seems even more welcome than usual this year. We've come through a long, hard winter, and now that we've seen what I imagine is the last snowfall of the season, we can be happy that Memorial Day is here, and summer will soon be upon us.

Because we work for the railroad, of course, summer can be just as challenging sometimes as winter: instead of frozen switches, the tracks get sun-kinks, and locomotives don't like excessive heat any more than they like excessive cold. Over the past couple of years, we've made plenty of improvements to deal with both heat and cold, and they help us get through summer and winter – things like new switch heaters, new electric locomotives, and new facilities. Every little bit helps us to handle a challenging business like this ours.

Our business is all-consuming and when we are dealing with great challenges sometimes it is easy to forget not only how much we depend on the people around us, but what a great job they do when we are dealing with these challenges. Someone on our staff at headquarters recently told a story that I think fits how any one of us could and should feel about the people around us. While searching for a lost friend on the Internet, this guy – who is a veteran – found a group picture of some other fellows from his old unit. And he was shocked by what he found – because while he knew a couple of the men in the picture by sight, they weren't the story: the story was one guy, a sergeant who stood off to the side of the picture, who only looked "vaguely familiar." That vaguely familiar man turned out to be a posthumous recipient of the Medal of Honor, awarded for service in Afghanistan in 2009.

In telling the story, our fellow said that he looked at the extensive online memorial, and was shocked to discover not only that they had worked together, but that many people he had known had left written testimonials on the memorial website. He said that the evidence showed that he worked with this man for two years, almost two decades ago, but he simply could not recall anything distinguishing out of all the many memories of his time in the service. He came to realize, though, that in a sense, it didn't matter: this man could have been any one of so many of the men he knew, because the qualities this particular man had displayed were present and living in so many of the others that it would be hard to pick one man out on the basis of them. He then repeated something someone else had once told him about another man who had earned the Medal of Honor: "Where do we find these guys? The answer is, 'you can find them on every street in America.'"

I think that's quite a statement. This Memorial Day, it's also something to think about. We've worked hard to create a system here at Amtrak that involves each of us in the lives of the people around us in Safe-2-Safer. I hope this weekend, in the midst of the celebrations and the happiness of the beginning of summer, you will take some time to think about the people

around you, on whom our success and safety depends. And I hope you will also take some time to think about those whose last full measure of devotion was freely given so that all of us may enjoy a weekend in safety, comfort, and peace. They are an example and an inspiration in everything we do.

Sincerely,

Joe Boardman
President and CEO

Amtrak supports the National Moment of Remembrance. On Memorial Day all trains will sound one long whistle, where safe operation permits, at 3:00 p.m. local time.

I think that's quite a statement. This Memorial Day, it's also something to think about. We've worked hard to create a system here at Amtrak that involves each of us in the lives of the people around us in Safe-2-Safer. I hope this weekend, in the midst of the celebrations and the happiness of the beginning of summer, you will take some time to think about the people

A Message from Joe Boardman

Dear Co-workers,

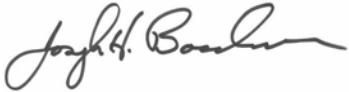

I am happy to announce that Dan Black, currently the assistant vice president of financial analysis, has agreed to temporarily become the acting chief financial officer. Dan has been with Amtrak since 2001 and has an extensive Finance and Transportation background.

This appointment was approved this week by our board of directors and becomes effective immediately.

We continue to actively seek and interview candidates to fill the chief financial officer position.

I know that you will join me in supporting Dan as we move forward.

Sincerely,

Joe Boardman
President and CEO

Mr. Boardman's Speech at the National Press Club

Mr. Boardman gave a speech today at the National Press Club in Washington, D.C. The key issues he addressed included that the guiding principle of a new federal surface transportation investment program must focus on national priorities, connectivity and economic growth. "The Highway Trust Fund is dead. We need to be thinking about how to replace it with a surface transportation program for the 21st Century," he stated.

The current authorization for surface transportation programs – a two-year stopgap law known as MAP-21-- expires this year, providing an opportunity to create a new framework for federal transportation investment.

Mr. Boardman said the notion of a highway program must be replaced with a new, balanced Transportation Trust Fund for projects that are truly national in scope and responsibility, and generate policy outcomes the nation needs.

He explained that a balanced program can provide investment in any surface mode-- including highway, transit and rail (both passenger and freight)--and would unshackle transportation planners, system users and other decisions makers from simply chasing mode-restricted dollars and instead ask them to produce results that matter to the nation.

"A world-leading economy today requires a world-leading transportation system that strengthens the whole network and recognizes and supports the unique roles each mode plays in supporting interstate commerce," he said.

He stressed that every program, every investment must provide for national connectivity and the overarching objective of transportation policies and infrastructure investments must be America's economic future. He noted America is not making the investments needed for growth and improvement, and is just barely keeping the existing system going.

"If we treat the issue as 'what do we do within the existing structure,' we will all lose – nothing worthwhile will change. The questions we as Americans must answer are 'How do we redefine the approach to federal transportation investment to ensure it is focused on truly national needs? How do we recapture the national vision and purpose of the Interstate era?'" he asked.

"We are facing a real challenge and the bankruptcy of the Highway Trust Fund is just the tip of the iceberg. It won't be easy, but if we strive in good faith, we can find a way through to a solution that will give America what it needs," he said.

A copy of his full remarks is attached. Mr. Boardman's address will be aired by C-SPAN at 6:45 p.m. (ET) tonight. <http://www.c-span.org/>

A Message from Joe Boardman

Dear Co-workers,

We are continuing to proactively address and mitigate the ongoing issue of on-time performance (OTP) on Amtrak's long-distance routes. Yesterday Amtrak filed a complaint asking the Surface Transportation Board (STB) to investigate Norfolk Southern Railway (NS) and CSX Transportation (CSXT) for causing unacceptable delays for passengers traveling between Chicago and Washington, D.C., on the *Capitol Limited* service.

We are taking this action under Section 213 of the Passenger Rail Investment and Improvement Act which mandates that the STB initiate an investigation upon the filing of a complaint by Amtrak if the on-time performance of an intercity passenger train falls below 80 percent for two consecutive quarters. In addition, under federal law, Amtrak has a statutory right to preference in the dispatching of intercity passenger trains before freight trains.

Due to persistent excessive delays caused by NS and CSXT freight train interference, the OTP of the *Capitol Limited* at its endpoint terminals was 2.7 percent for the quarter ending September 30, down from an already substandard 33.6 percent the previous quarter. The delays are continuing as Amtrak had to provide bus transportation between Toledo and Chicago for six days in October to better accommodate passengers when *Capitol Limited* trains had often been eight to ten hours late.

Poor on-time performance creates a major disruption for Amtrak customers due to delayed trains and missed connections. It also negatively impacts Amtrak and state-supported services through decreased ridership, lost revenues and higher operating costs. We cannot deliver on our mission of providing intercity transportation with superior safety, customer service and financial excellence.

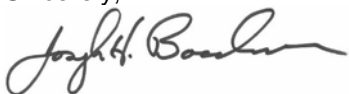

Amtrak has taken additional actions to help improve OTP of passenger trains. On August 29, Amtrak filed an amended complaint with the Surface Transportation Board (STB) seeking an investigation of Canadian National Railway for causing unacceptable train delays on the *Illini/Saluki* service that uses the Canadian National Railway line between Chicago and Carbondale, Illinois.

Late last month we announced that Amtrak established a Blue Ribbon Panel of rail and transportation leaders to identify infrastructure and operational improvements to address the rail traffic gridlock in Chicago. The first meeting of the panel was held yesterday.

I will keep you updated on our progress on these issues.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Since my arrival at Amtrak, the board of directors and I have placed renewed emphasis and commitment to running Amtrak like a business. Our pursuit for financial excellence includes budget transparency, reducing debt, growing revenues, cutting costs across the company and providing a great product to our customers.

I am pleased to share the results of our financial **commitment** for Fiscal Year 2014.

- Amtrak is reporting an unaudited revenue totaling \$3.17 billion for ~~the~~ Fiscal Year 2014. This is the fifth consecutive year of revenue growth and the eighth out of the past nine years.
- Amtrak covered 93 percent of operating costs with ticket sales and other revenues in FY14, up from 89 percent in our prior fiscal year.
- Amtrak is projecting an operating loss of \$227 million for Fiscal Year 2014. The unaudited operating loss is at its lowest level since 1973, and represents a 37 percent decrease from last year and a decrease of more than 52 percent since 2007.
- Moody's Investors Service has confirmed our debt rating as A1/Stable. The rating is a result of the our company's strong operating performance, long term debt reduction to \$1.3 billion – that is 61 percent over the past seven years, and other contributing factors.

This is good news for our company, and we should celebrate our collective success in these important business areas. It takes a team effort – management, employees, partners and customers working together to provide better value for the services that we offer. Our efforts to deliver a better and more financially sound railroad for our customers and the American taxpayer are achieving positive results.

Our improved financial performance also reminds us that we still have room for improvement meeting future passenger demands and industry trends. We still require dedicated federal funding to build, renew and expand our infrastructure and acquire new equipment.

Our financial excellence goal, outlined in our strategic plan, is to be profitable on an operating basis, and be good stewards of capital in order to secure our long-term viability as a company. To do this, we must continue to grow revenue, while focusing on efficiencies and better managing our operating costs. Thank you for your results in our progress towards achieving this goal.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Since my arrival at Amtrak, the board of directors and I have placed renewed emphasis and commitment to running Amtrak like a business. Our pursuit for financial excellence includes budget transparency, reducing debt, growing revenues, cutting costs across the company and providing a great product to our customers.

I am pleased to share some of the financial results for Fiscal Year 2014.

- Amtrak is reporting an unaudited record revenue totaling \$3.2 billion for Fiscal Year 2014. This is the fifth consecutive year of revenue growth and the eighth out of the past nine years.
- Amtrak covered 93 percent of operating costs with ticket sales and other revenues in FY14, up from 89 percent in our prior fiscal year.
- Amtrak is projecting an operating loss of \$227 million for Fiscal Year 2014. The unaudited operating loss is at its lowest level since 1973, and represents a 37 percent decrease from last year and a decrease of more than 52 percent since 2007.
- Moody's Investors Service has confirmed our debt rating as A1/Stable. The rating is a result of our company's strong operating performance, long term debt reduction to \$1.3 billion – that is 61 percent over the past seven years and other contributing factors.

This is good news for our company, and we should celebrate our collective success in these important business areas. Our efforts to deliver a better and more financially sound railroad for our customers and the American taxpayer are achieving positive results.

We have achieved a corporate restructuring that has resulted in a strong emphasis on increased financial transparency, a de-leveraged balance sheet, and providing an improved product to its existing customer base while attracting new passengers.

Amtrak also is building the equipment, infrastructure and organization needed to ensure its strong growth continues. Over the past few years, we have seen an expansion of state-supported services, introduced Wi-Fi and eTicketing technologies, acquired new equipment for the Northeast Corridor and long-distance services, made progress on a major planning effort for the development of next-generation high-speed rail, and installed positive train control safety technology to more sections of track maintained by Amtrak - among other critical capital projects.

Our improved financial performance also reminds us that we still have room for improvement meeting future passenger demands and industry trends. We still require dedicated federal funding to build, renew and expand our infrastructure and acquire the planned new equipment.

A Message from Barry Melnkovic

Dear Colleagues,

In support of our “One Amtrak Way” strategy, Amtrak is developing a company-wide strategy for Training and Employee Development (T&ED) covering all agreement and non-agreement employees across all departments. The single, shared approach to Amtrak T&ED that will be created over the next six months is a critical element in continuing our pursuit of Safety and Security, Customer Focus and Financial Excellence, our corporate goals.

Over the next few months, departments will be asked to provide T&ED related data that will be incorporated into the creation of this strategy. You may even be asked to provide some data or input. For us to succeed in the creation of this strategy, we need everyone to stay informed and be ready to respond if asked to contribute. Your attention and efforts are appreciated, as we work to provide best-in-class T&ED to our best-in-class people.

Thank you.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

A Message from Joe Boardman

Dear Co-workers,

One century ago, Europe descended into World War I, a conflict that would eventually draw in the United States and claim the lives of more than 116,000 American service members.

In November 1919, a year after the fighting had stopped and peace was declared, Americans observed the first Veterans Day (then called Armistice Day). President Woodrow Wilson noted, "The reflections of Armistice Day will be filled with solemn pride in the heroism of those who died in the country's service... [and in] the opportunity [victory] has given America to show her sympathy with peace and justice..."

Americans, then as now, were encouraged to honor war veterans with parades and community gatherings. President Eisenhower would later broaden the holiday to honor all veterans of American wars.

The Vietnam War was a defining event of my generation, and I am proud to have served in that conflict as a member of the U.S. Air Force. Military life taught me how to work as part of a united force, take accountability for the safety of others and strive for integrity in all my actions.

As we celebrate Veterans Day tomorrow, please join me in offering thanks to the men and women of Amtrak who have served our nation in our times of need. They accepted their mission with a true desire to defend and uphold the nation's founding principles.

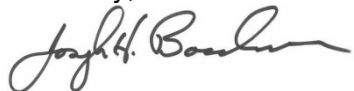

You may recall that last year, Amtrak established a goal of recruiting qualified veterans as 25 percent of all new hires by 2015. To date, we've partnered with numerous companies to hold veterans' hiring fairs across the country. As a result, nearly 500 veterans have begun careers with America's Railroad.

Approximately 20 percent of the Amtrak workforce has self-identified as veterans of the Army, Navy, Marine Corps, Air Force or Coast Guard.

Skills learned in the armed forces, including experience with logistics, heavy machinery and electronic systems, often transition well to a career on the railroad. Veterans also demonstrate a strong dedication to excellence, leadership and safety that benefits the entire company.

I wish you a happy, peaceful Veterans Day.

Sincerely,

Joe Boardman
President and CEO

A Message from Barry Melnkovic

Dear Colleagues,

I am pleased to announce two top level changes to the Human Capital team.

Roger Casalengo will be joining Amtrak on November 17 as a Senior Vice President, Human Capital Business Partners, Labor and Employee Relations and will be located in Washington, D.C., reporting directly to me.

Roger had been with Morgan Hotel Group and prior to that, Financial Industry Regulatory Authority (FINRA) as Senior Director, HR Services. At FINRA Roger was credited with having built from the ground up the infrastructure of the HR Services model

Roger possesses a Master of Arts with a concentration in human resources from Marymount University of Virginia and a Bachelor of Science in hotel, restaurant and tourism from Western Kentucky University.

Charlie Woodcock will be assuming the new position of Vice President, Labor Relations reporting directly to Roger. Both Roger and Charlie will be responsible for demonstrating Amtrak's values and leadership philosophy while providing customers with excellent service and meeting performance targets that are driven by and aligned with the goals of the Strategic Plan. Charlie will be directly responsible for leading the Labor Relations function for Amtrak.

Mr. Woodcock is a respected leader by his peers, employees, business and union partners. He has developed strong cross-functional business knowledge through collaboration across Amtrak. Charlie began his career with Amtrak in Labor Relations in 1975. He has honed his knowledge during his many years with the company, holding roles that included Personnel Administrator, Labor Relations Officer, District Manager Labor Relations, Assistant Director Labor Relations, Director Labor Relations and his current Senior Director Labor Relations role. In his present position he has been instrumental in negotiating Amtrak's local and national contracts and collaborating with the unions to ensure we position the company properly in past and upcoming labor negotiations.

Mr. Woodcock has earned both a Bachelor of Science in industrial relations and a Bachelor of Arts in psychology from the University of North Carolina.

Please join me in congratulating Charlie on his new position and welcoming Roger to the Amtrak team. I hope to arrange an opportunity for Roger to meet with many of you in the next few weeks to start building his foundation and understanding of the "One Amtrak Way".

Thank you for your continued support.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

A Message from Joe Boardman

Dear Co-workers,

I have let you know that we are continuing to work on addressing the ongoing issue of on-time performance (OTP) throughout the national network. Yesterday we took action to improve the OTP of our trains that operate over tracks controlled by host railroads.

Amtrak filed a complaint asking the Surface Transportation Board (STB) to investigate Norfolk Southern Railway (NS) and CSX Transportation (CSXT) for causing unacceptable delays for passengers traveling between Chicago and Washington, D.C., on the *Capitol Limited* service.

We are taking this action under Section 213 of the Passenger Rail Investment and Improvement Act which mandates that the STB initiate an investigation upon the filing of a complaint by Amtrak if the on-time performance of an intercity passenger train falls below 80 percent for two consecutive quarters. In addition, under federal law, Amtrak has a statutory right to preference in the dispatching of intercity passenger trains before freight trains.

Due to persistent excessive delays caused by NS and CSXT freight train interference, the OTP of the *Capitol Limited* at its endpoint terminals was 2.7 percent for the quarter ending September 30, down from an already substandard 33.6 percent the previous quarter. The delays are continuing as Amtrak had to provide bus transportation between Toledo and Chicago for six days in October to better accommodate passengers when *Capitol Limited* trains had often been eight to ten hours late.

Poor on-time performance creates a major disruption for Amtrak customers due to delayed trains and missed connections. It also negatively impacts Amtrak and state-supported services through decreased ridership, lost revenues and higher operating costs. We cannot deliver on our mission of providing intercity transportation with superior safety, customer service and financial excellence.

Amtrak has taken additional actions to help improve OTP of passenger trains. On August 29, Amtrak filed an amended complaint with the Surface Transportation Board (STB) seeking an investigation of Canadian National Railway for causing unacceptable train delays on the *Illini/Saluki* service that uses the Canadian National Railway line between Chicago and Carbondale, Illinois.

Late last month we announced that Amtrak established a Blue Ribbon Panel of rail and transportation leaders to identify infrastructure and operational improvements to address the rail traffic gridlock in Chicago.

I will keep you updated on our progress on these issues.

I appreciate all you do every day to make America's railroad the safest and best it can be.

Drug and Alcohol Policy

Last week, Oregon, Alaska and Washington, D.C., joined with Washington state and Colorado in legalizing the recreational use of marijuana; however, Congress has the authority to overrule this new D.C. law. Last January, certain jurisdictions in Colorado began selling the drug for recreational use.

It is important to re-emphasize that these initiatives will have no bearing on Amtrak's drug testing program. Amtrak's policy and the Department of Transportation's Drug and Alcohol Testing Regulation (49 CFR Part 40) with which we comply does not authorize the use of Schedule I drugs, including marijuana, for any reason.

The drug and alcohol testing examiners will **not** verify a drug test as negative based upon learning that our employee used "recreational marijuana" when states have passed "recreational marijuana" initiatives.

We also need to reiterate that drug and alcohol testing examiners will **not** verify a drug test as negative based upon information that a physician recommended that the employee use "medical marijuana" when states have passed "medical marijuana" initiatives.

Marijuana remains a drug listed in Schedule I of the Controlled Substances Act. It is still a controlled substance barred from Amtrak property by company policy and it remains unacceptable for use by any employee subject to drug testing under Amtrak's or the Department of Transportation's drug testing regulations. Possession of a controlled substance will result in discharge from Amtrak.

Any employees who test positive for marijuana will be dealt with in accordance with Amtrak's drug testing policy and federal law.

We run a safe railroad today and want to continue to make Amtrak the safest railroad it can be.

A Message from Barry Melnkovic and Jerry Sokol

Dear Colleagues,

As leaders and managers, we have the accountability to continually monitor and manage our labor costs so that we help Amtrak achieve our financial excellence goals. This includes efficient oversight and approval for hiring decisions affecting our workforce, especially those that result in raising headcount (and cost) beyond what has already been approved in our operating budget. We also want to streamline decision-making and avoid creating burdensome administrative requirements that are not value-added to our mission.

With this in mind, we wanted to clarify recent guidance on approvals for new hires and the role of the Headcount Approval Committee (HAC) in the approval process. This advisory supersedes, as outlined below, the August 27, 2014, guidance on this topic.

- The authority for approving hiring decisions within a department's approved fiscal year headcount is delegated to the Company Operating Team (COT) Executive (or the delegated representative) for that particular department. Hiring actions approved at the department level cannot result in exceeding their approved fiscal year headcount.
- The HAC will only meet to decide on hiring decisions that will result in exceeding the approved fiscal year headcount. Forms provided in the above-referenced August 27 memo remain in effect and are attached.

For example: The approved fiscal year head count for Department "X" is 100 non-agreement employees. One of the department managers wishes to hire five additional non-agreement employees, which will raise the department's overall headcount to 105. In this case, the authority to proceed with the hiring of the five positions would be made by the HAC, with the concurrence of the department's COT Executive. The attached forms would need to be completed and appropriately submitted.

In the same example, if the additional five hires are instead filling existing vacancies that won't result in exceeding the department's overall approved headcount, then the approval authority for the hire is the department's COT Executive, or their delegated representative to the department. In that case, no HAC approval is required and no forms are required.

The HAC consists of all CEO direct reports who are members of the COT, as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. The HAC's role is to oversee a standardized process for reviewing and approving Amtrak headcount requests.

A Message from Barry Melnkovic and Jerry Sokol

Dear Colleagues,

As leaders and managers, we have the accountability to continually monitor and manage our headcount and labor costs so that we help Amtrak achieve our financial excellence goals. This includes efficient oversight and approval for hiring decisions affecting our workforce, especially those that result in raising headcount (and cost) beyond what has already been approved in our operating budget. We also want to streamline decision-making and avoid creating burdensome administrative requirements that are not value-added to our mission.

With this in mind, we wanted to clarify recent guidance on approvals for new hires and the role of the Headcount Approval Committee (HAC) in the approval process. This advisory supersedes, as outlined below, the August 27, 2014, guidance on this topic.

- The authority for approving hiring decisions within a department's approved fiscal year headcount is delegated to the Company Operating Team (COT) Executive (or the delegated representative) for that particular department. Hiring actions approved at the department level cannot result in exceeding their approved fiscal year headcount.
- The HAC will only meet to decide on hiring decisions that will result in exceeding the approved fiscal year headcount. Forms provided in the above-referenced August 27 memo remain in effect and are attached.

For example, the approved fiscal year head count for Department "X" is 100 non-agreement employees. One of the department managers wishes to hire five additional non-agreement employees, which will raise the department's overall headcount to 105. In this case, the authority to proceed with the hiring of the five positions would be made by the HAC, with the concurrence of the department's COT Executive. The attached forms would need to be completed and appropriately submitted.

Similarly, repurposing positions into different positions will not need HAC approval, as long as the department does not exceed their overall approved headcount. As an example, if Department "X" has a budget of 100 non-agreement employees and there is a business need to repurpose some of their openings into different positions, the approval authority for these decisions will reside with the department's COT Executive and no forms are required.

The HAC consists of all CEO direct reports who are members of the COT, as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. The HAC's role is to oversee a standardized process for reviewing and approving Amtrak headcount requests.

Ebola Virus Update

Our Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in West Africa and the small number of cases identified in the United States. As news about Ebola spreads via the news media and social media, it is important that all Amtrak employees be aware of facts about the virus.

Managers and supervisors are strongly encouraged to regularly share the information below at crew briefings, roll calls and team meetings since not all employees have access to company email or the Amtrak Intranet while on the job. Amtrak will provide future updates to employees as needed. Amtrak operations at this time are not affected.

The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person. Ebola is not spread through the air. Symptoms of Ebola include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Make sure to wet your hands and then lather all parts—including the backs, between fingers and under nails. Once you've worked up a good lather, scrub your hands for at least 20 seconds, rinse and dry.

Hands should be cleaned before preparing food, eating or touching one's face and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger or employee develops the symptoms described above, and has a history of travelling to West Africa or has had contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill individual separated from the other passengers as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill individual or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.

Ebola Virus Update

Our Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in West Africa and the small number of cases identified in the United States. As news about Ebola spreads via the news media and social media, it is important that all Amtrak employees be aware of facts about the virus.

Managers and supervisors are strongly encouraged to regularly share the information below at crew briefings, roll calls and team meetings since not all employees have access to company email or the Amtrak Intranet while on the job. Amtrak will provide future updates to employees as needed. Amtrak operations at this time are not affected.

The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person. Ebola is not spread through the air. Symptoms of Ebola include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Make sure to wet your hands and then lather all parts—including the backs, between fingers and under nails. Once you've worked up a good lather, scrub your hands for at least 20 seconds, rinse and dry.

Hands should be cleaned before preparing food, eating or touching one's face and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger or employee develops the symptoms described above, and has a history of travelling to West Africa or has had contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill individual separated from the other passengers as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill individual or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.

A Message from Joe Boardman

Dear Co-workers,

The rail congestion in Chicago is causing unacceptable delays for Amtrak passengers while reducing revenues and driving up our operating costs. There is an expectation that we will arrive at our destinations safely and in a timely manner. Poor on-time performance is a major disruptive force for our passengers as their arrival time is compromised and connections are missed.

Yesterday we announced that Amtrak is establishing a blue ribbon panel of rail and transportation leaders to identify infrastructure and operational improvements to address the rail traffic gridlock in Chicago. The unprecedented level of rail congestion is causing major delays for Amtrak passengers and freight shipments which are damaging to the U.S. economy.

Panel members on the Chicago Gateway Initiative include Jack Quinn, former U.S. Congressman and past chairman of the U.S. House Railroads Subcommittee, Linda Morgan, former chair of the Surface Transportation Board and Tom Carper, Amtrak board member and past chairman. The freight railroads which operate in Chicago and other stakeholders will be invited to participate in panel activities and are key to implementing recommended solutions.

Because Chicago is the hub of the U.S. rail network, and the key gateway between East and West rail traffic, gridlock in the Chicago area is causing major delays throughout the United States. The congestion problem is caused by a combination of rising demand on the East Coast for more intermodal freight and crude oil shipments which originate west of Chicago, underinvestment in critical rail infrastructure that produces public benefits and short term capital projects that create additional temporary bottlenecks.

The panel is charged with identifying and evaluating infrastructure investments and operational actions that will optimize Amtrak on-time performance and improve freight rail service. Its objectives are to minimize disruptions and delays, and accelerate the construction of infrastructure projects. A final report on recommendations is expected by the end of May 2015.

Chicago is Amtrak's most important hub and many of our trains that operate to and from the city are suffering from poor on-time performance, dispatching issues and high levels of freight train interference. For example, delays of four hours or more for Amtrak trains operating between Chicago and Cleveland have become a near daily occurrence. These and other major delays have ripple effects across the Amtrak national system. If Amtrak trains, which have statutory dispatching priority over freight trains, cannot be moved efficiently through the nation's principal rail hub, then freight shipments will continue to be slowed by gridlock as well.

October 29, 2014 • Page 2 of 2

The CREATE program has been a concerted effort by freight railroads, Amtrak and other stakeholders to address rail congestion issues in Chicago and it has achieved several successes. The Chicago Gateway Initiative will build on the CREATE program by re-energizing the conversation, stimulating new discussion about next steps for securing funding to implement CREATE projects, and seeking to improve cooperative efforts among the railroads.

Alleviating Chicago rail congestion will be of great benefit to Amtrak passengers and the fluidity of the national freight transportation network. We need solutions and predictable dedicated funding to make the needed infrastructure investments.

This announcement is one of a three-prong approach I have initiated to overcome these congestion challenges. Amtrak leadership is fully engaged on this issue and we are committed to understanding and addressing this considerable challenge at the highest levels of the company. The final prong involved the changes and improvements we are making to our Chicago operating plans in order to continually improve the on-time performance of Amtrak trains arriving and departing Chicago Union Station. A number of you are involved in this complicated effort and your contributions are valued.

I appreciate all you do every day to make America's Railroad the safest and best it can be.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

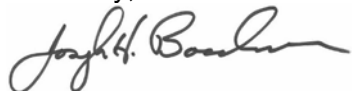

I am deeply saddened to report that earlier today an incident claimed the life of one of our Engineering department employees. Words cannot express how tragic it is to lose a member of the Amtrak family in this manner. I know that you join with me in feeling similar emotions.

The employee's family is in the process of being notified. Until that critical process is complete, we are not releasing any information on the employee. I ask that you respect this important process and refrain from sharing any information you may have until the next-of-kin notification process is completed.

The incident occurred shortly before 11 a.m. today near Germantown, New York. None of the 182 passengers and five crew members aboard the train was injured. The National Transportation Safety Board is investigating the incident.

I am currently on my way to the accident scene and will provide you with updates as they become available.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am very saddened to report that earlier today an accident claimed the life of one of our Maintenance of Way employees. It is particularly tragic to lose a member of the Amtrak family in this manner.

At approximately 11:15 a.m. today, our employee was reported to have been struck by eastbound *Empire Service* Train 280 at milepost 101.0 near Malden, New York as track work was being performed. This resulted in a fatal injury.

There were xxx passengers and xxx employees on board Train 280 at the time of the incident.

Emergency responders are at the scene. No train movement is possible through the area at this time.

I am currently on my way to the accident scene and will provide you with updates as they become available.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

It is with great sadness that I share with you the name of the teammate we lost in yesterday's incident. Minwella Kline was working on the Hudson Line signal wire relocation project near Germantown, New York, when she was fatally struck by an Amtrak train yesterday. Minwella joined Amtrak in 2013 and worked as a C & S Signal Helper based out of Hudson Engineering. Her family has been notified.

The National Transportation Safety Board is leading the investigation. We are cooperating fully so that we learn from what happened and can take the necessary actions to prevent another such incident.

It is hard to cope with a tragedy like this and I want to remind you that our Employee Assistance Program (EAP) counselors are available to speak with you should the need arise. Assistance is always available by going to <http://wiki.intranet.nrpc/display/EAP/Home> and finding a counselor located near you. After November 1, you may call 1 (844)-Amtrak1 (1-844-268-7251) or go to www.achievesolutions.net/AmtrakEAP.

This is a difficult time for the Amtrak family as we mourn the loss of one of our own. Please redouble our focus on safety so that we can prevent future tragedies.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I wanted to provide you with an update to the incident that occurred yesterday morning on the *Empire Service* line.

Signal maintainer xxxxxxxxxxxxxxxxxxxx was working along with a contractor on the Hudson Line signal wire relocation project near Germantown, New York, when she was fatally struck by Train 280. Her family was notified last evening.

The National Transportation Safety Board remains at the site and is leading the investigation.

Our hearts go out to her young daughters and husband. And our prayers and thoughts are with her family, friends, co-workers and the Train & Engine crew.

It is hard to recover from something like this and I want to remind you that our Employee Assistance Program (EAP) counselors are available to speak with you should the need arise. It is totally appropriate to feel sad at times like this and talking with someone is often very beneficial. Assistance is always available by calling 1 (844)-Amtrak1 (1-844-268-7251) or go to www.achievesolutions.net/AmtrakEAP.

As we reflect today, please remember to keep safety at the forefront of your thoughts.

New Engineering Report on New York Tunnels

We all recall the devastation that Hurricane Sandy wrought in the Northeast and how badly both tubes of the Hudson River tunnel and two of the four tubes of the East River tunnel were affected. We again salute the hard work of many of you during that critical time.

Today Amtrak released a new engineering report that details the work needed to fix and enhance these tunnels, recommends closures to perform the necessary work and promotes the need to move forward on the Gateway Program.

The report recommends a phased approach to take individual tubes out of service for extended periods to perform this work. In order to alleviate potential service disruptions which would result from tunnel closures, the report emphasizes the urgency to advance the Gateway Program, a series of infrastructure projects that will double train capacity between Newark, New Jersey, and New York Penn Station. This program includes building two new tunnels under the Hudson River that can increase capacity and help alleviate service impacts to the area as the necessary work is underway.

The tunnels leading into Penn Station remain safe for passenger train operations. We have a very active tunnel inspection program and we conduct regular maintenance work and perform interim work when needed. A permanent fix is soon required so that the tunnels remain available for use by the traveling public.

The goal is to ensure the safety of all our passengers while balancing the efforts to minimize service disruptions and ensure the long-term reliability of the tunnels and service to New York Penn Station.

We will update you on any progress as it may develop.

October 3,, 2014 • Page 1 of 1

Ebola Virus Update

Recent news reports that the Ebola virus outbreak continues in Western Africa and that the first confirmed case of an individual infected with Ebola was reported in the United States.

Infection with Ebola virus requires direct contact with blood or body fluids of an infected person. Ebola is not spread through the air. Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Hands should be cleaned before preparing food, eating or touching one's face and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger develops the symptoms described above, and has a history of travelling to Africa or has had contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill passenger separated from the other passengers as much as possible (three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with ill passenger or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.
- Contact CNOC so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

Amtrak's procedure for employees who have contact with blood or body fluids can be found [here](#) on the company Intranet.

A Message from Barry Melnkovic and Jerry Sokol

Dear Colleagues,

As leaders and managers, we have the accountability to continually monitor and manage our labor costs so that we help Amtrak achieve our financial excellence goals. This includes efficient oversight and approval for hiring decisions affecting our workforce, especially those that result in raising headcount (and cost) beyond what has already been authorized in our operating budget. We also want to streamline decision-making and avoid creating burdensome administrative requirements that are not value-added to our mission.

With this in mind, we wanted to clarify recent guidance on approvals for new hires and the role of the Headcount Approval Committee (HAC) in the approval process. Guidance on this topic was previously provided on August 27, 2014, and remains in effect, subject to the amendments outlined below.

- The authority for approving hiring decisions within a department's authorized fiscal year headcount is delegated to the Company Operating Team (COT) Executive (or their delegated representative) for that particular department. Hiring actions approved at the department level cannot result in exceeding their authorized fiscal year headcount.
- The HAC will only meet to decide on hiring decisions that will result in exceeding the authorized fiscal year headcount. Procedures and forms provided in the above-referenced August 27 memo remain in effect.

For example: The authorized fiscal year head count for Department "X" is 100 non-agreement employees. One of the department managers wishes to hire five additional non-agreement employees, which will raise the department's overall headcount to 105. In this case, the authority to proceed with the hiring of the five positions would be made by the HAC, with the concurrence of the department's COT Executive.

In the same example, if the additional five hires are instead filling existing vacancies that won't result in exceeding the department's overall authorized headcount, then the approval authority for the hire is the department's COT Executive, or their delegated representative to the department. In that case, no HAC approval is required.

The HAC consists of all CEO direct reports who are members of the Company Operating Team, as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. The HAC's role is to oversee a standardized process for reviewing and approving Amtrak headcount requests.

This includes efficient oversight and approval for hiring decisions affecting our workforce, especially those that result in raising headcount (and cost) beyond what has already been approved in our operating budget. We also want to streamline decision-making and avoid creating burdensome administrative requirements that are not value-added to our mission.

With this in mind, we wanted to clarify recent guidance on approvals for new hires and the role of the Headcount Approval Committee (HAC) in the approval process. This advisory supersedes, as outlined below, the August 27, 2014, guidance on this topic.

- The authority for approving hiring decisions within a department's approved fiscal year headcount is delegated to the Company Operating Team (COT) Executive (or the delegated representative) for that particular department. Hiring actions approved at the department level cannot result in exceeding their approved fiscal year headcount.
- The HAC will only meet to decide on hiring decisions that will result in exceeding the approved fiscal year headcount. Forms provided in the above-referenced August 27 memo remain in effect and are attached.

For example: The approved fiscal year head count for Department "X" is 100 non-agreement employees. One of the department managers wishes to hire five additional non-agreement employees, which will raise the department's overall headcount to 105. In this case, the authority to proceed with the hiring of the five positions would be made by the HAC, with the concurrence of the department's COT Executive. The attached forms would need to be completed and appropriately submitted.

In the same example, if the additional five hires are instead filling existing vacancies that won't result in exceeding the department's overall approved headcount, then the approval authority for the hire is the department's COT Executive, or their delegated representative to the department. In that case, no HAC approval is required and no forms are required.

The HAC consists of all CEO direct reports who are members of the Company Operating Team, as well as the Human Capital Vice President of Organizational Effectiveness/Leadership Development. The HAC's role is to oversee a standardized process for reviewing and approving Amtrak headcount requests.

A Message from Chief of Police Polly Hanson

Dear Colleagues,

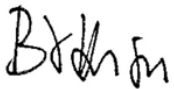

The Islamic State, formerly the Islamic State of Iraq and the Levant (ISIL) or the Islamic State of Iraq and Syria (ISIS), is a Sunni jihadist group in the Middle East. ISIS or ISIL has been designated as a foreign terrorist organization by the United States, the United Kingdom, Australia, Canada, Indonesia and Saudi Arabia, and has been described by the United Nations and Western and Middle Eastern media as a terrorist group. The United Nations has accused the Islamic State of committing "mass atrocities" and war crimes.

ISIS has thousands of fighters in its ranks who, in addition to attacks on government and military targets, have claimed responsibility for attacks that have killed thousands of civilians including American journalists.

While the American government strategizes on how to respond to this ever growing threat, intelligence analysts continue to deliberate about the threat ISIS poses to American interests both here and abroad. As we approach the anniversary of the September 11 attacks, the Amtrak Police Department (APD) want to remind you to report suspicious activity or behavior you see to the APD by text APD11 (27311), by telephone 1-800-331-0008 or in person. We encourage you to remain ever vigilant as you carry out your duties every day.

Thank you for your efforts to make Amtrak safe and secure. Please email me at AmtrakChief@Amtrak.com with any suggestions you may have on how to improve security.

Sincerely,

Chief Polly Hanson
Amtrak Police Department

A Message from Chief of Police Polly Hanson

Dear Colleagues,

The Islamic State, formerly the Islamic State of Iraq and the Levant (ISIL) or the Islamic State of Iraq and Syria (ISIS), is a Sunni jihadist group in the Middle East. It claims religious authority over all Muslims across the world and aspires to bring much of the Muslim-inhabited regions of the world under its political control, beginning with Iraq, Syria and other territory that includes Jordan, Israel, Palestine, Lebanon, Cyprus and part of southern Turkey. ISIS or ISIL has been designated as a foreign terrorist organization by the United States, the United Kingdom, Australia, Canada, Indonesia and Saudi Arabia, and has been described by the United Nations and Western and Middle Eastern media as a terrorist group. The United Nations has accused the Islamic State of committing "mass atrocities" and war crimes.

ISIS is the successor to Al-Qaeda in Iraq, which took part in the Iraqi insurgency against American-led forces and their Iraqi allies following the 2003 invasion of Iraq. ISIS had close links to Al-Qaeda until February 2014, when Al-Qaeda cut all ties with the group, reportedly for its brutality and "notorious intractability".

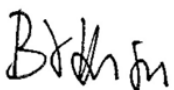

ISIS has grown significantly, gaining support in Iraq due to alleged economic and political discrimination against Arab Iraqi Sunnis, and establishing a large presence in the Syrian governorates.

In June 2014, ISIS had at least 4,000 fighters in its ranks in Iraq who, in addition to attacks on government and military targets, have claimed responsibility for attacks that have killed thousands of civilians including American journalists.

While the American government strategizes on how to respond to this ever growing threat, intelligence analysts continue to deliberate about the threat ISIS poses to American interests both here and abroad. As we approach the anniversary of the September 11 attacks, the Amtrak Police Department (APD) want to remind you to report suspicious activity or behavior you see to the APD by text, telephone or in person and encourages you to remain ever vigilant as you carry out your duties every day.

Thank you for your efforts to make Amtrak safe and secure. Please email me at AmtrakChief@Amtrak.com with any suggestions you may have on how to improve security.

Dear Co-workers,

Effective today, Bruce Pohlot, Chief Engineer, is leaving Amtrak to pursue other opportunities. We thank Bruce for his service to Amtrak and wish him well in his future endeavors.

We are moving forward to announce and fill this key leadership position as quickly as possible. In the interim, Scot Naparstek, currently our Assistant Vice President of Operations, has been named acting head of the Engineering department. Please extend your support to Scot and the Engineering leadership team during this transition.

Sincerely,

DJ Stadtler

A Message from Barry Melnkovic

Dear Co-workers,

I wanted to inform you that Bob Lynch, Vice President for Total Rewards and Wellness, is leaving Amtrak for an opportunity at another organization. Bob's last day will be September 26.

During his time at Amtrak, Bob was responsible for the rollout of Amtrak's Total Rewards which includes the Short Term Incentive Program and wellness incentives. We appreciate Bob's many contributions to Amtrak in his seven years of service to the company. We wish him well in his new endeavors.

I am pleased to announce that Dave Roberts, Director, Employee Benefits, will be promoted to serve as the Vice President for Total Rewards and Wellness. In this role, Dave will report to me and be responsible for Amtrak's compensation and benefits programs including health and medical services. Dave's promotion reinforces our succession planning philosophy which aims to promote individuals who have demonstrated exceptional performance, and the potential for greater contributions to our mission, customers and people.

Dave joined Amtrak in 2013. Prior to Amtrak, Dave worked in positions of increased responsibility at Towers Perrin, Ryder System, National City Bank, and CSL Behring. Dave earned his Master's in business administration from Case Western Reserve University, and his Bachelors in psychology and business management from Eckerd College.

Please join me in congratulating both Bob and Dave, and extend your support to Dave in his new role.

Sincerely,

Barry Melnkovic

A Message from Joe Boardman

Dear Co-workers,

As we celebrate Employee Appreciation across Amtrak, I want to thank you for the work you do every day to achieve our strategic goals. Passenger railroading is fundamentally about people, and thanks to each of you, we continue to nurture an Amtrak culture of excellence. We keep looking for ways to become the safest, most financially sound and customer focused mode of transportation in our country.

I am confident that Amtrak will strengthen its position as the top choice for intercity travel. Ridership and revenue growth over the last decade demonstrate that we provide a transportation choice Americans desire. Continued success means that we must always put our customers first and communicate with them regarding operating challenges such as harsh weather and rail system congestion. By listening to our passengers and observing the transportation marketplace, we are better equipped to meet changing market demands. We continue to place safety as our priority and to foster a safety culture across departments in the corporation.

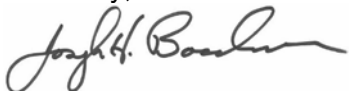

Let's take time to thank our colleagues and to appreciate what each of us does every day to keep Amtrak running. A nationwide business such as Amtrak only operates smoothly and efficiently when we work together to achieve our company goals. We must be open to new ideas and the possibilities of learning from one another.

Our past successes and those we hope to achieve are no small feats, as they involve close coordination across departments. They are the result of the passion that every one of us has for our jobs. If you work on-board the trains, in a station, at a maintenance facility or in one of our offices, never forget that we all are part of Amtrak.

Collaboration is vital to supporting a national passenger rail system that meets our goals and serves the nation. When we look back at our history, our greatest achievements have been the result of collaborative efforts, whether it was designing new equipment, working with state partners to expand services or instituting technological advancements such as eTicketing. We should all be proud of our history and look forward to putting our mark on the future of Amtrak. Together, I believe we can advance our strategic vision and grow the demand for our skills and services.

Congratulations on celebrating what it means to be an Amtrak employee.

Sincerely,

Joe Boardman
President and CEO

Employee/Contractor Property Inspections

On August 12, 2014, Amtrak instituted the Employee Property Inspections policy (P/I number 9.11.0) which governs all employees, Amtrak contractors and independent contractors. This policy stipulates that the company reserves the right to:

- Conduct inspections of company supplied or approved equipment including desks, lockers, filing cabinets and other types of storage units.
- Conduct random inspections of employee belongings and containers (i.e. backpacks, baggage, lunch bags) in order to address identifiable concerns including theft, drug/alcohol misuse, unauthorized weapons and equipment.
- Conduct inspections of company supplied or approved equipment and/or employee belongings and containers as part of a company investigation based upon reasonable suspicion of a violation of corporate/department policy, procedure or a violation of law, statute or regulation.

The full policy can be found on the company Intranet>Library>Policies>Amtrak Policy and Instruction Manual.

This communication is merely an advisory. The inspections described above are governed by the formal policy.

Amtrak is equally committed to providing a safe work environment for our employees and managing our resources in the appropriate manner in order to continually drive our goal of financial excellence.

A Message from Matt Hardison

Dear Co-workers,

Amtrak's 2014 National Train Day was widely regarded as a wonderful success, thanks of course to the hard work of our employees and volunteers across the nation. Over 313 communities held events across all 50 states including 153 events held at Amtrak stations. These local celebrations engaged more than 500 Amtrak employee volunteers and welcomed local community leaders and dignitaries across the nation as key speakers and participants. Trains, train travel, communities and Amtrak were all celebrated.

The growing success of National Train Day has made it clear that a one-day event does not do justice to the communities we support and the resources that an event like this demands. In 2015, we are therefore set to evolve the program from being a single-day celebration to become a traveling, multi-market experience taking place one market at a time over the spring and summer months under the new name **Amtrak Train Days**.

Amtrak Train Days (ATD) will focus on the Amtrak brand, integrate our Exhibit Train at many events and encourage target audiences to engage with, learn about and try out Amtrak's great services. By spreading the program out over the summer, we will be able to support each event more effectively and efficiently.

From spring until fall, ATD will demonstrate why "Trains Matter" by sharing with the local communities we serve the 'reasons to ride' the train. Amtrak Train Days will be a combination of parts - a dedicated tour of the Exhibit Train in select markets, an Amtrak experiential footprint at sponsored events, and an ATD Kit-in-a-Box toolkit to support local community celebrations.

Amtrak Train Days will officially kick off on May 9, 2015, in Chicago Union Station. This event will mark the first stop of the Exhibit Train tour and be the day when local stations, partners and communities from across the nation will be invited to join in the national celebration of trains and train travel by hosting their own events. Importantly, all events **are not** expected to take place on the same day as has been done in the past, but can be timed to coincide with other train festivals and community events. Amtrak will continue to offer event toolkits (ATD Kit-in-a-Box) to those who are interested and by request.

To promote your station and the route(s) that serve your community, the Amtrak Train Days team will once again work with you to coordinate a 2015 event to be held in your community. Whether on May 9 as part of the kick-off or on another chosen date, support will include how to:

- Partner with local businesses and universities who directly benefit from our stations and services to spread the "Trains Matter" message and encourage attendance to the local event.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

December 12, 2014 • Page 2 of 2

- Customize events to each region by incorporating route-specific elements that celebrate the specific train(s) serving each community.
- Capitalize on the ATD Kit-in-a-Box toolkits that will include Amtrak branded printed materials, posters, and giveaways. These resources will make it easier to promote your local event without you having to incur additional publication or production expenses.

If you or someone in your community wants to hold an event, let us know. Amtrak's Train Days event team and agency, LeadDog Marketing Group, will reach out to you to share further Amtrak Train Days 2015 details to help you begin the planning and coordination for your events.

We remain committed to driving train service awareness and ridership, reach new audiences in smaller communities nationwide and reinforce the importance, benefits and value of rail. This exciting next step will allow us to broaden our reach, deepen our conversation with existing and potential customers, and expand our presence in market.

We appreciate your ongoing participation and support in this important endeavor. If you have questions, please contact the ATD Program Manager, Jerome Trahan, by e-mail at TrahanJ@amtrak.com or by telephone at 202.906.4622.

Sincerely,

Matt Hardison
Executive Vice President and
Chief Marketing and Sales Officer

A Message from Joe Boardman

Dear Co-workers,

Tomorrow we begin a new era in offering more modern, reliable and energy efficient service to our Northeast Corridor (NEC) customers.

Along with Vice President Joe Biden, U.S. Secretary of Transportation Anthony Foxx and other dignitaries at Philadelphia's 30th Street Station, we will inaugurate Amtrak's new Cities Sprinter electric locomotive (ACS-64) that will help power the economic future of the Northeast region.

The Cities Sprinter locomotives are the new workhorses of the Amtrak fleet in the Northeast. These next-generation, high performance, energy and maintenance efficient locomotives will enable us to deliver improved performance and reliability for regional and intercity routes along the heavily traveled NEC. More than just mobility, however, these advanced locomotives also will help support the rebirth of rail manufacturing right here at home in America.

The locomotives are being built at Siemens solar-powered manufacturing facility on the West Coast. Nearly 70 other suppliers representing more than 60 cities and 23 states are supporting the effort. This is truly a great success story where American workers coast-to-coast are literally helping build and deliver the future of America's Railroad.

A world class economy requires a world-leading transportation system. These new locomotives are part of Amtrak's comprehensive Fleet Strategy Plan to modernize and expand our equipment. These vastly upgraded locomotives will replace older locomotives that had been in service for the past 25-35 years, with an average of 3.5 million miles traveled. Amtrak expects to have several more new locomotives enter revenue service in the coming weeks, followed by monthly delivery of the remaining units through 2015.

The new locomotives will operate on *Northeast Regional* trains at speeds up to 125 mph on the Northeast Corridor between Washington, D.C., New York and Boston. They also will power all long-distance trains operating on the NEC.

Following tomorrow's announcement, Locomotive Engineers Rick Stolnis and Pat Darcy will travel from Philadelphia to Boston for this locomotive's (#600) inaugural run. Boston-based employees will have a chance to see the locomotive on Friday from 6:00 a.m. to 8:15 a.m. (Track 8) when Train 171, the first revenue run, departs.

Engineers Arthur Fontes and Jack Cawley will take the locomotive from Boston to Washington, D.C., where Washington-based employees will be able to welcome the arrival of Train 171 or see a parked ACS-64 from 3:00 p.m. to 4 p.m. on Track 20.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

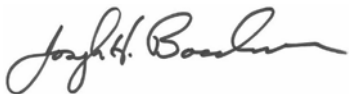

February 5, 2014 • Page 2 of 2

Locomotive engineers and mechanics have been specially trained on the ACS-64 through classroom and instructional time, software-based training and simulation and hands-on training in the field at our Wilmington test track. [To date, 450 Amtrak engineers have been trained and training will continue through 2015.](#)

President Obama's transportation agenda aims to modernize our infrastructure and deliver energy efficient solutions – and Amtrak is a key part of this modernization effort. At the same time, these locomotives directly advance our own Strategic Goals to improve safety, connect communities and reduce our carbon footprint. The future of our railroad starts today.

As we celebrate this big step forward for our railroad, for our customers and for American manufacturing – both your service and support for moving Amtrak into the future are greatly appreciated.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

This week, the disability community around the country celebrates the 24-year anniversary of the signing into law of the Americans with Disabilities Act (ADA). The law was passed in 1990 to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak serves as an important mode of travel for people with disabilities, and we continue to improve our services, facilities and program to ensure accessibility for all.

Accessibility for passengers with disabilities has historically placed Amtrak at a competitive advantage over other travel modes. With input from national disability advocacy groups and a robust program supported by collaborative teams throughout the company, we have taken significant steps to improve the travel experience for passengers with disabilities from trip planning, to purchasing tickets, to stations, to equipment and on-board services.

Over the past five years, Amtrak has:

- Held disability customer service training for front line employees.
- Advanced design and development efforts for setback boarding platforms that utilize a gap mitigation device and put forth efforts to improve the existing Amtrak stock of bridgeplates (used at level boarding platforms) and the ramp used on board the Superliner cars.
- Installed wheelchair lifts or replaced aging and obsolete lifts where needed; approximately 350 stations now have a mobile station lift.
- Made accessibility improvements at more than 200 stations including repairs and upgrades to platforms, ramps and sidewalks and renovated entrance ways and restrooms.
- Developed new standards for Passenger Information Display Systems (PIDS) in stations to include both audio and visual communication
- Either replaced or installed accessible Quik-Trak ticket kiosks in stations.
- Made improvements to Amtrak.com to allow passengers with disabilities to book online; further updates will take effect in the fall.

All Amtrak trains have accessible seating and restrooms, all long-distance trains have accessible bedrooms and Amtrak is the only mode of intercity transportation that provides a discount to passengers with disabilities and their companions.

Our advancements are reflected in part by the ridership growth of passengers with disabilities. Through June 2014, this segment has grown by 2.8 percent over the same period last year.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

July 23, 2014 • Page 2 of 2

Since 2006, through our Great American Stations Project, Amtrak has been working to educate communities on the benefits of redeveloping train stations and making improvements to ensure stations are accessible for all. We have sponsored 10 Civic Conversations around the system touching over 200 Amtrak-served communities across the country. The purpose of these meetings is to bring together city officials, civic leaders and state officials to discuss station redevelopment, accessibility requirements and how Amtrak can serve as a partner in the process.

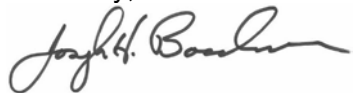

However, despite the progress we have made, there is still work that needs to be done. Upgrading stations and making them accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements.

We own only a small percentage of the nearly 500 stations that are required to become ADA-compliant. We need to find a way to overcome the length of time it takes to work through the complexity of station ownership issues, and we remain committed to working with all of the owners of the stations, platforms and parking facilities to create a nationwide rail system that is accessible to each and every customer and employee.

We are confident that we can build on the progress made to date, and we plan to advance a robust program of station accessibility improvements in Fiscal Year 2015. Making Amtrak service accessible to all individuals aligns with our Strategic Plan, specifically the goals of customer focus, safety and security and mobility and connectivity.

Providing greater accessibility to our trains and Thruway buses, in facilities and stations and on Amtrak.com is the right thing to do as a company because all of our customers must be treated equally and without differentiation, even our customers who happen to have a disability

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

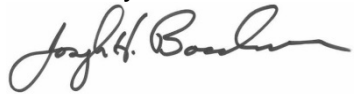

Dear Co-workers,

I am happy to announce that Michael McGee will be joining the company on June 16 as our treasurer, reporting directly to Chief Financial Officer Jerry Sokol. The treasurer is responsible for managing the company's cash flow in the most efficient and profitable fashion possible. The position also involves forecasting future needs for funding and seeking the best alternatives for obtaining it.

Michael has successfully led, managed, and directed finance and operations in diverse and challenging business environments worldwide. He has proven skills across different industries including manufacturing and technology where he has positively impacted earnings and growth for organizations. His most recent positions were as the assistant treasurer and global vice president of finance and treasurer at AGT International where he improved cash flow of the global business units by implementing and monitoring the financial controls of a decentralized global organization.

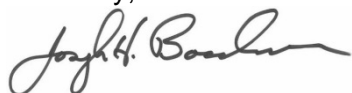

In his previous role as the assistant vice president of Corporate Finance with Zoom Developers, LTD he advised the chief executive officer on financing, working capital and financial structuring for Zoom corporate, entities and global projects that require access to the global capital markets. Prior to that Mr. McGee was the senior manager, Treasury, for CA Inc., formally Computer Associates International Inc. He has held other financial positions both domestically and internationally throughout his more than 20 years in finance.

He holds a Global Executive Master of Business Administration from New York University/The London School of Economics/HEC TRIUM Program in New York, London and Paris and a bachelor's degree in finance from St. Bonaventure University.

Please join me in welcoming Michael to this very important position at America's Railroad.

I would also like to express my appreciation to Scott Veldman who served as our interim treasurer while the search to permanently fill this position was ongoing.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am optimistic that you already know that one of our three strategic goals is customer focus. As a company we are striving to “acquire and retain the most satisfied customers of any travel company in the world.” Our customers deserve a consistently high-quality travel experience. One of the performance measures for this experience is the Customer Satisfaction Index (CSI) measured through the feedback from Amtrak’s customers. Surveys are sent out to recent riders and the overall experience of the ride is used to measure how Amtrak performing.

Through March our system-wide CSI is 82 percent, 1 point below last year and 2 points below our goal. While OTP is part of the cause for this decline, there is no excuse for poor customer service. We have specific examples of increased CSI during this period on several routes facing significant OTP challenges:

- *Adirondack* and *Maple Leaf* services are up 2 points.
- *Carolinian* is up 5 points.
- *Heartland Flyer* is up 4 points.
- *San Joaquin* is up 2 points.

On-board employees and supervisors on these routes intensified their efforts and focused on providing friendliness and helpfulness to their customers, upsold the food and beverage choices and offered clear, timely and appropriate information about delays.

Assistant Superintendent Lisa Hubbard has focused on a sustained team effort in the Empire District to improve CSI scores. Her team starts with frontline employees who are encouraged by their Trainmasters and ARASA Supervisor to demonstrate helpful and friendly service to our passengers. Lisa said that “feedback from passengers is shared with our crews in an effort to increase customer satisfaction and ensure that Amtrak’s expectations regarding customer service are met. By fostering communication between crews, passengers and management alike, we have focused our efforts on factors we can control. The bottom line is that our frontline employees make the difference.” These actions helped minimize the impact of deteriorating OTP on the CSI scores and have proven that we can provide an increased level of service to our customers despite the obstacles in our path.

special employee advisory

June xx, 2014 • Page 2 of 2

For FY14, the Short-Term Incentive (STI) is calculated based on two contributory factors: the adjusted operating loss of the company must come in at \$305 million (funding goal) and a CSI score of 84.25 percent (performance goal).

We are all responsible for moving the needle in terms of how well we meet and surpass our customers' expectations. There are many employees who want to make a difference and clearly we have felt their positive contributions. Let us all continue to work together to provide our on-board crews with the appropriate information and support so that clear and informative announcements can be made and the Lead Service Attendants can reinforce that beverages, snacks and meals are available to tide over the passengers in the event of a delay. We need to encourage and support one another and especially provide encouragement to those who interact with the customers daily to help them improve customer service. If we work together we can meet and even exceed our CSI goals.

Thank you for all you do every day to help this railroad serve our customers.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

I am optimistic that you already know that one of our three strategic goals is customer focus. As a company we are striving to “acquire and retain the most satisfied customers of any travel company in the world.” Our customers deserve a consistently high-quality travel experience. One of the performance measures for this experience is the Customer Satisfaction Index (CSI) measured through the feedback from Amtrak’s customers. Surveys are sent out to recent riders and the overall experience of the ride is used to measure how Amtrak performing.

Through April our system-wide CSI is 82 percent, 1 point below last year and 2 points below our goal. It should come as no surprise that the on-time performance (OTP) score is also down: 4 points lower than the same period last year. OTP is a significant driver of the overall CSI scores. Several causes of poor on-time performance are largely beyond our control and our trains have been adversely affected by significant weather events, mud slides, growth in freight traffic over our host railroads and the inevitable summer track work.

Yet, we have specific examples of increased CSI during this period on several routes facing these same challenges:

- *Adirondack* and *Maple Leaf* services are up 2 points.
- *Carolinian* is up 5 points.
- *Heartland Flyer* is up 4 points.
- *San Joaquin* is up 2 points.

On-board employees and supervisors on these routes intensified their efforts and focused on providing friendliness and helpfulness to their customers, upsold the food and beverage choices and offered clear, timely and appropriate information about delays.

We are all responsible for moving the needle in terms of how well we meet and surpass our customers’ expectations. There are many employees who want to make a difference and clearly we have felt their positive contributions. Let us all continue to work together to provide our on-board crews with the appropriate information and support so that clear and informative announcements can be made and the Lead Service Attendants can reinforce that beverages, snacks and meals are available to tide over the passengers in the event of a delay. We need to encourage and support one another and especially provide encouragement to those who interact with the customers daily to help them improve customer service. If we work together we can meet and even exceed our CSI goals.

Thank you for all you do every day to help this railroad serve our customers.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am pleased to share some good news on our company's financial results for Fiscal Year 2014. Our efforts to operate a more financially sound railroad for our stakeholders are achieving positive results.

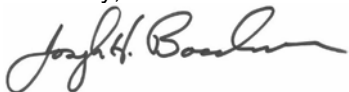

- Amtrak is reporting an unaudited record revenue totaling \$3.2 billion for Fiscal Year 2014. This is the fifth consecutive year of revenue growth and the eighth out of the past nine years.
- Amtrak covered 93 percent of operating costs with ticket sales and other revenues in FY14, up from 89 percent in our prior fiscal year.
- Amtrak is projecting an unaudited operating loss of \$227 million for Fiscal Year 2014. This is at its lowest level since 1973, and represents a 37 percent decrease from last year and a decrease of more than 52 percent since 2007.
- As a result of the company's strong operating performance, long-term debt reductions of approximately 61 percent over the past seven years to \$1.3 billion, and other contributing factors, Moody's Investor Service confirmed Amtrak's A1/Stable debt rating on Nov. 12, 2014.

Amtrak's corporate restructuring has resulted in a strong emphasis on increased financial transparency, a de-leveraged balance sheet, and providing an improved product to our existing customer base while attracting new passengers.

We are also building the equipment, infrastructure and organization needed to ensure strong growth continues. Over the past few years, we have seen an expansion of state-supported services, introduced Wi-Fi and eTicketing technologies, procured new equipment for Northeast Corridor and long-distance services, initiated a major planning effort for the development of next-generation high-speed rail, and installed positive train control safety technology to more sections of track maintained by Amtrak - among other critical capital projects. These actions form the foundation that will support more and faster service, improve the reliability and safety of current and future operations, and meet the expectations of a growing number of customers choosing Amtrak for their travel needs.

Thank you for your hard work and the results you delivered that contributed to Amtrak's success. We are committed to achieving the financial excellence goals outlined in our strategic plan, specifically maximizing revenue, minimizing our operating costs and reducing our operating loss. Our above results indicate we are on the right path, and I look forward to working with you on making continued progress in Fiscal Year 2015.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Since my arrival at Amtrak, the board of directors and I have placed renewed emphasis and commitment to running Amtrak like a business. Our pursuit for financial excellence includes budget transparency, reducing debt, growing revenues, cutting costs across the company and providing a great product to our customers.

I am pleased to share some of the financial results for Fiscal Year 2014.

- Amtrak is reporting an unaudited record revenue totaling \$3.2 billion for Fiscal Year 2014. This is the fifth consecutive year of revenue growth and the eighth out of the past nine years.
- Amtrak covered 93 percent of operating costs with ticket sales and other revenues in FY14, up from 89 percent in our prior fiscal year.
- Amtrak is projecting an operating loss of \$227 million for Fiscal Year 2014. The unaudited operating loss is at its lowest level since 1973, and represents a 37 percent decrease from last year and a decrease of more than 52 percent since 2007.
- Moody's Investors Service has confirmed our debt rating as A1/Stable. The rating is a result of our company's strong operating performance, long term debt reduction to \$1.3 billion – that is 61 percent over the past seven years and other contributing factors.

This is good news for our company, and we should celebrate our collective success in these important business areas. Our efforts to deliver a better and more financially sound railroad for our customers and the American taxpayer are achieving positive results.

We have achieved a corporate restructuring that has resulted in a strong emphasis on increased financial transparency, a de-leveraged balance sheet, and providing an improved product to its existing customer base while attracting new passengers.

Amtrak also is building the equipment, infrastructure and organization needed to ensure its strong growth continues. Over the past few years, we have seen an expansion of state-supported services, introduced Wi-Fi and eTicketing technologies, acquired new equipment for the Northeast Corridor and long-distance services, made progress on a major planning effort for the development of next-generation high-speed rail, and installed positive train control safety technology to more sections of track maintained by Amtrak - among other critical capital projects.

Our improved financial performance also reminds us that we still have room for improvement meeting future passenger demands and industry trends. We still require dedicated federal funding to build, renew and expand our infrastructure and acquire the planned new equipment.

Our financial excellence goal, outlined in our strategic plan, is to be profitable on an operating basis, and be good stewards of capital in order to secure our long-term viability as a company. To do this, we must continue to grow revenue, while focusing on efficiencies and better managing our operating costs. Thank you for your results in our progress towards achieving this goal.

Sincerely,

Joe Boardman

A Message from Barry Melnkovic and Eldie Acheson

Dear Delegate Managers,

The Immigration Reform and Control Act of 1986 (IRCA) requires employers to verify that all newly hired employees present "facially valid" documentation verifying the employee's identity and legal authorization to accept employment in the United States. Documentation provided must be physically validated by a company representative for authenticity. This documentation is captured and maintained via the Employment Eligibility Verification form I-9.

The Human Capital department, in partnership with the Law department, recently conducted a voluntary review of all I-9 forms and supporting documentation and as a result, some errors were identified. Therefore, Amtrak has committed to obtaining a new, correct I-9 for those employees whose original I-9 on file contains an error or omission.

We need your help in order to make this initiative successful. As a company representative, we need your support to assist in the completion of electronic I-9s for employees in your business unit. Specifically, we are requesting you enter an online system and submit an electronic I-9 with the employee present if the employee is unable to travel to an I-9 Collection Hub. **Due to the importance of this initiative, managers have been encouraged to gain involvement from their delegates.**

All identified employees will be required to have a new electronic I-9 completed by Dec. 31, 2014, and those impacted will receive a communication mailed to their homes. As we move closer to the anticipated go-live date of Nov. 1, 2014, more information will be provided including webinar training schedule and access to the online platform.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

Eldie Acheson
Chief Legal Officer, General Counsel and Corporate Secretary

Dear Managers,

The Immigration Reform and Control Act of 1986 (IRCA) requires employers to verify that all newly hired employees present "facially valid" documentation verifying the employee's identity and legal authorization to accept employment in the United States. Documentation provided must be physically validated by a company representative for authenticity. This documentation is captured and maintained via the Employment Eligibility Verification form I-9.

The Human Capital department, in partnership with the Law department, recently conducted a voluntary review of all I-9 forms and supporting documentation and as a result, some errors were identified. Therefore, Amtrak has committed to obtaining a new, correct I-9 for those employees whose original I-9 on file contains an error or omission. As a company representative, we need your support to complete a new I-9 either by: 1) you (or your delegate) entering an online system and completing an electronic I-9 with your employee present **or** 2) sending your employee to a defined location to have a new I-9 completed for them. **If you have a delegate in place, you are encouraged to have them facilitate completion of the I-9 on your behalf.**

Additional information will be forthcoming, providing a link to the online tool and the designated I-9 location schedule. Further, you will soon receive a list of your identified employees who are required to complete a new I-9 by Dec. 31, 2014. These employees will receive a communication mailed to their homes. Throughout the duration of this collection, there will be dedicated resources available to assist you with completion of the electronic I-9 and to provide general guidance regarding the process. As we move closer to the anticipated go-live date of Nov. 1, 2014, more information around the location schedule and resources will follow.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer (CHCO)

PSSA Nomination Period Extended

Nominations for the 2014 President's Service and Safety Awards will now be accepted through **Friday, May 9th, 2014**.

Nomination forms are located in the "Forms Library" on our company Intranet, <http://apps.nrpc/forms/> or by emailing 2014PSSA@amtrak.com.

Below are descriptions of each of the award categories. Please especially note the new Living our Values Award and two returning categories - the Safety Committee of the Year Award and the Diversity Award.

2014 Award Categories:

- o [Achievement Award](#) - Nominees in the Achievement category have completed an impressive and unique accomplishment or project that had a significant and positive impact on Amtrak, our business results and/or passenger rail.
- o [Amtrak Champion Award](#) (External Partner) - Nominees in the Amtrak Champion category are non-employees (volunteers, business partners, state partners, etc.) who have successfully completed a project, implemented a program or made a contribution that significantly preserves, expands or enhances the safety or quality of passenger rail.
- o [Diversity Award](#) - Nominees in the Diversity category are Amtrak employees who have completed unique and impressive actions, accomplishments, projects or events that significantly improve diversity, accessibility and/or inclusion at Amtrak for our employees and/or passengers. Their work helps promote understanding, accepting, valuing and celebrating differences among people based on age, race, religion, culture, gender, disability, sexual orientation and veteran status; and/or making Amtrak more accessible to people with disabilities.
- o [Excellence in Customer Service Award](#) - Nominees in the Excellence in Customer Service category are customer-facing employees who work with our passengers on a daily basis (including, but not limited to, reservation sales agents, service attendants, conductors, ticket/accounting clerks, redcaps, customer service representatives, etc.) and are passionate about our passengers and ensuring that they have positive experiences while traveling on Amtrak. They go above and beyond for our customers every day to exceed their needs and expectations. They have the ability to provide a smile and excellent service even during challenging customer situations. Their hard work and dedication to our passengers often positively impacts customer satisfaction, loyalty and sales.

o [Excellence in Leadership](#) - Nominees in the Excellence in Leadership category are highly effective and respected leaders of people who directly supervise at least one employee and are in an official position such as, managers, directors, supervisors, and ARASA foremen. They serve and mentor others, help them grow, share information, provide respectful feedback and hold their teams accountable. They are passionate about managing people, understand what it takes to have a successful workgroup and their teams are often top contributors to Amtrak's success and achievement of our goals.

o [Innovation Award](#)- Nominees in the Innovation category are employees who have demonstrated imagination and creativity in designing and implementing something new and unique at Amtrak such as a major improvement or solution to a significant problem. Their efforts resulted in significant positive impact/results for Amtrak. The impact may be monetary, organizational or process-oriented and is not limited to technical innovations. Nominees in this category are usually creative, driven, problem solvers and idea people.

o [Living Our Values Award](#) - Nominees in the Living Our Values category consistently demonstrate the qualities exemplified by Amtrak's core values of Commitment to Safety, Integrity, Spirit of Service, Desire to Improve, Respect, Entrepreneurial Spirit, Accountability, Humility and Forgiveness. Nominees bring Amtrak's values to life and actively show that our values are at the very heart of our business. Nominees in this category inspire, support and encourage others to embrace Amtrak's values.

o [Safety Achievement Award](#) - Nominees in the Safety Achievement category have completed an impressive and unique action, accomplishment, event or project that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

o [Safety Committee of the Year](#)- Nominees in the Safety Committee of the Year category are Safety Committees and Safe2Safer Steering/Core Committees that have completed impressive and unique actions, accomplishments, events and/or projects that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

**Please note: All Safety Committees are eligible for this award including Safe-2-Safer Core Committees and Safe-2-Safer Steering Committees.*

o [Sustained Excellence Award](#)- Nominees in the Sustained Excellence category consistently go above and beyond their required job responsibilities to drive results to help Amtrak meet our goals. They are employees who are self-motivated and know what it takes to get things done. They put their all into their work and because of that they get results. They are reliable and often help their teams achieve as a group. They have a history of accomplishments and never stop trying to improve.

o [Valor Award](#)- Nominees in the Valor category are Amtrak employees who have courageously handled a life-threatening or emergency situation related to Amtrak employment in an outstanding and heroic manner, usually with danger or risk to themselves.

A Message from Susan Reinertson

Dear Co-workers,

I am happy to invite you to become an Amtrak Ambassador, a new program offered by the Amtrak Emergency Management and Corporate Security Department (EMCS). This program provides an opportunity for you to develop skills in customer service and safety, while supporting station needs during customer surges and station emergencies.

Amtrak Ambassadors will receive training in a range of preparedness activities required to ensure the safety of station visitors during customer surge events such as National Train Day, holiday surge activities or unplanned emergencies that lead to service disruptions. The training modules include customer service, all-hazards preparedness, emergency action plans, incident procedures and station awareness. Employees who successfully complete this training will be recognized as our Amtrak Ambassadors.

Training will be conducted over a four-hour period on the dates/locations below:

- | | |
|--------------------------------|------------|
| • Los Angeles/New York | October 9 |
| • Philadelphia | October 10 |
| • Oakland | October 11 |
| • Baltimore/Seattle/Washington | October 14 |
| • Miami | October 15 |
| • Boston/New Orleans | October 16 |

All interested participants must obtain their supervisor's signature on the attached approval form and return the form at the training session. Additional details with logistics information will be available shortly. Additionally, all Amtrak Ambassadors will be required to complete their online annual Amtrak Fire Extinguisher Training and Amtrak Security Awareness Training before becoming certified as Ambassadors.

Your participation in this program is vital to our emergency response capabilities. Thank you for your commitment to ensuring that Amtrak stations are safe and secure for all customers and employees.

Sincerely,

Susan Reinertson
Chief, Emergency Management and
Corporate Security

A Message from Joe Boardman

Dear Co-workers,

Over the last year, Amtrak's Human Capital and business leadership teams across the organization have been reviewing existing job documentation, consolidating job classifications and validating them against the marketplace to create the best Amtrak Career & Compensation Structure for non-agreement employees.

Currently, Amtrak has over 1,300 unique titles for our nearly 2,900 non-agreement employees. It is no surprise there is confusion about what is expected at each level and how every title fits into the organization. The foundation of Amtrak's Strategic Plan is to have an engaged workforce that works within a strategically designed organizational structure and is equipped with the tools and skills needed to carry out our mission. The current state is inconsistent with achievement of our plan and requires realignment.

The Amtrak Career & Compensation Structure combines similar job titles to create uniformity. Human Capital has successfully reduced the number of unique job titles for non-agreement employees by more than 60 percent. This new structure provides a consistent framework to help employees understand the core competencies they need to be successful in their role and identify development opportunities across the company. It provides managers with a tool to aid their Performance Conversations and guide the development of their employees. And, it provides Amtrak with a basis to identify and predict workforce needs, manage resources and ensure equitable pay.

In the next few weeks, managers will be educated on the new Career & Compensation structure and then meet one-on-one with each of their employees to review where the employee's current role fits in the new structure and what, if any, title impact has occurred. A title change is not a reflection of individual performance; rather it reflects the need for standardization so all employees can better understand how they fit into the broader organization.

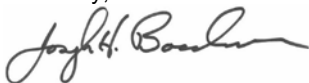

Your manager will provide you with a personalized statement that will outline your title, band, zone, how your salary compares to market (compa ratio) and your STI Target Incentive opportunity. Our goal is that you all will understand how your band/zone is defined, how to grow your Amtrak career and the best way to earn a merit award based on both your compa ratio and performance.

In the coming weeks, please take advantage of the training and education resources available for the Career & Compensation Structure that were mentioned in recent *Amtrak This Week* articles. The Compensation eLearning computer-based training can be found in the Learning Management System and provides detailed information about the new structure. It can be found on the Amtrak Intranet home page>Employee Information Portal>Training>Course Catalog>Management and Supervisory>Compensation and Career Structure. In addition, a new Intranet site has been created to provide additional resources regarding this important initiative. It can be accessed through the following link:
<http://wiki.corp.nrpc/pages/viewpage.action?pageId=306217004>.

If you have any questions or concerns, please contact the Compensation team at compensationdept@amtrak.com or reach out to the Human Capital business partner for your department.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

October 27, 2014 • Page 1 of 1

AMTRAK RIDERSHIP AND REVENUES CONTINUE STRONG GROWTH IN FY 2014

Amtrak posted record ticket revenues for its Fiscal Year 2014 ending Sept. 30, and achieved an increase in ridership over the prior fiscal year, reflecting strong continued demand for passenger rail. However, meeting future growth in passenger demand requires investing in the infrastructure that supports intercity passenger rail and resolving unacceptable congestion delays caused by freight railroads that own the tracks.

For Fiscal Year 2014, ticket revenues reached \$2.189 billion, up 4.0 percent from the prior year. Ridership was more than 30.9 million, an increase of 0.2 percent over adjusted FY 2013 numbers. The slower growth in ridership than in recent years is due, in part, to a harsh winter season and on-time performance issues associated with freight train delays and infrastructure in need of replacement.

With ridership of 11.6 million, the Northeast Corridor (NEC) had its highest ridership year ever in FY 2014, up 3.3 percent from the prior year. However, ridership on long-distance routes and state-supported services declined by 4.5 percent and 0.6 percent, respectively.

The *Acela Express* and the *Northeast Regional* services each set a new ridership record. In particular, *Acela* showed strong popularity, with 28 days where the number of trips topped 14,000 as compared to just five such days in the previous year. Eight other routes also set ridership records, including *Adirondack*, *Auto Train*, *Albany-Niagara Falls-Toronto*, *Blue Water*, *Capitol Limited*, *Empire Service*, *Piedmont*, and *Washington-Lynchburg*.

"Amtrak is clearly selling a product that is very much in demand," said Amtrak Board Chairman Tony Coscia. "Achieving strong ridership and revenue despite the challenges with aging infrastructure and freight rail congestion demonstrates Amtrak's commitment to improving its financial and operating performance, and is a credit to Amtrak's management and staff. It is now time to leverage Amtrak's successes in increasing ridership and improving performance by making much-needed investments in our nation's passenger rail system."

"As more and more people choose Amtrak for their travel needs, investments must be made in the tracks, tunnels, bridges and other infrastructure used by intercity passenger trains particularly on the Northeast Corridor and in Chicago," said Amtrak President and CEO Joe Boardman. "Otherwise, we face a future with increased infrastructure-related service disruptions and delays that will hurt local and regional economies and drive passengers away."

Boardman explained that nowhere is the connection between passenger rail and economic growth stronger than in the NEC, but its infrastructure

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 27, 2014 • Page 2 of 2

continues to age and suffers from a chronic case of long-term underfunding. He said a new federal policy and funding arrangement is needed to create a significant and reliable multi-year capital investment program to reverse the decay of NEC infrastructure and support other intercity passenger rail projects across the nation.

Further, many long-distance and state-supported trains operate over tracks owned and dispatched by freight railroads that could benefit from infrastructure upgrades to improve the fluidity of the rail system. Not only are delays to passenger trains on these tracks increasing, but so, too, is the magnitude of those delays. On many of these routes, passenger rail has experienced a significant decline in on-time performance, lower ridership and revenue, and increased operating costs.

“The freight railroads simply have to do a better job in moving Amtrak trains over their tracks,” Boardman stressed. “Amtrak is prepared to take all necessary steps with the freights to enforce our statutory, regulatory and contractual rights to meet the expectation of our passengers for improved on-time performance.”

Amtrak is working with the freight railroads to address the congestion situation and is also pursuing remedies through the federal Surface Transportation Board. In addition, Amtrak is open to supporting public funding to supplement freight railroad track capacity, but only after the operational and maintenance improvements under their own control have been exhausted and prove to be insufficient.

Please note that in FY 2014, Amtrak began counting actual lifted ridership for multi-ride tickets (due to eTicketing), rather than the estimated multi-ride ridership used previously. This change has no impact on ticket revenue.

Their efforts resulted in significant positive impact/results for Amtrak. The impact may be monetary, organizational or process-oriented and is not limited to technical innovations. Nominees in this category are usually creative, driven, problem solvers and idea people.

o [Living Our Values Award](#) - Nominees in the Living Our Values category consistently demonstrate the qualities exemplified by Amtrak's core values of Commitment to Safety, Integrity, Spirit of Service, Desire to Improve, Respect, Entrepreneurial Spirit, Accountability, Humility and Forgiveness. Nominees bring Amtrak's values to life and actively show that our values are at the very heart of our business. Nominees in this category inspire, support and encourage others to embrace Amtrak's values.

o [Safety Achievement Award](#) - Nominees in the Safety Achievement category have completed an impressive and unique action, accomplishment, event or project that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

o [Safety Committee of the Year](#)- Nominees in the Safety Committee of the Year category are Safety Committees and Safe-2-Safer Steering/Core Committees that have completed impressive and unique actions, accomplishments, events and/or projects that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

**Please note: All Safety Committees are eligible for this award including Safe-2-Safer Core Committees and Safe-2-Safer Steering Committees.*

o [Sustained Excellence Award](#)- Nominees in the Sustained Excellence category consistently go above and beyond their required job responsibilities to drive results to help Amtrak meet our goals. They are employees who are self-motivated and know what it takes to get things done. They put their all into their work and because of that they get results. They are reliable and often help their teams achieve as a group. They have a history of accomplishments and never stop trying to improve.

o [Valor Award](#)- Nominees in the Valor category are Amtrak employees who have courageously handled a life-threatening or emergency situation related to Amtrak employment in an outstanding and heroic manner, usually with danger or risk to themselves.

Amtrak® Employee Update

May 1, 2014

PSSA Nomination Period Extended

Nominations for the 2014 President's Service and Safety Awards will now be accepted through **Friday, May 9th, 2014**.

Nomination forms are located in the "Forms Library" on our company Intranet, <http://apps.nrpc/forms/> or by emailing 2014PSSA@amtrak.com.

Below are descriptions of each of the award categories. Please especially note the new Living our Values Award and two returning categories - the Safety Committee of the Year Award and the Diversity Award.

2014 Award Categories:

- o [Achievement Award](#) - Nominees in the Achievement category have completed an impressive and unique accomplishment or project that had a significant and positive impact on Amtrak, our business results and/or passenger rail.
- o [Amtrak Champion Award](#) (External Partner) - Nominees in the Amtrak Champion category are non-employees (volunteers, business partners, state partners, etc.) who have successfully completed a project, implemented a program or made a contribution that significantly preserves, expands or enhances the safety or quality of passenger rail.
- o [Diversity Award](#) - Nominees in the Diversity category are Amtrak employees who have completed unique and impressive actions, accomplishments, projects or events that significantly improve diversity, accessibility and/or inclusion at Amtrak for our employees and/or passengers. Their work helps promote understanding, accepting, valuing and celebrating differences among people based on age, race, religion, culture, gender, disability, sexual orientation and veteran status; and/or making Amtrak more accessible to people with disabilities.
- o [Excellence in Customer Service Award](#) - Nominees in the Excellence in Customer Service category are customer-facing employees who work with our passengers on a daily basis (including, but not limited to, reservation sales agents, service attendants, conductors, ticket/accounting clerks, redcaps, customer service representatives, etc.) and are passionate about our passengers and ensuring that they have positive experiences while traveling on Amtrak. They go above and beyond for our customers every day to exceed their needs and expectations. They have the ability to provide a smile and excellent service even during challenging customer situations. Their hard work and dedication to our passengers often positively impacts customer satisfaction, loyalty and sales.

o [Excellence in Leadership](#) - Nominees in the Excellence in Leadership category are highly effective and respected leaders of people who directly supervise at least one employee and are in an official position such as, managers, directors, supervisors, and ARASA foremen. They serve and mentor others, help them grow, share information, provide respectful feedback and hold their teams accountable. They are passionate about managing people, understand what it takes to have a successful workgroup and their teams are often top contributors to Amtrak's success and achievement of our goals.

o [Innovation Award](#)- Nominees in the Innovation category are employees who have demonstrated imagination and creativity in designing and implementing something new and unique at Amtrak such as a major improvement or solution to a significant problem. Their efforts resulted in significant positive impact/results for Amtrak. The impact may be monetary, organizational or process-oriented and is not limited to technical innovations. Nominees in this category are usually creative, driven, problem solvers and idea people.

o [Living Our Values Award](#) - Nominees in the Living Our Values category consistently demonstrate the qualities exemplified by Amtrak's core values of Commitment to Safety, Integrity, Spirit of Service, Desire to Improve, Respect, Entrepreneurial Spirit, Accountability, Humility and Forgiveness. Nominees bring Amtrak's values to life and actively show that our values are at the very heart of our business. Nominees in this category inspire, support and encourage others to embrace Amtrak's values.

o [Safety Achievement Award](#) - Nominees in the Safety Achievement category have completed an impressive and unique action, accomplishment, event or project that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

o [Safety Committee of the Year](#)- Nominees in the Safety Committee of the Year category are Safety Committees and Safe-2-Safer Steering/Core Committees that have completed impressive and unique actions, accomplishments, events and/or projects that had a significant impact on safety at Amtrak and/or in the passenger rail industry.

**Please note: All Safety Committees are eligible for this award including Safe-2-Safer Core Committees and Safe-2-Safer Steering Committees.*

o [Sustained Excellence Award](#)- Nominees in the Sustained Excellence category consistently go above and beyond their required job responsibilities to drive results to help Amtrak meet our goals. They are employees who are self-motivated and know what it takes to get things done. They put their all into their work and because of that they get results. They are reliable and often help their teams achieve as a group. They have a history of accomplishments and never stop trying to improve.

o [Valor Award](#)- Nominees in the Valor category are Amtrak employees who have courageously handled a life-threatening or emergency situation related to Amtrak employment in an outstanding and heroic manner, usually with danger or risk to themselves.

Amtrak Holiday Merchandise Sale

There will be an Amtrak holiday merchandise sale on December 4 and December 5 from 2 p.m. to 6 p.m. near the Frank Furness display in the Wilmington station.

You can purchase Amtrak-branded merchandise and collectibles in time for the holidays. The sale will feature many items only available at this location as well as items from our online store www.amtrak.com/store. Customers who place an order online while in the store are eligible for free shipping on that order. A special promotional code will be entered by the store employee and is valid only once per customer account.

New as well as old items will be offered at a considerable discount so we cannot offer separate employee discounts on this merchandise. Supplies are limited so please shop early so you are not disappointed. This sale is open to employees and the public.

Happy and safe holidays to all.

Reminder: Oakland Smart ID Photo Collection

Here is your chance to get your photo taken for the new IDs. For those who will be in the Oakland area next week, the Smart ID Team will be on-site to take your photo.

Having your photo taken will not only fulfill the requirements to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please visit them at the following locations and times:

Dates	Locations	Times
Wed., Aug. 20	West Oakland Maintenance Facility 1303 3rd Street Oakland CA 94607- (Enter through side of fence that has Guard Shack-Ask for Noelle)	7:30 a.m.- 4:30 p.m.
Thurs., Aug. 21	Oakland Station 245 2nd Street Oakland, CA (Conference room in station)	8:00 a.m.– 5:00 p.m.

****Remember all employees and contractors need to update their photos in order to obtain their new Amtrak IDs.***

September 16, 2014

Reminder: Smart ID Photo Collection

As you know, Amtrak is in the process of issuing new Amtrak IDs. It is mandatory for all employees and contractors to update their photos in order to receive a new ID.

If you have not yet submitted your photo, or if you have not had your photo taken by the Smart ID team, then please submit your photo by **Friday, September 19**.

Employees and contractors who do not submit a new photograph by the deadline will experience significant delays in receiving a new ID.

Here are the photo requirements:

- All photos must have a white background and display a clear headshot (no hats, sunglasses, etc.).
- Photo should include full face view with both eyes open.
- If you wear eye glasses regularly, wear them in your photo.

All photos must be emailed or texted to the Smart ID team at IDrefresh@amtrak.com. Please include SAP # and full name in the subject line.

Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

January 17, 2014

Notice to Interested Parties Who Participate in Either the Agreement 401(k) Plan, Non-Agreement 401(k) Plan or the Retirement Income Plan

The attached Notices to Interested Parties are being provided to you for posting/distribution, as required by the Internal Revenue Service (IRS). In brief, the notices are intended to notify participants in the National Railroad Passenger Corporation Savings Plan, Amtrak's Retirement Savings Plan for Agreement Employees and the Retirement Income Plan for Employees of National Railroad Passenger Corporation (the "Plans") of the filing with the IRS of an application for determination as to the plans' tax qualified status under the Internal Revenue Code and of participant's right to comment.

Amtrak® Employee Update

April 30, 2014

Customer Experience Delivery and Training Survey

The Customer Service team is embarking on a mission to redefine the employee experience and enhance the customer experience in alignment with our customer service goal in the Amtrak Strategic Plan.

In order for this mission to be effective, we would like all Amtrak employees' voices represented. You should have received a Customer Experience survey which allows you to share your ideas on making a better and stronger Amtrak. We know there are many employees who want to make a difference. Your feedback is essential to making this happen for Amtrak today, tomorrow and in the years ahead.

If you did not receive the survey or are having issues with it working correctly, please email JFreund@WBAResearch.com.

Who	Every active full-time and part-time Amtrak employee should have received the survey.
What	<p>Agreement employees were sent a survey packet in the mail which includes a pre-addressed, postage-paid return envelope for a timely return.</p> <p>Non-agreement employees received an email from "Amtrak and WBA Research" (invite@survey.wbanda.com). The subject line read, "<i>Amtrak Customer Experience and Training Survey.</i>"</p>
When	<p>Surveys were sent out on April 23, 2014.</p> <p>Completed surveys are due by May 12, 2014.</p>
How	<p>Your feedback is completely confidential and unidentifiable.</p> <p>Your survey will be sent directly to WBA Research, an independent market research firm. Your individual survey will not be shared with anyone at Amtrak.</p>
Why	<p>Amtrak cares about what you think. Your voice is vital to shaping the future of Amtrak's employee and customer experience (for passengers, state partners, stakeholders and colleagues).</p> <p>Your input will help build effective development programs that will dramatically contribute to a better Amtrak employee and customer experience.</p> <p>Action Requested: We need to hear from every Amtrak employee. The survey will take about 15 minutes of your time, but your participation will make a tremendous difference and have a lasting influence on employees and customers.</p>

Philadelphia 30th Street Station **District Plan Open House #2**

Calling all Amtrak 30th Street Station Staff! You are invited to attend an open house this month for the Philadelphia 30th Street Station District Plan. At the Open House, project staff will be available to share early concept ideas, respond to any questions and review public comment from the previous open house.

As day-to-day users of the station, your input into the planning process is extremely valuable. We thank you in advance for your support and hope to see you at the open house.

The open house will be held on Wednesday, June 17, on the main concourse at 30th Street Station (30th Street Side) from 4-7 p.m. There will be no formal presentation, but members of the project team will be on hand to share early concept ideas and answer questions.

Amtrak is working on the 30th Street Station District Plan with Brandywine Realty Trust, Drexel University, PennDOT, SEPTA and a host of area stakeholders. It is a joint planning effort focused on creating a single integrated vision for the area surrounding 30th Street Station as a dynamic neighborhood anchored by a world-class transportation hub.

For additional information on the District Plan and open house, please visit www.PhillyDistrict30.com or contact Danelle Hunter at ATS 728-2176.

- 23rd Street NW both sides between Lincoln Memorial Circle NW and E Street NW from 12:00 AM to 6:30 PM

PUBLIC TRANSPORTATION

Metrorail: Metrorail service is not expected to be impacted. On weekdays, Metrorail opens at 5:00AM and closes at midnight. The closest Metrorail station to the State Department is Foggy Bottom Station on the Orange, Silver, and Blue lines. The closest stations to the Mandarin Oriental Hotel are the Smithsonian Station on the Orange, Silver, and Blue lines, and L'Enfant Plaza Station on the Orange, Silver, Blue, Yellow and Green lines. For schedule and fare information, please visit wmata.com or call (202) 637-7000.

Metrobus: Several Metrobus routes will be detoured due to street closures around Summit Event locations, including routes A9, A42, A46, A48, D51, H1, L1, N3, S1, V7, X1, W9, 31, 32, 36, 39, 52, 80, 3Y, 7Y, 11Y and 16Y. Riders traveling on these routes are encouraged to allow additional travel time on Monday, Aug. 4, and Tuesday, Aug. 5. For specific detour information by route, visit wmata.com/alerts/bus. For real-time delay information, please follow @metrobusinfo on Twitter or subscribe to email or text alerts at wmata.com/metroalerts.

MetroAccess: Due to street closures, MetroAccess vehicles may not be able to provide para-transit service to certain locations within the security zone. For assistance, Metro Access customers may call (301) 562-5350.

Please be careful.

September 25, 2014

Concur Travel Tool Temporarily Unavailable

Due to scheduled security enhancements, Amtrak employees will not have online access to Concur Travel from 6:00 p.m. EST, September 26 – 9:00 p.m. EST, September 29, 2014.

During this time, please call Concur Travel at 1-800-892-1911 for all Amtrak business travel needs.

Thank you.

December 12, 2014

I-9 Collection Campaign

The I-9 Collection Campaign is headed your way! If you received prior notification that you need a new electronic I-9 completed, please stop by throughout the week. Representatives will be available from **5:00 a.m. to 5:00 p.m.** on the following dates:

12/14/14 – 12/20/14	Seattle (Holgate) Transportation Building	Multnomah Falls Conference Room
------------------------	--	------------------------------------

Please bring your List A **OR** List B and List C original documentation with you to have an electronic I-9 completed for you in minutes! The most common forms of documentation are: List A – U.S. passport **OR** Lists B/C – driver's license and social security card or birth certificate. For the full list of acceptable documentation, please visit the I-9 Collection Campaign Wiki page under the FAQs link.

<http://wiki.corp.nrpc/display/HR/I9+Collection+Campaign>

Should you need additional information please call **1-888-474-2685** or write to:
AmtrakI9Collection@Amtrak.com

Thank you for your support of this critical initiative.

December 1, 2014

Reminder: Smart IDs Are Ready for Pick Up

Thank you for your participation in Amtrak's Smart ID refresh effort. New Amtrak Smart ID badges were distributed to location-specific Points of Contact and are available to be picked up at all locations.

- **You must pick up your new Amtrak Smart ID badge no later than December 6.**
- **It is each individual's responsibility to pick up the new badge and return the old badge.**

The Amtrak Smart ID poster in your location explains when and where you can go to pick up your badge.

The new badges will be activated on Saturday, December 6. Your new badge will provide the same access as your old badge. After December 6, all old badges will no longer function and should not be used for any purpose (e.g., access to facilities, travel privileges or employee identification). Please hold onto your old badge until you have verified that your new Smart ID is working properly.

If you have any questions about the new Amtrak Smart ID badges, please call the **Smart ID Refresh Help Desk at 202-906-2239**. The ID Refresh Help Desk will be available from 8:00 a.m. to 8:00 p.m. EST Monday through Friday. You can also email IDRefresh@amtrak.com with any questions.

NOTE: Your new Amtrak Smart ID badge may take a few minutes to register when you first swipe it. If it does not work the first time, please try again after one minute. If this continues, please call the Smart ID Refresh Help Desk.

December 8, 2014

Please Pick Up Your Smart ID Today

The switch to the New Amtrak Smart ID badges occurred this past Saturday December 6, 2014.

All employees should have their new Amtrak Smart ID badge. It is your responsibility to pick up your new badge. If you haven't, the Amtrak ID Refresh team is offering you one last chance to do so. The team is in the Starlight Room today and will be there through Wednesday from 8:00 a.m. to 4:00 p.m.

Please note:

- Employees must present their current Amtrak ID badge for validation when picking up the new Amtrak ID badge.
- Contractors must present their current Amtrak ID badge and a valid government photo ID for validation.
- Information on the collection of old ID badges will be available soon.

If you have any questions about the new Amtrak Smart ID badges, please call the Smart ID Refresh Help Desk at **202-906-2239**. You can also email IDRefresh@amtrak.com with any questions.

NOTE: Your new Amtrak Smart ID badge may take a few minutes to register when you first swipe it. If it does not work the first time, please try again after one minute. If this continues, please call the Smart ID Refresh Help Desk at 202-906-2239.

December 8, 2014

Water To Be Shut Off

The District of Columbia Water and Sewer Authority will be performing a Systems Repair on Wednesday December 10, from 11 p.m. to 3:00 a.m.

This will affect Washington Union Station and the water will be turned off in the entire building during the necessary repair time. Please plan accordingly.

Thank you.

December 22, 2014

Emergency Wardens

Emergency Management and Corporate Security (EMCS), Headquarters Facilities and IT Safety and Facilities staff are looking for your assistance to help provide a safe workplace.

We are in the process of re-establishing the Emergency Warden program for 40 Massachusetts Ave., 60 Massachusetts Ave. and 10 G Street buildings. This process will include a more structured training program that will standardize information and procedures in the event of a workplace emergency.

If you are a current emergency warden or are interested in becoming one, please join us for one of the upcoming information sessions. The information session will take no more than one hour. Sessions are assigned by work location.

- 40 Massachusetts Ave employees – January 7, 2015 at 10:00 a.m.
40 Massachusetts Ave. Conference room L, room 3W 127
- 60 Massachusetts Ave employees - January 7, 2015 at 11:00 a.m.
40 Massachusetts Ave. Conference room L, room 3W 127
- 10 G Street employees – January 7, 2015 at 1:00 p.m.
10 G Street Conference room 10, 4th floor, 4W-143

Thank you in advance for your support. Please contact Steven Fruchtman or your building facilities staff with any questions.

2013 W-2 Forms

Just to update all Amtrak employees that the 2013 W-2 forms were mailed on Friday, January 31. Please be advised that these were mailed to your permanent home address as listed in SAP.

You should allow ten days for delivery before contacting the Payroll department. If you have not received your W-2 by February 15, please contact the Payroll department for a reprint.

Amtrak® Employee Update

February 4, 2014

Weather Update

We are actively following the weather advisories and wanted to remind Washington area employees that tomorrow will be business as usual. We will let you know if there are any changes to normal business schedules.

Please drive safely.

Thank you.

February 12, 2014

Winter Storm

We are actively following the weather advisories and will have a weather-related call this afternoon. We will let you know if there are any changes to normal business schedules for tomorrow as the day and the storm both progress.

Supervisors and employees who are able to telework should begin discussing and preparing for the possibility of teleworking tomorrow.

Thank you.

Weather Update #2

We have actively followed the weather today and wanted to remind Washington area employees that we will be open for business tomorrow and we will certainly let you know if there are any changes to this decision.

We would hope and expect you to use your best judgment and exercise common sense about whether you can safely come to work or, if able, work from home.

Thank you.

February 13, 2014

Weather Update #3

We have continued following the weather reports today. All Washington area locations will be open for business tomorrow and we will certainly let you know if there are any changes to this decision.

As said yesterday, we would hope and expect you to use your best judgment and exercise common sense about whether you can safely come to work or, if able, work from home.

Please be careful.

February 4, 2014

Internal Revenue Service W-2 Forms

There has been some discussion amongst employees about the federal W-2 forms. They were sent out on Friday, January 31 and should be received at the address you have listed with the Employee Service Center.

Winter Storm

We are actively following the weather advisories and wanted to remind Washington area employees that tomorrow will be business as usual. We will let you know if there are any changes to normal business schedules as the day and the storm both progress.

The storm is going to usher in a period of very cold weather. Please remember to dress appropriately, drive safely and be careful when shoveling.

Thank you.

January 21, 2014

Winter Storm Update

The safety of our employees comes first. As the storm intensifies, please be advised that employees who are non-essential to immediate train operations can depart early after notifying their supervisor about their intentions. Those who can work from home are encouraged to bring work home and telecommute.

If you and your supervisor agree that you can telework tomorrow, please do so. You can also elect to use a vacation or personal day.

Agreement-covered employees are covered under the provisions of their labor agreements. Operations department employees should follow their departmental procedures for these situations.

Please travel safely.

January 23, 2014

Frozen Train Doors

As many of you know, the extreme weather conditions on the Northeast Corridor have created numerous challenges for the safe and efficient operation of our trains. One of the most visible and potentially dangerous problems involves the build-up of snow and ice in the vestibules between coaches. Because many of us have been asked about this issue by passengers, and to help raise awareness of the challenges it creates, following is an explanation of why it happens and what you can do to help mitigate the problem.

The very fine, powdery snow that fell this week presents a unique challenge to train operations because it easily enters the vestibules when the train kicks up the loose flakes. The snow enters through the diaphragms and pocket doors, and once inside, a cycle of melting and refreezing can make normal operation of the doors extremely difficult.

Train crews have been working extremely hard to keep the vestibules clear of snow and ice to ensure the safety of everyone aboard. If you are riding a train and see your crew working on this issue, please don't hesitate to ask the Conductor if there's something you can do to assist.

Passengers who recognize you as an Amtrak employee might also ask you about this issue. Feel free to explain the situation honestly and accurately (as described above), and encourage them to be patient as we work through these extreme weather conditions. The forecast calls for continued cold in the days (and possibly weeks) to come, so please keep that in mind.

Please travel safely.

January 31, 2014

Northeast Corridor Cafe Car Seating

Most of you know that we are the preferred method of travel on the Northeast Corridor and our trains are frequently operating at capacity. One of the many reasons passengers choose us is the preference to use the tables in the café/lounge as it allows for use of laptops and productive conversation with colleagues. That space is often occupied by off-duty Amtrak employees.

Please remember that employees not on duty should freely give up available lounge/table space when requested or evidently needed by our revenue-producing passengers.

Only **one** table on the Northeast Regional trains can be used by our working crews.

Our passengers would greatly appreciate your complying with this request.

Thanks and have a safe weekend.

AMTRAK'S ID REPLACEMENT PROGRAM

As you know, the Amtrak Smart ID team is in the process of collecting photos for the new badges. So far the response has been excellent, but we still need your help. Please help us stay cost effective by submitting your updated photo today. You can submit photos via email from your personal smart phone or digital camera.

The photo requirements are simple:

- All photos must have a white background and display a clear shot of the employee's/contractor's face (please no hats, sunglasses, etc.).
- Photos should include the full face view with a neutral facial expression and both eyes should be open.
- If you regularly wear glasses, please wear them in your photo.

All photos should be emailed or texted to the Smart ID team at IDrefresh@amtrak.com. Your emails should include SAP number and full name in the subject line. Please submit photos by July 15, 2014.

As always, please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

Thank you for your continued support.

July 3, 2014

REMINDER - Lobby Renovations at 60 Massachusetts Avenue to Begin

Beginning on **July 5** through **July 21**, the entrance to 60 Massachusetts Avenue, NE (east side) will be closed for renovations. Both the exterior door facing Columbus Plaza and the interior door through the East Hall will not be accessible.

During this renovation period the elevator in the east lobby will only operate between floors two through four.

All employees, contractors and visitors will need to enter through the 40 Massachusetts Avenue, NE side of the building and use the fourth floor walk over to get to the offices located on the east side of the building.

Security will be available at that entrance to provide visitor and temporary employee badges. Employees will also have to meet their visitors on the 40 Massachusetts Avenue, NE side.

Your understanding is appreciated during this temporary inconvenience.

July 9, 2014

Emergency Stairwells During 60 Massachusetts Avenue Lobby Renovations

Please be advised that Stairwell #2 is closed during the July 5 through July 21 lobby renovation period. This is the stairwell located near the restrooms on the second, third and fourth floors.

During an emergency you will need to exit from Stairwell #7 on the west side of 60 Massachusetts Avenue. This is the open stairwell located on the fourth floor crossover, close to the Claims conference room on the third floor and near where Meeta Amin sits on the second floor. Or Stairwell #3 next to the pantries on the north side of 60 Massachusetts Avenue

Your understanding is appreciated during this temporary inconvenience.

July 9, 2014

Washington D.C. Smart ID Photo Collection

Are you unable to submit your updated photo by the July 15 deadline? If so, the Smart ID Team is here to help! For those who will be in Union Station next week, the Smart ID Team will be on-site to take your photo.

Having your photo taken will not only fulfill the requirements to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please visit them from **July 14 through July 18** in the **Starlight Room** between the hours of **8:30 a.m. to 3:00 p.m.**

We hope to see you there.

Amtrak® Employee Update

July 10, 2014

Dear Managers and Supervisors,

As you know, Amtrak is in the process of issuing new Amtrak IDs to all employees and contractors. This is necessary because the current iteration of the badges will begin to expire in January of 2015, and a large majority of the ID photos are greater than five years old. For security purposes, all employees and contractors must have an updated photo before a new ID will be issued.

We have had an excellent response rate from employees so far, but we still have a ways to go and need your help to ensure full employee and contractor participation in the photo submission process. There are many ways you can help: offer to take a photo, collect and submit a group of photos, volunteer to become a point of contact (POC) at your location or simply remind co-workers that the **deadline for submission is July 15th**.

The photo requirements are simple:

- All photos must have a white background and display a clear headshot (no hats, sunglasses, etc.).
- Photo should include full face view with a neutral facial expression – both eyes open.
- If you wear eye glasses regularly, please wear them in your photo.

All photos should be emailed or texted to the Smart ID team at IDrefresh@amtrak.com. All emails should include SAP # and full name in the subject line. Please submit photos by July 15, 2014.

Please look out for continued email communications, posters and reminders in *Amtrak This Week* regarding the Smart ID rollout and distribution of the new badges.

If you have any questions or require additional support, please reach out to the Smart ID Team at IDrefresh@amtrak.com.

Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

Thank you for your support.

July 14, 2014

Washington D.C. Smart ID Photo Collection

The Smart ID Team is here! For those who will be at Union Station this week, the Smart ID Team will be on-site today through Friday to take your photo.

Having your photo taken will not only fulfill the requirement to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please come by from **Monday, July 14 through Friday, July 18** in the **Starlight Room** between the hours of **8:30 a.m. to 3:00 p.m.**

Looking forward to seeing you this week!

July 17, 2014

Reminder: Washington D.C. Smart ID Photo Collection Ends Tomorrow

Washington, D.C. area employees, tomorrow is your last opportunity to have your Smart ID photo taken at Union Station. If you would like your photo taken by the Smart ID Team, please come to the **Starlight Room** between the hours of **8:30 a.m. to 3:00 p.m.**

Your current Smart ID will expire and without a valid replacement you will not be able to enter any Amtrak-secured space.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

Looking forward to seeing you.

July 24, 2014

Philadelphia Smart ID Photo Collection

Were you unable to submit your updated photo by the July 15 deadline? If so, the Smart ID Team is here to help! For those who will be in 30th Street Station next week, the Smart ID Team will be on-site to take your photo.

Having your photo taken will not only fulfill the requirements to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please visit them from **Wednesday, July 30 through Friday, August 1** in the **Facilities Office (29th and Market Street entrance next to the Post Office)** between the hours of **9:00 a.m. to 4:00 p.m.**

We hope to see you there.

July 25, 2014

Wilmington Smart ID Photo Collection

Were you unable to submit your updated photo by the July 15 deadline? If so, the Smart ID Team is here to help! For those who will be in Wilmington next week, the Smart ID Team will be on-site to take your photo.

Having your photo taken will not only fulfill the requirements to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please visit them on **Tuesday, July 29 and Wednesday, July 30** in the **CNOC Lobby** (15 S. Poplar Street) between the hours of **12:00 p.m. to 6:00 p.m.**

We hope to see you there.

July 28, 2014

Philadelphia Smart ID Photo Collection

Were you unable to submit your updated photo by the July 15 deadline? If so, the Smart ID Team is here to help! For those who will be in 30th Street Station this week, the Smart ID Team will be on-site to take your photo.

Remember all employees and contractors need to update their photos in order to obtain their new Amtrak IDs.

Looking forward to seeing you!

June 2, 2014

Amtrak Confidential Information

In the next few days you will be receiving an important mailing from Amtrak directed to your home address. This mailing contains a letter from Chief Human Capital Officer Barry Melnkovic reminding us that any confidential information we use or find within the course of our daily work is required to be maintained for internal use only. Accompanying the letter is a copy of the corporate Confidentiality Policy (P 9.1.0) which can also be found on the company Intranet>Library>Policies>Amtrak Policy and Instruction Manual.

It is very important to the well-being of Amtrak that this information be read and that the policy is followed.

Thank you.

Amtrak® Employee Update

June 25, 2014

AMTRAK IS ISSUING NEW SMART IDS

Thanks to your fantastic support, we have received hundreds of new employee and contractor photos. As we update the identification cards, we need your help in continuing this great effort that you and your fellow employees have started. If you haven't done so already, please send your current photo via email or text to: IDrefresh@amtrak.com. You can use a digital camera or a personal phone. Please remember to include your SAP number and full name in the subject line.

Sending your photo helps Amtrak save costs and increase efficiency. Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: *Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1*. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

Thanks to you, the Smart ID team has had great participation, and we hope to continue receiving more photos. Remember, you can use a digital camera or a personal phone, complying with applicable policies and instructions.

Thank you for your continued support.

June 26, 2014

Lobby Renovations at 60 Massachusetts Avenue

Beginning on July 5 through July 21, the entrance to 60 Massachusetts Avenue, NE (east side) will be closed for renovations. Both the exterior door facing Columbus Plaza and the interior door through the East Hall will not be accessible.

During this renovation period the elevator in the east lobby will only operate between floors two through four.

All employees, contractors and visitors will need to enter through the 40 Massachusetts Avenue, NE side of the building and use the fourth floor walk over to get to the offices located on the east side of the building.

Security will be available at that entrance to provide visitor and temporary employee badges. Employees will also have to meet their visitors on the 40 Massachusetts Avenue, NE side.

Your understanding is appreciated during this temporary inconvenience.

August 14, 2014

Los Angeles, CA Smart ID Photo Collection

Here is your chance to get your photo taken for the new IDs. For those who will be in the Los Angeles area next week, the Smart ID Team will be on-site to take your photo.

Having your photo taken will not only fulfill the requirements to submit your updated photo, it will also help improve our overall photo collection effort.

We appreciate all those who have sent their photos to IDrefresh@amtrak.com and we still encourage you to submit your photos via email or text.

If you would like your photo taken by the Smart ID Team, please visit them at the following locations and times:

Dates	Locations	Times
Monday, Aug. 18	Los Angeles Union Station - Crewbase (Near Bus Plaza)	8:30 a.m.- 4:00 p.m.
Tuesday, Aug. 19		
Wednesday, Aug. 20	Los Angeles 8th Street Station – Coach yard (Conference room in Building 11- 2472 East)	8:30 a.m.- 5:00 p.m.

****Remember all employees and contractors need to update their photos in order to obtain their new Amtrak IDs.***

Amtrak® Employee Update

March 3, 2014

Weather Update

Like many of you, we have actively followed the weather today and wanted to remind Washington area employees that we will be open for business tomorrow.

We would hope and expect you to use your best judgment and exercise common sense about whether you can safely come to work or, if able, work from home.

Please be careful during this weather situation.

Thank you.

Amtrak® Employee Update

March 16, 2014

Weather Update

We have continued following the weather reports today. All Washington area locations will be open for business tomorrow and we will certainly let you know if there are any changes to this decision.

We hope and expect you to use your best judgment and exercise common sense about whether you can safely come to work tomorrow or, if able, work from home.

Please be careful.

Amtrak® Employee Update

March 28, 2014

60 Massachusetts Avenue

Employees may now enter and exit the 60 Massachusetts Avenue side of Union Station.

Thank you for your cooperation.

March 28, 2014

Please Do Not Exit Building thru 60 Massachusetts Avenue

Employees of 60 Massachusetts Avenue have been requested **NOT** to exit the building through either the station or the front door as there is ongoing Police department activity.

Should you need to exit, please use the cross over on the fourth floor and exit through the 40 Massachusetts Avenue exit.

We will let you know when this situation has been resolved.

Thank you.

May 6, 2014

Amtrak Launches New Online Booking Tool

Effective June 2, 2014 Concur Travel will replace Trip Manager as the online booking tool for Amtrak business travelers and travel planners. Concur Travel is an industry leading provider of Business Travel Solutions. The new tool is easy to use and in addition to enhanced features and services, provides an innovative mobile application for booking anytime or anywhere.

Travel Leaders will configure the new site with all the current company policy and program information and individual travel profiles will be transferred to the new site. Travel Leaders will continue to support Concur for all technical and navigational assistance. We ask all travelers and travel planners to take the time to review the new profiles for accuracy and update as appropriate after the launch. Travelers will also need to check that all the accounting codes are correct (cost center, Internal Order and WBS Element) as reservations will not be able to be made without this information.

The new tool will no longer be available in eTrax but will be accessed through the Employee Information Portal (EIP). As a reminder, Travel Authorizations should be done in eTrax prior to travel. Travelers should also take this opportunity to review the Amtrak Travel Policy (P/I 8.35.2) on the company Intranet (Home>Employees>Management Employee Business Travel).

Please note:

- Updates made to the personal preferences areas in your online profile after May 9 will not transfer to the new Concur profile. You will need to re-enter this information.
- Credit card information used for hotel and rental car reservations must be entered by the traveler in the new Concur profile before booking any travel.
- The Concur site will be available for new bookings on Monday, June 2, 2014. Reservations for future travel booked in Trip Manager will be accessible by Travel Leaders agents for changes.
- Southwest Airlines will be displayed alongside all the other airlines and will no longer be available as a separate punch out or paid separately

A new log in process will be implemented. Single sign-on via the Amtrak EIP will be available.

Training sessions will be held prior to the launch of Concur Travel. Additional information about these sessions will be distributed soon.

The Travel department and Travel Leaders are committed to making this transition a smooth one for all our business travelers and travel planners.

Should you have additional questions regarding the Travel Program, please contact your Travel Administrator at CorporateTravel@amtrak.com.

May 7, 2014

Customer Experience Delivery and Training Survey

All non-agreement employees should have received a Customer Experience Delivery and Training Survey in your Microsoft Outlook mailboxes. If you still have not received this important survey, please check your junk email folders. If the survey is still not found, please contact Jack Freund of WBA Research, our survey partner, at JFreund@WBAResearch.com. Please contact Mr. Freund if you encounter problems completing the survey. If necessary, a paper survey can be faxed to you.

If you supervise agreement-covered employees, please remind them to complete and mail their surveys by the deadline.

It is really important that the voices of all Amtrak employees be represented.

Completed surveys need to be received by May 12.

You really can make a difference.

May 13, 2014

Automated External Defibrillator Program

Automated External Defibrillators (AED) are used in the event someone experiences cardiac distress. Amtrak is implementing a company-wide program to inventory our current AED devices.

Emergency Management and Corporate Security (EMCS) is reaching out to all Amtrak employees asking for your help in identifying the location and status of every AED in the system.

To assist this effort, EMCS has created an online form that will capture this AED information. Please click on the [AED Field Survey Form](#) and complete it.

If you come across an AED that has a red light on and is beeping, please remove the AED, secure it and send a note as soon as possible to the AED program manager at aedservicerequest@amtrak.com.

We appreciate all of your assistance in helping us update our records. By providing this information, you just may help save a life.

If you still have questions please review the [AED FAQ's](#) document or send an email to aedservicerequest@amtrak.com.

We need you to help save a life!

May 15, 2014

Event at Union Station Tomorrow Night

On May 16, Union Station will again host the Georgetown University Senior Class Ball. It is anticipated that over 6,000 guests will dance the night away in the Main Hall, West Hall, East Hall, Columbus Club and designated areas of the Food Court. So that the station can properly prepare for this event please note the following schedule which may impact your path of travel.

Taxi Lane and Taxi Dispatch

The taxi dispatch will be moved to the West Carriage Porch at 7 a.m. on Friday. Existing signage will be placed in both the Front Colonnade and Train Concourse to properly direct station guests seeking taxi service. The taxi dispatch will remain on the West Carriage Porch throughout the day and will resume its customary location at the front of the station on Saturday at 7 a.m.

The taxi lane (lane A) will be reserved for event deliveries beginning on Friday at 6 a.m.

West Hall

Restaurant seating and West Hall benches will be removed from West Hall tonight. All the West Hall restaurants will close operations at 5 p.m. on Friday including Chipotle and its West Carriage Porch seating. All benches and restaurant seating will be returned to the West Hall by 6 a.m. on Saturday and the restaurants will resume normal operations.

Main Hall and East Hall

All merchants in the Main Hall and East Hall will close at 5 p.m. on Friday and reopen for business as usual on Saturday, May 17.

Food Court

Seating areas in the east part of the Food Court (Johnny Rockets moving east) will begin to close at 5 p.m. on Friday. All Food Court vendors east of Johnny Rockets will stop serving food to all patrons at 7 p.m. and these merchants will close. All areas of the Food Court will reopen for business as usual on Saturday.

The Mezzanine merchants, station and Train Concourse merchants and Amtrak remain open for business as usual.

May 19, 2014

Escape Mask Collection

In 2009 – 2010, Amtrak issued ILC Dover 30-minute escape masks to a wide audience of Amtrak employees located at our Union Station corporate offices and 10 G Street location.

All of these masks will expire in June 2014 and should no longer be used.

We will be collecting masks from all employees from Monday, May 19 through Thursday May 22, 2014.

For those employees located at Union Station, collection bins will be placed in the first floor elevator lobby of the 40 and 60 Massachusetts Avenue entrances.

For those employees located at 10 G Street, there will be collection containers in the pantry area.

Please take a few minutes and place your old escape mask in the bin for appropriate disposal.

If you have any questions, please contact:

Steve Fruchtman
Regional Emergency Manager (EMCS)
202-906-2551
Steven.fruchtman@amtrak.com

Travel Program Rollout and Online Booking Tool Training Sessions

As announced several weeks ago, effective June 2, 2014, Concur Travel will replace Trip Manager as the online booking tool for Amtrak business travelers and travel planners. The new tool is easy to use and in addition to enhanced features and services, provides an innovative mobile application for booking anytime or anywhere. In addition to the continued support of a dedicated team of Travel Leaders agents, travelers and travel planners will now have access to Concur Travel for online booking.

The one-hour web-based training will provide employees the opportunity to learn more about the new travel program offerings and how to utilize the Travel Leaders'/Concur products and services available to Amtrak.

These informational sessions will be hosted by Travel Leaders. A recorded session will also be posted on the company Intranet. Please use the links below to register for a session. You will be sent instructions to save the meeting to your calendar for access on the day. Please log in to the meeting at least 10 minutes prior to the start time to ensure an on time start.

Date	Time	Registration Link
Wednesday, May 28	10:00 a.m. ET	Register for Wed May 28 at 10 a.m. ET
Wednesday, May 28	2:00 p.m.ET	Register for Wed May 28 at 2 p.m. ET

Thursday, May 29	2:00 p.m. ET	Register for Thurs May 29 at 2p.m.ET
Friday, May 30	10:00 a.m. ET	Register for Fri May30 at 10 a.m. ET
Monday, June 2	10:00 a.m. ET	Register for Mon June 2 AT 10 a.m. ET
Monday, June 2	2:00 p.m. ET	Register for Mon June 2 at 2 p.m. ET
Tuesday, June 3	1:00 p.m. ET	Register for Tues June 3 at 1 p.m. ET
Wednesday, June 4	1:00p.m. ET	Register for Wed June 4 at 1 p.m. ET

If you require assistance logging in to the meeting, please call the conference bridge number. Assistance will be available via the conference bridge 10 minutes prior the session. For additional questions regarding the travel program or these sessions, contact the Travel Department at CorporateTravel@amtrak.com.

May 22, 2014

Memorial Day Safety

The Memorial Day weekend is usually regarded as the beginning of the summer season. It often signifies time with family and friends, outdoor activities and the end of junior and senior proms in our local communities.

The safety and health of our employees remains the key corporate goal. We have been told that as our Safe-2-Safer program becomes even more integrated into our safety culture, the lessons learned are extending into our lives outside Amtrak. For those of us who are fortunate to be with family and friends over the holiday weekend, it would be a good idea to remind them that:

- When going fishing, please never walk, sit or stand on any railroad bridge.
- With an increase in automobile traffic, make sure all precautions are taken at grade crossings. Stop, Look and Listen.
- Never trespass onto railroad tracks as every step on the tracks could be your last.
- The human eye cannot accurately judge a train's speed or distance. A train will always appear to be farther away and traveling slower than it is. The train **always** wins.
- Most crashes occur within 25 miles from home.
- Approximately every two hours either a vehicle or a pedestrian is struck by a train in the United States.

Operation RedBlock, a labor-developed, company-adopted drug and alcohol prevention and intervention program, would like to wish everyone a safe and happy holiday. Please remember that Operation RedBlock is here to help and labor coordinators are available 24/7 to provide assistance. Operation RedBlock is offered to all Amtrak employees.

For confidential mark-offs please call 1-800-44R-BLOC (1-800-447-2562).

Have a safe, happy and sober holiday.

May 28, 2014

Electrical Power Interruption

Electrical maintenance for the emergency generator has been scheduled for Friday, May 30, 2014 between the hours of midnight and 6:00 a.m. This interruption will affect all elevators throughout Washington Union Station and Amtrak Towers.

Thank you.

May 29, 2014

Travel Program Rollout and Online Booking Tool Training Sessions Revised

The rollout of the new Online Booking Tool requires additional time for testing. As a result, the launch of Concur/Travel Leaders has been postponed to **Monday June 9, 2014**.

Based on feedback we have received, the training schedule has also been adjusted for the convenience of a larger audience. The one-hour web-based training will provide employees the opportunity to learn more about the new travel program offerings and how to utilize the Travel Leaders'/Concur products and services available to Amtrak.

These informational sessions will be hosted by Travel Leaders. A recorded session will also be posted on the company Intranet. Please use the links below to register for a session. You will be sent instructions to save the meeting to your calendar for access on the day. Please log in to the meeting at least 10 minutes prior to the start time to ensure an on time start.

Date	Time	Registration Link
Wednesday, May 28	10:00 a.m. ET	Register for Wed May 28 at 10 a.m. ET

I-9 Collection Campaign

The I-9 Collection Campaign is headed your way! If you received prior notification that you need a new electronic I-9 completed, please stop by throughout the week. Representatives will be available from **5:00 a.m. to 5:00 p.m.** on the following dates:

Nov. 15 – Nov. 21	Washington Union Station	Nov. 15 – Nov. 20 – Starlight Room, Gate D Nov. 21 – Suite 100, Gate A
----------------------	-------------------------------------	---

Please bring your List A **OR** List B and List C original documentation with you to have an electronic I-9 completed for you in minutes! The most common forms of documentation are: List A – U.S. passport **OR** Lists B/C – driver's license and social security card or birth certificate. For the full list of acceptable documentation, please visit the I-9 Collection Campaign Wiki page under the FAQs link.

<http://wiki.corp.nrpc/display/HR/I9+Collection+Campaign>

Should you need additional information please call 1-888-474-2685 or write to:
AmtrakI9Collection@Amtrak.com

Thank you for your support of this critical initiative.

November 17, 2014

Smart IDs Are Ready for Pick Up

Thank you for your participation in Amtrak's Smart ID refresh effort. New Amtrak Smart ID badges are currently being distributed and will be available at all locations by Friday, November 21. Please **pick up your new Amtrak Smart ID badge no later than December 6**. It is your responsibility to pick up your new badge and turn in your old one.

The Amtrak Smart ID poster in your location explains when and where you can go to pick up your badge.

The new badges will be activated on Saturday, December 6. Your new badge will provide the same access as your old badge. After December 6, all old badges will no longer function and should not be used for any purpose (e.g., access to facilities, travel privileges or employee identification).

If you have any questions about the new Amtrak Smart ID badges, please call the Smart ID Refresh Help Desk at **202-906-2239**. The ID Refresh Help Desk will be available from 8:00 a.m. to 8:00 p.m. EST Monday through Friday starting November 17. You can also email IDRefresh@amtrak.com with any questions.

NOTE: Your new Amtrak Smart ID badge may take a few minutes to register when you first swipe it. If it does not work the first time, please try again after one minute. If this continues, please call the Smart ID Refresh Help Desk at 202-906-2239.

November 21, 2014

Mr. Boardman Appears on Sunday's "60 Minutes"

President and CEO Joe Boardman will be appearing on the November 23 broadcast of 60 Minutes discussing the need for infrastructure investment as part of a segment on the country's decaying infrastructure. Mr. Boardman will focus on the necessity to fund the Portal Bridge replacement project.

The show airs on CBS television from 7:30 p.m. to 8:30 p.m. ET/7:00 p.m. to 8:00 p.m. PT.

Ebola Update

We wanted to let you know of an incident that occurred yesterday morning. Local Emergency Medical Services personnel responded to the Jackson, Mississippi, bus and train station after receiving a report of an ill passenger who arrived at the station via a commercial passenger bus. The patient was examined at a local hospital and determined not to have Ebola. The station was cleared and resumed scheduled operations shortly after 11 a.m. local time.

As a precaution, all Amtrak passengers and staff were isolated. The *City of New Orleans*, scheduled to stop at that time, bypassed the station. The Amtrak passengers that were scheduled to board and deboard at this station were provided alternate transportation once the station was cleared and normal operations resumed.

Mark Murphy, General Manager of the Long-Distance business line said that, "all employees involved in the activities at the Jackson station on Sunday did an excellent job and the response was handled in a textbook manner. We handled local and internal communications and notification outreach properly and the isolation of the suspected passenger was followed according to procedures. I would like to commend the interdepartmental cooperation of employees from Emergency Management and Corporate Security, our Long-Distance business line employees and Public Health who were critical in executing this so well."

Amtrak has plans and strategies in place for addressing contagious disease outbreaks. They provide detailed instructions on how employees should interact with sick passengers and outline the steps for notifying appropriate parties within Amtrak. The events of yesterday clearly demonstrate that our processes work and the continued need to be prepared and vigilant.

Please remind your staff that valuable documents are available on the new Ebola Update webpage located on the homepage of the Amtrak Intranet or go directly to <http://wiki.corp.nrpc/display/ebola/Home>. This site was updated this morning with a new version of the Employee Assistance Program brochure, "Managing Anxiety About Ebola." This site will be updated regularly to provide the most current information.

Questions and Answers Regarding Ebola

A number of our employees have been asking really good questions regarding the Ebola virus. We sat down with Director of Public Health Vic Zare and Corporate Medical Director Dr. Paul McCausland and Associate Medical Director Dr. Glenn Greene to review some of the questions and formulate responses.

Amtrak is very fortunate to have these employees on staff. Vic has been with Amtrak for 34 years and is licensed as a Communicable Investigator and serves as Amtrak's regulatory authority in Public Health. Both Dr. McCausland and Dr. Greene are specialists in Occupational Medicine, the medical specialty that focuses on work-related injury and illness. Both also have additional degrees in Public Health, both are Fellows of the American College of Occupational and Environmental Medicine and both have served as presidents of their State Associations of Occupational and Environmental Medicine. In addition, both have extensive experience in industrial settings outside of medicine – Dr. McCausland served as an engineer in the Nuclear Navy, and Dr. Greene was previously a physicist performing nuclear fusion research for the Department of Energy.

Question 1

Is Amtrak screening customers for health reasons? Have we instituted any special health-related protocols?

Amtrak is following the Centers for Disease Control (CDC) guidelines for public transportation which do not require health screenings. Our Medical, Public Health and Emergency Management teams continue to stay in contact with public health officials and follow their guidance.

Question 2

What phone number do we call if we suspect a passenger or employee shows symptoms and may have a history of exposure?

Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger/employee detained and met by local Emergency Medical Personnel.

Question 3

What number should we give out should a passenger have a question?

Passengers should call: 800-USA-RAIL (800-872-7245)

Question 4

Will the gloves in the first aid kit protect me from Ebola?

The Ebola virus is transmitted by direct contact with the bodily fluids of someone who is infected with the virus and is showing symptoms. As long as the gloves are waterproof (such as nitrile or latex gloves) and intact, with no holes or tears, the virus will not be transmitted through the glove. If the glove is contaminated care, must be taken to remove the glove without your skin touching the contaminated part of the glove. Leather or knit gloves are not waterproof and will not protect you from the virus.

Question 5

What is Amtrak doing to keep up on the latest developments?

Amtrak has activated its Corporate Emergency Plan and currently holds an Ebola management coordination meeting every day, seven days per week, to review the latest information and developments relating to Ebola. On a daily basis, we monitor announcements from the CDC, the World Health Organization and professional medical societies. We also network with other railroads. On Monday, we participated in a conference call with the medical directors of a number of passenger and freight railroads (organized by the American Association of Railroads) to discuss and exchange information and experience relating to Ebola. Later this week, we will participate in a conference call about Ebola with the CDC's Principal Deputy Director for the Division of Global Health Protection, organized by the American College of Occupational and Environmental Medicine.

Question 6

I heard that the CDC just issued new guidelines for protection from Ebola. How does that affect me?

On Oct. 21 the CDC issued new guidance on personal protective equipment (PPE) to be used by healthcare workers in managing patients with Ebola virus disease (EVD) in hospitals. This guidance was issued in response to the unexpected infection of two nurses who were caring for a patient with EVD in a Dallas hospital. The guidance includes more stringent requirements for PPE (including no exposed skin) and also focuses on the importance of training.

It is important to remember that this guidance is specifically for healthcare workers caring for patients with EVD in hospitals. Hospitalized patients with EVD have higher levels of the virus in their blood and bodily fluids, are further along in the course of the disease and are much more infectious than individuals who have EVD but are still well enough to be mobile in the community (e.g., taking a train). Therefore, these new guidelines are not applicable to interactions between Amtrak employees and passengers.

The CDC has not issued new guidelines for PPE that are relevant to the railroad or airline industries. Amtrak will continue to closely monitor all recommendations regarding PPE and procedures for interacting with individuals who are suspected of having EVD, and we will rapidly communicate any new information to our employees.

Question 7

Can I get Ebola from someone who is coughing?

There is no evidence that Ebola virus disease can be spread from one person to another “through the air” (no “airborne transmission”). However, there may be some confusion about what those words mean. To a doctor, “no airborne transmission” means that the virus does not remain able to infect someone as dried virus particles are so small that they can remain floating in the air for long periods. The viruses that cause measles and chickenpox can be transmitted that way from one person to another, but not the Ebola virus. However, the CDC does recognize that the Ebola virus could be transmitted from one person to another via the droplets of saliva or mucus that are produced when someone with the disease coughs or sneezes, if those droplets hit your eyes, nose, mouth, or cut or scratched skin (abraded).

It is important to recognize that the risk of getting infected with Ebola in this way is very low. Coughing and sneezing are not characteristic symptoms of Ebola virus disease, and no case of such transmission in a human has been proven. There remains some risk, and that is one reason for the recommendation to remain at least three feet away from an individual who is suspected of having Ebola virus disease (unless using appropriate additional PPE for contact and droplet precautions, as recommended by the CDC).

Question 8

Can I get Ebola from touching a doorknob?

Ebola virus on dried surfaces (doorknobs, counter tops, paper) can remain viable (able to infect) for several hours. Ebola virus in body fluids that are outside the body (such as a blood soaked rag) can remain viable for several days, if not dried out. If someone touched such a contaminated surface or object and then touched his or her eyes, nose, mouth, or abraded skin, it is theoretically possible to become infected. However, there have been very few reports of actual transmission of the Ebola virus in this manner. Nevertheless, to be safe, use of appropriate waterproof gloves is required if touching the luggage or personal belongings of someone who is suspected of having Ebola virus disease.

Regular hand washing (especially before touching your eyes, nose or mouth) is one of the best ways to lower the risk of catching any viral disease (including Ebola, influenza and many others).

Today, we will participate in a conference call about Ebola with the CDC's Principal Deputy Director for the Division of Global Health Protection, organized by the American College of Occupational and Environmental Medicine.

Question 6

I heard that the CDC just issued new guidelines for protection from Ebola. How does that affect me?

On Oct. 21 the CDC issued new guidance on personal protective equipment (PPE) to be used by healthcare workers in managing patients with Ebola virus disease (EVD) in hospitals. This guidance was issued in response to the unexpected infection of two nurses who were caring for a patient with EVD in a Dallas hospital. The guidance includes more stringent requirements for PPE (including no exposed skin) and also focuses on the importance of training.

It is important to remember that this guidance is specifically for healthcare workers caring for patients with EVD in hospitals. Hospitalized patients with EVD have higher levels of the virus in their blood and bodily fluids, are further along in the course of the disease and are much more infectious than individuals who have EVD but are still well enough to be mobile in the community (e.g., taking a train). Therefore, these new guidelines are not applicable to interactions between Amtrak employees and passengers.

The CDC has not issued new guidelines for PPE that are relevant to the railroad or airline industries. Amtrak will continue to closely monitor all recommendations regarding PPE and procedures for interacting with individuals who are suspected of having EVD, and we will rapidly communicate any new information to our employees.

Question 7**Can I get Ebola from someone who is coughing?**

There is no evidence that Ebola virus disease can be spread from one person to another “through the air” (no “airborne transmission”). However, there may be some confusion about what those words mean. To a doctor, “no airborne transmission” means that the virus does not remain able to infect someone in the form of dried virus particles that are so small they can remain floating in the air for long periods. The viruses that cause measles and chickenpox can be transmitted that way from one person to another, but not the Ebola virus. However, the CDC does recognize that the Ebola virus could be transmitted from one person to another via the droplets of saliva or mucus that are produced when someone with the disease coughs or sneezes, if those droplets hit your eyes, nose, mouth, or cut or scratched skin.

It is important to recognize that the risk of getting infected with Ebola in this way is very low. Coughing and sneezing are not characteristic symptoms of Ebola virus disease, and no case of such transmission in a human has been proven. There remains some risk, however small, and that is one reason for the recommendation to remain at least three feet away from an individual who is suspected of having Ebola virus disease (unless using appropriate additional PPE for contact and droplet precautions, as recommended by the CDC).

Question 8**Can I get Ebola from touching a dry surface?**

There have been no reports of environmental transmission of the Ebola virus in the U.S., and very few worldwide. Regular hand washing is one of the best ways to lower the risk of catching any viral disease (including Ebola, influenza and many others). Hand washing is recommended (at a minimum) before eating, touching your eyes, nose and mouth, and after using the restroom. While the use of appropriate waterproof gloves can help prevent transmission, improper glove use and removal may be another way of transmitting the disease, i.e., if not changed properly, frequently enough, or not used in conjunction with hand washing. Nevertheless, the use of appropriate waterproof gloves is required if touching surfaces contaminated by someone who is suspected of having Ebola virus disease. These recommendations are consistent with current CDC guidelines and do not violate the Amtrak uniform standards.

Question 9**How can I order hand sanitizer and/or gloves?**

Waterproof gloves and hand sanitizers are available through our SAP system and can be ordered in the same manner as all supplies are ordered. Please speak with your supervisor if you have any additional questions on procurement of these items.

On a daily basis, we monitor announcements from the CDC, the World Health Organization and professional medical societies. We also network with other railroads. On Monday, we participated in a conference call with the medical directors of a number of passenger and freight railroads (organized by the American Association of Railroads) to discuss and exchange information and experience relating to Ebola. Yesterday, we participated in a conference call about Ebola with the CDC's Principal Deputy Director for the Division of Global Health Protection, organized by the American College of Occupational and Environmental Medicine.

Question 6

I heard that the CDC just issued new guidelines for protection from Ebola. How does that affect me?

On Oct. 21 the CDC issued new guidance on personal protective equipment (PPE) to be used by healthcare workers in managing patients with Ebola virus disease (EVD) in hospitals. This guidance was issued in response to the unexpected infection of two nurses who were caring for a patient with EVD in a Dallas hospital. The guidance includes more stringent requirements for PPE (including no exposed skin) and also focuses on the importance of training.

It is important to remember that this guidance is specifically for healthcare workers caring for patients with EVD in hospitals. Hospitalized patients with EVD have higher levels of the virus in their blood and bodily fluids, are further along in the course of the disease and are much more infectious than individuals who have EVD but are still well enough to be mobile in the community (e.g., taking a train). Therefore, these new guidelines are not applicable to interactions between Amtrak employees and passengers.

The CDC has not issued new guidelines for PPE that are relevant to the railroad or airline industries. Amtrak will continue to closely monitor all recommendations regarding PPE and procedures for interacting with individuals who are suspected of having EVD, and we will rapidly communicate any new information to our employees.

Question 7

Can I get Ebola from someone who is coughing?

There is no evidence that Ebola virus disease can be spread from one person to another “through the air” (no “airborne transmission”). However, there may be some confusion about what those words mean. To a doctor, “no airborne transmission” means that the virus does not remain able to infect someone in the form of dried virus particles that are so small they can remain floating in the air for long periods. The viruses that cause measles and chickenpox can be transmitted that way from one person to another, but not the Ebola virus. However, the CDC does recognize that the Ebola virus could be transmitted from one person to another via the droplets of saliva or mucus that are produced when someone with the disease coughs or sneezes, if those droplets hit your eyes, nose, mouth, or cut or scratched skin.

It is important to recognize that the risk of getting infected with Ebola in this way is very low. Coughing and sneezing are not characteristic symptoms of Ebola virus disease, and no case of such transmission in a human has been proven. There remains some risk, however small, and that is one reason for the recommendation to remain at least three feet away from an individual who is suspected of having Ebola virus disease (unless using appropriate additional PPE for contact and droplet precautions, as recommended by the CDC).

Question 8

Can I get Ebola from touching a dry surface?

There have been no reports of environmental transmission of the Ebola virus in the U.S., and very few worldwide. Regular hand washing is one of the best ways to lower the risk of catching any viral disease (including Ebola, influenza and many others). Hand washing is recommended (at a minimum) before eating, touching your eyes, nose and mouth, and after using the restroom. While the use of appropriate waterproof gloves can help prevent transmission, improper glove use and removal may be another way of transmitting the disease, i.e., if not changed properly, frequently enough, or not used in conjunction with hand washing. Nevertheless, the use of appropriate waterproof gloves is required if touching surfaces contaminated by someone who is suspected of having Ebola virus disease. These recommendations are consistent with current CDC guidelines and do not violate the Amtrak uniform standards.

Question 9

How can I order hand sanitizer and/or gloves?

Waterproof gloves and hand sanitizers are available through our SAP system and can be ordered in the same manner as all supplies are ordered. Please speak with your supervisor if you have any additional questions on procurement of these items.

October 24, 2014

Questions and Answers Regarding Ebola

A number of our employees have been asking really good questions regarding the Ebola virus. We sat down with Corporate Medical Director Dr. Paul McCausland, Associate Medical Director Dr. Glenn Greene and Director of Public Health Victor Zare to review some of the questions and formulate responses.

Amtrak is very fortunate to have these employees on staff. Both Dr. McCausland and Dr. Greene are specialists in Occupational Medicine, the medical specialty that focuses on work-related injury and illness. Both also have additional degrees in Public Health, both are Fellows of the American College of Occupational and Environmental Medicine and both have served as presidents of their State Associations of Occupational and Environmental Medicine. Vic has been with Amtrak for 34 years and is a Registered Sanitarian with a degree in Health Science. He is also an experienced Communicable Disease Investigator.

Question 1

Is Amtrak screening customers for health reasons? Have we instituted any special health-related protocols?

Amtrak is following the Centers for Disease Control (CDC) guidelines for public transportation which do not require health screenings. Our Medical, Public Health and Emergency Management teams continue to stay in contact with public health officials and follow their guidance.

Question 2

What phone number do we call if we suspect a passenger or employee shows symptoms and may have a history of exposure?

Contact CNOC ([1-800-424-0217](tel:1-800-424-0217)) and you will be provided specific direction on what steps to take which may include detaining the passenger/employee and making arrangements to be met by local Emergency Medical Personnel.

Question 3

What number should we give out should a passenger have a question?

Passengers should call: 800-USA-RAIL (800-872-7245)

Question 4

Will the gloves in the first aid kit protect me from Ebola?

The Ebola virus is transmitted by direct contact with the bodily fluids of someone who is infected with the virus and is showing symptoms. As long as the gloves are waterproof (such as nitrile or latex gloves) and intact, with no holes or tears, the virus will not be transmitted through the glove. If the glove is contaminated, care must be taken to remove the glove without your skin touching the contaminated part of the glove. Leather or knit gloves are not waterproof and will not protect you from the virus.

Question 5

What is Amtrak doing to keep up on the latest developments?

Amtrak has activated its Corporate Emergency Plan and currently holds an Ebola management coordination meeting every day, seven days per week, to review the latest information and developments relating to Ebola. On a daily basis, we monitor announcements from the CDC, the World Health Organization and professional medical societies. We also network with other railroads. On Monday, we participated in a conference call with the medical directors of a number of passenger and freight railroads (organized by the American Association of Railroads) to discuss and exchange information and experience relating to Ebola. Yesterday, we participated in a conference call about Ebola with the CDC's Principal Deputy Director for the Division of Global Health Protection, organized by the American College of Occupational and Environmental Medicine.

Question 6

I heard that the CDC just issued new guidelines for protection from Ebola. How does that affect me?

On Oct. 21 the CDC issued new guidance on personal protective equipment (PPE) to be used by healthcare workers in managing patients with Ebola virus disease (EVD) in hospitals. This guidance was issued in response to the unexpected infection of two nurses who were caring for a patient with EVD in a Dallas hospital. The guidance includes more stringent requirements for PPE (including no exposed skin) and also focuses on the importance of training.

It is important to remember that this guidance is specifically for healthcare workers caring for patients with EVD in hospitals. Hospitalized patients with EVD have higher levels of the virus in their blood and bodily fluids, are further along in the course of the disease and are much more infectious than individuals who have EVD but are still well enough to be mobile in the community (e.g., taking a train). Therefore, these new guidelines are not applicable to interactions between Amtrak employees and passengers.

The CDC has not issued new guidelines for PPE that are relevant to the railroad or airline industries. Amtrak will continue to closely monitor all recommendations regarding PPE and procedures for interacting with individuals who are suspected of having EVD, and we will rapidly communicate any new information to our employees.

Question 7

Can I get Ebola from someone who is coughing?

There is no evidence that Ebola virus disease can be spread from one person to another “through the air” (no “airborne transmission”). However, there may be some confusion about what those words mean. To a doctor, “no airborne transmission” means that the virus does not remain able to infect someone in the form of dried virus particles that are so small they can remain floating in the air for long periods. The viruses that cause measles and chickenpox can be transmitted that way from one person to another, but not the Ebola virus. However, the CDC does recognize that the Ebola virus could be transmitted from one person to another via the droplets of saliva or mucus that are produced when someone with the disease coughs or sneezes, if those droplets hit your eyes, nose, mouth, or cut or scratched skin.

It is important to recognize that the risk of getting infected with Ebola in this way is very low. Coughing and sneezing are not characteristic symptoms of Ebola virus disease, and no case of such transmission in a human has been proven. There remains some risk, however small, and that is one reason for the recommendation to remain at least three feet away from an individual who is suspected of having Ebola virus disease (unless using appropriate additional PPE for contact and droplet precautions, as recommended by the CDC).

Question 8

Can I get Ebola from touching a dry surface?

There have been no reports of environmental transmission of the Ebola virus in the U.S., and very few worldwide. Regular hand washing is one of the best ways to lower the risk of catching any viral disease (including Ebola, influenza and many others). Hand washing is recommended (at a minimum) before eating, touching your eyes, nose and mouth, and after using the restroom. While the use of appropriate waterproof gloves can help prevent transmission, improper glove use and removal may be another way of transmitting the disease, i.e., if not changed properly, frequently enough, or not used in conjunction with hand washing. Nevertheless, the use of appropriate waterproof gloves is required if touching surfaces contaminated by someone who is suspected of having Ebola virus disease. These recommendations are consistent with current CDC guidelines and do not violate the Amtrak uniform standards.

Question 9

How can I order hand sanitizer and/or gloves?

Waterproof gloves and hand sanitizers are available through our SAP system and can be ordered in the same manner as all supplies are ordered. Please speak with your supervisor if you have any additional questions on procurement of these items.

October 9, 2014

After Hours Contacts at Washington Union Station

Please use the following contact numbers for weekend and after hours situations occurring at Washington Union Station:

- For life-threatening emergencies, call **911**.
- For an Amtrak Police department response, call the National Communications Center at **1-800-331-0008**.
- To report situations (plumbing, electrical) requiring immediate response or notification to Jones Lang LaSalle, the property manager, please call Union Station dispatch at **202-289-8355** and your request will be relayed to the appropriate recipient.

October 20, 2014

I-9 Collection Campaign

In preparation for the I-9 Collection Campaign going live, several webinar trainings have been scheduled. The training will be presented by Accurate Background, Inc., Amtrak's I-9 collection software partner. **Pre-registration is recommended to access the webinar.**

In addition to training, the attached Manager Talking Points and Frequently Asked Questions have been developed to assist with discussing this campaign with employees. Please use these references to facilitate conversations with identified employees.

As part of end user training, Accurate Background will describe the I-9 process, including how to place an order for a new I-9 form. The training will also cover the functionality and features of the I-9 system.

A brief question and answer session will be held at the end of the training.

Register for a session now by clicking a date below:

[Mon, Oct 20, 2014 11:00 AM - 12:00 PM EDT](#)

[Mon, Oct 20, 2014 3:00 PM - 4:00 PM EDT](#)

[Wed, Oct 22, 2014 11:00 AM - 12:00 PM EDT](#)

[Wed, Oct 22, 2014 3:00 PM - 4:00 PM EDT](#)

[Fri, Oct 24, 2014 11:00 AM - 12:00 PM EDT](#)

[Fri, Oct 24, 2014 3:00 PM - 4:00 PM EDT](#)

Once registered, you will receive an email confirming your registration along with information necessary to join the webinar.

A recording of this training will be posted on the I-9 Campaign wiki page under Human Capital Management.

September 10, 2014

Water Main Repair

Washington, D.C. water crews are currently repairing a broken 12-inch water main located on North Capitol Street, NE.

To access the 10 G Street, NE parking garage, please use First Street, NE.

DC Water has informed us that North Capitol Street, NE will likely be closed for the remainder of the day.

Thank you.

September 30, 2014

Amtrak Ambassador Program Training Opportunity

Chief of Emergency Management and Corporate Security Susan Reinertson recently sent a Special Employee Advisory inviting our employees to register for training to become certified as Amtrak Ambassadors.

Training for Washington, D.C. area staff will be offered on October 14, 2014, from 9:00 a.m. to 1:00 p.m. in the board room at 60 Massachusetts Avenue, NE (fourth floor). The training modules include customer service, all-hazards preparedness, emergency action plans, incident procedures and station awareness.

Please contact Steve Fruchtman, our Washington, D.C. regional emergency manager at 202-906-2551 (office), 202-604-7094 (cell) or by email at steven.fruchtman@amtrak.com if you would like to register for the training.

All interested participants must obtain their supervisor's signature on the attached approval form and return the form at the training session. Additionally, all Amtrak Ambassadors will be required to complete their online annual Amtrak Fire Extinguisher Training and Amtrak Security Awareness Training before becoming certified as Ambassadors.

Class size will be limited to 25 people for this first course offering. A waiting list will be created and those on the list will be offered the next available training session in the Washington, D.C. area.

Your participation in the Washington, D.C. program is vital to the success of the nationwide rollout of Amtrak Ambassadors and will help Amtrak further develop our response capabilities. Thank you for your commitment to ensuring that Amtrak stations are safe and secure for all customers and employees.

October 17, 2014

A Message from DJ Stadtler

Ebola Virus Update

This message is being sent to managers and frontline supervisors. It is important that all employees who work with passengers including On-Board Service, Train and Engine crews, station personnel and the Amtrak Police know the facts about Ebola. We need your assistance in keeping your teams informed about what they need to know and do to safeguard our customers and employees from Ebola.

WHAT AMTRAK IS DOING TO ADDRESS EBOLA

- Amtrak Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in the United States and elsewhere. They are in contact with appropriate officials across our network to maintain awareness of the latest information. Amtrak operations at this time are not affected.
- We have reviewed and updated our protocols for proper handling of passenger and employee medical issues to reflect latest guidance from public health authorities. We are keeping employees informed so they are prepared to address customer concerns.
- While Amtrak performs regular cleaning of our passenger railcars, we have contingency plans to take railcars out of service to decontaminate should the need arise.

MANAGERS AND SUPERVISORS MUST UPDATE FRONTLINE EMPLOYEES

- Refresh your knowledge of Amtrak protocols and strategies for addressing serious communicable diseases, and review with your employees. Protocols and plans are attached to this email.
- See the attached Special Employee Advisory issued on October 17.
- Ensure that your people on the frontline know what Amtrak is doing and that they are aware of their roles in keeping customers and fellow employees safe.
- Share information in this update at crew briefings and roll call since not all employees have access to company email or the Amtrak Intranet while on the job.
- Reference the new Ebola Update webpage on the homepage of the Amtrak Intranet for information and answers to common questions or you can go directly

to the site <http://wiki.corp.nrpc/display/ebola/Home> . It will be updated regularly with current information.

THINGS TO KNOW ABOUT EBOLA

- The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person and that person has a history of travelling to West Africa.
- Ebola is not spread through the air from person-to-person.
- Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

PROCEDURE IF YOU SUSPECT A PASSENGER OR EMPLOYEE SHOWS SYMPTOMS AND MAY HAVE A HISTORY OF EXPOSURE

- Keep the ill individual separated from other passengers / employees as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill passenger or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.
- Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

FURTHER QUESTIONS? CONTACT YOUR REGIONAL AMTRAK PUBLIC HEALTH STAFF MEMBER

- **Victor Zare**, Amtrak Public Health Superintendent
(Washington, DC) O: 202-906-3943; Cell: 703-856-9002
- **John Parke**, Director, Public Health Procedures and Assurance
(New York) O: 212-630-7295; Cell: 732-740-2618
- **Al Cooper**, Regional Public Health Manager, Southeast Region
(Washington, DC) O: 202-906-2602; Cell: 202-437-9038
- **Russell Graham**, Regional Public Health Manager, Western Region
(Los Angeles) O: 213-683-6936; Cell: 213-500-9022
- **Clayton Pape**, Regional Public Health Manager, Central Region
(Chicago) O: 312-880-5595; Cell: 312-802-0590
- **Mark Petrillo**, Regional Public Health Manager, Northeast Region
(New York) O: 212-630-6265; Cell: 917-692-7496

October 21, 2014

Union Station Repair Work

Please note that wreath support repairs were started on October 17 and will continue through November 11. This work is performed only on the front of the building. The taxi cab Lane A will be closed through the duration of this repair, and passenger pick up is on the west side of the building.

On Wednesday, October 22, Function Roofing will be on the roof performing additional repairs.

Thank you.

April 11, 2014

Off-Site Business Meetings

As we strive to contain our costs, it is important that all employees familiarize themselves with the Amtrak policy (P/I Number 8.39.0) regarding off-site business meetings. This policy defines responsibilities, controls and procedures to appropriately plan and pay for business meeting requirements and expenses when holding meetings at off-site locations. It explains the approved method of making arrangements for all types of employee business meetings, how to obtain approvals and follow appropriate Procurement procedures and the process of paying meeting expenses. The proper procedures within the off-site business meeting policy must be followed.

NRPC 3117 (meeting justification form) should be completely filled out and approved by the appropriate level of management. The policy and the form can be found on the company Intranet>Library>Policies>Amtrak Policy and Instruction Manual Section 8.0.

Please remember to try and use webinars and virtual meetings whenever possible as an alternative to travel.

A new way to book Corporate Travel will be coming in June. Updates will be provided when available.

March 6, 2014

Corporate Travel Policy Clarification

As you undoubtedly already know, the new Corporate Travel Policy, FI 8.35.2, **is now in effect**. There have been significant changes made to Amtrak's Corporate Travel Policy in order to reduce company-wide travel expenditures. There have been some very good discussions and questions raised as a result of employees complying with this new policy.

- If any daily meals are provided at no cost to the employee such as in departmental staff meetings, conferences, included in hotel rate, etc., then deduct the cost of those meals as broken down on the Meals and Incidental Expenses (M&IE) section on www.gsa.gov/perdiem. Once deducted, you have the remaining per diem to use for that day as long as the daily maximum is not exceeded.
- If no meals are provided, then the M&IE per diem rates apply for that city and the daily maximum can be applied in any manner as long as the daily maximum is not exceeded.
- Reimbursement for lodging, meals and incidentals will be based on **actual** expenses incurred not to exceed the GSA per diem. Maximum allowable amounts are calculated separately for lodging and for meals and incidentals. The "per diem" maximum for meals and incidentals will be adjusted downward by **25 percent** on the first and last day of travel. Employees and approvers are responsible for this calculation. Rates are different for each destination city and can change monthly. Current rates for a given destination can be found on the GSA website www.gsa.gov/perdiem. The link to the GSA website can also be found on the Travel Authorization eform. A screen print of the relevant rates **MUST** be included with your faxed documentation for the expense report. If the hotel you have booked through the Corporate Travel Agency is above the per diem rate for lodging, please contact the hotel to see if a government rate is available to you. If you cannot obtain the government rate please note this in the comments section of your expense report. If a Corporate Lodging Card is being used, please capture this expense on the Travel Authorization and mark as company paid on your expense report.
- Employees are now required to provide an **itemized** receipt for all expenses, with the exception of some minor categories, instead of the previous \$10.00 threshold.

We hope that you have taken the opportunity to update your travel profiles and ensure that your accounting information is correct. To do this log into eTrax – click on the Search tab – then Catalog then click on to the Worldspan/Trip Manager Punchout Catalog. Click on the Profile tab (fill in) – then click on Custom Fields and fill in your accounting information (cost center, internal order and WBS element (no dots) then click submit.

Please familiarize yourselves with the entire policy and the Frequently Asked Questions (FAQs) which are available for reference at <http://wiki.corp.nrpc/display/Bustravel/Home>. The FAQs on the GSA website also provide some helpful answers.

August 4, 2014

Amtrak's New Career and Compensation Structure: What it Means for You

Amtrak's new Career and Compensation Structure for non-agreement employees is beginning to launch across the organization. The goal of this project is to deliver consistent titles and to align those titles, where appropriate, with similar positions outside the organization. Aligning our positions with the broader job market helps managers and employees from a recruiting perspective both as hiring managers as well as potential applicants to future positions. It also helps you to better understand how your role fits into the organization.

Since last fall, Amtrak's Compensation and Talent teams in Human Capital have been hard at work with the leadership teams in each department reviewing all the existing titles and positions at Amtrak and aligning them with Amtrak's new structure. With approximately 75 percent of all non-agreements positions currently being reviewed, two major themes have emerged. One, we currently have far too many individually unique titles for an organization of our size, which makes position administration and recruitment more difficult. Second, we significantly over-utilize the director title, resulting in title inflation, and underutilize the manager title in the organization. This project will fix both of these issues.

Here's what you need to know when the new structure is implemented in your department this fall:

The **Career & Compensation Structure** establishes consistent titles, organized into bands with zones defined by the market. The new structure expands the salary levels at Amtrak beyond the band/zone salary levels that exist today. The current band/zone salary levels (C1/C2 & D1/D2 being the most common) have been expanded by four additional levels to reflect not just additional levels of pay, but career levels with distinct behaviors, characteristics and abilities required for each level based on Amtrak's core competencies.

As part of the new structure, a **Career Level Guide** has been created to define the responsibilities for the Career Professional (Band C), Technical and Management Lead (Band D) and Executive (Band E) levels. The descriptions provided are only a general reference and may not be an accurate description for every position. You and your manager will review the guide and discuss what is most applicable and relevant for your role.

Manager meetings begin this fall. Your manager will meet with you to review where your current role fits in the new structure and will let you know what, if any, title impact has occurred for you. Your manager will explain what your particular career level

means. There will be no impact to base pay regardless of where your position aligns in the new structure unless your salary is below the market.

Amtrak's new career structure will provide you with a solid framework to **help you develop both short- and long-term career goals** based on your level in the organization and your own unique ambitions. You'll have access to training to better understand Amtrak's new Career & Compensation structure to make the most of your opportunities at Amtrak.

If you have any questions or concerns, please feel free to reach out to a member of the Compensation team or the Human Capital Business Partner for your department. Watch this space for additional information about the Career and Compensation Structure in the coming weeks.

Amtrak President and CEO Completes Southwest Chief Whistle-stop Tour

Recently, Amtrak President and CEO Joe Boardman met with state and local officials on a whistle-stop tour along the route of the *Southwest Chief*.

The tour, which began in Topeka, Kansas and ended in Albuquerque, New Mexico, was designed to rally support and allow for meetings regarding the future of the route of the Amtrak *Southwest Chief* between Newton, Kansas and Albuquerque. Also onboard the train between Topeka and Dodge City were Kansas Secretary of Transportation Mike King and BNSF Railway Executive Chairman Matt Rose. Secretary King continued west to Garden City.

The Amtrak delegation also made a side trip by car to the Philmont Scout Ranch near Cimarron, New Mexico to meet with leaders of the Boy Scouts of America camp. This summer, more than 5,000 scouts and their leaders used the Amtrak service at Raton to reach the ranch. U.S. Sen. Martin Heinrich of New Mexico traveled with the group from Raton through Las Vegas. Representatives of U.S. Sens. Mark Udall of Colorado and Tom Udall of New Mexico met the train in La Junta and Lamy, respectively. In addition, New Mexico DOT Secretary Tom Church rode the train between Raton and Lamy.

Amtrak has been talking with leaders in Kansas, Colorado and New Mexico since April 2012 about the pending downgrades to this route, owned by BNSF Railway. At that time Amtrak proposed a plan to maintain the route for daily passenger train service and share the necessary capital investment among Amtrak, BNSF and the three states.

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

August 4, 2014-continued

Without an agreement and capital investment, the end of service at acceptable Amtrak speeds in Western Kansas, Southeastern

Colorado and Northeastern New Mexico is threatened for 2016. Due to track layouts, direct service to Albuquerque is also in some doubt if the Amtrak service is rerouted.

Amtrak supported the filing of a federal TIGER grant application by Garden City, Kansas and other communities that would preserve and improve the *Southwest Chief's* route in Kansas and Colorado and has pledged some matching funds. A decision on that grant is expected by this fall from the U.S. Department of Transportation.

Amtrak Government Affairs is continuing to work with all three states and each of the affected cities to keep the train on its historic route.

Reminder: Mandatory Information Security Training

The 2014 Amtrak Information Security Awareness training is available via the Training section of the Employee Information Portal. This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed annually. For additional information and instructions please visit <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

Meet us in St. Louis!

If you're in the St. Louis area or soon plan to be, make your way over to two local museums featuring Amtrak exhibits depicting our company's past, present and future.

Through October 31, the Children's Illustrated Art Museum will feature All Aboard: Now and Then. The exhibit showcases the history of trains through visual displays, interactive exhibits and model railroads. Amtrak will be prominently featured with a display of memorabilia including past route guides, brochures, promotional items and photographs. For museum details visit <http://www.stlciam.org/>

Through December 2015, the St. Louis Museum of Transportation is also featuring an Amtrak exhibit which includes Amtrak timetables, menus, china and vintage advertising. One shelf is devoted to the long-standing Amtrak-Missouri partnership, which was established in 1979 as a result of the discontinuance of the *National Limited* (New York/ Washington-Kansas City). Without that train, the busy St. Louis-Kansas City corridor would have had no passenger rail service so Missouri signed an agreement with Amtrak to help fund continued service. To mark the 30th anniversary of the partnership in 2009, the trains were collectively renamed the *Missouri River Runner*. For museum details visit <http://transportmuseumassociation.org/>.

Amtrak history is always on display at <http://history.amtrak.com>, with items from our company's beginning in 1971 to present day.

eLearning Offers New Insights on Amtrak's Career and Compensation Structure

To help non-agreement employees make the most of the new Career and Compensation Structure, Amtrak has launched an eLearning tool to help you understand how to use the structure to guide your development at Amtrak. The eLearning tool will help you to understand:

- **Your Band/Zone** – Bands and Zones provide the foundation for the Career and Compensation Structure. Know how they are defined and how you can use them to define your path for development.
- **Your Development Opportunities** – The Career and Compensation Structure offers a dual career track within the D band: the Technical Track and Management Track. Explore what these two tracks are and how they may guide your development.
- **Your Compensation** – Every non-agreement position is mapped into the Career and Compensation Structure using one of two common marketplace practices: benchmarking to external surveys or slotting based on an evaluation of the job. Benchmark positions are those jobs within Amtrak with comparable external marketplace data which is then used to guide placement in the structure. Slotted positions do not have external marketplace data available but are slotted into the structure based on a number of factors including, but not limited to, functional knowledge, impact of position to the business, level of organizational influence, level of strategic formulation, department and organizational hierarchy and current salary.
- **Your Compa Ratio** – Understand how your pay compares to the marketplace by using the Compa Ratio. Compa Ratio is a comparison ratio that measures an employee's salary relative to the midpoint of the salary range. The midpoints of the range are an approximation of the marketplace median for like positions in that band/zone.

Access the eLearning tool today on the **Employee Information Portal>>Training>>under Course Catalog Management and Supervisory >>under Assigned Subject Areas Compensation>>Compensation again>>Compensation and Career Structure.**

If you have any questions or concerns about the Career and Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital Business Partner for your department. Watch this space for additional information about the Career and Compensation Structure in the coming weeks.

Beech Grove Employees Participate in Local Event

Last month, Amtrak supported the 2014 Indiana Black Expo Summer Celebration. Over three days, 20 Amtrak employees from our Beech Grove Maintenance Facility volunteered and staffed a booth, providing attendees the opportunity to learn about Amtrak travel.

During the Summer Celebration Expo, a special emphasis was placed on our *Cardinal* and *Hoosier State* services serving Indianapolis, Indiana.

In its 44th year, Indiana's Black Expo Summer Celebration showcases African American culture through concerts, exhibits and workshops. The Summer Celebration Expo's goal is to educate and uplift the growing, diverse Indianapolis community. Thank you to those employee volunteers who assisted at the Summer Celebration Expo and helped make our participation a success.

EFFECTIVE AUGUST 6, 1974

Adirondack Celebrates 40 Year Anniversary

August 5 marked the 40th anniversary of the *Adirondack* (New York-Albany-Montreal), which for much of its 381 mile journey follows the broad Hudson River and Lake Champlain's curving Western shore. To celebrate the day, Amtrak Marketing Manager Deb Sanderson, Amtrak Customer Service Supervisor Matt Kelley and NYSDOT Quality Assurance Inspector Charlie Poltenson greeted passengers on-board both the north and southbound *Adirondack* trains with a complimentary *Adirondack* souvenir tote, luggage tag and lapel pin. To learn about the history of the *Adirondack* visit: <http://history.amtrak.com/blogs/blog/celebrating-40-years-of-adirondack-service#sthash.b3nE5JBN.dpuf>

eTicket Eligibility Added to Select Amtrak Thruway Bus Services

Effective August 1, additional Amtrak Thruway bus services became eTicket eligible. These routes include:

- *Silver Service* dedicated Thruway routes in Florida between Orlando and Ft. Myers, Tampa and Ft. Myers, and Jacksonville and Lakeland (bus schedules 6091, 6092, 6097, 6098, 6291, and 6292).
- *Capitol Limited* and *Lake Shore Limited* dedicated Thruway route between Toledo, Detroit, Ann Arbor, and East Lansing (bus schedules 6029, 6030, 6048, and 6049).
- *Cardinal* dedicated Thruway route between Charlottesville and Richmond (bus schedules 4050 and 4051).

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

ATW, August 18, 2014, continued

eTicketing allows for an entire one-way or roundtrip reservation to connect to train reservations on most connecting Thruway buses. Customers at unstaffed bus stops will no longer have to order tickets by mail. For added customer convenience, eTickets can be displayed at no charge via the iPhone app or as a PDF depending on the mobile device.

Effective September 1, Amtrak Thruway bus service between Newport News and Virginia Beach will become eTicket eligible.

Reminder: Responses Needed for Amtrak Uniform Program Surveys

All Operations department uniformed employees are reminded to participate in Amtrak Uniform Program surveys – the Uniform Dress Shirt Survey or the Chef and Food Specialist Uniform Survey. Please note the following links for each survey:

- www.surveymonkey.com/s/AmtrakDressShirtSurvey (Train Service, Station Service, On Board Service employees)
- www.surveymonkey.com/s/AmtrakChef-FSUniformSurvey (Chef and Food Specialists only)

Please participate. Your opinion counts.

We Are Still Accepting Photos

Thank you to those who have submitted their updated photos to be used on new Amtrak identification badges. If you haven't already submitted your photo, **photos are still**

being accepted via email or text to IDrefresh@amtrak.com.

You can use a digital camera or a personal phone. Please remember to include your SAP number and full name in the subject line when submitting your photo.

Sending your photo helps Amtrak save costs and increase our photo collection efforts. Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: *Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1*. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

December 1, 2014

Amtrak Celebrates the Spirit of the Season

Each year, holiday celebrations abound throughout the Amtrak system. Sparked by Amtrak employees and by communities, each celebration is designed to celebrate the joy of

the holiday season. Here are some examples of merriment and charitable efforts taking place around the country.

Seattle, Wash. - Through Dec. 21, canned food donations will be accepted at King Street station for Northwest Harvest, a local food bank in the Seattle area. A luggage float will be available in the station throughout the Thanksgiving and holiday season.

In addition, on Saturday, **Dec. 13** from 8:00 a.m. – 2:00 p.m., Santa Claus will host a holiday event at the station. Passengers young and old can pose for pictures with Santa, and pictures will either be printed or emailed. This free, fun, family event will also offer complimentary coffee, hot chocolate and other treats. From noon-1:00 p.m., the Seattle Symphony Chorale will be singing favorite holiday songs. Canned food donations for Northwest Harvest will be accepted throughout the event

Niles, Mich. - On Dec. 6 from 4:30 to 6:00 p.m., the Four Flags Garden Club will host its 23rd Annual Hometown Christmas celebration at the historic Amtrak Depot. Enjoy the beautiful holiday decorations, visit with Santa and Mrs. Claus, and enjoy treats such as homemade cookies, cider and candy. Don't miss the annual lighting of the station, dazzling visitors every year since 1990 when it appeared in the movie "Only the Lonely".

Baltimore, Md- On Dec. 3 at 10:00 a.m., the lights are turned on at the annual Christmas Tree Lighting in the main hall. On **Dec. 24** from 3:00 p.m. – 7:00 p.m., visitors in the station will be able to enjoy holiday carols performed by Charlene Cochran and the Fifth Avenue Band.

Dillon, S.C. – On Dec. 6, the Polar Express leaves Dillon, S.C., en route to Fayetteville, N.C for a one-day round-trip journey. In Fayetteville, passengers will enjoy a buffet lunch and meet Santa before returning back to Dillon. Train and lunch tickets must be purchased in advance. Call 843-774-5167 for more information.

Tucson, Ariz. - On December 20, Amtrak will be a sponsor of the Southern Arizona Transportation Museum's annual "Santa Coming to Tucson" event held at the notable train depot located at 414. N. Toole Ave. At the free event, Santa will be greeting kids in front of the historic locomotive from 1:30 p.m. -4:00 p.m., followed by a classic holiday movie. www.tucsonhistoricdepot.org.

Washington, D.C. – From Dec. 4 - Jan. 1, 2015, visitors to the National Christmas Tree in Washington, D.C., can enjoy watching an Amtrak model train circle the notable evergreen located at President's Park, just south of the White House. This is the sixth

year Amtrak has participated in this national tradition in conjunction with the National Park Service, the National Park Foundation (the official charity of America's national parks) and the National Christmas Tree Railroad.

The model represents Amtrak's Midwest corridor service, as well as our *Northeast Regional* service south of Washington, D.C., where the trains operate with this type of equipment. For more information visit www.NCTRR.org.

Lancaster, Pa-On Dec. 9 from 6:00 p.m. – 7:00 p.m., the Lancaster Chamber Singers will be performing at the Lancaster Amtrak station for all to enjoy.

Raleigh & Charlotte, N.C. - On Dec. 6, Amtrak passengers in North Carolina have the opportunity to ride with Santa and experience holiday magic on regularly scheduled trains. Reservations are required for special one-day round-trips within N.C. that include photos with Santa, refreshments and special activities. Learn more at www.ncbyrail.org.

New York Penn Station – Through Dec. 24, drop off canned food items at the Amtrak Customer office, behind 15 -16 west gates. Items will be donated to the St. Francis Food Pantry and Shelter, near the station.

Toys for Tots Campaign

In conjunction with the U.S. Marine Corps, toy donations for the Toys for Tots campaign will take place throughout the Amtrak system. If you would like to donate a new, unwrapped toy (no stuffed animals please) to a child in need, the following donation points are available to receive your items.

Washington Union Station- Dec. 10-11, from 6:00 a.m. – 6:00 p.m., outside Gates A and B. Amtrak and MARC employees will join forces with the U.S. Marines fostering donations in the station and on the platforms.

PHL 30th Street Station: Through Dec. 19, drop off at the Amtrak Customer Service office, behind Stairway 7.

New York Penn: Through Dec. 24, drop off unwrapped toys at the Amtrak Customer Service office behind 15-16 west gates and at the Amtrak Baggage area..

Albany, N.Y. - Dec. 6-7, the 16th Annual Toys for Tots Train, in cooperation with Canadian Pacific (CP) Railway, will run between Binghamton, N.Y - Albany., on Dec. 6 and between Albany – Rouses Point, N.Y., on Dec. 7. Those attending will be greeted by volunteers from Amtrak, CP and the U.S. Marines, who will help

distribute over 1,000 bundles of collected toys, hats and assorted clothing items to underprivileged children at station stops along the route each day. As an added bonus, Santa Claus will be riding on-board each trip to greet children and volunteers along the way. Donations may be placed in the collection bins available at the Albany station through Dec.5.

Reminder: Check Out Special Offers on Amtrak Employee Store

Traveling to Washington, D.C. this winter and want to catch a Caps or Wizards game? Or, maybe you'd prefer seeing a Monday night magic show in N.Y. If you're looking for fun-family attractions and theme-parks while in California or looking for a rental car in St. Louis, check out the [Amtrak Employee Store](#).

Whether you're looking for a deal or simply want to browse, the online store offers special discounts and savings available to current Amtrak employees.

To browse the store, visit the company Intranet →Employees →Employee Store. Once there, you'll find offerings listed in categories such as Gifts, Amtrak Merchandise, Travel and Entertainment, Discount Memberships and more.

Amtrak Wins Prestigious Human Capital Awards

Amtrak received the [2014 Global HR Top 10 Breakaway Leaders Award](#) sponsored by Evanta which spotlights human resources leaders who are revolutionizing their company's competitive position in the evolving economy. Amtrak also received the [Optimas Award](#) for general excellence from *Workforce* magazine which acknowledges human resources and workforce management initiatives that achieve business results.

These awards recognize Amtrak's business transformation that has reduced costs, restructured performance management and differentiated pay, strengthened career growth and development opportunities, implemented best-in-class recruitment and retention strategies and created a Total Rewards compensation and benefits structure.

"Our business transformation is being driven by the Amtrak board of directors and President and CEO Joe Boardman and his executive management team who are committed to fulfilling Amtrak's mission of moving America where it wants to go while ensuring our customers get a consistent, high-quality travel experience," said Chief Human Capital Officer Barry Melnkovic.

2015 Mechanical Department Safety Logo Announced

In its ninth consecutive year, the Safety Process Focus Team recently held a safety logo contest for the Mechanical department. The winning safety logo will be made into a pin and used on all official documents produced by the Mechanical department during the calendar year of 2015.

Contest rules required that the logo include an element about Mechanical safety, be clear and visible when positioned in a 1-1/2" by 1-1/2" dimension and be designed by a Mechanical employee or a member of their family.

The 2015 winner is fourth-grader Erika Ekblaw, daughter of Amtrak Senior Service Engineer Bruce Ekblaw in our Chicago Lumber Street shops. She proudly accepted a recognition plaque for her winning entry.

Have You Had a Chance to Review the New Organization Manual?

The Amtrak Organization Manual contains information about the company's origin, organizational structure and mission and function statements. The manual was developed to fill a need to have an official strategic document that Amtrak employees can use to gain a broader understanding of the organization.

"Amtrak is a complex corporation with many moving parts. It is important to define what each department is accountable for delivering in support of our Strategic Plan. By knowing who is responsible for what, we can be sure that essential functions will be performed. This is what the manual provides: clarity of accountability," said Amtrak President and CEO Joe Boardman.

The manual can be accessed via the Human Capital Management section of the Amtrak Policy and Instruction Manual <http://wiki.corp.nrpc/display/Policies/Organization+Manual+Update>

For additional information, contact the Human Capital Employee Service Center at 1-888-694-7372.

Amtrak Launches New Website Dedicated to the Northeast Corridor

Amtrak has launched a new website, NEC.amtrak.com, dedicated to providing news and information about Amtrak's stewardship of the Northeast Corridor (NEC), including information about the many improvement projects underway and a vision for the future of the NEC.

The site aims to equip the public, stakeholders, Amtrak employees and supporters, with tools and information about the investments being made in the NEC and the continuing need for infrastructure renewal and improvement. The site includes historical information about the NEC as well as Amtrak's vision for the future. In addition, the site highlights more than 20 improvement projects spanning the full length of the corridor from Boston to Washington D.C., interactive maps, ridership data, infographics and a resources section where users can download or share reports, fact sheets and graphics about the NEC.

The site was developed by the Northeast Corridor Infrastructure and Investment Development business line, which welcomes your feedback on the site. Comments and suggestions can be directed to the website administrators at nec@amtrak.com.

Amtrak Completes Career & Compensation Structure Launch

Working with functional leaders from across the business, the Human Capital department recently completed an ambitious project to create a consistent framework to help employees understand the core competencies they need to be successful in their roles and identify development opportunities across the company. It also provides managers with a tool to aid their Performance Conversations and guide the development of their employees. It also provides Amtrak with a framework to identify and predict workforce needs, manage resources and ensure equitable pay.

As a result of Amtrak's new Career & Compensation Structure, non-agreement employees:

- Know their band/zone and how it is defined.
- Understand the competencies – knowledge, skills, abilities and experience – required for all non-agreement roles at Amtrak.
- Understand how to grow their career at Amtrak.
- Receive the same base salary that they receive now.
- Understand how their pay compares to the marketplace – **compa ratio**.
- Earn a Merit Award based on their compa ratio and performance.

In less than a year, the team accomplished a great deal:

- Consolidated similar titles and reduced the number of titles at Amtrak by 60 percent.
- Matched company-wide existing job descriptions and benchmarked 75 percent of them against general industry marketplace data.
- Slotted non-benchmark positions into structure where they aligned with benchmark positions and the level of business contribution.
- Reviewed all benchmark positions with leadership and next level managers.
- Aligned titles to new nomenclature that is reflective of the general industry marketplace.
- Provided every non-agreement employee with a personalized statement that outlines: title, band, zone, compa ratio and STI Target.
- Created tools and resources to help managers successfully use the Career & Compensation Structure to guide employee coaching and career development.

In the next year, you will see more learning and development opportunities directly linked to the competencies identified in the Amtrak Career Level Guide so you can develop the skills you

need to achieve your career aspirations at Amtrak. If you have any questions or concerns, please contact the Compensation team via email: compensationdept@amtrak.com or reach out to the Human Capital Business Partner for your department.

New Bay Area Rail Shuttle Connects with Amtrak System

With the Nov. 22 opening of the Air BART rail shuttle (an automated train) between the Oakland Coliseum BART station (served by Amtrak *Capitol Corridor* trains) and Oakland International Airport (OAK), OAK becomes the second airport (in addition to Newark Liberty International Airport) with a direct rail connection to an Amtrak station.

There are five airports directly connected to the Amtrak network. The train station at John Wayne Airport in Burbank is a short walk from the airport terminal, and Baltimore-Washington International (BWI) Thurgood Marshall Airport and General Mitchell International Airport in Milwaukee have dedicated shuttle bus service to their Amtrak stations.

Learn more about the new Air Bart rail shuttle here: http://www.oaklandairport.com/bart_airbart.shtml.

Holiday Happenings: Los Angeles Union Station

Visitors to Los Angeles Union Station can enjoy these upcoming seasonal events:

- **Salvation Army Brass Players:** Dec. 1- 23 between 7:00 a.m. - 9:00 a.m. at the Ticket Concourse and in the East Portal
- **Metro Express Band:** Dec. 19 at 5:00 p.m. -7:00 p.m. in the East Portal
- **Metro Presents: The "Wizard of Oz" Film Screening:** Dec. 20 at 5:00 p.m. at the Ticket Concourse
- **The All-American Boys Choir:** Dec. 21 at 7:00 p.m. at the Ticket Concourse

Amtrak Holiday eCard Brightens the Season

Each year, the Amtrak Guest Rewards (AGR) team sends out a holiday [eCard](#) to Amtrak Guest Rewards members, as well as customers to say thank you and wish them a happy holiday season. This December, AGR wanted to connect the magic of train travel and the spirit of the season to unite passengers around the country.

The Amtrak Guest Rewards team created a sing-along video, capturing customers and employees singing an Amtrak-centric version of Jingle Bells at Union Station in Washington, D.C. The shoot took place on November 3. Fun was had filming with employees and customers throughout the day, which included sound effects of the train, such as keys jingling, whistles blowing, scanning of tickets and footsteps.

Amtrak Guest Rewards is partnering with other teams to help support the holiday video during the month of December, which included an email going out to members and non-members on December 8, [Amtrak.com](#) and [AmtrakGuestRewards.com](#) banner placements and social media posts. Oh what fun!

Amtrak vs. Strains and Sprains...November Update

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout FY15. Each month we will be challenged to combat and reduce our previous sprains and strains from FY14. The goal is to “knockout” this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains.

For November, Amtrak received a “flash knockdown”, which occurs when a boxer is knocked down but gets back on his feet before the referee begins the count. It's also known as a no-count. Unfortunately, Sprains and Strains ultimately won the round with a 14 percent increase for the month.

The key to winning these bouts is team work ensuring everyone is working safely and protecting themselves. For the December round, remember to keep your guard up and discuss with your group or team how they can contribute to the match. Check out the [Ergonomic Checklist](#) posted on the company Intranet and access your safety risks today.

John D. Dingell Transit Center Now Open

On December 10, Amtrak service in Dearborn, Mich., moved to the [John D. Dingell Transit Center](#). The new station is located two miles west of the existing station, and directly north of the Henry Ford complex.

The spacious new 16,000 square-foot Transit Center offers a larger waiting room and free parking. Additionally, a Tim Hortons restaurant will open in late December, and complimentary Wi-Fi will be available in January 2015.

The transit center, owned by the city of Dearborn and operated by Amtrak, features a pedestrian bridge over the tracks that will allow travelers to access a new entrance to The Henry Ford complex, including the Henry Ford Museum, Greenfield Village, the IMAX Theater, and Ford Rouge Factory Tours. The transit center has a silver certification from the U.S. Green Building Council's Leadership in Environmental and Energy Design (LEED).

The transit center and associated track work was funded entirely with \$28.2 million from the federal American Recovery and Reinvestment Act of 2009. The new station is an important component in initiatives to boost commuter rail from Ann Arbor to Detroit and accelerated speed rail from Pontiac to Chicago.

To celebrate the opening of the new station, an open house will be held today, December 15 from 4:00 p.m. - 6:00 p.m. At the open house, visitors can take a tour of the station, see informative displays and talk with people knowledgeable about the future of train travel. A mural created by Dearborn students will also be featured.

Amtrak Launches New Website Dedicated to the Northeast Corridor

Amtrak has launched a new website, [NEC.amtrak.com](#), dedicated to providing news and information about Amtrak's stewardship of the Northeast Corridor (NEC), including information about the many improvement projects underway and a vision for the future of the NEC.

Influenza Prevention Tips

While the length and severity of influenza seasons are difficult to predict, illnesses due to flu can be expected to increase in the coming months. The Center for Disease Control and Prevention recommends efforts to reduce the spread of influenza virus. These preventative actions include:

- If you haven't done so, get vaccinated. Check with your physician or local pharmacy for vaccination availability. With your Amtrak medical card, the flu vaccine will not cost you anything but the protection you get will be invaluable.
- Wash your hands often with soap and water. If soap and water is not available, use an approved hand sanitizer.
- Cover your nose and mouth by coughing or sneezing into your sleeve or into a tissue. In addition, dispose of any used tissues in a proper trash receptacle.
- Avoid contact with sick people. Recommended distance is three to six feet.
- Stay home and postpone travel if you are sick.
- If you get sick with flu, contact your physician; effective medications to treat influenza are available and work best if started within 48 hours of symptom onset.

For more information about influenza visit: <http://www.cdc.gov/flu> or the company Intranet [here](#).

'Tis the season—Remember to Keep Holiday Stress in Check

Plan for ways to capture the true joy of this season. Here are a few suggestions to manage

seasonal stress:

- **Be realistic.** Few of us have ideal families, unlimited resources or perfect lives. Resist putting pressure on yourself to magically create a perfect scenario during the holidays.
- **Communicate.** Families often stick to rituals that are stress-producing or have lost their original pleasure. Talk to your loved ones about what has meaning for you at this time in your life.

- **Take care of yourself.** Don't overextend yourself to the point that a pleasure turns into a burden. Set limits in terms of your commitments so that you have time for rest, exercise, good nutrition and quality time with loved ones.
- **Be independent.** It's easy to get caught up with trying to compete with others because of the intense commercial hype surrounding the holidays. Think for yourself. Make plans that feel right for you. Give gifts, eat, drink and socialize on *your* terms.
- **Plan ahead.** Take inventory of past disappointments and recent losses and plan differently. Being separated from family by distance, death or other circumstance can be especially difficult during the holiday season. Ask for assistance from friends and family members so that no one is overtaxed and everyone is supported.
- **Be creative.** Make your own traditions. Focus more on spirituality and interpersonal closeness rather than on materialism and over-consumption.

Challenge yourself to put aside the glamor of the gifts, decorations and holiday celebrations and remember to take care of yourself and one another. If this is a difficult time of year for you, there is help available. **Contact the Employee Assistance Program at (844)-Amtrak1 or visit www.achievesolutions.net/AmtrakEAP.** By practicing self-care and planning the holiday you really want, you can make this holiday season one that you and your loved ones will enjoy and cherish.

Office Calendar Order Deadline is December 31

There's a new process for ordering Amtrak office calendars this year. Here is some important information to keep in mind:

- **Is there a new process for receiving wall calendars (small and large)?**
 - Yes – All locations must order calendars from the internal order site by following the link on the Intranet <http://wiki.corp.nrpc/display/ES/Amtrak+2015+Calendars>, click the order button. You will be brought to an internal ordering site, run by our online store vendor. Using a credit card, orders can be submitted for any of the three calendars being offered this year. To get reimbursed, submit an eTrax expense report. Choose "Other" as the type of expense. Be sure to include your receipt as you would for any reimbursable expense.
- **What's the recommended method of distribution?**
 - Each department should designate someone to order calendars for each physical location. There is no need for a department to have one person order all calendars for the entire department and redistribute them as has been done in years past.
- **Is there a cost for departments ordering calendars?**
 - Yes – The traditional wall and tabloid calendars are being offered at cost, and the monthly calendar is discounted by 25 percent off the retail price.
- **Is there a deadline for ordering?**
 - Yes - The special internal order site will only be active through December 31, 2014. Departments must place an order before this deadline in order to purchase calendars at the internal rates. Any orders for calendars after December 31, 2014 will have to go through the external store site at store.amtrak.com and be subject to higher prices.

Railroad Retirement Contribution Changes in 2015

December 22, 2014

The amounts of compensation subject to railroad retirement payroll taxes will increase in 2015, with the Tier I tax rates remaining the same while Tier II tax rates will increase for both railroad employers and employees.

Tier I and Medicare Tax: The railroad retirement Tier I payroll tax rate on covered rail employers and employees for the year 2015 remains at 7.65 percent. The railroad retirement Tier I tax rate is the same as the social security tax and for withholding and reporting purposes is divided into 6.20 percent for retirement and 1.45 percent for Medicare hospital insurance. The maximum amount of an employee's earnings subject to the 6.20 percent rate increases from \$117,000 to \$118,500 in 2015, but there is no maximum on earnings subject to the 1.45 percent Medicare rate.

An additional Medicare payroll tax of 0.9 percent applies to an individual's income exceeding \$200,000 or \$250,000 for a married couple filing a joint tax return.

Tier II Tax: The railroad retirement Tier II tax rate on employees increases to 4.9 percent in 2015, and the employers' rate will be 13.1 percent. The rates in 2014 for employees and employers were 4.4 percent and 12.6 percent, respectively. The maximum amount of earnings subject to railroad retirement Tier II taxes will increase from \$87,000 to \$88,200 in 2015. Since 2004, Tier II tax rates are based on an average account benefits ratio reflecting railroad retirement fund levels. Depending on this ratio, the Tier II tax rate for employees can be between 0 percent and 4.9 percent, while the Tier II rate for employers can range between 8.2 percent and 22.1 percent.

For additional information visit the Railroad Retirement Board website at www.rrb.gov.

Focus on Safety

As we progress into the New Year, we should reflect on last year's achievements as well as areas needing improvement. How can we make this year better?

Think about our actions and their consequences— It is true that every action has a reaction. Think about what could possibly go wrong with what we are doing; then think about what we can do to prevent it. Remember to maintain a heightened sense of awareness regarding safety risk and take consistent action to reduce exposure to you and others.

Communication — It is important that we all participate in safety discussions. If you are leading a safety discussion, engage others by asking questions and getting feedback.

Ask Questions — When it comes to safety, **No** question is wrong. The answer to your question could prevent someone from being injured; help by participating.

Take Your Time — There is no reason to hurry through a safety discussion. Take your time and have a conversation about safety. Rushing could add to the possibility of missing something important for your co-workers.

Personal Sharing — Your personal attitude and role modeling are critical factors in the success of your effective safety discussions.

New Equipment Delivered for Final Inspection

On Dec. 17, the Amtrak program to modernize its long-distance train equipment reached to a key milestone when 18 new baggage cars departed the CAF USA Elmira, N.Y., facility and traveled to our Hialeah maintenance facility for final inspections before acceptance. Pulled by two locomotives, the special train traveled through New York to Philadelphia, where two additional baggage cars that have been testing on the Northeast Corridor were added to the consist. The train then traveled southbound to Florida, arriving on Dec. 19.

The baggage cars are expected to enter revenue service in early 2015 and are subject to be used on any of Amtrak's 15 long-distance routes. The baggage cars are part of a larger order for 130 single-level long-distance passenger cars, including diner, sleeper and bag-dorm cars. The new cars are designed to modernize the Amtrak fleet, improve reliability and maintenance, upgrade passenger amenities, travel at speeds up to 125 mph and replace units built as far back as the 1940s and 1950s.

Lantern Award for Operations Leadership Announced

The American Association of Railroad Superintendents recently presented Moe Savoy, deputy general manager, Central Region with the Lantern Award for Operations Leadership. The award is given to a railroad, transit or operating company executive who has demonstrated exceptional leadership by implementing effective changes that have led to improvements such as safety, efficiency or training/development.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

Savoy has responsibility for long-distance, state supported and Metra commuter rail services at Chicago Union Station. On a daily basis, he is responsible for over 580 train movements and nearly 120,000 passengers. He is recognized for challenging both union and management team members to identify safety risks and to create a plan to implement changes to reduce those risks.

Knowledge Corridor Service to Begin

On December 29, new [Vermont](#) service to the Knowledge Corridor will begin with stops in Greenfield and Northampton, Mass. The *Vermont* will also add a stop in Holyoke, Mass., later in 2015 when station work is complete. The added stops will replace service provided to the Amherst station, which will end on December 28.

In preparation for the new service, Amtrak has been working with local authorities to raise rail safety awareness by meeting with community groups and schools. A variety of rail safety education tools are available from [Operation Lifesaver](#), a rail safety education organization.

In Fiscal Year 2014, ridership on this route increased 6.6 percent, providing service to more than 89,000 passengers. The *Vermont* is financed primarily through funds made available by the Vermont Agency of Transportation, the Connecticut Department of Transportation and the Massachusetts Department of Transportation.

If you happen to have snapped a photo, **tag** it **#AmtrakForward** and **share** it with us on [Twitter](#) or [Instagram](#). We'll be sharing some of the top submissions.

Anaheim Regional Transportation Intermodal Center (ARTIC) Now Open

On December 6, the [Anaheim Regional Transportation Intermodal Center](#) (ARTIC) opened for service, with a community-wide celebration held on December 13. The new station is the premier transportation hub in Southern California, serving Amtrak *Pacific Surfliner* service, Metrolink commuter trains, Orange County Transportation Authority (OCTA), Anaheim Resort Transportation (ART), Megabus.com, Greyhound, taxis, bikes and over the next two months, a variety of restaurants and retail options will open to passengers.

ARTIC is an iconic, LEED Platinum-certified facility that incorporates environmentally friendly materials and design features. In addition to providing expanded public transportation options, ARTIC is a destination for all that offers amenities like

transit oriented retail, specialty dining, Wi-Fi and charging stations, parking, bike racks and lockers.

Auto Train Pass Rider Changes

Amtrak pass riders are entitled to free travel under the Red, White and Blue Policy when the color of the train is BLUE. In some cases, such as *Auto Train*, complimentary amenities are offered on board. Due to the increasing cost of these amenities, Amtrak pass rider fees will be implemented.

Effective December 22, a fee of \$75.00 will be applied to motorcycles and cars in addition to an amenity fee of \$30 per pass rider (regardless of age) traveling on *Auto Train*. This new fee applies to current Amtrak employees and retirees. For more information about the new changes, visit the [company Intranet](#).

Amtrak This Week will return on January 5, 2015. Happy Holidays from the Corporate Communications team.

New Amtrak Smart IDs are Ready for Pick Up

Thank you for your participation in Amtrak's Smart ID refresh effort. New Amtrak Smart ID badges were distributed to location-specific Points of Contact and are available at all locations to be picked up.

- **You must pick up your new Amtrak Smart ID badge no later than December 6**
- **It is each individual's responsibility to pick up the new badge and return the old badge.**

The Amtrak Smart ID poster in your location explains when and where you can go to pick up your badge. The new Amtrak Smart ID badges will be activated on Saturday, December 6 and will provide the same access as your old badge. After December 6, all old badges will no longer function and should not be used for any purpose (e.g., access to facilities, travel privileges or employee identification).

If you have any questions about the new Amtrak Smart ID badges, please call the **Smart ID Refresh Help Desk at 202-906-2239**. The ID Refresh Help Desk will be available from 8:00 a.m. - 8:00 p.m. EST, Monday through Friday. You can also email IDRefresh@amtrak.com with any questions.

Reminder: Next Step of FY14 End of Year Wrap-Up Begins November 25

Good news. Final ratings have been approved by the Executive Committee, which means Performance Conversations can occur as scheduled from November 25 - December 23. Since employee performance affects compensation decisions at Amtrak, Rating Managers are strongly encouraged to schedule one-on-one meetings with direct reports to include discussion of the three key components of our pay-for-performance strategy. This includes the Performance Conversations, merit and the short-term incentive (STI).

To plan for this discussion, both you and your Rating Manager should familiarize yourselves with the key components of our pay-for-performance strategy. Specifically, be prepared to discuss:

- **Performance Conversations** – Your performance towards your FY14 SMART goals and Job Accountabilities as well as demonstration of Amtrak Core Competencies throughout FY14. Since each of these factors affected your overall final performance rating,

each should be included as part of your performance discussion.

- **Merit** – As a pay-for-performance company, increases in base salary are contingent upon performance; the higher your performance, the higher your merit award.
- **STI** – How your performance and that of each Amtrak employee collectively contributes to achievement of our Financial Excellence and Customer Focus goals, which determine STI payout.

Merit and STI statements will be available upon approval for payout by the board of directors on Dec 10 or shortly thereafter. An announcement from Mr. Boardman will indicate when statements will be available and how Rating Managers can access their direct reports' statements in *My CareerTrak*. During the time prior to merit and STI statements being available, employees and Rating Managers can and should discuss merit award and STI as noted above. After statements are available, specifics regarding merit award and STI payout can also be discussed.

Winter Vehicle Preparation

Old or not, vehicles need attention.

Mechanical failure is an inconvenience and a safety hazard in the winter. Preventative maintenance is a must. Here are some tips to be prepared for driving in winter weather:

- Check the tread on your tires.
- Switch to winter-grade oil if you aren't already using all season oil.
- Check your battery, clean the posts and if more than five years old, have a load test performed on your battery. Car batteries have definite shelf lives, and no amount of maintenance or care can reverse the effects of chemicals on metal.
- Antifreeze should not only be strong enough to prevent freezing, but fresh enough to prevent rust. Even when temperatures dip, your vehicle's coolant system works hard to keep the engine cool and running smoothly. It's important to take care of your cooling system, whatever the weather.
- Have the exhaust system fully checked for leaks that could send carbon monoxide into your vehicle.
- Make sure wiper blades are cleaning properly. Consider changing to winter wiper blades, which are made for driving in snow.
- Top off your windshield washer fluid, and carry extra in case your reservoir runs dry.
- Prepare an emergency kit. Here are some recommended items:

Amtrak Store Holiday Super Sale: Black Friday – Cyber Monday

Looking for the perfect gift for the train enthusiast in your life? Check out www.amtrak.com/store between

November 28 – December 1 and stock up on Amtrak-branded merchandise and collectibles, just in time for the holidays.

Over 75 items will be offered at great discounts, including hats, shirts, teddy bears, and posters. Some items will be marked down 75 percent or more. Supplies are limited...be sure to shop early and save.

In addition to the online Super Sale, Amtrak also opened a brick and mortar store in Chicago Union Station for the holiday season. Located just south of the Great Hall breezeway, the store will be open to the public through December 23, Sunday through Monday (Closed Saturdays and Thanksgiving Day), between 10:00 a.m. - 6:30 p.m.

Find out What's Going on with the iLMS Project

The Integrated Labor Management System (iLMS) team has kicked off the Planning and Requirements phases for their first release. The iLMS system will provide a more efficient way to manage labor across departments and crafts by optimizing assignments, payroll and crew management. Amtrak is undertaking the iLMS project to modernize our current labor management systems and processes.

Members of the team are meeting with agreement and management employees to gather business requirements for the new solution in the following locations:

- Albany, N.Y.
- Boston, Mass.
- Chicago, Ill.
- Jacksonville, Fla.
- Los Angeles, Calif.
- New York City, N.Y.
- Oakland, Calif.
- Seattle, Wash.
- Washington, D.C.
- Wilmington, Del.

To learn more about the iLMS project, click on this link for a full version of the **iLMS Quarterly newsletter**.

November 3, 2014

Reminder: Automated Certificate of Compliance Process Launches Today

The automated Certificate of Compliance process officially re-launched today. This is the process by which all non-agreement employees are required to disclose relationships that might present a conflict of interest with Amtrak's business and operations. All non-agreement employees should have received a communication via email detailing the process and how to electronically submit information for 2014.

The deadline by which this year's disclosure process must be completed is **Friday, November 21**. As a reminder, **participation in this certification process is an annual requirement for all non-agreement employees**.

Any questions regarding this process can be emailed to the Certificate of Compliance email box at COC@amtrak.com.

New Amtrak Collectibles Available for Purchase

The official Amtrak 2015 monthly calendar is now available for purchase at <http://store.amtrak.com/>. Spanning 14 months, November 2014 – December 2015, this is the first time Amtrak has sold a monthly calendar. It features photos taken throughout the country by some of our talented employees and was printed at our Reprographic facility in Washington, D.C. A variety of trains and routes are depicted supporting all three business lines as well as other corporate initiatives including Great American Stations, Amtrak History and Operation Lifesaver. The traditional Amtrak wall and 11" x 17" tabloid size calendars will also be available for sale this year, featuring a different image than those featured in the monthly calendar.

Also available for sale is the official 2014 Amtrak holiday ornament. Manufactured in Rhode Island, the limited-edition silver tone ornament features the *Coast Starlight* Pacific Parlor car logo. Each ornament is shipped in its own silver-foil stamped box, perfect for gift-giving during the holidays or throughout the year. The ornament retails for \$20.

These items, as well as other Amtrak-branded merchandise, can be purchased online by employees at a 15 percent discount by using the discount code EMP15 (which requires the input of a complete employee ID number in a separate field).

Blue Ribbon Panel Created to Address Chicago Rail Gridlock

Last week, Amtrak established a blue ribbon panel of rail and transportation leaders to identify infrastructure and operational improvements concerning the rail traffic gridlock in Chicago. The unprecedented level of rail congestion is causing major delays for Amtrak passengers and freight shipments which are damaging to the U.S. economy.

Chicago is the main hub of the U.S. rail network and an important Amtrak hub. Many of our trains that operate to and from the city are suffering from poor on-time performance, dispatching issues and high levels of freight train interference. If Amtrak trains, which have statutory dispatching priority over freight trains, cannot be moved efficiently through Chicago, then freight shipments will continue to be slowed by gridlock as well.

Learn more about blue ribbon panel and its objectives [here](#).

Announcing Exciting New EAP and Work/Life Benefits

Your Amtrak Employee Assistance Program (EAP) is pleased to announce expanded EAP services for all Amtrak employees and their immediate family members. Amtrak has partnered with [ValueOptions](#) to provide state of the art programs designed to help employees and family members manage the challenges of work and life. One call to the toll- free number will allow you to set up counseling with a professional, licensed counselor near where you live or work, talk with a legal or financial advisor, get referrals for childcare or eldercare and much more, all at no cost to you. So what's the catch? There is none!

The Employee Assistance Program is confidential and free, and there to help Amtrak employees have the best quality of life possible. Call their toll- free number or visit the website to get support with:

- Marital and family concerns
- Stress management
- Financial planning and legal issues
- Managing feelings of anxiety and depression
- Child and eldercare issues
- Drug and alcohol issues
- Relationship problems

Remember, assistance is available 24 hours a day, 365 days a year. Accessing services is easy; simply call **1 (844)-Amtrak1 (1-844-268-7251)** or go to www.achievesolutions.net/AmtrakEAP. Whether an issue is big or small, the Amtrak EAP can offer a helping hand in finding the support needed.

Ebola Preparedness Intranet Site

Amtrak employees looking for the company's Ebola Preparedness Intranet site can now find information [here](#) or on the Amtrak Intranet under How We Work>Public Health> Public Health>Ebola.

November 10, 2014

Benefits Open Enrollment Starts Today

Take Action in Three Simple Steps

1. **KNOW YOUR OPTIONS** – Take the time to review your benefit options for 2015.
2. **REVIEW YOUR HEALTHCARE NEEDS** – Talk with your family about your healthcare needs for the upcoming year, review your current usage of health care and consider how that may change for the upcoming year.
3. **ENROLL** – Once you are ready to make a decision, log on to **www.AmtrakBenefits.com** during the enrollment period (November 10–21, 2014) to enroll.

Understanding the 2015 Affordable Care Act (ACA) Updates to Amtrak Plans

The Affordable Care Act (ACA) requires that health plans restrict the amount you pay for in-network covered services. This is known as the out-of-pocket (OOP) maximum. The OOP maximum under ACA includes your out-of-pocket expenses for co-pays, co-insurance and/or deductibles for covered in-network services applicable to the plan you choose. The maximum also applies to the Comprehensive Plan available to agreement employees. If the plan you choose does not have a deductible, the OOP maximum limit applies to co-pays and co-insurance amounts only.

There may be separate OOP maximum limits for medical claims and pharmacy claims. For 2015, Amtrak will apply separate OOP maximum limits for medical and pharmacy for all plans except for the Consumer Directed Health Plans (CDH) available to non-agreement employees. The CDH plans will have a combined OOP maximum that includes both medical and pharmacy claims.

What's an Out-of-Pocket Maximum?

The **out-of-pocket maximum** is the most you will have to pay out-of-pocket each year for the covered healthcare services you receive. Once you reach the **out-of-pocket maximum**, your health insurance plan begins to pay 100 percent of the allowed amount.

How do I meet the Out-of-Pocket Maximum?

Typically, out-of-pocket expenses – the amount you pay for healthcare services – include co-pays, co-insurance and deductibles. The type of out-of-pocket expenses you incur will depend on the plan you select. For example, some plans pay benefits based on a schedule of co-payments while other plans share the cost based on a level of co-insurance. You can find information on your 2015 medical plan options and each plan's out-of-pocket (OOP) maximum on the Medical Benefits Summary chart in your enrollment guide.

For more information on the Affordable Care Act (ACA) and the out-of-pocket maximum visit:

<https://www.healthcare.gov/glossary/out-of-pocket-maximum-limit/>

Law Topic: Service Attendants and Knowledge of Alcohol Laws

Did you know that the serving of alcohol is governed by state law and each state law differs? That means in addition to being adept at customer service, the service attendant must also be proficient in the laws of serving alcohol. Not an easy task when one is in constant movement from one state to another.

The Law department can help anyone with any questions about these and other laws that have an impact on our business.

Please visit the updated Intranet page

at <http://epmoweb20p/sites/ldi/SitePages/Homepage2.aspx> for more information. You can also read more about it in the quarterly newsletter by clicking [here](#).

Amtrak Delivers a Knockout for October

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout fiscal year 2015 (FY15). Each month, we will be challenged to combat and reduce our sprains and strains from fiscal year 2014 (FY14). The goal is to **"knock out"** this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains. With "preliminary" results in, it appears Amtrak won the first round by landing a knockout with 37 injuries related to sprains and strains for the month of October FY15 vs. 46 for the month of October FY14. After the first round, it appears we are well positioned for many victories throughout FY15.

Corner man- It's crucial we keep our guard up and stay focused. That was a nice blow to Sprains & Strains, but it's a long championship bout. The next match will be with a tougher opponent and as preparation for this match, let's keep these thoughts in check:

- Ask fellow workers for help with heavy pushing, pulling, lifting and carrying tasks.
- Warm up and stretch before you start your day.
- Stay aware and prevent slips, trip and falls.
- Discuss in your safety briefings ways to prevent Sprains & Strains.

Official Score: Amtrak swiftly delivered a "Knockout" blow in round one with a **19.5 percent improvement** from last year at this time.

Use the Career & Compensation Structure to Prepare for Your Performance Conversation

Performance Conversations—how we describe performance management at Amtrak—foster ongoing dialogues between you and your manager to share, set and discuss goals; create development plans; and monitor, measure and recognize your results. Amtrak's new Career & Compensation Structure can be a useful tool as you prepare for these conversations with your manager.

Here's how:

1. **Understand how you fit into the organization.** Amtrak's Career Level Guide can help you identify where your current job is located in the career structure so that you can see what positions might be a good fit for you in the future. Depending on where you are in your career and/or where you aspire to be in the future, the framework provides a structure of the knowledge requirements at various points in your career.
2. **Evaluate your current skills.** By evaluating your current skills and competencies, and then identifying where you need to focus your development efforts, you will be able to align your personal development plan more closely to your career aspirations.
3. **Define your career aspirations.** Having identified future career aspirations, assessed your current knowledge, skills and competencies and created a personal development plan, your Performance Conversation is a great time to talk to your manager.
4. **Identify areas for improvement and growth.** During your Performance Conversation, ask your manager for his or her assessment of your strengths and potential, and explore what opportunities are available at Amtrak to help you develop or enhance your skills and competencies.
5. **Set your goals for 2015 and beyond.** Your Performance Conversation with your manager is a great opportunity to not only discuss your performance for 2014 and your goals for 2015 but it's also a great time to define your career aspirations and create a personal development plan in partnership with your manager to help you get there.

The Amtrak Career & Compensation Structure creates consistency and sustainability across the company to help you achieve your career goals and Amtrak's strategic goals. Take advantage of the tools available to help you prepare for your upcoming Performance Conversation with your manager.

To find out more about the FY 2015 performance management process, visit <http://wiki.corp.nrpc/display/HR/Performance+Conversations>

Place Your 2015 Calendar Order Now

Amtrak departments and stations wishing to purchase 2015 Amtrak calendars may now order through an internal order site. This Calendar Order Site is solely for internal Amtrak orders of calendars. Orders for other Amtrak-branded merchandise or for personal use must go through store.amtrak.com.

Traditional wall and tabloid calendars are available at cost through a special internal store site run by our vendor, Staples Promotional Products. In addition, the monthly calendar is available at a 25 percent discount. The 2015 calendar prices are:

- **Wall:** \$3.25
- **Tabloid/Desk:** \$0.45
- **Monthly:** \$7.50

To place a calendar order, click on <http://amtrak.bnr.corpmmerchandise.com/calendar>

This site will remain active until December 31, 2014. This URL is not to be disseminated externally.

The ordering employee must submit a Purchase Requisition through eTrax for reimbursement through their department's budget. Orders can only be accepted via credit card.

Please note that the only calendar currently in stock is the monthly calendar, which will ship within two days (or less) of ordering. The wall and tabloid calendars are expected to ship in early December. If an order consists of an out-of-stock calendar, the order will be held until it can be fulfilled in its entirety. There will be no split shipments, and shipping charges will apply.

November 17, 2014

Reminder: Deadline for 2014 Annual Certificate of Compliance Process is Friday, November 21

The deadline by which the annual Certificate of Compliance process must be completed is this **Friday, Nov. 21**. This is the process by which all non-agreement employees are required to disclose relationships that might present a conflict of interest with Amtrak's business and operations. All non-agreement employees should have received a communication via email on Nov. 3 detailing the automated process and how to electronically submit information for 2014.

As a reminder, **participation in this certification process is an annual requirement for all non-agreement employees.**

Any questions regarding this process can be emailed to the Certificate of Compliance email box at COC@amtrak.com.

Extra Train Service Added for Thanksgiving Holiday

A special Thanksgiving holiday timetable for the Northeast Corridor (NEC) effective Nov. 25 – Dec. 1, is now available in print and online. The special timetable also includes *Empire* and *Keystone* service holiday schedules.

The Thanksgiving holiday is the busiest travel period of the year, and in the NEC we will serve more than 300,000 passengers during the holiday week. On the two busiest days -Wednesday and Sunday-NEC trains serve twice as many people as on an average day. To support the increased demand and customer service, "Holiday Extra" trains will be added.

In addition, a special Thanksgiving holiday timetable is now available online for *Pere Marquette* and *Wolverine* services. Amtrak will operate 22 extra trains in Michigan to supplement regularly scheduled service. These extra trains will operate between Chicago, Ill., and Kalamazoo/Ann Arbor and Holland, Mich.

As always, volunteers are needed at our most heavily trafficked stations during this holiday period to ensure a positive and upbeat customer experience. Volunteer posts may include:

- Line Monitors
- Quik-Trak Machines
- Gate Assistance
- Information, i.e., directions, train schedules, etc.

Please consider volunteering at a station near you.

New Tool Allows Real Time Access to Operational Information

Through the Operations Foundation program, a new **Operations Portal** has been developed that provides users the capability to access consolidated real time information about today's train operations. Developed closely with subject matter experts and a pilot user group, the portal will help meet the day to day information needs of the Operations staff.

Previously, information was only available through Amtrak legacy systems such as Arrow, the Labor Management System (LMS) and other systems and displays that required system knowledge and many separate manual steps. The Operations Portal now greatly improves access to information for use in day-to-day decision making by aggregating data from these systems. This allows for near-real time train performance, equipment, and crew and passenger information. The portal has five Operational Views: Train Performance, Passengers On/Off by Train, Passengers On/Off by Station, Required Equipment and Connecting Passengers and Success Measures (metrics)

The **Operations Portal** can be accessed by clicking [here](#) or by going through the Amtrak Intranet to How We Work > Operations Organization > Operations Portal. A [user guide](#) is available to you by clicking on the user guide button located on the left hand side of the main screen.

Email notifications will be sent out from the Operations Foundation team about upcoming webinars which will provide guidance and insight into use of the Operations Portal. The team will also be visiting field locations for in-person training.

Users can submit questions and suggestions to the Operations Foundation team by clicking on the submit feedback button located on the left side menu bar of the main screen or by sending an email to OpsFoundation@amtrak.com

Amtrak Labor & Employment Law Newsletter Available

The latest edition of the Amtrak Labor & Employment Law Newsletter, "On the Right Track," is now available. You can find this and past editions of all Law department newsletters under the Resources tab on the [Law department](#) Intranet page, located under the How We Work tab on the main Amtrak Intranet page.

Featured in this Issue:

- Your emails are being automatically deleted – what you need to do about it.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

- Should you allow a temporary change in an employee's job duties to accommodate a medical condition?
- Ash v. Walgreens – Another employer lands in hot water for failing to timely address performance problems and making disparaging comments about medical leave.
- New Jersey and San Francisco are latest to regulate employer's use of criminal records during hiring process.
- Is discipline ever okay after an employee injury? Your Federal Railroad Safety Act questions answered.
- Why can't I ask for a doctor's note when an employee marks off "Family Medical Leave Act?"

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter. Their job is to provide you with answers to your labor and employment law questions so that you can get on with doing your job running the railroad.

Reminder: Practice Good Housekeeping

Effective housekeeping can help get work done safely and efficiently by eliminating potential workplace hazards. Remember, housekeeping is more than cleanliness; it means keeping work areas organized...conditions in your work area are a reflection of your commitment to safety!

Keys to Good Housekeeping:

- Keep your work area free of slip and trip hazards.
- Discard waste materials and other fire hazards from work areas.
- Pay attention to important details such as the layout of the whole workplace, aisle marking, adequacy of storage facilities and maintenance.
- Clean all spills immediately. Be aware of oil and grease.
- Mark off areas that cannot be cleaned or repaired immediately.
- Remove obstacles from walkways and always keep them free of clutter.
- Secure mats, rugs and carpets that do not lay flat.
- Always close file cabinets or storage drawers.
- Cover cables and electrical cords that cross walkways.
- Keep work areas and walkways well lit.
- Keep tools and equipment clean, neat and in good working order.
- Keep work vehicles orderly.

New Virginia Thruway Service Added

Effective Oct. 27, a new dedicated Thruway service began operating, connecting passengers traveling on the *Crescent* at Charlottesville to/from Richmond – Staples Mill and Richmond – Main Street stations. Previously, a thruway service existed connecting to/from the *Cardinal* three days a week.

This new service will provide additional connectivity in Virginia and allow passengers to connect to more trains and destinations. Schedules are available for sale in Arrow and on Amtrak.com.

The iLMS system will provide a more efficient way to manage labor across departments and crafts by optimizing assignments, payroll and crew management. Amtrak is undertaking the iLMS project to modernize our current labor management systems and processes.

Members of the team are meeting with agreement and management employees to gather business requirements for the new solution in the following locations:

- Albany, N.Y.

All Aboard the 2014 Amtrak Autumn Express

October 6, 2014

Due to popular demand, the Amtrak "Autumn Express" excursion is back. Come along for a historic train ride departing from

and returning to Philadelphia 30th Street Station on Saturday and Sunday, November 8 and 9. Travel through small towns, historic tunnels, see key landmarks and experience rare mileage along a route in Pennsylvania that hasn't seen regular passenger service in decades.

Enjoy fall foliage during a rare trip beginning with the Philadelphia Highline above and across the Penn Coach Yards and mainline. Travel along the Schuylkill River and through the countryside that only freight trains travel now. You will pass through the Flat Rock Tunnel constructed in 1836-1840 (one of the oldest in the country) and the Black Rock Tunnel constructed in 1838, the third oldest tunnel still in use in this country. After a brief stop in Harrisburg, the "Autumn Express" will take you back to Philadelphia via Hershey and Reading while travelling through scenic Montgomery, Chester, Berks, Lebanon and Dauphin counties.

Tickets go on sale Thursday, October 9 at 10:00 am ET on Amtrak.com, and are sure to go fast. Reserve your seats quickly.

- The "Autumn Express" departs Philadelphia at 9:45 a.m. and returns at 6:00 p.m.
- Tickets are \$129 for adults and include a boxed lunch (turkey sandwich, chips, water and cookie) and souvenir tote bag.
- Children 2 - 12 ride for half price and receive a boxed lunch and tote bag.
- Seating is limited for this unique opportunity.
- Employee/Retiree Rail Pass not valid.

Chicago Union Station Featured in Architecture Festival

On October 18-19, the [Chicago Architecture Foundation \(CAF\)](http://ChicagoArchitectureFoundation.org) will be presenting Open House Chicago, a free behind-the-scenes look at many of the city's great places and spaces with 150 buildings open to the public. Participants can explore repurposed mansions, hidden rooms, sacred spaces, private clubs, iconic theatres, offices, hotels and more.

This year, [Chicago Union Station](http://ChicagoUnionStation.org) (CUS) will be a tour site during the weekend festival. CUS is the only example in the United

States of a "double-stub" station, where 24 tracks approach from two directions and most do not continue under or through the station. The building is clad in Bedford limestone quarried in Indiana. Together with the approach and storage tracks, the entire station facility takes up nearly ten city blocks.

During Open House Chicago, event goers will gain behind the scene access which will include the long-vacant Women's Lounge, located just off of the Great Hall and the Union Gallery.

For more information

visit <http://www.openhousechicago.org/site/426/>

Ebola Virus Update

Recent news reports reveal that the Ebola virus outbreak continues in West Africa and that the first case of an individual infected with Ebola was reported in the United States.

Infection with Ebola virus requires direct contact with blood or body fluids of an infected person. Ebola is not spread through the air. Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Hands should be cleaned before preparing food, eating or touching one's face, and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger develops the symptoms described above, and has a history of travelling to Africa or contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill passenger separated from the other passengers as much as possible (three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill passenger or his/her luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.

- Contact CNOC so arrangements can be made to have the ill passenger detained and met by local emergency medical personnel.

Amtrak's procedure for employees who have contact with blood or body fluids can be found [here](#) on the company Intranet.

Amtrak Launches New System Safety Dashboard

On September 30, the Amtrak System Safety department launched the [Amtrak System Safety Dashboard](#). Located on company Intranet at Safety > Safety> Safety System Dashboard, the dashboard will allow all Amtrak employees to view Amtrak's safety metrics and progress each month as data becomes available. The dashboard currently reflects how the organization was aligned prior to last year's Operations reorganization. Work is currently being done on updating the Amtrak Safety Information System, which when completed, will accurately reflect how the company is aligned today.

The dashboard is a combination of leading and lagging safety indicators which are familiar to most employees. Also included on the dashboard is the Serious Injury or Fatality (SIF) metric indicator. Recently developed by Amtrak, the SIF metric indicator will measure those injuries that have the potential to become a serious injury or lead to a fatality. This metric is an outgrowth of discussions with CSX Transportation and their Life Altering Index and the emphasis they place on these types of injuries.

Using SIF as a leading indicator will enable responsible parties to develop an action plan focused on preventing injuries with potentially serious consequences.

Training for managers and supervisors on how to report a SIF has been ongoing over the last few months and our Human Capital department is working on developing a computer based training module.

Amtrak will use Fiscal Year 2014 data as the baseline for a SIF ratio. To learn how the SIF ratio is calculated, view the System Safety Dashboard Summary on the company Intranet or [click here](#).

If you have suggestions for improving the System Safety Dashboard, please contact System Safety at CentralReporting@Amtrak.com.

Anniversary Celebrations Held for Two Amtrak Michigan Services

On Oct. 1, Amtrak [Blue Water](#) service between Port Huron and Chicago celebrated its 40th anniversary. The onboard celebration included an extra café car, offering more table seating, commemorative gift bags and refreshments. Volunteer hosts were available in each car to hand out gifts and answer passenger questions.

Recent improvements to the service include free Wi-Fi service and bicycle racks in the café car. A new station in East Lansing is expected to open next year, offering a larger waiting room and additional parking. The [Blue Water](#) service has a steady annual ridership with more than 150,000 passengers each year.

The [Blue Water](#) 40th anniversary event was sponsored by the [Blue Water Coalition/Shore to Shore](#), Amtrak and the Michigan Department of Transportation (MDOT), which sponsors the route.

Last month, [30 years](#) of the [Pere Marquette](#) Amtrak service was celebrated with a special event. The [Pere Marquette](#) travels between Grand Rapids, Michigan and Chicago, with stops in Holland, Bangor and St. Joseph/Benton Harbor.

The [Westrain Coalition](#), Amtrak and MDOT, which provides state support for the route, promoted the 30th anniversary event with a bilevel Superliner train, including a special "theater car" at the rear of the train for better viewing; an opportunity to win free round-trip tickets at stations and commemorative gift bags and refreshments.

Approximately one-half hour prior to regularly scheduled train departure, 30th anniversary ceremonies were held at each city and included local mayors and other city leaders, as well as MDOT and Amtrak officials.

Boston Back Bay Station to Become Unstaffed

Effective Oct. 8 and until further notice, the [Boston Back Bay](#) Amtrak ticket office will close, and Amtrak personnel will not be available at the station to assist with ticketing, baggage or other services. Amtrak trains will continue to serve the Boston Back Bay station, according to the normal published schedule. The closure is due to a ventilation issue within the ticket office.

Boston South Station

- Passengers who require ticketing services from an agent and passengers who are paying for their

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

tickets with cash should use Boston South Station or other staffed stations.

- Passengers who need assistance with luggage or other passenger services should use Boston South Station or other staffed stations.
- Unaccompanied minors will not be permitted to travel to or from Boston Back Bay. Unaccompanied minors may, instead, use Boston South Station or other staffed stations.

Boston Back Bay Station

- Passengers boarding at Boston Back Bay are encouraged to print their travel documents before arriving at the station, or use their smartphone or other mobile devices to present their eTickets to the conductor on the train.
- Two Quik-Trak self-serve ticketing kiosks are available at the Boston Back Bay station for passengers to purchase and pick up their travel documents using a credit card.

Arm Yourself For Flu Season

Did you know that healthy adults can spread the flu virus *the day before* they feel sick? Help reduce the risk of flu for yourself, your family and those around you by getting the flu vaccine today. The Centers for Disease Control and Prevention (CDC) states that: "The single best way to prevent the flu is to get a flu vaccination each fall."

Amtrak is sponsoring flu shot clinics at many locations again this year. Please click [here](#) for the list of scheduled clinics.

If you missed the clinic at your location, the good news is that if you are covered by an Amtrak medical plan you can go to many pharmacies across the country to get a flu shot at no cost to you just by showing your medical card and so can your dependents covered by the plan. A list of retail pharmacies where you can get your flu shot can be found on the Amtrak Wellness website.

For more information on the flu vaccine, please visit the Amtrak Wellness Webpage on the Amtrak Intranet>Employees>Wellness.

In addition to a flu shot, keep in mind these helpful tips:

- Wash your hands often with soap and water. If soap and water is not available, use an alcohol-based hand rub.
- Cover your nose and mouth with a tissue when you cough and sneeze. In addition, dispose of any used tissues in a proper trash receptacle.
- Avoid contact with sick people. Recommended distance is three – six feet.
- Postpone travel when sick.

Top 10 Things to Know About the Career & Compensation Structure

Amtrak's new Career & Compensation Structure increases visibility into the knowledge, skills and abilities required to excel in individual functional roles and provides direct line of sight to future career paths and opportunities at Amtrak.

Here are 10 quick things you should know. The Amtrak Career & Compensation Structure:

1. Reinforces the four principles of Amtrak's compensation philosophy:
 - Marketplace Competitive
 - Pay for Performance
 - Career Progression & Growth
 - Transparency

2. Creates the same anatomy for all Amtrak titles to ensure consistency and better align with titles commonly found in the marketplace. Amtrak's titles consist of three parts:
 - Level – the hierarchical position within the career structure (e.g., Specialist)
 - Function – the job family or function to which the job is associated (e.g., Finance)
 - Organization Role – the essence of the job – is it usually paired with a function to more fully describe the nature of the work (e.g., Manager)
3. Establishes consistent titles, organized into bands with zones defined by compensation at the marketplace median. Through this process, we consolidated similar titles and reduced the number of titles at Amtrak by more than 60 percent.
4. Updates some Amtrak titles to more accurately reflect job content and marketplace best practice.
5. Defines the core competencies required for every non-agreement role at Amtrak. That way, you know the knowledge, skills and abilities you need to be successful and you can identify development opportunities to help you close any gaps.
6. Identifies the required behaviors, characteristics and abilities are outlined for each level based on Amtrak's core competencies.
7. Provides managers with a tool to guide their Performance Conversations and better support the development of their team. Each manager will conduct a one-on-one meeting with the members of their team to review a personalized statement that will outline their title, band, zone, compa ratio and the impact to their STI Target Incentive opportunity, if any.
8. Creates a consistent framework to evaluate the three key components of compensation across the company: base salary, merit awards and the Short-Term Incentive (STI).
9. Validates compensation zones by using the marketplace median as the anchor for the midpoint and built the range around that marketplace analysis.
10. Defines a salary range or zone that establishes the minimum, midpoint and maximum. The entire range is reflective of the marketplace and based on benchmarking data. The midpoint represents an approximation of the band's marketplace median compensation based on jobs in similar markets.

Human Capital developed the Amtrak Career & Compensation Structure with help from a cross-functional team. The team worked closely with leadership and directors to review existing job documentation and consolidate job classifications and validate against the marketplace. The Career & Compensation Structure was launched in Human Capital beginning in July, Corporate Support in September and Operations in October. The entire process will be completed by the end of November 2014.

Reminder: Use Caution in Purchasing LED Lighting

LED lighting is an emerging lighting solution that has taken the lighting market by storm. This emergence is due to the bright white light it produces, its long burn life and the significant reduction in wattage compared to the traditional incandescent, High Intensity Discharge (HID) and fluorescent bulbs. While LED lighting has these advantages, the technology is still relatively new and is very expensive. Some technical issues are still being resolved, including how to disperse heat and how to distribute and reflect the light effectively.

While LED is the light source of the future, we must be very careful when purchasing LED fixtures, especially in higher wattages. There are manufacturers rushing their products to the marketplace that DO NOT meet sound lighting practices and are not providing the proper light for operational and safety performance.

Amtrak's Utilities Management and the Engineering Design groups have been working together to research, test and specify LED lighting products for use in our stations and facilities around the country. Amtrak installed several hundred fixtures and have received positive feedback on the performance of these LED fixtures.

We are asking all facility managers, procurement buyers and other employees who specify and purchase lighting fixtures to contact John Tull at John.Tull@amtrak.com or our Engineering Design group before purchasing LED fixtures -- or any large fixtures orders over \$5,000. This is in conformance with [Amtrak's Utilities Processing policy](#), P/I 8.28.1, Section 5.5. In addition, the policy specifies that all major facilities should have an Energy Plan and perform an annual energy audit/evaluation as well as request capital funding to perform energy efficiency projects.

Proper specification of lighting fixtures will ensure the safety of our employees as well as the efficient use of our operating and capital dollars.

The Importance of Personal Protective Equipment

At Amtrak, safety is always job one. Across the railroad, different positions and crafts require personal protective equipment (PPE), and as its name implies, the equipment is for your personal protection.

If your job duties require PPE, please review your safety rule book to determine what equipment applies to you. Make sure the equipment is approved, fits and is not compromised in any manner.

Amtrak assesses work locations to determine if hazards are present and if protective equipment is required. In addition, the Occupational Safety and Health Administration has general requirements outlined in 29CFR 1910.132 which also applies to specific work functions and locations.

We have all heard "If you see something, say something" as it relates to security issues. This is also true when we observe risky behavior. If you see a co-worker performing an at-risk behavior, stop them and discuss the safe way. No one wants to see a fellow worker injured. Remember taking shortcuts and not following safety rules is dangerous.

New Legal Resources Available for all Employees

Have a Legal Question? In an effort to make more resources available to Amtrak employees, the Amtrak Law department has launched an updated Intranet page and is publishing a new newsletter.

The Intranet page contains a wealth of information of value for Amtrak employees who work in every department of the corporation, and employees can access the new page here: **Law Department Intranet**.

Amtrak employees can find answers to questions such as:

- What to do if an employee is contacted by an attorney or receives a legal document for litigation involving Amtrak;
- How to gain access to company bylaws; and
- Who to call if an employee needs to speak with an attorney about work-related legal questions.

In addition to the updated Intranet page, the Law department will be distributing a newsletter where topics of general legal interest will be addressed. The newsletter includes information about the legalities of Amtrak's business and a schedule of training sessions available to different employees. The newsletter will be found on the new Intranet page along with issues of the Labor & Employment newsletter that has been published for over fifteen years.

Visit the Law Department Intranet page under the How We Work tab on Amtrak's Intranet home page to check out the updated page, frequently asked questions, contact information and archived editions of the law newsletters.

Discounted Tickets Available for Select XL Arena Events

New Amtrak IDs Coming Soon

Recently, all Amtrak employees and contractors submitted their photo to be used for their new Amtrak ID badges.

In the next few weeks, all Amtrak employees and contractors will receive notification on where and when to pick-up your new Amtrak ID badge through posters displayed throughout the workplace.

To pick up your new Amtrak ID badge, you must present your current Amtrak ID and a valid government photo ID for validation.

Remember, it is your responsibility to pick-up your new Amtrak ID badge. Amtrak ID badges will not be mailed.

When you receive your new Amtrak ID, you will need to carry both the old and new Amtrak ID at all times until the Amtrak transitions to the new ID badge system, scheduled to take place in mid-November. Once the new Amtrak ID system is active, all old Amtrak IDs will no longer work.

If you have questions or for additional information, please visit the Amtrak Smart ID intranet site: <http://wiki.corp.nrpc/display/SmartID/Home>.

Please keep an eye out for the Amtrak ID pick-up location posters.

Amtrak Law Department: 101

Did you know the Amtrak Law department handles over 1,000 legal matters each year? From legal questions that arise in day-to-day operations to matters pending in court, the Law department consists of nine various practice areas, each working in tandem to keep the railroad running. Here's a glimpse of each practice area within the department and their center of expertise:

- **Office of the Corporate Secretary-** The Office of the Corporate Secretary serves as the liaison between Amtrak's management and the Board of Directors
- **Corporate Affairs Group-** The Corporate Affairs group advises on commercial and regulatory issues. It is divided into two teams: the Commercial Transactions team and the Railroad Operations Support team.
- **General Litigation Group-** The General Litigation group handles any legal proceeding in which Amtrak is involved –
-

- from simple small claims to complex matters that involve constitutional issues or class-action lawsuits.
- **Claims Group-** The Claims group handles passenger claims, investigates all incidents, interviews the claimants and witnesses, and collects facts and evidence to support Amtrak's defenses.
- **Freedom of Information Office-** Amtrak is subject to the Freedom of Information Act ("FOIA") even though it is not a federal agency. The FOIA Office handles requests for records submitted under FOIA and ensures that Amtrak meets the requirements set forth by Congress.
- **Records Information Management Group-** The Records Information Management group oversees the maintenance of all Amtrak business records, sets policies, and develops and approves processes to ensure compliance with legal and regulatory directives while maintaining the integrity of the records management system.
- **Environmental and Sustainability Group-** The Environmental and Sustainability group works to maintain environmental compliance and advance sustainability within Amtrak.
- **Public Health Group-** The Public Health group upholds proper food safety and sanitation standards by providing guidance on complying with applicable state and federal laws and regulations, and integrating sound principles and practices into Amtrak's daily business decisions and operations.
- **Office of Disciplinary Investigations-** The Office of Disciplinary Investigations is responsible for conducting all disciplinary investigations of agreement covered employees except employees covered by the Fraternal Order of Police. It is staffed by Hearing Officers and Administrative Assistants who perform functions very similar to a civil court or alternative dispute resolution system.

To learn more about Amtrak's Law department read "[Behind the Fine Print](#)". "Newly launched to enhance employee understanding of the legal issues and laws that impact Amtrak, the newsletter provides informative and interesting articles that pertain to Amtrak and its unique business operations," said Byl Herrmann, Amtrak managing deputy general counsel.

In addition to the newsletter, visit the Law department's web page on the company Intranet at: <http://epmoweb20p/sites/LDI/SitePages/Homepage2.aspx>

If you have a suggestion for future editions of *Behind the Fine Print*, contact Richard Kim at: Richard.Kim@amtrak.com.

New Station Opens in Troy, Michigan

On October 14, representatives from the city of Troy, Amtrak, the Michigan Department of Transportation and other organizations, cut the ribbon on the new \$6.3 million Troy Transit Center, which brings together the services of Amtrak, Suburban Mobility Authority for Regional Transportation (SMART) buses and taxis. Fully funded through a federal High Speed Intercity Passenger Rail grant, the new facility replaces the former station, an enclosed shelter, located across the tracks in Birmingham.

Designed by local architectural firm Neumann/Smith, the one story, 2,000 square foot brick building includes a waiting room and restrooms; large expanses of glass allow natural light to flood the interior. Passengers may take advantage of free Wi-Fi and vending machines. A pedestrian bridge over the tracks allows access to the western platform and protects passengers

The Troy Transit Center is served by Amtrak *Wolverine* service, running daily between Chicago and Pontiac, Michigan. To learn more about the history of Troy and Birmingham, visit www.GreatAmericanStations.com.

Utilities Policy Reminder

Following proper utilities bill processing procedures is critical in ensuring prompt payment of invoices and preventing discontinued electricity, water and natural gas service due to non-payment of invoices. P/I Number 8.28.2 Section 5.0 will guide Amtrak managers via e-Trax to open or close utility accounts correctly, which is especially important when starting a new utility service.

If the procedure is not followed, the utility company will send the monthly invoice to the service location or our corporate headquarters. By the time the invoice gets to the right place, the utility company may have shut off service for non-payment or charged us late fees which could be up to ten percent. View the policy here: <http://wiki.corp.nrpc/download/attachments/3585/8.28.1+Utilities+Processing.pdf?version=1&modificationDate=1302195448327>

Confidential Close Call Reporting System (C3RS)

Amtrak has many safety programs to help us reduce risk, the most common of which is Safe -2-Safer. Another program you may not be as familiar with is the Confidential Close Call Reporting System (C3RS). C3RS is a Federal Railroad Administration (FRA) sponsored pilot program

currently being implemented in the Transportation and Mechanical departments in select locations at Amtrak.

The Engineering department will be meeting soon to examine the feasibility of starting a C3RS pilot program of their own. The program encourages employees to confidentially share information about unsafe events to a third party. The National Aeronautic Space Administration (NASA) is the third party for this program.

Employees submit a close call report to NASA, who then interviews the employee to collect additional details, de-identifies any information that could be linked to the employee and then shares the report with an Amtrak Peer Review Team (PRT). The PRT is a joint problem solving team comprised of management, labor and FRA representatives. The PRT identifies why the problem occurred and recommends corrective actions to management.

Learn more about C3RS and find the necessary forms on the [Safety page](#) on company Intranet. Amtrak has a number of safety programs available to you. Remember if you see an unsafe condition or act, say something. Stay involved in your safety and the safety of your co-workers.

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

October 27, 2014

Reminder: Pick-up Your New Amtrak IDs

New Amtrak ID badges for all Amtrak employees and contractors are ready to be picked up in your workplace.

Starting this week, posters will be displayed throughout the Amtrak workplace explaining where you must go to pick up your new Amtrak ID badge.

Amtrak employees must present their current Amtrak ID for validation when you pick-up your new Amtrak ID badge and Amtrak contractors must present their current Amtrak ID and a valid government photo ID for validation.

Remember, it is your responsibility to pick-up your new Amtrak ID badge. **Badges will not be mailed.**

When you receive your new Amtrak ID, you will need to carry both the old and new Amtrak ID at all times until Amtrak transitions to the new ID badge system. Once the switch to the new system occurs in mid-November, old Amtrak IDs will no longer work and should not be worn.

If you have questions or for additional information, please visit the Amtrak Smart ID Intranet site: <http://wiki.corp.nrpc/display/SmartID/Home>.

Please look for the Amtrak ID posters and pick-up your new ID today.

Amtrak Cities Sprinter Debuts on Keystone Service

Passengers riding on Train 605 on October 20 from Philadelphia to Harrisburg were aboard the first *Keystone Service* train in revenue operation to be powered by the modern and reliable Amtrak Cities Sprinter (ACS-64) electric locomotive.

Amtrak is acquiring 70 of the state-of-the-art locomotives that will operate on the electrified Northeast and Keystone Corridors. More than a dozen ACS-64 units are now in service with the remainder to be delivered through the end of 2015. The new locomotives replace older units that have seen between 25 and 35 years of service, and accumulated an average of more than 3.5 million miles each.

These new locomotives are designed for improved reliability and easier maintenance which leads to increased availability for service. A state-of-the-art microprocessor system performs

self-diagnosis of technical issues, takes self-corrective action and notifies the Locomotive Engineer. In addition, there are redundant systems to ensure power is maintained to the passenger cars to keep heating and cooling systems working, the lights on and the doors operational. The locomotives also meet the latest federal rail safety regulations, including crash energy management components.

Among the benefits of the ACS-64 is the ability to feed energy back into the power system for use by other trains through a process known as regenerative braking. When the entire ACS-64 fleet is deployed, this feature is estimated to save 3 billion kilowatt hours of energy.

The locomotives are being built by Siemens and assembled at its facility in Sacramento, California, with parts from more than 60 suppliers representing more than 50 cities and 20 states.

Enhancements to Quik-Trak Kiosks Activated

Effective October 26, the following two enhancements were made to Quik-Trak kiosks:

Pass Rider Upgrade:

Currently when a revenue passenger without a reservation makes a walk-up sale at a Quik-Trak kiosk, and non-*Acela Express* business class or *Acela Express* first class is available on any train in the display, an orange "Upgrade Option" button appears to the right of that train's availability line. The passenger can touch that button to book and pay for an upgraded seat.

Now that option is also available to Amtrak personal pass riders (employees, retirees, spouses, dependents) who make a walk-up sale at a Quik-Trak kiosk. Pass riders will no longer have to call 1-800-USA-RAIL or go to a ticket window for these upgrades. This will save the pass rider time, especially those who travel often, improve customer service and reduce costs by getting more pass riders off the phone and out of the ticket line.

Round Trip Modifications:

Customers using Quik-Trak will now be able to make changes to round-trip travel, even if the change is to a segment that does not originate at the location where the customer is making the change. The location of that kiosk, however, must be one of the origin or destination cities in the round-trip itinerary.

Amtrak This Week is a publication of Amtrak Employee Communications

Three Steps to Jump Start Your Career at Amtrak

The Amtrak Career & Compensation Structure can help you jump start your career and get the most out of your time at Amtrak. Here are three steps to help you on your journey:

1. **Use the Amtrak Career & Compensation Structure to Chart Your Path:** Having consistent job titles that more accurately reflect the level of work and the nature of the job being performed offers advantages to us all. First, it provides the foundation to help us align with the marketplace in offering competitive pay — which means your pay is competitive with other companies in our marketplace. Also, it helps us better reward you based on your contributions to our success. But, even more importantly, the Career & Compensation Structure gives you a clearer picture of how your role fits within the broader organization, with more information about your role than you've ever had before at Amtrak. The foundation we're putting in place now will ultimately help you more easily identify future opportunities in the company.
2. **Get to Know the Career Level Guide:** Learn more about the expectations and requirements for non-agreement employees at each exempt career stage and level. The guide provides a framework that you can use to guide your learning and development, and your manager can use it to provide coaching and development opportunities for you.
3. **Take Advantage of Your Performance Conversation:** Amtrak's Performance Conversations—how we describe performance management at Amtrak—fosters ongoing dialogues between you and your manager to share, set and discuss goals and create development plans and monitor, measure and recognize your results. This is a great time to discuss your career aspirations with your manager.

Find out more: <http://wiki.corp.nrpc/pages/viewpage.action?pagelid=306217004>

Reminder: Changes to Arrow Log Sine Procedures

Employees submitting an Arrow log sine request can currently use the following methods:

- Email to CooperS@amtrak.com
- Fax the [Log Sine Request Form](#) located on the Amtrak Intranet (for those without access to Amtrak email or to

Arrow) to the **Attention of Arrow Security Team** ATS 777-3268 or Bell 202-906-3268

- ISM Request – Completed with a help desk representative.
- Arrow message to queue 'MHQ'

Effective November 1, the MHQ queuing process for log sine requests will be discontinued.

The other three options for log sine request will remain available. If you choose to email for log sine requests please use the new distribution list at DLArrowLogSine@amtrak.com. All questions may also be emailed to this address, which will allow for shortened response times.

View the complete Arrow Log Sine Procedures at <http://wiki.corp.nrpc/display/ARR/Arrow++Log+Sine+Request>

If your access is active, you **do not** need to re-apply or respond.

Auto Train Pass Rider Changes

Amtrak pass riders are entitled to free travel under the Red, White and Blue Policy when the color of the train is BLUE. In some cases, such as *Auto Train*, complimentary amenities are offered on board. Due to the increasing cost of these amenities, Amtrak pass rider fees will be implemented.

Effective December 22, a fee of \$75.00 will be applied to motorcycles and cars in addition to an amenity fee of \$30 per pass rider (regardless of age) traveling on *Auto Train*. This new fee applies to current Amtrak employees and retirees. For more information about the new changes, visit <http://wiki.corp.nrpc/display/arw/Auto+Train+pass+rider+fee+effective+December+22%2C+2014>

There's Still Time to Get Your Flu Shot

Recently there have been frequent news reports about the outbreak of the Ebola virus. Medical experts emphasize that in the U.S., catching the flu is much more likely to happen than contracting Ebola. Nationwide, up to 200,000 people are hospitalized each year for the flu, and up to 25 percent of these people die. Early symptoms of flu and Ebola, such as fever, fatigue and vomiting are similar, so this year flu prevention is more important than ever.

The 2014-2015 flu season is officially underway and early immunization is the most effective way of preventing the flu. Contrary to popular belief, the flu shot cannot cause the flu because the vaccine viruses used to make it are inactivated, according to the Centers for Disease Control.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Most pharmacies house a certified pharmacist who is authorized to administer flu shots to anyone 18 or over. Also, with your Amtrak medical card, the flu vaccine will **not** cost you anything, but the protection you get will be invaluable. So head to your local CVS, Walgreens or your doctor's office today and get your vaccine. Don't forget to get your eligible family members vaccinated as well. For a list of the covered pharmacies for Aetna and Cigna please visit the [Amtrak Wellness Intranet site](#).

There are still some remaining clinics at Amtrak locations, please click [here](#) for the list.

Reminder: Certificate of Compliance due for Non-Agreement Employees

It is that time of year again when non-agreement employees are required to disclose relationships that might present a conflict of interest with Amtrak's business and operations. We are happy to announce that this year's process will once again be automated via eTrax.

On **Monday, November 3**, all non-agreement employees will receive a communication via email from COC@amtrak.com detailing the automated process and how to electronically submit information for 2014. The deadline by which this year's disclosure process must be completed is **Friday, November 21**. As a reminder, **participation in this certification process is an annual requirement for all Non-Agreement employees.**

Please look forward to receiving the initial communication next week. Any questions can be emailed to the Certificate of Compliance email box at COC@amtrak.com.

September 8, 2014

Safety First: New Measurement System in Place

Amtrak is committed to safety with the understanding that the health and well-being of co-workers and customers comes before all else. At Amtrak, we now measure serious injuries and fatalities (SIF) through a new system-wide process. In addition to meeting the Federal Railroad Administration and the Occupational Safety and Health Administration injury classification requirements, SIF implements a progressive approach making classification decisions based on **potential** injuries. Currently, our system has a SIF rating of 0.5, with an ultimate target of zero.

The new SIF process is intended to reduce or eliminate SIF by reducing inherent risk, making the management controls more effective or changing the accepted norm of work practices in the organization. When we classify based on outcomes, we are creating a lagging metric, but when we classify based on potential we are creating a leading metric. And more importantly, we are taking action before someone gets seriously injured, rather than after the injury occurs.

Have You Met Your Annual Requirements?

The 2014 Amtrak Information Security Awareness training is available in the Training section of the Employee Information Portal. This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed by September 30, 2014. For additional information and instructions please visit: <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

New Lodging Procedures and Webinar Information

Beginning October 1, 2014, hotel lodging currently provided by Corporate Lodging (CLC) will be provided

by Travelliance. Most employees will not notice a change in the process as the majority of hotels will remain the same and room reservations will be processed electronically on a nightly basis. This change will result in some new procedures that include:

- Call Travelliance at 866-927-8010 with hotel reservation requests, questions or issues. Please do not contact CNOC with any hotel needs or issues. This new reservation process will be available beginning **September 22**, however; you will only be able to reserve hotels for lodging on or after October 1.
- Hotel reservations may also be made via the [Travelliance Portal](https://corpconnex.tvlinc.com) at <https://corpconnex.tvlinc.com>. The portal will be available September 22 for reservation requests on and after October 1. You will be given a user name and password to log on to the Travelliance Portal.
- After October 1, both the phone number and [Travelliance Portal](https://corpconnex.tvlinc.com) will be available 24 hours/7 days a week.
- Employees will only need to show the hotel desk their Amtrak employee ID. Business line employees should know their job symbol as this may help identify them with the hotel in the event they do not have their name.
- Hotels will verify reservations at check-in using the employee badge and job code.
- Transportation crews will have rooms reserved through the electronic booking process.
- Engineering supervisors and foremen who require hotel rooms for their gangs will need to call Travelliance to reserve rooms. As much as possible, please call 24 hours in advance of your reservation to make adjustments or to cancel. **Employees should not to call the hotels directly or they will be held accountable for paying the invoice from the hotel.**

CLC cards will be terminated and unavailable for use as of October 1, 2014 (12:01 a.m. Central Time). Managers should please collect and destroy as many of the CLC cards as possible.

Travelers should no longer make reservations directly with hotels. Instead, they should contact Travelliance for reservations beginning on or after October 1.

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

The following employee groups can make hotel reservations via Web ([Travelliance Portal](#)) or by calling Travelliance:

- All management employees
- Training department personnel that will be arranging hotels for others scheduled for any Operations Training
- Amtrak Police Department
- Any employee approved for reverse lodging

To assist in making hotel reservations by phone at 866-927-8010 and/or through the portal, there will be **several webinars which will provide complete instructions** for working with Travelliance. Please try to attend any one of the following sessions being provided:

September 10, 15, 17, 22, 24 and 29

All sessions are held from 10:00 a.m. – 11:00 a.m. and 3:00 p.m. – 4:00 p.m., Eastern Standard Time.

To access the webinar please use the following:

- **Toll-Free** (US and Canada): 800-768-2983. Use Access Code: 7671111
- **Meeting**
URL: <https://www.callinfo.com/prt?host=level3&an=8007682983&ac=7671111>
- **To Test Your Computer:** <http://test.callinfo.com/?host=level3>
Use Access Code: 7671111

Participants will be required to enter their name and no other information is required.

Using this online tool will be vitally important to ensuring your hotel needs are addressed. We hope you find a convenient time to log on to the webinar for this important information session.

Glory Days in White River Junction, Vermont

Between 1848 and 1865, five railroads laid tracks along this bend in the Connecticut River, thereby giving birth to [White River Junction](#).

Opened in December 1937, the current depot was built as a union station to serve the Central Vermont and Boston and Maine (B and M) railroads. The building is a fine example of the Georgian Revival, and the cupola features a weathervane with a small engine and tender. During the mid-20th century, the station was

especially busy during football season when rambunctious crowds passed through on their way to games at nearby Dartmouth.

Today the streets close to the station are active with new shops, restaurants and art studios. North of the depot, visitors can see a vintage 1892 4-4-0 steam locomotive built for the B and M. Learn more about the White River Junction station at <http://www.greatamericanstations.com/Stations/WRJ>.

On September 13, the [Amtrak Exhibit Train](#) will be in White River Junction for the 22nd annual [Glory Days Festival](#). Attendees are invited to take a free tour of the Exhibit Train between 10:00 a.m. – 4:00 p.m. and learn about our company's past, present and future. In addition, festival goers can enjoy a model train show, children's activities and live entertainment.

Amtrak Labor and Employment Law Newsletter

The latest edition of the Amtrak Labor and Employment Law newsletter, "On the Right Track," is now available. You can find this and past editions of the newsletter under Law department publications on the [Law Department](#) Intranet page, located under the How We Work tab on the main Amtrak Intranet page.

Featured in this Issue

- EEOC Issues Publications Providing Guidance on Religious Dress and Grooming
- After Harassment: Judging the Employer Response
- Employee's Friends may be Protected by Civil Rights Act
- New Philadelphia Law Requires Pregnancy Accommodations
- Accommodation of Work Goals for Disabled Employees
- When Charging Discrimination, Employees Can Point to Others with Different but Comparably Serious Offenses

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter.

September 22, 2014

Safety First: Knockout Strains and Sprains

Are you ready to rumble? The Safety Process Focus Team (PFT) is asking for everyone's assistance defeating our number one safety opponent: sprains and strains. With 41 percent of all injuries occurring in this category for FY14 (to date), the PFT team has put together a knockout initiative to annihilate this opponent. Let's get ready to rumble Amtrak employees, and land a "Knock Out" on all strains and sprains injuries.

Throughout FY15, the Safety PFT team will keep us well informed on how well we are doing towards our goal to end FY15 with 15 percent fewer injuries than in FY14. So let's get this championship bout with sprains and strains started.

Event Overview - *Here's how we'll keep score...*

- There will be 12 rounds, one for each month during FY15. If and when Amtrak delivers a "Knock Out," another match will take place for the following month.
- Blows to opponents will land after the round/month is calculated. Calculations are based by a percentage basis:
 - One – five percent reduction lands a **Jab**
 - Six – ten percent reduction is a **Upper Cut**
 - 11-15 percent reduction is a **Knock Down** standing eight counts
 - 16 percent or more is a **Knock Out**

Completing an [Ergo Checklist](#) self-assessment before the start of FY15 will help ensure we land some blows to sprains and strains. Supervision and the Safety PFT will be of assistance with corrective actions from the checklist also available on the company Intranet under Safety → Safety.

Reminder: Have You Met Your Annual Requirements?

The 2014 Amtrak Information Security Awareness training is available in the Training section of the Employee Information Portal. This is a mandatory course that must be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Amtrak Reinforces its Commitment to Preserve the Environment

Today, Amtrak President and CEO Joe Boardman will participate on a transportation panel at the *On Track for Clean and Green Transport Climate Change* event at the future Moynihan Station in New York. This event will bring together high level stakeholders to discuss the role of sustainable transport as a solution to climate change. Mr. Boardman will reinforce Amtrak's dedication to preserving the planet.

Our accomplishments to date are many. They include installing **energy-efficient lighting** at our facilities, realizing **reduced locomotive fuel consumption** by installing anti-idling devices and the recently purchased [ACS-64](#) — electric locomotives equipped with **regenerative braking**. Our investment in the future and our commitment to the environment is real.

To learn more about [Amtrak's environmental practices](#), visit the company Intranet> Safety→ Environmental.

Reminder: New Lodging Vendor Reservations Start October 1

Beginning October 1, Travelliance will begin providing hotel lodging that is currently provided by Corporate Lodging (CLC). To make reservations or if you have questions/issues about an existing reservation:

- Call Travelliance at 866-927-8010
- Hotel Reservations may also be made via the Travelliance Portal at <https://corpconnex.tvlinc.com>.
- Both the phone and portal will be available September 22, for reservations requests occurring on and after October 1. You will be given a user name and password to log on to the Travelliance portal.
- **After October 1, both the phone number and Travelliance Portal will be available 24 hours/7 days a week, 365 days a year.**
- The following employee groups can make hotel reservations via Web ([Travelliance Portal](#)) or by calling Travelliance:
 - Training department personnel that will be arranging hotels for others scheduled for any Operations training
 - Amtrak Police Department
 - Any employee approved for reverse lodging
 - Management employees – this is an addition to and not a replacement of the existing Concur system

- Need CLC cards. Cards will be terminated and unavailable for use as of October 1 (12:01 am Central Time). Please collect and destroy as many of the CLC cards as possible.
- Do not make reservations directly with hotels. If you currently contact hotels directly, you will need to call Travelliance to reserve your hotel rooms. If you do contact the hotels directly we will not have a record of the trip and cannot reimburse the hotel for your stay.
- Please do not contact CNOC with any hotel needs or issues.

Using this online tool will be vitally important to ensuring your hotel needs are addressed. Please find a convenient time to log on to the webinar for an important information session.

iLMS Newsletter Now Available

Integrated Labor Management System (iLMS) is one of the first projects of the Operations Foundation Program, a capital program that will begin to implement some of the foundational and high priority initiatives identified by key stakeholders in the Operations department. Amtrak is undertaking the iLMS project to modernize our current labor management systems and processes. iLMS will provide a more efficient way to manage labor across departments and crafts by optimizing assignments, payroll and crew management.

Some of the key benefits that the iLMS project plans to achieve are:

- Reducing operating ratio and minimizing operating cost
- Modernizing position and employee management
- Maximizing utilization of employee resources to ensure proper staffing levels and job assignments
- Streamlining data access to employee information during emergency situations
- Reducing train delays due to staffing issues
- Providing employees self-service tools

To learn more about the iLMS project, read the [iLMS Quarterly](#), a newsletter available on the company Intranet and designed to provide you with updates on project progress and accomplishments.

Washington Ballet and Delaware Theatre Company Offer Discounted Tickets to Amtrak Employees

Employees living in or visiting the Washington, D.C., area may take advantage of a marketing partnership with the [Washington Ballet](#) and enjoy a ten percent discount on tickets for the upcoming 2014 – 2015 season. Performances are held at various locations throughout Washington, D.C., and include:

2014 Performances:

Petite Mort	October 22-26
The Nutcracker	November 29 - December 28

2015 Performances:

Sleepy Hollow	February 18-22
Swan Lake	April 8-12, 2015
ALICE (in Wonderland)	May 6-10 and May 16-17
Tour-de-Force: Serenade	May 13-15
The Sleeping Beauty	May 30-31

To purchase tickets, use promo code AMTRAK at any ticket purchasing outlet: www.ticketmaster.com, via telephone 202.362.3606 x605 or at the box offices at the Kennedy Center, Harman Center for the Arts or Warner Theater. For more details visit the [Employee Store](#) on the company Intranet

For employees living in or visiting the Wilmington, Delaware area, the award winning [Delaware Theatre Company](#) (DTC) produces a diverse season of plays, including musicals, new works and the classics. In addition, DTC attracts professional actors and artists from Broadway and regional theatres across the country. Based on the long-term marketing alliance with Amtrak, Amtrak employees can enjoy a limited number of complimentary** and exclusive 20 percent off discounted tickets for the 2014-2015 season.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

The Delaware Theatre Company is located on the Riverfront in Wilmington, Delaware, a short walk from the Amtrak Station and just off I-95's MLK Blvd exit.

Delaware Theatre Company 2014-2015 Performance Schedule:

2014 Performances:

Love Letters	September 17 – October 5
Rest, in Pieces	November 5 – 23
My Mother's Italian, My Father's Jewish, & I'm Home for the Holidays	December 3 – 21

2015 Performances:

Nora	February 4 - 22, 2015
Because of Winn-Dixie	April 8 – May 3, 2015
The Male Intellect: An Oxymoron	March 5-8, 2015
The Book of Moron	March 12-15, 2015

To receive your complimentary or reduced price tickets, please follow these instructions and use the following coupon codes:

- AMTRAKLOVE (Complimentary tickets for "Love Letters")
- AMTRAKRIP (Complimentary tickets for "Rest, In Pieces")
- AMTRAKHOLIDAYS (Complimentary tickets for "My Mother's Italian ...")
- AMTRAKNORA (Complimentary tickets for "Nora")
- AMTRAKWD (Complimentary tickets for "Because of Winn Dixie")
- AMTRAKMORON (Complimentary tickets for "The Book of Moron")
- AMTRAKDUBAC (Complimentary tickets for "The Male Intellect")

The codes above can be used online at <https://tickets.delawaretheatre.org> or by calling the Delaware Theatre Company's Box Office at (302) 594-1100.

Codes are valid for all productions during DTC's 2014-2015 season.

To book online: select production, select performance, select seats, when the site displays your order enter the appropriate coupon code above in the box below your tickets; the site will take you back to the performance selection page with the message indicating that your price has been adjusted.

If you do not receive the message that your price has been adjusted when using any of the applicable Amtrak100 Coupon Codes, it means the limited allotment of complimentary tickets for that production has been filled. Instead, use Coupon Code Amtrak20 for the exclusive Amtrak 20 percent discount. Click shopping cart and complete your transaction.

****Complimentary tickets are limited to four per employee for all to enjoy.**

New Depot Open in Hermann, Missouri

Recently, city officials, residents and representatives from Amtrak, the [Missouri Department of Transportation](#) (MoDOT) and Union Pacific Railroad gathered to cut the ribbon on the city's new depot and transportation museum. The building replaces a small shelter constructed in 1991 when *Missouri Service* (now the *Missouri River Runner*) trains began making regular stops at Hermann.

The depot was funded through various resources, including a federal [Transportation Enhancement](#) (TE) grant matched with local funds. Administered by MoDOT, TE grants are meant to "help expand transportation choices and the transportation experience" through a dozen activities including landscaping and scenic beautification, historic preservation and creation of pedestrian and bicycle infrastructure. The Dierberg Educational Foundation, a local non-profit organization that supports projects to preserve the region's cultural heritage, also contributed funds for depot construction, as did the city of Hermann.

[Hermann](#), founded by German immigrants in the 1830s, remains proud of its origins and hosts numerous cultural festivals throughout the year. Due to its close proximity to St. Louis, the city is popular with day-trippers, many of whom take the train. In FY13, more than 18,500 travelers began or ended their journeys at the Hermann station.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Dear Co-workers,

This week, the disability community around the country celebrates the 24-year anniversary of the signing into law of the Americans with Disabilities Act (ADA). The law was passed in 1990 to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak serves as an important mode of travel for people with disabilities, and we continue to improve our services, facilities and program to ensure accessibility for all.

Accessibility for passengers with disabilities has historically placed Amtrak at a competitive advantage over other travel modes. With input from national disability advocacy groups and a robust program supported by collaborative teams throughout the company, we have taken significant steps to improve the travel experience for passengers with disabilities from trip planning, to purchasing tickets, to stations, to equipment and on-board services.

Over the past five years, Amtrak has:

- Held disability customer service training for front line employees.
- Advanced design and development efforts for setback boarding platforms that utilize a gap mitigation device and **put forth** efforts to improve the existing Amtrak stock of bridgeplates (used at level boarding platforms) and the ramp used on board the Superliner cars.
- Installed wheelchair lifts or replaced aging and obsolete lifts where needed so that we now have in **excess** of **500** station based mobile lifts at our stations.
- Made accessibility improvements at more than 200 stations including repairs and upgrades to platforms, ramps and sidewalks and renovated entrance ways and restrooms.
- Developed new standards for Passenger Information Display Systems (PIDS) in stations to include both audio and visual communication.
- Either replaced or installed accessible Quik-Trak ticket kiosks in stations.
- Made improvements to Amtrak.com to allow passengers with disabilities to book online; further updates will take effect in the fall.

All Amtrak trains have accessible seating and restrooms, all long-distance trains have accessible bedrooms and Amtrak is the only mode of intercity transportation that provides a discount to passengers with disabilities and their companions.

Our advancements are reflected in part by the ridership growth of passengers with disabilities. Through June 2014, this segment has grown by 2.8 percent over the same period last year.

Comment [GT1]: Not accurate, Kyle please update

Comment [KG2]: Not sure where this number comes from or how to validate it. I sent an email to Gail Secan to see if she has the total number of lifts that are in service. ADR data, as of today, has that out of the 514 active train stations 344 stations have a station based lift. However, I believe the ADR data is still in the process of being updated and may not be accurate at this time. I have data, that I had pulled together in the past based on a combination of sources, that there are 406 stations that provide a station based mobile lift, however, this number was never vetted.

Since 2006, through our Great American Stations Project, Amtrak has been working to educate communities on the benefits of redeveloping train stations and making improvements to ensure stations are accessible for all. We have sponsored 10 Civic Conversations around the system touching over 200 Amtrak-served communities across the country. The purpose of these meetings is to bring together city officials, civic leaders and state officials to discuss station redevelopment, accessibility requirements and how Amtrak can serve as a partner in the process.

However, despite the progress we have made, there is still work that needs to be done. Upgrading stations and making them accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements.

We own only a small percentage of the nearly 500 stations that are required to become ADA-compliant. We need to find a way to overcome the length of time it takes to work through the complexity of station ownership issues, and we remain committed to working with all of the owners of the stations, platforms and parking facilities to create a nationwide rail system that is accessible to each and every customer and employee.

We are confident that we can build on the progress made to date, and we plan to advance a robust program of station accessibility improvements in Fiscal Year 2015. Making Amtrak service accessible to all individuals aligns with our Strategic Plan, specifically the goals of customer focus, safety and security and mobility and connectivity.

Providing greater accessibility to our trains and Thruway buses, in facilities and stations and on Amtrak.com is the right thing to do as a company because all of our customers must be treated equally and without differentiation, even our customers who happen to have a disability.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

Comment [A3]: David suggests we rephrase as "equally, regardless of whether they have a disability or not."

DRAFT

A Message from DJ Stadtler

Ebola Virus Update

This message is being sent to managers and frontline supervisors. It is important that all employees who work with passengers, including On-Board Service and Train and Engine crews, know the facts about Ebola. We need your assistance in keeping your teams informed about what they need to know and do to safeguard our customers and employees from Ebola.

WHAT AMTRAK IS DOING TO ADDRESS EBOLA

- Amtrak Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in the United States and elsewhere. They are in contact with appropriate officials across our network to maintain awareness of the latest information. Amtrak operations at this time are not affected.
- We have reviewed and updated our protocols for proper handling of passenger and employee medical issues to reflect latest guidance from public health authorities. We are keeping employees informed so they are prepared to address customer concerns.
- While Amtrak performs regular cleaning of our passenger railcars, we have contingency plans to take railcars out of service to decontaminate should the need arise.

MANAGERS AND SUPERVISORS MUST UPDATE FRONTLINE EMPLOYEES

- Refresh your knowledge of Amtrak protocols and strategies for addressing serious communicable diseases, and review with your employees. Protocols and plans are attached to this email.
- See the attached Special Employee Advisory issued on **<insert date>**.
- Ensure that your people on the frontline know what Amtrak is doing and that they are aware of their roles in keeping customers and fellow employees safe.
- Share information in this update at crew briefings since not all employees have access to company email or the Amtrak Intranet while on the job.
- Reference the new Ebola Update webpage on the homepage of the Amtrak Intranet for information and answers to common questions. This site will be updated regularly with current information.

THINGS TO KNOW ABOUT EBOLA

- The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person. That individual must have had a history of potential exposure to the disease.
- Ebola is not spread through the air from person-to-person.
- Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

PROCEDURE IF YOU SUSPECT A PASSENGER OR EMPLOYEE SHOWS SYMPTOMS

- Keep the ill individual separated from other passengers / employees as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill passenger or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.
- Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

FURTHER QUESTIONS? CONTACT YOUR REGIONAL AMTRAK PUBLIC HEALTH STAFF MEMBER

- **Victor Zare**, Amtrak Public Health Superintendent
(Washington, DC) O: 202-906-3943; Cell: 703-856-9002
- **John Parke**, Director, Public Health Procedures and Assurance
(New York) O: 212-630-7295; Cell: 732-740-2618
- **Al Cooper**, Regional Public Health Manager, Southeast Region
(Washington, DC) O: 202-906-2602; Cell: 202-437-9038
- **Russell Graham**, Regional Public Health Manager, Western Region
(Los Angeles) O: 213-683-6936; Cell: 213-500-9022
- **Clayton Pape**, Regional Public Health Manager, Central Region
(Chicago) O: 312-880-5595; Cell: 312-802-0590
- **Mark Petrillo**, Regional Public Health Manager, Northeast Region
(New York) O: 212-630-6265; Cell: 917-692-7496

Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.
- Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

DRAFT

A Message from DJ Stadtler

Ebola Virus Update

This message is being sent to managers and frontline supervisors. It is important that all employees who work with passengers, including On-Board Service, Train and Engine crews station personnel and the Amtrak Police know the facts about Ebola. We need your assistance in keeping your teams informed about what they need to know and do to safeguard our customers and employees from Ebola.

WHAT AMTRAK IS DOING TO ADDRESS EBOLA

- Amtrak Medical, Public Health and Emergency Management teams continue to closely monitor recent developments regarding the Ebola virus outbreak in the United States and elsewhere. They are in contact with appropriate officials across our network to maintain awareness of the latest information. Amtrak operations at this time are not affected.
- We have reviewed and updated our protocols for proper handling of passenger and employee medical issues to reflect latest guidance from public health authorities. We are keeping employees informed so they are prepared to address customer concerns.
- While Amtrak performs regular cleaning of our passenger railcars, we have contingency plans to take railcars out of service to decontaminate should the need arise.

MANAGERS AND SUPERVISORS MUST UPDATE FRONTLINE EMPLOYEES

- Refresh your knowledge of Amtrak protocols and strategies for addressing serious communicable diseases, and review with your employees. Protocols and plans are attached to this email.
- See the attached Special Employee Advisory issued on October 17.
- Ensure that your people on the frontline know what Amtrak is doing and that they are aware of their roles in keeping customers and fellow employees safe.
- Share information in this update at crew briefings and roll call since not all employees have access to company email or the Amtrak Intranet while on the job.
- Reference the new Ebola Update webpage on the homepage of the Amtrak Intranet for information and answers to common questions or you can go directly

to the site <http://wiki.corp.nrpc/display/ebola/Home> . It will be updated regularly with current information.

THINGS TO KNOW ABOUT EBOLA

- The risk of contracting Ebola is low unless you come into direct contact with blood or body fluids of an infected person and that person has a have a history of travelling to West Africa.
- Ebola is not spread through the air from person-to-person.
- Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

PROCEDURE IF YOU SUSPECT A PASSENGER OR EMPLOYEE SHOWS SYMPTOMS AND MAY HAVE A HISTORY OF EXPOSURE

- Keep the ill individual separated from other passengers / employees as much as possible (at least three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill passenger or luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.
- Contact CNOC (1-800-424-0217) so arrangements can be made to have the ill passenger detained and met by local Emergency Medical Personnel.

FURTHER QUESTIONS? CONTACT YOUR REGIONAL AMTRAK PUBLIC HEALTH STAFF MEMBER

- **Victor Zare**, Amtrak Public Health Superintendent
(Washington, DC) O: 202-906-3943; Cell: 703-856-9002
- **John Parke**, Director, Public Health Procedures and Assurance
(New York) O: 212-630-7295; Cell: 732-740-2618

OPERATIONS

Northeast Corridor Business Line

October 27, 2014

Dear Co-workers:

New York Governor Cuomo announced the launch of a new state information line **1-800-861-2280** to answer public health questions from New Yorkers about Ebola. This information line is free and trained operators are available to answer the public's questions 24 hours a day, seven days a week. Please note that this line is established for public health information only. If individuals require medical attention, they should call their health care provider or 9-1-1 immediately.

For current information about Amtrak's preparations, and what you can do to help keep our passengers and employees safe, please refer to Amtrak's Ebola Update Intranet webpage <http://wiki.corp.nrpc/display/ebola/Home>.

Sincerely,

Mike DeCataldo
General Manager
Northeast Corridor Business Line

AMTRAK is a registered service mark of the
National Railroad Passenger Corporation.

April 9, 2014 • Page 1 of 1

Dear Co-workers,

Amtrak seeks to provide a safe transportation system for our passengers and a safe working environment for employees. Since safety is an essential element of our business, it must be an integral part of our daily activities.

In the past 24 hours, we have had three operating rule violations with one resulting in a serious injury to an employee. This is unacceptable.

Comment [SA1]: On Tuesday we had...

Safety is everyone's job. Commitment to safety and security must be lived every day by everyone at Amtrak.

Our number one Strategic Goal is **Safety and Security** and by setting the standard in the transportation industry we ensure that every passenger and employee goes home injury-free every day. We have been working hard to improve our record and have seen tangible results from those efforts but any injury is unacceptable.

Please stay focused and continue to:

- Have regular job briefings
- Work with your colleagues to identify safety risks
- Create a continuous improvement process to drive the reduction of risk
- Discuss any changes in activity to ensure all team members are on the same page
- Post updates on bulletin boards and review at crew and safety briefings
- Voice your safety concerns to supervisors and fellow employees

If you have any questions or need clarification on any efforts or changes in process and/or behavior, please directly approach and discuss with your fellow employees and supervisor. The more we communicate, the better we can work together and ensure a safe work environment.

Thank you for all you do every day to make America's Railroad the safest and best it can be.

DJ Stadtler
Vice President of Operations

February 14, 2014 • Page 1 of 1

Dear Co-workers,

A working team comprised of representatives from the Office of the President, Operations, Legal, Finance, and Marketing was recently formed to review Amtrak's business practices related to private cars, charters and special moves. The team will establish a charter consisting of applicable policies for each type of movement that falls under the Charter and Special Moves scope of responsibility.

The group has agreed that their first order of business is to establish and communicate a single point of contact, or process owner, to develop the business and manage all aspects of communications with third parties, proposal evaluations, negotiations and closing on contracts. Therefore, effective immediately, Frank Foldetta, director of Charter and Special Movements will be Amtrak's single point of contact for all movement within this category.

Mr. Foldetta's contact information is as follows:

Frank Foldetta
Director Charters and Special Movements
15 S. Polar Street
Wilmington, DE 19801

Email foldetf@amtrak.com
Business Phone 302-683-2444
Mobile Phone 302-256-6258

The establishment of a lead point of contact should not impede Amtrak business lines and employees from seeking sound business opportunities for our company. It simply means that when opportunities are discovered, they must be funneled through this single point of contact to ensure consistency and limit liability to Amtrak. Frank is not alone in this endeavor and will have the full support of all Amtrak stakeholders.

Please feel free to contact my office with any questions or concerns regarding private cars, charters, and special moves.

Thank you for your cooperation.

Sincerely,

DJ Stadtler
Vice President of Operations

March 19, 2014 • Page 1 of 1

Dear Co-workers,

As part of our continued journey to safety excellence, Amtrak has embarked on a process to more fully understand incidents/injuries that have potential for serious injury and fatality (SIF) and how to reduce them. In December of 2013, with the help of BST, Amtrak formed an interdepartmental team to develop a process to understand and reduce SIF incidents.

To date the team has developed a working definition of serious injuries, a decision tree on how to classify incidents for SIF potential, a metric to track our SIF potential rate, and a pathforward to implement this process. While prevention of all injuries is important and remains our goal, once we are measuring incidents that have SIF potential we will be better able to tailor our prevention efforts.

The SIF potential classification of incidents for the first half of FY 2014 has been done by the Central Reporting Group. Starting in April the SIF classification of incidents will be done by the Divisions and reviewed by the Central Reporting Group. Next steps in the implementation of this process include the following:

1. Conduct SIF potential process overview for each of the S2S Core Teams.
2. Develop a detailed procedure for the SIF potential classification process and incorporate it into the System Safety Plan.
3. Change the incident form to capture SIF Potential.
3. Train key leaders with classification responsibility on the SIF potential classification process.
4. Upgrade our investigation processes to put more of our focus and attention on injuries with high potential while streamlining the investigation process of injuries without SIF potential.

In summary, I ask for your engagement and support in implementing the SIF process and transforming our safety focus from one that has historically been focused on outcomes to one that is more focused on potential so we can address the causes of SIF's before our employees suffer a serious injury or fatality

Thank you for your continued and energetic support of Safe-2-Safer. It is delivering results, and we have a great opportunity to change Amtrak positively for the future.

Michael Logue
Chief Safety Officer

March 19, 2014

Dear Co-workers,

Integrity is the cornerstone to everything we do at Amtrak. There cannot and should not be any doubt that we must perform our responsibilities with integrity and honesty at all times. Unfortunately, during a recent internal audit of payroll records within Operations, it was discovered that employees had engaged in fraudulent time reporting by reporting overtime hours worked as equivalent straight time. Such behavior is unacceptable and will not be tolerated. All fraudulent acts will result in discipline up to and including termination. The reputation of Amtrak is too important, and honesty in relationships too critical for the integrity of our company to be compromised.

Due to the recently discovered fraudulent act I am requiring the following:

- All Supervisors/Managers are to meet with their employees and reinforce the need for integrity in all activities and tasks. There should not be any doubt as to the importance of integrity in performing all our responsibilities as well as the consequences of failing to comply. To assist you with these discussions please remember the definition of integrity, one of our core values, from our Strategic Plan:

Integrity – The resolve to do the right thing for Amtrak, for one's colleagues and for one's customers even when no one is looking.

- Since we are responsible to Congress to accurately report all overtime and we have now discovered a breach of this responsibility, I have requested the Office of Inspector General to conduct an independent audit of Operations time reporting to ensure that what was discovered was an isolated incident. I expect all applicable Operations personnel to comply with and support this audit.

I thank each and every one of you for your support and your understanding on the importance of this matter. As we continue on our mission of delivering the highest levels of safety, customer service and financial excellence we must always remember that we can only do so with the highest levels of values in order to keep the trust of our passengers, our fellow employees and ourselves.

DJ Stadtler
Vice President of Operations

July 10, 2014 • Page 1 of 1

Dear Co-workers,

Last month you received a communication from Chief Engineer Bruce Pohlott letting you know that we have begun an in-depth organizational analysis of the Engineering department in order to determine how the department can consistently deliver high performance that reflects our fundamental mission, values and strategic objectives. We have put together a work plan that I wanted to share with you.

This analysis of the safety practices, culture and processes within the department, now called the Engineering Review, has begun. I am leading the project team which consists of an Executive Steering Committee (Chief of Emergency Management and Corporate Security Susan Reinertson, Assistant Vice President of Operations Scot Naparstek and Mr. Pohlott) and three focus area leads. Chief Safety Advocate Mark McKeon is focusing on safety, Human Capital Business Partner Steve Christian is reviewing the culture and Director of Business Development Ryan Bernaski is looking into the department's processes. The focus area leads are reviewing the key systems and practices in Engineering to understand what deficiencies exist. By the end of FY14, I expect that the initial phases of this review will be completed and the project team will present an overview of findings and recommended next steps.

I cannot stress enough the importance of this endeavor. We are devoting a great deal of time and resources to get it right. At the conclusion of this Engineering Review, I expect that our Engineering department will have the tools necessary to become a role model for culture and values second to none in this industry. Additionally, I expect that our model for service delivery to internal and external customers will exceed those of our strongest competitors. We should not accept anything less.

Your honesty, support and participation are essential to the success of this project and I appreciate your cooperation.

Sincerely,

DJ Stadtler
Vice President of Operations

July 15, 2014 • Page 1 of 1

Dear Co-workers,

I am writing to ensure you are aware of the recent significant increase in the number of major operating rule violations Amtrak has experienced. These violations seem to have some common themes: a momentary loss of situational awareness and a lack of focus on the most safety critical task at hand. Each and every one of these operating rule violations has the potential to have catastrophic consequences not only for you, your co-workers and our passengers, but your family as well.

As of July 15, we have had 92 major operating rule violations for Fiscal Year (FY) 14, and we are on track to end the fiscal year with 118 violations. To put this into perspective, through July 15 last year, we had 68, and we ended the year with 86; for FY14, rule violations have increased 35 percent through July and are on track for a 37 percent increase on a fiscal year basis.

Here is a partial breakdown of the 92 violations we have had thus far in FY14:

- 25 have involved failure to stop at a Stop Signal or Stop Sign,
- 10 have involved running through or failing to properly line a switch,
- 8 have involved excessive speed through a speed restriction,
- 4 have involved failure to apply or maintain blocking device protection.

In light of this increase in major operating rule violations, I'm asking each of you to give absolute priority to focusing on the most safety critical task at hand, and on keeping situational awareness at the forefront (**Crew Resource Management Situational Awareness**). Discuss all safety related issues during your initial job briefing, and more importantly, when operational or safety conditions change, *take the time needed to discuss **all** of the changes (CRM Communication)*. There is no movement on the railroad that is so important that, if the assignment changes, you can't stop for a few minutes to discuss the changes and work safely by ensuring all crew members are aware of the changes and agree on the course of action (**CRM Teamwork**).

Safety is Amtrak's number one commitment to its employees and passengers; make it your number one commitment to yourself, your co-workers, our passengers and most importantly, your family.

Michael Logue
Chief Safety Officer

June 10, 2014 • Page 1 of 1

Dear Co-workers,

Several months ago I was asked to take a look at the Safety department's then-current structure with an eye toward realigning it to better meet the needs of today's Operational structure, to include the implementation of the business line approach along with providing safety leadership across the company. With this advisory, I am pleased to announce that effective June 1 we have a realigned department now titled System Safety.

As most know, the initial step in this process was making the Safety department a stand-alone department during the Operations reorganization and the creation of the Chief Safety Officer position reporting directly to the Vice President of Operations.

Since then, a Deputy Chief Safety Officer position was approved and was recently filled by Theresa Impastato. Since Theresa's onboarding, she has begun to systematically realign the safety leadership team by establishing Directors of Safety to provide direct support and leadership for the Northeast Corridor Long-Distance and State Supported business lines, Engineering, Mechanical and corporate functions. Overseeing the leadership positions for Northeast Corridor and Long-Distance business lines and State Supported Services are Keith Wiertz and Fred Rutt, respectively, each of whom will have Safety Managers reporting to them. Announcements will soon be posted for the two remaining Directors of Safety positions.

Additionally, passenger safety will be given greater attention with the addition of a Passenger Safety Specialist to provide direct support to all business lines with direct responsibility for improving passenger safety. Also, Public Safety will be substantially increased by the addition of an Operations LifeSaver Specialist. Both positions will be working closely with each of the business lines as well as the Engineering and Mechanical departments.

Many of these positions will be filled with existing staff. New positions will be posted to recruit new talent to make System Safety an efficient and effective safety organization that exceeds the needs of Amtrak as well as the travelling public.

As we continue to progress, I will continue to provide you with additional information about the realignment and the safety support required to be a world class transportation organization.

May xx, 2014 • Page 1 of 1

Dear Co-workers,

Our number one Strategic Goal is **Safety and Security** and by setting the standard in the transportation industry we ensure that every passenger and employee goes home injury-free every day.

The Engineering department did not perform well on the Organizational Culture Diagnostic Instrument (OCDI) in the key areas of perceptions of management's credibility, support for the workforce and value for safety. When personnel have low trust in management and are not confident that management "has their back" it is very difficult to build and maintain a culture of commitment around safety and operational excellence.

In the past few months there have been two serious accidents involving Engineering department employees and there have been incidents of falsified time sheets. There have also been reports of manipulating numbers related to our safety programs. This is just not acceptable and I have zero-tolerance for these types of actions.

We need to get to the root cause of these behaviors now. I have asked that an in-depth organizational analysis of the Engineering department be performed in order to determine what we need to do to make it more efficient, effective and have the Engineering employees consistently embrace our core values. A cross-departmental team will be examining the organizational structure, the current culture in both the agreement and non-agreement ranks, safety and engineering processes and barriers to change. Once the current state is identified we will move into the vision for where we would like and need to be: an Engineering department aligned with our Strategic Plan. This team will make recommendations as to how to bridge the gap between the current state and our vision.

Key findings are to be delivered by July 1 and the full report by the end of FY14. This full report will include the recommended action plan for FY15.

I expect every Engineering employee to cooperate fully with these efforts.

Safety is everyone's job. Commitment to safety and security must be lived every day by everyone at Amtrak.

Dear Co-workers,

I want to update you on the Engineering Review, the in-depth organizational analysis of the Engineering department begun last June to determine how we can consistently deliver a level of high-performance that reflects our fundamental mission, values and strategic objectives.

The analysis of safety practices and processes has been completed and gaps between our current method of operating and our ideal model have been identified. We are finalizing recommended actions with milestones for Safety and Process. There will be a shift from Mark McKeon and Ryan Bernaski, owners of the analysis for Safety and Process respectively, to the Deputy Chief Engineers who will play a larger role in managing the execution of the tasks necessary to complete the recommended actions.

Project monitoring will now be a consistent part of the agenda at the Chief Engineer's bi-weekly staff meetings. I would like to thank Mark and Ryan for their fine work and let you know that they will continue to act as subject matter experts. In addition, they will evaluate both the proposed tasks as well as the completed actions for quality and the assurance that they will fully impact the intent of the recommended action

We are now entering the cultural assessment phase. This phase has two goals: (1) understand the existing culture in the department and challenges and barriers to achieving our vision and (2) how safety and engineering processes align to our culture and values. Engineering has engaged GAP International, an organization regarded as an industry leader in driving organizations to achieve breakthrough performance, to help us perform this assessment.

Employee interviews are an important part of the assessment of the cultural obstacles that prevent consistent execution of documented policies and procedures. I would expect that interviewees will provide candid, open and honest responses. It is through these interviews that we can gain some new understanding to assist us in eliminating the barriers to success and help drive us toward a breakthrough performance in Engineering.

I appreciate your cooperation.

Sincerely,

DJ Stadler
Vice President of Operations

Dear Co-workers,

I want to update you on the Engineering Review, the in-depth organizational analysis of the Engineering department begun last June to determine how we can consistently deliver a level of high-performance that reflects our fundamental mission, values and strategic objectives.

The analysis of safety practices and project management has been completed and gaps between our current method of operating and our ideal model have been identified. We are finalizing recommended actions for Safety and Process. There will be a shift from Mark McKeon and Ryan Bernaski, owners of the first two processes, to the Deputy Chief Engineers who will play a larger role in managing the execution of the tasks necessary to complete the recommended actions.

Project monitoring, led by Ryan and Mark, will now be a consistent part of the agenda at the Chief Engineer's bi-weekly staff meetings. I would like to thank them for their fine work and let you know that they will continue to act as subject matter experts. In addition, they will evaluate both the proposed tasks as well as the completed actions for quality and the assurance that they will fully impact the intent of the recommended action

We are now entering the cultural assessment phase. This phase has two goals: (1) understand the existing culture in the department and challenges and barriers to achieving our vision and (2) how safety and engineering processes align to our culture and values. Engineering has engaged GAP International, an organization regarded as an industry leader in driving organizations to achieve breakthrough performance to help us perform this assessment.

Employee interviews are an important part of the assessment of the cultural obstacles that prevent consistent execution of documented policies and procedures. I would expect that interviewees will provide candid, open and honest responses. It is through these interviews that we can gain some new understanding to assist us in eliminating the barriers to success and help drive us toward a breakthrough performance in Engineering.

I appreciate your cooperation.

Sincerely,

DJ Stadler
Vice President of Operations

October 29, 2014 • Page 1 of 1

Dear Co-workers,

Our Medical, Public Health and Emergency Management teams continue to closely monitor developments regarding the Ebola virus outbreak in West Africa and the small number of cases identified in the United States. We are also preparing for flu season and encourage all employees to frequently wash your hands with soap and receive a flu shot as a precautionary measure.

Material Control is working with the Mechanical department to make certain that effective immediately, all trains are being supplied with boxes of non-alcoholic hand sanitizer wipes (100 per box) for use by our customers and crew. The total number of boxes issued should be **one for each car in the consist**. The boxes should be **stored** in the café/lounge car. Additionally, at least two extra trash liner bags for each car are being supplied to serve as biohazard waste bags should the need arise.

The hand sanitizers should be placed on the condiment counter in the lounge/café car and only **one box at a time** should be displayed. For those routes without food service, **one box should be placed on display on the luggage rack nearest the restrooms in every passenger car**.

Conductors should make an announcement that we encourage hand washing especially during flu season and to supplement that, hand sanitizing towelettes are available in the café/lounge car.

New contagious disease protection kits (also referred to as flu kits) will be provided within the next week to every lounge/café car in the system. These kits are for protection against common germs, such as the cold virus, seasonal flu, enterovirus (the virus currently affecting some children) and even Ebola. These kits will contain:

- Two dust masks
- Four surgical masks for distribution to ill passengers
- Four pairs of extended nitrile gloves (a latex pair is already available in the safety kits located in the emergency equipment locker in every car and can be used until these kits arrive)
- One bottle of Purell or similar hand sanitizer
- One red biohazard bag
- One package of tissues
- One emesis bag
- Two Ziploc plastic bags

More information regarding the proper use of these kits will be issued prior to distribution.

Please note that the current double bags will end once the flu kits are provided as the biohazard bags will then be available.

We will continue to keep you informed and I thank you for your cooperation.

Sincerely,

DJ Stadtler
Vice President of Operations

Dear Co-workers,

I wanted to provide you with an interim update on the Engineering Review, the in-depth organizational analysis of the Engineering department that was begun in June.

The analysis of safety practices and project management has been completed and gaps between our current method of operating and our ideal model have been identified.

Our safety policies, procedures, violations, training and oversight have undergone thorough review to identify trends and conditions which have contributed to a higher than acceptable rate of safety violations. In most cases, written policies meet or exceed federal guidelines. We are revising both initial and on-the-job training to ensure that workers are better prepared to mitigate the risks present in their work environment. Additionally, an initial meeting on updating the safety rule book was held earlier this month so that we can have a rule book consistent with our behavior-based safety training principles.

We have made organizational changes which reflect Amtrak's dedication to operational safety. Last month, the Engineering safety organization began to integrate into the System Safety department in order to improve Engineering's access to safety resources and ensure alignment with the corporate goals. We have also re-established the Safety Advisory Committee to lead a cooperative effort towards improving the safety of our workforce.

We have completed the analysis of our project management structure, with a focus on bringing consistency across the breadth of projects carried out by Engineering. An immediate result of this was the recent graduation of the first class of project managers to go through the new curriculum.

Over the next month we will continue to make improvements to procedures and training to improve worker safety. We will develop detailed action plans for implementations of the recommendations made from this Engineering Review. And we will study the organizational culture of Amtrak Engineering in order to assess the cultural obstacles that prevent consistent execution of documented policies and procedures. This will involve employee interviews so our challenges can be identified.

We continue to progress on track and expect that the initial phases of this review will be completed by the end of FY14 when the project team will present a complete overview of findings and an actionable plan on how Engineering can consistently deliver high performance that reflects our fundamental mission, values and strategic objectives.

You can expect that departmental improvements will be continuing through FY15 and beyond and incorporated in individual performance goals.

I appreciate your cooperation.

Sincerely,

DJ Stadler
Vice President of Operations

June 10, 2014 • Page 1 of 1

Dear Co-workers,

As you know, Amtrak's three main Strategic Goals are safety and security, customer focus and financial excellence. My vision as the leader of the Engineering group is that as an organization we should be setting the standard in the transportation industry for all of these areas. We should specifically pay attention to safety and ensure that every passenger and employee goes home injury-free every day. As we strive towards achieving these goals, along with fulfillment of Amtrak's mission statement of "*delivering intercity transportation with superior safety, customer service and financial excellence*," we also must ensure that we continue to grow the cultural environment to support these efforts.

We must immediately analyze our behaviors to ensure that they are consistent with our core values and the standards we expect of every Amtrak employee. I have directed that an in-depth organizational analysis of the Engineering department be performed in order to determine how we can consistently deliver high performance that reflects our fundamental objectives, values and strategic objectives. Aside from looking at the organizational structure we need to understand the existing culture in the department, and how safety and engineering processes align to our culture and values. Once the safety, culture and processes are identified we will move immediately into defining where we would like to be: an Engineering department aligned with our Strategic Plan and core values delivering best in class service. We will share key findings and go forward actions after this process is completed.

I request that any Engineering employee who is asked to participate do so, open and honestly. This candor and collaboration will help us drive towards becoming the transportation industry leader in our delivery of strategic goals and the true fulfillment of our mission.

I appreciate your support and commitment to this critical part of our work at Amtrak and look forward to continuing conversations during this process.

Bruce R. Pohlott
Chief Engineer

Engineering

AMTRAK is a registered service mark of the
National Railroad Passenger Corporation.

**Bob Guy-State Director, SMART-Transportation Division
Statement regarding member assault on Amtrak Train 364 on 12/5/14**

The SMART-Transportation Division (formerly UTU) is deeply saddened this evening after receiving the disturbing news that one of our members, while faithfully performing his duties aboard AMTRAK Train #364, was seriously injured in a seemingly senseless and random act of violence.

Our thoughts and prayers go out to our fellow member and the other passengers that were injured during this inconceivable attack. I would like to express my personal appreciation to our other crew members, passengers aboard Train #364, and local law enforcement for any assistance that led to the apprehension of the subject.

SMART-Transportation Division will stand ready to assist AMTRAK and local law enforcement as the investigation into this rare act of violence moves forward, and we will do everything in our power to ensure that the person responsible for these acts is prosecuted to the full extent of the law.

**Bob Guy
State Director
Illinois Legislative Board
SMART-Transportation Division

2014

Amtrak This Week

Changes to Form W-2

The 2013 Wage and Tax Statement Form, Form W-2 will be printed and distributed by Automatic Data Processing (ADP), Inc. ADP is one of the leading Payroll solution providers and has the latest technology and experience to provide excellent quality and service to Amtrak employees.

This year you will notice a different format for your W-2 form. Below are some details regarding similarities and differences regarding the new Form W-2 format:

What will stay the same

- As in the past, Form W-2s will be mailed to your "permanent" address as noted in the Employee Information Portal (EIP). This is also the same address that appears on your paycheck or pay stub. If you log into EIP, you will find a "permanent" address option and a "new mailing" address option. Please ensure your "permanent" address is accurate as Form W-2 will be mailed there.
- If you worked in multiple states and/or different localities within your state, multiple Form W-2s will be printed to report each the taxes for each state and locality.
- If you are receiving more than one Form W-2, each Form W-2 will continued to be mailed separately.
- W-2 reprints should continue to be requested through the Payroll department.

What will be different

- Directly under the employee's address, a page reference is provided to denote the number of Form W-2s that were printed. (example - Page 1 of 2 means that two Form W-2s were printed).
- SAP ID/Personnel Number will not print in Box d (control number).
- Federal and state wages and taxes will also print on the second page when multiple pages are printed due to having two or more states or localities during the year.
- If you worked in multiple states or multiple localities during the year, the **federal copy** of your Form W-2 will print total state or total city and combine the taxes you paid for each.

Healthy New Year Resolution: Keep Vaccinations Up-To-Date

Periodic vaccinations are recommended for all age groups, not just children. If you're confused over what vaccinations you need, consult the Center for Disease Control (CDC) quiz "What Vaccines Do You Need?" at <http://www2.cdc.gov/nip/adultimmsched/> for an individualized guide based on your sex, age and health.

There has been a resurgence of whooping cough (pertussis) for which the adult vaccination with Tdap is recommended. Besides pertussis, this vaccine protects against tetanus and diphtheria. While whooping cough can be especially serious for infants, adults can develop a persistent cough that can last for up to ten weeks or more; sometimes known as the '100 day cough'.

Other vaccinations may be recommended for specific medical conditions, so contact your doctor or healthcare provider and ensure your vaccinations are up to date in the New Year.

Employee Helpline is at Your Service

Amtrak is committed to maintaining a positive and productive environment for all employees. If a conflict arises at work, there are people and resources to turn to for help. Employees may call the toll-free Amtrak Helpline to report any type of workplace conflict or concern and a third-party interview specialist will document the issue in detail and relay this information to Amtrak for follow-up.

Employees will be given the option to remain anonymous. All Helpline reports are reviewed by an Amtrak employee in the Law department who refers the reports to the appropriate department. For example, reports may be referred to a senior manager in the employee's department, Employee Relations, the EEO (Equal Employment Opportunity) Compliance Office or the Amtrak Police Department. The decision about where to direct the reports is made based on the information given to the Helpline.

In general, the Law department will not conduct further intake before referring the report. Therefore, all key information should be given to the Helpline at the time the complaint is filed. Helpline reports will be handled promptly and discretely. Retaliation of any kind violates Amtrak's policies and will not be tolerated.

Please note that the reports are only reviewed by the Law department during regular business hours. Emergencies, such as workplace violence incidents, should be reported directly to the Amtrak Police (215-349-4919) or to your local management.

Amtrak's Helpline can be reached at (866) 908-7231 or at <http://www.reportlineweb.com/Amtrak>.

2014 Holiday Schedule

Holidays observed at Amtrak vary depending on an employee's status. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each labor agreement can be found on the home page of the Intranet under Employee Info → Holidays.

Amtrak will observe the following 2014 dates as holidays for non-agreement employees:

- New Year's Day, January 1
- Martin Luther King, Jr. Day, January 20
- President's Day, February 17
- Memorial Day, May 26
- Independence Day, July 4
- Labor Day, September 1
- Veterans Day, November 11
- Thanksgiving Day, November 27
- Christmas Day, December 25

Non-agreement employees hired in 2014 will receive personal days based on their date of hire. Employees hired between January 1 and May 31 will receive two personal days, while those hired June 1 through August 31 are entitled to one personal day. Employees hired September 1 or after will not have any personal days.

For further information regarding holidays and personal days, please refer to the company Intranet under Library → Policies → Human Capital Management Policies → Holiday Schedule.

New System Timetable in Effect

Starting today, our new Winter/Spring system timetable is in effect. The timetable features a new customer-focused, easier-to-understand shading scheme for the columns and the nine different colors and shades used in previous national timetables have been simplified to five: *Acela Express*, *Overnight train*, *Daytime train* (instead of *Northeast Regional*, *Shuttle Service*, *Medium Distance Train*, *Unreserved Corridor* and reserved portion of unreserved corridor service), *Thruway service* and *Connecting Train Service*.

Schedule changes are relatively minimal. Lynchburg-Roanoke/Blacksburg connecting bus service is now operated as Amtrak Thruway and is integrated into the Virginia service grid. The timetable also lists an expanded number of state partnerships due to the changes which took place under PRIIA, effective last October.

The cover art is by Eric Smith, assistant superintendent of Road Operations in Los Angeles. The painting captures the southbound *Coast Starlight* at the platform in San Luis Obispo, Calif. The original painting is displayed in our new Los Angeles Amtrak Metropolitan Lounge.

"On the Right Track" Legal Newsletter Now Available

The latest edition of the Amtrak Labor & Employment Law Newsletter--"On the Right Track" is now available. You can find this and past editions of the newsletter under Law Department Publications on the [Law Department](#) Intranet page, located under the How We Work tab on the main Amtrak Intranet page. Topics featured in this issue include:

- Another reason you cannot remain silent if you see harassment at work.
- When (if ever) can a woman be excluded from a job because she is a woman?
- How do you assess if an employee with a medical condition poses a safety risk at work?
- Can a request to attend a week-long funeral overseas be a request for religious accommodation?
- New York City becomes the latest to pass a pregnancy accommodation law.
- What not to say when an employee says she needs a larger monitor due to a visual impairment.
- After FMLA leave: What does reinstatement mean?

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter.

Nominate an Outstanding National Train Day Volunteer

On May 10, National Train Day (NTD) celebrations will be held across the country, and its growing success each year is due to the support and time contributed by our own employee volunteers. If you know of an outstanding co-worker whose National Train Day volunteer efforts should be recognized, you can now nominate them for the opportunity to be featured on our employee-only NTD website, TrainDay411.com. Starting in February and posted each week through National Train Day, an outstanding NTD employee volunteer will be featured. Submit your nomination by Jan. 31 to Francine.Berk@Amtrak.com along with the following information:

- Name
- Department
- Title
- Tenure
- Email Address
- Phone Number
- Quote about their efforts (please limit to 250 characters)

A Transformative Year at Baltimore Penn Station

With nearly three million riders (Amtrak and MARC) in 2013, Baltimore Penn Station has developed into a critical gateway for the city of Baltimore and an important link on the greater Northeast Corridor (NEC). Situated in the heart of the city, the station is a major multimodal hub serving Amtrak's high-speed *Acela Express*, Northeast Regional and long-distance trains, MARC Penn Line, light rail, buses and university shuttles.

Penn Station had a particularly transformative year in 2013, which was marked by three significant projects funded through the Amtrak/Maryland Transit Administration (MTA) Joint Benefits Program, and is managed by Amtrak's Customer Management and Sales group. This group, part of the NEC Infrastructure and Investment Development (NECIID) Business Line, manages the contractual and business relationships between Amtrak and the different commuter rail agencies operating on the NEC.

The Joint Benefits Program with MTA helps support the recapitalization of NEC infrastructure in Maryland and the District of Columbia. The station's restrooms underwent a \$1 million renovation and expansion that was recently recognized at Central Baltimore Partnership's 2013 Honor Roll Awards for significant improvements to the community's quality of life. The station's concourse came back to life with the \$1.7 million investment into the refinishing of historic windows, wood benches and ceiling details. Furthermore, the second phase installation of Passenger Information Displays (PIDs) to ensure an American Disability Act (ADA)-compliant experience for all station users is currently underway. These improvements build upon an additional \$7 million of other station improvements completed over the past four years.

Amtrak, along with our state, city and local partners, have been recognized for partnership efforts to renew Baltimore Penn Station. Dignitaries including Maryland Governor Martin O'Malley, Congressman Elijah Cummings and Baltimore City Mayor Stephanie Rawlings-Blake have attended station events throughout the year. Looking forward to 2014, the NECIID and Real Estate division continue to advance several studies that will be integrated into a comprehensive Baltimore Penn Station Master Plan. Ultimately, the Master Plan will set forth a vision for a transportation-oriented development anchoring the city's central core.

WOW!

The recent cold weather might have you thinking of warmer locales...such as Florida. To promote travel to the Land of Sunshine in the 1970s, Amtrak offered its "Week of Wheels" (WOW) promotion. It included round-trip train fare to various destinations coupled with a car upon one's arrival. In 1975, passengers could choose from a Plymouth Duster or a Valiant.

<http://history.amtrak.com/archives/week-of-wheels-in-florida-brochure-1975>

Flash Pass Not Permitted for Travel to Secaucus Junction

The first Mass Transit Super Bowl will take place on Feb. 2 at MetLife Stadium in East Rutherford, N.J. Amtrak has been working closely with the N.Y. / N.J. Super Bowl Host Committee and regional transit service providers to ensure an easy and seamless travel experience for everyone, and will play an integral part in bringing fans throughout the region to the center of the action. On that day, several Amtrak trains will make a special stop at Secaucus Junction for passengers with Super Bowl tickets.

To accommodate our passengers, Amtrak employees, spouses and dependents with tickets to the Super Bowl game **may not** "flash pass" using their employee Smart ID cards or pass cards to Secaucus Junction.

Employees must make reservations, pay for their tickets if the fare is not zero, and obtain eTicket travel documents **prior to boarding trains** in order to travel to Secaucus. **Fares may not be paid on board**; conductors do not have the fares to Secaucus. The eTicket travel documents will be required at Secaucus Junction in order to pass through the security gates to the shuttle trains traveling to the stadium. Reservations should be made as early as possible, as seating could be sold out on the day of travel.

If a pass rider boards the train without an eTicket Travel document, he/she will not have the necessary document needed to pass through the gates at Secaucus to the shuttle trains.

For more information visit the company Intranet → Library → Daily Advisories → January 2014 or [click here](#).

Nominations Needed for Outstanding NTD Volunteers

On May 10, National Train Day (NTD) celebrations will be held across the country, and its growing success each year is due to the support and time contributed by our own employee volunteers. If you know of an outstanding co-worker whose National Train Day volunteer efforts should be recognized, you can now nominate them for the opportunity to be featured on our employee-only NTD website, TrainDay411.com. Starting in February and posted each week through National Train Day, an outstanding NTD employee volunteer will be featured. **Submit your nomination by Jan. 31 to Francine.Berk@Amtrak.com** along with the following information:

- Name
- Department
- Title
- Tenure
- Email Address
- Phone Number
- Quote about their efforts (please limit to 250 characters)

Conducting the Rails....and Musical Scales

Those in attendance at a recent National Symphony Orchestra concert at Washington Union Station may have noticed an unusual crew change. Midway through the performance, Amtrak Passenger Conductor Kevin Kelly took center stage, leading the orchestra through several measures of Offenbach's "Can-Can". The railroad-themed concert was performed in the station's East Hall.

Record Revenue and Ridership Results Set in December

The numbers are in! December 2013 ticket revenues of \$200.1 million resulted in the highest ticket revenue month in Amtrak history, exceeding last year by 12 percent and budget by 5 percent. This is due in part to the Sunday - Monday after Thanksgiving shift this year from November to December but, is also due in part to strong overall demand on the Northeast Corridor (NEC), especially early in the month.

December FY14 ridership of 2.71 million trips was the best December ever, exceeding last year (adjusted) and budget by 6 percent and 3 percent respectively.

As a team, we continue to grow and strive to accomplish more and we all should be proud of our record setting achievements.

APD11 "Txt-a-Tip" Video Released for the Hearing Impaired

In 2013, Amtrak launched a new method for reporting suspicious activity, crime, or emergencies by introducing **APD11 "Txt-a-Tip,"** a program that allows contacting the Amtrak Police Department's (APD) National Communications Center via SMS text messaging. Passengers can report suspected criminal or suspicious activity by sending a text to APD11 from a smartphone or to 27311 from a standard cell phone. Txt-a-Tip will especially benefit Amtrak passengers and station visitors who are deaf or hard of hearing by providing an easy and efficient method of communicating emergency information to the APD.

To further generate awareness of the program, a [video](#) was specifically designed to alert the deaf community that there now is a convenient and easy method to contact the Amtrak Police Department anywhere, at any time.

Agreement Signed to Extend Amtrak Virginia Service to Roanoke

On Jan. 9, then-Virginia Governor Bob McDonnell announced that the Department of Rail and Public Transportation (DRPT) and Norfolk Southern Corporation had entered into an agreement to improve rail-related infrastructure between Lynchburg and Roanoke. The improvements will allow passenger rail to once again serve the Roanoke region.

Included in the agreement are track additions and realignments, signal and communication upgrades along the route, clearance adjustments and a platform and train servicing facility in downtown Roanoke, all necessary prerequisites to reintroduce passenger rail service slated to begin in 2017.

The extension of intercity passenger train service from Lynchburg to Roanoke marks the return of train service to the Star City for the first time in 34 years.

Hit the Slopes!

Numerous Amtrak trains conveniently stop near major ski destinations in the West and Northeast. This brochure for winter 1974-1975 promotes vacation packages to famous Vermont resorts including Stowe, Bolton Valley and Jay Peak. A highlight of the popular *Montrealer* (later replaced by the *Vermont*) was "Le Pub," a "dimly-lit, romantic cocktail lounge car" that featured a piano player/singer on weekends.

<http://history.amtrak.com/archives/ski-northeast-brochure-1974>

Helpful Tips to Avoid Catching Influenza

We encourage all employees to maintain a healthy work environment. With Influenza season in full swing, please remember that it is not too late to get your flu vaccination if you have not already done so. In addition, here are some general steps everybody can do in their daily lives to protect against getting the flu:

- Wash your hands often with soap and water or an alcohol-based hand rub.
- Avoid touching your eyes, nose, or mouth. Germs spread this way.
- Try to avoid close contact with sick people.
- Practice good health habits. Get plenty of sleep and exercise, manage your stress, drink plenty of fluids, and eat healthy food.
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- If you are sick with a flu-like illness, or exposed to a person with the flu, medications may be indicated. Call your health care provider immediately as medications are more effective the sooner they are started. Antiviral drugs are 70 percent to 90 percent effective at preventing the flu.
- If you are sick with flu-like illness, stay home for at least 24 hours after your fever is gone without the use of fever-reducing medicine.

For additional information and useful tips visit www.flu.gov. For help in locating where you can obtain the flu vaccine visit <http://vaccine.healthmap.org>.

Cold Weather Safety Tips

Exposure to cold can cause injury or serious illness such as frostbite or hypothermia. The likelihood of injury or illness depends on factors such as physical activity, clothing, wind, humidity, working and living conditions, and a person's age and state of health. Please review these cold weather safety tips as the winter season draws upon us:

- Dress appropriately before going outdoors. The air temperature does not have to be below freezing for someone to experience cold emergencies such as hypothermia and frostbite. Wind speed can create dangerously cold conditions even when the temperature is not that low. If possible, avoid being outside in the coldest part of the day or for extended periods of time in extreme cold weather.
- Dress in layers so you can adjust to changing conditions. Avoid overdressing or overexertion that can lead to heat illness. Most of your body heat is lost through your head so wear a hat, preferably one that covers your ears.
- Wear waterproof, insulated boots to help avoid hypothermia or frostbite by keeping your feet warm and dry and to maintain your footing in ice and snow.
- Get out of wet clothes immediately and warm the core body temperature with a blanket or warm fluids like hot cider or soup. Avoid drinking caffeine or alcohol if you expect you or someone you are trying to help has hypothermia or frostbite.

Reminder: Make Sure Your Spouse and Dependents Have Their New Pass Cards

In order to preserve flash passing privileges on corridor trains, your spouse and all dependents (of any age) are required to have the new non-picture pass cards that we began distributing in October and November 2013. **The old picture pass cards will no longer be honored after February 28, 2014.** Active Amtrak employees will use the Smart ID card (with the blue stripe) as their pass cards; they do not receive separate pass cards.

If cards are needed for a spouse or dependent, first go to amtrakbenefits.com or call 800-481-4887 to make sure that the spouse or dependent has been registered for pass benefits. (For dependents, this must be done regardless of the dependent's age.)

- If this has not been done, immediately register that person with Amtrak Benefits in order to obtain pass privileges.
- If the person is registered for pass benefits, and cards have not yet been received, ask a contact center agent or station ticket agent to look up your pass file and see if the spouse and all dependents are in it. Give the agent your Social Security number; you do not need to know your three-digit index number as they can display your pass file without it (but it is needed for ticketing).
- If the spouse and dependents are in the pass file, but you have not received the cards, contact the Amtrak Pass Bureau at passbureau@amtrak.com or 202-906-3745 and ask that cards be sent. Make sure the Pass Bureau has your correct mailing address.
- If the spouse or any dependent is not in the pass file (but that person is registered already for pass privileges with Amtrak Benefits), contact the Amtrak Pass Bureau as above so the problem can be resolved and cards sent.

Remember, you do not need the actual card for any purpose other than to flash pass on corridor trains. You may make a reservation and obtain eTicket travel documents without the card. In all cases identification with a picture is required for all pass riders 16 and over such as a driver's license, state ID card, passport or high school picture ID. Active Amtrak employees may also use the Smart ID card as the required identification.

Station in the Spotlight....Castleton, Vt.

Easily accessible on foot from the town center and the grounds of Castleton College, the depot, erected in 1850, is one of the oldest station buildings in the national Amtrak network. Northwest of Castleton is peaceful Lake Bomoseen. In the 1920s, Alexander Woollcott, the *New Yorker* magazine arts critic and a member of the Algonquin Round Table, purchased seven acres on Neshobe Island in the middle of the lake. It became a weekend getaway for Woollcott and his friends, who included Ethel Barrymore, Irving Berlin, Vivian Leigh and Harpo Marx.

Amtrak Celebrates Black History Month

Black History Month (BHM) is an annual celebration recognized during the month of February. Amtrak's celebration of Black History Month will feature a wide range of in-station events, promotions, contests and advertising. "Black History Month is a great time to not only reflect on the important contributions made by so many Americans, but it allows us the opportunity to dream and to learn." said Darlene Abubakar, senior director, National Advertising and Marketing Programs. "Below is a sampling of the various activities and events taking place around the system. Visit myblackjourney.com for additional Amtrak BHM activities.

Carole Copeland Thomas' Multicultural BHM Breakfast

Amtrak will be sponsoring the Carole Copeland Thomas's Multicultural BHM Breakfast to salute black entrepreneurs on Tuesday Feb. 11, at 8:30 a.m. at the UMass Boston-Student Center Ballroom. The keynote speaker is award winning entrepreneur, Beth Williams, President and CEO of Roxbury Technology. For details visit www.mssconnect.com

Amtrak Pioneer Awards

In partnership with the Washington Wizards, on Tuesday, Feb. 25 at 7:00 p.m. at the Verizon Center, the Amtrak Pioneer Award will be presented, recognizing local community leaders who have made a positive impact in the Washington, D.C., area.

On Monday, Feb. 3 at 7:30 p.m., Amtrak will partner with the Brooklyn Nets at the Barclays Center where the Amtrak Pioneer Award will be presented, recognizing local community leaders who have made a positive impact in the New York City area.

New York-Harlem Fine Arts Show

Amtrak is a sponsor of the Harlem Fine Arts Show (HFAS). HFAS is the premiere showcase for exhibiting modern and contemporary art that reflects the breadth of African Diasporic Art.

Philadelphia - African American Museum

Amtrak is an on-going annual "Partner Sponsor" of the African American Museum in Philadelphia. Visitors to the museum's website may link directly to Amtrak.com to plan their travel.

Baltimore & Ohio Railroad Museum

Amtrak is the proud sponsor of BHM events at the Baltimore & Ohio Railroad Museum, celebrating the many contributions of African-Americans to the railroad industry throughout the last century.

Milwaukee

Amtrak and WJMR-FM in Milwaukee will take an entertaining and respectful look at Black history within the Milwaukee area and the state of Wisconsin. The station has created 60 second Black History Facts that include ten seconds of Amtrak copy in the middle of each spot. The facts include topics from entertainment, history and current events, all of which have local ties.

New York Penn Station

Amtrak sponsored BHM activities in the New York Penn Station Rotunda area will include cultural vendors and live musical artists on the following dates: Vendors: Feb. 11, 13, 14, 17, 19, 21, 24, 27 and 28 from noon – 7:00 pm. Live musical performances will be held on Feb. 17, 21, 27 and 28 from 3:00 p.m. – 7:00 p.m.

BMH celebrations continued...

Rollingout.com Pullman Porter Advertorial and Video

Amtrak has partnered with Rollingout.com to host a short video documentary and advertorial about Pullman Porters. Throughout the month, the popular entertainment and news site will be hosting a video documentary complemented by an advertorial that will provide a brief history on America's railroad while educating readers on the significant role Pullman porters played in America's history.

Washington Union Station

All Amtrak employees and their families are invited to come out to support the 17th Annual Black History Celebration Program at Washington Union Station in the Starlight Room, Gate C, on Feb. 22 from 11:00 a.m. to 3:00 p.m. This year's event will honor the achievements of African Americans in uniform military service past and present.

Amtrak Updates Mobile Applications

Amtrak recently updated our popular customer [iPhone](#) application, refreshed the [Android](#) version and added a new [Windows Phone](#) version.

Passengers can use any of our smartphone applications to book one-way and roundtrip tickets, get station information, check train status, show an eTicket while onboard, update Amtrak.com reservations and access their Amtrak Guest Rewards account. Plus they offer the convenience to save tickets to their phone calendar, Apple Passbook™ or Samsung Wallet™.

Amtrak for iPhone v2.0 was redesigned for iOS7 and includes updates in the purchase and modify flows. Both iPhone and Android versions feature new look of the home screen.

Amtrak for Windows Phone was developed in cooperation with Microsoft. As part of this effort, Microsoft is featuring the app in the Windows Phone App Store and promoting it in merchandising and social media channels.

These new versions of the Amtrak app are part of a continued effort to enhance convenience to our passengers with easy and quick access to their trip information. The goal is to continue embracing mobile technology that fits the lifestyle of our customers and improve their travel experience.

We expect all three versions will continue the success of the existing iPhone and Android app, which have been downloaded by our passengers over 3.5 million times. Visit amtrak.com/mobile to learn more about the whole family of Amtrak mobile offerings.

The Service Standards Manual Distribution List to be Updated

The Service Standards Manual version 8.0 for Train Service and On-Board Service employees becomes effective April 30, 2014. As a result of the recent company restructuring, the distribution list for the manual is being updated. Transportation managers currently on the distribution list should have received an email last week asking to update their contact information. Transportation managers who have not been contacted and need copies of version 8.0 to distribute to their employees, should email Sharon Slaton at sas@amtrak.com and provide their mailing address, phone number, job title and quantity of manuals needed no later than **Friday, February 7, 2014**.

Please put SSM 8.0 in the subject line of the email. If you do not require a hard copy of the manual, the current online version of the [Service Standards Manual](#) can be accessed on the intranet at "Library" → "Service Standards" → "Standards."

Flexible Spending Account (FSA) Reminders

Due to the recent switch of our account administrator, some employees may have questions regarding their accounts. Here are some helpful reminders about the recent change:

- **WageWorks is no longer Amtrak's administrator for Flexible Spending Accounts (FSA).** For 2014, your payroll contributions will go directly to the P&A Group. You should have recently received a P&A debit card for your eligible expenses. This card can be used for both Flexible Spending and Commuter Reimbursement Accounts, if you enrolled in both. If you didn't receive your debit card, please contact the P&A Group.
- **Remaining 2013 Balances:** Any remaining balance you have in your WageWorks account for Transit and Commuter Benefits will be transferred to P&A in February 2014. If you still have a balance in your 2013 Health Care FSA, you can continue to submit eligible medical expenses for claims incurred through March 15, 2014 to WageWorks (www.wageworks.com or 1-877-924-3967). If you enrolled in a Health Care FSA or Limited FSA for 2014, you will use your P&A debit card for your eligible expenses or submit your expenses directly to P&A Group.
- **Limited FSA:** Remember, if you participate in a Consumer Directed Health Plan with a Health Savings Account for 2014 and also enrolled in a Limited Flexible Spending Account, your FSA is limited or restricted to dental and vision expenses.
- **Commuter Reimbursement Benefits:** To access your 2014 Commuter or Transit Account balance, you can submit a claim or you can use your P&A debit card. If you were previously set up for automatic payments to a parking vendor or transit authority through WageWorks, you must now set up the payment through P&A.
- **Commuter Reimbursement Benefits for Metro's SmarTrip card:** If you live in the Washington, D.C., area and want all of your payroll contributions for 2014 to apply directly to an existing or new Metro SmarTrip card, you must provide your Metro SmarTrip card serial number to P&A Group. This will ensure your payroll deductions are automatically applied to your Metro SmarTrip card.
- **Transit Benefits Decreased:** For 2014, the federal government has reduced the limit for transit benefits to \$130 a month. For those who drive to and from work, the parking benefits have increased to \$250 a month. You can change your commuter and transit elections through www.AmtrakBenefits.com or by calling the Amtrak Benefits Service Center at 800-481-4887.
- **Filing Claims:** If you don't use your P&A Debit Card to access your account, there are three ways to file your claims: QuikClaim on your mobile device, enter claims directly online via an electronic claim upload or you can print the claim form and mail it in. Read about these options at www.padmin.com.

To contact the P&A Group Customer Service department, call 1-800-688-2611 (Monday- Friday 8:30 a.m. – 8:00 p.m. ET) or visit www.padmin.com.

Amtrak Cities Sprinter Arrives with Fanfare

On Feb. 6, a new era of more reliable and energy efficient Amtrak service arrived at Philadelphia 30th Street Station. At a ceremony in the station's historic North Waiting Room, Amtrak President and CEO Joe Boardman praised the delivery of the first of 70 advanced technology electric locomotives to be placed into revenue service. The need to invest in America's Railroad and other transportation modes was emphasized by United States Vice President Joe Biden. Also in attendance was U.S. Secretary of Transportation Anthony Foxx and President and CEO, Siemens USA, Eric Spiegel.

The state-of-the-art Amtrak Cities Sprinters (ACS-64) are part of our comprehensive Fleet Strategy Plan to modernize and add equipment while providing improved performance and reliability for intercity passenger rail services on the Northeast and Keystone Corridors. In addition, all long-distance trains operating in the Northeast Corridor will be powered by the new locomotives.

Produced by Siemens in Sacramento, Calif., the locomotive's major components are sourced from suppliers in 61 cities from 23 states across the U.S. The new equipment will be replacing locomotives that have been in service between 25 and 35 years with average mileage of more than 3.5 million miles. As the first locomotive enters revenue service, production of the remaining units will ramp up a scheduled delivery of approximately two locomotives per month through 2014, and moving to three units per month through 2015.

Technologically advanced features of the ACS-64 include regenerative braking, allowing 100 percent of the energy generated during braking to feed back to the power grid, a state-of-the-art microprocessor which allows for self-diagnosis of technical issues and, Siemens' newest platform, the Vectron, ensuring that heating, cooling, lighting and door systems will remain in service should one inverter fail.

Important Messaging Regarding Your Amtrak E-mail

Amtrak's IT Department has begun migrating to a new e-mail system in order to improve performance, reduce operating costs, and comply with Amtrak's Records Management Policy. As part of this process, a 90 day delete policy will be applied to non-user-directed archive folders in your Outlook mailbox. **This means that ALL e-mail messages older than 90 days which have NOT been moved into one of the User Directed Archives (UDA) folders (one, three, five, seven, ten, 30 or 65 years) by the date of migration WILL be deleted and will not be recoverable.** The e-mail migration team will notify you of the date migration will occur, providing enough lead time to complete movement of messages to UDA folders. It is important that when you receive this e-mail, you read it in its entirety and follow the instructions.

Changes to the new migration system include:

- Migration to the latest Microsoft e-mail system, Exchange 2010
- Replacement of the e-mail archive system
- Addition of integrated instant messaging

In addition, the migration team will be sending you a reminder e-mail the day before they activate the 90 day delete policy. Please be alert for this e-mail as it may contain any last-minute information. They will also be sending you a post-migration e-mail that will contain important information regarding the new e-mail system – including information on how to use MS Lync Instant Messaging. If you have any questions or concerns, please e-mail: [E-mail Migration Project Mailbox](mailto:E-mail+Migration+Project@amtrak.com). You may also find important information about the e-mail migration project at <http://wiki.corp.nrpc/display/deptAt/E-mail+Migration+Project>.

PBS to Air "The Rise and Fall of Penn Station"

Tonight, at 9 p.m., the Public Broadcasting System (PBS) will be airing an episode of its American Experience series called "The Rise and Fall of Penn Station". The program closely follows the story in the book "Conquering Gotham", which details the history of the construction of New York's Penn Station, the two rail tunnels under the Hudson River, and four rail tunnels under the East River. The station and its tunnels were built by the Pennsylvania Railroad in the first decade of the 20th century, resulting in a vast civil engineering feat that greatly opened up the flourishing metropolis to rail travel.

Today, at more than 100 years old, the same two Hudson River tunnels still serve as the only intercity rail crossing into New York City from New Jersey. Amtrak, through its Gateway Program, has proposed a series of strategic rail infrastructure improvements including two new Hudson River tunnels to improve service and create additional capacity. A critical first step was taken last fall with the start of construction of an 800-foot concrete casing at the Hudson Yards facility in the heart of Manhattan that will preserve an underground right-of-way that could serve as the future alignment for the Gateway Program.

Amtrak Assistant Superintendent Phil Kaplan is featured in a short video "extra" about dispatching train traffic at Penn Station Central Control (PSCC) center, which will be posted on the PBS website.

Onboard Wi-Fi Service Expands to the Midwest

AmtrakConnect®, our cellular-based Wi-Fi service, is now available on Amtrak trains in the Midwest, with eight corridors offering this free amenity to Amtrak passengers. Amtrak installed the equipment under contracts with the states of [Illinois](#), [Michigan](#), [Missouri](#) and [Wisconsin](#) as part of their sponsorship of Amtrak service. The Wi-Fi service, which has incorporated 4G technology, will be provided on these routes:

- *Lincoln Service*: Chicago-Springfield-St. Louis
- *Illini/Saluki*: Chicago-Champaign-Carbondale
- *Illinois Zephyr/Carl Sandburg*: Chicago-Galesburg-Quincy
- *Wolverine Service*: Chicago-Ann Arbor-Detroit-Pontiac
- *Blue Water*: Chicago-East Lansing-Port Huron
- *Pere Marquette*: Chicago-Holland-Grand Rapids
- *Missouri River Runner*: St. Louis-Jefferson City-Kansas City
- *Hiawatha Service*: Chicago-Milwaukee

AmtrakConnect is available on trains that serve 85 percent of Amtrak passengers, and routinely supports between 30 and 50 percent of passengers on a given train.

A Fresh Look for Amtrak News Clippings

Amtrak News Clippings has a new look. The new format features video news stories and readers have the capability to email stories to others. Amtrak News Clippings is a source for employees with news, commentary and features about Amtrak, our state partners, and the railroad and travel industry. If you have any questions or comments, contact Amtrak Media Relations at MediaRelations@Amtrak.com.

Discontinuation of Select Long-Distance Passenger Amenities

As part of Amtrak's efforts to eliminate the Food & Beverage department losses over the next five years, select amenities will no longer be complimentary on long-distance routes. These reductions represent a significant savings and a potential increase in food and beverage revenues. The dates are approximate and are based on an estimate of the amount of amenities that are still in stock, but no new items will be put onto trains on or after these dates.

Effective February 8, 2014

- Cranberry juice will no longer be available in the sleeping cars.
- Orange juice and apple juice will continue to be available.
- Cranberry juice will continue to be available in the dining car.

Effective February 15, 2014

- Flowers and vases will no longer be on the tables in the dining car.

Effective March 31, 2014

- Wine and cheese events will no longer be held on the *Empire Builder*, the *Coast Starlight*, or the *Lake Shore Limited*.
- Complimentary sparkling wine, non-alcoholic cider, and chocolate squares will no longer be given to sleeping car passengers on the *Empire Builder* and the *Coast Starlight*.

Effective May 31, 2014

- Complimentary amenity kits will no longer be given to sleeping car passengers on the *Empire Builder* and the *Coast Starlight*.

Effective on a date to be announced

- Complimentary newspapers will no longer be given to sleeping car passengers.

Reminder: New Pass Cards Needed for Spouse and Dependents

In order to preserve flash passing privileges on corridor trains, your spouse and all dependents (of any age) are required to have the new non-picture pass cards that we began distributing in October and November 2013. **The old picture pass cards will no longer be honored after February 28, 2014.** Active Amtrak employees will use the Smart ID card (with the blue stripe) as their pass cards; they do not receive separate pass cards.

If cards are needed for a spouse or dependent, first go to amtrakbenefits.com or call 800-481-4887 to make sure that the spouse or dependent has been registered for pass benefits. (For dependents, this must be done regardless of the dependent's age.)

- If the spouse and dependents are in the pass file, but you have not received the cards, contact the Amtrak Pass Bureau at passbureau@amtrak.com or 202-906-3745 and ask that cards be sent. Make sure the Pass Bureau has your correct mailing address.
- If the spouse or any dependent is not in the pass file (but that person is registered already for pass privileges with Amtrak Benefits), contact the Amtrak Pass Bureau as above so the problem can be resolved and cards sent.

Please note that this applies to **Amtrak** employees, retirees, spouses and dependents only. Freight railroad pass riders never had picture pass cards and their pass card situation stays as is.

National Train Day to be Celebrated on May 10

Plans are now underway to celebrate the seventh annual National Train Day across the country. Last year, 259 communities in 50 states and the District of Columbia held activities celebrating National Train Day with the theme, "Trains Matter," championing the importance of all trains across the country, including freight, commuter and long-distance passenger service.

This year, the "Trains Matter" theme will be repeated, expanding the awareness of the positive impact Amtrak and other operators have on hundreds of towns and communities nationwide. National Train Day strives to demonstrate that trains do not simply move people and freight, but that stations, too, act as anchors for economic development, catalysts for historic preservation and tourism growth, sites for commercial and cultural uses, and points of civic pride.

In 2013, attendees enjoyed touring train equipment displays at 20 event celebrations. At Washington Union Station, attendees had the opportunity to experience a short excursion on *Acela Express*; and in Albuquerque, N.M., the Amtrak Exhibit Train and its self-guided tours were a big hit! Additionally, there were local and state dignitaries on site in 19 cities to kick-off their community's event.

In 2014, National Train Day will offer even more exciting activities for event attendees while our goals remain to stimulate long-distance train awareness and ridership, reach new audiences in smaller communities nationwide and reinforce the importance, benefits and value of rail. Excursion trips will be available in Washington, D.C., and Chicago. Grassroots efforts will intensify to include more communities and new exhibits will be featured. In Longview, Texas, National Train Day will be complementing the rededication of the station, recently designated as a Recorded Texas Historical Landmark.

For those planning to attend and/or volunteer at Los Angeles Union Station, National Train Day will be celebrated on May 3 as part of the station's 75th anniversary celebration. National Train Day will also be celebrated on May 3 in Toledo, Ohio as well as in Huntington, W.Va.

National Train Day Celebration Station in the Spotlight...

Opened in 1999, the Rutland depot was built in an area that was once the headquarters of the Rutland Railroad. The extensive complex included a depot, roundhouse and shops, making the city the hub of southern Vermont's rail network.

Rutland's fame spread due to the deposits of fine white marble discovered to the north and west of town in the 1830s. Cutting and transporting the stone proved labor intensive and difficult—it was not until the arrival of the railroads at mid-century that the industry truly flourished. The prosperity brought by the railroads and marble business is visible in Merchant's Row, a collection of grand buildings across from the depot that today houses shops, galleries and restaurants. **In Rutland, Vt., "Trains Matter".**

Amtrak Exhibit Train Begins its 2014 Tour

On March 1-2, the Amtrak Exhibit Train will begin its 2014 tour in Chandler, Ariz., at the Arizona Railway Museum. The Exhibit Train is the former 40th Anniversary Exhibit Train originally designed to celebrate the company's 40th anniversary in 2011. The train will tour the system stopping in communities to strengthen state and local partnerships, be present at station dedications and new service openings and at special events. The stops are an opportunity for members of the community to meet Amtrak representatives, build relationships and enhance the corporate image of Amtrak throughout the country.

The Exhibit Train allows visitors to take a free, self-guided tour and catch glimpses of Amtrak's past, present and future and its importance in communities across America. Since its inception, new displays have been added such as an interactive video sleeper tour, workable train signals, and video trivia questions while former favorites remain such as the horn display and locomotive stand.

This year, the Exhibit Train will stop in approximately 20 communities. At most stops, the train will be led by our Veterans' Locomotive, supporting our corporate hiring initiative that 25 percent of new hires be from the military by 2015 while showing support for our country's servicemen and women. While not all stops are finalized, the 2014 tour schedule can be found at Amtrak.com/Exhibit-Train.

We hope that every employee gets the opportunity to tour the train when it's at a nearby location.

Case Studies Showcase Amtrak Stations and their Communities

Communities around the country have discovered that rail stations are vital assets. Since the launch of the Great American Stations Project in 2006, Amtrak has worked with several Amtrak-served communities interested in implementing station improvements ranging in all shapes and sizes. As they shared their stories, lessons learned and best practices, we recognized the value to other communities in collecting these observations in a set of short case studies.

Recently, eight new case studies were posted offering a quick "snapshot" of a station improvement project including: project overview, community benefits, keys to success, funding sources, and insight from project, municipal and civic leaders. The case studies include station improvement projects in Cut Bank, Mont., Culpeper, Va., Kingman, Ariz., Kirkwood, Mo., Brunswick, Maine, Elizabethtown, Pa., Cincinnati, Ohio and Hattiesburg, Miss.

To read the case studies, visit GreatAmericanStations.com.

Amtrak Service Returns to Denver Union Station

Effective Feb. 28, Amtrak passenger rail service returned to Denver Union Station located at 1701 Wynkoop Street, in Denver, Colo., after serving passengers since 2011 at a temporary location during the redevelopment of the historic station.

Construction is still underway at Union Station, and until it is completed, passengers can access the waiting room, ticketing and baggage office by following signs to the trackside of the building at the south end. From there, passengers will follow signs to the newly constructed passenger platform, under the large white canopy.

When construction is completed in July, passengers will access the Amtrak facility from the front of the building. Please note that the stop for Amtrak Thruway buses will be temporarily located on Wynkoop Street, across from Union Station and marked with signage.

All Aboard for National Train Day Volunteers!

National Train Day (NTD) will be on May 10 and celebrations will be held around the country. Especially important to the success at each celebration are our employee volunteers. This year, our goal is to increase employee participation by two percent over last year to a minimum of 525 employee volunteers. Our employee-only National Train Day website has just re-launched for 2014 and if you would like to volunteer, please visit TrainDay411.com and register. While on the site, be sure to see which co-workers were nominated and are featured as outstanding NTD volunteers. In addition, take the NTD Trivia Challenge for your chance to win exciting Amtrak-branded prizes, now through National Train Day.

Please note that National Train Day activities will be held on May 3 in Los Angeles, Huntington, W.Va., and in Toledo, Ohio.

Amtrak Employee Discount Available at Ford's Theatre

As part of an ongoing promotion with Ford's Theatre in Washington, D.C., employees can enjoy a "Friends and Family" 50 percent discount on tickets to "The 25th Annual Putnam County Spelling Bee." Performances are being held from March 14 – May 17.

The play follows six awkward adolescents through their daunting and hilarious championship quest. Along the way, they learn that there is more to life than winning a trophy. This charming coming-of-age tale also invites four volunteers from the audience to participate in each performance, ensuring new and unexpected comedy every night. The show is recommended for ages 12 and up.

For more information on the show visit Fordstheatre.org. To purchase tickets contact Rae Davidson at (202) 434-9533 or email rdavidson@fords.org

National Train Day Celebration Station...

The brick depot in Cary, N.C., built in 1996 and featuring a handsome clock tower, serves this fast-growing community located near the state's famous Research Triangle Park. The Cary area, first settled in the 1750s, gained important railroad connections a century later that fostered the town's development and incorporation. Cary is today noted for its bicycle-friendliness, excellent public safety and careful urban planning. **In Cary, N.C., "Trains Matter."**

PSSA Nomination Period is Now Open with a New Category Added – *Living our Values*

Nominations are currently being accepted for the 2014 President's Service and Safety Awards (PSSA) and we are excited to announce the addition of one new category to this year's awards. The Living our Values Award will recognize our employees for the outstanding ways that they exhibit Amtrak's core values of Commitment to Safety, Integrity, Spirit of Service, Desire to Improve, Respect, Entrepreneurial Spirit, Accountability, Humility and Forgiveness.

Don't delay - now is a great time to get started on your nomination forms. The PSSA nomination period runs through **Wednesday, April 30, 2014** and will not be extended beyond that date. Once the nomination period concludes, nominations will be reviewed for completeness and strength of information, so please make sure to make your nominations form as clear, concise and complete as possible.

Also, please remember to support the committee members as they work diligently to select this year's award recipients. We need everyone's help to ensure that we select the best of the best as 2014 President's Service and Safety Awards winners.

Winners will be selected in the fall and honored in November at a ceremony in Washington, D.C.

Nomination forms are posted on the Intranet and can be found in the Forms Library which is available by clicking "Library" then clicking "Forms." Questions can also be directed to committee members and/or 2014PSSA@amtrak.com.

2014 Short Term Incentive Plan Announced for Non-Agreement Employees

The 2014 Short Term Incentive (STI) Plan Guide and FAQ's for non-agreement employees is now available for the plan year Oct. 1, 2013 through Sept. 30, 2014. The STI Plan is based on two goals that align with our strategic plan.

- **Financial Excellence** – This goal is 50 percent of the needed achievement and also provides the funding for the incentive. It will be achieved if we reduce our budgeted net operating loss of \$345 million to \$305 million, a \$40 million reduction.
- **Customer Satisfaction** – If we meet our financial goal the other 50 percent achievement will be based on our 2014 Customer Satisfaction Index (CSI) goal. The goal is measured on a sliding scale that ranges from 83.50 percent to 84.25 percent.

You can read more about the Amtrak 2014 Short Term Incentive Guide and FAQ's on the employee Intranet > Employee > Benefits as well as on our external Benefits website at www.Amtrakbenefits.com.

We are very excited to be offering this plan for the second year and hope our achievements far exceed our goals. Should you have any questions on the plan please feel free to contact the Employee Service Center at 888-694-7372 or email the compensation team at Compensationdept@amtrak.com.

Changes to Washington, D.C. Pass Bureau

In the past, the Pass Bureau office at the Amtrak corporate offices in Washington, D. C., had walk-up service hours for employees to obtain pass cards for themselves, their spouses and their dependents.

The Pass Bureau no longer issues pass cards. These are now produced and mailed weekly by an outside vendor, which uses data sent by the pass system.

Accordingly, since the Pass Bureau cannot produce cards immediately, there is no longer a paper form to submit to the Pass Bureau to obtain cards, and since most issues normally require research, walk-up service is no longer provided.

- To obtain pass privileges and new cards for spouses and dependents who do not yet have them, apply through the Amtrak Benefits web site at amtrakbenefits.com or call 800-481-4887 if you do not have computer access.
- For all other pass questions and pass card needs, please contact the Pass Bureau by email at passbureau@amtrak.com (recommended) or by phoning 202-906-3745.

All Aboard for National Train Day Volunteers!

National Train Day (NTD) will be on May 10 and celebrations will be held around the country. Especially important to the success at each celebration are our employee volunteers. This year, our goal is to increase employee participation by two percent over last year to a minimum of 525 employee volunteers. Our employee-only National Train Day website has just re-launched for 2014 and if you would like to volunteer, please visit TrainDay411.com and register. While on the site, be sure to see which co-workers were nominated and are featured as outstanding NTD volunteers. In addition, take the NTD Trivia Challenge for your chance to win exciting Amtrak-branded prizes, now through National Train Day.

Please note that National Train Day activities will be held on May 3 in Los Angeles, Huntington, W.Va., and in Toledo, Ohio.

New Long-Distance Advertising Campaign Begins

Amtrak has launched a new national advertising campaign targeting the millions of travelers that take car trips for leisure travel each year. The creative concept leverages the appeal of the automobile among the targets while emphasizing the benefits, amenities and power of an Amtrak train. The campaign showcases the amenities offered by long-distance trains thereby portraying the train as a unique and comfortable alternative to automobile road trips.

The ads were produced in two versions and feature a Superliner and Eastern long-distance train image. The three primary targets are seniors, families with young children and millennials (the majority born between 1980 – 1995), with the goal of the campaign being to attract new riders for Amtrak's long-distance trains. The advertising will also promote one-way sample fares between select cities to stimulate awareness, consideration and purchase.

Paperless Direct Deposit Receipt Now Available for Agreement-Covered Employees

As a part of our ongoing cost-saving initiatives coupled with our desire to be environmentally responsible, we invite all employees to opt out of having your Direct Deposit Advices (receipts) mailed to you. Now, all Amtrak employees can view and/or print their Direct Deposit Advices themselves directly from the company Intranet.

Along with our Amtrak non-agreement employees, all Amtrak Agreement-Covered Direct Deposit employees now have the ability to use the 24/7 web-based secured access to the Employee Information Portal (EIP) which maintains your payroll direct deposit advices.

Please note: If you are receiving an Earnings and Denial form (E & D) with your direct deposit, we are not able to put the E & D on the portal at this time.

In order to view and print your current Direct Deposit Advise, simply follow the instructions below:

To access from work:

Click #1: From your work PC go to the Amtrak Intranet and click on the Employee Information Portal (EIP)

Click #2: Click on BENEFITS and PAYMENTS

Click #3: Click on SALARY STATEMENTS

To access from home, smart phone or tablet:

Click #1: From Google type in <https://employee.amtrak.com> and log in

Click #2: Click on BENEFITS and PAYMENTS

Click #3: Click on SALARY STATEMENTS

Once you reach the Salary Statement tab, you will find your most current and prior Direct Deposit Advices.

If you have never logged in and don't know your password or need a password reset, please call the Amtrak Help Desk at 1-800-772-HELP or 1-800-772-4617.

If you are interested in joining this "Going Green" initiative, please complete the "Paperless Payroll Option Form for Agreement Employees" which can be obtained from your local payroll office, by emailing payroll@amtrak.com or by calling the hotline at 1-866-247-2915. Once complete, you can send it by mail to: Amtrak Payroll Dept., 10 G Street NE, 3W-110, Washington, D.C., 20002, by fax to 202-906-4617 or by email to payroll@amtrak.com.

National Train Day Celebration Station in the Spotlight...

Colonel H. S. McComb, president of the New Orleans, Jackson, and Great Northern Railroad (NOJ&GN), chartered the city that bears his name in 1872 to house railroad shops. Five years later, the Illinois Central (IC) purchased a controlling interest in the NOJ&GN and the Mississippi Central; however, before these lines could be integrated into the IC, they had to be converted to standard gauge. By 1905, McComb also boasted an icing plant used to produce ice for refrigerated boxcars.

The McComb depot was built by the IC in 1901 and is known as a "combination" depot since it included passenger and freight functions. Today, it contains a passenger waiting room and the McComb Railroad Museum. In Macomb, Miss., "Trains Matter."

OSHA Programs Now Updated

Over the last six months several Occupational Safety and Health Administration (OSHA) programs have been updated to reflect new regulatory requirements and incorporate Amtrak's Operations department reorganization.

The Hazard Communication program has been updated to reflect the new Global Harmonization System which includes updated labeling, and the inclusion of Safety Data Sheets. The Respiratory Protection Program has been updated to include revised processes, NRPC forms and appendices. And finally, the Confined Space Program has been updated to reflect revised regulatory language and updated NRPC forms.

Please take a few minutes to follow the link to the Safety Resource Library to review and print these revised programs:

<http://wiki.corp.nrpc/display/SAFETY/Safety+Resource+Library>

There is also a Safety Bulletin at the following link that provides contact information if you have any questions or comments on the revised programs:

<http://wiki.corp.nrpc/display/SAFETY/Alerts+and+Bulletins>

National Train Day Celebration Station...

As the former capital of the Spanish province of Texas, San Antonio possesses a vibrant history and culture. The city was founded in 1718 by Father Antonio Olivares, who established the Mission San Antonio de Valero, better known as the "Alamo." Following the Mexican-American War and the American Civil War, San Antonio found prosperity as a center of the regional cattle industry. Rail service began in February 1877, and more than 8,000 people turned out to welcome the arrival of the Galveston, Harrisburg and San Antonio Railroad. The city soon became an important crossroads for numerous lines, including the Southern Pacific (SP), Missouri Pacific, Texas & Pacific, and Missouri Kansas Texas Railway.

Today, Amtrak uses a facility adjacent to the SP's famed Sunset Station, considered one of the most impressive in the South. Opened in 1903, it includes broad, unadorned stucco walls, an arcade and low-pitched clay tile roofs. Early visitors marveled at its many electric lights, giving it the nickname of "Building of 1,000 Lights." In 1972, it played a starring role in the film "The Getaway" with Steve McQueen and Ali McGraw. **In San Antonio, Texas, "Trains Matter."**

Editor's Note: Last week's National Train Day Celebration Station should have read Macomb, Miss.

Transit Benefit and Health Care Flexible Spending Account (FSA): Reminders for 2013 and 2014

Balances and Expenses from 2013

1. Transfer of Remaining 2013 Transit and Commuter

Balances Complete: Any remaining balance you had in your WageWorks account for Transit and Commuter Benefits has been transferred to the P&A Group. You can check your balance on the [P&A Group website \(www.padmin.com\)](http://www.padmin.com).

2. Deadline for Remaining 2013 Health Care FSA Expenses: If

you still have a balance in your 2013 Health Care Flexible Spending Account, the last date to incur eligible medical expenses was March 15, 2014. You must submit those expenses to WageWorks by April 15, 2014.

3. Eligible Expenses: Review the IRS list of eligible expenses in [Publication 502 \(www.irs.gov/publications/p502\)](http://www.irs.gov/publications/p502).

Using Your FSAs in 2014

1. Reimbursements for 2014: If you enrolled in a Health Care FSA or Limited Health Care FSA for 2014, you will use your P&A Group debit card for your eligible expenses or submit your expenses directly to the P&A Group. Remember, if you participate in a Consumer Directed Health Plan with a Health Savings Account for 2014 and also enrolled in a Limited Health Care FSA, your FSA is restricted to dental and vision expenses.

2. Transit Benefits for Metro's SmarTrip Card: If you live in the Washington, D.C., area and want your payroll contributions for 2014 to apply directly to an existing or new Metro SmarTrip card, you must provide your Metro SmarTrip card serial number to the P&A Group. This will ensure your payroll deductions are automatically applied to your Metro SmarTrip card.

3. Questions: Contact our New Administrator, P&A Group, at:

P&A Group Customer Service (Monday- Friday 8:30 a.m. – 8:00 p.m., ET) Phone: (800) 688-2611 or visit www.padmin.com.

Changes Coming for Child-Age Tickets

Effective **March 24, 2014**, the classification for the ages of children for Amtrak will change from 2-15 years of age to 2-12 years of age. Existing reservations made prior to March 24, 2014 will be honored at the current age; however if customers make changes they are subject to the policy in affect at the time of the new booking.

- This change will apply to all child passenger types, including those used for various membership discounts (such as AAA) and for other fares where there is a child half fare (disabled, mobility impaired, military, pass rider, etc.).
- The policy update does not affect Amtrak's unaccompanied minor policy; it remains the same.

No child 12 or under may travel unless accompanied by a passenger 18 years or older. Passengers between 13-15 years of age traveling alone must travel as full-fare unaccompanied minors.

All Aboard for National Train Day Volunteers!

National Train Day (NTD) will be on May 10 and celebrations will be held around the country. Especially important to the success at each celebration are our employee volunteers. This year, our goal is to increase employee participation by two percent over last year to a minimum of 525 employee volunteers. Our employee-only National Train Day website has just re-launched for 2014 and if you would like to volunteer, please visit TrainDay411.com and register. While on the site, be sure to see which co-workers were nominated and are featured as outstanding NTD volunteers. In addition, take the NTD Trivia Challenge for your chance to win exciting Amtrak-branded prizes, now through National Train Day.

Please note that National Train Day activities will be held on May 3 in Los Angeles, Huntington, W.Va., and in Toledo, Ohio.

Changes Coming to Student Discount Programs

Effective April 2, 2014, changes will be made to the International Student Identity Card (ISIC) and Student Advantage membership discount programs.

The rail fare discount will change from 15 percent to 10 percent.

This matches the membership discount for (American Automobile Association) AAA and National Association of Railroad Passengers (NARP), which is already 10 percent.

The discount may only be booked online at Amtrak.com or on the mobile application. It will no longer be available for booking by calling 800-USA-RAIL or by going to a ticket office. The requirement to book at least three days before travel remains in effect.

Reservations made April 1, 2014, or earlier will be priced at the 15 percent discount level. However, if the passenger makes changes to such reservations on April 2 or after, the reservation will reprice at the 10 percent discount level.

For more details visit the company Intranet > How We Work > Daily Advisories > March 2014.

National Train Day Celebration Station in the Spotlight...

Portland Union Station was completed in 1896 through a partnership between the Northern Pacific, Union Pacific and Southern Pacific railroads. The centerpiece of the Romanesque and Queen Anne style building is the soaring clock tower; the famous "Go by Train" and "Union Station" neon signs were added in 1948. In 1987, the Portland Development Commission purchased Union Station and an adjacent rail yard. Since then, the building has been renovated inside and out, while the old rail yard was transformed into a popular residential and commercial district.

Today, Union Station anchors one end of the busy downtown transit mall and contains a passenger waiting room, shops, restaurant and offices. In Portland, Ore., "Trains Matter."

www.GreatAmericanStations.com/Stations/PDX

Metrolink Contract Extended

After successfully operating Metrolink Commuter service for the past four years, effective July 1, 2014, our contract to supply train and engine (T&E) crews for Metrolink will be extended for an additional three years. Metrolink is the commuter rail system linking six southern California counties over a 512 mile route system. In addition, the system has seven service lines with 55 stations, operating 169 week day trains and 44,000 daily boardings.

"The extension of our T&E contract with Metrolink not only strengthens our position as an operator in Southern California, it also builds partnerships with the agency and host railroad over whose track we operate the *Pacific Surfliner*, Amtrak's second busiest corridor service, as well as operate some long-distance services," says Michael Chandler, deputy general manager, Southwest region. The contract extension provides employment for 175 Amtrak employees.

Changes to Auto Train Amenities

In an effort to be good stewards of the federal funding we receive to operate, a number of steps are being taken to eliminate losses in our Food and Beverage department over the next five years. Some of the changes being made to accomplish this include the discontinuation of select amenities offered on *Auto Train*.

Effective March 14, the Sleeping car lounge was removed from *Auto Train* and replaced with an additional Coach car to allow greater seating capacity for our passengers. Additionally, complimentary wine served with dinner was discontinued as well as the on-board wine and cheese tastings for Sleeping car passengers. Passengers will continue to receive all regular meals in the dining car at no additional charge, and passengers may purchase cheese and cracker trays and other snacks, as well as liquor, wine and beer, in the Lounge car.

Additional revenue enhancing changes are anticipated. For complete details visit <http://wiki.corp.nrpc/display/arw/Auto+Train+amenity+changes>.

Focusing on Mental Health Can Improve Your Quality of Life

Mental wellbeing plays a critical role in positioning each of us to fully enjoy our lives at work and home. In fact, when people focus on their mental health, they are better able to develop and maintain meaningful relationships, progress in their career, make good life choices, manage life's natural ups and downs and move toward their full potential. With that in mind, it is important for each of us to take steps to ensure that we are free from addictions, excessive stress and worry, depression, anxiety and other psychological problems. By making good mental health a priority, we can feel increased life satisfaction and more productive at work and home.

The good news is your Employee Assistance Program (EAP) can help! We are here to be a confidential partner as you explore ways to care for your psychological wellbeing. EAP is a free and confidential resource available to all employees and their immediate family members.

Your EAP Counselor is a phone call away! Washington, D.C., (202) 906-3447, Philadelphia (215) 349-1487, New York (212) 630-7655, Boston (617) 345-7738, Chicago (312) 544-5254, Los Angeles (213) 891-3438, Jacksonville (904) 766-5133. Visit the EAP Website at <http://wiki.intranet.nrpc/display/EAP/Home>.

Amtrak Supports Opening of New Shore Line East Westbrook, Conn., Station

On March 25, Amtrak's Deputy General Manager Fred Fournier and New England Superintendent Paul O'Mara joined Connecticut Department of Transportation Commissioner James Redeker, Westbrook First Selectman Noel Bishop and other members of the community to formally open the new \$14.4 million Westbrook, Conn., station serving Shore Line East customers. Amtrak has operated ConnDOT's Shore Line East commuter service since its inception in 1990. Amtrak's current contract with Shore Line East runs through 2016 and includes operational, mechanical and ticketing services. The combined access and commuter operations agreement generates approximately \$27 million in revenue annually for Amtrak. With over 640,000 annual Shore Line East riders system-wide, the new Westbrook Station provides for an additional connection point for commuters to access Amtrak's Northeast Corridor and New Haven-Hartford-Springfield line.

Update: Veterans Hiring Initiative

In 2013, Amtrak developed a veterans hiring initiative with the goal that 25 percent of all new hires be veterans by 2015. This initiative is part of the Talent and Technology objective that supports our Strategic Plan to develop, acquire and retain talent with the skills and tools needed to carry out our mission and veterans play a big part in Amtrak's recruitment goals. We value the leadership, reliability and high-tech skills veterans bring to Amtrak. Their ability to adapt to a dynamic environment, their dedication and focus to safety and their experience gained while on military duty directly contributes to meeting our company goals.

We are pleased to announce that through February 2014, almost 19 percent of all new hires are veterans. To reach our final goal, Human Capital has partnered with various veterans organizations such as Hiring Our Heroes, Recruit Military and Wounded Warriors to extend our hiring outreach. In September, two transportation-focused veterans hiring fairs are now being planned to take place in Philadelphia and Indianapolis in addition to the nearly 100 military career fairs that Amtrak will be attending throughout 2014-2015.

Amtrak's commitment to U.S. veterans begins with our current employees who have bravely served and continue to serve our country, and we will continue our focus on hiring veterans in the future.

Amtrak Southwest Marketing Supports Long-Distance Service

Fans of the Arizona Diamondbacks will notice a new marketing partner this year. For the first time, Amtrak Southwest Marketing has entered into a sponsorship relationship with the Arizona Diamondbacks in support of our *Southwest Chief*, *Sunset Limited* and *Texas Eagle* long-distance trains. Amtrak signage will be visible on televised games that are broadcast throughout Arizona and Western New Mexico. Sponsorship elements include:

- First and third base rotating digital ads: one inning every game throughout the season
- Rotating digital ads behind home plate and in suites during one game per home stand
- Eighty-one 30 second pre/in/post radio spots during the season.

On Track Discussions for Non-Agreement Employees Begin April 1

Rating Managers and their employees can start holding their On Track Discussions (formerly called "Mid-Year Reviews") on Tuesday, April 1. The deadline for holding these meetings is Friday, May 16.

The On Track Discussion is designed to review the employee's progress on the commitments they set earlier this year. My Commitments include SMART goals, core competencies, job accountabilities, and optional developmental goals. Teleconference webinars for all non-agreement employees and managers will be held throughout this period to review important developments (e.g., new information on the role of core competencies) and answer questions. Teleconference details will be in next *My CareerTrak Update* on April 1. Find additional information about the Performance Conversations process at

<http://wiki.corp.nrpc/display/HR/Performance+Conversations>.

Empire Builder to Operate on Modified Schedule

Effective April 15, *Empire Builder* trains will operate on a modified schedule, with most of the change affecting passengers between St. Paul, Minn., and Portland, Ore., or Seattle.

The eastbound *Empire Builder* trains leaving Seattle (Train 8) and Portland (Train 28) will originate three hours earlier than they do today. The trains are combined leaving Chicago and St. Paul (Trains 7/27) and are separated at Spokane, with about 90 minutes added to the current westbound schedules between St. Paul and Seattle or Portland. Schedules between St. Paul and Chicago are largely unchanged.

"We are working closely with BNSF Railway Co., which owns the tracks and controls the dispatching of the *Empire Builder* trains between St. Paul and the West Coast, in order to publish a schedule that accounts for the freight train congestion and the condition of the BNSF-owned infrastructure," said Jim Brzezinski, route director for the *Empire Builder*. "We will assess the ability of BNSF to dispatch the *Empire Builder* with better reliability on this schedule, with further schedule changes possible in June."

National Train Day Celebration Station in the Spotlight...

In 1791, the English founded a settlement on the St. Johns River at a spot where cattle could cross. In 1822, a year after Spain ceded Florida to the United States; the town was renamed for the first military governor, General Andrew Jackson. Hoping to boost trade and promote development, the state legislature chartered the Florida Atlantic and Gulf Central Railroad (GA&GC) in 1851. The first phase of the project—finished in 1860—connected the port of Jacksonville with inland Alligator Town, later known as Lake City. The GA&GC was extensively damaged during the Civil War and then changed hands several times until it became part of the Seaboard Air Line Railroad.

In the late 19th century, Jacksonville became a popular winter resort for the rich and famous, who arrived by steam boat and later by railroad. New York movie-makers also noticed the city's warm climate and exotic locale; more than 50 silent films were made in the area.

In [Jacksonville, Fla.](#), "Trains Matter."

New Report Highlights Importance of Northeast Corridor Rail Network to the U.S. Economy

The Northeast Corridor Infrastructure and Operations Advisory Committee released a new report today on the economic impact of the Northeast Corridor mainline, illustrating the importance of Amtrak services and infrastructure on the regional and national economy. *The Northeast Corridor and the American Economy* report details key economic, transportation and demographics trends determining that the Northeast Corridor rail network is vital economic engine contributing to the prosperity and mobility of the country.

Amtrak owns and maintains 363 miles of the 457-mile NEC rail network, stretching from Washington, D.C., to Boston, Mass., and connecting eight states and the District of Columbia. Its impact extends nationally and globally as it serves 750,000 daily commuters and intercity passengers, in addition to freight movement. It strengthens communities; alleviates traffic congestion; and brings people to jobs and recreation, clients to businesses and goods to market. A key report finding shows that NEC commuter passengers alone contribute about \$50 billion a year to the national economy and that a loss of the NEC for a single day would cost nearly \$100 million in transportation-related impacts and productivity losses.

The Northeast Corridor and the American Economy report was produced in response to a Congressional mandate established in the Passenger Rail Investment and Improvement Act of 2008, commonly referred to as PRIIA, which directs the NEC Commission to submit a report to Congress on the role of the NEC in supporting economic activity and opportunities for the NEC to enhance economic development. The full report can be accessed here: <http://www.nec-commission.com/reports/nec-and-american-economy/>.

Reminder: PSSA Nominations Being Accepted Through April 30

Nominations are currently being accepted for the 2014 President's Service and Safety Awards (PSSA) and we are excited to announce the addition of one new category to this year's awards. The Living our Values Award will recognize our employees for the outstanding ways that they exhibit Amtrak's core values of Commitment to Safety, Integrity, Spirit of Service, Desire to Improve, Respect, Entrepreneurial Spirit, Accountability, Humility and Forgiveness.

Don't delay – The PSSA nomination period runs through **Wednesday, April 30, 2014** and will not be extended beyond that date. Once the nomination period concludes, nominations will be reviewed for completeness and strength of information, so please make sure to make your nominations form as clear, concise and complete as possible.

Also, please remember to support the committee members as they work diligently to select this year's award recipients. We need everyone's help to ensure that we select the best of the best as 2014 President's Service and Safety Awards winners.

Winners will be selected in the fall and honored in November at a ceremony in Washington, D.C.

Nomination forms are posted on the Intranet and can be found in the Forms Library which is available by clicking "Library" then clicking "Forms." Questions can also be directed to committee members and/or 2014PSSA@amtrak.com.

Reminder: National Train Day Volunteers Still Needed!

National Train Day (NTD) will be on May 10 and celebrations will be held around the country. Especially important to the success at each celebration are our employee volunteers. Our employee-only National Train Day website has just re-launched for 2014 and if you would like to volunteer, please visit TrainDay411.com and register. While on the site, be sure to see which co-workers were nominated and are featured as outstanding NTD volunteers. In addition, take the NTD Trivia Challenge for your chance to win exciting Amtrak-branded prizes, now through National Train Day.

Please note that National Train Day activities will be held on May 3 in Los Angeles, Huntington, W.Va., and in Toledo, Ohio.

Make Everyday Earth Day

Earth Day, held annually on April 22, is a day filled with events to inspire environmental protection. Visit the [U.S. Environmental Protection Agency's Earth Day Take Action](http://www.epa.gov/earthday) website to find out what you can do to make every day Earth Day. You can find local opportunities to volunteer, read daily environmental tips and even pledge to commit five actions to help protect the environment.

National Train Day Celebration Station in the Spotlight...

Recently highlighted in *Architectural Digest*, Seattle King Street Station was constructed in 1906 by the Great Northern Railway. The distinctive clock tower, inspired by the bell tower on the Piazza San Marco in Venice, Italy is a Seattle landmark. Some of the station's most remarkable features include elaborate plasterwork, marble wainscot and mosaics. In the late 1960s the interior was modernized according to period tastes, which meant covering many of the decorative finishes. Cosmetic renovations and modernization of services began in 2003; three years later, the Seattle City Council formalized an agreement to purchase the station from the Burlington Northern Santa Fe Railway. The multi-year rehabilitation project included seismic retrofitting, installation of sustainable systems such as geothermal wells and restoration of the station's grand public spaces.

Today, the station is a crossroads for important downtown neighborhoods, including the Commercial, International, and Stadium Districts, as well as world-renowned Pioneer Square. [*"In Seattle, 'Trains Matter.'"*](#)

Reminder: On Track Discussions (Formerly called “Mid-Year Reviews”) are Underway Now Through May 16

It's time for rating managers and their employees to start holding their On Track Discussions (formerly called “Mid-Year Reviews”). The deadline for holding these meetings is Friday, May 16.

The On Track Discussion is designed to review the employee's progress on the commitments they set earlier this year. My Commitments include SMART goals, core competencies, job accountabilities and optional developmental goals. Webinars for all non-agreement employees and managers will be held throughout this period to review the process, introduce new information on the role of core competencies and answer questions.

For more information and details related to:

- The webinars (e.g., dates), visit the Performance Conversations page at <http://wiki.corp.nrpc/display/HR/Performance+Conversations>.
- Core Competencies and On Track Discussions (e.g., vignette illustrating how to frame the conversation) visit the Competencies Page at <http://wiki.corp.nrpc/display/HR/Competencies>.

All Aboard! Volunteers Needed for National Train Day

National Train is May 10. This year's theme is “Trains Matter” and celebrations will be held across the system. To ensure their success, volunteers are vital. To register as a volunteer at a National Train Day event near you, visit TrainDay411.com. All volunteers will receive a complimentary T-shirt and lunch.

Please note that NTD will be held on May 3 in Los Angeles, Toledo, Ohio and in Huntington, W.Va.

National Train Day Celebration Station in the Spotlight...

The area now occupied by Huntington was a natural resting point on the Ohio River for settlers moving westward over the Appalachian Mountains. Huntington, named after Collis P. Huntington, President of the Chesapeake and Ohio Railway (C&O), was founded in 1869 as the location for the railroad's westernmost terminal. In 1873, the first C&O locomotive steamed into town, completing a long-sought connection between the Atlantic Seaboard and the Ohio River Valley. With access to raw materials and strong transportation links, Huntington grew into a manufacturing hub. Rail car construction, steel production and coal transport were supplemented by glass-making, nickel production and other industries.

[In Huntington, W. Va., Trains Matter!](#)

Enhanced Consumer Security on Amtrak.com

On April 13, Amtrak and Cardinal Commerce partnered to provide consumer authentication services for Amtrak's online business, enhancing payment security for our passengers booking tickets on Amtrak.com. The service, 3D Secure, is more commonly marketed as “Verified by VISA” and “MasterCard Secure Code” and will screen Visa and MasterCard sales on Amtrak.com, removing the responsibility of any fraud losses on those transactions from Amtrak.com. The checkout for consumers may look a little different, but their transactions will be much more secure. Currently, the majority of Amtrak.com ticket revenue is charged through VISA and MasterCard.

By incorporating the consumer authentication service into our online ticket purchases, we will realize increased sales through a reduced amount of card declines by issuers and reduced chargebacks costs.

FY14-FY18 Strategic Plan

Our FY14-FY18 Strategic Plan is designed to guide us to where we are going as a corporation over the next several years. Our **Mission** is why we are here: “Delivering intercity transportation with superior safety, customer service and financial excellence.” Our **Vision** is what we want to be, and what we look like when we are successful: “Moving America where it wants to go.” Together, with common purpose and focused effort, we can make this vision a reality and become our customers' first choice for intercity passenger rail transportation.

To secure our standing as a national asset, our Strategic Plan focuses on three key themes and goals:

1. **Safety and Security:** Set the standard for safety and security in the transportation industry to ensure that every passenger and employee goes home injury-free every day.
2. **Customer Focus:** To acquire and retain the most satisfied customers of any travel company in the world.
3. **Financial Excellence:** To be profitable on an operating basis and be good stewards of capital in order to secure our long-term viability as a company.

In the coming months, we will be working to translate the Strategic Plan into specific objectives, measures and initiatives for your departments. In the meantime, read our [Strategic Plan, reference summary](#) and [frequently asked questions](#) to become familiar with the components of the plan. These materials can be found on the employee Intranet homepage under the “Strategic Plan” tab. If you have any questions regarding the Strategic Plan, please contact [Amtrak Strategic Plan@amtrak.com](mailto:AmtrakStrategicPlan@amtrak.com).

Earth Month: Disposing of Household Hazardous Waste

Unused household products such as paint, cleaners, oil, batteries and pesticides that may contain ingredients harmful to the environment are known as household hazardous waste (HHW). Products that contain potentially hazardous ingredients require special care when you dispose of them. Improper disposal of these wastes can pollute the environment and pose a threat to human health. Many communities in the United States offer a variety of options for conveniently and safely managing HHW. Check your municipal or county web pages or visit Earth911.com to find a drop off location near you.

April 21, 2014

Amtrak Strategic Plan FY14-FY18: Safety and Security Theme

Our Amtrak Strategic Plan is designed to make progress toward three strategic goals focused on three themes: **Safety and Security**, **Customer Focus** and **Financial Excellence**.

Safety and Security Goal:

"To set the standard for safety and security in the transportation industry to ensure that every passenger and employee goes home injury-free every day."

Our goal is that every Amtrak employee and every Amtrak passenger will go home at least as healthy, safe and secure as when they came to work or entered one of our stations, shops or offices. Our goal also extends to our neighbors, including those who live, work, travel or play near our right-of-way or any other Amtrak property. Progress towards our Safety and Security goal will be measured two ways:

- Safe-2-Safer Contact Rate and
- Passenger Injuries per hundred million passenger miles
(**NOTE:** *These measures have been refined from what was originally presented in the FY14-FY18 Strategic Plan*).

Among the achievements that show our commitment to safety is the expansion of the Safe-2-Safer program, which encourages us all to adopt safer behaviors and reduce the risk of injury across the system. Amtrak also plays a role with Operation Lifesaver, which works with railroads and communities to reduce collisions, injuries and fatalities at highway grade crossings.

Employees are encouraged to read our [Strategic Plan, reference summary](#) and [frequently asked questions](#) to become familiar with the components of the plan on the company Intranet homepage under the "Strategic Plan" tab. If you have any questions regarding the strategic plan, please contact [Amtrak Strategic Plan@amtrak.com](mailto:Amtrak.StrategicPlan@amtrak.com).

Drug & Alcohol Policy Reminder

Amtrak is a drug- and alcohol-free workplace and it is the responsibility of all employees to be knowledgeable about Amtrak's policy and procedures for maintaining a safe work environment for employees and our customers. Please read the following documents found on the company Intranet under Safety → Health → Health and Medical Services:

- Amtrak Drug and Alcohol Policy 7.3.0 and Guidelines
- 49 CFR Part 40 Procedures for Transportation
- 49 CFR Part 219 - Control of Alcohol and Drug Use (Federal Railroad Administration)
- 49 CFR Part 382- Controlled Substance (Federal Motor Carrier Safety Administration)
- Workplace Drug and Alcohol Testing Programs

In addition, Amtrak encourages employees to support the Drug Enforcement Administration's *National Prescription Drug Take-Back Day* on Saturday, April 26. On this day government, community, public health and law enforcement partners will work together to collect expired, unused and unwanted prescription drugs. To locate local community prescription drug collection sites, visit www.GetSmartAboutDrugs.com and click the "Got Drugs?" icon, or call 1-800-882-9539. The service is free and anonymous.

As a reminder, employees taking prescription medications that have the potential to interfere with the safe performance of their job duties must complete form NRPC 3133 "Authorization to Work with Medications," and submit it to Health Services Medical. For more information, call 215-728-2389 or leave a message on Health Services Drug and Alcohol Program's confidential Employee Hotline at 202-906-2255.

Customer Experience Delivery and Training Survey

Starting on April 23, all Amtrak employees will be invited to participate in our *Customer Experience Delivery and Training Survey*.

Your feedback to this questionnaire is vital and strongly encouraged, and will be instrumental in cultivating improvements to the Amtrak customer experience as well as employee training programs.

All individual survey responses will be confidential. To ensure your anonymity, your completed survey will be mailed directly to WBA Research, an independent market research firm. WBA Research will not share your answers with anyone at Amtrak, and will only report on unidentifiable results for total employees and groups of 30 or more. Active full-time and part-time Amtrak employees are urged to participate in the following ways:

- **Agreement employees** will be mailed a survey packet to their homes, which will include a paper copy of the questionnaire and a pre-addressed return envelope. The return envelope indicates that postage is pre-paid, and employees will not incur any postage costs.
- **Non-agreement employees** will be emailed a website link at their work email address to complete the survey online. The email will originate from "Amtrak and WBA Research" / invite@survey.wbanda.com, and will have "Amtrak Customer Experience Delivery and Training Survey" in the subject line.

"This survey is very important in supporting Amtrak's Customer Focus strategic goal because it offers employees a unique opportunity to provide critical insights on improving the customer experience and customer service training programs" says Tom Hall, Amtrak chief of Customer Service.

All survey responses are due by May 12.

Northeast Earth Day Celebrations

Amtrak is receiving the benefit of a Diesel Emissions Reduction Act (DERA) grant. Awarded through the Environmental Protection Agency (EPA) National Clean Diesel Funding Assistance Program, the award is being used to replace the existing diesel engines in two switcher locomotives with GenSet engines for use at our Washington, D.C. (Ivy City) yard. This effort is a partnership with the Metropolitan Washington Council of Governments (MWCOC) and the Brotherhood of Locomotive Engineers and Trainmen / District of Columbia – State Legislative Board (BLET / DCSLB) and represents a labor, management and regional neighborhood collaboration supporting local and regional air quality and environmental sustainability. GenSet engines are also in use in California and Illinois.

To celebrate this new technology, an event will be held on Earth Day, April 22. The event will start at 11:00 a.m. in the Starlight Room of Washington Union station. Once invited speakers have finished their remarks, attendees will be escorted out to Track 17 for a photo opportunity with the new engine. In addition, an Earth Day Fair will be held in the station from 9:00 a.m. – 3:00 p.m.

At our Philadelphia 30th Street Station, the fourth annual Earth Day Fair is also scheduled for April 22. Through a partnership with the EPA, the fair has grown exponentially and this year will include over 50 tables staffed by representatives from various organizations including the Sustainable Business Network, Green Roof Works, Clean Air Council, the Red Cross and Zip Car. The event will run from 9:00 a.m. to 2:00 p.m., and is open to the public and to all employees.

Through our sponsorship and participation in events such as these, Amtrak demonstrates that as a corporation we are responsive to the environmental issues and concerns that are important to our passengers, employees and the public.

AirTrain Newark Service to be suspended for Repairs

Effective May 1 and continuing through mid-summer, rail service to and from Newark Liberty International Airport station (EWR) will be suspended to allow the Port Authority of New York and New Jersey to perform critical repair work to AirTrain, which links the rail station to the airport. Substitute shuttle bus service will be available in both directions between Newark Penn Station (NWK) and the airport.

Passengers should utilize the normal booking methods (Amtrak.com, Quik-Trak, Amtrak mobile app, etc.) to and from EWR. For passengers going to the airport, the system will indicate rail travel to Newark Penn station and a connecting service to the airport. For passengers leaving the airport, the system will indicate connecting service from the airport to Newark Penn station and rail service to their destination.

Amtrak passengers traveling to the airport will detrain at Newark Penn Station, where Port Authority shuttle buses will provide service from the station to each airport terminal. Shuttle service will be free of charge to passengers who present the bus driver with a ticket/travel document designating travel to Newark Liberty International Airport (EWR).

Amtrak passengers at the airport will board Port Authority shuttle buses to Newark Penn station, where they may board the train. Shuttle service will be free of charge to passengers who present the bus driver with an Amtrak ticket/travel document designating travel from the airport to Newark Penn station. Passengers may board any available shuttle bus and will not need to wait for the scheduled departure printed on their ticket. Personnel and signage will be available at Newark Penn station and at the airport to provide assistance and direction.

Passengers may also purchase shuttle bus tickets at New Jersey Transit ticket vending machines located at NWK and at each airport terminal.

Reminder: Send in your PSSA Nomination Submissions

The 2014 President's Service and Safety Award (PSSA) nomination period runs through **Wednesday, April 30**, and will not be extended.

Nomination forms are posted on the Intranet and can be found in the Forms Library which is available by clicking "Library" then clicking "Forms." Questions can also be directed to committee members and/or 2014PSSA@amtrak.com.

Reminder: On Track Discussions for Non-Agreement Employees

Rating managers and their employees should be scheduling their On Track Discussions (formerly called "Mid-Year Reviews"). The deadline for holding these meetings is Friday, May 16. Information about the Performance Conversation process can be found [here](#).

Amtrak's Drug & Alcohol Policy Expanded to Non-Agreement Employees

Recently, it was announced that Amtrak's Drug and Alcohol Policy will expand the random drug testing program to cover non-agreement employees in "safety sensitive" positions. An email was sent to all non-agreement employees on April 15. If you are a non-agreement employee and did not receive the email, please contact the Health Services group at HSDA@amtrak.com. More information will be forthcoming.

National Train Day News

In celebration of National Train Day, Amtrak employees can register to receive a free copy of 'Train Simulator 2014 – Amtrak Edition', courtesy of Dovetail Games! Visit dovetailgames.com and register at www.train-simulator.com/amtrak. To volunteer at a National Train Day event near you, register at trainday411.com.

Update: Strategic Incentive Plan

In FY13, a Strategic Incentive Plan was introduced to non-agreement employees. The program allows for defined short-term incentive awards (STI) based on our corporate objectives with a financial metric set by our board of directors to reduce our operating loss. For FY14, funding will only be available if we achieve our goal of reducing the net operating loss to the \$305 million financial target.

Through the first six months of the fiscal year (October – March), actual results are significantly ahead of the operating loss target. The operating loss target through March is \$160 million, but the actual loss through March is \$113 million. This means that Amtrak has achieved a loss that is \$47 million better than the mid-year target – an impressive 29 percent favorable performance.

While ticket revenue has come in less than expected due to lower ridership, increased reimbursable revenue has helped offset the shortfall. Expenses have been favorable due to strong management of benefit costs, lower host railroad incentive fee payments for Amtrak (due to poor host railroad on-time performance), and lower than expected fuel prices.

Despite the very favorable first half performance by the organization, the operating and corporate budget analysts in the organization have submitted an aggregate forecast that produces a year-end adjusted loss of \$318 million. This loss is \$13 million over the STI target of \$305 million. If that occurs, there will be no STI bonus payment.

For the remainder of the year, all employees need to focus on their individual and team objectives, continue to eliminate unnecessary costs, seek ways to operate more efficiently and support those who face the customers to help them improve customer service. If no action is taken by individuals and departments, Amtrak's second half operating loss (April – September) is projected to be nearly twice that of the first half (an 81 percent increase).

Together, we can continue on the same track we've established through March and not give back the hard earned gains we've achieved year-to-date.

Amtrak Supports See Tracks? Think Train! Safety Campaign

Amtrak has joined Operation Lifesaver Inc. (OLI), the Association of American Railroads and other railroads in raising awareness about safety near railroad tracks through *See Tracks? Think Train!*, a national campaign seeking to educate the public about the deadly consequences of trespassing on railroad property and failure to obey grade crossings signs and signals. *See Tracks? Think Train!* was triggered in part by increases in trespassing and grade crossing deaths and injuries along railroad rights-of-way. According to the Federal Railroad Administration (FRA), a person or vehicle is hit by a train every three hours.

"Education and outreach are critical in helping the public understand the importance of railroad safety," said Amtrak Chief Safety Officer Michael Logue. "Amtrak is more than a railroad. We're responsible each day for moving thousands of people around the U.S. If we fail to accomplish this mission, nothing else matters. This campaign is 100 percent aligned with our No. 1 priority; safety."

According to OLI, *See Tracks? Think Train!* highlights common risks drivers and pedestrians take each day, such as trying to beat a train at a grade crossing or trespassing on railroad property. Pedestrians and drivers often do not realize how dangerous it is to walk on or near railroad tracks, or how long it takes the average train to stop. It can take a mile or more for a fully loaded freight train to come to a full stop, making it difficult for railroad engineers to avoid collisions in emergency situations.

Amtrak is one of several partners with OLI, a national, non-profit safety education group working to eliminate deaths and injuries at railroad crossings and along railroad rights of way. The organization has programs in all 50 states, and has trained volunteers who provide free safety presentations to community groups, school bus operators, truckers and student drivers to raise awareness of the dangers around railroad tracks and trains.

Amtrak Labor & Employment Law Newsletter Now Available

The latest edition of the Amtrak Labor & Employment Law Newsletter, "On the Right Track," is now available. You can find this and past editions of the newsletter under Law Department publications on the Law Department Intranet page, located under the How We Work tab on the main Amtrak Intranet page. Items in this issue include:

- What does the Windsor decision mean for employees at Amtrak with a same-sex spouse?
- Even when "lifting" is traditionally required for a job, it may not be an essential job function
- Domestic violence leave in New Jersey
- Employees can challenge employment actions under grievance procedures as well as under FRSA
- Medical conditions that are episodic and mostly under control may be disabilities under the ADA
- Can employers enforce conflict of interest rules that cover an employee's spouse even in states where marital status discrimination is prohibited?

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter.

Carry-on Pet Pilot Program Begins in Illinois

Effective today, May 5, Amtrak and the Illinois Department of Transportation will launch a Carry-on Pet pilot program, welcoming pet dogs and cats aboard the *Illinois Zephyr* and *Carl Sandburg* between Chicago and Quincy, Illinois.

Passengers must begin the first leg of their trip in Chicago, Naperville or Galesburg. Advance reservations are required and a surcharge of \$25.00 will be assessed for each travel segment. Pets will be accepted in carriers no larger than 19"L x 14"W x 10.5"H, and the maximum weight of the pet and carrier is 20 pounds. The carrier must be placed under the seat of the pet owner, and pets must remain in their carriers at all times. No more than four pets are reserved per train, and only one pet per passenger is allowed. One pet car will be designated on each train.

Trains 380-383 operate to and from Chicago, LaGrange, Naperville, Plano, Mendota, Princeton, Kewanee, Galesburg, Macomb and Quincy, Ill. The pilot program is scheduled to be continuously reviewed and end in November, 2014. The policy for service animals on trains remains unchanged. Other restrictions apply. The complete policy is available at <http://www.amtrak.com/carry-on-pet-pilot>.

Reminder: Amtrak Information Security Awareness Training

The 2014 Amtrak Information Security Awareness training is available via the Training section of the Employee Information Portal. **This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account.** The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed annually. For additional information and instructions please visit: <http://wiki.corp.nrpc/download/attachments/5591/FAQ+SecAwarenessC BT+2012.pdf?version=3>

Employee Appreciation at Amtrak

As a company, Amtrak appreciates the hard work and dedication of our employees every day. Recognizing that each department has its own high volume times, this year, instead of selecting one specific day of celebration for the entire company, we are asking team leaders to select a day between Aug. 1 and Sept. 30 that works best as an employee appreciation day for their work unit/facility. More information will be forthcoming about Employee Appreciation celebrations as we get closer to August.

In addition, as part of Human Capital's commitment to employee recognition, greeting cards have been developed for supervisors and managers to use to say "thank you" or "good job" to an employee who has pitched in on a project, had a great idea for improving work processes, went beyond the call of duty to be helpful to a customer or demonstrated that he/she is living our corporate values. There are 20 different varieties of cards, including one to welcome aboard new employees. All cards have the Amtrak logo printed on them. Managers and supervisors can order greeting cards through the Western Folder catalog in eTrax. To view the cards visit <http://wiki.corp.nrpc/display/HR/Employee+Relations>.

Amtrak Strategic Plan FY14-FY18 – Customer Focus Theme

Our Amtrak Strategic Plan is designed to make progress toward our three strategic goals focused on three themes: Safety and Security, Customer Focus and Financial Excellence

Customer Focus Goal:

"To acquire and retain the most satisfied customers of any travel company in the world."

To achieve our customer focus goal, we need to develop a culture aligned around meeting and exceeding customers' needs and expectations. If you work at Amtrak, you serve the customer or serve Amtrak colleagues who serve the customer. Ultimately, our ability to satisfy our customers will affect our ability to achieve our financial targets.

In support of our Strategic Plan, various efforts to improve our customers' experience and demand for our services are underway. We want to know what you think about the current state of our customer focus so distribution of a confidential Customer Experience Delivery and Training Survey to all employees began on April 23. The feedback collected from this survey will be instrumental in making and monitoring improvements to the Amtrak customer experience as well as employee training programs. The survey responses are due by May 12.

Employees are encouraged to read our [Strategic Plan, reference summary](#) and [frequently asked questions](#) to become familiar with the components of the plan in the Intranet homepage under the Strategic Plan tab. If you have any questions regarding the Strategic Plan, please contact Amtrak.StrategicPlan@amtrak.com.

Discount Admission Tickets Available to Streamliner at Spencer

From May 29-June 1, employees attending the [Streamliner at Spencer](#) event at the N.C. Transportation Museum can save \$5.00 off the price of admission of up to four tickets.

The Amtrak employee discount code for the Streamliner at Spencer event is Amtrak14. This code needs to be entered in the "Offer Code" box, followed by a valid email address. The discount is valid on day passes, night photo passes or the preview day passes. It is not valid for the Celebration at the Station dinner.

Amtrak employees can also call for tickets at (704) 636.2889, ext. 237 or 257. *Please note:* Tickets will not be mailed. Employees will receive a confirmation email, which will be used when picking up their lanyard/tickets at the on-site Will Call booth. When picking up tickets, Amtrak employees will need to show a valid Amtrak id card.

Amtrak Strategic Plan FY14-FY18 – Financial Excellence Theme

Our Amtrak Strategic Plan is designed to make progress toward three strategic goals focused on three themes: Safety and Security, Customer Focus and Financial Excellence.

Financial Excellence Goal:

"To be profitable on an operating basis and be good stewards of capital in order to secure our long-term viability as a company."

This means that we will seek to make an operating profit. Our goal is that revenues we receive from those who pay to ride our trains, those who pay us for transportation services and from other businesses to which we provide support, will exceed our operating cost and those operating profits will contribute to meeting Amtrak's capital investment requirements.

How each of us works every day affects our financial results. Perhaps you are thinking, "What can I do to affect the bottom line?" We can all look around us to see how we can focus on our individual and team objectives, continue to eliminate unnecessary costs and seek ways to operate more efficiently.

Progress towards our Financial Excellence goal will be measured two ways:

- 1) Operating ratio – which is our operating cost divided by our operating revenues.
- 2) Adjusted net income or loss – our bottom line results.

Employees are encouraged to read our [Strategic Plan, reference summary](#) and [frequently asked questions](#) to become familiar with the components of the plan on the Intranet homepage under the Strategic Plan tab. If you have any questions regarding the Strategic Plan, please contact Amtrak.StrategicPlan@amtrak.com.

New Interview System to Begin

Human Capital is pleased to announce that Amtrak will be adopting a new interviewing system called Targeted Selection.

Targeted Selection is a comprehensive, proven and accurate behavior-based interviewing system that will standardize and improve the way we conduct our hiring process. The benefits of the Targeted Selection interviewing system are:

- Provides a more structured, efficient and consistent process allowing hiring managers to make better hiring decisions.
- Increases the hiring manager's interviewing skills and confidence through the use of a consistent and targeted hiring process; asking behavioral based questions and using the Situation Task Action Result (STAR) concept to ensure that we obtain complete and objective job-relevant information.
- Increases job acceptance rates.
- Improves employee morale by hiring the right person, for the right job.
- Provides hiring managers with the security and ability to interview confidently, while gathering data that predicts future job performance.

Targeted Selection training will begin in June with an initial group of hiring managers to be selected for the 7.5 hours Targeted Selection training. These hiring managers will receive a notification from their management informing them of where and when to attend, and how to enroll. Future classes will include additional hiring managers and others involved in the hiring process. The enrollments will be through an open enrollment process, with similar enrollment information.

National Train Day Celebrated Across the Country

This past weekend, 313 communities in 50 states and the District of Columbia held activities celebrating the seventh annual National Train Day (NTD). Repeating last year's theme, "Trains Matter," the events championed the importance of trains - freight, commuter and long-distance passenger service - across the country.

This year, three National Train Day celebrations were held on May 3 in Los Angeles, Toledo and in Huntington, West Virginia. The Los Angeles event coincided with the 75th anniversary of Los Angeles Union Station where Metro, Metrolink and Amtrak California partnered for the celebration. Attendees were entertained by Choo Choo Bob, the Ladd McIntosh Swing Orchestra and the Los Angeles Muses among others. At the station, our Veterans' Locomotive was available for photo opportunities as was the 7.5 foot Times Square Kissing Statue, which honors the men and women of the armed forces who achieved victory in World War II. In that era, Union Station and trains played a major role in moving troops across the country. In Toledo, attendees were treated to the music of "Cannonball" Paul, the crooning conductor, and his sidekick "Carolina Red." The pair sang and played railroad favorites including the Wabash Cannonball, The Rock Island Line, Casey Jones, and Night Train to Memphis. In Huntington, visitors were serenaded by an acappella trio. At all three locations, train enthusiasts were given the opportunity to view Amtrak railcars as well as privately owned luxury train and/or freight cars.

On May 10, the rest of the country held NTD celebrations. Highlights this year included short excursion rides for attendees in Washington, D.C., Chicago and in Rutland, Vermont. At 17 event celebrations including San Antonio, Kansas City, Jacksonville, St. Paul and Emeryville, attendees enjoyed touring Amtrak train equipment. In Philadelphia, our Track Geometry car which measures track alignment was on display as was our Catenary Geometry car which contains scientific instruments that measure the height and alignment of the overhead catenary wire that provides power to electric trains. In Longview, Texas, the Amtrak Exhibit Train was available for tours and complemented the dedication of the newly remodeled multi-modal station. At 17 NTD celebrations, a local or state dignitary was on site to kick-off their community's event.

This year's NTD partners included Operation Lifesaver that promoted its new "See Tracks? Think Train" campaign. Amtrak Vacations offered a rare look at historic and unique rail train equipment and Chuggington Depot featured arts and crafts for children. In addition, Dovetail Games offered a free download of the Amtrak *Pacific Surfliner* version of the hit game "Train Simulator 2014". Amtrak employees can receive their free download through June 1 at dovetailgames.com and register at www.train-simulator.com/amtrak.

From our smallest depots to our largest city stations, especially important at each celebration was our employee volunteers. This year, over 500 employees volunteered. Thank you to everyone that made this year's National Train Day a huge success and for representing Amtrak as only you can, as proud employees, and it showed.

New Leave Management Resources Available on the Intranet

The Human Capital Employee Service Center (ESC) Leave Management Team has been working diligently to create process improvements that will allow us to "Put the Customer First". With that in mind, the ESC team has recently developed and published **Leave Management Frequently Asked Questions** on the dedicated Intranet page along with links to the Railroad Retirement Board (RRB) and Department of Labor websites. These resources have been provided proactively to inform employees and managers of their rights and responsibilities under the FMLA and Amtrak leave policies.

To view the newly created documents, please follow the link below: <http://wiki.corp.nrpc/display/HR/HCESC+Leave+Management+Administration>

May 19, 2014

Amtrak Police Office of the Year Announced

Amtrak Police Department (APD) Officer Eric Taveras from the APD New York Division's Criminal Investigation Unit has been named APD Officer of the Year for 2013.

"Officer Taveras was chosen for this prestigious award for his significant contributions in protecting the Amtrak community," said Chief of Police Polly Hanson. "His persistence and unwavering professionalism is worthy of recognition, and we are honored to present him with this award."

Amtrak Chief of Police Polly Hanson, Amtrak Board of Directors Member Albert DiClemente and Amtrak President and CEO Joe Boardman presented the award to Officer Taveras for his significant contributions which include 18 background investigations, acting as primary investigator on 18 criminal cases and participating in the execution of three search warrants.

In August 2013, Officer Taveras initiated a credit card fraud/identity theft investigation involving the fraudulent purchase of Amtrak tickets. Taveras and other officers made contact with the suspect who was traveling on board a train with a companion. During the investigation, it was determined that both parties knew that the tickets were purchased with an unauthorized credit card. The companion was also found to be in possession of credit card information of 15 other victims along with text messages implicating both in the crime. Both were arrested and charged accordingly.

In another case, the officers from the New York Command received information from the Massachusetts State Police that a violent fugitive was traveling aboard an Amtrak train from Massachusetts to New York with a final destination of Kissimmee, Florida. The suspect was wanted in connection to an attempted murder and 14 armed robberies of pharmaceutical stores of Oxycontin/Oxycodone pills with estimated value of over \$400,000. Officer Taveras located the suspect in the Amtrak waiting area where he and other officers confirmed his identity. Officer Taveras placed the suspect into custody and facilitated the investigation by participating with the Massachusetts State police in drafting subsequent warrants.

Officer Taveras has been employed with the Amtrak Police Department since 1996 and has worked in patrol and investigations. He was also awarded "Officer of the Month" for June and August in 2013.

Complimentary Newspapers to be Discontinued on all Long-Distance Trains

Effective June 9, all complimentary newspapers currently distributed to our long-distance sleeping car passengers will be discontinued, coinciding with the release of our new system timetable. An estimated cost saving of approximately \$282,000 (on an annualized basis) will be realized from this effort, supporting our Financial Excellence goal of reducing costs to improve the company's financial bottom line.

Lost Emails? Important Information Regarding your Amtrak Emails

Recently, our IT department began migrating to a new email system in order to improve performance, reduce operating costs and comply with Amtrak's Records Management Policy. Many Amtrak employees believe that they may have lost protected emails during the recent migration. This is not the case.

Please note that any email over 90 days old that was protected in one of the seven User Directed Archive (UDA) Retention folders gets automatically moved to the new Archival mailbox located on the left hand-side of your Outlook screen with the name (Archive – your_email@amtrak.com). You will need to open this new mailbox by clicking on the triangle next to it.

You protect your emails by moving them into the UDA folders or by applying the necessary policy as outlined in the email you received from the Email Migration Team once your migration was complete.

Remember, the 90 days delete rule is enforced every day; therefore any email that is not protected (moved over) will be permanently deleted once it becomes 90 days old.

New Public Arts Project Designed to Enhance the Northeast Corridor Landscape

Last week, the city of Philadelphia Mural Arts Program put the finishing touches on a public art project designed for Amtrak's Northeast Corridor. Created by critically acclaimed Berlin-based visual artist Katharina Grosse, *psychylustro* has transformed one of Philadelphia's major transportation thoroughfares with a series of seven bright, bold installations along the city's rail gateway between 30th Street and North Philadelphia stations.

This large-scale, site-specific public artwork, visible primarily to passengers on Amtrak (traveling between Philadelphia and New York), SEPTA Regional Rail (Chestnut Hill West and Trenton lines) and New Jersey Transit (Atlantic City line), is a temporary installation that will transform over time as the elements reclaim the space. The work unfolds in a series of seven passages — from vast, dramatic warehouse walls to small buildings and stretches of green spaces — meant to be framed through the windows of the moving train, creating a real-time landscape painting that explores shifting scale, perspective and the passage of time.

Of the project's unique title, Curator Elizabeth Thomas explains: "The title *psychylustro* combines ideas of the psyche and illumination to convey the work as a landscape of the mind. The project aims to frame viewers' railway journey and intensify the experience of their surroundings."

With nearly 34,000 daily viewers along that stretch of the Northeast Corridor, the installation is a portal for new audiences to experience contemporary art, transforming a routine train journey into a voyage of the imagination. This program is made possible by a cooperative effort with our NEC IID, Engineering, Real Estate, Corporate Communications and Legal departments. More information on the artwork is available at www.muralarts.org/katharinagrosse.

April Revenue Figures

Our April revenue figures have been tallied and for April FY14, ticket revenues of \$186.5 million were seven percent ahead of last year and one percent (+\$2.7 million) ahead of budget. Only a few smaller service disruptions impacted April's performance in comparison to previous months. Also, the Easter holiday travel period fell in both March and April last year, while this year the entire holiday travel period was in April.

For Amtrak FYTD14 (Oct. – April), ticket revenues of \$1.2 billion were five percent ahead of last year and down slightly, -0.9 percent of budget.

NEC Track Work to Begin

On June 2-20, track work is planned on the Northeast Corridor (NEC). This work will result in improving our on-time performance allowing for trains to travel along certain sections of the NEC at speeds of up to 125 mph.

To accommodate the needed work, slight schedule adjustments will be made. There is a minor change to one MARC midday train and no impact to Amtrak's weekend service. Scheduled changes include:

- *Acela Express* trains (2104, 2158, 2160, 2166 and 2170) will depart five minutes earlier from our WAS, BWI and BAL stations.

Amtrak is issuing targeted communications to notify customers who may be impacted by the earlier *Acela* departures.

In addition, throughout the summer, several southbound *Acela Express* and *Northeast Regional* trains will arrive in Washington D.C., up to 13 minutes later than the normal scheduled times.

Update: MERS in the News

Amtrak's task force on serious communicable diseases/pandemic flu follows developing diseases that could affect Amtrak's employees and passengers. Recently, there have been reported cases of Middle East Respiratory Syndrome (MERS) imported into the United States by travelers from the Middle East. This is a developing situation, and at present the CDC considers the risk of infection to the general population to be low.

MERS was first reported in Saudi Arabia in 2012. MERS is caused by a Coronavirus and is also named MERS-CoV. It can cause a viral respiratory illness that can develop into severe acute respiratory distress.

The Center of Disease Control (CDC) continues to closely monitor the MERS situation. Amtrak recommends that all employees follow the CDC suggested everyday preventative actions to protect themselves from respiratory illnesses:

- Wash your hands often with soap and water for 20 seconds, and help young children do the same. If soap and water are not available, use an approved hand sanitizer.
- Cover your nose and mouth with a tissue when you cough or sneeze then throw the tissue in the trash.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact, such as kissing, sharing cups, or sharing eating utensils, with sick people.
- Clean and disinfect frequently touched surfaces, such as toys and doorknobs.

Summer/Fall System Timetable to Take Effect

On June 9, the Summer/Fall Amtrak system timetable will be in effect. The cover of the new timetable features a dramatic photo of one of our new ACS-64 electric locomotive leading a southbound *Northeast Regional* train through Claymont, Delaware en route to Washington, D.C. The ACS-64 photo was taken by Gary Pancavage, director of Operations-High Speed Rail Mechanical, continuing our recent practice of featuring photos or artwork by Amtrak employees on the timetable cover.

The Summer/Fall system timetable highlights the *Empire Builder's* move from Midway Station to the newly restored Union Depot in St. Paul, and includes schedules for the new location. Also shown are seasonal summer weekend schedule adjustments to the *Pacific Surfliners* and the southbound *Ethan Allen* to accommodate traffic to racetracks at Del Mar, California and Saratoga Springs, New York.

The listing of Amtrak train and Thruway bus service locations that appears at the front of the system timetable has been streamlined, saving eight pages in the book. Supporting our [Strategic Plan](#) goal of Financial Excellence, this initiative will result in a total of 2.4 million less pages printed for the entire system timetable run. Each location now simply indicates station name, city code, timetable page and service symbols, with station address information no longer listed. The banner at the top of each page directs our customers to Amtrak.com for more complete station information.

Safe-2-Safer Video Wins Award

The third video in our Safe-2-Safer series, which focuses on controlling exposures to oneself and others, has won a 2013 Communicator Award in the employee communications category. It will join the other two statues awarded for the prior Safe-2-Safer videos. The video features Amtrak President and CEO Joe Boardman and a number of employees from around the country who spoke passionately about the Safe-2-Safer program.

In addition, GreatAmericanStations.com, has won a Communicator Award of Distinction under the website category for transportation. The website features information and statistics on all of our stations and is used as a reference tool for urban planners, architects and historians. It is especially useful for station revitalization projects. In addition, recently, eight new case studies were posted offering a quick "snapshot" of a station improvement project including: project overview, community benefits, keys to success, funding sources, and insight from project, municipal and civic leaders.

The Communicator Awards are sanctioned and judged by the International Academy of Visual Arts, an invitation-only group consisting of top-tier professionals from acclaimed media, communications, advertising, creative, and marketing firms. It honors the continued pursuit of excellence in communications. To view the video, visit the company Intranet or click here:

<http://wiki.corp.nrpc/display/SAFETY/Safe-2-Safer>

Amtrak Sponsors Pride Events

Volunteers Needed in Washington, D.C., and New York

For the fourth straight year, Amtrak will be a presenting sponsor of the Green Village at the **Capital Pride Festival**. The Capital Pride Festival is the largest annual one-day event held in Washington, D.C., and attracts over 150,000 festival visitors. This year, festival attendees will learn about energy-efficient travel and our sustainability efforts to preserve the environment. The Capital Pride Festival will take place on Sunday, June 8 on Pennsylvania Avenue, N.W., from noon - 7:00 p.m.

On June 29, Amtrak will be an official sponsor of **NYC PRIDE 2014**, one of the largest LGBT Pride events in the nation. NYC's PrideFest will take place on Sunday, June 29 on Hudson Street between Abingdon Square and West 14th Street from 11:00 a.m. - 6:00 p.m. Visitors stopping by the Amtrak booth will enjoy activities and games and receive Amtrak branded promotional materials while learning about Amtrak service to more than 500 destinations.

On June 20-22, Amtrak will be a corporate sponsor of the **Baltimore Pride** celebration, a program sponsored by the Gay & Lesbian Community Center of Baltimore. Attended annually by an estimated 25,000 people, each of the main three days of this Pride weekend sees a different event in a different area of Baltimore. For event details visit the Gay and Lesbian Visitor web page of the Baltimore Convention and Visitors Bureau at www.baltimore.org.

In the **Pacific Northwest**, Amtrak is a proud sponsor and member of the Greater Seattle Business Association (GSBA). Members can get 15 percent off travel to any Pride event in the region: Portland June 14-15, Seattle June 28-29 and Vancouver August 3.

In addition, Amtrak employees will volunteer at the GSBA booth and pass out Amtrak branded promotional items as well as promote Amtrak service to more than 500 destinations. Event attendees will also have the opportunity to win free round-trip travel to any Pride event in Vancouver, Seattle or Portland.

Successful events are due in large part to our employee volunteers. If you are interested in volunteering at the Washington, D.C., or New York events, please contact Ann Owens at owensa@amtrak.com or 202.906.4404- ATS 777.4404. Especially needed are volunteers for afternoon shifts.

Great Food, Vibrant Atmosphere and Fair Prices...

The energetic red and purple decor Amtrak used in the early 1970s is on full display in this refurbished Lunch Counter car, which was most likely purchased from the Santa Fe. A close look at the price board reveals that coffee cost \$0.10 and sodas were \$0.30.

<http://history.amtrak.com/archives/refurbished-lunch-counter-car-1970s>

Amtrak Employee Discounts Available for Summer Fun

As summer unfolds, vacation planning begins, and this year Amtrak employees can take advantage of discounted ticket admission to attractions from coast-to-coast.

On the east coast, Hershey Park is offering discounted admission for employees and their families. Located in Pennsylvania, take a sweet trip to this theme park featuring 12 roller coasters and over 65 rides and attractions including over 20 kiddie rides. Visit <https://tinyurl.com/amtrak2014> and use Promo Code 12321. In addition, Busch Gardens in Williamsburg, Virginia, Orlando and Tampa, Florida, are offering Amtrak employees reduced admission tickets.

Going to NY? Baseball fans can take in a New York Mets game at an Amtrak Employee Night at CitiField. Discounted packages are available on June 14, July 4 and Sept. 12. Details can be found at <http://www.mets.com/amtrak>

For employees living in or visiting California, discounted admission to LEGOLAND® is available. Once there, dip in the Lion Temple Wave Pool and explore the SEA LIFE® aquarium. Additional California attractions offering Amtrak employee discounted admission include Knott's Berry Farm, the Aquarium of the Pacific in Long Beach, Castle Park in Riverside and SeaWorld in San Diego. Check out the Employee Store> Theme Parks & Attractions on the company Intranet for details.

Employees looking to explore the Grand Canyon can take advantage of special pricing on the Grand Canyon Railway and Hotel. Enjoy a scenic round-trip excursion from Arizona or if you're taking a RV to get there, enjoy a 20 percent savings at the Grand Canyon Railway's RV park and hotel. For reservations call 1-866-422-9724 and use Promo Code CDAMTRAK.

If you're thinking about sailing the high seas, Carnival Cruise Lines offers Amtrak employees special rates throughout the year. Choose from 4, 5, 6, and 7 day getaways from close-to-home ports to the beautiful destinations on the Bahamas, Caribbean and Mexico. For information and reservations, call 1-800-557-0863 Ext. 82317.

For those looking to take a drive and in need a rental car, choose one to fit your needs at a discounted price from Budget, Enterprise, Hertz and National. In addition, discounted Zipcar memberships are available

Additional information on these and other discount offers for Amtrak employees can be found in the [Employee Store](#) on our company Intranet under Employees > Employee Store.

Reminder: Short Term Incentive Updates Available Monthly

Every month an update on the Short Term Incentive (STI) program for non-agreement employees is posted on the Amtrak Intranet. The STI consists of a financial goal and a performance goal. The most recent updates on performance against goals can be found on the right hand side of the homepage by clicking on "STI" and "CSI". Specifics about how the STI plan works can be found by clicking on Employees > Benefits/Total Rewards.

June 9, 2014

New Look for Amtrak This Week & Amtrak Ink

Amtrak employees will notice a new look and distribution channel for *Amtrak This Week* and *Amtrak Ink*. Effective today, both employee communication vehicles have been enhanced with a more engaging and easier to read design to include smartphones.

In addition, a downloadable and printable version of both publications are included in these designs allowing for posting on bulletin boards where needed.

Announcing the New Retirement Website

Recently, Retirement Programs launched the [Retirement Website](#) for both agreement and non-agreement employees. The Retirement Website is your one stop shop resource for up-to-date information, forms and tools to help ease the retirement transition and simplify the retirement process.

Did you know?

- "The average age annuity being paid by the Railroad Retirement Board (RRB) at the end of fiscal year 2013 to career rail employees was \$3,080 a month, and for all retired rail employees the average was \$2,450. The average age retirement benefit being paid under Social Security was over \$1,270 a month."
- "Spouse benefits averaged \$915 a month under railroad retirement compared to \$615 under Social Security."

Source: Railroad Retirement Information – U.S. Railroad Retirement Board

It's never too early to begin retirement planning. To learn more, access the Retirement Website by visiting the [Human Capital Management Intranet page](#) on your work desktop and click on "Retirement" under Quick Links or enter the site through your personal device at <https://VPN.Amtrak.com>.

Station in the Spotlight...

Every summer, [Winona, Minnesota](#) hosts the famous Great River Shakespeare Festival, which attracts fans of the Bard from around the country. Founded in 1851, this Mississippi River settlement quickly grew into a major trade hub for lumber and wheat. Waterways offered routes into the interior while new railroads filled in the gaps. Winona's industrial and commercial wealth gave birth to a flowering of the arts, whose gifts continue to embellish the city. The downtown contains acclaimed examples of Prairie School architecture, and the Minnesota Marine Art Museum's collection features works by Vincent van Gogh and Georgia O'Keeffe.

Network Access Control Program in Progress

Network Access Control (NAC) is a networking and security solution that our Information Technology (IT) department will be implementing in the next few weeks. NAC is an additional layer of security that is needed on the Amtrak network in order to ensure that there are no compromises or security breaches to our business or to our customers. This service platform will allow only Amtrak authorized staff, vendors and partners on the network in a controlled manner and will deny access to anyone who shouldn't be on the network.

For the last several months, Amtrak IT Network Services has been creating "Profiles" associated with machines attaching to the Amtrak Network. This action has been taken to identify the types and locations of machines, for the purpose of categorization of computing devices into respective Profile groupings, which ensure approved business and revenue network devices are allowed onto the Amtrak network. An example of "Profile Groups" includes desktop computers, wireless devices, PDAs and Quiktrak machines. If a device in use has not been profiled, it will not automatically be allowed onto the network. This could include such devices as personal IPADS or cell phones. Once the rollout begins there will be processes in place for adding these types of business related devices in the event they were not profiled.

This month, work will begin on a pilot deployment for activating NAC network and security controls to all devices that connect to the Amtrak Network. This initial deployment will occur for Amtrak IT employees located within the 10 G St., N.E., building in Washington, D.C. A planned activation rollout is being developed on a state-by-state, building-by-building basis throughout Amtrak. Additional information will follow as the NAC project is rolled out.

Reminder: Concur/Travel Leaders Booking Tool Begins Today

Effective today, June 9, Concur Travel will replace Trip Manager as the online booking tool for Amtrak business travelers and travel planners. The new tool is easy to use and in addition to enhanced features and services, provides an innovative mobile application for booking anytime or anywhere. Access to the new booking tool can be found in the Employee Information Portal on the company Intranet and employees must have a valid Amtrak email address to access the Amtrak Business eTravel site. Please note that some traveler profile information such as credit card numbers and loyalty program account numbers may have to be reentered and your default WBS element must be entered. All business travel air fares, including Southwest Airlines, will now be applied and purchased directly on the Amtrak company credit card already stored in the system.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

June 16, 2014

Sales Record – Amtrak.com generated **\$5,469,357** in sales on Monday, June 9, 2014, which now is the highest revenue day in the history of Amtrak.com. This performance was **\$32,643** or **0.6%** higher than the previous record of **\$5,436,714** set on Monday, December 9, 2013.

Empire Service Rails to Recovery Program Launches

Amtrak has partnered with the New York State Department of Transportation and Voices of Hope, to launch *Empire Service Rails to Recovery*, a new program that provides a “Buy One – Get One Free” discounted fare on Amtrak *Empire Service* trains operating in New York state. The discounted fare is available to those customers who are traveling specifically for treatments for a life-threatening illness.

Tickets can be obtained solely through the Voices of Hope website at www.voicesofthecapitalregion.org where customers will register for the discount with the appropriate participating member agency of Voices of Hope. Once completing the necessary registration, the customer is then automatically directed to Amtrak.com where their travel can be booked and they will automatically receive the discount.

This program is made possible by the collaborative efforts of Amtrak’s Sales and Marketing, Government Affairs and Ecommerce departments.

Temporary Adjustment to Personal Rail Pass Policy

Amtrak *Acela Express* Train 2158, regularly scheduled to depart Washington at 9:00 a.m., is currently departing at 8:55 a.m. due to track work. Amtrak employee personal rail pass riders will be allowed on this departure through July 14.

Call for Washington, D.C., Area Donations

The Amtrak Headquarters Employee Committee in collaboration with the United Services Organization (USO) will be assembling 500 care packages to send to U.S. service members overseas.

You can also support the troops by donating supplies to be placed in the bags such as trial-size toiletries through June 18. Washington, D.C. area drop off boxes are located on the third floor of 10 G Street N.E., the first floor of 60 Massachusetts Ave.,

N.E., the fourth floor of 40 Massachusetts Ave., N.E., and in the pantry at the REA building.

National Mall and Memorial Parks Partners with Amtrak Trails & Rails

For the past 14 years, Amtrak has partnered with the National Park Service (NPS) to offer innovative interpretive programs that connect people with natural and cultural resources in a non-traditional setting. The National Trails and Rails program reaches more than 600,000 passengers annually and consists of 19 Amtrak routes.

Recently, the National Mall and Memorial Parks, a unit of the NPS, developed a Trails & Rails program in which Washington, D.C., based Trails & Rails Guides ride select Amtrak *Northeast Regional* trains (typically trains 152 and 161) on Saturdays and Sundays between Washington and New York Penn Station. The guides promote and interact with Amtrak passengers about National Park Service sites along the Northeast Corridor (NEC). Armed with iPads and transportation apps, the guides can help provide passengers with travel information with regard to public transportation access from any Amtrak station along the NEC to national, state, local parks and other places of interest. The program encourages the use of Amtrak and public transportation as a green alternative to visit the parks.

The guides are located in the Café car and have maps and brochures on parks and places of interest. They are available to answer questions about specific areas or things of interest outside the train windows. The guides also periodically move about the train to see if passengers have any questions or need assistance.

This program began the week before the National Cherry Blossom Festival and ends the weekend after New Year’s Day. For more information about the Trails and Rails program [click here](#) or visit Amtrak.com.

Uniform Website Now Available

June 23, 2014

Uniformed employees in our Operations department now have another resource to learn about their uniform program - www.amtrakuniforms.com . Simply follow these

instructions to access the site:

- **Log-on** is the employee eight-digit SAP number
- **Password** is the employee's last name only (with initial capital letter),
- **Include** the employee's three-letter work location
- **Submit!**

This user-friendly website is designed to keep employees informed and up-to-date with sales, promotions and seasonal purchase reminders. On the left-hand side of the home page, employees can click on their appropriate uniformed craft to view required and optional components, available sizes, colors and pricing. Website tabs can help to answer frequently asked questions identify local uniform coordinators and provide sizing information.

Please remember: employees will still need to contact their local uniform coordinator to place a uniform order.

New Requirement for Commercial Vehicle Drivers (CDL and Non-CDL)

As of May 21, 2014, a new federal rule now requires that all commercial motor vehicle drivers' medical examinations must be performed by a National Registry of Certified Medical Examiners (NRCME) certified medical examiner. If the medical examiner finds that the person examined is physically qualified to operate a commercial motor vehicle in accordance with § 391.41(b), he or she must complete a certificate and include their national registry number. Medical examinations/certificates without this number are not acceptable. The original certificate is furnished to those examined before they leave the facility.

Please note: approved medical clinics may not have NRCME certified medical examiners on site at all times.

Since this is a new requirement, when a manager is scheduling a Department of Transportation / commercial motor vehicle exam at a medical clinic from the Amtrak approved clinic drop down box, please contact the clinic **prior** to scheduling the exam to ensure a NRCME certified medical examiner is available on site at the time of the appointment to complete the required certification.

Employee Retirement Website

The recently launched [Retirement Website](#) for both agreement and non-agreement employees is your one stop shop resource for up-to-date information, forms and tools to help ease the retirement transition and simplify the retirement process.

Here are the top five questions that future retirees are asking:

- What benefits can I expect from the U.S. Railroad Retirement Board?
- Am I eligible for a benefit under the Retirement Income Plan?
- Can I continue my medical coverage when I retire?
- What are my other retirement benefits?
- When do I apply for retirement and let my supervisor know my retirement date?

The resources located on the Retirement Website will help answer your questions and lead you on the path to making your retirement a reality. Visit the Retirement Website by visiting the [Human Capital Management Intranet page](#) on your work desktop and click on "Retirement" under Quick Links or enter the site through your personal device at <https://VPN.Amtrak.com>.

Reminder: Mandatory Information Security Awareness Training Needed Annually

The 2014 Amtrak Information Security Awareness training is available via the Training section of the Employee Information Portal. This is a mandatory course that is to be completed annually by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

For additional information and instructions please visit: <http://wiki.corp.nrpc/download/attachments/5591/FAQ+SecAwarenessCBT+2012.pdf?version=3>

Summer of '74... All eyes were on Spokane, Washington in the summer of 1974 as it hosted a popular world's fair. An Amtrak display, visited by more than one million people, included cut-aways of various train accommodations. Amtrak also introduced the *Expo '74* a daylight all-coach train between Seattle and Spokane that accommodated the crowds for the duration of the fair.

AMTRAK® THISWEEK

Amtrak Employee Nominated for Environmental Award

June 30, 2014

At Amtrak, we are involved and innovative whenever and wherever necessary to do our part to preserve our planet. It is one thing to provide energy efficient transportation, and quite another to help find 21st century solutions to our environmental needs.

Each year, the Association of American Railroads presents the John H. Chafee Environmental Excellence Award to a railroad employee who has demonstrated the highest level of environmental stewardship during the previous year. This year, we are proud that Bob Costello, plant manager of our Delaware mechanical shops, was nominated for the award for his environmental contributions towards operating a safe and environmentally responsible railroad.

Over his 37-year career at Amtrak, Bob created a training program requiring all facility employees to receive instruction in storm water spill management and spill prevention, control and countermeasure regardless of job requirements. Five years ago, Bob began evaluating environmental performance in yearly employee reviews—becoming the first Amtrak plant manager to do so. Recently, challenged with closing Wilmington's antiquated steam plant, Bob suggested installing individual heaters in each building, effectively retiring central steam operation to give Amtrak a combined fuel and labor savings of over \$3 million annually. Join us in congratulating Bob on his nomination.

Post-Fireworks Train 1776 to Run Between WAS-NYP

On July 4, Amtrak will be operating a special post-fireworks train to allow passengers who wish to attend the National Mall Independence

Day celebration an opportunity to catch a train home following the memorable fireworks display. *Northeast Regional* Train 1776 will depart from Washington Union Station at 11:05 p.m., and make normal stops en route to New York. To read the media advisory, [click here](#).

Reminder: Submit Your Amtrak ID Photo

All Amtrak employee and contractor identification badges will be updated for both security purposes and increased efficiency onboard our trains. To receive a new id badge, an updated photo is required. Please note that most smart phones can take acceptable passport quality photos. All photos should be emailed or texted to the Smart ID team at IDrefresh@amtrak.com by **July 15**. All emails should include SAP number and full name in the subject line. For complete details, visit the company Intranet > How We Work > Smart ID or [click here](#).

Wire Theft Prevention Tips

The theft of signal and catenary wire, as well as material along the right-of-way impacts Amtrak financially and can create hazards that may put our passengers and employees at risk. The Amtrak Police and Engineering departments partnered to produce a list of tips to help address the theft of these materials along the right-of-way:

- **Stapling Wire**-Neutral lead wire, traction return wire and series fouling wire should be stapled down to wooden ties, if available, making it more difficult to remove wire.
- **Ordering New Wire**-When ordering new wire, request manufacturers stamp "Property of Amtrak" on the insulation. Even if it is stripped off, remains of the insulation at a suspect's location can be valuable.
- **Dumpster Locations**-In areas where scrap wire is being stored in a dumpster, the dumpster should be located in a designated area that can be secured with high security fencing whenever possible.
- **Vandal Proof Locks**-All dumpsters that are used to store wire and other materials should be equipped with vandal proof locks.
- **Security Cameras**-To deter theft and assist in identifying potential suspects, security cameras should be installed in compounds where wire is being stored.
- **Conduct Frequent Inventories**-Conducting frequent inventories of material stored in compounds will assist in detecting theft and prevent loss.

If you observe suspicious activity, or suspicious behavior, please call the Amtrak Police Department at (800) 331-0008 or call 911.

Where are the Pretty Pictures?

Amtrak This Week's new format includes pictures and graphics to make it more visually interesting. If you're having difficulty seeing those images in Outlook, follow these steps to view them.

1. In an open message that was sent from that email address (ecom@amtrak.com) or domain (anything with @amtrak.com), right click on one of the blocked items.
2. Once the pop-up menu appears, click "**Add Sender to Safe Senders List**" (will only work for ecom@amtrak.com) or "**Add the Domain @amtrak.com**" to **Safe Senders List** (this will work for all emails sent from a @amtrak.com email address).

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

CSI- What is it?

At Amtrak, customer focus is a vital component of our Strategic Plan. Our Customer Focus goal is to acquire and retain the most satisfied customers of any travel company in the world.

We focus on building customer loyalty and repeat ridership to achieve this.

To keep focused on our goal, we use Customer Satisfaction Indexes (CSI) to measure our customers' perception of the service we provide. By surveying randomly selected Amtrak riders, we measure our customers' overall satisfaction, as well as specific service attributes such as information given about problems and delays, overall train cleanliness, friendliness/helpfulness of staff, and on-time performance on each route. By tracking changes in CSI scores over time, we can identify where we excel and where improvements are needed to enhance the customer experience. CSI improvement is indicative of improved customer satisfaction, which may lead to an increase in demand for our products and services.

We calculate CSI scores in a variety of ways, including an overall rating for the Amtrak system; average ratings for state-supported, long-distance and Northeast Corridor service scores; and ratings at the route level. Surveys ask riders to rate various service tributes on a 0 – 100 scale, with 100 being the best possible score. Passengers who rate their overall experience an 80 or higher are considered "very satisfied."

Our overall Amtrak CSI goal for FY14 is 84 percent. The score through April is 82 percent, which means that 82 percent of our surveyed customers were very satisfied with Amtrak. To view our most recent CSI scores and how we are tracking towards our fiscal year goal, visit the company Intranet and click on CSI in the [Tools and Performance Information window](#). Be sure to watch this space next week for strides being taken to increase CSI despite our recent challenges with on time performance.

B 12...Bingo!

In this photo taken in June, 1974, passengers enjoy playing Bingo in the Lounge car aboard the *Southwest Chief*. Though fashions may have changed, the popularity

of our long-distance Lounge cars remains a passenger favorite. See more retro photos from the [Documerica Project](#) on the National Archives website.

July 7, 2014

Amtrak Seeking New Acela Train Sets

With demand for high-speed rail service at record levels, Amtrak is moving to acquire new train sets to supplement and eventually replace our aging *Acela Express* equipment currently operating on the heavily-traveled Northeast Corridor (NEC).

In a Request for Proposals (RFP), Amtrak is seeking up to 28 next-generation high-speed train sets capable of meeting or exceeding current *Acela Express* trip times on the existing NEC infrastructure. The new equipment is intended to have 40 percent more seats per train than current train sets.

"The Northeast Corridor needs more high-speed rail capacity to help move the American economy forward," said President and CEO Joseph Boardman. "More and more people are choosing Amtrak for travel between Washington, New York and Boston. New equipment means more seats and more frequent departures to help meet that growing demand."

Amtrak's *Acela Express* service is as popular as ever. Ridership is up seven percent over last year and trains are often sold out, especially during peak periods. On 25 occasions so far in FY 2014, the number of daily trips on *Acela* topped 14,000. That's compared to only five such times in FY 2013 and is an indication of the value placed on the convenience and comfort of high-speed rail.

Current manufacturers of high-speed rail equipment, defined as manufacturers with equipment in commercial operation at speeds of at least 160 mph, will be eligible to submit bids.

Reminder: ID Photos Needed by July 15

All Amtrak employee and contractor identification badges will be updated for both security purposes and increased efficiency onboard our trains. If you haven't done so

already, please send your current photo via email or text to: IDrefresh@amtrak.com. You can use a digital camera or a personal phone. Please remember to include your SAP number and full name in the subject line. Badge distribution will begin in late summer and more information will be available shortly.

July 14, 2014

On-Time Performance: Controlling the Sometimes Uncontrollable

Running our railroad on time has been challenging in recent months, and especially so for our long-distance trains. Understandably, late trains are trying for our passengers as well as for our employees. As we strive to acquire and retain the most satisfied customers of any travel company in the world, late arrivals are often unavoidable and may result in dissatisfied passengers.

Last week in this column, we discussed the use of Customer Satisfaction Indexes (CSI) to chart our customer service performance. To measure CSI, passengers are selected at random to take the survey. These results provide an indication of where we excel and where improvements are needed to enhance the customer experience. Lately, one of the service attributes identified as a leader in customer dissatisfaction is on-time performance (OTP).

Recent CSI surveys reveal there are several attributes that, when proactively addressed, may lessen the dissatisfaction of passengers on board a delayed train. In some circumstances, these attributes have either helped increase the overall route CSI score or minimized the impact of lower customer satisfaction with OTP. Several of these attributes revolve around how we communicate with our passengers and include:

- Information given to passengers on board about problems and/or delays
- Clarity of announcements
- Friendliness/courteous manner of on-board crew

While numerous factors affect on-time performance, we have control in communicating with our passengers. To help keep passengers informed, several procedures are now being implemented.

For example, sometimes when there is a delay, the Conductor may find him/herself so engrossed in remedying the cause that pertinent information may not get communicated to our passengers or the other on-board crew members through no fault of his/her own. Car or Café Attendants who don't know what is causing a delay or when it might be resolved, have nothing to communicate to passengers. To help in these situations, plans are currently underway so that by mid-August, at least one other on-board employee on all trains will be provided with a cell phone that can receive the same operational alerts that the Conductors receive. That information can then be communicated to our passengers in a timely and consistent manner. Together, the on-board crew member teams are strengthened to ensure we take care of the passengers.

In those stations where people are waiting to board or pick up arriving passengers, station agents with email access have begun receiving emails when departure or arrival times change. In the future, our Station Ticketing and Reservation System (STARS) will be able to alert agents when trains are not on schedule. This will help to provide customers with better information and consistent status updates.

Communicating with our customers in a friendly and courteous manner helps lessen any potential negativity that a late train may invoke. By keeping our customers well informed, we help strengthen the overall customer experience and help strengthen overall customer satisfaction.

Introducing the Amtrak Culture Fit Assessment

Amtrak continues to improve the processes and tools we use to develop, hire and retain the best-qualified talent.

Later this month we will introduce the Amtrak **Culture Fit Assessment**, a tool that will help us evaluate how likely a job candidate will perform certain behaviors on the job that support the Amtrak culture: **being safe, providing excellent customer service, showing integrity and collaborating with others.**

When employees demonstrate the four behaviors measured by the **Culture Fit Assessment**, they bring to life our Core Values and enable Amtrak to achieve its Strategic Goals – the cornerstone of our organization's culture. Because the **Culture Fit Assessment** evaluates candidates on things that reflect our culture, candidates who do well are more likely demonstrate those behaviors and be a better fit with our culture than those who do poorly. This assessment, along with our other hiring tools such as technical aptitude tests and behavioral interviews, provide the insight we need to make hiring decisions that help move Amtrak forward.

About the Culture Fit Assessment

The assessment is web-based and will be given to internal and external candidates who apply for a job and meet that job's minimum qualifications. Specifically, the assessment will be given to (1) internal agreement-covered candidates who apply for a job that is being filled by Talent Acquisition (and therefore **does not** interfere with the established Bid and Bump process), (2) all internal non-agreement candidates and (3) all external candidates.

Introducing the Amtrak Culture Fit Assessment-continued

To learn more about the **Culture Fit Assessment**, please visit the "Human Capital Frequently Asked Questions" tab on the Human Capital Wiki site or email questions to HumanCapital@amtrak.com.

Snap, Submit, Update!

Current Smart IDs are set to begin expiring in January 2015 and will require updated photos. Please submit an updated photo of yourself **by tomorrow** to the Smart ID team in order to receive your new Smart ID. Simply snap a headshot, attach it to an email or text and submit it to the Smart ID team.

Submit your photo today to beat the **July 15** deadline and ensure continued access. The photo requirements are simple:

- All photos must have a white background and display a clear shot of the employee's/contractor's face (please no hats, sunglasses, etc.).
- Photos should include the full face view with a neutral facial expression and both eyes should be open.
- If you regularly wear glasses, please wear them in your photo.

All photos should be emailed or texted to the Smart ID team at IDrefresh@amtrak.com. In the subject line include your SAP number and your full name. Please submit photos by July 15.

Be sure to keep a look out for continued communication regarding the Smart ID rollout and distribution of the new badges.

As always, please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

**OPERATION
LIFESAVER[®]**
Rail Safety Education

Amtrak Operation Lifesaver Volunteers: Call for Photos!

Operation Lifesaver (OL) is the national non-profit organization created in 1972 to promote education, enforcement and engineering advancements designed to end collisions, deaths and injuries at highway-rail grade crossings and on rail property. Each year, through a network of Operation Lifesaver Authorized Volunteers (OLAVs) and trained instructors, presentations are delivered to more than one million people around the country. These presentations are made to school groups, driver education classes, community audiences, professional drivers, law enforcement officers and emergency responders.

Amtrak has a long history of collaborating with Operation Lifesaver. Dozens of Amtrak employees are already trained as OLAVs and have helped deliver Operation Lifesaver safety messages at special railroad events, internal and external training activities and presentations. Together, they have helped spread the word about trespassing and grade crossing safety.

Currently, we are in the process of updating the Operation Lifesaver portion of our company Intranet and we are in need of photos. If you are an Amtrak OLAV and would like to send a photograph of yourself participating in an OL presentation past or present, please send your photos to Barb Petito at petitob@Amtrak.com by Friday, August 29.

How to Receive Automatic Email Images

Amtrak This Week's new format includes pictures and graphics to make it more visually interesting.

To view the images in Outlook, follow these steps:

1. In an open message that was sent from that email address (ecom@amtrak.com) or domain (anything with @amtrak.com), right click on the phrase **Click here to download pictures**, located just above the **"FROM"** line of the email.
2. Once the pop-up menu appears, click **"Add Sender to Safe Senders List"** (will only work for ecom@amtrak.com) or **"Add the Domain @amtrak.com" to Safe Senders List** (this will work for all emails sent from an @amtrak.com email address).

Additional Thruway Bus Services Added

Effective July 14, multiple Amtrak Thruway bus routes went into service, providing increased connectivity for our passengers.

Amtrak Thruway Service	Amtrak Route
Williston - Billings - Bozeman - Butte - Missoula, Mont.	<i>Empire Builder</i>
Albuquerque - El Paso, Texas	<i>Southwest Chief</i>
Tuscaloosa - Selma - Mobile, Ala.	<i>Crescent</i>
New Orleans - Mobile - Montgomery, Ala.	<i>City of New Orleans</i>
Jackson, Miss. - Hattiesburg - Gulfport - Biloxi - Mobile, Ala.	<i>City of New Orleans</i>
Pittsburgh - Columbus, Ohio	<i>Capitol Limited, Pennsylvanian</i>

Amtrak Sponsors National Council of La Raza Conference

For the seventh straight year, Amtrak has supported the National Council of La Raza Annual (NCLR) Conference held this past weekend in Los Angeles. As a co-sponsor, an Amtrak booth was featured with family activities, including a prize wheel with giveaways, photos with a model Amtrak train and a bilingual conductor. This interactive booth provided entertainment for attendees as well as an opportunity to learn about Amtrak travel.

"This is one of Amtrak's most exciting partnerships," said Darlene Abubakar, senior director of National Advertising. "We understand the important connection with family and friends within the Latino community. Our partnership with NCLR provides a great opportunity for us to educate the community on the affordability of Amtrak travel and the wonderful services we offer to help stay connected. Thank you to our many employee volunteers who assisted at the conference and helped make our participation a success."

STI: June Financial Metrics Now Available

Every month, an update on the Short Term Incentive (STI) program for non-agreement employees is posted on the company intranet.

The STI consists of a financial goal and a performance goal. The financial goal is the adjusted operating loss of the company which can also be thought of as cash revenues minus cash expenses. The Board of Directors set the FY14 STI metric at \$305 million.

Through the first nine months of FY14 (October - June), actual results are significantly ahead of the adjusted operating loss target. The adjusted operating loss target through June is \$254 million, but the actual adjusted operating loss through June is \$153 million. This means that Amtrak has achieved a loss that is \$101 million better than the target - an impressive 40 percent favorable performance.

Due to the very favorable October through June performance, the operating and corporate budget analysts in the organization have submitted an aggregate forecast that produces a year-end adjusted loss of \$256 million. This loss is \$49 million under the STI target of \$305 million. If that occurs, participants would be eligible for an STI bonus payment. However, ultimately an STI bonus payment will be at the Board's determination and approval.

Specifics about how the STI plan works can be found on the [company intranet](#) by clicking on Employees >Benefits/Total Rewards. The most recent updates on performance against goals can be found on the right hand side of the homepage by clicking on "STI" and "CSI".

Carry-on Pet Pilot Expanded in Illinois

Last May, Amtrak and the Illinois Department of Transportation launched a Carry-on Pet pilot program, welcoming pet dogs and cats aboard the *Illinois Zephyr* and *Carl Sandburg* between

Chicago and Quincy, Illinois. To allow for further testing and customer feedback, the pilot program has now been extended through Sunday, April 26, 2015.

Recently, the Illinois Department of Transportation has requested that Amtrak start a Carry-on Pet pilot program on the Chicago-Carbondale corridor (*Saluki* service trains 390/391 and *Illini* service trains 392/393). This pilot program is valid for reservations August 4, 2014 – April 26, 2015 and valid for travel August 11, 2014 - April 26, 2015. View the complete policy at <http://www.amtrak.com/carry-on-pet-pilot>.

Employee Appreciation Day

Employee Appreciation Day will be celebrated at various locations in August and September. The purpose is for managers to thank their employees for the work they do day in and day out, helping us to achieve our company goals and satisfy our customers.

In addition to these celebrations, there is a way you can thank your co-workers for a job well done or wish them a happy Employee Appreciation Day with an e-card. Visit <http://mtmrecognition.com/ecards/amtrak> to view the e-card selection and for instructions.

Auto Train Boarding Changes

Effective September 1, all automobiles being carried on *Auto Train* must be checked-in by 2:30 p.m. This is a change from the current cut-off time of 3:00 p.m. The cut-off time will remain the same for motorcycles at 2:00 p.m., and priority vehicle offloading at 2:30 p.m.

Through August 31, if a passenger who has paid for Priority Vehicle Offloading checks in after 2:30 p.m., but before 3:00 p.m., the vehicle will be carried but will not be loaded into the Priority Vehicle Offloading auto carriers as they will already have been transferred to the train. The Priority Vehicle Offloading charge is not refunded.

Enhancements Being Made to Veterans Advantage Program

Amtrak continues to support service members through our partnership with Veterans Advantage. Membership in Veterans Advantage allows veterans and active duty military access to preferred pricing on goods and services throughout the country.

Effective August 15, Veterans Advantage members will be able to enjoy a 15 percent savings off the best available fare on most Amtrak trains for themselves and up to six qualifying travel companions traveling on the same itinerary. Qualifying travel companions are the cardholder's spouse and dependents age 22 years or younger. Restrictions apply and include *Acela Express* weekday service, First Class, Business Class, select Thruway bus services and sleeping accommodations. Enhancements also include the elimination of blackout dates and advance reservation requirements.

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

August 4, 2014

Meet us in St. Louis!

If you're in the St. Louis area or soon plan to be, make your way over to two local museums featuring Amtrak exhibits depicting our company's past, present and future.

Through October 31, the Children's Illustrated Art Museum will feature *All Aboard: Now and Then*. The exhibit showcases the history of trains through visual displays, interactive exhibits and model railroads. Amtrak will be prominently featured with a display of memorabilia including past route guides, brochures, promotional items and photographs. For museum details visit <http://www.stlciam.org/>

Through December 2015, the St. Louis Museum of Transportation is also featuring an Amtrak exhibit which includes Amtrak timetables, menus, china and vintage advertising. One shelf is devoted to the long-standing Amtrak-Missouri partnership, which was established in 1979 as a result of the discontinuance of the *National Limited* (New York/ Washington-Kansas City). Without that train, the busy St. Louis-Kansas City corridor would have had no passenger rail service so Missouri signed an agreement with Amtrak to help fund continued service. To mark the 30th anniversary of the partnership in 2009, the trains were collectively renamed the *Missouri River Runner*. For museum details visit <http://transportmuseumassociation.org/>

Amtrak history is always on display at <http://history.amtrak.com>, with items from our company's beginning in 1971 to present day.

Reminder: Mandatory Information Security Training

The 2014 Amtrak Information Security Awareness training is available via the Training section of the Employee Information Portal. This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed annually. For additional information and instructions please visit <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

Amtrak President and CEO Completes Southwest Chief Whistle-stop Tour

Recently, Amtrak President and CEO Joe Boardman met with state and local officials on a whistle-stop tour along the route of the *Southwest Chief*.

The tour, which began in Topeka, Kansas and ended in Albuquerque, New Mexico was designed to rally support and allow for meetings regarding the future of the route of the Amtrak *Southwest Chief* between Newton, Kansas and Albuquerque. Also onboard the train between Topeka and Dodge City were Kansas Secretary of Transportation Mike King and BNSF Railway Executive Chairman Matt Rose. Secretary King continued west to Garden City.

The Amtrak delegation also made a side trip by car to the Philmont Scout Ranch near Cimarron, New Mexico to meet with leaders of the Boy Scouts of America camp. This summer, more than 5,000 scouts and their leaders used the Amtrak service at Raton to reach the ranch. U.S. Sen. Martin Heinrich of New Mexico traveled with the group from Raton through Las Vegas. Representatives of U.S. Sens. Mark Udall of Colorado and Tom Udall of New Mexico met the train in La Junta and Lamy, respectively. In addition, New Mexico DOT Secretary Tom Church rode the train between Raton and Lamy.

Amtrak has been talking with leaders in Kansas, Colorado and New Mexico since April 2012 about the pending downgrades to this route, owned by BNSF Railway. At that time Amtrak proposed a plan to maintain the route for daily passenger train service and share the necessary capital investment among Amtrak, BNSF and the three states.

Without an agreement and capital investment, the end of service at acceptable Amtrak speeds in Western Kansas, Southeastern Colorado and Northeastern New Mexico is threatened for 2016. Due to track layouts, direct service to Albuquerque is also in some doubt if the Amtrak service is rerouted.

Amtrak supported the filing of a federal TIGER grant application by Garden City, Kansas and other communities that would preserve and improve the *Southwest Chief's* route in Kansas and Colorado and has pledged some matching funds. A decision on that grant is expected by this fall from the U.S. Department of Transportation.

Amtrak Government Affairs is continuing to work with all three states and each of the affected cities to keep the train on its historic route.

Amtrak Initiates STB Investigation

On July 21, Amtrak filed a notice of intent with the U.S. Surface Transportation Board (STB) regarding Amtrak's request that the STB

investigate substandard handling of Amtrak trains by Canadian National Railway Company (CN). This action is being taken to improve on-time performance and reduce the delays experienced by Amtrak trains operating on tracks in the United States owned by CN. Amtrak operates passenger trains on CN-owned tracks in the South and Midwest, including state-sponsored routes in Illinois and Michigan.

Host railroads such as CN and others can be investigated and fined by the STB, which regulates business dealings and service within the railroad industry.

Amtrak originally brought a complaint against CN to the STB in January 2012 under a provision of the Passenger Rail Investment and Improvement Act (PRIIA) that enables the regulatory body to investigate poor performance of Amtrak trains. On-time performance of many Amtrak trains on tracks owned or controlled by CN continues to be less than 80 percent, which can trigger the obligation of the STB to investigate the causes of delay under federal law. The amended complaint will focus initially on substandard performance by CN on the corridor between Chicago and Carbondale, Illinois. Amtrak trains dispatched by CN on this route arrived on schedule barely half of the time in the first six months of 2014.

Poor on-time performance is unacceptable to Amtrak passengers, employees, management and other stakeholders. It creates a major inconvenience for our customers and impacts the business through decreased ridership, lost revenues and higher operating costs for Amtrak, and for the states that sponsor routes. It also impedes the ability of Amtrak to deliver on the mission of providing intercity transportation with superior safety, customer service and financial excellence.

Taxpayers and Amtrak's state train funding partners will also benefit from this action, since the states make the largest contribution to covering the cost of state-supported trains after revenue, which is the largest contributor to covering costs.

Lost revenue, along with higher operating costs arising from poor host railroad performance, increases Amtrak's federal and state subsidy needs.

Bringing Consistent Titles to Amtrak

What's in a title? A title should reflect the work you do without overstating it. It should indicate how you fit into the overall organization and within the industry. And, it should be consistent – employees who do similar work should have similar titles. This also helps us to understand how we can progress our careers. The Amtrak Career and Compensation Structure help us to do just that.

Currently, Amtrak has over 1,300 unique titles for its nearly 2,900 non-agreement employees. The job descriptions and titles for each of these jobs was reviewed and consolidated to establish the Amtrak Career and Compensation Structure. The structure combines similar job titles to create consistency – reducing the number of unique job titles by over 60 percent.

Human Capital worked with a cross-functional team to develop the Amtrak Career and Compensation Structure and establish consistent titles. The team worked closely with leadership and directors to review existing job documentation and consolidate job classifications and validate against the marketplace.

All Amtrak titles will have the same structure to ensure consistency and better align with titles commonly found in the marketplace. Amtrak's titles consist of three parts:

- **Level** – the hierarchical position within the Amtrak career structure (e.g., associate, specialist, senior specialist, etc.)
- **Function** – the job family or function to which the job is associated (e.g., Finance or Accounts Payable)
- **Organization Role** – the essence of the job – is it usually paired with a function to more fully describe the nature of the work (e.g., manager or analyst)

Level	Function	Organization Role
senior	telecommunications	analyst

Bringing consistency to our job titles will allow us to more accurately compare compensation to the marketplace and ensure we are offering competitive pay. When we compare jobs to the marketplace, it is important to have titles that are commonly found in the industry so an accurate comparison of compensation can be made. Consistent titles will also provide you with a clear picture of how you fit into the organization and the career development opportunities available to you.

Bringing Consistent Titles to Amtrak...continued

This fall, your manager will meet with you to review where your current role fits in the new structure and will let you know what, if any, title impact has occurred for you. If your title does change, this is in no way a reflection of individual performance rather it reflects the need for standardization so employees in every functional area and department at Amtrak can better understand how they fit into the broader organization.

If you have any questions or concerns, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department. Watch this space for additional information about the Career and Compensation Structure in the coming weeks.

The hiring managers and others involved in the hiring process who are selected for the seven and one-half hours Targeted Selection education can look forward to a notification from their management informing them of where and when to attend, and how to enroll. The enrollments will be through an open enrollment process.

Targeted Selection Training to Resume

Human Capital is pleased to announce that education for the new interviewing system called Targeted Selection will resume starting August 13, with the first class being held at our Riverside Call Center.

Targeted Selection is a comprehensive, proven and accurate behavior-based interviewing system that will standardize and improve the way we conduct our hiring process. The benefits of the Targeted Selection interviewing system are:

1. Provides a more structured, efficient and consistent process allowing hiring managers to make better hiring decisions.
2. Increases the hiring manager's interviewing skills and confidence through the use of a consistent and targeted hiring process; asking behavioral based questions, and using the Situation Task Action Result (STAR) concept to ensure that we obtain complete and objective job-relevant information.
3. Increases job acceptance rates.
4. Improve employee morale by hiring the right person for the right job.
5. Provides hiring managers with the security and ability to interview confidently, while gathering data that predicts future job performance.
6. Improves the candidate's hiring experience because the interview is structured by STAR behavioral questions, addressing four critical aspects of success: knowledge, experience, competency, and personal attributes/motivational targets.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

August 18, 2014

eLearning Offers New Insights on Amtrak's Career and Compensation Structure

To help non-agreement employees make the most of the new Career and Compensation Structure, Amtrak has launched an eLearning tool to help you understand how to use the structure to guide your development at Amtrak. The eLearning tool will help you to understand:

- **Your Band/Zone** – Bands and Zones provide the foundation for the Career and Compensation Structure. Know how they are defined and how you can use them to define your path for development.
- **Your Development Opportunities** – The Career and Compensation Structure offers a dual career track within the D band: the Technical Track and Management Track. Explore what these two tracks are and how they may guide your development.
- **Your Compensation** – Every non-agreement position is mapped into the Career and Compensation Structure using one of two common marketplace practices: benchmarking to external surveys or slotting based on an evaluation of the job. Benchmark positions are those jobs within Amtrak with comparable external marketplace data which is then used to guide placement in the structure. Slotted positions do not have external marketplace data available but are slotted into the structure based on a number of factors including, but not limited to, functional knowledge, impact of position to the business, level of organizational influence, level of strategic formulation, department and organizational hierarchy and current salary.
- **Your Compa Ratio** – Understand how your pay compares to the marketplace by using the Compa Ratio. Compa Ratio is a comparison ratio that measures an employee's salary relative to the midpoint of the salary range. The midpoints of the range are an approximation of the marketplace median for like positions in that band/zone.

Access the eLearning tool today on the **Employee Information Portal>>Training>>under Course Catalog Management and Supervisory >>under Assigned Subject Areas Compensation>>Compensation** again>>**Compensation and Career Structure**.

If you have any questions or concerns about the Career and Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital Business Partner for your department. Watch this space for additional information about the Career and Compensation Structure in the coming weeks.

Beech Grove Employees Participate in Local Event

Last month, Amtrak supported the 2014 Indiana Black Expo Summer Celebration. Over three days, 20 Amtrak employees from our Beech Grove Maintenance Facility volunteered and staffed a booth, providing attendees the opportunity to learn about Amtrak travel.

During the Summer Celebration Expo, a special emphasis was placed on our *Cardinal* and *Hoosier State* services serving Indianapolis, Indiana.

In its 44th year, Indiana's Black Expo Summer Celebration showcases African American culture through concerts, exhibits and workshops. The Summer Celebration Expo's goal is to educate and uplift the growing, diverse Indianapolis community. Thank you to those employee volunteers who assisted at the Summer Celebration Expo and helped make our participation a success.

EFFECTIVE AUGUST 6, 1974

Adirondack Celebrates 40 Year Anniversary

August 5 marked the 40th anniversary of the *Adirondack* (New York-Albany-Montreal), which for much of its 381 mile journey follows the broad Hudson River and Lake Champlain's curving Western shore. To celebrate the day, Amtrak Marketing Manager Deb Sanderson, Amtrak Customer Service Supervisor Matt Kelley and NYSDOT Quality Assurance Inspector Charlie Poltenson greeted passengers on-board both the north and southbound *Adirondack* trains with a complimentary *Adirondack* souvenir tote, luggage tag and lapel pin. To learn about the history of the *Adirondack* visit: <http://history.amtrak.com/blogs/blog/celebrating-40-years-of-adirondack-service#sthash.b3nE5JBN.dpuf>

eTicket Eligibility Added to Select Amtrak Thruway Bus Services

Effective August 1, additional Amtrak Thruway bus services became eTicket eligible. These routes include:

- *Silver Service* dedicated Thruway routes in Florida between Orlando and Ft. Myers, Tampa and Ft. Myers, and Jacksonville and Lakeland (bus schedules 6091, 6092, 6097, 6098, 6291, and 6292).
- *Capitol Limited* and *Lake Shore Limited* dedicated Thruway route between Toledo, Detroit, Ann Arbor, and East Lansing (bus schedules 6029, 6030, 6048, and 6049).
- *Cardinal* dedicated Thruway route between Charlottesville and Richmond (bus schedules 4050 and 4051).

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

ATW, August 18, 2014, continued

eTicketing allows for an entire one-way or roundtrip reservation to connect to train reservations on most connecting Thruway buses. Customers at unstaffed bus stops will no longer have to order tickets by mail. For added customer convenience, eTickets can be displayed at no charge via the iPhone app or as a PDF depending on the mobile device.

Effective September 1, Amtrak Thruway bus service between Newport News and Virginia Beach will become eTicket eligible.

Reminder: Responses Needed for Amtrak Uniform Program Surveys

All Operations department uniformed employees are reminded to participate in Amtrak Uniform Program surveys – the Uniform Dress Shirt Survey or the Chef and Food Specialist Uniform Survey. Please note the following links for each survey:

- www.surveymonkey.com/s/AmtrakDressShirtSurvey (Train Service, Station Service, On Board Service employees)
- www.surveymonkey.com/s/AmtrakChef-FSUniformSurvey (Chef and Food Specialists only)

Please participate. Your opinion counts.

We Are Still Accepting Photos

Thank you to those who have submitted their updated photos to be used on new Amtrak identification badges. If you haven't already submitted your photo, **photos are still**

being accepted via email or text to IDrefresh@amtrak.com.

You can use a digital camera or a personal phone. Please remember to include your SAP number and full name in the subject line when submitting your photo.

Sending your photo helps Amtrak save costs and increase our photo collection efforts. Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: *Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1*. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

August 25, 2014

Employee Appreciation Day

This year Employee Appreciation Day will be celebrated through September 30. The purpose is for managers to thank their employees for the

work they do day in and day out.

While celebrations will be held across the country, we have included a way you can thank your employees and co-workers for a job well done or wish them a happy Employee Appreciation Day with an e-card. Visit <http://mtmrecognition.com/ecards/amtrak> to view the e-card selection and for instructions. Managers will receive additional information about Employee Appreciation Day in the upcoming weeks along with action items for celebrating Employee Appreciation Day with your team.

Reminder: Changes to Amtrak Lodging Services

Amtrak has announced a new partnership with Travelliance, a full-service accommodations and transportation administration company. They will be replacing our current vendor, Corporate Lodging (CLC), beginning October 1, 2014.

This will bring changes to employee lodging procedures that will simplify the hotel booking and check-in processes. Reservations will be booked through a phone call to Travelliance (available 24/7/365) or electronically on their website.

Some minor changes to existing lodging procedures will be required by employees and include:

- CLC cards will be terminated and unavailable for use as of October 1, 2014 (12:01 a.m. Central Time)
- Employees will only need to show the hotel desk agent their Smart ID (employee badge)
- Hotels will verify reservations at check-in
- You will not be able to make reservations directly with hotels. If you currently contact hotels directly, you will now need to call Travelliance to book hotel rooms.

Amtrak will continue utilizing the same hotels as today, and Travelliance will be working with hotels in regard to future activity.

Please watch this space as additional information on this new program will be provided to all as the transition date approaches.

Common Myths about the Career and Compensation Structure

Questions and concerns come with any change. We are committed to providing you with the

information you need so you can use the Career and Compensation Structure to support your career development at Amtrak. That's why we want to clear up some common myths about the Career and Compensation Structure:

"My job is changing" is FICTION. While titles may change as a result of the Career and Compensation Structure, the responsibilities of the job will not change. Creating consistency in titles will allow us to more accurately compare compensation to the marketplace and ensure we are offering competitive pay. If your title does change, this is in no way a reflection of individual performance. Rather it reflects the need for standardization so employees in every functional area and department at Amtrak can better understand how they fit into the broader organization.

"I'm getting a pay cut" is FICTION. Base salaries will not go down as a result of the Career and Compensation Structure. In fact, if your base salary is below the minimum point of the range for your band/zone, you will receive an increase in salary.

"New hires get paid more" is FICTION. The Career and Compensation Structure establishes salary ranges within each band where the entire range represents the marketplace and the midpoint is an approximation of the marketplace median based on jobs in similar markets. Employees move through the zone and are compensated based on their performance and skill level.

Employees in the low end of the range should have developing skills; toward the middle of the range their skills should be proficient; and at the top of the range they should have expert skills. During the Merit Award process, employees whose salary is below the midpoint may be given a larger increase compared to employees whose salary is above the market. This will move employees who are below the marketplace closer to the marketplace faster. We will also continue to differentiate pay based on performance – giving high performers larger increases.

"GEO pay is going away" is FICTION. With the Career and Compensation Structure, the location or region of a position no longer impacts a job title. However, this does not impact GEO pay. Amtrak will continue to review its GEO pay program through 2014.

For additional information and answers to your frequently asked questions (FAQ), refer to the FAQ document available on the company Intranet at <http://wiki.corp.nrpc/pages/viewpage.action?pagelD=306217004>.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

If you have any questions or concerns about the Career and Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department.

Did You Know...?

Did you know that Amtrak offers many training courses in a variety of options to meet your needs? They include classroom, web-based and self-paced

computer-based training with topics such as Amtrak Security Awareness Training and various computer skill enhancement classes.

Any request for external training should be submitted by the employee through eTrax. If you are taking an external course we recommend that you submit the request at least four weeks prior to class date. To create a Training Request, login to eTrax and select the **Create New Training Request** link on the left side of the page. This will launch the request process and prompt you to add in all necessary information including:

- Employee information
- Training information (type and name of training, training vendor, dates, cost, etc.)
- Justification

After the training request has been submitted, it will be sent to your supervisor/manager for approval in eTrax. Once approved, it will then be processed by the appropriate department. Please note that if there is a cost to attend training it will be billed back to your Cost Center.

After you have attended the training a copy of your certificate of completion along with the training objectives and course description should be sent to Training and Development (TrainingAndDevelopment@amtrak.com) to be included in your employee training record in SAP.

Reminder: Last Call for Amtrak Uniform Program Surveys

All Operations department uniformed employees are reminded to participate in Amtrak Uniform Program surveys – the Uniform Dress Shirt Survey or the Chef and Food Specialist Uniform Survey. Please note the following links for each survey:

- www.surveymonkey.com/s/AmtrakDressShirtSurvey (Train Service, Station Service, On Board Service employees)
- www.surveymonkey.com/s/AmtrakChef-FSUniformSurvey (Chef and Food Specialists only)

The survey will be **open through Friday, Aug. 29**. Please participate. Your opinion counts.

Reminder: We Are Still Accepting Photos

Thank you to those who have submitted their updated photos to be used for new Amtrak identification badges. If you haven't already submitted your photo, **photos are still being accepted** via email or text to IDrefresh@amtrak.com. You can use a digital camera or a personal phone. Please remember to include your SAP number and full name in the subject line when submitting your photo.

Sending your photo helps Amtrak save costs and increase our photo collection efforts. Please continue to adhere to the policies and instructions pertaining to the use of cell phones. The Amtrak corporate policy can be found on the company Intranet at: *Library > Policies > Amtrak Policy and Instruction Manual (APIM) > Operations > 3.23.1*. Employees who are governed by railroad operating rules (e.g., Locomotive Engineers, Conductors, Dispatchers, Track Car Drivers and Foremen, etc.) must continue to adhere to the operating rules and special instructions that apply to the use of electronic devices.

Safety Corner: New Safety Training Program Rolling Out

Amtrak is committed to safety with the understanding that the health and well-being of co-workers and customers come before all else. Currently, Amtrak is working with Strategic Safety Associates to conduct Train the Trainer classes in MoveSMART, a program designed to boost safe behavior at work and at home by encouraging judgment, motivation and personal control for safety. MoveSmart was first introduced to Amtrak in 1997 and was an overwhelming success with enthusiastic acceptance of the training by Amtrak agreement and non-agreement employees.

The first module of the training program is "Strength and Control" and addresses strains and sprains, identified as the leading injury statistic throughout Amtrak. Forty-two percent of all injuries are in this category which represents a 12 percent increase over FYTD 2013. In an effort to eliminate and reduce ergonomic related soft tissue injuries, this program utilizes techniques and strategies that increase useable strength, improve balance and control, increase body awareness and enhance judgment. It is designed to help reduce the frequency and severity of injuries incurred as a result of pushing, pulling, lifting, handling and repetitive work.

MoveSMART Train the Trainer classes are scheduled for September and employee training is expected to be rolled out in October 2014. The training will initially be delivered in new hire training, block training and boot camps with a goal of reaching all employees.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

September is National Preparedness Month

Amtrak is committed to providing our employees with a safe and secure working environment and believes that many of the preparedness activities that are done at work can also benefit employees at home.

September is National Preparedness Month and a perfect time to prepare yourself and your family for a disaster by making an emergency plan.

As a member of Federal Emergency Management Agency's READY.GOV Alliance for the past three years, Amtrak's Emergency Management and Corporate Security department will be partnering with a number of organizations to host a series of National Preparedness Month events at stations across the country.

Additional preparedness suggestions to help you during a natural or manmade disaster at home, at work and in your community are available on www.ready.gov. Please take some time to read the information and share it with your family and friends.

During this month, we encourage all employees to make an emergency plan and practice it. For additional information, please visit one of our September events listed in the chart below or contact EMCS@amtrak.com.

National Preparedness Month Events

<u>Date</u>	<u>Time</u>	<u>Location</u>	<u>Regional Emergency Manager</u>
Sept. 3	11:00 a.m. – 6:00 p.m.	Boston – South Station	Steve Pugsley
Sept. 3	10:00 a.m. – 2:00 p.m.	King Street Station, Seattle	Lis Klute
Sept. 4	10:00 a.m. – 2:00 p.m.	King Street Station, Seattle	Lis Klute
Sept 10	6:30 a.m. – 10:30 a.m.	Providence Station	Steve Pugsley
Sept. 11	2:00 p.m. – 6:00 p.m.	Chicago Union Station	Gary Miller
Sept. 12	10:00 a.m. – 2:00 p.m.	New Orleans	Charlie Cox
Sept. 12	9:00 a.m. – 1:00 p.m.	San Diego	Dave Albert
Sept. 15	10:00 a.m. – 2:00 p.m.	Wilmington Station	Mac Mclean
Sept. 16	6:00 a.m. – 11:00 a.m.	Milwaukee Intermodal Transportation Station	Gary Miller
Sept. 16	10:00 a.m. – 2:00 p.m.	BWI Station	Mac Mclean
Sept. 17	10:00 a.m. – 2:00 p.m.	Baltimore Penn Station	Mac Mclean

Sept. 17	7:00 a.m. – 11:00 a.m.	Portland Station, Maine	Steve Pugsley
Sept. 17	TBA	New York Penn Station	Gary Hearn
Sept. 17	10:00 a.m. – 2:00 p.m.	Lancaster/Harrisburg	Brian McDonough
Sept. 17	TBA	Greensboro, North Carolina	Mike Stammel
Sept. 18	10:00 a.m. – 2:00 p.m.	New Carrollton Station	Mac Mclean
Sept. 19	10:00 a.m. – 2:00 p.m.	Philadelphia 30 th Street Station	Brian McDonough

Sept. 24	10:00 a.m. – 2:00 p.m.	Washington Union Station,	Steve Fruchtmann
Sept. 25	TBA	Charlotte, North Carolina	Mike Stammel
Sept. 27	10:00 a.m. – 3:00 p.m.	Olympia/Tumwater, Washington	Lis Klute

Electronic Customer Satisfaction Surveys to Replace Mailings

Amtrak is changing how we solicit and collect customer feedback. Since October 2013 we have been both mailing and emailing customer satisfaction surveys in order to gather comparative data on both methods. In FY15, Amtrak will only email Customer Satisfaction Index surveys (eCSI) to those who recently used Amtrak's services. This replaces the mailed surveys (CSI) that have been in use since May 1995.

Customer surveys are used to measure our customer's overall satisfaction or dissatisfaction on a particular train trip. This helps us identify areas of strength and areas that may need improvement in order to enhance the overall customer experience. The surveys form the basis for our Customer Satisfaction Index (CSI), which is one of Amtrak's key measures.

Some of the benefits of making this change include a shorter time between the customers' trip and their receipt of the survey since the responses are now emailed and eCSI is a less expensive surveying tool.

New Lodging Vendor Procedures

Beginning October 1, 2014, hotel lodging currently provided by Corporate Lodging (CLC) will now be provided by Travelliance. Most employees will not notice a change in the process as the majority of hotels will remain the same and room reservations will be done electronically on a nightly basis. However, this change will result in some new procedures that include:

- Please call Travelliance at 866-927-8010 with hotel reservation questions or issues. Please do not contact CNOC with any hotel needs or issues. This new booking process will be available for you beginning September 22, 2014, from 8 a.m. to 3 p.m. Central time; however, you will only be able to book hotels for stays after October 1, 2014.
- Hotel reservations may also be made via the Travelliance portal at <https://corpconnex.tvlinc.com>. This portal will also be available September 22, 2014, from 8 a.m. to 3 p.m. Central time and reservations for stay dates on or after October 1 can be made at that time. You will need a user name and password to log on to the Travelliance portal.
- After October 1, 2014, both the phone number and Travelliance portal will be available 24 hours a day.
- Employees will only need to show the hotel desk their Smart ID badge. Business line employees should know their job code as well as this may help identify you to the hotel in the event they do not have your name.
- Hotels will verify reservations at check-in using your Smart ID badge and job code.
- Transportation crews will have rooms reserved through the electronic booking process
- Engineering Supervisors and Foremen who require hotel rooms for their gangs will need to call Travelliance to reserve rooms. If possible, please call 24 hours in advance of your hotel dates or any changes in hotel reservations. You will not be able to call the hotels directly or you will be held accountable for paying the invoice from the hotel.
- The following employee groups can make hotel reservations via web (Travelliance Portal) or by calling Travelliance:
 - All management employees
 - Training department personnel who will be arranging hotels for others scheduled for any Operations training
 - Amtrak Police Department
 - Any employee approved for reverse lodging

Employees will no longer:

- Need CLC cards. Cards will be terminated and deactivated for use as of October 1, 2014 (12:01 a.m. Central time). Please turn your cards into your managers.
- You cannot make reservations directly with hotels. If you currently contact hotels directly, you will need to call Travelliance to book hotel rooms.

Additional information and training will be provided on how to use the Travelliance Portal as well as the information you will need when calling Travelliance to book a hotel room. Please keep an eye out for future dates for a webinar/question and answer sessions.

Your Manager and You: Constructive Conversations about Your Career at Amtrak

The Amtrak Career and Compensation Structure provides a consistent framework to help employees understand the core competencies they need to be successful in their role and identify development opportunities across the company. It also is a tool that you can use with your manager during your Performance Conversations – and throughout the year – to guide your development.

In the coming months, all non-agreement employees will be meeting with their managers to discuss the Career and Compensation Structure. Use this opportunity to reflect on your career at Amtrak.

1. **Evaluate** – Think about your current role at Amtrak.
 - Where does my current position fit into the company?
 - What are my strengths?
 - What do I need to continue to develop my skills?
 - What do you enjoy about your current position?
 - What do you not enjoy about your current position?
2. **Dream** – Think about where you see yourself in the future at Amtrak.
 - What are your career aspirations?
 - Do you want to manage people?
 - Do you want to build technical expertise as an individual contributor?
 - Do you want to explore other functional areas at Amtrak?
3. **Act** – Create a development plan to achieve your career goals at Amtrak.
 - What skills do I need to develop to reach my goal?
 - What experience do I need to reach my goal?
 - What learning and development opportunities exist?
 - Who can I talk to? Is there someone whose footsteps I can follow?

Before you meet with your manager, take the time to consider your career ambitions at Amtrak. Be ready to share this information with your manager so you can have a productive conversation about your career at Amtrak.

For additional information about the Career and Compensation Structure, visit:

<http://wiki.corp.nrpc/pages/viewpage.action?pagelid=306217004>.

If you have any questions or concerns about the Career and Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department.

FY15 My Commitments Extended to October 10

In order to provide us all with the time we need the FY 15 My Commitments deadline has been extended to October 10, 2014. As in FY14, FY15 My Commitments refer to SMART goals, developmental goals, core competencies and job accountabilities. Please enter your FY15 My Commitments in My CareerTrak by October 10. To help with the My Commitments process and answer your My CareerTrak questions, a series of webinars, 'Performance Conversations Workshops,' will be held on the following dates through October:

- Wednesday, September 3, 10:30 - 12:00 p.m. Eastern time
- Tuesday, September 9, 1:00 - 2:30 p.m. Eastern time
- Monday, September 15, 3:00 - 4:30 p.m. Eastern time
- Friday, September 19, 11:00 - 12:30 p.m. Eastern time
- Wednesday, September 24, 2:00 - 3:30 p.m. Eastern time
- Tuesday, September 30, 11:00 - 12:30 p.m. Eastern time
- Friday, October 3, 10:30 - 12:00 p.m. Eastern time
- Monday, October 6, 1:30 - 3:00 p.m. Eastern time
- Wednesday, October 8, 12:00 - 1:30 p.m. Eastern time

These interactive sessions will address questions about the process such as: What should I do if my manager has not cascaded his/her goals to me? How do Core Competencies play in to My Commitments? What actions do I (e.g. rating managers and employees) need to complete? Participants will be encouraged to ask questions about My Commitments that matter most to them. Use the following log-in information to attend one of these webinars:

Dial 1-866-209-1307

Enter passcode 9657457#

Click the following link to attend the virtual

meeting: <https://connect17.uc.att.com/amtrak/meet/?ExEventID=89657457>

For more information on these and other resources available to support you in setting your commitments, Check out the full version of the My CareerTrak Update on the My CareerTrak wiki site. If you have general My CareerTrak questions contact the Employee Service Center (ESC) by calling 1-888-694-7372.

Limited Schedule Change: Northbound Acela Express Trains

Starting September 2 through November 14, major railroad construction will occur near Aberdeen, Maryland. To accommodate this work, northbound *Acela Express* trains will depart earlier from Washington, BWI Thurgood Marshall Airport and Baltimore:

- All northbound *Acela Express* trains will depart Washington five minutes earlier.
- All northbound *Acela Express* trains will depart from BWI and Baltimore station between three and five minutes earlier.
- Schedules will not change at Wilmington or at any remaining stations on the route.

Most southbound trains will arrive at Baltimore, BWI and Washington up to eight minutes later than the times shown in Amtrak printed timetables.

Amtrak joins Federal, State and Local Officials to Support the Grow America Act

As most of our employees know, the Northeast Corridor (NEC) is a critical infrastructure asset for our country with 750,000 daily passenger trips on 2,200 trains. With increasing ridership comes increasing demands on our aging infrastructure. Currently two projects are advancing – the **New Jersey High Speed Rail Improvement Program (NJ HSRIP)** and the **Baltimore and Potomac Tunnel Replacement Project**, both designed to deliver the capacity and reliability improvements that are required on the busiest corridor in the Amtrak system.

Recently, Amtrak NEC leaders joined the Federal Railroad Administration (FRA), state and local elected officials to discuss these projects and reiterate how predictable, dedicated funding is essential for the future of rail infrastructure. This press tour initiative led by the FRA was designed to drive attention to the Congressional call to pass the GROW AMERICA Act - a four year, \$300 billion transportation bill that would invest \$19 billion in America's railroad system.

The **New Jersey High Speed Rail Improvement Program (NJ HSRIP)** and the **Baltimore and Potomac Tunnel Replacement Project** were highlighted as examples of infrastructure projects in the environmental review, design or construction phase that could be replicated or advanced swiftly should the necessary multi-year funding be secured.

- **New Jersey High Speed Rail Improvement Program (NJ HSRIP)**
The NJ HSRIP will improve service reliability for Amtrak intercity and commuter services by increasing capacity in support of more frequent train travel for Amtrak intercity operations as well as New Jersey Transit commuter operations. The program will create additional capacity to support the operation of two *Acela Express* trains per hour between New York and Washington.
- **Baltimore and Potomac Tunnel Replacement Tunnel**
The Baltimore and Potomac (B and P) Tunnel Replacement Project seeks to improve rail service and reliability, and gain crucial speed and capacity for Amtrak, MARC and freight users. Replacement of the 141-year-old B and P Tunnel will allow for increased speeds in the Baltimore region and will improve on-time performance. When completed, the project will help make Amtrak and MARC less susceptible to maintenance-related delays as a result of the aging infrastructure.

September is National Preparedness Month

Amtrak is committed to providing our employees with a safe and secure working environment and believes that many of the preparedness activities that are done at work can also benefit employees at home.

September is National Preparedness Month and a perfect time to prepare yourself and your family for a disaster by making an emergency plan.

As a member of Federal Emergency Management Agency's READY.GOV Alliance for the past three years, Amtrak's Emergency Management and Corporate Security department will be partnering with a number of organizations to host a series of National Preparedness Month events at stations across the country.

Additional preparedness suggestions to help you during a natural or manmade disaster at home, at work and in your community are available on www.ready.gov. Please take some time to read the information and share it with your family and friends.

During this month, we encourage all employees to make an emergency plan and practice it. For additional information, please visit one of our September events listed in the chart below or contact EMCS@amtrak.com.

National Preparedness Month Events

<u>Date</u>	<u>Time</u>	<u>Location</u>	<u>Regional Emergency Manager</u>
Sept. 3	11:00 a.m. – 6:00 p.m.	Boston – South Station,	Steve Pugsley
Sept. 3	10:00 a.m. – 2:00 p.m.	King Street Station, Seattle	Lis Klute
Sept. 4	10:00 a.m. – 2:00 p.m.	King Street Station, Seattle	Lis Klute
Sept 10	6:30 a.m. – 10:30 a.m.	Providence Station,	Steve Pugsley
Sept. 11	2:00 p.m. – 6:00 p.m.	Chicago Union Station	Gary Miller
Sept. 12	10:00 a.m. – 2:00 p.m.	New Orleans	Charlie Cox
Sept. 12	9:00 a.m. – 1:00 p.m.	San Diego	Dave Albert
Sept. 15	10:00 a.m. – 2:00 p.m.	Wilmington Station	Mac Mclean
Sept. 16	6:00 a.m. – 11:00 a.m.	Milwaukee Intermodal Transportation Station	Gary Miller
Sept. 16	10:00 a.m. – 2:00 p.m.	BWI Station	Mac Mclean
Sept. 17	10:00 a.m. – 2:00 p.m.	Baltimore Penn Station	Mac Mclean

Sept. 17	7:00 a.m. – 11:00 a.m.	Portland Station, Maine	Steve Pugsley
Sept. 17	TBA	New York Penn Station,	Gary Hearn

Safety First: New Measurement System in Place

Amtrak is committed to safety with the understanding that the health and well-being of co-workers and customers comes before all else. At Amtrak, we now measure serious injuries and fatalities (SIF) through a new system-wide process. In addition to meeting the Federal Railroad Administration and the Occupational Safety and Health Administration injury classification requirements, SIF implements a progressive approach making classification decisions based on **potential** injuries. Currently, our system has a SIF rating of 0.5, with an ultimate target of zero.

The new SIF process is intended to reduce or eliminate SIF by reducing inherent risk, making the management controls more effective or changing the accepted norm of work practices in the organization. When we classify based on outcomes, we are creating a lagging metric, but when we classify based on potential we are creating a leading metric. And more importantly, we are taking action before someone gets seriously injured, rather than after the injury occurs.

Have You Met Your Annual Requirements?

The 2014 Amtrak Information Security Awareness training is available in the Training section of the Employee Information Portal. This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, the training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed by September 30, 2014. For additional information and instructions please visit: <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

New Lodging Procedures and Webinar Information

Beginning October 1, 2014, hotel lodging currently provided by Corporate Lodging (CLC) will be provided

by Travelliance. Most employees will not notice a change in the process as the majority of hotels will remain the same and room reservations will be processed electronically on a nightly basis. This change will result in some new procedures that include:

- Call Travelliance at 866-927-8010 with hotel reservation requests, questions or issues. Please do not contact CNOC with any hotel needs or issues. This new reservation process will be available beginning **September 22**, however; you will only be able to reserve hotels for lodging on or after October 1.
- Hotel reservations may also be made via the [Travelliance Portal](https://corpconnex.tvlinc.com) at <https://corpconnex.tvlinc.com>. The portal will be available September 22 for reservation requests on and after October 1. You will be given a user name and password to log on to the Travelliance Portal.
- After October 1, both the phone number and [Travelliance Portal](https://corpconnex.tvlinc.com) will be available 24 hours/7 days a week.
- Employees will only need to show the hotel desk their Amtrak employee ID. Business line employees should know their job symbol as this may help identify them with the hotel in the event they do not have their name.
- Hotels will verify reservations at check-in using the employee badge and job code.
- Transportation crews will have rooms reserved through the electronic booking process.
- Engineering supervisors and foremen who require hotel rooms for their gangs will need to call Travelliance to reserve rooms. As much as possible, please call 24 hours in advance of your reservation to make adjustments or to cancel. **Employees should not to call the hotels directly or they will be held accountable for paying the invoice from the hotel.**

CLC cards will be terminated and unavailable for use as of October 1, 2014 (12:01 a.m. Central Time). Managers should please collect and destroy as many of the CLC cards as possible.

Travelers should no longer make reservations directly with hotels. Instead, they should contact Travelliance for reservations beginning on or after October 1.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

The following employee groups can make hotel reservations via Web ([Travelliance Portal](#)) or by calling Travelliance:

- All management employees
- Training department personnel that will be arranging hotels for others scheduled for any Operations Training
- Amtrak Police Department
- Any employee approved for reverse lodging

To assist in making hotel reservations by phone at 866-927-8010 and/or through the portal, there will be **several webinars which will provide complete instructions** for working with Travelliance. Please try to attend any one of the following sessions being provided:

September 10, 15, 17, 22, 24 and 29

All sessions are held from 10:00 a.m. – 11:00 a.m. and 3:00 p.m. – 4:00 p.m., Eastern Standard Time.

To access the webinar please use the following:

- **Toll-Free** (US and Canada): 800-768-2983. Use Access Code: 7671111
- **Meeting**

Glory Days in White River Junction, Vermont

Between 1848 and 1865, five railroads laid tracks along this bend in the Connecticut River, thereby giving birth to [White River Junction](#).

Opened in December 1937, the current depot was built as a union station to serve the Central Vermont and Boston and Maine (B and M) railroads. The building is a fine example of the Georgian Revival, and the cupola features a weathervane with a small engine and tender. During the mid-20th century, the station was

especially busy during football season when rambunctious crowds passed through on their way to games at nearby Dartmouth.

Today the streets close to the station are active with new shops, restaurants and art studios. North of the depot, visitors can see a vintage 1892 4-4-0 steam locomotive built for the B and M. Learn more about the White River Junction station at <http://www.greatamericanstations.com/Stations/WRJ>.

On September 13, the [Amtrak Exhibit Train](#) will be in White River Junction for the 22nd annual [Glory Days Festival](#). Attendees are invited to take a free tour of the Exhibit Train between 10:00 a.m. – 4:00 p.m. and learn about our company's past, present and future. In addition, festival goers can enjoy a model train show, children's activities and live entertainment.

Amtrak Labor and Employment Law Newsletter

The latest edition of the Amtrak Labor and Employment Law newsletter, "On the Right Track," is now available. You can find this and past editions of the newsletter under Law department publications on the [Law Department](#) Intranet page, located under the How We Work tab on the main Amtrak Intranet page.

Featured in this Issue

- EEOC Issues Publications Providing Guidance on Religious Dress and Grooming
- After Harassment: Judging the Employer Response
- Employee's Friends may be Protected by Civil Rights Act
- New Philadelphia Law Requires Pregnancy Accommodations
- Accommodation of Work Goals for Disabled Employees
- When Charging Discrimination, Employees Can Point to Others with Different but Comparably Serious Offenses

This newsletter is not designed to provide legal advice, but to make you aware of new and emerging issues that may impact the work you do every day. If you have any questions, please contact one of the attorneys listed in the newsletter.

The National Domestic Violence

HOTLINE

**Safety First: Domestic Violence –
There is a Way Out**

Recently, disturbing high-profile events have brought [Domestic Violence](#) to the forefront of the minds of many Amtrak Employees. The unfortunate reality that relationships can become so destructive is unsettling to many of us. It is a good time to reeducate ourselves, and reinforce our resolve to stand up for those who are victims of this senseless type of violence. Domestic Violence does not discriminate and it affects all parts of society, including our friends, family or coworkers.

Amtrak stands firm in its resolve to stand up against domestic violence and support all of our employees. The [Employee Assistance Program](#) is committed to providing confidential assistance to any employee or family member who has been a victim of domestic violence.

It is important that we bring attention to this issue because so many victims remain silent. Domestic violence affects the workplace in a number of ways. Absenteeism, impaired job performance and loss of experienced employees are only some of the costs that companies bear as a direct result of this behavior.

Domestic violence happens when one person exerts power or control over a current or past intimate partner or family member. Victims often feel fear and are intimidated. Physical or psychological injuries or even death can be the result. Domestic violence attacks can be physical, sexual, psychological or financial.

If you have been a victim of domestic violence you are not alone. Domestic violence affects people of every age, gender, sexual orientation, race, religion, income and education. Nearly one in four women and 11.5 percent of men have reported at least one episode of domestic violence in their lifetime. Help is available.

To get help or more information on Domestic violence, please contact [Amtrak's Employee Assistance Program](#): Mid-Atlantic Division (Washington, D.C.) – 202-906-3447, Mid-Atlantic Division (Philadelphia) – 215-349-1487, Northeast Division (New York) – 212-630-7655, Northeast Division (Boston) – 617-345-7738, Central Division (Chicago) – 312-544-5254, Southwest/Pacific Division (Los Angeles) – 800-453-9557, Southern Division (Jacksonville)—904-766-5133, or the [National Domestic Violence Hotline](#) at (800) 799-SAFE (7233).

Reminder: Have You Met Your Annual Requirements?

The 2014 Amtrak Information Security Awareness training is available via the Training section of the Employee Information Portal. This is a mandatory course that has to be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, this training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed by September 30, 2014. For additional information and instructions please visit: <http://wiki.corp.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=2&modificationDate=1410194376317>

**How Amtrak's Career Level Guide Helps
You Chart Your Career Path**

With the introduction of the Career & Compensation Structure comes a variety of tools to help you chart your career path at Amtrak. One of those tools is the [Career Level Guide](#), which describes the responsibilities for Career Professionals (C Band), Management and Technical Leads (D Band) and Executives (E Band).

You can use this guide as reference to:

- **Understand Your Role** – Determine where your role fits in and know what is expected for your band/zone. Talk with your manager to discuss what is most applicable and relevant to you as the descriptions provided are for general reference.
- **Know Your Impact on the Business** – Every employee at all levels of the business makes an impact on our organization. Reflect on how your position makes an impact to our business.
- **Identify Development Opportunities** – Assess how your skills and experience match the expectations for your role. Determine what skills and experience you need to excel in your role and progress to the next level.
- **Guide Performance Conversations** – Talk with your manager about how your role fits in to the organization and how you would like to progress your career at Amtrak. Together, create a plan to develop the skills and experience you need to reach your career goals.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

To access the Career Level Guide and other resources for the Career & Compensation Structure, visit:
<http://wiki.corp.nrpc/pages/viewpage.action?pageId=306217004>.
If you have any questions or concerns about the Career & Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department.

11th Civic Conversation Held in Memphis

On Sept. 11, our Government Affairs and Corporate Communication department held their 11th Civic Conversation in Memphis, Tennessee. The conference was attended by local, city, state and federal officials.

As part of the [Great American Stations](#) project, Amtrak hosts Civic Conversations in an effort to inform communities about station renovation and to build partnerships with those considering and working to revitalize the stations Amtrak serves. The focus of the Memphis event was the *City of New Orleans* and *Texas Eagle* routes to include 21 Amtrak-served communities in Illinois, Kentucky, Tennessee, Mississippi, Louisiana, Texas, Arkansas and Missouri.

Discussions at the Civic Conversation included:

- How to get started with a project and an introduction to Amtrak contacts
- Compliance with the Americans with Disabilities Act (ADA)
- Possible federal and private funding sources
- Case studies of successful station projects
- Amtrak station planning guidelines and
- Historic preservation regulations

These forums serve as an invaluable tool to educate attendees on the importance of Amtrak as an economic driver in communities across the country.

Amtrak K-9 Team Wins Competition Event

Last month, Los Angeles K-9 Officer Robert Solomon-Billings and his K-9 partner Pal, participated in the prestigious Transportation Security Administration sponsored "Reno K911" training and competition event held in Reno, Nevada. Over 25 federal, state and local K-9 teams participated in multiple training scenarios simulating VIP movements, bomb threats and K-9 sweeps. The K-9 sweeps included moving and stationary baggage, offices, baggage rooms and trains.

Also at the event were Amtrak Police Department instructors, who delivered K-9 first aid training and provided the group with a moving train-search scenario between Reno and Truckee, California.

K-9 Officer Solomon-Billings and Pal placed second in the luggage sweep, sweeping 80 pieces of luggage in 10 minutes and successfully located two explosive devices. During the bus sweep competition, K-9 Officer Solomon-Billings and Pal placed first and located two explosive devices. In addition, the Amtrak K-9 team placed first in the overall competition with a grand total of 298 points out of a possible 300 points available for the two timed events.

Congratulations on a winning performance.

Safety First: Knockout Strains and Sprains

Are you ready to rumble? The Safety Process Focus Team (PFT) is asking for everyone's assistance defeating our number one safety opponent: sprains and strains. With 41 percent of all injuries occurring in this category for FY14 (to date), the PFT team has put together a knockout initiative to annihilate this opponent. Let's get ready to rumble Amtrak employees, and land a "Knock Out" on all strains and sprains injuries.

Throughout FY15, the Safety PFT team will keep us well informed on how well we are doing towards our goal to end FY15 with 15 percent fewer injuries than in FY14. So let's get this championship bout with sprains and strains started.

Event Overview - *Here's how we'll keep score...*

- There will be 12 rounds, one for each month during FY15. If and when Amtrak delivers a "Knock Out," another match will take place for the following month.
- Blows to opponents will land after the round/month is calculated. Calculations are based by a percentage basis:
 - One – five percent reduction lands a **Jab**
 - Six – ten percent reduction is a **Upper Cut**
 - 11-15 percent reduction is a **Knock Down** standing eight counts
 - 16 percent or more is a **Knock Out**

Completing an [Ergo Checklist](#) self-assessment before the start of FY15 will help ensure we land some blows to sprains and strains. Supervision and the Safety PFT will be of assistance with corrective actions from the checklist also available on the company Intranet under Safety → Safety.

Reminder: Have You Met Your Annual Requirements?

The 2014 Amtrak Information Security Awareness training is available in the Training section of the Employee Information Portal. This is a mandatory course that must be completed by employees and contractors who have an Amtrak e-mail account. The training lasts approximately one hour and will cover securely accessing Amtrak's Internet, computers, networks, emails and tips for handling security breaches. Please note, this training is a supplement to Amtrak's Computer Security and Usage Policy.

The training must be completed by September 30, 2014. For additional information and instructions please visit: <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

Amtrak Reinforces its Commitment to Preserve the Environment

Today, Amtrak President and CEO Joe Boardman will participate on a transportation panel at the *On Track for Clean and Green Transport Climate Change* event at the future Moynihan Station in New York. This event will bring together high level stakeholders to discuss the role of sustainable transport as a solution to climate change. Mr. Boardman will reinforce Amtrak's dedication to preserving the planet.

Our accomplishments to date are many. They include installing **energy-efficient lighting** at our facilities, realizing **reduced locomotive fuel consumption** by installing anti-idling devices and the recently purchased [ACS-64](#) — electric locomotives equipped with **regenerative braking**. Our investment in the future and our commitment to the environment is real.

To learn more about [Amtrak's environmental practices](#), visit the company Intranet> Safety→ Environmental.

Reminder: New Lodging Vendor Reservations Start October 1

Beginning October 1, Travelliance will begin providing hotel lodging that is currently provided by Corporate Lodging (CLC). To make reservations or if you have questions/issues about an existing reservation:

- Call Travelliance at 866-927-8010
- Hotel Reservations may also be made via the Travelliance Portal at <https://corpconnex.tvlinc.com>.
- Both the phone and portal will be available September 22, for reservations requests occurring on and after October 1. You will be given a user name and password to log on to the Travelliance portal.
- **After October 1, both the phone number and [Travelliance Portal](#) will be available 24 hours/7 days a week, 365 days a year.**

The following employee groups can make hotel reservations via Web ([Travelliance Portal](#)) or by calling Travelliance:

- Training department personnel that will be arranging hotels for others scheduled for any Operations training
- Amtrak Police Department
- Any employee approved for reverse lodging
- Management employees – this is an addition to and not a replacement of the existing Concur system

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

To assist in making hotel reservations by phone at 866-927-8010 and/or through the [Travelliance Portal](#) there will be several webinars complete with step-by-step instructions for use. Please try to attend any one of the following sessions being provided. All sessions are Eastern Standard Time.

- Sept. 22: 10:00 a.m. -11:00 a.m. and 3:00 p.m. - 4:00 p.m.
- Sept. 24: 10:00 a.m. -11:00 a.m. and 3:00 p.m. - 4:00 p.m.
- Sept. 29: 10:00 a.m. -11:00 a.m. and 3:00 p.m. - 4:00 p.m.

To access the webinar please use the following:

Toll-Free (US & Canada): 8007682983/**Access Code:** 7671111
Meeting URL:

<https://www.callinfo.com/prt?host=level3&an=8007682983&ac=7671111>

Test Your Computer: <http://test.callinfo.com/?host=level3>

Access Code: 7671111

Participants will be required to enter their name, no other information is required.

Please keep in mind that in the future *employees will no longer:*

- Need CLC cards. Cards will be terminated and unavailable for use as of October 1 (12:01 am Central Time). Please collect and destroy as many of the CLC cards as possible.
- Do not make reservations directly with hotels. If you currently contact hotels directly, you will need to call Travelliance to reserve your hotel rooms. If you do contact the hotels directly we will not have a record of the trip and cannot reimburse the hotel for your stay.
- Please do not contact CNOC with any hotel needs or issues.

Using this online tool will be vitally important to ensuring your hotel needs are addressed. Please find a convenient time to log on to the webinar for an important information session.

iLMS Newsletter Now Available

Integrated Labor Management System (iLMS) is one of the first projects of the Operations Foundation Program, a capital program that will begin to implement some of the foundational and high priority initiatives identified by key stakeholders in the Operations department. Amtrak is undertaking the iLMS project to modernize our current labor management systems and processes. iLMS will provide a more efficient way to manage labor across departments and crafts by optimizing assignments, payroll and crew management.

Some of the key benefits that the iLMS project plans to achieve are:

- Reducing operating ratio and minimizing operating cost
- Modernizing position and employee management
- Maximizing utilization of employee resources to ensure proper staffing levels and job assignments
- Streamlining data access to employee information during emergency situations
- Reducing train delays due to staffing issues
- Providing employees self-service tools

To learn more about the iLMS project, read the [iLMS Quarterly](#), a newsletter available on the company Intranet and designed to provide you with updates on project progress and accomplishments.

Washington Ballet and Delaware Theatre Company Offer Discounted Tickets to Amtrak Employees

Employees living in or visiting the Washington, D.C., area may take advantage of a marketing partnership with the [Washington Ballet](#) and enjoy a ten percent discount on tickets for the upcoming 2014 – 2015 season. Performances are held at various locations throughout Washington, D.C., and include:

2014 Performances:

Petite Mort	October 22-26
The Nutcracker	November 29 - December 28

2015 Performances:

Sleepy Hollow	February 18-22
Swan Lake	April 8-12, 2015
ALICE (in Wonderland)	May 6-10 and May 16-17
Tour-de-Force: Serenade	May 13-15
The Sleeping Beauty	May 30-31

To purchase tickets, use promo code AMTRAK at any ticket purchasing outlet: www.ticketmaster.com, via telephone 202.362.3606 x605 or at the box offices at the Kennedy Center, Harman Center for the Arts or Warner Theater. For more details visit the [Employee Store](#) on the company Intranet

For employees living in or visiting the Wilmington, Delaware area, the award winning [Delaware Theatre Company](#) (DTC) produces a diverse season of plays, including musicals, new works and the classics. In addition, DTC attracts professional actors and artists from Broadway and regional theatres across the country. Based on the long-term marketing alliance with Amtrak, Amtrak employees can enjoy a limited number of complimentary** and exclusive 20 percent off discounted tickets for the 2014-2015 season.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

The Delaware Theatre Company is located on the Riverfront in Wilmington, Delaware, a short walk from the Amtrak Station and just off I-95's MLK Blvd exit.

Delaware Theatre Company 2014-2015 Performance Schedule:

2014 Performances:

Love Letters	September 17 – October 5
Rest, in Pieces	November 5 – 23
My Mother's Italian, My Father's Jewish, & I'm Home for the Holidays	December 3 – 21

2015 Performances:

Nora	February 4 - 22, 2015
Because of Winn-Dixie	April 8 – May 3, 2015
The Male Intellect: An Oxymoron	March 5-8, 2015
The Book of Moron	March 12-15, 2015

To receive your complimentary or reduced price tickets, please follow these instructions and use the following coupon codes:

- AMTRAKLOVE (Complimentary tickets for "Love Letters")
- AMTRAKRIP (Complimentary tickets for "Rest, In Pieces")
- AMTRAKHOLIDAYS (Complimentary tickets for "My Mother's Italian ...")
- AMTRAKNORA (Complimentary tickets for "Nora")
- AMTRAKWD (Complimentary tickets for "Because of Winn Dixie")
- AMTRAKMORON (Complimentary tickets for "The Book of Moron")
- AMTRAKDUBAC (Complimentary tickets for "The Male Intellect")

The codes above can be used online at <https://tickets.delawaretheatre.org> or by calling the Delaware Theatre Company's Box Office at (302) 594-1100.

Codes are valid for all productions during DTC's 2014-2015 season.

To book online: select production, select performance, select seats, when the site displays your order enter the appropriate coupon code above in the box below your tickets; the site will take you back to the performance selection page with the message indicating that your price has been adjusted.

If you do not receive the message that your price has been adjusted when using any of the applicable Amtrak100 Coupon Codes, it means the limited allotment of complimentary tickets for that production has been filled. Instead, use Coupon Code Amtrak20 for the exclusive Amtrak 20 percent discount. Click shopping cart and complete your transaction.

****Complimentary tickets are limited to four per employee for all to enjoy.**

New Depot Open in Hermann, Missouri

Recently, city officials, residents and representatives from Amtrak, the [Missouri Department of Transportation](#) (MoDOT) and Union Pacific Railroad gathered to cut the ribbon on the city's new depot and transportation museum. The building replaces a small shelter constructed in 1991 when *Missouri Service* (now the *Missouri River Runner*) trains began making regular stops at Hermann.

The depot was funded through various resources, including a federal [Transportation Enhancement](#) (TE) grant matched with local funds. Administered by MoDOT, TE grants are meant to "help expand transportation choices and the transportation experience" through a dozen activities including landscaping and scenic beautification, historic preservation and creation of pedestrian and bicycle infrastructure. The Dierberg Educational Foundation, a local non-profit organization that supports projects to preserve the region's cultural heritage, also contributed funds for depot construction, as did the city of Hermann.

[Hermann](#), founded by German immigrants in the 1830s, remains proud of its origins and hosts numerous cultural festivals throughout the year. Due to its close proximity to St. Louis, the city is popular with day-trippers, many of whom take the train. In FY13, more than 18,500 travelers began or ended their journeys at the Hermann station.

Jessica Allen Hawkins

Petra Todorovich Messick

**Amtrak Employees
Recognized by
Progressive Railroading
Magazine**

Amtrak Director, Process Engineering, Jessica Allen Hawkins and Principal Officer, NEC Infrastructure and Investment Development, Petra Todorovich Messick, were recognized as Rising Stars by [Progressive Railroading](#) magazine. Rising Stars are individuals who are under 40 years old and who have made a positive impact on their company, organization, department or team. They are also viewed by others — peers, colleagues, supervisors, clients or associates — as up-and-coming leaders in the rail industry. The honorees were celebrated at a reception in Chicago, Illinois.

Jessica Allen Hawkins was recognized for her natural leadership ability in refining processes that enhanced fleet availability and reliability at our Hialeah, Florida, maintenance facility. Hawkins led the implementation of the Day-Spot-Shift Preventative Maintenance (PM) line that incorporated 235 pieces of passenger railroad equipment and included 92 day, 184 day and annual inspection cycles. This resulted in meeting PM production goals on a consistent level, significant time reductions in equipment out of service and an improved overall quality of equipment released from PM. Her efforts have expanded beyond the division to system wide initiatives that have impacted the entire Mechanical department.

Petra Todorovich Messick was recognized for her outreach and communication efforts to advance the Gateway Program, which will double rail capacity between New York and New Jersey with two new tunnels under the Hudson River. In late 2013, Amtrak broke ground to build a concrete casing to protect the underground right-of-way of the Gateway tunnels through Hudson Yards. Messick led the efforts to communicate the importance of this preliminary project. Prior to joining Amtrak, Messick was the director of America 2050, a national infrastructure planning and policy program of the Regional Plan Association, which in part advocated for investment in intercity passenger rail.

Ensuring Competitive and Equitable Pay at Amtrak

Amtrak's compensation philosophy and guiding principles guide how compensation decisions are made for non-agreement employees. There are four principles of Amtrak's compensation philosophy which ensure performance and accountability to accelerate progress toward our strategic compensation goals:

- **Market Competitive** – Align positions to the marketplace and clearly define the compensation range, which is inclusive of the whole marketplace, including the minimum, midpoint and maximum.
- **Pay for Performance** – Differentiate compensation based on performance where high performers earn merit awards and short-term incentives.
- **Career Progression and Growth** – Enhance career progression and mobility with a standard Amtrak career structure.
- **Transparency** – Educate managers and employees so expectations are clear and they understand how compensation decisions are made at Amtrak.

Amtrak's Career & Compensation Structure—now being launched throughout the company—establishes consistent titles across the organization, organized into bands with zones defined by the market. The Amtrak Career & Compensation Structure provides a framework for us to achieve our compensation philosophy and guiding principles found [here](#) by ensuring each non-agreement position is defined by a band/zone, competencies, knowledge, skills and abilities. From there, we are able to review and validate the marketplace values of each position to ensure it is competitive. We ensure equity by providing a transparent process in how we define Amtrak's compensation zones for each position using the market median as the anchor for salary zone midpoints.

Compa ratio is a term new to Amtrak, but one that the Human Capital discipline routinely uses across industries to describe how an employee's base salary compares to the midpoint of the salary zone. If an employee's compa ratio is less than 100 percent, their base salary is considered below the midpoint and in the **developing** part of the zone. If an employee's compa ratio is greater than 100 percent, their base salary is above the midpoint and in the **expert** part of the zone.

You can calculate your **compa ratio** by dividing your base salary by your zone's midpoint. For example, an employee in the C2 Band receives an annual base salary of \$60,500. The midpoint for the C2 Band is \$65,000. The employee's compa ratio is 93 percent ($\$60,500/\$65,000 = .931$ or 93.1 percent). The employee is paid seven percent below the midpoint and is in the developing part of the zone.

Throughout the months of October and November, following approval from leadership, managers will be meeting with all non-agreement employees to review the [Amtrak Career & Compensation Structure](#) and share a personalized compensation statement with each employee that will include the new band/zone, title, salary range and compa ratio.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

Over the coming years, we will work to ensure all employees receive pay that is competitive based on the marketplace and their performance. Here are a few ways we will drive this:

- **Merit Award Increases** – Beginning with the 2014 Merit Award process, employees whose compa ratio is less than 100 percent may be given larger increases to help move employees below the market median closer to the midpoint of the zone. We will also continue to differentiate based on performance – giving high performers larger increases. If you earn a Merit Award increase in 2014, it will be based on your salary as of September 29, 2014.
- **Short-Term Incentives (STI)** – With the introduction of the Amtrak Career & Compensation Structure, some employees may be placed in a different zone that reflects the market for that position, which may impact their STI Target Incentive percentage. If you earn a STI award in 2014, it will be based on your STI Target Incentive as outlined in the compensation statement that you will receive from your manager in the coming months.
- **Base Salary** – If your salary is below the minimum of the salary range for your zone, we will make an adjustment that will be retroactive to September 29, 2014. The Amtrak Career & Compensation Structure will also help us to identify other pay issues so we can plan and budget for potential future adjustments.

If you have any questions or concerns about the Career & Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department.

**Safety Corner: MoveSMART
Training Now Available**

As part of the MoveSMART program designed to boost safe behavior at work and at home, 26 instructors have now been trained to teach the first module, “Strength & Control”. The Strength & Control module addresses strains and sprains, identified as the leading cause of injury throughout Amtrak.

The MoveSMART program utilizes techniques and strategies that increase useable strength improve balance and control, increase body awareness and enhance judgment. It is designed to help reduce the frequency and severity of injuries incurred as a result of pushing, pulling, lifting, handling and repetitive work. **The MoveSMART program is applicable to all Amtrak employees.**

If you are interested in scheduling the Strength & Control training class at your work facility, please contact Duke Pugh, senior Safety coordinator at 215.349.2573 or pughk@Amtrak.com. At least ten participants per class is suggested and lasts approximately two hours.

Memphis Central Station Celebrates 100 Year Anniversary

On October 4, [Memphis Central Station](#) will celebrate its 100 year anniversary with a public celebration hosted by the [Memphis Railroad and Trolley Museum](#), located in the station. During the 20th century, Memphis became a major railroad hub, playing host to a number of regional and national railroad companies. Central Station has hosted passenger trains running under the Illinois Central, Yazoo and Mississippi Valley, Chicago, Rock Island & Pacific, St. Louis-San Francisco and Amtrak flags. Today, Central Station is served daily by the *City of New Orleans*, with connections to taxi services, city buses and the historic Memphis trolley system.

The [Amtrak Exhibit Train](#) will also be present to complement the anniversary festivities. The train will be open to the public for free tours on October 4 from 10:00 a.m. – 5:00 p.m. and on October 5 from noon – 5:00 p.m. In addition, on October 3, the train will welcome local area school groups.

On Saturday, a Canadian National locomotive cab tour will allow visitors to climb up the locomotive's front steps and enter into the cab through the nose door. Guests will be able to sit in the engineer's seat, pose for pictures and ask the engineer questions. Other scheduled equipment on display from the five Class 1 railroads that serve Memphis will be the Norfolk Southern Exhibit Car and locomotive, and BNSF, CSX and Union Pacific locomotives.

Writers Selected in Amtrak Residency Program

Last week, 24 members of the literary community were selected as the first group of writers to participate in the [#AmtrakResidency](#) program. The program will host the writers as they work on the writing projects of their choice in the unique workspace of a long-distance train, over the next year.

The 24 residents offer a diverse representation of the writing community and hail from across the country. They were selected based on their desire to work on their craft in an inspiring environment, and the originality, creativity and quality of their writing samples.

Starting in October, approximately two writers per month will travel round trip on pre-selected long-distance trains, with writers

Amtrak This Week is a publication of Amtrak Employee Communications

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

September 29, 2014

Jessica Allen Hawkins

Petra Todorovich Messick

**Amtrak Employees
Recognized by
Progressive Railroading
Magazine**

Amtrak Director, Process Engineering, Jessica Allen Hawkins and Principal Officer, NEC Infrastructure and Investment Development, Petra Todorovich Messick, were recognized as Rising Stars by [Progressive Railroading](#) magazine. Rising Stars are individuals who are under 40 years old and who have made a positive impact on their company, organization, department or team. They are also viewed by others — peers, colleagues, supervisors, clients or associates — as up-and-coming leaders in the rail industry. The honorees were celebrated at a reception in Chicago, Illinois.

Jessica Allen Hawkins was recognized for her natural leadership ability in refining processes that enhanced fleet availability and reliability at our Hialeah, Florida, maintenance facility. Hawkins led the implementation of the Day-Spot-Shift Preventative Maintenance (PM) line that incorporated 235 pieces of passenger railroad equipment and included 92 day, 184 day and annual inspection cycles. This resulted in meeting PM production goals on a consistent level, significant time reductions in equipment out of service and an improved overall quality of equipment released from PM. Her efforts have expanded beyond the division to system wide initiatives that have impacted the entire Mechanical department.

Petra Todorovich Messick was recognized for her outreach and communication efforts to advance the Gateway Program, which will double rail capacity between New York and New Jersey with two new tunnels under the Hudson River. In late 2013, Amtrak broke ground to build a concrete casing to protect the underground right-of-way of the Gateway tunnels through Hudson Yards. Messick led the efforts to communicate the importance of this preliminary project. Prior to joining Amtrak, Messick was the director of America 2050, a national infrastructure planning and policy program of the Regional Plan Association, which in part advocated for investment in intercity passenger rail.

Ensuring Competitive and Equitable Pay at Amtrak

Amtrak's compensation philosophy and guiding principles guide how compensation decisions are made for non-agreement employees. There are four principles of Amtrak's compensation philosophy which ensure performance and accountability to accelerate progress toward our strategic compensation goals:

- **Market Competitive** – Align positions to the marketplace and clearly define the compensation range, which is inclusive of the whole marketplace, including the minimum, midpoint and maximum.
- **Pay for Performance** – Differentiate compensation based on performance where high performers earn merit awards and short-term incentives.
- **Career Progression and Growth** – Enhance career progression and mobility with a standard Amtrak career structure.
- **Transparency** – Educate managers and employees so expectations are clear and they understand how compensation decisions are made at Amtrak.

Amtrak's Career & Compensation Structure—now being launched throughout the company—establishes consistent titles across the organization, organized into bands with zones defined by the market. The Amtrak Career & Compensation Structure provides a framework for us to achieve our compensation philosophy and guiding principles found [here](#) by ensuring each non-agreement position is defined by a band/zone, competencies, knowledge, skills and abilities. From there, we are able to review and validate the marketplace values of each position to ensure it is competitive. We ensure equity by providing a transparent process in how we define Amtrak's compensation zones for each position using the market median as the anchor for salary zone midpoints.

Compa ratio is a term new to Amtrak, but one that the Human Capital discipline routinely uses across industries to describe how an employee's base salary compares to the midpoint of the salary zone. If an employee's compa ratio is less than 100 percent, their base salary is considered below the midpoint and in the **developing** part of the zone. If an employee's compa ratio is greater than 100 percent, their base salary is above the midpoint and in the **expert** part of the zone.

You can calculate your **compa ratio** by dividing your base salary by your zone's midpoint. For example, an employee in the C2 Band receives an annual base salary of \$60,500. The midpoint for the C2 Band is \$65,000. The employee's compa ratio is 93 percent ($\$60,500/\$65,000 = .931$ or 93.1 percent). The employee is paid seven percent below the midpoint and is in the developing part of the zone.

Throughout the months of October and November, following approval from leadership, managers will be meeting with all non-agreement employees to review the [Amtrak Career & Compensation Structure](#) and share a personalized compensation statement with each employee that will include the new band/zone, title, salary range and compa ratio.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

Over the coming years, we will work to ensure all employees receive pay that is competitive based on the marketplace and their performance. Here are a few ways we will drive this:

- **Merit Award Increases** – Beginning with the 2014 Merit Award process, employees whose compa ratio is less than 100 percent may be given larger increases to help move employees below the market median closer to the midpoint of the zone. We will also continue to differentiate based on performance – giving high performers larger increases. If you earn a Merit Award increase in 2014, it will be based on your salary as of September 29, 2014.
- **Short-Term Incentives (STI)** – With the introduction of the Amtrak Career & Compensation Structure, some employees may be placed in a different zone that reflects the market for that position, which may impact their STI Target Incentive percentage. If you earn a STI award in 2014, it will be based on your STI Target Incentive as outlined in the compensation statement that you will receive from your manager in the coming months.
- **Base Salary** – If your salary is below the minimum of the salary range for your zone, we will make an adjustment that will be retroactive to September 29, 2014. The Amtrak Career & Compensation Structure will also help us to identify other pay issues so we can plan and budget for potential future adjustments.

If you have any questions or concerns about the Career & Compensation Structure, please feel free to reach out to a member of the Compensation team or the Human Capital business partner for your department.

Amtrak Employees Recognized by *Progressive Railroading Magazine*

Jessica Allen Hawkins Petra Todorovich Messick

Amtrak Director, Process Engineering, Jessica Allen Hawkins and Principal Officer, NEC Infrastructure and Investment Development, Petra Todorovich Messick, were recognized as Rising Stars by *Progressive Railroading* magazine. Rising Stars are individuals who are under 40 years old and who have made a positive impact on their company, organization, department or team. They are also viewed by others — peers, colleagues, supervisors, clients or associates — as up-and-coming leaders in the rail industry. The honorees were celebrated at a reception in Chicago, Illinois.

Jessica Allen Hawkins was recognized for her leadership ability in refining processes that enhanced fleet availability and reliability at our Hialeah, Florida, maintenance facility. Safety Corner: MoveSMART Training Now Available

As part of the MoveSMART program designed to boost safe behavior at work and at home, 26 instructors have now been trained to teach the first module, "Strength & Control". The Strength & Control module addresses strains and sprains, identified as the leading cause of injury throughout Amtrak.

The MoveSMART program utilizes techniques and strategies that increase useable strength improve balance and control, increase body awareness and enhance judgment. It is designed to help reduce the frequency and severity of injuries incurred as a result of pushing, pulling, lifting, handling and repetitive work. **The MoveSMART program is applicable to all Amtrak employees.**

If you are interested in scheduling the Strength & Control training class at your work facility, please contact Duke Pugh, senior Safety coordinator at 215.349.2573 or pughk@Amtrak.com. At least ten participants per class is suggested and lasts approximately two hours.

Memphis Central Station Celebrates 100 Year Anniversary

On October 4, [Memphis Central Station](#) will celebrate its 100 year anniversary with a

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

public celebration hosted by the [Memphis Railroad and Trolley Museum](#), located in the station. During the 20th century, Memphis became a major railroad hub, playing host to a number of regional and national railroad companies. Central Station has hosted passenger trains running under the Illinois Central, Yazoo and Mississippi Valley, Chicago, Rock Island & Pacific, St. Louis-San Francisco and Amtrak flags. Today, Central Station is served daily by the *City of New Orleans*, with connections to taxi services, city buses and the historic Memphis trolley system.

The [Amtrak Exhibit Train](#) will also be present to complement the anniversary festivities. The train will be open to the public for free tours on October 4 from 10:00 a.m. – 5:00 p.m. and on October 5 from noon – 5:00 p.m. In addition, on October 3, the train will welcome local area school groups.

On Saturday, a Canadian National locomotive cab tour will allow visitors to climb up the locomotive's front steps and enter into the cab through the nose door. Guests will be able to sit in the engineer's seat, pose for pictures and ask the engineer questions. Other scheduled equipment on display from the five Class 1 railroads that serve Memphis will be the Norfolk Southern Exhibit Car and locomotive, and BNSF, CSX and Union Pacific locomotives.

Writers Selected in Amtrak Residency Program

Last week, 24 members of the literary community were selected as the first group of writers to participate in the [#AmtrakResidency](#) program. The program will host the writers as they work on the writing projects of their choice in the unique workspace of a long-distance train, over the next year.

The 24 residents offer a diverse representation of the writing community and hail from across the country. They were selected based on their desire to work on their craft in an inspiring environment, and the originality, creativity and quality of their writing samples.

Starting in October, approximately two writers per month will travel round trip on pre-selected long-distance trains, with writers covering all of our 15 long-distance routes. A complete list of selected residents and bios can be found on the [Amtrak blog](#).

The program received more than 16,000 applications, of which a group of semi-finalists was reviewed by a [panel](#) representing the literary community including published author Alexander Chee, Amtrak Vice President of Government Affairs and Corporate Communications Joe McHugh, Random House Editor Samuel Nicholson and Director of Literature for the National Endowment for the Arts Amy Stolls.

The [#AmtrakResidency](#) program was launched after overwhelming social media interest in Amtrak's long-distance service as a creative inspiration, following the residency test-run by Manhattan-based writer [Jessica Gross](#), whose piece, "Writing The Lake Shore Limited" was published by the *Paris Review*. For more information on the Amtrak Residency program, visit blog.amtrak.com or follow [#AmtrakResidency](#).

Discounted Microsoft Home Use Program Suspended

The Microsoft Home Use Program (HUP) that allowed Amtrak employees to purchase MS Office for a nominal price has been removed from the [Employee Store](#) on the Intranet. The contract with Microsoft that covered the program has expired, and no replacement program has been announced.

Reminder: Travelliance to Start October 1

To make Amtrak business travel reservations or if you have questions/issues about an existing reservation:

- Call Travelliance at 866-927-8010
- Hotel Reservations may also be made via the [Travelliance Portal](#) at <https://corpconnex.tvlinc.com>.

Management employees should still use Concur for their travel needs as directed by policy. Management personnel with Corporate Lodging or CLC cards, please note that Travelliance is an option for making hotel reservations in addition to Concur. It does not replace Concur.

Violinist Scheduled to Serenade Washington Union Station

For those passing through Washington Union Station's main hall on September 30, be sure to catch Grammy Award winning violinist Joshua Bell, who will be using the station as a backdrop for a public performance scheduled at 12:30 p.m. In 2007, Bell played for spare change in a Washington, D.C., Metro station and almost no one paid attention. The story appeared in the *Washington Post* and won a Pulitzer Prize.

Now Bell hopes to capture a much larger audience with a goal to promote music education. He will be accompanied by nine students that he mentored. He also has a new album debuting the same day and an upcoming HBO special.

All Aboard the 2014 Amtrak Autumn Express

October 6, 2014

Due to popular demand, the Amtrak "Autumn Express" excursion is back. Come along for a historic train ride departing from

and returning to Philadelphia 30th Street Station on Saturday and Sunday, November 8 and 9. Travel through small towns, historic tunnels, see key landmarks and experience rare mileage along a route in Pennsylvania that hasn't seen regular passenger service in decades.

Enjoy fall foliage during a rare trip beginning with the Philadelphia Highline above and across the Penn Coach Yards and mainline. Travel along the Schuylkill River and through the countryside that only freight trains travel now. You will pass through the Flat Rock Tunnel constructed in 1836-1840 (one of the oldest in the country) and the Black Rock Tunnel constructed in 1838, the third oldest tunnel still in use in this country. After a brief stop in Harrisburg, the "Autumn Express" will take you back to Philadelphia via Hershey and Reading while travelling through scenic Montgomery, Chester, Berks, Lebanon and Dauphin counties.

Tickets go on sale Thursday, October 9 at 10:00 am ET on Amtrak.com, and are sure to go fast. Reserve your seats quickly.

- The "Autumn Express" departs Philadelphia at 9:45 a.m. and returns at 6:00 p.m.
- Tickets are \$129 for adults and include a boxed lunch (turkey sandwich, chips, water and cookie) and souvenir tote bag.
- Children 2 - 12 ride for half price and receive a boxed lunch and tote bag.
- Seating is limited for this unique opportunity.
- Employee/Retiree Rail Pass not valid.

Chicago Union Station Featured in Architecture Festival

On October 18-19, the [Chicago Architecture Foundation \(CAF\)](http://ChicagoArchitectureFoundation.org) will be presenting Open House Chicago, a free behind-the-scenes look at many of the city's great places and spaces with 150 buildings open to the public. Participants can explore repurposed mansions, hidden rooms, sacred spaces, private clubs, iconic theatres, offices, hotels and more.

This year, [Chicago Union Station](http://ChicagoUnionStation.org) (CUS) will be a tour site during the weekend festival. CUS is the only example in the United

States of a "double-stub" station, where 24 tracks approach from two directions and most do not continue under or through the station. The building is clad in Bedford limestone quarried in Indiana. Together with the approach and storage tracks, the entire station facility takes up nearly ten city blocks.

During Open House Chicago, event goers will gain behind the scene access which will include the long-vacant Women's Lounge, located just off of the Great Hall and the Union Gallery.

For more information visit

<http://www.openhousechicago.org/site/426/>

Ebola Virus Update

Recent news reports reveal that the Ebola virus outbreak continues in West Africa and that the first case of an individual infected with Ebola was reported in the United States.

Infection with Ebola virus requires direct contact with blood or body fluids of an infected person. Ebola is not spread through the air. Symptoms include fever, weakness, muscle pain, headache and sore throat, followed by vomiting, diarrhea, rash, and in some cases, bleeding.

As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin. Hands should be cleaned before preparing food, eating or touching one's face, and after handling soiled material (e.g. used tissues, lavatory surfaces), coughing or sneezing and using the toilet. Hand sanitizers may be used in addition or when soap and water are not available and hands are not visibly soiled.

If an Amtrak passenger develops the symptoms described above, and has a history of travelling to Africa or contact with an individual infected with Ebola within the past three weeks then:

- Keep the ill passenger separated from the other passengers as much as possible (three to six feet).
- Avoid all contact with blood or body fluids, and isolate any contaminated area. Use of disposable gloves is recommended for any contact with an ill passenger or his/her luggage. Remember, gloves are not intended to replace proper hand hygiene. Immediately after contact, gloves should be carefully removed and discarded and

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

hands should be cleaned with soap and water and/or a hand sanitizer. Gloves should not be washed or reused.

- Contact CNOC so arrangements can be made to have the ill passenger detained and met by local emergency medical personnel.

Amtrak's procedure for employees who have contact with blood or body fluids can be found [here](#) on the company Intranet.

Amtrak Launches New System Safety Dashboard

On September 30, the Amtrak System Safety department launched the [Amtrak System Safety Dashboard](#). Located on company Intranet at Safety > Safety> Safety System Dashboard, the dashboard will allow all Amtrak employees to view Amtrak's safety metrics and progress each month as data becomes available. The dashboard currently reflects how the organization was aligned prior to last year's Operations reorganization. Work is currently being done on updating the Amtrak Safety Information System, which when completed, will accurately reflect how the company is aligned today.

The dashboard is a combination of leading and lagging safety indicators which are familiar to most employees. Also included on the dashboard is the Serious Injury or Fatality (SIF) metric indicator. Recently developed by Amtrak, the SIF metric indicator will measure those injuries that have the potential to become a serious injury or lead to a fatality. This metric is an outgrowth of discussions with CSX Transportation and their Life Altering Index and the emphasis they place on these types of injuries.

Using SIF as a leading indicator will enable responsible parties to develop an action plan focused on preventing injuries with potentially serious consequences.

Training for managers and supervisors on how to report a SIF has been ongoing over the last few months and our Human Capital department is working on developing a computer based training module.

Amtrak will use Fiscal Year 2014 data as the baseline for a SIF ratio. To learn how the SIF ratio is calculated, view the System Safety Dashboard Summary on the company Intranet or [click here](#).

If you have suggestions for improving the System Safety Dashboard, please contact System Safety at CentralReporting@Amtrak.com.

Anniversary Celebrations Held for Two Amtrak Michigan Services

On Oct. 1, Amtrak [Blue Water](#) service between Port Huron and Chicago celebrated its 40th anniversary. The onboard celebration included an extra café car, offering more table seating, commemorative gift bags and refreshments. Volunteer hosts were available in each car to hand out gifts and answer passenger questions.

Recent improvements to the service include free Wi-Fi service and bicycle racks in the café car. A new station in East Lansing is expected to open next year, offering a larger waiting room and additional parking. The [Blue Water](#) service has a steady annual ridership with more than 150,000 passengers each year.

The [Blue Water](#) 40th anniversary event was sponsored by the [Blue Water Coalition/Shore to Shore](#), Amtrak and the Michigan Department of Transportation (MDOT), which sponsors the route.

Last month, [30 years](#) of the [Pere Marquette](#) Amtrak service was celebrated with a special event. The [Pere Marquette](#) travels between Grand Rapids, Michigan and Chicago, with stops in Holland, Bangor and St. Joseph/Benton Harbor.

The [Westrain Coalition](#), Amtrak and MDOT, which provides state support for the route, promoted the 30th anniversary event with a bilevel Superliner train, including a special "theater car" at the rear of the train for better viewing; an opportunity to win free round-trip tickets at stations and commemorative gift bags and refreshments.

Approximately one-half hour prior to regularly scheduled train departure, 30th anniversary ceremonies were held at each city and included local mayors and other city leaders, as well as MDOT and Amtrak officials.

Boston Back Bay Station to Become Unstaffed

Effective Oct. 8 and until further notice, the [Boston Back Bay](#) Amtrak ticket office will close, and Amtrak personnel will not be available at the station to assist with ticketing, baggage or other services. Amtrak trains will continue to serve the Boston Back Bay station, according to the normal published schedule. The closure is due to a ventilation issue within the ticket office.

Boston South Station

- Passengers who require ticketing services from an agent and passengers who are paying for their

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

tickets with cash should use Boston South Station or other staffed stations.

- Passengers who need assistance with luggage or other passenger services should use Boston South Station or other staffed stations.
- Unaccompanied minors will not be permitted to travel to or from Boston Back Bay. Unaccompanied minors may, instead, use Boston South Station or other staffed stations.

Boston Back Bay Station

- Passengers boarding at Boston Back Bay are encouraged to print their travel documents before arriving at the station, or use their smartphone or other mobile devices to present their eTickets to the conductor on the train.
- Two Quik-Trak self-serve ticketing kiosks are available at the Boston Back Bay station for passengers to purchase and pick up their travel documents using a credit card.

Arm Yourself for Flu Season

Did you know that healthy adults can spread the flu virus *the day before* they feel sick? Help reduce the risk of flu for yourself, your family and those around you by getting the flu vaccine today. The Centers for Disease Control and Prevention (CDC) states that: "The single best way to prevent the flu is to get a flu vaccination each fall."

Amtrak is sponsoring flu shot clinics at many locations again this year. Please click [here](#) for the list of scheduled clinics.

If you missed the clinic at your location, the good news is that if you are covered by an Amtrak medical plan you can go to many pharmacies across the country to get a flu shot at no cost to you. You just need to show your medical card. Your dependents covered by the plan can follow the same process.

For more information on the flu vaccine, please visit the Amtrak Wellness Webpage on the Amtrak Intranet>Employees>Wellness.

In addition to a flu shot, keep in mind these helpful tips:

- Wash your hands often with soap and water. If soap and water is not available, use a hand sanitizer.
- Cover your nose and mouth with a tissue when you cough and sneeze. In addition, dispose of any used tissues in a proper trash receptacle. If tissues are not available, sneeze into your sleeve.
- Avoid contact with sick people. Recommended distance is three – six feet.
- Postpone travel when sick.

Top 10 Things to Know About the Career & Compensation Structure

Amtrak's new Career & Compensation Structure increases visibility into the knowledge, skills and abilities required to excel in individual functional roles and provides direct line of sight to future career paths and opportunities at Amtrak.

Here are 10 quick things you should know. The Amtrak Career & Compensation Structure:

1. Reinforces the four principles of Amtrak's compensation philosophy:
 - Marketplace Competitive
 - Pay for Performance
 - Career Progression & Growth
 - Transparency

2. Creates the same anatomy for all Amtrak titles to ensure consistency and better align with titles commonly found in the marketplace. Amtrak's titles consist of three parts:
 - Level – the hierarchical position within the career structure (e.g., Specialist)
 - Function – the job family or function to which the job is associated (e.g., Finance)
 - Organization Role – the essence of the job – is it usually paired with a function to more fully describe the nature of the work (e.g., Manager)
3. Establishes consistent titles, organized into bands with zones defined by compensation at the marketplace median. Through this process, we consolidated similar titles and reduced the number of titles at Amtrak by more than 60 percent.
4. Updates some Amtrak titles to more accurately reflect job content and marketplace best practice.
5. Defines the core competencies required for every non-agreement role at Amtrak. That way, you know the knowledge, skills and abilities you need to be successful and you can identify development opportunities to help you close any gaps.
6. Identifies the required behaviors, characteristics and abilities are outlined for each level based on Amtrak's core competencies.
7. Provides managers with a tool to guide their Performance Conversations and better support the development of their team. Each manager will conduct a one-on-one meeting with the members of their team to review a personalized statement that will outline their title, band, zone, compa ratio and the impact to their STI Target Incentive opportunity, if any.
8. Creates a consistent framework to evaluate the three key components of compensation across the company: base salary, merit awards and the Short-Term Incentive (STI).
9. Validates compensation zones by using the marketplace median as the anchor for the midpoint and built the range around that marketplace analysis.
10. Defines a salary range or zone that establishes the minimum, midpoint and maximum. The entire range is reflective of the marketplace and based on benchmarking data. The midpoint represents an approximation of the band's marketplace median compensation based on jobs in similar markets.

Human Capital developed the Amtrak Career & Compensation Structure with help from a cross-functional team. The team worked closely with leadership and directors to review existing job documentation and consolidate job classifications and validate against the marketplace. The Career & Compensation Structure was launched in Human Capital beginning in July, Corporate Support in September and Operations in October. The entire process will be completed by the end of November 2014.

Reminder: Use Caution in Purchasing LED Lighting

LED lighting is an emerging lighting solution that has taken the lighting market by storm. This emergence is due to the bright white light it produces, its long burn life and the significant reduction in wattage compared to the traditional incandescent, High Intensity Discharge (HID) and fluorescent bulbs. While LED lighting has these advantages, the technology is still relatively new and is very expensive. Some technical issues are still being resolved, including how to disperse heat and how to distribute and reflect the light effectively.

While LED is the light source of the future, we must be very careful when purchasing LED fixtures, especially in higher wattages. There are manufacturers rushing their products to the marketplace that DO NOT meet sound lighting practices and are not providing the proper light for operational and safety performance.

Amtrak's Utilities Management and the Engineering Design groups have been working together to research, test and specify LED lighting products for use in our stations and facilities around the country. Amtrak installed several hundred fixtures and have received positive feedback on the performance of these LED fixtures.

We are asking all facility managers, procurement buyers and other employees who specify and purchase lighting fixtures to contact John Tull at John.Tull@amtrak.com or our Engineering Design group before purchasing LED fixtures -- or any large fixtures orders over \$5,000. This is in conformance with [Amtrak's Utilities Processing policy](#), P/I 8.28.1, Section 5.5. In addition, the policy specifies that all major facilities should have an Energy Plan and perform an annual energy audit/evaluation as well as request capital funding to perform energy efficiency projects.

Proper specification of lighting fixtures will ensure the safety of our employees as well as the efficient use of our operating and capital dollars.

The Importance of Personal Protective Equipment

At Amtrak, safety is always job one. Across the railroad, different positions and crafts require personal protective equipment (PPE), and as its name implies, the equipment is for your personal protection.

If your job duties require PPE, please review your safety rule book to determine what equipment applies to you. Make sure the equipment is approved, fits and is not compromised in any manner.

Amtrak assesses work locations to determine if hazards are present and if protective equipment is required. In addition, the Occupational Safety and Health Administration has general requirements outlined in 29CFR 1910.132 which also applies to specific work functions and locations.

We have all heard "If you see something, say something" as it relates to security issues. This is also true when we observe risky behavior. If you see a co-worker performing an at-risk behavior, stop them and discuss the safe way. No one wants to see a fellow worker injured. Remember taking shortcuts and not following safety rules is dangerous.

New Legal Resources Available for all Employees

Have a Legal Question? In an effort to make more resources available to Amtrak employees, the Amtrak Law department has launched an updated Intranet page and is publishing a new newsletter.

The Intranet page contains a wealth of information of value for Amtrak employees who work in every department of the corporation, and employees can access the new page here: **Law Department Intranet.**

Amtrak employees can find answers to questions such as:

- What to do if an employee is contacted by an attorney or receives a legal document for litigation involving Amtrak;
- How to gain access to company bylaws; and
- Who to call if an employee needs to speak with an attorney about work-related legal questions.

In addition to the updated Intranet page, the Law department will be distributing a newsletter where topics of general legal interest will be addressed. The newsletter includes information about the legalities of Amtrak's business and a schedule of training sessions available to different employees. The newsletter will be found on the new Intranet page along with issues of the Labor & Employment newsletter that has been published for over fifteen years.

Visit the Law Department Intranet page under the How We Work tab on Amtrak's Intranet home page to check out the updated page, frequently asked questions, contact information and archived editions of the law newsletters.

Ebola Preparedness

Amtrak medical, public health, and emergency management teams continue to closely monitor recent developments regarding the Ebola virus.

For current information about Amtrak's preparations, answers to frequently asked questions and what you can do to help keep our passengers and employees safe, please refer to Amtrak's Ebola Update Intranet webpage. You can also go directly to the site <http://wiki.corp.nrpc/display/ebola/Home>. It will be updated regularly with current information.

New Amtrak IDs Coming Soon

Recently, all Amtrak employees and contractors submitted their photo to be used for their new Amtrak ID badges.

In the next few weeks, all Amtrak employees and contractors will receive notification on where and when to pick-up your new Amtrak ID badge through posters displayed throughout the workplace.

To pick up your new Amtrak ID badge, you must present your current Amtrak ID and a valid government photo ID for validation.

Remember, it is your responsibility to pick-up your new Amtrak ID badge. Amtrak ID badges will not be mailed.

When you receive your new Amtrak ID, you will need to carry both the old and new Amtrak ID at all times until the transitions to the new ID badge system are complete. This is scheduled to take place in mid-November. Once the new Amtrak ID system is active, all old Amtrak IDs will no longer work.

If you have questions or would like additional information, please visit the Amtrak Smart ID intranet site: <http://wiki.corp.nrpc/display/SmartID/Home>.

Please keep an eye out for the Amtrak ID pick-up location posters.

Lean Six Sigma Survey

This is an exciting time at Amtrak and the perfect time to get the word out about incorporating lean six sigma (LSS) and/or process improvement practices into your daily activities. LSS practices will help Amtrak

further deliver Financial Excellence, one of our three strategic goals, through the elimination of process waste. Amtrak's ultimate goal is to create a culture of continuous improvement in order to

make us more efficient and cost effective, which will drive profitability.

The Human Capital department encourages you to take the [LSS Participation Survey](#), so that they can gather some information about your experiences with LSS and/or process improvement activities with Amtrak. If you have received training in the past (whether internal or external to Amtrak) please complete the survey by close of business on Nov. 4. If you are not familiar with LSS methodologies or have never received training as a green/black belt then there is no need for you to complete this survey. However, if you are interested in LSS please join the [Community of Practice \(CoP\)](#) group. This group meets monthly and will serve as a community to share current LSS and continuous improvement projects, experiences, tools, training and best practices.

You are urged to start thinking about how you can influence your LSS experience to impact the Amtrak Strategy. If we all work together as LSS practitioners it will help move each of us – and Amtrak as a whole – forward on our journey of continuous improvement. The objective is a full implementation of LSS as an important part of Human Capital's transformation of our organization.

Amtrak Law Department: 101

Did you know the Amtrak Law department handles over 1,000 legal matters each year?
From legal questions that arise in day-to-day

operations to matters pending in court, the Law department consists of nine various practice areas, each working in tandem to keep the railroad running. Here's a glimpse of each practice area within the department and their center of expertise:

- **Office of the Corporate Secretary** - The Office of the Corporate Secretary serves as the liaison between Amtrak's management and the Board of Directors
- **Corporate Affairs Group** - The Corporate Affairs group advises on commercial and regulatory issues. It is divided into two teams: the Commercial Transactions team and the Railroad Operations Support team.
- **General Litigation Group** - The General Litigation group handles any legal proceeding in which Amtrak is involved – from simple small claims to complex matters that involve constitutional issues or class-action lawsuits.
- **Claims Group** - The Claims group handles passenger claims, investigates all incidents, interviews the claimants and witnesses and collects facts and evidence to support Amtrak's defenses.
- **Freedom of Information Office** - Amtrak is subject to the Freedom of Information Act (FOIA) even though it is not a

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

federal agency. The FOIA Office handles requests for records submitted under FOIA and ensures that Amtrak meets the requirements set forth by Congress.

- **Records Information Management Group** -The Records Information Management group oversees the maintenance of all Amtrak business records, sets policies and develops and approves processes. This ensures compliance with legal and regulatory directives while maintaining the integrity of the records management system.
- **Environmental and Sustainability Group** -The Environmental and Sustainability group works to maintain environmental compliance and advance sustainability within Amtrak.
- **Public Health Group** -The Public Health group upholds proper food safety and sanitation standards by providing guidance on complying with applicable state and federal laws and regulations. They integrate sound principles and practices into Amtrak's daily business decisions and operations.
- **Office of Disciplinary Investigations** -The Office of Disciplinary Investigations is responsible for conducting all disciplinary investigations of agreement-covered employees except employees covered by the Fraternal Order of Police. It is staffed by Hearing Officers and Administrative Assistants who perform functions very similar to a civil court or alternative dispute resolution system.

To learn more about Amtrak's Law department read [Behind the Fine Print](#). "Newly launched to enhance employee understanding of the legal issues and laws that impact Amtrak, the newsletter provides informative and interesting articles that pertain to Amtrak and its unique business operations," said Byl Herrmann, Amtrak Managing Deputy General Counsel.

In addition to the newsletter, visit the Law department's web page on the company Intranet at:
<http://epmoweb20p/sites/LDI/SitePages/Homepage2.aspx>

If you have a suggestion for future editions of *Behind the Fine Print*, please contact Richard Kim at: Richard.Kim@amtrak.com.

New Station Opens in Troy, Michigan

On October 14, representatives from the city of Troy, Amtrak, the Michigan Department of Transportation and other organizations, cut the ribbon on the new \$6.3 million Troy Transit

Center, which brings together the services of Amtrak, Suburban Mobility Authority for Regional Transportation (SMART) buses and taxis. Fully funded through a federal High Speed Intercity Passenger Rail grant, the new facility replaces the former station, an enclosed shelter, located across the tracks in Birmingham.

Designed by local architectural firm Neumann/Smith, the one story, 2,000 square foot brick building includes a waiting room and restrooms. Large expanses of glass allow natural light to flood the interior. Passengers may take advantage of free Wi-Fi and vending machines. A pedestrian bridge over the tracks allows access to the western platform and protects passengers

The Troy Transit Center is served by Amtrak *Wolverine* service, running daily between Chicago and Pontiac, Michigan. To learn more about the history of Troy and Birmingham, visit www.GreatAmericanStations.com.

Utilities Policy Reminder

Following proper utilities bill processing procedures is critical in ensuring prompt payment of invoices and preventing discontinued electricity, water and natural gas service due to non-payment of invoices. P/I Number 8.28.2 Section 5.0 will guide Amtrak managers via e-Trax to open or close utility accounts correctly, which is especially important when starting a new utility service.

If the procedure is not followed, the utility company will send the monthly invoice to the service location or our corporate headquarters. By the time the invoice gets to the right place, the utility company may have shut off service for non-payment or charged us late fees which could be up to 10 percent of the bill total. You may view the policy here:

<http://wiki.corp.nrpc/download/attachments/3585/8.28.1+Utilities+Processing.pdf?version=1&modificationDate=1302195448327>

Confidential Close Call Reporting System (C3RS)

Amtrak has many safety programs to help us reduce risk, the most common of which is Safe-2-Safer. Another program you may not be as familiar with is the Confidential Close Call Reporting System (C3RS). This is a Federal Railroad Administration (FRA) sponsored pilot program currently being implemented in the Transportation and Mechanical departments in select locations at Amtrak.

The Engineering department will be meeting soon to examine the feasibility of starting a C3RS pilot program of their own. The program encourages employees to confidentially share information about unsafe events with a third party. The National Aeronautic Space Administration (NASA) is the third party for this program.

Employees submit a close call report to NASA, who then interviews the employee to collect additional details, removes any information that could be linked to the employee and then shares the report with an Amtrak Peer Review Team (PRT). The PRT is

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Please Pick Up Your Smart ID Today

The switch to the New Amtrak Smart ID badges occurred this past Saturday December 6, 2014.

All employees should have their new Amtrak Smart ID badge. It is your responsibility to pick up your new badge. If you haven't, the Amtrak ID Refresh team is offering you one last chance to do so. The team is in the Starlight Room today and will be there through Wednesday from 8:00 a.m. to 4:00 p.m.

Please note:

- Employees must present their current Amtrak ID badge for validation when picking up the new Amtrak ID badge.
- Contractors must present their current Amtrak ID badge and a valid government photo ID for validation.
- Information on the collection of old ID badges will be available soon.

If you have any questions about the new Amtrak Smart ID badges, please call the Smart ID Refresh Help Desk at **202-906-2239**. You can also email IDRefresh@amtrak.com with any questions.

NOTE: Your new Amtrak Smart ID badge may take a few minutes to register when you first swipe it. If it does not work the first time, please try again after one minute. If this continues, please call the Smart ID Refresh Help Desk at 202-906-2239.

A Message from Joe Boardman

Dear Co-workers,

At the meeting of the Amtrak Board of Directors this week, I informed them of my intention to retire from Amtrak in September 2016. At that time, I will have served nearly eight years as the President and CEO of our company. When I look back at this time, I see so many accomplishments and so many changes we made to make America's Railroad a stronger, safer and a more important part of our nation's transportation system.

For those of you who know me, you know a decision like this is something that I spent a lot of time considering. Yet, I think in the railroad business, all of us know when it's time to retire. I hear this often from you when I travel around the system. It's not easy to find people to work in an environment that is as demanding as running a railroad and providing good customer service. One of the reasons why I gave our Board notice so far in advance of my planned retirement is because I want them to have the time to think about the next leader they will select and have a chance to think about the kinds of qualities this leader will need as we move forward. Having served on the Board prior to my time as CEO, I know that the selection of a President and CEO of Amtrak is perhaps the single most important decision that a Board can make.

The other reason why I want to work well into 2016 is because there are things I want to get done on my watch and they include critical and important investments both in the future of our service and the safety of our railroad. Early next year, we expect to place an order for the next generation of high speed trainsets in North America. When they are delivered they will instantly add capacity and the newest technology available to our passengers. The introduction of that service will drive the future and the brand of Amtrak to new heights just as Acela did 15 years ago. I wanted very much to be a part of that accomplishment. I also want to make sure that by the time I left we had all the new ACS-64 electric locomotives delivered and operating. Finally, there will still be some work in 2016 to advance PTC implementation on sections of the railroad which we own outside of the NEC. As I have said, there is no greater contribution that my generation of railroaders can make to the safety of our industry than full implementation of PTC.

Amtrak is a remarkable story and it is so because of the people who work here--people who put their entire life's work into this company; people who go out in the middle of the night to rescue a train; people who deal with sick passengers; people who simply make a difference. I have tried to live and manage by these values as well. Over the next nine months, I expect to spend a large amount of my time at the facilities, crew bases and on the trains that we operate all around this country. We have an exciting future and I truly believe some of our best days lie ahead.

The Board has asked me to work closely with them in the selection of the new CEO. I am confident that the time I have given the Board they can

achieve the goal of selecting a good leader for this company and provide a level of transition that a company like Amtrak deserves. In the meantime, there is a lot of work that needs our attention and I ask you to stay focused and work safely.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Boardman". The signature is fluid and cursive, with a long horizontal stroke at the end.

A Message from Stephen J. Gardner

Dear Co-workers,

I am pleased to announce an update to our organizational structure. As of January 1st, 2015, the Real Estate Development department has been realigned under NEC IID, reporting directly to Bob LaCroix, Deputy Chief of Development. This change helps unify our collective efforts to leverage our nationwide infrastructure, stations and other assets to improve quality and performance, gain strategic and financial value, and maximize net returns to Amtrak.

This combination is a critical step towards the evolution of a corporate development business line described in Amtrak's Strategic Plan, which is intended to serve as a steward of Amtrak's infrastructure and facilities, and responsible for leading the planning, development, acquisition, disposition, access arrangements and other functions related to such assets. Further actions related to standing up this new business line, including the development of its full scope and official final name, will come as the year progresses.

Please share this message with your teams and direct reports. We will continue to keep you informed as we reach other important milestones. Thank you for your support and continued hard work in supporting our mission and Amtrak's success.

Sincerely,

Stephen J. Gardner
Executive Vice President and Chief

A Message from Joe Boardman

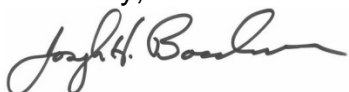

Dear Co-workers,

It is with great sadness that I share with you the news of the passing today of our colleague, Amtrak engineer, Glenn Steele. Glenn was critically injured last week while performing his duties operating a Metrolink train from Ventura, CA to Los Angeles that struck a utility truck. That incident injured 28 passengers and two other Amtrak crew members, both of whom were treated and later released. The incident remains under investigation by the National Transportation Safety Board.

Glenn joined Amtrak in 1986 and worked as an engineer, spending most of his career at California's Metrolink. He was the longest tenured engineer among Metrolink operators, and was so highly regarded that he often was asked to train student engineers.

This is a difficult time for both Amtrak and Metrolink as we mourn the loss of one of our own. Please join me in extending our deepest sympathies to the Steele family. Please keep them, as well as Glenn's many friends and co-workers, in your thoughts and prayers.

Sincerely,

Joe Boardman
President and CEO

Measles Update

Many of you may be aware that a passenger, later confirmed to have measles, traveled on the Empire Service train 283 from New York Penn Station to Rhinecliff, New York, on Sunday, January 25, 2015. Amtrak was notified of the incident last Friday evening by the New York State Department of Health (NYSDoH), in conjunction with a news release they distributed throughout New York.

https://www.health.ny.gov/press/releases/2015/2015-01-30_measles.htm

We worked closely with the NYSDoH and the Centers for Disease Control (CDC) throughout the weekend and followed their recommendations. We also distributed a message to employees along the Northeast Corridor so they were aware of Amtrak's response to the incident, and where they could go for further information. We encouraged our employees to follow up with their healthcare providers and to remain alert for symptoms over the next two weeks. We continue to monitor the situation.

This latest incident, as well as the recent rise in the number of reported cases of measles throughout the United States, should serve as a timely reminder for employees to review/verify their immunization status by checking their records with their healthcare provider. Employees with questions about the measles virus should contact their healthcare provider or refer to the CDC website:

<http://www.cdc.gov/measles/index.html>

The safety of our passengers and crew members is our top priority. Our Public Health and Medical Teams actively monitor the latest developments on public health issues that have the potential to affect our passengers and crew. We never know when or where the next incident will occur, which is why we must be prepared. Those who work closely with passengers and customers especially should take the opportunity to review the protocols and plans Amtrak has in place for addressing contagious disease outbreaks, including measles. These protocols and plans provide detailed instructions on how employees should interact with sick passengers and outline the steps for notifying appropriate parties within Amtrak. Employees can visit the Intranet public health page to learn about these protocols

<http://wiki.corp.nrpc/display/PublicHealth/Health+-+Public+Health>

Amtrak Public Health Staff members are also available should you have an urgent question regarding the management of an ill passenger or coworker:

A Message from Joseph Boardman

Dear STI Participants,

I have some disappointing news that you are likely expecting at this point: We are not going to have a payout of our Short-Term Incentive (STI) plan for fiscal year 2015.

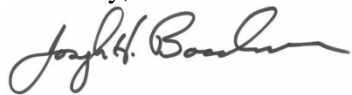

As I shared with you last week, we did not meet our financial or customer satisfaction targets for the year – and these were our two main incentive goals for 2015. The major reason why we are arriving at this outcome is our financial performance. At the start of the year, we committed to achieving a Normalized Adjusted Operating Loss of no worse than \$235M – and we fell \$59M short of our goal. We need to recognize that an important reason why we missed our financial target was due to a factor completely within our control – our operating expenses were much higher than originally planned.

We simply cannot have our expenses outpace our revenues at this rate to deserve an incentive payout. Looking at customer satisfaction, more than 77% of our customers who responded to surveys did say they were very satisfied with Amtrak – but this is essentially the same number as last year, and almost a full percentage point short of our FY 2015 target. Our customers have choices, and we need to keep getting better in making the case they choose Amtrak every time.

I share your disappointment in this result. I ask that you keep the faith in this program. We need to operate at a higher level as an enterprise. The best way to reach this level is to make sure we all feel a personal connection between ourselves and the company. Our STI program helps create this connection, by ensuring that part of our compensation is tied to our business results. I also ask that you take the long view. In years where we perform well and achieve our targets, we will be rewarded.

Building a strong year starts with today. Let's focus on 2016. Very soon, we will be sharing more detail on the FY 2016 STI program. In the meantime, I ask that you continue to work safely, take care of our customers, and help us be good financial stewards.

Sincerely,

Joe Boardman
President and CEO

A Message from DJ Stadtler

Managers,

Please remind your employees to travel and operate safely, especially given this week's severe weather across different parts of the country. Employees need to be mindful of the conditions around them, keeping eyes on path and three points of contact when possible. Safety first.

Given the impact on mission requirements, managers should consult with their immediate supervisor before authorizing telework, liberal leave/vacation or modified work schedules for their teams.

Sincerely,

DJ Stadtler
Executive Vice President and
Chief Operations Officer

Supervisors, please ensure this message is shared with your employees.

Amtrak was notified Friday evening by the New York State Department of Health (NYSDoH) that a passenger later confirmed to have measles traveled on the Empire Service train 283 from New York Penn Station to Rhinecliff, New York, on Jan. 25. Here is a link to the news release from the New York State Department of Health:

https://www.health.ny.gov/press/releases/2015/2015-01-30_measles.htm.

The safety of our passengers and crew members is our top priority. We've been working closely with the NYSDoH and the Centers for Disease Control (CDC), who have responsibility for notifying passengers and crew who were exposed to the virus.

Based on recommendations from the NYSDoH and CDC, we are not restricting our train or station crews from work. We have contacted the onboard crew for that particular train and encouraged them to follow up with their primary care physicians and to remain alert for symptoms over the next two weeks. We also recommend that any employee with questions about the measles virus contact their healthcare provider or refer to the CDC website: <http://www.cdc.gov/measles/index.htm>

Amtrak's Public Health and Medical Teams continue to monitor the situation closely. We will provide further updates as needed.

A Message from Matt Hardison

Dear Co-workers,

Amtrak's 2014 National Train Day was widely regarded as a success, thanks to the hard work of our employees and volunteers across the nation. Over 313 communities held events across all 50 states including 153 events held at Amtrak stations. These local celebrations engaged more than 500 Amtrak employee volunteers and welcomed local community leaders and dignitaries across the nation as key speakers and participants. Trains, train travel, communities and Amtrak were all celebrated.

The growing success of National Train Day has made it clear that a one-day event does not do justice to the communities we support and the resources that an event like this demands. In 2015, the program is evolving from a single-day celebration to a traveling, multi-market experience that will take place one market at a time under the new name of **Amtrak Train Days**.

Amtrak Train Days (ATD) will focus on the Amtrak brand, integrate our Exhibit Train at many events and encourage target audiences to learn about Amtrak and try out our service. By spreading the program from spring until fall, we will be able to support each event more effectively and efficiently.

From spring until fall, ATD will demonstrate why "Trains Matter" by sharing with the local communities we serve the 'reasons to ride' the train. Amtrak Train Days will capitalize on a combination of tools - a dedicated tour of the Exhibit Train in select markets, an Amtrak experiential footprint at sponsored events, and an ATD Kit-in-a-Box toolkit to support local community celebrations.

Amtrak Train Days will officially kick off on May 9, 2015, in Chicago Union Station. This event will mark the first stop of the Exhibit Train tour. Local stations, partners and communities from across the nation will be invited to join in the national celebration of trains and train travel by hosting their own events. Importantly, all events **are not** expected to take place on the same day as has been done in the past, but they can be timed to coincide with other train festivals and community events. Amtrak will continue to offer event toolkits (ATD Kit-in-a-Box) to those who are interested and by request.

To promote your station and the route(s) that serve your community, the Amtrak Train Days team will once again work with you to coordinate a 2015 event to be held in your community. Whether on May 9, as part of the kick-off, or on another chosen date, you will receive support to:

- Partner with local businesses and universities who directly benefit from our stations and services to spread the "Trains Matter" message and encourage attendance to the local event.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

January 6, 2015 • Page 2 of 2

- Customize events to each region by incorporating route-specific elements that celebrate the specific train(s) serving each community.
- Capitalize on the ATD Kit-in-a-Box toolkits that will include Amtrak branded printed materials, posters, and giveaways. These resources will make it easier to promote your local event without additional publication or production expenses.

If you or someone in your community wants to hold an event, let us know. Amtrak's Train Days event team and agency, LeadDog Marketing Group, will reach out to you to share further Amtrak Train Days 2015 details to help you plan and coordinate your event.

We remain committed to driving train service awareness and ridership, reach new audiences in smaller communities nationwide and reinforce the importance, benefits and value of rail. This exciting next step will allow us to broaden our reach, deepen our conversation with existing and potential customers, and expand our presence in market.

We appreciate your ongoing participation and support in this important endeavor. If you have questions, please contact the ATD Program Manager, Jerome Trahan, by e-mail at TrahanJ@amtrak.com or by telephone at 202.906.4622.

Sincerely,

Matt Hardison

Amtrak Train Days will officially kick off on May 9, 2015, in Chicago Union Station. Local stations, State partners, rail industry colleagues and communities from across the nation will be invited to join in the celebration of train travel by hosting their own events. Importantly, all events **are no longer** expected to take place on the same day; instead ATD events can be timed to coincide with other train festivals and community events.

To promote your station and the route(s) serving your community, the Amtrak Train Days team will work with you to coordinate a 2015 event in your community. Whether on May 9, as part of the kick-off, or on another chosen date, you will receive support to:

- Partner with local businesses and universities who directly benefit from our stations and services to spread the "Trains Matter" message and encourage attendance to the local event.
- Customize events to each region by incorporating route-specific elements that celebrate the specific train(s) serving each community.
- Capitalize on the ATD Kit-in-a-Box toolkits that will include Amtrak branded printed materials, posters, and giveaways. These resources

will make it easier to promote your local event without additional publication or production expenses.

If you or someone in your community wants to hold an event, let us know. We will reach out to you to share further Amtrak Train Days 2015 details to help you plan and coordinate your event.

We are committed to driving continued support for Amtrak and ridership throughout our network. Amtrak Train Days helps us achieve these goals through strengthening community goodwill, reaching new audiences in Amtrak-served communities, and reinforcing the importance, benefits and value of passenger train travel.

We appreciate your ongoing participation and support in this important endeavor. If you have questions, please contact the ATD Program Manager, Jerome Trahan, by e-mail at TrahanJ@amtrak.com or by telephone at 202.906.4622.

Sincerely,

Matt Hardison

A Message from Joe Boardman

Dear Co-workers,

At the meeting of the Amtrak Board of Directors this week, I informed them of my intention to retire from Amtrak in September 2016. At that time, I will have served nearly eight years as the President and CEO of our company. When I look back at this time, I see so many accomplishments and so many changes we made to make America's Railroad a stronger, safer and a more important part of our nation's transportation system.

For those of you who know me, you know a decision like this is something that I spent a lot of time considering. Yet, I think in the railroad business, all of us know when it's time to retire. I hear this often from you when I travel around the system. It's not easy to find people to work in an environment that is as demanding as running a railroad and providing good customer service. One of the reasons why I gave our Board notice so far in advance of my planned retirement is because I want them to have the time to think about the next leader they will select and have a chance to think about the kinds of qualities this leader will need as we move forward. Having served on the Board prior to my time as CEO, I know that the selection of a President and CEO of Amtrak is perhaps the single most important decision that a Board can make.

The other reason why I want to work well into 2016 is because there are things I want to get done on my watch and they include critical and important investments both in the future of our service and the safety of our railroad. Early next year, we expect to place an order for the next generation of high speed trainsets in North America. When they are delivered they will instantly add capacity and the newest technology available to our passengers. The introduction of that service will drive the future and the brand of Amtrak to new heights just as Acela did 15 years ago. I wanted very much to be a part of that accomplishment. I also want to make sure that by the time I left we had all the new ACS-64 electric locomotives delivered and operating. Finally, there will still be some work in 2016 to advance PTC implementation on sections of the railroad which we own outside of the NEC. As I have said, there is no greater contribution that my generation of railroaders can make to the safety of our industry than full implementation of PTC.

Amtrak is a remarkable story and it is so because of the people who work here--people who put their entire life's work into this company; people who go out in the middle of the night to rescue a train; people who deal with sick passengers; people who simply make a difference. I have tried to live and manage by these values as well. Over the next nine months, I expect to spend a large amount of my time at the facilities, crew bases and on the trains that we operate all around this country. We have an exciting future and I truly believe some of our best days lie ahead.

The Board has asked me to work closely with them in the selection of the new CEO. I am confident that the time I have given the Board they can

special employee advisory

December 9, 2015 • Page 2 of 2

achieve the goal of selecting a good leader for this company and provide a level of transition that a company like Amtrak deserves. In the meantime, there is a lot of work that needs our attention and I ask you to stay focused and work safely.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Boardman".

A Message from Joe Boardman

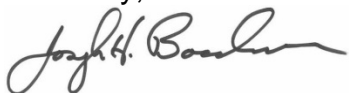

Dear Co-workers,

It is with great sadness that I share with you the news of the passing today of our colleague, Amtrak engineer, Glenn Steele. Glenn was injured last week while performing his duties operating a Metrolink train from Ventura, CA to Los Angeles that struck a utility truck. That incident injured 28 passengers and two other Amtrak crew members, both of whom were treated and later released. The incident remains under investigation by the National Transportation Safety Board.

Glenn joined Amtrak in 1986 and worked as an engineer, spending most of his career at California's Metrolink. He was the longest tenured engineer among Metrolink operators, and was so highly regarded that he was often asked to train student engineers.

This is a difficult time for both Amtrak and Metrolink as we mourn the loss of one of our own. Please join me in extending our deepest sympathies to the Steele family. Please keep them, as well as Glenn's many friends and co-workers, in your thoughts and prayers.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

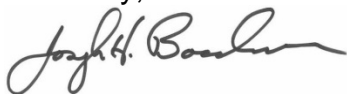

Dear Co-workers,

This afternoon, Amtrak Train 80, the *Carolinian*, struck a truck on the tracks at a grade crossing approximately 30 miles north of Rocky Mount, NC. The train was operating from Charlotte to New York. There were 212 passengers and eight crew members on board.

Local police and EMS responded to the scene. Initial reports are that several passengers have been injured and taken to local medical facilities for treatment. Thankfully, none of the injuries appear life threatening at this time. We will update you if the situation changes.

There is an ongoing investigation into the incident.

Sincerely,

Joe Boardman
President and CEO

March 26, 2015 • Page 1 of 1

A Message from Joe Boardman

Amtrak faces high—and rapidly rising—costs to fund our pension and retiree medical plans. These retirement benefits have historically been generous, yet they have also positioned Amtrak as an outlier compared to our competitors.

These facts have led us to the conclusion that our company can no longer sustain the growing financial burden of our retirement benefits.

Based on thorough analysis of current and projected costs to our business, as well as ensuring Amtrak's continued financial health, we have identified some necessary actions. These changes will help stabilize our rapidly rising benefit costs, help us re-invest in our business and people and position us to more effectively compete for (and win) new business. These changes are consistent with other companies in our industry and other for-profit companies.

Even after these changes are implemented, Amtrak will still offer a strong and attractive Total Rewards package to our employees.

The Amtrak Board of Directors recently approved the following changes to Amtrak's retirement program for non-agreement employees and non-agreement retirees:

1. Amtrak Retirement Income Plan (Pension)

Amtrak will “freeze” benefit accruals in the Amtrak Retirement Income Plan on June 30, 2015 for eligible, non-agreement employees. Following this date, employees will not accrue additional benefits under the plan, but they will not lose any benefit earned to date. Benefits through the Railroad Retirement Board (RRB) will continue unchanged.

2. Retirement Savings Plan – 401(k)

Amtrak will increase its maximum company match on employee contributions. Beginning with the July 3, 2015 paycheck, Amtrak will match employee contributions dollar for dollar, up to 7 percent – an increase from the current 5 percent company match.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

March 26, 2015 • Page 2 of 3

3. Retiree Medical

Amtrak will continue to provide access to comprehensive retiree medical coverage for all retirees and most employees, but how this coverage is provided and paid for will change:

*** Post-age 65 Coverage** – Beginning July 1, 2015, current eligible post-age 65 retirees will no longer be enrolled in the existing Amtrak medical plan options. Instead, Amtrak will provide an annual subsidy to current eligible post- age 65 retirees and, upon retirement, to eligible employees who were age 50 or older on July 1, 2015 to help them purchase post-age 65 coverage through a private health insurance exchange. Medicare will continue to be the primary source of medical benefits.

	Annual Subsidy
Current Retirees (as of June 30, 2015)	\$4,800/retiree and \$4,800/spouse
Employees Age 50 and Over on July 1, 2015	\$4,800/retiree and \$2,400/spouse
Employees Under Age 50 on July 1, 2015	Access only – retiree pays the full cost

*** Pre-age 65 Coverage** – Amtrak will provide the same pre-age 65 medical coverage available today to retirees and, upon retirement, to eligible employees age 50 and over on July 1, 2015. Amtrak retirees will continue to share the cost for coverage. Employees under age 50 on July 1, 2015 will have access to pre-age 65 medical coverage, but will pay the full cost for coverage.

*** Eligibility** – The eligibility for the retiree medical plan will also change from age 55 with five years of service to age 55 with 10 years of service, or to age 60 with five years of service for those who retire on or after July 1, 2015.

If you were hired or transferred from an agreement position to a non-agreement position on or after April 1, 2013, you are not eligible for the Amtrak Retirement Income Plan or the Retiree Medical Plan. As a result, the changes to these plans do not impact you. However, you will be eligible for the increased company match into the Retirement Savings Plan – 401(k).

special employee advisory

March 26, 2015 • Page 3 of 3

Amtrak will continue to make a substantial investment in our retirement program—including Amtrak's contributions to the Railroad Retirement Board (RRB) benefits and the increased 401(k) match. These changes provide us with a more predictable way of managing risk and funding of our program while continuing to provide a competitive retirement benefits program. Amtrak continually evaluates its benefit offerings to ensure its competitive position and ability to attract and retain talent, and reserves the right to modify its benefit offerings at any time and for any reason.

What Happens Next

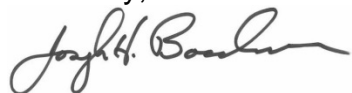

This letter is only a summary of the upcoming benefit changes. In the coming weeks, we will provide additional information about online tools, webinars, face-to-face meetings and one-on-one counseling to help you evaluate your options and make decisions on planning for your financial future.

Pension benefit statements will be mailed by the week of April 6, 2015 to non-agreement employees who are eligible to retire as of June 30, 2015. Generally, to be eligible to receive your Retirement Income Plan benefit, you must meet the minimum age (55) and Amtrak service (five years) requirements or be age 65.

Specially trained representatives are available to answer your questions about the 2015 Amtrak Retirement Program Changes. If you have any questions, please contact the Amtrak Benefit Service Center at 800-481-4887 (Monday – Friday, except holidays, 8 a.m. – 6 p.m., Eastern Time).

Thank you for your support as we implement this critical change for our business.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I'm proud to share that Amtrak has been named to the first-ever ["America's Best Employers 2015"](#) list issued by *Forbes* magazine. We're honored to be recognized on this list of the 500 largest corporations and institutions representing the private and public sectors in the U.S..

In the field of transportation and logistics, we're in the good company of respected organizations including CSX, Union Pacific, BNSF Railway, Norfolk Southern and Southwest Airlines.

Selection to the list was determined through an anonymous survey in which more than 20,000 people were asked how likely they were to recommend their employer to someone else, as well as suggest other employers in their industry.

We were also recently recognized on the annual "Military Friendly® Top 100 List" published in *G.I. Jobs®*, *Military Spouse* and *Vetreprenuer* magazines and on the "2015 STEM JobsSM Approved Employer" list by Victory Media, which connects professionals in transition with education and career opportunities.

In my more than six years as the head of Amtrak, I have met many of you in our offices, stations, shops and onboard trains. Your thoughtful suggestions for improving Amtrak never cease to amaze me and are true signs of your dedication to the company and our success.

Listening to you leaves a strong impression of our workforce and its motivations. Amtrak employees are diverse, multitalented and welcoming. We are continuously improving America's Railroad® by leveraging the expertise of the people who know our business and our industry best: you.

Amtrak is integral to a rich American railroad tradition that dates back almost two centuries. It's not hard to find employees whose parents, grandparents and other relatives were involved in the industry. Once part of the railroad family, you remain so forever.

Based on this proud past and present, we are laying the groundwork for the passenger rail system of the future. Our vision incorporates renewed infrastructure, next-generation equipment, reimagined stations and an enhanced customer experience.

Emergency Wardens

Emergency Management and Corporate Security (EMCS), Headquarters Facilities and IT Safety and Facilities are looking for your assistance to help provide a safe workplace.

We are in the process of re-establishing the Emergency Warden program for 40 Massachusetts Ave., 60 Massachusetts Ave. and 10 G Street buildings. This process will include a more structured training program that will standardize information and procedures in the event of a workplace emergency.

If you are a current emergency warden or are interested in becoming one, please join us for one of the upcoming information sessions. The information session will take no more than one hour. Sessions are assigned by work location.

- 40 Massachusetts Ave employees – January 7, 2015 at 10:00 a.m.
40 Massachusetts Ave. Conference room L, room 3W 127
- 60 Massachusetts Ave employees - January 7, 2015 at 11:00 a.m.
40 Massachusetts Ave. Conference room L, room 3W 127
- 10 G Street employees – January 7, 2015 at 1:00 p.m.
10 G Street Conference room 10, 4th floor, 4W-143

Thank you in advance for your support. Please contact Steven Fruchtman or your building facilities staff with any questions.

January 12, 2015

Philadelphia 30th Street Station District Plan

Open House

Calling all Amtrak 30th Street Station Staff! You are invited to attend an open house this month for the Philadelphia 30th Street Station District Plan.

The open house will be held on Wednesday, January 28, on the main concourse at 30th Street Station (30th Street Side) from 4-7 p.m. There will be no formal presentation, but members of the project team will be on hand to answer questions and provide information.

This event is an opportunity for you to learn about the District Plan, meet the project team, ask questions and provide input. As day-to-day users of the station, your input into the planning process is extremely valuable. We thank you in advance for your support and hope to see you at the open house.

Amtrak is currently working with Brandywine Realty Trust, Drexel University, SEPTA and a host of area stakeholders on a joint planning effort focused on creating a single integrated vision for the area surrounding 30th Street Station as a dynamic neighborhood anchored by a world-class transportation hub.

For additional information on the District Plan, please visit www.PhillyDistrict30.com or contact Danelle Hunter at ATS 728-2176 for more information on the open house.

January 20, 2014

Prepare To Collect Old ID Badges

All Amtrak managers/supervisors,

Now that Amtrak's new Smart ID badges have been distributed, old Amtrak ID badges should not be used for any purpose (e.g., access to facilities, riding privileges, or employee identification, including clocking in/out).

A corporate-wide notice will be sent tomorrow informing all employees to return their old Amtrak ID badges to their respective manager/supervisor. Please be prepared to collect these badges from your direct reports and contractors.

Please mail the old ID badges to the Smart ID office at the address listed below by Friday, January 30, 2015.

ATTN: Smart ID Office
40 Massachusetts Ave., NE
Washington, DC 20002

For any questions, please contact the Smart ID office via e-mail at SMARTID@amtrak.com or phone at 202-906-3639.

January 21, 2014

Please Return Your Old Amtrak ID Badges

All Amtrak employees and contractors,

Thank you for your participation in Amtrak's recent Smart ID refresh effort. Now that Amtrak's new Smart ID badges have been distributed, old Amtrak ID badges should not be used for any purpose (e.g., access to facilities, riding privileges, or employee identification, including clocking in/out).

All old Amtrak ID badges must be collected and returned by Friday, January 30, 2015.

Please return your old Amtrak ID badge to your respective manager/supervisor or mail it directly to the Smart ID office at:

ATTN: Smart ID Office
40 Massachusetts Ave., NE
Washington, DC 20002

For any questions, please contact the Smart ID office via e-mail at SMARTID@amtrak.com or call 202-906-3639.

March 11, 2014

Emergency Notification Beacon Installation

All 40 and 60 Mass Amtrak employees and contractors:

Please be advised that Alertus Emergency Notification Beacons will be installed on the wall facing the elevators on all floors in 40 and 60 Mass offices beginning the week of ???

The beacon is small yellow plastic box that measures 7" x 6". The beacons flash, sound an audible tone and display a text message when an emergency alert message is received. The Alertus devices are widely used for mass notification on college campuses, office buildings and large industrial facilities.

The beacons will be tested for a ninety (90) day period to determine if they will be used in other Amtrak facilities.

For any questions, please contact the Chris Bello of EMCS at ATS 777-2243.

January 20, 2015

40 Mass. Elevator 1 – Out of Service

Elevator 1 in the 40 Massachusetts Ave. building is temporarily out of service. Please note this is the elevator that services B floor (Basement).

Repairs will be done tonight. The elevator is expected to return to service by 6 a.m. tomorrow.

January 8, 2015

Do Not Use East Stairs at Crossover between 60 and 40 Mass.

Please do not use the East stairway at the crossover between 60 and 40 Mass Ave. buildings until further notice.

Amtrak facilities and building management are working on a maintenance issue at this time.

We will keep you informed when the stairway will be available for use.

January 21, 2014

Please Return Your Old Amtrak ID Badges

All Amtrak employees and contractors,

Thank you for your participation in Amtrak's recent Smart ID refresh effort. Now that Amtrak's new Smart ID badges have been distributed, old Amtrak ID badges should not be used for any purpose (e.g., access to facilities, riding privileges, or employee identification, including clocking in/out).

All old Amtrak ID badges must be collected and returned by Friday, January 30, 2015.

Please return your old Amtrak ID badge to your respective manager/supervisor or mail it directly to the Smart ID office at:

ATTN: Smart ID Office
40 Massachusetts Ave., NE
Washington, DC 20002

For any questions, please contact the Smart ID office via e-mail at SMARTID@amtrak.com or call 202-906-3639.

April 6, 2015

Housekeeping is Safe Keeping at Work

You never get a second chance to make a good first impression. This phrase is true when it comes to housekeeping at work. The negative impressions and implications of poor housekeeping can affect you and co-workers. Morale is lowered for most people who must function every day in a messy, disorderly work environment, although they may not be aware of the cause. Safety is an even more critical issue if your housekeeping habits are poor. The result can contribute to employee injuries and Environmental issues.

Here are some results of poor housekeeping practices:

- Storing objects that could cause a person to trip, fall, strike or be struck by the out-of-place object
- Using improper tools because the correct tool cannot be found
- Improperly storing and disposing of materials and/or waste
- Not cleaning up after the job has finished

General housekeeping rules to remember are:

- Clean up after yourself. Pick up trash and debris. Dispose of trash and debris properly, or place it where it will not pose a hazard to others
- Keep your work area clean throughout the day
- Follow all Environmental Regulations and Policies (Storage, Use and Disposal)
- Use common sense when stacking materials and supplies. Do not stack items too high or stack heavy items onto of things that cannot support them. Also remember to secure items so they cannot topple.

Retirement Benefit Road Shows Coming to You Soon

Amtrak recently announced changes to its retirement program for non-agreement employees. To help you get answers to your questions, members of the leadership team will be conducting Road Shows over the next several weeks at different locations. Road Shows are your opportunity to hear information first-hand, and get answers. Each week we will provide the following weeks locations. For the week of April 13 the scheduled locations include:

Tuesday, April 14 at 10:00 a.m. and noon

Philadelphia, Penn.
30th Street Station
Chapel, 2nd Floor North

Tuesday, April 14 at 3:00 p.m.

Bear – Maintenance Facility
Administration Building
Large Conference room
258 E. Scotland Drive
Bear, Delaware

Wednesday, April 15 at 9:00 a.m. and 11:30 a.m.

Wilmington, Delaware – Mechanical Shop
2nd Floor Conference Room
4001 Vandever Avenue
Wilmington, Delaware

Wednesday, April 15 at 3:00 p.m.

Wilmington, Delaware
Renaissance Centre
405 North King St., 7th floor
Baltimore and Philadelphia Training Room
Wilmington, Delaware

Thursday, April 16 at 10:00 a.m.

Wilmington, Delaware
Amtrak Transportation Training Center
One High Speed Way
Classroom 124
Wilmington, Delaware

Thursday, April 16 at 1:00 p.m. and 3:00 p.m.

Wilmington, Delaware
CNOC/CETC
15 South Poplar St.
CETC Conference Room, 1st Floor
Wilmington, Delaware

Friday, April 17 at 10:00 a.m. and 1:00 p.m.

Washington, D.C.
Washington Union Station
Starlight Room, Gate D
Washington, D.C.

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

Stay tuned for the week of April 20 when we will be on the West Coast. Also look for future emails and work site posters for meeting locations, dates and times.

Webinars Also Available

If you are unable to attend a Road Show in person, you can participate in a webinar. This week's webinar is scheduled for Thursday, April 9 at 1:00 p.m. EST.

To participate:

- Log on: <https://www.teleconference.att.com/amtrak/connectmeeting>
- Meeting Number: 866-209-1307
- Access Code: 2085912

Questions?

Specially trained representatives are available to answer your questions about the 2015 Amtrak Retirement Program Changes. If you have any questions, please contact the Amtrak Benefit Service Center at (800) 481-4887, Monday through Friday, except holidays, from 8:00 a.m. to 6:00 p.m., Eastern Time.

America's PrepareAthon! Begins in April

For the month of April, Amtrak and Federal Emergency Management Agency (FEMA) are teaming up for [America's PrepareAthon!](#) This community-based campaign brings together millions of people to practice the simple steps that will help them get and stay prepared for disasters.

It is important to prepare for a disaster before one happens. Download the [FEMA App](#) today to get started. Make one change this month to better prepare yourself, your co-workers or your family for a disaster. On April 30, look for Amtrak Emergency Management and Corporate Security (EMCS) regional emergency managers located in Amtrak stations across the country hosting a day of preparedness activities. In addition, EMCS will be hanging emergency management posters (Hurricane, Flood, Tornado, Wildfire and Earthquake) in three languages (English, Chinese and Spanish) at the beginning of April.

Have You Met the Amtrak Learning Council (ALC)? Get to Know the Team Working to Improve Learning at Amtrak

With Amtrak's renewed focus on improving learning and development opportunities for all of our employees, we have created the Amtrak Learning Council (ALC). The ALC oversees

learning and development strategy at Amtrak--a critical part of achieving our goals to promote and measurably improve knowledge sharing, professional and technical development, learning and continuous improvement.

By managing learning at Amtrak as a strategic business process, we will create a shared future vision for workforce development that contributes positively to Amtrak's employment brand and the Total Rewards and Integrated Talent Management Strategy. Our goal is to build and sustain a learning culture at Amtrak.

ALC Mission Statement

The Amtrak Learning Council (ALC) meets regularly to share information, make key decisions, coordinate training efforts across the enterprise, and ensure delivery of cost effective, relevant, and engaging training and learning opportunities to Amtrak employees. This process helps to strengthen the "One Amtrak Way" philosophy to ensure:

1. **Alignment**—Manage learning as a strategic business process to make learning a part of achieving Amtrak's business goals
2. **Efficiency**—Ensure training efficiency and gain agreement to identify what training is necessary and prioritize resources
3. **Integration**—Develop an integrated plan to create a culture of learning at Amtrak which supports the "One Amtrak Way"

ALC Members

The ALC is comprised of seven senior leaders who are responsible for driving efforts around learning and development that are aligned with Amtrak's Strategic Plan. Members include:

- DJ Stadtler, EVP, Chief Operations Officer
- Matt Hardison, EVP, Chief Marketing and Sales Officer
- Peggy Reid, Chief of Staff
- Jason Molfetas, EVP Chief Information Officer
- Barry Melnikov, EVP Chief Human Capital Officer
- Scot Naparstek, SVP Operations-OPS Engineering
- Uzma Burki, SVP Organizational Effectiveness and Leadership Development

Members are responsible for identifying and recommending opportunities which further the achievement of Amtrak's business goals; representing the interests of their business/functional unit(s); and providing guidance and communication throughout Amtrak.

More to Come. As we continue on our journey to improve learning and development opportunities at Amtrak, you will hear more about Amtrak's strategy for the future of learning.

Amtrak Train Days- Volunteer at a Celebration Near You

All Aboard Amtrak Employees! In the past seven years, over 300 communities in all 50 states have celebrated their love of trains on National Train Day. Due to the growing success and the concentrated resources required in supporting a one-day celebration, we are evolving this program into a traveling, community-centric experience under the new name of [Amtrak Train Days \(ATD\)](#).

With a theme of "Trains Matter", ATD officially kicks off at Chicago Union Station on May 9. Prior to the kickoff, Amtrak will participate in two community events, Toledo Train Day in Toledo, Ohio on May 2 and at the Fullerton Railroad Festival in Fullerton, Calif., on May 2 -3. With Amtrak Train Days celebrations fast approaching, volunteers will be needed at all events across the country.

It is the dedication, loyalty and pride demonstrated by Amtrak employees at past National Train Day celebrations that will make Amtrak Train Days a success. At select locations, employees can volunteer for specific shifts, and can also participate for the entire day.

Volunteer registration is easy. Simply click on the [company Intranet](#) and select the location and time you prefer. All volunteers will receive a complimentary ATD t-shirt and meal during their shift.

Make Everyday Earth Day

Earth Day, held annually on April 22, is a day filled with events to inspire environmental protection. Visit the [U.S. Environmental Protection Agency's Earth Day Take Action](#) website to find out what you can do to make every day Earth Day. You can find local opportunities to volunteer, read daily environmental tips and even pledge to commit five actions to help protect our planet.

Amtrak Recycles

Amtrak recognizes that our passengers want to recycle, and we are committed to making recycling an integral part of train travel. Currently, we are installing new recycling containers on all

long-distance Superliner I equipment. Our in-house design team created the design and solicited feedback from the Transportation department. Employees at our Beech Grove, Indiana Back Shop

built the recycling containers. With these new containers onboard and in place, passengers and employees can deposit newspapers, magazines, and all beverage containers for recycling. Amtrak also provides recycling containers on the *Auto Train*, *Acela Express* and all *Northeast Corridor* trains (in the Café car).

Behind the scenes, Amtrak is very committed to industrial recycling. Thanks to the strong dedication at each of our facilities, we recycle more than 8,000 tons of industrial materials each year. This includes many unusual items like train windows, mattress foam and pallets. Most recently, we recycled over 14,000 foam seat cushions that could no longer be reused. You can read more about our recycling efforts on the Amtrak Blog.

Questions? Suggestions?

Email askenvironmental@amtrak.com with your input.

April 13, 2015

ASIS Update

The Amtrak Safety Information System (ASIS) is the repository of all injuries/illnesses/fatalities and rail equipment and grade crossing incidents that occur on Amtrak. The ASIS database ensures accurate and timely reporting of these events to the Federal Railroad Administration.

The ASIS system is being updated from April 17 – April 20. After that update, those who need ASIS data will be required to obtain information by cost center rather than the current method of pulling information by division. Please contact your department's budget analyst for cost center information.

The following reports will be available as a result of this enhancement:

ASIS Business Objects:

Safety Snapshot (Report #85)
Man-Hours Ratio by Period (Report #83)
Job Related Absences (Report #56)
RE/GC Form – 97 (Report #13)
Injury/Illness Form – 98 (Report #56)

If any other reports are needed, please contact the ASIS team who will work to obtain them.

Road Shows to Explain Changes in Retirement Benefits

Amtrak recently announced changes to its retirement program for non-agreement employees. To further explain these changes and answer questions, members of the leadership team will be conducting road shows over the next several weeks at different locations. These events are an opportunity to hear information first-hand, ask questions, and get answers. For the week of April 20 the scheduled locations include:

Monday, April 20,
Riverside, California
Riverside Call Center
7920 Lindbergh Drive
Large Conference Room
11:00 a.m.

Tuesday, April 21,
Los Angeles, California- LAUS
810 N Alameda St
3rd Floor, Large Conference Room
10:00 a.m. and 2:00 p.m.

Wednesday, April 22,
Los Angeles, California – Mechanical Yard
2468 E. 16th Street
Preventive Maintenance Facility
Building 25, Conference Room
9:00 a.m. and 11:00 a.m.

Thursday, April 23,
Oakland, California – Mechanical Yard
1303 3rd Street
Transportation Training Trailer (Building 2)
Large Training Room
9:00 a.m.

Oakland, California – Port of Oakland Building
530 Water Street, 5th Floor
Amtrak Conference Room
1:00 p.m.

Friday, April 24,
Seattle, Washington
187 S. Holgate Street, 2nd Floor, North
Columbia River Conference Room
10:00 a.m.

Stay tuned for the week of April 27 when we will be in Chicago. Also look for future emails and work site posters for meeting locations, dates and times.

Webinars Also Available

For those not able to attend a road show in person, a webinar will be offered on **Monday, April 13** at 1:00 p.m. EST. There are a limited number of ports for the webinars. Other scheduled webinars will be announced in Amtrak This Week.

To participate:

Reward Established for Vital Information

It has been nearly 20 years since the derailment of the *Sunset Limited* in Hyder, Arizona on October 9, 1995. Some may remember that this heinous act caused the death of one of our Amtrak employees, Mitchell Bates, and caused injury to many of the 258 passengers aboard the train.

On Friday, April 10, 2015, Amtrak Police Chief, Polly Hanson participated in a joint press conference held in Phoenix, Arizona at the local headquarters of the Federal Bureau of Investigations (FBI) to announce a \$310,000 reward for information leading to the arrest of the person or persons responsible for the derailment.

"The Amtrak Police never stopped looking for those responsible for the death of Mitchell Bates and the injury of our passengers," said Chief Hanson. "We appreciate all the work of our law enforcement partners in Arizona, the FBI and Maricopa County Attorney's Office for their sustained commitment to bringing those responsible to justice. We hope that new attention to the case and the offer of a substantial reward will prompt someone with that last bit of information to come forward so we can finally get justice for Mr. Bates and all of those injured."

Amtrak and the Amtrak Police Department remain committed to the safety and security of our passengers and employees. Those who may have information about the derailment of the *Sunset Limited*, please email: aztrainderailment@ic.fbi.gov.

Amtrak Scored Well on Carbon Disclosure Submittal

The Carbon Disclosure Project (CDP) is an independent not-for-profit organization working to drive greenhouse gas emissions reduction and sustainable water use by business and cities. It is the world's only global environmental disclosure system, with more than 5,000 companies and municipalities reporting.

In the most recent report, Amtrak received a score of 96B on our submittal of climate change data to the CDP. The 96 represents the completeness of our disclosure, while B (A being best) represents our performance in the area of climate change as a company. This score improves on the score of 85B received for Amtrak's first-ever submittal covering the previous calendar year.

In addition to reporting climate change information to CDP, Amtrak also reported through CDP's supply chain system at the request of two corporate clients. When benchmarked against 3,400 other companies that responded to CDP's supply chain

request, Amtrak's score of 96B is significantly higher than the average disclosure score of 53 and performance score of "C" for companies reporting supply chain information. The approval of our Sustainability Policy in 2013 laid the foundation for continuous improvement. Amtrak has committed to annual reporting through CDP and will continue working to focus on transparency and performance in the area of climate change.

New "Green" Power Purchasing Policy

Amtrak has implemented a purchasing policy. The purpose is to provide guidelines for the purchase of "green" power for use within Amtrak operations, which supports the company's commitment to reduce the environmental impacts from Amtrak operations. This is another step that Amtrak has taken towards becoming a more sustainable organization.

One Week Remaining for PSSA Nominations

Nominations for the Amtrak's President's Service and Safety Awards will be accepted through **Monday, April 20**. This is an opportunity to make a difference by recognizing colleagues, leaders, teams and external partners. Nominations will be reviewed for completeness and strength of information, so please include strong supporting details and examples that clearly justify why the nomination should be awarded one of Amtrak's top honors.

Nomination forms can be found here: <http://apps.nrpc/forms/>. FAQs and category descriptions can be found here: <http://wiki.corp.nrpc/display/AWARDS/President%27s+Service+and+Safety+Awards>.

Amtrak vs. Sprains and Strains: March Results

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout fiscal year 2015 (FY15). Each month, we are challenged to combat and reduce our sprains and strains from fiscal year 2014 (FY14). The goal is to “**knock out**” this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains.

“Knock Down” in Round 1

Amtrak was knocked down in March with a 58 percent increase in sprains and strains compared to March FY14. FYTD, strain injuries are down nine percent.

Learn more about Amtrak v. Sprains and Strains on the company [Intranet](#)> Safety.

Road Shows to Explain Changes in Retirement Benefits

Amtrak recently announced changes to its retirement program for non-agreement employees. To further explain these changes and answer questions, members of the leadership team will be conducting road shows over the next several weeks at different locations. These events are an opportunity to hear information first-hand, ask questions, and get answers. For the week of April 27 the scheduled locations include:

Thursday, April 30

Chicago Union Station
HC Classroom, Room 318
9:00 a.m., 11:00 a.m. and 3:00 p.m.

Friday, May 1

Chicago
Lumber Street Yards
Car Shop Building, Room 205
9:00 a.m. and 11:00 a.m.

Stay tuned for the week of May 4 when we will be on the Northeast Corridor. Also look for future emails and work site posters for meeting locations, dates and times.

Webinars Also Available

If you are unable to attend a Road Show in person, you can participate in a webinar. Next week's webinar is scheduled for Wednesday, April 29 at 1:00 p.m. EST. Note that there are a limited number of ports for the webinars so if you are not able to join stay tuned for others.

To participate:

Log

Operating an Efficient Organization

One of the key measures for the Short-Term Incentive Plan is to achieve an Adjusted Operating Loss of \$235M (or less). This goal measures our organizational effectiveness by focusing on reducing the operating loss, increasing the ability to perform at optimal levels as One Amtrak.

Together, employees can all make an impact by increasing productivity and ultimately improving the bottom line. Here are just a few ways to help Amtrak operate as an efficient organization and achieve its Adjusted Operating Loss target:

1. **Keep communication open** – When communication flows freely – among colleagues, leadership and our customers – confusion is minimized and expectations are clarified. Work with your team to establish communication protocols that work best for your group. That might mean scheduling regular check-ins, setting up project team SharePoint sites or as simple as sharing mobile phone numbers.
2. **Prioritize your work** -It's important to focus first on the work that matters – the work that directly impacts Amtrak's success and the satisfaction of our customers.
3. **Continuously improve** -Identify opportunities to improve, offer new ideas and ways of working.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

4. **Make it easier** – Our job is not to create more work, but to make it easier – easier on colleagues, managers and customers. Throughout the day, be conscious of how to help simplify ways of working and become more efficient.
5. **It's not a race** – Sometimes people equate being productive with doing the most work, the fastest. That's not always the case. Often by taking ones time, more efficient ways of working are uncovered and the job gets done right the first time.
6. **Stay current with technology and trends** – Everyone has the responsibility to stay at the forefront of our area of expertise. Keeping up with industry trends will allow Amtrak to go further, faster.
7. **Offer solutions** – It's easy to find something to complain about – the temperature in the office, the printer that never works or the never-ending project. When the occasion arises, think of a way to address the issue by offering a solution or idea.
8. **Be positive** – Change is happening at Amtrak. While not everyone will always understand or agree with every decision, it's important to assume positive intent – working for the betterment of the company.

For more information about Amtrak's 2015 Corporate Measures, refer to the [Guide to the Amtrak 2015 Short-Term Incentive Plan](#). Watch for further updates in *Amtrak This Week* on how we are progressing toward our Corporate Measures and suggestions on how everyone can help Amtrak achieve its Strategic Plan.

Make Everyday Earth Day

Earth Day, held annually on April 22, is a day dedicated with events to inspire environmental protection. Visit the [U.S. Environmental Protection Agency's Earth Day Take Action](#) website to find out what you can do to make every day Earth Day. You can find local opportunities to volunteer, read daily environmental tips, and even pledge to commit five actions to help protect the environment.

Earth Day activities in which Amtrak is participating include:

- U.S. Department of Transportation Earth Day Celebration – DOT Headquarters, Washington, D.C. (April 21). Amtrak will be showcasing the environmental benefits of rail transportation.
- Earth Day Fair – 30th Street Station, Philadelphia, PA (April 22 from 9:00 a.m. - 2:00 p.m., North Waiting Room). Amtrak-hosted event will feature representatives from over 20 organizations including the Delaware Riverkeeper Network, Philly Bike Share/Bicycle Coalition and ZipCar.
- Earth Day Fair – Washington Union Station, Washington D.C. (April 21 - 22 from 10:00 a.m. - 5:00

p.m.) Features include NASA scientists and astronauts, real time uplinks to the International Space Station, and exhibits from Amtrak, Washington Gas Energy Services, and the Human Rights Campaign.

- Mantua Neighborhood Clean-up – Philadelphia, PA, (April 23 from 8:30 a.m. - 11:00 a.m.) Amtrak employees will partner with neighbors near 30th Street Station. To volunteer, contact AskEnvironmental@Amtrak.com.
- Amtrak Facility Cleanup Days including Southampton Street Yard (Boston), Engineering maintenance of way bases and yards in New England and New York divisions
- Delaware and Beech Grove (Indiana) Back Shops (week of April 20)

Final Call for PSSA Nominations

Reminder: Nominations for the Amtrak President's Service and Safety Awards will be accepted through **Monday, April 20**. This is an opportunity to make a difference by recognizing colleagues, leaders, teams and external partners in categories such as Safety Committee of the Year, Excellence in Customer Service and Diversity.

Nominations will be reviewed for completeness and strength of information, so please include strong supporting details and examples that clearly justify why the nomination should be awarded one of Amtrak's top honors.

Nomination forms can be found here: <http://apps.nrpc/forms/>. FAQs and category descriptions can be found here: <http://wiki.corp.nrpc/display/AWARDS/President%27s+Service+and+Safety+Awards>.

Introducing the Amtrak Leadership Development Excellence (ALDE) Program An Investment in Amtrak's People Leaders

The Amtrak Leadership Development Excellence (ALDE) program is launching on Monday, April 20. Amtrak created the ALDE program—a three-part learning opportunity—to help our leaders develop the knowledge, skills and abilities to become the best Amtrak leader they can be. This first program, ALDE, Part 1, is designed to:

- Provide Amtrak leaders with the critical skills needed to succeed
- Empower Amtrak leaders to lead, manage and coach effectively
- Create meaningful relationships across the organization

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

ALDE, Part 1 is an innovative, customized leadership program, tailored to Amtrak's business needs, and provides simple, standardized, curriculum for leaders as well as every Functional Area and Business Line. The newly learned leadership knowledge, skills and tools will result in improved employee performance, an Amtrak culture of safety, financial excellence, and the achievement of Amtrak business goals.

Sign-up Today – ALDE, Part 1 Sessions Filling Fast

Amtrak's agreement and non-agreement supervisors and managers can enroll online for upcoming sessions throughout 2015 in 10 locations across the country. To enroll online, visit <http://cip.corp.nrpc/irj/portal> on the Employee Information Portal. If you have any questions, send an email to ALDE@amtrak.com.

ALDE challenges everyone in the business to play an active role in the learning and development process by supporting, coaching and mentoring program participants as they move through their leadership journey at Amtrak. The program creates a shared understanding of what it means to be an effective leader at Amtrak, and supports the ongoing development of a *learning culture* that recognizes our people as our most valuable asset, and invests in them to support the achievement of our vision – "Moving America where it wants to go."

During ALDE 1, participants strengthen important skills and behaviors to support them in their leadership role at Amtrak including:

- Leadership Mindset
- Leadership and Safety
- DiSC® – Behavioral Profile
- Communication
- Active Listening
- Providing Feedback

Following the classroom session, participants work on completing a series of goals and work with their line manager to refine the leadership skills and behaviors learned in the ALDE, Part 1 program. Depending on your relationship with an ALDE participant (i.e., direct report, participant's manager, peer), you may be called on to provide feedback, coaching, mentoring, or guidance as the participant works to successfully apply his or her new skills on the job.

Call for Amtrak Train Days
Volunteers

All Aboard Amtrak Employees! In the past seven years, over 300 communities in all 50 states have celebrated their love of trains on National Train Day. Due to the growing success and the concentrated resources required in supporting a one-day

celebration, we are evolving this program into a traveling, community-centric experience under the new name of [Amtrak Train Days \(ATD\)](#).

With a theme of "Trains Matter", ATD officially kicks off at Chicago Union Station on May 9. Prior to the kickoff, Amtrak will participate in two community events, Toledo Train Day in Toledo, Ohio on May 2 and at the Fullerton Railroad Festival in Fullerton, Calif., on May 2 -3. With Amtrak Train Days celebrations fast approaching, employee volunteers will be needed at all events across the country.

Volunteer registration is easy. Simply click on the [company Intranet](#) and complete the form following the instructions on the top of the page. Registered volunteers will be contacted for their preferred shift time. All volunteers will receive a complimentary ATD t-shirt and meal during their shift.

April is Alcohol Awareness Month

Excessive use of alcohol is a leading cause of preventable deaths in the United States, in fact one in 10 deaths among working age an adult in our country is due to alcohol misuse or abuse. This means that friends, families and our employees are vulnerable to being a part of this disturbing statistic.

This month, several Amtrak programs including the Amtrak Employee Assistance, Operation RedBlock, Drug and Alcohol, Medical and Wellness are taking steps to stamp out alcohol-related illnesses and deaths.

The facts: Alcohol is the most commonly abused drug in the United States. A startling 8.5 percent of our population suffers from alcohol use disorders. These disorders are a frequent cause of individual and family suffering. The popularity and social acceptance of alcohol not only contributes to its being a substantial threat to our health and wellbeing, but also makes it complicated to recognize and treat misuse. Recent studies have revealed that nationally, excessive alcohol use shortened the lives of those who died by its misuse by an average of 30 years. These deaths were due to health effects from drinking too much over time, such as breast cancer, liver disease, and heart disease, and health effects from consuming a large amount of alcohol in a short period of time, such as violence, alcohol poisoning, and motor vehicle crashes. **Remember: Drinking too much can harm your health, your relationships and your safety at Amtrak.**

Evaluate your own use of alcohol by completing a quick and private quiz at www.achievesolutions.net/AmtrakEAP. Carefully consider the results and the steps that lead to keeping alcohol use a healthy part of your life and also encourage others to do the same. To learn more, or to explore whether your drinking or that

Defensive Driving Tips

When people drive defensively, they are aware and ready for whatever happens. They are cautious, yet ready to take action and not put their fate in the hands of other drivers. Following these defensive driving tips can help reduce risks on the road:

Think safety first. Drivers who avoid aggressive and inattentive driving tendencies put themselves in a stronger position to deal with other people's bad driving. There should be plenty of space between vehicles. Doors should always be locked and seatbelts should always be worn.

Be aware of your surroundings — pay attention. It is important to check mirrors frequently and scan conditions 20 to 30 seconds ahead of your vehicle. If another vehicle is showing signs of aggressive driving, slow down or pull over to avoid it. If the driver is driving dangerously, try to get off the roadway by turning right or taking the next exit if it's safe to do so. Also, keep an eye on pedestrians, bicyclists and pets along the road.

Do not depend on other drivers. Be considerate of others but look out for yourself. Do not assume another driver is going to move out of the way or allow you to merge.

Have an escape route. In all driving situations, the best way to avoid potential dangers is to position your vehicle where you have the best chance of seeing and being seen. Having an alternate path of travel is essential, so take the position of other vehicles into consideration when determining an alternate path of travel.

Follow the 3- to 4-second rule. Since the greatest chance of a collision is ahead, using the 3- to 4- second rule will help establish and maintain a safe following distance and provide adequate time to brake to a stop if necessary in normal traffic under good weather conditions.

Keep your speed down. Posted speed limits apply to ideal conditions. It's the drivers' responsibility to ensure that their speed matches conditions.

Separate risks. When faced with multiple risks, it's necessary to address them by separating risks. The driver's goal is to avoid having to deal with too many risk factors at the same time.

Cut out distractions. A distraction is any activity that diverts your attention from the task of driving. Driving deserves your full attention — so stay focused on the driving task.

Amtrak to Turn 44

While created in 1970 by an act of Congress, on May 1, 1971, Amtrak began operations with 184 trains per day as outlined by then Secretary of Transportation John Volpe. Nine days later, Amtrak's first new service was added as a daily New York –Buffalo- Cleveland- Chicago train, supported by the states of New York and Ohio; it was later named the Lake Shore Limited.

Within a few months, Amtrak needed to create an organizational framework; hire and train employees; upgrade and standardize rolling stock and station facilities acquired from predecessor railroads; institute a comprehensive national reservations system; and craft an advertising campaign to inform the public about its services.

Tricia "Patty" Saunders, pictured above and one of the company's first employees, recalls, "being the eyes and ears of Amtrak" in her first position as a passenger service representative. She assisted customers on the train, listened to their complaints and compliments regarding Amtrak service, talked about future company initiatives and passed on ideas for improvement to management. "Management was eager to hear from customers," notes Saunders, "and their suggestions led to change." She also solicited feedback from fellow employees.

Learn more about the company's past on the official [Amtrak History](#) website.

Are You Ready to Retire? Fidelity Hosts Upcoming Webinars for Amtrak Employees

Join Fidelity Investments for an upcoming workshop where you'll get guidance and strategies to help with retirement planning and other planning needs.

To register:

1. Click on the corresponding link below to register for the event you wish to attend.
2. Fill in your first name, last name and e-mail address, then click "Register."
3. You will be sent a confirmation e-mail that will include a link to access the workshop on the day of the event. Please keep the confirmation e-mail.

On the day of the event:

- Use the link provided in the confirmation e-mail and click **"Join Now."**
- Once you have joined the meeting through the Internet, you will see a pop-up box with the conference call information. If you need technical assistance, please contact the Fidelity **Help Desk** at 888-600-4015. Representatives are available between 8:30 a.m. and 6:00 p.m., Eastern Time.

In addition to attending one of these workshops, you can visit [Fidelity e-Learning®](#) to access a variety of self-directed workshops.

Road Shows to Explain Changes in Retirement Benefits

Amtrak recently announced changes to its retirement program for non-agreement employees. To further explain these changes and answer questions, members of the leadership team will be conducting road shows over the next several weeks at different locations. These events are an opportunity to hear information first-hand, ask questions, and get answers. For the week of May 4 the scheduled locations include:

Monday, May 4

New York

400 West 31st Street, 6th Floor
10:00 a.m. and 3:00 p.m.

Tuesday, May 5

New York – Sunnyside Yard

39-29 Honeywell Street
Commissary Building, 2nd Floor
Mechanical Training Room
10:30 a.m.

Tuesday, May 5

New York- Penn Station

8th Avenue and 32nd Street
(by Customer Service)
Superintendent's Conference Room
3:00 p.m.

Wednesday, May 6

New York

400 West 31st Street, 6th Floor
10:00 a.m.

Thursday, May 7

Boston

South Station
5th Floor, Executive Conference Room
10:00 a.m. and 2:00 p.m.

Friday, May 8

Boston- Yards

Southampton Street Yard
Training Room 200
8:00 a.m.

Friday, May 8

New Haven- Union Station

50 Union Ave.
2:00 p.m.

Stay tuned for the week of May 16 for additional Road Shows. Also look for future emails and work site posters for meeting locations, dates and times.

Keeping Our Customers Happy – Employees Play a Role (eCSI)

Amtrak's Short-Term Incentive Plan ensures a strong link between individual employee performance and the Amtrak Strategic Plan by rewarding non-agreement employees based on the achievement of Amtrak's financial targets as well as the corporate initiatives that support the overall Amtrak Strategic Plan.

One of the most important metrics for the 2015 Short-Term Incentive Plan is Amtrak's Customer Service Index (eCSI). For 2015, Amtrak has set a goal to improve the Customer Satisfaction Index to 78 percent (or greater), a one-point improvement over last year's score. Following their trip, customers receive a survey that allows us to assess customer satisfaction, which in addition to their overall satisfaction, also measures specific attributes such as On-Time Performance (OTP), information given about delays, information received about the trip prior to boarding the train, train cleanliness and train comfort.

All employees can make a difference. Here's how:

- **Engineering** is critical to the safety of our passengers and employees and the reliability of the service we

provide. Engineering employees help provide the infrastructure to provide a smooth ride and enable Amtrak to operate trains on time. Engineering can make track work repairs in a way that minimizes delays.

- **Information Technology:** Our customers desire real-time updates, more frequent communication and more rapid responses and resolutions to issues. Two of the five most important service attributes relate to information provided to our customers, including the information received about the train prior to boarding (the 4th most important attribute). Our employees and customers must have technology that provides quick access to information, is linked to critical processes and connects us directly to our customers.
- **Operations:** Whether you're responsible for Route Strategy & Analysis or improving energy efficiency as a Manager, Energy Projects, you're impacting the efficiency of our trains, contributing to OTP and ensuring our ticket costs remain competitive. All of which enhance our customer's experience and satisfaction.
- **Mechanical:** Reliable equipment contributes to a smooth and comfortable trip as well as an on-time departure and arrival. In addition, the second most important customer service attribute is information given about delays on board the train. The onboard staff depends on the Mechanical department to ensure the PA systems are working on every trip.

For those in direct contact with Amtrak customers, we must provide our customers with the best information possible to keep our eCSI score within the target. For employees who don't have direct contact with customers, we need to ensure everything we do enables those in front of our customers to focus 100 percent on the customer.

Talk to your manager during your mid-year Performance Commitment Conversations to identify new ways that you and your team can help Amtrak achieve its financial, organizational and operational goals. We're all in this together.

Share in Our Results – What the Short-Term Incentive (STI) Means for You

Each full- and part-time non-agreement position within Amtrak has a defined Target Incentive based on the position's band and zone and is stated as a percentage of employee base salary. To learn about the plan, including the target for your level, visit the [Guide to the Amtrak 2015 Short-Term Incentive Plan](#).

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Track Our Progress

Through March 2015, our overall eCSI is 77 percent; the same as the year to date (YTD) score last March and one point below are target of 78 percent. Recent decreases in OTP in the Northeast Corridor are weather related and the primary reason that our YTD scores are below target. Improved scores in other service experience attributes, including information given to passengers about delays, are offsetting some of the negative impacts of poor OTP.

To find out how we are doing against our goals, visit the Amtrak main Intranet page > Tools and Performance > Short Term Incentive (STI) for the latest information.

Amtrak to Open IT Center in Metro Atlanta Area

Last week, the Amtrak IT department announced the establishment of its Atlanta Service Delivery Center at Concourse Office Park in Sandy Springs, Ga. Expected to open in the summer of 2015, the new IT Center will serve as an additional location for IT operations. Amtrak IT operations will continue to function in Washington, D.C., Philadelphia, and Wilmington, Del.

Safe-2-Safer Exceeds 400,000 Observations

The System Safety department goal of reaching 400,000 total observations by the end of Fiscal Year 2015 has been reached. Congratulations to all the Behavioral Accident Prevention Process observers, committees, supervisors and all employees throughout the country for their active support in exceeding this company goal.

As of the end of July, the total number of contacts since the inception of Safe-2-Safer was 408,169. This achievement demonstrates the dedication and power of our entire workforce in watching out for and keeping each other safe as we perform our daily duties. This fiscal year alone, the observation process through July has resulted in 94,813 peer-to-peer contacts and observations of employees as they go about their day. Of that number there were 20,826 at risk behaviors observed about which a focused safety conversation took place.

There is a "potential" for injury associated with each one of those at risk behaviors, but thankfully those employees all went home safely at the end of the day. That is something we at Amtrak should all be proud of, continue to support, and strive to improve as we move forward with our behavior-based safety program.

New Labor Management System Coming

Lights, camera, action! Check out this new [video](#) that introduces Amtrak's new labor management system that will be rolled out starting in 2016. The integrated labor management system (iLMS) will improve our ability to deliver consistent, reliable labor information and ultimately improved services to our customers.

iLMS is one of the key themes under the Operations Foundation Program with the specific focus of modernizing Amtrak's current tools and processes related to labor management. The system will be rolled out by craft; first up will be T&E and OBS. While the ways in which employees interact with the system will vary based on craft and role, there are some fundamental benefits that iLMS offers including on-demand access and self-service options to essential tools and information.

This summer the iLMS project team successfully solicited feedback from employees across the nation on the system's fundamental requirements to ensure that the system will meet Amtrak's business needs. The team is now working to build the iLMS system and will continue to provide opportunities for employees to offer input into the design and implementation of the solution through the iLMS Champion Program.

If you have any questions for the iLMS team or want to know more about the iLMS Champion Program, please email

iLMS@amtrak.com. The iLMS Overview video is available at: <http://youtu.be/ViQ6EhvBUZU>.

Employee Volunteers Needed to Support Papal Visit to Northeast Corridor

As Amtrak prepares for the Papal visit to Northeast Corridor cities, we are calling on employees to volunteer their time Tuesday, September 22 through Monday, September 28 at select stations to help guarantee the safety of our passengers and to help with crowd control.

Employees that volunteer as Amtrak Ambassadors will work six (6) hour shifts and will be provided training prior to the event. Volunteer sign up is available on the [Amtrak Intranet](#) (Amtrak News > Papal Visit Information and Updates) where employees can sign up for their preferred location, date and timeslot. All information regarding the Papal visit will continue to be posted on the Amtrak Intranet, which will be updated as more details are made available and plans become finalized.

Free Digital Newspapers for Business Class and First Class Passengers

Effective Aug. 17, Business class and First class passengers now have free unlimited access to *The New York Times* and *The Washington Post* digital newspapers while traveling aboard the following Amtrak trains:

<i>Acela Express</i>	<i>Maple Leaf</i>
<i>Carolinian</i>	<i>Northeast Regional</i>
<i>Downeaster</i>	<i>Palmetto</i>
<i>Empire Service</i>	<i>Pennsylvanian</i>
<i>Ethan Allen Express</i>	<i>Vermont</i>

To access digital newspapers, visit the AmtrakConnect page, click on the entertainment tab and choose either one of the two newspapers. Then, enter the access code located on a card in your seat back pocket. *Acela Express* passengers will not need a code to access digital newspapers. With the start of digital newspapers, printed newspapers are now discontinued aboard these trains.

Preventing Slips, Trips and Falls

One of the most common types of injury sustained by employees is related to slips, trips and falls. These injuries can result in economic hardship, pain and suffering and sometimes worse. The good news is that in most cases injuries can be prevented. In order to reduce slips, trips and falls:

- Understand how fall accidents happen.
- Identify trouble areas.
- Eliminate or minimize hazards of falling.

Preventing Injuries:

- Wear footwear of sturdy construction with a definite heel and slip resistant sole. Footwear must be properly laced, buckled, zipped or otherwise fastened.
- Slips happen where there is too little friction or traction between the footwear and the walking surface.
- Trips can happen when your foot collides (strikes, hits) an object causing you to lose your balance and eventually fall.
- Be aware of your surroundings at all times.
- Good housekeeping is the first and most important step in preventing falls due to slips and trips. Keep your work area clean.
- Employees must be alert and watch where they are walking and not run.
- Use established paths or routes when going to or from an office, station or work location.
- Employees must place their feet firmly and have a secure handhold when getting on or off equipment, steps or ladders.
- Avoid tripping and slipping hazards.

Reminder: Update Your Contact Information

As part of the standardization of data in our Microsoft Outlook Global Address List (GAL), the Amtrak IT department has embarked on an initiative to populate the GAL with accurate user profile information. Most information will now be updated automatically from the personnel record contained in the SAP system. The information covered under this process will be:

- Last Name, First Name, Title, Company, Department, Address, City, State, Zip Code, Country, and Manager.

As for the remaining information contained in your user profile, effective January 17 you are now able to update it by visiting

<https://iam.apps.nrpc/idm/login.jsp>. This information includes the following attributes:

- Your Contact Phone Numbers, Display Name, Assistant, Notes and Office (Cubicle).

Please be advised you may be required to sign in. Your updates may take up to 48 hours to appear in Outlook. Using this method you will be able to update your information with accurate profile data, including even your display name, which users will see in the Global Address List.

Amtrak Celebrates Black History Month

Black History Month (BHM) is an annual celebration recognized during the month of February. Amtrak's celebration of Black

History Month will feature a wide range of in-station events, promotions, contests and advertising.

"Black History Month is a great time to not only reflect on the important contributions made by so many Americans, but it allows us the opportunity to dream and to learn." said Darlene Abubakar, senior director, National Advertising and Marketing Programs. "

Below is a sampling of the various activities and events taking place around the system.

Multicultural Symposium Series: Amtrak will be sponsoring the 22nd annual Empowerment Recognition Multicultural BHM Breakfast to salute Community and Faith Based Leadership on Tuesday Feb. 10, at 8:30 a.m. at the Colonnade Boston Hotel. The keynote speaker is Reverend Karla Cooper, Professor and Co-Founder AME India. For details visit www.mssconnect.com.

The Portland Jazz Festival: Amtrak Cascades is proud to sponsor the Portland Jazz Festival. The organization's mission is to inspire, educate and develop future jazz audiences for generations to come. The festival is a multi-venue series of jazz events, education and outreach programs that extend into Portland, Oregon schools and neighborhoods.

Amtrak Pioneer Awards: In partnership with the Washington Wizards, today, Feb. 2 at 7:00 p.m., at the Verizon Center, the Amtrak Pioneer Award will be presented, recognizing local community leaders who have made a positive impact on the Washington, D.C., area.

On Friday, Feb. 6 at 7:00 p.m., Amtrak will partner with the Brooklyn Nets at the Barclays Center where the Amtrak Pioneer

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

Award will be presented, recognizing local community leaders who have made a positive impact on the New York City area.

Newark Museum: Black History Month will include a month long schedule of family programs, hands on workshops for children/adults, lectures, films and live theatre, dance and music performances at this New Jersey museum. Special gallery tours will herald the accomplishments of prominent African American artists. Visit www.newarkmuseum.org for more information.

African American Museum in Philadelphia (AAMP): On February 28, Amtrak and the African American Museum will have a Black History Month event to support One Book, One Philadelphia and its book selection of *Locomotive* for 2015. One Book, One Philadelphia is a joint project of the Mayor's Office and the Free Library of Philadelphia that has the goal of promoting literacy and encouraging the Philadelphia community to come together through reading and discussing a single book.

The museum will be using the book as the touch point for their 2015 February Macy's Family Fun Day. The day will be filled with family-oriented activities – games, crafts and contests all with a train theme. An Amtrak Locomotive Engineer and Track / Signal person will also be part of the day's festivities.

Visit <http://www.aampmuseum.org/calendar.html> for more information.

B&O Railroad Museum in Baltimore: Proudly presented by Amtrak, the B&O Railroad Museum opens a new African American exhibit that celebrates the contributions of African Americans to the railroad industry. Learn about these men and women who filled vital jobs along the B&O Railroad's line and understand how significant social issues, such as segregation, affected railroading.

New exhibits focus on African American passenger travel during segregation and chefs and waiters who worked on B&O dining cars. More info at: <http://www.borail.org>.

Washington Union Station: The Mid-Atlantic Division Employee Black History Committee is inviting all Amtrak employees and their families to come out to support the 18th Annual Black History Celebration program at Washington Union Station, Starlight Room, Gate C on Saturday, February 21 from noon - 3:00 p.m. This year's event will honor African American Women in Media and Andrea Roane, a local television news anchor, will be a guest speaker.

New York Penn Station: Amtrak sponsored BHM activities in the New York Penn Station Rotunda area will include:

Feb. 18 and 19: The New York Historical Society Educational Series – History of Slavery in New York City and History of the

Underground Railroad. Visual and hands-on presentations will be available from 10:00 a.m. – noon and 1:00 p.m. – 3:00 p.m.

Feb. 18 and 19: Documentary Visual Presentations to include a slide show and short documentary films with audio on topics such as Black American History and the Reverend Dr. Martin Luther King, Jr. Presentations are from noon – 1:00 p.m. and 3:00 p.m. – 5:00 p.m.

Feb. 25: Live on-site mini performances from professional dancers and alumni from the Dance Theater of Harlem. Performances will be held between 10:00 a.m. – 5:00 p.m.

Ladder Safety

February 9, 2015

Ladders are used to reach elevated areas in just about every type of job. They are common and needed in many situations. Don't mistake their simplicity or the hazards associated with ladder falls. When working with ladders remember to keep safety first.

- **Inspection** - Make sure that the ladder you are about to use was made for that purpose. Prior to use, visibly inspect the ladder to ensure that it is safe to use and properly labeled.
- **Usage** - Use ladders solely for their intended purpose. Do not exceed their maximum intended load or beyond the manufacturer's rated capacity.
- **Positioning** - Use ladders only on stable and level surfaces unless secured to prevent accidental movement.
- **Secure** - Ladders that are used in areas such as passageways, doorways or driveways, or when used near workplace activities / traffic must be secured to prevent accidental movement. Use a barricade to keep traffic or activity away from the ladder.
- **Maintenance** - Maintain ladders free of oil, grease, and other slipping hazards.

2015 Short Term Incentive Plan Announced for Non-Agreement Employees

Last fall, the Total Rewards team introduced four performance goals for the 2015 Short Term Incentive (STI) Plan that tie to the Amtrak Strategic Plan. The Board of Directors agreed that these goals should serve as the targets for the plan and include: Amtrak's Adjusted Operating Loss, electronic Customer Satisfaction Index (eCSI), Revenue per Available Seat Mile (RASM), and Cost per Available Seat Mile (CASM).

- **Financial Excellence (50 percent)** – If Amtrak achieves an adjusted operating loss of \$235M or less, there will be a 50 percent payout even if the goal is exceeded. If Amtrak does not achieve it, there will be no payout, regardless of the performance against the other measures.
- **Customer Satisfaction (30 percent)** – eCSI is the similar to CSI before it, but done with surveys via email rather than conventional mail. It represents 30 percent of the overall STI payout. The eCSI 2015 target is set at 78 percent, which represents a 1 percentage point improvement over 2014. This goal will be prorated so that for each quarter point improvement over 2014, 25 percent of the overall target will be earned.

- **Operational Excellence (20 percent)** – Two new goals were added to the STI plan this year, RASM and CASM, which measure the revenue and cost per available seat mile, respectively. Each is worth 10 percent of the payout, for a total target payout of 20 percent. These metrics are directly related to the efficiency of how we operate the system. The 2015 RASM target is \$0.204 and the CASM target is \$0.220.

We are very excited to be offering an STI plan for the third year in a row and hope to continue on our record of increasing the payout amount each year. The 2015 STI Guide for employees will be available shortly and posted in the Human Capital section of the Amtrak intranet on the [Compensation wiki page](#). Should you have any questions on the plan please feel free to contact the Employee Service Center at 888-694-7372 or email the compensation team at Compensationdept@amtrak.com.

Black History Month Celebrations Continue

As Black History Month (BHM) continues, remaining celebrations are listed below. To learn how Amtrak brings travelers closer to culture, visit myblackjourney.com.

- February 19 at 10:00 a.m. – 3:00 p.m., Baltimore Penn Station: Guest speakers, music and exhibits by the National Great Blacks in Wax Museum, The Negro League Museum, Reginald F. Lewis Museum, Tuskegee Airmen, Boys Scouts of America, the Romare Bearden Foundation and the Brotherhood of Locomotive Engineer and Trainmen.
- February 26, 10:00 a.m. - 4:00 p.m., Philadelphia 30th Street Station, North Waiting Room: Marketplace and Health Fair. Vendors will be offering jewelry, crafts and fashion items. In addition, health screenings will be available.
- February 27, 11:00 a.m. – 2:00 p.m., Philadelphia 30th Street Station, North Waiting Room: Singers, dancers, poetry readings and guest speakers.

Underground Railroad Network to Freedom

Amtrak is recognizing the Perryville Railroad Ferry and Station and the Keystone line as part of the National Underground Railroad Network to Freedom. The Perryville, Maryland site, a new addition to the network, is where many escaping slavery passed through and made their way to freedom using the train. People traveled on the Perry Point Ferry and arrived at the

Amtrak This Week is a publication of Amtrak Employee Communications

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

Perryville Railroad station in order to get to the Wilmington and Baltimore Railroad to travel to Philadelphia. While the station no longer exists, the location is available by maps and historic records.

The Keystone route, between Philadelphia and Lancaster, is another Amtrak area that is part of the network. Beginning around 1835, the original Pennsylvania Railroad's 80-plus mile right-of-way from Philadelphia to Columbia, Pa., in Lancaster County, was used by African-American lumber merchants – using box cars fitted with secret false-end compartments that provided hidden spaces – to transport slaves to the Philadelphia Vigilance Committee and to freedom.

The Underground Railroad was a network for those with or without assistance who used resources at hand to escape slavery and find a means to head north to the free states or Canada during the antebellum years. Learn more about the Underground Railroad on the [Amtrak History website](#).

TRAIN DAYS

Amtrak Train Days to Launch in May

Last year, more than 313 communities in all 50 states demonstrated their love of trains on National Train Day. It's hard to believe that since the first celebration held seven years ago, the participation level has expanded and grown five-fold, thanks to the support and dedication of our employees. Due to the growing success and the concentrated resources required in supporting a one-day celebration, we are evolving this program into a traveling, community-centric experience under the new name of **Amtrak Train Days**.

Amtrak Train Days (ATD) will focus on the Amtrak brand, support our business lines and services, and help our target audiences learn about the Amtrak experience and service. By expanding this outreach program from multiple events on a single day to individual events over the course of spring, summer and fall, we will also be able to participate in a variety of local events.

Amtrak Train Days is kicking off at Chicago Union Station on May 9, and then ATD hits the rails, traveling to over 20 locations across the country. Currently, the Amtrak Train Days tour stops are being mapped out based on audience, state partnerships, opportunity for increased revenue and ridership, among other criteria. Once the schedule has been set, it will be announced and posted on [AmtrakTrainDays.com](#), which should launch in mid-April.

While the touring event can't stop in every community, we invite Amtrak-served communities, state partners and rail industry colleagues to join in the celebration of train travel by hosting their

own events. This is a joint initiative being led by Marketing, Operations, Government Affairs and Corporate Communications.

Amtrak Train Days will demonstrate why "Trains Matter" by sharing the 'reasons to ride' the train. Depending on the event and availability of resources, ATD celebrations may feature a tour of the Amtrak Exhibit Train, the new "Amtrak Experience" display, Amtrak guest speakers, media and event promotions and a special toolkit to support local community celebrations.

The Amtrak Train Days team will work with communities to promote their local festivities. Whether on May 9th, as part of the kick-off, or on the date of their choice, communities will receive support by registering for the ATD toolkit that will include Amtrak branded printed materials, posters and giveaways. These resources will make it easier to promote an ATD event without additional publication or production expenses.

While we're still in the planning stages, if you or someone in your community wants to hold an event from May – October 2015, visit [AmtrakTrainDays.com](#) and get on board for 2015. Simply fill out the form, and we'll send updates and information as we work to finalize the schedule. Amtrak employees can keep up to date on Amtrak Train Day by visiting the [company Intranet](#), an internal website where employees can learn how they can get involved in their community.

Amtrak vs. Sprains and Strains: January Results

February 17, 2015

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout fiscal year 2015 (FY15). Each month, we are challenged to combat and reduce our sprains and strains from fiscal year 2014 (FY14). The goal is to “**knock out**” this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains.

Amtrak delivered a “**flash knock down**” for the month of January by **decreasing strains and sprains over 18 percent** from last year at this time. The contest was a close match and will go into round two.

Corner Man: For round 2 come out strong and finish. It takes everyone focusing on injury prevention to position ourselves for victories. Don't let down your guard and stay off the ropes, stay alert and establish the best body position for all tasks. Let's knock this opponent out together.

Learn more about Amtrak v. Sprains and Strains on the company [Intranet](#) > Safety.

New Car Rental Partnership Available for Amtrak Employees

Amtrak has entered into a new car rental partnership with Enterprise Holdings.

With this partnership, Amtrak employees can take full advantage of discounted rental rates for business and leisure car rentals, as well as National Car Rental's Emerald Club. Emerald Club is the premier counter-bypass program that gives our travelers special recognition, service and speed. The benefits offered by joining the Emerald Club include:

- Bypass the rental counter and go directly to the Emerald Club Aisle
- Your choice of any car from the Emerald Club Aisle and be on your way
- No necessary paperwork when you return your car. Sign up to receive this benefit and you will automatically receive your receipt via email within 24 hours of each returned rental

If you are not enrolled in Emerald Club, visit <https://www.nationalcar.com/offer/XZ16182> for complimentary enrollment and start receiving your premium car rental service.

Note: If you are already an Emerald Club member, please call 1-800-962-7070 with your Emerald Club member number to attach Amtrak's customer number to your profile. If you have an elevated status with another car rental agency, advise the agent with your status level and member number or you can do it online at <http://statusmatch.emeraldclub.com/us/en/>. A screenshot of your current status from the other car rental agency needs to be provided and Enterprise Holdings will match the equivalent status with Emerald Club.

Reserve business rentals through the Amtrak Business eTravel link located in the [Employee Information Portal](#). For leisure travel you can access National through www.NationalCar.com and Enterprise through www.Enterprise.com and use Discount ID XZ16J07. If a PIN code is needed please use AMT.

Boston Back Bay Station Reopens

Effective Feb. 17, the [Boston Back Bay](#) Amtrak ticket office is open for business. The station was closed due to a ventilation issue that has now been repaired.

Amtrak personnel will be available at the station to assist with ticketing, baggage or other services. Amtrak trains will continue to serve the Boston Back Bay station according to the normal published schedule.

The station will have new ticket hours: Monday – Friday: 5:00 a.m. - 7:10 p.m., and Saturday – Sunday: 6:00 a.m. - 7:10 p.m. For more station information visit the [company Intranet](#) > Library > Station Information.

Did You Know...

The U.S. state (not including Washington, D.C.) that has the least Amtrak stops is Idaho. The *Empire Builder* stops daily in the town of [Sandpoint](#).

The U.S. state that has the most Amtrak train stops is California, serving 76 communities. In FY13, over 11 million train riders used California Amtrak stations, approximately one-third of Amtrak national ridership. Learn more about California train stations at GreatAmericanStations.com.

February 23, 2015

Safety First: Given the ongoing inclement weather across different parts of the country, this is an opportunity to remind all employees to take extra care to travel and operate safely. Be mindful of the conditions around you, your co-workers and our passengers. Keep eyes on path and three points of contact when possible.

Are You Safe or Just Lucky?

After an accident on the job, people often wonder what they could have done to have prevented the accident. That type of reflection can help avoid similar accidents in the future. The best way to prevent job accidents is to think about prevention before an accident happens, not after.

For example, think about:

- What could go wrong before you start any job. Then take the necessary precautions to prevent accidents, such as eliminating hazards or wearing personal protective equipment.
- The information, procedures, and techniques you've learned in safety meetings and training sessions that could help prevent an accident.
- Requirements of safety rules and regulations that apply to the job.
- The equipment, tools, materials, etc. you need to perform jobs safely.
- Any additional steps you could take to ensure safety in your work area.
- How you can encourage co-workers to take proper safety precautions and work more safely.
- Ideas for improving safety performance in your department and your organization.

In addition, use your safety sense to protect you and your co-workers. That means looking for hazards before the job starts, taking action on eliminating those hazards and communicating with co-workers on how to make a job safer.

Historic Milestone for NEC

The Northeast Corridor Commission, which includes representatives of Northeastern states, the U.S. Department of Transportation and Amtrak, recently reached an historic agreement that will transform how crucial infrastructure investments are made on the Northeast Corridor (NEC).

Adoption of this Cost Allocation policy, a key requirement of Section 212 of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA), creates a formula by which Amtrak and commuter operators will contribute operating and capital funds to the NEC. It is a major step forward that many of our colleagues

have spent years working to achieve and we congratulate them on this accomplishment.

Whether you work in New York, Chicago, Los Angeles, Denver or anywhere else in between, this is important to you because the success of America's Railroad relies heavily upon us achieving our overall financial goals. By creating a dedicated and reliable source of funding for the NEC, this helps move us closer to that goal.

You'll hear more in the months ahead as we align our business practices to comply with the policy, which becomes effective on October 1, 2015. For now, feel free to read more about it on the Northeast Corridor Commission's website [here](#).

All Aboard — Start Moving to Better Health

Great news! The added wellness features you wanted will be rolling into the station soon. Be the first to hop on.

Need help kicking the habit? We'll lend you a hand.

It's difficult to quit tobacco — particularly if you go it alone. But now you don't have to. By telephone or online, coaches will work with you to create a plan that's customized to your life — and be there every step of the way. You can take a class, work with a coach, get nicotine replacement therapy and more. On your time. On your terms. Until you kick the habit.

Cigna members call 1-866-417-7848 or go online to enroll at www.myCIGNA.com.

Aetna members simply log in to www.aetna.com and complete the health assessment. Then call 1-866-213-0153 to get on the track to a smoke-free life. Tufts members can also call the Aetna number to take part on the tobacco free program.

Need help reaching a healthy weight? We'll help you with the hard part.

The new strategic partnership with Weight Watchers provides multiple options to provide help with the hard part: At-Work meetings, community meetings at thousands of locations around the country and an online option for those who cannot attend meetings. Through this strategic partnership, employees have two options:

- **Weight Watchers Meetings**
 - Workplace meetings and unlimited meetings in the community (not available in franchise areas)
 - Free access to Essentials, a full suite of digital tools and online access
 - \$18.25 per month — less than half the regular price

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

- **Weight Watchers Essentials**

- Free access to online and mobile tools
- \$8.05 per month – less than half the regular price

For more information and registration instructions please visit the [wellness](#) site on the Amtrak Intranet or visit <https://wellness.weightwatchers.com> (Employer ID: **10543605** and Employer Passcode: **WW10543605**).

**Need help meeting your fitness goals?
We'll help you get on track.**

The new strategic partnership with **LA Fitness** provides discounted monthly dues, \$0 initiation fee and no long-term contract requirements. LA Fitness has locations conveniently located throughout the US. Membership dues are based on the club level that you choose:

- Premier Multi-Club - \$24.95/month, \$5 additional per month for racquetball
- Elite membership - \$34.95/month, \$5 additional per month for racquetball
- Signature membership - \$39.95/month, \$5 additional per month for racquetball

LA Fitness offers members:

- The finest strength and cardio equipment
- Strength and free weight centers
- Unlimited group fitness classes (cycling, kickbox cardio, yoga and more!)
- Complete access to Pool (where available) and sauna
- Sports Leagues
- Racquetball (extra charge)
- Kids Klub – babysitting

Take advantage of this great new offering through the link on the [wellness](#) site on the Amtrak Intranet or for more information about LA Fitness or to check on the nearest location, visit www.LAFitness.com.

January 5, 2015

Are you an Effective Safety Communicator?

When you conduct safety meetings, hold safety briefings or engage in safety discussions it is important that the message you are trying to send is being properly conveyed and received. When it comes to safety communication it is important that those receiving the message understand that you care. There are various techniques you can use to improve your safety communication skills. The following are examples of ways you can ensure an effective message is being delivered:

- Be confident and action-oriented and express opinions directly and honestly. This allows the listener to “know where they stand” with you.
- Remember that body language is important, project an open and welcoming appearance.
- Encourage a two-way communication. Get feedback on ways to improve safety.
- Be sure to show respect for others' opinions, listen carefully to what others have to say and thank others for their input.
- Be sensitive to the feelings and concerns of others.
- Take action when issues are brought to your attention. Give feedback and let employees know what is happening with their suggestions. If something cannot be done explain why.

An effective safety culture is determined by the effectiveness of safety communication. Good communication skills are important to a safe and productive work environment.

Hotel Policy Change Effective January 1

Business travelers have long been accustomed to being able to cancel a reservation at many hotels, without charge, as late as 6:00 p.m. on the day of arrival.

Recently, two worldwide hotel companies, Marriott and Hilton, announced that they are tightening rules on last-minute reservation cancellations. Effective January 1, there is no longer a 6:00 p.m. day of arrival cancellation policy. Travelers **must** cancel at least 24 hours prior to or arrival, or be charged a penalty of one night's room rate.

Concur Enhances User Experience

Concur Travel is the booking tool used by Amtrak employees for booking business travel. Effective January 19, employees will notice several key enhancements which include:

- Improved navigation
- Streamlined booking workflow process
- Enhanced Home Page
- Clear and easier to find Key actions and notifications
- Icons Vs. Text
- Reservation Review Pages

To learn more about the enhancements, Travel Leaders will be hosting informational sessions. Use the links below to register for a session. You will receive an email with instructions to save the meeting to your calendar for access on the appropriate day. Please log in to the meeting at least ten minutes prior to the start time to ensure an on time start.

- **Register for Monday, Jan 19 at 2:00 p.m. ET**
- **Register for Wednesday Jan 21 at 11:00 a.m. ET**

Amtrak Mobile Device Program Streamlined

The Amtrak IT department has reviewed the company's mobile technologies and has identified a need to modernize and standardize our mobile devices.

Until recently, mobile devices were seen as mobile phones with the ability to review email and text messages. Today, mobile devices are mobile computers with potential for use throughout Amtrak and the way we work.

To effectively use mobile technology it is important for Amtrak to standardize on mainstream mobile technologies that have demonstrated the ability to work in an enterprise environment. After reviewing potential solutions, the Samsung Galaxy S4 and Apple iPhone 5S were selected as the best fit for Amtrak's current and future needs.

While these devices have higher acquisition costs than current phones, the standardization of mobile devices will lower the overall lifecycle costs, particularly when the cost of testing, management and replacement are included. For those employees with Windows and Blackberry phones, they will be replaced with one of the approved devices if the current device breaks or when they are due for refresh.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

It has been recognized that specific tasks or departments may have mobile device needs beyond the recommended devices and requests will be handled on a project basis.

Information Technology Classes Offered

Amtrak employees and contractors are eligible to participate in a free computer-based training (CBT) sponsored by Vitalyst. The training features Microsoft Windows 7 and Microsoft Office 2010 courses. Please contact the Amtrak Service Desk for questions at 1-800-772-4357, option 1.

For more information, visit <http://training.vitalyst.com/amtrak/>

Available Courses:

- [Microsoft Windows 7](#)
- [Microsoft Office 2010](#)
- [What's New In Office 2010?](#)
- [Excel 2010](#)
- [Word 2010](#)
- [Outlook 2010](#)
- [PowerPoint 2010](#)
- [Access 2010](#)
- [Project 2010](#)
- [Visio 2010](#)
- [Lync 2010](#)
- [SharePoint 2010](#)

January 12, 2015

Safety Update: Amtrak v. Sprains and Strains

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout FY15. Each month we are challenged to combat and reduce our previous sprains and strains from FY14. The goal is to “**knockout**” this undesired opponent each and every month, ending FY15 with 15 percent fewer sprains and strains.

During the month of December, Amtrak delivered a **Knockout Blow**. Sprain & Strains was defeated with a 44 percent reduction for the month compared to this time in FY14.

As we start a new year, let's use the buddy system for help with heavy pushing, pulling, lifting, or carrying tasks. If you see someone struggling, offer your assistance. Let's deliver another Knockout to Sprains & Strains for the month of January.

2015 Holiday Schedule

Holidays are observed at Amtrak throughout the year. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each agreement can be found on the home page of the [Intranet](#).

Amtrak will observe the following 2015 dates as holidays for non-agreement employees:

- New Year's Day, January 1
- Martin Luther King, Jr. Day, January 19
- President's Day, February 16
- Memorial Day, May 25
- Independence Day, July 3 (In observance of July 4)
- Labor Day, September 7
- Veterans Day, November 11
- Thanksgiving Day, November 26
- Christmas Day, December 25

Non-agreement employees hired in 2015 will receive personal days based on their date of hire. Employees hired between January 1 and May 31 will receive two personal days, while those hired June 1 through August 31 are entitled to one personal day. Employees hired September 1 or after will not have any personal days.

For further information regarding holidays and personal days, please refer to the company [Intranet](#).

2015 Benefit Contribution Limits

The following contribution limits are in place for 2015:

Benefit	2015 Contribution Limit
Health Care Flexible Spending Account	\$2,500
Limited Use Health Care Flexible Spending Account (for non-Agreement Employees)	\$2,500 per year
Dependent Care Flexible Spending Account	\$2,500 per year if married and filing separate income tax returns \$5,000 per year if single or married and filing joint income tax returns
Health Savings Account (for non-Agreement Employees)	\$3,350/individual per year or \$6,650/family per year (this limit includes Amtrak's HSA contribution)
Transit Commuter Reimbursement Account	\$130 per month
Parking Commuter Reimbursement Account	\$250 per month
401(k) Savings Plan	\$18,000 per year for employees under age 50; or \$24,000 per year for employees age 50 and over

If you elected to make benefit contributions during 2014 and then reached annual contribution limits in 2014, your contributions stopped; however, they should have automatically resumed for 2015 beginning with the first paycheck in 2015.

2015 Reminders and Updates

Please note the following updates for 2015 and important reminders:

Railroad Retirement Board Tier II Taxes: In 2015, the tax rate for the Railroad Retirement Board Tier II taxes will be increasing from 4.4 percent to 4.9 percent and Amtrak's contributions will increase from 12.6 percent to 13.1 percent. The maximum amount of earnings subject to Tier II taxes will also increase from \$87,000 to \$88,200. Tier I contributions will remain unchanged at

Amtrak This Week is a publication of Amtrak Employee Communications

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

the same rate of Social Security and Medicare taxes with both you and Amtrak contributing 7.65 percent.

- **Flexible Spending Account Deductions:** If you elected to contribute to a Flexible Spending Account in 2015, your contributions will be deducted in equal installments over 27 pay periods.
- **W-2s:** At the end of January, your W-2 will be mailed to your permanent address on file (NOT your mailing address). Please review the address on file to ensure you receive your important tax documents.
- **Pay Increases:** If you have earned a pay increase, it was reflected in your first paycheck in 2015, on January 2, 2015.

Thank you for your contributions to our success in 2014. We are looking forward to another successful year in 2015. If you have any questions or concerns about the information, please contact the Amtrak Benefits Service Center at **800-481-4887** (Monday through Friday, except holidays, 8:00 a.m. – 8:00 p.m., Eastern Time).

January 20, 2015

Renew Your Commitment to Safety

January is a great time to review your workplace safety policy. Renew your commitment to safety by answering the questions below with safety information that is pertinent to your job. Some important questions to ask your supervisor are:

- Where is the first-aid kit located?
- What are my workplace's accident reporting procedures?
- Where is personal protective equipment (PPE) required at the facility? What PPE is required?
- What clothing is not safe to wear at my facility?
- What does the evacuation signal sound like?
- Where do I get the material safety data sheets I need?
- What are good housekeeping practices in my workspace?

Remember, it is everyone's responsibility to know and to follow Amtrak safety rules. By doing so, you and your co-workers can reduce the risk of an accident or injury. Renew your knowledge of and commitment to working safely in 2015.

Amtrak Takes Parking Digital

Amtrak has entered into a partnership with Parking Panda, the nationwide leader in online parking reservations, to provide customers with

the unprecedented ability to reserve parking at select Amtrak stations. Passengers are now able to compare available parking options and prices and then purchase a guaranteed spot in advance of their trip. More than [30 stations](#) are now part of the program with more to be added through 2015.

Through the partnership, Amtrak customers can now have access to Parking Panda's more than 12,000 parking lots and garages across 30 cities to pre-purchase parking at hundreds of locations within easy walking distance to select stations. Passengers can view available parking options and compare prices directly from the Parking section of the respective station's page on Amtrak.com, or view parking for all stations directly at <https://parking.amtrak.com>.

Once a reservation is made, parking passes are e-mailed instantly to the passenger and can be displayed on a smartphone (through Parking Panda's free iOS or Android apps) or printed for guaranteed entrance at the selected location. Parking Panda's platform integrates seamlessly with the partner parking location to ensure that sufficient space is set aside for pre-reserved customers so that parking availability is 100 percent guaranteed, even if the lot otherwise fills up.

"Amtrak is committed to providing our customers with the best possible experience and that includes before they arrive at the station," said Matt Hardison, Amtrak chief marketing and sales officer. "By partnering with Parking Panda, we are providing an exceptional innovation to the parking experience and our passengers will have less to worry about and more time to enjoy their journey with us."

Reminder: Employee Helpline is at Your Service

Amtrak is committed to maintaining a positive and productive environment for all employees. If a conflict arises at work, there are people and resources to turn to for help. Employees may call the toll-free Amtrak Helpline to report any type of workplace conflict or concern. A third-party interview specialist will document the issue in detail and refer this information to Amtrak for follow-up.

Employees will be given the option to remain anonymous. All Helpline reports are reviewed by an Amtrak employee in the Law Department who refers the reports to the appropriate department. For example, reports may be referred to a senior manager in the employee's department, Employee Relations, the EEO (Equal Employment Opportunity) Compliance Office or the Amtrak Police Department. The decision about where to direct the reports is made based on the information given to the Helpline.

All key information should be given to the Helpline at the time the complaint is filed, so the report can be expeditiously referred to the appropriate office. In general, the Law department will not conduct further intake before referring the report. Helpline reports will be handled promptly and discreetly. Retaliation of any kind violates Amtrak's policies and will not be tolerated.

Please note that the reports are reviewed by the Law Department only during regular business hours. Emergencies, such as workplace violence incidents, should be reported directly to the Amtrak Police (1-800-331-0008) or to your local management.

Amtrak's Helpline can be reached at (866) 908-7231 or at <http://www.reportineweb.com/Amtrak>

New Year, New You!

On January 1, Amtrak launched its new Weight Watchers campaign, offering reduced membership pricing. Available to all Amtrak employees, the official site kickoff will begin in February 2015. For employees wanting to start early, sign up [here](#) and start today.

Cold Comfort: Stay Warm and Safe

January 26, 2015

How cold is too cold? According to Occupational Safety and Health Administration (OSHA), cold stress can occur when the body is unable to warm itself. This can lead to tissue damage and possibly death. Four factors contribute to cold stress:

- Cold air temperatures
- High-velocity air movement
- Dampness of the air
- Contact with cold water or surfaces

A cold environment forces the body to work harder to maintain its temperature. Cold air, water, and snow all draw heat from the body. OSHA points out that while below-freezing conditions and inadequate protection can bring about cold stress, problems can also occur with much higher temperatures, even in the 50s, when coupled with rain and wind. The most common cold-induced problems are hypothermia, frostbite, and trench foot.

Cold conditions add hazards to normal safety concerns on the job. It's not just low temperatures, but also wind and water that heed warning. For example, when the air temperature of wind is 40 degrees F (4 degrees C) and its velocity is 35 mph, exposed skin receives conditions equivalent to the still-air temperature being 11 degrees F (-11 degrees C).

Wet conditions also increase the hazards of cold temperatures beyond the actual thermometer reading. OSHA recommends these precautions:

Wear at least three layers of clothing.

- An outer layer, such as GORE-TEX®, to break the wind
- A middle layer of down or wool to absorb sweat and provide insulation
- An inner layer of cotton or synthetic weave to allow ventilation

Wear a hat. Considerable heat escapes the body from the head.

Keep a change of dry clothing available in case work clothes become wet.

Wear loose rather than tight clothing for better ventilation.

Follow work practices, including:

- Drink plenty of water to avoid dehydration
- Schedule work during the warmer parts of the day
- Take breaks out of the cold
- Work in pairs
- Avoid fatigue
- Consume warm, high-calorie food

Reminder: Add APD11 "Txt-a-Tip" to Your Mobile Device

In 2013, Amtrak launched a new method for reporting suspicious activity, crime, or emergencies by introducing [APD11 "txt-a-tip."](#) a program that allows contacting the Amtrak Police Department's (APD) National Communications Center via SMS text messaging. Passengers can report suspected criminal or suspicious activity by sending a text to APD11 from a smartphone or to 27311 from a standard cell phone. Txt-a-tip especially benefits Amtrak passengers and station visitors who are deaf or may have hearing loss, by providing an easy and efficient method of communicating emergency information to the APD.

When a text is received, the sender will receive a message acknowledging the report, and will then be connected to a live Amtrak Police Communications Officer who will correspond directly via text message with the person to learn more about the situation and determine the appropriate action.

During 2014, the Amtrak Police Department National Communications Center received over 450 messages from passengers and employees via the APD11 txt-a-tip system.

For more information about the Amtrak Police Department visit www.amtrakpolice.com.

You're Invited...Philadelphia 30th Street Station District Plan Open House

Amtrak along with its partners Brandywine Realty Trust, Drexel University and the Southeastern Pennsylvania Transportation Authority (SEPTA) is hosting an Open House on the Philadelphia 30th Street Station District Plan on Wednesday, January 28 from 4:00 p.m. to 7:00 p.m. on the main concourse at 30th Street Station (30th Street side). All are welcome to attend. This event is an opportunity to learn about the District Plan, meet the project team, ask questions and provide input.

The District plan is a joint planning effort to create a single, integrated vision for the area surrounding 30th Street Station as a dynamic neighborhood anchored by a world-class transportation hub. For additional information on the project, please visit www.PhillyDistrict30.com.

Securing Amtrak Rights-of-Way

June 1, 2015

Securing each right-of-way at all times is extremely important to reduce safety and security risks. Keeping these areas secure is a requirement Amtrak must comply with under federal regulation.

Employees must ensure that restricted areas, including gated access to rights-of-way, are all properly secured at all times. After entering a right-of-way area, the access gate must be secured directly afterward. When leaving the area, the senior ranking employee must ensure the access gate is secure and properly locked.

Employees are reminded to report any suspicious persons along the right-of-way and at stations. Towers, substations, central instrument houses and interlockings should also be observed for suspicious activity. Immediately report open gates and fences to a supervisor or Amtrak Police Department at 1-800-331-0008 or by sending a text to APD11 from a smartphone or to 27311 from a standard cell phone, or by calling 911. Remember, "If You See Something, Say Something".

All employees are required to display an Amtrak photo identification card on their outermost garment and above the waist while on Amtrak property. Report people without Amtrak identification to Amtrak Police at 1-800-331-0008.

ALDE, Part 1 – Sneak Peek: What's Your Leadership Style?

This article is part of a series which previews the new skills Amtrak's leaders are developing as part of the Amtrak Leadership Development Excellence (ALDE), Part 1 program.

Amtrak's newest leadership development program ALDE, Part 1 uses the DiSC assessment to help our leaders improve productivity, teamwork and communication. Leadership styles may be described as:

- **Dominance: Focus** on results, the bottom line;
- **Influence: Focus** on influencing or persuading others;
- **Steadiness: Focus** on cooperation, sincerity, dependability; or
- **Conscientiousness: Focus** on quality and accuracy.

Learn more at: <https://discprofile.com/what-is-disc/overview/>.

ALDE, Part 1 is an innovative, customized leadership program, tailored to Amtrak's business needs, and provides simple, standardized, curriculum for non-agreement and agreement leaders as well as every Functional Area and Business Line.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Enroll Online Today

Amtrak's agreement and non-agreement leaders who have direct reports can enroll online for upcoming sessions throughout 2015 in ten locations across the country. To enroll online, visit <http://cip.corp.nrpc/irj/portal> on the SAP/LSO Employee Information Portal (EIP). Questions may be sent via email to ALDE@amtrak.com.

Station in the Spotlight...Sandpoint, Idaho

Last week, city and Amtrak leaders were on hand to dedicate the rehabilitated 1916 Northern Pacific Railway depot. The City Council and the Historic Preservation Commission worked closely with Amtrak on the improvement project. Sandpoint is the sole Amtrak station in Idaho.

The red brick, Gothic Revival style depot reopened to passengers in spring 2015 following a complete renovation of the exterior and the passenger waiting room. Construction began in mid-2014 and included repointing of the brickwork; reinforcement of the walls; installation of a new roof; and renovation of interior spaces to bring them into accordance with ADA guidelines.

Passengers now use the former ladies retiring room, which is outfitted with glazed white tile wainscot and a terrazzo floor. Original wood benches have been refurbished to serve the next generation of travelers. There is also an ADA compliant restroom. A new exterior entrance provides access from a covered outdoor waiting area, while lighting along the eaves creates a welcoming glow in the evening. Craftsmen also installed a brick walkway around the building.

In Fiscal Year 2014, more than 8,400 passengers began or ended their journey at the Sandpoint station, which is served twice a day by the *Empire Builder* (Chicago-Seattle/Portland). To learn more about the stations across the Amtrak national system visit GreatAmericanStations.com.

TRAIN DAYS

**Amtrak Train Days
Heads West**

Amtrak employees visiting or living in the northern California area will have the opportunity to tour the [Amtrak Exhibit Train](#) when it heads west this month. As part of Amtrak Train Days celebrations, scheduled stops include:

- June 6 and 7- California State RR Museum, Sacramento
- June 13 – Dunsmuir Amtrak Station

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

Visitors can climb aboard and tour a free exhibit to learn about Amtrak's history and catch a glimpse into the company's future. Displays include vintage advertising, past menus and dinnerware, period uniforms and other items of memorabilia from Amtrak's beginning in 1971 to a model of today's sleeping accommodations and high-speed rail service displays. Interactive displays include railroad horns, trivia questions, workable signals and an engineer's stand. In addition, the Exhibit Train will be led by Veterans' Locomotive #42, honoring the service members who have served in our nation's military.

At the California State RR Museum, visitors will also have the opportunity to explore the Amtrak Experience, a dynamic exhibit that allows attendees to see, hear, and feel the benefits of train travel through interactive elements and informative graphics. Of special note, all visitors attending Amtrak Train Days at the California State RR museum will receive free admission to the facility.

For more information about Amtrak Train Days visit AmtrakTrainDays.com. To volunteer at an Amtrak Train Days event visit the [company Intranet](#) > News> Amtrak Train Days.

System Safety

The Safe-2-Safer peer-to-peer agreement-covered employee observation process and focused observations have reduced risk and severity of injuries across Amtrak. This is a major milestone for Amtrak employees.

- FY14 YTD contact rate .65 – participation rate 6%
- FY15 YTD contact rate .74 – participation rate 7%

For the three major operating departments the severity of injuries is as follows:

- Transportation: FY14 YTD: .49 FY15 YTD: .38
- Mechanical: FY14 YTD: .53 FY15 YTD: .32
- Engineering: FY14 YTD: .63 FY15 YTD: .32

Employees are encouraged to become engaged in Safe-2-Safer. It is working; there is proof in the numbers.

For more information on the System Safety department and to learn more about the System Safety Dashboard, visit the [company Intranet](#).

celebration locations, visitors can tour the Amtrak Exhibit Train, explore the “Amtrak Experience”, learn about Operation Lifesaver and receive Amtrak travel information. Young train fans can enjoy Chuggington Depot, featuring toy train and coloring tables.

Volunteers are needed at Amtrak Train Days celebrations this summer. Event locations include:

- June 27-28 Galesburg, Ill., Amtrak Station
- July 25 Grand Rapids, Mich., Amtrak Station
- August 15-16 Whitefish, Mont., Amtrak Station
- August 27-30 NY State Fairgrounds, Syracuse, N.Y.

Employees can volunteer for specific shifts or participate for the entire day. Registration is easy. Simply click on the [company Intranet](#) and select the location and time you prefer. All volunteers will receive a complimentary ATD t-shirt for participating.

Independence Train Added to Schedule

On July 4, Amtrak will be operating a special post-fireworks train to allow passengers who wish to attend the National Mall

Independence Day celebration an opportunity to catch a ride home. [Northeast Regional Train 1776](#) will depart Washington Union Station at 11:05 p.m., and make normal stops en route to New York. This one-day only train is scheduled to allow visitors to enjoy Independence Day on the National Mall, including the memorable fireworks display, and catch a comfortable ride home. Additional regularly-scheduled trains are available all throughout the NEC to provide options for passengers to attend the various fireworks displays.

Visit <http://www.nps.gov/foju> for more information on the National Mall Independence Day Celebration.

Call for Volunteers

All Aboard Amtrak Employees! The [Amtrak Train Days](#) tour continues with stops planned through November 2015. At select

Safety First: Portable Space Heater

During the cold winter weather months, many people look for an alternative means of heating their homes. A commonly used choice is a portable electric space heater to provide supplemental heat. Unfortunately space heaters can increase the risk of fire or electrical shock if not used properly. According to the National Fire Protection Agency, one third of home fires are caused by owners not properly maintaining their heaters or by unsafe practices. Here are a few important safety tips when using electric space heaters.

- Heaters must be kept at least three feet from any combustible material.
- Always plug space heaters directly into a wall outlet. Do not use extension cords or power strips which could overheat and result in a fire.
- Operating space heaters should never be left unattended. They should be turned off and unplugged at the end of the day.
- All space heaters should have the certification of an independent testing laboratory and should be equipped with a tip-over automatic shutdown feature and a grounded three prong plug.
- Heaters that are missing guards, control knobs, or have frayed cords, are otherwise damaged or defective must be taken out of service.

The good news – like so many other hazards, portable space heaters can be used safely if proper care and precautions are understood and implemented.

GROW AMERICA Express Tour Concludes

Last week, Department of Transportation Secretary Foxx visited five states on a bus tour to highlight the importance of investing in infrastructure, and to encourage Congress to act on a long-term transportation bill. The “GROW AMERICA Express” tour visited communities that have created jobs and new opportunities by investing in transportation, as well as communities with transportation projects that are waiting on much needed funding.

At all stops, Secretary Foxx stated his support for the Administration’s plan, the [GROW AMERICA Act](#), a six-year transportation proposal that would put more Americans to work repairing and modernizing our roads, bridges, railways, ports, and transit systems.

Station in the Spotlight...

The present **Tukwila, Wash.**, station was dedicated on Feb. 18, 2015 and is served by Sounder commuter rail, Amtrak Cascades trains, and Sounder Transit and Metro Transit buses. It includes two concrete platforms, covered waiting areas, pedestrian underpass, bus transfer plaza, 390 parking spaces and bicycle storage racks and lockers. Artwork by artist Sheila Klein, incorporating steel, lighting, mirrored panels and shrubbery, creates a beacon for approaching travelers.

The \$46 million facility replaces temporary structures that opened in 2000 and remained in use while the cities of Tukwila and Renton determined how a permanent station complex would best fit into long-term transportation plans for the area. Sound Transit provided the majority of funding, but the project also received federal transportation grants. For more information about the station and history of the area, visit GreatAmericanStations.com.

Microsoft Home Use Program Now Available

Active Amtrak employees are now eligible to participate in Microsoft’s Software Assurance Home Use Program (HUP). This program enables you to get a licensed copy of most Microsoft® Office desktop PC applications to install and use on your home computer.

Under the Home Use Program, you and our other employees who are users of qualifying applications at work (e.g. Office Enterprise) may acquire a licensed copy of the corresponding Home Use Program software (e.g. Office Enterprise) to install and use on a home computer. You may continue using HUP software while you are under our employment and as long as the corresponding software you use at work has active Software Assurance coverage.

In order to access this program you will need to provide the following information to the Amtrak IT Service Desk. The Service

Seven (7) Common Causes of Accidents

March 9, 2015

Accidents occur for many reasons. Consider this statistic: 80 out of every 100 accidents are the fault of the person involved in the incident and unsafe acts cause four times as many accidents and injuries as unsafe conditions. Most people tend to look for "things" to blame when an accident happens, because it's easier than looking for the real "root causes." Consider the underlying accident causes described below. Have you been guilty of any of these attitudes or behaviors?

- **Taking Shortcuts:** Every day we make decisions we hope will make the job faster and more efficient. But do time savers ever risk your own safety, or that of other crew members? Short cuts that reduce your safety on the job are not shortcuts, but an increased chance for injury.
- **Being Over Confident:** Confidence is a good thing. Overconfidence is too much of a good thing. "It'll never happen to me" is an attitude that can lead to improper procedures, tools, or methods in your work. Any of these can lead to an injury.
- **Starting a Task with Incomplete Instructions:** To do the job safely and right the first time you need complete information. Don't be shy about asking for explanations about work procedures and safety precautions.
- **Poor Housekeeping:** Housekeeping can be an accurate indicator of everyone's attitude about safety. A well maintained area sets a standard for others to follow.
- **Ignoring Safety Procedures:** Purposely failing to observe safety procedures can endanger you and your co-workers. It is your job to follow the company safety policies-not to make your own rules. Being "casual" about safety can lead to a casualty.
- **Mental Distractions from Work:** Having a bad day at home and worrying about it at work is a hazardous combination. Dropping your 'mental' guard can pull your focus away from safe work procedures.
- **Failure to Pre-Plan the Work:** There is a lot of talk today about Job Hazard Analysis (JHA). JHAs are an effective way to figure out the smartest ways to work safely and effectively. Being hasty in starting a task or not thinking through the process can put you in harm's way. Instead, Plan Your Work and then Work Your Plan!

Creating a Learning Culture that Supports One Amtrak Way...Defining a Strategy for the Future is the First Step

Amtrak strives to promote and measurably improve knowledge sharing, professional and technical development, learning and continuous improvement of all of our employees. The focus of this goal is creating a learning culture and knowledge-based workforce at Amtrak.

Amtrak's Integrated Talent Management and Total Rewards strategy have been in effect for two years now, and is a cornerstone in building One Amtrak Way and achieving our strategic goals. A project to build an Amtrak-wide Training & Employee Development (TED) strategy is underway which will begin shaping a culture that prioritizes learning as critical to our success.

A core working team of Amtrak colleagues from across the Business Lines and the functional areas has been partnering throughout their organizations to collect current-state data needed for this project and illustrate "how training gets done" today. This team has done a great deal of work to collect the right data from the right people. We hope you will join us in applauding their continuing effort. They are...

Burt Glassman
Carolyn (Sigg) Kennedy
Jessica Hatchette
Kim Supranovich
Mark Rose
Maria Faulkner
Milt Lundy
Ramona Schmitt
Susan Reinertson
Zenaida Crousore

Camille Ross
David Nelson
Joanne Maxwell
Mark Jones
Mary Carlson
Michael McKenzie
Paris Davis-Reed
Steve Ladislav
Tom Kozmel

The Training & Employee Development (TED) strategy will be the blueprint for transforming Amtrak into a learning culture and contributing to an Integrated Talent Management and Total Rewards environment that develops, attracts and retains the best fit talent and offers ongoing development and growth opportunities for colleagues who have made Amtrak the great organization it is today.

More updates will come through various channels regarding progress of Amtrak's strategy for the future of learning, so look for updates on our progress in *Amtrak This Week*.

Reminder: The IRS issued its 2015 optional standard mileage rates, and beginning Jan. 1, the standard mileage rates for the use of a car, van, pickup, or panel truck is 57.5 cents per mile for business miles

driven (an increase from 56 cents in 2014).

Amtrak vs. Sprains and Strains: February Results

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout fiscal year 2015 (FY15). Each month, we are challenged to combat and reduce our sprains and strains from fiscal year 2014 (FY14). The goal is to **"knock out"** this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains.

"Knock Out" in Round 2

Amtrak delivered an upper cut to finish the Brawler in Round 2. Sprains and Strains were down and out as Amtrak finished the month of February FY15 with 31 percent less strain injuries compared to this time February FY14. FYTD, strain injuries are down almost 19 percent throughout Amtrak.

Learn more about Amtrak v. Sprains and Strains on the company [Intranet](#)> Safety.

Customer Service Awards Presented to Oakland and Los Angeles Employees

Last week, members of the Amtrak Customer Advisory Committee (ACAC) honored three employees in California. Herman Davidson, lead service agent, *Capitol Corridor*; Peggy Fleming, sleeping car attendant, *Southwest Chief*; and Denise Murtaugh, red cap at Los Angeles Union Station each received the prestigious Customer Service Award in recognition of their exemplary customer service.

Sharon Slaton, Amtrak Senior Communications Specialist and a company liaison to the ACAC, was joined by several ACAC members, Amtrak employees, and family and friends of the honorees at presentation ceremonies in Oakland and Los Angeles. At the March 9 ceremony at the Oakland crew base, one ACAC member noted that Davidson epitomizes the concept of "customer service." In the Los Angeles ceremony on March 13, Peggy Fleming was lauded for her impeccable attention to detail and her friendliness, while Denise Murtaugh's sensitivity to passenger needs was highlighted.

Over the past dozen years, the ACAC has presented 115 Customer Service Awards to Amtrak employees, including red caps, lead service attendants, sleeping car attendants, reservation agents, and conductors. These are the only awards given by passengers to Amtrak employees. The ACAC, a group of 24 regular Amtrak riders who volunteer their time and expertise, serves as the voice of the customer, sharing ideas with and serving as a sounding board for Amtrak management.

2015 Short-Term Incentive Corporate Measures We All Play a Role in Our Strategic Plan

The Short-Term Incentive Plan ensures a strong link between individual employee performance and Amtrak's Strategic Plan by rewarding employees based on the achievement of Amtrak's financial targets as well as the corporate initiatives that support the overall Amtrak Strategic Plan.

For 2015, the Amtrak Board of Directors approved four strategic goals or Corporate Measures:

1. Reduce Adjusted Operating Loss to \$235M (or less) – This measures the organizational effectiveness by focusing on reducing the operating loss. We all have a role to play in helping to reduce or eliminate costs. Spending on things like printer ink, office supplies and overnight packages ultimately all flows back to Amtrak for payment. We all have a responsibility to review our expenditures and determine if they could be avoided. Last year, through the combined effort of all of Amtrak's employees we reduced our Operating Loss by \$214 million--substantially exceeding our goal of \$305 million. For 2015, the goal is to further reduce our Operating Loss by \$235 million.
2. Improve Customer Satisfaction Index to 78 percent (or greater) – Following their trip, customers receive an email survey that allows us to assess customer satisfaction using measures such as On-Time Performance (OTP), train cleanliness and train comfort. Anything we can do support our front-line employees and improve the customer experience will ultimately help drive revenue.
3. Decrease Cost per Available Seat Mile (CASM) to \$.218 (or less) – This measure focuses on decreasing the cost of doing business. While certain expenses are fixed, there are areas we can be more efficient. For example, some things you can ask yourself to help keep the cost of doing business down are: is this the most cost effective way to advertise, should I travel for that meeting or can we do it virtual, do I need to buy these supplies right now?
4. Increase Revenue per Available Seat Mile (RASM) to \$.204 (or greater) – This measure focuses on increasing our revenue. Regardless if the train is half-full or sold out, there are certain expenses that are essentially the same, like wear and tear, fuel and labor costs. Keeping our trains full, will drive our revenue up. We can all promote the pride we have in riding Amtrak and encourage our friends and family to do the same.

If the 2015 Corporate Measures are achieved, eligible employees will earn a Short-Term Incentive as defined by the Target Incentive for your band and zone. For more information about the 2015 Corporate Measures and your Target Incentive opportunity,

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

refer to the Amtrak 2015 Short-Term Incentive Plan at <http://wiki.corp.nrpc/download/attachments/311334391/Amtrak+2015+STI+Guide+FINAL.pdf?version=1&modificationDate=1426265421192>

To continuously find out how we are doing against our goals visit the main Intranet page >Tools & Performance > Short Term Incentive (STI).

Quarterly Progress Update: 2015 Corporate Measures:

To earn a Short-Term Incentive payout, we must achieve the goals we set at the beginning of the year. Our progress against these goals is outlined below.

Measure One: Reduce Adjusted Operating Loss to \$235M (or less) - **Behind Target**

Our FY15 goal for our Adjusted Operating Loss is \$235 million (or less). We are currently projecting to lose \$282 million this year, which is \$47 million short of our target. We have done a great job in keeping our expenses down and need to work on increasing our revenue to close this gap by the end of the year to justify STI payments.

Measure Two: Improve Customer Satisfaction Index (eCSI) to 78% (or greater) – **On Target**

Through January, our overall eCSI is 78 percent. On Time Performance (OTP) on most routes, especially in January and February, is a major reason for Amtrak's current satisfaction performance. Improved scores in other service experience attributes, including information given to passengers about delays, train cleanliness and train comfort are also helping to improve the overall score.

Of Amtrak's 46 train routes, 23 are meeting or exceeding their eCSI target while 23 are below target. *Empire Builder*, *California Zephyr*, *Texas Eagle* and *Adirondack* are among the routes that are performing well against target. Most of the routes that are performing well below their respective FY15 targets are state corridor routes that have had recent OTP issues in FY15. For those in direct contact with our customer, we need to make sure we provide our customers with the best information possible to keep our eCSI score within the target. For employees that don't have direct contact with customers we need to make sure that everything done will allow those in front of the customer the ability to focus 100% on the customer.

Measure Three: Decrease Cost per Available Seat Mile (CASM) to \$.218 (or less) – **On Target**

We must decrease the cost per available seat mile to \$.218 or less for the year. We are currently at \$.197 cents per Seat Mile (through January).

Measure Four: Increase Revenue per Available Seat Mile (RASM) to \$.204 (or greater) - **Behind Target**

We must increase the revenue per available seat mile to \$.204 or more for the year. We are currently at \$.195 cents per Seat Mile (through January).

What's My Potential Payout?

Each full-time and part-time non-agreement position within Amtrak has a defined Target Incentive based on the position's band and zone and is stated as a percentage of employee base salary. To find out more about the plan, including the target for your level please visit the wiki site [here](#) for more information.

Stay tuned for upcoming articles on how we are doing through the remainder of the year.

Pass Policy Change for Student Travel

Due to a revised assessment of complex and imprecise IRS rules regarding fringe benefits, Amtrak's Pass Policy for full time student pass privileges has been revised as follows: Subject to certain requirements and verification procedures, full time student pass privileges will end at the dependent's 24th birthday. Current pass policy indicates that full time student pass privileges end at the 26th birthday.

Students past their 24th birthday will have their pass inactivated effective April 10, 2015

- Effective April 10, 2015, all dependents aged 24 and above (except for those who are disabled) will be inactivated in pass files and they will no longer have pass privileges. On and after that date, the normal weekly pass file processing will automatically inactivate any student dependent who has turned 24 within the previous week, as it already does with non-student dependents who have turned 19 within the previous week.

Pass policy for dependents restated and will be:

- Until the 19th birthday - all dependents have pass privileges. From the 19th birthday until the 24th birthday - full time student dependents have pass privileges.
- Proof of student status must be submitted at least once a year or the dependent will lose pass privileges.
- Beginning with the 24th birthday - full time student dependents no longer have pass privileges.
- Disabled dependents - Disabled dependents of any age retain pass privileges. Proof of disabled status (a Social Security Administration or Railroad Retirement Board disability award letter) must be submitted.

Ineligible dependents - recover pass cards

Please be certain that you have recovered the Rail Travel Privilege Card from these and all other dependents no longer eligible for pass privileges, to prevent unauthorized "flash passing". If such travel by an ineligible dependent occurs this will be considered pass abuse and you may be subject to various measures, including being charged for the retail value of any travel taken.

Questions? Please call Amtrak Benefits at 800-481-4887 regarding this change or any other benefit matter.

The PSSA Nomination Period is Opening Friday, March 20

Calling all Amtrak employees - it is time to start thinking about who you want to nominate for outstanding achievements and contributions to Amtrak. The President's Service and Safety Awards (PSSA) are Amtrak's top awards for employees and external partners.

You can make a difference by recognizing your co-workers, leaders, teams and other colleagues and we have 11 different categories for you to choose from. Check out the list here <http://wiki.corp.nrpc/display/AWARDS/President%27s+Service+and+Safety+Awards> and make sure to take a look at the forms for a couple of our favorite categories – Safety Achievement, Living Our Values and Excellence in Leadership.

The nomination period is open Friday, March 20, 2015 through Monday, April 20, 2015. If you have never previously submitted a nomination, this is the year to try it. If you are a loyal nominator, we look forward to seeing your nominations again this year.

Also, please remember to support the committee members as they work diligently to select this year's award recipients. We need everyone's help to ensure that we select the best of the best as 2015 President's Service and Safety Awards winners.

Winners will be selected in the fall and honored in November at a ceremony in Washington, D.C.

Nomination forms are posted on the intranet and can be found in the Forms Library which is available by clicking "Library" then clicking "Forms." Questions can also be directed to committee members and/or pssa@amtrak.com. Once the nomination period concludes, nominations will be reviewed for completeness and strength of information, so please make your nomination form as clear, concise and complete as possible.

Long-Distance 20 Percent off Saver Fare Test Revised

Given the anticipated impact of falling gas prices, the Amtrak Long-Distance Saver Fare, 20 percent off with a 14-day advance purchase, is being tested on two train routes, the *Southwest Chief* and *Empire Builder*.

Customers may book their trip until April 30 for travel March 2 through June 14, 2015 to enjoy the savings. If successful, the 14-day advance Saver fares may be implemented on all long-distance trains.

This advertising effort is a collaborative and integrated approach including National Advertising and the Midwest, Northwest and Southwest Field Marketing teams. Amtrak will utilize online display ads, search and radio to promote this offer. Amtrak Guest Rewards and Amtrak.com assets are also being utilized.

AMTRAK[®] THISWEEK

March 23, 2015

Grade Crossing Precautions

Recent incidents involving vehicles struck at grade crossings reinforce the need to remind employees what can and should be done when a vehicle is stuck on the tracks. Employees who are qualified on the operating rules should take the actions prescribed by railroad rules and special instructions for protecting obstructed track, including initiating an emergency radio broadcast, and then notifying the train dispatcher.

Other employees should be aware that there are blue signs posted on either the crossbuck posts or the signal mast at grade crossings. Those signs, part of the Emergency Notification System (ENS), display an emergency phone number and the Department of Transportation crossing location. That posted 800-number should be called to notify the operating railroad at that location of an impending emergency situation. The engineer of an approaching train can be notified to stop safely to avert a tragedy. If the ENS sign cannot be located, a call to 911 or the local police should be initiated.

Knowing where to find the emergency number and when to call it is part of the training and practices for drivers of commercial vehicles. There is a companion effort on the part of Operation Lifesaver and our System Safety department to get a similar message out to drivers of passenger vehicles. *Please try to familiarize yourself with these signs. **You could save lives.***

If someone is stuck on the tracks and a train is approaching there is a minimum of 20 seconds from the time the lights start flashing until the train is at the crossing. So if you are in a vehicle, you may only have 20 seconds to escape. Just **GO; get out** of your vehicle and run in a 45 degree angle away from the train in the direction that the train is coming and call 911 immediately or the ENS number if possible

Railroads' Emergency Phone Numbers: Provide the location, crossing number (if posted), and the name of the road or highway that crosses the tracks. **And be sure to specify that a vehicle is on the tracks!**

Amtrak	1-800-331-0008
BNSF Railway	1-800-832-5452
CSX	1-800-232-0144
Canadian National	1-800-465-9239
Canadian Pacific	1-800-716-9132
Kansas City Southern	1-800-892-6295
Norfolk Southern	1-800-453-2530
Union Pacific	1-888-877-7267

Remember, call the local police or dial 911 if you cannot locate the railroad emergency phone number at the site.

New System Timetable in Effect April 6

The Amtrak system timetable is scheduled to be updated, printed and distributed with an effective date of April 6. PDF versions of the schedule will be uploaded to Amtrak.com a few days prior to April 6 and delivery to stations and other distribution points will happen shortly thereafter.

All trains and corridors not impacted by the freight scheduling issues were produced and distributed with the original January 12, 2015 effective date. Timetable products for the following trains will be issued per the following schedules and will remain valid until the next update.

- **Issued with an effective date of November 2, 2014** (end of daylight saving time):
 - *Sunset Limited, Southwest Chief, Texas Eagle/Heartland Flyer*
- **Issued with an effective date of December 29, 2014** (first day of rerouted service):
 - *Vermont/er/Ethan Allen Express* (will be reissued April or May)
- **Issued with an effective date of January 12, 2015:**
 - *New York-Washington, D.C., panel, Springfield/Boston – Washington, D.C., panel, Keystone Service, Pennsylvanian, Empire Service, Adirondack, Maple Leaf, Crescent, City of New Orleans, Hiawatha Service, Illinois and Missouri Services, Empire Builder, California Zephyr, Coast Starlight, San Joaquin.*
- **Issued with an effective date of March 1, 2015:**
 - *Capitol Corridor, San Joaquin.*
- **Issued with an effective date of April 6, 2015:**
 - *Amtrak System Timetable, Boston/Springfield – Virginia Panel, Capitol Limited, Lake Shore Limited, Cardinal/Hoosier State, Atlantic Coast Services, Michigan Services, Downeaster, Pacific Surfliner.*
- **Status quo:**
 - *Amtrak Cascades*

Amtrak Marketing Efforts Honored by NY State Advocacy Group

Last week, Amtrak Senior Marketing and Sales Specialist Deb Sanderson was recognized by Empire State Passengers Association (ESPA)

President Bruce Becker for her outstanding marketing efforts of Amtrak across New York State. ESPA is the New York State chapter of the National Association of Rail Passengers, an advocacy group supporting passenger train travel. Sanderson was a guest speaker at ESPA's 35th annual statewide meeting held in Schenectady, NY where she provided a presentation on her marketing program to the ESPA members.

CASM & RASM – Measuring Our Efficiency

We as Amtrak employees have a responsibility to make the most efficient use of Amtrak's dollars. For 2015, two of the Corporate Measures – Cost per Available Seat Mile (CASM) and Revenue per Available Seat Mile (RASM) – measure our efficiency as a business. If we achieve the targets, eligible non-agreement employees will earn a Short-Term Incentive.

CASM and RASM are common measurements in the transportation industry, particularly among the airlines. CASM is the cost to Amtrak to operate and move one seat one mile. (Operating Costs divided by Total Available Seat Miles). This is expressed in cents per available seat mile. Operating costs include all expenses incurred by the business – from fuel, train maintenance, infrastructure improvements, new equipment to employee compensation and benefits. The goal would be to reduce Amtrak costs throughout the year and/or add more available seats per mile which should reduce our cost per seat per mile. For 2015, our targeted goal is to decrease the CASM to less than or equal to \$0.218.

RASM is similar to CASM except it is expressed as the total revenue Amtrak receives for each seat moved one mile. The measurement encompasses all operating revenue including ticket revenue, food & beverage revenue and other revenue. RASM is calculated by using total revenue divided by available seat miles. The goal would be to increase revenue throughout the year increasing our RASM. For 2015, our targeted goal is to increase the RASM to greater than or equal to \$0.204.

We all have a role to play in achieving our CASM and RASM targets and running our business as efficient as possible. Reducing our operating costs will help us to achieve our CASM and maximizing our revenue to achieve our RASM targets.

Here are just a few ways you can help Amtrak run more efficiently:

Continuously improve – Take an honest look at how you and your team operate. Identify areas where you can improve your productivity and ways of working.

Manage the finances like it's your own money – Before spending your hard earned cash, you probably compare your options to gain consumer insights and find the best value. You may ask yourself: 'do I need to spend this money or will a less-expensive alternative meet my needs?' A similar approach should be used when spending Amtrak dollars.

For more information about our 2015 STI Measures, refer to the [Guide to the Amtrak 2015 Short-Term Incentive Plan](#). Watch this space for updates on how we are progressing toward our Corporate Measures and suggestions on how you can help Amtrak achieve its Strategic Plan.

Amtrak Guest Rewards Program Hits Membership Milestone

On March 17, the Amtrak Guest Rewards (AGR) program achieved its 5 millionth member. Amtrak Guest Rewards, established in 2000, is the company's customer loyalty program, allowing our customers to earn points for every trip they take. Points can be redeemed for future travel and various products and services.

Today, AGR members account for 32 percent of Amtrak ticket revenue. The program also generates revenue via program partners and a co-branded credit card. You can find out more at AmtrakGuestRewards.com or on the company Intranet at <http://wiki.corp.nrpc/display/AGR/Home>.

Amtrak Employee Assistance Program- Help is Available

The Employee Assistance Program (EAP) is an important part of Amtrak's safety culture and commitment to its employees. To expand service offerings, increase accessibility and offer a state of the art program, the EAP has undergone a recent reorganization. Changes include addition of an industry-leading vendor partner and streamlining the internal EAP Counselors. Through Amtrak's Employee Assistance Program employees and their immediate family members are now able to see skilled, licensed counselors convenient to work or home at no cost. Additionally, employees and their households have access to legal and financial consultations, elder and childcare referrals and a robust, award winning website full of information and tools to manage life challenges and improve individual wellbeing. To access EAP services call (844)-Amtrak1/(844) 268-7251 or www.achievesolutions.net/AmtrakEAP.

As part of the change to the program, we welcome Miles Murdaugh to the EAP Team. Miles will work as the EAP counselor in the Los Angeles EAP Office covering the West Coast as well as Arizona, New Mexico and Texas. Other EAP team members include Greg Williams in the Chicago EAP office covering the central part of the country and Steve Garnham who covers the East Coast. Amtrak's internal EAP Counselors will continue to focus on providing first-class service in managing Amtrak's CARE program for employees who experience critical incidents and other safety sensitive issues including treatment for substance use issues as well as management and union referrals. For any questions regarding the Employee Assistance Program or changes to the program contact EAP Manager, Chian Gavin at 202-906-3275 or chian.gavin@amtrak.com

April is National Uniform Awareness Month

The image that you project is part of the overall Customer Experience that you provide to our customers. In line with "spring cleaning" activities, uniformed employees are encouraged to visit with their local uniform coordinator and place orders to look extra fresh and crisp as we prepare to kick-off our upcoming Amtrak Train Days, which officially begins in Chicago, Saturday, May 9.

Supervisors will be extra observant during April to ensure employees' footwear meets safety requirements, all uniform components are compliant as outlined in the Station policy and Service Standards Manual (SSM), and personal grooming is conservative and business-professional. Look your best and continue to "Dress for Success."

Amtrak IT Center to Open in Metro Atlanta Area

The Amtrak IT department is excited to announce the establishment of its Atlanta Service Delivery Center at Concourse Office Park in Sandy Springs, Ga., which will serve as an additional location for IT operations. The office lease has been signed is expected to open in the summer of 2015. Amtrak IT operations will continue to operate in Washington, D.C., Philadelphia, and Wilmington, Del.

For more information, read the [March xx] press release [link].

March 30, 2015

Employee Assistance Program is Here to Help

The Employee Assistance Program (EAP) is an important part of Amtrak's safety culture and commitment to its employees. To expand service offerings, increase accessibility and offer a state of the art program, the EAP has undergone a recent reorganization. Changes include addition of an industry-leading vendor partnering with our team of internal EAP Counselors. Through Amtrak's Employee Assistance Program, employees and their immediate family members are now able to see skilled, licensed counselors convenient to work or home at no cost. Additionally, employees and their households have access to legal and financial consultations, elder and childcare referrals and a robust, award winning website full of information and tools to manage life challenges and improve individual wellbeing. **To access EAP services call (844)-Amtrak1/(844)-268-7251 or www.achievesolutions.net/AmtrakEAP.**

As a part of the changes to the program, we welcome Miles Murdaugh to the EAP Team. Miles will work as the EAP counselor in the Los Angeles EAP Office covering the West Coast as well as Arizona, New Mexico, Texas and Oklahoma. Other EAP team members include Program Manager Chian Gavin in Washington, D.C., Greg Williams in the Chicago EAP office and Steve Garnham in the Philadelphia EAP office. Amtrak's internal EAP Counselors will continue to focus on providing first-class service in managing Amtrak's CARE program for employees who experience critical incidents and other safety sensitive issues including treatment for substance use issues as well as management and union referrals.

For any questions regarding the Employee Assistance Program or changes to the program, contact EAP Manager Chian Gavin at 202-906-3275 or chian.gavin@amtrak.com.

Amtrak Announces Changes to Retirement Program for 2015

A letter explaining important changes to Amtrak's retirement program for non-agreement employees was mailed to employees' homes and should arrive by this Friday, April 3, 2015. These changes affect Amtrak's pension plan, 401(k) and retiree medical programs for non-agreement employees and retirees. The letter contains important information on how these changes affect you, as well as resources you can utilize to understand and plan for your retirement. A summary of these changes can be found on our Benefit Wiki site [here](#) or at Amtrak Benefits [here](#).

In the coming weeks, leaders from Amtrak's Human Capital Management team will host a series of employee meetings to help you better understand these changes and what they will mean for you.

If you have not received the letter that was mailed to your home by this Friday, please contact the Amtrak Retirement Program Changes hotline at **800-481-4887** (Monday – Friday, except holidays, 8:00 a.m. – 6:00 p.m., Eastern Time). They will re-send the letter to your home.

Newly Updated Information Security Awareness Computer Based Training is now available

Information Security Awareness Training is crucial to Amtrak and the updated training will focus on many of the challenging areas Amtrak users face on a daily basis. New training content includes new questions, refreshed graphics and new tools designed to help users to remain vigilant while using Amtrak network and system resources. The training will last approximately one hour and will cover:

- Browser Security
- Email Security Risks
- Identifying and Counteracting Social Engineering Exploits
- Physical Security Measures
- Strong Password Selection
- Desktop Security Settings
- Identifying and Responding to Security Incidents

This is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account and SAP ID. The 2015 course is currently available to employees via the Training section of the Employee Information Portal or via the Information Technology section of the intranet for contractors. Please note this training is a supplement to Amtrak's Information Technology Security and Usage Policy and must be completed by September 30, 2015.

With your attendance we will be able to improve information security awareness and help keep Amtrak network resource users aware of potential information security pitfalls.

For additional information and instructions please visit: <http://wiki.intranet.nrpc/download/attachments/5591/Accessing+The+Course.pdf?version=1>

April is National Uniform Awareness Month

The image that you project is as important as the service that you provide. Both of these contribute to the overall customer experience for our passengers. As we move from winter to spring, this is also a great time for uniformed employees to review their current uniform wardrobe.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

AMTRAK[®] THISWEEK

A Weekly Publication for and by Amtrak Employees

If necessary, employees should visit with their local uniform coordinator and place new orders as we prepare to launch Amtrak Train Days, which officially begins in Chicago on Saturday, May 9. Supervisors will continue to ensure that employees' footwear meets safety requirements, all uniform components are compliant as outlined in the Station Policy and Service Standards Manual (SSM), and personal grooming is conservative and business-professional. Look your best this Spring...and continue to "Dress for Success."

What's Involved in the Amtrak Training/Employee Development (TED) Strategy?

After reading the recent announcement regarding the Amtrak TED Strategy Project and our journey toward creating a "learning culture", many may stop and ask what exactly a TED Strategy is...and what it *does*?

The Amtrak TED Strategy Project does more than just look at what training Amtrak employees need. In fact, the strategy assesses every aspect of how to run a learning organization **like a business** and recommends the best path to take in the next three to five years. In the Amtrak TED Strategy Project, a number of important topics will be addressed to create a learning culture, emulate *One Amtrak Way*, and benefit your daily life:

- You're getting the training you need, at the time you need it.
- Amtrak employees are receiving the same training on non-job specific topics (for example, one Cardiopulmonary Resuscitation (CPR) course provided for all employees across Amtrak).
- Amtrak is making the most effective and efficient use of training dollars to ensure employees get the most and best learning opportunities available.
- Amtrak is providing learning opportunities to "upskill" yourself for future career opportunities.

These are a few of the key topics the strategy will address.

While there is a great deal to consider, and much to accomplish in the coming years, implementation of the strategy will help Amtrak continue to be a place people want to work, learn, grow, and be the best they can possibly be.

Business Pass Travel on Auto Train Requires Prior Authorization

Amtrak employees using their business passes to travel on *Auto Train* are required to obtain prior approval for that travel to ensure that business travel does not conflict with busy travel periods when we need all the space for revenue passengers.

The pass policy for business travel on *Auto Train* requires that Amtrak employees using their business passes obtain prior approval from the *Auto Train* Route Director Kathy Brewer, brewerk@amtrak.com or 703-690-3666/ATS 741-3666). Please ensure that if you are traveling on *Auto Train* for business purposes, you follow this procedure.

Amtrak Train Days to Launch in May

All Aboard Amtrak Employees! Help

celebrate Amtrak Train Days when it comes to a community near you. Last year, more than 313 communities in all 50 states demonstrated their love of trains on National Train Day. It's hard to believe that since the first celebration held seven years ago, the participation level has expanded and grown five-fold. Due to the growing success and the concentrated resources required in supporting a one-day celebration, we are evolving this program into a traveling, community-centric experience under the new name of [Amtrak Train Days](#).

Amtrak Train Days will showcase the products and services we offer through a combination of fun-filled activities including tours of the [Amtrak Exhibit Train](#) and the **Amtrak Experience** display. During select ATD events, guests will be able to explore the Amtrak Exhibit Train and learn about the company's past, present and future. Amtrak will also showcase "Reasons to Ride" the train, a dynamic experience that allows attendees to see, hear, and feel the benefits of train travel through interactive elements and informative graphics. The framework emulates the structure of a train and incorporates real furniture, interactive elements and informative graphics.

Other features may include Chuggington Depot, a kids play area featuring train and coloring tables and talks by guest speakers. Our partners throughout the tour also include the National Park Service, Operation Lifesaver, Nook by Barnes & Noble and Amtrak Vacations.

Amtrak Train Days kicks off at Chicago Union Station on May 9, and then the Exhibit Train and Amtrak Experience hit the rails, traveling to more than 15 locations during 2015. Amtrak-served communities, state partners and rail industry colleagues are also invited to join in the celebration by hosting their own events on dates of their choice.

To learn more about ATD events, visit AmtrakTrainDays.com. Next week, watch this space to learn how you can play a part and volunteer for an ATD celebration in a community near you.

Amtrak vs. Sprains and Strains: April Update

Amtrak vs. Sprains and Strains is a competitive event with a focus on bringing situational awareness for reducing injuries related to sprains and strains throughout FY15. Each month we will be challenged to combat and reduce our previous sprains and strains from FY14. The goal is to “knockout” this undesired opponent each and every month and also to end FY15 with 15 percent fewer sprains and strains.

The month of April finished with 3.9 percent fewer injuries, an improvement over April 2014. Year-to-Date FY15 sprains and strains have increased 33.3 percent compared to the same time frame in FY14. It takes everyone focusing on injury prevention to position ourselves for victory and achieve the FY15 strains and sprains reduction goal.

Learn more about Amtrak v. Sprains and Strains on the company [Intranet](#)> Safety.

Road Shows to Explain Changes in Retirement Benefits

Amtrak recently announced changes to its retirement program for non-agreement employees. To further explain these changes and answer questions, members of the leadership team will be conducting road shows over the next several weeks at different locations. These events are an opportunity to hear information first-hand, ask questions, and get answers. For the week of May 11 and May 18 the scheduled locations include:

Friday, May 15
Philadelphia, Pa., Call Center
2198 Horning Road
Large Conference Room
11:00 a.m.

Monday, May 18
Miami, Fla., Station
Mechanical Conference Room
2nd Floor
9400 NW 37 Avenue
8:30 a.m. and 1:30 p.m.

Tuesday, May 19
New Orleans, La., Station
Annex Conference Room
Annex Building, 2nd Floor
1001 Loyola Avenue
10:00 a.m.

Friday, May 22

Albany-Rensselaer, N.Y., Station
4th Floor, Executive Conference Room
8:30 a.m.

Stay tuned for the week of May 25 when we will be in Beech Grove. Also look for future emails and work site posters for meeting locations, dates and times.

Questions?

Specially trained representatives are available to answer questions about the Amtrak Retirement program changes. Please contact the Amtrak Benefit Service Center at (800) 481-4887, Monday through Friday, except holidays, from 8:00 a.m. to 8:00 p.m., Eastern Time.

Visit the **Amtrak Total Rewards** intranet site, <http://wiki.corp.nrpc/display/BEN/Home>, for the most up-to-date resources including FAQs, road show schedule, fact sheets and more.

Updated Information Security Awareness Computer Based Training is now Available

An updated Information Security Awareness Training course is now available. Course content includes new questions, refreshed graphics and new tools designed to help users to remain vigilant while using Amtrak network and system resources. The training will last approximately one hour and will cover:

- Browser Security
- Email Security Risks
- Identifying and Counteracting Social Engineering Exploits
- Physical Security Measures
- Strong Password Selection
- Desktop Security Settings
- Identifying and Responding to Security Incidents

Remember, this is a mandatory course that is to be completed by employees and contractors who have an Amtrak e-mail account and SAP ID by **September 30, 2015**. Add It Up: How an Increase in Your 401(k) Match Can Make a Difference

Amtrak recently announced beginning with the July 3, 2015 paycheck it would increase the company match for non-agreement employees, dollar for dollar, up to seven percent – an increase from five percent.

With the Amtrak Retirement Savings Plan – 401(k), employees can save a percentage of their salary on a pre-tax basis. Amtrak also contributes into the account. Participating employees decide how much to save and how to invest their account balance. Under the plan, non-agreement employees may contribute one percent to 40 percent of their salary on a tax-deferred basis, up to IRS limits. In 2015, the IRS limits (subject to change each year) are:

- \$18,000 for employees under age 50; and
- \$24,000 for employees age 50 and older.

Anytime during the year, employees can enroll in the Plan, increase their contributions, or access information about the Plan by visiting www.netbenefits.com/amtrak or calling Fidelity Investments at 877-477-AMTK (2685).

Maximize Savings

Over time, increasing contributions into the 401(k) plan can have a significant impact on retirement savings. And, with Amtrak's increased matching contribution, the savings potential is even greater. The example below illustrates the impact of taking full advantage of the increased maximum company match (seven percent).

Add it Up. In the following example, a Bankrate tool was used. In addition, the Fidelity calculator can be used.

John – Early Career

Age:	35
Years to Normal Retirement:	30
Annual Salary:	\$65,000
Annual Salary Increase:	3%
Current 401(k) Balance:	\$100,000
Rate of Return:	6%

John & Amtrak Contribute 5%

Total John Will Contribute:	\$159,259
Total Amtrak Will Contribute:	\$159,259
Balance at Normal Retirement:	\$1,316,012

John & Amtrak Contribute 7%

Total John Will Contribute:	\$222,962
Total Amtrak Will Contribute:	\$222,962
Balance at Normal Retirement:	\$1,612,676

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

To take full advantage of the maximum company match, non-agreement employees can contact Fidelity at 877-477-AMTK (2685) or visit www.mysavingsatwork.com/amtrak and request to increase their contributions to seven percent.

Carolinian and Piedmont Service Celebrations

The month of May marks the anniversary of two Amtrak services operated in partnership with the state of North Carolina. Special activities in all stations throughout the state will celebrate the anniversaries of the *Carolinian* and *Piedmont* services.

The *Carolinian*, which operates daily between New York City and Charlotte, is celebrating its 25th anniversary. Inaugurated on May 12, 1990, the *Carolinian* carried 302,601 passengers last year along its 704-mile route, the highest ridership of any Amtrak state-supported train.

The *Piedmont*, which operates twice daily in each direction between Raleigh and Charlotte, is celebrating its 20th anniversary. Service began on May 26, 1995 with one daily round trip; the second round trip was added on June 5, 2010. The *Piedmont* is the only Amtrak train operated entirely over a state-owned railroad (the North Carolina Railroad). Its newly remodeled coaches and lounge cars are owned by the state, and include bike racks, checked baggage, and the only vending machines operated on an Amtrak train.

Stations along the routes for both trains will host activities and offer refreshments to passengers in observance of the milestone anniversaries. Celebrations at each station will also include Amtrak Train Days festivities to celebrate why trains such as the *Carolinian* and *Piedmont* matter and reasons to ride.

- Day long *Carolinian* celebrations will be held on Saturday, May 9, and Monday, May 11
- Day long *Piedmont* celebrations will be held on Saturday, May 23, and Monday, May 25

Information about North Carolina's Amtrak can be found at <http://www.ncbytrain.org/>.

Exclusive Offer for Amtrak Employee Travelers

For a limited time, Amtrak employees who are Emerald Club members can select rental credits as their Emerald Club reward choice and earn double rental credits for all qualifying vehicle rentals at participating National and Enterprise locations from June 1- 30, 2015.

AMTRAK® THISWEEK

A Weekly Publication for and by Amtrak Employees

Standard rental credits will be applied to the account immediately after the completion of the rental. Bonus rental credits will be applied to each qualified Emerald Club member's account within six weeks after the end of the promotion.

Update your existing Emerald Club profile.

Go to the Emerald Club website at <http://www.emeraldclub.com>. Log-in and choose "Reward Preferences" from the drop-down box. Select "Rental Credits" as your reward preference.

Note: You may have to create a log-in using your Emerald Club number and your last name if you have never logged in to this site before. The Amtrak account number is XZ16182.

Not enrolled? Enroll in Emerald Club for free.

If you're not already a member, simply click on the button below for your complimentary membership. Be sure to select rental credits as your rewards option when you enroll.

Amtrak Police Office of the Year Announced

May 26, 2015

Amtrak Police Department (APD) Officer Shawn McClister from the APD Mid-Atlantic North Patrol Division in Philadelphia, Pa., has been named APD Officer of the Year for 2014.

Amtrak Chief of Police Polly Hanson and Amtrak Board of Directors member Albert DiClemente presented the award to Officer McClister for his significant contributions which include active participation in the Anti-Crime Unit, plain clothes work dealing with the reduction of narcotics traffic, and for working jointly with outside enforcement agencies and the APD Criminal Investigations Unit.

Officer McClister has been employed with the Amtrak Police Department since 2013. He was awarded Officer of the Month for January and August 2014 and is the recipient of nine letters of commendations, a Life Saving award and a Distinguished Unit Citation award. His outstanding work supporting law enforcement efforts of the APD, which included numerous arrests to combat illegal drug use and trafficking, and preventing a potential suicide, earned him national recognition within the APD.

Road Shows to Explain Changes in Retirement Benefits

Amtrak recently announced [changes to its retirement program for non-agreement employees](#). To further explain these changes and answer questions, members of the leadership team will be conducting road shows over the next several weeks at different locations. These events are an opportunity to hear information first-hand, ask questions, and get answers. For the weeks of May 25 and June 1 the scheduled locations include:

Tuesday, May 26

Beech Grove
202 Garstang Street
Training Center
12:30 p.m.

Monday, June 1

Ivy City
1401 W Street, NE
2nd Floor, High Speed Rail Large
Conference Room
10:30 a.m.

Tuesday, June 2

Philadelphia Call Center
2198 Horning Road
Large Conference Room
11:00 a.m.

Questions?

Specially trained representatives are available to answer questions about the Amtrak Retirement program changes. Please contact the Amtrak Benefit Service Center at (800) 481-4887, Monday through Friday, except holidays, from 8:00 a.m. to 8:00 p.m., Eastern Time.

Visit the Amtrak Total Rewards intranet site, <http://wiki.corp.nrpc/display/BEN/Home>, for the most up-to-date resources including FAQs, road show schedule, fact sheets and more.

Holiday Policy Revised

Reminder: As of April 29, 2015, Amtrak Holiday policy number 7.11.2 has been revised. This policy applies to all full-time and part-time non-agreement employees and establishes guidelines to allow employees to take time off, with pay, for recognized holidays and personal days. Amtrak operations may dictate the observance of holiday(s) on different day(s) or the assignment of an alternate personal day, as provided in this policy.

Please note the revised Section 4.5 of the policy states: Holidays falling on a Saturday will be observed on the preceding Friday. When a holiday falls on a Sunday, it will be observed on the following Monday.

For example, in 2015, Amtrak will be observing the July 4th holiday on Friday, July 3rd.

For more information, the full version of revised policy can be accessed via the [Human Capital Management section](#) of Amtrak Policy and Instruction Manual.

Amtrak Financial and Operational Goals

Amtrak is currently falling behind on key measures for the Amtrak Short-Term Incentive (STI) Plan. To earn a Short-Term Incentive payout, the goals set at the beginning of the fiscal year must be achieved. The progress against these goals through March 2015 is outlined below:

Measure One: Reduce Adjusted Operating Loss to \$235M (or less)-**Behind Target**

Currently, projections indicate a loss of \$255 million this fiscal year, which is \$20 million over the target. This gap must be closed by the end of the fiscal year to justify STI payments.

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

Through March 2015, actual results are ahead of the target and expenses have been favorable due to lower fuel and propulsion costs. However, due to lower ticket revenue, increased wages, overtime and professional fees—we are behind on this goal.

Measure Two: Improve Customer Satisfaction Index (CSI) to 78 Percent (or greater)-Behind Target

Through March, overall eCSI is 77 percent. Of Amtrak's 46 train routes, 19 are meeting or exceeding their eCSI target while 27 are below target. *Empire Builder, Hoosier State, California Zephyr, Wolverine, Pere Marquette, Cardinal and Adirondack* are among the routes that are performing well against target. Most of the routes that are performing well below their respective FY15 targets are state corridor routes that have had recent on time performance (OTP) issues in FY15. Making sure to provide customers with the best information possible regarding problems and delays can help to mitigate poor OTP.

Measure Three: Decrease Cost per Available Seat Mile (CASM) to \$.218 (or less)-On Target

Currently, CASM is \$0.206 cents per Seat Mile (through March). CASM is calculated as National Train Service Total Costs (excluding non-cash items) divided by Seat Miles.

Measure Four: Increase Revenue per Available Seat Mile (RASM) to \$.204 (or greater)-Behind Target

Currently, RASM is \$0.197 cents per Seat Mile (through March). RASM is calculated as National Train Service Total Revenue divided by Seat Miles. Total Revenue for Amtrak routes includes Net Ticket Revenue, Food and Beverage Revenue, State Supported Revenue and Other Revenue.

Five Simple Things You Can Do to Help Us Close the Gap

Everyone can play a part in helping to reduce Amtrak's operating loss, improve customer satisfaction and operational efficiency:

1. Pay attention to the small stuff. Eliminate waste and look for ways to reduce departmental expenses. Spending on things such as printer ink, office supplies, overnight FedEx packages, even allowable meals on business travel and conferences all ultimately flow back to Amtrak for payment. Each manager should review planned expenditures over the remaining months to determine if they could ultimately be avoided.

2. Work together. Get together as a team to plan upcoming tasks to ensure deadlines are met, improving efficiency and eliminating any duplication of efforts. Look for ways to work smarter, more efficiently.

3. Stay focused on the customer. Even employees who don't interact directly with Amtrak customers play a critical part in customer satisfaction. From providing technical expertise to ensure the safety and reliability of Amtrak trains, managing communication systems to keep customers informed, to improving the efficiency of train routes, it all impacts the customer experience. Take a step back and ask yourself how your role directly impacts customers – and how to help make it better.

4. Operate like an owner. No one knows your piece of the business better than you, nor can anyone tell you how to run it more effectively and efficiently. Every employee can evaluate every dollar spent and question whether or not there is a better way to avoid the cost. Look at your contribution to Amtrak's expenses and ask yourself if you would spend your own money in this manner. If the answer is no, find a more effective and efficient way to reach the same outcome.

5. Take pride. We are all the face of Amtrak. When we ride our trains, we all have a responsibility to look out for our customers and make sure they have the best experience possible. One of the best things you can do for our company is to be an advocate for rail and use Amtrak in your travel this summer.

Share in Amtrak's Results – What the Short-Term Incentive (STI) Means for You

Each full-time and part-time non-agreement position within Amtrak has a defined Target Incentive based on the position's band and zone and is stated as a percentage of employee base salary. To find out more about the plan, including the target levels visit the [wiki site](#) for more information.

Talk to your manager during your mid-year Performance Commitment Conversations to identify new ways that you and your team can help Amtrak achieve its financial, organizational and operational goals.

Track progress: The [Amtrak Intranet](#) has the most recent update through March. Check for continuing updates throughout the year to improve visibility for all employees into our progress against key goals.

ALDE-Part 1, ALDE Centers Leadership Learning on Critical Behaviors and Skills

This article is part of a series which previews the new skills Amtrak's leaders are developing as part of the Amtrak Leadership Development Excellence (ALDE), Part 1 program.

ALDE is Amtrak's newest training opportunity and it stands for Amtrak Leadership Development Excellence. Amtrak created the ALDE program—a three-part learning opportunity—to help leaders develop the knowledge, skills and abilities to become the

Amtrak This Week is a publication of Amtrak Employee Communications
To contribute a story idea, please contact Fran Berk at Francine.Berk@Amtrak.com

best Amtrak leader they can be. During ALDE, Part 1, participants strengthen important skills and behaviors to support them in their leadership role at Amtrak including:

- Communicating with others
- Building trust
- Coaching
- Leadership and safety
- Employee engagement
- Adapting leadership styles
- Listening

Following the ALDE, Part 1 classroom session, participants work on completing a series of goals and work with their line manager to refine the leadership skills and behaviors learned in the ALDE, Part 1 program. Depending on your relationship with an ALDE participant (i.e., direct report, participant's manager, peer), employees may be called upon to provide feedback, coaching, mentoring, or guidance as the participant works to successfully apply his or her new skills on the job.

Join Us – ALDE, Part 1 Sessions Begin in May and Continue through 2015

Amtrak's agreement and non-agreement leaders who have direct reports can enroll online for upcoming sessions throughout 2015 in ten locations across the country. To enroll online, visit <http://cip.corp.nrpc/irj/portal> on the SAP/LSO Employee Information Portal (EIP). Questions can be emailed to ALDE@amtrak.com.

Amtrak Prepares for Papal Visit to Northeast Corridor Cities

In late September, Pope Francis will make his first visit to the United States with events in several Northeast Corridor cities. While we anticipate heavy passenger traffic for the events in Washington, D.C. and New York, the biggest impact to Amtrak employees is expected in Philadelphia where the Pope will participate in a series of public events on Saturday, September 26 followed by an outdoor mass on the Ben Franklin Parkway on Sunday, September 27.

Amtrak has been working closely with a number of agencies and partners to coordinate planning around the Pope's visit – particularly the Philadelphia events, which are expected to draw extremely large crowds in excess of one million people.

In anticipation of heavy travel to and from Philadelphia that weekend, we are working to finalize an operating plan that includes extra trains and additional capacity. 30th Street Station is expected to be a focal point for regional transportation and will likely see very large crowds. **To help guarantee the safety of our passengers and to help with crowd control, we are calling on Amtrak employees to volunteer as Amtrak Ambassadors. Volunteer sign up will be made available on the Amtrak Intranet in the coming weeks and will be announced in Amtrak This Week. Amtrak Ambassadors will be deployed across a number of our stations based on sales to assist our customers. Ambassadors will work a six (6) hour shift, and be provided training prior to the event.**

The City of Philadelphia has announced a "traffic box" that will restrict use of personal vehicles within a specified area. As 30th Street Station is included within the box, an internal task force is working to develop a contingency plan to assist employees in getting to and from work. All information regarding the Papal visit will be available on the [Amtrak Intranet](#) (Amtrak News -> Papal Visit Information and Updates), which will be updated as more details are made available and plans become finalized.

The Pope's visit presents a great opportunity for Amtrak to demonstrate why the work we do every day is vitally important to mobility and connectivity in the Northeast. Many passengers will be using the system for the first time during this historic visit, making it more important than ever for us to keep customer service top of mind.

Please don't hesitate to discuss any questions or concerns you may have with your supervisor.

February 26, 2015

Dear Colleagues:

As you know, Amtrak ridership on the Northeast Corridor is at record levels. More and more, travelers are turning to us for a safe, reliable and comfortable trip to and from major cities along the East Coast. This growth is a direct result of your hard work, which we recognize and sincerely appreciate.

One of the best ways to ensure passengers keep coming back is by delivering superior customer service that puts the needs of our passengers first. I'm proud to say that overall eCSI score (a primary measure by which we gauge our performance), is on the rise, with scores on the Acela up 3 points from the 4th Quarter of FY14 with an overall increase of 2 points for the entire Northeast Corridor.

Despite this positive news, we have also unfortunately seen an increase in the number of passengers who comment negatively on their overall experiences while utilizing our Café Car. The primary complaints continue to center on Amtrak employees utilizing the existing Café Car seating areas, often times leaving our paying customers without the chance to sit and enjoy their snacks and meals. Accordingly, I have asked our OBS and T&E crew employees to raise awareness of this issue.

In order to assist in remedying this problem, I would strongly suggest that all employees refrain from utilizing seats within the Café Car and seek regular coach accommodations when feasible. If passengers are looking for a place to sit, we ask you to offer up your seat. If the Café Car is full and paying customers want to sit there, please offer your table and find another seat elsewhere in the train.

Without a doubt, the brutal weather we've experienced over the past several weeks has been extremely challenging for all of us. Schedule changes and reduced frequencies have meant more crowded trains, so let's work together to remedy this situation for our passengers.

As always, input and feedback is welcome. You can reach the NEC Operations Business Line at 1-844-213-7530 or NECOPS@amtrak.com with any questions, suggestions or comments.

Thank you and please continue to work safely.

Mike DeCataldo
Sr. Vice President & General Manager, NEC Operations

special employee advisory

A Message from Joe Boardman

Our Journey Together – the Past Seven Years

This Thanksgiving marks my seventh year with Amtrak. I have always found the holidays and personal milestones to be good times to reflect on where I've been, and what lies ahead.

As many of you will probably remember, I came aboard the day before Thanksgiving, 2008. The first thing I wanted to do was talk to our people. Joanne and I spent time on Thanksgiving Day in Washington Terminal, the crew base, the platforms, talking with employees about the state of the company and thanking them for their work on that Thanksgiving Day.

At the time, as you may remember, we had just emerged from a prolonged and contentious set of contract negotiations that ended in a Presidential Emergency Board. The “brush with bankruptcy” was just a few years in the past, and although ridership had started what turned out to be a phenomenal run of growth, it had been a tough couple of years. I heard a lot about the state of the company – about what it was, but also what you hoped it could be, for our employees were already beginning to understand how *Acela* was changing the way Americans thought about Amtrak and passenger rail. I learned a lot about what was happening at the company, and by traveling to where you worked, I saw so many of the places served by our system. As someone from the Northeast, but raised on a dairy farm in rural New York, I came with an understanding of how vital our national network services were to those small rural communities across our nation. In the seven years since I've logged more miles on our train routes than nearly all previous CEO's combined and I appreciate our critically important impact even more to the mobility and economic vigor of the small communities of this nation.

What I've come to learn from all my visits and travel was that although our employees were doing a great job of keeping the company going, they needed some things from management. Amtrak was no longer in survival mode, because employees were beginning to ask me how they could build and grow our business, where just a few years before they would have been asking if they still had jobs. We owed them clear guidance, plans and an organization that aligned their efforts to accomplish clear-cut goals, and the tools to do the job.

The last of these came first – for just three months after that Thanksgiving, Congress passed the Recovery Act, which provided

special employee advisory

November 24, 2015 • Page 2 of 3

unprecedented amounts of money for investment in our system, equipment, and infrastructure. While we were undertaking the enormous task of investing this funding, I was looking at ways to change the culture of this company to reflect the many changes in technology, society, and the railroad industry. We moved quickly, made good plans, and made investments across the system.

As we were doing all of these things, we were also benefitting from the tremendous growth in ridership and revenue which followed the introduction of *Acela* and the significant post-2008 improvements in OTP that our off-NEC services enjoyed. We used that opportunity to transform our business. We worked hard to improve our partnerships with our customers, we invested in our facilities and customer-facing functions like eTicketing and Wi-Fi, and we implemented our business line organization, so that we could bring each type of service the focus it deserved. We cut our debt by two thirds, and Amtrak now has the financial ratings needed for the next stage of fleet investments – which will make as big an impact as *Acela* did fifteen years ago.

We made early decisions in my tenure to make the most urgently needed investments in our fleet, and the delivery of new electric locomotives and long distance equipment is well underway. These investments and debt reduction efforts have set the stage for our next big equipment order – a fleet of 28 trainsets to replace the existing *Acela* equipment. These trains will be as much – if not more – of a game-changer as the *Acelas* were. We will get more trains, more cars, and more seats – and this will give us the capacity we need to drive the company ahead in the decade to come. I look forward to an official announcement on that in early 2016.

For Amtrak it has never been easy – and never more so than this year. The Train 188 incident was a terrible reminder of how serious our responsibilities are. But I think it also affirmed our early decision to push for the extension of positive train control on the NEC. When we complete that task this year, we will be the only major carrier in the railroad industry to provide its main line with such extensive protection.

Of all the physical changes we've accomplished, PTC implementation is closest to my heart. But we've done an awful lot over the last seven of years, and I think we can all take great pride in all this company has accomplished. We are a different Amtrak, a stronger and more businesslike company, capable of realizing the vision we have for it. I'm reminded by a lot of people in Washington that we need to run it like a business, and I support that. But I am also reminded time and again by our passengers – and by you – that we provide a vital public

service. Our national network serves the common good of our nation's people better and with more scheduled stations stops than the airlines. People want to be treated decently, and they appreciate our efforts – that's why we feel like we can call ourselves America's Railroad®.

At this time of year we set aside a special day to be thankful. Yet we know we need to be thankful every day, and I am, for and I am especially thankful to work with you, and to be inspired by you. I wish each of you a safe and happy holiday with your loved ones – and a successful new year individually and for Amtrak.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Boardman".

A Message from Joe Boardman

Dear Co-workers,

Every Amtrak employee has to consider how to best deploy and protect our resources, and identify risks to the company, if we are to fulfill our promise of moving America where it wants to go by delivering intercity transportation with superior safety, customer service and financial excellence.

Amtrak launched the Management Control Framework (MCF) process two years ago to assist in these efforts. It enables all departments to:

- Identify and document their respective business objectives, related risks and the existing controls intended to mitigate each risk;
- Evaluate the design and/or operating effectiveness of controls (the specific actions that we take to increase the likelihood that we will achieve our goals and objectives);
- Identify and document Control Improvement Opportunities; and
- Conclude, based on the results of the evaluation, whether controls are effective, or require improvement, and certify the results.

A comprehensive MCF evaluation that includes controls testing allows Amtrak to highlight areas where our controls are robust and also pinpoint areas for renewed focus and control improvements. Employees are also able to document what should occur as part of their job duties and define success for their contributions to the company; therefore, you should embrace the MCF as part of your regular duties and responsibilities.

Increased discipline over management controls and employee understanding of, and participation in, risk management activities ultimately bolsters the company's growth and long-term strategy. Although each employee should consider ways to reduce risks to Amtrak, it is managers' responsibility to certify that their groups have tested controls.

Please join me in completing a thorough MCF self-assessment in 2015. **Between now and mid-August, Amtrak employees will test controls and communicate the results to management.** After reviewing the cumulative results, I will provide a certification for Amtrak to the Board of Directors. The process then starts anew in Fiscal Year 2016, creating a continuous cycle of control testing and improvement.

By participating in the MCF evaluation and assessing the management controls applicable to you and any direct reports, you ensure:

- The safety of our employees, customers and the general public;

- Delivery of the best value and travel experience possible; and
- Optimized use of resources to reduce our need for federal assistance and enhance the sustainability of Amtrak.

Simply put, each one of us has a stake in making this controls self-assessment a success.

We all play a role in making Amtrak a stronger business that is responsive to the competitive, dynamic transportation marketplace. I appreciate your participation in this critical MCF evaluation and improvement process at all levels.

If you have questions about any part of our MCF process, or have any suggestions for improving Amtrak's management controls, please do not hesitate to contact your manager or your Amtrak Controls Team at ACT@Amtrak.com.

Sincerely,

Joe Boardman

A Message From Joe Boardman

Dear Colleagues,

The next few weeks constitute one of the busiest and most exciting times of year at Amtrak. We should all be proud of our integral role in helping hundreds of thousands of our passengers enjoy the Thanksgiving holiday with family and friends. It's also a prime opportunity for us to pull together and provide the best customer service possible—both for our loyal passengers and first time riders.

Last year, Amtrak carried a record 772,211 passengers during the Thanksgiving travel period, the most ever for the holiday, and we expect similar ridership this year. To meet demand, we are adding cars to trains, scheduling additional frequencies and requiring reservations for corridor trains that are usually unreserved.

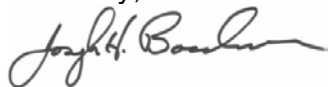

Between these changes, the bustle of stations and the general holiday excitement, we need to ensure we take the time to provide the extra assistance some passengers may require. This can be as simple as explaining where a temporary waiting area is located, informing first time riders that food and beverages are available in the café and/or dining car and making sure restrooms are regularly cleaned.

One of the easiest things we can do is present a knowledgeable, cheerful and calm demeanor to our passengers. Your positive customer interactions, whether on board a train, in a station or over the phone, also set an example for your coworkers. Don't hesitate to share customer service tips and your valuable experience.

Ultimately, it's the little things we do to make a passenger's trip less harried that will color their impression of America's Railroad®. An opportunity always exists to convert first time riders into permanent Amtrak customers; our actions are the determining factor. A satisfied customer also shares his or her experience with others.

During the busy days ahead, please remember to work safely and call upon your colleagues for help. I appreciate everything you do for Amtrak every day, and I wish you a Happy Thanksgiving.

Sincerely,

Joe Boardman
CEO and President

A Message From Joe Boardman

Dear Colleagues,

In a tradition that stretches back almost a century, tomorrow communities across the country will honor war veterans with parades and public ceremonies. These events are a way for Americans to thank our veterans for their bravery in defending our nation in times of crisis here and abroad.

Americans observed the first Veterans Day (then called Armistice Day) in 1919 to mark the end of World War I a year earlier. Following another war that spanned the globe, Congress in 1954 broadened the purpose of the holiday to honor all veterans of American wars.

President Dwight D. Eisenhower wrote at the time, "Let us solemnly remember the sacrifices of all those who fought so valiantly, on the seas, in the air, and on foreign shores, to preserve our heritage of freedom, and let us reconsecrate ourselves to the task of promoting an enduring peace so that their efforts shall not have been in vain."

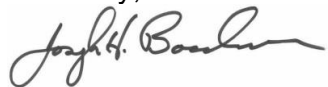

Approximately one in five Amtrak employees are veterans of the Army, Navy, Marine Corps, Air Force or Coast Guard. I am among them, having proudly served in the Air Force in Vietnam.

Military life imparts many lessons, such as how to work together to achieve team goals, ensure the safety of fellow service members and strive for integrity in all one's actions. Skills learned in the armed forces, including experience with logistics and advanced electronic and mechanical systems, also transition well to a career on the railroad.

This morning we will salute the men and women of Amtrak who have served the nation during a ceremony held at Washington Union Station. Employees are also invited to view Amtrak Veterans Locomotive No. 642. Painted at our Beech Grove Shops, this ACS-64 unit features red, white and blue accents, a special "America's Railroad Salutes Our Veterans" logo and 50 stars.

Please join me in thanking our veterans for their sacrifices on behalf of our country. I wish you a happy, peaceful Veterans Day.

Sincerely,

Joe Boardman
CEO and President

A Message from Joe Boardman

Dear Co-workers,

I'm proud to share that Amtrak has been named to the first-ever [“America's Best Employers 2015”](#) list issued by *Forbes* magazine. We're honored to be recognized on this list of the 500 largest corporations and institutions representing the private and public sectors in the U.S.

In the field of transportation and logistics, we're in the good company of respected organizations including CSX, Union Pacific, BNSF Railway, Norfolk Southern and Southwest Airlines.

Selection to the list was determined through an anonymous survey in which more than 20,000 people were asked how likely they were to recommend their employer to someone else, as well as suggest other employers in their industry.

We were also recently recognized on the annual “Military Friendly® Top 100 List” published in *G.I. Jobs*®, *Military Spouse* and *Vetreprenuer* magazines and on the “2015 STEM JobsSM Approved Employer” list by Victory Media, which connects professionals in transition with education and career opportunities.

In my more than six years as the head of Amtrak, I have met many of you in our offices, stations, shops and onboard trains. Your thoughtful suggestions for improving Amtrak never cease to amaze me and are true signs of your dedication to the company and our success.

Listening to you leaves a strong impression of our workforce and its motivations. Amtrak employees are diverse, multitalented and welcoming. We are continuously improving America's Railroad® by leveraging the expertise of the people who know our business and our industry best: you.

Amtrak is integral to a rich American railroad tradition that dates back almost two centuries. It's not hard to find employees whose parents, grandparents and other relatives were involved in the industry. Once part of the railroad family, you remain so forever.

Based on this proud past and present, we are laying the groundwork for the passenger rail system of the future. Our vision incorporates renewed infrastructure, next-generation equipment, reimaged stations and an enhanced customer experience.

Employees are at the heart of our mission. Only by working together under a united vision can we move America where it wants to go and achieve our goals of superior safety, customer service and financial excellence.

A Message from Joe Boardman

Dear Co-workers,

Memorial Day is a time for us to remember all those who have died in American wars at home and abroad. To mark the day, the American flag is flown at half-staff from sunrise until noon, when it is quickly raised in honor of the fallen.

For me and other veterans, Memorial Day offers an opportunity for quiet reflection and remembrance of those who did not return. Our thoughts are also with our Amtrak colleagues who are currently on active duty and are deployed away from loved ones.

Looking into our own lives, many of us have a family member who fought and died for our country, whether in the long ago struggles to establish and then reunite our nation, or in more recent conflicts that spanned the globe. While war clearly impacts the members of the armed forces, it also affects those at home—the family and friends keeping vigil.

The holiday also marks the traditional start of summer and one of the busiest times on the railroad. Not only are the trains full, but the construction season kicks into high gear with projects to improve and enhance our infrastructure.

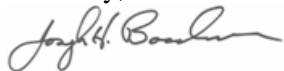

Although service on the Northeast Corridor has been restored, last week's derailment in Philadelphia and the resulting loss of life and injuries will never be forgotten. We have a responsibility to learn from what happened so that we can ensure such an incident never occurs again. These last two weeks have been very difficult for many of us. Together we will get through this. Please reach-out to your managers, co-workers or the Employee Assistance Program (EAP) for any support or assistance that you need. We are a family, and families come together and support each other in the most trying of times.

In the coming months, we must work together to demonstrate to the American public—and our passengers—that Amtrak continues to be a safe and secure way to travel. Safety and Security are our first priority; we should renew our personal commitments to practice safe behaviors and encourage our co-workers to do the same.

Our focus on safety must be complemented by an emphasis on providing excellent customer service. Whether working onboard a train or in a station, maintenance facility or office, each one of us has a duty to ensure our customers are satisfied with the services we provide.

Thank-you for everything you do for Amtrak, and my wishes for a safe and peaceful Memorial Day.

Sincerely,

Joe Boardman

A Message from Joe Boardman

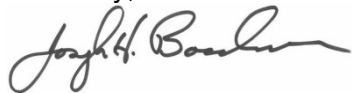

Dear colleagues,

As I shared with you last night, I am intending to retire from Amtrak at the end of September 2016. Further, I asked our chief financial officer Jerry Sokol, who intended to leave the company at the end of this year, to stay on into 2016 as we continue to recruit for a permanent CFO. He has agreed to do so.

Jerry has been our CFO since December 2013. I have valued Jerry as a partner in helping us drive our strategic plan forward, and strengthening our business. In staying with us into 2016, Jerry will continue to do the important work in improving our budget and finance processes, as well as being part of our management team.

I appreciate your continued support of me, and I thank Jerry for his continued service with Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

FY 2016 Short-Term Incentive (STI) Program

Dear STI participant,

I am writing to share with you the details of our FY 2016 Short-Term Incentive (STI) program.

Every year since we first introduced STI in 2013, we have made annual enhancements to the plan, to better reflect the evolving priorities of the company. Once again, a portion of our total compensation is aligned to how well our business performs – especially as it relates to Amtrak's financial performance and customer satisfaction levels. The major STI change for the FY 2016 plan is that we are going to reward our employees for the results they deliver at both the Company and Business Line levels.

To earn an STI Award in FY 2016, we need to meet the following three criteria:

First, we need to achieve a certain level of corporate financial performance to fund the plan. In other words, we have to earn the right to have incentive bonuses. For FY 2016, the Board has set an Adjusted Operating Loss target of \$212.5M or better for our STI pool to be funded. This metric is a simple measure of our revenues minus our expenses. If we perform at this target level, the Board believes we can responsibly and appropriately fund the bonus pool.

Next, we need to meet our individual commitments to be eligible to receive an STI award. This metric is also simple. For your FY 2016 Performance Review, you must be rated as having "Met Commitments" or better. Each of us needs to demonstrate that we are solid contributors to our team's and the company's success.

Finally, we need to achieve our STI targets, which are evenly divided between two performance goals – financial (50%) and customer service (50%). The specific targets for each goal are outlined in this [brochure](#).

New to the plan this year is a Business Line measure for financial and customer service performance. The potential payout for both STI goals will be weighted at 60% for company measures and 40% for business lines. If you are working in a Business Line, you will receive the full 40% STI payout if you reach your Business Line target for each goal. If

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

November 30, 2015 • Page 2 of 2

you are working in a Corporate Function, you will receive a partial payout for each business line as it achieves its target.

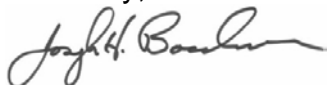

Your manager has received a toolkit with more details around the targets for both the Company and the Business Lines. We encourage you to meet with them to discuss how the goals you have planned for FY 2016 can be viewed as opportunities for you and your department to maximize your impact.

It is believed that this new STI feature will help create stronger collaboration across the entire enterprise – while also giving additional focus and recognition to individual Business Line performance. This approach is also consistent with our One Amtrak focus – we only win together.

We will be hosting education sessions about this year's STI plan. Look for more details in upcoming Amtrak communications. In addition, we will be providing regular updates on how we are performing against our STI goals, along with recommendations on what actions we can all take to raise our performance in these areas.

Thank you for your continued support in helping to drive Amtrak's strategy.

Sincerely,

Joe Boardman
CEO and President

Installation of Inward Facing Cameras

Dear Co-workers,

As an additional measure to improve safety, we will begin to install inward-facing video cameras in the fleet of ACS-64 locomotives in service on the Northeast Corridor by the end of 2015, and all subsequently delivered locomotives will have the equipment installed before they go into service.

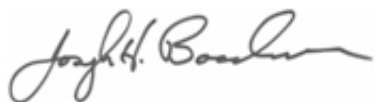

Installation will first occur in the 70 ACS-64 locomotives that will power all *Northeast Regional* and long-distance trains between Washington, New York and Boston, as well as *Keystone Service* between New York, Philadelphia and Harrisburg, Pa.

This new technology will add an additional layer of safety to the outward facing cameras already in place on locomotives, as well as the advanced systems that monitor locomotive and engineer actions.

We are developing a plan for installation of inward-facing cameras in the rest of our locomotive fleet, including *Acela Express* power cars and diesel locomotives.

I want to reinforce that safety is and always will be our number one priority. Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and Chief Executive Officer

special employee advisory

October 26, 2015 • Page 1 of 1

A Message from Joseph Boardman

Dear colleagues,

As I look back on the fiscal year we have just concluded, my first and last thought is probably the same as yours. I think about the passengers and families impacted by the derailment of Train 188. I ask that you continue to keep them in your thoughts and prayers. This event, and the consequences that followed it, defined our year in 2015 – and serves as a constant reminder that our industry demands the very best performance from us each and every day.

I have generally refrained from public discussion of the Train 188 derailment in recent months because the NTSB is still continuing its investigation. When we have the findings, we will share them, and we will all work together to implement any necessary corrective actions. In the meantime, I want to once again recognize and thank the many people in our company who have been working tirelessly on Amtrak's behalf following the derailment. The task of rebuilding our reputation will take a sustained level of commitment and excellence from all of us. I am very proud of Amtrak – of our employees, of the important transportation service that we provide across this great country. I know that each of you also cares deeply about our customers and our colleagues – and others see that, too.

In FY 2015, we continued to execute our strategy to take America to where it needs to go, by achieving results in three critical areas – safety and security, customer focus, and financial excellence. These three themes rest on a foundation of our values, and our commitment to developing our people. Of course, no journey is a straight line. In some cases, we made progress in our strategy areas – and in others, we did not meet our own high expectations.

We all recognize that we need to further improve our safety performance. Still, there are positive signs that deserve mention. We cut Operating Rules Violations by 26.1 percent from 2014, and we achieved year-over-year improvements in our safety ratios and injuries. We are also showing industry leadership in the installation of positive train control, or PTC. We have already installed and operate PTC on the tracks we own in Michigan and Indiana, as well as on more than 200 miles of the Northeast Corridor (NEC). Further, we are on schedule to activate PTC on the remainder of the Amtrak-controlled portions of the (NEC) between Washington, D.C., and Boston, and also the Harrisburg line, by the current federally-mandated deadline of Dec. 31, 2015. These actions will help us better ensure the safety of our passengers and co-workers. The more we commit to

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 26, 2015 • Page 2 of 3

staying vigilant and looking out for our passengers and each other, the better we can make sure everyone goes home the same way we all come to work or board our trains.

In customer focus, our total ridership remained steady in FY 2015. More than 30.9 million people rode an Amtrak train last year, which reflects continued strong demand for our services. Given that our ridership levels were negatively affected by significant weather events, a closure of part of the NEC, on-time performance issues, and lower gas prices, the overall demand for our services is still remarkable. We have now carried more than 30 million passengers for four straight years, which is a testament to the value we bring to intercity travelers.

Looking more closely at our routes, the NEC had its highest ridership year ever in FY 2015, with 11.7 million passengers, up 0.5 percent. Our growth in the NEC was led by the Northeast Regional service, which saw a 1.5 percent increase in ridership. I also want to extend my congratulations to the *Southwest Chief* and *Empire Service* teams, both of which set ridership records last year.

An important measure of the care we take of our customers is our Customer Satisfaction Index score, or eCSI score. In FY 2015, 77.1% of our customers who responded to surveys said they were very satisfied with Amtrak. This performance is slightly up from our score in FY 2014 (76.7%), but still short of our target for this year (78%). I am pleased to report that 19 of our 46 train routes showed year-over-year improvements in their overall eCSI scores – with 16 routes exceeding their eCSI goals for the year. I want to especially recognize the *Empire Builder*, which recorded the largest year-over-year increase in eCSI. While we know that on-time performance is a major driver of eCSI, we know that timely information about delays, the friendliness and helpfulness of conductors, and a smooth and comfortable ride are three critical factors impacting customer satisfaction, as well. We must continue to put a special emphasis on improving our performance in these areas in the coming year.

Finally, in financial excellence, we generated slightly less cash than we expected in FY 2015, due to lower-than-expected ridership levels. In total, we generated \$2.185 billion in ticket revenue, or 0.1 percent below last year. We were able to partially offset some of this revenue loss through lower fuel and propulsion costs – but these offsets were not enough to close our gap. With all revenue and expenses taken into account, we operated at a Normalized Adjusted Operating Loss of \$294 million – or \$59 million unfavorable to our FY 2015 target.

special employee advisory

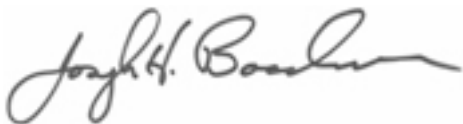

October 26, 2015 • Page 3 of 3

While this has not been an easy year, FY 2015 has demonstrated the strength of our Amtrak team in dealing with very difficult circumstances. Looking ahead to FY 2016 and beyond, we must all understand that our ability to operate at the highest levels in the future depends upon America making significant infrastructure investments to our rail system. To help ensure a safe, efficient and reliable operation that meets our customers' needs, we must continue to make a strong case for investment. We are continuing to have discussions with Congressional leaders to help guide this debate and secure the funding we need. Our customers care about mobility, reliability and safety, and with your contribution, Amtrak will be well positioned to deliver on all three. In the meantime, I ask that you stay focused on controlling what you can control, which includes giving our customers a great experience with Amtrak, and above all, ensuring that you take good care of yourselves, your co-workers, and our customers.

I wish I had the opportunity to speak to more of our customers and tell them about everything we are doing to strengthen our ability to move America to where it wants to go. All of you are in a better place than I am to do that – especially those of you who interact with our customers every day. Whenever you can, please remind them that we are continually working to improve our safety and our reliability; that we are expanding our services to make the travel experience even better, such as Wi-Fi and pets on trains; that we value their continued support of us; and that we will continue to evolve to better respond to their changing needs.

Thanks again for your work and commitment to Amtrak in 2015. I'm looking forward to 2016 as we continue our work to carry rail passengers across our great nation.

Regards,

Joe Boardman
President and CEO

Update on *Northeast Regional* Train 188 and Restoration of Service

Dear Co-workers,

I want to provide all employees with an update on recent developments concerning last week's derailment of *Northeast Regional* Train 188. I have stated publicly that Amtrak takes responsibility and is deeply sorry for this event. With truly heavy hearts, our condolences go out to the families of the eight passengers who lost their lives. I know you join me as well in keeping all those aboard Train 188 in your thoughts and prayers, including our five Amtrak employees. We will continue to do everything we can to assist those who were affected by this tragic event.

The National Transportation Safety Board is leading the investigation to determine the cause of the incident, and Amtrak is providing full cooperation. This is a careful, measured process that will take time to complete, but I will keep you updated as information becomes available to share. Please continue to avoid comments and speculation on matters related to the investigation.

Amtrak is ever grateful to the City of Philadelphia—the first responders and officials from the City of Philadelphia, as well as Amtrak Police and personnel, who rushed to assist passengers, render aid, assess the situation and implement a clear response plan. The Mayor of Philadelphia organized a "Moment of Reflection" event on Sunday to recognize those who were onboard the train, as well as those who helped in the response and aftermath of the tragedy. I was humbled to represent Amtrak at that event, along with several other Amtrak employees.

Since the derailment, Amtrak staff and crew have worked around the clock to repair the infrastructure necessary to restore service for all the passengers who travel along the Northeast Corridor. Our repairs have been made with the utmost care and emphasis on safety, including complete compliance with Federal Railroad Administration directives. Through our hardworking crews, we were able to restore normal passenger rail service on the Northeast Corridor this morning.

I want to reinforce that safety is and always will be our number one priority. We have worked very hard to communicate this to our customers and the public. You can read about facts related to our

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

safety statistics and our Positive Train Control system on the [Amtrak blog](#).

Please remember that the Employee Assistance Program is available to support you and your families. Conversations with EAP counselors are strictly confidential. If you, a family member or fellow employee might benefit from consulting with EAP, please call (844) 268-7251. More information on EAP can be found on the Amtrak Intranet, under “Employees” → “Employee Assistance Program.”

I want to recognize the employees who have been working non-stop to repair the railroad, communicate with the families affected by this tragedy and keep America’s Railroad running. Thank you for everything you do for Amtrak. Your hard work and support to our customers and employees during this difficult time is especially appreciated.

Sincerely,

Joe Boardman

Northeast Regional Train 188 Incident

Dear Co-workers

On Tuesday, May 12 at approximately 9:45 p.m., Amtrak Northeast Regional Train 188, operating from Washington to New York, derailed in northeastern Philadelphia. There were approximately 238 passengers and 5 crew members on board.

We are deeply saddened by the confirmed fatalities resulting from the derailment. Local emergency responders and senior Amtrak leadership are on the scene and an investigation is ongoing.

During this difficult time, the Employee Assistance Program is available to support all employees and their families. EAP counselors are very familiar with the unique challenges employees may face on the railroad, and conversations with the counselors are strictly confidential.

If you, a family member or fellow employee might benefit from consulting with EAP, please call (844) 268-7251. More information on EAP can be found on the Amtrak Intranet, under "Employees" → "Employee Assistance Program."

We will update you as the investigation progresses and further information becomes available.

Our thoughts and prayers are with our passengers, crew members and their loved ones.

Sincerely,

DJ Stadtler
Executive Vice President and Chief Operations Officer

Please post this on crew bulletin boards and discuss at staff meetings, crew briefings and roll calls.

Reminder – Refer All News Media Requests to Corporate Communications

Given that there is an ongoing NTSB investigation into the Train 188 derailment, this is an opportunity to remind all employees about Amtrak's existing policy that only the Government Affairs and Corporate Communications (GACC) Department are authorized to speak to the news media on behalf of the corporation. This is designed to ensure that accurate and consistent information is provided to the news media, and that the information is also appropriately communicated within the corporation.

Please refer any news media inquiries to Amtrak Corporate Communications. Contact information for the regional [Media Relations Offices](#) is listed below:

Dear Colleagues:

Last week, Mike DeCataldo, Susan Reinertson, Polly Hanson and I – along with about 20 of our co-workers from the Northeast Corridor business line – participated in an extremely valuable emergency preparedness exercise in conjunction with our partners at New Jersey Transit.

The weeklong course at the Texas A&M Engineering Extension Service (TEEX) Emergency Operations Training Center in College Station, TX was a challenging, yet rewarding hands-on exercise that reinforced how crucial it is for us to coordinate, cooperate and communicate with our partners – particularly during large scale incidents and special events.

The lessons we learned apply to our business in many different ways. We'll incorporate some of them into the post-incident analysis of our Train 188 derailment response, and draw on them in planning for events such as the upcoming Papal Visit that involve several of our agency partners. There are also day-to-day applications which we'll look to integrate where and when it makes sense. Our department of Emergency Management & Corporate Security continues working to bring structure to our processes and these lessons will both inform our planning efforts and supplement existing training programs and exercises.

Importantly, we also strengthened our already close relationship with New Jersey Transit. At both the executive and staff levels, we built personal relationships over the course of the exercise that provided both agencies with a better understanding of how each functions. While there are similarities and differences in our operations, one of the major takeaways was the idea that success for both agencies depends on us working together. This is crucial for Amtrak, as our Partner Satisfaction Index is a key performance indicator upon which we are all measured.

TEEX is one of the most sophisticated emergency management training campuses in the world, and we are grateful that our friends at NJT invited us to participate in last week's activities. As a management team, we were very impressed with the training and plan to seek opportunities for more of us to take advantage of this resource in the future. We will continue to keep you posted as those plans develop.

Thank you for your hard work on behalf of Amtrak.

Sincerely,

DJ Stadtler
Executive Vice President and Chief Operations Officer

Amtrak Train 55

Amtrak Train 55 – the Vermonter – partially derailed this morning while travelling from Saint Albans, Vt., to Washington, D.C. The event occurred at 10:25 a.m. ET, in the vicinity of Northfield, Vt.

There were 102 people were reportedly on board – including 98 passengers and four crew members. The injured have been transported to local hospitals to receive treatment for injuries while alternative transportation is being arranged for all passengers.

We are continuing to work on the scene with first responders and the Vermont State Police. We also have updated the National Transportation Safety Board (NTSB) about this incident, and will continue to work with all local, state and federal authorities to provide the necessary information. In addition, we are working with the local Red Cross to ensure our passengers have what they need during this time.

Our Employee Assistance Program counselors are available to speak with you should the need arise. Assistance is always available by going to <http://wiki.intranet.nrpc/display/EAP/Home> and finding a counselor located near you. You can also call 844-Amtrak1 ([1-844-268-7251](tel:1-844-268-7251)) or go to www.achievesolutions.net/AmtrakEAP.

We appreciate the efforts of all our colleagues responding to and assisting with this incident. We will provide further updates as more information becomes available.

A Message from DJ Stadtler

Dear Colleagues:

We will be extending the response time for the Organizational Culture Diagnostic Instrument (OCDI) until November 15, 2015.

I expect that you will support this very important initiative. We can only make progress by having our employees identify what issues need to be addressed.

Employees can access the survey on the Amtrak Intranet at *Safety>Safe2Safer>2015 OCDI* or [click here to begin the survey](#). If this link does not work, copy and paste <https://bstsolutions.inquisiteasp.com/surveys/R72584/> into your web browser.

Supervisors and managers should set aside some time for employees to participate. There should be no question about the importance to the company of OCDI responses.

Thank you.

Sincerely,

DJ Stadtler
Executive Vice President and
Chief Operations Officer

Employee Update - Winter Storm Advisory – Safety Tips & Inclement Weather Policy

Amtrak NEC employees and supervisors,

As you may be aware, the National Weather Service is forecasting a severe winter storm that will affect the Northeast and southern regions of the country. The latest forecast calls for snow to begin on Friday morning, with heavier accumulation occurring in the afternoon.

Your safety and the safety of our customers is our No. 1 priority. In preparation for this storm, we ask that you review the following:

KEEPING SAFE DURING A SNOW STORM – TIPS

Amtrak's Emergency Management and Corporate Security (EMCS) department reminds you winter storms and cold temperatures can be hazardous, but if you plan ahead, you can stay safe and healthy. The attached advisory provides tips on how you can stay safe.

COMING INTO WORK – INCLEMENT WEATHER POLICY

Amtrak has an Inclement Weather Policy that provides guidelines to employees and supervisors on coming into work during bad weather events such as this upcoming storm. Non-agreement employees are covered under this policy, [here](#) – while agreement employees are covered under the provisions of their labor agreements.

In addition, Amtrak also has a policy for allowing employees in some positions to telework during emergency situations. Amtrak's telework policy is [here](#). Supervisors and employees who are able to telework should begin discussing and preparing for the possibility of teleworking tomorrow. In the event that teleworking is not an option for you, and if you feel you cannot come into work safely, you may use one of your available vacation or personal days.

We don't want anyone taking unnecessary risks in coming into work during bad weather. At the same time, people are expected to make every reasonable effort report to work and use the same judgment to ensure that they leave work so that they can return safely. Our customers and our families are counting on us.

February 9, 2016 • Page 1 of 2

Dear fellow employees,

Because I respect you, it is important to me that you understand the current state of our business.

Every year, we make a commitment to the American people, Congress and our Board of Directors that we will successfully operate our business within our given budget. This budget is a set amount of money that we need to operate our trains, build our infrastructure, and employ and grow our people. A critical part of operating within our budget is to for us to realize the ridership and revenue levels that we expect to achieve.

You know that we had a challenging end to fiscal year 2015. And you need to be aware that prevailing market conditions are going to make fiscal year 2016 even more difficult.

Continued low gas and oil prices are hurting our ridership levels. Two years ago, the price of crude oil was more than \$100 a barrel. Last year, it was \$60 a barrel. Today, it has fallen to almost \$25 a barrel. As a result, the price of gas is now about \$2 a gallon nationally – the lowest it has been since 2009. When gas prices are cheap, many customers who normally ride with Amtrak are either choosing to drive for shorter trips, or choosing to fly for longer trips. Either way, our bottom line takes a big hit.

Our ridership and revenue levels have also been impacted by several other factors outside our control. Bad weather has caused several costly service disruptions -- most notably the recent Northeastern blizzard, and flooding on the Texas Eagle and City of New Orleans routes. We also had a disappointing Thanksgiving season, as lower gas prices contributed to a year-over-year decline in ridership. Believe it or not, we are also hurt by a strong U.S. dollar, which has hurt our international sales.

Together, these factors have been causing us to underperform against our budget for some time. In FY 2015, we committed to our stakeholders that we would achieve \$235M on an adjusted operating loss basis. Due mostly to lower-than-expected revenues, we fell \$70M short of our commitment, ending the year with a \$305M adjusted loss.

This revenue decline has continued in the first quarter of FY 2016. The Amtrak budget passed by the Board of Directors last September expected our adjusted operating loss for FY 2016 to be \$245M. That adjusted loss was predicated on increased revenue and holding fixed costs down. We're falling short on both counts this year. Revenues are continuing to decline, and we haven't successfully managed our costs, especially in the areas of salaries, wages and overtime. Our company needs cash to pay our daily expenses, and our cash position is becoming a concern.

We have seen these warning signals, and we have already taken some initial actions to improve our position. In January, I asked senior managers to develop new revenue enhancing strategies and cost-saving options for

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

February 9, 2016 • Page 2 of 2

consideration. I also asked our department heads in January to cut their FY 2016 budget by an average of 3.8%.

For those of you who know me, you know that I am committed to operating with integrity and transparency. I am compelled to tell you that while these initial reductions are a good start, it's not enough. We are going to need to take more aggressive actions to reduce our costs – some of which may be painful to take. Our senior leadership team is evaluating all our options, and our goal is to achieve our cost-reduction goals with as little impact to our people as possible.

In the meantime, I need your help. We need to rally together and have a laser focus on reducing or eliminating all discretionary spending that is within our control:

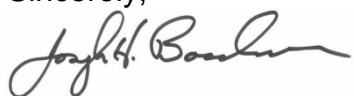

- We should eliminate all non-essential business travel. If at all possible, please conduct your business by phone or video conference.
- We should delay any cost-intensive projects that are not essential to the operation of our business.
- We should delay hiring new employees, where possible.

I want to be clear: We will continue making all necessary investments to keep our employees and customers safe. Our total commitment to safety remains unconditional, regardless of market conditions.

I will update you on a regular basis about the state of our business. I know many of you personally and I know you are good people who want to do the right thing for the company and for the country. I will do everything I can do to support our Amtrak team, and I appreciate your continued support in helping us get through this difficult time.

Be safe, and be at peace with each other,

Sincerely,

Joe Boardman
President and CEO

In Memoriam: Gilbert E. Carmichael

Gilbert E. Carmichael

June 27, 1927 - January 31, 2016

With sadness, Amtrak marks the passing of Gilbert E. “Gil” Carmichael, a Mississippi businessman who sat on the Amtrak Board of Directors from 1989 to 1992. Carmichael passed away on Sunday evening in Meridian, Miss., at the age of 88.

Building on his success as a car dealer and real estate developer, Carmichael ran for the U.S. Senate in 1972 and later the governorship of Mississippi. He was involved with the transportation industry for many years and became a strong advocate for both passenger and freight rail as components of the nation’s intermodal transportation system.

Under President George H. W. Bush, Carmichael led the Federal Railroad Administration (FRA) from 1989 to 1993. He sat on the Amtrak Board of Directors as the representative of the U.S. Secretary of Transportation.

During Carmichael’s leadership, the FRA contributed to the creation of the Intermodal Surface Transportation Efficiency Act of 1991. Recognizing the near-completion of the interstate highway system, this federal transportation bill emphasized the need for a balanced intermodal transportation system that included passenger rail. The legislation also called for the designation of high-speed rail corridors.

In 1996, Carmichael helped establish the Intermodal Transportation Institute at the University of Denver, and he chaired its board from 1997 to 2001.

Carmichael was also appointed to, and chaired, the Amtrak Reform Council, an independent federal commission established under the Amtrak Reform and Accountability Act of 1997. Among its duties, the council made recommendations on how Amtrak could improve its operational and financial performance. Gil worked closely with the Amtrak Board of Directors, presidential administrations and Congress.

Gil Carmichael will be remembered for his many civic contributions and for being a devoted husband and loving father. He will be missed, and Amtrak offers its condolences to Carmichael’s family and friends.

special employee advisory

February 22, 2016 • Page 1 of 2

Dear fellow employees,

I have been thinking a lot about what we need to do to become a safer company and ensure we are reliably that way. We often say that "Safety is the No. 1 priority at Amtrak" -- but what do we really mean by that?

I see it as part of our license to operate. We have an obligation to ourselves, to our customers, and to everyone around us to make sure that everybody goes home in the same condition that they came into work, or boarded one of our trains.

An important part of living up to this obligation is accountability. We need to build a culture where everybody knows what is expected of them -- and everybody understands that there are serious consequences for not living up to the high standards we have set for ourselves.

Today, we are taking an important step in continuing to improve our safety culture by introducing our Cardinal Rules. These rules are a set of 10 safety actions and behaviors that each of us must follow, every day, as a condition of our continued employment at Amtrak. These 10 rules have been identified by our Executive Safety Council as essential to maintaining workplace safety —and in fulfilling the obligations we have set for ourselves, our customers, and the public.

These rules apply to all employees -- agreement and non-agreement alike. While many of these rules address the operations environment, we all have an obligation to see that they are observed and enforced.

You can read more about our Cardinal Rules which are included at the end of this letter. I'm also asking that we have Stand Down meetings across the entire company on this subject. I expect that your supervisor will be discussing these rules with you in the coming days, and what they mean for all of us.

For now, I am asking you to do three things with these Cardinal Rules.

First, read them carefully. You must follow them, to the letter, every day. If you have any questions or concerns about any of them, ask your supervisor.

Next, you need to appreciate the full scope of accountability here. Every employee's employment at Amtrak depends on following these rules every day. A violation of any of these rules, or a failure to report any violation of these rules, will be handled with zero tolerance.

Employee Communications

ecom@amtrak.com

special employee advisory

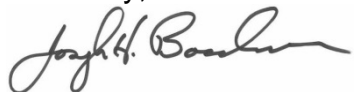

February 22, 2016 • Page 2 of 3

Any employee's failure to comply with these rules, or failure to report any noncompliance with the rules, shall be the basis for discipline, including dismissal. Given the importance of these rules, termination is likely.

Finally, I ask that you join me in standing up and saying we won't tolerate any behavior at Amtrak that fails to place safety first. This shouldn't just be Amtrak's professional expectations. It should be, at a personal level, yours and mine, too. It should be completely unacceptable to accept anything less.

We are a caring company filled with hard working, dedicated, and responsible people. But we should never cut corners or look the other way when it comes to safety. Thank you for your continuing support and leadership.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

February 22, 2016 • Page 3 of 3

10 Cardinal Rules

The following actions constitute serious violations of Amtrak's Operating Rules and Standards of Practices that put life and limb at risk. Violations of these rules will be handled with zero tolerance. Discipline for any such violations will likely lead to immediate dismissal.

1. Any unauthorized tampering with or disabling of an approved safety device.
2. Any serious failure to comply with applicable Lock Out/Tag Out procedures and AMT-2 Electrical Operation System procedures.
3. Any serious failure to comply with confined space entry requirements for all permit required confined spaces.
4. Any unauthorized use of an electronic device when operating or riding moving equipment; directing equipment movement; assisting in preparing equipment for movement; and performing service on the ground, in yards, or on main track.
5. Falsification of inspection or maintenance documents.
6. Cheating on required exams.
7. Working on, under, between rolling equipment without proper Blue Signal Protection procedures.
8. Failure to comply with Shoving and Backing Movements procedures.
9. Failure to comply with approved Fall Protection Equipment procedures where required.
10. Failure to comply with applicable Roadway Worker Protection (RWP) Procedures.

All alleged violations shall be immediately and thoroughly investigated. Findings demonstrating violations of these rules shall warrant severe discipline, likely dismissal. Should extenuating circumstances arise that warrant variation in discipline, they will be reviewed, and discipline shall be approved by the Cardinal Rules Review Board consisting of our Chief Transportation Officer, equivalent officers as necessary, and Labor Relations as necessary.

special employee advisory

February 19, 2016 • Page 1 of 1

Dear fellow employees,

I promised that I would keep you updated on the state of our business. Last week, I shared with you that we have been underperforming against our budget for some time. I am writing you again so soon because our revenue management team just reviewed Amtrak's final performance metrics for the month of January. As a result, there are some concerns I want to share with you, and some actions we are going to start taking as a company to address revenue and cost issues.

First, we are falling further behind our budget commitment for the fiscal year. Our ticket revenue projections for FY 2016 have gotten worse in February, as gas prices remain low and market conditions remain soft.

Next, I appreciate the work that everyone has done to help us reduce our costs – but I have reviewed the recommended cuts, and in many cases, we are delaying or eliminating investments that are critical to our future while not looking at underlying cost issues.

Our challenge is to keep building Amtrak for the future while managing our way through this difficult financial situation today. Between new safety regulations, technology upgrades and infrastructure needs, we need to make sure that we are continually upgrading our skills and tools.

You need to understand that our industry peers are working through the same challenge – and in many cases, they are taking drastic actions. Just two weeks ago, Norfolk Southern announced it was reducing its workforce by 2,000 employees by 2020. Union Pacific has also made headcount reductions. Further, BNSF Railway recently laid off 100 people at yards in North Dakota and Minnesota, and CSX recently said it would begin streamlining its mechanical operations at 16 locations. These companies are preparing for a new industry normal, just as we must.

For now, we are taking action that will impact future hiring. Effective immediately, we are introducing a new approval process for open positions. When an Amtrak employee leaves the company, the position can no longer automatically be kept open. All vacant positions will be eliminated. A department that wants to fill the position will need to get approval from its Company Operating Team (COT) member, who then must ultimately get approval from me. To be clear, our commitment to safety and security remains unconditional. We will make sure that our

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

February 19, 2016 • Page 2 of 2

Safety, Police, EMCS and Train Operation positions continue to get the resources and people they need.

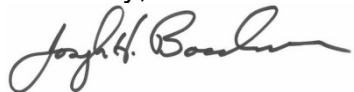

This is a meaningful action. We have many positions at Amtrak that have been held open for a long time. When these positions are left open, the funding for these positions stays within the department – and can be used for other purposes, as the department sees fit. This practice is not an efficient use of our resources. This action will force all of us to be more purposeful in how many people we hire, how we staff our operations, and how we use our people the most efficiently and productively.

I am committed to taking this process one step at a time – and if we can do this without impacting current jobs, that would be my desire. Our customers and stakeholders are demanding that we operate at the highest levels of efficiency and performance. Their expectations of us are much higher now – and meeting them will be no easy task for any of us. But I am confident that all of us, working together, can meet these challenges.

I know that many of you are concerned about your jobs. Once again, I ask that you continue working together to find new and creative ways to generate revenue, save costs and work more efficiently. I also want to thank you for the work you have done in improving our safety and customer satisfaction performance year-over-year. Our continued progress in these areas is essential to our ability to operate successfully.

I will keep you updated on our progress. Thank you for your continued support.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Our Journey Together – the Past Seven Years

This Thanksgiving marks my seventh year with Amtrak. I have always found the holidays and personal milestones to be good times to reflect on where I've been, and what lies ahead.

As many of you will probably remember, I came aboard the day before Thanksgiving, 2008. The first thing I wanted to do was talk to our people. Joanne and I spent time on Thanksgiving Day in Washington Terminal, the crew base, the platforms, talking with employees about the state of the company and thanking them for their work on that Thanksgiving Day.

At the time, as you may remember, we had just emerged from a prolonged and contentious set of contract negotiations that ended in a Presidential Emergency Board. The "brush with bankruptcy" was just a few years in the past, and although ridership had started what turned out to be a phenomenal run of growth, it had been a tough couple of years. I heard a lot about the state of the company – about what it was, but also what you hoped it could be, for our employees were already beginning to understand how *Acela* was changing the way Americans thought about Amtrak and passenger rail. I learned a lot about what was happening at the company, and by traveling to where you worked, I saw so many of the places served by our system. As someone from the Northeast, but raised on a dairy farm in rural New York, I came with an understanding of how vital our national network services were to those small rural communities across our nation. In the seven years since I've logged more miles on our train routes than nearly all previous CEO's combined and I appreciate our critically important impact even more to the mobility and economic vigor of the small communities of this nation.

What I've come to learn from all my visits and travel was that although our employees were doing a great job of keeping the company going, they needed some things from management. Amtrak was no longer in survival mode, because employees were beginning to ask me how they could build and grow our business, where just a few years before they would have been asking if they still had jobs. We owed them clear guidance, plans and an organization that aligned their efforts to accomplish clear-cut goals, and the tools to do the job.

The last of these came first – for just three months after that Thanksgiving, Congress passed the Recovery Act, which provided

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

November 24, 2015 • Page 2 of 3

unprecedented amounts of money for investment in our system, equipment, and infrastructure. While we were undertaking the enormous task of investing this funding, I was looking at ways to change the culture of this company to reflect the many changes in technology, society, and the railroad industry. We moved quickly, made good plans, and made investments across the system.

As we were doing all of these things, we were also benefitting from the tremendous growth in ridership and revenue which followed the introduction of *Acela* and the significant post-2008 improvements in OTP that our off-NEC services enjoyed. We used that opportunity to transform our business. We worked hard to improve our partnerships with our customers, we invested in our facilities and customer-facing functions like eTicketing and Wi-Fi, and we implemented our business line organization, so that we could bring each type of service the focus it deserved. We cut our debt by two thirds, and Amtrak now has the financial ratings needed for the next stage of fleet investments – which will make as big an impact as *Acela* did fifteen years ago.

We made early decisions in my tenure to make the most urgently needed investments in our fleet, and the delivery of new electric locomotives and long distance equipment is well underway. These investments and debt reduction efforts have set the stage for our next big equipment order – a fleet of 28 trainsets to replace the existing *Acela* equipment. These trains will be as much – if not more – of a game-changer as the *Acelas* were. We will get more trains, more cars, and more seats – and this will give us the capacity we need to drive the company ahead in the decade to come. I look forward to an official announcement on that in early 2016.

For Amtrak it has never been easy – and never more so than this year. The Train 188 incident was a terrible reminder of how serious our responsibilities are. But I think it also affirmed our early decision to push for the extension of positive train control on the NEC. When we complete that task this year, we will be the only major carrier in the railroad industry to provide its main line with such extensive protection.

Of all the physical changes we've accomplished, PTC implementation is closest to my heart. But we've done an awful lot over the last seven of years, and I think we can all take great pride in all this company has accomplished. We are a different Amtrak, a stronger and more businesslike company, capable of realizing the vision we have for it. I'm reminded by a lot of people in Washington that we need to run it like a business, and I support that. But I am also reminded time and again by our passengers – and by you – that we provide a vital public

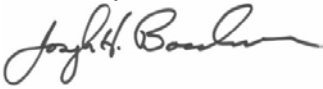

special employee advisory

service. Our national network serves the common good of our nation's people better and with more scheduled stations stops than the airlines. People want to be treated decently, and they appreciate our efforts – that's why we feel like we can call ourselves America's Railroad®.

At this time of year we set aside a special day to be thankful. Yet we know we need to be thankful every day, and I am, for and I am especially thankful to work with you, and to be inspired by you. I wish each of you a safe and happy holiday with your loved ones – and a successful new year individually and for Amtrak.

Sincerely,

Joe Boardman
CEO and President

Winter Storm Jonas- Amtrak Keeps Running

Dear Colleagues,

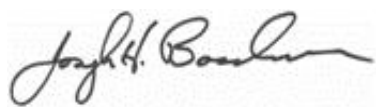

Thank you to the men and women of Amtrak who kept America's Railroad® open and kept trains running during winter storm Jonas.

With airlines cancelling more than 12,000 flights, intercity buses parked and other rail carriers shut down, we stood alone in being able to provide dependable transportation service in the hardest hit areas. Our planning and execution were outstanding and our experience and teamwork enabled us to under-promise and over-deliver. Every department had a role to play and each played that role with distinction.

Preparing for storms of this magnitude is a year-round obligation. Decisions made months and years ago to storm-harden our infrastructure and rolling stock, paid dividends during this historic storm.

Yet not a wheel would have turned without a dedicated and committed workforce. Whether you were able to make your way in, perform your duties and head home or whether you spent long days on the railroad followed by short nights in hotels or sleeping cars, I appreciate your extraordinary effort and thank you for your service.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Critical Compliance Requirements

Dear Colleagues,

Ever since we launched the Management Control Framework (MCF) process three years ago, thanks to Amtrak employees across the Company, we have seen a continuous flow of process improvements.

In fact, we have seen over 400 reported process deficiencies resolved in that period, and the progress is accelerating. Thank you for your contributions to this effort.

We have learned from this process that the greatest benefits are achieved when the documentation of our objectives, risks and controls is complete and well organized. We have also determined that there is a significant benefit to having a comprehensive understanding of specific requirements with which Amtrak must ensure compliance (e.g. defined in Policies, procedures, laws, regulations, etc.).

In order to ensure that Amtrak's documentation of compliance requirements is comprehensive, I have asked Matt Gagnon and the Amtrak Controls Team to take the following steps:

- Identify each function currently performing activities related to risk management and compliance;
- Obtain and review available documentation of compliance requirements for completeness;
- Identify the associated objectives, risks and controls within the current MCF; and
- Where we lack an objective that explicitly states our intent to comply with each requirement, add such an objective.

So that this information is available for our 2016 MCF self-assessment and so that we are able to timely address any compliance issues as soon as possible, I have asked that this effort be completed over the next four months. Please be responsive to requests about compliance requirements in your areas.

If you have information to share regarding compliance activities in your area, or have any suggestions for improving Amtrak's management controls, please do not hesitate to contact your manager or the Amtrak Controls Team directly at ACT@Amtrak.com.

I appreciate your contributions to the success of this effort.

Sincerely,
