Keep in mind that it's a concept, and represents only one of a wide range of possible network and service configurations that could be developed. But the key here is that we have undertaken an initial in-depth study of what it would take to offer a world-class high-speed system for the future, and the economic viability of such an endeavor.

If you don't live in the Northeast, the significance of this plan shouldn't mean any less to you. While this is a major undertaking for the NEC, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end with the NEC. We are pursuing high-speed rail corridor development opportunities such as the projects in Florida and California in partnership with states and others in the industry. Last week, I introduced our incoming Vice President of High Speed Rail Al Engel, an industry expert to help us advance our ambitions in the high-speed rail arena.

I hope you're as excited as I am about the prospects of this concept plan and the opportunities before us. Please take the time to take a look at the study — it's posted on Amtrak.com and on the Amtrak intranet — it's an excellent example of kind of thinking we should be doing, and the dynamic and bold Amtrak I know we can be.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today, Amtrak released a bold vision of a realistic and attainable next-generation high-speed rail system that could revolutionize transportation, travel patterns and economic development in the Northeast for generations.

With trains operating up to 220 mph (354 kph) on a two-track corridor, we could operate from Washington to New York in 96 minutes and New York to Boston in just 84 minutes, cutting today's trip-times in half. We could offer our passengers at least four hourly high-speed departures in each direction, compared to once per hour today.

As America's Railroad and our country's high-speed rail operator, it is part of our central to our mission to put forth concepts and plans that look beyond what we can operate with what we have today.

Entitled "*A Vision for High-Speed Rail in the Northeast Corridor (NEC)*," the study describes a system that addresses a major national transportation need for generations to come. Given its population, economic densities and demand for intercity travel — which estimates show doubling by 2050 — the Northeast is in need of a next-generation high-speed rail system that will support growth through the next century.

When it's completed in 2040, the new infrastructure would support expected high-speed train ridership of 18 million, but it could accommodate 80 million passengers annually, with a hundred or more frequencies a day in the decades to follow as demand increases.

Building a world-class system of this magnitude would require \$4.7 billion annually, or \$117 billion, over the course of a 25-year construction period.

Certainly, this is a significant investment, but with the billions more needed just to maintain the region's overburdened highway and aviation networks, building a new high-speed, high-capacity railroad may be the more cost-effective solution.

You may remember that this summer we developed an NEC Infrastructure Master Plan that examined how the NEC could meet accommodate growth given the railroad we have today. That study predicted that capacity would max out by 2030 — this next-generation high-speed rail system will provide the necessary new capacity to meet growing demand well beyond 2030.

Our vision meets our safer, greener and healthier goals. We could provide fast, safe and secure travel that reduces energy use and emissions while providing comfortable and reliable service to sustainable communities and helping support the national and regional economies. It would help ease highway and airway congestion and foster "greener" travel for millions of Americans.

Construction of the system alone would mean more than 40,000 annual jobs during the 25-year build-out period, and the operation would yield 7,100 new rail operations jobs.

Keep in mind that it's a concept, and represents only one of a wide range of possible network and service configurations that could be developed. But the key here is that we have undertaken an initial in-depth study of what it would take to offer a world-class high-speed system for the future, and the economic viability of such an endeavor.

AMTRAK SETS NEW RIDERSHIP RECORD, THANKS PASSENGERS FOR TAKING THE TRAIN

Strong performance shows demand for passenger rail ~~continues to grow~~ is real and growing

WASHINGTON – Amtrak set a new annual ridership record of 28,716,857 passengers for the fiscal year ending September 30 and collected a record \$1.74 billion in ticket revenue.

The strong performance ~~is evidence that the demand shows demand~~ for passenger rail service ~~is rising is real~~ and that more Americans are choosing Amtrak — a greener and more convenient travel mode growing.

“We thank every passenger for choosing Amtrak to meet their intercity travel needs,” said President and CEO Joseph Boardman. “More and more people see passenger rail as a way to get to where they need to go, and when our front line employees put them first, it helps to bring passengers back for another trip.”

Boardman added that in addition to passengers, Amtrak’s relationship with other customers such as states and commuter agencies are crucial. “Just as we must earn the loyalty of the customers who ride our trains, we must work to build stronger ties to our state and commuter customers,” he added, noting that Amtrak operates in an increasingly competitive environment.

A year-over-year comparison of FY 2010 to FY 2009 shows total Amtrak ridership grew by 5.7 percent, or about 1.55 million passengers, and all Amtrak business lines experienced growth including the Northeast Corridor (up 4.3 percent), long-distance trains (up 6.6 percent), and state-supported and other short-distance routes (up 6.5 percent.) Over the same period, ticket revenue increased 9 percent, or more than \$140 million.

Factors that ~~have~~ contributed to Amtrak’s success include an improved economic environment allowing for some recovery of business travel along the Northeast Corridor, the increased appeal and popularity of rail travel, effective marketing campaigns, the introduction of Wi-Fi on the high-speed *Acela Express* trains and sustained high gasoline prices.

NATIONAL RAILROAD PASSENGER CORPORATION

525 West Van Buren Street, Suite 222, Chicago, IL 60607 tel 312 880.5390 fax 202 799.6397 mediarelationschicago@amtrak.com

In addition, continued difficulties with air travel and consumer dissatisfaction with air service are moving passengers from planes to trains particularly along the Northeast Corridor, where Amtrak now enjoys a 65 percent share of the air-rail market between Washington and New York and a 52 percent share of the market between New York and Boston.

Since FY 2000, Amtrak ridership is up nearly 37 percent. To continue this long-term trend, Amtrak is pursuing several initiatives including partnering with states to expand existing services and establish new routes, buying 130 new single-level long-distance passenger cars to modernize its equipment fleet, and beginning the process to expand capacity along the Northeast Corridor to support growing demand. Amtrak is also promoting its vision for a world class next-generation high-speed rail service capable of achieving 220 mph (354 kph).

Furthermore, Amtrak recently completed the first of several comprehensive reviews of its long-distance trains exploring every aspect of operations from on-time performance to on-board services to identify opportunities for improvement. The initial group of [reports](#) analyzed the *Sunset Limited*, *Texas Eagle*, *California Zephyr*, *Cardinal* and *Capitol Limited*.

About Amtrak

As the nation's intercity passenger rail operator, Amtrak connects America in safer, greener and healthier ways. Last fiscal year (FY 2009), the railroad carried 27.2 million passengers, making it the second-best year in the company's history. With 21,000 route miles in 46 states, the District of Columbia and three Canadian provinces, Amtrak operates more than 300 trains each day—at speeds up to 150 mph (241 kph)—to more than 500 destinations. Amtrak also is the partner of choice for state-supported corridor services in 15 states and for several commuter rail agencies. Visit Amtrak.com or call 800-USA-RAIL for schedules, fares and more information.

Board Receives Update on Safe-2-Safer Progress

In conjunction with the program's one-year anniversary, the Safe-2-Safer leadership team delivered an update to the board of directors at its meeting last week on the progress that has been made thus far, along with the challenges that still need to be overcome.

Safe-2-Safer was designed to be implemented over three years. Now a third of the way through the implementation, all divisions, contact centers and headquarters departments have begun the process of creating a workforce that is unified around safety and security through collaboration and communication.

"I can't tell you how impressed I've been with individuals throughout the company who have taken it upon themselves to champion Safe-2-Safer in their division, shop or office," said Richard Phelps, vice president, Transportation and Safe-2-Safer executive sponsor. "These folks have an infectious desire to change the way we work together to be safe and secure. They truly believe in Safe-2-Safer and I know we will succeed because of that."

Since last July, every executive has been meeting regularly with a coach from BST, Amtrak's partner in Safe-2-Safer. Additionally, more than 1,600 managers and supervisors have started the leadership training program to learn how to communicate more effectively with their teams and create an atmosphere of cooperation.

On the front lines, the Mid-Atlantic, Northeast and Southern Divisions have progressed into the implementation of the Behavioral Accident Prevention Process (BAPP). This process involves local Steering Committees made up entirely of union members working with their peers to reduce risks as much as possible.

"I believe we're at the tipping point," said Peter Hall, senior director, Safe-2-Safer. "As people build trust and see that this process not only keeps them safer, but also improves the relationships they have at work, they'll get on board and we'll see a real transformation."

Operation Changes: Select Northeast Corridor train schedules have been changed to reduce hold time that had been previously added to accommodate track work. *Keystone* Train 644 will depart Philadelphia five minutes earlier, while *Acela Express* Train 2190 and *Northeast Regional* Train 190 will depart New Haven, Conn., eight and four minutes earlier, respectively.

Marketing and Product Development: Amtrak will be featured in an episode of the TLC hit reality show "Cake Boss" on Aug. 16 at 9/8c. To promote the partnership, a fully wrapped *Acela Express* trainset featuring Buddy Valastro, star of the show, will run through August. Keep an eye out for employee contests for "Cake Boss" merchandise in the coming weeks.

PSSA: The President's Service and Safety Awards Committee has announced that it will present all 2010 awards at a single ceremony rather than at multiple regional ceremonies, as in recent years. All PSSA winners and their guests will be invited to Washington, D.C., for a luncheon on Nov. 3. Regional luncheon ceremonies will still be held to honor employees reaching 30 or 35 years of service in 2010. Locations and dates for these events will be released soon.

Did You Know?

New Data Shows Improved Energy Efficiency

The latest edition of the U.S. Department of Energy's Transportation Energy Data Book shows that Amtrak trains are now even more efficient than auto and airline travel.

According to the latest data, Amtrak is 20 percent more energy efficient than airlines on a per-passenger-mile basis, up from 19 percent in the previous study. Amtrak trains improved to being 30 percent more efficient than automobiles, up from 28 percent.

Amtrak also improved its absolute efficiency, by decreasing BTUs per passenger mile from 2,561 to 2,398.

Downeaster Expansion is Underway

Amtrak officials were in Brunswick, Maine, this morning with Gov. John Baldacci, FRA Administrator Joe Szabo and representatives from the Northern New England Passenger Rail Authority for the kick-off of the *Downeaster* Expansion Project.

The project involves upgrading 30 miles of track to extend service north beyond Portland to Freeport and Brunswick. Service studies estimate that the expansion will increase ridership by approximately 36,000 per year upon completion in 2012.

The \$38 million investment is funded primarily with a \$35 million Recovery Act grant, with the balance contributed by the state of Maine. An estimated 200 jobs will be created to support the work.

Operation Changes: Beginning today, select northbound *Acela Express* trains will depart Washington 5-10 minutes earlier and select northbound *Northeast Regional* trains will depart Washington, Baltimore and/or Philadelphia 5-15 minutes earlier. These schedule changes are being made due to the completion of track maintenance.

Benefits: All non-agreement employees who added dependents to their Amtrak benefits plan prior to 2010 will soon receive a dependent verification package requesting documentation, such as a birth certificate or marriage license, that shows dependents are eligible for coverage. Employees that added dependents in 2010 have already complied with this request.

Engineering: Amtrak has reached an agreement with East Lyme, Conn., Selectman Paul Formica, the U.S. Coast Guard, local boaters and marine businesses that allows use of the Niantic River channel while keeping the Niantic River Bridge replacement project on schedule. The agreement permits channel closures on Monday and Tuesday nights through Oct. 15, the traditional end of the summer boating season.

Timetable Distribution Reminder

In advance of the new Fall-Winter System Timetable being distributed in November, station employees wishing to adjust their current allotment of timetables may contact Joe Wenclawiak (wenclawj@amtrak.com) or Keith Bonneckarrere (bonneck@amtrak.com) in the National Marketing group.

Timetable orders made within three weeks of the new version being issued will be held until the new timetable is available in order to keep obsolete products from being distributed to passengers.

Amtrak Gearing Up for 40-Year Anniversary

Amtrak will turn 40 on May 1, 2011, and in addition to celebration plans that are still being made, the company is publishing a commemorative book that will document the story of its first four decades. To make it a true representation of the railroad, employees are invited to submit photos of people, places and equipment for the book.

“We’re really trying to tell the story of Amtrak from every angle and as the saying goes, a picture is worth a thousand words,” said Joe McHugh, vice president, Government Affairs and Corporate Communications. “We’re seeking photos that represent a complete range of time periods, geographies and functions — whether it’s a car shop in the 70s or a call center in the 90s.”

Employees whose photo submissions are selected for inclusion in the book will receive photo credit. By submitting a photo, the employee is indicating that it is their property and that Amtrak has permission to publish it.

Because prints and slides will not be returned, employees are encouraged to have print photos or slides copied into digital form and e-mail their submission. This will also prevent one-of-a-kind items from being lost in the mail. Digital submissions should be 300 dpi (dots per inch) or better.

To submit a digital photo, e-mail it to Alvin.Riddell@amtrak.com. Print photographs and slides (black and white shots are welcome) should be packaged in a flat envelope marked “Do Not Bend” and mailed to:

Amtrak Corporate Communications
Attn: Doug Riddell 4E-328
60 Mass. Ave. NE
Washington, D.C. 20002

All submissions, via e-mail or hard copy, should include a description identifying the year, location and subject(s) in the photo. Amtrak cannot accept responsibility for any photos that are lost or damaged. The deadline for submissions is Aug. 18.

“The book will be called ‘Amtrak: An American Story,’ and we want it to be an enduring contribution to our nation on this important milestone in the company’s life,” said McHugh. “So what better way to tell the story than through the eyes and images of the people who built this railroad.”

Operation Changes: Amtrak *Cascades* service has returned to normal with the early completion of critical bridge maintenance by BNSF Railway. Trains are now operating between Bellingham, Wash., and Vancouver, B.C., ahead of the scheduled completion date of Aug. 18.

Hit Us With Your Best Shot!

This is the last week for employees to submit photos for inclusion in the company's 40th anniversary commemorative book. Photos of current and former employees at work during each of the four decades in all departments are still needed. Action shots will be favored over posed photos.

Because submissions will not be returned, employees are encouraged to copy print photos or slides into digital form and sent via e-mail. This will also prevent one-of-a-kind items from being lost in the mail. Digital submissions should be 300 dpi (dots per inch) or better.

To submit a digital photo, e-mail it to Alvin.Riddell@amtrak.com. Print photographs and slides should be mailed to:

Amtrak Corporate Communications
60 Mass. Ave. NE 4E-328
Washington, D.C. 20002

All submissions, via e-mail or hard copy, should include a description identifying the year, location and subject(s) in the photo. Submissions must be sent/postmarked no later than Aug. 18, and Amtrak cannot accept responsibility for any photos that are lost or damaged.

APD Receives Award for K-9 Program

At a recent ceremony in Alabama, the Auburn University Canine Detection Research Institute (CDRI) presented the War Eagle Spirit Award to Amtrak Vice President and Chief of Police John O'Connor and Inspector William Parker, manager of the department's K-9 program.

The award is in recognition of Amtrak's commitment and contributions to the field of K-9 detection. It is the first such award ever presented by the CDRI, the largest K-9 detection research program in the U.S.

"The Amtrak Police Department [has] a K-9 program that is second to none," said John Pearce, associate director of the CDRI. "Amtrak's K-9 detection program quickly became the benchmark for other K-9 programs...[its] innovative deterrence strategies and use of dogs is changing how mass transit K-9 detection operates."

The APD has had a relationship with Auburn University since 2007. Of the department's 48 K-9 teams, 34 of them have undergone training at the CDRI.

Watch Amtrak on "Cake Boss" Tonight, Win Prizes This Week

Earlier this year, Amtrak worked with Carlo's Bakery, featured on the TLC reality show "Cake Boss," to create a train-themed cake in honor of National Train Day. Tonight, the "Cake Boss" episode featuring the National Train Day cake will premiere. Amtrak is celebrating with all employees by giving away "Cake Boss" prize packs to 20 randomly selected winners of a trivia contest, which is being hosted on the Amtrak intranet.

Tune into "Cake Boss" tonight at 9 p.m. EDT. Then, log in to the Amtrak intranet anytime after 10 a.m. EDT on Tuesday, Aug. 17, to answer a trivia question about the show. The contest will be featured in the "News & Info" section of the intranet and will be open until noon EDT on August 20. Winners of the "Cake Boss" prize package will be selected randomly from all participants that have submitted correct answers. Entrants must be current Amtrak employees or contractors.

Operation Changes: Due to track work being performed by BNSF Railway, schedules for *Saluki* Trains 390 and 391, and *Illini* Train 392 will be adjusted between Carbondale and Du Quoin, Ill., on Aug. 24-25. Alternate transportation will be provided.

Operation Changes: On Aug. 28, Amtrak *Cascades* Train 513, which normally originates in Vancouver, B.C., will operate between Seattle and Portland only.

We Asked, You Responded!

Amtrak extends a “thank you” to every employee who participated in the recent “Cake Boss” trivia contest, as well as those who have submitted a photo for consideration in the upcoming book to commemorate the company’s 40th anniversary.

Earlier this year, Amtrak worked with Carlo’s Bakery, featured on the TLC reality show “Cake Boss,” to create a train-themed cake in honor of National Train Day. The “Cake Boss” episode featuring the National Train Day cake premiered last Monday. Nearly 600 employees took part in the related trivia contest on the Amtrak intranet last week. The 20 random prize pack winners are being notified this week.

Amtrak has also received more than 250 photo submissions for “Amtrak: An American Story,” which will be published next year to celebrate the company’s first four decades. Final selections are being made and employees who submitted selected photos will be contacted in the coming weeks.

Amtrak to Begin Revitalization Project in New York

In addition to a \$15 million safety improvement project and its ongoing efforts to remove graffiti and debris along the Northeast Corridor in New York City, Amtrak has begun a landscape revitalization project in the city to restore trees and shrubs, while also fencing a section of the right-of-way in Woodside, Queens.

The project is the result of extensive cooperation with the local community, U.S. Rep. Joseph Crowley and New York City Councilman Peter Vallone, Jr. Approximately 600 new trees and shrubs will be planted in addition to the installation of 1,350 lineal feet of standard and ornamental fencing.

When completed, the work will help keep debris out of the right-of-way and increase safety by preventing access to tracks. Total cost for the project is estimated at \$460,000.

“Our efforts in Woodside underscore Amtrak’s commitment to be a good neighbor and provide our passengers with a reliable, efficient and safe travel experience,” said Chief Engineer Frank Vacca.

New Medical Director Joins Amtrak

Paul J. McCausland, MD, MPH, recently joined the company as corporate medical director. In this Philadelphia-based role, he provides expert medical guidance to Amtrak by advising departments and programs as needed, while providing input on policy decisions related to medical issues. Dr. McCausland is also responsible for managing the Medical Services staff, which handles all medically-related activities including physical exams, medical surveillance programs and the evaluation of medical documentation.

Dr. McCausland is board certified in family practice and occupational medicine, and he is the immediate past president of the Philadelphia Occupational and Environmental Medical Society. Prior to joining Amtrak, he was medical director for Sunoco’s Northeast Refineries, which include five facilities in four states. In addition to earning his medical degree from the Hahnemann Medical College, he also holds a master’s degree in public health from the Medical College of Wisconsin.

Operation Changes: Beginning on Aug. 30, many *Northeast Regional* and *Acela Express* trains will operate according to an adjusted schedule for up to eight weeks between Boston and New Haven, Conn., due to track upgrades being performed in Rhode Island. Select westbound trains will depart 5-10 minutes earlier and all eastbound train schedules have been adjusted.

Accounts Payable Deadlines are Approaching

With the end of the 2010 fiscal year approaching, it is important that all company purchases and other liabilities incurred this year be accounted for before books are closed.

To meet this accounting requirement and help make Amtrak healthier financially, all employees must submit any unpaid invoices, purchase orders and eTrax requests to Accounts Payable as soon as possible. The table below outlines deadlines and cutoff dates.

YEAR END A/P CUTOFF SCHEDULE	
Item	Due Date
Deliver invoices to A/P to ensure entry into AAMPS	Sept. 15
PO Receivers (RNV) Accrual	Sept. 30
eTrax Payment Request Accrual	Oct. 11
A/P Invoice Accrual	Oct. 11
Final Day for eTrax eAccrual	3 p.m. Oct. 12
Reversal of all September Accruals	Oct. 20

Amtrak Takes Part in National Preparedness Month

As part of its commitment to safety and security, along with its strong relationship with the U.S. Department of Homeland Security, Amtrak is participating in the seventh annual National Preparedness Month throughout September.

National Preparedness Month is sponsored by the DHS through the Federal Emergency Management Agency's Ready campaign, which aims to inform individuals, families and businesses on how to prepare for an emergency or natural disaster.

Amtrak is hosting a series of events and activities at multiple work locations and stations throughout September. In addition to distributing information to passengers and employees on how families can prepare for an emergency, many of these events will include blood drives.

"Readiness comes in many forms and preparedness is everyone's responsibility," said Chief Operating Officer William Crosbie. "Be informed about the risks in your area — both work and home — and take action to be ready before an emergency arises."

A National Preparedness Month calendar has been produced for Amtrak employees. The calendar offers daily tips on how to increase safety and security at home and at work in the event of a natural disaster or emergency situation. The calendar can be downloaded on the intranet by clicking "National Preparedness Month Calendar" under the "Police" menu on the home page.

For more information, visit www.ready.gov or go to www.fema.gov.

Midwest Service Added for Labor Day Weekend

As consumers aim to enjoy the last summer holiday of the year, Amtrak is capitalizing on increased demand for travel to Lake Michigan destinations by adding service between Northern Illinois and Western Michigan over Labor Day weekend.

"People want day trip and weekend travel options to beaches along the lake and we're responding by providing extra early morning and late evening trains between Kalamazoo and Chicago," said Superintendent, Road Operations Moe Savoy.

From Sept. 2-7, five daily roundtrips will be offered along the route. One-way adult fares will begin at \$21.

Dec. 6, 2010

Acela Express Celebrates Ten Years of High-Speed Service

On Dec. 11, 2000, Amtrak became the first operator of high-speed rail in North America with the launch of *Acela Express* service between Washington and Boston. As Amtrak celebrates the service's 10-year anniversary this week, it thanks its employees for their commitment and passengers for their loyalty, while looking ahead to next-generation high-speed rail.

"This is a major milestone and we should all be very proud," said Al Engel, vice president, High-Speed Rail. "*Acela Express* represents the vision and innovation this company possesses. We need to use this knowledge and expertise to retain our position as the premier high-speed rail provider in the U.S., while expanding and improving service in corridors across the country."

Since the service's inaugural run, significant growth and service improvements have taken place. In FY '10, *Acela Express* accounted for \$440 million in ticket revenue and topped 3.2 million riders. In recent years, passengers have responded to service improvements such as better menu offerings, installation of leather seats and free Wi-Fi. All these accomplishments are even more significant when taking in to consideration the unique challenges of operating on a dense corridor with such heavy train traffic.

The latest data indicates that Amtrak earns 69 percent of the Washington-New York air/rail market and 51 percent between New York and Boston. These numbers are up from 45 and 27 percent, respectively, in 2001. Much of these gains can be credited to *Acela Express* service.

To celebrate the anniversary, Amtrak is offering *Acela Express* First class passengers free cupcakes, while passengers who buy one of the new sandwich offerings will receive a free baseball cap. Promotion of the anniversary is also being driven through special advertisements, e-mails to Amtrak Guest Rewards® members and social media outlets.

Celebrations for employees were hosted at noon today at crew bases in Boston, New Haven, Conn., New York and Philadelphia, as well as the Starlight Room in Washington Union Station.

In September, Amtrak unveiled its vision for the next generation of high-speed service in the Northeast with a conceptual plan for financially viable service that could cut trip times between Washington and Boston in half. Upon its full build-out in 2040, high-speed train ridership would reach 18 million passengers annually.

On Dec. 7, Engel will present the next generation high-speed rail vision at the Seventh Annual World Congress on High-Speed Rail in Beijing.

Commuter Services: The South County Commuter Rail Service begins operating on the Northeast Corridor today between Providence and Warwick, R.I. The access agreement is the result of hard work by numerous employees in the Policy, Law, Engineering and Transportation departments to ensure financial and operational feasibility.

Stations Update: The Wilmington, Del., station reopens today after 18 months of renovation work. Funded by federal stimulus money and DelDOT, the station offers passengers a new HVAC system, new waiting rooms and platforms, and other interior and exterior upgrades.

Marketing: Employees may visit www.RadioCityChristmas.com for a 25 percent discount on tickets to the Radio City Christmas Spectacular featuring The Rockettes in New York. Input "AMTRAK" in the promotional code box upon checkout. Some restrictions apply.

Smart IDs: New employee Smart ID badges are being distributed at locations across the system beginning tomorrow. Dates and times vary by location. The schedule for Dec. 7-17 distribution is now available on the intranet under "Police" → "Smart IDs."

Firearms Carriage Begins Next Week

Amtrak will begin accepting firearms in checked baggage on Dec. 15, as required by federal law. Media outlets across the country have already begun publicizing this major service change.

"Despite all our communications efforts to educate passengers, there may still be some confusion," said Amtrak Police Chief John O'Connor. "It is important employees know the rules and how to handle these situations."

The full policy is available on the "Reservations, Ticketing and Passenger Services Policies" page on the intranet under "Library" → "Policies."

IT: Employees no longer need to speak to an IT Service Desk agent to reset their Windows and Mainframe passwords. A new Voice Trust automated password reset service is now available, which uses “voiceprint” technology to verify identity. Instructions are located on the intranet under “How We Work” → “Service Desk” → “Password Resets.”

Marketing: Special Amtrak travel offer inserts will be placed in 200,000 DVD copies of *Scooby-Doo! Curse of the Lake Monster*, which is being released next month.

Reminder About Safety Reporting

Employees are reminded that all work-related injuries and illnesses, as well as safety and security violations must be reported immediately. Reporting activities are protected under the Federal Rail Safety Act (FRSA) and Amtrak will not tolerate retaliation of any kind against employees who report an incident.

Information on the protections to which you are entitled under the FRSA is attached to this issue of *Amtrak This Week*. Please distribute both flyers at safety briefings and post on bulletin boards for at least 180 days.

APD Mourns Loss of K-9

Amtrak mourns the loss of Ivan, a valued member of the Amtrak Police Department’s K-9 Unit, who passed away on Dec. 8 due to complications from immune mediated hemolytic anemia.

Ivan had served as a vapor wake and certified explosives detection dog with his partner, Officer Naomi Stratton, since joining the APD in May 2008. A memorial service will be held on Dec. 16 in Washington, D.C. As per Patrol Guide Directive 350.019, sworn APD officers are authorized to wear mourning bands for a 15-day period.

Amtrak Begins Carrying Firearms in Checked Baggage

Effective Dec. 15, Amtrak will begin to accept unloaded firearms in checked baggage at stations and on trains that offer checked baggage service and operate within the U.S. The requirement was established in section 159 of the Consolidated Appropriations Act of 2010 (Public Law 111-117), which was enacted by Congress in late 2009. Since that time, Amtrak has devoted considerable resources to provide firearms carriage for passengers while ensuring safety and security for employees and travelers alike.

“This is a major operational change for the company and implementing it was quite a challenge,” said Amtrak Police Chief John O’Connor. “But the innovation and resourcefulness of our employees got the job done on time.”

The total cost of the project was just over \$2 million. To ensure the safe carriage of guns, a total of 135 baggage floats, 145 stations offering checked baggage service and 142 baggage cars received security improvements including storage and signage. Modifications to the reservation system and operating policies were also made. Employee training has been ongoing for several months and passenger communications are in full swing.

“Despite all our communications efforts to educate passengers, there may still be some confusion,” said O’Connor. “It is important employees know the rules and how to handle these situations.”

Amtrak stopped the carriage of firearms on trains after the terrorist attacks on Sept. 11, 2001. Further restrictions were made after the attacks on trains in Madrid, Spain.

The full policy and more information is available on the “Reservations, Ticketing and Passenger Services Policies” page on the intranet under “Library” → “Policies.”

Amtrak Featured in National Christmas Tree Display

An Amtrak model train will circle the National Christmas Tree outside the White House this year, thanks to a partnership with the National Park Service, National Park Foundation and the National Christmas Tree Railroad. Tourists from all over the world have visited the National Christmas Tree each year since 1923.

The featured train is a G scale (1:22.5) model and includes two GE Genesis P-42 diesel locomotives and four single-level Amfleet passenger cars, plus a café car. The model represents Amtrak’s Midwest corridor service, as well as the *Northeast Regional* service south of Washington, D.C., where the trains operate using this type of equipment. The National Christmas Tree and model Amtrak train will be on display through Jan. 1.

Message From Joe Boardman

Dear Co-workers,

Just before Thanksgiving, I wrote to you about all the ways in which I think our country, our communities and our company have been blessed. We get to work for a company that serves a need for the greatest nation on earth, at a time when lots of positive changes are taking place.

We're getting new rolling stock and building new facilities. We're putting cutting-edge technology to work for us and for our customers. And we're going to be an instrumental part of bringing truly high-speed rail to the U.S.

Now, as we approach the Christmas and New Year holidays, I want to encourage all of us to spend some time thinking about what we can accomplish in 2011.

With the 24/7 nature of running a railroad, it's very easy to get tied down by that next item on the to-do list. We often become consumed by the short-term and fail to spend any time thinking about a long-term vision for our company. We all have leadership work to do, regardless of rank or job title. Some of the best and most impactful ideas at Amtrak have come from folks in the field who saw a way to improve the way we serve passengers and did something about it.

Next year, which happens to be Amtrak's 40th anniversary, will be one that shapes the future of the company for a long time. We will roll out new systems, like Strategic Asset Management, that will drastically change the way we use information to make decisions. We will offer one of the most advanced e-ticketing systems in the world to our passengers. We will install Wi-Fi on many more of our trains to make traveling with us more enjoyable. And the exciting part is that we will also accomplish many things that haven't even been thought of yet.

So during this holiday season, remember that we are breaking away from our old "survival" mentality. To reach our potential we have to become innovative at all levels of the company, and that means thinking beyond today and tomorrow. What can we do over the next one, two or three years that will have a lasting impact on Amtrak? Let's start 2011 ready to make it happen.

Thank you all for making 2010 such a great year. Let's carry this momentum forward.

Sincerely,

Joe Boardman
President and CEO

Operations Update: In response to growing demand, *Northeast Regional* trains are now making weekend stops in Newark, Del., near the University of Delaware. Southbound Train 133 will stop in Newark on Fridays at 3:05 p.m., while northbound Train 182 will stop on Saturdays and Sundays at 8:43 p.m.

Labor Update: The second general wage increase of 1.5 percent will take effect on Jan. 1 for Amtrak employees covered by new labor agreements. This wage increase applies to approximately 58 percent of agreement-covered workers.

Message From Joe Boardman

Dear Co-workers,

Sometimes I wonder if there is a better way to address you than “Dear Co-workers.” It’s an effort to communicate that we should all treat each other with the same level of respect regardless of one’s role in the company. I absolutely believe that every job well done deserves respect no matter what job you do, or what rank you hold at Amtrak. So we are “co-workers,” and I will stay with it, but please know when you read it that it comes with a high value for you and for what you do for our customers, our nation and for each other.

I’d like to wish you a Merry Christmas or Happy Holidays, depending on your personal beliefs. All beliefs are welcome here at Amtrak, along with how you wish to live your life. It is one of the greatest gifts we have for living in this nation, and we need to guard those rights for ourselves and for others who may not think the same way we do.

This season fills many of us with joy as we watch our children and grandchildren as they receive gifts or attend concerts or even play in the snow. Wouldn’t it be wonderful if we could feel that same way each time we see someone new experience a ride on our train?

I believe most of us want that kind of feeling to come from what we do. We might not articulate it just that way, but in fact, we want to enjoy coming to work everyday and we want a sense of purpose. I hope that while we might call ourselves “co-workers,” we can also consider each other — and our customers — as friends.

I think that feeling exists at many places in this company, which in part is why we had such a great year. Ridership and revenue are at record levels. The number of you that I have met and thanked is at a record level too. It bothers me that I can’t remember every name, but I am thankful to have had the opportunity to be here at Amtrak as one of your co-workers. I hope you feel that I treat you like a friend when we talk.

As a company we have lots of plans for the next year such as Wi-Fi on more services, our 40th anniversary celebration and new e-Ticketing systems — stuff that will help us all do our jobs better and improve our future as a company. Let’s make 2011 even better than 2010.

Thank you for what you do.

Joe Boardman
President and CEO

Government Affairs: On Dec. 21, Congress passed a continuing resolution (CR) that extends federal funding for Amtrak in the absence of an annual appropriations bill. The CR extends funding for Amtrak through March 4 at a prorated annual amount of \$1.5 billion.

Operations Update: In response to growing demand, *Northeast Regional* trains are now making weekend stops in Newark, Del., near the University of Delaware. Southbound Train 133 will stop in Newark on Fridays at 3:05 p.m., while northbound Train 182 will stop on Saturdays and Sundays at 8:43 p.m.

Labor Update: The second of 10 general wage increases over a five-year period will take effect on Jan. 1 for Amtrak employees covered by new labor agreements. This 1.5 percent wage increase applies to approximately 58 percent of agreement-covered workers whose unions have settled with Amtrak.

Benefits: The monthly limit of \$230 for pre-tax mass transit payroll deductions has been extended through 2011 as part of legislation signed by President Obama last week. Previously, the limit was scheduled to be reduced to \$120. The Amtrak benefits system will be updated accordingly. Employees should check their mass transit benefit elections by calling 1-800-481-4887 or logging on to www.AmtrakBenefits.com.

New Business Meetings Policy is Now in Effect

A new corporate policy for business meetings held off Amtrak property took effect on Dec. 20. The Business Meetings (Off Site) Policy defines responsibilities, Procurement controls and procedures for departments to appropriately plan and pay for small and large meeting requirements and expenses when holding meetings at off-site locations.

All meetings are to be held on Amtrak property when meeting space is available. When meetings must be held off-site, departmental meeting planners should work with Procurement, Amtrak's eTravel service provider and the Amtrak Business Travel Office to identify potential meeting sites and to ensure utilization of the proper Procurement processes.

For details, refer to the complete Business Meetings (Off Site) Policy (P/I 8.39.0) on the intranet under "Library" → "Policies" → "Amtrak Policy and Instruction Manual" → "Finance."

2011 Holiday Schedule

Holidays observed at Amtrak vary depending on an employee's status. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each agreement can be found on the intranet under "Employees" → "Labor Agreements."

Holidays for non-agreement employees in 2011 are as follows:

<u>Holiday</u>	<u>Day Observed</u>
New Year's Day	Sat., Jan. 1*
Martin Luther King, Jr. Day	Mon., Jan. 17
President's Day	Mon., Feb. 21
Memorial Day	Mon., May 30
Independence Day	Mon., July 4
Labor Day	Mon., Sept. 5
Veteran's Day	Fri., Nov. 11
Thanksgiving Day	Thurs., Nov. 24
Christmas Day	Mon., Dec. 26

* Since New Year's Day falls on a Saturday, non-agreement employees hired prior to 2011 are granted an additional personal day and are therefore entitled to three personal days in 2011.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library" → "Policies."

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 50 cents to 51 cents, effective for mileage expenses incurred on or after Jan. 1, 2011.

Finance: Employees are reminded that any time they are seeking to obtain project funding from grants, they should refer to the Amtrak Policy and Instruction Manual, section 8.14.0, for guidance. Any employee with a potential grant opportunity or pending grant submission should contact Beverly Thorpe, senior director, Grants Administration at 202-906-2218 or beverly.thorpe@amtrak.com.

Human Resources: Employees who have moved in the past year should be sure to update their mailing address in the Employee Information Portal. Addresses should be changed by Jan. 10 in order for W-2 tax forms to be mailed to the correct address. Log on to the intranet and click "Employees" → "Employee Information Portal."

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2011 must also submit a new form by Feb. 15.

July 6, 2010

Heat Wave Continues in the Northeast

An early-summer heat wave will continue through the rest of this week in the Northeast, as temperatures in many areas are expected to reach record-breaking highs. Employees in the region should act quickly if they recognize heat stress symptoms such as heat exhaustion and heat stroke in themselves, co-workers or passengers.

Symptoms of heat exhaustion include headaches, dizziness or lightheadedness; weakness and moist skin; irritability or confusion; and upset stomach or vomiting. People suffering from heat stroke will have dry, hot skin with no sweating; become confused or lose consciousness; and suffer convulsions.

To prevent heat stress, try to block out direct sun; use cooling fans or air conditioning where possible; drink plenty of water (about 1 cup every 15 minutes); wear light-colored, loose-fitting clothes; and avoid caffeine. If you observe someone who appears to be suffering from heat stress, call 911 or Amtrak Police Department (1-800-331-0008). Move the person to a cool, shaded area and loosen or remove heavy clothing. Provide the person with cool drinking water, and fan and mist the person with water.

Supervisors of employees who work outside should be familiar with symptoms of heat stress and make sure that drinking water is made available to them.

“Remember to follow the principles of Safe-2-Safer — look out for one another and reinforce safe behaviors,” said President and CEO Joe Boardman. Because heat can cause confusion, employees are reminded to pay close attention to the task at hand. “Stay hydrated and take a break if you need to,” he added.

On the Operations front, protect locomotives are stationed along the Northeast Corridor and crews are positioned to step in when needed, while mechanical technicians will be riding trains that may be problematic.

Should a train lose head-end power, employees should put the passengers first. Conductors should be in regular communication with CNOC to monitor on-board conditions, help assess passengers' special needs and formulate appropriate responses. Crews are reminded to make frequent announcements aboard a disabled train, even if the information remains the same. Additional water and other beverages are being stored aboard trains and Amtrak Police Department patrol vehicles are being stocked with water to bring to the disabled train. In the event that it becomes necessary to transfer passengers to another train, no train capable of accepting additional passengers is to pass the disabled train.

In addition, crews and station personnel should watch for symptoms of heat stress in passengers aboard trains and in stations. Loads are heavy this holiday week, and passengers rushing for trains and carrying heavy luggage can become overheated easily.

More information about working in hot conditions and heat stress is available on the Intranet under “Safety.”

Safety Policy Update: The Amtrak Safety Policy has been updated to include Safe-2-Safer risk-reduction principles in the job planning guidelines. The new policy can be found in the Operations section of the Amtrak Policy and Instruction Manual posted on the intranet under “Library” → “Policies.”

Travel Policy Update: The meal reimbursement section of the Travel Policy and Reimbursement Business Travel Policy has been revised. Employees must now input actual meal costs on their Expense Report e-form. Any meal over \$10 requires a receipt and total meal expenses may not exceed \$55 per day. The current daily meal and hotel maximum rates, which are subject to change, are posted on the intranet under “How We Work” → “Management Employee Business Travel.” The full policy is posted the Intranet at “Library” → “Policies” → “Finance.”

Transportation: Many disability groups are hosting conferences and events this summer and Amtrak expects many attendees to travel by train. Details on dates and locations were distributed last week in OSA 10-32. Employees should refer to Focus On 10-04 for reminders on how to best assist passengers with disabilities.

Marketing and Product Development: Amtrak is teaming up with the movie *Cats & Dogs: The Revenge of Kitty Galore* to offer a chance to win a grand prize trip for four to anywhere Amtrak travels. The sweepstakes runs until July 31. To learn more, visit www.catsanddogsmovie.com.

Stations Update: Amtrak Chairman of the Board Tom Carper will attend a groundbreaking ceremony for a new, state-funded Pontiac, Mich., station on July 16. The modern and energy-efficient multi-modal facility will serve Amtrak's *Wolverine* service in addition to Greyhound buses, replacing the existing trailer and unsheltered platform currently being used.

Operations Update: Effective July 12 through late August, many *Keystone Service* schedules will change between Harrisburg and Philadelphia, due to track improvements being performed along the route. Most eastbound trains will depart earlier, and westbound trains will depart later.

Amtrak Police Department: On July 15, the APD's San Diego Station Action Team will conduct a "tabletop exercise" with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak's Continuity of Operation planning.

Amtrak Partners with DHS to Promote Rail Security

Secretary of Homeland Security Janet Napolitano and Amtrak Vice President and Chief of Police John O'Connor recently announced that the Amtrak Police Department will be the first passenger rail police agency to partner with DHS in the launch of the Suspicious Activity Reporting Initiative, along with a number of other federal, state and local law enforcement agencies. This initiative aims to implement a centralized and collaborative process of collecting information about suspicious activities.

"We're establishing a unified approach at all levels of government to gather, document, process, analyze, and most importantly share information about terrorism-related suspicious activities," said O'Connor. "APD is pleased to become a part of this network of law enforcement agencies and we look forward to working closely with federal, state and local authorities."

The announcement was made in New York at a media event on July 1 where Napolitano also announced a nationwide "See Something, Say Something" campaign before departing on a promotional whistle-stop tour with stops in Philadelphia and Washington.

The partnership announcement coincided with a weeklong Operation RAILSAFE (Regional Alliance Including Local, State and Federal Efforts) exercise. The coordinated effort between APD, NYPD, TSA and other law enforcement agencies involved increased station patrols, additional security aboard trains, K-9 explosive detection sweeps and random passenger baggage screenings. The teams worked together to improve counterterrorism and incident response capabilities.

Similar to Operation RAILSAFE, an Operation ALERTS (Allied Law Enforcement for Rail and Transit Security) exercise was conducted by APD personnel with Metra and TSA agents in Chicago and parts of Wisconsin and Indiana. This was the first time any such program has been conducted outside the Northeast Corridor.

"We're planning more exercises like this one for the coming months because they help us cast an even wider net of security and make us very visible to the public to let them know we are here for their protection," said O'Connor.

Amtrak Police Department: On July 22, the APD's Chicago Station Action Team will conduct a "tabletop exercise" with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak's Continuity of Operation planning.

Marketing and Product Development: Amtrak has launched a "Create Our Contest Contest" on Facebook. The summer-long campaign invites the general public to develop what will become the company's first user-generated contest. Entries must be submitted in essay or video form by August 2. More information is available at www.facebook.com/amtrak.

Sales Distribution: Based on successful testing at the BWI-Thurgood Marshall Airport Station, improved ticket stock will now be distributed throughout the system as new orders are placed. The thinner tickets use nearly 30 percent less paper, reduce production and ticket printer maintenance costs and contain improved counterfeit protection features.

Chicago Hosts Civic Conversation This Week

Amtrak will host its sixth Civic Conversation in Chicago on July 21-22 as part of its Great American Stations Project. The event brings together Midwest community leaders, elected officials and other stakeholders to provide expert guidance on station development.

Special focus will be placed on best practices for renovating existing train stations and building new stations along planned routes between Chicago and cities in Illinois, Iowa and Wisconsin that are made possible by funding from the Recovery Act. Other topics will include real estate issues, compliance with the Americans with Disabilities Act and funding options.

Additional Virginia Service Begins Tomorrow

A new, state-supported *Northeast Regional* roundtrip between Richmond, Va., and Washington, D.C. begins tomorrow, bringing the total number of weekday *Northeast Regional* trains to five.

The new frequency is the second train funded by Virginia. Service between Washington and Lynchburg began last October.

"State partnerships are crucial to expanding the passenger rail network in this country and Virginia is a model example," said Jay McArthur, principal officer, Policy & Development. "This service addition offers Virginians another easy, convenient, green alternative to driving along the I-95 corridor."

The new northbound frequency will operate as Train 174 on Monday-Friday, departing Richmond at 7 a.m. and making stops at Staples Mill, Ashland, Fredericksburg, Quantico, Woodbridge and Alexandria before reaching Washington and continuing to Boston. Train 164 will depart on Saturdays and Sundays at 6:35 a.m. The new Monday-Friday southbound frequency is an extension of Train 125 that will depart Washington at 3:55 p.m. On Saturdays, Train 87 will depart at 7 p.m. and on Sundays, Train 157 will depart at 4 p.m.

"With hourly trains in the morning and several afternoon trains to choose from, you can easily plan your business trip and get to work on the train instead of sitting in traffic," added Thelma Drake, director, Virginia Department of Rail and Public Transportation.

To promote the new service, Amtrak Virginia is hosting a drawing for two free roundtrip tickets on *Northeast Regional* service at tonight's Richmond Flying Squirrels minor league baseball game. Fans in attendance can enter to win at the Amtrak Virginia booth inside the stadium. The winner will be announced during the game.

In addition to new service, Virginia has funded equipment rebuilds to increase the equipment pool and added new track capacity and infrastructure to service equipment at the Staples Mill Station.

Amtrak Celebrates ADA Milestone

On July 26, 1990, the Americans with Disabilities Act was signed into law to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak celebrates the 20-year anniversary of the ADA and is proud to serve as an important mode of travel for people with disabilities.

Fleet Plan: On July 23, Amtrak announced plans to purchase 130 new single-level rail cars for the long-distance fleet. The five-year, \$298.1 million contract is being awarded to CAF USA, which is creating 575 jobs to perform manufacturing and final assembly work at its plant in Elmira, N.Y. The first car is scheduled to roll off the assembly line in October 2012.

Amtrak Police Department: On July 30, the APD’s Wilmington (Del.) Station Action Team will conduct a “tabletop exercise” with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak’s Continuity of Operation planning.

“Over the course of the last two decades, Amtrak has taken significant steps to make travel on Amtrak more accessible and to enhance service to passengers with special needs,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

These special services are designed to make the entire Amtrak experience — from trip planning, to booking, to stations, to equipment, to on-board and station services — accommodating for passengers with disabilities.

Special services include assistance with boarding and detraining, at-seat meals, reading menus to customers with visual disabilities and writing on-board announcements for customers who are deaf or hard of hearing. Additionally, the company has made improvements to Amtrak.com to better serve passengers with visual impairments or who are color-blind. All of Amtrak’s trains meet or exceed the ADA requirements for accessible seating and all Quik-Trak ticket kiosks are fully compliant with ADA requirements.

“In addition to what we already have in place, we’re continually making improvements to better serve all of our customers,” said Chief Operating Officer William Crosbie.

Crosbie explained that new passenger information display systems (PIDS) are being piloted in stations as part of a capital program aimed at improving communication of important information to all customers, including those with hearing and visual disabilities. The company is also taking steps to expand the presence of wheelchair lifts while replacing those that are aging and obsolete. And as Amtrak acquires new equipment over the next 20 years, every new rail car will have improved accessibility.

However, for all the progress Amtrak has made, there are still challenges that must be overcome. Upgrading stations and making them fully accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements. Amtrak is conducting a capital improvement program to bring all designated stations up to the necessary standards.

Amtrak is also in the process of hiring an ADA program director who will be responsible for coordinating ADA work, as well as a manager of Disability Outreach in the Government Affairs department. These new staff members will augment Amtrak’s existing personnel in departments across the company who are dedicated to ensuring station and on-board accessibility.

Operations: A Health and Safety Fair will be held for Operations employees at the Providence Maintenance of Way Base on June 29 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Environmental Health and Safety:

Amtrak has expanded its sponsorship of the Student Conservation Association to cover projects in nine cities across the country. The SCA provides environmental education and green jobs training. Reduced-cost travel will be provided to students as they complete projects related to trail and habitat restoration, invasive species removal and historical preservation.

Update on NEC Business Travel

All employees are reminded that *Northeast Regional* trains must be used for business travel along the NEC in order to maximize available revenue seats on *Acela Express*. Additionally, travel vouchers for *Acela* service should not be given to contractors or vendors unless their work is directly related to an *Acela Express* project.

“We understand that many employees have to travel frequently along the corridor for business related to SAM, EIM, Safe-2-Safer and other projects, but if employees are using an average of just 15-20 revenue seats on peak *Acela* departures, the lost revenue easily reaches nearly \$1 million per year,” said Emmett Fremaux, vice president, Marketing and Product Development.

Employees are also reminded that no flash-passing is allowed aboard *Acela Express* and that all business travel requires a ticket.

“I’m relying on our conductors to enforce this policy,” said Richard Phelps, vice president, Transportation. “We expect all our employees to have the integrity to do what’s right by our passengers and the company.”

Amtrak Assumes Full Operations for Metrolink Service

All seven lines of the Los Angeles-area Metrolink commuter rail service are now operated by Amtrak. The Southern California Regional Rail Authority selected Amtrak to provide operating service last fall and the two organizations signed a formal contract in March, setting the service transition date for June 26.

Under the terms of the four-year contract, Amtrak will provide Train and Engine crews along with the necessary management and support staff to operate the 512 route-mile network that covers six counties in Southern California. The contract includes two additional three-year extension options. Amtrak previously operated Metrolink from 1992 to 2005.

Expanding its commuter and state-supported operations service is a key cog in the company’s growth strategy. Amtrak will continue to seek new partnership opportunities where it can leverage its expertise in rail operations, safety performance, business support functions and other competitive advantages.

New Board Members Confirmed

Three rail industry veterans who were nominated by President Obama to the Amtrak board of directors were confirmed by the U.S. Senate last week, clearing the final hurdle for them to officially join the board. The only step that remains is for each new member to be sworn in.

Anthony Coscia, Bert DiClemente and Jeff Moreland are expected to join Chairman Tom Carper, Vice Chairman Donna McLean, President and CEO Joe Boardman, FRA Administrator Joe Szabo and Director Nancy Naples in time for the July board meeting.

Coscia is a partner at New York law firm Windels Marx Lane & Mittendorf and has served as chairman of the Board of Commissioners of the Port Authority of New York and New Jersey. DiClemente is vice president at CB Richard Ellis, Inc., the world’s largest real estate company and has 20-years of experience working on Capitol Hill. Moreland has 32-years of railroad experience, and was most recently executive vice president of public affairs at BNSF Railway.

Dear Co-workers,

Sometimes I wonder if there is a better way to address you than “Dear Co-workers.” It’s an effort to communicate that we should all treat each other with the same level of respect regardless of one’s role in the company. I absolutely believe that every job well done deserves respect no matter what job you do, or what rank you hold at Amtrak. So we are “co-workers,” and I will stay with it, but please know when you read it that it comes with a high value for you and for what you do for our customers, our nation and for each other.

I’d like to wish you a Merry Christmas or Happy Holidays, depending on your personal beliefs. All beliefs are welcome here at Amtrak, along with how you wish to live your life. It is one of the greatest gifts we have for living in this nation, and we need to guard those rights for ourselves and for others who may not think the same way we do.

This season fills many of us with joy as we watch our children and grandchildren as they receive gifts or attend concerts or even play in the snow. Wouldn’t it be wonderful if we could feel that same way each time we see someone new experience a ride on our train?

I believe most of us want that kind of feeling to come from what we do. We might not articulate it just that way, but in fact, we want to enjoy coming to work everyday and we want a sense of purpose. I hope that while we might call ourselves “co-workers,” we can also consider each other — and our customers — as friends.

I think that feeling exists at many places in this company, which in part is why we had such a great year. Ridership and revenue are at record levels. The number of you that I have met and thanked is at a record level too. It bothers me that I can’t remember every name, but I am thankful to have had the opportunity to be here at Amtrak as one of your co-workers. I hope you feel that I treat you like a friend when we talk.

As a company we have lots of plans for the next year such as Wi-Fi on more services, our 40th anniversary celebration and new e-Ticketing systems. Stuff that will help us all do our jobs better and improve our future as a company. Let’s make 2011 even better than 2010.

Thank you for what you do.

Joe Boardman

PSSA: Winners of this year's President's Service and Safety Awards, the company's highest honor, will be recognized at a ceremony in Washington, D.C., on Nov. 3.

Daylight Savings Time: Daylight Savings Time ends at 2 a.m. on Sunday, Nov. 7. Station personnel on duty at that time should set clocks back to 1 a.m. Stations that are closed at that time should adjust clocks the night before, prior to closing. Trains en route at 2 a.m. will proceed to the next station and hold there until the adjusted, Standard Time, departure time.

Numerous Flu Shot Clinics This Week

Amtrak is offering employees the opportunity to stay healthier this fall and winter by hosting free flu shot clinics across the country in November and December. The following clinics will be hosted this week:

New York Penn Station	Nov. 2
Rensselaer Mechanical Facility	Nov. 2
New York Division HQ	Nov. 3
North Brunswick (N.J.) M/W Base	Nov. 5
San Diego Station	Nov. 5

For a full schedule and details, log on to the intranet and click "Employees" → "Human Resources-Health Services" and scroll down to the "What's New" section.

Ethical Conduct and Conflict of Interest Forms Due Nov. 22

All non-agreement employees, including support staff and independent contractors hired prior to September 15, 2010, must complete a Certificate of Compliance (NRPC Form 1194) and submit the signed document to Human Resources for the official record. Send completed forms to laurie.barnaby@amtrak.com or fax them to 202-906-3558.

Additionally, all Executive Committee Members and Corporate Officers must also complete a Clayton Antitrust Act Statement (NRPC Form 1195) and mail it to the Vice President of Human Resources at 60 Mass. Ave. NE, 2E-230, Washington, D.C., 20002.

All completed forms are due by November 22. Both the Certificate of Compliance (NRPC Form 1194) and Clayton Antitrust Act Statement (NRPC Form 1195) are available on the Intranet on the "Human Resources" and "Forms" pages.

Kirk Serves as Southern Division Acting General Superintendent

Assistant Superintendent Tom Kirk has been appointed acting general superintendent of the Southern Division, following former General Superintendent Joe Wall's departure from Amtrak on Friday.

Kirk will manage the day-to-day operations in the division until a permanent replacement is selected. During this period, Mid-Atlantic Assistant Superintendent Al Scala will fill in as superintendent of operations for the division.

"Many of the employees in the division already know Tom well, and I ask that they give both him and Al the assistance they need to manage operations and deliver professional service in the Southern Division," said Chris Jagodzinski, general manager-East.

New "Smart ID" Badges Coming Soon

Employees in select locations will be issued new "Smart ID" badges beginning in December, with distribution continuing to all employees through January.

The new employee badges are more technologically advanced than current credentials, allowing the company to integrate them with existing and future systems to better ensure safety and security across Amtrak and its facilities.

Smart ID badges will not replace employee "flash passes" used for train travel. New badges will only replace current employee IDs used for access to buildings, IP Timeclock, TED and SupplyPro. No other systems or processes will be affected.

New badges will be distributed on site throughout the system. During the next few weeks, posters will be put up at each facility with details on when and where employees must pick up their new ID. More details, along with a distribution calendar, will be available on the intranet under "Police" → "Smart IDs."

Open Enrollment Begins Today

Amtrak has taken significant steps to improve the benefits administration and information provided to employees about their benefits. Employees can take advantage of those efforts beginning today as open enrollment for 2011 benefits runs now through Nov. 19.

When enrolling in 2011 benefits elections, employees will find an improved AmtrakBenefits.com website. In addition to being easier to navigate and providing a great deal of information, the site has new tools and features to help employees select the best benefits for their needs.

Employees can now chat online in real-time with a benefits representative to answer questions and provide assistance. Questions can also be e-mailed directly to a representative through the site.

Employees are reminded that all benefits elections will roll over if no changes are made, except for Health Care and Dependent Care FSA elections. Employees must re-enroll in these programs each year.

For more information, or to make 2011 benefits elections, log on to www.AmtrakBenefits.com or call the Amtrak Benefits Service Center toll-free at 1-800-481-4887.

Operations Update: On Sunday, Nov. 14, track work being performed by BNSF Railway will require the cancellation of several *Pacific Surfliner* trains, while others will operate on modified schedules.

Operations Update: Amtrak *Cascades* trains will operate with Superliner equipment this week as the trainsets normally used for the service undergo extensive exterior cleaning.

Fall-Winter Timetable Now in Effect

Schedules included in the Fall-Winter Amtrak System Timetable, which includes minor and seasonal operating schedules, go into effect today.

Notable changes include a new stop in Poughkeepsie, N.Y., for *Lake Shore Limited* trains, while the northbound *Silver Star* will now receive passengers at Richmond-Staples Mill, Va., which was previously a discharge-only stop.

Missouri River Runner Trains 311 and 314 now depart 45 minutes earlier to restore an eastbound connection from the *Southwest Chief* in Kansas City.

In the West, Richmond, Calif., is now part of the *California Zephyr* and *Coast Starlight* routes. California's Burbank Airport is another addition to *Coast Starlight* service.

Second Phase of Illinois High-Speed Rail Project Begins Today

After recently announcing record ridership in Illinois in FY '10, the state is set to begin the second phase of track upgrades along the Chicago-St. Louis corridor that will allow for high-speed train service. Under an agreement with the Illinois Department of Transportation, Union Pacific Railroad is installing new concrete ties and track switches along the corridor. Work between Springfield and Lincoln begins today.

Once the entire project is complete, *Lincoln Service* trains could operate at up to 110 mph (177 kph). The work is being completed in part with \$1.1 billion in federal stimulus funds designated for passenger rail corridor improvements. Other uses for Illinois' funds include purchasing new locomotives and passenger cars, additional grade crossing warning devices and safety technology.

Overall, the Midwest received \$3 billion for similar improvements to create the Chicago Hub Network. When completed, the network will connect more than 40 of the largest cities in the Midwest with passenger rail, including 60 daily roundtrips from Chicago. The Illinois Public Interest Research Group projects that the completed network will create 57,000 permanent jobs and support 15,200 new jobs during the 10-year construction period.

During the 2010 fiscal year, the Chicago-St. Louis corridor had the largest ridership increase in the Midwest. Total Amtrak ridership on routes operated in partnership with Illinois was 1.97 million, a seven percent increase from the previous year.

"These record numbers provide us with a glimpse of what is possible with future high-speed rail," said Gov. Pat Quinn. "Illinois will serve as the hub of a Midwest high-speed rail network that will provide travelers with a reliable and efficient travel option while attracting businesses that are demanding a 21st century transportation system."

Green Efforts Honored by TIME Magazine

Amtrak's partnership with the Oklahoma and Texas departments of transportation to test a biodiesel fuel blend to power the *Heartland Flyer* has been named on TIME magazine's list of "The 50 Best Inventions of 2010." The list is published in the Nov. 22 issue of the magazine.

Initial measurements of the biodiesel blend known as B20 (20 percent pure biofuel and 80 percent diesel) show it reduced hydrocarbons and carbon monoxide each by 10 percent, reduced particulates by 15 percent and sulfates by 20 percent.

Other inventions honored include the Apple iPad and a flying car from Terrafugia. To see the full list, visit www.time.com and click the "Best Inventions" link in the upper right corner.

Operations Update: On Nov. 21 and 22, passengers traveling on several *San Joaquin* trains will be provided motorcoach service between Fresno and Merced, Calif., due to BNSF bridge replacement project. Service will not be available at Madera. Additionally, Trains 711 and 717 will operate according to a later schedule.

Health Update: The American Cancer Society is hosting the annual Great American Smokeout this Thursday, Nov. 18. Amtrak is hosting related information sessions on Nov. 16 at Ivy City in Washington, D.C., and in Jacksonville, Fla. The event encourages smokers to quit for at least one day, hoping it will challenge them to quit permanently. According to Amtrak Medical Director Paul McCausland, smoking is the number one avoidable health risk for heart, lung and vascular disease. For more information, visit www.cancer.org.

Open Enrollment Extended to Nov. 23

The open enrollment period for employees to make 2011 benefits elections has been extended to Tuesday, Nov. 23. Employees should go to AmtrakBenefits.com to make 2011 benefit elections. Those who have not done so already will need to log in as a "first time user."

Please note that anyone who needs to update a dependent's social security number must call the Amtrak Benefits Service Center at 800-481-4887.

Message from Joe Boardman

Dear Co-workers,

Early in my life, Christmas was my favorite holiday. I guess it was about the anticipation of the gifts and the drama of surprise around the tree on Christmas morning.

A number of years ago that thrill began to be replaced by an acknowledgement of how fortunate I was — some might even say blessed. It became natural, then, for Thanksgiving to become my new favorite holiday. It's a time to reflect on the bounty with which our nation, our communities and our company are blessed.

I have had the opportunity to know more and more of you, and I sense that many of you may feel the same way, and that you have probably gone through a similar transition over the course of your life.

I had the good fortune to become CEO of this company the day before Thanksgiving two years ago. Since then, so many of the wonderful members of the Amtrak team have worked hard and our dedication has resulted in great progress and many blessings.

Let me count just a few of our blessings:

- Having 200 new long-distance cars and electric locomotives on order.
- A new maintenance facility under construction in Miami.
- A new operation control center under construction in Chicago.
- All-time highs in ridership and ticket revenue in FY '10.
- A work culture that is improving thanks to your participation in Safe-2-Safer.
- Equipment that has been rebuilt even though some thought it could never be done.
- A vision for very high-speed rail in the Northeast.
- A newly rebuilt Wilmington, Del., station.
- Accessibility improvements at numerous stations.
- A very strong, award-winning K-9 team.

Hopefully each of you can add more to this list as you think about what to be thankful for this week. I know that our renewed focus on our customers is another one for which I am thankful. This is the time of year when so many people depend on us to get them to their families and loved ones in a safe and courteous way.

Thank you all for the hard work you do to make that happen. May each of you have a blessed and safe Thanksgiving.

Sincerely,

Joe Boardman
President and CEO

K-9 Teams Return from Training in Miami

The Amtrak Police Department hosted the second annual K-9 Unit Training Conference from Nov. 14-19 in Miami. The goal of the conference was to strengthen the department through intensive classroom and field training exercises.

Classroom training covered a variety of topics ranging from canine first-aid to techniques for recognizing various types of explosives. Field training included live-explosives demolition with the Miami Dade Police Department and firearms training at the Federal Air Marshall Field Office.

Finally, K-9 teams experienced interactive scenarios to test their skills in situations they may confront in the field, including bomb threats at a station, explosives hidden in a vehicle, abandoned luggage, and searching train equipment.

Open Enrollment Ends Tomorrow

The last day for employees to make 2011 benefits elections is Tuesday, Nov. 23. Employees who have not already done so should log in at AmtrakBenefits.com to make 2011 benefit elections, or call the Amtrak Benefits Service Center at 800-481-4887.

Thank You Photographers!

Thank you to the more than 80 employees who submitted photographs for the "Day in the Life" section of Amtrak's 40th anniversary commemorative book, which will be published next year.

With your help, we received more than 2,000 photographs for consideration that illustrate the hard work, dedication and industriousness of employees throughout the system.

Nov. 29, 2010

Amtrak Achieves Best Thanksgiving Performance Ever

Thank you to all of the employees who played a role in making last week potentially Amtrak's best Thanksgiving week on record.

While the numbers are not yet final, preliminary numbers show estimated increases in ridership of 3 percent and ticket revenue of 7 percent over last year, as more than 700,000 traveled during the Thanksgiving week. We will report on the final results once they become available.

Deitchman Named to Board of Operation Lifesaver

Vice President of Environmental Health and Safety Roy Deitchman has been named to the Operation Lifesaver, Inc. Board of Directors.

Operation Lifesaver, Inc. is a national non-profit safety education group dedicated to eliminating deaths and injuries at railroad crossings and along railroad rights-of-way. The group has programs in all 50 states, with trained and certified presenters (including about 35 Amtrak employees) who provide safety talks to community groups, school bus drivers, professional truck drivers and students to raise awareness of dangers on the railroad.

"Roy's expertise and passion for safety will be of great benefit to Operation Lifesaver's Board," said OLI Board Chair Reilly McCarren.

"Mr. Boardman's support for our increased involvement with OLI activities, including the recent OLI *Common Sense* trespass prevention campaign and the Pacific Northwest Safety Train, are helping to reinforce and extend the reach of our railroad safety message," said Deitchman.

Deitchman will fill the board position being vacated in January by Amtrak Senior Safety Coordinator Alvin Richardson, Sr., who is retiring.

Next Round of SAM Training Begins in January

As the Strategic Asset Management (SAM) Program winds down its second round of site visits across the system, the next critical wave of activity will be focused on preparation for end-user training of new systems generally associated with finance and logistics.

Training for the SAM Release 1a audience — this applies to employees whose jobs include budgeting, accounting, materials management and procurement — is slated to commence on Jan. 17, continuing through March 25. During December, the SAM Program will be conducting workshops for its SAP instructors and the SAM Subject Matter Experts/Power Users who will be supporting the classes during training.

Amtrak management has been working with managers of the SAM Program to select the roles, tasks and curriculum of employees who are involved in Release 1a. The SAM program plans to release the schedules for these courses within the next month.

Those employees are strongly encouraged to discuss their anticipated schedules in detail with their managers, as soon as possible, to make sure that their curriculum and roles in the SAM Program are understood and that their training schedules are clear and manageable.

Training will be offered at 10 off-site locations in or near Washington D.C., Boston, New York, Philadelphia, Wilmington, Del., Beech Grove, Ind., Sanford, Fla., Los Angeles, Oakland and Chicago. Transportation to and from training facilities will be provided by the SAM Program. Any appropriate expenses for travel and accommodation will be reimbursed by the SAM Program as well.

Training locations are posted on the SAM Program page on the intranet under "How We Work" → "SAM Program." Any questions about the program or SAM training may be e-mailed to sam@amtrak.com.

PSSA: Winners of the 2010 President's Service and Safety Award will be honored at a ceremony on Nov. 3 in Washington, D.C., at the Renaissance Downtown Hotel. Invited winners must RSVP by Oct. 20 to 202-906-2488.

High-Speed Rail: President and CEO Joe Boardman and Al Engel, incoming vice president of High-Speed Rail, were in Philadelphia last week to unveil the company's bold vision for next-generation high-speed rail service along the Northeast Corridor. Video of the event can be viewed on the new multimedia section of the corporate intranet. Click the link in the "Multimedia" tab at the bottom of the intranet homepage.

Chicago Union Station Upgrades to Benefit Passengers

Amtrak Chairman Tom Carper, Illinois Gov. Pat Quinn and Illinois Transportation Secretary Gary Hannig were at Chicago Union Station today to announce major renovation plans for the historic station that served more than 3 million passengers last year.

The \$40 million project will create approximately 100 jobs and nearly double the seating in Amtrak passenger lounges, increase the number of restrooms and provide air conditioning in the Great Hall. Project completion is scheduled for late 2012.

In concert with these passenger-related improvements, Amtrak is moving forward to create a redevelopment plan for the historic station's Headhouse Building. Jones Lang LaSalle (JLL) has been selected to conduct a feasibility study on the best plan for its use.

New Safety Metrics Replace Reportable Injury Ratio, Focus on Risk Reduction

In January, Amtrak announced that the FRA reportable injury ratio would no longer be used as a performance goal for managers, supervisors or departments as part of Safe-2-Safer, the ongoing process to improve Amtrak's safety performance and culture. Since then, employees from various departments and ranks have been working on a new set of safety metrics, which were announced recently in conjunction with the new fiscal year.

Safety performance goals will now be set according to the new measures, which are designed to track risk reduction, safety conditions and safe behaviors. Because the BAPP process is in its infancy at most work locations, metrics for observations and safety barriers removed will not be included in initial FY '11 monthly safety reports. Safety performance goals for managers and supervisors will not be set until data becomes available and benchmarks are set.

"Tracking injuries measures how often systems fail. Often times, the difference between an injury and a near miss is very small," explained Roy Deitchman, vice president, Environmental Health and Safety. "Our new metrics better indicate how safe a workplace actually is by measuring how well we are reducing the risks that make an injury possible in the first place."

The three new metrics used for safety performance at Amtrak are:

- 1. Number of quality behavior based observations per observer per month.* This metric is a measurement of the rollout of the Safe-2-Safer Behavioral Accident Prevention Process. The anonymous peer-to-peer observations are critical to helping Safe-2-Safer Steering Committees identify unsafe or at-risk behaviors in their work locations.
- 2. Number of safety barriers removed to reduce safety risks.* After barriers to safety are identified through the BAPP process, Steering Committees, Core Teams and management sponsors must work together to remove them. This metric tracks proactive efforts to make a workplace safer.
- 3. Percentage of injuries resulting in lost-time days.* This metric is aimed at tracking the severity of the injuries that occur, rather than just the total number of injuries that occur. It is measured as the percentage of total injuries that require an employee to miss work — whether it is one day or several months.

Deitchman also noted that Amtrak is still legally required to notify the FRA on all reportable injuries and illnesses and the FRA will continue to compare safety results by calculating the Reportable Injury Ratio, even though it is no longer used to set goals at Amtrak.

Marketing and Product Management:

Amtrak and LeapFrog, a leader in education innovation, have partnered to launch the LeapFrog Learning Journey Sweepstakes. The sweepstakes runs through Oct. 31. For more information, visit www.amtrak.com/leapfrog.

PSSA Correction: The *Special Employee Advisory* on Sept. 24 announcing this year's PSSA winners mistakenly omitted Howard G. Noll as a member of the Empire Safety Committee, which won Safety Committee of the Year. Additionally, the name of Sustained Excellence Award winner Ramesh Apanah was misspelled. Amtrak apologizes for the errors.

Company Information Protected by New Confidentiality Policy

Amtrak recently enacted a new Confidentiality Policy (P/I Number 9.1.0) that applies to all employees and all confidential company information. The policy aims to create a healthier Amtrak by better protecting corporate knowledge and assets.

Employees must protect confidential information and report any known or suspected incident where confidential information has been lost, improperly used or disclosed. Depending on the nature of the information, such an incident should be reported to the appropriate head of the Law, Amtrak Police or IT department.

Confidential information includes all information created or acquired by Amtrak that has not been made available to the general public, whether in electronic, paper or other form that an employee knows or has access to because of his or her job.

The full policy is posted in the Law section of the Policy and Instruction Manual on the intranet under "Library" → "Policies."

Annual Ridership and Revenue Hit All-Time Highs

Amtrak carried more passengers and generated more ticket revenue during the 2010 fiscal year than any other year in company history. Previous records were set in FY 2008.

"The resurgence in the popularity of rail travel, improved on-time performance and increasing difficulties associated with flying helped us draw in customers," said George Raed, chief, Market Research.

Amtrak finished the fiscal year with ticket revenue of \$1.7 billion, which was \$8.8 million more than in 2008. Ridership totaled 28,716,857 — just 450 more than in 2008. However, Raed noted that 2008 was a leap year, and that extra calendar day accounted for approximately 90,000 trips.

"The numbers are important, but it's what's behind them that tells the true story," wrote President and CEO Joe Boardman in a *Special Employee Advisory* issued earlier today. "It's the people — you, your co-workers and the passengers you serve — that make it happen. More and more people see passenger rail as the way to get to where they need to go, and when our front line employees put them first, they are the ones that help bring passengers back for another trip."

Free Flu Shot Vouchers Now Available; On-Site Clinics Also Scheduled Nationwide

In addition to hosting free flu shot clinics at Amtrak work locations across the system, the company is offering complimentary vouchers that allow employees to visit a local healthcare provider for a flu vaccination.

"We want every employee to have the opportunity to protect him or herself from the flu virus this year. So if you can't make it to an Amtrak on-site clinic, you can simply print the voucher to get a free vaccination," said Dr. Paul McCausland, corporate medical director.

Log on to <https://register.flushotsusa.com/Amtrak> to print the voucher and find a participating local healthcare provider. Employees will need to provide their full name, their employee ID number (omit any leading zeros) and contact information, including a personal or work e-mail address. A series of health-related questions must be answered to complete the registration process.

After completing the registration, the voucher will be sent via e-mail along with other directions. Please note that only current Amtrak employees may use the flu shot voucher. Call Mollen Services at 877-279-3588 for assistance with obtaining a voucher.

For a calendar of flu shot clinics being held at Amtrak locations, see the "What's New" section on the Health Services intranet page. Log on to the intranet and click "Employees" → "Human Resources-Health Services."

Operations Update: An agreement with the Canadian government related to border inspection fees clears the way for Amtrak to continue operating the second daily Amtrak *Cascades* roundtrip between Seattle and Vancouver that began last year in advance of the 2010 Winter Olympics.

Benefits Reminder: The open enrollment period for 2011 benefits elections will take place from Nov. 8-19. Elections can be made during that time at www.AmtrakBenefits.com. Employees will soon receive an enrollment packet with more details in the mail.

Remember to Submit Your Photos as Amtrak Documents "A Day in the Life"

At any hour of the day and night, someone, somewhere is helping keep the Amtrak system running. Employees are invited to capture our 24/7 operation in digital photographs now through Oct. 22 for a commemorative book that will be published next year honoring Amtrak's 40th anniversary. A chapter of the book will be devoted to "A Day in the Life" of our company.

Photos should feature employees doing what they do best in stations, shops, offices, aboard trains and at Engineering project sites. Photos should be no smaller than 300 dpi and must be received by Oct. 27. Digital photos and any questions should be directed to Ann Owens at 202-906-4404 or OwensA@amtrak.com.

Submissions must be accompanied by the photographer's name, phone number and e-mail address.

By submitting a photo, employees are indicating that Amtrak has permission to publish it. Employees must be able to secure photo releases from any individuals who are clearly identifiable in any photo they submit. All Amtrak and FRA safety and operating rules must be followed when taking photographs.

Notable Station Milestones Take Place This Week

Amtrak officials joined partners in the Northeast, South and Midwest to celebrate numerous station-related achievements.

Today in New York City, Amtrak took part in two events: a groundbreaking for the new Moynihan Station and an event honoring the 100th anniversary of Penn Station. In Florida, local, state and federal officials were on hand for the grand opening of the Sanford *Auto Train* terminal.

"These stations are great examples of what can be accomplished when local communities work with state and federal government to support passenger rail," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "Stations are not only an important element of the travel experience, but they also serve as a catalyst to economic growth and revitalization."

New York Gov. David Paterson, Sens. Charles Schumer and Kirsten Gillibrand, Congressman Jerrold Nadler, Transportation Secretary Ray LaHood and Mayor Michael Bloomberg participated in the Moynihan Station groundbreaking. The event included the signing of a final grant agreement that provides \$83 million in Recovery Act funds to New York for the project.

At New York Penn Station, a rare collection of photos, artifacts and other items commemorating the station's rich history, as well as Amtrak's role in the history of passenger rail, was on display today. Nadler and other officials from Amtrak, Long Island Rail Road and New Jersey Transit were on hand to kick-off the festivities. In addition, Lorraine Diehl, renowned author of "The Late, Great Pennsylvania Station," hosted a discussion about the station's most memorable moments over its 100 year existence.

The new Sanford *Auto Train* terminal is almost four times larger than its predecessor at approximately 10,000 square feet and can now accommodate 600 passengers. Amtrak Chairman Tom Carper helped christen the new facility, which will serve more than 244,000 *Auto Train* passengers annually. It was funded mainly by grants through the American Recovery and Reinvestment Act of 2008.

Additionally, local organizations in Mattoon, Ill., last week wrapped up a four-year project to improve the depot that serves six daily Amtrak trains. The \$3 million renovation was funded by federal transportation grants along with money raised by the Coles County Historical Society and grants from the city of Mattoon and the Illinois Department of Transportation. The station now serves all passengers better thanks to accessibility improvements made in accordance with the Americans with Disabilities Act.

Oct. 18, 2010

Notable Station Milestones Take Place This Week

Amtrak is hosting numerous station related events across the country this week. Company officials are joining partner organizations in the Northeast, South and Midwest to celebrate various achievements.

Marketing and Product Management:
Amtrak

PSSA Correction: The

Today in New York City, Amtrak is partnering with New Jersey Transit and Long Island Railroad to celebrate the 100th anniversary of Penn Station. In Florida, local, state and federal officials will be on hand for the grand opening celebration of the Sanford *Auto Train* terminal. And in Mattoon, Ill., local organizations have just wrapped up a four-year project to improve the depot that serves six daily Amtrak trains.

“These stations are great examples of what can be accomplished when the public and private sectors work together,” said WHO? “Train stations are a key cog in a great transportation network and they are proven to help grow local economies. As Amtrak employees, we should all be proud of our role in the success of these three stations.”

At New York Penn Station, a rare collection of photos, artifacts and other items commemorating the station’s rich history, as well as Amtrak’s role in the history of passenger rail, is on display. Lorraine Diehl, renowned author of “The Late, Great Pennsylvania Station,” also attended to host a discussion about the station’s most memorable moments over its 100 year existence.

The brand new Sanford *Auto Train* terminal is almost four times larger than its predecessor at approximately 10,000 square feet and can now accommodate 600 passengers. Amtrak Chairman Tom Carper helped christen the new facility, which will serve more than 244,000 *Auto Train* passengers annually. It was funded mainly by grants through the American Recovery and Reinvestment Act of 2008.

The \$3 million renovation of the Mattoon station was funded by federal transportation funds along with money raised by the Coles County Historical Society and grants from the City of Mattoon and the Illinois Department of Transportation. A new clay tile roof, passenger elevator and other upgrades were made to the three-story, 1918 structure. It now serves all passengers better thanks to accessibility improvements made in accordance with the Americans with Disabilities Act.

Operations Update: Track work being performed by Union Pacific Railroad will affect *San Joaquin* and *Capitol Corridor* service through Oakland, Calif., on Oct. 25-29 and Nov. 1-5.

Benefits Reminder: During the upcoming benefits open enrollment period from Nov. 8-19, employees will have new, “green” ways to ask questions about their coverage. Simply log on to www.AmtrakBenefits.com to chat in real-time with an Amtrak Benefits Service Center representative, or send a question via e-mail.

Help Keep Employees and Passengers Healthier this Flu Season

Amtrak has again purchased various hand sanitizers for use at stations and aboard trains to help fight the spread of flu viruses and other germs. Employees are encouraged to order these products through the AAMPS system, rather than purchase sanitizer from an outside source.

Alcohol-based hand sanitizers, which are recommended for station and facility use, are available in one-liter (part number 47-123-00079) and two-liter (part number 47-123-00078) sizes. For use aboard trains, non-alcohol based sanitizers must be used. These are available in one-liter containers (part number 47-123-00085) or as hand sanitizing wipes (part number 47-123-00076).

Employees are also reminded that free flu shots are being offered around the system. Free vouchers for a flu shot from participating healthcare providers are also available. For more information, visit the “What’s New” section on the Health Services intranet page. Log on to the intranet and click “Employees” → “Human Resources-Health Services.”

FY '10 Performance Earns International Media Attention

After announcing all-time annual highs for both ridership and ticket revenue during FY '10, news organizations throughout the world took note. The widespread media coverage is helping to further promote Amtrak as the travel mode of choice for millions of Americans.

“We expect this attention to attract more ticket sales as people read about the popularity of our service,” said Joe McHugh, vice president, Government Affairs and Corporate Communications.

Following are excerpts from news stories that have been published over the last two weeks. Click the links for the full story or visit the outlet’s website and search “Amtrak Ridership”:

“Amtrak has benefited from the ‘remarkable lifestyle shift’ caused by smartphones, laptops and iPads that let travelers work and communicate almost everywhere, says Joseph Schwieterman, a transportation professor at DePaul University in Chicago. ‘It’s kind of a have-iPhone-will-travel kind of thing.’”

[USA Today](http://www.usatoday.com) (www.usatoday.com)
Oct. 19, 2010

“North Carolina’s Amtrak ridership grew 15 percent in fiscal year 2010 – more than double the national Amtrak ridership growth rate during the same period.”

[Triangle Business Journal](http://www.bizjournals.com/triangle) (www.bizjournals.com/triangle)
Oct. 15, 2010

“Amtrak ridership and service have improved over the past several years with the help of increased U.S. government subsidies and political support in Washington for maintaining rail service outside the heavily traveled Northeast.”

[Reuters](http://www.reuters.com) U.S. Edition (www.reuters.com)
Oct. 11, 2010

“More than 572,000 passengers took Amtrak between St. Louis and Chicago in the just-completed federal fiscal year, a 13.1 percent increase that made the route one of the fastest growing in the country.”

[The State Journal-Register](http://www.sj-r.com) (www.sj-r.com)
Oct. 12, 2010

“AMTRAK, America’s government-owned passenger rail company, has had a good recession. But there’s a lot of good news in the railroad’s numbers, and, more importantly, some hints about where to go from here.”

[The Economist](http://www.economist.com) (www.economist.com)
Oct. 16, 2010

Operation Changes: On select dates through Nov. 9, *Lincoln Service* and *Texas Eagle* trains will operate according to an adjusted schedule between St. Louis and Chicago due to Union Pacific track maintenance. Alternate transportation will be provided for some trains on affected dates.

Finance: Employees are reminded that all unpaid invoices, purchase orders and eTrax requests must be submitted to Accounts Payable as soon as possible so they can be recorded before the close of the fiscal year. To ensure entry into AAMPS, invoices must be delivered to Accounts Payable no later than Sept. 15.

Think It's Fraud? Report It.

Just as Amtrak employees are an important line of defense against crime and potential terrorism, you are also an important part of the company's effort to fight fraud.

Amtrak spends millions of dollars each year on supply and service contracts with outside vendors. These contracts are susceptible to fraud and Amtrak needs employees to report any suspicious activity.

Some common schemes include: material and time overcharging, where the contractor bills the company for more material or time than is actually used to complete the job; bid rigging and collusion, which involves competing firms cooperating on a bid to ensure award and increase profits; and substituting lower-cost products for those included in the contract to increase profits.

Any suspected fraud should be reported to the Amtrak Office of Inspector General at 800-468-5469 or www.AmtrakOIG.gov. Reports may be made anonymously and will be kept confidential.

President Obama Announces Investment Plan for Rail

President Obama announced on Sept. 6 a plan to expand and renew the nation's roads, railways and runways as part of his administration's effort to support economic recovery and ensure long-term sustainable growth. Though specific details are not yet available, the announcement stated that investments would go toward overhauling Amtrak's aging equipment fleet, help construct and maintain 4,000 miles of track, build on previous ARRA investments in high-speed rail development and expand public transit systems.

In response to the announcement, Amtrak issued a statement supporting the president's plan. "President Obama's infrastructure investment plan ... is a smart move with major benefits for increasing personal mobility, jump-starting job creation and improving the environment. [He] understands passenger rail is a key component of America's transportation system and connects the nation in ways no other mode can. We applaud his vision for the future and his commitment to make the needed investments now to advance and bring to reality the next generation of passenger rail."

The president plans to work with Congress to enact an investment that would be front-loaded in the first year and would augment those investments already made through the American Recovery and Reinvestment Act of 2009.

Amtrak to Document "A Day in the Life" in October

As part of its preparations for celebrating its 40th anniversary next year, Amtrak is asking employees to participate in its effort to document a day in the life of the company by taking photos of their workplace and co-workers from Oct. 15-22. Photos will then be submitted to Corporate Communications to be used in a pictorial section of Amtrak's 40th anniversary commemorative book, which will be published next year.

"We want to capture this moment in the company's history by documenting all the sights, places and people who make this railroad function every day," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "The photos will be used in a visual timeline that shows everything we do during a 24-hour period to operate our service."

Employees in offices, contact centers, aboard trains, in stations and mechanical shops and at engineering project sites are asked to take photographs at various points during the day. The goal is to show the complexity and around-the-clock nature of Amtrak operations.

A *Special Employee Advisory* will be issued in the coming weeks with full details on how to submit a photo and other requirements. Additionally, more information about other initiatives planned for the company's 40th anniversary will be covered in the October issue of *Amtrak Ink*.

Operation Changes: From Sept. 19-21, southbound *Carolinian* Train 79 will operate as a combined train with *Palmetto* Train 89 at all stations between New York and Rocky Mount, N.C. Upon arrival in Rocky Mount, the trains will be separated and Train 79 will operate to Charlotte according to the normal schedule.

Finance: Employees are reminded that all unpaid invoices, purchase orders and eTrax requests must be submitted to Accounts Payable as soon as possible so they can be recorded before the close of the fiscal year. To ensure entry into AAMPS, invoices must be delivered to Accounts Payable no later than Sept. 15.

Payroll: All employees can now view their paycheck online, days in advance of it being issued. Log on to the Employee Information Portal, and go to “Benefits and Payment” → “Salary Statement.”

Amtrak Joins Unions and FRA in “Close Call Reporting”

Amtrak announced today its participation in a risk-reduction pilot program that allows employees to confidentially report “close call” events that could have resulted in an accident or injury. Close Call Reporting is sponsored by the Federal Railroad Administration, and Amtrak is partnering with the Brotherhood of Locomotive Engineers and Trainmen (BLET) and the United Transportation Union (UTU) Conductors and Yardmasters to launch the program at several rail yards in the Northeast, Midwest and West Coast.

“We want to take safety to the next level by identifying and then mitigating or removing risk before a serious incident occurs,” said President and CEO Joseph Boardman.

By reporting close calls anonymously and without the potential for disciplinary action, employees and managers will be able to identify potential risks and take action to remove any barriers to safety that might exist. To ensure the confidentiality of any close call reports, employees will report events to NASA, which has years of experience with risk-reduction, for processing. Then, a Peer Review Team with representatives from Amtrak, FRA, BLET and UTU will analyze the report and determine ways to reduce the risk of future incidents.

Examples of a close call event include leaving a piece of equipment unsecured to operating a train beyond its track authority. Incidents that do result in an injury or accident must still be reported through the traditional reporting structure.

“Close Call Reporting aligns perfectly with our Safe-2-Safer approach,” said Chief Operating Officer William Crosbie. “It focuses on reducing risks through better relationships between employees and managers, and collaboration between management and unions.”

As of press time, nearly every unit within BLET and UTU had signed on to Close Call Reporting. “We are continuing to work in partnership with UTU Zone 1 leadership so they are comfortable and confident about joining the program,” said Crosbie.

Ridership Remains Strong; Record Year Still Possible

Ridership and ticket revenue numbers for August are in, and with only one month remaining in the fiscal year, Amtrak is still in position to possibly set an all-time annual ridership record. The company carried 2.54 million passengers in August, generating \$152 million in ticket revenue. Year-to-date totals for ridership and revenue are at 26.4 million and \$1.6 billion, respectively. Amtrak will need to carry approximately 2.3 million riders in September to set a record.

“If we all do our best to provide service that results in a repeat trip or prompts just one or two more ticket sales over the coming weeks, it could make the difference. This is an opportunity for us to capitalize on the collaboration and teamwork we’ve been working so hard to improve throughout the company,” said Emmett Fremaux, vice president, Marketing and Product Development.

Operation Changes: Due to track work being performed by the San Diego Northern Railroad, *Pacific Surfliner* trains will be cancelled at most station stops from San Diego to San Juan Capistrano or Irvine on September 24-26. Alternate motorcoach service will be provided at most station stops where train service has been cancelled.

Marketing and Product Development: Passengers will once again have the chance to view fall foliage aboard the “Great Dome” car. The car will operate as part of the *Adirondack* from Sept. 23 through Oct. 24, and as part of the *Cardinal* from Oct. 30 through Nov. 12.

Did You Know?

Sept. 15 marked the 30th anniversary of Caltrans-funded Amtrak Thruway Bus service connections. The original bus connections operated from Sacramento to Stockton, Calif., in connection with *San Joaquin* trains.

California and Amtrak now offer more than 250 daily Thruway departures along 19 routes that serve more than 120 offline cities and 42 train stations.

Flu Vaccinations Offered to All Employees

In its effort to become healthier, Amtrak is offering flu vaccinations to all employees at no charge for the second straight year. On-site immunization clinics will be set up at approximately 50 major work locations throughout the system beginning in October, or employees may obtain a voucher for a free flu shot at a local healthcare provider.

“As many as one in five Americans get the flu every year, and most don’t realize it is not just a bad cold, but a serious respiratory disease,” said Corporate Medical Director Paul McCausland. “I encourage all of us to get vaccinated for our own health and the health of our families, friends and passengers.”

To improve upon last year and ensure there are no vaccine shortages, Amtrak has contracted with a new vendor this year to administer the flu vaccination program. The vaccine provided this year protects individuals from two “seasonal” flu virus strains as well as H1N1.

“More than 4,500 employees took advantage of this program last year, and we hope many more will get vaccinated this year,” said Roy Deitchman, vice president, Environmental Health and Safety.

Dates and times of on-site clinics will be posted in work locations over the coming weeks. Information, along with directions on how to obtain a voucher, will be posted on the intranet under “Safety” → “Health” within the next two weeks.

Only Amtrak employees are eligible for the on-site immunization clinics and vouchers. Contractors and dependents are not eligible. Employees who have already paid for a flu vaccination may request reimbursement by mailing a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
60 Mass Ave. NE, 3W-104
Washington, D.C. 20002

Reimbursement claims must be submitted no later than Oct. 1. The vaccination cost, up to \$30, will be reimbursed tax-free in the employee’s paycheck. Please allow three to four weeks for processing.

Amtrak to Submit Five Route Performance Improvement Plans This Week

Performance Improvement Plans will be submitted to Congress on Sept. 30 for *California Zephyr*, *Cardinal*, *Capitol Limited*, *Sunset Limited* and *Texas Eagle* service, as required in the Passenger Rail Investment and Improvement Act of 2008.

Operation Changes: On October 1-4, numerous schedule changes and train cancellations are required for *Keystone Service* and *Pennsylvanian* trains operating between Philadelphia and Harrisburg due to bridge upgrade projects.

High-Speed Rail: Industry expert Al Engel has been appointed to the new executive post of vice president, High-Speed Rail, effective Oct. 18. He will be responsible for advancing Amtrak's position as the preferred and premier provider of high-speed train service in America.

PSSA Winners Announced: Winners of the 2010 President's Service and Safety Awards were announced in a *Special Employee Advisory* on Sept. 24. To see the full list of winners, log on to the intranet and click "News" → "ATW/Advisories."

Five-Year Financial Plan to be Submitted to Congress

Amtrak is submitting to Capitol Hill this week its financial plan for Fiscal Years 2011-2015. However, because Congress has not yet appropriated funding for Fiscal Year 2011, the plan will be updated once final budget amounts are set. Until that time, Amtrak will operate under a Continuing Resolution, which is a legislative measure enacted by Congress to provide funding until regular appropriations are enacted.

The Five-Year Financial Plan will be posted on Sept. 30 on the intranet under "How We Work" → "Finance."

Since its creation in 2006, the Marketing and Product Development department has dedicated teams to make route-specific improvements in customer service and product quality. In 2008, the department launched its first formal Route Performance Improvement (RPI) program in collaboration with several other departments. Interdepartmental teams reviewed every aspect of six long-distance and corridor routes, then formulated an improvement plan to improve customer satisfaction, increase ridership and reduce operating costs. RPI programs were conducted on six additional routes in 2009.

"PRIIA basically requires that we continue our RPI efforts to maximize the value of long-distance service for passengers and for the company," said Brian Rosenwald, chief, Product Development. "If we can reach agreements with the host railroads, I'm confident our plans will generate the improvements that we want, and that Congress has requested."

Primary recommendations for the *California Zephyr* include customer service training and recognition programs for employees, and new equipment inspection and follow-up procedures. Recommendations in the *Cardinal* improvement plan are to implement daily service between New York and Chicago as well as improving food service, baggage handling and marketing strategy.

The key proposal for *Capitol Limited* service is the introduction of single-seat through-service at Pittsburgh, allowing passengers from Chicago to connect directly with cities along the *Pennsylvanian* route, including Philadelphia and New York. In addition to merging *Sunset Limited* and *Texas Eagle* into single daily service between Chicago and Los Angeles, the plan for these routes includes daily connecting service from San Antonio to New Orleans.

Each Performance Improvement Plan will be available on Amtrak.com on Sept. 30 under "Inside Amtrak" → "Reports and Documents," and on the Amtrak intranet.

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2010 must also submit a new form by Feb. 15.

Human Resources: Leave requests for calendar year 2010 can now be submitted. Employees should enter any type of leave in the SAP system as it is taken.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will decrease from 55 cents to 50 cents, effective for mileage expenses incurred on or after Jan. 1.

Amtrak Set to Provide Update on Seattle Maintenance Facility Upgrades

On Jan. 8, Amtrak, along with the Washington Department of Transportation, Oregon Department of Transportation, Sound Transit, Talgo and BNSF Railway, will host a press conference in Seattle to announce plans to upgrade the facility there that supports operations and maintenance agreements in the Pacific Northwest.

A contract award and beginning of the first phase of construction is expected to take place later this spring. The upgraded backshops will benefit from increased capacity and efficiency, along with dramatically improved working conditions for the Mechanical employees who perform inspections, testing and maintenance on rolling stock. A new building for parts storage, administrative offices and Transportation crew facilities are also planned.

The project is expected to create 150 construction jobs on site over the next six years.

Employee Vigilance Remains an Important Part of Security Effectiveness

Following the recent attempted terrorist attack aboard a Northwest Airlines flight, employees are reminded to remain vigilant in their duties and attentive to their surroundings during daily work activities.

While there is no specific threat to Amtrak identified at this time, Amtrak Police and Security personnel assigned to the FBI's National and Regional Joint Terrorism Task Force remain informed regarding any potential threats and other security issues. Amtrak Police and Security personnel will also use the intelligence gathered regarding the Northwest Airlines incident to inform security activities in stations and on trains as needed.

In addition to the behind-the-scenes and front-line security measures Amtrak has in place to improve passenger rail security, employee vigilance is important resource for Amtrak Police and other law enforcement and counterterrorism personnel.

Any suspicious persons or activities should be reported immediately to the Amtrak Police and Security Department at 1-800-331-0008, or dial 911.

Joe Boardman Discusses 2010 Outlook with National Media

President and CEO Joe Boardman today hosted a conference call with members of the media to highlight projects and initiatives that will help Amtrak reach its goals established in the Strategic Guidance and Five Year Financial Plan that were unveiled late last fall.

Operational Changes: Effective Jan. 9-15 and Jan. 24, certain *Pacific Surfliner* trains will be cancelled due to track work being performed by Union Pacific Railroad. Other *Pacific Surfliners* will not serve all stations. Motorcoach service will be provided to and from most major stations where train service has been cancelled.

Media: The current issue of Arrive magazine features a cover story written by Vice President Joe Biden regarding the importance of trains in America. View the article online at <http://whistlestop.amtrak.com>.

Industry Event: Trains magazine and Amtrak are co-sponsoring a town hall meeting in Chicago on March 6. Chairman Tom Carper and President and CEO Joe Boardman will discuss photo policies, fleet plans and the future of long-distance trains with registered attendees. For details, visit www.trains.com or see the February issue of Trains magazine.

Retirement Benefits: The Dec. 28 issue of *Amtrak This Week* incorrectly stated the maximum 2010 withholding amounts for Railroad Retirement. The maximum withholding for Tier I is \$6,621.60 and \$3,088.80 for Tier II.

“Amtrak enters 2010 with a strong sense of optimism, enthusiasm and purpose,” said Boardman. “We have an aggressive game plan to modernize, renew, and grow America’s passenger railroad.”

These major projects will benefit passengers, increase service, and rebuild infrastructure to help position the company as the provider of choice for commuter, intercity passenger rail and high-speed rail service. Boardman added that Amtrak is partnering with 25 states that applied for funding from the \$8 billion federal grant for rail development.

Other projects highlighted included strengthening security at stations and on board trains; installing Positive Train Control; increasing operating speed on the Michigan Line to 105 mph; completing interior upgrades and WiFi deployment on *Acela Express*; stimulus-funded projects; and expanding corridor services with state partners.

Boardman will make a speech tomorrow about the state of the railroad, its achievements and its future.

FEMA Veteran Joins Operations Department

Susan Reinertson joins Amtrak today as chief operations administrator, reporting to Chief Operating Officer William Crosbie. She will lead and coordinate the department’s high-level financial and management activities as well as the implementation of the company’s Continuity of Operations Plan.

Reinertson previously was a consultant to private organizations and the government on homeland security and emergency management. She is a veteran of the Federal Emergency Management Agency, having served as the regional administrator for the Pacific Northwest. She has also served in various roles within state and local emergency management departments and the Homeland Security Institute. Reinertson earned a master’s degree in public administration from the University of North Dakota and a master’s degree in security studies from the Naval Postgraduate School.

Operations Change: New schedules for many trains operating between Boston/Springfield, Mass., and New York and between New York and Washington, D.C., are now in effect with certain trains departing earlier. Current schedules can be found at Amtrak.com.

Transportation: Handheld electronic credit card devices are now being deployed for on-board use. Deployment begins in Zone 2 from Jan. 19 to Feb. 16, with other zones to follow. All conductors and assistant conductors working Zone 2 trains are required to attend a mandatory one-hour training program. Class schedules are posted in Crew Bases.

Haiti Relief Information

Many employees within the Amtrak family are of Haitian descent and have loved ones directly impacted by devastating earthquake in Port-au-Prince last week. Managers are working to provide support where possible and employees are reminded that counseling services and other support resources are available through the Employee Assistance Program. For a list of local EAP Counselors, go to "Employees" → "Employee Assistance Program" on the intranet, or call 202-906-3447.

Many employees have inquired about donating to the relief effort there. Anyone wishing to make a donation is encouraged to do so through one of the following reputable organizations actively providing aid to residents of Haiti: American Red Cross (www.redcross.org), Clinton Bush Haiti Fund (www.clintonbushhaitifund.org) and UNICEF (www.unicefusa.org).

Niantic River Bridge Replacement Set to Begin in April

Amtrak awarded the contract for replacement of the 102-year-old Niantic River Bridge last week, setting the stage for the three-year construction process to begin in April. Upon completion, the new bridge in East Lyme, Conn., should improve reliability of the 40 passenger trains that cross the bridge daily.

"This is a major piece of our capital improvement program that will not only improve our train operations, but will also benefit passengers and local marine traffic while creating jobs and boosting the local economy," said Chief Operating Officer William Crosbie.

The \$104.7 million contract is being funded by \$47.1 million from Amtrak's annual capital budget, with the remaining \$57.6 million provided through the American Recovery and Reinvestment Act. Crosbie said the existing bridge will remain in operation until the new bridge is complete and the Niantic River will remain open to marine vessels during construction.

Cianbro/Middlesex VII of Littleton, Mass., the same construction company that replaced the Thames River Bridge lift span, will construct the new double-track bridge just south of its present alignment. Additional elements of the project include expanding the navigation channel beneath the bridge for improved marine access, realigning the east and west track approaches to the bridge and relocating the Niantic Bay Overlook, including beach restoration.

Labor Relations Vice President Retires

Joe Bress, who served as Vice President of Labor Relations for 12 years, announced his retirement from Amtrak on Jan. 14. Having joined Amtrak in May of 1996 as an assistant vice president, Bress led labor relations activities during significant periods in the company's labor/management history.

"Joe played an important role in the company's chronicles and we thank him for his contributions to Amtrak," said President and CEO Joe Boardman. "In the interim, pending a final decision on the position, I have asked Assistant Vice President Charlie Woodcock to lead the labor relations function."

Engineering: The Production Switch & Rail Gang, with the assistance of New York Division Engineering forces, will replace 3,800 feet of track in the south tube of the North River Tunnel over the next nine weekends.

Marketing and Product Development:

A special round-trip weekend fare of \$85 is available for sale on *Adirondack* service through April 19, for travel through April 26. Ridership on the state-supported route in the first quarter of FY '10 increased more than 10 percent compared to last year.

Employees Aid Haitian Evacuees

Amtrak employees in Orlando, Fla., have been assisting the American Red Cross and the Florida Department of Children and Families to transport evacuees from Haiti following the 7.0-magnitude earthquake there two weeks ago.

Thousands of evacuees who are U.S. citizens or have relatives in the U.S. are being flown into Orlando-Sanford International Airport. The state of Florida has purchased tickets to transport many of these people to South Florida on Amtrak trains.

Orlando station employees have been assisting evacuees with their travel and are providing additional childcare products to families, many of whom were without diapers, bottles and water.

"It is an honor to help those who have been through so much and it gives me great joy to have the opportunity to help," said Ticket Clerk Sharon Crane.

President Obama to Nominate New Board Member

President Obama last week announced his intent to nominate Jeffrey R. Moreland to the Amtrak board of directors. He is the third board nominee made by the president, joining Bert DiClemente and Anthony Coscia, who were announced as nominees in October. All three must still be approved by the U.S. Senate before joining the board of directors.

Before retiring in 2007, Moreland was executive vice president of public affairs at BNSF Railway, where he was responsible for federal and state government relations, corporate communications and economic regulatory policy. Prior to that post, he held several other executive and senior level positions with the company.

Moreland joined the railroad industry in 1978 as an assistant general attorney for the Santa Fe Railway after serving eight years at the U.S. Securities and Exchange Commission. He earned a bachelor's degree from Georgetown University, a law degree from The Catholic University of America and a master's degree in business administration from the University of Chicago.

Remote Network Access Changes Approaching

Beginning April 5, employees who access the Amtrak network using Citrix or the Virtual Private Network (VPN) will need a new authentication "token" to log in. The token is a small piece of hardware resembling a USB flash memory drive that displays a unique six-digit identification number that changes every 60 seconds. The new system greatly increases network security.

When accessing the Amtrak network, employees will need to provide their user ID, a PIN number chosen by the employee and the number displayed on their authentication token. Passwords will no longer be used to log in to Citrix or the VPN.

Any employee who accesses the company network remotely via Citrix or VPN should contact Amtrak Information Security at infosec@amtrak.com to be assigned an authentication token. User instructions will be provided at that time. Employees who already have an authentication token must begin to use it immediately in order to ensure continued network access.

For questions or technical help using an authentication token, call the Amtrak Help Desk at 800-772-HELP.

Annual Funding Request Sent to Capitol Hill; Fleet Plan to be Announced This Week

Amtrak's Grant and Legislative Request for the 2011 fiscal year was submitted to Congress on Feb. 1, along with a detailed budget and business plan for the year. The company will also publicly announce its comprehensive fleet plan later this week.

The funding request includes \$592 million for operating expenses, \$1.299 billion for capital improvements and \$305 million for debt service, totaling \$2.196 billion.

These figures are in line with what is authorized by Congress in the Passenger Rail Investment and Improvement Act of 2008. President Obama's proposed budget released yesterday recommends \$1.615 billion.

Approximately \$281 million of the capital funding would be spent on making various improvements needed to comply with the Americans with Disabilities Act.

A key portion of the funding request for debt service would be used to buy out two existing equipment leases. By repurchasing the 14 locomotives and 14 cars currently being leased, the company will realize a net savings of \$14.4 million in payments.

The fleet plan announcement this week will outline total costs and annual spending to purchase single- and bi-level passenger cars, locomotives and high-speed equipment. The existing fleet will be entirely replaced by 2040.

"The age and variety of the fleet [are] matters of serious concern. Amtrak regards the replacement of its existing fleet as a top-priority goal," said President and CEO Joe Boardman. "We are confident that the plan represents an effective proposal for both the replacement of aging equipment and the pursuit of larger policy objectives that will develop and improve the manufacturing base for rail equipment."

The full Grant and Legislative Request is posted on Amtrak.com under "Inside Amtrak" → "Reports and Documents." The fleet plan will be posted following its announcement.

Operations Update: All station operations in Wilmington, Del., moved to an adjacent temporary station complex on Feb. 1 to accommodate interior renovations to Wilmington Station. The work is expected to be complete in December. Parking will not be affected.

Safety: Injury ratios will no longer be used as safety performance goals for managers and supervisors. President and CEO Joe Boardman announced the decision in a Jan. 29 Special Employee Advisory, citing the company's effort to shift focus to activities that reduce risks as part of Safe-2-Safer.

Engineering: Construction of new platforms at the Baltimore-Washington International Thurgood Marshall Airport station continues and is expected to be complete this summer. A new walkway and elevators are scheduled to be installed by December. The \$9.1 million project is funded by the Maryland Transit Administration as part of the MARC Joint Benefit Capital Program.

Police and Security: Amtrak Police and Security will be supporting counterterrorism efforts during the 2010 Winter Olympic Games in Vancouver beginning this month. Explosive detecting K-9 teams, uniformed and plain-clothed officers will provide coverage from Seattle to Bellingham, Wash. The department will so coordinate efforts with federal, state, local and railroad law enforcement in the U.S. and Canada.

Government Affairs: Amtrak officials were in San Antonio, Texas, last week to host the fifth Civic Conversation as part of the Great American Stations program. Local, state and federal officials representing 22 communities attended to discuss best practices for preserving, restoring and upgrading train stations. Visit www.GreatAmericanStations.com for details.

Engineering: Components of the TLS Blue Team, supported by Mid-Atlantic Division forces, are working to replace 53,000 feet of rail on Track 3 of the Northeast Corridor between Bowie and Grove Interlockings in Maryland. This work will be completed over the next seven weeks, weather permitting.

Information Technology: Non-agreement employees and contractors are reminded they must complete the online Information Security Awareness Training course. Log on to www.elementk.com/login.asp/ to access the course. Enter your eight-digit SAP number followed by "amtrak" as the user name (ex. 12345678amtrak) and "amtrak1" as the password.

Mid-Atlantic and Northeast Division Crews Battle Massive Storm

Transportation, Police and Security, Engineering and Mechanical crews in the Mid-Atlantic and Northeast Divisions are still combating the remnants of a winter storm that dropped between 24 and 30 inches of snow throughout much of the East Coast on Saturday. The storm caused some service cancellations over the weekend, but schedules are returning to normal.

"In typical Amtrak fashion, you have all demonstrated the commitment and perseverance to minimize the effects of a monstrous storm," said Chief Operating Officer William Crosbie. "Your work is appreciated by every one of your fellow employees and by the passengers who are able to travel when flying or driving would be impossible."

Forecasters are predicting another five to 10 inches of snow in the region on Tuesday night. "We can't let up," said Crosbie. "We must continue working safely to push through and I know we will."

Congressional Hearing on Stimulus Projects Slated for Wednesday

Amtrak executives are scheduled to testify before the House Transportation and Infrastructure Committee on Feb. 10 to provide a one-year progress report on the company's stimulus-funded projects.

In 2009, Amtrak received approximately \$1.3 billion from the U.S. Department of Transportation for capital improvement projects as part of the American Recovery and Reinvestment Act. Those funds are being used to return to service nearly 100 pieces of rolling stock, renovate or repair 270 stations, make significant security and life safety improvements, and replace or repair eight bridges. Other projects include 38 new or improved Amtrak facilities, increasing station accessibility through the Mobility First Program, and numerous track maintenance projects among others.

To date, stimulus-funded projects from this grant have created more than 600 Amtrak jobs and 200 jobs through suppliers.

The hearing, which begins at 10 a.m. eastern time can be viewed live online at <http://transportation.house.gov>. Schedules may change due to winter storms in the Washington, D.C., area.

Amtrak to Reimburse Employees for H1N1 Flu Vaccinations

In support of its commitment to promote and protect the health of its employees, Amtrak has announced that it will reimburse employees who have paid for an H1N1 flu vaccination.

"In addition to reimbursement of seasonal flu shots last fall, Mr. Boardman has identified funds to cover the H1N1 vaccination costs for our employees. We ask people who have not already received a vaccination to make it a priority to reduce their health risk of contracting H1N1 flu," said Roy Deitchman, vice president, Environmental Health and Safety.

The Centers for Disease Control is now encouraging everyone to get vaccinated against H1N1 and lists this as the first and most important step in protecting against the flu.

Amtrak employees who receive(d) an H1N1 vaccination between Oct. 1, 2009, and March 15, 2010, are eligible for reimbursement up to \$35. Employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to:

Amtrak Environmental Health and Safety
60 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

Receipts must be submitted by March 30. The vaccination cost, up to \$35, will be reimbursed tax-free in the employee's paycheck. Payroll processing may take up to four weeks. Reimbursements will be provided for H1N1 vaccinations for current Amtrak employees only.

Marketing and Product Development:

Responding to continued passenger feedback, china, glassware, and linens were restored to the *Coast Starlight* dining car on Feb. 9. This enhanced dining service will put the *Coast Starlight* on par with the *Empire Builder* and *Auto Train* as premium services.

Marketing and Product Development:

A new culturally-focused Web site, www.MyBlackJourney.com, was launched last week in conjunction with Black History Month. The site serves as a comprehensive resource to connect users to information about destinations rich with African American heritage.

Human Resources: To obtain information about benefits, employees can call the Amtrak Benefits Service Center at 800-481-4887 or log onto www.AmtrakBenefits.com. This Web site contains benefit plan handbooks, forms and other useful information.

Government Affairs: Amtrak officials were scheduled to testify last week before the House Transportation and Infrastructure Committee regarding stimulus projects, however, the hearing was postponed due to winter storms in the Mid-Atlantic. A new date has not yet been scheduled.

Safety: Last week Amtrak launched the “Common Sense” rail safety campaign with Operation Lifesaver, freight railroads and state transportation agencies to reduce train-related pedestrian injuries in California. The state had the highest number of pedestrian-train fatalities in the nation last year. Visit www.commonsenseuseit.com for more information.

Interdepartmental Teamwork on Display During East Coast Snow Storms

In battling a second major snow storm in five days last week, operating employees in the Mid-Atlantic and Northeast — with support from other business departments — were able to successfully mitigate the conditions that grounded thousands of flights and shut down roads to keep trains running and get passengers to their destination.

“Two major snow storms back-to-back creates huge problems for any business, especially a transportation company,” said Chief Operating Officer William Crosbie. “But around-the-clock effort from thousands of Amtrak employees kept the railroad open, which speaks to our collective skill and ability.”

Engineering employees were out in the elements to keep switches and interlockings from freezing up or becoming snow-packed, while removing fallen trees from tracks and catenary wires. Mechanical crews battled equipment complications that arise from running in snow and freezing temperatures. Transportation crews worked to keep passengers safe, comfortable and informed and System Operations managed scheduling and equipment availability issues. Amtrak Police and Security managed large crowds to keep everyone safe.

Outside of operating departments, reservation sales agents worked tirelessly to alert passengers of service changes while e-Commerce and Corporate Communications kept the public informed via Amtrak.com and the media.

“There’s no way to recognize the impact of every individual’s contribution, but I hope we will all reflect on the magnitude of what we accomplished as a team over the last week,” said Crosbie.

State Partnership Expands with New Shore Line East Roundtrip

Amtrak officials joined representatives from the Connecticut Department of Transportation this morning to kick-off a second daily Shore Line East roundtrip to New London, Conn. Additional frequencies are planned to begin later this year.

The service, which is operated by Amtrak and runs on the Northeast Corridor, will further relieve traffic congestion along I-95 while also improving air quality and reducing energy consumption. Passengers will also benefit from track improvement projects that are scheduled to be completed this year.

“This is further evidence of our strong relationship with Connecticut and we’re looking forward to building on it over the next year,” said Vice President of Government Affairs and Corporate Communications Joe McHugh.

Human Resources: Adding new dependents to your benefits coverage due to a family status change (marriage, new baby, etc.) must be done through the Amtrak Benefits Service Center within 31 days of the event at www.AmtrakBenefits.com or 800-481-4887. Supporting documentation such as a marriage license or birth certificate is required.

Chairman Carper to Testify Before Congress on Stimulus Projects

Board Chairman Tom Carper will testify at the House Transportation and Infrastructure Committee hearing on stimulus projects on Feb. 23. The hearing, originally scheduled for Feb. 10, will be broadcast online at <http://transportation.house.gov> beginning at 10 a.m. Eastern Standard Time.

In 2009, Amtrak received approximately \$1.3 billion for capital improvement projects as part of the American Recovery and Reinvestment Act. Those funds are being used to return to service nearly 100 pieces of rolling stock, renovate or repair 270 stations, make significant security and life safety improvements, and replace or repair eight bridges, along with dozens of other projects. To date, stimulus-funded projects from this grant have created more than 600 Amtrak jobs and 200 jobs through suppliers.

Chairman Carper's testimony will be posted on Amtrak.com under "Inside Amtrak" → "Government Affairs."

New National Train Day Web Site Launches This Week

In commemoration of the 141st anniversary of the first transcontinental railroad being completed, Amtrak will host the third annual National Train Day on May 8 with events across the country celebrating America's love of trains. Marketing and Product Development is scheduled to launch a Web site tomorrow afternoon as a comprehensive resource for the public at www.NationalTrainDay.com. Another site exclusively for employees is set to launch in mid-March.

"National Train Day celebrates the train's impact on our country and provides an opportunity for Americans to further understand the influence rail has on the future of transportation in America," said Emmett Fremaux, vice president, marketing and product development.

The company will host free events from 11 a.m. to 4 p.m. local time at stations in Chicago, Los Angeles, Philadelphia and Washington, D.C. Each event will feature live entertainment; interactive and educational exhibits; kids' entertainment; cooking demonstrations; model train displays; and tours of notable private cars, Amtrak equipment, freight, and commuter trains and more.

In the nation's capital, the soon-to-be-announced National Train Day celebrity spokesperson will kick-off festivities on May 8. The other three major markets will feature unique exhibits that narrate each region's rich train history.

"The History of Baseball's Travel on Trains" in Philadelphia will feature memorabilia, photos, video and audio displays featuring several former players from a variety of leagues will showcase the early days of America's favorite pastime and its connection to train travel.

In Chicago, the "Blues Journey and Connection to the Railroad" exhibit will be headlined by Big Bill and Larry "Mud" Morganfield, the sons of celebrated blues musician Muddy Waters, who will be joined by legendary Mississippi Delta blues musician Bobby Rush to perform train-themed blues songs.

Los Angeles attendees will have the opportunity to see the "Railroad Bracero Exhibit," which details how thousands of Mexicans came to the U.S. during World War II to work legally under a program to build and maintain our nation's passenger rail system.

Additional events are being organized in local communities across the U.S. Last year, more than 140 total celebrations took place, and even more are expected this year.

Wireless Internet Launches on *Acela Express* and in Select Stations

Passengers on *Acela Express* and those traveling through select stations in the Northeast can now stay connected thanks to AmtrakConnectSM, the company's wireless Internet solution, which officially launched today.

"This is a major service upgrade," said Matt Hardison, chief, Sales Distribution and Customer Service. "We expect this offering to translate directly to higher satisfaction and therefore, higher ridership and ticket revenue."

Following two years of development and extensive testing, passengers now have a 3G connection for wireless devices such as laptops and netbooks. Marketing and Product Management worked closely with teams from Mechanical, Transportation, Engineering, Real Estate and Information Technology to implement the highest level of system performance possible.

"We've taken another step toward delivering the best possible travel experience to our customers and we will be expanding our on-board technology even further in the coming years," said Senior Director, On-Board Systems, Lenetta McCampbell.

In the past, passengers were only able to access the Internet using a cellular air card or smart telephone with Web capabilities. However, these options are not ideal because users must rely on one carrier's coverage along the route, and they must be able to receive a consistent cellular signal inside the train. The new on-board system delivers a more consistent experience by pulling a signal from multiple sources and delivering the bandwidth through a single, full-train network.

Stations that now feature AmtrakConnect in gate areas are Boston's Route 128 Station, Providence Station, New York Penn Station, Philadelphia 30th St. Station, Baltimore Penn Station and Washington Union Station. The service will be available in Wilmington, Del., once the current station renovation is complete. Amtrak already has free wireless Internet in all Club*Acela* locations as well as the Metropolitan Lounge at Chicago Union Station.

Other routes offering some type of on-board wireless Internet service are the *Pacific Surfliner* and *Downeaster*. The company hopes to extend AmtrakConnect to additional routes, but no timeline has yet been set.

Information Technology: Beginning April 5, employees who access the Amtrak network using Citrix or the VPN will need a new authentication "token" to log in. Employees should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token. User instructions will be provided at that time.

Government Affairs: Amtrak will participate in a hearing before the Pennsylvania House of Representatives Transportation Committee in Pittsburgh on March 3 to discuss the future of passenger and freight rail in the state. Specific topics will include stimulus projects and Amtrak's recent feasibility study for expanded service in Pennsylvania.

Employee Information Management: This week, employees will receive details and schedules regarding training on the use of new upgrades to the Employee Information Portal, which is set to launch on May 19. The training will be offered through classroom sessions, online classes and on CD for those who do not have access to the company intranet. Additional information and updates will be sent directly to employees by the EIM Team.

Amtrak Hosts Town Hall This Week

Amtrak is partnering with Trains Magazine to sponsor a town hall meeting in Chicago on Saturday, March 6. Approximately 250 attendees are registered to attend the meeting, which will serve as an open forum to discuss the future of long-distance trains, fleet plans and Amtrak's photo policy. Chairman Tom Carper and President and CEO Joe Boardman will lead the discussion along with other Amtrak officials.

"We aim to have an open dialogue with people who are interested in Amtrak. It will be a success if we can engage stakeholders and constructively exchange views," said Boardman.

Engineering: The 172 employees of the Track Laying System-Blue, with support from Mid-Atlantic Division forces, will kick-off the 2010 production season with concrete tie replacement on Track #1 at Landover (Md.) Interlocking on March 14. Multiple schedule changes along the NEC will take effect to accommodate the work.

Human Resources: When adding a dependent to their benefits coverage, employees must submit proof of dependent eligibility such as a marriage license or birth certificate. Call the Amtrak Benefits Service Center at 800-481-4887 for more information.

Marketing and Product Development: A new video production contest targeting college students in Illinois offers the chance to win more than \$3,000 in prizes and Amtrak travel. Visit www.AmtrakTRAINsPortationVideoContest.com for details.

Test Your "Green" I.Q. to be Featured in *Amtrak Ink*

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Over the coming weeks, a new trivia question will appear in *Amtrak This Week*. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

Amtrak's initiative to print two-sided documents when possible reduced the company's estimated carbon dioxide output by how many tons in FY '09?

a.) 28 b.) 38 c.) 40 d.) 90

Amtrak Hosts Successful Town Hall Meeting in Chicago

Board Chairman Tom Carper and President and CEO Joe Boardman hosted the first-ever town hall meeting between passenger rail supporters and railroad executives on Saturday, March 6, in Chicago. More than 250 people from 28 states attended.

Co-hosted and moderated by Trains Magazine, the all-day event included question and answer sessions and centered on three topics: Amtrak's strategy to replace and increase the size of its equipment fleet, initiatives to improve long-distance trains and the company's policy on personal photography and videography in stations, trains and other Amtrak property.

Boardman initiated the creation of the event citing the importance of engaging stakeholders. "It is important for Amtrak senior management to hear directly from people who care deeply about improving and growing passenger rail in this country," he said. "Listening to their opinions and viewpoints with open ears and respect is crucial because their support matters in determining how passenger rail moves forward."

At the town hall meeting, Amtrak announced the creation of a new program inviting train watchers to be on the lookout for suspicious activities, trespassers and other safety and security threats when they are taking photographs or traveling. Amtrak Police Chief John O'Connor announced the program, explaining its fit with the company's existing "See Something, Say Something" campaign. BNSF Railway has instituted a similar effort, which has been well-received.

In addition to the meeting, attendees were given the opportunity to tour rehabilitated equipment that is being returned to service with funding from the American Recovery and Reinvestment Act, including a newly rebuilt P-40 Genesis locomotive, two Superliner sleeping cars and a Superliner dining car. Employees who performed the work at the Beech Grove Maintenance Facility were on hand to explain the process.

"Trains was honored to play a part in this unique event," said Trains Magazine Editor Jim Wrinn. "For a major corporation to provide that much of its senior management to listen to its customers and take feedback from them is amazing. We hope to do this again."

Operations Update: On Monday through Friday of each week from March 15 through April 2, southbound *Saluki* Train 391 will depart Chicago 25 minutes earlier and depart all remaining stations on the route 30 minutes earlier due to track work being performed by Canadian National Railway.

Operations: Anna Szczepanska has been selected as the Operations department's senior executive assistant and will report directly to Chief Operating Officer William Crosbie. Previously, Szczepanska was executive assistant to the Mid-Atlantic Division general superintendent.

Marketing and Product Development: A new employee-only National Train Day Web site is now available at www.TrainDay411.com. Sign-up online to volunteer at an event on May 8, enter to win employee prize packages and find all the latest news and information.

This Week's "Green" I.Q. Question

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

The new capital program to replace up to 2,000 light fixtures with energy-efficient bulbs in nine Mechanical facilities and station platforms at Chicago Union Station is expected to cut energy use by how many kilowatt hours?

a.) 2 million b.) 6 million c.) 7 million

Congratulations to last week's winner, Assistant Inspector General Nick Pinto, who correctly answered that Amtrak reduced its CO₂ output by 40 tons in FY '09 by printing two-sided documents.

New Study Outlines Kansas Service Options

Amtrak and the Kansas Department of Transportation unveiled last week a new study analyzing four alternatives for state-sponsored passenger rail service between Kansas City, Oklahoma City and Fort Worth. Commissioned by the Kansas DOT, the study was prepared by Amtrak with input from BNSF Railway to identify options to restore service to various cities in Kansas and Oklahoma that lost Amtrak service during federally mandated cuts in 1979.

"Growth is a vital part of our corporate strategy and building new service on state-supported corridors is one of the best ways for us to achieve that," said Mike Franke, assistant vice president, Policy and Development.

Estimated start-up costs of each option range from \$156 million to \$479 million and would require between \$3.2 million and \$8 million in annual operating support. Projected ridership of the four options fall between 65,900 and 174,000 annually. The study does not include cost estimates for renovating or building stations or platforms. The full report can be found on the Kansas DOT Web site at www.ksdot.org.

"This is just the first of many steps that must take place before service can actually start," added Franke. "The real work begins now as decisions must be made and funding must be secured by Kansas and the other states involved."

Departments Show Flexibility, Team Work to Seize Opportunity

System Operations and Revenue Management have teamed with the Central Division to capitalize on increased demand in the Midwest for spring break travel, which peaks in mid-March.

"There are a lot of colleges and universities throughout the region and many students need to get home to the Chicago area or they're catching a flight to their spring break destination," explained Mike Frazier, acting senior director, System Operations. "Our job is to recognize opportunities like this and adjust our plans accordingly."

System Operations re-allocated equipment to extend train consists and increase capacity from Chicago to St. Louis, Carbondale and Quincy, Ill., Detroit and Port Huron, Mich.

According to Denise Johnson, director, Revenue and Capacity Management, spring break ridership has been much heavier this year, especially to Quincy and Carbondale. Travel is highest on Fridays and Sundays as students leave or return to campus.

While ticket revenue information will not be available until early April, the increases are expected to be significant. "We're seeing a high percentage of tickets purchased at our highest fare levels. Combined with the increased ridership, that's a great thing," said Johnson.

Government Affairs: President and CEO Joe Boardman will testify regarding Amtrak's FY '11 grant request before the House Appropriations Subcommittee on Transportation, Housing and Urban Development, and Related Agencies on March 23. The testimony will be posted on the intranet under "News" → "Legislative."

Marketing and Product Development: As part of the "ALL SPRING – ALL ROUTES – ALL KINDS OF POINTS" promotion, Amtrak Guest Rewards members will earn double points on qualifying travel now through May 7, and triple points for qualifying travel from May 8-29, for every one-way trip on every route.

This Week's "Green" I.Q. Question

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

How many gallons of used oil did Amtrak recycle in FY 2009?

a.) 70,000 b.) 94,000 c.) 137,000 d.) 215,000

Congratulations to last week's winner, Teresa Cohen, secretary, Beech Grove, who correctly answered that Amtrak's program to install energy-efficient light bulbs in nine Mechanical facilities and platforms at Chicago Union Station will cut energy use by 7 million kilowatt hours.

Safe-2-Safer Rollout Continues With Collaboration Between Labor Leaders and Senior Management

The implementation of Safe-2-Safer has reached another milestone, as Amtrak executives and General Chairmen from nearly every employee union agreed recently on a Memorandum of Understanding that outlines how the committees responsible for the peer-to-peer safety observation process — a major component of the program — will be implemented.

"The group worked together to create the process for nominating and selecting Steering Committee members and facilitators. We can now begin building these teams for Mechanical and Transportation departments in the Mid-Atlantic, APD and the backshops. We appreciate the support and willingness to collaborate from the union General Chairmen," said Vice President of Transportation Richard Phelps, the executive sponsor of Safe-2-Safer.

The approximately 25 Steering Committees systemwide will be made up of union members in good standing that are selected by their respective union leadership. The committees' role will be to implement the Behavioral Accident Prevention Process® (BAPP), which involves peer-to-peer observations and identifying safe behaviors that prevent the most common injuries. The data from the observations will then be used to teach employees how to reduce their personal risk and identify other barriers to safety that need to be addressed, such as fixing tripping hazards or replacing defective tools.

"The peer-to-peer observations for BAPP are anonymous, voluntarily and will never be done by managers or result in any discipline," said Phelps. "Our motto for BAPP is 'No Name, No Blame, No Sneek-Up.'"

Additionally, the General Chairmen and Amtrak's executive team finalized the selection process and pay rate for each committee's Safe-2-Safer facilitator, who will manage the day-to-day Steering Committee activities. These positions will also be filled by union members, and job announcements will be posted beginning this week at <http://jobs.amtrak.com>.

The group of executives and labor leaders will continue to meet periodically to provide Safe-2-Safer progress updates and address any issues that arise.

The Safe-2-Safer rollout process is underway in the Mid-Atlantic, Northeast and Southern regions as well as backshops and Reservation Call Centers, with managers and supervisors beginning leadership training and coaching. Corporate office locations and the Central, Southwest and Pacific regions will soon follow.

"Safety is everyone's responsibility, but managers must be accountable and must lead their teams to create a safer environment. A big part of Safe-2-Safer is teaching our managers and supervisors how to do that in a way that is non-confrontational and doesn't include finger pointing," said Phelps.

Information Technology: Only one week remains for employees who access the Amtrak network using Citrix or the VPN to obtain a new authentication “token” to log in. After April 5, a token will be required for remote network access. Employees should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token. User instructions will be provided at that time.

Employee Information Management: Managers and delegates who have received invitations to enroll in instructor-led training on the Employee Information Portal (EIP) upgrades launching in May are reminded to RSVP by April 9. Computer-based training on the new Employee Self Service features will be available to all employees in the coming weeks.

“Green” I.Q. Contest Winner

Congratulations to the winner of the final Green I.Q. trivia question last week, Clint Foster, engineer, Sacramento, who correctly answered that Amtrak recycled 215,000 gallons of used oil last year.

Taye Diggs Signs On as National Train Day Spokesperson

Actor and avid train fan Taye Diggs, star of *Private Practice*, will join Amtrak to kick-off the third annual National Train Day.

“Riding the train was my first real exposure to serious travel and the magical notions attached to train travel will stay with me forever,” said Diggs. “My wife [Broadway Actress Idina Menzel] and I have lived all of our adult lives in New York City so we have come to know riding the train as a relaxing and convenient travel option.”

Diggs will start the festivities with a ceremony at New York’s Penn Station on Friday, May 7, where he will flip the switch that launches an edible three-dimensional “trainscape” made of cake and moving model trains. The display will be inspired by this year’s new National Train Day artwork and will include a model train installation by Bachmann Trains, a leading model train company.

Afterward, Diggs will board Amtrak and travel to Washington, D.C. to host the celebration at Washington Union Station and enjoy the festivities with other train fans on May 8.

Joining Amtrak to celebrate the importance of trains, the SUBWAY® restaurant chain is the premier sponsor of the third annual National Train Day. For more information, employees should visit www.TrainDay411.com.

New National Train Day Employee Trivia Contest Now Open

A new employee trivia contest is now open at www.TrainDay411.com, an exclusive site for Amtrak employees to find news about National Train Day and register to volunteer at one of the four major events in Los Angeles, Chicago, Philadelphia or Washington, D.C. The new contest will be open until April 8. The winner of each contest will receive a National Train Day prize package.

Congratulations to John Deissler, B&B mechanic, New York, who won the previous trivia contest by correctly identifying the four cities hosting major National Train Day events: Chicago, Los Angeles, Philadelphia and Washington, D.C.

Operations Update: Chief Operating Officer William Crosbie has officially deactivated the “state of emergency” of the Amtrak Pandemic Flu Contingency Plan based on reports from federal and state public health agencies. The emergency section of the plan was enacted last fall as a measure to help protect employees and passengers against the H1N1 flu virus. The company offered free vaccinations and reimbursements for both seasonal and H1N1 flu. More than 4,500 employees took advantage of the program.

Information Technology: Beginning today, a token will be required for remote network access through Citrix or the Amtrak VPN. Employees who access the network using these channels should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token and to receive user instructions.

PSSA: The nomination period for the 2010 President’s Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under “Employees”→ “Awards and Achievements.”

Human Resources: Amtrak is working with specialized consultants to analyze the new healthcare legislation and how it will impact employee benefits. While some changes will take effect quickly, many of the provisions in the bill will not take effect for several years. More information will be provided in the coming weeks.

National Train Day: As of today, 75 National Train Day events in 36 states, including Alaska and Hawaii, have been scheduled in communities across the country for May 8. For more information, or to volunteer at an event in Chicago, Los Angeles, Philadelphia or Washington, D.C., visit www.TrainDay411.com.

U.S. Secretary of Transportation Visits Beech Grove

As members of President Obama’s cabinet traveled throughout the country on April 2 to highlight stimulus projects that have been effective in creating jobs in the U.S., Secretary of Transportation Ray LaHood visited Amtrak’s Beech Grove Maintenance Facility to see the operation first-hand and meet with Amtrak employees who attended the event. Joining LaHood in Beech Grove were U.S. Rep. Andre Carson (D-Ind.) and President and CEO Joe Boardman.

“I really enjoyed touring the car shops where six cars have already been rehabilitated — with more in the works — and locomotive shops where the first of the locomotives was refurbished,” said LaHood in a blog post following his visit. “The work adds important capacity to the Amtrak passenger rail system and provides riding comfort to Amtrak’s passengers.”

In 2009 alone, Amtrak projects funded by the American Recovery and Reinvestment Act led to the creation of more than 800 jobs with the company and its vendors, including more than 100 at Beech Grove. With numerous additional projects throughout the system slated for the 2010 construction season, the company will be reporting a significantly higher number of jobs created at the end of this year.

New Frequencies Coming for North Carolina Service

North Carolina Transportation Secretary Gene Conti announced last week that the state is expanding its partnership with Amtrak by adding two new midday frequencies — operating as Trains 74 and 75 — between Raleigh and Charlotte. The new trains are scheduled to begin operating in early June of this year.

With these additions, Amtrak will operate a total of six daily state-sponsored *Piedmont* and *Carolinian* trains between the state’s two largest cities.

Current frequencies only operate in the morning and evening. After the June service expansion, business travelers, families and college students will have a valuable new schedule option.

Operations Update: Due to track work being performed by Metro-North Railroad and CSX Transportation, schedules for trains operating between Niagara Falls, Albany-Rensselaer and New York will be adjusted between April 11 and June 19.

Transportation: The updated Revision No. 5.1 of the *Service Standards: Manual for Train Service and On-Board Service Employees*, which becomes effective April 30, will be shipped directly from the printer to crew base locations across the system beginning this week. If packets have not been received by April 19, contact Monika Lukens at ATS 734-2047 or (302) 683-2047.

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 15. Congratulations to the latest winner, Brian Hains, machinist journeyman, Rensselaer, N.Y. Employees are also encouraged to volunteer at a National Train Day event by signing up online. All volunteers will receive a free polo shirt, a meal during their shift and other gift items.

Operation RedBlock Day is April 14

In conjunction with National Alcohol Awareness Month, April 14 marks the 10th annual national Operation RedBlock Day. This week, Operation RedBlock committees at Amtrak and several freight railroads will host a series of events throughout the system aimed at educating employees about how to promote a drug- and alcohol-free workplace.

"Over the years, Operation RedBlock has benefitted employees across the system by raising awareness, changing attitudes and giving co-workers another channel by which to encourage others to seek assistance," said President and CEO Joe Boardman.

As always, employees are encouraged to mark off work — without consequence — when impaired by drugs or alcohol by calling 1-800-44-RBLOC (800-447-2562).

Customer Self-Service Launches on Amtrak.com

Customers who book their reservation online can now make modifications to their reservation at Amtrak.com with a few clicks of the mouse. Rather than having to contact a ticket agent, customers have the flexibility to change their travel schedule or class of service online, as well as upgrade, downgrade and exchange tickets. Any reductions in fare will be refunded automatically while payment of fare increases resulting from reservation changes can be collected through the online system.

"This is an important step forward in customer service," said Tony Flynn, eTicketing program director. "Even though we just launched this feature on April 6, our customers are already taking advantage of it to change trains or upgrade their travel."

The online self-service feature is currently available for reservations made on Amtrak.com before a paper ticket has been printed. All customers will still need to pick up printed tickets at the station prior to boarding their train — but not for long.

This new self-service feature is the first of several upcoming eTicketing program features that will offer additional customer self-service opportunities. In May, a new capability will be introduced that will enable customers to pick up their tickets at Quik-Trak kiosks even if their reservation was affected by a last minute schedule change or re-accommodation. Previously, customers were required to go to the ticket window to obtain tickets under such circumstances.

By late summer 2011, customers will also be able to print travel documents at home or at the office. Conductors will simply scan bar codes on the "print-from-anywhere" boarding pass, eliminating the need to collect paper tickets. Additional functionality will allow passengers to present their boarding pass on their smart phone, such as a BlackBerry or iPhone, making completely paperless travel possible.

The eTicketing program, once fully developed, is projected to deliver up to \$14 million in additional ticket revenue annually by improving access to Amtrak ticketing, particularly at cities with unstaffed stations or for those customers booking outside the U.S.

Ridership and Revenue on Record-Breaking Pace

During the first six months of the FY '10 fiscal year, Amtrak carried a record high of 13,619,770 passengers — a 4.3 percent increase over last year and roughly 100,000 more than the same period in FY '08, when the company set its all-time record for annual ridership. A slowly improving economy and continued high fuel prices are contributing factors in ridership growth.

Comparing March 2010 to March 2009, ridership increased by 13.5 percent to a record 2.47 million passengers for the month. In addition, every single Amtrak route carried more passengers, with several experiencing double-digit growth.

Message from Lorraine Green and DJ Stadler

Dear Co-workers,

Each Tuesday morning, the 11 members of the executive committee and other department heads meet to discuss company strategy, direction and policy. As part of our effort to become a healthier company, some of our discussions revolve around how we can continue to improve the company for your benefit.

To that end, we are pleased to announce that as a result of negotiations with Fidelity Investments, our 401(k) Retirement Savings Plan administrator, starting May 19 we will be offering employees new lower-cost investment options, allowing you to save more for retirement and better meet your financial goals.

The fees and expenses of the investments you select have a large impact on the overall return of your portfolio, especially over the course of an entire career. By replacing the Fidelity Freedom Funds® currently being offered with 12 lower-cost lifecycle funds from a new series of Fidelity Freedom KSM Funds, participants will collectively save a considerable amount of money in management fees. The investment strategies, fund portfolios and fund managers are the same as the current Freedom Funds; the only difference is that the costs you pay will be reduced.

Those of you who currently invest in the Freedom Funds will see your balances automatically transfer to the corresponding Freedom K Funds at the close of business on May 19. If you choose not to have your funds transferred to a corresponding Freedom K fund, you may elect another investment option before May 19, or after the transfer has occurred. An additional investment option called Fidelity *Contrafund*® - Class K will also be made available.

The Fidelity Freedom K Funds are typically available only to employees of new corporate clients of Fidelity; however, Dale Stein, our treasurer, negotiated with Fidelity to secure these lower-cost fund options for Amtrak employees, even though we were already a client. This is a prime example of Amtrak's commitment to you as a valued employee and we hope more of you will take advantage of this company benefit.

Plan participants will soon begin receiving letters from Fidelity with more information about the new funds. If you have questions or would like to begin saving for retirement, please call 877-477-AMTK (2685) or visit www.MySavingsAtWork.com/amtrak to schedule an appointment with a Fidelity representative.

Sincerely,

Lorraine Green
Vice President, Human Resources
and Diversity Initiatives

DJ Stadler
Chief Financial Officer

Engineering: Engineering will host an Employee Health & Safety Fair in Sunnyside Yard on April 21 from 9 a.m.-2 p.m.

Corporate Communications: On April 13, CNN aired a segment featuring Amtrak Police K-9 teams. To view the story, visit www.cnn.com and search "Dog's Nose Knows."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 22. Congratulations to the latest winner, Angeline Summers, Engineering assignment clerk, Philadelphia.

Government Affairs: Vice President, Government Affairs and Corporate Communications Joe McHugh will testify before the House Transportation and Infrastructure Committee in Chicago on April 20 regarding stimulus high-speed rail grants. Amtrak Police Chief John O'Connor will testify in Washington before the Senate Commerce, Science and Transportation Committee on April 21. The hearing focuses on securing the nation's rail and other transportation networks.

Board Makes Visit to Chicago

The board of directors traveled to Chicago last week for its April meeting to conduct site visits and meet with state and local officials.

"The Midwest plays a major role in our national system through extensive state-supported corridor service and as the hub for much of our long distance network," said Board Chairman Tom Carper. "The board wanted to see it firsthand to get a better understanding of the challenges and opportunities here."

Board members greeted employees and met with Wisconsin Gov. Jim Doyle and other officials from Illinois, Iowa, Michigan, Minnesota and Ohio. The board also toured Chicago Union Station and rode *Hiawatha Service* to see the renovated Milwaukee station, in addition to traveling to several CREATE project sites aboard equipment recently rehabilitated at Beech Grove Maintenance Facility.

Employee Appreciation Day to be Celebrated This Friday at 46 Locations

This Friday, April 30, has been designated as the second annual Employee Appreciation Day, which will be celebrated throughout the system at 46 different events. These events are designed to help employees become safer, greener and healthier in their professional and personal lives.

Human Resources: Participants in the 401(k) Retirement Savings Plan should receive a letter from Fidelity Investments this week (if they have not already received it) regarding investment fund changes that will lower fees for employees, allowing them to save more for retirement.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 29. Congratulations to the latest winner, Sheryl Johnson, secretary, Chicago.

Government Affairs: President and CEO Joe Boardman and Amtrak Inspector General Ted Alves will appear before the Senate Appropriations Committee on April 29 regarding the company's FY '11 funding request.

"I am committed to growing our company by making it safer, greener and healthier," said President and CEO Joe Boardman. "Part of what healthier means is fostering a work environment where employees feel valued and that their contributions mean something. It also means providing better benefits and services to our employees. Employee Appreciation Day is just one gesture to show our commitment to you and to becoming a healthier Amtrak."

Teams of employees in each location have worked hard over the last several months to put together events offering employees information on personal finance and retirement savings from Fidelity Investments; health and wellness screenings from Aetna and United Healthcare; "green" tips from local energy conservation organizations; and safety tips and updates from Safe-2-Safer, Employee Assistance Program, Operation RedBlock and Operation Lifesaver.

Information about the new Employee Information Portal, a new Employee Service Center, and how all employees will soon be able to access the company's intranet from home will also be available. These are major programs that will launch on May 19 in an effort to better serve employees.

Another resource being provided at all 46 events is an expanded version of last year's popular "Did You Know" booklet. This guide outlines the wide range of employee discounts from companies like AT&T, Verizon, Carnival Cruise Lines, Pro-FLOWERS, Hertz, Budget and others, along with other useful company information.

Temporary Changes to Leave Requests Made via Employee Self-Service

From May 1 to May 19, non-agreement employees who submit a leave request through the Employee Self Service (ESS) system will not receive any e-mail notifications or confirmations related to their request.

Employees must monitor their request status by logging in to ESS or by following-up with their supervisor directly. Managers are also encouraged to notify their employees of approvals or denials of leave requests.

This temporary function outage is due to necessary system improvements being made to launch the expanded Employee Information Portal on May 19.

Tentative Agreements Reached, Covering 40 Percent of Unionized Employees

Amtrak has reached tentative agreements on new labor contracts with the International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International (TCU) covering the period of January 1, 2010, through January 1, 2015.

The new contracts must be ratified by the union membership and will cover electricians, machinists, carmen and coach cleaners, clerks and telegraphers.

The IBEW, IAM, JCC and TCU are four of 14 labor organizations and joint councils representing Amtrak employees. The tentative agreements will affect about 6,900 employees, or 40 percent of Amtrak's unionized labor force.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through May 6. Congratulations to the latest winner, Tim Carroll, ticket agent, Raleigh, N.C.

Government Affairs: Assistant Vice President, Policy and Development, Drew Galloway appeared at a field hearing in Miami on May 3 before the House Transportation and Infrastructure Subcommittee on Railroads, Pipelines and Hazardous Materials. The hearing focused on intermodal/high-speed rail connections. His testimony can be viewed on the intranet under "News" → "Legislative."

Human Resources: From May 1 to May 19, non-agreement employees who submit a leave request through the Employee Self Service (ESS) system will not receive any e-mail notifications or confirmations related to their request. Employees must monitor their request status by logging in to ESS or by following-up with their supervisor directly.

Amtrak Looks at Possible Florida Service Expansion

On May 1, Amtrak officials including Chairman Tom Carper, hosted a special inspection trip along the Florida East Coast Railway (FEC) to review the feasibility of passenger rail service on the 351-mile route between Miami and Jacksonville. Included on the trip were several local officials, community leaders and rail supporters interested in restoring service along the route.

The Florida DOT has partnered with FEC owner Rail America and local governments and planning councils to apply for stimulus funding to support the initiative. The FEC has not had regular passenger service since 1968.

Communities Nationwide to Celebrate National Train Day this Saturday

Don't miss out on the third annual National Train Day, which will be celebrated at approximately 170 events in 44 states, including Hawaii and Alaska this Saturday, May 8. Employees are encouraged to bring family and friends to a nearby event to celebrate the rich history of the American railroad and learn about the important role trains have in the nation's future.

"National Train Day is bigger and better this year thanks to hard work from our colleagues and increased participation from our host railroads as well as our state, local and commuter partners," said Emmett Fremaux, vice president, Marketing and Product Development. "We work closely with these organizations every day and we all have a common interest in promoting rail transportation."

New for National Train Day this year is the addition of a premier sponsor. Subway® will help Amtrak reach a wider audience to promote the events. Subway will also provide complimentary meals to volunteers at the events in Chicago, Los Angeles, Philadelphia and Washington, D.C.

As of press time, 347 employees have volunteered to help manage the four major market events. Dozens more have taken the initiative to create an event at their local station or have worked with the local chamber of commerce or visitor's bureau.

On Friday, May 7, Taye Diggs of the TV series *Private Practice* will unveil a trainscape at New York Penn Station made of cake and other edible treats that includes a model railroad installed by Bachmann Trains. He will then travel to Washington on May 8 to kick off the festivities before performances by Rocknoceros and the Ballou High School Marching Band.

In Philadelphia, a special exhibit will be on display called "Baseball Junction: The History of Baseball and the American Railroad," while Chicago attendees can take part in "The Blues Journey and Connection to the Railroad." The Los Angeles event will feature a special "Railroad Braceros" exhibit detailing the role thousands of Mexicans played in developing U.S. railroads as part of a special work program during World War II.

The four major events will all feature expanded train displays with rail cars and locomotives from the past, present and future. The AmtraKids Depot will offer fun and entertainment for younger rail fans and other displays will focus on the green benefits of rail travel, as well as the industry's contribution to economic development.

For a complete list of National Train Day events and information, visit www.TrainDay411.com and click "Build the Buzz."

Operations Update: The Spring-Summer 2010 System Timetable takes effect today.

Marketing and Product Development:

Beginning May 15, Amtrak will no longer accept debit cards that require a PIN. Amtrak will still continue to accept debit cards that contain an American Express, Discover, MasterCard or Visa credit card logo. Enhancements to Amtrak's payment systems may allow for reintroduction of debit cards in the future.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: Congratulations to the last two TrainDay411.com trivia contest winners, Carmen Calderon, mechanical clerk, Los Angeles and Mario Edwards, Amtrak Police, Chicago. Thanks to everyone who participated.

Operations: A Health and Safety Fair will be held for Operations employees in Odenton, Md., on May 12 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Important Info Regarding New Employee Information Portal

The new Employee Information Portal will launch on May 19 and become accessible to all employees from home.

Starting May 19, managers will use new electronic forms in place of current Forms 2000 and 2002. To prepare for this change, please do not initiate new Forms 2000 or 2002 after 5 p.m. on Friday, May 14. Forms currently in progress will be accepted by Human Resources. If there is an urgent need between May 14 and May 19, please contact Human Resources for assistance.

Another new feature is the eRecruiting system, which will replace Team Rewards, ending the employee referral program. As a result, all referral points must be used before May 19. Any unused points will be forfeited.

**Labor-Management Collaboration
Brings New Jobs to Amtrak**

Amtrak is currently in the process of hiring more than 50 new employees at the Contact Centers in Riverside, Calif., and Philadelphia to support assumption of the customer support work for Amtrak Guest Rewards (AGR), the company's loyalty marketing program. Training for new agents will begin next month and training for the agents who will work the AGR desk is scheduled for early September.

Currently, call center support for AGR members is outsourced as part of a vendor agreement. But with the contract up for renewal earlier this year, Amtrak worked closely with the Transportation Communication International Union (TCU) to bring the work in-house, effective Oct. 1.

"This outcome is a direct result of a collaborative effort by the leadership of TCU, which represents our Contact Center agents, our Labor Relations department, the Amtrak Guest Rewards team, and the Contact Center team," said Mark Rose, senior director, Reservation Sales.

**Employees Make Third National Train Day
A Winning Effort**

Employees played a prominent role in the third annual National Train Day, which was celebrated on May 8 with events in four major markets and approximately 180 smaller communities in nearly every state, including Alaska and Hawaii.

"On behalf of the executive committee and our department, I want to thank each and every employee who contributed to making this year's National Train Day the biggest and best yet," said Emmett Fremaux, vice president, Marketing and Product Development.

At the four events in Chicago, Los Angeles, Philadelphia and Washington, D.C., roughly 400 employee volunteers answered questions from attendees, assisted in merchandise sales, helped exhibitors and guided people through equipment displays. Dozens of other employees worked with their local chambers of commerce and visitor's bureaus to create events in their community.

What Did You Think?

On Friday April 30, Amtrak hosted dozens of Employee Appreciation Day events across the country to help employees become safer, greener and healthier in their professional and personal lives.

Tell us what you thought so we can make it better next year by completing an anonymous, five-minute online survey at www.surveymonkey.com/s/EAD2010.

Three New Employee Resources Launch This Week

Beginning May 19, three important new resources will be available to all Amtrak employees, allowing for greater access to company information, easier updates to their personal information and streamlined Human Resources support. These interconnected tools are part of the company's initiative to become "healthier" by strengthening its position as an employer of choice.

For the first time, every employee will be able to sign in through Amtrak.com to access the company intranet, which houses news, policies and other company information. Once on the intranet, employees can access the enhanced Employee Information Portal to view or update their personal information, apply for jobs and enroll in training courses. Managers will be able to access new HR forms, manage their staff's training and perform recruiting functions in the portal.

To sign on from a home Internet connection, go to Amtrak.com and click "Inside Amtrak" at the bottom of the page. Then click the "Employees" link. Employees who already access the Amtrak network using Citrix or the Virtual Private Network will continue to use their existing login ID and password. Employees who are signing on for the first time should have received instructions containing their initial login ID and password with their May 14 pay stub. These instructions are also being mailed to employees' homes this week.

Once signed on, a link on the intranet home page will connect employees to the Employee Information Portal. For optimal performance, please use Internet Explorer Version 7.0 and disable any pop-up blockers. For assistance logging in, call the Amtrak Help Desk at 800-772-4357.

The Employee Service Center will also open on May 19 to provide comprehensive support for all Human Resources-related inquiries and transactions. The Employee Service Center will be open from 8 a.m. to 8 p.m. Eastern time, Monday through Friday. Call 888-MY-HR-ESC (888-694-7372) or email HRESC@amtrak.com.

With the opening of the Employee Service Center, many forms have been modified or replaced. Forms 2000 and 2002 have been discontinued as of last Friday and employees with urgent needs prior to May 19 should contact their HR representative. Beginning May 19, managers and delegates will be able to access the new HR forms on the portal and intranet.

The portal's new eRecruiting feature will replace Team Rewards and close the employee referral program. As a result, all referral points must be used before May 19. Any unused points will be forfeited.

Operations: A Health and Safety Fair will be held for employees in Operating departments at the Adams Maintenance Facility in North Brunswick, N.J., on May 19 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Marketing and Product Development: Checked baggage service is now available to *Cardinal* passengers at many stations along the route. The new service is a result of close collaboration between the Product Development and Transportation departments.

Benefits: The Amtrak 401(k) Retirement Savings Plan will offer new lower-cost investment options beginning May 19, allowing participants to save more money for retirement. Current investments in Fidelity Freedom Funds will automatically be transferred to the corresponding Fidelity Freedom K Fund, which has the same investment strategy but lower management fees. Call 877-477-AMTK (2685) with questions.

Amtrak Police: Congratulations to Officer Richard Beynon of Harrisonburg, Pa., who received the Amtrak Police Department's 2009 Officer of the Year award at a luncheon in Washington, D.C., on May 13 as part of National Police Week.

Information Technology: A series of online courses is available through the end of May for eTrax users explaining changes to navigating the applications, creating travel authorizations and expense reports and reconciling P-Cards. Information is on the intranet under "How We Work" → "eTrax."

PSSA Nomination Period Extended

The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1.

Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

What Do You Think?

Help make next year's Employee Appreciation Day even better by completing an anonymous, five-minute online survey at www.surveymonkey.com/s/EAD2010.

Operations Update: Beginning May 24, through early August, select *Northeast Regional* and *Acela Express* trains will operate according to a later schedule to accommodate track work near Baltimore.

Operations: A Health and Safety Fair will be held for employees in operating departments at the Wilmington (Del.) Maintenance Facility on May 19 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Transportation: All trains will sound their horns at noon local time on Memorial Day, May 31, in honor of the men and women who have lost their lives in service to the United States. A System General Road Foreman Notice will be issued this week to provide direction to locomotive engineers.

PSSA: The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1. Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

Security Reminder: Protecting the financial information of Amtrak, customers and employees is critical. Employees are reminded to always minimize exposure of credit card account numbers to anyone who does not need to see them, avoid writing them down if at all possible, and destroy any record of an account number as soon as it is no longer necessary for the job.

Region Partnership Group Unveils NEC Master Plan

Amtrak and 12 states released the Northeast Corridor Infrastructure Master Plan on May 20, after three years of collaboration and research. The group aims for the plan to be the foundational document for a multi-state planning effort to improve the region's transportation network by further defining the role of intercity and high-speed passenger rail. Amtrak and the states have formally asked the Federal Railroad Administration to lead the planning effort.

The NEC Master Plan can be found on Amtrak.com under "Inside Amtrak" → "Reports and Documents."

New Employee Resources Up and Running

Employees now have greater access to company information and their personal records thanks to new technology resources that launched last week that allow them to log in to the company intranet and Employee Information Portal through Amtrak.com. The new Employee Service Center also opened last week to provide a one-stop shop for all Human Resources needs.

"We have already seen a high usage rate from employees across the country," said Chief Information Officer Ed Trainor. "We've been working hard to iron out a few things based on employee feedback and I hope everyone will see how valuable these tools are."

Any employee who had access to the Amtrak network prior to May 19 should use their already-assigned Amtrak login ID and their password. Employees who have never had access to the intranet before, should follow the instructions provided on the login page, which can be found at Amtrak.com → "Inside Amtrak" → "Employees."

Some users may have experienced intermittent technical problems when logging in or trying to access the corporate forms library in the Employee Information Portal last week. Those issues have been corrected. Additionally, system access for some ticket agents who share generic login passwords is delayed while Information Technology is developing unique passwords to secure their personal information. Those agents will be notified of their new secure login credentials by IT.

The new careers section of the portal and the Amtrak job board are still being transitioned to the new system, which is expected to be complete by Friday, May 28. Employees who had applied for a posted job using the old system will not need to re-apply because their application is being transferred automatically to the new system.

The Employee Service Center is open weekdays from 8 a.m. to 8 p.m. Eastern time, to provide comprehensive support for all Human Resources-related inquiries and transactions. Call 888-MY-HR-ESC (888-694-7372) or email HRESC@amtrak.com.

For assistance with technical intranet or Employee Information Portal login issues, see the help links on the login page or call the Amtrak Help Desk at 800-772-4357.

Operations: A Health and Safety Fair will be held for employees in operating departments at the Midway Maintenance of Way Base on June 2 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

PSSA: The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1. Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

Safety: A revised Safety Bulletin was issued last week providing guidance on identifying and working with asbestos in Amtrak facilities. For details, visit the intranet under "Safety" → "Safety Resource Library" or call the Industrial Hygiene group at ATS 777-3126.

Human Resources: To view and apply for jobs electronically, employees must use the new Employee Information Portal. To log in, go to Amtrak.com "Inside Amtrak" → "Employees" or go directly to <https://cip.corp.nrpc/irj/portal>.

New Employee Resources for Payroll and Human Resources Assistance Available

Employees with questions about their paychecks can now call a new toll-free Payroll hotline dedicated to responding to employees' inquiries. Support staff will answer calls on weekdays between 8 a.m. and 6 p.m. Eastern time. Employees who leave a message after those hours will get a response within one business day. The new toll-free Payroll number is 866-247-2915 or ATS 777-4823.

For assistance with any Human Resources-related inquiry or transaction other than paycheck questions, call the new Employee Service Center weekdays from 8 a.m. to 8 p.m. Eastern time at 888-MY-HR-ESC (888-694-7372) or e-mail HRESC@amtrak.com.

Amtrak Launches National Recovery and Resiliency Exercise Program

To further strengthen Amtrak's ability to provide America with safe and reliable passenger rail service in the wake of a large-scale emergency, the company is launching a Recovery and Resiliency Exercise Program.

The program, which will involve employees from every department, includes a series of exercises that will help preserve the rail system's operational viability following a large-scale emergency.

"With these exercises, we will talk through our current plans, identify gaps, and improve the way we operate during an emergency," said William Crosbie, chief operating officer.

Exercises will be conducted nationwide and will specifically challenge the 15 Station Action Teams currently in place at major locations. Three SATs have volunteered to pilot the program: San Diego, Chicago and Baltimore. Each will hold a discussion-based exercise (commonly referred to as Tabletop Exercises) in July where teams are presented with a scenario and talk through how they would respond. Upon completion of the local exercises, an Executive Committee-level tabletop exercise will take place in September 2010.

This program will utilize the Department of Homeland Security's Homeland Security Exercise and Evaluation Program, a proven method for preparing individuals to respond to and recover from potentially disabling disruptions of critical services. It is funded by the DHS Transportation Security Grant Program.

Every aspect of this exercise series will be carefully analyzed in order to learn as much as possible and make improvements to the policies and procedures currently in place.

"This program will better prepare us to minimize our vulnerabilities, and advance our preparedness and response to real-world attacks. It will be a component of an overall Continuity of Operations plan for Amtrak," said Susan Reinertson, chief operations administrator and director of the program.

New Piedmont Service Begins This Week

Amtrak and the state of North Carolina will begin operating two additional *Piedmont* trains on June 5, increasing the state's sponsored passenger rail service to six daily trains.

Piedmont service operates between Raleigh and Charlotte, North Carolina's two largest cities. The new trains will provide midday service to complement the existing morning and late afternoon *Piedmont* departures. The New York-Charlotte *Carolinian* also serves the two cities with morning and evening service.

As demand for passenger rail service in North Carolina grows, six more trains are planned to be added over the next seven years.

Marketing and Product Development:

An event is being held on June 10 at the Santa Fe Depot in San Diego to celebrate the 10th anniversary of the *Pacific Surfliner*.

Marketing and Product Development:

Based on a successful three-month trial run, AmtrakConnectSM wireless Internet is now a free standard service offering for all *Acela Express* passengers. A request for proposals has been issued to install wireless Internet on the entire fleet nationwide.

Joe Boardman Discusses Growth with Bloomberg News

President and CEO Joe Boardman told the Bloomberg News editorial board in an interview on Friday afternoon that Amtrak appears to be on track to set a ridership record this year. The nearly hour-long interview covered a variety of topics including safety and security improvements, network planning and fleet replacement.

“We’re seeing growth. We retained a lot of passengers even in the teeth of the recession. People want choices and one of the choices they want is rail,” said Boardman, noting that Amtrak currently has a higher share of the air/rail market than it has ever had before.

According to the most recent quarterly data, Amtrak has 65 percent of the market for travel between New York and Washington, D.C., and 52 percent between New York and Boston.

“People are riding the railroad and it’s not just because fuel prices are higher, it’s also because there’s an improvement in customer service, there’s an improvement with Wi-Fi now on *Acela*.”

In addition to capturing more travelers along existing routes, Boardman explained to editors and reporters that the company is focused on expanding state partnerships to grow the national rail network.

“I think Amtrak is the lifeline to an awful lot of people in this country ... This is America’s railroad. We need to provide that connectivity. A transportation system that doesn’t provide connectivity isn’t a transportation system ... and that’s part of the Amtrak advantage — that we’re connecting across the country and providing that service.”

The company is working closely with numerous states across the country to apply for the next round of federal transportation funding to make investments and improvements in passenger rail.

When asked how he thinks Amtrak will be able to accomplish its growth objectives, Boardman explained that the company has two critical competitive advantages over other rail operators. The first is its existing national network, the second is its people.

“There isn’t anybody in this country that knows how to run electrified rail other than Amtrak. There isn’t anybody in this country that knows how to build and maintain [high-speed] track other than Amtrak. The people at Amtrak are the key to its success,” he said.

Following the interview, Boardman did a live segment on Bloomberg TV. To see the on-air segment, go to www.bloomberg.com and click “TV and Radio” → “CEO Spotlight.”

June 14, 2010

Prohibition Against Firearms in Checked Baggage Remains in Effect Until December

While Amtrak is submitting a report to Congress today on its preparations for accepting firearms in checked baggage, the company's current policy remains in effect.

Benefits: Effective July 1, agreement-covered employees and their eligible dependents will receive vision care benefits through EyeMed Vision Care. Although VSP will no longer be the vision care provider, the plan benefits have not changed. Within the next two weeks, employees will receive a welcome package from EyeMed that will include vision ID cards, a summary of benefits, and a list of the 10 closest participating eye doctors.

Amtrak's current policy prohibits all firearms, ammunition and other weapons aboard its trains. This includes any being carried on the person, in carry-on baggage or in checked baggage. Employees should take note that this policy remains in effect until Amtrak begins firearm carriage service on Dec. 15, 2010.

A law passed last year requires Amtrak to implement the procedures necessary to provide storage and carriage of firearms in checked baggage cars and at Amtrak stations that accept checked baggage, within one year of the bill's enactment. This requirement applies solely to checked baggage, not carry-on baggage.

"Employees are reminded that we will not carry any firearms for passengers prior to December 15," said Amtrak Police Chief John O'Connor. "Anyone attempting to bring any type of gun or weapon onto a train should be reported to Amtrak police immediately."

Briefings to Focus on Providing Excellent Service to Passengers with Disabilities Begin This Week

A series of briefings for front-line employees that will begin later this week will provide important reminders about best practices in assisting passengers with disabilities.

The briefings take place in advance of the 20th anniversary of the enactment of the Americans with Disabilities Act (ADA) on July 26. Numerous events and conferences recognizing this anniversary are planned this summer around the country, and it is expected that many attendees will travel to these events via Amtrak. This provides a great opportunity for Amtrak to showcase its ability to provide excellent service to this important group that relies on Amtrak as a favored mode of transportation.

"Amtrak is proud of its role as an important mode of transportation for people with disabilities and aims to continue to provide excellent service for this group of passengers," said Kevin Scott, chief, Service Delivery.

Starting this week and for a two-week period, a "Focus On" will be distributed to on-board service and station employees as well as Amtrak Police Department personnel. Contact Center agents and ticket agents will be provided similar information.

Safe-2-Safer Underway Across the System

This week, the Pacific and Pacific Northwest Divisions are beginning the rollout process for Safe-2-Safer, and managers and supervisors are gearing up to begin safety leadership training. The rollout is now in progress across the system, marking an important milestone in the company's quest to improve its safety practices by adding new processes built around data and teamwork between union and management employees.

"It's been almost exactly one year since we first started Safe-2-Safer by conducting a survey and employee focus groups to learn more about employees' attitudes toward safety," said Vice President, Transportation Richard Phelps, the executive sponsor of Safe-2-Safer. "We've made tremendous progress so far, thanks to the time and effort put in by employees, managers and our union leaders."

The launch of Safe-2-Safer has been initiated in phases by geography, beginning in the Mid-Atlantic Division last fall and progressing to the West Coast. According to Safe-2-Safer Senior Director Peter Hall, results from divisions that began the program first are very encouraging.

In the Mid-Atlantic Division, for example, every manager and supervisor has participated in two leadership training modules, Steering Committees comprising union members are in place and peer-to-peer observations are beginning as part of Safe-2-Safer's Behavioral Accident Prevention Process (BAPP). These anonymous observations provide the data that will help Steering Committees identify risks at their local workplace and address the causes of those risks.

"I firmly believe that I'm helping to make a difference toward changing our safety behaviors in a positive fashion, while helping create a better environment where management and labor employees work hand-in-hand toward a common goal, which is safety for all," wrote Felicia Thompson in a message which is currently posted on the intranet home page. Thompson is a conductor who was selected for a two-year term as the full-time Safe-2-Safer Facilitator for Transportation in the Mid-Atlantic Division.

"As the other departments and divisions begin BAPP in the coming weeks and months, I encourage people to get involved and consider joining your local Steering Committee, applying to become a Facilitator, and most importantly, be willing to let your peers observe you working so they can make your workplace even safer," she wrote.

"The local Steering Committees are the ones who really drive this and I've been incredibly impressed with their commitment and the level of credibility they've brought to Safe-2-Safer," concluded Phelps. "The General Chairmen have done an excellent job of selecting the right people to represent their unions."

Operations Update: Beginning today, schedules for trains operating between Niagara Falls, Albany-Rensselaer and New York will be adjusted to accommodate track work and engineering projects near Yonkers and along the Empire Connection to New York. The work is scheduled for completion on Nov. 21.

Engineering: Fence Gangs R-902, R-903 and R-904 are continuing their work this week installing right-of-way fencing at various locations along the Harrisburg Line and Northeast Corridor. So far this fiscal year, the gangs have installed 20,532 feet of fencing.

Benefits: Effective July 1, agreement-covered employees and their eligible dependents will receive vision care benefits through EyeMed Vision Care. Although VSP will no longer be the vision care provider, the plan benefits have not changed. Employees will soon receive a welcome package from EyeMed that includes vision ID cards, a summary of benefits and a list of the 10 closest participating eye doctors.

Customer Service: Front-line managers and supervisors across the system are providing important reminders to employees about best practices in assisting passengers with disabilities ahead of numerous events and conferences recognizing the 20-year anniversary of the Americans with Disabilities Act on July 26. Materials were issued last week to applicable departments. Transportation managers are asked to record these briefings in TDRS using their respective job briefings code.

Operations: A Health and Safety Fair will be held for Operations employees at the Providence Maintenance of Way Base on June 29 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Environmental Health and Safety:

Amtrak has expanded its sponsorship of the Student Conservation Association to cover projects in nine cities across the country. The SCA provides environmental education and green jobs training. Reduced-cost travel will be provided to students as they complete projects related to trail and habitat restoration, invasive species removal and historical preservation.

Update on NEC Business Travel

Demand for Northeast Corridor trains is once again strong, and *Acela Express* is regularly selling out. Employees are reminded to use *Northeast Regional* service for business travel whenever possible in order to protect revenue space on *Acela*, unless there is a compelling reason to use the high-speed service.

Additionally, contractors and vendors should not be provided travel vouchers for *Acela Express* unless their work is directly related to that service or there is some other clear, compelling reason to do so.

“We understand that many employees have to travel frequently along the corridor on Amtrak business, but where employee travel occurs on a peak-period *Acela* departure, which is often sold out, we risk displacing paying customers and diluting ticket revenues,” said Emmett Fremaux, vice president, Marketing and Product Development.

Unlike other corridor services, business or personal pass travel on *Acela Express* requires tickets. No flash pass travel is allowed. Detailed information on employee pass travel rules is available on the intranet under “Employees”→ “Policies.”

Amtrak Assumes Full Operations for Metrolink Service

Amtrak Train and Engine crews today began operating all seven lines of the Los Angeles-area Metrolink commuter rail service. Amtrak officially took over the operation on Saturday, operating the four lines that provide weekend service. Under the terms of the four-year contract, Amtrak will provide Train and Engine crews along with management and support staff to operate the 512 route-mile network that covers six counties in Southern California.

The Southern California Regional Rail Authority selected Amtrak to provide operating service last fall and the two organizations signed a formal contract in March. The contract includes two additional three-year extension options. Amtrak previously operated Metrolink from 1992 to 2005.

Expanding commuter and state-supported operations service is a key element of Amtrak’s growth strategy. Amtrak will continue to seek new partnership opportunities where it can leverage its expertise in rail operations, safety performance, business support functions and other competitive advantages.

New Board Members Confirmed

Three rail industry and business veterans who were nominated by President Obama to the Amtrak board of directors were confirmed by the U.S. Senate last week, clearing the final hurdle for them to be sworn in and officially join the board.

Anthony Coscia, Bert DiClemente and Jeff Moreland are expected to join Chairman Tom Carper, Vice Chairman Donna McLean, U.S. Transportation Secretary Ray LaHood, President and CEO Joe Boardman and Director Nancy Naples in time for the July board meeting.

“We welcome our newest board members with confidence they will contribute their considerable knowledge and experience to advance Amtrak’s growth strategy and efforts to make the nation’s railroad safer, greener and healthier,” said Carper.

Coscia is a partner at New York law firm Windels Marx Lane & Mittendorf, and has served as chairman of the Board of Commissioners of the Port Authority of New York and New Jersey. DiClemente served as vice president at CB Richard Ellis, Inc., the world’s largest real estate company, and has 20 years of experience working on Capitol Hill. Moreland has 32 years of railroad experience, and was most recently executive vice president of public affairs at BNSF Railway.

July 6, 2010

Heat Wave Continues in the Northeast

An early-summer heat wave will continue through the rest of this week in the Northeast, as temperatures in many areas are expected to reach record-breaking highs. Employees in the region should act quickly if they recognize heat stress symptoms such as heat exhaustion and heat stroke in themselves, co-workers or passengers.

Symptoms of heat exhaustion include headaches, dizziness or lightheadedness; weakness and moist skin; irritability or confusion; and upset stomach or vomiting. People suffering from heat stroke will have dry, hot skin with no sweating; become confused or lose consciousness; and suffer convulsions.

To prevent heat stress, try to block out direct sun; use cooling fans or air conditioning where possible; drink plenty of water (about 1 cup every 15 minutes); wear light-colored, loose-fitting clothes; and avoid caffeine. If you observe someone who appears to be suffering from heat stress, call 911 or Amtrak Police Department (1-800-331-0008). Move the person to a cool, shaded area and loosen or remove heavy clothing. Provide the person with cool drinking water, and fan and mist the person with water.

Supervisors of employees who work outside should be familiar with symptoms of heat stress and make sure that drinking water is made available to them.

“Remember to follow the principles of Safe-2-Safer — look out for one another and reinforce safe behaviors,” said President and CEO Joe Boardman. Because heat can cause confusion, employees are reminded to pay close attention to the task at hand. “Stay hydrated and take a break if you need to,” he added.

On the Operations front, protect locomotives are stationed along the Northeast Corridor and crews are positioned to step in when needed, while mechanical technicians will be riding trains that may be problematic.

Should a train lose head-end power, employees should put the passengers first. Conductors should be in regular communication with CNOC to monitor on-board conditions, help assess passengers’ special needs and formulate appropriate responses. Crews are reminded to make frequent announcements aboard a disabled train, even if the information remains the same. Additional water and other beverages are being stored aboard trains and Amtrak Police Department patrol vehicles are being stocked with water to bring to the disabled train. In the event that it becomes necessary to transfer passengers to another train, no train capable of accepting additional passengers is to pass the disabled train.

In addition, crews and station personnel should watch for symptoms of heat stress in passengers aboard trains and in stations. Loads are heavy this holiday week, and passengers rushing for trains and carrying heavy luggage can become overheated easily.

More information about working in hot conditions and heat stress is available on the Intranet under “Safety.”

Safety Policy Update: The Amtrak Safety Policy has been updated to include Safe-2-Safer risk-reduction principles in the job planning guidelines. The new policy can be found in the Operations section of the Amtrak Policy and Instruction Manual posted on the intranet under “Library” → “Policies.”

Travel Policy Update: The meal reimbursement section of the Travel Policy and Reimbursement Business Travel Policy has been revised. Employees must now input actual meal costs on their Expense Report e-form. Any meal over \$10 requires a receipt and total meal expenses may not exceed \$55 per day. The current daily meal and hotel maximum rates, which are subject to change, are posted on the intranet under “How We Work” → “Management Employee Business Travel.” The full policy is posted the Intranet at “Library” → “Policies” → “Finance.”

Transportation: Many disability groups are hosting conferences and events this summer and Amtrak expects many attendees to travel by train. Details on dates and locations were distributed last week in OSA 10-32. Employees should refer to Focus On 10-04 for reminders on how to best assist passengers with disabilities.

Marketing and Product Development: Amtrak is teaming up with the movie *Cats & Dogs: The Revenge of Kitty Galore* to offer a chance to win a grand prize trip for four to anywhere Amtrak travels. The sweepstakes runs until July 31. To learn more, visit www.catsanddogsmovie.com.

Stations Update: Amtrak Chairman of the Board Tom Carper will attend a groundbreaking ceremony for a new, state-funded Pontiac, Mich., station on July 16. The modern and energy-efficient multi-modal facility will serve Amtrak's *Wolverine* service in addition to Greyhound buses, replacing the existing trailer and unsheltered platform currently being used.

Operations Update: Effective July 12 through late August, many *Keystone Service* schedules will change between Harrisburg and Philadelphia, due to track improvements being performed along the route. Most eastbound trains will depart earlier, and westbound trains will depart later.

Amtrak Police Department: On July 15, the APD's San Diego Station Action Team will conduct a "tabletop exercise" with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak's Continuity of Operation planning.

Amtrak Partners with DHS to Promote Rail Security

Secretary of Homeland Security Janet Napolitano and Amtrak Vice President and Chief of Police John O'Connor recently announced that the Amtrak Police Department will be the first passenger rail police agency to partner with DHS in the launch of the Suspicious Activity Reporting Initiative, along with a number of other federal, state and local law enforcement agencies. This initiative aims to implement a centralized and collaborative process of collecting information about suspicious activities.

"We're establishing a unified approach at all levels of government to gather, document, process, analyze, and most importantly share information about terrorism-related suspicious activities," said O'Connor. "APD is pleased to become a part of this network of law enforcement agencies and we look forward to working closely with federal, state and local authorities."

The announcement was made in New York at a media event on July 1 where Napolitano also announced a nationwide "See Something, Say Something" campaign before departing on a promotional whistle-stop tour with stops in Philadelphia and Washington.

The partnership announcement coincided with a weeklong Operation RAILSAFE (Regional Alliance Including Local, State and Federal Efforts) exercise. The coordinated effort between APD, NYPD, TSA and other law enforcement agencies involved increased station patrols, additional security aboard trains, K-9 explosive detection sweeps and random passenger baggage screenings. The teams worked together to improve counterterrorism and incident response capabilities.

Similar to Operation RAILSAFE, an Operation ALERTS (Allied Law Enforcement for Rail and Transit Security) exercise was conducted by APD personnel with Metra and TSA agents in Chicago and parts of Wisconsin and Indiana. This was the first time any such program has been conducted outside the Northeast Corridor.

"We're planning more exercises like this one for the coming months because they help us cast an even wider net of security and make us very visible to the public to let them know we are here for their protection," said O'Connor.

Additional Virginia Service Begins Tomorrow

A new, state-supported *Northeast Regional* roundtrip between Richmond, Va., and Washington, D.C. begins tomorrow, bringing the total number of weekday *Northeast Regional* trains to five.

Amtrak Police Department: On July 22, the APD's Chicago Station Action Team will conduct a "tabletop exercise" with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak's Continuity of Operation planning.

Marketing and Product Development: Amtrak has launched a "Create Our Contest Contest" on Facebook. The summer-long campaign invites the general public to develop what will become the company's first user-generated contest. Entries must be submitted in essay or video form by August 2. More information is available at www.facebook.com/amtrak.

Sales Distribution: Based on successful testing at the BWI-Thurgood Marshall Airport Station, improved ticket stock will now be distributed throughout the system as new orders are placed. The thinner tickets use nearly 30 percent less paper, reduce production and ticket printer maintenance costs and contain improved counterfeit protection features.

The new frequency is the second train funded by Virginia. Service between Washington and Lynchburg began last October.

"State partnerships are crucial to expanding the passenger rail network in this country and Virginia is a model example," said Jay McArthur, principal officer, Policy & Development. "This service addition offers Virginians another easy, convenient, green alternative to driving along the I-95 corridor."

The new northbound frequency will operate as Train 174 on Monday-Friday, departing Richmond at 7 a.m. and making stops at Staples Mill, Ashland, Fredericksburg, Quantico, Woodbridge and Alexandria before reaching Washington and continuing to Boston. Train 164 will depart on Saturdays and Sundays at 6:35 a.m. The new Monday-Friday southbound frequency is an extension of Train 125 that will depart Washington at 3:55 p.m. On Saturdays, Train 87 will depart at 7 p.m. and on Sundays, Train 157 will depart at 4 p.m.

"With hourly trains in the morning and several afternoon trains to choose from, you can easily plan your business trip and get to work on the train instead of sitting in traffic," added Thelma Drake, director, Virginia Department of Rail and Public Transportation.

Chicago Hosts Civic Conversation This Week

Amtrak will host its sixth Civic Conversation in Chicago on July 21-22 as part of its Great American Stations Project. The event brings together Midwest community leaders, elected officials and other stakeholders to provide expert guidance on station development.

Special focus will be placed on best practices for renovating existing train stations and building new stations along planned routes between Chicago and cities in Illinois, Iowa and Wisconsin that are made possible by funding from the Recovery Act. Other topics will include real estate issues, compliance with the Americans with Disabilities Act and funding options.

To promote the new service, Amtrak Virginia is hosting a drawing for two free roundtrip tickets on *Northeast Regional* service at tonight's Richmond Flying Squirrels minor league baseball game. Fans in attendance can enter to win at the Amtrak Virginia booth inside the stadium. The winner will be announced during the game.

In addition to new service, Virginia has funded equipment rebuilds to increase the equipment pool and added new track capacity and infrastructure to service equipment at the Staples Mill Station.

Amtrak Celebrates ADA Milestone

On July 26, 1990, the Americans with Disabilities Act was signed into law to “establish a clear and comprehensive prohibition of discrimination on the basis of disability.” Amtrak celebrates the 20-year anniversary of the ADA and is proud to serve as an important mode of travel for people with disabilities.

Fleet Plan: On July 23, Amtrak announced plans to purchase 130 new single-level rail cars for the long-distance fleet. The five-year, \$298.1 million contract is being awarded to CAF USA, which is creating 575 jobs to perform manufacturing and final assembly work at its plant in Elmira, N.Y. The first car is scheduled to roll off the assembly line in October 2012.

Amtrak Police Department: On July 30, the APD’s Wilmington (Del.) Station Action Team will conduct a “tabletop exercise” with other Amtrak departments, local law enforcement and emergency response organizations as part of Amtrak’s Continuity of Operation planning.

“Over the course of the last two decades, Amtrak has taken significant steps to make travel on Amtrak more accessible and to enhance service to passengers with special needs,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

These special services are designed to make the entire Amtrak experience — from trip planning, to booking, to stations, to equipment, to on-board and station services — accommodating for passengers with disabilities.

Special services include assistance with boarding and detraining, at-seat meals, reading menus to customers with visual disabilities and writing on-board announcements for customers who are deaf or hard of hearing. Additionally, the company has made improvements to Amtrak.com to better serve passengers with visual impairments or who are color-blind. All of Amtrak’s trains meet or exceed the ADA requirements for accessible seating and all Quik-Trak ticket kiosks are fully compliant with ADA requirements.

“In addition to what we already have in place, we’re continually making improvements to better serve all of our customers,” said Chief Operating Officer William Crosbie.

Crosbie explained that new passenger information display systems (PIDS) are being piloted in stations as part of a capital program aimed at improving communication of important information to all customers, including those with hearing and visual disabilities. The company is also taking steps to expand the presence of wheelchair lifts while replacing those that are aging and obsolete. And as Amtrak acquires new equipment over the next 20 years, every new rail car will have improved accessibility.

However, for all the progress Amtrak has made, there are still challenges that must be overcome. Upgrading stations and making them fully accessible is a challenge that requires significant, dedicated funding and, in many cases, complex access and other agreements. Amtrak is conducting a capital improvement program to bring all designated stations up to the necessary standards.

Amtrak is also in the process of hiring an ADA program director who will be responsible for coordinating ADA work, as well as a manager of Disability Outreach in the Government Affairs department. These new staff members will augment Amtrak’s existing personnel in departments across the company who are dedicated to ensuring station and on-board accessibility.

Operation Changes: Select Northeast Corridor train schedules have been changed to reduce hold time that had been previously added to accommodate track work. *Keystone* Train 644 will depart Philadelphia five minutes earlier, while *Acela Express* Train 2190 and *Northeast Regional* Train 190 will depart New Haven, Conn., eight and four minutes earlier, respectively.

Marketing and Product Development: Amtrak will be featured in an episode of the TLC hit reality show “Cake Boss” on Aug. 16 at 9/8c. To promote the partnership, a fully wrapped *Acela Express* trainset featuring Buddy Valastro, star of the show, will run through August. Keep an eye out for employee contests for “Cake Boss” merchandise in the coming weeks.

PSSA: The President’s Service and Safety Awards Committee has announced that it will present all 2010 awards at a single ceremony rather than at multiple regional ceremonies, as in recent years. All PSSA winners and their guests will be invited to Washington, D.C., for a luncheon on Nov. 3. Regional luncheon ceremonies will still be held to honor employees reaching 30 or 35 years of service in 2010. Locations and dates for these events will be released soon.

Did You Know?

New Data Shows Improved Energy Efficiency

The latest edition of the U.S. Department of Energy’s Transportation Energy Data Book shows that Amtrak trains are now even more efficient than auto and airline travel.

According to the latest data, Amtrak is 20 percent more energy efficient than airlines on a per-passenger-mile basis, up from 19 percent in the previous study. Amtrak trains improved to being 30 percent more efficient than automobiles, up from 28 percent.

Amtrak also improved its absolute efficiency, by decreasing BTUs per passenger mile from 2,561 to 2,398.

Board Receives Update on Safe-2-Safer Progress

In conjunction with the program’s one-year anniversary, the Safe-2-Safer leadership team delivered an update to the board of directors at its meeting last week on the progress that has been made thus far, along with the challenges that still need to be overcome.

Safe-2-Safer was designed to be implemented over three years. Now a third of the way through the implementation, all divisions, contact centers and headquarters departments have begun the process of creating a workforce that is unified around safety and security through collaboration and communication.

“I can’t tell you how impressed I’ve been with individuals throughout the company who have taken it upon themselves to champion Safe-2-Safer in their division, shop or office,” said Richard Phelps, vice president, Transportation and Safe-2-Safer executive sponsor. “These folks have an infectious desire to change the way we work together to be safe and secure. They truly believe in Safe-2-Safer and I know we will succeed because of that.”

Since last July, every executive has been meeting regularly with a coach from BST, Amtrak’s partner in Safe-2-Safer. Additionally, more than 1,600 managers and supervisors have started the leadership training program to learn how to communicate more effectively with their teams and create an atmosphere of cooperation.

On the front lines, the Mid-Atlantic, Northeast and Southern Divisions have progressed into the implementation of the Behavioral Accident Prevention Process (BAPP). This process involves local Steering Committees made up entirely of union members working with their peers to reduce risks as much as possible.

“I believe we’re at the tipping point,” said Peter Hall, senior director, Safe-2-Safer. “As people build trust and see that this process not only keeps them safer, but also improves the relationships they have at work, they’ll get on board and we’ll see a real transformation.”

Downeaster Expansion is Underway

Amtrak officials were in Brunswick, Maine, this morning with Gov. John Baldacci, FRA Administrator Joe Szabo and representatives from the Northern New England Passenger Rail Authority for the kick-off of the *Downeaster* Expansion Project.

The project involves upgrading 30 miles of track to extend service north beyond Portland to Freeport and Brunswick. Service studies estimate that the expansion will increase ridership by approximately 36,000 per year upon completion in 2012.

The \$38 million investment is funded primarily with a \$35 million Recovery Act grant, with the balance contributed by the state of Maine. An estimated 200 jobs will be created to support the work.

Operation Changes: Beginning today, select northbound *Acela Express* trains will depart Washington 5-10 minutes earlier and select northbound *Northeast Regional* trains will depart Washington, Baltimore and/or Philadelphia 5-15 minutes earlier. These schedule changes are being made due to the completion of track maintenance.

Benefits: All non-agreement employees who added dependents to their Amtrak benefits plan prior to 2010 will soon receive a dependent verification package requesting documentation, such as a birth certificate or marriage license, that shows dependents are eligible for coverage. Employees that added dependents in 2010 have already complied with this request.

Engineering: Amtrak has reached an agreement with East Lyme, Conn., Selectman Paul Formica, the U.S. Coast Guard, local boaters and marine businesses that allows use of the Niantic River channel while keeping the Niantic River Bridge replacement project on schedule. The agreement permits channel closures on Monday and Tuesday nights through Oct. 15, the traditional end of the summer boating season.

Timetable Distribution Reminder

In advance of the new Fall-Winter System Timetable being distributed in November, station employees wishing to adjust their current allotment of timetables may contact Joe Wenclawiak (wenclawj@amtrak.com) or Keith Bonnacarrere (bonneck@amtrak.com) in the National Marketing group.

Timetable orders made within three weeks of the new version being issued will be held until the new timetable is available in order to keep obsolete products from being distributed to passengers.

Amtrak Gearing Up for 40-Year Anniversary

Amtrak will turn 40 on May 1, 2011, and in addition to celebration plans that are still being made, the company is publishing a commemorative book that will document the story of its first four decades. To make it a true representation of the railroad, employees are invited to submit photos of people, places and equipment for the book.

“We’re really trying to tell the story of Amtrak from every angle and as the saying goes, a picture is worth a thousand words,” said Joe McHugh, vice president, Government Affairs and Corporate Communications. “We’re seeking photos that represent a complete range of time periods, geographies and functions — whether it’s a car shop in the 70s or a call center in the 90s.”

Employees whose photo submissions are selected for inclusion in the book will receive photo credit. By submitting a photo, the employee is indicating that it is their property and that Amtrak has permission to publish it.

Because prints and slides will not be returned, employees are encouraged to have print photos or slides copied into digital form and e-mail their submission. This will also prevent one-of-a-kind items from being lost in the mail. Digital submissions should be 300 dpi (dots per inch) or better.

To submit a digital photo, e-mail it to Alvin.Riddell@amtrak.com. Print photographs and slides (black and white shots are welcome) should be packaged in a flat envelope marked “Do Not Bend” and mailed to:

Amtrak Corporate Communications
Attn: Doug Riddell 4E-328
60 Mass. Ave. NE
Washington, D.C. 20002

All submissions, via e-mail or hard copy, should include a description identifying the year, location and subject(s) in the photo. Amtrak cannot accept responsibility for any photos that are lost or damaged. The deadline for submissions is Aug. 18.

“The book will be called ‘Amtrak: An American Story,’ and we want it to be an enduring contribution to our nation on this important milestone in the company’s life,” said McHugh. “So what better way to tell the story than through the eyes and images of the people who built this railroad.”

Operation Changes: Amtrak *Cascades* service has returned to normal with the early completion of critical bridge maintenance by BNSF Railway. Trains are now operating between Bellingham, Wash., and Vancouver, B.C., ahead of the scheduled completion date of Aug. 18.

Hit Us With Your Best Shot!

This is the last week for employees to submit photos for inclusion in the company's 40th anniversary commemorative book. Photos of current and former employees at work during each of the four decades in all departments are still needed. Action shots will be favored over posed photos.

Because submissions will not be returned, employees are encouraged to copy print photos or slides into digital form and sent via e-mail. This will also prevent one-of-a-kind items from being lost in the mail. Digital submissions should be 300 dpi (dots per inch) or better.

To submit a digital photo, e-mail it to Alvin.Riddell@amtrak.com. Print photographs and slides should be mailed to:

Amtrak Corporate Communications
60 Mass. Ave. NE 4E-328
Washington, D.C. 20002

All submissions, via e-mail or hard copy, should include a description identifying the year, location and subject(s) in the photo. Submissions must be sent/postmarked no later than Aug. 18, and Amtrak cannot accept responsibility for any photos that are lost or damaged.

APD Receives Award for K-9 Program

At a recent ceremony in Alabama, the Auburn University Canine Detection Research Institute (CDRI) presented the War Eagle Spirit Award to Amtrak Vice President and Chief of Police John O'Connor and Inspector William Parker, manager of the department's K-9 program.

The award is in recognition of Amtrak's commitment and contributions to the field of K-9 detection. It is the first such award ever presented by the CDRI, the largest K-9 detection research program in the U.S.

"The Amtrak Police Department [has] a K-9 program that is second to none," said John Pearce, associate director of the CDRI. "Amtrak's K-9 detection program quickly became the benchmark for other K-9 programs...[its] innovative deterrence strategies and use of dogs is changing how mass transit K-9 detection operates."

The APD has had a relationship with Auburn University since 2007. Of the department's 48 K-9 teams, 34 of them have undergone training at the CDRI.

Watch Amtrak on "Cake Boss" Tonight, Win Prizes This Week

Earlier this year, Amtrak worked with Carlo's Bakery, featured on the TLC reality show "Cake Boss," to create a train-themed cake in honor of National Train Day. Tonight, the "Cake Boss" episode featuring the National Train Day cake will premiere. Amtrak is celebrating with all employees by giving away "Cake Boss" prize packs to 20 randomly selected winners of a trivia contest, which is being hosted on the Amtrak intranet.

Tune into "Cake Boss" tonight at 9 p.m. EDT. Then, log in to the Amtrak intranet anytime after 10 a.m. EDT on Tuesday, Aug. 17, to answer a trivia question about the show. The contest will be featured in the "News & Info" section of the intranet and will be open until noon EDT on August 20. Winners of the "Cake Boss" prize package will be selected randomly from all participants that have submitted correct answers. Entrants must be current Amtrak employees or contractors.

Operation Changes: Due to track work being performed by BNSF Railway, schedules for *Saluki* Trains 390 and 391, and *Illini* Train 392 will be adjusted between Carbondale and Du Quoin, Ill., on Aug. 24-25. Alternate transportation will be provided.

Operation Changes: On Aug. 28, Amtrak *Cascades* Train 513, which normally originates in Vancouver, B.C., will operate between Seattle and Portland only.

We Asked, You Responded!

Amtrak extends a “thank you” to every employee who participated in the recent “Cake Boss” trivia contest, as well as those who have submitted a photo for consideration in the upcoming book to commemorate the company’s 40th anniversary.

Earlier this year, Amtrak worked with Carlo’s Bakery, featured on the TLC reality show “Cake Boss,” to create a train-themed cake in honor of National Train Day. The “Cake Boss” episode featuring the National Train Day cake premiered last Monday. Nearly 600 employees took part in the related trivia contest on the Amtrak intranet last week. The 20 random prize pack winners are being notified this week.

Amtrak has also received more than 250 photo submissions for “Amtrak: An American Story,” which will be published next year to celebrate the company’s first four decades. Final selections are being made and employees who submitted selected photos will be contacted in the coming weeks.

Amtrak to Begin Revitalization Project in New York

In addition to a \$15 million safety improvement project and its ongoing efforts to remove graffiti and debris along the Northeast Corridor in New York City, Amtrak has begun a landscape revitalization project in the city to restore trees and shrubs, while also fencing a section of the right-of-way in Woodside, Queens.

The project is the result of extensive cooperation with the local community, U.S. Rep. Joseph Crowley and New York City Councilman Peter Vallone, Jr. Approximately 600 new trees and shrubs will be planted in addition to the installation of 1,350 lineal feet of standard and ornamental fencing.

When completed, the work will help keep debris out of the right-of-way and increase safety by preventing access to tracks. Total cost for the project is estimated at \$460,000.

“Our efforts in Woodside underscore Amtrak’s commitment to be a good neighbor and provide our passengers with a reliable, efficient and safe travel experience,” said Chief Engineer Frank Vacca.

New Medical Director Joins Amtrak

Paul J. McCausland, MD, MPH, recently joined the company as corporate medical director. In this Philadelphia-based role, he provides expert medical guidance to Amtrak by advising departments and programs as needed, while providing input on policy decisions related to medical issues. Dr. McCausland is also responsible for managing the Medical Services staff, which handles all medically-related activities including physical exams, medical surveillance programs and the evaluation of medical documentation.

Dr. McCausland is board certified in family practice and occupational medicine, and he is the immediate past president of the Philadelphia Occupational and Environmental Medical Society. Prior to joining Amtrak, he was medical director for Sunoco’s Northeast Refineries, which include five facilities in four states. In addition to earning his medical degree from the Hahnemann Medical College, he also holds a master’s degree in public health from the Medical College of Wisconsin.

Operation Changes: Beginning on Aug. 30, many *Northeast Regional* and *Acela Express* trains will operate according to an adjusted schedule for up to eight weeks between Boston and New Haven, Conn., due to track upgrades being performed in Rhode Island. Select westbound trains will depart 5-10 minutes earlier and all eastbound train schedules have been adjusted.

Accounts Payable Deadlines are Approaching

With the end of the 2010 fiscal year approaching, it is important that all company purchases and other liabilities incurred this year be accounted for before books are closed.

To meet this accounting requirement and help make Amtrak healthier financially, all employees must submit any unpaid invoices, purchase orders and eTrax requests to Accounts Payable as soon as possible. The table below outlines deadlines and cutoff dates.

YEAR END A/P CUTOFF SCHEDULE	
Item	Due Date
Deliver invoices to A/P to ensure entry into AAMPS	Sept. 15
PO Receivers (RNV) Accrual	Sept. 30
eTrax Payment Request Accrual	Oct. 11
A/P Invoice Accrual	Oct. 11
Final Day for eTrax eAccrual	3 p.m. Oct. 12
Reversal of all September Accruals	Oct. 20

Amtrak Takes Part in National Preparedness Month

As part of its commitment to safety and security, along with its strong relationship with the U.S. Department of Homeland Security, Amtrak is participating in the seventh annual National Preparedness Month throughout September.

National Preparedness Month is sponsored by the DHS through the Federal Emergency Management Agency's Ready campaign, which aims to inform individuals, families and businesses on how to prepare for an emergency or natural disaster.

Amtrak is hosting a series of events and activities at multiple work locations and stations throughout September. In addition to distributing information to passengers and employees on how families can prepare for an emergency, many of these events will include blood drives.

"Readiness comes in many forms and preparedness is everyone's responsibility," said Chief Operating Officer William Crosbie. "Be informed about the risks in your area — both work and home — and take action to be ready before an emergency arises."

A National Preparedness Month calendar has been produced for Amtrak employees. The calendar offers daily tips on how to increase safety and security at home and at work in the event of a natural disaster or emergency situation. The calendar can be downloaded on the intranet by clicking "National Preparedness Month Calendar" under the "Police" menu on the home page.

For more information, visit www.ready.gov or go to www.fema.gov.

Midwest Service Added for Labor Day Weekend

As consumers aim to enjoy the last summer holiday of the year, Amtrak is capitalizing on increased demand for travel to Lake Michigan destinations by adding service between Northern Illinois and Western Michigan over Labor Day weekend.

"People want day trip and weekend travel options to beaches along the lake and we're responding by providing extra early morning and late evening trains between Kalamazoo and Chicago," said Superintendent, Road Operations Moe Savoy.

From Sept. 2-7, five daily roundtrips will be offered along the route. One-way adult fares will begin at \$21.

Operation Changes: On select dates through Nov. 9, *Lincoln Service* and *Texas Eagle* trains will operate according to an adjusted schedule between St. Louis and Chicago due to Union Pacific track maintenance. Alternate transportation will be provided for some trains on affected dates.

Finance: Employees are reminded that all unpaid invoices, purchase orders and eTrax requests must be submitted to Accounts Payable as soon as possible so they can be recorded before the close of the fiscal year. To ensure entry into AAMPS, invoices must be delivered to Accounts Payable no later than Sept. 15.

Think It's Fraud? Report It.

Just as Amtrak employees are an important line of defense against crime and potential terrorism, you are also an important part of the company's effort to fight fraud.

Amtrak spends millions of dollars each year on supply and service contracts with outside vendors. These contracts are susceptible to fraud and Amtrak needs employees to report any suspicious activity.

Some common schemes include: material and time overcharging, where the contractor bills the company for more material or time than is actually used to complete the job; bid rigging and collusion, which involves competing firms cooperating on a bid to ensure award and increase profits; and substituting lower-cost products for those included in the contract to increase profits.

Any suspected fraud should be reported to the Amtrak Office of Inspector General at 800-468-5469 or www.AmtrakOIG.gov. Reports may be made anonymously and will be kept confidential.

President Obama Announces Investment Plan for Rail

President Obama announced on Sept. 6 a plan to expand and renew the nation's roads, railways and runways as part of his administration's effort to support economic recovery and ensure long-term sustainable growth. Though specific details are not yet available, the announcement stated that investments would go toward overhauling Amtrak's aging equipment fleet, help construct and maintain 4,000 miles of track, build on previous ARRA investments in high-speed rail development and expand public transit systems.

In response to the announcement, Amtrak issued a statement supporting the president's plan. "President Obama's infrastructure investment plan ... is a smart move with major benefits for increasing personal mobility, jump-starting job creation and improving the environment. [He] understands passenger rail is a key component of America's transportation system and connects the nation in ways no other mode can. We applaud his vision for the future and his commitment to make the needed investments now to advance and bring to reality the next generation of passenger rail."

The president plans to work with Congress to enact an investment that would be front-loaded in the first year and would augment those investments already made through the American Recovery and Reinvestment Act of 2009.

Amtrak to Document "A Day in the Life" in October

As part of its preparations for celebrating its 40th anniversary next year, Amtrak is asking employees to participate in its effort to document a day in the life of the company by taking photos of their workplace and co-workers from Oct. 15-22. Photos will then be submitted to Corporate Communications to be used in a pictorial section of Amtrak's 40th anniversary commemorative book, which will be published next year.

"We want to capture this moment in the company's history by documenting all the sights, places and people who make this railroad function every day," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "The photos will be used in a visual timeline that shows everything we do during a 24-hour period to operate our service."

Employees in offices, contact centers, aboard trains, in stations and mechanical shops and at engineering project sites are asked to take photographs at various points during the day. The goal is to show the complexity and around-the-clock nature of Amtrak operations.

A *Special Employee Advisory* will be issued in the coming weeks with full details on how to submit a photo and other requirements. Additionally, more information about other initiatives planned for the company's 40th anniversary will be covered in the October issue of *Amtrak Ink*.

Operation Changes: From Sept. 19-21, southbound *Carolinian* Train 79 will operate as a combined train with *Palmetto* Train 89 at all stations between New York and Rocky Mount, N.C. Upon arrival in Rocky Mount, the trains will be separated and Train 79 will operate to Charlotte according to the normal schedule.

Finance: Employees are reminded that all unpaid invoices, purchase orders and eTrax requests must be submitted to Accounts Payable as soon as possible so they can be recorded before the close of the fiscal year. To ensure entry into AAMPS, invoices must be delivered to Accounts Payable no later than Sept. 15.

Payroll: All employees can now view their paycheck online, days in advance of it being issued. Log on to the Employee Information Portal, and go to “Benefits and Payment” → “Salary Statement.”

Amtrak Joins Unions and FRA in “Close Call Reporting”

Amtrak announced today its participation in a risk-reduction pilot program that allows employees to confidentially report “close call” events that could have resulted in an accident or injury. Close Call Reporting is sponsored by the Federal Railroad Administration, and Amtrak is partnering with the Brotherhood of Locomotive Engineers and Trainmen (BLET) and the United Transportation Union (UTU) Conductors and Yardmasters to launch the program at several rail yards in the Northeast, Midwest and West Coast.

“We want to take safety to the next level by identifying and then mitigating or removing risk before a serious incident occurs,” said President and CEO Joseph Boardman.

By reporting close calls anonymously and without the potential for disciplinary action, employees and managers will be able to identify potential risks and take action to remove any barriers to safety that might exist. To ensure the confidentiality of any close call reports, employees will report events to NASA, which has years of experience with risk-reduction, for processing. Then, a Peer Review Team with representatives from Amtrak, FRA, BLET and UTU will analyze the report and determine ways to reduce the risk of future incidents.

Examples of a close call event include leaving a piece of equipment unsecured to operating a train beyond its track authority. Incidents that do result in an injury or accident must still be reported through the traditional reporting structure.

“Close Call Reporting aligns perfectly with our Safe-2-Safer approach,” said Chief Operating Officer William Crosbie. “It focuses on reducing risks through better relationships between employees and managers, and collaboration between management and unions.”

As of press time, nearly every unit within BLET and UTU had signed on to Close Call Reporting. “We are continuing to work in partnership with UTU Zone 1 leadership so they are comfortable and confident about joining the program,” said Crosbie.

Ridership Remains Strong; Record Year Still Possible

Ridership and ticket revenue numbers for August are in, and with only one month remaining in the fiscal year, Amtrak is still in position to possibly set an all-time annual ridership record. The company carried 2.54 million passengers in August, generating \$152 million in ticket revenue. Year-to-date totals for ridership and revenue are at 26.4 million and \$1.6 billion, respectively. Amtrak will need to carry approximately 2.3 million riders in September to set a record.

“If we all do our best to provide service that results in a repeat trip or prompts just one or two more ticket sales over the coming weeks, it could make the difference. This is an opportunity for us to capitalize on the collaboration and teamwork we’ve been working so hard to improve throughout the company,” said Emmett Fremaux, vice president, Marketing and Product Development.

Operation Changes: Due to track work being performed by the San Diego Northern Railroad, *Pacific Surfliner* trains will be cancelled at most station stops from San Diego to San Juan Capistrano or Irvine on September 24-26. Alternate motorcoach service will be provided at most station stops where train service has been cancelled.

Marketing and Product Development: Passengers will once again have the chance to view fall foliage aboard the "Great Dome" car. The car will operate as part of the *Adirondack* from Sept. 23 through Oct. 24, and as part of the *Cardinal* from Oct. 30 through Nov. 12.

Did You Know?

Sept. 15 marked the 30th anniversary of Caltrans-funded Amtrak Thruway Bus service connections. The original bus connections operated from Sacramento to Stockton, Calif., in connection with *San Joaquin* trains.

California and Amtrak now offer more than 250 daily Thruway departures along 19 routes that serve more than 120 offline cities and 42 train stations.

Flu Vaccinations Offered to All Employees

In its effort to become healthier, Amtrak is offering flu vaccinations to all employees at no charge for the second straight year. On-site immunization clinics will be set up at approximately 50 major work locations throughout the system beginning in October, or employees may obtain a voucher for a free flu shot at a local healthcare provider.

"As many as one in five Americans get the flu every year, and most don't realize it is not just a bad cold, but a serious respiratory disease," said Corporate Medical Director Paul McCausland. "I encourage all of us to get vaccinated for our own health and the health of our families, friends and passengers."

To improve upon last year and ensure there are no vaccine shortages, Amtrak has contracted with a new vendor this year to administer the flu vaccination program. The vaccine provided this year protects individuals from two "seasonal" flu virus strains as well as H1N1.

"More than 4,500 employees took advantage of this program last year, and we hope many more will get vaccinated this year," said Roy Deitchman, vice president, Environmental Health and Safety.

Dates and times of on-site clinics will be posted in work locations over the coming weeks. Information, along with directions on how to obtain a voucher, will be posted on the intranet under "Safety" → "Health" within the next two weeks.

Only Amtrak employees are eligible for the on-site immunization clinics and vouchers. Contractors and dependents are not eligible. Employees who have already paid for a flu vaccination may request reimbursement by mailing a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
60 Mass Ave. NE, 3W-104
Washington, D.C. 20002

Reimbursement claims must be submitted no later than Oct. 1. The vaccination cost, up to \$30, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for processing.

Amtrak to Submit Five Route Performance Improvement Plans This Week

Performance Improvement Plans will be submitted to Congress on Sept. 30 for *California Zephyr*, *Cardinal*, *Capitol Limited*, *Sunset Limited* and *Texas Eagle* service, as required in the Passenger Rail Investment and Improvement Act of 2008.

Operation Changes: On October 1-4, numerous schedule changes and train cancellations are required for *Keystone Service* and *Pennsylvanian* trains operating between Philadelphia and Harrisburg due to bridge upgrade projects.

High-Speed Rail: Industry expert Al Engel has been appointed to the new executive post of vice president, High-Speed Rail, effective Oct. 18. He will be responsible for advancing Amtrak's position as the preferred and premier provider of high-speed train service in America.

PSSA Winners Announced: Winners of the 2010 President's Service and Safety Awards were announced in a *Special Employee Advisory* on Sept. 24. To see the full list of winners, log on to the intranet and click "News" → "ATW/Advisories."

Five-Year Financial Plan to be Submitted to Congress

Amtrak is submitting to Capitol Hill this week its financial plan for Fiscal Years 2011-2015. However, because Congress has not yet appropriated funding for Fiscal Year 2011, the plan will be updated once final budget amounts are set. Until that time, Amtrak will operate under a Continuing Resolution, which is a legislative measure enacted by Congress to provide funding until regular appropriations are enacted.

The Five-Year Financial Plan will be posted on Sept. 30 on the intranet under "How We Work" → "Finance."

Since its creation in 2006, the Marketing and Product Development department has dedicated teams to make route-specific improvements in customer service and product quality. In 2008, the department launched its first formal Route Performance Improvement (RPI) program in collaboration with several other departments. Interdepartmental teams reviewed every aspect of six long-distance and corridor routes, then formulated an improvement plan to improve customer satisfaction, increase ridership and reduce operating costs. RPI programs were conducted on six additional routes in 2009.

"PRIIA basically requires that we continue our RPI efforts to maximize the value of long-distance service for passengers and for the company," said Brian Rosenwald, chief, Product Development. "If we can reach agreements with the host railroads, I'm confident our plans will generate the improvements that we want, and that Congress has requested."

Primary recommendations for the *California Zephyr* include customer service training and recognition programs for employees, and new equipment inspection and follow-up procedures. Recommendations in the *Cardinal* improvement plan are to implement daily service between New York and Chicago as well as improving food service, baggage handling and marketing strategy.

The key proposal for *Capitol Limited* service is the introduction of single-seat through-service at Pittsburgh, allowing passengers from Chicago to connect directly with cities along the *Pennsylvanian* route, including Philadelphia and New York. In addition to merging *Sunset Limited* and *Texas Eagle* into single daily service between Chicago and Los Angeles, the plan for these routes includes daily connecting service from San Antonio to New Orleans.

Each Performance Improvement Plan will be available on Amtrak.com on Sept. 30 under "Inside Amtrak" → "Reports and Documents," and on the Amtrak intranet.

PSSA: Winners of the 2010 President's Service and Safety Award will be honored at a ceremony on Nov. 3 in Washington, D.C., at the Renaissance Downtown Hotel. Invited winners must RSVP by Oct. 20 to 202-906-2488.

High-Speed Rail: President and CEO Joe Boardman and Al Engel, incoming vice president of High-Speed Rail, were in Philadelphia last week to unveil the company's bold vision for next-generation high-speed rail service along the Northeast Corridor. Video of the event can be viewed on the new multimedia section of the corporate intranet. Click the link in the "Multimedia" tab at the bottom of the intranet homepage.

Chicago Union Station Upgrades to Benefit Passengers

Amtrak Chairman Tom Carper, Illinois Gov. Pat Quinn and Illinois Transportation Secretary Gary Hannig were at Chicago Union Station today to announce major renovation plans for the historic station that served more than 3 million passengers last year.

The \$40 million project will create approximately 100 jobs and nearly double the seating in Amtrak passenger lounges, increase the number of restrooms and provide air conditioning in the Great Hall. Project completion is scheduled for late 2012.

In concert with these passenger-related improvements, Amtrak is moving forward to create a redevelopment plan for the historic station's Headhouse Building. Jones Lang LaSalle (JLL) has been selected to conduct a feasibility study on the best plan for its use.

New Safety Metrics Replace Reportable Injury Ratio, Focus on Risk Reduction

In January, Amtrak announced that the FRA reportable injury ratio would no longer be used as a performance goal for managers, supervisors or departments as part of Safe-2-Safer, the ongoing process to improve Amtrak's safety performance and culture. Since then, employees from various departments and ranks have been working on a new set of safety metrics, which were announced recently in conjunction with the new fiscal year.

Safety performance goals will now be set according to the new measures, which are designed to track risk reduction, safety conditions and safe behaviors. Because the BAPP process is in its infancy at most work locations, metrics for observations and safety barriers removed will not be included in initial FY '11 monthly safety reports. Safety performance goals for managers and supervisors will not be set until data becomes available and benchmarks are set.

"Tracking injuries measures how often systems fail. Often times, the difference between an injury and a near miss is very small," explained Roy Deitchman, vice president, Environmental Health and Safety. "Our new metrics better indicate how safe a workplace actually is by measuring how well we are reducing the risks that make an injury possible in the first place."

The three new metrics used for safety performance at Amtrak are:

- 1. Number of quality behavior based observations per observer per month.* This metric is a measurement of the rollout of the Safe-2-Safer Behavioral Accident Prevention Process. The anonymous peer-to-peer observations are critical to helping Safe-2-Safer Steering Committees identify unsafe or at-risk behaviors in their work locations.
- 2. Number of safety barriers removed to reduce safety risks.* After barriers to safety are identified through the BAPP process, Steering Committees, Core Teams and management sponsors must work together to remove them. This metric tracks proactive efforts to make a workplace safer.
- 3. Percentage of injuries resulting in lost-time days.* This metric is aimed at tracking the severity of the injuries that occur, rather than just the total number of injuries that occur. It is measured as the percentage of total injuries that require an employee to miss work — whether it is one day or several months.

Deitchman also noted that Amtrak is still legally required to notify the FRA on all reportable injuries and illnesses and the FRA will continue to compare safety results by calculating the Reportable Injury Ratio, even though it is no longer used to set goals at Amtrak.

Marketing and Product Management:

Amtrak and LeapFrog, a leader in education innovation, have partnered to launch the LeapFrog Learning Journey Sweepstakes. The sweepstakes runs through Oct. 31. For more information, visit www.amtrak.com/leapfrog.

PSSA Correction: The *Special Employee Advisory* on Sept. 24 announcing this year's PSSA winners mistakenly omitted Howard G. Noll as a member of the Empire Safety Committee, which won Safety Committee of the Year. Additionally, the name of Sustained Excellence Award winner Ramesh Apanah was misspelled. Amtrak apologizes for the errors.

Annual Ridership and Revenue Hit All-Time Highs

Amtrak carried more passengers and generated more ticket revenue during the 2010 fiscal year than any other year in company history. Previous records were set in FY 2008.

"The resurgence in the popularity of rail travel, improved on-time performance and increasing difficulties associated with flying helped us draw in customers," said George Raed, chief, Market Research.

Amtrak finished the fiscal year with ticket revenue of \$1.7 billion, which was \$8.8 million more than in 2008. Ridership totaled 28,716,857 — just 450 more than in 2008. However, Raed noted that 2008 was a leap year, and that extra calendar day accounted for approximately 90,000 trips.

"The numbers are important, but it's what's behind them that tells the true story," wrote President and CEO Joe Boardman in a *Special Employee Advisory* issued earlier today. "It's the people — you, your co-workers and the passengers you serve — that make it happen. More and more people see passenger rail as the way to get to where they need to go, and when our front line employees put them first, they are the ones that help bring passengers back for another trip."

Company Information Protected by New Confidentiality Policy

Amtrak recently enacted a new Confidentiality Policy (P/I Number 9.1.0) that applies to all employees and all confidential company information. The policy aims to create a healthier Amtrak by better protecting corporate knowledge and assets.

Employees must protect confidential information and report any known or suspected incident where confidential information has been lost, improperly used or disclosed. Depending on the nature of the information, such an incident should be reported to the appropriate head of the Law, Amtrak Police or IT department.

Confidential information includes all information created or acquired by Amtrak that has not been made available to the general public, whether in electronic, paper or other form that an employee knows or has access to because of his or her job.

The full policy is posted in the Law section of the Policy and Instruction Manual on the intranet under "Library" → "Policies."

Free Flu Shot Vouchers Now Available; On-Site Clinics Also Scheduled Nationwide

In addition to hosting free flu shot clinics at Amtrak work locations across the system, the company is offering complimentary vouchers that allow employees to visit a local healthcare provider for a flu vaccination.

"We want every employee to have the opportunity to protect him or herself from the flu virus this year. So if you can't make it to an Amtrak on-site clinic, you can simply print the voucher to get a free vaccination," said Dr. Paul McCausland, corporate medical director.

Log on to <https://register.flushotsusa.com/Amtrak> to print the voucher and find a participating local healthcare provider. Employees will need to provide their full name, their employee ID number (omit any leading zeros) and contact information, including a personal or work e-mail address. A series of health-related questions must be answered to complete the registration process.

After completing the registration, the voucher will be sent via e-mail along with other directions. Please note that only current Amtrak employees may use the flu shot voucher. Call Mollen Services at 877-279-3588 for assistance with obtaining a voucher.

For a calendar of flu shot clinics being held at Amtrak locations, see the "What's New" section on the Health Services intranet page. Log on to the intranet and click "Employees" → "Human Resources-Health Services."

Operations Update: An agreement with the Canadian government related to border inspection fees clears the way for Amtrak to continue operating the second daily Amtrak *Cascades* roundtrip between Seattle and Vancouver that began last year in advance of the 2010 Winter Olympics.

Benefits Reminder: The open enrollment period for 2011 benefits elections will take place from Nov. 8-19. Elections can be made during that time at www.AmtrakBenefits.com. Employees will soon receive an enrollment packet with more details in the mail.

Remember to Submit Your Photos as Amtrak Documents "A Day in the Life"

At any hour of the day and night, someone, somewhere is helping keep the Amtrak system running. Employees are invited to capture our 24/7 operation in digital photographs now through Oct. 22 for a commemorative book that will be published next year honoring Amtrak's 40th anniversary. A chapter of the book will be devoted to "A Day in the Life" of our company.

Photos should feature employees doing what they do best in stations, shops, offices, aboard trains and at Engineering project sites. Photos should be no smaller than 300 dpi and must be received by Oct. 27. Digital photos and any questions should be directed to Ann Owens at 202-906-4404 or OwensA@amtrak.com.

Submissions must be accompanied by the photographer's name, phone number and e-mail address.

By submitting a photo, employees are indicating that Amtrak has permission to publish it. Employees must be able to secure photo releases from any individuals who are clearly identifiable in any photo they submit. All Amtrak and FRA safety and operating rules must be followed when taking photographs.

Notable Station Milestones Take Place This Week

Amtrak officials joined partners in the Northeast, South and Midwest to celebrate numerous station-related achievements.

Today in New York City, Amtrak took part in two events: a groundbreaking for the new Moynihan Station and an event honoring the 100th anniversary of Penn Station. In Florida, local, state and federal officials were on hand for the grand opening of the Sanford *Auto Train* terminal.

"These stations are great examples of what can be accomplished when local communities work with state and federal government to support passenger rail," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "Stations are not only an important element of the travel experience, but they also serve as a catalyst to economic growth and revitalization."

New York Gov. David Paterson, Sens. Charles Schumer and Kirsten Gillibrand, Congressman Jerrold Nadler, Transportation Secretary Ray LaHood and Mayor Michael Bloomberg participated in the Moynihan Station groundbreaking. The event included the signing of a final grant agreement that provides \$83 million in Recovery Act funds to New York for the project.

At New York Penn Station, a rare collection of photos, artifacts and other items commemorating the station's rich history, as well as Amtrak's role in the history of passenger rail, was on display today. Nadler and other officials from Amtrak, Long Island Rail Road and New Jersey Transit were on hand to kick-off the festivities. In addition, Lorraine Diehl, renowned author of "The Late, Great Pennsylvania Station," hosted a discussion about the station's most memorable moments over its 100 year existence.

The new Sanford *Auto Train* terminal is almost four times larger than its predecessor at approximately 10,000 square feet and can now accommodate 600 passengers. Amtrak Chairman Tom Carper helped christen the new facility, which will serve more than 244,000 *Auto Train* passengers annually. It was funded mainly by grants through the American Recovery and Reinvestment Act of 2008.

Additionally, local organizations in Mattoon, Ill., last week wrapped up a four-year project to improve the depot that serves six daily Amtrak trains. The \$3 million renovation was funded by federal transportation grants along with money raised by the Coles County Historical Society and grants from the city of Mattoon and the Illinois Department of Transportation. The station now serves all passengers better thanks to accessibility improvements made in accordance with the Americans with Disabilities Act.

Operations Update: Track work being performed by Union Pacific Railroad will affect *San Joaquin* and *Capitol Corridor* service through Oakland, Calif., on Oct. 25-29 and Nov. 1-5.

Benefits Reminder: During the upcoming benefits open enrollment period from Nov. 8-19, employees will have new, “green” ways to ask questions about their coverage. Simply log on to www.AmtrakBenefits.com to chat in real-time with an Amtrak Benefits Service Center representative, or send a question via e-mail.

Help Keep Employees and Passengers Healthier this Flu Season

Amtrak has again purchased various hand sanitizers for use at stations and aboard trains to help fight the spread of flu viruses and other germs. Employees are encouraged to order these products through the AAMPS system, rather than purchase sanitizer from an outside source.

Alcohol-based hand sanitizers, which are recommended for station and facility use, are available in one-liter (part number 47-123-00079) and two-liter (part number 47-123-00078) sizes. For use aboard trains, non-alcohol based sanitizers must be used. These are available in one-liter containers (part number 47-123-00085) or as hand sanitizing wipes (part number 47-123-00076).

Employees are also reminded that free flu shots are being offered around the system. Free vouchers for a flu shot from participating healthcare providers are also available. For more information, visit the “What’s New” section on the Health Services intranet page. Log on to the intranet and click “Employees” → “Human Resources-Health Services.”

FY '10 Performance Earns International Media Attention

After announcing all-time annual highs for both ridership and ticket revenue during FY '10, news organizations throughout the world took note. The widespread media coverage is helping to further promote Amtrak as the travel mode of choice for millions of Americans.

“We expect this attention to attract more ticket sales as people read about the popularity of our service,” said Joe McHugh, vice president, Government Affairs and Corporate Communications.

Following are excerpts from news stories that have been published over the last two weeks. Click the links for the full story or visit the outlet’s website and search “Amtrak Ridership”:

“Amtrak has benefited from the ‘remarkable lifestyle shift’ caused by smartphones, laptops and iPads that let travelers work and communicate almost everywhere, says Joseph Schwieterman, a transportation professor at DePaul University in Chicago. “It’s kind of a have-iPhone-will-travel kind of thing.”

[USA Today](http://www.usatoday.com) (www.usatoday.com)
Oct. 19, 2010

“North Carolina’s Amtrak ridership grew 15 percent in fiscal year 2010 – more than double the national Amtrak ridership growth rate during the same period.”

[Triangle Business Journal](http://www.bizjournals.com/triangle) (www.bizjournals.com/triangle)
Oct. 15, 2010

“Amtrak ridership and service have improved over the past several years with the help of increased U.S. government subsidies and political support in Washington for maintaining rail service outside the heavily traveled Northeast.”

[Reuters](http://www.reuters.com) U.S. Edition (www.reuters.com)
Oct. 11, 2010

“More than 572,000 passengers took Amtrak between St. Louis and Chicago in the just-completed federal fiscal year, a 13.1 percent increase that made the route one of the fastest growing in the country.”

[The State Journal-Register](http://www.sj-r.com) (www.sj-r.com)
Oct. 12, 2010

“AMTRAK, America’s government-owned passenger rail company, has had a good recession. But there’s a lot of good news in the railroad’s numbers, and, more importantly, some hints about where to go from here.”

[The Economist](http://www.economist.com) (www.economist.com)
Oct. 16, 2010

PSSA: Winners of this year's President's Service and Safety Awards, the company's highest honor, will be recognized at a ceremony in Washington, D.C., on Nov. 3.

Daylight Savings Time: Daylight Savings Time ends at 2 a.m. on Sunday, Nov. 7. Station personnel on duty at that time should set clocks back to 1 a.m. Stations that are closed at that time should adjust clocks the night before, prior to closing. Trains en route at 2 a.m. will proceed to the next station and hold there until the adjusted, Standard Time, departure time.

Numerous Flu Shot Clinics This Week

Amtrak is offering employees the opportunity to stay healthier this fall and winter by hosting free flu shot clinics across the country in November and December. The following clinics will be hosted this week:

New York Penn Station	Nov. 2
Rensselaer Mechanical Facility	Nov. 2
New York Division HQ	Nov. 3
North Brunswick (N.J.) M/W Base	Nov. 5
San Diego Station	Nov. 5

For a full schedule and details, log on to the intranet and click "Employees" → "Human Resources-Health Services" and scroll down to the "What's New" section.

Ethical Conduct and Conflict of Interest Forms Due Nov. 22

All non-agreement employees, including support staff and independent contractors hired prior to September 15, 2010, must complete a Certificate of Compliance (NRPC Form 1194) and submit the signed document to Human Resources for the official record. Send completed forms to laurie.barnaby@amtrak.com or fax them to 202-906-3558.

Additionally, all Executive Committee Members and Corporate Officers must also complete a Clayton Antitrust Act Statement (NRPC Form 1195) and mail it to the Vice President of Human Resources at 60 Mass. Ave. NE, 2E-230, Washington, D.C., 20002.

All completed forms are due by November 22. Both the Certificate of Compliance (NRPC Form 1194) and Clayton Antitrust Act Statement (NRPC Form 1195) are available on the Intranet on the "Human Resources" and "Forms" pages.

Kirk Serves as Southern Division Acting General Superintendent

Assistant Superintendent Tom Kirk has been appointed acting general superintendent of the Southern Division, following former General Superintendent Joe Wall's departure from Amtrak on Friday.

Kirk will manage the day-to-day operations in the division until a permanent replacement is selected. During this period, Mid-Atlantic Assistant Superintendent Al Scala will fill in as superintendent of operations for the division.

"Many of the employees in the division already know Tom well, and I ask that they give both him and Al the assistance they need to manage operations and deliver professional service in the Southern Division," said Chris Jagodzinski, general manager-East.

New "Smart ID" Badges Coming Soon

Employees in select locations will be issued new "Smart ID" badges beginning in December, with distribution continuing to all employees through January.

The new employee badges are more technologically advanced than current credentials, allowing the company to integrate them with existing and future systems to better ensure safety and security across Amtrak and its facilities.

Smart ID badges will not replace employee "flash passes" used for train travel. New badges will only replace current employee IDs used for access to buildings, IP Timeclock, TED and SupplyPro. No other systems or processes will be affected.

New badges will be distributed on site throughout the system. During the next few weeks, posters will be put up at each facility with details on when and where employees must pick up their new ID. More details, along with a distribution calendar, will be available on the intranet under "Police" → "Smart IDs."

Open Enrollment Begins Today

Amtrak has taken significant steps to improve the benefits administration and information provided to employees about their benefits. Employees can take advantage of those efforts beginning today as open enrollment for 2011 benefits runs now through Nov. 19.

When enrolling in 2011 benefits elections, employees will find an improved AmtrakBenefits.com website. In addition to being easier to navigate and providing a great deal of information, the site has new tools and features to help employees select the best benefits for their needs.

Employees can now chat online in real-time with a benefits representative to answer questions and provide assistance. Questions can also be e-mailed directly to a representative through the site.

Employees are reminded that all benefits elections will roll over if no changes are made, except for Health Care and Dependent Care FSA elections. Employees must re-enroll in these programs each year.

For more information, or to make 2011 benefits elections, log on to www.AmtrakBenefits.com or call the Amtrak Benefits Service Center toll-free at 1-800-481-4887.

Operations Update: On Sunday, Nov. 14, track work being performed by BNSF Railway will require the cancellation of several *Pacific Surfliner* trains, while others will operate on modified schedules.

Operations Update: Amtrak *Cascades* trains will operate with Superliner equipment this week as the trainsets normally used for the service undergo extensive exterior cleaning.

Fall-Winter Timetable Now in Effect

Schedules included in the Fall-Winter Amtrak System Timetable, which includes minor and seasonal operating schedules, go into effect today.

Notable changes include a new stop in Poughkeepsie, N.Y., for *Lake Shore Limited* trains, while the northbound *Silver Star* will now receive passengers at Richmond-Staples Mill, Va., which was previously a discharge-only stop.

Missouri River Runner Trains 311 and 314 now depart 45 minutes earlier to restore an eastbound connection from the *Southwest Chief* in Kansas City.

In the West, Richmond, Calif., is now part of the *California Zephyr* and *Coast Starlight* routes. California's Burbank Airport is another addition to *Coast Starlight* service.

Second Phase of Illinois High-Speed Rail Project Begins Today

After recently announcing record ridership in Illinois in FY '10, the state is set to begin the second phase of track upgrades along the Chicago-St. Louis corridor that will allow for high-speed train service. Under an agreement with the Illinois Department of Transportation, Union Pacific Railroad is installing new concrete ties and track switches along the corridor. Work between Springfield and Lincoln begins today.

Once the entire project is complete, *Lincoln Service* trains could operate at up to 110 mph (177 kph). The work is being completed in part with \$1.1 billion in federal stimulus funds designated for passenger rail corridor improvements. Other uses for Illinois' funds include purchasing new locomotives and passenger cars, additional grade crossing warning devices and safety technology.

Overall, the Midwest received \$3 billion for similar improvements to create the Chicago Hub Network. When completed, the network will connect more than 40 of the largest cities in the Midwest with passenger rail, including 60 daily roundtrips from Chicago. The Illinois Public Interest Research Group projects that the completed network will create 57,000 permanent jobs and support 15,200 new jobs during the 10-year construction period.

During the 2010 fiscal year, the Chicago-St. Louis corridor had the largest ridership increase in the Midwest. Total Amtrak ridership on routes operated in partnership with Illinois was 1.97 million, a seven percent increase from the previous year.

"These record numbers provide us with a glimpse of what is possible with future high-speed rail," said Gov. Pat Quinn. "Illinois will serve as the hub of a Midwest high-speed rail network that will provide travelers with a reliable and efficient travel option while attracting businesses that are demanding a 21st century transportation system."

Green Efforts Honored by TIME Magazine

Amtrak's partnership with the Oklahoma and Texas departments of transportation to test a biodiesel fuel blend to power the *Heartland Flyer* has been named on TIME magazine's list of "The 50 Best Inventions of 2010." The list is published in the Nov. 22 issue of the magazine.

Initial measurements of the biodiesel blend known as B20 (20 percent pure biofuel and 80 percent diesel) show it reduced hydrocarbons and carbon monoxide each by 10 percent, reduced particulates by 15 percent and sulfates by 20 percent.

Other inventions honored include the Apple iPad and a flying car from Terrafugia. To see the full list, visit www.time.com and click the "Best Inventions" link in the upper right corner.

Operations Update: On Nov. 21 and 22, passengers traveling on several *San Joaquin* trains will be provided motorcoach service between Fresno and Merced, Calif., due to BNSF bridge replacement project. Service will not be available at Madera. Additionally, Trains 711 and 717 will operate according to a later schedule.

Health Update: The American Cancer Society is hosting the annual Great American Smokeout this Thursday, Nov. 18. Amtrak is hosting related information sessions on Nov. 16 at Ivy City in Washington, D.C., and in Jacksonville, Fla. The event encourages smokers to quit for at least one day, hoping it will challenge them to quit permanently. According to Amtrak Medical Director Paul McCausland, smoking is the number one avoidable health risk for heart, lung and vascular disease. For more information, visit www.cancer.org.

Open Enrollment Extended to Nov. 23

The open enrollment period for employees to make 2011 benefits elections has been extended to Tuesday, Nov. 23. Employees should go to AmtrakBenefits.com to make 2011 benefit elections. Those who have not done so already will need to log in as a "first time user."

Please note that anyone who needs to update a dependent's social security number must call the Amtrak Benefits Service Center at 800-481-4887.

K-9 Teams Return from Training in Miami

The Amtrak Police Department hosted the second annual K-9 Unit Training Conference from Nov. 14-19 in Miami. The goal of the conference was to strengthen the department through intensive classroom and field training exercises.

Classroom training covered a variety of topics ranging from canine first-aid to techniques for recognizing various types of explosives. Field training included live-explosives demolition with the Miami Dade Police Department and firearms training at the Federal Air Marshall Field Office.

Finally, K-9 teams experienced interactive scenarios to test their skills in situations they may confront in the field, including bomb threats at a station, explosives hidden in a vehicle, abandoned luggage, and searching train equipment.

Open Enrollment Ends Tomorrow

The last day for employees to make 2011 benefits elections is Tuesday, Nov. 23. Employees who have not already done so should log in at AmtrakBenefits.com to make 2011 benefit elections, or call the Amtrak Benefits Service Center at 800-481-4887.

Thank You Photographers!

Thank you to the more than 80 employees who submitted photographs for the "Day in the Life" section of Amtrak's 40th anniversary commemorative book, which will be published next year.

With your help, we received more than 2,000 photographs for consideration that illustrate the hard work, dedication and industriousness of employees throughout the system.

Message from Joe Boardman

Dear Co-workers,

Early in my life, Christmas was my favorite holiday. I guess it was about the anticipation of the gifts and the drama of surprise around the tree on Christmas morning.

A number of years ago that thrill began to be replaced by an acknowledgement of how fortunate I was — some might even say blessed. It became natural, then, for Thanksgiving to become my new favorite holiday. It's a time to reflect on the bounty with which our nation, our communities and our company are blessed.

I have had the opportunity to know more and more of you, and I sense that many of you may feel the same way, and that you have probably gone through a similar transition over the course of your life.

I had the good fortune to become CEO of this company the day before Thanksgiving two years ago. Since then, so many of the wonderful members of the Amtrak team have worked hard and our dedication has resulted in great progress and many blessings.

Let me count just a few of our blessings:

- Having 200 new long-distance cars and electric locomotives on order.
- A new maintenance facility under construction in Miami.
- A new operation control center under construction in Chicago.
- All-time highs in ridership and ticket revenue in FY '10.
- A work culture that is improving thanks to your participation in Safe-2-Safer.
- Equipment that has been rebuilt even though some thought it could never be done.
- A vision for very high-speed rail in the Northeast.
- A newly rebuilt Wilmington, Del., station.
- Accessibility improvements at numerous stations.
- A very strong, award-winning K-9 team.

Hopefully each of you can add more to this list as you think about what to be thankful for this week. I know that our renewed focus on our customers is another one for which I am thankful. This is the time of year when so many people depend on us to get them to their families and loved ones in a safe and courteous way.

Thank you all for the hard work you do to make that happen. May each of you have a blessed and safe Thanksgiving.

Sincerely,

Joe Boardman
President and CEO

Nov. 29, 2010

Amtrak Achieves Best Thanksgiving Performance Ever

Thank you to all of the employees who played a role in making last week potentially Amtrak's best Thanksgiving week on record.

While the numbers are not yet final, preliminary numbers show estimated increases in ridership of 3 percent and ticket revenue of 7 percent over last year, as more than 700,000 traveled during the Thanksgiving week. We will report on the final results once they become available.

Deitchman Named to Board of Operation Lifesaver

Vice President of Environmental Health and Safety Roy Deitchman has been named to the Operation Lifesaver, Inc. Board of Directors.

Operation Lifesaver, Inc. is a national non-profit safety education group dedicated to eliminating deaths and injuries at railroad crossings and along railroad rights-of-way. The group has programs in all 50 states, with trained and certified presenters (including about 35 Amtrak employees) who provide safety talks to community groups, school bus drivers, professional truck drivers and students to raise awareness of dangers on the railroad.

"Roy's expertise and passion for safety will be of great benefit to Operation Lifesaver's Board," said OLI Board Chair Reilly McCarren.

"Mr. Boardman's support for our increased involvement with OLI activities, including the recent OLI *Common Sense* trespass prevention campaign and the Pacific Northwest Safety Train, are helping to reinforce and extend the reach of our railroad safety message," said Deitchman.

Deitchman will fill the board position being vacated in January by Amtrak Senior Safety Coordinator Alvin Richardson, Sr., who is retiring.

Next Round of SAM Training Begins in January

As the Strategic Asset Management (SAM) Program winds down its second round of site visits across the system, the next critical wave of activity will be focused on preparation for end-user training of new systems generally associated with finance and logistics.

Training for the SAM Release 1a audience — this applies to employees whose jobs include budgeting, accounting, materials management and procurement — is slated to commence on Jan. 17, continuing through March 25. During December, the SAM Program will be conducting workshops for its SAP instructors and the SAM Subject Matter Experts/Power Users who will be supporting the classes during training.

Amtrak management has been working with managers of the SAM Program to select the roles, tasks and curriculum of employees who are involved in Release 1a. The SAM program plans to release the schedules for these courses within the next month.

Those employees are strongly encouraged to discuss their anticipated schedules in detail with their managers, as soon as possible, to make sure that their curriculum and roles in the SAM Program are understood and that their training schedules are clear and manageable.

Training will be offered at 10 off-site locations in or near Washington D.C., Boston, New York, Philadelphia, Wilmington, Del., Beech Grove, Ind., Sanford, Fla., Los Angeles, Oakland and Chicago. Transportation to and from training facilities will be provided by the SAM Program. Any appropriate expenses for travel and accommodation will be reimbursed by the SAM Program as well.

Training locations are posted on the SAM Program page on the intranet under "How We Work" → "SAM Program." Any questions about the program or SAM training may be e-mailed to sam@amtrak.com.

Dec. 6, 2010

Acela Express Celebrates Ten Years of High-Speed Service

On Dec. 11, 2000, Amtrak became the first operator of high-speed rail in North America with the launch of *Acela Express* service between Washington and Boston. As Amtrak celebrates the service's 10-year anniversary this week, it thanks its employees for their commitment and passengers for their loyalty, while looking ahead to next-generation high-speed rail.

"This is a major milestone and we should all be very proud," said Al Engel, vice president, High-Speed Rail. "*Acela Express* represents the vision and innovation this company possesses. We need to use this knowledge and expertise to retain our position as the premier high-speed rail provider in the U.S., while expanding and improving service in corridors across the country."

Since the service's inaugural run, significant growth and service improvements have taken place. In FY '10, *Acela Express* accounted for \$440 million in ticket revenue and topped 3.2 million riders. In recent years, passengers have responded to service improvements such as better menu offerings, installation of leather seats and free Wi-Fi. All these accomplishments are even more significant when taking in to consideration the unique challenges of operating on a dense corridor with such heavy train traffic.

The latest data indicates that Amtrak earns 69 percent of the Washington-New York air/rail market and 51 percent between New York and Boston. These numbers are up from 45 and 27 percent, respectively, in 2001. Much of these gains can be credited to *Acela Express* service.

To celebrate the anniversary, Amtrak is offering *Acela Express* First class passengers free cupcakes, while passengers who buy one of the new sandwich offerings will receive a free baseball cap. Promotion of the anniversary is also being driven through special advertisements, e-mails to Amtrak Guest Rewards® members and social media outlets.

Celebrations for employees were hosted at noon today at crew bases in Boston, New Haven, Conn., New York and Philadelphia, as well as the Starlight Room in Washington Union Station.

In September, Amtrak unveiled its vision for the next generation of high-speed service in the Northeast with a conceptual plan for financially viable service that could cut trip times between Washington and Boston in half. Upon its full build-out in 2040, high-speed train ridership would reach 18 million passengers annually.

On Dec. 7, Engel will present the next generation high-speed rail vision at the Seventh Annual World Congress on High-Speed Rail in Beijing.

Commuter Services: The South County Commuter Rail Service begins operating on the Northeast Corridor today between Providence and Warwick, R.I. The access agreement is the result of hard work by numerous employees in the Policy, Law, Engineering and Transportation departments to ensure financial and operational feasibility.

Stations Update: The Wilmington, Del., station reopens today after 18 months of renovation work. Funded by federal stimulus money and DelDOT, the station offers passengers a new HVAC system, new waiting rooms and platforms, and other interior and exterior upgrades.

Marketing: Employees may visit www.RadioCityChristmas.com for a 25 percent discount on tickets to the Radio City Christmas Spectacular featuring The Rockettes in New York. Input "AMTRAK" in the promotional code box upon checkout. Some restrictions apply.

Smart IDs: New employee Smart ID badges are being distributed at locations across the system beginning tomorrow. Dates and times vary by location. The schedule for Dec. 7-17 distribution is now available on the intranet under "Police" → "Smart IDs."

Firearms Carriage Begins Next Week

Amtrak will begin accepting firearms in checked baggage on Dec. 15, as required by federal law. Media outlets across the country have already begun publicizing this major service change.

"Despite all our communications efforts to educate passengers, there may still be some confusion," said Amtrak Police Chief John O'Connor. "It is important employees know the rules and how to handle these situations."

The full policy is available on the "Reservations, Ticketing and Passenger Services Policies" page on the intranet under "Library" → "Policies."

IT: Employees no longer need to speak to an IT Service Desk agent to reset their Windows and Mainframe passwords. A new Voice Trust automated password reset service is now available, which uses “voiceprint” technology to verify identity. Instructions are located on the intranet under “How We Work” → “Service Desk” → “Password Resets.”

Marketing: Special Amtrak travel offer inserts will be placed in 200,000 DVD copies of *Scooby-Doo! Curse of the Lake Monster*, which is being released next month.

Reminder About Safety Reporting

Employees are reminded that all work-related injuries and illnesses, as well as safety and security violations must be reported immediately. Reporting activities are protected under the Federal Rail Safety Act (FRSA) and Amtrak will not tolerate retaliation of any kind against employees who report an incident.

Information on the protections to which you are entitled under the FRSA is attached to this issue of *Amtrak This Week*. Please distribute both flyers at safety briefings and post on bulletin boards for at least 180 days.

APD Mourns Loss of K-9

Amtrak mourns the loss of Ivan, a valued member of the Amtrak Police Department’s K-9 Unit, who passed away on Dec. 8 due to complications from immune mediated hemolytic anemia.

Ivan had served as a vapor wake and certified explosives detection dog with his partner, Officer Naomi Stratton, since joining the APD in May 2008. A memorial service will be held on Dec. 16 in Washington, D.C. As per Patrol Guide Directive 350.019, sworn APD officers are authorized to wear mourning bands for a 15-day period.

Amtrak Begins Carrying Firearms in Checked Baggage

Effective Dec. 15, Amtrak will begin to accept unloaded firearms in checked baggage at stations and on trains that offer checked baggage service and operate within the U.S. The requirement was established in section 159 of the Consolidated Appropriations Act of 2010 (Public Law 111-117), which was enacted by Congress in late 2009. Since that time, Amtrak has devoted considerable resources to provide firearms carriage for passengers while ensuring safety and security for employees and travelers alike.

“This is a major operational change for the company and implementing it was quite a challenge,” said Amtrak Police Chief John O’Connor. “But the innovation and resourcefulness of our employees got the job done on time.”

The total cost of the project was just over \$2 million. To ensure the safe carriage of guns, a total of 135 baggage floats, 145 stations offering checked baggage service and 142 baggage cars received security improvements including storage and signage. Modifications to the reservation system and operating policies were also made. Employee training has been ongoing for several months and passenger communications are in full swing.

“Despite all our communications efforts to educate passengers, there may still be some confusion,” said O’Connor. “It is important employees know the rules and how to handle these situations.”

Amtrak stopped the carriage of firearms on trains after the terrorist attacks on Sept. 11, 2001. Further restrictions were made after the attacks on trains in Madrid, Spain.

The full policy and more information is available on the “Reservations, Ticketing and Passenger Services Policies” page on the intranet under “Library” → “Policies.”

Amtrak Featured in National Christmas Tree Display

An Amtrak model train will circle the National Christmas Tree outside the White House this year, thanks to a partnership with the National Park Service, National Park Foundation and the National Christmas Tree Railroad. Tourists from all over the world have visited the National Christmas Tree each year since 1923.

The featured train is a G scale (1:22.5) model and includes two GE Genesis P-42 diesel locomotives and four single-level Amfleet passenger cars, plus a café car. The model represents Amtrak’s Midwest corridor service, as well as the *Northeast Regional* service south of Washington, D.C., where the trains operate using this type of equipment. The National Christmas Tree and model Amtrak train will be on display through Jan. 1.

Government Affairs: On Dec. 21, Congress passed a continuing resolution (CR) that extends federal funding for Amtrak in the absence of an annual appropriations bill. The CR extends funding for Amtrak through March 4 at a prorated annual amount of \$1.5 billion.

Operations Update: In response to growing demand, *Northeast Regional* trains are now making weekend stops in Newark, Del., near the University of Delaware. Southbound Train 133 will stop in Newark on Fridays at 3:05 p.m., while northbound Train 182 will stop on Saturdays and Sundays at 8:43 p.m.

Labor Update: The second of 10 general wage increases over a five-year period will take effect on Jan. 1 for Amtrak employees covered by new labor agreements. This 1.5 percent wage increase applies to approximately 58 percent of agreement-covered workers whose unions have settled with Amtrak.

Benefits: The monthly limit of \$230 for pre-tax mass transit payroll deductions has been extended through 2011 as part of legislation signed by President Obama last week. Previously, the limit was scheduled to be reduced to \$120. The Amtrak benefits system will be updated accordingly. Employees should check their mass transit benefit elections by calling 1-800-481-4887 or logging on to www.AmtrakBenefits.com.

Message From Joe Boardman

Dear Co-workers,

Sometimes I wonder if there is a better way to address you than “Dear Co-workers.” It’s an effort to communicate that we should all treat each other with the same level of respect regardless of one’s role in the company. I absolutely believe that every job well done deserves respect no matter what job you do, or what rank you hold at Amtrak. So we are “co-workers,” and I will stay with it, but please know when you read it that it comes with a high value for you and for what you do for our customers, our nation and for each other.

I’d like to wish you a Merry Christmas or Happy Holidays, depending on your personal beliefs. All beliefs are welcome here at Amtrak, along with how you wish to live your life. It is one of the greatest gifts we have for living in this nation, and we need to guard those rights for ourselves and for others who may not think the same way we do.

This season fills many of us with joy as we watch our children and grandchildren as they receive gifts or attend concerts or even play in the snow. Wouldn’t it be wonderful if we could feel that same way each time we see someone new experience a ride on our train?

I believe most of us want that kind of feeling to come from what we do. We might not articulate it just that way, but in fact, we want to enjoy coming to work everyday and we want a sense of purpose. I hope that while we might call ourselves “co-workers,” we can also consider each other — and our customers — as friends.

I think that feeling exists at many places in this company, which in part is why we had such a great year. Ridership and revenue are at record levels. The number of you that I have met and thanked is at a record level too. It bothers me that I can’t remember every name, but I am thankful to have had the opportunity to be here at Amtrak as one of your co-workers. I hope you feel that I treat you like a friend when we talk.

As a company we have lots of plans for the next year such as Wi-Fi on more services, our 40th anniversary celebration and new e-Ticketing systems — stuff that will help us all do our jobs better and improve our future as a company. Let’s make 2011 even better than 2010.

Thank you for what you do.

Joe Boardman
President and CEO

New Business Meetings Policy is Now in Effect

A new corporate policy for business meetings held off Amtrak property took effect on Dec. 20. The Business Meetings (Off Site) Policy defines responsibilities, Procurement controls and procedures for departments to appropriately plan and pay for small and large meeting requirements and expenses when holding meetings at off-site locations.

All meetings are to be held on Amtrak property when meeting space is available. When meetings must be held off-site, departmental meeting planners should work with Procurement, Amtrak's eTravel service provider and the Amtrak Business Travel Office to identify potential meeting sites and to ensure utilization of the proper Procurement processes.

For details, refer to the complete Business Meetings (Off Site) Policy (P/I 8.39.0) on the intranet under "Library" → "Policies" → "Amtrak Policy and Instruction Manual" → "Finance."

2011 Holiday Schedule

Holidays observed at Amtrak vary depending on an employee's status. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each agreement can be found on the intranet under "Employees" → "Labor Agreements."

Holidays for non-agreement employees in 2011 are as follows:

<u>Holiday</u>	<u>Day Observed</u>
New Year's Day	Sat., Jan. 1*
Martin Luther King, Jr. Day	Mon., Jan. 17
President's Day	Mon., Feb. 21
Memorial Day	Mon., May 30
Independence Day	Mon., July 4
Labor Day	Mon., Sept. 5
Veteran's Day	Fri., Nov. 11
Thanksgiving Day	Thurs., Nov. 24
Christmas Day	Mon., Dec. 26

* Since New Year's Day falls on a Saturday, non-agreement employees hired prior to 2011 are granted an additional personal day and are therefore entitled to three personal days in 2011.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library" → "Policies."

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 50 cents to 51 cents, effective for mileage expenses incurred on or after Jan. 1, 2011.

Finance: Employees are reminded that any time they are seeking to obtain project funding from grants, they should refer to the Amtrak Policy and Instruction Manual, section 8.14.0, for guidance. Any employee with a potential grant opportunity or pending grant submission should contact Beverly Thorpe, senior director, Grants Administration at 202-906-2218 or beverly.thorpe@amtrak.com.

Human Resources: Employees who have moved in the past year should be sure to update their mailing address in the Employee Information Portal. Addresses should be changed by Jan. 10 in order for W-2 tax forms to be mailed to the correct address. Log on to the intranet and click "Employees" → "Employee Information Portal."

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2011 must also submit a new form by Feb. 15.

Memo

Date September 29, 2010
To Amtrak Employees

From  Joseph Boardman
Department President and CEO
Subject Cooperation with OIG
cc Chairman Tom Carper
Amtrak Inspector General Ted Alves

Message As Amtrak approaches FY 2011, I want to ensure that Amtrak managers and staff understand the role of Amtrak's Office of Inspector General (OIG) and to address how I expect Amtrak personnel to interact with the OIG. This memorandum describes the mission of our OIG, its undertakings and Amtrak employees' obligations to the OIG, all as more fully addressed in the "relationship" policy promulgated on March 4, 2010, a copy of which is attached.

As background, the Fiscal Year 2010 Consolidated Appropriations Act (Public Law 111-117) called for an Inspector General (IG) who is a member of the Council of the Inspectors General on Integrity and Efficiency (CIGIE) to determine that Amtrak and the company's Inspector General have agreed upon a set of policies and procedures for interacting with each other that are consistent with the letter and the spirit of the Inspector General Act of 1978, as amended. Amtrak and the Inspector General reached agreement on a set of policies and procedures that we believe are consistent with the letter and spirit of the IG Act.

Carl Clinefelter, Inspector General of the Farm Credit Administration and a CIGIE member, evaluated those policies and procedures as required by the Appropriations Act and determined:

that the Corporation and the IG have agreed to a set of policies and procedures for interacting with each other that are consistent with the letter and the spirit of the Inspector General Act of 1978, as amended (IG Act). As a result, they are now positioned to build a constructive relationship that will enable the Amtrak Office of Inspector General (OIG) to operate unhindered in its role of: 1) promoting economy, efficiency, and effectiveness, 2) preventing and detecting fraud and abuse, and 3) providing a means for keeping the head of the entity and Congress fully and currently informed about the problems and deficiencies relating to Amtrak's programs and operations. Amtrak will benefit by having a properly functioning OIG that remains independent of Corporation programmatic activities and, thus, able to provide objective assessments and recommendations regarding Amtrak operations.

I believe that these new policies and procedures are already helping to rebuild the relationship between Amtrak and the OIG.

The OIG serves as an independent and objective unit within Amtrak, playing an important role in preventing and rooting out fraud, waste, mismanagement and abuse in Amtrak programs and operations. The OIG also endeavors to improve the efficiency of our programs and operations through the performance of audits, evaluations and inspections. To carry out its statutorily required function, the OIG necessarily requires, on a regular basis, information and assistance from Amtrak managers and staff.

It is imperative that, upon request, Amtrak personnel provide OIG auditors, evaluators and investigators with full and unrestricted access to personnel, facilities, records (including, but not limited to, reports, databases and documents), and any other information or material that is needed by the OIG to accomplish its mission. Unrestricted access means that managers and staff are not to impose burdensome administrative requirements or screening procedures that could impede OIG access to needed employees and materials. Management should not attempt to control or influence the free flow of information to and from the OIG or to frustrate the full and unfettered exchange between Amtrak personnel and the OIG.

My expectation is that we will cooperate with the OIG as follows:

1. Managers and staff are to expeditiously provide materials responsive to an OIG request;
2. Materials should be provided to the OIG in the manner requested, rather than routed through an intermediary for review prior to disclosure;
3. Amtrak managers and staff must not conceal information or obstruct OIG audits, investigations or other inquiries. Doing so is against Amtrak policy, and may be in violation of federal law;
4. At any time, the OIG may have access to available information such as policy, guidance, procedures or existing reports and other general information to focus its plans. In the context of specific OIG audits, evaluations or other reviews, the OIG will ordinarily issue a notification letter or kick-off memo to Amtrak management announcing the objectives of the OIG activity. Frequently, a meeting will be scheduled with Amtrak management and the OIG staff to discuss the activity. Under all circumstances, Amtrak managers and staff are to provide complete cooperation upon receipt of such notification; and
5. Amtrak staff are not required to obtain permission from or inform managers before they speak with OIG representatives during audits, evaluations, investigations or other OIG reviews. Staff may, at their own discretion, contact their manager with any questions regarding their responsibility to cooperate with the OIG or their scheduling of meetings with the OIG, unless, in the context of an investigation, they are instructed otherwise by the OIG. In the context of investigations, managers should not question staff about their interactions with the OIG. It should also be clear that any employee who attempts to retaliate against another employee for cooperating or assisting the OIG may be subject to disciplinary action up to and including termination.

The OIG, for its part, has indicated its intent to respect the multiple demands made upon Amtrak managers and staff and, to the extent possible, to seek to accommodate scheduling difficulties or other time constraints that managers and staffs might face. Also, the OIG is committed to honoring requests for confidentiality to the extent permitted by the law and to

handling all Amtrak documents and information in an appropriate manner.

To ensure that reports from audits, evaluations and other reviews (collectively referred to here as “audits”) are fairly prepared and presented, the OIG staff will endeavor to provide management with significant opportunities for interaction. To this end, an audit will ordinarily begin with an entrance conference or kick-off meeting and will ordinarily conclude its active phase with an exit conference. Management should attend both entrance and exit conferences and make its views and concerns known. At any time during the course of the audit, Amtrak management may request and meet with the OIG staff to discuss the audit, provide information to clarify management assertions and discuss status and any concerns.

The OIG intends to solicit Amtrak management for input regarding accuracy and tonal quality frequently during the audit up to and including submission of comments to the written audit product. This interaction should help to avoid misunderstandings. The OIG is committed to give full consideration to management comments on discussion drafts and formal draft reports in the course of finalizing reports. Amtrak managers should engage with OIG leadership when it believes that its input is not satisfactorily addressed. In the end, formal Amtrak comments to the formal draft will ordinarily be attached, in their entirety, to the final OIG report. This interactive process, in which the OIG engages management in the audited office in an effort to develop and refine findings and recommendations, is a key part of the OIG process, and Amtrak managers need to see these opportunities for interaction as their primary means of expression in the context of OIG audits.

All offices are expected to review their policies and procedures related to interaction with the OIG and must conform to this guidance.

If you have any questions about this guidance, please contact Amtrak’s General Counsel, Eleanor D. Acheson at ATS 777-2198, or the OIG General Counsel, Colin Carriere, at ATS 777-4355.

Attachment

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

1.0 PURPOSE

To establish the responsibility and authority of the Amtrak Office of Inspector General ("OIG"), the general principles for ensuring a productive relationship between the OIG and the rest of the company, and to summarize the process followed by the OIG when conducting audits, evaluations, and investigations.

2.0 SCOPE

This policy applies to all Amtrak employees, contractors, programs, and operations.

3.0 RESPONSIBILITY

The head of Amtrak and the Amtrak Inspector General ("Inspector General") are responsible for the interpretation and administration of this policy. As of the date of this policy, the "head" of Amtrak is defined as the Chairperson of the Board of Directors of Amtrak (the "Chair").

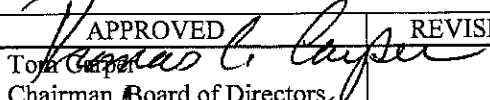

4.0 AUTHORITY AND RESPONSIBILITIES OF THE OIG

4.1 Mission of the OIG. The Inspector General Act of 1978, as amended (5 U.S.C. Appendix 3), hereinafter "IG Act," established the OIG as an independent and objective unit within Amtrak to:

- (a) Provide policy direction for and to conduct, supervise, and coordinate audits and investigations relating to Amtrak programs and operations;
- (b) Provide leadership and coordination and to recommend policies for activities designed (1) to promote economy, efficiency, and effectiveness in the administration of, and (2) to prevent and detect fraud and abuse in Amtrak programs and operations;
- (c) Review existing and proposed legislation and regulations relating to Amtrak programs and operations and make recommendations in its semiannual reports concerning their impact on the economy and efficiency in the administration of programs and operations administered or financed by Amtrak or the prevention and detection of fraud and abuse in such programs;
- (d) Keep the Chair and Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by Amtrak, recommend corrective action concerning such problems, abuses, and deficiencies, and report on the progress made in implementing corrective actions.

4.2 Establishment of the OIG.

- (a) The Inspector General is appointed by the Chair without regard to political affiliation, and solely on the basis of integrity and demonstrated ability in

 Thomas C. Casper Chairman, Board of Directors		2.1.1	1

INSPECTOR GENERAL

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

accounting, auditing, financial analysis, law, management analysis, public administration, or investigations.

- (b) The Inspector General reports to and is under the general supervision of the Chair and is not subject to supervision by any other officer or employee of Amtrak. The Chair cannot prevent or prohibit the Inspector General from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.
- (c) The Inspector General serves as a non-voting, ex officio member of the Executive Committee. This is an important mechanism to foster open communications and facilitate the exchange of information. It allows the IG to be aware of management issues and concerns and to provide appropriate input for management to consider. The IG's role will be limited and subject to the following conditions:
 - (1) The IG will not be a voting member;
 - (2) The IG will not perform programmatic functions or roles, which are proscribed under the IG Act;
 - (3) The IG's participation will be in a mutually agreed capacity, which allows the IG to decide not to attend certain meetings, or Amtrak management to elect to conduct meetings or segments of meetings, without the IG's presence;
 - (4) Both the IG and Amtrak management will respect the IG's statutory requirement to maintain independence and objectivity and will not request participation or agreement with respect to any matter that would impair or compromise that independence or objectivity;
 - (5) The IG will not make management decisions or perform management functions.
- (d) If the Inspector General is removed from office or is transferred to another position or location within Amtrak, the Chair must communicate in writing the reasons for the removal or transfer to both Houses of Congress, at least 30 days before the removal or transfer. The Chair can also take other personnel actions authorized by law.
- (e) The Chair also provides the OIG with appropriate and adequate office space at central and field office locations of Amtrak, together with needed equipment, office supplies, communications facilities and services, and necessary maintenance services.

4.3 Authority of the Inspector General. In carrying out the provisions of the IG Act, the Inspector General is authorized to:

- (a) Conduct audits and investigations and issue reports relating to Amtrak programs and operations that, in the judgment of the Inspector General, are necessary or desirable;
- (b) Have access to all Amtrak records, reports, audits, reviews, documents, papers, recommendations, or other material available to Amtrak which relate to programs and operations with respect to which the Inspector General has responsibilities;

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	2

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (c) Request such information or assistance as may be necessary to carry out the duties and responsibilities provided by the IG Act from any Federal, State, or local governmental agency or unit thereof;
- (d) Require by subpoena the production of information, documents, reports, answers, records, accounts, papers and other data needed to accomplish the functions assigned by the IG Act (procedures other than subpoenas will be used by the Inspector General to obtain documents and information from Federal agencies). Because the Inspector General has access to all Amtrak information, subpoenas are not used to obtain documents and information from Amtrak;
- (e) Administer oaths, affirmations, and affidavits, when needed to carry out the functions assigned by the IG Act;
- (f) Have direct and prompt access to the Chair when necessary for any purpose pertaining to the performance of functions and responsibilities under the IG Act; and
- (g) Enter into contracts and other arrangements for audits, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of the IG Act.

5.0 GENERAL PRINCIPLES GUIDING RELATIONSHIPS WITH THE OIG

5.1 To work together most effectively, the OIG and Amtrak's management, employees, and contractors should:

(a) Interact with professionalism and mutual respect.

- (1) Representatives of Amtrak's management and the OIG should always act in good faith and expect the same from the other.
- (2) Amtrak's management and the OIG share as a common goal the successful accomplishment of Amtrak's mission.

(b) Ensure mutual respect for each mission.

- (1) Amtrak's officers, directors, employees, and contractors should recognize the OIG's primary responsibility and authority to conduct independent and objective audits, evaluations, and investigations of Amtrak programs and operations, and the OIG's responsibility to report to both the Chairman and the Congress.
- (2) The OIG will seek to carry out its work with a minimum of disruption to the primary mission of Amtrak.
- (3) Amtrak's management will promptly notify the OIG in the event that it initiates reviews or examinations related to fraud or waste which could be the subject of an OIG audit, investigation, or inspection. Once notified, the Inspector General will determine whether it is a matter subject to the jurisdiction of the OIG and respond promptly to management to determine how to proceed. To the extent the Inspector General deems appropriate, the OIG will coordinate with the responsible department where management is engaged in a review or examination or litigation involving matters of common interest to the OIG and management.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	3

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (4) If, in the course of its work, the OIG discovers facts or circumstances related to safety or other matters which have some immediacy or may cause significant business or legal harm to the company unless management is notified and given the opportunity to intervene, the Inspector General will, at his discretion, notify and coordinate with appropriate Amtrak managers or the department head in order to address safety issues quickly or to limit significant business or legal harm.

(c) Foster open communications at all levels.

- (1) The OIG's access to information, records, facilities and people must be unimpeded. Amtrak's employees, contractors, and representatives should promptly respond to OIG requests for information to facilitate OIG activities.
- (2) Amtrak managers will be forthcoming in recognizing the existence of challenges that the OIG can help to address.
- (3) Surprises are to be avoided. The OIG will seek to avoid undertaking its work or presenting its findings without reasonable notice to management and management will keep the OIG informed of significant challenges and problems.
- (4) With limited exceptions, primarily related to criminal investigations, the Inspector General will keep the President and the Chairman advised of its work and its findings on a timely basis, and the OIG will provide information helpful to Amtrak's management at the earliest possible stage.
- (5) Because some OIG investigations may involve allegations of criminal misconduct or other need for confidentiality, circumstances will dictate whether, and what type of, notice will be given. This will be at the discretion of the Inspector General, with consideration of all factors of confidentiality, sensitivity, and investigative techniques.

(d) Be thorough, objective, and fair.

- (1) The OIG will perform its work thoroughly, objectively, and with due consideration of the point of view of Amtrak's management.
- (2) When working with the OIG, Amtrak's management and staff should objectively consider differing opinions and alternative ways to improve operations.
- (3) Both the OIG and other departments of Amtrak should recognize successes in addressing management challenges and advancing Amtrak's mission.

(e) Respect confidential information.

- (1) The OIG will respect Amtrak's need to protect confidential, sensitive, or privileged information from inappropriate disclosure, while meeting OIG's obligation to report to the Department of Justice, external oversight entities such as Congress, and the public.
- (2) The terms confidential, sensitive, and privileged will be accorded the meanings ascribed to them under the Freedom of Information Act (FOIA).
- (3) Other than the Department of Justice, in disclosing to external oversight entities (such as the Congress, Department of Transportation, OMB, and

APPROVED	REVISION NO.	SUPERSEDES	PAGE

GAO) or other law enforcement entities, information that may be confidential, sensitive or privileged, the OIG will notify the recipient entities of the confidential, sensitive, or privileged nature of the information and request that they treat the information with the level of protection set forth under the FOIA or as otherwise required by law. If the IG believes there is a significant risk that the information could be released inappropriately, he may, at his discretion, consult with the appropriate department head to ensure that the company's interests are protected.

- (4) The process to determine the sensitivity of information included in OIG audit, evaluation, and investigative reports that will be subject to public release is described in sections 6 and 7 below.

(f) Be engaged.

- (1) The OIG, Amtrak's management, and the Board will work cooperatively to identify the most important areas for OIG work, as well as the best means to address the results of that work, while maintaining the OIG's required independence.
- (2) Amtrak's leadership will recognize that the OIG's limited resources must also be applied to address work that is initiated by the OIG, requested by members of Congress, or mandated by law or regulation.

(g) Facilitate the exchange of information.

- (1) The OIG will keep abreast of Amtrak's programs and operations, and keep Amtrak's management and Board informed of OIG activities and concerns that are raised in the course of the OIG's work.
- (2) Amtrak's management and Board should ensure that the OIG is kept up to date on current matters and events affecting Amtrak or that may affect it in the future.
- (3) Amtrak and the OIG will implement mechanisms, both formal and informal, to ensure prompt and regular feedback.
- (4) All Amtrak employees, contractors, and representatives should understand that the OIG is the primary entity within Amtrak to address issues or concerns related to fraud or abuse; and that they have a responsibility to report suspected violations of the law or Amtrak policy that could result in fraud or abuse.
- (5) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions.
- (6) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful authority.

6.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND THE OIG ON INVESTIGATIONS

6.1 General Investigative Process.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	5

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) The OIG determines whether it will initiate an investigation once it receives an allegation regarding fraud, abuse, criminal action, or other wrongdoing. Allegations originate from various sources including employees, vendors, Congress, federal agencies, and prosecutors. The OIG may also initiate investigations proactively to ensure that Amtrak is not being subject to fraud, waste, or abuse.
- (b) The investigative process generally involves: (1) determining the basis for an allegation; (2) analyzing the issues involved; and (3) obtaining relevant, objective evidence from individuals and entities, in the form of interviews, documents, tangible objects, and data.
- (c) The OIG follows the Quality Standards for Investigations (issued by the Council of the Inspectors General on Integrity and Efficiency ("CIGIE")) to guide its investigative activity.
- (d) Allegations are reviewed and screened and resources are allocated based on, among other things, the seriousness of the allegations, potential harm to Amtrak or the public, whether a violation of a statute or regulation likely occurred, and the effect of the alleged illegal or improper activity on Amtrak programs and operations.
- (e) If the OIG determines that an investigation should be undertaken, it seeks to obtain all relevant facts by examining documents and other tangible materials and interviewing individuals. When appropriate or required by law, the OIG informs subjects of their legal rights, including the right or opportunity to remain silent and to obtain legal counsel.
- (f) The process may result in one or more of the following OIG actions: administrative report to management, referral to a prosecutor for consideration, or closing the investigation.
- (g) When the investigation substantiates a wrongful act which is considered administrative, the OIG usually prepares an investigative report, which describes the allegation, the factual evidence to support its findings, and recommendations. This report is submitted to management for a written response. These administrative reports often recommend that management take action, but usually do not recommend specific disciplinary action. Privacy concerns usually restrict these reports from public release.
- (h) If an issue identified in an investigative report is a recurring or systemic problem, the OIG may also identify this broader problem to managers and, usually, make recommendations for management to consider in addressing the problem. Management normally is given an opportunity to provide comments before the report is issued. The process for obtaining comments and issuing the report is described in Section 7.2(h).
- (i) If there is evidence of criminal wrongdoing, the OIG presents the report to the Department of Justice or other appropriate prosecutors for their consideration. This may lead to prosecution of the subject(s) in Federal, state, or local court. In cases where there is evidence of criminal wrongdoing, the Inspector General may, in his/her discretion, also refer the report to management for administrative action.

6.2 Requirements And Responsibilities.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	6

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(a) OIG.

- (1) The Inspector General shall not, after receipt of a complaint or information from an employee, disclose the identity of the employee without the consent of the employee, unless the Inspector General determines such disclosure is unavoidable during the course of the investigation.
- (2) The OIG will ensure that Amtrak's confidential, sensitive, or privileged information as defined in section 5.1(e) above is not inappropriately disclosed by OIG employees.
- (3) Circumstances when the OIG will disclose such information include:
 - (A) referrals to appropriate agencies for law enforcement purposes;
 - (B) disclosures under court order;
 - (C) responses to requests by Congress; and,
 - (D) referrals to other agencies that may have cognizance over the matter.
- (4) The OIG will usually honor an employee's request that counsel be present during an interview. The counsel may not be another employee of Amtrak, paid for by Amtrak (unless approved in accordance with Amtrak's Bylaws and policies), a potential subject, or a witness in the case.
- (5) Employees who allege that action was taken against them as reprisal or retaliation for cooperating with or disclosing information to the OIG while they were employed at Amtrak may request the OIG to investigate their reprisal or retaliation allegations.

(b) Amtrak Management, Employees, and Contractors.

- (1) All Amtrak employees must comply with requests for interviews and briefings.
- (2) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions or penalties.
- (3) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful appropriate authority.
- (4) In the context of investigations, managers should not question staff about their interactions with the OIG.
- (5) Any employee who makes a complaint to the OIG with the knowledge that the complaint is false or that it is made with willful disregard for the truth of the information may be held accountable for such statements and may be subject to disciplinary action or criminal prosecution.

7.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND OIG ON AUDITS AND EVALUATIONS

- 7.1 Types of Audits and Evaluations.** The OIG conducts audits and evaluations of Amtrak programs and operations, including performance of contractors. Some audits and evaluations may be specifically required by statute.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	7

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) An audit is an independent, formal, and methodical examination of an organization, program, function, or activity, designed to help Amtrak accomplish its mission efficiently and effectively. OIG audits are performed in accordance with Government Auditing Standards (commonly called the Yellow Book).
- (b) Evaluations are reviews of an organization, program, function, or activity. Evaluations are performed in accordance with the Quality Standards for Inspections issued by the CIGIE.
- (c) Audits and evaluations may include financial or performance reviews.
 - (1) Financial reviews include financial statement audits and any other financially related reviews related to Amtrak's financial operations.
 - (2) Performance reviews include evaluating whether Amtrak programs and operations are working efficiently and effectively as well as whether programs are achieving expected results.
- (d) The OIG also routinely gathers information and data but does not use that information in a formal audit report. These activities may be in response to a congressional inquiry, a request for testimony, or routine planning purposes. Normally, OIG staff members assigned to these activities directly contacts responsible managers to collect information. The assigned OIG staff will inform management of the nature of the data gathering effort.

7.2 Audit and Evaluation Processes. The audit and evaluation processes involve the following steps:

- (a) **Audit or Evaluation Planning.** The OIG often conducts informal research to help it develop audit or evaluation plans or to better understand emerging issues. Audit plans outline potential reviews to be conducted, the objectives of each review, and the resources required to conduct them. In developing the audit or evaluation plan for the year, the OIG considers the following:
 - (1) Issues that may pose a risk to or would promote Amtrak's mission;
 - (2) Objectives of Amtrak's Board and senior managers; and
 - (3) Objectives of Congress.
- (b) **Notification.** The OIG will notify responsible management officials of its intent to begin a review.
- (c) **Entrance Conference.** As a general practice, the OIG will request an entrance conference with responsible management officials to advise them of the objectives and scope of the review and the general methodology that will be followed, and to solicit input from Amtrak officials.
- (d) **Survey.** In some cases, particularly for large or complex reviews, the OIG will perform initial research to refine the objectives, determine the scope, and develop a sound methodology.
- (e) **Field Work.** The OIG analyzes selected areas of a program, activity, or function. It obtains sufficient evidence to support the findings and conclusions and to make recommendations. Frequent interaction with responsible managers and employees occurs during fieldwork.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	8

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (f) **Exit Conference.** Prior to the issuance of a draft audit or evaluation report, the OIG will contact the responsible management official to set up an exit conference to discuss the results of the work. In some cases discussion draft reports or fact sheets are used to facilitate the discussion. The OIG strives to maintain an open channel of communication with managers to ensure that findings, conclusions, and recommendations are accurately and fairly presented in the report.
- (g) **Draft Report.** The OIG provides a draft report to the Audit Liaison, responsible managers of audited organizations, and Amtrak departments affected by the audit findings for their review and comment. The draft report will have been approved by OIG management and will contain the objectives, results, conclusions, and recommendations resulting from the OIG's audit or evaluation.
- (h) **Management Response.** Responsible management officials are normally provided 30 days to respond in writing to the draft report, indicating how they plan to address the findings and recommendations contained in the report. In some cases, the OIG requests a quicker response. Extensions to the established due date will be granted by the responsible Assistant Inspector General.
- (1) Comments should clearly indicate whether responsible management officials concur with each of the recommendations.
 - (2) Concurrence is when management agrees to implement the recommendation or to take an alternative action that will correct the deficiency, along with actual or estimated completion dates.
 - (3) Nonconcurrence is when management does not agree to implement the recommendation or an acceptable alternative. In this case, management should explain the rationale, and include additional facts, if necessary.
 - (4) Management should also identify any information contained in the report that should be protected from public release on the basis that its release may cause significant business or legal harm to Amtrak (the information so designated must not be subject to public release pursuant to the Freedom of Information Act, as amended, 5 U.S.C. § 552). The responsible manager should also weigh the public benefit of transparency against the harm, or potential harm, to company interests, in light of the fact that the company receives Federal subsidies.
 - (5) With respect to decisions regarding confidential, sensitive or privileged information, the Inspector General will follow the standard set forth in Section 5.1(e) above. If the OIG disagrees with management's assertion that specific information should be withheld from public release because it is confidential, sensitive, or privileged, the IG will confer with the responsible department head regarding the need to redact the information before publicly releasing the report. If so requested, the department head has one week to articulate in writing to the IG the bases or reasons for protecting the information from disclosure, including identifying the significant business or legal harm anticipated compared to the benefit of transparency. If, following that consultation, the IG determines that the

APPROVED	REVISION NO.	SUPERSEDES	PAGE

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

information should be publicly released, he will consult with the Chair before including such information in a publicly released report.

- (i) **Final Report.** The OIG will amend the draft report, as appropriate, based on management's response. The Inspector General makes final determinations about what information will be included in the issued report. The OIG also normally includes the entire management response, along with the OIG's analysis of the response in the final report.
- (j) **Report Distribution.** The OIG usually distributes audit and evaluation reports to the Chairman, other Board members, responsible management officials, and Congress. Final reports are normally public documents and are available on the OIG Web site.
- (k) **Recommendation Follow-up.** Amtrak managers are responsible for implementing OIG recommendations to the extent there is concurrence, and OIG staff and Amtrak's Audit Liaison monitor managers' actions to ensure that recommendations are implemented in a timely manner.

7.3 Audit and Evaluation Process Responsibilities.

(a) **Audit Liaison.**

- (1) The Audit Liaison is an individual, or individuals, designated by Amtrak management to perform the functions outlined in this section.
- (2) Facilitates OIG audits and evaluations with Amtrak management. In this role, the liaison ensures that Amtrak managers are aware of OIG reviews and that OIG staff is provided with initial contacts to begin the review process.
- (3) Coordinates entrance and exit conferences with appropriate Amtrak managers.
- (4) Follows up with Amtrak managers to track the status of management actions to implement OIG recommendations.
- (5) Ensures that management's response to draft reports is coordinated with affected departments, is approved by the head of the audited department or organization and is completed in a timely manner.

(b) **Inspector General Managers.**

- (1) Notifies responsible management officials of the intent to begin a review.
- (2) Contacts responsible management officials and the audit liaison to schedule entrance conferences and exit conferences.
- (3) Provides copies of draft reports to the Audit Liaison, responsible management officials of audited organizations, and Amtrak departments affected by audit findings.
- (4) Reviews and evaluates management response to the draft report and, as appropriate, either revises the report or provides the OIG's analysis of the response in the final report.
- (5) Grants extensions to the established due date for management comments.
- (6) Distributes final reports to the Audit Liaison and the appropriate Amtrak departments, and makes further distribution to authorized committees and subcommittees of Congress and the public.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	10

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(c) **Responsible Management Officials.** To maximize the value of OIG reports, management officials or their designees will:

- (1) Attend exit conferences, unless they are waived by agreement with the OIG.
- (2) Prepare responses to draft OIG reports.
- (3) State in the proposed management decision whether they concur with the recommendations presented in the corresponding audit or evaluation report or propose alternative actions to correct the deficiency. For nonconcurrences, explain why management does not concur and present additional facts, if necessary.
- (4) Take prompt and effective action to implement agreed-upon corrective actions.

8.0 OTHER POLICIES

- 8.1 The presumption is that this policy will take precedence in instances where other policies are inconsistent with this policy. When inconsistencies are identified, OIG and management will consult and reconcile differences.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	11

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

1.0 PURPOSE

To establish the responsibility and authority of the Amtrak Office of Inspector General ("OIG"), the general principles for ensuring a productive relationship between the OIG and the rest of the company, and to summarize the process followed by the OIG when conducting audits, evaluations, and investigations.

2.0 SCOPE

This policy applies to all Amtrak employees, contractors, programs, and operations.

3.0 RESPONSIBILITY

The head of Amtrak and the Amtrak Inspector General ("Inspector General") are responsible for the interpretation and administration of this policy. As of the date of this policy, the "head" of Amtrak is defined as the Chairperson of the Board of Directors of Amtrak (the "Chair").

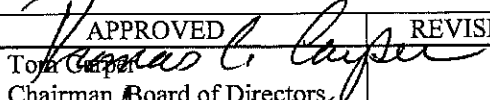

4.0 AUTHORITY AND RESPONSIBILITIES OF THE OIG

4.1 Mission of the OIG. The Inspector General Act of 1978, as amended (5 U.S.C. Appendix 3), hereinafter "IG Act," established the OIG as an independent and objective unit within Amtrak to:

- (a) Provide policy direction for and to conduct, supervise, and coordinate audits and investigations relating to Amtrak programs and operations;
- (b) Provide leadership and coordination and to recommend policies for activities designed (1) to promote economy, efficiency, and effectiveness in the administration of, and (2) to prevent and detect fraud and abuse in Amtrak programs and operations;
- (c) Review existing and proposed legislation and regulations relating to Amtrak programs and operations and make recommendations in its semiannual reports concerning their impact on the economy and efficiency in the administration of programs and operations administered or financed by Amtrak or the prevention and detection of fraud and abuse in such programs;
- (d) Keep the Chair and Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by Amtrak, recommend corrective action concerning such problems, abuses, and deficiencies, and report on the progress made in implementing corrective actions.

4.2 Establishment of the OIG.

- (a) The Inspector General is appointed by the Chair without regard to political affiliation, and solely on the basis of integrity and demonstrated ability in

APPROVED	REVISION NO.	SUPERSEDES	PAGE
 Thomas C. Caper Chairman, Board of Directors		2.1.1	1

INSPECTOR GENERAL

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

accounting, auditing, financial analysis, law, management analysis, public administration, or investigations.

- (b) The Inspector General reports to and is under the general supervision of the Chair and is not subject to supervision by any other officer or employee of Amtrak. The Chair cannot prevent or prohibit the Inspector General from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.
- (c) The Inspector General serves as a non-voting, ex officio member of the Executive Committee. This is an important mechanism to foster open communications and facilitate the exchange of information. It allows the IG to be aware of management issues and concerns and to provide appropriate input for management to consider. The IG's role will be limited and subject to the following conditions:
 - (1) The IG will not be a voting member;
 - (2) The IG will not perform programmatic functions or roles, which are proscribed under the IG Act;
 - (3) The IG's participation will be in a mutually agreed capacity, which allows the IG to decide not to attend certain meetings, or Amtrak management to elect to conduct meetings or segments of meetings, without the IG's presence;
 - (4) Both the IG and Amtrak management will respect the IG's statutory requirement to maintain independence and objectivity and will not request participation or agreement with respect to any matter that would impair or compromise that independence or objectivity;
 - (5) The IG will not make management decisions or perform management functions.
- (d) If the Inspector General is removed from office or is transferred to another position or location within Amtrak, the Chair must communicate in writing the reasons for the removal or transfer to both Houses of Congress, at least 30 days before the removal or transfer. The Chair can also take other personnel actions authorized by law.
- (e) The Chair also provides the OIG with appropriate and adequate office space at central and field office locations of Amtrak, together with needed equipment, office supplies, communications facilities and services, and necessary maintenance services.

4.3 Authority of the Inspector General. In carrying out the provisions of the IG Act, the Inspector General is authorized to:

- (a) Conduct audits and investigations and issue reports relating to Amtrak programs and operations that, in the judgment of the Inspector General, are necessary or desirable;
- (b) Have access to all Amtrak records, reports, audits, reviews, documents, papers, recommendations, or other material available to Amtrak which relate to programs and operations with respect to which the Inspector General has responsibilities;

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	2

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (c) Request such information or assistance as may be necessary to carry out the duties and responsibilities provided by the IG Act from any Federal, State, or local governmental agency or unit thereof;
- (d) Require by subpoena the production of information, documents, reports, answers, records, accounts, papers and other data needed to accomplish the functions assigned by the IG Act (procedures other than subpoenas will be used by the Inspector General to obtain documents and information from Federal agencies). Because the Inspector General has access to all Amtrak information, subpoenas are not used to obtain documents and information from Amtrak;
- (e) Administer oaths, affirmations, and affidavits, when needed to carry out the functions assigned by the IG Act;
- (f) Have direct and prompt access to the Chair when necessary for any purpose pertaining to the performance of functions and responsibilities under the IG Act; and
- (g) Enter into contracts and other arrangements for audits, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of the IG Act.

5.0 GENERAL PRINCIPLES GUIDING RELATIONSHIPS WITH THE OIG

5.1 To work together most effectively, the OIG and Amtrak's management, employees, and contractors should:

(a) Interact with professionalism and mutual respect.

- (1) Representatives of Amtrak's management and the OIG should always act in good faith and expect the same from the other.
- (2) Amtrak's management and the OIG share as a common goal the successful accomplishment of Amtrak's mission.

(b) Ensure mutual respect for each mission.

- (1) Amtrak's officers, directors, employees, and contractors should recognize the OIG's primary responsibility and authority to conduct independent and objective audits, evaluations, and investigations of Amtrak programs and operations, and the OIG's responsibility to report to both the Chairman and the Congress.
- (2) The OIG will seek to carry out its work with a minimum of disruption to the primary mission of Amtrak.
- (3) Amtrak's management will promptly notify the OIG in the event that it initiates reviews or examinations related to fraud or waste which could be the subject of an OIG audit, investigation, or inspection. Once notified, the Inspector General will determine whether it is a matter subject to the jurisdiction of the OIG and respond promptly to management to determine how to proceed. To the extent the Inspector General deems appropriate, the OIG will coordinate with the responsible department where management is engaged in a review or examination or litigation involving matters of common interest to the OIG and management.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	3

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (4) If, in the course of its work, the OIG discovers facts or circumstances related to safety or other matters which have some immediacy or may cause significant business or legal harm to the company unless management is notified and given the opportunity to intervene, the Inspector General will, at his discretion, notify and coordinate with appropriate Amtrak managers or the department head in order to address safety issues quickly or to limit significant business or legal harm.

(c) Foster open communications at all levels.

- (1) The OIG's access to information, records, facilities and people must be unimpeded. Amtrak's employees, contractors, and representatives should promptly respond to OIG requests for information to facilitate OIG activities.
- (2) Amtrak managers will be forthcoming in recognizing the existence of challenges that the OIG can help to address.
- (3) Surprises are to be avoided. The OIG will seek to avoid undertaking its work or presenting its findings without reasonable notice to management and management will keep the OIG informed of significant challenges and problems.
- (4) With limited exceptions, primarily related to criminal investigations, the Inspector General will keep the President and the Chairman advised of its work and its findings on a timely basis, and the OIG will provide information helpful to Amtrak's management at the earliest possible stage.
- (5) Because some OIG investigations may involve allegations of criminal misconduct or other need for confidentiality, circumstances will dictate whether, and what type of, notice will be given. This will be at the discretion of the Inspector General, with consideration of all factors of confidentiality, sensitivity, and investigative techniques.

(d) Be thorough, objective, and fair.

- (1) The OIG will perform its work thoroughly, objectively, and with due consideration of the point of view of Amtrak's management.
- (2) When working with the OIG, Amtrak's management and staff should objectively consider differing opinions and alternative ways to improve operations.
- (3) Both the OIG and other departments of Amtrak should recognize successes in addressing management challenges and advancing Amtrak's mission.

(e) Respect confidential information.

- (1) The OIG will respect Amtrak's need to protect confidential, sensitive, or privileged information from inappropriate disclosure, while meeting OIG's obligation to report to the Department of Justice, external oversight entities such as Congress, and the public.
- (2) The terms confidential, sensitive, and privileged will be accorded the meanings ascribed to them under the Freedom of Information Act (FOIA).
- (3) Other than the Department of Justice, in disclosing to external oversight entities (such as the Congress, Department of Transportation, OMB, and

APPROVED	REVISION NO.	SUPERSEDES	PAGE

GAO) or other law enforcement entities, information that may be confidential, sensitive or privileged, the OIG will notify the recipient entities of the confidential, sensitive, or privileged nature of the information and request that they treat the information with the level of protection set forth under the FOIA or as otherwise required by law. If the IG believes there is a significant risk that the information could be released inappropriately, he may, at his discretion, consult with the appropriate department head to ensure that the company's interests are protected.

- (4) The process to determine the sensitivity of information included in OIG audit, evaluation, and investigative reports that will be subject to public release is described in sections 6 and 7 below.

(f) Be engaged.

- (1) The OIG, Amtrak's management, and the Board will work cooperatively to identify the most important areas for OIG work, as well as the best means to address the results of that work, while maintaining the OIG's required independence.
- (2) Amtrak's leadership will recognize that the OIG's limited resources must also be applied to address work that is initiated by the OIG, requested by members of Congress, or mandated by law or regulation.

(g) Facilitate the exchange of information.

- (1) The OIG will keep abreast of Amtrak's programs and operations, and keep Amtrak's management and Board informed of OIG activities and concerns that are raised in the course of the OIG's work.
- (2) Amtrak's management and Board should ensure that the OIG is kept up to date on current matters and events affecting Amtrak or that may affect it in the future.
- (3) Amtrak and the OIG will implement mechanisms, both formal and informal, to ensure prompt and regular feedback.
- (4) All Amtrak employees, contractors, and representatives should understand that the OIG is the primary entity within Amtrak to address issues or concerns related to fraud or abuse; and that they have a responsibility to report suspected violations of the law or Amtrak policy that could result in fraud or abuse.
- (5) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions.
- (6) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful authority.

6.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND THE OIG ON INVESTIGATIONS

6.1 General Investigative Process.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	5

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) The OIG determines whether it will initiate an investigation once it receives an allegation regarding fraud, abuse, criminal action, or other wrongdoing. Allegations originate from various sources including employees, vendors, Congress, federal agencies, and prosecutors. The OIG may also initiate investigations proactively to ensure that Amtrak is not being subject to fraud, waste, or abuse.
- (b) The investigative process generally involves: (1) determining the basis for an allegation; (2) analyzing the issues involved; and (3) obtaining relevant, objective evidence from individuals and entities, in the form of interviews, documents, tangible objects, and data.
- (c) The OIG follows the Quality Standards for Investigations (issued by the Council of the Inspectors General on Integrity and Efficiency ("CIGIE")) to guide its investigative activity.
- (d) Allegations are reviewed and screened and resources are allocated based on, among other things, the seriousness of the allegations, potential harm to Amtrak or the public, whether a violation of a statute or regulation likely occurred, and the effect of the alleged illegal or improper activity on Amtrak programs and operations.
- (e) If the OIG determines that an investigation should be undertaken, it seeks to obtain all relevant facts by examining documents and other tangible materials and interviewing individuals. When appropriate or required by law, the OIG informs subjects of their legal rights, including the right or opportunity to remain silent and to obtain legal counsel.
- (f) The process may result in one or more of the following OIG actions: administrative report to management, referral to a prosecutor for consideration, or closing the investigation.
- (g) When the investigation substantiates a wrongful act which is considered administrative, the OIG usually prepares an investigative report, which describes the allegation, the factual evidence to support its findings, and recommendations. This report is submitted to management for a written response. These administrative reports often recommend that management take action, but usually do not recommend specific disciplinary action. Privacy concerns usually restrict these reports from public release.
- (h) If an issue identified in an investigative report is a recurring or systemic problem, the OIG may also identify this broader problem to managers and, usually, make recommendations for management to consider in addressing the problem. Management normally is given an opportunity to provide comments before the report is issued. The process for obtaining comments and issuing the report is described in Section 7.2(h).
- (i) If there is evidence of criminal wrongdoing, the OIG presents the report to the Department of Justice or other appropriate prosecutors for their consideration. This may lead to prosecution of the subject(s) in Federal, state, or local court. In cases where there is evidence of criminal wrongdoing, the Inspector General may, in his/her discretion, also refer the report to management for administrative action.

6.2 Requirements And Responsibilities.

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(a) OIG.

- (1) The Inspector General shall not, after receipt of a complaint or information from an employee, disclose the identity of the employee without the consent of the employee, unless the Inspector General determines such disclosure is unavoidable during the course of the investigation.
- (2) The OIG will ensure that Amtrak's confidential, sensitive, or privileged information as defined in section 5.1(e) above is not inappropriately disclosed by OIG employees.
- (3) Circumstances when the OIG will disclose such information include:
 - (A) referrals to appropriate agencies for law enforcement purposes;
 - (B) disclosures under court order;
 - (C) responses to requests by Congress; and,
 - (D) referrals to other agencies that may have cognizance over the matter.
- (4) The OIG will usually honor an employee's request that counsel be present during an interview. The counsel may not be another employee of Amtrak, paid for by Amtrak (unless approved in accordance with Amtrak's Bylaws and policies), a potential subject, or a witness in the case.
- (5) Employees who allege that action was taken against them as reprisal or retaliation for cooperating with or disclosing information to the OIG while they were employed at Amtrak may request the OIG to investigate their reprisal or retaliation allegations.

(b) Amtrak Management, Employees, and Contractors.

- (1) All Amtrak employees must comply with requests for interviews and briefings.
- (2) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions or penalties.
- (3) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful appropriate authority.
- (4) In the context of investigations, managers should not question staff about their interactions with the OIG.
- (5) Any employee who makes a complaint to the OIG with the knowledge that the complaint is false or that it is made with willful disregard for the truth of the information may be held accountable for such statements and may be subject to disciplinary action or criminal prosecution.

7.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND OIG ON AUDITS AND EVALUATIONS

- 7.1 Types of Audits and Evaluations.** The OIG conducts audits and evaluations of Amtrak programs and operations, including performance of contractors. Some audits and evaluations may be specifically required by statute.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	7

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) An audit is an independent, formal, and methodical examination of an organization, program, function, or activity, designed to help Amtrak accomplish its mission efficiently and effectively. OIG audits are performed in accordance with Government Auditing Standards (commonly called the Yellow Book).
- (b) Evaluations are reviews of an organization, program, function, or activity. Evaluations are performed in accordance with the Quality Standards for Inspections issued by the CIGIE.
- (c) Audits and evaluations may include financial or performance reviews.
 - (1) Financial reviews include financial statement audits and any other financially related reviews related to Amtrak's financial operations.
 - (2) Performance reviews include evaluating whether Amtrak programs and operations are working efficiently and effectively as well as whether programs are achieving expected results.
- (d) The OIG also routinely gathers information and data but does not use that information in a formal audit report. These activities may be in response to a congressional inquiry, a request for testimony, or routine planning purposes. Normally, OIG staff members assigned to these activities directly contacts responsible managers to collect information. The assigned OIG staff will inform management of the nature of the data gathering effort.

7.2 Audit and Evaluation Processes. The audit and evaluation processes involve the following steps:

- (a) **Audit or Evaluation Planning.** The OIG often conducts informal research to help it develop audit or evaluation plans or to better understand emerging issues. Audit plans outline potential reviews to be conducted, the objectives of each review, and the resources required to conduct them. In developing the audit or evaluation plan for the year, the OIG considers the following:
 - (1) Issues that may pose a risk to or would promote Amtrak's mission;
 - (2) Objectives of Amtrak's Board and senior managers; and
 - (3) Objectives of Congress.
- (b) **Notification.** The OIG will notify responsible management officials of its intent to begin a review.
- (c) **Entrance Conference.** As a general practice, the OIG will request an entrance conference with responsible management officials to advise them of the objectives and scope of the review and the general methodology that will be followed, and to solicit input from Amtrak officials.
- (d) **Survey.** In some cases, particularly for large or complex reviews, the OIG will perform initial research to refine the objectives, determine the scope, and develop a sound methodology.
- (e) **Field Work.** The OIG analyzes selected areas of a program, activity, or function. It obtains sufficient evidence to support the findings and conclusions and to make recommendations. Frequent interaction with responsible managers and employees occurs during fieldwork.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	8

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (f) **Exit Conference.** Prior to the issuance of a draft audit or evaluation report, the OIG will contact the responsible management official to set up an exit conference to discuss the results of the work. In some cases discussion draft reports or fact sheets are used to facilitate the discussion. The OIG strives to maintain an open channel of communication with managers to ensure that findings, conclusions, and recommendations are accurately and fairly presented in the report.
- (g) **Draft Report.** The OIG provides a draft report to the Audit Liaison, responsible managers of audited organizations, and Amtrak departments affected by the audit findings for their review and comment. The draft report will have been approved by OIG management and will contain the objectives, results, conclusions, and recommendations resulting from the OIG's audit or evaluation.
- (h) **Management Response.** Responsible management officials are normally provided 30 days to respond in writing to the draft report, indicating how they plan to address the findings and recommendations contained in the report. In some cases, the OIG requests a quicker response. Extensions to the established due date will be granted by the responsible Assistant Inspector General.
- (1) Comments should clearly indicate whether responsible management officials concur with each of the recommendations.
 - (2) Concurrence is when management agrees to implement the recommendation or to take an alternative action that will correct the deficiency, along with actual or estimated completion dates.
 - (3) Nonconcurrence is when management does not agree to implement the recommendation or an acceptable alternative. In this case, management should explain the rationale, and include additional facts, if necessary.
 - (4) Management should also identify any information contained in the report that should be protected from public release on the basis that its release may cause significant business or legal harm to Amtrak (the information so designated must not be subject to public release pursuant to the Freedom of Information Act, as amended, 5 U.S.C. § 552). The responsible manager should also weigh the public benefit of transparency against the harm, or potential harm, to company interests, in light of the fact that the company receives Federal subsidies.
 - (5) With respect to decisions regarding confidential, sensitive or privileged information, the Inspector General will follow the standard set forth in Section 5.1(e) above. If the OIG disagrees with management's assertion that specific information should be withheld from public release because it is confidential, sensitive, or privileged, the IG will confer with the responsible department head regarding the need to redact the information before publicly releasing the report. If so requested, the department head has one week to articulate in writing to the IG the bases or reasons for protecting the information from disclosure, including identifying the significant business or legal harm anticipated compared to the benefit of transparency. If, following that consultation, the IG determines that the

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	9

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

information should be publicly released, he will consult with the Chair before including such information in a publicly released report.

- (i) **Final Report.** The OIG will amend the draft report, as appropriate, based on management's response. The Inspector General makes final determinations about what information will be included in the issued report. The OIG also normally includes the entire management response, along with the OIG's analysis of the response in the final report.
- (j) **Report Distribution.** The OIG usually distributes audit and evaluation reports to the Chairman, other Board members, responsible management officials, and Congress. Final reports are normally public documents and are available on the OIG Web site.
- (k) **Recommendation Follow-up.** Amtrak managers are responsible for implementing OIG recommendations to the extent there is concurrence, and OIG staff and Amtrak's Audit Liaison monitor managers' actions to ensure that recommendations are implemented in a timely manner.

7.3 Audit and Evaluation Process Responsibilities.

(a) **Audit Liaison.**

- (1) The Audit Liaison is an individual, or individuals, designated by Amtrak management to perform the functions outlined in this section.
- (2) Facilitates OIG audits and evaluations with Amtrak management. In this role, the liaison ensures that Amtrak managers are aware of OIG reviews and that OIG staff is provided with initial contacts to begin the review process.
- (3) Coordinates entrance and exit conferences with appropriate Amtrak managers.
- (4) Follows up with Amtrak managers to track the status of management actions to implement OIG recommendations.
- (5) Ensures that management's response to draft reports is coordinated with affected departments, is approved by the head of the audited department or organization and is completed in a timely manner.

(b) **Inspector General Managers.**

- (1) Notifies responsible management officials of the intent to begin a review.
- (2) Contacts responsible management officials and the audit liaison to schedule entrance conferences and exit conferences.
- (3) Provides copies of draft reports to the Audit Liaison, responsible management officials of audited organizations, and Amtrak departments affected by audit findings.
- (4) Reviews and evaluates management response to the draft report and, as appropriate, either revises the report or provides the OIG's analysis of the response in the final report.
- (5) Grants extensions to the established due date for management comments.
- (6) Distributes final reports to the Audit Liaison and the appropriate Amtrak departments, and makes further distribution to authorized committees and subcommittees of Congress and the public.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	10

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(c) **Responsible Management Officials.** To maximize the value of OIG reports, management officials or their designees will:

- (1) Attend exit conferences, unless they are waived by agreement with the OIG.
- (2) Prepare responses to draft OIG reports.
- (3) State in the proposed management decision whether they concur with the recommendations presented in the corresponding audit or evaluation report or propose alternative actions to correct the deficiency. For nonconcurrences, explain why management does not concur and present additional facts, if necessary.
- (4) Take prompt and effective action to implement agreed-upon corrective actions.

8.0 OTHER POLICIES

- 8.1 The presumption is that this policy will take precedence in instances where other policies are inconsistent with this policy. When inconsistencies are identified, OIG and management will consult and reconcile differences.

Tom Carper Chairman, Board of Directors		2.1.1	11

RULES ALERT

RULES ALERT No. 2010- 08

November 12, 2010

Crafts Involved: Engineer, Asst. Conductor

Incident: On Friday, November 5, 2010 in Washington Terminal, Washington, D.C., a yard crew with a diesel and two cars pulled north from 30 track to clear signal 209 in preparation to shove south onto 29 track. At the same time a yard crew shoved commuter equipment south from 41 track in preparation to place the equipment on 28 track. The Asst. Conductor (AC) was on the point of the southbound movement. The last car count given to the Engineer was "twenty." The AC called two signals to the Engineer but failed to see and call out the aspect of signal 241 which was a Stop Signal. The movement continued by the Stop Signal and collided with the standing diesel and 2 cars after 13 car lengths following the 20 count. The AC did not place the train in emergency, nor was there an emergency transmission prior to or after the collision. The Engineer did not stop at 10 car lengths when no further count was given after the 20 count. The collision resulted in injury to six employees and extensive equipment damage.

What Could Have Prevented This Incident?

The Engineer should have stopped at half the distance when no further count was given after the 20 count.

The bigger question is: Why did the AC stop giving car counts and calling out signals?

Answer: Personal cell phone records indicate that the AC was talking on the phone immediately prior ~~for 32 minutes up to~~ the point of the collision. If the AC had been focused on the task at hand instead of the phone conversation this incident would not have occurred.

The following rule on Use of Person Electronic and Electrical Devices was published in a Rules Alert less than one month before this incident ~~and still the AC did not adhere to the policy.~~

NORAC Rule E paragraph 4, and Amtrak Division General Order Instructions C.5 paragraph b regarding the use of electronic devices is as follows:

USE OF PERSONAL ELECTRONIC AND ELECTRICAL DEVICES

Unauthorized use of electronic devices is prohibited, as follows:

a. Personal Electronic and Electrical Devices.

Use of a personal electronic or electrical device to perform any function when required to perform service is prohibited.

Personal electronic or electrical devices, including those used for voice communication, must be turned off and stored out of sight, and any earpieces, headphones or other similar peripheral devices stored out of sight when required to perform service.

b. Railroad-Supplied or Authorized Electronic And Electrical Devices.

The use of a railroad-supplied electronic or electrical device on a moving train is prohibited, except as follows:

1. A crew member, other than a locomotive engineer operating the controls of a moving train, may use a railroad-supplied electronic device in the cab of a moving locomotive for an authorized business purpose, after a safety briefing, provided that all assigned crew members agree that it is safe to do so. Any other use in the cab is prohibited.
2. An employee may use a railroad-supplied electronic or electrical device for an approved business purpose while on duty within the body of a passenger train or railroad business car. Such use must not interfere with any safety related duties.

3. Where specified by special instruction, a railroad employee may use a railroad supplied or railroad-authorized wireless device for voice communications to conduct operations when radio communications fail. The use of a railroad-supplied electronic or electrical device for an approved business purpose when required to perform service outside the cab is prohibited:
- (1) While fouling any track;
 - (2) While switching operation is underway;
 - (3) While required to perform any other safety related duty; and
 - (4) Until all members of the crew have been briefed that operations are suspended.

c. Exceptions

- When radio failure occurs, a wireless device may be used for voice communication in the event of a railroad emergency or to perform other duties directly related to the operation of the train by an employee other than the locomotive engineer controlling the movement of the train.
- A locomotive engineer (including a remote-control locomotive operator) may use electronic control systems and informational displays presented to the locomotive engineer within the locomotive cab or on a remote control transmitter to operate a train or conduct a switching operation, including functions associated with controlling switches.

d. Penalties

Any individual who violates these prohibitions or uses any of the described devices without observing any of the restrictions is subject to discipline up to and including discharge. If there are any questions regarding the authorized use of a personal or railroad-supplied electronic device, employees should refrain from any use until the proper authority can be consulted.

This regulation has been in effect for two years.

This is the 5th Rules Alert on the topic of cell phone usage rules and related incidents.

AGAIN: Failure to comply with these restrictions can no longer be attributed to lack of knowledge. Intentional and willful disregard for these regulations will be dealt with severely. Employees found in non-compliance are subject to **personal fines** by the FRA of up to **\$17,000 and dismissal** by Amtrak.

Note: Amtrak will not be responsible for the personal fines.

REMEMBER: THE LIFE YOU SAVE BY ADHERING TO THE RULES REGARDING USE OF ELECTRONIC DEVICES MAY BE YOUR OWN!

STAY FOCUSED! STAY SAFE!

STATE OF AMERICA'S PASSENGER RAILROAD
Amtrak President and CEO Joseph Boardman

Transportation Research Forum
Washington, D.C.
January 12, 2010

Written remarks as prepared.

Thank you for inviting me to be here with you at the Transportation Research Forum.

The day before Thanksgiving in 2008 I became Amtrak's CEO. In the past 14 months I have learned that there are so many others out there interested in making news about Amtrak, that the only news delivered by a CEO seems to be related to his or her resignation.

I say that partly in jest. No, this is not a resignation speech — I plan on being Amtrak's CEO for a long time.

But my point is that someone, somewhere already knows — or thinks they know — everything there is to know about what is happening at Amtrak or should be happening at Amtrak and they write about it somewhere: a newsletter; a blog; a widely dispersed e-mail; or even a trade journal.

Why is that?

I would like to offer three reasons:

- The name "Amtrak" is a blend of the words "America" and "Track." On May 1, 1971 Amtrak became America's Railroad, and it still is. At Amtrak's inception, rumors were already being spread that it was created to fail and to eliminate passenger rail in this country. Disquieted by the rumors, those who believed in America's Railroad kept very close track of the railroad, making sure that any news would be known right away. They existed then, and they exist today.
- Because of the way Amtrak was created, we must collaborate with lots of people before we can make important decisions, and in some cases even not-so-important decisions. About 70 percent of the train-miles traveled by Amtrak trains are on tracks owned by freight and commuter railroads. Changes require discussion, whether it's with the host railroads, communities we serve, elected officials, or rail consumer organizations. In addition, we have 14 unions and two councils that represent our workforce and naturally they stay very engaged in changes that might be considered.

- As a government-supported business, Amtrak must be transparent in what it does and what its strategy is. We provide testimony to Senate and House Committees, are evaluated by an Amtrak IG, USDOT IG, the GAO and a private financial audit every year.

I raise this because there has been so much uncertainty in Amtrak's history that the people who care about passenger rail – and some who don't — appear to be conditioned to look for or make news about Amtrak.

So my message is: Stop living in the past 39 years of worry that passenger rail is going away. The truth is that we're in the midst of a transformational chapter for Amtrak and passenger rail in America. We're taking action this year, and look forward to next year — Amtrak's 40th — to shed that worry once and for all.

Here's why:

Congress has given America's Railroad a strong long-term mission and the White House has presented a vision for passenger rail in America. That support yields funding to make enduring capital investments, including substantial funds from the American Recovery and Reinvestment Act.

There is also tremendous support for new and expanded passenger rail at the state level.

Accordingly, Amtrak is pursuing a growth-oriented mission — we've moved beyond mere survival.

All of us (both inside and outside Amtrak), must reform our thinking and our approach to key issues. We must renew and rebuild our infrastructure and fleet of equipment, be innovative, and pursue opportunities and decisions that make good business sense.

I am proud to inform you that over the past year Amtrak is doing all of that — and more. Amtrak **IS** changing and rising to meet the challenge.

And I can say without hesitation that **THE STATE OF AMERICA'S PASSENGER RAILROAD IS STRONG AND WE ARE OPTIMISTIC.**

Amtrak enters 2010 with enthusiasm and purpose.

RIDERSHIP

We just closed the books on the best first quarter ever for ridership in Amtrak history. We carried nearly 7.2 million passengers in the first quarter — breaking the previous record set in FY 08, which was our best year ever.

In fact, Amtrak is experiencing a long-term trend of rising ridership, from 21.6 million in FY 2002 to 27.2 million in FY 2009, with an all-time record of 28.7 million in FY 2008.

Since FY 2004 through the most current numbers available in third quarter of FY 2009, Amtrak's share of the rail / air market has been on the rise in many locations.

On the Northeast Corridor, the Amtrak share of the rail / air market between New York and Washington increased from 50 percent to 61 percent. During the same period, for the New York-Boston market, the Amtrak share rose from 39 percent to 50 percent. Similarly, our share of the Chicago-St Louis market was 10 percent and increased to 16 percent. During the same period, for the Los Angeles-San Diego market, Amtrak's share went from 73 percent to 97 percent.

AMTRAK GOALS

We are setting aggressive goals to maximize our new opportunities. To make certain Amtrak has a clear set of goals and priorities — and that they support those of Congress and the White House — last October we issued new Strategic Guidance and a detailed Five-Year Financial plan.

Combined, the two documents create a new vision for Amtrak — the first new vision statement for the railroad since 2005.

That vision is built on six fundamental goals to be safer, greener, healthier and to improve financial performance and customer service, and to meet national needs.

SAFER

Amtrak has a good safety record and we intend to be the safest railroad in the world for our passengers, our 19,800 employees and the communities in which we operate.

But we aim to further improve safety and security by making risk-reduction a top priority. This approach to safety complements, and does not replace, traditional rules-based compliance programs.

To that end, we are moving forward with two risk-reduction initiatives.

Underway now is Safe-2-Safer, an approach to safety and security that aims to reduce injuries by promoting a more collaborative environment in which employees at all levels work together to change at-risk behaviors to safe behaviors.

Working with our labor unions, we are helping supervisors become better leaders, and establishing teams of managers and front-line employees to identify ways to make our tracks, shops, stations and trains become even safer and more secure places.

By mid-2010, we intend to begin a Federal Railroad Administration-sponsored program called Close Call Reporting. It allows close-call events that did not result in an accident or injury — but could have — to be anonymously reported by employees so that safety improvements can be made as appropriate.

I realize this change in approach to safety will take time to take hold. Successfully changing habits and mindsets that have been in place for so long will take time, but I am convinced it will produce positive results.

Remember — the challenge is to reform our thinking and our approach to key issues.

In addition, Amtrak is committed to an aggressive schedule to install Positive Train Control (PTC) technology. We have PTC on some, but not all, of our tracks now on the Northeast Corridor and in Michigan.

By our self-imposed deadline of the end of 2012 — three years **BEFORE** a Congressional deadline for the rail industry — we will have installed PTC on the remaining 308 route miles along the Amtrak-owned or maintained Northeast Corridor and on the last 50 route miles of our line in Michigan where the technology is not currently available.

On the security front, Amtrak has in place a range of robust behind-the-scenes and front-line security measures to help safeguard our passengers and employees.

We will continue to expand our K-9 explosive detection teams, harden more stations and continue to extend the reach of our security activities by strengthening cooperative inter-agency operations with local, state, federal and international law enforcement and counterterrorism partners.

Our partnerships include representation on the FBI's Joint Terrorism Task Forces and conducting more than 130 joint VIPR security operations at 38 different stations with the Transportation Security Agency last year.

In addition, we now have 45 qualified K-9 explosive detection teams — nearly triple the number of just a few years ago. They are among the most sophisticated in the country and can detect various explosive substances, including the type used in the Christmas Day airline terrorist plot.

For 2010, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrol deployment, screenings and other activities in stations and on trains.

GREENER

In 2009, through our membership with the Climate Registry and Climate Counts, we joined efforts to voluntarily and publicly report our greenhouse gas emissions and undergo an independent assessment of our programs to reduce our carbon footprint.

Amtrak is a founding member of the Chicago Climate Exchange, and will meet or exceed our commitment to reduce greenhouse gas emissions (CO₂) from diesel fuel by 6 percent by the end 2010.

In addition, Amtrak is taking action to conserve energy, water and other resources at buildings and other facilities.

HEALTHIER

The health of a company relates to its vital signs. We are making enduring investments to better the reliability of our infrastructure and fleet and our ability to grow business with new and existing partners.

During 2009, Amtrak conducted a comprehensive examination of its locomotive and passenger railcar needs. Our fleet plan, with an identified funding mechanism, will be announced in February as part of our annual legislative and grant request to Congress.

It will include the purchase of several hundred single-level and bi-level long-distance passenger railcars and more than a hundred locomotives. This major equipment purchase will replace and expand the fleet and support American rail manufacturing industries, creating jobs in the United States.

Separately, but related, Amtrak expects to make contract awards this spring for 130 single-level long-distance cars and 20 electric locomotives.

How we pay for these plans could involve a range of options.

In fact, Congress is currently considering additional capital funding for Amtrak as part of Stimulus 2, as they call it. The House bill includes \$800 million for rehabilitation and acquisition of new equipment. We will need to see what the Senate version offers, but we see the House bill as a positive statement of support.

Amtrak is making good use of the \$1.3 billion we received from the Obama administration's American Recovery and Reinvestment Act. Of the \$1.3 billion, Amtrak has awarded \$596.5 million in contracts for 113 projects.

With those funds, we will also be rehabilitating and restoring damaged or stored equipment including 60 Amfleet, one Viewliner and 20 Superliner cars, and 15 P-40 diesel-electric locomotives.

For those who question whether the stimulus funds have created jobs, I can tell you that so far we have created over 600 Amtrak jobs and another 200 in vendor organizations with which we have contracted as a result of ARRA-funded projects.

Beyond ARRA, we will spend \$442 million for our annual capital program for several other major projects to repair and replace tracks, bridges and other key infrastructure.

Being a healthier Amtrak helps position itself as THE provider and partner of choice for commuter, intercity passenger rail and high-speed rail service.

We currently have partnerships with 15 states accounting for nearly 50 percent of our average weekday departures and we plan to foster more. Over the next five years, Amtrak is seeking to establish at least eight service expansions as part of existing state partnerships and form at least two new state partnerships.

Last year, we added our 15th partnership when we entered into a contract with Virginia to provide new *Northeast Regional* service between Lynchburg and Washington, D.C. We expect to add another frequency between Richmond and Washington, D.C. this summer.

Also starting in 2010, is an additional *Piedmont* frequency between Raleigh and Charlotte in partnership with North Carolina.

On the commuter front, Amtrak is currently working out final details to provide Train and Engine crews to operate all seven lines of the Los Angeles-based Metrolink commuter rail service starting this summer.

A healthier Amtrak also means we are dedicating significant resources to modernize and replace outdated IT systems and business processes critical to the delivery of service such as for internal business processes and for reservation and ticketing.

IMPROVED FINANCIAL PERFORMANCE

It is those kinds of investments that support an efficient business. Amtrak is America's passenger railroad. As government-supported business, we are fully aware of the responsibilities that come with taxpayer support.

For the current budget year, we received federal operating support of \$563 million, and it is our duty to invest and spend that appropriation, along with the federal stimulus funds, in an efficient and smart manner.

In fact, for FY 2010, we will fund 81 percent of our operating costs from all revenue sources, excluding federal and state funds. And, in FY 2009, Amtrak had a farebox recovery rate of 71 percent — among the highest among all passenger railroads, including commuters and transit, in the U.S.

Amtrak completed a year-end financial audit containing no material weaknesses — the first time that has happened since 2004.

CUSTOMER SERVICE

Amtrak offers riders an experience that is convenient, competitive, and pleasant.

Overall Customer Satisfaction Index scores have been steadily rising from 78 percent in FY 2007 to 82 percent in FY 2009.

On-time performance is one of the major drivers of customer satisfaction. In FY 2009 systemwide OTP was 80 percent, a 9 point increase over the prior year and Acela Express operated on time 87 percent of the time.

In March, we intend to make WiFi available initially free of charge to every passenger on Acela and by November we will finish upgrading the interiors.

We remain focused on our Route Performance Improvement process to identify ways to enhance service on specific routes. One of the most recent results of that effort is restoring sleeper cars and dining cars to the *Lake Shore Limited*.

In 2010, Amtrak will also undertake an in-depth evaluation of the poorest performing long-distance routes to identify and implement changes where possible to improve key measures such as customer service, ridership, and financial performance. The five routes being analyzed are the *Sunset Limited*, *Cardinal*, *Texas Eagle*, *Capitol Limited*, and *California Zephyr*.

Three months ago, we launched our newest generation of Amtrak.com, which among other things makes booking tickets easier.

We also partnered with Google Transit to include Amtrak routes as part of its trip-planning tool that provides travelers with public transportation connections.

MEETING NATIONAL NEEDS

Amtrak was created to provide an essential national service and must support the government in moments of national need. As Amtrak grows, so does its capacity to meet those needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

We also have a five-year contract with FEMA to use Amtrak trains and crews to help evacuate New Orleans during Hurricane season and we will continue to review other potential opportunities to assist when natural disasters occur.

INTERCITY AND HIGH-SPEED RAIL

Finally, as many of you are aware, the big news expected in the coming days or weeks will be the U.S. DOT and FRA's announcement about which states and what projects will get a piece of the \$8 billion in grants available for intercity and high-speed rail development and expansion.

Leveraging our experience as the nation's intercity passenger rail service provider and its only operator of high-speed trains, we partnered with 25 states to support more than 100 projects as part of the first round of grants.

It seems likely that a significant number of the grant awards will involve improvements to routes over which Amtrak operates. That is obviously good for Amtrak, but it is also good for America, our passengers, the communities we serve, and our state partners.

CLOSING

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth. In addition, the opportunities that are being made available to us thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others, both domestic and foreign-owned to enter the market.

The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

As I told you when I began this speech, Amtrak **IS** changing and rising to meet the challenge, and I look forward to the next couple very exciting years at Amtrak.

The days of wondering if Amtrak is going to survive another year and uncertainty are behind us. This year and the years ahead are, and will be, focused on growth.

They will be years of strong and optimistic leadership, filled with achievements that will demonstrate a safer, greener, healthier, improved financial and customer focused railroad that lives up to its role in meeting America's national passenger rail needs.

Thank you.

###

2010

Collateral

On Monday, May 31, we will observe Memorial Day. For more than a century, our nation has honored the men and women who died in the service of their country at the end of May. The holiday was originally known as Decoration Day, and it was so called because communities turned out to decorate the graves that the Revolution, the War of 1812, and the Civil War had left scattered across the American landscape. The Twentieth Century's wars took Americans farther afield than many of them had ever been or meant to go, and it was not practical for everyone to come out to decorate graves in France, Italy, or the distant Pacific islands. Today those graves are well tended by people who have as much cause as we do to be grateful for their freedom and the sacrifices that won it, and we now know this holiday as Memorial Day.

In recent years, at the request of Congress, people have begun to observe a national "moment of remembrance" on Memorial Day. They stop what they're doing and observe a minute of silence as a way of honoring the people who gave their lives for our country. Amtrak is America's railroad, and we, too, will commemorate Memorial Day. This year, as on previous years, all of the engines on the system will sound their horns at 12 o'clock noon local time as a salute to those who died for our country. Over the years, Amtrak employees have served our nation and have gone in harm's way to protect our freedoms and our way of life. Today I hope you will remember the Amtrak employees who are on active duty with the Reserve or the National Guard and are deployed away from their families and friends.

Memorial Day is customarily regarded as the first day of summer, and it's always an occasion for joy – and after the past winter, I think we can all agree that we're ready for a little summer sun and warmth. I hope those of you who can take the holiday do so, and enjoy the time off. I also hope, however, that if you are away from work that day, you can find a moment to remember the people who gave "their last full measure of devotion" for our country, our people, and our form of government.

For those uniformed crewmembers who will be working on Memorial Day, Amtrak has authorized the wear of dignified or appropriate lapel pins or badges that commemorate your military service. We wish to encourage wear of service crests, unit badges, and ribbon pins. Wearing of American flag pins or yellow ribbons is likewise appropriate, and everyone who wishes to wear them should feel free to do so. Amtrak supports our veterans. We are proud of you and grateful for your service, and I hope that everyone can spare a minute or two on Memorial Day to reflect on the sacrifices that secured our freedom, and are preserving it today.

Message from Joe Boardman

Dear Co-workers,

Today we come together at 46 different locations to celebrate our second annual Employee Appreciation Day. I hope that you'll take the time to participate and learn more about what's going on in the company.

We've made a lot of headway in the past year, but I'd like to focus on some of the things we're doing as a company to improve life at Amtrak.

Whether you are a locomotive engineer or a financial analyst, each employee is the power behind the Amtrak brand. You — your ideas, your energy, your know-how — are what makes us America's railroad. And our employees show a loyalty to Amtrak and to the Amtrak family that in my view is uncommon in today's world.

We have our own financial challenges and as a government-supported business, we are fully aware of the responsibilities that come with taxpayer support. But one of the most meaningful investments we can make is in our workforce.

Next month, we'll be unveiling three interconnected resources for employees: the new Human Resources Employee Service Center, the Employee Information Portal and access to the intranet from home for all employees.

Also next month, employees participating in the Fidelity 401 (k) Retirement Savings plan will have new lower-cost options in which to invest, allowing you to save more for retirement. The new options are the direct result of the initiative of our Treasurer, Dale Stein, who made securing these new options for employees among his top priorities.

We're devoting resources toward implementing Safe-2-Safer because the

return on a safer working environment — saving a co-worker from an injury or worse — is that employees go home to their families at the end of the work day. With Safe-2-Safer, we're also providing managers ongoing training and helping foster a more collaborative environment. While the full benefits of Safe-2-Safer will play out over time, the result is an enduring change in the way we relate to one another, and a safer and more pleasant place to work.

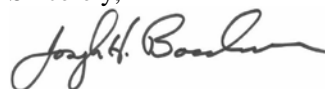

We also offer other resources that are unique to Amtrak. For example, we are among few companies with its own Employee Assistance Program. The benefit of an in-house EAP is that our staff of professional counselors provides confidential support and guidance, but they also understand the unique Amtrak culture.

We also recently marked the 10th annual Operation RedBlock Day, aimed at educating employees about how to promote a drug- and alcohol-free workplace.

Next Saturday, approximately 170 locations in 44 states (including the events in Los Angeles, Chicago, Philadelphia, and Washington) will be hosting National Train Day events — an opportunity to celebrate the American railroad and the people behind it.

These are just a few examples of our efforts to show our commitment to you. We value and appreciate you and the work you do every day. Thank you and keep working safely.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today marks the 40th anniversary of Earth Day, a movement that has taken on international significance and has changed attitudes all over the globe. As we strive to be a greener railroad, we're examining many facets of the business to help ensure better environmental stewardship.

Just this week, we joined the Oklahoma and Texas state Departments of Transportation in announcing the first-ever test of a cleaner and renewable biodiesel fuel blend to power the *Heartland Flyer*. This was made possible by a FRA grant to trial alternate fuels; the fuel used on the *Heartland Flyer* includes beef byproduct refined into biofuel.

While we currently make recycling available on all trains that provide food service, we aim to increase recycling aboard our trains, in stations and at facilities this year.

As a result of our fuel conservation and emissions-reduction efforts, our diesel fuel consumption and carbon emissions fell by 8.5 percent from 2000 to 2008, while ridership grew more than 27 percent over the same period. And we plan to improve on those efforts each year.

We also plan to reduce utility usage by 2 percent at 10 locations with the highest usage, and are implementing measures to reduce computing energy use by 20 percent by FY '12.

We've also partnered with organizations like The Climate Registry, which has helped provide a framework for our first comprehensive greenhouse gas emissions inventory. We're also

working with Climate Counts, an organization that makes independent assessments of companies' commitment to the environment, and Amtrak was recently awarded a score of 62 out of 100 — the highest among transportation-related businesses.

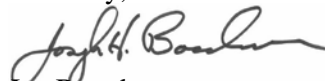

While it often takes innovation to help make the most of our natural resources, there are also things as simple as switching to more energy-efficient light bulbs or printing on both sides of the paper that also make a difference. Half the battle is changing our collective attitudes and changing our behaviors so that we are all more environmentally conscious.

Our Environmental Management Steering Committee, a cross-departmental group of employees that develops strategies to reduce Amtrak's carbon footprint, sets many of these goals. If you have an idea for the steering committee please e-mail Joanne Maxwell at MaxwelJ@amtrak.com.

There are many other goals and accomplishments on the green front, and you can learn more about those in this month's issue of *Amtrak Ink*. But being green is more than measuring up — good environmental stewardship makes us a more efficient operation, a better corporate citizen and a good neighbor to the communities we serve.

"Greener" involves a state of mind that is put to action, and it is what responsible companies need to be. We can all — individually and collectively — help advance our goal of becoming greener.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

At about 1:57 a.m. on Sunday morning, a CSX conductor was shot and killed by an intruder who boarded the locomotive while the freight train was stopped about four miles outside of the New Orleans Terminal. The engineer was grazed by additional gun fire and played dead while the intruder searched through their pockets. The assailant fled the scene, and a search and investigation is underway.

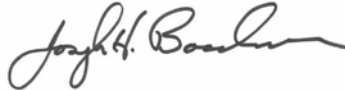

Upon hearing about the incident, Amtrak Police Department dispatched four special agents to assist CSX and the New Orleans Police Department with the investigation. While the Crescent does travel through the area, it rarely stops there. Nevertheless, we have increased our own police presence in the area, and the crews are being briefed to take precautions and to remember to keep cab doors locked.

We become so familiar with our daily working environment that it's easy to let our guard down and fall into a false sense of security. Whether it's in New Orleans or anywhere on the railroad, I ask everyone to be mindful of their environment at all times. Sadly, this tragic and senseless act could take place anywhere. Your personal safety and security is paramount — please be watchful, stay vigilant and lock doors that should be locked.

We mourn the loss of one of our brothers. I will never understand why people commit such horrible acts of violence, but the reality is that it happens and we must watch out for one another.

Please take a moment to consider the personal safety and security at your work site.

Sincerely,

Joe Boardman

June 10, 2010 • Page 1 of 1

Message from Joe Boardman

Dear Co-workers,

At Virginia Railway Express' request, Amtrak has agreed to extend our operation of the commuter service for an additional two weeks, due to uncertainty surrounding the incoming service provider's ability to assume operations on June 28. We expect to sign an agreement to implement the extension early next week.

VRE has asked Amtrak to provide train crews and operate the service from June 28 through July 9, and we are taking the steps necessary to accommodate that request. We requested that VRE provide us sufficient advance notice so that we could be sure to have crews available to operate VRE during this period, since we'd planned for new assignments for those employees starting June 28. According to the terms of the previous agreement, June 25 would have been the last day our crews operated the service.

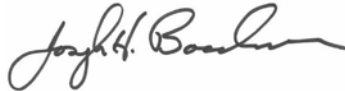

As I've told the T and E crews currently assigned to VRE service, we have a civic responsibility to the 17,000 daily riders, and we will not allow VRE commuters to suffer a loss in service.

Throughout this process, Amtrak has been committed to a cooperative and smooth transition, including providing training and moving forward on the necessary access agreement for VRE's continued use of Washington Union Station and Terminal. Our agreement to an extension is further evidence of our commitment and of our dedication to the people who rely on the service to get to work every day.

I want our crews to know that I am proud of the work they do and look forward to having them continue to be part of the Amtrak family.

Thank you for the work you do every day and please keep working safely.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

At about 1:57 a.m. on Sunday morning, a CSX conductor was shot and killed by an intruder who boarded the locomotive while the freight train was stopped at a red signal about four miles outside of the New Orleans Terminal. The engineer was grazed by additional gun fire and played dead while the intruder searched through their pockets. The assailant fled the scene, and an investigation is underway.

Upon hearing about the incident, Amtrak Police Department Chief John O'Connor dispatched four special agents to assist CSX and the New Orleans Police Department with increased security presence. While the *Crescent* does travel through the area, it rarely stops there. Nevertheless, we are closely monitoring activity in the area, and local crews are being briefed to take precautions and to remember to keep cab doors locked. In addition, I've asked that all crews across the system be reminded of safety and security tips during crew briefings this week.

We become so familiar with our daily working environment that it's easy to let our guard down and fall into a false sense of security. Whether it's in New Orleans or anywhere on the railroad, I ask everyone to be mindful of their environment at all times. Sadly, this horrific and senseless act could take place anywhere. Your personal safety and security is paramount — please be watchful, and lock doors that should be locked.

We mourn the loss of one of our brothers and we extend our sympathies to the families of both victims. I will never understand why people commit such horrible acts of violence, but the reality is that it happens, and we must be vigilant and watch out for one another.

June 28, 2010 • Page 1 of 2

Message from Joe Boardman

Dear Co-workers,

As many of you know all too well, we are currently experiencing a rash of engine problems — particularly with the electric locomotives on the Northeast Corridor — that is seriously affecting the quality of our service.

The combination of high temperatures and the fact that our locomotives are old and hard-run is resulting in mechanical failures. But saying that this is what happens to aging engines when it's hot is not an acceptable answer. We cannot afford any level of complacency on this.

To that end, we have increased the number of mechanical technicians riding Northeast Corridor trains, as of last week. Who rides when and where is the result of a daily evaluation based on weather conditions, locomotive history and other operational conditions.

To help address the restoration of Head End Power when an engine loses motive power, the Mechanical department is beginning to replace the current mechanical output contactor — the mechanism that can restore HEP to the cars after the main circuit breaker trips — with an electric one on HHP-8 and AEM-7 AC locomotives. This replacement will make it a lot easier to reset HEP and to restore it more quickly, and installation is expected to be completed on the electric fleet by the end of the calendar year.

Modeled after a Mechanical Reliability Bad Actor (RBA) team for the diesel engines in Chicago, we've established another team for electric locomotives in Washington to identify the root causes of failures for engines that are chronically breaking down. The

team in Chicago has processed more than 40 units with over 7,000 days reported defect-free, so I am hopeful that we'll have similar success on the NEC.

On July 14, we will be expanding Maintenance Events Analysis Program (MEAPS) training to Ivy City for some mechanical technicians. MEAPS is a relatively new program that provides real-time fault monitoring for our electric locomotive fleet, so that each facility can better diagnose and troubleshoot en-route problems.

In addition, about two weeks ago Engineering's Electric Traction group installed recording volt meters at the Union substation to monitor the voltage for irregularities that would result in a service disruption or mechanical issue. None have been detected, but they will continue to closely monitor the voltage until the number of failures is reduced.

While the wave of engine failures has taken place on the Northeast Corridor, we've recently dispatched master mechanics to the Central and Southern divisions to see how we can better support the diesel fleet as well.

I know these failures take a toll on our on-board crews. I know that our mechanical forces work hard to maintain equipment that is way past its prime. This is not about pointing fingers, it's about knowing that we CAN do better and putting our minds together to make things right.

I have communicated to Congress the urgency of replacing our aging fleet and the situation we're facing today is dire. So we are moving forward with the

Produced by
Employee Communications

special employee advisory

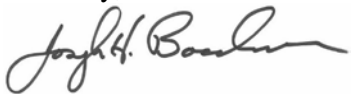

June 28, 2010 • Page 2 of 2

purchase of new equipment and we expect to procure between 20 and 60 electric locomotives. But please know that even as we press forward on buying new equipment, we won't take delivery for another two to three years.

We're taking steps to address the mechanical issues that are affecting our service. To our front line employees, I thank you for your dedication. I know it can be challenging when the equipment is failing — it's in the tough times that it's extremely important to maintain our professionalism.

I thank you for working hard to do that and want you to know that we're taking steps to provide you and our passengers healthier equipment.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

It is with great regret that I inform you that United Transportation Union (UTU) General Chairman Al Suozzo passed away last night.

I just learned the news during our meeting of the board of directors today and we held a moment of silence in his memory. We were all saddened — he had just attended a meeting here a few weeks ago.

Having begun his career in the railroad industry in 1964, he became UTU General Chairman in 1992. Well-respected by the conductors he represented, he was known for his passion and concern for his members. He presided over numerous contract negotiations and earned the respect of his peers and company officials.

The board of directors and Amtrak offer our condolences to the union and his family.

Sincerely,

Message from Joe Boardman

Dear Co-workers,

To support our corporate growth strategy and our goal of remaining the premier operator of high-speed passenger service in the United States, I am creating a new High-Speed Rail department at Amtrak, which will be led by a vice president reporting directly to me.

The board of directors approved this change yesterday at its monthly meeting and we plan to move quickly to fill the new vice president position so he or she can build a department that will focus on pursuing opportunities to expand our high-speed rail operation.

Specifically, this department will work on the planning and development activities that will allow us to significantly increase operating speeds above 150 mph (240 kph) on the Northeast Corridor. It will also pursue partnerships with states and others in the passenger rail industry to develop federally-designated high-speed rail corridors such as the new projects moving forward in California and Florida.

Amtrak's leadership in this area is reaffirmed in the Passenger Rail Investment and Improvement Act of 2008 and we must make every effort to remain in that position.

The increasing demand for passenger rail service means we will face new competition from companies all over the world, but we have

several strategic advantages that we must not waste. We have assets, partnerships and knowledge that others do not. And most importantly we have an extremely skilled team of employees that is unmatched. In short, we are uniquely qualified to meet the goals laid out by President Obama and the administration's *Vision of High-Speed Rail in America*.

Our new High-Speed Rail department will capitalize on these assets to ensure that we keep our position as the most effective, most professional high-speed rail operator in the nation.

We will continue to keep you informed as we develop this new department. In the meantime, please keep up the great work and continue to work safely.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

On Friday, April 30, we will celebrate our second companywide Employee Appreciation Day. We instituted Employee Appreciation Day last year to express our thanks for what you do for the company — it's just one way we can show our commitment to you.

We're making many long-lasting investments to position the company for growth, including investments in our workforce. I am committed to helping make Amtrak a more collaborative and unified company, because each one of us has a role to play in our collective success.

We want Employee Appreciation Day to be meaningful and beneficial to you, so we'll provide information, tools and resources that we hope you'll find useful.

After last year's event, I asked for your feedback about Employee Appreciation Day so we could understand what was valuable to you at the events and how we could improve. Some of you took the time to send your thoughts and we have used your feedback to improve this year's program.

At 46 locations throughout the system, we will host events to recognize our many collective accomplishments over the past year, while providing information and resources to help us become safer, greener and healthier — both personally and professionally.

Specifics will vary by location, but planned activities include personal finance and retirement planning sessions with representatives from Fidelity

Investments; health and wellness screenings from Aetna and United Healthcare; "green" tips from local energy conservation organizations; and safety tips and updates from Safe-2-Safer, Operation RedBlock and Operation Lifesaver. We will also be providing information about the new Employee Information Portal, a new Employee Service Center, and how all employees will soon be able to access the company's intranet from home — all aimed at better serving you.

One of the other things that many of you liked last year was the "Did You Know" booklet that offers company information and discounts to Amtrak employees on services from AT&T, Verizon, Carnival Cruise Lines, Pro-FLOWERS, Hertz, Budget and other companies. We've expanded that resource this year to make it even more valuable.

I plan to visit some of our locations in Florida on April 30 (I'm still working out the schedule), so that I can spend that day with some of you. It is a wonderful opportunity to provide leadership for this company today. From all the members of the Executive Committee, the Board of Directors and from me as your CEO, I hope that you are seeing and understanding a new appreciation for what you do every day and not just during this day dedicated to it. Feel free to ask us questions, voice your concerns or just say hello.

Thank you all for your dedication. Please keep up the great work and, as always, work safely.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

I am pleased to announce today the availability of three news tools aimed at providing better service to you.

Making the intranet available to all employees from home, enabling you to access and update information such as your pay stub or contact information through the Employee Information Portal and offering you a one-stop-shop Employee Service Center for answers to your Human Resources questions are all part of our commitment to creating a better Amtrak for you.

Many of you have not had access to the intranet site before, and I urge you to go take a look and see what resources are there for you.

If you want to change your address, access your bank information or enroll for training, you can do it any time you want by going to the Employee Information Portal, which is available on the intranet. The portal also provides managers new tools for managing employees' training and other streamlined functions.

And if you have questions for Human Resources, you can call or e-mail the Employee Service Center, where employees dedicated to answering your questions can assist you.

You can now access the intranet through Amtrak.com and by

choosing "Inside Amtrak," then "Employee." If you've never logged in before, check the insert that came with your May 14 pay stub for instructions. A letter sent this week to all employees' homes also contains that information.

You can call the Employee Service Center 1-888-MY-HR-ESC (1-888-694-7372) at any time between 8 a.m. and 8 p.m. Eastern time, Monday through Friday.

I hope you'll take advantage of these resources, we strive to make them convenient and easy to use. We're making many investments to make Amtrak a healthier company, and investing in our workforce is among the most significant.

Please keep up the great work and, thank you.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

Last Friday morning, an out-of-service MARC train being backed into Washington Union Station collided with a switcher pulling a Dome Car and a private car, as the trains were switching in the yard. The collision sent six people — all Amtrak employees — to area hospitals. Thankfully, all employees were released from the hospitals that day.

The incident investigation has determined that the MARC train passed a stop signal without permission. In addition, preliminary findings show that the assistant conductor, who was responsible for calling the signals to the locomotive engineer, was using a cell phone immediately prior to the collision, in violation of federal rail safety regulations. That person is currently not performing service, pending the completion of the investigation.

All of us — especially employees in the operating departments — should be familiar with FRA Emergency Order 26, which prohibits on-duty railroad operating employees from improperly using personal cellular telephones and other distracting electronic devices. A Rules Alert is being distributed to crew bases today to remind employees of the details of how it applies to them.

I say all of us, because we are all responsible for our own, as well as one another's, safety. With the rollout of Safe-2-Safer, we are in the midst of a safety culture transformation. Rules are necessary and must be enforced, but as I've said many times, the safety culture we're developing is not about rules and "catching" people — it's about fostering a culture that is committed to identifying and eliminating barriers to safety and unsafe behaviors to prevent injuries in the first place.

Safety is a value — not a rule — that is universally shared and that guides everything we do; every action, every decision. But you can't impose a value, it's got to come from each one of us. It's got to be internalized. Safety is a fundamental value and it comes down to each and every one of us embracing it. It's easy to relate to, because we all want to go home the way we came in to work. And I know we want the same for all of our co-workers.

Our unions have been cooperative in this investigation and I value the relationships we are strengthening as we work together to create a safer work environment.

As I've said before in different circumstances, this is not about blame — this is about ownership — and there's an important difference. Blame is the culture we're doing away with at Amtrak. Ownership, learning from each other and looking out for one another, help instill a strong safety culture.

Based on feedback from front-line employees and managers alike, I'm encouraged to know that Safe-2-Safer is changing our safety culture for the better. Please keep it up, look out for one another, and thank you for the work you do to accomplish that.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Last Friday morning, an out-of-service MARC train being pushed toward Washington Union Station collided with a switcher pulling the Dome Car and a private car, as the trains were switching in the yard. The collision sent six people — all Amtrak employees — to area hospitals. Thankfully, all employees were released from the hospitals that day.

The incident investigation has determined that the MARC train violated a stop signal. In addition, preliminary findings show that the assistant conductor, who was responsible for calling the signals to the locomotive engineer, was using a cell phone immediately prior to the collision in violation of federal rail safety regulations. That person is currently not in service, pending the completion of the investigation.

On Friday, a federal rule was violated. That stands true, regardless of the injuries that violation may have caused.

All of us — especially employees in the operating departments — should be very familiar with FRA Emergency Order 26, which prohibits on-duty railroad operating employees from improperly using personal cellular telephones and other distracting electronic devices. An Operation Alert is being distributed to Transportation department employees today to ensure that they are fully aware of the details of EO 26.

I say all of us, because we are all responsible for our own, as well as one another's, safety. With the rollout of Safe-2-Safer, we are in the midst of a safety culture transformation. Rules are necessary and must be enforced, but as I've said many times, the safety culture we're developing is not about rules and

"catching" people — it's about fostering a culture that is committed to identifying and eliminating barriers to safety and unsafe behaviors to prevent injuries in the first place.

Safety is a value — not a rule — that is universally shared and that guides everything we do; every action, every decision. But you can't impose a value, it's got to come from each one of us. It's got to be internalized. Safety is a fundamental value and it comes down to each and every one of us embracing it. It's easy to relate to, because we all want to go home the way we came in to work. And I know we want the same for all of our co-workers.

Our unions have been cooperative in this investigation and I value the relationships we are strengthening as we work together to create a safer work environment.

As I've said before in different circumstances, this is not about blame — this is about ownership — and there's an important difference. Blame is the culture we're doing away with at Amtrak. Ownership, learning from each other and looking out for one another help instill a strong safety culture.

Based on feedback from front-line employees and managers alike, I'm encouraged to know that Safe-2-Safer is changing our safety culture for the better. Please keep it up, look out for one another, and thank you for the work you do to accomplish that.

Message from Joe Boardman

Dear Co-workers,

Today, Amtrak released a bold vision of a realistic and attainable next-generation high-speed rail system that could revolutionize transportation, travel patterns and economic development in the Northeast for generations.

With trains operating up to 220 mph (354 kph) on a two-track corridor, we could operate from Washington to New York in 96 minutes and New York to Boston in just 84 minutes, cutting today's trip-times in half. We could offer our passengers three to four hourly high-speed departures, compared to once per hour today.

As America's Railroad and our country's high-speed rail operator, it is central to our mission to put forth a concept plan that looks beyond what we can operate with what we have today.

Entitled "*A Vision for High-Speed Rail in the Northeast Corridor (NEC)*," the study describes a system that addresses a major national transportation need for generations to come. Given its population, economic densities and demand for intercity travel — which estimates show doubling by 2050 — the Northeast is in need of a next-generation high-speed rail system that will support growth through the next century.

When it's completed in 2040, the new infrastructure would support expected high-speed train ridership of 20 million, but it would ultimately accommodate 80 million passengers decades later at full capacity.

Building a world-class system of this magnitude would require \$117 billion, or

\$4.7 billion annually, over the course of a 25-year construction period.

You may remember that this summer we developed an NEC Infrastructure Master Plan that examined how the NEC could meet accommodate growth given the railroad we have today. That study predicted that capacity would max out by 2030 — this next-generation high-speed rail system will provide the necessary new capacity to meet growing demand well beyond 2030.

Our vision meets our safer, greener and healthier goals. We could provide fast, safe and secure travel that reduces energy use and emissions while providing comfortable and reliable service to sustainable communities and helping support the national and regional economies. It would help ease highway and airway congestion and foster "greener" travel for millions of Americans.

Construction of the system alone would mean 44,000 annual jobs during 25-year build-out period, and the operation would yield 7,100 new rail operations jobs.

Keep in mind that it's a concept, and represents only one of a wide range of possible network and service configurations that could be developed. But the key here is that we have undertaken an in-depth study of what it would take to offer a world-class high-speed system for the future.

If you don't live in the Northeast, the significance of this plan shouldn't mean any less to you. While this is a major undertaking for the NEC, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end on the NEC. We are pursuing high-speed rail corridor development opportunities such as the projects in Florida and California

Chief O'Connor Testifies Before Senate Committee

Amtrak must focus its efforts on defeating and deterring the most dangerous and likely terror tactics, Vice President and Chief of Amtrak Police John O'Connor told members of a Senate Committee on Wednesday.

O'Connor was invited to appear before the Senate Committee on Commerce, Science and Transportation as part of a panel to provide expert testimony on securing rail and surface transportation networks.

Citing attacks on train systems in Madrid, London, Mumbai and Moscow in recent years, O'Connor stated that future attacks on surface transportation modes would likely occur with the use of an Improvised Explosive Device on a train or in a station, or an active shooter. Accordingly, Amtrak is focused on a growth strategy to address security goals and to make it harder for terrorists to use their preferred strategies to attack stations, trains and passengers.

The plans include strengthening the bomb-detecting K-9 operation, which includes "vapor-wake" teams that can detect residual fumes; increasing the number of baggage screening teams; and bolstering partnerships with federal authorities, including expanding the Visible Intermodal Prevention and Response (VIPR) program with the Transportation Security Administration. The company is also advancing its corporate security goals by using American Recovery and Reinvestment Act funds to assess and fortify vulnerabilities, utilize Station Action Teams and continue to train employees to remain vigilant.

"We are enthusiastic about programs that help us to bring more people, technology and animals to bear on the task of keeping our stations and trains secure," said O'Connor.

Describing the merging of the former Office of Security Strategy and Special Operations and the Amtrak Police Department, O'Connor stated that the new integrated Amtrak Police Department organization would eliminate some duplication of functions and allow better use of personnel and assets, yielding a blend of "customer-oriented policing and robust counterterrorism efforts."

In a letter to Amtrak Police Department employees issued today, President and CEO Joe Boardman pointed out that this change aligns with what many other police departments have done. "These departments have found that they are better able to detect-deter-defend in an integrated public safety and security organization than with separate organizations," he said.

O'Connor's testimony is posted on the intranet, under "News"→ "Legislative," and on Amtrak.com under "Inside Amtrak."

Tentative Agreements Reached, Covering 40 Percent of Unionized Employees

Amtrak has reached tentative agreements on new labor contracts with the International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International (TCU) covering the period of January 1, 2010, through January 1, 2015.

The new contracts must be ratified by the union membership and will cover electricians, machinists, carmen and coach cleaners, clerks and telegraphers.

The IBEW, IAM, JCC and TCU are four of 14 labor organizations and joint councils representing Amtrak employees. The tentative agreements will affect about 6,900 employees, or 40 percent of Amtrak's unionized labor force.

Board Approves Changes for Labor Relations and Human Resources

The Amtrak board of directors has formalized and made permanent the current reporting structure between Labor Relations and Human Resources that has been in place since January.

In addition to Human Resources and Diversity Initiatives, Lorraine Green will retain executive responsibility for day-to-day labor administration and support programs for agreement-covered employees. Her new title is vice president of Human Resources, Labor Administration and Diversity Initiatives.

The board also approved the appointment of Charlie Woodcock to the newly created position of chief labor relations officer and assistant vice president. He was previously assistant vice president of Labor Relations. Woodcock will report to President and CEO Joe Boardman on issues pertaining to labor negotiations and related activities. On matters related to labor administration, Woodcock will report to Green.

The decision to make this organizational structure official supports the company's objective to enable more cohesive management and integration of employee programs and practices that provide a more supportive and motivating work environment throughout Amtrak.

Jagodzinski Named to New Position of Transportation General Manager-East

Chris Jagodzinski has been tapped as the Transportation department's general manager-east and will report directly to Vice President of Transportation Richard Phelps. Previously, Jagodzinski was senior director, System Operations.

Mike Frazier, director, System Operations, will serve as acting senior director until a permanent replacement is named.

"In his new role, Chris will oversee all aspects of day-to-day railroad operations and business performance within the Central, Northeast, Mid-Atlantic and Southern Divisions as well as NEC Service Operations and assume supervisory responsibility for the respective general superintendents," explained Chief Operating Officer William Crosbie. Jagodzinski will be based in Wilmington, Del.

The position was created to streamline the department's senior management structure and allow the vice president to focus more attention on high level policy and management issues. The department is also conducting a search for a general manager-west to oversee the Southwest and Pacific Divisions.

"I'm excited to have Chris as general manager," said Phelps. "His unique skill set, railroad experience and focus on safety make him an ideal candidate to lead performance

and customer service while supporting the Safe-2-Safer rollout."

Jagodzinski joined Amtrak in 1989 as an assistant transportation manager in Boston while a co-op student at Northeastern University. Since then he has served in various roles including trainmaster, terminal superintendent and assistant chief mechanical officer. Jagodzinski graduated cum laude from Northeastern with a bachelor's degree in transportation and logistics.

A Message from Joe Boardman

Dear Co-workers,

Earlier today, I announced that we had the best ridership of any first quarter (October through December) in Amtrak history, breaking the previous record set in FY 08 — our best year ever.

I made the announcement as part of my remarks at a Transportation Research Forum event, where I also told the group that the state of the railroad is strong and that we are optimistic.

The days of just surviving and uncertainty about the future of passenger rail are behind us. We are focused on growth, and we are making enduring investments to maximize the history-making opportunities before us.

I've attached the speech and hope you'll take the time to read it. It reflects all of the things we're doing this year to secure our position as the provider and partner of choice for commuter, intercity passenger rail and high-speed rail service.

You'll be hearing more from me soon, when the FRA makes its announcement on the grant awards to states for intercity and high-speed rail development. We'll also be submitting our Legislative and Grant Request, which will include a very comprehensive fleet plan.

In the interim, thank you for doing your part to deliver excellent service and please work safely.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

Intercity and High-Speed Rail Grants Announced Today

President Obama and other administration officials were in various parts of the country today to announce nearly \$8 billion in grant awards as part of the American Recovery and Reinvestment Act of 2009. The awards are intended to lay the groundwork in developing 13 new, large-scale high-speed rail corridors across the country.

The grants are part of the president's strategic long-term plan to build and sustain a comprehensive passenger rail program in the U.S. Nearly 60 percent of the \$8 billion in funding will be invested by states in routes and services that are part of the current and future Amtrak system.

At 30th Street Station in Philadelphia, President and CEO Joe Boardman joined FRA Administrator Joe Szabo, Pennsylvania Deputy Transportation Secretary Toby Fauver and Connecticut Department of Transportation Commissioner Joseph Marie to announce \$485 million in passenger rail grants for the region, including \$112 million on the Northeast Corridor.

Coupled with Amtrak's \$700 million in capital investments, the NEC will benefit from its largest program of upgrades in a decade.

Additionally, Szabo will travel to Chicago tomorrow where he will appear with Amtrak Chairman Tom Carper to discuss the \$2.2 billion in grant awards for that region.

"These investments will result in higher operating speeds, reduced trip times, additional frequencies, improved facilities and greater reliability for at least 13 routes across our system," said

Boardman. "As I've said over and over, we have historic opportunities in front of us that we can only achieve by working together."

Boardman also pointed out that funding will result in new services or service extensions, including an extension of *Downeaster* service to Brunswick, Maine, and development of the Cleveland-Columbus-Cincinnati corridor in Ohio.

As mentioned during his State of the Union address last night, President Obama traveled with Vice President Biden to Florida to announce that \$1.25 billion will go to the state to develop a dedicated high-speed rail line connecting Orlando and Tampa. California will receive \$2.25 billion for its own dedicated high-speed corridor.

Obama and Biden's remarks focused on the many benefits of rail development including job creation, connectivity, economic development and energy efficiency.

"The awards to Florida and California are very exciting and we look forward to opportunities to work with those states on developing those systems," said Boardman.

Projects to be funded by ARRA grants include station renovations, track improvements, right-of-way acquisition, and corridor planning. Investments will be made in a total of 31 states.

More details and the full list of grants for intercity passenger rail can be found online at www.whitehouse.gov under "Briefing Room" → "Statements and Releases."

A Message from Joe Boardman on Safety Goals

Dear Co-Workers,

Since we launched Safe-2-Safer last year, I've been telling you about how we are going to change the way we approach safety at Amtrak, and that we would be doing so based on the input you provided us through the Safe-2-Safer survey and focus groups.

One of the things we heard from you is that there is sometimes reluctance to report injuries because to some employees, it appears that blame and punishment are the primary response to reporting an injury. This kind of thinking is one of the things Safe-2-Safer aims to change, and I'm happy to announce to you the first major step we're taking to usher in a new way of doing things.

For many years, Amtrak has measured its safety performance by using injury ratios. While working toward a goal is important, the goal and the numbers in some instances may have contributed to a mindset more focused on managing the ratio rather than truly identifying and reducing the risks that cause injuries.

So effective immediately, injury ratios will no longer be associated with safety goals. We must still record this data to comply with FRA requirements, but the performance of managers and supervisors will no longer be graded on how many injuries occur within their group or department. Instead, we will focus on improving the activities that reduce risk and prevent injuries.

The Executive Committee and I have made this decision because it's vital that employees feel comfortable reporting injuries without fear of being

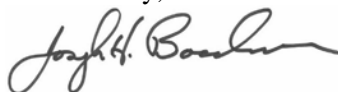

reprimanded or impacting their co-workers' ability to meet a ratio goal. We want managers to be more concerned with the welfare of their employees and creating safe working environments, not statistics. Knowing when and how all injuries occur is the only way we can take action to reduce risks and increase our chances to go home to our families and loved ones every day.

In the absence of injury ratios, we still need ways to measure our safety performance and we are in the process of developing new metrics. Until then, managers and supervisors will have interim safety goals for FY '10 that focus on risk reduction.

Our hope is to someday reach a point where no one in our company gets injured on the job. But instead of celebrating and rewarding people for not reporting any injuries, we want to recognize employees who work hard to reduce risk as much as possible and learn from them what they're doing right.

Safe-2-Safer will provide us all with the tools and knowledge to make Amtrak the safest workplace possible, but it will take commitment from all of us to put them into practice. Changing things that have been in place for so long will not happen overnight, but I have total confidence that we can make it happen together.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

I've received some feedback on my last couple of messages about the operations and customer service issues we've been having and I'd like to share .

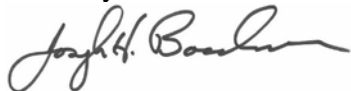

Regardless of the issues we face, the important point It's important because we put the passengers first.

What I've been trying to communicate is that This is not a good situation by any means. What I want you to know — regardless of where you work — is that we have taken ownership of our failures and mistakes, we are investigating them and we are going to fix what is broken. We don't make excuses and don't point fingers; we own our mistakes as much as we own our successes.

We transport people. I know the equipment, on-time performance, and other issues are very important. But people come first and they should always come first when we are making operational decisions — especially in service recovery scenarios.

To the many of you who do put our passengers first — thank you for your dedication.

Sincerely,

Joe Boardman

Message From Chairman Tom Carper

Dear Amtrak employees,

I am extremely pleased to inform you that the board of directors has unanimously agreed to retain President and CEO Joe Boardman for another two-and-a-half years.

Since he was tapped for the job in November of 2008, Joe has set out to provide Amtrak the leadership, vision and stability needed to guide the railroad into this new era of passenger rail.

Joe has focused on a safer, greener and healthier Amtrak by striving to enhance safety, improve the reliability of our services, reduce trip times and increase speeds, make targeted and effective infrastructure investments, and ensure the delivery of quality customer service. As we near the end of the fiscal year, it appears we will rival our all-time-high ridership and ticket revenue record from FY 2008.

With the implementation of Safe-2-Safer, he has dedicated himself to creating a safer and collaborative working environment. His sincere desire to build a culture of accountability and ownership is evident in his own words and deeds.

Through Joe's leadership, we announced last week the purchase of 130 new single-level cars for long-distance service, the first step in making a long-term fleet plan that was issued in February a reality.

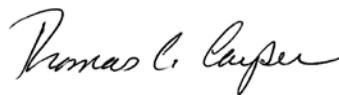

Joe is also further developing our relationships with state, commuter and other partners to add frequencies to current routes and developing service to new markets. In addition, he is setting the stage for Amtrak to be a competitive force as we expand our role in new

markets as America's only high-speed rail operator.

In addition, Joe takes an active interest in the Amtrak workforce, visiting facilities and meeting many of you. He is a part of the Amtrak family and is committed to building and strengthening relationships, from states to labor organizations.

On behalf of the board, I thank Joe for his commitment and service to Amtrak and look forward to working with him in the coming years.

Sincerely,

Tom Carper
Chairman, Board of Directors

Message from Joe Boardman

Dear Co-workers,

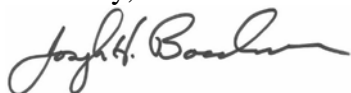

Last week, I told you that I would update you on our negotiations with Virginia Railway Express to continue to provide Train and Engine crews and operate the commuter service for an additional two-week period. Despite an unexpected announcement issued by VRE last Thursday that an agreement had been reached, we were still in negotiations at the time.

Since then, the negotiations have completed and yesterday Amtrak signed an agreement to continue operating both VRE lines through July 9, a two-week extension of the existing agreement.

VRE requested the extension because of the new service provider's inability to assume operations as scheduled on June 28, and our priority is the continuity of service to the VRE passengers during this transition.

I thank our VRE-assigned crews for their dedication and know that they will continue to deliver the professional and outstanding service for which they are known.

Sincerely,

Joe Boardman
President and CEO

Dear Co-workers,

Earlier this week, we suffered a high-profile customer service failure in Maryland. One of the MARC commuter trains that we operate for Maryland Mass Transit Administration lost power, along with cooling and ventilation. About 900 people were stuck in a very high-heat environment for about two hours, in some cases taking things in their own hands to improve the situation.

As your President and CEO, I have made a public apology, and called the MTA Administrator, the Maryland Secretary of Transportation, and Gov. O'Malley apologizing and committing to do better. In a letter that we placed on the evening rush-hour MARC trains yesterday, we asked for forgiveness from the MARC passenger population, particularly those directly affected by this failure. Similarly, those involved in this incident have accepted accountability and have committed to improving how we handle these incidents.

We are working in conjunction with MTA to improve service, with managers riding trains, running two locomotives on some trains and other measures so that we're better prepared to troubleshoot if we need to. Just as we have a plan for passenger service recovery in extreme cold weather, we should have the same for severe heat.

This is not about blame — this is about ownership — and there's an important difference. Blame is the culture we're doing away with at Amtrak. It's about ownership, and having the resilience to learn and drive harder to do our very best. That is what we're doing with the MARC operation.

This company is full of daily heroes who make our system work. We get the job done under constantly changing conditions and with daily equipment failures, bad weather, or any number of surprises that present significant challenges.

Monday's service failure started out with the same intent. Our people were trying to do the right thing in rescuing the 900 passengers. But it took too long, and the rescue itself went bad when we could not move the stalled train. While our on-board crews were trying to keep people safe, passengers were infuriated that there seemed to be no concern for them. To make matters worse, communication broke down almost everywhere, among our staff, with CNOC, and aboard the train itself.

Are we to "blame"? The answer to that is that we are accountable, and responsible for the safety and security of our passengers. Our recovery effort failed this time. But this experience should serve to strengthen our resolve to learn from the experience, put measures in place — and stick to them — to avoid a repeat occurrence. We must accept responsibility, dust ourselves off and do better. Our confidence in ourselves, and our faith in our ability to correct our course and perform at a higher level has not failed.

We ask a lot of our daily heroes. I thank you for your commitment to provide those who make a choice to ride our trains safe, secure and friendly service. We are all accountable for how we perform and for how — good or bad — that affects others. Please be accountable and maintain that sense of ownership and duty for what you do to make us better each day, and thank you for the work you do to that end.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I've been struck by all of the discussion in the media these days about corporate or organizational culture. As I read news articles about inquiries into other organizations' business practices and what was or wasn't tolerated within their respective "cultures," I think about some of the changes we're making.

There is a very real relationship between culture ("how things really get done") and performance. And when things go wrong, what's often revealed is a culture that wasn't fostering the right values and/or steering the company in the right direction. If you don't believe me, just check the headlines lately.

I believe in Amtrak, and I believe that the investments we're making — including Safe-2-Safer and the Strategic Asset Management (SAM) — are helping cultivate a different Amtrak culture. The culture we're aiming for is one that thrives on collaboration and innovation; that makes decisions that make good business sense.

We're also pursuing a growth-oriented mission, and steering the company to better serve our state and commuter partners by providing them a higher level of customer service while always ensuring safe operations.

To that end, I want to update you on some of our activities on the commuter front. We're currently putting the finishing touches on our joint proposal with Bombardier to operate the Camden and Brunswick Lines of the Maryland Area Regional Commuter (MARC) service, in addition to the Penn Line, which we already operate.

We are also looking ahead to the release of a Request for Proposals to continue to operate Caltrain's Peninsula

Corridor Commuter Rail Service between San Jose and San Francisco. Keeping this contract will further strengthen our strategic partnerships in California — an important market given the state's commitment to expanding rail service.

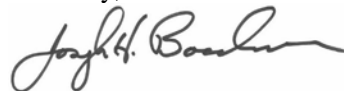

Speaking of California, the Transportation department is ramping up to begin operating Metrolink service on June 26 and we expect to sign the official contract in the very near future.

And while we are preparing for the transition of the Virginia Railway Express business to a competitor, VRE is currently still our customer and they deserve nothing but our best efforts. When that relationship ends, the employees that have been serving VRE in a variety of roles can stay with Amtrak, without resulting in the loss of any jobs for others in the Washington area. I look forward to having them continue to be part of the Amtrak family, pursuing a career in similar or the many other jobs and opportunities throughout our national system, now and in the future.

As I've said before, in years past Amtrak seemed to be focused on survival. Today, our survival relies on being focused on growth. As America's railroad and the only high-speed rail operator in the country, we offer unique expertise and experience and are making investments to secure our position as the provider of choice.

I'll keep you updated on the opportunities we're pursuing and look to you to help us secure them. In the meantime, thank you for your dedication and please work safely.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Alleman to Fill New Senior Engineering Position

Steve Alleman, formerly the general superintendent of the Mid-Atlantic Division, has been named to the newly created position of deputy chief engineer-special projects.

In this Philadelphia-based role, he will report to Chief Engineer Frank Vacca and manage the implementation of the department's major special projects such as the expansion of Positive Train Control on the Northeast Corridor (NEC) and the Michigan Line, construction related to compliance with the Americans with Disabilities Act and overseeing the NEC Environmental Impact Assessment process.

According to Chief Operating Officer William Crosbie, the position was created to meet the increasing volume of work for the Engineering department thanks to additional capital funding from the Recovery Act and infrastructure projects required in other federal legislation.

"We need a proven leader with the ability to manage these major projects on-time and on-budget," said Crosbie. "But just as important, we want someone who demonstrates safety leadership, is able to work collaboratively and is committed to being a teacher and mentor to employees under his or her supervision. Steve is that person."

Prior to becoming general superintendent in 2008, Alleman served as deputy chief engineer for the Fire & Life Safety Program. He originally joined Amtrak in 1977 as a trackman and has worked in a variety of roles in the Transportation and Engineering departments during his career. Alleman holds a bachelor's degree from Virginia Tech.

Mike Sherlock, superintendent of operations, is the acting general superintendent for the Mid-Atlantic Division until a permanent replacement is named.

Please post on bulletin boards and distribute at safety briefings.

Supplemental Funding Request for Equipment Sent to Congress

*Boardman Testified on FY '11
Budget at House Subcommittee
Hearing*

Amtrak submitted to Congress yesterday a supplemental request to its FY 11 Grant and Legislative Request for \$446 million for the purchase of new equipment.

The \$446 million is in addition to Amtrak's FY '11 request made in February for \$2.1 billion, which is in line with the level recommended in the Passenger Rail Investment and Improvement Act.

President and CEO Joe Boardman focused his testimony today before a House Appropriations Subcommittee on the fleet plan released by Amtrak in February. Boardman noted that the plan "supports the administration's stated intent to develop a domestic rail manufacturing capability, and we do so by projecting long-term large scale procurement streams that will nurture and sustain suppliers."

He added that it will also provide an affordable means for states to add their purchases to our own, with unit cost savings for everyone, especially as the demand for more passenger rail service continues to grow.

In addition, Boardman noted that between 2002 and 2008, Amtrak ridership increased by 32 percent to record-levels and the railroad handled the new passengers without buying a single piece of new equipment.

The \$446 million would set the plan in motion, and fund acquisitions, including 130 single-level long-distance passenger cars and 15 electric locomotives. The procurement process for this equipment was initiated last year.

Citing the equipment's age and the fact that it is the hardest-run in the industry, Boardman stressed the critical need for new equipment.

Boardman's testimony is posted on the intranet under "News" → "Legislative," or on Amtrak.com under "Inside Amtrak."

Joe Boardman Elevates Police Department to Executive Level

President and CEO Joe Boardman announced that effective today, Amtrak Chief of Police John O'Connor will report directly to him, a move that elevates and gives greater visibility to police and security issues at the executive level.

"It's important that matters pertaining to the security of our workforce, passengers and assets be given a direct line to the CEO," said Boardman.

O'Connor oversees all law enforcement and security activities at Amtrak, consisting of Patrol, Special Operations, and Corporate Security divisions.

"Chief O'Connor has built a professional policing organization and ties with local, state and federal agencies to extend the reach of the APD — it's that kind of vision and leadership that he is now applying to counterterrorism polices and strategies," added Boardman.

Until now, the department resided in Operations under Chief Operating Officer Bill Crosbie.

"Our operating departments will continue to work closely with Chief O'Connor and his department to help safeguard our system," added Crosbie.

This shift represents another step in the formalization of the consolidation of the Amtrak Police Department and the former Office of Security Strategy and Special Operations.

Please distribute at all safety meetings and post on all employee bulletin boards.

Amtrak Signs Final Agreement to Operate Metrolink Service

Amtrak today executed a final contract with the Southern California Regional Rail Authority to operate Metrolink trains on all seven lines of the Los Angeles-based commuter rail agency beginning June 26, 2010.

The final agreement provides for an initial four-year operating contract with the potential for two additional three-year extensions. Amtrak will provide the Train and Engine crews — and related management and support staff — required to operate Metrolink trains. The 512 route-mile network covers six counties throughout the Los Angeles region.

SCRRA decided to enter into this contract with Amtrak because of the railroad's unique qualifications and experience in intercity and commuter rail operations, its excellent safety performance, its present operation of intercity trains over four of the seven lines that comprise Metrolink service, and its prior experience as the original operator of Metrolink trains from 1992 to 2005.

"We are pleased to move forward with this board action," said Metrolink CEO Eric Haley. "The depth of relevant experience and management support Amtrak has for our operation is unique in the passenger rail environment and we look forward to working with them again in this capacity."

"Amtrak is proud of our safety record and we are dedicated to providing excellent and efficient service to Metrolink and its passengers," said Amtrak President and CEO Joseph Boardman.

Over the coming weeks and months, Amtrak will work closely with Metrolink, Metrolink's current operator and its employees, and other contractors to ensure a smooth transition.

Please distribute at all safety meetings and post on all employee bulletin boards.

Commer and Sherlock Named General Superintendents

Amtrak has announced the appointments of Jay Commer and Mike Sherlock as general superintendents of the Pacific and Mid-Atlantic divisions, respectively.

Previously, Commer was principal officer, state contracts, and acting superintendent, Caltrain commuter operations. Sherlock was superintendent of operations and acting general superintendent of the Mid-Atlantic Division.

Vice President of Transportation Richard Phelps explained that he and the executive committee are dedicated to promoting employees who have a leadership style based on collaboration, communication and teamwork in order to build a more unified culture within the company.

Additionally, some of Amtrak's largest commuter partners operate in the Mid-Atlantic and Pacific divisions, which influenced the selections.

"Mr. Boardman is devoted to growing our railroad, and a key part of his strategy is expanding our operating partnerships despite increased competition from other companies," said Phelps. "I am confident that both Jay and Mike have the expertise and commitment to provide the best possible service to our state and commuter partners."

Sherlock began his career with Amtrak as a block operator in 1976. He held positions in the Rules department, Crew Management and System Operations prior to joining the Mid-Atlantic Division. He will report to General Manager-East Chris Jagodzinski.

Commer will temporarily report directly to Phelps until a general manager-west is appointed. Commer joined Amtrak in 1986 as a locomotive engineer and has since held a variety of positions including road foreman and general manager of the California Corridor.

Tentative Agreement Reached with ATDA

Amtrak has reached a tentative agreement on a new labor contract with the American Train Dispatchers Association (ATDA) covering the period of January 1, 2010, through January 1, 2015.

The new contract must be ratified by the union membership and will cover Train Dispatchers, Power Directors and Load Dispatchers on the Northeast Corridor.

In addition to earlier tentative agreements with the International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International Union (TCU), Amtrak now has tentative agreements with five of the 14 labor organizations and two joint councils representing Amtrak employees. About 7,300 employees, or 43 percent of Amtrak's unionized labor force, are affected by these agreements.

Laird Named General Superintendent of the Pacific Northwest Division

Amtrak has announced the appointment of District Superintendent Kurt Laird as general superintendent of the Pacific Northwest Division, effective today.

“This newly created position will strengthen our relationship with Washington and Oregon, states that have been ardent supporters of passenger rail and where there are tremendous opportunities for growth,” said President and CEO Joe Boardman.

This division was not previously under the management of a general superintendent. The creation of this position reflects Amtrak’s commitment to being more responsive to the needs of state and commuter partners, and to the communities Amtrak serves.

Chief Operating Officer William Crosbie cited Laird’s strong relationship with partners, business acumen and a ground-level understanding of good customer service as the qualities that make him best suited for the job.

Laird will oversee all transportation and mechanical operations, including maintenance of the Talgo equipment, the Amtrak *Cascades* service, and Sounder commuter contract.

Laird joined Amtrak in 1977 and has served as the District

Superintendent of the Pacific Northwest District since 2002. He began his railroad career in 1974 as a trackman and then several years as an on-board services crew member. Laird has a Bachelor of Arts degree from Southern Connecticut State College.

Laird will temporarily report directly to Vice President of Transportation Richard Phelps until a general manager-west is appointed.

Amtrak Reaches Tentative Agreement with ASWC

Amtrak has reached a tentative agreement on a new labor contract with the Amtrak Service Workers Council (ASWC) covering the period of January 1, 2010, through January 1, 2015. The ASWC consists of members of the Transportation Communications International Union, Transport Workers Union and UNITE HERE union.

The new contract must be ratified by the union membership and will cover On-Board Service employees such as service attendants, lead service attendants, train attendants and chefs.

With the addition of ASWC, Amtrak now has tentative agreements in place with six labor organizations and joint councils representing 9,200 employees, or 54 percent of the total unionized labor force.

Tentative agreements have also been reached with the American Train Dispatchers Association (ATDA), International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International Union-Clerks (TCU-Clerks).

Message from Joe Boardman

Dear Co-workers,

I am pleased to announce today the availability of three news tools aimed at providing better service to you.

Making the intranet available to all employees from home, enabling you to access and update information such as your pay stub or contact information through the Employee Information Portal and offering you a one-stop-shop Employee Service Center for answers to your Human Resources questions, are all part of our commitment to creating a better Amtrak for you.

Many of you have not had access to the intranet site before, and I urge you to go take a look and see what resources are available there.

If you want to change your address, access your bank information or enroll for training, you can do it any time you want by going to the Employee Information Portal, which is available through the intranet. The portal also provides managers new tools for managing employees' training and other streamlined functions.

And if you have questions for Human Resources, you can call or e-mail the Employee Service Center, where employees dedicated to answering your questions can assist you.

You can now access the intranet from home by going online to

Amtrak.com and clicking "Inside Amtrak," then "Employees." If you've never logged in before, check the insert that came with your May 14 pay stub for instructions. A letter sent this week to all employees' homes also contains that information.

You can call the Employee Service Center at 1-888-MY-HR-ESC (1-888-694-7372) any time between 8 a.m. and 8 p.m. Eastern time, Monday through Friday, or e-mail HRESC@amtrak.com.

It seems that we live in a world driven by constant communication and there's information everywhere. Our aim is to provide you with more centralized resources where you can find the information you want and need. I hope you'll take advantage of these resources — we're making many investments to make Amtrak a healthier company, and investing in our workforce is among the most significant.

Please keep up the great work and thank you.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

On Monday, May 31, we will observe Memorial Day. For more than a century, our nation has honored the men and women who died in the service of their country at the end of May. The holiday was originally known as Decoration Day, and it was so called because communities turned out to decorate the graves that the Revolution, the War of 1812, and the Civil War had left scattered across the American landscape.

The Twentieth Century's wars took Americans farther afield than many of them had ever been or meant to go, and it was not practical for everyone to come out to decorate graves in France, Italy, or the distant Pacific islands. Today those graves are well tended by people who have as much cause as we do to be grateful for their freedom and the sacrifices that won it, and we now know this holiday as Memorial Day.

In recent years, at the request of Congress, people have begun to observe a national "moment of remembrance" on Memorial Day. They stop what they're doing and observe a minute of silence as a way of honoring the people who gave their lives for our country. Amtrak is America's railroad, and we, too, will commemorate Memorial Day.

This year, as on previous years, all of the engines on the system will sound their horns at 3 p.m. local time as a salute to those who died for our country. Over the years, Amtrak employees have served our nation and have gone in harm's way to protect our freedoms and our way of life.

Today I hope you will remember the Amtrak employees who are on active duty with the Reserve or the National Guard and are deployed away from their families and friends.

Memorial Day is customarily regarded as the first day of summer, and it's always an occasion for joy — and after the past winter, I think we can all agree that we're ready for a little summer sun and warmth. I hope those of you who can take the holiday do so, and enjoy the time off. I also hope, however, that if you are away from work that day, you can find a moment to remember the people who gave "their last full measure of devotion" for our country, our people, and our form of government.

For those uniformed crew members who will be working on Memorial Day, Amtrak has authorized the wear of dignified or appropriate lapel pins or badges that commemorate your military service. We wish to encourage wear of service crests, unit badges, and ribbon pins. Wearing of American flag pins or yellow ribbons is likewise appropriate, and everyone who wishes to wear them should feel free to do so.

Amtrak supports our veterans. We are proud of you and grateful for your service, and I hope that everyone can spare a minute or two on Memorial Day to reflect on the sacrifices that secured our freedom, and are preserving it today.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today, we will announce an agreement with French National Railways (SNCF) and Bechtel Infrastructure Corporation to bid for the contract to design, build, operate, maintain and finance Florida's planned high-speed rail line between Tampa and Orlando.

The consortium we have formed presents a powerful, full-service team to pursue the high-speed rail contract in Florida.

Partnership is central to our future, whether it be with states, freight railroads, or others in the industry. In this case, each partner brings its unique body of experience and knowledge. Bechtel was the leader in a consortium which brought high-speed rail to the UK (HS1). The SNCF launched high-speed rail service (TGV) in Europe on the Paris to Lyon line in 1981, bringing three decades of high-speed rail implementation and operating expertise to the team.

Bechtel offers demonstrated engineering, construction, and program management expertise; while SNCF has its proven ability to design, operate and maintain high-speed rail systems around the world. As America's high-speed rail provider, we offer a wealth of operational expertise and know-how to the group. Combining SNCF's international high-speed rail experience with our own amplifies

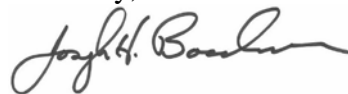

what we can offer the citizens of Florida.

The Florida line is a turn-key project requiring a team that can provide all of the systems needed for a world-class high speed rail operation. We believe, along with our partners, that we can deliver that.

As I've mentioned before, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end with the NEC. As you may remember, we recently announced a new High-Speed Rail department, led by Vice President of High Speed Rail Al Engel, to help us advance our ambitions in the high-speed rail arena.

We need to aggressively compete to secure this leadership position, and by bringing all of our resources to bear, together with our partners in this consortium, we aim to win.

Sincerely,

Joe Boardman
President and CEO

Oct. 28, 2010 • Page 1 of 1

Message from Joe Boardman

Dear Co-workers,

Tomorrow, Amtrak will be announcing the purchase of 70 new electric locomotives for use on the Northeast Corridor (including the Keystone Service), the first of which will be delivered in February 2013.

The six-year, \$466 million contract has been awarded to Siemens, and will create 250 jobs at its manufacturing plant in Sacramento, Calif., as well as its other facilities in Norwood, Ohio, and Alpharetta, Ga.

Board Chairman Tom Carper and FRA Administrator Joe Szabo will be at the Sacramento facility tomorrow to describe how the new equipment will expand and modernize our fleet. The new equipment will result in improved reliability and better service to our passengers, helping meet the growing demand for passenger rail. The engines will replace locomotives that are between 20 and 30 years old, which many of you know we run very hard.

This news follows the announcement we made in the summer to buy 130 new long-distance rail cars and is the next step in our fleet renewal plan.

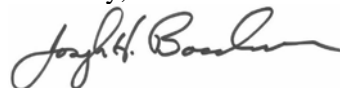

Part of the responsibility of leadership is to ensure that the men and women meeting our mission have the tools they need to do the mission well. Not only does aging and problematic equipment hurt our ability to deliver good service, but I know it also takes a toll on our crews. Expanding and renewing our fleet is not only critical to meeting our nation's transportation needs, but also to creating a safer, greener and healthier Amtrak.

The new locomotives will be equipped with anti-climbing technology and push-back couplers that will help keep the train upright and on the tracks in the event of a collision. In addition, the regenerative braking system in the units will return electricity to the power grid.

As we take delivery of the 70 new locomotives, we will retire 64 older locomotives in our current electric fleet, including 20 DC AEM-7s, 29 AC AEM-7s and 15 HHP-8s. The additional units will be put toward service expansion.

This is an exciting time for our company as we approach our 40-year anniversary. We are making important and lasting changes that will help shape the future of transportation in America. Thank you for all your hard work — let's keep it going.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

Sept. 28, 2010 • Page 1 of 2

Message from Joe Boardman

Dear Co-workers,

Today, Amtrak released a bold vision of a realistic and attainable next-generation high-speed rail system that could revolutionize transportation, travel patterns and economic development in the Northeast for generations.

With trains operating up to 220 mph (354 kph) on a two-track corridor, we could operate from Washington to New York in 96 minutes and New York to Boston in just 84 minutes, cutting today's trip-times in half. We could offer our passengers at least four hourly high-speed departures in each direction, compared to once per hour today.

As America's Railroad and our country's high-speed rail operator, it is central to our mission to put forth a concept plan that looks beyond what we can operate with what we have today.

Entitled "*A Vision for High-Speed Rail in the Northeast Corridor (NEC)*," the study describes a system that addresses a major national transportation need for generations to come. Given its population, economic densities and demand for intercity travel — which estimates show doubling by 2050 — the Northeast is in need of a next-generation high-speed rail system that will support growth through the next century.

When it's completed in 2040, the new infrastructure would support expected high-speed train ridership of 18 million, but it could ultimately accommodate 80 million passengers in the decades to follow.

Building a world-class system of this magnitude would require \$117 billion, or

\$4.7 billion annually, over the course of a 25-year construction period.

You may remember that this summer we developed an NEC Infrastructure Master Plan that examined how the NEC could meet accommodate growth given the railroad we have today. That study predicted that capacity would max out by 2030 — this next-generation high-speed rail system will provide the necessary new capacity to meet growing demand well beyond 2030.

Our vision meets our safer, greener and healthier goals. We could provide fast, safe and secure travel that reduces energy use and emissions while providing comfortable and reliable service to sustainable communities and helping support the national and regional economies. It would help ease highway and airway congestion and foster "greener" travel for millions of Americans.

Construction of the system alone would mean more than 40,000 annual jobs during the 25-year build-out period, and the operation would yield 7,100 new rail operations jobs.

Keep in mind that it's a concept, and represents only one of a wide range of possible network and service configurations that could be developed. But the key here is that we have undertaken an initial in-depth study of what it would take to offer a world-class high-speed system for the future, and the economic viability of such an endeavor.

If you don't live in the Northeast, the significance of this plan shouldn't mean any less to you. While this is a major undertaking for the NEC, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end on the NEC. We are pursuing high-speed rail

corridor development opportunities such as the projects in Florida and California in partnership with states and others in the industry. Last week, I introduced our incoming Vice President of High Speed Rail Al Engel, an industry expert to help us advance our ambitions in the high-speed rail arena.

I hope you're as excited as I am about the prospects of this concept plan and the opportunities before us. Please take the time to take a look at the study — it's posted on Amtrak.com and on the Amtrak intranet — it's an excellent example of kind of thinking we should be doing and the dynamic, bold-thinking Amtrak I know we can be.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

Sept. 28, 2010 • Page 1 of 2

Message from Joe Boardman

Dear Co-workers,

Today, Amtrak released a bold vision of a realistic and attainable next-generation high-speed rail system that could revolutionize transportation, travel patterns and economic development in the Northeast for generations.

With trains operating up to 220 mph (354 kph) on a two-track corridor, we could operate from Washington to New York in 96 minutes and New York to Boston in just 84 minutes, cutting today's trip-times in half. We could offer our passengers at least four hourly high-speed departures in each direction, compared to once per hour today.

As America's Railroad and our country's high-speed rail operator, it is central to our mission to put forth a concept plan that looks beyond what we can operate with what we have today.

Entitled "*A Vision for High-Speed Rail in the Northeast Corridor (NEC)*," the study describes a system that addresses a major national transportation need for generations to come. Given its population, economic densities and demand for intercity travel — which estimates show doubling by 2050 — the Northeast is in need of a next-generation high-speed rail system that will support growth through the next century.

When it's completed in 2040, the new infrastructure would support expected high-speed train ridership of 20 million, but it would ultimately accommodate 80 million passengers decades later at full capacity.

Building a world-class system of this magnitude would require \$117 billion, or

\$4.7 billion annually, over the course of a 25-year construction period.

You may remember that this summer we developed an NEC Infrastructure Master Plan that examined how the NEC could meet accommodate growth given the railroad we have today. That study predicted that capacity would max out by 2030 — this next-generation high-speed rail system will provide the necessary new capacity to meet growing demand well beyond 2030.

Our vision meets our safer, greener and healthier goals. We could provide fast, safe and secure travel that reduces energy use and emissions while providing comfortable and reliable service to sustainable communities and helping support the national and regional economies. It would help ease highway and airway congestion and foster "greener" travel for millions of Americans.

Construction of the system alone would mean more than 40,000 annual jobs during 25-year build-out period, and the operation would yield 7,100 new rail operations jobs.

Keep in mind that it's a concept, and represents only one of a wide range of possible network and service configurations that could be developed. But the key here is that we have undertaken an in-depth study of what it would take to offer a world-class high-speed system for the future.

If you don't live in the Northeast, the significance of this plan shouldn't mean any less to you. While this is a major undertaking for the NEC, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end on the NEC. We are pursuing high-speed rail corridor development opportunities such

as the projects in Florida and California in partnership with states and others in the industry. Last week, I introduced our incoming Vice President of High Speed Rail Al Engel, an industry expert to help us advance our ambitions in the high-speed rail arena.

I hope you're as excited as I am about the prospects of this concept plan and the opportunities before us. Please take the time to take a look at the study — it's posted on Amtrak.com and on the Amtrak intranet — it's an excellent example of kind of thinking we should be doing and the dynamic, bold-thinking Amtrak I know we can be.

Sincerely,

Joe Boardman
President and CEO

Engineering: Engineering will host an Employee Health & Safety Fair in Sunnyside Yard on April 21 from 9 a.m.-2 p.m.

Corporate Communications: On April 13, CNN aired a segment featuring Amtrak Police K-9 teams. To view the story, visit www.cnn.com and search "Dog's Nose Knows."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 22. Congratulations to the latest winner, Angeline Summers, Engineering assignment clerk, Philadelphia.

Government Affairs: Vice President, Government Affairs and Corporate Communications Joe McHugh will testify before the House Transportation and Infrastructure Committee in Chicago on April 20 regarding stimulus high-speed rail grants. Amtrak Police Chief John O'Connor will testify in Washington before the Senate Commerce, Science and Transportation Committee on April 21. The hearing focuses on securing the nation's rail and other transportation networks.

Board Makes Visit to Chicago

The board of directors traveled to Chicago last week for its April meeting to conduct site visits and meet with state and local officials.

"The Midwest plays a major role in our national system through extensive state-supported corridor service and as the hub for much of our long distance network," said Board Chairman Tom Carper. "The board wanted to see it firsthand to get a better understanding of the challenges and opportunities here."

Board members greeted employees and met with Wisconsin Gov. Jim Doyle and other officials from Illinois, Iowa, Michigan, Minnesota and Ohio. The board also toured Chicago Union Station and rode *Hiawatha Service* to see the renovated Milwaukee station, in addition to traveling to several CREATE project sites aboard equipment recently rehabilitated at Beech Grove Maintenance Facility.

Message from Lorraine Green and DJ Stadler

Dear Co-workers,

Each Tuesday morning, the 11 members of the executive committee and other department heads meet to discuss company strategy, direction and policy. As part of our effort to become a healthier company, some of our discussions revolve around how we can continue to improve the company for your benefit.

To that end, we are pleased to announce that as a result of negotiations with Fidelity Investments, our 401(k) Retirement Savings Plan administrator, starting May 19 we will be offering employees new lower-cost investment options, allowing you to save more for retirement and better meet your financial goals.

The fees and expenses of the investments you select have a large impact on the overall return of your portfolio, especially over the course of an entire career. By replacing the Fidelity Freedom Funds® currently being offered with 12 lower-cost lifecycle funds from a new series of Fidelity Freedom KSM Funds, participants will collectively save a considerable amount of money in management fees. The investment strategies, fund portfolios and fund managers are the same as the current Freedom Funds; the only difference is that the costs you pay will be reduced.

Those of you who currently invest in the Freedom Funds will see your balances automatically transfer to the corresponding Freedom K Funds at the close of business on May 19. If you choose not to have your funds transferred to a corresponding Freedom K fund, you may elect another investment option before May 19, or after the transfer has occurred. An additional investment option called Fidelity *Contrafund*® - Class K will also be made available.

The Fidelity Freedom K Funds are typically available only to employees of new corporate clients of Fidelity; however, Dale Stein, our treasurer, negotiated with Fidelity to secure these lower-cost fund options for Amtrak employees, even though we were already a client. This is a prime example of Amtrak's commitment to you as a valued employee and we hope more of you will take advantage of this company benefit.

Plan participants will soon begin receiving letters from Fidelity with more information about the new funds. If you have questions or would like to begin saving for retirement, please call 877-477-AMTK (2685) or visit www.MySavingsAtWork.com/amtrak to schedule an appointment with a Fidelity representative.

Sincerely,

Lorraine Green
Vice President, Human Resources
and Diversity Initiatives

DJ Stadler
Chief Financial Officer

Operations Update: Chief Operating Officer William Crosbie has officially deactivated the “state of emergency” of the Amtrak Pandemic Flu Contingency Plan based on reports from federal and state public health agencies. The emergency section of the plan was enacted last fall as a measure to help protect employees and passengers against the H1N1 flu virus. The company offered free vaccinations and reimbursements for both seasonal and H1N1 flu. More than 4,500 employees took advantage of the program.

Information Technology: Beginning today, a token will be required for remote network access through Citrix or the Amtrak VPN. Employees who access the network using these channels should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token and to receive user instructions.

PSSA: The nomination period for the 2010 President’s Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under “Employees”→ “Awards and Achievements.”

Human Resources: Amtrak is working with specialized consultants to analyze the new healthcare legislation and how it will impact employee benefits. While some changes will take effect quickly, many of the provisions in the bill will not take effect for several years. More information will be provided in the coming weeks.

National Train Day: As of today, 75 National Train Day events in 36 states, including Alaska and Hawaii, have been scheduled in communities across the country for May 8. For more information, or to volunteer at an event in Chicago, Los Angeles, Philadelphia or Washington, D.C., visit www.TrainDay411.com.

U.S. Secretary of Transportation Visits Beech Grove

As members of President Obama’s cabinet traveled throughout the country on April 2 to highlight stimulus projects that have been effective in creating jobs in the U.S., Secretary of Transportation Ray LaHood visited Amtrak’s Beech Grove Maintenance Facility to see the operation first-hand and meet with Amtrak employees who attended the event. Joining LaHood in Beech Grove were U.S. Rep. Andre Carson (D-Ind.) and President and CEO Joe Boardman.

“I really enjoyed touring the car shops where six cars have already been rehabilitated — with more in the works — and locomotive shops where the first of the locomotives was refurbished,” said LaHood in a blog post following his visit. “The work adds important capacity to the Amtrak passenger rail system and provides riding comfort to Amtrak’s passengers.”

In 2009 alone, Amtrak projects funded by the American Recovery and Reinvestment Act led to the creation of more than 800 jobs with the company and its vendors, including more than 100 at Beech Grove. With numerous additional projects throughout the system slated for the 2010 construction season, the company will be reporting a significantly higher number of jobs created at the end of this year.

New Frequencies Coming for North Carolina Service

North Carolina Transportation Secretary Gene Conti announced last week that the state is expanding its partnership with Amtrak by adding two new midday frequencies — operating as Trains 74 and 75 — between Raleigh and Charlotte. The new trains are scheduled to begin operating in early June of this year.

With these additions, Amtrak will operate a total of six daily state-sponsored *Piedmont* and *Carolinian* trains between the state’s two largest cities.

Current frequencies only operate in the morning and evening. After the June service expansion, business travelers, families and college students will have a valuable new schedule option.

Operations Update: Due to track work being performed by Metro-North Railroad and CSX Transportation, schedules for trains operating between Niagara Falls, Albany-Rensselaer and New York will be adjusted between April 11 and June 19.

Transportation: The updated Revision No. 5.1 of the *Service Standards: Manual for Train Service and On-Board Service Employees*, which becomes effective April 30, will be shipped directly from the printer to crew base locations across the system beginning this week. If packets have not been received by April 19, contact Monika Lukens at ATS 734-2047 or (302) 683-2047.

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 15. Congratulations to the latest winner, Brian Hains, machinist journeyman, Rensselaer, N.Y. Employees are also encouraged to volunteer at a National Train Day event by signing up online. All volunteers will receive a free polo shirt, a meal during their shift and other gift items.

Operation RedBlock Day is April 14

In conjunction with National Alcohol Awareness Month, April 14 marks the 10th annual national Operation RedBlock Day. This week, Operation RedBlock committees at Amtrak and several freight railroads will host a series of events throughout the system aimed at educating employees about how to promote a drug- and alcohol-free workplace.

"Over the years, Operation RedBlock has benefitted employees across the system by raising awareness, changing attitudes and giving co-workers another channel by which to encourage others to seek assistance," said President and CEO Joe Boardman.

As always, employees are encouraged to mark off work — without consequence — when impaired by drugs or alcohol by calling 1-800-44-RBLOC (800-447-2562).

Customer Self-Service Launches on Amtrak.com

Customers who book their reservation online can now make modifications to their reservation at Amtrak.com with a few clicks of the mouse. Rather than having to contact a ticket agent, customers have the flexibility to change their travel schedule or class of service online, as well as upgrade, downgrade and exchange tickets. Any reductions in fare will be refunded automatically while payment of fare increases resulting from reservation changes can be collected through the online system.

"This is an important step forward in customer service," said Tony Flynn, eTicketing program director. "Even though we just launched this feature on April 6, our customers are already taking advantage of it to change trains or upgrade their travel."

The online self-service feature is currently available for reservations made on Amtrak.com before a paper ticket has been printed. All customers will still need to pick up printed tickets at the station prior to boarding their train — but not for long.

This new self-service feature is the first of several upcoming eTicketing program features that will offer additional customer self-service opportunities. In May, a new capability will be introduced that will enable customers to pick up their tickets at Quik-Trak kiosks even if their reservation was affected by a last minute schedule change or re-accommodation. Previously, customers were required to go to the ticket window to obtain tickets under such circumstances.

By late summer 2011, customers will also be able to print travel documents at home or at the office. Conductors will simply scan bar codes on the "print-from-anywhere" boarding pass, eliminating the need to collect paper tickets. Additional functionality will allow passengers to present their boarding pass on their smart phone, such as a BlackBerry or iPhone, making completely paperless travel possible.

The eTicketing program, once fully developed, is projected to deliver up to \$14 million in additional ticket revenue annually by improving access to Amtrak ticketing, particularly at cities with unstaffed stations or for those customers booking outside the U.S.

Ridership and Revenue on Record-Breaking Pace

During the first six months of the FY '10 fiscal year, Amtrak carried a record high of 13,619,770 passengers — a 4.3 percent increase over last year and roughly 100,000 more than the same period in FY '08, when the company set its all-time record for annual ridership. A slowly improving economy and continued high fuel prices are contributing factors in ridership growth.

Comparing March 2010 to March 2009, ridership increased by 13.5 percent to a record 2.47 million passengers for the month. In addition, every single Amtrak route carried more passengers, with several experiencing double-digit growth.

Employee Appreciation Day to be Celebrated This Friday at 46 Locations

This Friday, April 30, has been designated as the second annual Employee Appreciation Day, which will be celebrated throughout the system at 46 different events. These events are designed to help employees become safer, greener and healthier in their professional and personal lives.

Human Resources: Participants in the 401(k) Retirement Savings Plan should receive a letter from Fidelity Investments this week (if they have not already received it) regarding investment fund changes that will lower fees for employees, allowing them to save more for retirement.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through April 29. Congratulations to the latest winner, Sheryl Johnson, secretary, Chicago.

Government Affairs: President and CEO Joe Boardman and Amtrak Inspector General Ted Alves will appear before the Senate Appropriations Committee on April 29 regarding the company's FY '11 funding request.

"I am committed to growing our company by making it safer, greener and healthier," said President and CEO Joe Boardman. "Part of what healthier means is fostering a work environment where employees feel valued and that their contributions mean something. It also means providing better benefits and services to our employees. Employee Appreciation Day is just one gesture to show our commitment to you and to becoming a healthier Amtrak."

Teams of employees in each location have worked hard over the last several months to put together events offering employees information on personal finance and retirement savings from Fidelity Investments; health and wellness screenings from Aetna and United Healthcare; "green" tips from local energy conservation organizations; and safety tips and updates from Safe-2-Safer, Employee Assistance Program, Operation RedBlock and Operation Lifesaver.

Information about the new Employee Information Portal, a new Employee Service Center, and how all employees will soon be able to access the company's intranet from home will also be available. These are major programs that will launch on May 19 in an effort to better serve employees.

Another resource being provided at all 46 events is an expanded version of last year's popular "Did You Know" booklet. This guide outlines the wide range of employee discounts from companies like AT&T, Verizon, Carnival Cruise Lines, Pro-FLOWERS, Hertz, Budget and others, along with other useful company information.

Temporary Changes to Leave Requests Made via Employee Self-Service

From May 1 to May 19, non-agreement employees who submit a leave request through the Employee Self Service (ESS) system will not receive any e-mail notifications or confirmations related to their request.

Employees must monitor their request status by logging in to ESS or by following-up with their supervisor directly. Managers are also encouraged to notify their employees of approvals or denials of leave requests.

This temporary function outage is due to necessary system improvements being made to launch the expanded Employee Information Portal on May 19.

Tentative Agreements Reached, Covering 40 Percent of Unionized Employees

Amtrak has reached tentative agreements on new labor contracts with the International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International (TCU) covering the period of January 1, 2010, through January 1, 2015.

The new contracts must be ratified by the union membership and will cover electricians, machinists, carmen and coach cleaners, clerks and telegraphers.

The IBEW, IAM, JCC and TCU are four of 14 labor organizations and joint councils representing Amtrak employees. The tentative agreements will affect about 6,900 employees, or 40 percent of Amtrak's unionized labor force.

Annual Funding Request Sent to Capitol Hill; Fleet Plan to be Announced This Week

Amtrak's Grant and Legislative Request for the 2011 fiscal year was submitted to Congress on Feb. 1, along with a detailed budget and business plan for the year. The company will also publicly announce its comprehensive fleet plan later this week.

The funding request includes \$592 million for operating expenses, \$1.299 billion for capital improvements and \$305 million for debt service, totaling \$2.196 billion.

These figures are in line with what is authorized by Congress in the Passenger Rail Investment and Improvement Act of 2008. President Obama's proposed budget released yesterday recommends \$1.615 billion.

Approximately \$281 million of the capital funding would be spent on making various improvements needed to comply with the Americans with Disabilities Act.

A key portion of the funding request for debt service would be used to buy out two existing equipment leases. By repurchasing the 14 locomotives and 14 cars currently being leased, the company will realize a net savings of \$14.4 million in payments.

The fleet plan announcement this week will outline total costs and annual spending to purchase single- and bi-level passenger cars, locomotives and high-speed equipment. The existing fleet will be entirely replaced by 2040.

"The age and variety of the fleet [are] matters of serious concern. Amtrak regards the replacement of its existing fleet as a top-priority goal," said President and CEO Joe Boardman. "We are confident that the plan represents an effective proposal for both the replacement of aging equipment and the pursuit of larger policy objectives that will develop and improve the manufacturing base for rail equipment."

The full Grant and Legislative Request is posted on Amtrak.com under "Inside Amtrak" → "Reports and Documents." The fleet plan will be posted following its announcement.

Operations Update: All station operations in Wilmington, Del., moved to an adjacent temporary station complex on Feb. 1 to accommodate interior renovations to Wilmington Station. The work is expected to be complete in December. Parking will not be affected.

Safety: Injury ratios will no longer be used as safety performance goals for managers and supervisors. President and CEO Joe Boardman announced the decision in a Jan. 29 Special Employee Advisory, citing the company's effort to shift focus to activities that reduce risks as part of Safe-2-Safer.

Engineering: Construction of new platforms at the Baltimore-Washington International Thurgood Marshall Airport station continues and is expected to be complete this summer. A new walkway and elevators are scheduled to be installed by December. The \$9.1 million project is funded by the Maryland Transit Administration as part of the MARC Joint Benefit Capital Program.

Police and Security: Amtrak Police and Security will be supporting counterterrorism efforts during the 2010 Winter Olympic Games in Vancouver beginning this month. Explosive detecting K-9 teams, uniformed and plain-clothed officers will provide coverage from Seattle to Bellingham, Wash. The department will so coordinate efforts with federal, state, local and railroad law enforcement in the U.S. and Canada.

Government Affairs: Amtrak officials were in San Antonio, Texas, last week to host the fifth Civic Conversation as part of the Great American Stations program. Local, state and federal officials representing 22 communities attended to discuss best practices for preserving, restoring and upgrading train stations. Visit www.GreatAmericanStations.com for details.

Engineering: Components of the TLS Blue Team, supported by Mid-Atlantic Division forces, are working to replace 53,000 feet of rail on Track 3 of the Northeast Corridor between Bowie and Grove Interlockings in Maryland. This work will be completed over the next seven weeks, weather permitting.

Information Technology: Non-agreement employees and contractors are reminded they must complete the online Information Security Awareness Training course. Log on to www.elementk.com/login.asp/ to access the course. Enter your eight-digit SAP number followed by "amtrak" as the user name (ex. 12345678amtrak) and "amtrak1" as the password.

Mid-Atlantic and Northeast Division Crews Battle Massive Storm

Transportation, Police and Security, Engineering and Mechanical crews in the Mid-Atlantic and Northeast Divisions are still combating the remnants of a winter storm that dropped between 24 and 30 inches of snow throughout much of the East Coast on Saturday. The storm caused some service cancellations over the weekend, but schedules are returning to normal.

"In typical Amtrak fashion, you have all demonstrated the commitment and perseverance to minimize the effects of a monstrous storm," said Chief Operating Officer William Crosbie. "Your work is appreciated by every one of your fellow employees and by the passengers who are able to travel when flying or driving would be impossible."

Forecasters are predicting another five to 10 inches of snow in the region on Tuesday night. "We can't let up," said Crosbie. "We must continue working safely to push through and I know we will."

Congressional Hearing on Stimulus Projects Slated for Wednesday

Amtrak executives are scheduled to testify before the House Transportation and Infrastructure Committee on Feb. 10 to provide a one-year progress report on the company's stimulus-funded projects.

In 2009, Amtrak received approximately \$1.3 billion from the U.S. Department of Transportation for capital improvement projects as part of the American Recovery and Reinvestment Act. Those funds are being used to return to service nearly 100 pieces of rolling stock, renovate or repair 270 stations, make significant security and life safety improvements, and replace or repair eight bridges. Other projects include 38 new or improved Amtrak facilities, increasing station accessibility through the Mobility First Program, and numerous track maintenance projects among others.

To date, stimulus-funded projects from this grant have created more than 600 Amtrak jobs and 200 jobs through suppliers.

The hearing, which begins at 10 a.m. eastern time can be viewed live online at <http://transportation.house.gov>. Schedules may change due to winter storms in the Washington, D.C., area.

Amtrak to Reimburse Employees for H1N1 Flu Vaccinations

In support of its commitment to promote and protect the health of its employees, Amtrak has announced that it will reimburse employees who have paid for an H1N1 flu vaccination.

"In addition to reimbursement of seasonal flu shots last fall, Mr. Boardman has identified funds to cover the H1N1 vaccination costs for our employees. We ask people who have not already received a vaccination to make it a priority to reduce their health risk of contracting H1N1 flu," said Roy Deitchman, vice president, Environmental Health and Safety.

The Centers for Disease Control is now encouraging everyone to get vaccinated against H1N1 and lists this as the first and most important step in protecting against the flu.

Amtrak employees who receive(d) an H1N1 vaccination between Oct. 1, 2009, and March 15, 2010, are eligible for reimbursement up to \$35. Employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to:

Amtrak Environmental Health and Safety
60 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

Receipts must be submitted by March 30. The vaccination cost, up to \$35, will be reimbursed tax-free in the employee's paycheck. Payroll processing may take up to four weeks. Reimbursements will be provided for H1N1 vaccinations for current Amtrak employees only.

Marketing and Product Development:

Responding to continued passenger feedback, china, glassware, and linens were restored to the *Coast Starlight* dining car on Feb. 9. This enhanced dining service will put the *Coast Starlight* on par with the *Empire Builder* and *Auto Train* as premium services.

Marketing and Product Development:

A new culturally-focused Web site, www.MyBlackJourney.com, was launched last week in conjunction with Black History Month. The site serves as a comprehensive resource to connect users to information about destinations rich with African American heritage.

Human Resources: To obtain information about benefits, employees can call the Amtrak Benefits Service Center at 800-481-4887 or log onto www.AmtrakBenefits.com. This Web site contains benefit plan handbooks, forms and other useful information.

Government Affairs: Amtrak officials were scheduled to testify last week before the House Transportation and Infrastructure Committee regarding stimulus projects, however, the hearing was postponed due to winter storms in the Mid-Atlantic. A new date has not yet been scheduled.

Safety: Last week Amtrak launched the “Common Sense” rail safety campaign with Operation Lifesaver, freight railroads and state transportation agencies to reduce train-related pedestrian injuries in California. The state had the highest number of pedestrian-train fatalities in the nation last year. Visit www.commonsenseuseit.com for more information.

Interdepartmental Teamwork on Display During East Coast Snow Storms

In battling a second major snow storm in five days last week, operating employees in the Mid-Atlantic and Northeast — with support from other business departments — were able to successfully mitigate the conditions that grounded thousands of flights and shut down roads to keep trains running and get passengers to their destination.

“Two major snow storms back-to-back creates huge problems for any business, especially a transportation company,” said Chief Operating Officer William Crosbie. “But around-the-clock effort from thousands of Amtrak employees kept the railroad open, which speaks to our collective skill and ability.”

Engineering employees were out in the elements to keep switches and interlockings from freezing up or becoming snow-packed, while removing fallen trees from tracks and catenary wires. Mechanical crews battled equipment complications that arise from running in snow and freezing temperatures. Transportation crews worked to keep passengers safe, comfortable and informed and System Operations managed scheduling and equipment availability issues. Amtrak Police and Security managed large crowds to keep everyone safe.

Outside of operating departments, reservation sales agents worked tirelessly to alert passengers of service changes while e-Commerce and Corporate Communications kept the public informed via Amtrak.com and the media.

“There’s no way to recognize the impact of every individual’s contribution, but I hope we will all reflect on the magnitude of what we accomplished as a team over the last week,” said Crosbie.

State Partnership Expands with New Shore Line East Roundtrip

Amtrak officials joined representatives from the Connecticut Department of Transportation this morning to kick-off a second daily Shore Line East roundtrip to New London, Conn. Additional frequencies are planned to begin later this year.

The service, which is operated by Amtrak and runs on the Northeast Corridor, will further relieve traffic congestion along I-95 while also improving air quality and reducing energy consumption. Passengers will also benefit from track improvement projects that are scheduled to be completed this year.

“This is further evidence of our strong relationship with Connecticut and we’re looking forward to building on it over the next year,” said Vice President of Government Affairs and Corporate Communications Joe McHugh.

Human Resources: Adding new dependents to your benefits coverage due to a family status change (marriage, new baby, etc.) must be done through the Amtrak Benefits Service Center within 31 days of the event at www.AmtrakBenefits.com or 800-481-4887. Supporting documentation such as a marriage license or birth certificate is required.

Chairman Carper to Testify Before Congress on Stimulus Projects

Board Chairman Tom Carper will testify at the House Transportation and Infrastructure Committee hearing on stimulus projects on Feb. 23. The hearing, originally scheduled for Feb. 10, will be broadcast online at <http://transportation.house.gov> beginning at 10 a.m. Eastern Standard Time.

In 2009, Amtrak received approximately \$1.3 billion for capital improvement projects as part of the American Recovery and Reinvestment Act. Those funds are being used to return to service nearly 100 pieces of rolling stock, renovate or repair 270 stations, make significant security and life safety improvements, and replace or repair eight bridges, along with dozens of other projects. To date, stimulus-funded projects from this grant have created more than 600 Amtrak jobs and 200 jobs through suppliers.

Chairman Carper's testimony will be posted on Amtrak.com under "Inside Amtrak" → "Government Affairs."

New National Train Day Web Site Launches This Week

In commemoration of the 141st anniversary of the first transcontinental railroad being completed, Amtrak will host the third annual National Train Day on May 8 with events across the country celebrating America's love of trains. Marketing and Product Development is scheduled to launch a Web site tomorrow afternoon as a comprehensive resource for the public at www.NationalTrainDay.com. Another site exclusively for employees is set to launch in mid-March.

"National Train Day celebrates the train's impact on our country and provides an opportunity for Americans to further understand the influence rail has on the future of transportation in America," said Emmett Fremaux, vice president, marketing and product development.

The company will host free events from 11 a.m. to 4 p.m. local time at stations in Chicago, Los Angeles, Philadelphia and Washington, D.C. Each event will feature live entertainment; interactive and educational exhibits; kids' entertainment; cooking demonstrations; model train displays; and tours of notable private cars, Amtrak equipment, freight, and commuter trains and more.

In the nation's capital, the soon-to-be-announced National Train Day celebrity spokesperson will kick-off festivities on May 8. The other three major markets will feature unique exhibits that narrate each region's rich train history.

"The History of Baseball's Travel on Trains" in Philadelphia will feature memorabilia, photos, video and audio displays featuring several former players from a variety of leagues will showcase the early days of America's favorite pastime and its connection to train travel.

In Chicago, the "Blues Journey and Connection to the Railroad" exhibit will be headlined by Big Bill and Larry "Mud" Morganfield, the sons of celebrated blues musician Muddy Waters, who will be joined by legendary Mississippi Delta blues musician Bobby Rush to perform train-themed blues songs.

Los Angeles attendees will have the opportunity to see the "Railroad Bracero Exhibit," which details how thousands of Mexicans came to the U.S. during World War II to work legally under a program to build and maintain our nation's passenger rail system.

Additional events are being organized in local communities across the U.S. Last year, more than 140 total celebrations took place, and even more are expected this year.

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2010 must also submit a new form by Feb. 15.

Human Resources: Leave requests for calendar year 2010 can now be submitted. Employees should enter any type of leave in the SAP system as it is taken.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will decrease from 55 cents to 50 cents, effective for mileage expenses incurred on or after Jan. 1.

Amtrak Set to Provide Update on Seattle Maintenance Facility Upgrades

On Jan. 8, Amtrak, along with the Washington Department of Transportation, Oregon Department of Transportation, Sound Transit, Talgo and BNSF Railway, will host a press conference in Seattle to announce plans to upgrade the facility there that supports operations and maintenance agreements in the Pacific Northwest.

A contract award and beginning of the first phase of construction is expected to take place later this spring. The upgraded backshops will benefit from increased capacity and efficiency, along with dramatically improved working conditions for the Mechanical employees who perform inspections, testing and maintenance on rolling stock. A new building for parts storage, administrative offices and Transportation crew facilities are also planned.

The project is expected to create 150 construction jobs on site over the next six years.

Employee Vigilance Remains an Important Part of Security Effectiveness

Following the recent attempted terrorist attack aboard a Northwest Airlines flight, employees are reminded to remain vigilant in their duties and attentive to their surroundings during daily work activities.

While there is no specific threat to Amtrak identified at this time, Amtrak Police and Security personnel assigned to the FBI's National and Regional Joint Terrorism Task Force remain informed regarding any potential threats and other security issues. Amtrak Police and Security personnel will also use the intelligence gathered regarding the Northwest Airlines incident to inform security activities in stations and on trains as needed.

In addition to the behind-the-scenes and front-line security measures Amtrak has in place to improve passenger rail security, employee vigilance is important resource for Amtrak Police and other law enforcement and counterterrorism personnel.

Any suspicious persons or activities should be reported immediately to the Amtrak Police and Security Department at 1-800-331-0008, or dial 911.

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2010 must also submit a new form by Feb. 15.

Human Resources: Leave requests for calendar year 2010 can now be submitted. Employees should enter any type of leave in the SAP system as it is taken.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will decrease from 55 cents to 50 cents, effective for mileage expenses incurred on or after Jan. 1.

Amtrak Set to Provide Update on Seattle Maintenance Facility Upgrades

On Jan. 8, Amtrak, along with the Washington Department of Transportation, Oregon Department of Transportation, Sound Transit and BNSF Railway, will host a press conference in Seattle to announce **plans to upgrade the facility there that supports operations and maintenance agreements in the Pacific Northwest.**

A contract award and beginning of the first phase of construction is expected to take place later this spring. The upgraded backshops will benefit from increased capacity and efficiency, along with dramatically improved working conditions for the Mechanical employees who perform inspections, testing and maintenance on rolling stock. A new building for parts storage, administrative offices and Transportation crew facilities are also planned.

The project is expected to create 150 construction jobs on site over the next six years.

Employee Vigilance Remains an Important Part of Security Effectiveness

Following the recent attempted terrorist attack aboard a Northwest Airlines flight, employees are reminded to remain vigilant in their duties and attentive to their surroundings during daily work activities.

While there is no specific threat to Amtrak identified at this time, Amtrak Police and Security personnel assigned to the FBI's National and Regional Joint Terrorism Task Force remain informed regarding any potential threats and other security issues. Amtrak Police and Security personnel will also use the intelligence gathered regarding the Northwest Airlines incident to inform security activities in stations and on trains as needed.

In addition to the behind-the-scenes and front-line security measures Amtrak has in place to improve passenger rail security, employee vigilance is important resource for Amtrak Police and other law enforcement and counterterrorism personnel.

Joe Boardman Discusses 2010 Outlook with National Media

President and CEO Joe Boardman today hosted a conference call with members of the media to highlight projects and initiatives that will help Amtrak reach its goals established in the Strategic Guidance and Five Year Financial Plan that were unveiled late last fall.

Operational Changes: Effective Jan. 9-15 and Jan. 24, certain *Pacific Surfliner* trains will be cancelled due to track work being performed by Union Pacific Railroad. Other *Pacific Surfliners* will not serve all stations. Motorcoach service will be provided to and from most major stations where train service has been cancelled.

Media: The current issue of Arrive magazine features a cover story written by Vice President Joe Biden regarding the importance of trains in America. View the article online at <http://whistlestop.amtrak.com>.

Industry Event: Trains magazine and Amtrak are co-sponsoring a town hall meeting in Chicago on March 6. Chairman Tom Carper and President and CEO Joe Boardman will discuss photo policies, fleet plans and the future of long-distance trains with registered attendees. For details, visit www.trains.com or see the February issue of Trains magazine.

Retirement Benefits: The Dec. 28 issue of *Amtrak This Week* incorrectly stated the maximum 2010 withholding amounts for Railroad Retirement. The maximum withholding for Tier I is \$6,621.60 and \$3,088.80 for Tier II.

“Amtrak enters 2010 with a strong sense of optimism, enthusiasm and purpose,” said Boardman. “We have an aggressive game plan to modernize, renew, and grow America’s passenger railroad.”

These major projects will benefit passengers, increase service, and rebuild infrastructure to help position the company as the provider of choice for commuter, intercity passenger rail and high-speed rail service. Boardman added that Amtrak is partnering with 25 states that applied for funding from the \$8 billion federal grant for rail development.

Other projects highlighted included strengthening security at stations and on board trains; installing Positive Train Control; increasing operating speed on the Michigan Line to 105 mph; completing interior upgrades and WiFi deployment on *Acela Express*; stimulus-funded projects; and expanding corridor services with state partners.

Boardman will make a speech tomorrow about the state of the railroad, its achievements and its future.

FEMA Veteran Joins Operations Department

Susan Reinertson joins Amtrak today as chief operations administrator, reporting to Chief Operating Officer William Crosbie. She will lead and coordinate the department’s high-level financial and management activities as well as the implementation of the company’s Continuity of Operations Plan.

Reinertson previously was a consultant to private organizations and the government on homeland security and emergency management. She is a veteran of the Federal Emergency Management Agency, having served as the regional administrator for the Pacific Northwest. She has also served in various roles within state and local emergency management departments and the Homeland Security Institute. Reinertson earned a master’s degree in public administration from the University of North Dakota and a master’s degree in security studies from the Naval Postgraduate School.

Joe Boardman Discusses 2010 Outlook at Press Roundtable

Other *Pacific Surfliners* will not serve all stations. Motorcoach service will be provided to and from most major stations where train service has been cancelled.

Performance: December ridership and ticket revenues increased 5 and 4 percent over last year, respectively. Amtrak carried 2.4 million passengers and earned \$147 million in ticket revenue during the month. Attributable factors include improved customer service, higher gas prices and improving economic conditions.

What's Your Take?

February is Black History Month, and we want to know what it means to you. Send your answer of 50 words or less to Employee Communications at ecom@amtrak.com no later than Friday, Jan. 15 and you may be featured in the February issue of *Amtrak Ink*.

Joe Boardman Discusses 2010 Outlook at Press Roundtable

President and CEO Joe Boardman today hosted a conference call with members of the media to highlight projects and initiatives that will help Amtrak reach its goals established in the Strategic Guidance and Five Year Financial Plan that were unveiled late last fall.

“Amtrak enters 2010 with a strong sense of optimism, enthusiasm and purpose,” said Boardman. “We have an aggressive game plan to modernize, renew, and grow America’s railroad.”

These major projects will benefit passengers, increase service, rebuild infrastructure and position the company to be involved in high-speed rail development and expansion. Specifically, Boardman outlined Amtrak’s partnerships with 30 states that applied for funding from the \$8 billion federal grant for rail development.

Other projects discussed during the roundtable included: strengthening security at station and on board trains; installing Positive Train Control; increasing operating speed on the Michigan Line to 105 mph; completing interior upgrades and WiFi deployment on Acela Express; and expanding corridor services with state partners.

Stimulus-funded infrastructure improvements to occur this year include the Niantic River Bridge replacement, installation of new transformers and electrical equipment on the Northeast Corridor, improvements to tracks and switches at Chicago Union Station and construction of new maintenance facilities in Los Angeles and Hialeah, Fla.

Out of its own capital budget, in 2010 Amtrak will install more than 112,000 concrete ties in New England and 49,000 wood ties in the Midwest, while making numerous track and bridge repairs. The multi-year Hell Gate Line catenary replacement project in New York is also set for completion and construction will begin on new maintenance facilities in Seattle.

FEMA Veteran Joins Operations Department

Susan Reinertson joins Amtrak today as chief operations administrator, reporting to COO William Crosbie. In this role, she will lead and coordinate the department’s high level financial and management activities, and lead the implementation of the continuity of operations plan.

Reinertson previously was a consultant to private organizations and the government on homeland security and emergency management. She is a veteran of the Federal Emergency Management Agency, having served as the regional administrator for the Pacific Northwest. She has also served in various roles within state emergency management divisions and the Homeland Security Institute. Reinertson earned a master’s degree in public administration from the University of North Dakota and a master’s degree in security studies from the Naval Postgraduate School.

Operations Change: New schedules for many trains operating between Boston/Springfield, Mass., and New York and between New York and Washington, D.C., are now in effect with certain trains departing earlier. Current schedules can be found at Amtrak.com.

Transportation: Handheld electronic credit card devices are now being deployed for on-board use. Deployment begins in Zone 2 from Jan. 19 to Feb. 16, with other zones to follow. All conductors and assistant conductors working Zone 2 trains are required to attend a mandatory one-hour training program. Class schedules are posted in Crew Bases.

Haiti Relief Information

Many employees within the Amtrak family are of Haitian descent and have loved ones directly impacted by devastating earthquake in Port-au-Prince last week. Managers are working to provide support where possible and employees are reminded that counseling services and other support resources are available through the Employee Assistance Program. For a list of local EAP Counselors, go to "Employees" → "Employee Assistance Program" on the intranet, or call 202-906-3447.

Many employees have inquired about donating to the relief effort there. Anyone wishing to make a donation is encouraged to do so through one of the following reputable organizations actively providing aid to residents of Haiti: American Red Cross (www.redcross.org), Clinton Bush Haiti Fund (www.clintonbushhaitifund.org) and UNICEF (www.unicefusa.org).

Niantic River Bridge Replacement Set to Begin in April

Amtrak awarded the contract for replacement of the 102-year-old Niantic River Bridge last week, setting the stage for the three-year construction process to begin in April. Upon completion, the new bridge in East Lyme, Conn., should improve reliability of the 40 passenger trains that cross the bridge daily.

"This is a major piece of our capital improvement program that will not only improve our train operations, but will also benefit passengers and local marine traffic while creating jobs and boosting the local economy," said Chief Operating Officer William Crosbie.

The \$104.7 million contract is being funded by \$47.1 million from Amtrak's annual capital budget, with the remaining \$57.6 million provided through the American Recovery and Reinvestment Act. Crosbie said the existing bridge will remain in operation until the new bridge is complete and the Niantic River will remain open to marine vessels during construction.

Cianbro/Middlesex VII of Littleton, Mass., the same construction company that replaced the Thames River Bridge lift span, will construct the new double-track bridge just south of its present alignment. Additional elements of the project include expanding the navigation channel beneath the bridge for improved marine access, realigning the east and west track approaches to the bridge and relocating the Niantic Bay Overlook, including beach restoration.

Labor Relations Vice President Retires

Joe Bress, who served as Vice President of Labor Relations for 12 years, announced his retirement from Amtrak on Jan. 14. Having joined Amtrak in May of 1996 as an assistant vice president, Bress led labor relations activities during significant periods in the company's labor/management history.

"Joe played an important role in the company's chronicles and we thank him for his contributions to Amtrak," said President and CEO Joe Boardman. "In the interim, pending a final decision on the position, I have asked Assistant Vice President Charlie Woodcock to lead the labor relations function."

Operations Change: NEC schedule changes effective Jan. 18....

Transportation: Handheld electronic credit card devices are now being deployed for on-board use. Deployment begins in Zone 2 from Jan. 19 to Feb. 16, with other zones to follow. All conductors and assistant conductors working Zone 2 trains are required to attend a mandatory one-hour training program. Class schedules are posted in Crew Bases.

Niantic River Bridge Replacement Set to Begin in April

Amtrak awarded the contract for replacement of the 102-year-old Niantic River Bridge last week, setting the stage for the three-year construction process to begin in April. Upon completion, the new bridge in East Lyme, Conn., should improve reliability of the 40 passenger trains that cross the bridge daily.

“This is a major piece of our capital improvement program that will not only improve our train operations, but it will benefit passengers and local marine traffic while creating jobs and boosting the local economy,” said Chief Operating Officer William Crosbie.

The \$104.7 million contract is being funded by \$47.1 million from Amtrak’s annual capital budget, with the remaining \$57.6 million provided through the American Recovery and Reinvestment Act. Crosbie said the existing bridge will remain in operation until the new bridge is complete and the Niantic River will remain open to marine vessels during construction.

Cianbro/Middlesex VII of Littleton, Mass., the same construction company that replaced the Thames River Bridge, will construct the new double-track bridge just south of its present alignment. Additional elements of the project include expanding the navigation channel beneath the bridge for improved marine access, realigning the east and west track approaches to the bridge and relocating the Niantic Bay Overlook, including beach restoration.

Deadline for Remote Network Access Approaching

Beginning April 5, employees who access the Amtrak network using Citrix or the Virtual Private Network (VPN) will need a new authentication “token” to log in. The token is a small piece of hardware resembling a USB flash memory drive that displays a unique personal identification number that changes every 60 seconds. The new system greatly increases network security.

When accessing the Amtrak network, employees will need to provide their user ID number along with the current PIN number displayed on their authentication token. Passwords will no longer be used to log in to Citrix or the VPN.

Any employee who accesses the company network remotely should contact Amtrak Information Security at infosec@amtrak.com to be assigned an authentication token.

User instructions will be provided at that time. Employees who already have an authentication token must begin to use it immediately in order to ensure continued network access.

Engineering: The Production Switch & Rail Gang, with the assistance of New York Division Engineering forces, will replace 3,800 feet of track in the south tube of the North River Tunnel over the next nine weekends.

Marketing and Product Development:

A special round-trip weekend fare of \$85 is available for sale on *Adirondack* service through April 19, for travel through April 26. Ridership on the state-supported route in the first quarter of FY '10 increased more than 10 percent compared to last year.

Employees Aid Haitian Evacuees

Amtrak employees in Orlando, Fla., have been assisting the American Red Cross and the Florida Department of Children and Families to transport evacuees from Haiti following the 7.0-magnitude earthquake there two weeks ago.

Thousands of evacuees who are U.S. citizens or have relatives in the U.S. are being flown into Orlando-Sanford International Airport. The state of Florida has purchased tickets to transport many of these people to South Florida on Amtrak trains.

Orlando station employees have been assisting evacuees with their travel and are providing additional childcare products to families, many of whom were without diapers, bottles and water.

"It is an honor to help those who have been through so much and it gives me great joy to have the opportunity to help," said Ticket Clerk Sharon Crane.

President Obama to Nominate New Board Member

President Obama last week announced his intent to nominate Jeffrey R. Moreland to the Amtrak board of directors. He is the third board nominee made by the president, joining Bert DiClemente and Anthony Coscia, who were announced as nominees in October. All three must still be approved by the U.S. Senate before joining the board of directors.

Before retiring in 2007, Moreland was executive vice president of public affairs at BNSF Railway, where he was responsible for federal and state government relations, corporate communications and economic regulatory policy. Prior to that post, he held several other executive and senior level positions with the company.

Moreland joined the railroad industry in 1978 as an assistant general attorney for the Santa Fe Railway after serving eight years at the U.S. Securities and Exchange Commission. He earned a bachelor's degree from Georgetown University, a law degree from The Catholic University of America and a master's degree in business administration from the University of Chicago.

Remote Network Access Changes Approaching

Beginning April 5, employees who access the Amtrak network using Citrix or the Virtual Private Network (VPN) will need a new authentication "token" to log in. The token is a small piece of hardware resembling a USB flash memory drive that displays a unique six-digit identification number that changes every 60 seconds. The new system greatly increases network security.

When accessing the Amtrak network, employees will need to provide their user ID, a PIN number chosen by the employee and the number displayed on their authentication token. Passwords will no longer be used to log in to Citrix or the VPN.

Any employee who accesses the company network remotely via Citrix or VPN should contact Amtrak Information Security at infosec@amtrak.com to be assigned an authentication token. User instructions will be provided at that time. Employees who already have an authentication token must begin to use it immediately in order to ensure continued network access.

For questions or technical help using an authentication token, call the Amtrak Help Desk at 800-772-HELP.

Operations: A Health and Safety Fair will be held for employees in operating departments at the Midway Maintenance of Way Base on June 2 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

PSSA: The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1. Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

Safety: A revised Safety Bulletin was issued last week providing guidance on identifying and working with asbestos in Amtrak facilities. For details, visit the intranet under "Safety" → "Safety Resource Library" or call the Industrial Hygiene group at ATS 777-3126.

Human Resources: To view and apply for jobs electronically, employees must use the new Employee Information Portal. To log in, go to Amtrak.com "Inside Amtrak" → "Employees" or go directly to <https://cip.corp.nrpc/irj/portal>.

New Employee Resources for Payroll and Human Resources Assistance Available

Employees with questions about their paychecks can now call a new toll-free Payroll hotline dedicated to responding to employees' inquiries. Support staff will answer calls on weekdays between 8 a.m. and 6 p.m. Eastern time. Employees who leave a message after those hours will get a response within one business day. The new toll-free Payroll number is 866-247-2915 or ATS 777-4823.

For assistance with any Human Resources-related inquiry or transaction other than paycheck questions, call the new Employee Service Center weekdays from 8 a.m. to 8 p.m. Eastern time at 888-MY-HR-ESC (888-694-7372) or e-mail HRESC@amtrak.com.

Amtrak Launches National Recovery and Resiliency Exercise Program

To further strengthen Amtrak's ability to provide America with safe and reliable passenger rail service in the wake of a large-scale emergency, the company is launching a Recovery and Resiliency Exercise Program.

The program, which will involve employees from every department, includes a series of exercises that will help preserve the rail system's operational viability following a large-scale emergency.

"With these exercises, we will talk through our current plans, identify gaps, and improve the way we operate during an emergency," said William Crosbie, chief operating officer.

Exercises will be conducted nationwide and will specifically challenge the 15 Station Action Teams currently in place at major locations. Three SATs have volunteered to pilot the program: San Diego, Chicago and Baltimore. Each will hold a discussion-based exercise (commonly referred to as Tabletop Exercises) in July where teams are presented with a scenario and talk through how they would respond. Upon completion of the local exercises, an Executive Committee-level tabletop exercise will take place in September 2010.

This program will utilize the Department of Homeland Security's Homeland Security Exercise and Evaluation Program, a proven method for preparing individuals to respond to and recover from potentially disabling disruptions of critical services. It is funded by the DHS Transportation Security Grant Program.

Every aspect of this exercise series will be carefully analyzed in order to learn as much as possible and make improvements to the policies and procedures currently in place.

"This program will better prepare us to minimize our vulnerabilities, and advance our preparedness and response to real-world attacks. It will be a component of an overall Continuity of Operations plan for Amtrak," said Susan Reinertson, chief operations administrator and director of the program.

New Piedmont Service Begins This Week

Amtrak and the state of North Carolina will begin operating two additional *Piedmont* trains on June 5, increasing the state's sponsored passenger rail service to six daily trains.

Piedmont service operates between Raleigh and Charlotte, North Carolina's two largest cities. The new trains will provide midday service to complement the existing morning and late afternoon *Piedmont* departures. The New York-Charlotte *Carolinian* also serves the two cities with morning and evening service.

As demand for passenger rail service in North Carolina grows, six more trains are planned to be added over the next seven years.

Operations: A Health and Safety Fair will be held for employees in operating departments at the Midway Maintenance of Way Base on June 2 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

PSSA: The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1. Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

Policy and Development: Michigan HSR Study

Safety: A revised Safety Bulletin was issued last week providing guidance on identifying and working with asbestos in Amtrak facilities. For details visit the intranet under "Safety" → "Safety Resource Library" or call the Industrial Hygiene group at ATS 777-3126.

Human Resources: To view and apply for jobs electronically, employees must use the new Employee Information Portal. To log in, go to Amtrak.com "Inside Amtrak" → "Employees."

New Hotlines in Place for Payroll and Human Resources Assistance

A new toll free Payroll hotline is in place to answer employee questions related to their wages and salaries more quickly and effectively. Support staff will answer calls on weekdays between 8 a.m. and 6 p.m. eastern time. After hours calls will be answered by a voicemail system. The new toll-free Payroll number is 800-247-2915 or ATS 777-4823.

For assistance with any Human Resources-related inquiry or transaction, call the new Employee Service Center weekdays from 8 a.m. to 8 p.m. Eastern time at 888-MY-HR-ESC (888-694-7372) or email HRESC@amtrak.com.

Amtrak Launches a National Recovery and Resiliency Exercise Program

To further strengthen Amtrak's ability to provide America with safe and reliable passenger rail service in the wake of a large-scale emergency, the company is launching a new Recovery and Resiliency Exercise Program.

The program, which will involve employees from every department, includes a series of exercises will be developed that will help preserve the rail system's operational viability following a large-scale emergency, by testing the Station Action Plans.

"This program will really force us to talk through our current plans, identify gaps, and improve the way we operate during an emergency," said William Crosbie, chief operating officer.

Exercises will be conducted nationwide and will specifically challenge the ## Station Action Teams currently in place at major locations. Three teams have volunteered to pilot the program: San Diego, Chicago and Baltimore. Each will hold a discussion-based exercise (commonly referred to as Tabletop Exercises) in July. Based on these exercises, an Executive Committee-level Tabletop Exercise will take place in September 2010.

This program will utilize the U.S. Department of Homeland Security's Homeland Security Exercise and Evaluation Program (HSEEP), a proven method for preparing individuals to respond to and recover from potentially disabling disruptions of critical services.

Every aspect of this exercise series will be carefully analyzed in order to learn as much as possible and make improvements to the policies and procedures currently in place.

"This program will better prepare us to minimize our vulnerabilities, and advance our preparedness and response to real-world attacks. It will be a component of an overall Continuity of Operations (COOP) plan for Amtrak," said Susan Reinertson, chief operations administrator and director of the program.

New Piedmont Service Begins This Week

Amtrak and the State of North Carolina will begin operating two additional *Piedmont* trains on June 5, increasing the state's sponsored passenger rail service to daily trains.

Piedmont service operates between Raleigh and Charlotte, North Carolina's two largest cities. The new trains will provide midday service to complement the existing morning and late afternoon *Piedmont* departures. The New York-Charlotte *Carolinian* also serves the two cities with morning and evening service.

As demand for passenger rail service in North Carolina grows, three more trains are planned to be added over the next seven years.

Marketing and Product Development:

An event is being held on June 10 at the Santa Fe Depot in San Diego to celebrate the 10th anniversary of the *Pacific Surfliner*.

Marketing and Product Development:

Based on a successful three-month trial run, AmtrakConnectSM wireless Internet is now a free standard service offering for all *Acela Express* passengers. A request for proposals has been issued to install wireless Internet on the entire fleet nationwide.

Joe Boardman Discusses Growth with Bloomberg News

President and CEO Joe Boardman told the Bloomberg News editorial board in an interview on Friday afternoon that Amtrak appears to be on track to set a ridership record this year. The nearly hour-long interview covered a variety of topics including safety and security improvements, network planning and fleet replacement.

“We’re seeing growth. We retained a lot of passengers even in the teeth of the recession. People want choices and one of the choices they want is rail,” said Boardman, noting that Amtrak currently has a higher share of the air/rail market than it has ever had before.

According to the most recent quarterly data, Amtrak has 65 percent of the market for travel between New York and Washington, D.C., and 52 percent between New York and Boston.

“People are riding the railroad and it’s not just because fuel prices are higher, it’s also because there’s an improvement in customer service, there’s an improvement with Wi-Fi now on *Acela*.”

In addition to capturing more travelers along existing routes, Boardman explained to editors and reporters that the company is focused on expanding state partnerships to grow the national rail network.

“I think Amtrak is the lifeline to an awful lot of people in this country ... This is America’s railroad. We need to provide that connectivity. A transportation system that doesn’t provide connectivity isn’t a transportation system ... and that’s part of the Amtrak advantage — that we’re connecting across the country and providing that service.”

The company is working closely with numerous states across the country to apply for the next round of federal transportation funding to make investments and improvements in passenger rail.

When asked how he thinks Amtrak will be able to accomplish its growth objectives, Boardman explained that the company has two critical competitive advantages over other rail operators. The first is its existing national network, the second is its people.

“There isn’t anybody in this country that knows how to run electrified rail other than Amtrak. There isn’t anybody in this country that knows how to build and maintain [high-speed] track other than Amtrak. The people at Amtrak are the key to its success,” he said.

Following the interview, Boardman did a live segment on Bloomberg TV. To see the on-air segment, go to www.bloomberg.com and click “TV and Radio” → “CEO Spotlight.”

Joe Boardman Discusses Growth with Bloomberg News

President and CEO Joe Boardman was interviewed by Bloomberg News on June 4. The nearly hour-long interview covered a variety of topics including safety and security improvements, network planning and fleet replacement. However, one theme that was consistent throughout the conversation was Amtrak's strategy to grow the national rail system and compete for passengers.

"We're seeing growth. We retained a lot of passengers even in the teeth of the recession. People want choices and one of the choices they want is rail," said Boardman, noting that Amtrak currently has a higher share of the air/rail market than it has ever had before.

According to the most recent available data, Amtrak has 65 percent of the market for travel between New York and Washington, D.C., and 52 percent between New York and Boston.

"People are riding the railroad and it's not just because fuel prices are higher, it's also because there's an improvement in customer service, there's an improvement with Wi-Fi now on *Acela*."

Market share is growing outside the Northeast as well. [INSERT DATA IF AVAILABLE]

In addition to capturing more travelers along existing routes, Boardman explained that the company is focused on expanding state partnerships to grow the national rail network.

"I think Amtrak is the lifeline to an awful lot of people in this country — and we are one country. This is America's railroad. We need to provide that connectivity. A transportation system that doesn't provide connectivity isn't a transportation system...and that's part of the Amtrak advantage that we're connecting across the country in providing that service."

The company is working closely with numerous states across the country to apply for the next round of federal transportation funding to make investments and improvements for the future.

When asked how he thinks Amtrak will be able to accomplish its growth objectives, Boardman explained that the company has two critical competitive advantages over other rail operators. The first is its existing national network. The second is its people.

"There isn't anybody in this country that knows how to run electrified rail other than Amtrak. There isn't anybody in this country that knows how to build and maintain anything above a Class 4 track other than Amtrak. The people at Amtrak are the key to its success," he said.

Social Media: Did you know Amtrak has official Facebook and Twitter accounts? Follow the company at www.facebook.com/amtrak and www.twitter.com/amtrak.

Travel Policy Update: The Meal Policy for business travel has been changed. Instead of a meal per diem, employees must now input actual meal costs on their Expense Report e-form. Any meal over \$10 requires a receipt and total meal expenses may not exceed \$55 per day. The full policy is in the Finance section of the Policy and Instruction Manual on the intranet under "Library" → "Policies." (POLICY NOT SIGNED YET – MAY HAPPEN MONDAY)

June 14, 2010

Prohibition Against Firearms in Checked Baggage Remains in Effect Until December

While Amtrak is submitting a report to Congress today on its preparations for accepting firearms in checked baggage, the company's current policy remains in effect.

Benefits: Effective July 1, agreement-covered employees and their eligible dependents will receive vision care benefits through EyeMed Vision Care. Although VSP will no longer be the vision care provider, the plan benefits have not changed. Within the next two weeks, employees will receive a welcome package from EyeMed that will include vision ID cards, a summary of benefits, and a list of the 10 closest participating eye doctors.

Amtrak's current policy prohibits all firearms, ammunition and other weapons aboard its trains. This includes any being carried on the person, in carry-on baggage or in checked baggage. Employees should take note that this policy remains in effect until Amtrak begins firearm carriage service on Dec. 15, 2010.

A law passed last year requires Amtrak to implement the procedures necessary to provide storage and carriage of firearms in checked baggage cars and at Amtrak stations that accept checked baggage, within one year of the bill's enactment. This requirement applies solely to checked baggage, not carry-on baggage.

"Employees are reminded that we will not carry any firearms for passengers prior to December 15," said Amtrak Police Chief John O'Connor. "Anyone attempting to bring any type of gun or weapon onto a train should be reported to Amtrak police immediately."

Briefings to Focus on Providing Excellent Service to Passengers with Disabilities Begin This Week

A series of briefings for front-line employees that will begin later this week will provide important reminders about best practices in assisting passengers with disabilities.

The briefings take place in advance of the 20th anniversary of the enactment of the Americans with Disabilities Act (ADA) on July 26. Numerous events and conferences recognizing this anniversary are planned this summer around the country, and it is expected that many attendees will travel to these events via Amtrak. This provides a great opportunity for Amtrak to showcase its ability to provide excellent service to this important group that relies on Amtrak as a favored mode of transportation.

"Amtrak is proud of its role as an important mode of transportation for people with disabilities and aims to continue to provide excellent service for this group of passengers," said Kevin Scott, chief, Service Delivery.

Starting this week and for a two-week period, a "Focus On" will be distributed to on-board service and station employees as well as Amtrak Police Department personnel. Contact Center agents and ticket agents will be provided similar information.

Safe-2-Safer Underway Across the System

This week, the Pacific and Pacific Northwest Divisions are beginning the rollout process for Safe-2-Safer, and managers and supervisors are gearing up to begin safety leadership training. The rollout is now in progress across the system, marking an important milestone in the company's quest to improve its safety practices by adding new processes built around data and teamwork between union and management employees.

"It's been almost exactly one year since we first started Safe-2-Safer by conducting a survey and employee focus groups to learn more about employees' attitudes toward safety," said Vice President, Transportation Richard Phelps, the executive sponsor of Safe-2-Safer. "We've made tremendous progress so far, thanks to the time and effort put in by employees, managers and our union leaders."

The launch of Safe-2-Safer has been initiated in phases by geography, beginning in the Mid-Atlantic Division last fall and progressing to the West Coast. According to Safe-2-Safer Senior Director Peter Hall, results from divisions that began the program first are very encouraging.

In the Mid-Atlantic Division, for example, every manager and supervisor has participated in two leadership training modules, Steering Committees comprising union members are in place and peer-to-peer observations are beginning as part of Safe-2-Safer's Behavioral Accident Prevention Process (BAPP). These anonymous observations provide the data that will help Steering Committees identify risks at their local workplace and address the causes of those risks.

"I firmly believe that I'm helping to make a difference toward changing our safety behaviors in a positive fashion, while helping create a better environment where management and labor employees work hand-in-hand toward a common goal, which is safety for all," wrote Felicia Thompson in a message which is currently posted on the intranet home page. Thompson is a conductor who was selected for a two-year term as the full-time Safe-2-Safer Facilitator for Transportation in the Mid-Atlantic Division.

"As the other departments and divisions begin BAPP in the coming weeks and months, I encourage people to get involved and consider joining your local Steering Committee, applying to become a Facilitator, and most importantly, be willing to let your peers observe you working so they can make your workplace even safer," she wrote.

"The local Steering Committees are the ones who really drive this and I've been incredibly impressed with their commitment and the level of credibility they've brought to Safe-2-Safer," concluded Phelps. "The General Chairmen have done an excellent job of selecting the right people to represent their unions."

Operations Update: Beginning today, schedules for trains operating between Niagara Falls, Albany-Rensselaer and New York will be adjusted to accommodate track work and engineering projects near Yonkers and along the Empire Connection to New York. The work is scheduled for completion on Nov. 21.

Engineering: Fence Gangs R-902, R-903 and R-904 are continuing their work this week installing right-of-way fencing at various locations along the Harrisburg Line and Northeast Corridor. So far this fiscal year, the gangs have installed 20,532 feet of fencing.

Benefits: Effective July 1, agreement-covered employees and their eligible dependents will receive vision care benefits through EyeMed Vision Care. Although VSP will no longer be the vision care provider, the plan benefits have not changed. Employees will soon receive a welcome package from EyeMed that includes vision ID cards, a summary of benefits and a list of the 10 closest participating eye doctors.

Customer Service: Front-line managers and supervisors across the system are providing important reminders to employees about best practices in assisting passengers with disabilities ahead of numerous events and conferences recognizing the 20-year anniversary of the Americans with Disabilities Act on July 26. Materials were issued last week to applicable departments. Transportation managers are asked to record these briefings in TDRS using their respective job briefings code.

June 21, 2010

Safe-2-Safer Now Underway Nationwide

This month, the Pacific and Pacific Northwest Divisions are beginning the rollout process for Safe-2-Safer, marking an important milestone in the company's quest to improve its safety practices by adding new processes built around data and teamwork between union and management employees. The rollout has now started throughout the system and managers and supervisors in those divisions will soon begin safety leadership training.

"It's been almost exactly one year since we first started Safe-2-Safer by conducting surveys and focus groups among employees to see how we could reduce injuries even further," said Vice President of Transportation Richard Phelps, the executive sponsor of Safe-2-Safer. "We've made tremendous progress so far thanks to the time and effort put in by employees, managers and the union leaders."

The rollout was done in phases by geography, beginning in the Mid-Atlantic Division last fall and progressing to the West Coast. According to Safe-2-Safer Senior Director Peter Hall, results from divisions that began the program first are very encouraging.

In the Mid-Atlantic Division, for example, every manager and supervisor has begun leadership training, Steering Committees of union members are in place and peer-to-peer observations are beginning. These anonymous observations provide the data that will help Steering Committees identify risks at their local workplace and address the causes of those risks.

"I firmly believe that I'm helping to make a difference toward changing our safety behaviors in a positive fashion, while helping create a better environment where management and labor employees work hand-in-hand toward a common goal, which is safety for all," wrote Felicia Thompson in a message which is now posted on the intranet homepage. Thompson is a conductor who was selected for a two-year term as the full-time Safe-2-Safer Facilitator for Transportation in the Mid-Atlantic Division.

"As the other departments and divisions begin BAPP in the coming weeks and months, I encourage people to get involved and consider joining your local Steering Committee, applying to become a Facilitator, and most importantly, be willing to let your peers observe you working so they can make your workplace even safer," she wrote.

"The local Steering Committees are the ones who really drive this for us and I've been incredibly impressed with their commitment and the level of credibility they've brought to Safe-2-Safer," concluded Phelps. "The General Chairmen have done an excellent job of selecting the right people to represent their unions."

Operations Update: Beginning today, schedules for trains operating between Niagara Falls, Albany-Rensselaer and New York will be adjusted to accommodate track work and engineering projects near Yonkers and along the Empire Connection. The work is scheduled for completion on Nov. 21.

Engineering: Fence Gangs R-902, R-903 and R904 are continuing their work this week installing right-of-way fencing at various locations along the Harrisburg Line and Northeast Corridor. So far this fiscal year, the gangs have installed 20,532 feet of fencing.

Operations: A Health and Safety Fair will be held for Operations employees at the Providence Maintenance of Way Base on June 29 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Environmental Health and Safety:

Amtrak has expanded its sponsorship of the Student Conservation Association to cover projects in nine cities across the country. The SCA provides environmental education and green jobs training. Reduced-cost travel will be provided to students as they complete projects related to trail and habitat restoration, invasive species removal and historical preservation.

Update on NEC Business Travel

Demand for Northeast Corridor trains is once again strong, and *Acela Express* is regularly selling out. Employees are reminded to use *Northeast Regional* service for business travel whenever possible in order to protect revenue space on *Acela*, unless there is a compelling reason to use the high-speed service.

Additionally, contractors and vendors should not be provided travel vouchers for *Acela Express* unless their work is directly related to that service or there is some other clear, compelling reason to do so.

“We understand that many employees have to travel frequently along the corridor on Amtrak business, but where employee travel occurs on a peak-period *Acela* departure, which is often sold out, we risk displacing paying customers and diluting ticket revenues,” said Emmett Fremaux, vice president, Marketing and Product Development.

Unlike other corridor services, business or personal pass travel on *Acela Express* requires tickets. No flash pass travel is allowed. Detailed information on employee pass travel rules is available on the intranet under “Employees” → “Policies.”

Amtrak Assumes Full Operations for Metrolink Service

Amtrak Train and Engine crews today began operating all seven lines of the Los Angeles-area Metrolink commuter rail service. Amtrak officially took over the operation on Saturday, operating the four lines that provide weekend service. Under the terms of the four-year contract, Amtrak will provide Train and Engine crews along with management and support staff to operate the 512 route-mile network that covers six counties in Southern California.

The Southern California Regional Rail Authority selected Amtrak to provide operating service last fall and the two organizations signed a formal contract in March. The contract includes two additional three-year extension options. Amtrak previously operated Metrolink from 1992 to 2005.

Expanding commuter and state-supported operations service is a key element of Amtrak’s growth strategy. Amtrak will continue to seek new partnership opportunities where it can leverage its expertise in rail operations, safety performance, business support functions and other competitive advantages.

New Board Members Confirmed

Three rail industry and business veterans who were nominated by President Obama to the Amtrak board of directors were confirmed by the U.S. Senate last week, clearing the final hurdle for them to be sworn in and officially join the board.

Anthony Coscia, Bert DiClemente and Jeff Moreland are expected to join Chairman Tom Carper, Vice Chairman Donna McLean, U.S. Transportation Secretary Ray LaHood, President and CEO Joe Boardman and Director Nancy Naples in time for the July board meeting.

“We welcome our newest board members with confidence they will contribute their considerable knowledge and experience to advance Amtrak’s growth strategy and efforts to make the nation’s railroad safer, greener and healthier,” said Carper.

Coscia is a partner at New York law firm Windels Marx Lane & Mittendorf, and has served as chairman of the Board of Commissioners of the Port Authority of New York and New Jersey. DiClemente served as vice president at CB Richard Ellis, Inc., the world’s largest real estate company, and has 20 years of experience working on Capitol Hill. Moreland has 32 years of railroad experience, and was most recently executive vice president of public affairs at BNSF Railway.

Message from Lorraine Green and DJ Stadtler

Dear Co-workers,

Each Tuesday morning, the 11 members of the executive committee and other department heads meet to discuss company strategy, direction and policy. As part of our effort to become a healthier company, some of our discussions revolve around how we can continue to improve the company for your benefit.

We are pleased to announce that as a result of negotiations with Fidelity Investments, our 401 (k) Retirement Savings Plan administrator, starting May 19 we will be offering employees new low-cost investment options, allowing you to save more for retirement and better meet your financial goals.

The fees and expenses of the investments you select have a large impact on the overall return of your portfolio, especially over the course of an entire career. By replacing the Fidelity Freedom Funds® currently being offered with 12 lower-cost lifecycle funds from a new series of Fidelity Freedom KSM Funds, we expect to save employees \$500,000 in fund management fees. The investment strategies, fund portfolios and fund managers are the same as the current Freedom Funds; the only difference is that the costs you pay will be reduced.

An additional investment option called Fidelity *Contrafund*® - Class K will also be made available.

Those of you who currently invest in the Freedom Funds will see your balances automatically transfer to the corresponding Freedom K Funds at the close of business on May 19. If you choose not to have your funds transferred to a corresponding Freedom K fund, you may elect to another investment option before May 19, or after the transfer has occurred.

These types of changes are typically reserved for new plan participants; however, Dale Stein, our treasurer, negotiated with Fidelity to secure the lower-cost retirement options for current employees as well. This is a prime example of Amtrak's commitment to you as a valued employee and we hope more of you will take advantage of this company benefit.

Plan participants will begin receiving letters from Fidelity with more information about the new funds. If you have questions or would like to begin saving for retirement, please call 800-343-0860 or visit www.MySavingsAtWork.com/amtrak to schedule an appointment with a Fidelity representative.

Sincerely,

Lorraine Green
VP, Human Resources
and Diversity Initiatives

Wireless Internet Launches on *Acela Express* and in Select Stations

Passengers on *Acela Express* and those traveling through select stations in the Northeast can now stay connected thanks to AmtrakConnectSM, the company's wireless Internet solution, which officially launched today.

"This is a major service upgrade," said Matt Hardison, chief, Sales Distribution and Customer Service. "We expect this offering to translate directly to higher satisfaction and therefore, higher ridership and ticket revenue."

Following two years of development and extensive testing, passengers now have a 3G connection for wireless devices such as laptops and netbooks. Marketing and Product Management worked closely with teams from Mechanical, Transportation, Engineering, Real Estate and Information Technology to implement the highest level of system performance possible.

"We've taken another step toward delivering the best possible travel experience to our customers and we will be expanding our on-board technology even further in the coming years," said Senior Director, On-Board Systems, Lenetta McCampbell.

In the past, passengers were only able to access the Internet using a cellular air card or smart telephone with Web capabilities. However, these options are not ideal because users must rely on one carrier's coverage along the route, and they must be able to receive a consistent cellular signal inside the train. The new on-board system delivers a more consistent experience by pulling a signal from multiple sources and delivering the bandwidth through a single, full-train network.

Stations that now feature AmtrakConnect in gate areas are Boston's Route 128 Station, Providence Station, New York Penn Station, Philadelphia 30th St. Station, Baltimore Penn Station and Washington Union Station. The service will be available in Wilmington, Del., once the current station renovation is complete. Amtrak already has free wireless Internet in all Club*Acela* locations as well as the Metropolitan Lounge at Chicago Union Station.

Other routes offering some type of on-board wireless Internet service are the *Pacific Surfliner* and *Downeaster*. The company hopes to extend AmtrakConnect to additional routes, but no timeline has yet been set.

Information Technology: Beginning April 5, employees who access the Amtrak network using Citrix or the VPN will need a new authentication "token" to log in. Employees should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token. User instructions will be provided at that time.

Government Affairs: Amtrak will participate in a hearing before the Pennsylvania House of Representatives Transportation Committee in Pittsburgh on March 3 to discuss the future of passenger and freight rail in the state. Specific topics will include stimulus projects and Amtrak's recent feasibility study for expanded service in Pennsylvania.

Employee Information Management: This week, employees will receive details and schedules regarding training on the use of new upgrades to the Employee Information Portal, which is set to launch on May 19. The training will be offered through classroom sessions, online classes and on CD for those who do not have access to the company intranet. Additional information and updates will be sent directly to employees by the EIM Team.

Amtrak Hosts Town Hall This Week

Amtrak is partnering with Trains Magazine to sponsor a town hall meeting in Chicago on Saturday, March 6. Approximately 250 attendees are registered to attend the meeting, which will serve as an open forum to discuss the future of long-distance trains, fleet plans and Amtrak's photo policy. Chairman Tom Carper and President and CEO Joe Boardman will lead the discussion along with other Amtrak officials.

"We aim to have an open dialogue with people who are interested in Amtrak. It will be a success if we can engage stakeholders and constructively exchange views," said Boardman.

Engineering: The 172 employees of the Track Laying System-Blue, with support from Mid-Atlantic Division forces, will kick-off the 2010 production season with concrete tie replacement on Track #1 at Landover (Md.) Interlocking on March 14. Multiple schedule changes along the NEC will take effect to accommodate the work.

Human Resources: When adding a dependent to their benefits coverage, employees must submit proof of dependent eligibility such as a marriage license or birth certificate. Call the Amtrak Benefits Service Center at 800-481-4887 for more information.

Marketing and Product Development: A new video production contest targeting college students in Illinois offers the chance to win more than \$3,000 in prizes and Amtrak travel. Visit www.AmtrakTRAINsPortationVideoContest.com for details.

Test Your "Green" I.Q. to be Featured in *Amtrak Ink*

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Over the coming weeks, a new trivia question will appear in *Amtrak This Week*. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

Amtrak's initiative to print two-sided documents when possible reduced the company's estimated carbon dioxide output by how many tons in FY '09?

- a.) 28 b.) 38 c.) 40 d.) 90

Amtrak Hosts Successful Town Hall Meeting in Chicago

Board Chairman Tom Carper and President and CEO Joe Boardman hosted the first-ever town hall meeting between passenger rail supporters and railroad executives on Saturday, March 6, in Chicago. More than 250 people from 28 states attended.

Co-hosted and moderated by Trains Magazine, the all-day event included question and answer sessions and centered on three topics: Amtrak's strategy to replace and increase the size of its equipment fleet, initiatives to improve long-distance trains and the company's policy on personal photography and videography in stations, trains and other Amtrak property.

Boardman initiated the creation of the event citing the importance of engaging stakeholders. "It is important for Amtrak senior management to hear directly from people who care deeply about improving and growing passenger rail in this country," he said. "Listening to their opinions and viewpoints with open ears and respect is crucial because their support matters in determining how passenger rail moves forward."

At the town hall meeting, Amtrak announced the creation of a new program inviting train watchers to be on the lookout for suspicious activities, trespassers and other safety and security threats when they are taking photographs or traveling. Amtrak Police Chief John O'Connor announced the program, explaining its fit with the company's existing "See Something, Say Something" campaign. BNSF Railway has instituted a similar effort, which has been well-received.

In addition to the meeting, attendees were given the opportunity to tour rehabilitated equipment that is being returned to service with funding from the American Recovery and Reinvestment Act, including a newly rebuilt P-40 Genesis locomotive, two Superliner sleeping cars and a Superliner dining car. Employees who performed the work at the Beech Grove Maintenance Facility were on hand to explain the process.

"Trains was honored to play a part in this unique event," said Trains Magazine Editor Jim Wrinn. "For a major corporation to provide that much of its senior management to listen to its customers and take feedback from them is amazing. We hope to do this again."

Operations Update: On Monday through Friday of each week from March 15 through April 2, southbound *Saluki* Train 391 will depart Chicago 25 minutes earlier and depart all remaining stations on the route 30 minutes earlier due to track work being performed by Canadian National Railway.

Operations: Anna Szczepanska has been selected as the Operations department's senior executive assistant and will report directly to Chief Operating Officer William Crosbie. Previously, Szczepanska was executive assistant to the Mid-Atlantic Division general superintendent.

Marketing and Product Development: A new employee-only National Train Day Web site is now available at www.TrainDay411.com. Sign-up online to volunteer at an event on May 8, enter to win employee prize packages and find all the latest news and information.

This Week's "Green" I.Q. Question

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

The new capital program to replace up to 2,000 light fixtures with energy-efficient bulbs in nine Mechanical facilities and station platforms at Chicago Union Station is expected to cut energy use by how many kilowatt hours?

a.) 2 million b.) 6 million c.) 7 million

Congratulations to last week's winner, Assistant Inspector General Nick Pinto, who correctly answered that Amtrak reduced its CO₂ output by 40 tons in FY '09 by printing two-sided documents.

New Study Outlines Kansas Service Options

Amtrak and the Kansas Department of Transportation unveiled last week a new study analyzing four alternatives for state-sponsored passenger rail service between Kansas City, Oklahoma City and Fort Worth. Commissioned by the Kansas DOT, the study was prepared by Amtrak with input from BNSF Railway to identify options to restore service to various cities in Kansas and Oklahoma that lost Amtrak service during federally mandated cuts in 1979.

"Growth is a vital part of our corporate strategy and building new service on state-supported corridors is one of the best ways for us to achieve that," said Mike Franke, assistant vice president, Policy and Development.

Estimated start-up costs of each option range from \$156 million to \$479 million and would require between \$3.2 million and \$8 million in annual operating support. Projected ridership of the four options fall between 65,900 and 174,000 annually. The study does not include cost estimates for renovating or building stations or platforms. The full report can be found on the Kansas DOT Web site at www.ksdot.org.

"This is just the first of many steps that must take place before service can actually start," added Franke. "The real work begins now as decisions must be made and funding must be secured by Kansas and the other states involved."

Departments Show Flexibility, Team Work to Seize Opportunity

System Operations and Revenue Management have teamed with the Central Division to capitalize on increased demand in the Midwest for spring break travel, which peaks in mid-March.

"There are a lot of colleges and universities throughout the region and many students need to get home to the Chicago area or they're catching a flight to their spring break destination," explained Mike Frazier, acting senior director, System Operations. "Our job is to recognize opportunities like this and adjust our plans accordingly."

System Operations re-allocated equipment to extend train consists and increase capacity from Chicago to St. Louis, Carbondale and Quincy, Ill., Detroit and Port Huron, Mich.

According to Denise Johnson, director, Revenue and Capacity Management, spring break ridership has been much heavier this year, especially to Quincy and Carbondale. Travel is highest on Fridays and Sundays as students leave or return to campus.

While ticket revenue information will not be available until early April, the increases are expected to be significant. "We're seeing a high percentage of tickets purchased at our highest fare levels. Combined with the increased ridership, that's a great thing," said Johnson.

Operations Update: On Monday through Friday of each week from March 15 through April 2, southbound *Saluki* Train 391 will depart Chicago 25 minutes earlier and depart all remaining stations on the route 30 minutes earlier due to track work being performed by Canadian National Railway.

Operations: Anna Szczepanska has been selected as the Operations department's senior executive assistant and will report directly to Chief Operating Officer William Crosbie. Previously, Szczepanska was executive assistant to the Mid-Atlantic Division general superintendent.

Marketing and Product Development:

A new employee-only National Train Day Web site is now available at www.TrainDay411.com. Sign-up online to volunteer at an event on May 8, enter to win employee prize packages and find all the latest news info.

This Week's "Green" I.Q. Question

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. a.) 2 million b.) 6 million c.) 7 million

Congratulations to last week's winner, NAME, who correctly answered that Amtrak reduced its CO2 output by 40 tons in FY '09 by printing two-sided documents.

New Study Outlines Kansas Service Options

Amtrak and the Kansas Department of Transportation unveiled last week a new study analyzing four alternatives for state-sponsored passenger rail service between Kansas City, Oklahoma City and Fort Worth. The study was prepared by Amtrak with input from BNSF Railway to identify options to restore service to various cities in Kansas and Oklahoma that lost Amtrak service during federally-mandated cuts in 1979.

"Growth is a vital part of our corporate strategy and building new service in state-supported corridors is one of the best ways for us to grow," said Stephen Gardner, vice president, Policy and Development. "More and more states are recognizing passenger rail's value in terms of mobility, safety, economic development and environmental impact."

Estimated start-up costs of each option range from \$156 million to \$479 million and would require between \$3.2 million and \$8 million in annual operating support. Projected ridership of the four options fall between 65,900 and 174,000 annually. The study does not include cost estimates for renovating or building stations or platforms. The full report can be found on the Kansas DOT Web site at www.ksdot.org.

"This is just the first of many steps that must take place before service can actually start," added Gardner. "The real work begins now as decisions must be made and funding must be secured by Kansas and the other states involved."

Departments Show Flexibility, Team Work to Seize Opportunity

System Operations and Revenue Management have teamed with the Central Division to capitalize on increased demand in the Midwest for Spring Break travel, which peaks in mid-March.

"There are a lot of colleges and universities throughout the region and many students need to get home to the Chicago area or they're catching a flight to their Spring Break destination," explained Mike Frazier, acting senior director, System Operations. "Our job is to recognize opportunities like this and adjust our plans accordingly."

System Operations re-allocated equipment to extend train consists and increase capacity from Chicago to St. Louis, Carbondale and Quincy, Ill., Detroit and Port Huron, Mich.

According to Denise Johnson, director, Revenue and Capacity Management, Spring Break ridership has been much heavier this year, especially to Quincy and Carbondale. Travel is highest on Fridays and Sundays as students leave or return to campus.

While ticket revenue information will not be available until early April, the increases are expected to be significant. "We're seeing a high percentage of tickets purchased at our highest fare levels. Combined with the increased ridership, that's a great thing," said Johnson.

Government Affairs: President and CEO Joe Boardman will testify regarding Amtrak's FY '11 grant request before the House Appropriations Subcommittee on Transportation, Housing and Urban Development, and Related Agencies on March 23. The testimony will be posted on the intranet under "News" → "Legislative."

Marketing and Product Development: As part of the "ALL SPRING – ALL ROUTES – ALL KINDS OF POINTS" promotion, Amtrak Guest Rewards members will earn double points on qualifying travel now through May 7, and triple points for qualifying travel from May 8-29, for every one-way trip on every route.

This Week's "Green" I.Q. Question

In advance of the 40th anniversary of Earth Day in April, employees are invited to test their Amtrak "green" I.Q. Employees should submit their answer via e-mail to ecom@amtrak.com with "Green I.Q." in the subject line by noon Friday. A winner will be chosen at random and featured in the April issue of *Amtrak Ink*. This week's question is:

How many gallons of used oil did Amtrak recycle in FY 2009?

a.) 70,000 b.) 94,000 c.) 137,000 d.) 215,000

Congratulations to last week's winner, Teresa Cohen, secretary, Beech Grove, who correctly answered that Amtrak's program to install energy-efficient light bulbs in nine Mechanical facilities and platforms at Chicago Union Station will cut energy use by 7 million kilowatt hours.

Safe-2-Safer Rollout Continues With Collaboration Between Labor Leaders and Senior Management

The implementation of Safe-2-Safer has reached another milestone, as Amtrak executives and General Chairmen from nearly every employee union agreed recently on a Memorandum of Understanding that outlines how the committees responsible for the peer-to-peer safety observation process — a major component of the program — will be implemented.

"The group worked together to create the process for nominating and selecting Steering Committee members and facilitators. We can now begin building these teams for Mechanical and Transportation departments in the Mid-Atlantic, APD and the backshops. We appreciate the support and willingness to collaborate from the union General Chairmen," said Vice President of Transportation Richard Phelps, the executive sponsor of Safe-2-Safer.

The approximately 25 Steering Committees systemwide will be made up of union members in good standing that are selected by their respective union leadership. The committees' role will be to implement the Behavioral Accident Prevention Process® (BAPP), which involves peer-to-peer observations and identifying safe behaviors that prevent the most common injuries. The data from the observations will then be used to teach employees how to reduce their personal risk and identify other barriers to safety that need to be addressed, such as fixing tripping hazards or replacing defective tools.

"The peer-to-peer observations for BAPP are anonymous, voluntarily and will never be done by managers or result in any discipline," said Phelps. "Our motto for BAPP is 'No Name, No Blame, No Sneek-Up.'"

Additionally, the General Chairmen and Amtrak's executive team finalized the selection process and pay rate for each committee's Safe-2-Safer facilitator, who will manage the day-to-day Steering Committee activities. These positions will also be filled by union members, and job announcements will be posted beginning this week at <http://jobs.amtrak.com>.

The group of executives and labor leaders will continue to meet periodically to provide Safe-2-Safer progress updates and address any issues that arise.

The Safe-2-Safer rollout process is underway in the Mid-Atlantic, Northeast and Southern regions as well as backshops and Reservation Call Centers, with managers and supervisors beginning leadership training and coaching. Corporate office locations and the Central, Southwest and Pacific regions will soon follow.

"Safety is everyone's responsibility, but managers must be accountable and must lead their teams to create a safer environment. A big part of Safe-2-Safer is teaching our managers and supervisors how to do that in a way that is non-confrontational and doesn't include finger pointing," said Phelps.

Information Technology: Only one week remains for employees who access the Amtrak network using Citrix or the VPN to obtain a new authentication “token” to log in. After April 5, a token will be required for remote network access. Employees should contact Amtrak Information Security at infosec@amtrak.com to be assigned a token. User instructions will be provided at that time.

Employee Information Management: Managers and delegates who have received invitations to enroll in instructor-led training on the Employee Information Portal (EIP) upgrades launching in May are reminded to RSVP by April 9. Computer-based training on the new Employee Self Service features will be available to all employees in the coming weeks.

“Green” I.Q. Contest Winner

Congratulations to the winner of the final Green I.Q. trivia question last week, Clint Foster, engineer, Sacramento, who correctly answered that Amtrak recycled 215,000 gallons of used oil last year.

Taye Diggs Signs On as National Train Day Spokesperson

Actor and avid train fan Taye Diggs, star of *Private Practice*, will join Amtrak to kick-off the third annual National Train Day.

“Riding the train was my first real exposure to serious travel and the magical notions attached to train travel will stay with me forever,” said Diggs. “My wife [Broadway Actress Idina Menzel] and I have lived all of our adult lives in New York City so we have come to know riding the train as a relaxing and convenient travel option.”

Diggs will start the festivities with a ceremony at New York’s Penn Station on Friday, May 7, where he will flip the switch that launches an edible three-dimensional “trainscape” made of cake and moving model trains. The display will be inspired by this year’s new National Train Day artwork and will include a model train installation by Bachmann Trains, a leading model train company.

Afterward, Diggs will board Amtrak and travel to Washington, D.C. to host the celebration at Washington Union Station and enjoy the festivities with other train fans on May 8.

Joining Amtrak to celebrate the importance of trains, the SUBWAY® restaurant chain is the premier sponsor of the third annual National Train Day. For more information, employees should visit www.TrainDay411.com.

New National Train Day Employee Trivia Contest Now Open

A new employee trivia contest is now open at www.TrainDay411.com, an exclusive site for Amtrak employees to find news about National Train Day and register to volunteer at one of the four major events in Los Angeles, Chicago, Philadelphia or Washington, D.C. The new contest will be open until April 8. The winner of each contest will receive a National Train Day prize package.

Congratulations to John Deissler, B&B mechanic, New York, who won the previous trivia contest by correctly identifying the four cities hosting major National Train Day events: Chicago, Los Angeles, Philadelphia and Washington, D.C.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through May 6. Congratulations to the latest winner, Tim Carroll, ticket agent, Raleigh, N.C.

Government Affairs: Assistant Vice President, Policy and Development, Drew Galloway appeared at a field hearing in Miami on May 3 before the House Transportation and Infrastructure Subcommittee on Railroads, Pipelines and Hazardous Materials. The hearing focused on intermodal/high-speed rail connections. His testimony can be viewed on the intranet under "News" → "Legislative."

Human Resources: From May 1 to May 19, non-agreement employees who submit a leave request through the Employee Self Service (ESS) system will *not* receive any e-mail notifications or confirmations related to their request. Employees must monitor their request status by logging in to ESS or by following-up with their supervisor directly.

Amtrak Looks at Possible Florida Service Expansion

On May 1, Amtrak officials including Chairman Tom Carper, hosted a special inspection trip along the Florida East Coast Railway (FEC) to review the feasibility of passenger rail service on the 351-mile route between Miami and Jacksonville. Included on the trip were several local officials, community leaders and rail supporters interested in restoring service along the route.

The Florida DOT has partnered with FEC owner Rail America and local governments and planning councils to apply for stimulus funding to support the initiative. The FEC has not had regular passenger service since 1968.

Communities Nationwide to Celebrate National Train Day this Saturday

Don't miss out on the third annual National Train Day, which will be celebrated at approximately 170 events in 44 states, including Hawaii and Alaska this Saturday, May 8. Employees are encouraged to bring family and friends to a nearby event to celebrate the rich history of the American railroad and learn about the important role trains have in the nation's future.

"National Train Day is bigger and better this year thanks to hard work from our colleagues and increased participation from our host railroads as well as our state, local and commuter partners," said Emmett Fremaux, vice president, Marketing and Product Development. "We work closely with these organizations every day and we all have a common interest in promoting rail transportation."

New for National Train Day this year is the addition of a premier sponsor. Subway® will help Amtrak reach a wider audience to promote the events. Subway will also provide complimentary meals to volunteers at the events in Chicago, Los Angeles, Philadelphia and Washington, D.C.

As of press time, 347 employees have volunteered to help manage the four major market events. Dozens more have taken the initiative to create an event at their local station or have worked with the local chamber of commerce or visitor's bureau.

On Friday, May 7, Taye Diggs of the TV series *Private Practice* will unveil a trainscape at New York Penn Station made of cake and other edible treats that includes a model railroad installed by Bachmann Trains. He will then travel to Washington on May 8 to kick off the festivities before performances by Rocknoceros and the Ballou High School Marching Band.

In Philadelphia, a special exhibit will be on display called "Baseball Junction: The History of Baseball and the American Railroad," while Chicago attendees can take part in "The Blues Journey and Connection to the Railroad." The Los Angeles event will feature a special "Railroad Braceros" exhibit detailing the role thousands of Mexicans played in developing U.S. railroads as part of a special work program during World War II.

The four major events will all feature expanded train displays with rail cars and locomotives from the past, present and future. The AmtraKids Depot will offer fun and entertainment for younger rail fans and other displays will focus on the green benefits of rail travel, as well as the industry's contribution to economic development.

For a complete list of National Train Day events and information, visit www.TrainDay411.com and click "Build the Buzz."

Communities Nationwide to Celebrate National Train Day this Saturday

Amtrak is gearing up for the third annual National Train Day on May 8, which will be celebrated at approximately 170 events in 44 states, including Hawaii and Alaska. The events, which are being hosted in partnership with strategic partners and local community organizations, will celebrate the rich history of railroads and educate attendees on why trains are an important part of the nation's future.

"As a whole, National Train Day is bigger and better this year thanks to hard work from our colleagues and increased participation from our host railroads as well as our state, local and commuter partners," said Emmett Fremaux, vice president, Marketing and Product Development. "We work closely with these organizations every day and we all have a common interest in promoting rail transportation."

New for National Train Day this year is the addition of a premier sponsor. Subway® will help Amtrak reach a wider audience to promote the events. Subway will also provide complimentary meals to volunteers at the events in Chicago, Los Angeles, Philadelphia and Washington, D.C.

On Friday, May 7, Taye Diggs of the TV series *Private Practice* will unveil a trainscape at New York Penn Station made of cake and other edible treats that includes a model railroad installed by Bachmann Trains. He will then travel to Washington on May 8 to kick off the festivities before performances by Rocknoceros and the Ballou High School Marching Band.

In Philadelphia, a special exhibit will be on display called "Baseball Junction: The History of Baseball and the American Railroad," while Chicago attendees can take part in "The Blues Journey and Connection to the Railroad." The Los Angeles event will feature a special "Railroad Braceros" exhibit detailing the role thousands of Mexicans played in developing U.S. railroads as part of a special work program during World War II.

Employees are encouraged to attend an event with friends and family. The four major events will all feature expanded train displays with rail cars and locomotives from the past, present and future. The AmtraKids Depot will offer fun and entertainment for younger rail fans and other displays will focus on the green benefits of rail travel, as well as the industry's impact on economic development.

"We all have a vested interest in communicating the value of trains to Americans in order to ensure a healthy future for our company and our industry," said Fremaux. "National Train Day is designed to do just that and I hope you'll be a part of it this weekend."

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees"→ "Awards and Achievements."

National Train Day: A new employee trivia contest is open at www.TrainDay411.com now through May 6. Congratulations to the latest winner, Tim Carroll, ticket agent, Raleigh, N.C.

Government Affairs: Assistant Vice President, Policy and Development, Drew Galloway will appear at a field hearing in Miami on May 3 before the House Transportation and Infrastructure Subcommittee on Railroads, Pipelines and Hazardous Materials. The hearing will focus on intermodal high-speed rail connections.

Human Resources: From May 1 to May 19, non-agreement employees who submit a leave request through the Employee Self Service (ESS) system will not receive any e-mail notifications or confirmations related to their request. Employees must monitor their request status by logging in to ESS or by following-up with their supervisor directly.

Operations Update: The Spring-Summer 2010 System Timetable takes effect today.

Marketing and Product Development:

Beginning May 15, Amtrak will no longer accept debit cards that require a PIN. Amtrak will still continue to accept debit cards that contain an American Express, Discover, MasterCard or Visa credit card logo. Enhancements to Amtrak's payment systems may allow for reintroduction of debit cards in the future.

PSSA: The nomination period for the 2010 President's Service and Safety Awards is now open and will run through May 14. Nomination forms are available on the intranet under "Employees" → "Awards and Achievements."

National Train Day: Congratulations to the last two TrainDay411.com trivia contest winners, Carmen Calderon, mechanical clerk, Los Angeles and Mario Edwards, Amtrak Police, Chicago. Thanks to everyone who participated.

Operations: A Health and Safety Fair will be held for Operations employees in Odenton, Md., on May 12 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Important Info Regarding New Employee Information Portal

The new Employee Information Portal will launch on May 19 and become accessible to all employees from home.

Starting May 19, managers will use new electronic forms in place of current Forms 2000 and 2002. To prepare for this change, please do not initiate new Forms 2000 or 2002 after 5 p.m. on Friday, May 14. Forms currently in progress will be accepted by Human Resources. If there is an urgent need between May 14 and May 19, please contact Human Resources for assistance.

Another new feature is the eRecruiting system, which will replace Team Rewards, ending the employee referral program. As a result, all referral points must be used before May 19. Any unused points will be forfeited.

**Labor-Management Collaboration
Brings New Jobs to Amtrak**

Amtrak is currently in the process of hiring more than 50 new employees at the Contact Centers in Riverside, Calif., and Philadelphia to support assumption of the customer support work for Amtrak Guest Rewards (AGR), the company's loyalty marketing program. Training for new agents will begin next month and training for the agents who will work the AGR desk is scheduled for early September.

Currently, call center support for AGR members is outsourced as part of a vendor agreement. But with the contract up for renewal earlier this year, Amtrak worked closely with the Transportation Communication International Union (TCU) to bring the work in-house, effective Oct. 1.

"This outcome is a direct result of a collaborative effort by the leadership of TCU, which represents our Contact Center agents, our Labor Relations department, the Amtrak Guest Rewards team, and the Contact Center team," said Mark Rose, senior director, Reservation Sales.

**Employees Make Third National Train Day
A Winning Effort**

Employees played a prominent role in the third annual National Train Day, which was celebrated on May 8 with events in four major markets and approximately 180 smaller communities in nearly every state, including Alaska and Hawaii.

"On behalf of the executive committee and our department, I want to thank each and every employee who contributed to making this year's National Train Day the biggest and best yet," said Emmett Fremaux, vice president, Marketing and Product Development.

At the four events in Chicago, Los Angeles, Philadelphia and Washington, D.C., roughly 400 employee volunteers answered questions from attendees, assisted in merchandise sales, helped exhibitors and guided people through equipment displays. Dozens of other employees worked with their local chambers of commerce and visitor's bureaus to create events in their community.

What Did You Think?

On Friday April 30, Amtrak hosted dozens of Employee Appreciation Day events across the country to help employees become safer, greener and healthier in their professional and personal lives.

Tell us what you thought so we can make it better next year by completing an anonymous, five-minute online survey at www.surveymonkey.com/s/EAD2010.

Three New Employee Resources Launch This Week

Beginning May 19, three important new resources will be available to all Amtrak employees, allowing for greater access to company information, easier updates to their personal information and streamlined Human Resources support. These interconnected tools are part of the company's initiative to become "healthier" by strengthening its position as an employer of choice.

Operations: A Health and Safety Fair will be held for employees in Operating departments at the Adams Maintenance Facility in North Brunswick, N.J., on May 19 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Marketing and Product Development:

Checked baggage service is now available to *Cardinal* passengers at many stations along the route. The new service is a result of close collaboration between the Product Development and Transportation departments.

Benefits: The Amtrak 401(k) Retirement Savings Plan will offer new lower-cost investment options beginning May 19, allowing participants to save more money for retirement. Current investments in Fidelity Freedom Funds will automatically be transferred to the corresponding Fidelity Freedom K Fund, which has the same investment strategy but lower management fees. Call 877-477-AMTK (2685) with questions.

Amtrak Police: Congratulations to Officer Richard Beynon of Harrisonburg, Pa., who received the Amtrak Police Department's 2009 Officer of the Year award at a luncheon in Washington, D.C., on May 13 as part of National Police Week.

Information Technology: A series of online courses is available through the end of May for eTrax users explaining changes to navigating the applications, creating travel authorizations and expense reports and reconciling P-Cards. Information is on the intranet under "How We Work" → "eTrax."

PSSA Nomination Period Extended

The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1.

Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

For the first time, every employee will be able to sign in through Amtrak.com to access the company intranet, which houses news, policies and other company information. Once on the intranet, employees can access the enhanced Employee Information Portal to view or update their personal information, apply for jobs and enroll in training courses. Managers will be able to access new HR forms, manage their staff's training and perform recruiting functions in the portal.

To sign on from a home Internet connection, go to Amtrak.com and click "Inside Amtrak" at the bottom of the page. Then click the "Employees" link. Employees who already access the Amtrak network using Citrix or the Virtual Private Network will continue to use their existing login ID and password. Employees who are signing on for the first time should have received instructions containing their initial login ID and password with their May 14 pay stub. These instructions are also being mailed to employees' homes this week.

Once signed on, a link on the intranet home page will connect employees to the Employee Information Portal. For optimal performance, please use Internet Explorer Version 7.0 and disable any pop-up blockers. For assistance logging in, call the Amtrak Help Desk at 800-772-4357.

The Employee Service Center will also open on May 19 to provide comprehensive support for all Human Resources-related inquiries and transactions. The Employee Service Center will be open from 8 a.m. to 8 p.m. Eastern time, Monday through Friday. Call 888-MY-HR-ESC (888-694-7372) or email HRESC@amtrak.com.

With the opening of the Employee Service Center, many forms have been modified or replaced. Forms 2000 and 2002 have been discontinued as of last Friday and employees with urgent needs prior to May 19 should contact their HR representative. Beginning May 19, managers and delegates will be able to access the new HR forms on the portal and intranet.

The portal's new eRecruiting feature will replace Team Rewards and close the employee referral program. As a result, all referral points must be used before May 19. Any unused points will be forfeited.

What Do You Think?

Help make next year's Employee Appreciation Day even better by completing an anonymous, five-minute online survey at www.surveymonkey.com/s/EAD2010.

Operations Update: Beginning May 24, through early August, select *Northeast Regional* and *Acela Express* trains will operate according to a later schedule to accommodate track work near Baltimore.

Operations: A Health and Safety Fair will be held for employees in operating departments at the Wilmington (Del.) Maintenance Facility on May 19 from 9 a.m. to 2 p.m. Barbecue lunch will be provided.

Transportation: All trains will sound their horns at noon local time on Memorial Day, May 31, in honor of the men and women who have lost their lives in service to the United States. A System General Road Foreman Notice will be issued this week to provide direction to locomotive engineers.

PSSA: The deadline to submit nominations for the President's Service and Safety Awards has been extended from May 14 to June 1. Nomination forms can be found on the intranet under "Employees" → "Awards and Achievements."

Security Reminder: Protecting the financial information of Amtrak, customers and employees is critical. Employees are reminded to always minimize exposure of credit card account numbers to anyone who does not need to see them, avoid writing them down if at all possible, and destroy any record of an account number as soon as it is no longer necessary for the job.

Region Partnership Group Unveils NEC Master Plan

Amtrak and 12 states released the Northeast Corridor Infrastructure Master Plan on May 20, after three years of collaboration and research. The group aims for the plan to be the foundational document for a multi-state planning effort to improve the region's transportation network by further defining the role of intercity and high-speed passenger rail. Amtrak and the states have formally asked the Federal Railroad Administration to lead the planning effort.

The NEC Master Plan can be found on Amtrak.com under "Inside Amtrak" → "Reports and Documents."

New Employee Resources Up and Running

Employees now have greater access to company information and their personal records thanks to new technology resources that launched last week that allow them to log in to the company intranet and Employee Information Portal through Amtrak.com. The new Employee Service Center also opened last week to provide a one-stop shop for all Human Resources needs.

"We have already seen a high usage rate from employees across the country," said Chief Information Officer Ed Trainor. "We've been working hard to iron out a few things based on employee feedback and I hope everyone will see how valuable these tools are."

Any employee who had access to the Amtrak network prior to May 19 should use their already-assigned Amtrak login ID and their password. Employees who have never had access to the intranet before, should follow the instructions provided on the login page, which can be found at Amtrak.com → "Inside Amtrak" → "Employees."

Some users may have experienced intermittent technical problems when logging in or trying to access the corporate forms library in the Employee Information Portal last week. Those issues have been corrected. Additionally, system access for some ticket agents who share generic login passwords is delayed while Information Technology is developing unique passwords to secure their personal information. Those agents will be notified of their new secure login credentials by IT.

The new careers section of the portal and the Amtrak job board are still being transitioned to the new system, which is expected to be complete by Friday, May 28. Employees who had applied for a posted job using the old system will not need to re-apply because their application is being transferred automatically to the new system.

The Employee Service Center is open weekdays from 8 a.m. to 8 p.m. Eastern time, to provide comprehensive support for all Human Resources-related inquiries and transactions. Call 888-MY-HR-ESC (888-694-7372) or email HRESC@amtrak.com.

For assistance with technical intranet or Employee Information Portal login issues, see the help links on the login page or call the Amtrak Help Desk at 800-772-4357.

Safe-2-Safer Rollout Continues Thanks to Collaboration Between Labor Leaders and Senior Management

The implementation of Safe-2-Safer has reached another milestone, as Amtrak executives and General Chairmen from nearly every employee union agreed on a Memorandum of Understanding that outlines how the committees responsible for the peer-to-peer safety observation process — a major component of the program — will be implemented.

“The group worked together to create the process for nominating and selecting Steering Committee members and facilitators, and that can now begin for Mechanical and Transportation departments in the Mid-Atlantic, APD and Mechanical backshops,” said Richard Phelps, executive sponsor of Safe-2-Safer.

Steering Committee members will be union members in good standing that are selected by their respective union leadership. The committees’ role will be to implement the Behavioral Accident Prevention Process® (BAPP), which begins by identifying safe behaviors that prevent the most common injuries. That data will then be used to teach employees how to reduce their personal risk and identify other barriers to safety that need to be addressed, such as fixing tripping hazards or replacing defective tools.

Additionally, the General Chairmen and Amtrak executive team finalized the selection process and pay rate for each committee’s Safe-2-Safer facilitator, who will manage the day-to-day rollout process on behalf of the Steering Committee. These positions will also be filled by union members, and job announcements will be posted beginning this week at <http://jobs.amtrak.com>.

“We appreciate the support and willingness to collaborate from the general chairmen,” said Phelps. “This program is all about working together at every station and facility to keep each other safe. It’s great that the teamwork is originating at the highest levels.”

The group will continue to meet periodically to provide Safe-2-Safer progress updates and address any issues that arise.

The rollout process is underway in the Mid-Atlantic, Northeast and Southern regions as well as Mechanical backshops and Reservation Call Centers. Corporate office locations and the Central, Southwest and Pacific regions will soon follow. Managers and supervisors have already begun training sessions to learn more effective management techniques and better ways to provide feedback to employees.

“Safety is everyone’s responsibility, but managers must be accountable and must lead their teams to create a safer environment. A big part of Safe-2-Safer is teaching our managers and supervisors how to do that in a way that is non-confrontational and doesn’t include finger pointing,” said Phelps.

STATE OF AMERICA'S PASSENGER RAILROAD
Amtrak President and CEO Joseph Boardman

Transportation Research Forum
Washington, D.C.
January 12, 2010

Written remarks as prepared.

Thank you for inviting me to be here with you at the Transportation Research Forum.

The day before Thanksgiving in 2008 I became Amtrak's CEO. In the past 14 months I have learned that there are so many others out there interested in making news about Amtrak, that the only news delivered by a CEO seems to be related to his or her resignation.

I say that partly in jest. No, this is not a resignation speech — I plan on being Amtrak's CEO for a long time.

But my point is that someone, somewhere already knows — or thinks they know — everything there is to know about what is happening at Amtrak or should be happening at Amtrak and they write about it somewhere: a newsletter; a blog; a widely dispersed e-mail; or even a trade journal.

Why is that?

I would like to offer three reasons:

- The name "Amtrak" is a blend of the words "America" and "Track." On May 1, 1971 Amtrak became America's Railroad, and it still is. At Amtrak's inception, rumors were already being spread that it was created to fail and to eliminate passenger rail in this country. Disquieted by the rumors, those who believed in America's Railroad kept very close track of the railroad, making sure that any news would be known right away. They existed then, and they exist today.
- Because of the way Amtrak was created, we must collaborate with lots of people before we can make important decisions, and in some cases even not-so-important decisions. About 70 percent of the train-miles traveled by Amtrak trains are on tracks owned by freight and commuter railroads. Changes require discussion, whether it's with the host railroads, communities we serve, elected officials, or rail consumer organizations. In addition, we have 14 unions and two councils that represent our workforce and naturally they stay very engaged in changes that might be considered.

- As a government-supported business, Amtrak must be transparent in what it does and what its strategy is. We provide testimony to Senate and House Committees, are evaluated by an Amtrak IG, USDOT IG, the GAO and a private financial audit every year.

I raise this because there has been so much uncertainty in Amtrak's history that the people who care about passenger rail – and some who don't — appear to be conditioned to look for or make news about Amtrak.

So my message is: Stop living in the past 39 years of worry that passenger rail is going away. The truth is that we're in the midst of a transformational chapter for Amtrak and passenger rail in America. We're taking action this year, and look forward to next year — Amtrak's 40th — to shed that worry once and for all.

Here's why:

Congress has given America's Railroad a strong long-term mission and the White House has presented a vision for passenger rail in America. That support yields funding to make enduring capital investments, including substantial funds from the American Recovery and Reinvestment Act.

There is also tremendous support for new and expanded passenger rail at the state level.

Accordingly, Amtrak is pursuing a growth-oriented mission — we've moved beyond mere survival.

All of us (both inside and outside Amtrak), must reform our thinking and our approach to key issues. We must renew and rebuild our infrastructure and fleet of equipment, be innovative, and pursue opportunities and decisions that make good business sense.

I am proud to inform you that over the past year Amtrak is doing all of that — and more. Amtrak **IS** changing and rising to meet the challenge.

And I can say without hesitation that **THE STATE OF AMERICA'S PASSENGER RAILROAD IS STRONG AND WE ARE OPTIMISTIC.**

Amtrak enters 2010 with enthusiasm and purpose.

RIDERSHIP

We just closed the books on the best first quarter ever for ridership in Amtrak history. We carried nearly 7.2 million passengers in the first quarter — breaking the previous record set in FY 08, which was our best year ever.

In fact, Amtrak is experiencing a long-term trend of rising ridership, from 21.6 million in FY 2002 to 27.2 million in FY 2009, with an all-time record of 28.7 million in FY 2008.

Since FY 2004 through the most current numbers available in third quarter of FY 2009, Amtrak's share of the rail / air market has been on the rise in many locations.

On the Northeast Corridor, the Amtrak share of the rail / air market between New York and Washington increased from 50 percent to 61 percent. During the same period, for the New York-Boston market, the Amtrak share rose from 39 percent to 50 percent. Similarly, our share of the Chicago-St Louis market was 10 percent and increased to 16 percent. During the same period, for the Los Angeles-San Diego market, Amtrak's share went from 73 percent to 97 percent.

AMTRAK GOALS

We are setting aggressive goals to maximize our new opportunities. To make certain Amtrak has a clear set of goals and priorities — and that they support those of Congress and the White House — last October we issued new Strategic Guidance and a detailed Five-Year Financial plan.

Combined, the two documents create a new vision for Amtrak — the first new vision statement for the railroad since 2005.

That vision is built on six fundamental goals to be safer, greener, healthier and to improve financial performance and customer service, and to meet national needs.

SAFER

Amtrak has a good safety record and we intend to be the safest railroad in the world for our passengers, our 19,800 employees and the communities in which we operate.

But we aim to further improve safety and security by making risk-reduction a top priority. This approach to safety complements, and does not replace, traditional rules-based compliance programs.

To that end, we are moving forward with two risk-reduction initiatives.

Underway now is Safe-2-Safer, an approach to safety and security that aims to reduce injuries by promoting a more collaborative environment in which employees at all levels work together to change at-risk behaviors to safe behaviors.

Working with our labor unions, we are helping supervisors become better leaders, and establishing teams of managers and front-line employees to identify ways to make our tracks, shops, stations and trains become even safer and more secure places.

By mid-2010, we intend to begin a Federal Railroad Administration-sponsored program called Close Call Reporting. It allows close-call events that did not result in an accident or injury — but could have — to be anonymously reported by employees so that safety improvements can be made as appropriate.

I realize this change in approach to safety will take time to take hold. Successfully changing habits and mindsets that have been in place for so long will take time, but I am convinced it will produce positive results.

Remember — the challenge is to reform our thinking and our approach to key issues.

In addition, Amtrak is committed to an aggressive schedule to install Positive Train Control (PTC) technology. We have PTC on some, but not all, of our tracks now on the Northeast Corridor and in Michigan.

By our self-imposed deadline of the end of 2012 — three years **BEFORE** a Congressional deadline for the rail industry — we will have installed PTC on the remaining 308 route miles along the Amtrak-owned or maintained Northeast Corridor and on the last 50 route miles of our line in Michigan where the technology is not currently available.

On the security front, Amtrak has in place a range of robust behind-the-scenes and front-line security measures to help safeguard our passengers and employees.

We will continue to expand our K-9 explosive detection teams, harden more stations and continue to extend the reach of our security activities by strengthening cooperative inter-agency operations with local, state, federal and international law enforcement and counterterrorism partners.

Our partnerships include representation on the FBI's Joint Terrorism Task Forces and conducting more than 130 joint VIPR security operations at 38 different stations with the Transportation Security Agency last year.

In addition, we now have 45 qualified K-9 explosive detection teams — nearly triple the number of just a few years ago. They are among the most sophisticated in the country and can detect various explosive substances, including the type used in the Christmas Day airline terrorist plot.

For 2010, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrol deployment, screenings and other activities in stations and on trains.

GREENER

In 2009, through our membership with the Climate Registry and Climate Counts, we joined efforts to voluntarily and publicly report our greenhouse gas emissions and undergo an independent assessment of our programs to reduce our carbon footprint.

Amtrak is a founding member of the Chicago Climate Exchange, and will meet or exceed our commitment to reduce greenhouse gas emissions (CO₂) from diesel fuel by 6 percent by the end 2010.

In addition, Amtrak is taking action to conserve energy, water and other resources at buildings and other facilities.

HEALTHIER

The health of a company relates to its vital signs. We are making enduring investments to better the reliability of our infrastructure and fleet and our ability to grow business with new and existing partners.

During 2009, Amtrak conducted a comprehensive examination of its locomotive and passenger railcar needs. Our fleet plan, with an identified funding mechanism, will be announced in February as part of our annual legislative and grant request to Congress.

It will include the purchase of several hundred single-level and bi-level long-distance passenger railcars and more than a hundred locomotives. This major equipment purchase will replace and expand the fleet and support American rail manufacturing industries, creating jobs in the United States.

Separately, but related, Amtrak expects to make contract awards this spring for 130 single-level long-distance cars and 20 electric locomotives.

How we pay for these plans could involve a range of options.

In fact, Congress is currently considering additional capital funding for Amtrak as part of Stimulus 2, as they call it. The House bill includes \$800 million for rehabilitation and acquisition of new equipment. We will need to see what the Senate version offers, but we see the House bill as a positive statement of support.

Amtrak is making good use of the \$1.3 billion we received from the Obama administration's American Recovery and Reinvestment Act. Of the \$1.3 billion, Amtrak has awarded \$596.5 million in contracts for 113 projects.

With those funds, we will also be rehabilitating and restoring damaged or stored equipment including 60 Amfleet, one Viewliner and 20 Superliner cars, and 15 P-40 diesel-electric locomotives.

For those who question whether the stimulus funds have created jobs, I can tell you that so far we have created over 600 Amtrak jobs and another 200 in vendor organizations with which we have contracted as a result of ARRA-funded projects.

Beyond ARRA, we will spend \$442 million for our annual capital program for several other major projects to repair and replace tracks, bridges and other key infrastructure.

Being a healthier Amtrak helps position itself as THE provider and partner of choice for commuter, intercity passenger rail and high-speed rail service.

We currently have partnerships with 15 states accounting for nearly 50 percent of our average weekday departures and we plan to foster more. Over the next five years, Amtrak is seeking to establish at least eight service expansions as part of existing state partnerships and form at least two new state partnerships.

Last year, we added our 15th partnership when we entered into a contract with Virginia to provide new *Northeast Regional* service between Lynchburg and Washington, D.C. We expect to add another frequency between Richmond and Washington, D.C. this summer.

Also starting in 2010, is an additional *Piedmont* frequency between Raleigh and Charlotte in partnership with North Carolina.

On the commuter front, Amtrak is currently working out final details to provide Train and Engine crews to operate all seven lines of the Los Angeles-based Metrolink commuter rail service starting this summer.

A healthier Amtrak also means we are dedicating significant resources to modernize and replace outdated IT systems and business processes critical to the delivery of service such as for internal business processes and for reservation and ticketing.

IMPROVED FINANCIAL PERFORMANCE

It is those kinds of investments that support an efficient business. Amtrak is America's passenger railroad. As government-supported business, we are fully aware of the responsibilities that come with taxpayer support.

For the current budget year, we received federal operating support of \$563 million, and it is our duty to invest and spend that appropriation, along with the federal stimulus funds, in an efficient and smart manner.

In fact, for FY 2010, we will fund 81 percent of our operating costs from all revenue sources, excluding federal and state funds. And, in FY 2009, Amtrak had a farebox recovery rate of 71 percent — among the highest among all passenger railroads, including commuters and transit, in the U.S.

Amtrak completed a year-end financial audit containing no material weaknesses — the first time that has happened since 2004.

CUSTOMER SERVICE

Amtrak offers riders an experience that is convenient, competitive, and pleasant.

Overall Customer Satisfaction Index scores have been steadily rising from 78 percent in FY 2007 to 82 percent in FY 2009.

On-time performance is one of the major drivers of customer satisfaction. In FY 2009 systemwide OTP was 80 percent, a 9 point increase over the prior year and Acela Express operated on time 87 percent of the time.

In March, we intend to make WiFi available initially free of charge to every passenger on Acela and by November we will finish upgrading the interiors.

We remain focused on our Route Performance Improvement process to identify ways to enhance service on specific routes. One of the most recent results of that effort is restoring sleeper cars and dining cars to the *Lake Shore Limited*.

In 2010, Amtrak will also undertake an in-depth evaluation of the poorest performing long-distance routes to identify and implement changes where possible to improve key measures such as customer service, ridership, and financial performance. The five routes being analyzed are the *Sunset Limited*, *Cardinal*, *Texas Eagle*, *Capitol Limited*, and *California Zephyr*.

Three months ago, we launched our newest generation of Amtrak.com, which among other things makes booking tickets easier.

We also partnered with Google Transit to include Amtrak routes as part of its trip-planning tool that provides travelers with public transportation connections.

MEETING NATIONAL NEEDS

Amtrak was created to provide an essential national service and must support the government in moments of national need. As Amtrak grows, so does its capacity to meet those needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

We also have a five-year contract with FEMA to use Amtrak trains and crews to help evacuate New Orleans during Hurricane season and we will continue to review other potential opportunities to assist when natural disasters occur.

INTERCITY AND HIGH-SPEED RAIL

Finally, as many of you are aware, the big news expected in the coming days or weeks will be the U.S. DOT and FRA's announcement about which states and what projects will get a piece of the \$8 billion in grants available for intercity and high-speed rail development and expansion.

Leveraging our experience as the nation's intercity passenger rail service provider and its only operator of high-speed trains, we partnered with 25 states to support more than 100 projects as part of the first round of grants.

It seems likely that a significant number of the grant awards will involve improvements to routes over which Amtrak operates. That is obviously good for Amtrak, but it is also good for America, our passengers, the communities we serve, and our state partners.

CLOSING

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth. In addition, the opportunities that are being made available to us thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others, both domestic and foreign-owned to enter the market.

The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

As I told you when I began this speech, Amtrak **IS** changing and rising to meet the challenge, and I look forward to the next couple very exciting years at Amtrak.

The days of wondering if Amtrak is going to survive another year and uncertainty are behind us. This year and the years ahead are, and will be, focused on growth.

They will be years of strong and optimistic leadership, filled with achievements that will demonstrate a safer, greener, healthier, improved financial and customer focused railroad that lives up to its role in meeting America's national passenger rail needs.

Thank you.

###

State of the Railroad
Engineering, Marketing (G Raed), Mech

- Amtrak is in a state of modernization, renewal and growth. We enter 2010 with optimism, enthusiasm and purpose.
- We're in the midst of a transformational chapter for Amtrak and passenger rail, and ours is a growth-oriented mission to maximize unprecedented federal and state support for more passenger rail service.
- As high-speed and conventional rail service expands, Amtrak is working with states to lead the way in creating and preserving American jobs needed to develop, build, maintain, and operate the system.
- Our goals are all aimed at better positioning Amtrak to be the provider of choice. We are making— and will continue to make — significant and enduring investments to better position ourselves not simply as a provider, but as the provider of choice.
- Amtrak's responsibilities and opportunities increased significantly last year due to two laws passed by Congress — the Passenger Rail Investment and Improvement Act (PRIIA) and the American Recovery and Reinvestment Act (ARRA).
- PRIIA gives states more control over the development and expansion of passenger rail and sets objectives for Amtrak to serve as the nation's intercity passenger rail provider.
- PRIIA assigns many roles to Amtrak including being the operator of the national intercity passenger rail network, operator and steward of the Northeast Corridor, operator of high-speed rail, and partner of choice for intercity passenger rail development.
- ARRA provides Amtrak economic stimulus funds with which to make and advance significant and enduring investments, while providing states funds to expand service and develop high-speed passenger rail corridors.
- Amtrak has met all PRIIA deadlines for things such as route studies, financial reporting, and assisting states with applications for intercity and high-speed rail grant funding.
- The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition. We know that the opportunities that are being made available thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. Amtrak is America's railroad, the

nation's intercity passenger rail service provider and its only high-speed rail operator. During FY 2009, Amtrak carried 27.2 million passengers—the second highest total in company history.

- While ridership in FY 2009 was down from the all-time record of 28.7 million in FY 2008, it was up 5 percent over FY 2007—continuing a long-term trend of rising ridership since FY 2002 when 21.6 million passengers rode Amtrak.
- During the 2009 Thanksgiving Holiday, Amtrak carried nearly 686,000 passengers setting a record high for ridership for the holiday travel week.
- Amtrak has been experiencing record and growing ridership, increasing service, and aggressively moving forward to capture the coming high-speed rail market.
- **Need to confirm on 1/8 or 1/11:** We just closed the books on the best quarter we've ever had in ridership. Q 1 is up 1 percent over both FY 09 and FY 08, our best year on record.

Safer

Recognizing the value of every employee, and understanding that each employee makes his or her own contribution to the company's well-being and success, Amtrak is striving to foster a working environment that calls for safety and integrity, and encourages qualities such as teamwork, innovation and customer focus.

- Amtrak initiated an aggressive new risk-reduction safety program to complement traditional rules-based compliance programs. While Amtrak's safety record is good, Safe-2-Safer strengthens the emphasis on safety within the corporate culture by promoting a more collaborative working environment for the more than 19,000 employees and ensures a higher reliability of safe behaviors at all levels of the railroad. We aim to make risk-reduction our priority and create metrics that measure how well we change at-risk behaviors into safe ones rather than simply counting how many injuries we have.
- Amtrak entered into discussions to participate in an FRA-sponsored risk-reduction safety program called Close Call Reporting. It allows close-call events that did not result in an accident or injury to be reported without fear of disciplinary action so that safety improvement can be made as appropriate.
- Amtrak will continue to rollout and implement the Safe-2-Safer risk-reduction program across the nation and looks to begin the Close Call Reporting program by mid-year.

Comment [MS1]: Accurate number? Waiting for info from MDuncan

- Amtrak committed to an aggressive schedule to install Positive Train Control technology to control train movements and prevent collisions on all Amtrak-owned tracks by the end of 2012—three years before a Congressional deadline.
- This year, Amtrak will continue with design, procurement and installation of Positive Train Control on Amtrak-owned or maintained track along the NEC and on the Michigan Line, in the sections of track where that technology is currently not available. By our self-imposed deadline of December 2012, we will have completed the remaining 308 route miles along the Amtrak-owned or maintained Northeast Corridor and last 50 route miles in Michigan.
- Amtrak reorganized and consolidated its Security activities in the new Amtrak Police and Security Department. The move will enhance both security and regular policing activities under one command.
- Amtrak participated with the Department of Homeland Security Transportation Security Administration on numerous Visual Intermodal Prevention and Response Team (VIPR) operations at Amtrak served stations and expanded its baggage screening program and K-9 explosives detection teams.
- Amtrak participated in Operation ALERTS, a security and counterterrorism exercise involving over 100 federal, state and local law enforcement agencies covering approximately 150 rail stations along the NEC from VT to VA.
- The recent attempt at terrorism aboard Northwest Airlines need not remind us of our the fact that there are individuals out there testing security vulnerabilities.
- Like most rail systems worldwide, Amtrak shares facilities with commuter rail operations and city transit systems handling millions of daily passengers at hundreds of stations. It is an open system with connectivity and a free flow of large numbers of people between modes.
- Given this environment, Amtrak's Police and Security has in place a range of behind-the-scenes and front-line security measures aimed at improving passenger rail security, many of which are conducted on an unpredictable or random basis. Passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrols, baggage screenings and other activities in stations and on trains.
- Amtrak's is a collaborative security strategy. Amtrak extends the reach of its police, security and counterterrorism activities and intelligence through its network of partnerships with federal, state and local law enforcement and counterterrorism entities across the country and around the globe.
- As examples, Amtrak is represented on the Federal Bureau of Investigation's Joint Terrorism Task Force, and Northeast Corridor Coalition -- a consortium of

Comment [MS2]: How many VIPR exercises took place last year, expanding this year by a certain percentage?

Comment [MS3]: Is this still accurate

police and transit agencies. Amtrak also works closely with the TSA and its Visible Intermodal Prevention and Response Program (VIPR) teams.

- Our 45 qualified K-9 explosive detection teams have the capability of detecting explosive and substances, including the type that was used in the Christmas Day terrorist attempt aboard NW Airlines. Our teams are among the best in the country in terms of their sophistication and won top honors at the National Railroad Canine Competition held in Texas several months ago.
- Amtrak will continue to expand its K-9 explosive detection teams, harden more stations and strengthen cooperative inter-agency operations with local, state, and federal law enforcement and counterterrorism partners.

Greener

Over the course of the last decade, economic and social trends have led to an increase in the demand for passenger rail. Airport and highway congestion is growing and worsening, fuel prices are volatile, urban centers are expanding and concerns about environmental sustainability are affecting city planning and have Americans looking for transportation alternatives. Passenger rail has a smaller carbon footprint than its competitors and Amtrak is proving that it can draw riders from both air and auto in places like the Northeast Corridor, the Midwest and California. The New York-DC share in FY 04 was 50 percent, it was 61 percent in FY 09 (through 3rd quarter). NY-Boston was 39 percent in FY 04 and 50 percent in FY 09 through Q3. Chicago –St Louis was 10 percent in FY 04 and 16 percent in FY 09 Q3. LA-San Diego was 73 percent in FY 04 and was 97 percent on FY 09 Q3.

- Amtrak joined The Climate Registry a non-profit organization that sets consistent and transparent standards for businesses and governments to calculate, verify, and publicly report greenhouse gas emissions.
- Amtrak joined Climate Counts, a non-profit organization that provides an independent and verifiable assessment of a company's carbon footprint and its commitment to reduce its impact on the environment.
- As a member of the Chicago Climate Exchange, Amtrak is on track to meet its commitment to reduce greenhouse gas emissions (CO2) from diesel fuel by 6 percent by the end 2010. In fact, because of its energy conservation efforts, we expect to exceed that commitment by the end of this year.
- Amtrak will take action to conserve **energy** at buildings and other facilities and reduce diesel locomotive fuel consumption and reduce greenhouse gas emissions by diesel locomotive operations.

Comment [MS4]: Do we have energy conversation numbers (utilities?)? checking on this via email

- Expand recycling program at facilities, stations and aboard trains and incorporate alternative energy sources such as solar cells and wind turbines where it makes sense to do so.
- Amtrak will continue to explore and support the extension of electrification to additional routes to utilize low-emission energy generation [sources](#).

Comment [MS5]: Can we say from Maine to Miami, or talk about WAS to Richmond?

Healthier

During 2009, Amtrak undertook a comprehensive examination of its locomotive and passenger railcar needs for replacement and expansion of its equipment fleet. The fleet plan will be announced in February 2010 as part of our annual legislative and grant request to Congress. Amtrak issued Requests for Proposals to replace 130 single-level Viewliner cars, 20 single-level cab cars, and 20 electric locomotives.

We will be increasing the fleet size (see below)

Car type	Replacement	New addition to fleet
Diners (25)	20	5
Sleepers (25)	0	25
Baggage (55) Crew baggage (25)	68*	12*

* we are replacing 68 existing baggage cars and are adding crew space on the 25 crew baggage cars which will free-up revenue space on existing sleeper cars.

The above should read: "Amtrak has issued Requests for Proposals for 130 single level long distance cars and 20 electric locomotives. These cars will serve to replace our Heritage diners and baggage cars, while 25 of these cars will be used to supplement our existing Viewliner fleet. The electric locomotives will replace the existing AEM7 DC locomotive fleet."

Per Mechanical – there's no money in GCAP for this, so this must be part of the fleet plan and the loan, but we still need confirmation from DJ or other person and info on the fleet plan.

- Amtrak will issue a comprehensive fleet plan to replace and expand our aging locomotive and passenger railcar equipment to meet current and future needs as part of our annual legislative and grant request to Congress in February 2010.
- Amtrak began construction on numerous major projects being funded, in all or in part, by ARRA funds including:

- Wilmington, Del., station renovation;
- rehabilitation and restoration of damaged/stored 60 Amfleets, 1 Viewliner, 20 Superliners, and 15 P-40 diesel-electric locomotives;
- replacement or repair of NEC bridges in New York and Connecticut; and

Many other ARRA-funded projects were advanced in planning, design, and procurement and will be under construction during 2010. At this point, we've created over 500 Amtrak jobs and another 300 jobs for the with which vendors we're working.

Comment [MS6]: Up-to-date numbers?

- Amtrak is modernizing many of our internal policies, procedures and tools to improve planning, safety, and financial accountability—and external efforts to improve customer satisfaction, partner relationships and strengthen our competitive edge.
- Amtrak is renewing our tracks, bridges, and other infrastructure as well as our locomotive and passenger railcar equipment —
- Amtrak is dedicated to maintaining Amtrak-owned tracks, infrastructure and equipment in a state of good repair to minimize malfunctions and associated train delays and intends to replace equipment that has reached the end of its life span.

Getting reductions in mins of delay FY 09 vs FY 10 from G Genge

- Amtrak will continue construction on a number of major projects begun in 2009 and begin construction on a number of additional major projects in 2010, including:
 - \$100 million project to replace the 102-year old movable bridge over the Niantic River in East Lyme, Conn.; Replacement and repair to additional bridges in Connecticut;
 - Accessibility improvements at over 200 stations across the nation;
 - Track improvements along the NEC and in the Midwest;
- Amtrak will continue to modernize and replace outdated Information Technology systems and business processes critical to the delivery of service such as for internal business processes and for external reservation and ticketing.
- As part of Amtrak's \$442 million annual capital program, several major infrastructure projects will be undertaken including:
 - Replacing 27.9 miles of rail and 57 track switches and resurfacing 550 track miles;
 - Installing more than 112,000 concrete cross ties and nearly 50,000 wooden cross ties;

- Replace and/or repair bridges in Michigan, Maryland, New Jersey, and New York;
 - Make improvements to electric traction systems as such 50 miles of catenary hardware and 22 substations; and
 - Completion of the multi-year Hell Gate catenary improvement project.
- Approximately 47 percent of average weekday departures are state-supported.
- Amtrak entered into a state partnership with the commonwealth of Virginia –the 15th state partnership overall—with new *Northeast Regional* service between Lynchburg and Washington, D.C. that began in October 2009 and an additional frequency between Richmond and Washington, D.C. beginning in 2010.
- During 2010, Amtrak intends to begin a new *Northeast Regional* frequency from Richmond to Washington, D.C. in partnership with Virginia and a new *Piedmont* frequency between Raleigh and Charlotte in partnership with North Carolina.
- Amtrak will begin operating all seven lines of the Los Angeles based Metrolink commuter rail service on July 1, 2010. Amtrak intends to renew existing commuter contracts and seek new commuter business as appropriate.
- Amtrak also seeks to establish eight service expansions (frequency increases and/or route extensions) as part of existing state partnerships, form at least two new state partnerships and increase ridership on state corridors and state financial support as required by federal law.
- A second Amtrak *Cascades* train from Seattle to Vancouver, B.C. began as part of a partnership with the state of Washington that will operate through the Winter Olympics and Paralympics being held in Vancouver, B.C. through the end of March. We are hopeful that the expanded service will continue beyond March.
- Working with state partners, Amtrak began serving new stations including: *Empire Builder* in Leavenworth, Wash.; Amtrak *Cascades* in Stanwood, Wash.; and *Blue Water* and *Wolverine* in New Buffalo, Mich.
- Amtrak is hiring a new generation of employees.

Comment [MS7]: Do we have a number for retirement-eligible employees in FY 2010?

Improved Financial Performance

Amtrak is a government-supported business, and it must not lose sight of the responsibilities that come with taxpayer support. FY 2010 appropriation was \$1.5 billion. The company has a positive responsibility to ensure that federal and state money is spent in an economical and efficient manner that provides the nation with effective intercity

passenger service and protects the investment the nation has made in its railroad. Amtrak must ensure that capital money is invested in those projects that return value and that sustain our infrastructure and that operating funds be spent efficiently and return the maximum obtainable benefit for the lowest cost consistent with the need to attract customers and develop new business.

- Amtrak produced a Five Year Financial Plan that for the first time provides substantially detailed projections for revenue, operating costs, capital programs, and debt service obligations.
- Amtrak developed and is implementing a number of monthly Key Performance Indicators to track progress. Include ridership and CSI as KPIs.
- Amtrak is completing a year-end financial audit containing no material weaknesses—the first time that has happened since 2004.
- During the FY 2010-2014 period, Amtrak will fund 80 percent of its operating need from revenues, a share that will increase as costs shift onto state partners in compliance with federal law. The company will, however, continue to require federal funding for both operating and capital costs.
- Amtrak aims to increase ridership to 31.4 million passengers by FY 2014, representing a 15 percent jump from 27.2 million in FY 2009. In addition, the railroad expects ticket revenue to grow 20 percent by the end of FY 2014, exceeding \$2 billion annually.
- The ridership goal for FY 2010 27.5 million, and the ticket revenue goal (unadjusted before the food and revenue transfer) is \$1.653 billion. **Per G Raed we need to check with finance about how they want us to report that number)**

Comment [SK8]: RSAM, CASM, CRR for FY 10? How do they compare with FY 09?

Comment [SK9]: What is the number for just FY2010? What is the farebox recovery stats we can use? How do they compare with FY 09?

Comment [MS10]: Is this correct?

Customer Service

Amtrak must offer riders an experience that is convenient, competitive, and pleasant. Convenience and competitiveness are products of trip time and reliability, but customer experience is a product of a range of factors such as accessibility, food service, comfort, and service delivery.

- A new and improved Amtrak.com Web site was launched with a number of new features to make it easier for customers to book tickets online and provides enhanced content and functionality.

- Amtrak continued with its Route Performance Improvement process to identify ways to enhance service on specific long-distance routes. It will serve as the foundation for PRIIA required long-distance Performance Improvement Plans.
- Amtrak restored sleeper cars and diner cars to *Lake Shore Limited* service.

Amtrak initiated a program to upgrade the interior of *Acela Express* trainsets to increase passenger comfort and amenities. The Acela interior upgrade program began in August, 2008 and will be completed by November, 2010. The total cost is budgeted at \$34M.

- Amtrak partnered with Google Transit to initially include five Amtrak routes as part of its service to provide travelers with public transportation connections when planning a trip.

Comment [SK11]: How many more routes will be added in FY2010?

Amtrak developed and is implementing a number of monthly Key Performance Indicators to track progress.

Overall Customer Satisfaction Index scores have been rising steadily:

FY07 78%

FY08 80%

FY09 82%

FY10 target 84%

-
- Amtrak will continue our “Mobility First” accessibility program to create barrier-free pathways from streets/parking areas to platforms and trains.
- Amtrak will be offering WiFi Internet access first on *Acela Express* trains in March, as well as major stations on the Northeast Corridor, and subsequently to other services.
- Continue our Route Performance Improvement program which determines best opportunities for improvement on targeted routes.
- Amtrak will hold the first-ever Town Hall meeting where Amtrak fans will be able to directly discuss key issues with the Chairman of the Board and the CEO and President of the railroad.

Comment [SK12]: How many stations are involved in how many states?

Meeting National Needs

Amtrak was created to provide an essential national service and must support the government in moments of national need. As Amtrak grows, so does its capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

Amtrak has a five year contract with FEMA to evacuate New Orleans during Hurricane season. In addition, Amtrak has established a solid working relationship with FEMA and we will continue to review other potential opportunities to assist when natural disasters occur.

The segment regarding a contract with DOD to transport troops should not be added at this time as there is no contract currently in place and only preliminary discussions have taken place.

- Several new members are expected to be appointed, confirmed, and begin serving on the Amtrak board of directors.
- Amtrak will begin working to implement the Congressional mandate to allow firearms in checked baggage including the evaluation of security needs, the development of appropriate policies and procedures, and making physical improvements to baggage cars and stations as needed.

High-Speed Rail

- Under PRIIA, Amtrak's role in state partnerships is that of planner, service provider and expert adviser. With Amtrak's help, the states will strategically plan rail service and the federal government will integrate state plans into a national plan and administer the capital grant program. Amtrak will bring knowledge, expertise, and capacity to these partnerships.
- Every day, nearly half of all 300+ trains operated daily by Amtrak operate at speeds of 100 mph or more for some part of their trip route. Amtrak knows how to do high-speed rail.
- Leveraging our experience as the nation's only operator of high-speed trains, Amtrak assisted and partnered with numerous states as they developed and submitted applications for a piece of the \$8 billion available in federal funding for intercity and high-speed rail projects.
- For Track 1 (Intercity Passenger Rail) and Track 3 (Planning) project applications submitted by states for federal funding, Amtrak entered into 16 Agreements in Principle and 8 Agreements in Principle with Amtrak as Host, plus provided an additional 29 Letters of Support.
- For Track 2 (Intercity/HSR development) project applications submitted by states for federal funding, Amtrak entered into more than 30 Agreements in Principle.

Comment [SK13]: What number do we use?

Comment [SK14]: Are these numbers accurate?

Comment [SK15]: Is this number accurate?

2011

JM 9/1 approved by Bob Costello; TK approval from Lew Wood, Terry S. (other?)

Bear and Wilmington, Del., Mechanical Employees Prepare to Overhaul *Acela Express* Trainsets

About 50 employees from the Bear and Wilmington Mechanical shops are currently undergoing training to prepare for a major overhaul of the 20 *Acela Express* trainsets, which were first put into service in Dec. 2000.

The work is scheduled to begin in late October and run through the next three years. Bear will handle work on the coach cars, while Wilmington will overhaul the electric locomotives or power cars.

The team of employees involved in the project includes about 36 who will be dedicated to the effort full-time and another 15 or so who will fill in as part of a rotating pool.

In addition to overhauling the air brakes, central and auxiliary blocks, blower motors, mechanical doors, air-conditioning and other systems, employees will fix any broken parts or make other repairs as needed based on problems identified through inspections just prior to the work.

The *Acela* trainsets have undergone prior overhauls, although trainsets 2 and 4 have gone through less extensive updates as part of an “age exploration” study to see how the air-brake equipment performs over time. All of the trainsets will go through an extensive overhaul in this round.

Employees are currently participating in a 12-week training course, two weeks of which are with the High-Speed Rail maintenance teams at Ivy City, in Washington, D.C., and Sunnyside Yard, in New York.

“This major overhaul — done in close collaboration with the unions — provides an excellent opportunity for this talented team of employees to learn and apply new skills, while enabling the company to keep the work in-house,” says Terry Schindler, deputy chief mechanical officer who oversees both the Bear and Wilmington facilities.

special employee advisory

April 4, 2011 • Page 1 of 2

Message from Joe Boardman

Dear Co-workers,

I spent part of last week in Nashville Tenn., where our Safe-2-Safer contractor was holding a conference with a broad cross-section of their clients and others interested in best practices for improving safety culture and reducing accidents and injuries. In addition to our own S-2-S coordinators, I met many Amtrak senior and mid-level managers, as well as participants from other companies like Disney, Arch Coal and BNSF among others. Amtrak was also represented by our APD personnel — including some of our K-9 units. In addition, there was very strong union leadership support demonstrated by the significant number of local and general chairmen in attendance. It was a very well-attended event — nearly 3,000 participants — and I was impressed by the energy and interest I witnessed across the board.

Amtrak participated in the Safety Showcase, where each company told their safety story, and talked about the cultural changes that they were engaged in to make safety a way of life in their industry. All of you can be proud of our people, their enthusiasm and their message. They represented us all very well, and I believe that Amtrak is becoming the national leader in safety cultural changes in our industry.

It felt good to be there and to support our employees, as they move us toward a better place with safety.

Safety is, and always will be, our number one goal, but Amtrak is improving in so many ways toward a new vision for itself. I see a much greater focus on our customers — both our passengers and our state and commuter customers — the measure of

that effort is in part our growing ridership.

The Safer, Greener and Healthier Amtrak is appearing and it's shaping our future in a positive way. We are demonstrating leadership on the Northeast Corridor with a vision for faster trains, along with improvements for our critical infrastructure. We are looking for ways to do more recycling, save more fuel, pay down our debts, improve our organizational structure, and reduce our subsidies by raising our revenue and being smarter about costs.

Amtrak is becoming stronger because we are focused on the right things and its noticeable for those who take the time to look. I recently stopped in to a NARP meeting and said something like this: "Isn't it great that we have a fleet plan that can be criticized. After all, it isn't so long ago (before Feb. of 2010) that we did not have a fleet plan to criticize." Not only have we just updated the fleet plan we issued last year, but we've taken action on our plan by purchasing new equipment, with 130 long-distance single-level cars and 70 electric locomotives on order.

I see many successes by the men and women of Amtrak since I came here in late November of 2008, and I am thankful for them. But there is something we all must keep in mind as we work to complete things. I once read someplace that "life was an unfinished-ness," which I took to mean that we should not get discouraged by it, but just keep doing what needs to be done. Amtrak is like that. There will always be things that need to be done, or redone or changed; it will be "unfinished" but each day it is better, and will continue to be for the future. The thing to remember about working toward a vision is that it's bigger than us and what we do day-in and day-out. It's about planning and

Message from Joe Boardman

Dear Co-workers,

I spent part of last week in Nashville Tenn., where our Safe-2-Safer contractor was holding a conference with a broad cross-section of their clients and others interested in best practices for improving safety culture and reducing accidents and injuries. In addition to our own S-2-S coordinators, I met many Amtrak senior and mid-level managers, as well as participants from other companies like Disney, Arch Coal and BNSF among others. Amtrak was also represented by our APD personnel — including some of our K-9 units. In addition, there was very strong union leadership support demonstrated by the significant number of local and general chairmen in attendance. It was a very well-attended event — nearly 3,000 participants — and I was impressed by the energy and interest I witnessed across the board.

Amtrak participated in the Safety Showcase, where each company told their safety story, and talked about the cultural changes that they were engaged in to make safety a way of life in their industry. All of you can be proud of our people, their enthusiasm and their message. They represented us all very well, and I believe that Amtrak is becoming the national leader in safety cultural changes in our industry.

It felt good to be there and to support our employees, as they move us toward a better place with safety.

Safety is, and always will be, our number one goal, but Amtrak is improving in so many ways toward a new vision for itself. I see a much greater focus on our customers — both our passengers and our state and commuter customers — the measure of

that effort is in part our growing ridership.

The Safer, Greener and Healthier Amtrak is appearing and it's shaping our future in a positive way. We are demonstrating leadership on the Northeast Corridor with a vision for faster trains, along with improvements for our critical infrastructure. We are looking for ways to do more recycling, save more fuel, pay down our debts, improve our organizational structure, and reduce our subsidies by raising our revenue and being smarter about costs.

Amtrak is becoming stronger because we are focused on the right things and its noticeable for those who take the time to look. I recently stopped in to a NARP meeting and said something like this: "Isn't it great that we have a fleet plan that can be criticized. After all, it isn't so long ago (before Feb. of 2010) that we did not have a fleet plan to criticize." Not only have we just updated the fleet plan we issued last year, but we've taken action on our plan by purchasing new equipment, with 130 long-distance single-level cars and 70 electric locomotives on order.

I see many successes by the men and women of Amtrak since I came here in late November of 2008, and I am thankful for them. But there is something we all must keep in mind as we work to complete things. I once read someplace that "life was an unfinished-ness," which I took to mean that we should not get discouraged by it, but just keep doing what needs to be done. Amtrak is like that. There will always be things that need to be done, or redone or changed; it will be "unfinished" but each day it is better, and will continue to be for the future. The thing to remember about working toward a vision is that it's bigger than us and what we do day-in and day-out. It's about planning and

Amtrak to Continue Operations in the Event of a Government Shutdown

The current Continuing Resolution (CR, a temporary funding mechanism until a permanent budget for the fiscal year is approved by Congress) under which Amtrak is operating is slated to end at midnight on Friday, April 8. If the President and Congress are unable to reach an agreement on a budget for the current fiscal year, a government shutdown will occur.

In the event of a government shutdown, Amtrak will continue operations as normal. While the company relies on the government for some funding, Amtrak also uses revenue from ticket sales and other sources to fund operations. If a short-term government shutdown occurs, Amtrak has the resources available to continue service.

If a government shutdown occurs, we do not expect that it will last very long. Please be assured that we will provide regular updates to you about this issue via Special Employee Advisories and/or Amtrak This Week.

Reservation and Ticketing Outage Planned for Sunday, April 17

This Sunday morning, Amtrak's core reservation systems (Railres/STARS, Internet Booking, Content Management System (CMS), Quik-Trak, Arrow and Aries) will be out of service while they are being moved from the legacy Data Center in Manassas, Va., to a new Data Center in Southbury, Conn.

This relocation represents a significant coordination of activities and is expected to take approximately seven hours to complete. Specifically, from 3:00 a.m. through 10:00 a.m. (EDT), Amtrak reservation and ticketing systems will not be available. Consequently, Amtrak will have very limited ability to issue tickets, provide train status information and create or modify reservations. Amtrak will not be able to accept credit card payments via the Internet, by telephone, or travel agency outlets, and will have only limited ability at station ticket counters. In addition, Quik-Trak kiosks will be unavailable.

To minimize the impact on travelers, Amtrak is asking passengers to purchase and/or pick up tickets before Sunday, April 17. Passengers are being notified of this outage via Amtrak's Automated Customer Notification System, a website message on Amtrak.com, an update on Amtrak's Facebook page, station notices, and a message that passengers will hear when calling 1-800-USA-RAIL.

Ticket agents, conductors, call center agents and other employees have been provided procedures to follow in

preparation for and during this outage. These instructions include information on powering down computers, printing manifests, charging fares, ticketing, applying penalties and fees, and operation of Quik-Trak kiosks. Complete details on employee procedures are available in the Daily Advisory section of the Amtrak intranet, under "Library."

Additionally, a conference line will be available for from 6:00 a.m. through noon on Sunday to provide contact center and station employees assistance and updates on the outage. The conference number is 866-209-1307, access code 9846358.

Once the move is complete, the new modern data center will provide a higher level of availability and reliability than the Manassas facilities have provided.

Message from Joe Boardman

Dear Co-workers,

Congress has approved a federal budget for the current fiscal year, including \$1.484 billion funding for Amtrak. Amtrak's federal support for this year provides \$562 million for operating, \$277 million for debt service, and \$645 million for capital.

This has been a long and difficult process. I am encouraged that we fared better than the House of Representatives proposal (that would have cut \$152 million from last year's funding level of \$1.565 billion), and while we still fall \$81 million short of last year's amount, it could have been much more painful.

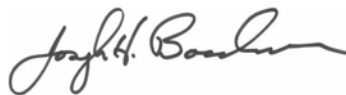

So what does the \$81 million funding reduction mean for us? We are currently benefiting from strong ticket revenue growth and more careful spending decisions made in the first half of the year. We can absorb the reduction if we continue to generate strong revenue and to make prudent decisions about expenses. We must scrutinize all spending items, to include travel and other discretionary costs. Additionally, any requests to hire for non-safety-essential positions — both agreement-covered and management — that are vacated through attrition will be carefully evaluated. We will also be closely monitoring the activities, progress, and benefits of all projects and adjust our contracting needs accordingly.

We are living in a tough budget climate, and I am thankful for the support we have earned with friends — new and old — on Capitol Hill.

But it's not just thanks to the work some of us do by educating members of Congress about why Amtrak is a critical element of our nation's transportation infrastructure. It also has a lot to do with the work you do, interacting with the public and behind the scenes, that helps build that support. Keep that in mind, because we're already talking about next year's budget, and I have a feeling it's going to be even more challenging.

Thank you for all you do.

Sincerely,

Joe Boardman
President and CEO

National Prescription Drug Take-Back Day Saturday, April 30

Amtrak encourages employees to support the Drug Enforcement Administration's second National Prescription Drug Take-Back Day on Saturday, April 30.

On this day, government, community, public health and law enforcement partners will work together to collect expired, unused and unwanted prescription drugs. To locate local community prescription drug collection sites, visit www.GetSmartAboutDrugs.com and click the "Got Drugs?" icon, or call 1-800-882-9539. The service is free and anonymous.

As a reminder, employees taking prescription medications that have the potential to interfere with the safe performance of their job duties must complete form NRPC 3133 "Authorization to Work with Medications," and submit it to Health Services Medical.

For more information, call 215-349-2389 between 8:00 a.m. and 6:00 p.m. (ET) or leave a message on Health Services Drug and Alcohol Program's confidential Employee Hotline at 202-906-2255. Information can also be found on the intranet under "Employees" → "Human Resources - Health Services" → "Over-The-Counter and Prescription Drugs."

This Special Advisory was issued because information on the Prescription Drug Take-Back Day was inadvertently omitted from Monday's edition of Amtrak This Week.

Appointments Made to Realign Strategic Functions in Transportation Department

Operating department veterans Robin McDonough and Lois Cunning have been selected for two senior-level Transportation department appointments that are designed to better support the company's strategic initiatives by aligning functions, streamlining operations and strengthening relationships with partners and stakeholders. Both functions became effective April 15, and report directly to Vice President of Transportation Richard Phelps.

Robin McDonough has been selected to manage all major business improvements, technology enhancements and strategic planning and analysis. As chief, Business Operations and Technology, she will also oversee special train/private car moves and fuel management. She will put increased attention on planning and analysis, including the centralized review of all service changes and requests for new positions. She will also oversee crew management and train scheduling upon the retirement of Chief, System Operations Jon Tainow in June.

As chief Business Management and Customer Service, Lois Cunning will direct the development and implementation of strategic customer service initiatives and the implementation of initiatives, such as EIM and SAM. Lois will also advance the company's goal of improved connectivity and mobility by aligning the connecting services, like Thruway Bus service. Adding to her recent assumption of responsibility for customer service delivery, she will oversee the 24-hour customer service

desk at CNOC. Lois will continue to direct the financial and organizational management of the department. She will also be responsible for the revenue remittance function, joining together the on-board service, conductor and station audit functions.

Lois and Robin will work very closely together to gain efficiencies and implement strategies for the day-to-day and long-term operation of the department, including tending to the needs of strategic partners.

The appointments encompass two of a three-person management team at CNOC that will be in effect starting in June and reporting to the Vice President of Transportation.

Robin and Lois join Senior Director of System Operations Mike Frazier at CNOC, whose responsibilities center on train operations, service disruptions (and host railroad field coordination), space and equipment control, emergency preparedness and FEMA evacuation trains — making safety and customer service a focal point of all of those functions. Mike will begin reporting directly to Richard Phelps upon the retirement of Jon Tainow.

Human Capital Management Chief Selected

President and CEO Joe Boardman announced today that Barry Melnkovic, a human resources professional with more than 25 years of experience, will join Amtrak as Chief Human Capital Officer on Aug. 15.

Mr. Melnkovic will be responsible for oversight of all human resources functions, diversity initiatives and labor relations. He will report directly to the President and CEO.

“Barry’s experience will advance and enrich an approach to HR that is more in line with our evolving culture,” said Boardman. “He is a leader who has a record of successfully implementing innovative human capital strategies.”

His areas of expertise include labor relations, operational strategic planning, recruitment, organizational development/training, leadership coaching, performance management and workforce development. He is also well-versed in Lean/Six Sigma process improvement methodology.

Mr. Melnkovic was most recently vice president of Talent Management and Business Development at Alistar Consulting, Inc., a global executive search and consulting company. Prior to that, he served as vice president in Human Resources at Owens Corning, Holland America Line, Motor Coach Industries and Lilly Industries.

The change in title and nomenclature from human resources to human capital management represents a change in the scope of responsibilities. Human capital management puts more emphasis on a comprehensive approach to managing the workforce, recognizing its critical role in the development of an organization.

A Message from Joe Boardman

Dear Co-workers,

I regret to inform you that another company has been chosen as the highest-ranked bidder to operate, and maintain track and equipment for, the Caltrain commuter rail service between San Jose and San Francisco.

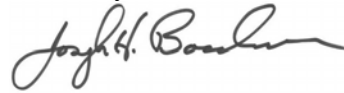

Amtrak has provided train crews, and Engineering and Mechanical employees for this service since 1992. Since then, our employees have contributed to major projects that have brought about transformational changes, including significantly expanding track and signal capacity, and service expansions. I thank all of the employees dedicated to Caltrain service for helping the Peninsula Corridor Joint Powers Board (JPB) achieve its goals and for serving the people of that region so well for so many years.

We will be preparing for the transition of the business to another company, which is projected to formally occur in early 2012. At this point, I don't have much more to share with you about the process, but we will learn more as we work out the details with the JPB. In the meantime, I know that our Caltrain-assigned employees will continue to provide the same professional, safe and reliable service they have for years.

We are naturally disappointed. We have enjoyed our relationship with the JPB and the many people in the area who rely on the service.

While there will be an opportunity for us to learn from this experience, we did put forward a strong proposal and I appreciate all the hard work many people put into it.

Sincerely,

Joe Boardman
President and Chief Executive Officer

A Message from Joe Boardman

Dear Co-workers,

As a result of the 5.9 earthquake that originated in Virginia this afternoon, we are in the process of inspecting our infrastructure, stations and facilities in the areas affected by the tremors. At this time, there are no injuries reported as a result of the earthquake.

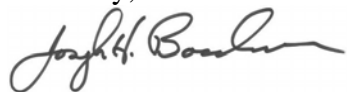

We are currently operating at reduced speeds between Washington and Baltimore and resuming normal speeds north of Baltimore. An operating plan — which will evolve as the situation unfolds — is in place.

The safety of our employees and passengers is of the utmost importance, and we are monitoring news reports for aftershocks.

Amtrak's Employee Assistance Program is available to employees who seek assistance in times of need. Employees on the East Coast can call (202) 906-3447 and (904) 891-9014 or (800) 327-6448 after business hours.

If you're in the area affected, please be mindful of aftershocks, and watch out for one another.

Sincerely,

Joe Boardman

Operating Plan for Hurricane Irene

Amtrak has implemented an operating plan in anticipation of Hurricane Irene's landfall along the East Coast.

At this point, many trains operating south of Washington, D.C., have been cancelled from Friday through Sunday, and more cancellations are possible. Employees from the operating departments are preparing for the hurricane — Mechanical is increasing its technical staff in strategic locations, including stations and other facilities and on trains to protect the fleet; Engineering is bolstering the infrastructure; and Transportation is managing manpower and protecting stations.

Employees in the areas bracing for the hurricane should visit www.ready.gov and www.fema.gov for preparedness tips. These tips include:

- Have a to-go bag ready that includes non-perishable food, water, a battery-powered radio, flashlights, etc.
- Know work and home evacuation plans.
- Be informed about the different hazards associated with a hurricane.

These sites are excellent resource to help people prepare and respond to emergency situations such as hurricanes and earthquakes.

At this point, many trains operating south of Washington, D.C., have been cancelled from Friday through Sunday, and more cancellations are possible. Employees from the operating departments are preparing for the hurricane — Mechanical is increasing its technical staff in strategic locations, including stations and other facilities and on trains to protect the fleet; Engineering is bolstering the infrastructure; and Transportation is managing manpower and protecting stations.

Employees in the areas bracing for the hurricane should visit www.ready.gov and www.fema.gov for preparedness tips. These tips include:

- Have a to-go bag ready that includes non-perishable food, water, a battery-powered radio, flashlights, etc.
- Know work and home evacuation plans.
- Be informed about the different hazards associated with a hurricane.

These sites are excellent resource to help people prepare and respond to emergency situations such as hurricanes and earthquakes.

Contingency Plan in Place in Case of Work Stoppage on Freight Territory

An impasse in negotiations between 30 freight railroads and unions may result in either party seeking self-help — a lockout or a strike — starting 12:01 a.m. on Tuesday, Dec. 6 that would significantly affect Amtrak operations outside of the Northeast Corridor.

This dispute does not involve Amtrak; it is between the freight railroads and unions that represent their workforce.

Should a work stoppage occur starting at 12:01 a.m. on Dec. 6, it would disrupt all Amtrak operations, except the Northeast Corridor (Washington – Boston), the Keystone Corridor (New York – Harrisburg), the Springfield Line (New Haven – Springfield), *Downeaster* (Boston – Portland), *Vermont*, and Caltrain commuter service (San Francisco – San Jose only).

Accordingly, Amtrak's operating departments, in collaboration with other departments, has developed a contingency plan in the event of a work stoppage. Depending on the date and the route, there will be cancellations and trains terminated at major stations with no alternate transportation. The Contact Centers may begin callbacks to passengers traveling on trains that would be affected as soon as tomorrow.

As it stands now, if a strike or lockout occurs most Amtrak

agreement-covered employees should report for work as scheduled, except for many Transportation department employees outside of the Northeast Corridor. Decisions about work schedules will vary by location and as the situation unfolds; employees should check with crew management and/or their supervisor about reporting for work, starting Dec. 4. (?)

The safety and security of Amtrak employees and passengers comes first. Amtrak Police Department and other personnel will be on hand at locations where Amtrak shares facilities with freight railroads to ensure that employees can report to work safely.

This is a dynamic and rapidly changing set of circumstances. Amtrak will continue to closely monitor the situation and hopes that the parties will reach resolution before negatively affecting passenger service. More information will be provided as we learn more.

Message From Joe Boardman

Dear Co-workers,

I know that there is a feeling of uncertainty in the air for some of you, and that many of you have questions. I don't have all the answers that many of you are seeking, but I want to tell you where the company is going — knowing what the plan is will at least help reduce some concerns that I have heard expressed.

As you know, our board of directors approved a Strategic Plan in October that sets a new course for our company. I recently asked you to read and become familiar with the Strategic Plan — I will ask you again to do so now — because it is in large part the basis upon which we are bringing change to Amtrak. As we follow it, our company will become stronger, more customer-focused, and more bottom-line business focused. Amtrak can no longer hunker down in survival mode, and we do not need to. We are a critical asset to this nation; we must serve our nation and our customers well.

Before I get into the changes that I'm seeking, I want you to know that there are no planned or expected service reductions anywhere. Similarly, there are no planned layoffs for agreement-covered employees, other than the normal seasonal adjustments that we go through each year. Nothing different there.

As you know, I am seeking to align how we do business with our Strategic Plan. As I've communicated before, this realignment of the organization will result in a reduction in the number of non-agreement employees across all departments. We are not going to reduce any management forces during the coming holidays, other than those who have elected and have been approved for the recent Voluntary Separation Incentive Plan. A little more than 150 non-agreement-covered people have chosen to leave the company via the VSIP, several of them from the senior ranks of management. On behalf of the company, I am grateful for the contributions that they have made through the years. Many of those among the group were close to making a retirement decision, and this program provided the incentive they needed to make a positive affirmation that it was time. I saw many struggle with that choice, as so many have done in the past when it was time to enter into retirement.

Also, remember that when we released the Strategic Plan, I told you it was developed with significant employee input and that it is a living document — it's not set in stone. A grand plan rolled out all at once does not allow for the creative ideas of those that are out there doing the work, or who have been asking questions for years and have nothing but frustrations left. So that's part of why we don't have all the answers that people are seeking yet.

So far, we have formally rolled out only one part of the Strategic Plan from a Business Line point of view — the Northeast Corridor Infrastructure and Investment Development Business Line managed by Stephen Gardner. Stephen Gardner and team he has assembled is hard at work to make our vision for very

high-speed rail a reality and while doing so improving the infrastructure and its capacity in an incremental way. We must increase current *Acela* capacity, commuter access to NYC and advance the state of good repair of our entire NEC infrastructure with a collaborative cross-functional team of Mechanical, Engineering and Transportation effort that is goal-oriented and customer-focused. Stephen's success will be our success, and he must not be alone in the effort.

As we look at Operations outside of the Northeast Corridor, we need to determine how we minimize costs that are not directly connected with the actual operation of safe, customer-focused and reliable service. Our operations outside of the NEC do not cover their basic operating costs, so the questions we need to ask are how can we do a better job to minimize costs, what can be done differently so that cost is lower without hurting the safety, customer service or reliability? Even more importantly, why are we still doing things in a way that does not take advantage of all the improvements available today? What should we stop doing?

We don't have all those answers, and as I said earlier, no one grand plan is going to give those answers to us. But I do have some answers. We cannot expect a reliable, on-time, customer-focused railroad to operate if there is not dedicated accountability for that. So we will establish a structure that includes a senior-level person who will be held accountable for both cost and revenue, while meeting the standards and the budgets that are set by the Chief Engineer, Chief Mechanical Officer and Chief Transportation Officer. Each of them will report to the VP of Operations. Accordingly, I have asked the VP of Operations to submit his plan for aligning under this structure in early February, and I expect to have given him enough input along the way that it will begin to be implemented by mid to late summer. I expect it to provide fewer levels of management from the top to the bottom, and that will cause an impact to the number of non-agreement-covered positions.

Northeast Corridor Operations is another one of the Business Lines in the Strategic Plan. It will operate differently than the off-corridor structure. The details on that will not come until after the off-corridor structure is set, although once that is known it will help define the boundaries of the Northeast Corridor. So this is an area that will need to wait a while for answers.

There will be one centrally managed Legislative, Government, Policy and Public Affairs function, with a field presence that will keep major contact with our state partners and determines what, if any, planning needs to be done for a customer or state partner. This function has been split up among too many departments, with a lack of focus and accountability. Some of that change has begun with the dissolution of the Policy and Development department. We expect 10 to 15 positions will be eliminated with that change.

In addition, there will be three planning organizations in the company, and they will be relatively small. Facility Planning, which will be within Real Estate under the Chief Financial Officer, will become much more active in proper planning for

special employee advisory

December 6, 2011 • Page 3 of 4

our real estate assets including our stations. Operations Planning will be placed under the VP of Operations. Strategic Planning, which will be in the President and CEO's office, and will monitor the Strategic Plan, make adjustments to the plan to keep it current, update the plan or help define course corrections early by paying attention to economic and other business trends to keep Amtrak on top of its game.

The Marketing and Product Development department will be less marketing and more sales. Social media will grow along with the use of other more up-to-date methods of improving our service to our customer. Field functions will be part of operations, part of Legislative, Government, Policy and Public Affairs, or will be a targeted sales function with sales goals or will not exist. The distribution function of the commissary will go to Operations but the Menu Development will stay with Marketing. The Call Centers will stay with Marketing, and Marketing will pick up accountability for selling our management services to commuter operations, as well as evaluating and responding to the solicitations for commuter contracts.

There are other changes that will occur as we respond to the requirements of this new direction. It's often said that change is the only constant that we deal with. We see it in our families and we see it in the world around us.

Amtrak costs continue to climb with additional direct salaries and wages, and while some revenue from ridership is up, other revenue like federal operating assistance, is down and that is part of the reason we must make cuts and adjustments to improve our bottom line. But frankly, that is not the primary reason. We must operate a more competitive company and it must reflect the realities of the competitive environment today. We have global competitors coming into our backyard and convincing members of Congress, state and commuter officials and others that they can do a better job than Amtrak. We also are in competition for federal assistance across transportation modes — airlines through the Federal Aviation Administration; highways and the intercity buses through the Federal Highway Administration; transit, commuter rail and buses through the Federal Transit Administration. We also have to compete with the funding for U.S. DOT safety programs, which comes out of the same appropriation funding.

We are making these changes for a stronger future, and yet I know when it affects you directly that high-minded idea gets lost. That's the tougher part of leading change. I've tried to mitigate some of this with the VSIP, giving us some room and also allowing those who have other opportunities to pursue them without hurting the company or the people. That won't be enough, and the positions that have been vacated won't be filled immediately and others will not be filled at all. When you see them posted and you qualify for them please apply, if your record is good and your skills are the ones that are needed, you will stand in a good position to be competitive.

Stephen's success will be our success, and he must not be alone in the effort.

As we look at Operations outside of the Northeast Corridor, we need to determine how we minimize costs that are not directly connected with the actual operation of safe, customer-focused and reliable service. Our operations outside of the NEC do not cover their basic operating costs, so the questions we need to ask are how can we do a better job to minimize costs, what can be done differently so that cost is lower without hurting the safety, customer service or reliability? Even more importantly, why are we still doing things in a way that does not take advantage of all the improvements available today? What should we stop doing?

We don't have all those answers, and as I said earlier, no one grand plan is going to give those answers to us. But I do have some answers. We cannot expect a reliable, on-time, customer-focused railroad to operate if there is not dedicated accountability for that. So we will establish a structure that includes a senior-level person who will be held accountable for both cost and revenue, while meeting the standards and the budgets that are set by the Chief Engineer, Chief Mechanical Officer and Chief Transportation Officer. Each of them will report to the VP of Operations. Accordingly, I have asked the VP of Operations to submit his plan for aligning under this structure in early February, and I expect to have given him enough input along the way that it will begin to be implemented by mid to late summer. I expect it to provide fewer levels of management from the top to the bottom, and that will cause an impact to the number of non-agreement-covered positions.

Northeast Corridor Operations is another one of the Business Lines in the Strategic Plan. It will operate differently than the off-corridor structure. The details on that will not come until after the off-corridor structure is set, although once that is known it will help define the boundaries of the Northeast Corridor. So this is an area that will need to wait a while for answers.

There will be one centrally managed Legislative, Government, Policy and Public Affairs function, with a field presence that will keep major contact with our state partners and determines what, if any, planning needs to be done for a customer or state partner. This function has been split up among too many departments, with a lack of focus and accountability. Some of that change has begun with the dissolution of the Policy and Development department. We expect 10 to 15 positions will be eliminated with that change.

In addition, there will be three planning organizations in the company, and they will be relatively small. Facility Planning, which will be within Real Estate under the Chief Financial Officer, will become much more active in proper planning for

special employee advisory

December 6, 2011 • Page 3 of 4

our real estate assets including our stations. Operations Planning will be placed under the VP of Operations. Strategic Planning, which will be in the President and CEO's office, and will monitor the Strategic Plan, make adjustments to the plan to keep it current, update the plan or help define course corrections early by paying attention to economic and other business trends to keep Amtrak on top of its game.

The Marketing and Product Development department will be less marketing and more sales. Social media will grow along with the use of other more up-to-date methods of improving our service to our customer. Field functions will be part of operations, part of Legislative, Government, Policy and Public Affairs, or will be a targeted sales function with sales goals or will not exist. The distribution function of the commissary will go to Operations but the Menu Development will stay with Marketing. The Call Centers will stay with Marketing, and Marketing will pick up accountability for selling our management services to commuter operations, as well as evaluating and responding to the solicitations for commuter contracts.

There are other changes that will occur as we respond to the requirements of this new direction. It's often said that change is the only constant that we deal with. We see it in our families and we see it in the world around us.

Amtrak costs continue to climb with additional direct salaries and wages, and while some revenue from ridership is up, other revenue like federal operating assistance, is down and that is part of the reason we must make cuts and adjustments to improve our bottom line. But frankly, that is not the primary reason. We must operate a more competitive company and it must reflect the realities of the competitive environment today. We have global competitors coming into our backyard and convincing members of Congress, state and commuter officials and others that they can do a better job than Amtrak. We also are in competition for federal assistance across transportation modes — airlines through the Federal Aviation Administration; highways and the intercity buses through the Federal Highway Administration; transit, commuter rail and buses through the Federal Transit Administration. We also have to compete with the funding for U.S. DOT safety programs, which comes out of the same appropriation funding.

We are making these changes for a stronger future, and yet I know when it affects you directly that high-minded idea gets lost. That's the tougher part of leading change. I've tried to mitigate some of this with the VSIP, giving us some room and also allowing those who have other opportunities to pursue them without hurting the company or the people. That won't be enough, and the positions that have been vacated won't be filled immediately and others will not be filled at all. When you see them posted and you qualify for them please apply, if your record is good and your skills are the ones that are needed, you will stand in a good position to be competitive.

Operating Departments Management Changes

As some non-agreement-covered employees begin to leave the company as a result of taking advantage of the Voluntary Separation Incentive Plan (VSIP), Amtrak continues to align the organization with the Strategic Plan, and is taking steps to ensure continuity of operations.

Effective today, Chief Financial Officer DJ Stadtler will take on the role of Acting Vice President of Operations, while Controller Gordon Hutchinson carries out the day-to-day Finance duties of the Chief Financial Officer.

In the near future, Amtrak will be actively recruiting to fill the roles of Chief Transportation Officer, General Manager - West, and Central Division General Superintendent. Following that effort, a Vice President of Operations will also be recruited, following today's departure of Jeff Geary.

Senior-level positions — those held by Vice President of Transportation Richard Phelps, General Manager - West Bill Duggan and General Superintendent Daryl Pesce — vacated as a result of the VSIP are not being immediately filled to enable a competitive job selection process.

"I thank Jeff for his hard work and wish him the best in his future endeavors. In the midst of this transition, I want to assure all Amtrak employees that we are being thoughtful and thorough about the changes we're making in the organization," said President and CEO Joe Boardman. "We have very strong operating departments with talented railroaders. While a handful of specific positions may be temporarily vacant, I have full confidence that our employees will continue to lead and to help deliver

safe and reliable service. Change can be distracting, but I know that you will remain focused on delivering the safe and professional service you deliver every day."

Employees who previously reported to these positions will report directly to DJ Stadtler, as will the Chief Mechanical Officer and the Chief Engineer. In this role, DJ will also be working with managers to develop a structure that is aligned with the Strategic Plan. In the coming days and weeks, DJ will be communicating with employees in the operating departments to provide more information about his role.

Amtrak thanks all of the employees who are leaving the company for their contributions to the company. We wish them well as they start new chapters in their lives.

A Message from Joe Boardman

Dear Co-workers,

I want to clear up some confusion about overtime for agreement-covered employees, in light of a new legal requirement.

There's a rumor circulating that as a result of this new requirement, it's the end of overtime. It is not the end of overtime for agreement-covered employees. Overtime is still something that will be paid, given the nature of some of the work we do. The difference is that we now have restrictions when any one agreement employee goes over \$35,000 in overtime payments.

When our appropriation was approved by Congress this year, the legislation included a provision that required new procedures for how the company manages overtime payments to agreement employees, establishing a limit of \$35,000 per employee before special approval would be required.

The limit was put into the legislation after we were asked by Congress to submit a list of our highest-paid functions, many more of which are among agreement-covered ranks, rather than non-agreement employees. The list included 1,283 employees who exceeded \$35,000 in overtime.

I know that it's often our most ambitious and productive employees that are the ones earning overtime. Those dedicated workers answer the call to come in to work or stay late. In some cases, overtime is necessary for us to make sure we get the job done without affecting service. It is unfortunate that the inadvertent consequence of this applies to some of our most hard-working employees trying to do the right thing.

On the other hand, Congress is telling Amtrak to fix situations in which overtime has been excessive. There are situations that on the surface seem out of control, but occur for a variety of reasons including provisions in labor agreements, regional manpower shortages and weather-related events. But we also need to do a better job of managing this part of the business, especially considering our current financial situation and our objective to put more emphasis on our bottom line.

We are currently working to understand exactly what we need to do to manage this requirement, including how we report it to Congress. When we know how we will manage the impact of this we will ensure that union leadership is fully advised and we will address it through your managers and carry it out in a way that it does not negatively impact service delivery.

Please know that I thank you for your work and your willingness to put more time in when business needs or the safety and welfare of the public we serve are at stake. We will get this done in a fair way.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear RedBlock supporters,

The RedBlock dilemma is about confidentiality. It is not hard to understand that the name of someone marking off because they made a mistake should be kept in confidence. Everyone that I have talked to (Union, Management, Regulatory and Oversight Agency) understands that and supports the confidentiality that protects those who have made those occasional mistakes. We all live with both a greater sense of confidence in the safety element of the RedBlock program and the ability to maintain a compassionate program when a mistake is made. That compassion includes peer counselors that are available to help make sure a mistake does not become a habit.

A dilemma is a problem offering at least two solutions or possibilities, of which none are practically acceptable.

So what is the real problem?

It is the Code of Federal Regulations. Specifically its 49 C.F.R. Part 219, Subpart E, "Identification of Troubled Employees." And 49 C.F.R. 240.119(b), "a person who has an active substance abuse disorder may not be certified as a locomotive engineer."

And, it is the requirement that only a "substance abuse professional" (SAP) can make determinations about whether or not a troubled employee has an active substance abuse disorder — in the case of Amtrak that is the EAP program. RedBlock does not evaluate or diagnose an employee with a substance abuse disorder, and does not mandate that an employee obtain counseling or treatment. Instead, RedBlock relies on peers, or lay-volunteers, to intervene with employees and encourage them to

seek assistance. In fact, the lynchpin of the program, and what encourages employees to use the mark-off procedure, is that the process is confidential and does not have any "consequences."

So what is the truth about confidentiality?

When an Substance Abuse Professional, such as our EAP program (but includes any professional referral service) determines that we have a "Troubled Employee" with a substance abuse problem, that employee must follow a treatment program prescribed by an SAP. By law, this process is entirely confidential, unless and until the employee refuses to cooperate with the recommended course of counseling or treatment, at which point, confidentiality may be waived in accordance with applicable regulations. Engineers would not be allowed to perform safety-sensitive operations until they successfully complete the treatment recommendations. Everyone agrees with these requirements, including RedBlock.

Then why is there a problem?

Because those who have been in charge of administering the RedBlock program (Amtrak management employees) have been unable to provide the information that FRA has asked for, and the information that the Amtrak Office of Inspector General has asked for, that would document that RedBlock is following the requirements of the regulations.

That set of circumstances has led to both the FRA and IG questioning the "due diligence" of Amtrak's management in ensuring that the federal regulations on substance abuse in the workplace are being properly managed.

Employee Communications

ecom@amtrak.com

special employee advisory

February 9, 2011 • Page 2 of 2

RedBlock is a union program. Management employees were being paid to operate that program. That put management at the center of the responsibility for the program, without control of the program. Both the FRA and the IG are holding Amtrak management accountable for the operation of the RedBlock program. The IG findings and recommendations are all couched in and start with “The President and CEO must...” — that’s me.

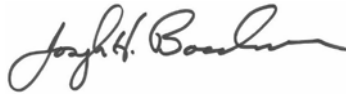

I agree that this is a union-run program. I made a proposal this past December to labor to support that — run it. Amtrak would support the program by paying for three coordinators. Amtrak would make sure that the company meets the requirement of due diligence to prevent drug and alcohol violations under the federal regulations by tasking EAP with oversight of the counseling functions, which it is uniquely qualified to do.

I’ve received several e-mails and some personal comments on the changes, many of them were part of a “grassroots campaign” that just spoke about the confidentiality issue, and the fear that causes among employees. I understand that fear, and I think it has been confused by a lack of understanding about what that means. I have tried to address that in this letter.

It’s time to set this program on the right path, at least the right path as our oversight agencies believe. Fighting the issue of confidentiality for the very few folks that have a substance abuse problem is not the right path. We need to ensure not only safety as our highest calling, but also the tough love it takes to confront any troubled employees that we might have.

Thank you for your service on the Executive Steering Committee, as RedBlock Captains or peer counselors. Help me bring this program to the right path.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

I spent all day yesterday on Capitol Hill educating members of Congress about the need for sufficient funding for Amtrak this fiscal year. We will continue to do so in an effort to support a constructive and informed debate.

There are reports about some of the numbers being discussed, but they are not final and **they're fluctuating**. For that reason, I don't want to get too caught up in the specific numbers we've heard because it's just not productive at this point.

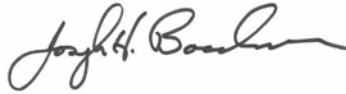

We will have a better sense over the next couple of weeks. We're currently operating according to a Continuing Resolution that is slated to expire on March 4, and we expect the House and Senate to take action on our appropriation over the course of the next couple of weeks. During this time, we expect to see amendments offered in support of, and against, Amtrak funding.

We don't know how we will make out on the other side of this. It is disheartening to consider the very real prospects that we may experience budget cuts, especially at a time of record ridership and demand for more passenger and high-speed rail, much less the need for a national policy that sees rail as a solution to transportation congestion, economic recovery, infrastructure investments, global competition and reliance on foreign oil.

You may see a lot of news articles about us in the coming weeks, and they may not all be positive. I urge you not to be consumed by what's being said, but know that we are facing a tough battle.

Thank you for your support and for what you do every day.

Message from Joe Boardman

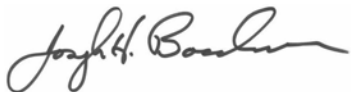

Dear Co-workers,

Effective Feb. 28, 2011, Vice President of Transportation Richard Phelps will relocate from Washington, D.C., to the Consolidated National Operations Center (CNOc) in Wilmington, Del. This change moves the Transportation VP to a field location close to the overall day-to-day operation. It also highlights the importance of the employees at CNOc and the vital role they play in providing safe and customer-focused service on a daily basis.

Also, Lois Cuning, senior director Operations Management, and Robin McDonough, deputy Program Management, who report to the vice president Transportation, will also relocate to CNOc from Corporate Headquarters. Effective immediately, the Customer Service Delivery and Operations Support organization, formerly under Kevin Scott, who recently retired, will be under the direction of the Lois Cuning. Chris Jagodzinski, general manager East, will be moving to Philadelphia, Pa.

As always, thank you for your support as I align resources to meet the many demands upon Amtrak to deliver safe, reliable service to the traveling public.

Employees to See Increase in Pay Due to Tax Cut Starting This Week

Starting with the first paycheck of the year, all employees will see an increase in their pay for 2011 due to recently enacted tax cut legislation that affects Social Security tax rates.

The law reduces the Social Security tax from 6.2 percent to 4.2 percent for 2011 earnings subject to the tax (the first \$106,800 of earnings this year). Since Railroad Retirement Tier 1 taxes are based on Social Security, those taxes will be cut by the same amount. What this means is that employees will see a 2 percent increase in net take-home pay in each paycheck in 2011.

This may be a good time to consider putting that extra 2 percent in your Amtrak 401(k) Retirement Savings Plan. If you are interested in opening an account to save for your retirement, please visit www.MySavingsAtWork.com/amtrak.

Paycheck Glitch Affects Some Agreement-Covered Employees' Deductions

The Jan. 6 paychecks of some agreement-covered employees erroneously do not include deductions for health care benefits or Flexible Spending Accounts. The mistake is the result of a technical glitch on the part of Amtrak's benefits administrator, and does not at all affect the health care coverage chosen by those employees.

This affects agreement-covered employees who participate in Amtrak's health care plan and did not make any changes to their benefits elections during the open enrollment period in November 2011 only.

Amtrak is working with the vendor to correct the error, and the deductions that did not appear in the Jan. 6 paycheck will be included in the Jan. xx paycheck.

We regret the inconvenience this may cause. Employees should rest assured that this error does not affect their medical, dental or vision plan coverage.

If you have questions about your benefits elections, please call (xxx) xxx-xxxx or visit www.xxxxx.com. If you have questions about your paycheck, please call (xxx) xxx-xxxx.

Message from Joe Boardman

Dear Co-workers,

It is being reported in news accounts that a Republican study committee has released its vision for reducing government spending by \$100 billion dollars now, and \$2.5 trillion dollars over the next 10 years. I'm sure many of you are not surprised that Amtrak is listed for being eliminated.

I know that raises anxiety for many, if not all of you. I believe the first thing all of us have to understand is that this is born from the fear that pervades our nation on the heels of what has been tagged as the "Great Recession." There has been a major shift in the House of Representatives, and there is a sense on their part that they must do some big things in order to fulfill what they believe their mandate is. I believe that very little time was used in actual study by this committee, but rather, Amtrak and other programs such as National Public Radio are on the list simply because they have appeared on past lists.

So here is what I'm asking you to do. We are a very unique company, in the sense that we see our nation everyday from coast to coast and border to border. Many of us can see the reasons for the fear that may be in the hearts and heads of those within communities where we live. Help reduce those fears to the extent you are willing and able to do so. Being active in doing so will also help you control your own fears.

We will take action. First, we have already started to educate the new members of Congress — and existing members — on the issues and benefits that Amtrak brings to our nation. You have a Government Affairs staff working for you on the Hill that is

second to none in Washington, D.C. That office is filled with not only those who know how to present our message, but also with people that strongly believe in what we do. Further, your union leadership is already working to educate and inform new members of Congress and old friends of the importance of Amtrak to our nation.

While somewhat ironic, we will celebrate our 40th anniversary in May of this year. That further gives us an opportunity to tell our story, and it's a great story with great people who have supported this company and continue to do so. Join in the telling of our story, and join in the celebration all summer long. We will kick that celebration off on May 7 in conjunction with National Train Day. Become a part of the celebration of what we do. Amtrak will prevail and prosper to celebrate many more anniversaries, because we are critical to this nation.

I will communicate more as the boundaries of this issue are better known. There will be a tense spot in early March as Congress needs to act on a continuing resolution for funding the remainder of our fiscal year ending Sept. 30. Please don't be distracted from what we know we must deliver for our customers and for each other. I wish each of you peace and freedom from fear for yourselves and your families.

Sincerely,

Joe Boardman
President and CEO

There will be a tense spot in early March as Congress needs to act on a continuing resolution for funding the remainder of our fiscal year ending Sept. 30. Please don't be distracted from what we know we must deliver for our customers and for each other. I wish each of you peace and freedom from fear for yourselves and your families.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

During his State of the Union address this week, President Obama made specific reference to the critical role high-speed rail has in our country's infrastructure and future.

Yesterday there was a congressional field hearing in New York City at Grand Central Station held by the new Chairman of the House Transportation and Infrastructure Committee, Rep. John Mica. The subject of the hearing was about building "real" or "true" high-speed rail.

Al Engel, our new vice president for High-Speed Rail, and I joined a roundtable discussion of the issues after the official part of the hearing ended — we were not invited to testify before the committee. The addition of a discussion format in connection to a committee hearing was new for me. I guess it was Chairman Mica's way of trying to get the members of the committee and others engaged in a discussion about high-speed rail.

While it's not my intent to represent Chairman Mica's position, his basic argument — as I understand it — comprises three parts: 1. While he appreciates the efforts that have been made to bring high-speed rail to the Northeast, those efforts do not measure up to a world-class standard based on what is available in Europe, Japan and China. 2. The assets of the Northeast Corridor should be privatized with perhaps multiple operators or franchised with the intent of introducing competition as the way to bring this level of service. 3. The distribution of federal high-speed rail funding is too widely dispersed and insufficient to accomplish the intended purpose of

successfully constructing a world-class system, and further the only region of the United States that has the density to support that success is the Northeast.

You may have seen some of the stories in the media about the hearing, and we'll be seeing more as the national debate about the future of passenger rail continues. I want to share with you our position.

In the context of these points of view — and I leave room for understanding them better as they develop — I believe: 1. Amtrak has proven to be a good steward of the Northeast Corridor since we were given that responsibility in 1976 for 363 miles of the 457 miles between Boston and Washington, D.C. Since 1976, we have electrified the entire route, we have nearly doubled the number of passenger trains per day, north-end speeds have gone up from a maximum of 90 mph to 150 mph, south-end speeds are up from 110 mph to 135 mph, travel time is down, ridership is up and continues to grow, Amtrak's air/rail market share is up and rising, and the number of grade crossings are down nearly 80 percent. Given our challenges, we have made significant strides given the federal investment levels over the years. It is my position that Amtrak should continue as the primary steward of Northeast Corridor assets, in collaboration with states and commuter railroads, and in a collegial way with the Federal Railroad Administration.

2. In listening to other points of view, I think the core of their debate about high-speed rail is ultimately about who owns the property and/or operates it — a public entity like Amtrak or private sector entity. I think that's at the heart of the debate. Its major focus is not "real high-speed rail," it's "real estate." Amtrak was created by Congress precisely because the privately owned

railroads could no longer sustain the vital public service of intercity passenger rail. No other company is prepared to take over the Northeast Corridor. No other entity is equipped to cover the long-term capital and operating costs of the NEC.

3. Places other than the Northeast need trip-time competitive rail service. The demand for it is so great that many states received funding for worthy investments to help meet their regional transportation needs. But more funding is needed to rebuild our passenger rail network, and to improve the ability for the freights to accommodate that growth. It is vitally important for passenger rail and high-speed rail systems to provide the connectivity that is needed to make passenger rail viable in the United States. It is not only about having rail as an option for millions of Americans, there are other reasons of national import — reducing our dependence on foreign oil, sound use of our energy and natural resources, economic recovery and stimulation, and congestion relief are among the others — for advancing passenger rail as a matter of strategic national priority. Putting Amtrak on a list for zero federal funding is both inconsistent with that need, and ill-advised in the face of the issues we face domestically and globally.

As I told you last week, we are working hard to educate new members of Congress about the importance of Amtrak to our nation, and to our nation's future. More and more of the public is demonstrating their knowledge of the importance of rail with our increasing ridership.

We always face uncertainty, and we will hear about cuts all around us; there are just some things we cannot control. But we can keep our faith that the right decisions will be made, and we can work hard for our customers.

Thank you for your support and for what you do every day.

Sincerely,

Joe Boardman

Message From Joe Boardman

Dear Co-workers,

As *Safe-2-Safer* is integrated into our safety culture, the safety and health of our employees remains a key goal. As we have previously communicated, it is important that all injuries be reported so that we have a more complete picture of where there are safety hazards and so that we can take appropriate actions to eliminate exposure to hazards.

An aspect of injury reporting that has received less attention is the need to report certain or suspected workplace injuries/illnesses promptly. Immediately reporting to your supervisor a certain or suspected injury or illness will result in a rapid response to secure the appropriate medical care. Reporting any injury/illness quickly also can reduce the severity of the injury and lead to a more rapid recovery. For these reasons, the immediate reporting of workplace injuries is mandated by Amtrak Policy 3.11.4, Amtrak's Standards of Excellence, and other policies.

Later today, department heads will be receiving a Safety Bulletin that they will be distributing to all of their managers and supervisors to reinforce this very important point.

In addition to assuring appropriate care, prompt reporting helps us to eliminate exposures to hazards. Our goal remains for Amtrak to have an injury/illness free workplace. *Safe-2-Safer* helps us to identify behaviors and risks which may lead to safety and hazards in the workplace. Your prompt reporting of job-related

injuries or illnesses is another component of our overall effort to quickly eliminate safety hazards from the work environment.

Thank you for working safely and supporting a safer work environment by promptly reporting workplace injuries and illnesses.

Sincerely,

Joe Boardman
President and CEO

Message From Joe Boardman

Dear Co-workers,

Last week, the board of directors and I recognized the contributions of Chief Information Officer Ed Trainor, as we offered him our best wishes for his retirement that begins this Friday.

Ed has served Amtrak twice in his career, from 1976 to 1985, and then again when he returned in Dec. 2006. As CIO, Ed presided over a number of major initiatives in Information Technology, including significant investments in streamlining our systems with Strategic Asset Management and the establishment of group information officers to better meet the business requirements of the company. I thank Ed for his perseverance in achieving major technology advances and for his dedicated service over the years.

While we bid Ed farewell this week, we welcome someone many of you already know. Ron Sorozan, group information officer, Operations, Maintenance and Engineering, has been selected to take over as chief information officer. Reporting directly to me, Ron will start in his new role on Monday, June 20.

Since he joined Amtrak about a year ago, Ron has shown the caliber of leadership, skills and technical knowledge that the CIO function requires. Ron has 25 years of experience in IT, including CIO appointments at two companies, and in-depth knowledge of reservation systems. Ron's familiarity with Amtrak's operational and business needs, combined with the customer focus he has shown in his current position, will serve him well in his new function.

Please join me in thanking Ed for his service and welcoming Ron to his new role at Amtrak.

Sincerely,

Joe Boardman

Message From Joe Boardman

Dear Co-workers,

I am very pleased to announce that we've selected Jeff Geary, a seasoned railroad industry professional, to lead our operating departments. Effective June 20, Jeff will join Amtrak as the vice president of Operations, overseeing the Transportation, Engineering and Mechanical departments.

Jeff will report directly to me and will be based in Wilmington, Del. As I've said before and as evidenced by some of the changes I've made to date, the people running the day-to-day operation of the railroad should be based in the field, closer to the employees they supervise. The vice president of Operations function is squarely focused on operations — Jeff will not serve as my deputy or absorb other non-operating duties — and will have direct accountability for keeping the railroad running across the system and across Transportation, Engineering and Mechanical functions. This means that he'll be managing our operations in a more integrated way to stimulate better collaboration, communication and delivery of safe and reliable service for our passengers.

With 32 years in the freight railroad industry, Jeff is a railroad operations manager who has grown through the ranks and proven himself in managerial areas, such as budgeting, strategic planning and performance management. In addition to his managerial and operations expertise, he was selected for this position because he shares my passion in many key areas — safety; a more profitable and on-time operation; strong relationships with unions, states and other stakeholders; customer focus and a culture in which mentoring and coaching come naturally.

Jeff most recently served as vice president and chief operating officer of the Florida East Coast Railroad and Highway Trucking Services. Before that, he served in leadership positions at Rail America, Inc., and Rail Link (short lines with about 40 and 62 railroads, respectively). Prior to that, he worked for CSXT in Pittsburgh, where he made strides in improving operations utilizing Six Sigma principles. He began his career at CONRAIL, where he served for 21 years in positions such as trainmaster, terminal superintendent and director of Operations for one its largest divisions.

Jeff's appointment is the latest step in my aim to create a high-performing organization that is aligned to deliver excellent customer service. We will continue to evolve as we bring together people and a structure that put a premium on collaboration and service quality.

Please welcome Jeff aboard when he starts next Monday, and please give him your support. Thank you for the work you do every day.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

It is with extreme sorrow that I inform you that a semi tractor-trailer truck struck *California Zephyr* Train 5 today at about 11:20 a.m. PDT east of Reno, Nev., resulting in injuries and fatalities, including one of our own.

We are assisting the National Transportation Safety Board, who is leading the investigation into this incident.

Preliminary reports are that there have been fatalities to passengers, one crew member and the operator of the truck. There were a number of passengers and crew members transported to local hospitals for treatment of injuries. The rest of the passengers were transported to local schools and arrangements were made to accommodate them.

We will learn more as the situation evolves. There will be a lot of information that will need confirming, and the NTSB is in charge of the investigation.

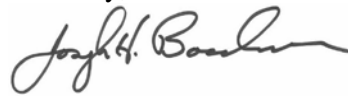

I offer my deepest condolences and my prayers to the friends and families of those who perished. It is particularly difficult to lose a member of our own Amtrak family, and I hope that those of you who knew the crew member, and the employee's family, will find solace in one another.

Employee Assistance Program counselors are offering support and services to our employees, passengers and the families of those involved. The counselors will continue to be on hand in the difficult days and weeks ahead.

I know that there are many employees working hard in the aftermath of this tragedy, and I thank them for their resilience and commitment.

Please keep everyone touched by this tragedy in your thoughts and prayers.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

I write this on my way to Reno, Nev., to talk to employees, following the tragic event on Friday when a truck struck *California Zephyr* Train 5.

This incident resulted in multiple fatalities, including that of Conductor Laurette Lee. Laurette joined Amtrak in 1988, and was a member of the UTU. She came from a family of railroaders, including current and retired Amtrak employees. I didn't have the opportunity to meet Laurette, but I understand that she was considered a mother to many at Amtrak. She's been described as a respected no-nonsense professional, who was also extremely compassionate, taking employees under her wing, serving as a mentor and coach, and willing to share everything she knew with those less experienced. She worked hard, and had hopes and dreams — just like you and me. My thoughts are with her family, her nephew at Amtrak, and those of you who worked with her and called her friend — I know she will be sorely missed.

My deepest sympathies and prayers go out to the others who perished and their loved ones. My thoughts are also with those who are recovering from injuries and the trauma that this has caused them and their families.

The NTSB is leading the investigation. And as the days and weeks pass, we will also learn about the selfless and heroic acts of Amtrak personnel and others. I thank the members of the crew who helped our passengers and each other; particularly those who put our passengers before their own injuries. There were fellow employees on vacation aboard the train, including a conductor who had been trained by

Laurette, and I thank them for their actions.

I also very much appreciate what the members of the GO-team, EAP and others are doing to help in the aftermath of this incident.

As with other tragedies, with the passage of time most of you will return to the work at hand and your routines. But this will always remain with us. Whether you are close to this event or not, we are all touched by it because we are part of the same family, and today many of us are hurting. Thankfully, railroaders are very resilient and we hold each other up.

Please keep everyone touched by this terrible event in your thoughts and prayers.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

I just want to share with you a few thoughts following my visit to Reno, Nev., after a truck struck the *California Zephyr* last Friday.

In Reno, I talked with employees involved in the incident and its aftermath. It's obviously been a difficult time for many of us. It reinforced for me that we work with exceptional people, and that we live in a country where strangers come to the aid of strangers.

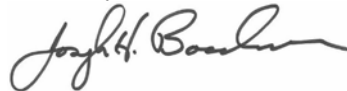

The crew and others took action, putting our passengers first and their own needs second. I offer my deepest gratitude to all of those individuals. Their quick thinking, courage and regard for others is stirring, to say the least. I am grateful to the EAP, GO-team members and other employees who helped provide comfort and support.

I also thank the passengers who may have helped their fellow travelers. I thank the Union Pacific Railroad and its personnel who came to our aid. I also want to express my gratitude to the city of Fallon and its residents, a community that opened its arms to us and our passengers and offered everything it could to assist, without hesitation.

I know that there are stories being shared about specific acts of heroism. There are many, told and untold. There will be a time for us to honor those efforts more widely, but at this point I want to be respectful of those in mourning and recovering, and the ongoing NTSB investigation.

I appreciate what you do every day for Amtrak. Please be safe and look out for one another.

Sincerely,

Joe Boardman

Dear Co-workers,

I just want to give you a brief update on the status of our funding for this year. Congress has just passed a two-week Continuing Resolution, essentially a temporary spending bill, to continue funding Amtrak (and many federal agencies and other entities) at last year's funding levels through March 18. Amtrak had been operating under a CR that would have expired on Friday, March 4.

There has been a lot of talk about a government shutdown, and I've been asked by employees what that means for us. While extending the CR another two weeks gives Congress more time to debate our country's fiscal priorities, talk of shutdown could resume later.

Let me be very clear — in the event of a government shutdown, Amtrak keeps operating. We have a duty to provide service, and we will remain true to that responsibility to the best of our capabilities. While we rely on the government for some of our funding, we also use revenue from ticket sales and other sources to fund operations, so even if the government had a short-term shutdown, we should still have resources to continue service.

I don't know how the debate over Amtrak funding for this year will end. We are working hard to educate members of Congress, and a recent House amendment to cut our funding by about \$450 million was defeated by more votes than we'd expected — so there is recognition of the important role Amtrak plays. But let me and those

whose jobs it is to focus on this battle keep working on this, while you focus on your job and how to deliver the best service you can.

Thank you for your support.

Sincerely,

Joe Boardman
President and CEO

Green to Leave Amtrak

Vice President of Human Resources, Labor Administration and Diversity Initiatives Lorraine Green has announced that she will be leaving Amtrak on April 1, 2011.

Green joined Amtrak in 1997 and has presided over a number of Human Resources initiatives, most recently adding oversight of labor relations and diversity to her responsibilities.

“Lorraine has served Amtrak with dedication and passion, and I will miss having her here to turn to for advice,” said President and CEO Joe Boardman. “She has made enduring contributions to Amtrak for which we thank her, and she will be truly missed as she begins a new chapter in her life.”

Message From Joe Boardman

Dear Co-workers,

Ensuring that we have a good team in place to maintain the continuity and focus we need to reach our goals is critically important, so I want to update you on some senior management functions.

As some of you may already know, we will be hiring a vice president of Operations, and the job has been posted on Amtrak.com and our intranet. Based in Wilmington, this position will be squarely focused on Operations, and the heads of the Transportation, Mechanical and Engineering departments will report to this person. While the function will report directly to me, this job should not be confused with the formerly abolished chief operating officer function, which served a different role in the company and included a number of other responsibilities outside of Operations. As I've said before, it's important that the folks who operate the railroad day-in and day-out are in the field, so that they are closer to the operation.

I also want to let you know that Chief Information Officer Ed Trainor has announced that he will be retiring after the initial launch of the Strategic Asset Management project in June of this year. To ensure that we have ample overlap and a smooth transition, we will also be looking for CIO candidates in about two weeks.

In addition, Michael Duncan has been selected to manage the Human Resources functions with the April 1 retirement of the current department head, Lorraine Green. Michael is overlapping with Lorraine to ensure continuity in the department, and is acting on an interim basis until a permanent selection is made.

For those of you who work with him or his department, Vice President of Policy and Development Stephen Gardner will be out on paternal leave beginning in the next week or two. Vice President of Marketing and Product Management Emmett Fremaux and Vice President of Government Affairs and Corporate Communications Joe McHugh have both agreed to step in for him while he is on leave.

We have a strong senior management team in place, and we will continue to evolve as we bring together people who put a premium on collaboration and service quality.

Thank you for your support and for the work you do every day.

Sincerely,

Joe Boardman

Employee Information Portal Unavailable May 25 Through Mid-June

Beginning at the end of the day on May 25 and continuing through mid-June, the Employee Information Portal (EIP) will be unavailable in preparation for the first release of the Strategic Asset Management (SAM) Program.

SAM is a company-wide initiative designed to modernize business systems and processes, and enable Amtrak to more effectively share information across departments and locations. During the “blackout period,” data will be converted and a new system will be connected to existing Amtrak systems.

Below is important information on how the EIP blackout will affect you, the Human Resources Employee Service Center (HRESC) and Human Resources transaction processing.

Managers should discuss this information with employees at briefings and post copies for employees without email access.

1. When will the EIP blackout period for the Employee Information Portal start?

The blackout period will start at the end of the day on **May 25** and will extend through mid-June. During this time, the Employee Information Portal will not be available.

2. How will the blackout affect me?

During the EIP blackout, the portal will not be available for you to initiate actions or view personal data. For instance, you will not be able to

submit leave requests, manage your addresses or emergency contacts or view payroll check statements.

3. Will agreement-covered employees' pay be affected?

Hourly agreement-covered employees' pay on June 10 will be affected by the launch of the first phase of the Strategic Asset Management System (SAM). **Is this the pay for June 10, or the pay in the June 10 paycheck?**

Please rest assured that provisions have been made to minimize any payroll impact that would affect you. Information is being mailed this week to all hourly agreement covered employees' homes that explains how your pay will be affected and what you should expect. To obtain a copy of the letter, [click here](#). The letter is also available on the Intranet at **(location TBD)**. For questions, please call 1-866-247-2975. **(this is Verizon conf line – what should it be?)**

4. What other functions will be unavailable?

After May 25, and throughout the blackout period, both the E-Recruiting and E-Learning systems will be unavailable since they are accessed through the portal. Therefore, employees will not be able to apply for a job or enroll in training using the portal.

Since employees will not be able to apply for jobs through the portal, the length of time a job is posted internally will be extended to account for the blackout period.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

May 18, 2011 • Page 2 of 2

5. How will I know the portal is not available?

When you access the Employee Information Portal from the Amtrak Intranet home page, a page will be displayed informing you that the portal is not available.

6. How will the blackout affect the HR Employee Service Center?

The deadline for managers to submit HR personnel actions for processing prior to the blackout period is May 25. The HR Employee Service Center will process all transactions that are fully approved and received in good order by May 25. Processing will resume when the system is made available again, in mid-June.

7. What about the HR forms available to employees on the intranet in the corporate forms library?

Employees will be able to submit these forms to the HR Employee Service center via the HRESC@amtrak.com mailbox. However, after May 25, the HRESC cannot process these requests until the system becomes available. Any forms received during the blackout period will be held until the system is back up.

8. Will the HRESC be able to take calls during the blackout?

Yes, the HRESC will be taking calls during the blackout and you can continue to reach them at 1-888-694-7372. However, while the HR system is unavailable, the Employee Service Center may need to postpone researching your question until system access is restored.

9. I have an SAP User ID and am able to log in to SAP and view some data. Will I be able to do this during the blackout?

There will be no access to SAP, even for viewing purposes during the blackout.

Message from Joe Boardman

Dear Co-workers,

For nearly 150 years, our nation has observed Memorial Day by honoring the men and women who have died in the service of our great country. As America's Railroadsm, we, too, will commemorate Memorial Day this year.

At 3 p.m. local time on Monday, we encourage all Amtrak employees to participate in the National Moment of Remembrance by taking a moment to observe, in your own way, the Americans who have died while defending our nation. This year, as in previous years, all of the engines on the system will sound their horns at 3 p.m. local time as a salute to those who died for our country.

Memorial Day is also a day to remember the men and women who are on active duty. Over the years, many Amtrak employees have served our nation to protect our freedoms and our way of life. I hope you will take a moment to think about the Amtrak employees who are on active duty with the Reserve or the National Guard and are deployed away from their families and friends.

For those uniformed crew members who will be working on Memorial Day, we want to remind you that Amtrak authorizes the wearing of appropriate lapel pins or badges that commemorate your military service. We encourage displaying service crests, unit badges and ribbon pins. Wearing of American flag pins or yellow ribbons is also appropriate.

Memorial Day often marks the start of the summer vacation season for most individuals and families and is greeted with celebration. I hope those of you

who are able to take the holiday enjoy your time off.

To those who are serving or have served, I share a special message: We are proud to support our veterans. I am proud of all of you and grateful for your service to our country.

NEC Business Line Implemented Under Strategic Plan

The first realignment of functions under the recently released FY 2011 - 2015 Strategic Plan is the formal integration of ongoing Northeast Corridor planning and development work with Amtrak's efforts to develop a proposed 220 mph next-generation high-speed rail system within a new Northeast Corridor Infrastructure and Investment Development business line.

Stephen Gardner has been selected as the vice president of NEC Infrastructure and Investment Development, and will be transitioning from his current position as vice president of Policy and Development.

This integrated business line will bring together all Amtrak funding, policy and planning decisions regarding NEC improvements to maximize the financial performance of the business line, and to support the current and future operations on the Corridor, including commuter and freight railroad service.

A critical element of the business line is to ensure the ongoing development of 220 mph high-speed rail, including developing financial and business plans, and communicating the high-speed rail vision for the NEC with Amtrak's stakeholders.

"Stephen has extensive experience and understanding of the NEC and

the needs of its customers, and is keenly aware that improving the NEC for all users and building a 220 mph system will require both public investment and private finance," said President and CEO Joe Boardman.

Concurrent with the implementation of the Strategic Plan and this integrated NEC development structure, Al Engel, vice president of High-Speed Rail, has advised the company he is leaving Amtrak in December to pursue other opportunities. As part of Amtrak's succession planning practices, Al will assist in the transition.

"Al has performed tremendous work to develop, advance and bring national and international recognition and credibility to the Amtrak high-speed rail program," said Boardman. "As a direct result of Al's leadership, Amtrak is well-positioned and has developed a strong path forward to realizing world-class high-speed rail on the Northeast Corridor."

Contingency Plan in Place in Case of

An impasse in negotiations between 30 freight railroads and three unions may result in either party seeking self-help — a lockout or a strike — starting 12:01 a.m. on Tuesday, Dec. 6 that would significantly affect Amtrak operations outside of the Northeast Corridor.

This dispute does not involve Amtrak, it is between the freight railroads and the unions that represent their workforce.

Should a work stoppage occur starting at 12:01 a.m. on Dec. 6, it would shut down all Amtrak operations, except for the Amtrak-controlled Northeast Corridor between New York and Boston, the Downeaster and Caltrain service between xxx and xxx.

Amtrak's operations departments, in conjunction with other departments, has developed a contingency plan in the event of a work stoppage.

Accordingly, all agreement-covered employees are expected to report for work as scheduled, unless otherwise told by xxxx. If there's any question about reporting for work/or Employees should call this number before reporting for work, employees may call xxx xxx –xxxx (whose line is this)

Will orderly shut down

No train will depart from initial terminal after xxx point.

Trains arriving at tie-down locations where mechanical employees will be available to service trains ... for timely resumption of service.

Any trains that would normally be en route at 12:01 a.m. on Dec. 6 will not operate on Dec. 5 to avoid inconveniencing or stranding (not this word) passengers. No alternate transportation will be provided (?). Passengers affected by the work stoppage will be refunded (waiving any penalties?).

Central clearinghouse for information on operations will be CNOC.

The safety and security of our employees and passengers comes first. Amtrak Police Department personnel will be on hand at locations where we share facilities with freight railroads

Passengers will be entitled to

Outside of a settlement on the part of the two entities before Dec. 6, congress would have to enact legislation to intervene...

Start up is based on many factors including track and C&S inspections, serviced equipment T&E crews, among others.

A Message from Joe Boardman

Dear Co-workers,

On the eleventh hour of the eleventh day of the eleventh month in 1918, an armistice put a stop to the fighting in World War I. That day became known as Armistice Day and was originally made a holiday to show appreciation for the veterans of that war.

It has since become Veteran's Day, a national holiday to remember and honor American veterans of all wars. It's a day to honor veterans, alive and dead, for their patriotism. Whether you're working or off for the holiday, remember that others have made — and are making — sacrifices to serve in times of war in the name of the liberty we enjoy as Americans.

It's likely that you work alongside a veteran, given the longstanding rapport between the railroad and the armed services. While the objectives for the military and passenger rail are certainly much different, it's not surprising that we are a second home to many with prior military service. We share that sense of community, mission and reliance on one another that binds us. Leveraging those commonalities, we benefit from the recruiting partnerships we have with some of the armed services.

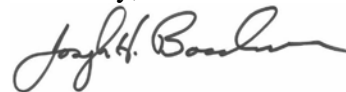

Many of our employees have served in the armed forces, some

having seen battle. And still others put their Amtrak careers on hold while they serve in current conflicts around the globe. I thank these employees for their selfless service and am proud to call them members of the Amtrak family.

As a Vietnam War veteran myself, my brothers and sisters in arms and I know the toll that can befall the most ardent of patriots. I carry gratitude in my heart every day for the service of those who traded their lives for their love of country, and I am humbled by them.

I hope you'll join me in showing my appreciation for those who serve our country, including our own employees.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Further Alignment Augments Government Affairs and Corporate Communications Functions

Following the alignment of functions under the Northeast Corridor Infrastructure and Investment Development business line announced last week, the Policy and Development department is being dissolved, and in large part integrated with the Government Affairs and Corporate Communications department led by Vice President Joe McHugh.

Effective today, some of the former members of the Policy and Development team linked to Northeast Corridor advancement join Stephen Gardner, vice president of NEC Infrastructure and Investment Development; while the majority of the group now reports to Joe McHugh. There will be a period of transition and further adjustments as McHugh defines roles and functions, and Amtrak continues to stand up the remaining business lines.

This is the next step in the continuing process of realignment to support the objectives and business lines in Amtrak's FY 2011 - 2015 Strategic Plan. The Strategic Plan organizes goals and strategic efforts to help strengthen Amtrak's bottom line. Because the realignment will result in a reduction in the number of non-agreement-covered employees across all departments, the company is offering non-agreement employees a Voluntary Separation Incentive Plan.

Voluntary Separation Incentive Plan Offer Ends Next Friday

The Voluntary Separation Incentive Plan (VSIP) offer for non-agreement-covered employees will no longer be available after next Friday.

Non-agreement employees with at least one year of service may elect to participate in the VSIP, which expires at the end of the day on Nov. 25.

Because the organizational realignments taking place now and through 2012 will result in a reduction in the number of non-agreement employees across all departments, a Reduction in Force is expected to begin in January 2012. The severance packages offered as part of any future involuntary Reduction in Force will not be as generous as those being offered in the VSIP.

Employees who qualify for the VSIP should review all of the information that has been sent to them so that they may carefully weigh their options.

Organizational changes are taking place to better allocate resources given the financial realities that Amtrak faces and to more closely align the structure of the company in accordance with the Strategic Plan.

More information about the VSIP is available on the Amtrak intranet under “Employees”→ “Human Resources,” then click on the “Voluntary Separation Incentive Plan” link, or employees may call the Human Resources Employee Service Center at (888) 694-7372.

Contingency Plan in Place in Case of Work Stoppage on Freight Territory

An impasse in negotiations between 30 freight railroads and three unions may result in either party seeking self-help — a lockout or a strike — starting 12:01 a.m. on Tuesday, Dec. 6 that would significantly affect Amtrak operations outside of the Northeast Corridor.

This dispute does not involve Amtrak; it is between the freight railroads and the unions that represent their workforce.

Should a work stoppage occur starting at 12:01 a.m. on Dec. 6, it would disrupt all Amtrak operations, except the Northeast Corridor (Washington – Boston), the Keystone Corridor (New York – Harrisburg), the Springfield Line (New Haven – Springfield), *Downeaster* (Boston – Portland), and Caltrain service (San Francisco – San Jose only).

Accordingly, Amtrak's operating departments, in collaboration with other departments, has developed a contingency plan in the event of a work stoppage. Depending on the date and the route, there will be cancellations and trains terminated at major stations with no alternate transportation. The Contact Centers may begin callbacks to passengers traveling on trains that would be affected as soon as tomorrow.

If a strike or lockout occurs, most Amtrak agreement-covered employees should report for work as

scheduled, except for many Transportation department employees outside of the Northeast Corridor. Decisions about work schedules will vary by location and as the situation unfolds; employees should check with crew management and/or their supervisor about reporting for work, starting Dec. 4. (?)

The safety and security of Amtrak employees and passengers comes first. Amtrak Police Department and other personnel will be on hand at locations where Amtrak shares facilities with freight railroads to ensure that employees can report to work safely.

Amtrak will continue to closely monitor the situation and hopes that the parties will reach resolution before negatively affecting passenger service. More information will be provided as we learn more.

Message From Joe Boardman

Dear Co-workers,

The final numbers are in, and I'm very pleased to announce that we broke ridership and ticket revenue records in FY '11, the fiscal year that just ended on Sept. 30. With 30.2 million passengers and ticket revenue of \$1.9 billion, we reached all-time-highs on both counts, and continued a trend of rising ridership and ticket revenue growth.

First, I want to thank every one of you who played a role in helping us achieve these records. Whether you're interacting with our customers or supporting the delivery of safe and reliable service in other ways, I want you to know that your efforts made a difference. I want to thank you for putting in the long days and overcoming challenges while putting our customers first. I also want to thank you for the times you've aspired for something better, like taking initiative to do something more efficiently, helping a co-worker work more safely or taking action that contributed to Amtrak's bottom line.

We also want to thank our passengers for their business and our state partners for their support of passenger rail. Today, we will mark exceeding 30 million passengers with a special event in St. Louis featuring an Amtrak Guest Regards member and frequent *Lincoln Service* and *Texas Eagle* rider who represents our 30-millionth passenger. The event will be attended by local employees, Vice President of Marketing and Product Development Emmett Fremaux, Amtrak Chairman Tom Carper, St. Louis Mayor Slay, and representatives of the congressional delegation and Illinois and Missouri state departments of transportation. We've also generated

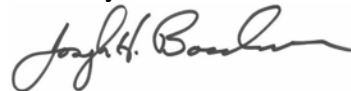

some enthusiasm around this milestone with our friends on Facebook and Twitter, who can enter to win a 30-millionth passenger sweepstakes.

One of the goals in the Strategic Plan we recently released is to advance customer focus by responding to the needs, wants and expectations of our customers to improve their experience and maximize passenger and partner satisfaction. When we provide safe and reliable service that puts passengers first, they come back. When we implemented AmtrakConnect Wi-Fi on *Acela Express*, people responded favorably. And we expect similar response when we expand the number of trains that will have Wi-Fi soon.

While the improvements we make to the service mean a lot, so do things that don't cost us money. We are facing tough budget times, but tightening our collective belts should never get in the way of treating people with courtesy, making sure you do a thorough job no matter what your role and collaborating more with one another to maximize resources.

We broke records in spite of a weak economy and the disruptions to service due to major weather events over the course of the year, and that speaks very highly of the dedication of our workforce. Thank you for the work you do — please keep it up!

Sincerely,

Joe Boardman
President and CEO

Message From Joe Boardman

Dear Co-workers,

The final numbers are in, and I'm very pleased to announce that we broke ridership and ticket revenue records in FY '11, the fiscal year that just ended on Sept. 30. With 30.2 million passengers and ticket revenue of \$1.9 billion, we reached all-time-highs on both counts, and continued a trend of rising ridership and ticket revenue growth.

First, I want to thank every one of you who played a role in helping us achieve these records. Whether you're interacting with our customers or supporting the delivery of safe and reliable service in other ways, I want you to know that your efforts made a difference. I want to thank you for putting in the long days and overcoming challenges while putting our customers first. I also want to thank you for the times you've aspired for something better, like taking initiative to do something more efficiently, helping a co-worker work more safely or taking action that contributed to Amtrak's bottom line.

We also want to thank our passengers for their business and our state partners for their support of passenger rail. Today, we will mark exceeding 30 million passengers with a special event in St. Louis featuring an Amtrak Guest Regards member and frequent *Lincoln Service* and *Texas Eagle* rider who represents our 30-millionth passenger. The event will be attended by local employees, Vice President of Marketing and Product Development Emmett Fremaux, Amtrak Chairman Tom Carper, St. Louis Mayor Slay, and representatives of the congressional delegation and Illinois and Missouri state departments of transportation. We've also generated

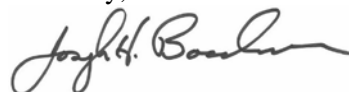

some enthusiasm around this milestone with our friends on Facebook and Twitter, who can enter to win a 30-millionth passenger sweepstakes.

One of the goals in the Strategic Plan we recently released is to advance customer focus by responding to the needs, wants and expectations of our customers to improve their experience and maximize passenger and partner satisfaction. Message from Joe Boardman

Dear Co-workers,

Today is a memorable day for the employees who are being honored at the annual President's Service and Safety Award event in Washington, D.C. In the company of friends, family and co-workers, we celebrate their accomplishments and drive to go beyond what's expected of them.

This year's 217 award winners include 208 employees from 10 departments, two state partners, one external Champion of the Rails and six contractors — a cross-section of talent, skills and commitment to quality passenger rail that deserves recognition. We celebrate the work of individuals and groups, understanding that what we do necessitates teamwork and collaboration, and that we rely on collective ownership to succeed.

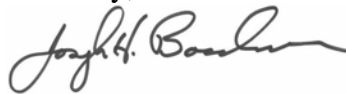

While the award winners represent a fraction of our workforce, they exhibit the characteristics, initiative and dedication that can be found within the entire workforce. There are winners in the making and those who operate below the radar that innovate, produce and inspire every day, and I want to thank them for that.

I strongly believe in the importance of recognition — it's a key element of our values. As we pay tribute to this year's winners, remember that the spirit of recognition doesn't end with the conclusion of today's PSSA program. We must all remain

mindful of the motivational power of acknowledgment, no matter how big or small, on any given day.

Congratulations to this year's President's Service and Safety winners, and thank you for your contributions to Amtrak!

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

Next week, the Senate is expected to resume debate on appropriations bills, including funding for Amtrak for this fiscal year. The latest best estimate from the Senate is about \$1.48 billion for Amtrak, which would translate to a decrease in operating funding from last year, and would be significantly less than the \$2.2 billion we'd requested for this fiscal year.

Once the Senate approves the appropriations bill, it will go to the House for debate. While we don't know what the outcome will be, we do know that a House subcommittee had previously recommended a much lower number. We will need to make our capital program a priority for the future success of Amtrak. It should be clear to all of us that for now uncertain economic conditions will not allow Congress to be our sole funding solution.

Using the Strategic Plan we released earlier this month as our roadmap, we must shift our focus to strengthening the bottom line. The plan — which everyone should read — aligns organizational efforts, prioritizes resource allocation, and measures performance against goals and strategies to put us in a stronger financial and strategic position.

The truth of our finances will require difficult decisions in the weeks and months ahead. You'll be hearing more about what this means next week, so please keep an eye out for more information. Our focus must be on the safety and service that our passengers and state partners expect.

Uncertainty about federal funding support and budget cuts are not new to Amtrak, and over the past 40 years we've learned to live with that kind of ambiguity. In the past, we've often halted or put off capital investments when federal funding fell

short, which put us two steps back and left us in a perpetual state of mere survival.

But we have a great future and we cannot abandon our investments or our plans. We don't have that luxury, and our customers expect us to get better while some of our detractors expect us to fold our tent. We will not do that. We need to create an organization and a culture that can manage the ambiguity that comes from the annually changing government support. We will not lose sight of the Amtrak our customers need us to be. We will continue to make the investments that will yield a more efficient and reliable Amtrak.

We will allocate our resources to continue long-lacking capital investments that have become critical for us in serving our customers, such as the next-generation reservation system and eTicketing; fulfilling our mandatory requirements for stations under the Americans with Disabilities Act; and proceeding with the acquisition of new equipment for our aging fleet.

I know that there have been rumors about our budget, and that can be distracting. But I ask you to stay focused on our customers. At a time of record ridership, delivering safe, reliable and customer-friendly service is the best antidote to the Amtrak funding debate.

Thank you for your support.

Sincerely,

Joe Boardman

October 31, 2011 • Page 1 of 1

Amtrak Offers Non-Agreement-Covered Employees Voluntary Separation Incentive Plan

Starting next week, Amtrak will be offering non-agreement-covered employees a Voluntary Separation Incentive Payment in order to better allocate its resources and align the structure of the company in accordance with its Strategic Plan and within the financial realities it faces.

Non-agreement employees with at least one year of service may elect to participate in the VSIP, starting Nov. 7 through Nov. 25. A letter will be emailed and mailed to the homes of all non-agreement employees today, outlining the specifics of the VSIP and associated benefits.

Because the realignment will result in a reduction in the number of non-agreement employees across all departments, the VSIP is being offered as a way to lessen the impact of future involuntary separations. The realignment is expected to occur throughout FY 2012. If the cost-reduction and organizational expectations are not achieved, a Reduction in Force will take place in January 2012. The severance packages offered as part of any future involuntary Reduction in Force will not be as generous as those being offered in the VSIP.

Please note that employees who elect to participate in the VSIP and possess agreement seniority in a craft may be eligible to return to the craft, in accordance with the

applicable collective bargaining agreement.

Amtrak retains the right to disallow participation of an eligible non-agreement employee to ensure that the business is not adversely affected.

Posted on the Amtrak intranet home page under “Employee Info,” the Strategic Plan aligns organizational efforts, prioritizes resource allocation, and measures performance against goals and strategies to better financially and strategically position the company.

More information about the VSIP is available on the Amtrak intranet under “Employees”→ “Human Resources,” then click on the “Voluntary Separation Incentive Payment” link.

Message from Joe Boardman

Dear Co-workers,

Since the official launch of Safe-2-Safer in August 2009, we've made some strides in creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

We have 28 steering committees and more than 500 trained volunteer observers in place across the system. In addition, more than 2,500 supervisors have participated in workshops to help make them more effective leaders.

Most of you were here when we invited all employees to participate in a voluntary survey in 2009. Those results did several things: They provided us with a current snapshot of how employees viewed Amtrak safety, security and leadership culture; provided a baseline from which we could measure improvement in employees' perceptions; and helped shape Safe-2-Safer to address the issues voiced by employees who completed the survey.

Now that we've put Safe-2-Safer in motion, we need your feedback about how it's going. Everyone's participation is needed and valued, as we will use the responses to determine how to modify Safe-2-Safer to better ensure that it's helping create a safer workplace. Starting on Oct. 3, we will be asking you to take a voluntary survey, which will take approximately 45 minutes to complete. You will have

the opportunity to complete the survey in a number of ways, depending on your location, craft and position. Safe-2-Safer facilitators and steering committees will be disseminating the paper copies at your job location, while employees who have Amtrak email can take the same survey online via a secure external link hosted by a third party (a link will also be posted on the Amtrak intranet).

Please remember that the surveys are anonymous, and no answers can be traced back to any individual. Only BST representatives (Behavioral Science Technology, who is helping us implement Safe-2-Safer) will see the individual surveys. As we did with the survey taken in 2009, we will be sharing the results once they're available.

We have seen a lot of support for Safe-2-Safer throughout the company, and we have seen the signs that point to progress. I cannot overstate how important it is for us to hear from you about this — we need your participation to measure how far we've come and how far we have yet to go.

Thank you for your support, and look for more information about the survey as we get closer to Oct. 3.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

The House Transportation Housing and Urban Development Appropriations Subcommittee has released a proposal for FY '12 that would significantly reduce Amtrak's federal funding, specifically the operating support.

The proposal also prohibits the use of federal operating funds provided to Amtrak to be used for state-supported trains. If enacted by the full Congress, it would effectively eliminate nearly 150 weekday state-supported Amtrak trains and negatively impact the more than nine million passengers who ride those trains each year, and the communities they live in.

While I am intent on doing our very best to continue to carry out our mission of providing national service, the cuts in funding would mean job losses for Amtrak.

The House proposal is shortsighted and steers our national transportation policy down the wrong road. It will force states that have made decades of investment in passenger rail, and have made rail an important part of their future transportation plans, to eliminate service.

Under PRIIA, which was passed by Congress in 2008, we are already working cooperatively with our state partners to shift more of the costs of state-supported trains directly to the states.

Amtrak is part of the solution, not the problem. We're on the verge of setting new ridership and ticket revenue records. We serve as a local and regional economic engine for communities across the country, we help relieve congestion and we help reduce our nation's dependence on foreign oil. And we provide 15 states — nearly half of our departures — the service they want to meet their transportation needs.

We will continue to meet with members of Congress to make our case and explain the repercussions of this budget proposal. This is the start of the legislative process for FY '12, but don't expect this to be like other years in recent history. We are living in a very tough political and economic climate, and it's going to be a challenge.

Sincerely,

Joe Boardman

The company honors employees and external partners each year who have made exceptional contributions to Amtrak. The following award winners will be honored at a ceremony in Washington, D.C., on Oct. 19.

Employees who have completed 30, 35 or 40 years of service in 2011 will also be honored at a series of regional celebrations in various locations later this fall.

Message from Joe Boardman

Dear Co-workers,

Today marks the end of Fiscal Year 2011, and another year of record ridership and ticket revenue. We've reached these milestones eight out of the last nine years, thanks in large part to your hard work.

We're starting FY '12 with a five-year strategic plan that is a truly comprehensive roadmap for evolving into a company that is more focused on the bottom line, and whose employees' roles and efforts are in sync with common goals.

This is unlike any of Amtrak's previous plans, for a number of reasons. Put simply, it shifts our focus to strengthening the bottom line. The plan aligns corporate goals, performance targets and strategic efforts so that we know what our specific goals are, what to do to achieve them and how to measure what we've got to do to get there. At the same time, it also aligns organizational efforts, prioritizes resource allocation, and measures performance against goals and strategies. That means creating an efficient organization that is empowered to carry out the goals, and that makes project funding decisions based on how well they meet the goals and the performance targets.

This plan is centered on accountability for performance, and calls for a sense of discipline and direction that enables us to leave behind the state of survival that

hampers our strategic growth. It puts us in a much better position to be an active participant in today's competitive industry and business world.

This plan is also unique in that it was developed with input from employees at every level and representing every department — their fingerprints helped mold it.

I know what you may be thinking as you read this — we've set goals and made plans before, and for various reasons, they were sidelined. We know that there are factors out of our control that influence our success, and we've recognized many of them in this plan. We're not blind to that reality, instead we understand that we must implement risk-management strategies to help minimize how those factors affect our ability to reach our goals. The future is a blend of continuity and change, the key is to know how to manage — expected and unexpected — change.

As we move forward with this plan, you will see more detailed descriptions of the tactics we'll employ in the annual Budget and Business plan and the Five Year Financial Plan.

It isn't a plan that sits on a shelf and becomes irrelevant, and it's definitely not perfect or set in stone. It's a living document that will need revising as we evolve. I strongly urge you to download a copy of this plan and take the time to read it. I've also attached a summary that will help give you an overview, but for

specifics you'll need to read the full plan. (The plan is available on the home page of the intranet, in the "Employee Info" box.)

Thank you for your commitment. I hope you'll agree that this plan is a guiding light for Amtrak and recognize that you have a role in making it happen.

Sincerely,

Joe Boardman
President and CEO

Preparations for 40th Anniversary, Employee Appreciation Day and National Train Day in Full Swing

Next month will be a busy one as the company kicks off its 40th anniversary, honors its employees' contributions, and celebrates National Train Day.

Special employee events will be held at more than 50 locations across the country on May 2 to celebrate Amtrak's third annual Employee Appreciation Day. Events will vary depending on the location, but most will include food, access to local vendors offering employee discounts on products and services, on-site human resource partners such as Fidelity and Aetna, and a number of other resources employees can use to become safer, greener and healthier.

In addition, as Amtrak kicks off its 40th Anniversary celebration, a special exhibit train will be unveiled to employees and the media in Washington, D.C. on Employee Appreciation Day. The exhibit train, which is comprised of restored equipment and customized display cars, will embark on a year-long, cross-country journey after its debut in Washington. Created by and for employees, the train is an opportunity to showcase Amtrak's history to employees and the communities it serves. Employees located in Washington, D.C., or traveling to the District the week of May 2 may view the exhibit train throughout the week.

The exhibit train will make its official debut for the general public at the National Train Day event in Washington, D.C. More information about the train's schedule, including viewing hours the week of May 2, will be posted on www.amtrak40th.com.

On May 7, the Fourth Annual National Train Day will take place at stations in Washington, D.C., Philadelphia, Chicago, and Los Angeles. These Amtrak-led events — and hundreds more held at other locations across the country — are designed to bring employees, passengers, and railroad enthusiasts together to celebrate the history and tradition of railroads in America.

This year, Amtrak invited GRAMMY® winner, Gladys Knight, to serve as spokesperson for National Train Day 2011 and co-host a special concert to benefit the Boys & Girls Clubs of America on Thursday, May 5 at 8 p.m. at the Beacon Theatre in New York City.

Employees can purchase tickets to the concert before they become available to the general public starting tomorrow, April 12 at 9 a.m. Eastern. To purchase tickets, visit www.ticketmaster.com/event/1D00467FD8565751 or call 866-858-0008. When purchasing tickets employees must use the special password TRAIN6.

For more information about all of the National Train Day celebrations, visit www.TrainDay411.com.

Funding Update: Congress has passed legislation to continue funding federal agencies, Amtrak and others that rely on federal support this fiscal year. Final details of the FY '11 budget, including how it would impact Amtrak, are being ironed out this week.

Ridership Update: March marked 17 consecutive months of year-over-year ridership growth and the nest March on record. Halfway through the fiscal year, it appears that the company remains on track to set another annual ridership record.

PSSA: The President's Service and Safety Awards (PSSA) Committee is currently accepting nominations for the 2011 President's Service and Safety Awards. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms." The nomination period ends **Friday, May 13.**

National Train Day Contest Winner

Congratulations to the first winner of this year's National Train Day trivia contest, Elizabeth Thornton, Customer Support Representative, Philadelphia!

A new question for the National Train Day employee trivia contest is posted on www.TrainDay411.com through April 18. Employees can enter the contest for the opportunity to win prizes and to be included in the May issue of *Amtrak Ink*. The contest launched on March 21, and a new question will be posted every two weeks leading up to May 7.

Employees are also encouraged to volunteer at a National Train Day event by signing up online.

April 4, 2011

Kirk Selected Southern Division General Superintendent

Tom Kirk, who has been managing the Southern Division on an interim basis since November, has been selected to serve as the general superintendent of the division.

“The broad range of experience Tom brings to this position makes him best suited for the job,” said General Manager Chris Jagodzinski. “He understands how to motivate people and recognizes what good customer service is.”

Since joining Amtrak in 1983 as a ticket clerk at the Syracuse Station, Kirk has held a number of positions of increasing responsibility, including *Acela Express* product line manager, crew base manager and most recently assistant superintendent of passenger services. Kirk is based in the division headquarters in Miami.

High-Speed Rail Grant for Gateway Project

Amtrak is applying for \$1.3 billion in federal funding to move forward with a series of infrastructure improvements to bring next-generation high-speed rail to the Northeast Corridor (NEC).

A recent decision by the Department of Transportation to name the NEC a federally designated high-speed rail corridor allows Amtrak to apply for the funding.

Amtrak is requesting funding for three major Gateway projects, including \$720 million to replace the more than 100-year-old movable Portal Bridge over the Hackensack River in New Jersey with a new, high-level fixed bridge. Amtrak’s request is for \$570 million, with a contribution from the State of New Jersey of up to \$150 million.

Updates Made to Fleet Strategy Plan

Amtrak recently issued an updated fleet strategy plan. The plan, which analyzes the company’s need to replace its existing fleet and manage capacity to meet the forecasted growth in ridership, was updated to reflect the current state of the fleet, programs that are underway, and changes in the larger business environment.

It includes updated information about two new equipment acquisitions that were begun last year: one for 130 single-level cars to replace the oldest cars in the fleet and provide increased capacity for long-distance trains, and the other for 70 electric locomotives to replace those in use on the Northeast Corridor and Keystone Corridor.

Also new to the plan is discussion about work underway to support more frequent *Acela* service with the acquisition of a new fleet of high-speed trainsets to expand the premium service. There is also an extensive update on the work of the Next Generation Equipment Committee — a partnership between Amtrak, states, the Federal Railroad Administration and industry participants.

Operations Update: Construction is underway on the next phase of a four-year high-speed rail project being performed by Union Pacific Railroad between Chicago and St. Louis affecting the *Lincoln Service* and *Texas Eagle*. The 2011 work schedule, which includes the installation of 250,000 concrete ties, will conclude in late July.

Government Affairs: On April 7, President and CEO Joe Boardman will testify before the House Appropriations Subcommittee on Transportation, Housing and Urban Development and Related Agencies about Amtrak’s FY ’12 budget.

Environmental Update: The Medical and Environmental Health and Safety department continues to monitor the releases from the damaged Japanese nuclear plant. The reports indicate there is no health risk to the United States though measurements have found very low levels of radiation. Additional information can be found at www.epa.gov/radiation/ or www.epa.gov/radiation/.

Participate in the National Train Day Contest

The National Train Day employee trivia contest is now open at www.TrainDay411.com. Employees can enter the contest for the opportunity to win prizes and to be included in the May issue of *Amtrak Ink*. The trivia contest launched on March 21st and a new question will be posted every two weeks. Employees are also encouraged to volunteer at a National Train Day event by signing up online.

April 18, 2011

Message From Joe Boardman

Dear Co-workers,

This Friday marks Earth Day, a day that was originally set aside more than 40 years ago to cultivate awareness about the condition of our environment and lead to action for ecological improvements.

While the establishment of Earth Day (April 1970) and Amtrak's birthday (May 1971) happen to fall about a year apart, the relationship between Amtrak and environmental stewardship is no coincidence. As one of the more environmentally friendly modes of transportation, Amtrak is 20 percent more fuel efficient than the airlines and 30 percent more efficient than automobiles on a passenger-mile basis.

Being good stewards is a responsibility we take seriously. To that end, environmental and energy efforts are now one of our five overarching goals for 2011. To accomplish this particular goal, we have set specific, company-wide targets to: reduce total diesel consumption per seat-mile by 1 percent, cut total electricity consumption on trains per seat-mile by 0.25 percent and reduce total electricity used at facilities and stations by 1 percent. (You can find all of the goals posted on the Amtrak intranet).

We've also implemented a number of other environmental management programs and practices to move the company toward a more sustainable system. Whether it's using automatic/start stop devices to reduce the amount of idling time on diesel locomotives, employing bio-lubricants in hydraulic systems, or installing more energy-efficient lighting in shops and offices, we're taking steps to be greener.

Part of the responsibility of leadership is to ensure that we meet our mission while also maintaining a high level of environmental integrity. Environmentally sound practices and tactics are an essential part of meeting our nation's transportation needs, but also to creating a safer, greener and healthier Amtrak for employees.

As we approach our 40-year anniversary, think about the role you can play to make important and lasting energy and environmental changes that will help shape the future of transportation in America. Thank you for all your hard work.

Sincerely,

Joe Boardman
President and CEO

Telework Policy: A new telework policy for non-agreement covered employees is now in effect. The policy allows for work to be performed at an alternate worksite on a permanent (not temporary) basis, instead of the employee's assigned work location. More information on the policy is available on the intranet under Library → Policies → APIs → Human Resources → 7.41.0 Telework.

National Train Day: Employees can now purchase tickets to the Amtrak Presents Gladys Knight National Train Day 2011 concert. Call 866-858-0008 or visit: www.ticketmaster.com/event/1D00467FD8565751. Make sure to use special password TRAIN6.

40th Anniversary Website: Amtrak's 40th anniversary website has launched! The site — www.Amtrak40th.com — will track the anniversary exhibit train on its cross-country tour and serve as the company's first historic archive, full of photographs, documents, advertisements and more.

Labor Relations: Employees represented by the Sheet Metal Workers International Association have overwhelmingly ratified their new five-year contract. The wage increases are patterned after agreements already reached. The majority of unions have reached new deals; the remaining unions with which Labor Relations is meeting have been presented with comprehensive proposals.

Earth Day Activities

In honor of Earth Day and Employee Appreciation Day, an Environmental Raffle will open to all employees this week for an opportunity to win one of eight kitchen composting kits or one of eight smart power strips. Visit the intranet from April 18 to May 5 to learn more about Amtrak Environmental Programs and to enter the raffle: Amtrak Intranet home page → How We Work → Environmental.

Amtrak and the Student Conservation Association (SCA) are hosting a number of volunteer cleanup and conversation efforts this month throughout the country. Contact Darlene Abubakar at ATS 777-4165 or abubakd@amtrak.com for more information on how to get involved.

Amtrak Celebrates 40 Years of Service Next Week

As most employees probably know by now, Amtrak will celebrate 40 years of service as America's RailroadSM this Sunday, May 1. Kicking off the year-long anniversary celebration, President and CEO Joe Boardman is scheduled to appear on the C-SPAN show "Washington Journal," which airs live at 8:30 a.m. on May 2. Following that, a special media event at Washington Union Station will include four employees who began their careers at Amtrak 40 years ago.

In addition, approximately 50 Amtrak locations will be marking the anniversary and its employees' contributions as part of Employee Appreciation Day on and around May 2. Employee Appreciation Day events will vary by location, but most will include food, access to local vendors offering discounts on products and services, on-site human resource partners such as Fidelity and Aetna, and a number of other resources. Contact Carolyn Stagger at staggerc@amtrak.com for more information about events in your area.

The 40th anniversary volunteer core team had hoped to have the exhibit train ready for employees to tour on Employee Appreciation Day, but finishing touches are still ongoing. However, the train is scheduled to be available for employees to visit on Friday, May 6, at Washington Union Station. The train will make its first *public* debut at National Train Day in Washington, D.C., on May 7. More than 30,000 people are expected to participate in National Train Day events across the country, including the four major Amtrak-led events in Washington, Philadelphia, Chicago and Los Angeles. Visit www.TrainDay411.com for more information about the events.

The exhibit train will then embark on a year-long anniversary tour (starting in the Northeast) and anniversary events will take place at each stop on the tour. The train's schedule and more information about the tour are posted on www.amtrak40th.com.

Want to Get Involved? We Need Volunteers!

Volunteers are needed for the National Train Day events in Chicago, Los Angeles, Philadelphia, Washington, D.C., and other areas around the country. Visit www.TrainDay411.com to volunteer or to host a National Train Day event in your area. All Amtrak employees and contractors are eligible to volunteer.

Volunteers are also needed to support Amtrak's 40th anniversary exhibit train tour at each location where the train is scheduled to stop. You can view the first three months of the train's tour schedule at www.amtrak40th.com. If you would like to be a part of these special events, you can volunteer by emailing your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the location where you want to volunteer, and your contact information (email and phone number) to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Baltimore, Md.

PASS: The Amtrak Police Department recently launched Partners for Amtrak Safety and Security (PASS), which is designed to encourage employees, passengers, rail enthusiasts and others to play an active role in reporting suspicious activities throughout the system. More than 1,100 people have already signed up for the program. Visit the PASS website at pass.Amtrak.com for safety tips and more.

Health & Wellness Update: The second round of the *Stay on Track...Keep Walking* program is now scheduled to begin on May 8. Over 1,000 employees have already registered. Those who did not participate in the first competition should receive a pedometer within the next seven days. The first information session about the competition will be held tomorrow, April 26, at 9:00 a.m. Dial 866-209-1307, access code: 2866559# to listen in.

Opt-Out/Opt-In: You can now receive *Amtrak Ink*, *Amtrak This Week* and *Special Employee Advisories* at your personal email rather than receiving paper copies by hand or mail. Sign up on the News & Info section of the Intranet.

PSSA: The President's Service and Safety Awards (PSSA) Committee is accepting nominations for the 2011 awards. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms." The nomination period ends **Friday, May 13**.

National Train Day Contest Winner

Congratulations to the second winner of this year's National Train Day trivia contest: **Mario Lezama**, journeyman electrician, Miami Mechanical Yard! Visit www.TrainDay411.com for the opportunity to test your train trivia knowledge and win. The newest trivia question is now posted online until May 2. A final question will be posted from May 2 through May 7. Employees who enter have the opportunity to win prizes and be included in the May issue of *Amtrak Ink*.

Operations: Beginning Aug. 3, and continuing for approximately nine months, the Battle Creek station will undergo renovations, and all station operations will relocate to a nearby temporary facility.

Special Exhibit Returns to Philadelphia's 30th Street Station

A National Train Day exhibit portraying the migration of African Americans in the U.S. has returned to Philadelphia's 30th Street Station, in response to requests from employees there.

The display was a major attraction at the station during National Train Day, and many employees not able to view the exhibit due to work schedules requested its return.

The exhibit chronicles the Great Migration of African Americans from the rural south to the industrial Northeast, Midwest and West via passenger (and sometimes freight) trains. The migration, which took place primarily during 1910-1930, was a major step in the full nationalization of the African-American population.

The exhibit recognizes and honors the important role that the railroad played in the Great Migration. It will remain on display at the station until Aug. 19, 2011.

Amtrak.com Experiences Robust Growth *Ranked No. 1 in Travel Industry Growth in the Month of July, According to Report*

A strong June and July has contributed to a 15 percent increase fiscal-year-to-date in ticket revenue on Amtrak.com. The growth the site is experiencing will lead to its strongest year on record, and it's projected to reach a milestone by generating \$1 billion in online bookings (within a fiscal year) later this month.

According to comScore Media Metrix data, travel websites saw record activity in June. Amtrak.com topped the list of travel sector sites with the highest growth in the month of June, increasing 14 percent over the previous month.

"We're on track for exceeding 30 million passengers this fiscal year, and approximately 56 percent of them are booking through Amtrak.com," said Roger Seitzinger, senior director, e-Commerce. "For many of our customers, Amtrak.com is the first step in the Amtrak journey, so we're extremely focused on making it easy to use, accessible and very customer service oriented."

Amtrak's eCommerce group leads innovations that have helped the site come first in other areas. Five years ago, Amtrak was a pioneer in the travel industry when it launched the first site specifically designed for mobile phones that allows full purchasing capability. The site, which can be accessed by going to Amtrak.com on a mobile phone, offers customers the ability to book tickets and conduct other transactions on their mobile phone.

Smartphone sales are predicted to triple to 491.9 million units by 2012 from 139.3 million in 2008, according to Gartner research firm. Business travelers are credited for being among the early adopters of smartphones, so it's no wonder that the travel industry sees this as a valuable sales channel. The employees behind Amtrak.com continue to explore the possibilities — keep an eye out for more news on this front soon.

Station Update: Today the Michigan Department of Transportation held a grand opening ceremony for the new Pontiac Transportation Center which will serve both passenger rail and intercity bus passengers. The \$1.4 million dollar project broke ground in June 2010 and was funded entirely with State of Michigan Comprehensive Transportation funds. The new station will act as a mass transit hub including the six daily Amtrak *Wolverine Service* trains and intercity bus passenger service provided by Greyhound.

Marketing: This week Amtrak is launching an iPhone application that allows customers to make and change reservations, check train status, get schedules and find station information. The application is available free through iTunes. More information is available at www.amtrak.com/mobile.

Philadelphia 30th Station Hosts Special Event This Sunday

Employees in the Philadelphia area and their families are invited to attend a special National Spirit of '45 Day event in observance of the end of World War II — Aug. 14, 1945 — on Sunday at 30th Street Station.

The event is one of hundreds of Spirit of '45 Day public events being held across the country. The event will be held at the station, in front of the Pennsylvania Railroad World War II Memorial at 10 a.m.

The program will include a description of the impact of WWII on Pennsylvania and the city of Philadelphia, a tribute to surviving members of the Greatest Generation and will conclude with a wreath laying ceremony led by local youth with a performance of "Taps." For more information visit spiritof45.org.

New Employee Resource Supports Better Communication Between Employees

A newly formed Employee Relations group — a function within the Human Resources department — serves as a resource to employees seeking guidance on how to better handle difficult situations with co-workers or managers. Through guidance, coaching and facilitated discussions, Employee Relations will work closely with employees and managers to help them solve work-related problems, improve communication and foster a more positive work environment.

"Employees can call the ethics hotline and, when appropriate, we'll help develop an action plan," says Dawn Marcelle, director, Employee Relations. She noted that the new office does not replace the collective-bargaining grievance process followed by agreement-covered employees.

In addition to assisting with workplace disagreements and conflicts, Employee Relations will assist managers and supervisors in their role as people managers by providing workshops and resource tools on various topics such as, managing conflict, mastering difficult conversations, and providing performance feedback. Employees who need assistance managing these types of issues may contact the **Ethics & Compliance Hotline at (866) 908-7231**.

This new service is part of a realignment of duties carried out by Human Resources and the Law department. As part of this shift, most employee discrimination and harassment complaints formerly directed to the Dispute Resolution Office (DRO), have been assigned to the Equal Employment Opportunity (EEO) Compliance Unit within the Law department. This group will also continue to handle complaints filed with federal and local agencies.

Employees who wish to report an incident of discrimination, harassment or bias, should also call Amtrak's Ethics and Compliance Hotline. Complaints of discrimination and harassment received through the Hotline will be immediately forwarded to the EEO Compliance Unit. EEO Compliance professionals are ready to assist employees in investigating and resolving a complaint or routing it to the department best able to assist them.

Operations: Amtrak's Joseph R. Biden Jr. Wilmington Delaware Station and the Superliner Coach Overhaul Program have been recognized for design excellence in the 2011 Edition of the prestigious Brunel Awards International Railway Design Competition. Over 150 entries were submitted for consideration from railway and government organizations throughout the world, and only 19 were awarded the prestigious Brunel Award. The Brunel Award recognizes the best in railway architecture, engineering, landscape and environmental design, product design, locomotive and car design, graphic arts, and corporate branding amongst the world's railways.

Employee Recognition Policy Established

A Recognition Policy has recently been established to emphasize Amtrak's commitment to honoring the dedication of its workforce. To roll out this policy, recognition committees are being formed within each department and tasked with implementing recognition strategies for their department. This policy does not replace other recognition efforts currently in place, but serves as a guide to more consistently recognize employees for their accomplishments.

Policy guidelines can be found on the intranet under "Employees" → "Policies" → "Human Resources Policies." The official policy is posted on the intranet at "Employees" → "Policies" → "Amtrak Policy and Instructions Manual" (APIM) → "Human Resources."

New LA Maintenance Facility Features Improvements to Increase Efficiency and Safety

On Thursday Aug.18, Amtrak will host a ribbon cutting ceremony to officially celebrate the opening of the Los Angeles maintenance facility. The facility will provide an upgraded, more efficient and environmentally friendly location for mechanical employees to perform safety inspections and other maintenance work. The facility will service and maintain passenger equipment used on long-distance routes including the *Coast Starlight*, *Southwest Chief*, *Sunset Limited* and on California-supported corridor services.

The building incorporates many features from the Leadership in Energy and Environmental Design (LEED) standards for environmentally sustainable construction, including redevelopment of an existing site, high bay florescent lighting with photocell sensors, large ceiling fans, sky lights and point-of-use instant hot water in lieu of water heaters. The new building also covers work that was previously performed outdoors. The covered facility will allow for the addition of a second shift at night, increasing the output and decreasing the out-of service time for equipment.

Considerable planning went into the layout of the building. The new facility is designed using a "progressive spot" approach, which allows cars to move through a standard production line maximizing efficiency. The facility features 35-ton traversing jacks stored within the shop floor, making it safer and more efficient to remove and replace the trucks or running gears of passenger cars.

The new LA facility was a \$24.5 million project that was funded through the American Recovery and Reinvestment Act economic stimulus program. Kemp Brothers began construction on February 22, 2010.

Security Training Reminder

Front-line employees are urged to provide input for the development of 2012 Block Training by filing out a short survey. The 12-question survey is accessible via the Amtrak Employee Resource site, <http://customerservice.amtrak.com> through Aug. 31. You can also access the site from the Amtrak intranet home page under "Employees" or under "Library" → "Service Standards."

Operations: Amtrak Cascades Trains 513 and 516 will continue to serve Vancouver, B.C., following discussions between the state of Washington and Canadian government officials. The service's second roundtrip to Vancouver was originally launched in conjunction with the 2010 Winter Olympics, and it has since exceeded ridership expectations.

Flood Relief: Employees who wish to contribute to the ongoing flood relief efforts in North Dakota can do so by donating to organizations like the Salvation Army <https://secure20.salvationarmy.org/?projectId=US-C-NOR-NDFlood>. Amtrak serves seven cities in North Dakota, of which the hardest hit was Minot.

Marketing: Amtrak is providing transportation for 10 students from the Coretta Scott King Young Women's Leadership Academy in Atlanta to travel to Washington, D.C., for the Dr. Martin Luther King, Jr., National Memorial Dedication held on Sunday, Aug. 28. The students will ride aboard the *Crescent* and will be greeted at Amtrak's Union Station by Rep. Lewis and Dr. Bernice A. King.

US DOT Announces Obligation of \$450 Million for High-Speed Rail Project

U.S. Department of Transportation Secretary Ray LaHood today announced \$450 million in High-Speed Rail funding for Amtrak to upgrade its rail infrastructure between Trenton, N.J., and New York City, resulting in improved on-time performance and reliability. The investment will also lead to an initial increase in top operating speeds from 135 mph up to 160 mph along the 24-mile segment of the corridor between Trenton and New Brunswick, N.J. With the procurement of new generation high-speed rail trainsets in the future, service would reach 186 mph.

An additional \$294 million will help alleviate major delays for trains coming in and out of Manhattan. Improvements to the Harold Interlocking rail junction in Queens will eliminate congestion and allow for the future growth of high-speed service along the corridor. A new flyover will also separate Amtrak trains travelling between New York and Boston from commuter trains. Construction on both projects is set to commence in 2012.

NCFO Agreement Ratified

Employees represented by the National Conference of Firemen and Oilers have overwhelmingly ratified their new five-year contract. This is patterned after others already reached and provides for wage increases which will be placed into effect shortly.

The majority of unions that represent Amtrak employees have reached new agreements; the remaining unions with which Labor Relations is meeting have already been presented with comprehensive proposals.

September is National Preparedness Month, 10-Year Anniversary of 9/11

September not only marks the tenth anniversary of 9/11, but it is also National Preparedness Month. Whether it's an earthquake, hurricane, flood or terrorist attack, most of us or people close to us have experienced an emergency situation that is or could be disastrous. That's why preparation and vigilance are so critical.

All employees should take precautions to prepare for and respond to potential emergencies, including ones that you think might never happen. Please take the time to visit www.ready.gov and www.fema.gov to help protect the welfare of your co-workers, your family and yourself. Don't leave yourself unprepared.

This week, watch for a letter in your mailbox at home from President and CEO Joe Boardman and Vice President and Chief John O'Connor that emphasizes importance of preparedness and vigilance. There's also an Amtrak National Preparedness Month calendar that can be downloaded from the Amtrak intranet by clicking on the "Police" tab on the home page and then choosing "National Preparedness Month Calendar."

Amtrak's approach to security has changed significantly since September 11, 2001. Amtrak Police has added a number of measures that are visible — and not so visible — to help safeguard employees and passengers. Among the greatest of Amtrak's security resources are our employees. All employees play a role in security, and it is vitally important that you remain aware of your surroundings. If you see something unusual or suspicious call Amtrak Police at **800-331-0008** or dial 911 immediately.

Among other tactics, Amtrak Police has added officers and K-9 explosive detection teams that patrol stations and trains. Amtrak has formed new partnerships with international, federal, state and local law enforcement and counterterrorism entities. Working with the Transportation Security Administration we've initiated random passenger baggage screenings, and we've expanded the Operation RAIL SAFE activities that result in a force multiplier with our partnering agencies. We've also established Station Action Teams that coordinate response to disasters in highest-risk areas.

Working closely with the TSA, FBI Joint Terrorism Task Force and others, Amtrak is increasing police and special operations patrols on bridges, tunnels, right-of-way and other areas, given the upcoming anniversary of September 11.

Check Amtrak's YouTube channel next week to hear more about the company's security measures from Chief O'Connor (www.youtube.com/amtrak).

Service Restored on Some Routes in the Aftermath of Hurricane Irene

Some service along the Northeast Corridor and other parts of the country resumed today, following the landfall of Hurricane Irene this weekend.

While some service has been restored, many trains were cancelled today, including *Acela Express*; *Northeast Regional* trains between Boston and Philadelphia, and between Washington and Newport News; *Empire Service*; *Ethan Allen*; Springfield Shuttles; *Crescent*; *Pennsylvanian*; *Lake Shore Limited*; *Auto Train*; *Palmetto*; and *Silver Service*, among others. Other services have been truncated.

Keystone Service between Philadelphia and Harrisburg resumed mid-afternoon.

The operating plan for the coming days is being developed in accordance with progress made on flooding, debris on tracks and power issues, among other factors.

Thank you to all of the employees across the company who are helping manage the hurricane; from preparation, during the storm and in its aftermath to restore service.

Benefits: Your 2012 Benefits Confirmation Statement should be arriving at your home address soon. The statement confirms your selected benefit options effective January 1, 2012 through December 31, 2012 (unless you experience a qualifying status change). **Be sure to review it carefully.** If the elections do not accurately reflect your choices, please call the Amtrak Benefits Service Center at 1-800-481-4887.

Station Update: On Dec. 3, Amtrak joined state and local officials at a dedication ceremony at the Lawrence, Kan., station following the completion of more than \$1.5 million in station improvements. The station is served by the *Southwest Chief*. Improvements include a 500-foot passenger boarding platform, access to parking compliant with the Americans with Disabilities Act, repairs to the platform canopy and new exterior lighting. As a result of the improvements, the station is better equipped to accommodate service expansions envisioned by Kansas and other states.

Amtrak to Meet with Community Leaders and State Officials at Civic Conversation Event

On Thursday, Amtrak will host local and state leaders in a Civic Conversation in Burlington, Vt., with a focus on the development of stations on routes along *Northeast Regional*, *Adirondack*, *Vermont*, *Ethan Allen Express* and *Downeaster* routes, the largest number of routes ever represented at one of Amtrak's Civic Conversations.

The Civic Conversation will serve as a forum and workshop to discuss transportation-oriented development, the Americans with Disabilities Act and engineering guidance, funding sources, real estate issues and how best to proceed with station development. The discussion will also provide a platform for communities to share how they successfully guided their station projects through the design, funding and construction phases.

"These forums strengthen Amtrak's relationships with the communities we serve, while providing local officials useful information that will help enhance their stations," said Vice President of Government Affairs and Corporate Communications Joe McHugh.

The eighth of its type to be held across the system, the event aims to encourage communities to make station improvements in recognition of the role they play in driving economic development, linking transportation modes and providing other benefits to communities.

For more information about the Civic Conversation and other station information, visit www.GreatAmericanStations.com.

Downeaster and Capitol Corridor Services Celebrate Anniversaries

Two state-supported services are celebrating anniversaries this week, marking decades of growth.

The *Downeaster*, which offers five roundtrips daily between Boston and Portland, is celebrating its 10th anniversary this week. Many improvements have been made to the service over the past decade, including a 20-minute reduction in travel time, a more convenient schedule and increased frequencies. In addition, the current annual *Downeaster* ridership of more than half a million riders has doubled since 2005. Expanded service to Freeport and Brunswick will start next year.

To honor 10 years of successful service, NNEPRA (Northern New England Passenger Rail Authority) is hosting a week-long celebration, beginning today and culminating with an event at the Portland, Maine, station on Dec. 15.

The *Capitol Corridor* is celebrating 20 years of service this week. The service offers convenient, frequent and affordable daily service between the Sacramento region and the Bay Area. What started in 1991 with just three roundtrips and 225,000 passengers annually has grown in the last 20 years to 32 trains carrying more than 1.7 millions passengers annually.

The Capitol Corridor Joint Powers Authority (CCJPA) is thanking passengers for their loyalty and support over the past 20 years by offering them the chance to earn extra Amtrak Guest Rewards® points and save on tickets during the month of December.

Amtrak's 401(k) Retirement Savings Plans Fund Changes

This week, employees who participate in Amtrak's 401(k) Retirement Savings Plans with Fidelity Investments will receive a letter at home describing changes associated with four funds.

As of the market close (generally 4:00 p.m. Eastern Standard Time) on Jan. 3, 2012, four mutual funds will no longer be available to plan participants. At that time, all existing balances and future contributions in these investment options will be transferred to other options with a similar investment style and category. There is no action required of the 401(k) participants for this transfer. Employees who don't want the transfer to be made to the funds listed in the letter may choose to make other choices.

Employees with questions may call Fidelity at 1-877-477-2685 or visit www.mysavingsatwork.com/amtrak.

2012 Holiday Schedule

Holidays observed at Amtrak vary depending on an employee's status. Holidays for agreement-covered workers are defined by each union's labor agreement, which may also include personal holidays. Each agreement can be found on the intranet under "Employees" → "Labor Agreements."

Amtrak will observe the following 2012 dates as holidays for non-agreement employees:

<u>Holiday</u>	<u>Day Observed</u>
New Year's Day	Jan. 2
Martin Luther King, Jr. Day	Jan. 16
President's Day	Feb. 20
Memorial Day	May 28
Independence Day	July 4
Labor Day	Sept. 3
Veteran's Day	Nov. 12
Thanksgiving Day	Nov. 22
Christmas Day	Dec. 25

Non-agreement employees hired in 2012 will receive personal days based on their date of hire. Employees hired between Jan. 1 and May 31 will receive two personal days, while those hired June 1 through Aug. 31 are entitled to one personal day. Employees hired Sept. 1 or after will not have any personal days.

Holidays for agreement-covered employees are subject to each specific labor agreement. Employees should check with their union to be sure which holidays are included in each agreement. Some agreement-covered employees also receive personal holidays, the number of which varies by agreement.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library" → "Policies."

2012 Amtrak Calendars: The 2012 Amtrak tabloid (\$5) and wall (\$10) calendars are now available for purchase. There are three ways to purchase the 2012 calendars:

- Visit the Amtrak Online Store at: <http://store.amtrak.com/>
- Call 1-800-369-4257
- Mail your order to:
Staples Promotional Products
Attention: Amtrak Customer Service Representative
1520 Albany Place S.E.
Orange City, IA 51041

Human Resources: Employees who have moved in the past year should be sure to update their mailing address in the Employee Information Portal. Addresses should be changed by Jan. 10 in order for W-2 tax forms to be mailed to the correct address. The Employee Information Portal can be accessed through the intranet under "Employees" → "Employee Information Portal."

Make Healthy New Year's Resolutions

Beginning in January, non-agreement employees will have access to a variety of programs through the Cigna medial plan that will help you make your resolutions a reality. These programs include topics ranging from stress, nutrition and physical activity. Join at www.mycigna.com.

- **Health Advisor:** Individuals may receive help achieving personal health goals through comprehensive, personalized health coaching.
- **Behavioral Coaching:** This service will help drive behavior changes in the areas of hypertension, high blood pressure, pre-diabetes, healthy eating and physical activity.
- **Disease Management:** Check out Your Health First, which includes a weight management program to address certain risk factors such as blood pressure, cholesterol and risk behaviors including lack of physical activity, tobacco use, weight and stress.

Feb. 7, 2011

Proposal Unveiled Today is Key Element of NEC High-Speed Rail Plan

President and CEO Joe Boardman and Amtrak Board member Anthony Coscia joined Sens. Frank Lautenberg (D-NJ) and Robert Menendez (D-NJ) in Newark today to announce a proposal that would significantly increase capacity for intercity and commuter service into New York City, and lays the foundation for Amtrak's vision for 220 mph service on the Northeast Corridor.

Operational Update: On weekends, starting Feb. 12 through March 27 (and President's Day, Feb. 21), all southbound *Acela Express* and many southbound *Northeast Regional* trains will operate up to 10 minutes later than the published schedule, as Amtrak crews replace interlocking switches near Aberdeen, Md.

Known as the "Gateway Project," the proposal would add 13 NJ Transit trains per peak hour and eight Amtrak trains per hour into New York City. The project involves building two new tunnels under the Hudson River, adding two more tracks between Newark and the tunnels, replacing the 100-year-old Portal Bridge with dual spans that would allow faster speeds, connecting to the new Moynihan station as well as to a new Penn Station South that would be linked to the current New York Penn Station.

"The Gateway Project is essential to the future growth and economic development of the entire Northeast region and will provide for greater capacity, connectivity and convenience for Amtrak and commuter passengers in the heart of Manhattan. It is a critical first step that we can take now to bring 220 mph Amtrak high-speed service to the Northeast Corridor," said Amtrak President and CEO Joe Boardman.

Amtrak's FY '12 Grant and Legislative Request will include \$50 million to begin preliminary engineering and design on the two new rail tunnels. The entire Gateway Project could be completed in 2020 at an estimated cost of \$13.5 billion.

"Intercity and commuter rail passengers in New York and New Jersey are in need of increased rail capacity. The two new trans-Hudson tunnels envisioned under this plan will provide long-sought-peak-period operational capacity and are an investment that will improve transportation flexibility and reliability for decades to come," said Tony Coscia, Amtrak Board of Directors.

In addition to adding capacity, the project would restore fluidity to a tightly constrained system, enhance station facilities in Manhattan, improve connections for both Amtrak passengers and commuters, and provide the capacity to bring trains into Manhattan when the first stage of Amtrak's Next-Gen high-speed rail program is introduced.

Feb.14, 2011

Message From Joe Boardman

Dear Co-workers,

This week may be a bit of a confusing one for those of you following the Amtrak funding process. First, we are awaiting decision on our appropriation for this fiscal year, which members of Congress are currently debating. Second, we will be submitting our FY '12 budget request to Congress today. Third, President Obama is releasing his FY '12 budget, which includes more information about the administration's \$53 billion plan for advancing intercity and high-speed rail. First things first, so I want to focus here on our efforts to secure sufficient funding for this fiscal year.

Last week, I spent a lot of time on Capitol Hill educating members of Congress about the need for sufficient funding for Amtrak this fiscal year. We will continue to do so in an effort to support a constructive and informed debate.

There are reports about some of the numbers being discussed, but they are not final and they're fluctuating. For that reason, I don't want to get too caught up in the specific numbers at this point.

We will have a better sense in the next two weeks. We're currently operating according to a Continuing Resolution that is slated to expire on March 4, and we expect the House and Senate to take action on our appropriation over the course of the next couple of weeks. During this time, we expect to see amendments offered in support of, and against, Amtrak funding.

We don't know how we will make out on the other side of this. It is disheartening to consider the very real prospects that we may experience budget cuts, especially at a time of record ridership and demand for more passenger and high-speed rail. Now with oil at more than \$100 a barrel, there is a pressing need for a national policy that sees rail as a solution to transportation congestion, economic recovery, infrastructure investments, global competition and reliance on foreign oil.

You may see a lot of news articles about us in the coming weeks, and they may not all be positive. I urge you not to be consumed by what's being said, but know that we are working closely with members of Congress as we face a tough battle.

Thank you for your support and for what you do every day.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Boardman', written in a cursive style.

Joe Boardman
President and CEO

Ridership: Amtrak posted the 15th straight month of ridership growth in January, and the best January on record with 2,126,429 passengers. Amtrak has set annual ridership records in seven of the last eight fiscal years, including more than 28.7 million passengers in FY 2010.

Operational Update: Effective Feb. 15, operation of a limited-stop service on the *Pacific Surfliner* route begins. Train 563 will operate weekdays only, departing San Diego at 7:05 am, and stopping at Solana Beach, Oceanside, Irvine, Anaheim, and Los Angeles. Train 565, which currently offers daily service, will operate weekends only after the Feb. 15 schedule change.

Amtrak Submits FY '12 Budget

Amtrak's Grant and Legislative Request for FY '12 funding includes plans for the purchase of 40 additional *Acela Express* cars, among other capital improvements across the system. The \$2.222 billion request includes \$1.285 million for capital investments, \$616 million for operating expenses and \$271 million for debt service.

Amtrak is also seeking \$50 million to begin design and preliminary engineering work for the Gateway Project announced last week.

"It is necessary to balance the real concern over federal spending with the ongoing need to invest in the nation's intercity passenger rail network to meet growing demand, support economic recovery and fuel the next generation of growth," said President and CEO Joe Boardman.

The entire budget request can be viewed on Amtrak.com or on the Amtrak intranet under "News"→"Legislative."

Benefits: You can now update your life insurance beneficiary information electronically by logging into AmtrakBenefits.com and clicking on “Beneficiary Designations” on the Welcome Page. You can also update your life insurance beneficiary information by calling 800-481-4887.

Social Media: Amtrak has launched its official YouTube channel featuring videos on topics such as safety and security, the Trails & Rails program, and our vision for high-speed rail. You can visit Amtrak on YouTube at www.YouTube.com/Amtrak. You can also join Amtrak on Facebook at www.Facebook.com/Amtrak and follow us on Twitter at www.Twitter.com/Amtrak.

E-mail Address Change for Employees in the Amtrak Office of Inspector General

Starting this week, e-mail addresses for Amtrak employees in the Office of the Inspector General (OIG) will end in “amtrakoig.gov,” rather than “amtrak.com.” The transition will take place this week.

Once this transition is completed, if you send an e-mail to an OIG employee using his or her old amtrak.com address, you will receive a reply that the e-mail is “Undeliverable.” To find an OIG employee’s new e-mail address, open your Outlook Address Book where all OIG employees will be listed with their new amtrakoig.gov e-mail addresses.

The switch to the new addresses brings the OIG in line with the practices of other IG offices.

***Auto Train* Begins Ticketless Check-In**

Passengers boarding the *Auto Train* in Sanford, Fla., this past Sunday took part in the launch of Ticketless Check-In, an important step toward making electronic ticketing available on all Amtrak trains later this year. With Ticketless Check-In, *Auto Train* passengers no longer need to carry traditional paper tickets.

Under the new system, *Auto Train* passengers simply check in at the station by showing their IDs or a copy of the confirmation page they received when they paid for their trip, and they no longer have to worry about holding on to their paper tickets. The change offers an even more convenient trip for *Auto Train* customers, many of whom book stays of a month or longer before their return trip.

The *Auto Train*’s unique airport-style check-in process provides an early opportunity for Amtrak to get familiar with ticketless travel, while the streamlined system helps station ticket agents process high passenger volumes more efficiently.

The new system manages reservations completely electronically by connecting directly to the company’s finance and revenue systems. “This new way of tracking and reporting ticket revenue is the foundation that will enable Amtrak to introduce eTicketing on other routes later this year,” said Tony Flynn, eTicketing’s program manager.

Ticketless Check-In is slated to begin at the Lorton, Va., station on Friday, Feb. 25. More information about *Auto Train* Ticketless Check-In is on Amtrak.com → “Routes” and then click on the *Auto Train* link.

Tentative Agreement Reached With Sheet Metal Workers

Amtrak has reached a tentative agreement on a new labor contract with the Sheet Metal Workers International Association covering the period of Jan. 1, 2010, through Jan. 1, 2015.

The new contract must be ratified by the union membership and covers 440 Amtrak employees. Currently, Amtrak has ratified agreements with nine labor organizations and joint councils; representing a total of 10,000 employees, or 58 percent of the total unionized labor force.

Benefits: You can now update your life insurance beneficiary information electronically by logging into AmtrakBenefits.com and clicking on “Beneficiary Designations” on the Welcome Page. You can also update your life insurance beneficiary information by calling 800-481-4887.

Amtrak, Community Leaders to Meet About Stations Along the Route of the *Cardinal* This Week

On Thursday, Amtrak will host a meeting with local, state and federal representatives of the communities along the route of the *Cardinal* to share best practices on how to preserve, restore and upgrade stations.

The Civic Conversation, which will be held in Huntington, W.Va., will cover transportation-oriented development, the Americans with Disabilities Act and engineering guidance, funding sources, real estate issues, and how best to proceed with station development.

The seventh of its type to be held across the system, the event aims to spur communities to make station improvements, in recognition of the role they play in driving economic development, strengthening city centers, linking transportation modes and providing other benefits to communities.

2011 PSSA Nomination Forms Now Available Online

Nominations are now being accepted for the 2011 President’s Service and Safety Awards (PSSA).

The PSSA program provides the highest recognition for employees and external business partners who have made outstanding contributions to the company. A committee of employees representing various departments and locations review the nominations and select award recipients. Later this year, award recipients will be announced and formally recognized at a luncheon to be held in Washington, D.C.

Nomination forms for the 2011 program are currently posted on the Intranet and can be found at “Employees” → “Awards and Achievements” → “2011 PSSA Nomination Forms.” Forms are also posted on the Intranet under “Library” → ☐ “Forms” → “New and Revised EForms.” The nomination period runs until **Friday, May 13.**

Operational Update: On Monday, March 14, 2011, schedules in the Northeast region will be modified, primarily for the commencement of track work by the Track Laying System (TLS) in New Jersey. In addition, many commuter agencies in the Northeast will be issuing modified schedules on that date and several Amtrak trains have been adjusted as a result. A summary of schedule changes planned for the Northeast on Monday, March 11 can be found on the Intranet at “Library” → “Daily Advisories” → “February 2011” → “Daily Advisories” → “Northeast Corridor schedule changes March 14, 2011”.

Operations Update: *Coast Starlight*, Amtrak *Cascades* and *Pacific Surfliner* began operating according to adjusted schedules on Jan. 2 due to significant track work being performed by Union Pacific Railroad. The adjusted schedules are set to remain in effect until early April.

Marketing: College students in Illinois, Michigan, Missouri and Wisconsin may enter the second annual Amtrak TRAINsportation Video Contest by submitting a train travel-themed video featuring *Lincoln Service*, *Wolverine Service*, *Missouri River Runner* or *Hiawatha Service*. Submissions must be made by Feb. 28, and winners will receive more than \$3,000 worth of prizes. For complete details and rules, visit www.AmtrakTransportationVideoContest.com.

Executives Use Media Attention to Tout Amtrak

Amtrak's record ridership and ticket revenue during the 2010 fiscal year, along with the increasing profile of transportation issues in America, have led to continued media coverage from both industry and consumer news outlets. Amtrak executives are using this attention to further promote the company as the premier high-speed rail provider in the U.S. and an integral part of the nation's transportation system.

Following are excerpts from two items that have been published in recent weeks. For the full story, click the links or visit the website listed:

[President and CEO Joe] Boardman's position on the transit industry is plain and simple. "Rail needs to be and is the backbone of moving freight in this country. It needs to be the backbone of moving people in this country....And if there is not an intercity rail passenger transportation system, then you have failed your country. Period."

...Is Amtrak making the changes needed to become that backbone? Boardman says it already is.... "[We need] to look at both green field high-speed rail like California and Florida, and how we take our own incremental high-speed rail, like is being thought of in the Midwest, in New York and some other places.... What Amtrak is, is we operate railroads."

"Our strength, our key competitive advantages are our men and women and our national interconnectivity. Coast-to-coast, border-to-border."

[Mass Transit](http://www.MassTransitMag.com) (www.MassTransitMag.com)
Dec. 2010-Jan. 2011 Issue

The next half-century will be defined by the emergence of "megaregions" — extended corridors of interconnected metropolitan areas, with shared economic sectors and linked infrastructure. High-speed rail can and should be among those links.

Over the course of its 10 years, Acela high-speed service has improved the connectivity and mobility of the Northeast Corridor megaregion....Amtrak has a bold vision for next-generation high-speed rail in the Northeast, with trains operating at maximum speeds of 220 m.p.h. on a new, two-track route that would supplement the existing service. Such a network would save significant travel time, dramatically improve mobility, and mitigate congestion. ...

This is a revolutionary vision of the future, but one that is also attainable. Acela has shown that high-speed rail does work in America, and that prudent public investments in passenger rail can pay huge dividends. It also has shown Amtrak's ability to innovate and reinvent itself.

Op-Ed by Vice President of High-Speed Rail Al Engel
[Philadelphia Inquirer](http://www.philly.com/inquirer) (www.philly.com/inquirer)
Dec. 21, 2010

Reid Joins Amtrak as Chief Corporate Liaison

U.S. Department of Transportation veteran Peggy Reid joins Amtrak today as chief corporate liaison. This new executive-level position reports directly to President and CEO Joe Boardman. Reid has held multiple senior leadership positions within the U.S. Department of Transportation and will be responsible for improving internal coordination between Amtrak departments on administrative, financial and operational activities.

Prior to joining Amtrak, Reid served for eight years as the Federal Railroad Administration's associate administrator for financial management and administration. She directed all Information Technology, Acquisition and Grants programs and Human Resources, and was also responsible for financial performance and budgeting for the agency and its eight regional offices.

"We can't continue operating as a collection of individual departments if we want to reach our potential," said President and CEO Joe Boardman, noting that programs such as Safe-2-Safer and Strategic Asset Management are moving the company in the right direction. "Peggy's job is to serve as an internal consultant to coordinate the process improvements and strategic planning we need to best serve our passengers and partners."

Other duties Reid assumes are management of organizational development, leading top-priority programs to make sure they align with strategic needs, and advising the CEO and other executives on major policies and issues facing Amtrak.

Reid began her career at the Civil Aeronautics Board and then worked for several years in the Office of the U.S. Secretary of Transportation before moving to the Federal Railroad Administration. During her tenure at the FRA, she also held the positions of Human Resources director and acting director of Information Technology. She graduated magna cum laude from the University of Maryland with a bachelor's degree in business and holds an associate's degree from George Washington University.

New Fitness Program Aims to Help Employees Get Healthier

From Feb. 1 to March 14, individuals and teams of Amtrak employees may participate in the "Stay on Track...Keep Walking" competition. Entrants will receive a pedometer that records how many steps are taken during the competition. Results can then be downloaded to a computer and reports submitted to the Health Services group in Human Resources.

Winners will receive various prizes, but all will benefit from the exercise. The deadline to sign-up is Jan. 21. For more information or to sign-up, contact Rosa Nesmith at NesmitR@amtrak.com or 202-906-2736.

Operations Update: *Crescent* trains will not operate between Atlanta and New Orleans on Monday through Thursday of each week from Jan. 10 through Feb. 17. Norfolk Southern is performing extensive tie, rail and bridge work along the route.

Amtrak Mourns Loss of Auto Train Founder

Eugene K. Garfield, the man responsible for creating the *Auto Train*, passed away on Dec. 26 in Florida. The inaugural run of the Auto Train took place in 1971, and the service became profitable within three months.

Amtrak began operating the service in 1983, and today it remains one of the company's highest performing routes.

Operations Update: Due to weekend track improvements being performed near Parkesburg, Pa., from Jan. 22 through Feb. 6, westbound *Keystone Service* trains will operate according to later schedules at select stations. In addition, westbound trains will stop at eastbound platforms at Coatesville and Parkesburg during this project.

Operation Lifesaver: Amtrak has received a grant from the Illinois Commerce Commission through its Public Education and Enforcement Research Study (PEERS) to support Operation Lifesaver. The funds will be used to provide materials and close-caption Amtrak's grade crossing safety video for hearing impaired students.

Marketing: Special \$89 roundtrip weekend fares for travel on Thursdays through Mondays are available for *Adirondack Service* trains now through April 28. Additionally, up to two children ages 2-15 may accompany each adult at a special discounted fare of \$44.50.

Company Seeks Items for Amtrak Museum Train

As part of its 40th anniversary celebration, Amtrak will operate a special museum train through major employee hubs across the country, beginning on National Train Day in Washington, D.C., on May 7. Employees are asked to donate or loan Amtrak historical items to outfit the museum train so the company can best illustrate its 40-year history to employees and passengers throughout the nation.

"We're retrofitting three baggage cars that will be pulled by restored F-40 and P-40 locomotives to make a rolling Amtrak museum," explained Joe McHugh, vice president, Government Affairs and Corporate Communications. "We want it to be as rich with Amtrak history as possible so we are looking beyond our own archives and asking employees to donate or loan us items from their personal collections."

Specific items needed for the museum train include china that has been used in dining cars; uniforms from various eras worn by passenger service representatives, red caps, on-board service crews and conductors; advertisements from across the country; ticket stock used throughout the years; and old menus from all trains.

Donated items will be accompanied by a plaque noting the person(s) who made the contribution to the museum. Those who contribute items as a loan will have their name appear in the exhibit brochure. Items must be loaned for a period of at least one year and will be returned to the owner.

To make a donation or loan items to Amtrak for the museum train, contact Suzi Andiman at AndimaS@amtrak.com or 202-906-2537. Items should be clearly marked as either a donation or loan and sent through secure mail, FedEx or UPS along with the owner's name, mailing address and phone number. Donated items are not tax deductible.

Marketing: Amtrak will be featured in the HBO series *Real Sports with Bryant Gumbel* at 10 p.m. EST on Tuesday, Jan. 25. A segment focusing on renowned football journalist Peter King includes his weekly trip from New York to Boston on *Acela Express*. King regularly uses his time aboard the train to write his columns. The episode will re-broadcast several times this week and will be available on HBO On Demand from Jan. 31 – Feb. 21.

Operational Update: In response to customer demand, the *Keystone Service* will add Quiet Car® service starting Jan. 24, providing passengers with a peaceful, quiet atmosphere to work or rest without distraction. *Keystone Service* trains are financed in part through funds made available by the Commonwealth of Pennsylvania Department of Transportation.

Correction: Last week's edition of Amtrak This Week included incorrect information about a grant awarded to Amtrak from the Illinois Commerce Commission to support Operation Lifesaver activities. Amtrak received a notice that the company is eligible for the award, but a grant agreement has not yet been executed. We regret the error.

Diversity Training Underway

Amtrak's non-agreement employee diversity training initiative for Fiscal Year 2011 is now underway, with the first class taking place on Feb. 15 in Wilmington. The diversity training program makes clear the corporation's position on diversity and provides the background and information necessary to work successfully in a diverse environment.

Diversity training is mandatory for all non-agreement employees as follows:

[Classroom Diversity Training](#) is mandatory for non-agreement employees who have no previous record of classroom diversity training. This includes recently hired employees, as well as employees promoted from agreement into non-agreement positions during the previous fiscal year.

[Online Diversity Refresher](#) is mandatory for non-agreement employees who completed classroom and/or online diversity refresher training in FY '08 and prior. The online course is now available.

If you are unsure as to whether to attend a class session or complete the online refresher, please speak with your department's Diversity Training Representative (DT-Rep). [Click here for a list of DT-Reps](#), or refer to the intranet under "Employees" → "Business Diversity" → "Human Resources & Diversity Initiatives Menu" → "Educational Links" → "Amtrak's Diversity Training Initiative."

For a class schedule and complete Diversity Training information [click here](#), or refer to the intranet under "Employees" → "Business Diversity" → "Human Resources & Diversity Initiatives Menu" → "Educational Links" → "Amtrak's Diversity Training Initiative."

Smart IDs to Be Activated

Smart ID badges will be activated at Noon, EST on February 7. Amtrak personnel hired before Nov. 15, 2010, must pick up their Smart IDs before Feb. 7, when their old badges will no longer work. Amtrak personnel hired after Nov. 15 will receive their badges in the coming days, and can continue to use their old badges in the meantime. More information on Smart IDs is available on the intranet under "Police" → "Smart IDs".

Diversity Training Underway

Amtrak's diversity training initiative for Fiscal Year 2011 is now underway, with the first class taking place on Feb. 2 in Washington D.C. Employees hired after Nov. 15 will receive their badges in February, and can continue to use their old badges until then. More information on Smart IDs is available on the intranet under "Police" → "Smart IDs".

40th Anniversary Commemorative Locomotive Enters Revenue Service

The first of four 40th Anniversary commemorative P-42 locomotives joined revenue service yesterday as the lead engine on the Washington-bound *Capitol Limited*.

Marketing: Tune in to the Super Bowl halftime show on your local Westwood One radio station this Sunday to hear who will be the recipient of the tenth annual Amtrak Player of the Year Award.

Operational Update: Amtrak *Cascades*, which operates between Eugene, Ore., and Vancouver, B.C., is the latest route to offer Wi-Fi service to passengers as part of AmtrakConnect®. The service has been available on the *Acela* since March 2010. During the coming months, Amtrak plans to add Wi-Fi to additional routes, with the goal of making it available on all trains over the next several years.

With a paint scheme first introduced in 1979, locomotive #145 displays one of four historic paint schemes. All four P-42 diesel-electric locomotives will be in service by the end of April, and will operate on trains across the system. Each locomotive had been previously scheduled to receive a new paint job and is being painted at the Beech Grove maintenance facility.

To view a photo of engine #145, please visit the photos tab on Amtrak's Facebook page (facebook.com/Amtrak). As each locomotive becomes available for service, Amtrak will issue a Twitter message at twitter.com/Amtrak and post a photo on its Facebook page.

As part of its 40th anniversary celebration, Amtrak will debut a special "exhibit train" on National Train Day in Washington, D.C., on May 7, and then travel through major employee hubs across the country for a one-year period. It will include two locomotives with historic paint schemes and use renovated baggage cars to display educational exhibits focusing on each decade of the railroad's existence with vintage advertising, past menus and dinnerware, period uniforms, photographs and other memorabilia. Dates and locations of when and where it will travel will be announced soon.

Employees are asked to donate or loan Amtrak historical items to outfit the exhibit train so the company can best illustrate its 40-year history to employees and passengers throughout the nation. To make a donation or loan items to Amtrak for the train, contact Suzi Andiman at AndimaS@amtrak.com or 202-906-2537. Items should be clearly marked as either a donation or loan and sent through secure mail, FedEx or UPS along with the owner's name, mailing address and phone number. Donated items are not tax deductible.

Other elements of the 40th anniversary activities will include a book entitled "Amtrak: An American Story," a documentary DVD illustrating the history of Amtrak, and a special anniversary website that will be launched this spring.

Federal Railroad Administration Finalizes Loan for 70 New Electric Locomotives

The Federal Railroad Administration has finalized a \$562.9 million Railroad Rehabilitation and Improvement Financing (RRIF) loan to Amtrak to finance the acquisition of 70 electric locomotives that will improve performance and service reliability on the Northeast Corridor, including the Keystone Line.

The RRIF loan amount includes the \$465.9 million contract for the locomotives, plus another \$97 million for maintenance facility upgrades and spare parts.

Amtrak announced its plans to purchase the 70 new electric locomotives from Siemens last October. With delivery beginning in 2013, the new locomotives will replace units that have been in service for 20 to 30 years.

“Record numbers of passengers are riding Amtrak trains across our national network. To better serve our customers, we are implementing a fleet replacement and renewal plan to improve the reliability and performance of our equipment,” said President and CEO Joe Boardman.

The locomotive contract is a key element of the Fleet Strategy Plan and follows a July 2010 announcement of a \$298 million contract to build 130 single-level cars to support growing ridership on long-distance trains.

“We appreciate the strong support of the Obama administration in advancing passenger rail in America,” said Boardman. “The Fleet Strategy Plan will provide new and modern equipment for passengers, and develop and sustain the domestic production capacity needed for the long-term viability of intercity passenger rail in the United States.”

This acquisition will help spur the growth of a domestic manufacturing base, adding about 250 new jobs primarily in Sacramento, Calif., but also in Norwood, Ohio, Alpharetta, Ga., and help support suppliers across the country.

Amtrak has worked strategically to cut its debt by half between 2002 and FY 2010. The company projects that improved ticket revenue from more reliable locomotives can fund the debt service payments to repay this RRIF loan.

Operations Update: New schedules are in effect on most Amtrak *Cascades* service (effective Friday, July 1).

Be Part of Amtrak History

Bring your friends and family to visit the 40th Anniversary exhibit train as it makes its way through New England. Its next stops are Springfield, Mass., on July 9-10; New Haven, Conn., on July 16-17 and New London, Conn., on July 23-24. The schedule and other information are posted on www.Amtrak40th.com.

We need volunteers, so if you want the opportunity to be part of Amtrak history, and to meet fellow employees and supporters of passenger rail, please sign up. To volunteer, email your name, shift preference (8:30 a.m.-1:30 p.m. or 12:30 p.m.-5 p.m.), the day you would like to help out, and your email and phone number to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-New London.

Operations: Due to track work being performed by CSX Transportation, Trains 448 and 449 will not operate between Albany-Rensselaer and Boston on select dates through July 21. Motorcoach service will be provided.

Carry-on Baggage: On July 8, select Illinois, Wisconsin, Michigan and Missouri service trains began accepting carry-on golf bags for a \$10 charge. Reservations are required and can only be made with a reservation sales agent or station agent.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 51 cents per mile to 55 1/2 cents per mile, effective for mileage expenses incurred on or after July 1, 2011.

Quick Reference Resource Available for Employees Using Financial Systems

A resource is available to employees who work with budgets and materials procurement to assist them with account coding. As part of the implementation of SAM, the old FIS /ACK-URA account coding system has been replaced with a Work Breakdown Structure in SAP.

Employees can find translations from the old FIS values to the new SAP values (referred to as a crosswalk) on the QuickReference page of the SAM Program website. To access the SAM Program website through the Amtrak intranet home page, click How We Work → SAM Program.

Ridership Expected to Exceed 30 Million This Fiscal Year

Amtrak is projecting that its annual ridership will exceed 30 million passengers, setting an all-time record when the 2011 fiscal year ends on Sept. 30. June marked the 20th consecutive month of year-over-year ridership growth and our best June ever. Amtrak served more than 2.6 million passengers, a 4.1 percent increase over June 2010.

Amtrak is basing the 30 million passenger projection on strong June ridership numbers and expected ticket sales for July, August and September, Amtrak's busiest season.

When comparing the first nine months of FY '11 with the same period in FY '10, national ridership is up 6.4 percent. The FY '11 success can be attributed to all three major business lines which have all showed gains. Specifically, the Northeast Corridor has seen a 5.6 percent increase, state-supported and other short-distance corridors are up 7.8 percent, and long-distance trains have seen an increase of 3.9 percent.

"Having an all-time record within our sights underscores the importance of a connected system that offers high-speed, corridor and long-distance service to millions of travelers — more than 30 million — across the country," said President and CEO Joe Boardman. "Our employees on the front lines and behind the scenes are what make it happen every day, helping boost the growing appeal of passenger rail in our nation."

Amtrak Mourns UTU General Chairperson

Amtrak mourns the passing of Roger Lenfest, general chairperson of United Transportation Union's Amtrak General Committee, on July 10, 2011.

With roots in the Boston and Maine Railroad, Mr. Lenfest dedicated his 40-plus career to the railroad. **Something else we can say here.**

Mr. Lenfest had just been elected to the position he most recently held with the UTU, representing more than 2,000 Amtrak conductors, yardmasters and stewards. Amtrak extends its sympathies to his friends, family and the UTU membership who knew him.

Operations: Due to track work being performed by CSX Transportation, Trains 448 and 449 will not operate between Albany-Rensselaer and Boston on select dates through July 21. Motorcoach service will be provided.

Carry-on Baggage: On July 8, select Illinois, Wisconsin, Michigan and Missouri service trains began accepting carry-on golf bags for a \$10 charge. Reservations are required and can only be made with a reservation sales agent or station agent.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 51 cents per mile to 55 1/2 cents per mile, effective for mileage expenses incurred on or after July 1, 2011.

Quick Reference Resource Available for Employees Using Financial Systems

Amtrak Mourns UTU General Chairperson

Amtrak mourns the passing of Roger Lenfest, general chairperson of United Transportation Union's Amtrak General Committee, on July 10, 2011.

With roots in the Boston & Maine Railroad, Mr. Lenfest dedicated his 40-plus career to the railroad.

Mr. Lenfest had just been elected to the position he most recently held with the UTU, representing more than 2,000 Amtrak conductors. Amtrak extends its sympathies to his friends, family and the UTU membership who knew him.

Amtrak Earns Awards for Railroad Grade Crossing Video

An Amtrak grade-crossing safety video has earned awards from two national organizations.

Designed primarily for a teenage audience, *Cheating Death* is a compelling depiction of the dangers and consequences of failing to obey highway-rail grade crossing signals. It was developed in response to several grade-crossing deaths of teenagers in Lakeland, Fla.

The 12-minute video, a condensed version of which is posted on Amtrak's YouTube page (www.YouTube.com/Amtrak), earned two bronze Telly Awards in the categories of Public Safety and Editing, and two 2011 communicator awards by the International Academy of Visual Arts.

Cheating Death will be used as a resource for state driver's education associations, school groups, civic organizations and transit agencies. In addition, more than 1,100 copies of the film have been distributed to Operation Lifesaver, a national organization dedicated to preventing railroad-related deaths and injuries.

The Telly Awards are judged by a panel of over 500 industry leaders and honor the best television, cable, video, film and web-based productions each year. This year's winners were selected from a pool of nearly 11,000 entries.

The awards add to Amtrak's collection, which includes a silver Telly Award in 2009 for the Union Station 100th anniversary video.

Cheating Death was produced by the Amtrak Police Department, Donnabrant Productions and DogHouse Media.

Operations: Via Rail is adjusting *Maple Leaf* schedules. Beginning July 19, Trains 63 and 64 will operate a few minutes earlier at select stations between Niagara Falls, ON and Toronto.

Marketing and Product Development, and Transportation: China and glassware service returned to the *Capitol Limited* dining car on July 15, offering passengers an upgraded and greener dining car experience. The *Capitol Limited* joins the *Auto Train*, *Empire Builder* and *Coast Starlight* in offering this service.

Heat Advisories: Heat advisories for many areas of the country this week are reminders to take steps to prevent heat stress. Preventive tips include eating well-balanced meals (avoid heavy meals), getting sufficient sleep, wearing loose-fitting clothing, and drinking plenty of fluids (avoid sugary and caffeinated drinks). Please look out for signs of heat stress in co-workers and passengers.

Look Out for New Vision ID Cards in the Mail

Agreement-covered employees will receive new vision ID cards in the mail from EyeMed this week.

The ID cards will contain a unique identification number for each employee, eliminating the need for vision providers to ask for an employee's social security and other personal information to verify coverage.

For employees' protection, all health providers can verify coverage through an ID card or, if the ID card is not available, name and date of birth can be used.

Heat Advisories: Heat advisories for many areas of the country this week are reminders to take steps to prevent heat stress. Preventive tips include eating well-balanced meals (avoid heavy meals), getting sufficient sleep, wearing loose-fitting clothing, and drinking plenty of fluids (avoid sugary and caffeinated drinks). Please look out for signs of heat stress in co-workers and passengers.

Benefits Reminder

Agreement-covered employees will continue to receive new vision ID cards in the mail from EyeMed this week.

The ID cards will contain a unique identification number for each employee, eliminating the need for vision providers to ask for an employee's social security and other personal information to verify coverage.

For employees' protection, all health providers can verify coverage through an ID card or, if the ID card is not available, name and date of birth can be used.

North Carolina Adds Locomotive to the Fleet

The North Carolina Department of Transportation welcomed its newest locomotive, the "City of Durham," into service today at a ceremony held at the Durham, N. C., train station.

The locomotive was rebuilt with ARRA funding and will enter into regular service following the ceremony.

Amtrak Partners with Boys & Girls Club of America

Amtrak and Boys & Girls Clubs of America have joined together for Amtrak's "Explore the Great Outdoors Adventure" program. As part of the program, members of Boys & Girls Clubs from New York, Philadelphia, Chicago and Washington, D.C., will travel by train to a local national park to participate in the National Park Service's Junior Ranger Program. Additionally, members of the Challengers Boys & Girls Club in Los Angeles will visit Mission San Juan Capistrano.

Amtrak's partnership with Boys & Girls Club of America was a cornerstone of this year's National Train Day celebration and a way for Amtrak to thank the communities it serves. The National Park Service is also an official partner in this program. You can learn more about Amtrak's partnership with Boys & Girls Clubs of America by visiting www.nationaltrainday.com.

Volunteers Needed for Amtrak Exhibit Train

The 40th anniversary exhibit train continues to tour the East Coast before continuing on its yearlong cross-country journey, and you can play a role in its success by helping out. If you want the opportunity to be part of Amtrak history, and to meet fellow employees and supporters of passenger rail, please sign up. To volunteer, email your name, shift preference (8:30 a.m.- 1:30 p.m. or 12:30 p.m.-5 p.m.), the day you would like to help out, and your email and phone number to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Freeport.

Message about the Strategic Asset Management (SAM) Program Launch

Dear Co-Workers,

Labor Relations: Employees represented by the Fraternal Order of Police have overwhelmingly ratified their new five-year contract. It provides for wage increases patterned after agreements already reached. The majority of unions have reached new deals; the remaining unions with which Labor Relations is meeting have already been presented with comprehensive proposals.

Engineering: Replacement of 37,000 concrete ties in Boston's southwest corridor will begin on June 11. Replacement of 63,000 concrete ties on the Hell Gate line between Metro-North CP216 and Harold Interlocking began on May 31. Both projects are scheduled for October completion.

We are excited to announce the launch of the first phase of the Strategic Asset Management (SAM) program, which is designed to optimize the processes, systems and tools that support our business and help us work better together. Once complete, SAM will provide us with consolidated and compatible operating systems for Finance, Procurement, Human Resources, IT and Operations.

Our goal in establishing this program is to create greater synergy throughout the organization and make us a more efficient company. SAM is just one of many ways Amtrak is becoming a "healthier" company and we hope you'll find these new systems to be useful tools that make working at Amtrak better.

System users will be provided access to Super Users, Power Users and Change Agents for support during the first three months of the launch. These individuals have undergone months of rigorous training so that they can assist other users. If you encounter an issue or have a question, look for your designated Power User on the Intranet under How We Work → SAM Program → Training POC.

We will continue to keep you abreast of any upcoming changes, key dates and program activities that will affect employees and departments. You can also learn more about what is happening by visiting the SAM program site on the Intranet.

Sincerely,

Kay Duggan
GIO, Enterprise Resource Systems

Operations Department Welcomes New Director, Corporate Process Engineering

Roderick Munro, a Six Sigma Master Black Belt and author of six books on business quality and process improvement, joined Amtrak last week as director, Corporate Process Engineering, reporting to Ken Jacobs, deputy, Reliability Centered Maintenance. Mr. Munro, who formerly led the Six Sigma learning effort at the Ford Motor Company, has 34 years of experience as a business improvement coach.

The newly created position emerged from discussions about the need for an individual to follow through on recommendations to improve Amtrak's corporate processes. His first task on the job is to facilitate resolution of the manner in which On-Time Performance incentive payments to host railroads are determined.

Six Sigma is a business management strategy that seeks to improve the quality of process outputs by identifying and removing the causes of errors and deficiencies, and minimizing inconsistencies in manufacturing and business processes.

Amtrak Supports International Level Crossing Awareness Day

On June 9, Amtrak will be supporting International Level Crossing Awareness Day (ILCAD). ILCAD promotes safe motorist and pedestrian behaviors at and around crossings worldwide. To download a flyer about railroad safety, go to Safety → Safety Resources Library → International Level Crossing Awareness Day on the Intranet.

Note: President and CEO Joe Boardman is scheduled to appear on C-SPAN's Washington Journal live call-in show on Friday, June 17, from 9:15 to 10 a.m. Eastern Daylight Time.

Government Affairs: Vice President and Chief of Police John O'Connor is scheduled to testify before the Senate Committee on Commerce, Science and Transportation on Tuesday afternoon about emerging threats to rail security.

Schedule Changes: *Northeast Regional* and *Acela Express* trains are operating on adjusted schedules between Boston and New Haven, Conn. The schedule changes took effect this past weekend and will continue through November due to concrete tie replacement in the Boston area.

Volunteers Needed: The 40th anniversary exhibit train will make its next stops in Strasburg, Pa., on June 18-19 and on June 25-26, and in Springfield, Mass., on July 9-10. Volunteers are needed to help support the tour. The schedule is posted on www.Amtrak40th.com. To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day you would like to volunteer, and your email and phone number to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Baltimore, Md.

Message From Joe Boardman

Dear Co-workers,

We just closed on the best May we've ever had. May was also the 19th consecutive month of year-over-year ridership growth. Part of that growth comes from our long-distance service — which has been up 18 of those 19 months — and advance reservations suggest that we'll see increased ridership on long-distance trains in the next three months. With less than four months away from the end of the fiscal year, it looks like we're on track to have our best year ever. But don't take that for granted — I need your help to make that happen.

I know the summer also brings challenges. Our equipment can suffer in the heat, and high temperatures can make even minor service disruptions very uncomfortable for our crews and passengers. Please make sure that you keep yourself well hydrated and that you recognize adverse signs of heat in your co-workers and our passengers.

On another front, we recently received positive feedback on our next-generation high-speed rail plan from our peers in the international high-speed rail community. European and Asian high-speed rail operators expressed support for our phased plan to reach 220 mph on the Northeast Corridor. They also suggested that we would likely generate more ridership than projected in the plan. Our plan has garnered a lot of interest; in fact, due to numerous questions from potential bidders, we've extended the deadline of our Request for Proposals to identify public and private funding sources for the project by 10 days.

This week you may hear reports about another high-speed rail proposal that involves privatizing the Northeast Corridor. I haven't seen any of the details of this proposal yet, but privatization raises some very significant and complex issues that call for an open discussion about what this really means — beyond the asset itself — for the region's economy and the transportation network that supports it. We will do our best to educate legislators and others on the issues associated with the development of new high-speed rail service on the NEC.

Again, please watch the heat this summer, and thank you for what you do every day.

Sincerely,

Joe Boardman
President and CEO

Operations Update: On select dates through Sept. 18, *Vermonters* passengers will be provided motorcoach service between Springfield and St. Albans, due to a major track and bridge rehabilitation project being performed by New England Central Railroad.

Arrow outage: On Sunday, June 26, the Arrow Reservation and Ticketing system will be unavailable from 3 a.m. until 7 a.m., due to an operating system upgrade. An Operations Service Advisory will be issued on Thursday, June 23 with special instructions for station and on-board employees.

Volunteers Needed: The 40th anniversary exhibit train will make its next stops in Strasburg, Pa., on June 25-26, and in Springfield, Mass., on July 9-10. Volunteers are needed to help support the tour. The schedule is posted on www.Amtrak40th.com. To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day you would like to volunteer, and your email and phone number to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Baltimore, Md.

Front-Line Employees' Input Sought for Security Training

Front-line employees are invited to provide their input for the development of security training and awareness programs as part of the upcoming 2012 Block Training.

By filling out a short online survey, employees who come into contact with unruly, disorderly or aggressive passengers will provide valuable information that will be used to help train employees in proper response and reporting procedures, and thereby help reduce the occurrence of potentially dangerous confrontations.

The 12-question survey will be available from June 17 through Sept. 30. It is accessible via the Amtrak Employee Resource site, <http://customerservice.amtrak.com>, which houses Service Standards Manuals and other resources for Transportation department employees. Please note that this is a different site than the Amtrak intranet or the Employee Information Portal where employees can access other information and make address, benefit and other changes. You can also access the site from the Amtrak intranet home page under "Employees," or under "Library" → "Service Standards."

Employees who have not previously accessed the <http://customerservice.amtrak.com> site will need to activate an account. If you receive a "Could not find your information" message when activating the account, please send your first and last name and SAP number to Russ Fox at foxr@amtrak.com.

The development of the Security Training Program is a collaborative effort between the Amtrak Police Department, the Transportation Department, Employee Development, the United Transportation Union and their contractor, CASE Experts; in cooperation with the TWU, TCU, the Amtrak Service Workers Council and HERE.

Old IDs Deactivated

To complete the transition to Amtrak Smart ID cards, all old employee and contractor IDs have been deactivated and are no longer being accepted for access to Amtrak facilities. Approved identification consists of Smart IDs, Temporary IDs and Day Passes. For more information, visit Police → Smart ID on the Intranet.

NO ATW ISSUED THIS WEEK

March 7, 2011

Employee-Only National Train Day Site, TrainDay411.com, Launches

Operations Update: For eight days beginning March 8, *Coast Starlight* Train 11 may arrive in Los Angeles 30-90 minutes later than scheduled due to a Union Pacific Railroad tie installation project taking place near Paso Robles, Calif. As the work continues on select dates through April 25, Train 11 will detour between Oakland and Los Angeles; motorcoach service will be provided at all intermediate stations.

Government Affairs: Vice President of Policy and Development Stephen Gardner will testify before the House Transportation and Infrastructure Committee on Friday, March 11, on “Finding Ways to Encourage and Increase Private Sector Participation in Passenger Rail Service.”

PSSA: Nominations are being accepted for the 2011 President’s Service and Safety Awards (PSSA). Nomination forms for the 2011 program are currently posted on the Intranet and can be found at “Employees” → “Awards and Achievements” → “2011 PSSA Nomination Forms.” Forms are also posted on the Intranet under “Library” → “New and Revised EForms.” The nomination period runs until **Friday, May 13.**

This year, Amtrak will host the fourth annual National Train Day on May 7 with events across the country celebrating America’s love of trains. Last year, nearly 400 employees volunteered at major events to make National Train Day a memorable experience for more than 34,000 attendees. With the help of employee volunteers we can make it happen again as we celebrate the 40th anniversary of America’s Railroad.

An employee-only National Train Day website is now available at www.TrainDay411.com to serve as a resource for employees leading up to the National Train Day celebration. TrainDay411.com offers employees the opportunity to sign up online to volunteer at one of the four major National Train Day events in Washington D.C., Philadelphia, Los Angeles and Chicago. Volunteers will receive a National Train Day shirt and gift bag for volunteering at an event.

Employees are encouraged to visit the Build the Buzz section of TrainDay411.com for ideas on how to spread the word about National Train Day and help build a National Train Day event in your community.

TrainDay411.com also features a trivia challenge where employees can enter for the opportunity to win prizes and to be included in the May issue of *Amtrak Ink*. The trivia contest will begin on March 21 and a new question will be posted every two weeks. Check out www.TrainDay411.com today and visit often to get the latest updates.

SAM Program Shifts Go-Live Date from Early April to Early June

The first round of the Strategic Asset Management (SAM) Project, designed to improve Amtrak's financial and other systems to help employees make better business decisions, is slated to launch in early June rather than its original April date.

The first round of SAM improvements will put a new financial system in place that will form the backbone of an integrated system that will allow employees to see how materials, time and money fit together in a much more efficient way. This system will tie in SAP with other applications that many employees use, such as Ariba, Exacta, Maximo, and Spear.

While this first "release" was scheduled to go live in early April, 60 additional days have been added to the schedule further stabilize the system environment and provide additional rounds of testing. As a result, the program go-live date has shifted from early April to early June 2011.

As of this writing, a majority of the 1,500 employees directly affected by SAM have completed training courses. Given the change in the go-live date, the SAM Program plans to provide condensed refresher training during the April/May timeframe for end-users. Details regarding the refresher training will be communicated to affected employees shortly.

A memo to highlight the specific activities that will occur for the June go-live will be distributed by the SAM Team within the next few weeks. In the meantime, employees are encouraged to visit the SAM Program intranet site for more detailed information about go-live, by clicking on "How We Work" → "SAM Program," or send questions to the SAM Team at sam@amtrak.com.

Operations Update: Union Pacific Railroad begins the initial phase of a summer track work project in Illinois, affecting the *Texas Eagle* and *Lincoln Service* Trains 303 and 304 from March 15 through March 19.

Station Update: On March 19, from noon until 3 p.m., Amtrak will host an Open House to celebrate the reopening and dedication of the historic Wilmington, Delaware Station. At the event, the station will be dedicated as the Joseph R. Biden, Jr., Railroad Station, in honor of the vice president.

Remember to Collect 2-Factor Authentication Tokens

Amtrak Information Security asks that managers remember to collect Amtrak property, including computer equipment and RSA 2-factor authentication tokens when employees and contract personnel end Amtrak employment.

RSA 2-factor authentication tokens should be returned to Amtrak Information Security. Contact Information Security at infosec@amtrak.com for additional information.

Did You Know?

February marked Amtrak's 16 straight month of ridership growth and was the best February on record with 2,099,010 passengers.

March 21, 2011

Amtrak Police Department Launches Public Website

Today, the Amtrak Police Department unveiled a website that offers Amtrak employees and the general public access to videos, photos, safety tips and news.

The new site displays the department's mission "Protecting America's Railroad," and offers a unique behind-the-scenes look at the men, women and K-9s who are dedicated to helping keep Amtrak employees and the traveling public safe on a daily basis. It also features descriptions of the various divisions that make up the Amtrak Police Department.

Individuals interested in a career as an Amtrak Police officer will also find employment information and a link to current job openings.

Employees are encouraged to visit at <http://police.amtrak.com> for the most up-to-date news and information regarding the Amtrak Police Department.

Save The Date Employee Appreciation Day is May 2

Activities are being planned at over 50 locations across the country to celebrate the third annual Employee Appreciation Day on Monday, May 2.

This year is particularly significant as the company begins to celebrate its 40th anniversary and honors the long-standing dedication and service of employees over the years. The events will include employee discounts offers on products and services, and resources to become safer, greener and healthier.

Operations Update: On March 21 through March 24, northbound Train 90 will depart Savannah and Yemassee one hour and 30 minutes **earlier** due to CSX Transportation track work.

Government Affairs: Amtrak continues to operate under a Continuing Resolution (CR), following the signing of another CR by the president on March 18. The CR extends FY '10 funding levels through April 8.

Contributing to the Earthquake and Tsunami Relief Efforts

The recent earthquake and tsunami have caused untold damage in Japan. Our thoughts are with employees who have loved ones in Japan, as well as with our friends at the East Japan Railway Company (JR East), as they strive to recover from the devastation.

Employees have inquired about donating to the relief effort in Japan. Anyone wishing to make a donation is encouraged to do so directly. There are many organizations actively supporting the recovery effort in Japan, including the American Red Cross (www.redcross.org), and Unicef (www.unicefusa.org).

As a reminder, counseling services and other support resources are available through the Employee Assistance Program. For a list of local EAP Counselors, go to "Employees" → "Employee Assistance Program" on the intranet, or call 202-906-3447.

March 28, 2011

Amtrak Launches Twitter Pilot to Notify Northeast Corridor Passengers of Major Service Disruptions

Tomorrow, Amtrak will be launching a new @AmtrakNEC Twitter handle as part of a pilot program aimed at using social media channels to more proactively and directly notify passengers of Northeast Corridor service disruptions.

Passengers who choose to follow @AmtrakNEC will be notified of major service disruptions resulting in delays of 60 minutes or more from a single incident on the route, up to and including stoppage of all rail traffic.

Twitter is a microblogging platform that enables users to stay in touch through the exchange of short status updates. A user's "Twitter handle" is the username that is selected to represent the user on Twitter.

The @AmtrakNEC handle will cover *Acela Express* and *Northeast Regional* and other Amtrak trains between Washington, D.C., and Boston; *Keystone Service* trains between Harrisburg, Pa., and New York City, via Philadelphia; and *Shuttle* trains between Springfield, Mass., and New Haven, Conn.

As the pilot launches, Amtrak will review the number of followers and the re-tweets to determine if the pilot program should be discontinued, made permanent, modified or expanded to cover additional corridors.

Although the @AmtrakNEC Twitter handle focuses on communicating major service disruptions only, Amtrak will continue to regularly engage with followers and fans on our official Facebook page (www.facebook.com/Amtrak) and @Amtrak Twitter handle (www.twitter.com/Amtrak).

An Operations Service Advisory (OSA) was issued today to inform all employees operating within the Northeast Corridor of the launch of the NEC Twitter pilot.

Participate in the National Train Day Contest

The National Train Day employee trivia contest is now open at www.TrainDay411.com. Employees can enter the contest for the opportunity to win prizes and to be included in the May issue of *Amtrak Ink*. The trivia contest launched on March 21st and a new question will be posted every two weeks.

Employees are also encouraged to volunteer at a National Train Day event by signing up online.

Message From Joe Boardman

Dear Co-workers,

I invite you to join fellow employees at the more than 50 offices, crew bases and facilities that will be holding events in honor of our third annual Employee Appreciation Day and marking Amtrak's 40th anniversary today.

Four decades ago, Congress created a company to provide passenger rail service for our nation. Thanks to you and those who have come before us, we have built America's Railroad comprising long-distance, corridor and high-speed rail service that is setting ridership records.

While we celebrate our accomplishments, we must continue to build on our strengths, recognize what binds — not what separates — us and, with humility, learn from our successes and our mistakes.

Our accomplishments are a testament to the fortitude, dedication and know-how that you offer every day. It's important to remember that supervisors and peers should take the time to appreciate hard work, and not just on an anniversary or Employee Appreciation Day.

Don't forget that there's another chance to celebrate the railroad this Saturday, as we host major National Train Day events in Washington, Philadelphia, Chicago and Los Angeles, as well as many other events across the country.

I value your contributions and am proud to be a member of the Amtrak family. Happy 40th anniversary, and thank you for what you do.

Sincerely,

Joe Boardman
President and CEO

Government Affairs: Amtrak President and CEO Joe Boardman is scheduled to testify before the Senate Subcommittee on Transportation, Housing and Urban Development on Thursday, May 5, about Amtrak's FY '12 federal funding request. The testimony will be posted on the Intranet under "News" → "Legislative" → "Testimonies" on May 5.

Corporate Communications: You can now receive *Amtrak Ink*, *Amtrak This Week* and *Special Employee Advisories* at your personal email rather than receiving paper copies by hand or mail. Sign up on the News & Info section of the Intranet.

National Train Day Contest: A new question for the National Train Day employee trivia contest is posted on www.TrainDay411.com through May 7. Employees can enter the contest for the opportunity to win prizes and to be included in the June issue of *Amtrak Ink*.

Amtrak Principal Engineer Receives NARP Safety Award

Blair Slaughter, principal engineer, industrial design, will be presented with the Dr. Gary Burch Memorial Safety Award during the National Association of Railroad Passengers (NARP) annual Capitol Hill Reception on Tuesday, May 3.

The safety award is presented annually to the railroad worker who has done the most in the previous year to improve the safety of railroad passengers. Slaughter is being recognized for his role in creating the Generation 2 (G2) Transfer Bridge, used to help passengers transfer from one train to another in the event of a service disruption.

The modified off-the-shelf ramp can fit onto any type of car and is compact, strong and lightweight and accommodates wheelchairs.

April 2011 Ridership Best on Record

April marked 18 consecutive months of year-over-year ridership growth and was the best April ever for the company. Ridership increased by 9 percent in April 2011 vs. April 2010, or 243,190 passengers. April 2011 ridership (692, 376) and ticket revenue (\$45.1 million) on the *Northeast Regional* were the best ever for this service.

Health & Wellness Update: The second round of the *Stay on Track...Keep Walking* program started May 8, and will run through June 18 for individuals who already received pedometers. For those who registered but have not received a pedometer, the program will run from May 15 through June 25. Contact Malva Reid for more information at mreid@amtrak.com.

Timetable Update: The 2011 Spring/Summer System Timetable takes effect today, May 9.

PSSA Deadline Extension: The President's Service and Safety Awards (PSSA) Committee extended the nomination period to **Tuesday, May 31**. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms."

Marketing: The winner of the 2nd Annual Amtrak TRAINSporation Video Contest is James Shanek of Oakland Community College in Bloomfield Hills, Mich. Watch it on www.youtube.com/Amtrak later this week.

Note About Blackberry Use: Employees who use Amtrak-provided BlackBerrys should refrain from downloading applications or other additions they do not need to do their jobs.

Amtrak Officer of the Year

Det. J. Christopher Glass will be honored as the Amtrak Police Department's Officer of the Year for 2010 at a special ceremony on May 12.

Det. Glass is receiving this prestigious award for his numerous and significant contributions to the Amtrak community. He has served the Amtrak Police Department for 18 years, and is currently assigned as a detective in Riverside, CA.

DOT Announces High-Speed Rail Funds for Amtrak

Today, U.S. Department of Transportation Secretary Ray LaHood announced \$450 million for Amtrak to upgrade its rail infrastructure to support faster and more frequent high-speed rail service between New York and Washington. Slated for completion in 2017, the project would yield infrastructure to support an increase in speed from 135 mph to 160 mph.

As part of a total \$2 billion award to Amtrak and 15 states, the DOT also awarded \$345 million to several states for other NEC-related projects that will help enhance capability of the current network. Additional funding for states in the Northeast, the Midwest and California will also benefit Amtrak services.

Thank you

Thank you to all of the employees who participated and volunteered at the more than 100 Employee Appreciation Day events, and the National Train Day events that took place in Washington, D.C., Chicago, Los Angeles, and hundreds more communities across the nation. An estimated 38,500 people participated in NTD events.

Amtrak's 40th anniversary kicked off in Washington, D.C., along with the unveiling of the 40th Anniversary Exhibit train. You can view the video of the kickoff at www.youtube.com/amtrak.

As reported by the Philadelphia Inquirer last week, "*Amtrak turned 40 this week, and the national railroad is finally growing up. With ridership back to a record-setting pace and a rail-friendly president (and vice president) in Washington, Amtrak is no longer limping along the brink of extinction.*"

...in recent years, Amtrak has enjoyed unprecedented rider support, and newfound political backing. With outspoken support from President Obama and Vice President Biden (a well-known Amtrak commuter), Boardman has pushed for growth and modernization of Amtrak."

To read the full story, visit:

www.philly.com/philly/insights/in_politics/20110505_Now_40_Amtrak_is_finally_growing_up.html

Government Affairs: Amtrak President and CEO Joe Boardman is scheduled to testify before the Senate Subcommittee on Transportation, Housing and Urban Development and Related Agencies Appropriations tomorrow, May 17, about Amtrak's FY12 federal funding request. The testimony will be posted on the Intranet under "News" → "Legislative" → "Testimonies" following the hearing.

Payroll: Agreement-covered employees should check their mail for an important letter being mailed this week. The letter explains how the launch of the first phase of the Strategic Asset Management System (SAM) will affect employee pay on June 10.

Health & Safety: On Friday, May 13, the Environmental, Health and Safety and HR Medical Services departments issued a safety notice about implantable cardiac devices (ICDs) and work environments at Amtrak that have measurable electromagnetic fields (EMFs). They recommend that employees talk to their physician about EMFs that can affect the normal operation of their personal cardiac device, and to notify Medical Services if they wear an ICD and work near EMFs.

Environmental: The 2010 Environmental Health and Safety Report is now available on the Intranet at "Safety" → "Environmental" → "Environmental Annual Report."

40th Anniversary Exhibit Train On the Move Volunteers Needed to Help with Events

Amtrak's 40th anniversary Exhibit Train, which embarked on a year-long commemorative tour after its public debut at National Train Day in Washington, D.C. on May 7, made its first tour stop in Lorton, Va., this past weekend.

The train consists of two locomotives decked out in historic paint schemes and three renovated baggage cars with displays that highlight each decade of the company's existence through vintage advertising, period uniforms, photographs and other memorabilia. In addition, an Amtrak Bistro car is being used as a retail center and additional exhibit area.

The exhibit train will make its next two stops in Baltimore on May 21-22 and in Philadelphia on May 28-29. The tour schedule through the month of July is posted on www.Amtrak40th.com. A tour blog, photo gallery and detailed history of the equipment are also available on the website.

Volunteers are needed to support the tour at each location where the train is scheduled to stop. To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day you would like to volunteer, and your contact information (email and phone number) to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Baltimore, Md.

Each volunteer will receive a 40th anniversary t-shirt to wear during the event. In addition, every Amtrak employee will receive an exclusive commemorative 40th anniversary lapel pin designed especially for employees. The pins are being mailed to employees' homes over the next two weeks.

Employee Appreciation Day Feedback Survey

What did you think about Employee Appreciation Day this year?
Do you have suggestions related to the event you attended?

Tell us what you thought so that we can improve next year's events. You can provide feedback by completing an anonymous, five-minute online survey at:

www.surveymonkey.com/s/AmtrakEAD2011

PSSA Nominations: The nomination period for the President's Service and Safety Awards (PSSA) is Tuesday, **May 31**. Nomination forms are available on the Intranet at "Employees"→ "Awards and Achievements"→ "2011 PSSA Nomination Forms."

Benefits: You can now update your life insurance beneficiary information electronically by logging into www.AmtrakBenefits.com and clicking on "Beneficiary Designations" on the welcome page. You can also update this information by calling 800-481-4887.

Amtrak Machinist Receives AAR Certificate of Commendation

Claude Fields, machinist, Chicago locomotive facility, received a Harold F. Hammond Award Certificate of Commendation from the Association of American Railroads during a ceremony on May 18 for his exceptional efforts to enhance railroad safety. Fields, a 35-year Amtrak employee, was recognized for his role in creating safety awareness among his co-workers.

Most recently, Fields served as safety liaison between contractors and the Chicago Lumber Street Yard throughout a wide range of construction projects that have taken place near the facility over the last 18 months. As a result of his safety-first approach, no Amtrak employee or contractor has been injured at the yard throughout the construction period.

Connecticut Bridge Replacement Projects Move Forward

As part of its effort to maintain strong relationships with the communities it serves, Amtrak is hosting its third public informational meeting on the Niantic Bridge Replacement Project today in Niantic, Conn. The \$125 million project to replace the existing 103-year-old bridge involves construction of a new two-track bridge, expansion of the navigation channel beneath the bridge, realignment of the east and west track approaches, and relocation of the Niantic Bay Overlook.

The project, which is the largest of Amtrak's four Connecticut bridge projects, is on schedule for May 2013 completion. It is funded by Amtrak's general capital money and resources from the American Recovery and Reinvestment Act (ARRA). The other three bridge projects remain on schedule as crews work to replace century-old structures with new ones.

The \$20 million Miamicock Bridge Replacement Project, also funded by ARRA, is slated for June completion. The bridge steel has been set and one track is fully operational; a second track is scheduled to go into service by the end of this week.

Construction on the East and West Harbor Railroad Bridges in Stonington is scheduled to be completed in September. Amtrak received \$16 million from ARRA to remove and replace the bridges' old steel spans, concrete piers, and headwalls, and increase their vertical clearance. Doing so will improve access north of the railroad for local boaters into Lambert's Cove, something long desired by the Stonington community.

"Our primary goal is to provide customers with more reliable service in this area, so we're glad to see these projects move forward," said Jim Richter, deputy chief engineer structures.

National Train Day Contest Winner

Congratulations to the fourth and final winner of this year's National Train Day trivia contest: Fred Katz, inventory planner, finance department, Philadelphia.

Did You Know?

Amtrak Vacations and National Train Day were featured on Wheel of Fortune and The Price is Right last month.

40th Anniversary Lapel Pins: Employees should receive an exclusive 40th anniversary lapel pin in the mail by June 1. If you have not already received a pin and would like to have one, email Debbie Varnado at varnadd@amtrak.com. Please also check the Employee Information Portal after it is restored in mid-June to make sure your address is listed correctly.

PSSA Nominations: The President's Service & Safety Awards Program is now accepting up to 25 nominations for the Project Excellence category. The nomination deadline for that category has been extended to June 3. The deadline for all other categories is today, May 31. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms."

Volunteers Needed: The 40th anniversary exhibit train will make its next stops in Perryville, Md., on June 4-5; Harrisburg, Pa., on June 11-12; and Strasburg, Pa., on June 18-19 and on June 25-26. Volunteers are needed to help support the tour. The schedule is posted on www.Amtrak40th.com. To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day you would like to volunteer, and your email and phone number to greatamericanstations@amtrak.com. Please write the words Volunteer and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Baltimore, Md.

Message about Credit Card Security

Dear Co-Workers,

Credit card security is a serious, high-profile issue. Problems with credit card security have affected many big companies over the years, including TJ Maxx, Michaels, and Apple, among others. In fact, you may have recently heard that customer information from Sony PlayStation was stolen.

Protecting customer information is an Amtrak priority. You may have heard us refer to credit card security as "PCI"- which is our short-hand term for the Payment Card Industry standards for how to guard this sensitive information. Keep in mind that it's more than just a credit card number. Customer information is a person's name, address and every other bit of data we collect about them. It is vital that all Amtrak employees continue to work together to keep customer information safe and secure.

The information we collect is only stored for the time needed to conduct business, and storage processes are designed to be as secure as possible. The final element to a good protection program is each of us working together to minimize the risk of exposing information. Here are just a few ideas:

- Never write down a customer's payment card account number. Always enter the customer's information directly into an Amtrak system. Swiping the card is the most secure method of all.
- Treat all customer information with total confidentiality at all times.
- Perform all accounting procedures in a timely manner so that customer information is processed as quickly and securely as possible.
- Refer to the Amtrak Payment Card Security Policy (APIM 8.10.2) if you have questions.

Thank you again for your continued support in helping Amtrak to be a secure and safe place.

Sincerely,

DJ Stadler
Chief Financial Officer

Amtrak Police Department: On Nov. 9, at 2 p.m. Eastern Standard Time, the Federal Communications Commission and the Federal Emergency Management Agency will be conducting a nationwide test of the Emergency Alert System via radio, television and other outlets. The aim is to test the reliability and effectiveness of the system in advance of a real disaster.

Safe-2-Safer: Thank you to everyone who participated in the Safe-2-Safer survey to gauge progress made to date and help shape strategy for the coming year. The results of the survey will be shared with employees once they've been tabulated.

VSIP Begins Today for Non-Agreement Employees

All non-agreement employees should have received an email message and a letter sent to their homes last week about the Voluntary Separation Incentive Plan (VSIP) that is being offered starting today through Nov. 25 to non-agreement employees with at least one year of service. An additional letter was mailed on Nov. 3 to retirement-eligible employees that includes a personalized account of their Amtrak Retirement Income (pension) Plan.

Thanks to feedback from employees, an updated Frequently Asked Questions (attached) is posted on the intranet, under "Employees" → "Human Resources" and click on the "Voluntary Separation Incentive Plan" link. Employees are encouraged to please review all the information provided regarding the VSIP. Employees with other questions about the VSIP should call the Human Resources Employee Service Center at (888) 694-7372 or send an email to VSIP@amtrak.com.

Non-agreement employees who wish to participate in the VSIP must complete the Election to Participate Form and send to Michael Ramirez (fax: 202-906-3558 or email: ramirem@amtrak.com).

The VSIP is being offered to better allocate resources and align the organization in order to advance Amtrak's Strategic Plan.

Open Enrollment Begins Today

Starting today, all employees will have the ability to make changes to their benefits elections for next year.

Benefits information packets were mailed to all employees last week. To make changes to your benefits elections, go to www.AmtrakBenefits.com or call 800-481-4887 during the Open Enrollment period from Nov. 7-18.

Remember, Health Care and Dependent Care FSA elections do not roll over. If you wish to continue to participate in these programs, you must re-enroll during Open Enrollment.

Additionally, Cigna will replace Aetna as the new medical provider for non-agreement employees, and the new prescription drug administrator will be CVS Caremark, effective Jan. 1. (These changes do not affect agreement employees.)

More information on the new providers will be provided at on-site meetings, through letters and email messages, and on the Amtrak Benefits website. Through Dec. 31, you can also call these special customer-service lines: Cigna 800-564-7642 and CVS Caremark 855-271-6604.

Domestic Partner Coverage Added

Starting Jan. 1, 2012, employees may cover a same-sex domestic partner, same-sex civil union partner or same-sex spouse, regardless of where you live.

To be eligible, employees and their domestic partners must provide required documentation, such as a marriage license, government (state or municipality) registration of domestic partnership or an Amtrak affidavit.

For a copy of the affidavit form and more information, visit www.AmtrakBenefits.com.

Employee Travel Guidelines

With ridership at an all-time high and Amtrak's busy holiday period rapidly approaching, employees traveling aboard trains are reminded to abide by the Amtrak Employee Pass Policy, as described below:

Station Update: The *Empire Builder* resumes service to Minot, ND, tomorrow. Service had been temporarily suspended due to flooding earlier this year that damaged the building and tracks. Repairs on the building will continue into next spring/summer.

Open Enrollment: The benefits open enrollment period ends this Friday, Nov. 18. To make changes to your benefits elections, go to www.AmtrakBenefits.com or call 800-481-4887.

Fidelity Retirement Webinars Being Held This Week

Fidelity is conducting retirement savings webinars for employees considering retirement or taking advantage of the Voluntary Separation Incentive Plan (VSIP) for non-agreement-covered employees. The series of one-hour webinars take place Tuesday, Nov. 15 through Thursday, Nov. 17. (See attached schedule.)

Please take advantage of this important opportunity to learn more about your retirement savings options. The schedule is also posted on the intranet under Employees → Human Resources and click on the Voluntary Separation Incentive Plan link.

Non-agreement employees interested in participating in the Voluntary Separation Incentive Plan may send a completed Election to Participate form to Michael Ramirez via fax at (202) 906-3558 or email ramirem@amtrak.com until Nov. 25.

Non-agreement employees who have questions about the VSIP may call the Employee Service Center at (888) 694-7372.

- A business or personal pass rider is required to give up his or her seat without being prompted to do so by the conductor — and may be required to give up a room accommodation — if standee conditions occur or if there's a shortage of space and a revenue passenger cannot be accommodated. Pass riders will be entitled to a refund if a fare was paid, even if the pass rider is able to obtain a seat later.
- Single pass riders must make way for revenue passengers traveling together who are unable to find seats together. The pass rider should find a single seat elsewhere.
- Employees at café tables should relinquish space when it becomes clear that space is needed by revenue passengers, either as overflow seating or for enjoying food and beverages purchased from the café.
- Employees traveling on passes must conduct themselves in a professional, courteous manner. Employees are accountable for the personal conduct of all individuals eligible to travel under their passes.
- Please note that if a pass rider does not travel in accordance with the policy, the employee's pass can be revoked.

In addition to the pass policy, On-board Service and Train Service employees should not perform administrative functions, or store supplies or personal belongings at tables in the dining or café/lounge cars during service hours. If it becomes necessary to use a table, no more than one table may be used.

Employees are strongly encouraged to familiarize themselves with the Amtrak Employee Pass Policy available on the intranet under Employees → Policies → Employee Pass, Voucher and Service Award Trip Policies.

Message from Joe Boardman

Dear Co-workers,

Thanksgiving is one of my favorite holidays — it reminds me how necessary and beneficial it is to pause and reflect on what we have achieved, especially when so much is going on.

This has been a period of high energy, achievement and innovation for Amtrak. In our 40th year, we posted record ridership and ticket revenue. I am thankful for the talent, dedication and commitment each of you put forth to make that possible.

Three years into my job as CEO of this company, I remain humbled by the trust you have invested in me. For many of us, this is a period of transition. We have many hard and important decisions ahead of us as we continue to strengthen this company, and I renew my commitment to each of you to lead with integrity and vision, backed by your collective wisdom and input.

As we head into one the busiest travel times of the year, let's embrace this opportunity to showcase our strengths. We'll be adding capacity to accommodate demand on many routes, including along the Northeast Corridor, Amtrak *Cascades* and the *San Joaquin*, *Pacific Surfliner* and *Capitol Corridor* in California. In addition, the historic "Great Dome" car is being added to *Lincoln Service*, *Saluki/Illini* and *Wolverine* trains in the Midwest. And we'll be offering a traditional Thanksgiving feast on long-distance routes — complete with pumpkin pie — for passengers and for our employees working during the holiday.

Many travelers will be riding Amtrak for the first time, and our efforts to provide efficient and caring service that anticipates and responds to their wants and needs will be the deciding factor in turning these passengers into loyal longtime customers.

Thank you for all that you do. I wish you and your families and friends a festive and safe Thanksgiving season.

Sincerely,

Joe Boardman
President and CEO

Thanksgiving Timetable: Thanksgiving timetables for the Northeast and Amtrak *Cascades* are posted on Amtrak.com. As in prior years, both the *Pacific Surfliner* and *Keystone Service* will be all-reserved throughout the holiday period, which runs Nov. 22-28.

Government Affairs: The Consolidated and Further Continuing Appropriations Act of 2012 that was signed by President Obama on Friday includes funding for Amtrak for the current fiscal year at \$1.418 billion, including \$466 million for operating, \$616 million for capital, and \$271 million for debt service. This represents the lowest federal appropriation Amtrak for FY '08, and the second year in a row in which Amtrak has received less than the previous year.

Last Week to Participate in the Voluntary Separation Incentive Plan

The Voluntary Separation Incentive Plan (VSIP) offer for non-agreement-covered employees with at least one year of service expires at the end of the day this Friday.

The severance packages offered as part of any future involuntary non-agreement Reduction in Force will not be as generous as those being offered through the VSIP.

Non-agreement employees interested in participating in the VSIP may send a completed Election to Participate form to Michael Ramirez via fax at (202) 906-3558 or email ramirem@amtrak.com through Nov. 25.

Employees interested in the VSIP may call the Employee Service Center at (888) 694-7372 or visit the intranet under "Employees" → "Human Resources" and click on the Voluntary Separation Incentive Plan link.

US Bank Travel Cards Go Into Effect This Week

As a reminder, new corporate US Bank travel cards go into effect on Dec. 1, 2011. Employees who use a corporate travel card for business travel should have received theirs last week in the mail from US Bank, and must follow the steps below to activate their card.

1. Activate your new card as per the instructions accompanying the card.
2. Update your travel **Profile** in the eTrax catalogue for Worldspan to reflect the new card number and expiration date.
3. The eTrax help desk can assist you with your **Profile** update (ATS 739-4750 or 888-445-7677).

AmtrakConnectSM Wi-Fi Now Available on California-Supported Services

Amtrak and its California passenger rail partners today launched free Wi-Fi service on all three state-supported routes — the *Capitol Corridor*, *San Joaquin* and *Pacific Surfliner*.

With the addition of AmtrakConnect aboard the California services, 75 percent of Amtrak passengers now have access to Wi-Fi. The service is already available on high-speed *Acela Express* trains and 12 other East Coast routes, as well as on the Amtrak *Cascades* service in the Pacific Northwest.

California state passenger rail agencies funded the implementation of Wi-Fi by reinvesting cost savings from prior completed rail projects.

Preliminary Thanksgiving Holiday Results Indicate All-Time Record

As the Thanksgiving travel season comes to a close today, it appears that it will go down in the books as a record-breaking one.

Thank you to all of the employees — on the front lines and behind the scenes — who played a role in making last week potentially Amtrak's best Thanksgiving on record.

While the numbers are not yet final, preliminary numbers show estimated increases in both ridership and ticket revenue over last year, as an estimated 720,000 traveled during the week. We will report on the final results once they become available.

Legislative Update: With the start of the new fiscal year on Saturday, Amtrak is currently operating under a Continuing Resolution that provides funding for the company at a rate of \$1.461 billion. Approval from the House of Representatives tomorrow would extend the CR through Nov. 18.

FY '11 Ridership: Amtrak closed FY '11 with record ridership and ticket revenue. Thank you for your contributions to helping Amtrak achieve another record-setting year!

Updated Policies Posted

Two policies that relate to communicating with the media and elected officials have been recently updated and are posted on the intranet.

As a reminder, only designated employees of the Government Affairs and Corporate Communications department (GACC) should speak to the news media on behalf of the corporation. In addition, official Amtrak communications with members of Congress and other elected and appointed officials or their representatives should be conducted through GACC. Some exceptions apply, including the Office of the Inspector General and employees acting in a capacity as a spokesperson for a labor organization representing Amtrak employees.

Amtrak employees must refer any inquiry from the news media to GACC at (202) 906-3860. Handling external communications through the proper channels helps ensure that accurate, consistent and timely information is provided to the news media and elected officials.

Please consult the policies for more information. The policies are posted on the intranet, under "Library" → "Policies," choose "Amtrak Policy and Instruction Manual" and then "4.0 Government Affairs."

Health and Medical Services for Employees

Amtrak's Health Services and Medical Services groups offer resources and programs that help employees understand their risks for disease, obtain preventive health services, support safety operations and foster healthy lifestyles. These programs include physical examinations and medical monitoring for Medical Leave of Absence.

Employees and their families confronted with issues that may affect job productivity and quality of life may get assistance from an Employee Assistance Program (EAP) counselor, within Health Services. Additionally, the Drug and Alcohol Testing Program provides resources and training for employees to learn more about the policies and testing procedures that help make our railroad system safe.

To better align the Health Services and Medical Services functions, both groups (previously within the Human Resources department) are now a part of the Environmental Health and Safety department. More information about the organization and services offered is available on the intranet at "Safety" → "Health."

Safe-2-Safer Survey Launches Today

Share your perspectives in the Safe-2-Safer survey, which begins today across the system. Safe-2-Safer Facilitators and Steering Committees will be disseminating the paper copies at many job locations, while employees who have Amtrak email can take the same survey online via a secure external link hosted by a third party (a link will also be posted on the Amtrak intranet home page in the "Employee Info" box). The survey is open to Amtrak employees only.

The responses from the survey will be used to evaluate our progress to date in changing the culture and to determine how to modify Safe-2-Safer to better ensure even more progress.

Strategic Plan Available on Intranet

Want to know more about what the company's goals mean for you? The company's new five-year strategic plan, and a reference summary, can be downloaded from the intranet home page, in the "Employee Info" section.

In a *Special Employee Advisory* announcing the plan's release last Friday, President and CEO Joe Boardman called it a "comprehensive roadmap for evolving into a company that is more focused on the bottom line, and whose employees' roles and efforts are in sync with common goals."

New Food and Beverage Accounting System Begins Aboard *Acela Express*

Installation on Acela Follows Successful Implementation Aboard California Services

A new on-board café car sales system being installed on *Acela Express* café cars this month will help cut costs, generate more revenue from food and beverage sales, and enable lead service attendants to spend more time on customer service.

Known as Point of Sale, the system replaces outdated cash registers and automates and tracks all food and beverage transactions, eliminating most of the labor-intensive manual paperwork — notably the Form 896 — that employees must complete to control stock and manage accounting of sales. Replacing cumbersome paperwork with an automated system frees up lead service attendants to sell more items and be more focused on delivering quality customer service.

Point of Sale tracks food inventory and revenue in real time, thereby reducing inventory costs and waste. The system integrates with a new back-end warehouse management system that was completed this summer to manage inventory in commissaries and stocking of trains, as well as improve menu planning.

As installation progresses throughout the month, *Acela Express* lead service attendants will begin using the system. The launch of Point of Sale on *Acela* trains follows the successful implementation of the system deployed on *Pacific Surfliner*, *Capitol Corridor* and *San Joaquin* trains last year. System-wide deployment will begin in 2012.

Safe-2-Safer Survey

If you want to provide your input, please participate in the voluntary and anonymous Safe-2-Safer survey. Safe-2-Safer Facilitators and Steering Committees are distributing the paper copies at many job locations, or you can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E>. The link is also posted on the home page of the intranet, in the “Employee Info” box.

The responses from the survey will be used to evaluate the progress to date in changing the culture and to determine how to modify Safe-2-Safer to better ensure progress. The survey is open to Amtrak employees only and concludes Oct. 28.

Martina McBride Charter Train Promotion Helps Reach Millions of Potential Travelers

A charter train tour featuring country music superstar Martina McBride departed Los Angeles this morning, the first of its 11 stops on a cross-country journey.

In partnership with McBride, Amtrak is operating “ELEVEN Across America Powered by Amtrak,” a four-day train ride to support the launch of her upcoming album titled “ELEVEN.”

In addition to Los Angeles, McBride’s tour will be making stops at Flagstaff, Ariz.; Albuquerque, N.M.; Newton, Kan.; Kansas City, Mo.; Chicago; Cleveland; Pittsburgh; Washington, D.C.; Philadelphia; and New York City. Fans will be treated to intimate performances in Albuquerque, Chicago and NYC.

The tour also supports Pink Together, an organization dedicated to supporting breast cancer awareness. The charter train initiative is an opportunity to reach millions of potential travelers and promote long-distance train travel on Amtrak.

To follow the journey and view photos and video, visit us on www.facebook.com/Amtrak or on Twitter @Amtrak.

Company Travel Cards: A new vendor has been selected for company-issued travel charge cards for eligible employees who travel frequently on Amtrak business. In November, GSA U.S. Bank MasterCard will be issued to employees who currently have corporate American Express cards. In a related move, employees will be eligible for GSA government-negotiated rates for hotels and rental cars for business travel. Both changes take effect Dec. 1. Letters detailing the changes have been mailed to employees who currently hold corporate charge cards for business travel. For more information, contact Francis Murphy, director, Corporate Support Services — Travel, at MurphyF@Amtrak.com.

Safe-2-Safer Survey: Don't forget to provide your input by completing the Safe-2-Safer survey. Safe-2-Safer Facilitators and Steering Committees are distributing the paper copies at many job locations, or you can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E>. The link is also posted on the home page of the intranet, in the "Employee Info" box. The survey is open to Amtrak employees only and concludes Oct. 28.

Employee Security — Did You Know?

Amtrak Police Department officers are available to escort employees and passengers to their personal vehicles, local parking lots or nearby train stations in many Amtrak locations.

The added safety assistance is available wherever Amtrak police are stationed. To arrange for an escort at any time, day or night, call (800) 331-0008.

Posters are being posted starting this week to remind employees and passengers about this police service.

Employees Honored at President's Service and Safety Awards This Week

Congratulations to the employees from across the country who will be joined by family, friends and co-workers at the 2011 President's Service and Safety Awards in Washington, D.C., this Wednesday.

The annual recognition program celebrates the accomplishments of employees who surpass expectations, and represent a high degree of dedication and commitment.

This year's 217 award winners include 208 employees from 10 departments, two state partners, one external Champion of the Rails and six contractors.

PSSA is an annual employee-driven recognition program; recipients are nominated by their co-workers, and their accomplishments are researched and evaluated by a committee comprised of management and agreement-covered employees from different departments across the country.

Tribute to Conductor Laurette Lee

On Wednesday, October 19, at 8:30 a.m. EDT, a brief ceremony will be held at the Employee Memorial Wall inside Washington Union Station to honor Conductor Laurette Lee. Lee died June 24 when the *California Zephyr* train she was working on was struck by a tractor trailer east of Reno, Nev.

In addition, a moment of silence will be dedicated to her and the others who perished as a result of the incident, at the President's Service and Safety Awards luncheon in Washington, D.C., on the same day.

Environmental, Health and Safety: Amtrak encourages employees to support the Drug Enforcement Administration's National Prescription Drug Take Back Day on Oct. 29, 2011. This day provides a venue for people who want to dispose of unwanted and unused prescription drugs. To locate local community prescription drug collection sites visit, www.justice.gov/dea/ and click the "Got Drugs?" icon. The service is free and anonymous.

Radio City Holiday Spectacular: Amtrak employees qualify for a 25 percent discount on tickets for select performances to see the Rockettes and other performers at the Radio City Christmas Spectacular in New York, from Nov. 11 through Jan. 2. For more information and to purchase tickets, go to www.radiocitychristmas.com/amemp. Type in the code "AMEMP" on the purchase page to receive the discount.

Human Resources: Non-agreement covered employees should be on the lookout for materials that will be mailed to their homes over the next two weeks that provide more information on the new Cigna and CVS Caremark benefit partners, transition of care benefits, and more. In addition, employees may contact the vendors through temporary customer service numbers that will be in effect 24/7 from October 24 through December 31, 2011:

- Cigna: 800-564-7642
- CVS Caremark: 855-271-6604

Employees may also send questions via email to the Benefits Department at HR_Benefits@amtrak.com.

Year in Review: Do you have photos of your favorite 2011 Amtrak moments? If so, email them, along with a brief description, to Ecom@Amtrak.com for possible inclusion in the December/January issue of *Amtrak Ink*. The deadline for submissions is Nov. 25.

Safe-2-Safer Survey Concludes Next Monday

There's only one week left to complete the Safe-2-Safer survey, which has been extended to Oct. 31. Employees are asked to complete the survey to provide their feedback; the responses will be used to evaluate progress to date in changing the culture and to determine how to modify Safe-2-Safer.

Safe-2-Safer Facilitators and Steering Committees are distributing the paper copies at many job locations, or employees can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E>. The link is also posted on the home page of the intranet, in the "Employee Info" box.

The survey is open to Amtrak employees only. Please remember that the survey responses are anonymous, and no answers can be traced back to any individual. Only BST representatives (Behavioral Science Technology, who is helping us implement Safe-2-Safer) will see the individual surveys.

Washington Union Station Renovation Begins Today

Starting tonight, Washington Union Station will undergo interior restoration to repair damage done to the structure's ceilings as a result of the Aug. 23 earthquake.

While the project will not directly affect Amtrak ticket counter operations and boarding gate areas, it will affect traffic flow through the station. The project is expected to take six to 10 months to complete and will take place in the Main Hall and the adjoining ticketing concourse area and lower-level food court. Work will first begin on the ticketing concourse ceiling, followed by work on the Main Hall around Nov. 1. At this point, access to the Amtrak headquarters offices is not expected to be affected.

All station operations and businesses will continue as normal. During the project, steps will be taken to ensure the safety of employees, passengers and visitors, as well as to minimize the inconvenience to those who work in and visit the station. Way-finding signage will be posted to facilitate traffic inside the station as the project evolves.

Given the Columbus Plaza construction project taking place in front of the main entrance to the station and this restoration project, Amtrak is encouraging passengers to allow additional time to arrive at the station and make their way to the boarding gates. Union Station is the second-busiest station in the Amtrak system.

12 Additional Routes Now Offer Free Wi-Fi Service

In a major expansion of AmtrakConnectSM Wi-Fi service, passengers on a dozen East Coast routes now have access to the popular service.

The expansion covers the *Northeast Regional*, as well as the *Empire Service*, *Keystone Service*, *Carolinian*, *Downeaster*, *Ethan Allen Express*, *New Haven – Springfield Shuttle* and *Vermont*.

Four other routes — the *Adirondack*, *Maple Leaf*, *Palmetto* and *Pennsylvanian* — will also offer Wi-Fi, but only in select cars, which will be marked with hotspot window decals.

The latest move means nearly 60 percent of all Amtrak passengers now have the ability to connect to the Internet while on board. Installation is also currently underway for Wi-Fi on the California corridor services: the *San Joaquin*, *Capitol Corridor* and *Pacific Surfliner*. With the addition of these routes, 75 percent of Amtrak passengers will have access to on-board Wi-Fi before the end of the year.

The addition of Wi-Fi is estimated to help attract an additional 300,000 riders and \$15.2 million in ticket revenue this fiscal year on these routes.

Conductors to Begin Scanning eTickets on Downeaster Service

In the next step toward a nationwide eTicketing system, conductors on the *Downeaster* this week will begin scanning “print anywhere” eTickets using handheld mobile device.

eTicketing provides significant benefits over traditional paper tickets. Passengers no longer have to pick up their tickets at a station, and they do not have to worry about keeping up with paper tickets that would have to be repurchased if lost. They also can more easily make changes to their trip itineraries while on the go.

For the company and crews, the shift to eTicketing means a reduction in paper usage and access to real-time passenger manifests, which will help the company better manage capacity and revenue.

This pilot project on the *Downeaster* is being conducted in partnership with the Northern New England Passenger Rail Authority (NNEPRA).

The rollout of eTicketing will continue on the *Capitol Corridor*, *San Joaquin* and *City of New Orleans* routes in early 2012, and is slated to be adopted nationwide by next summer.

Operations Update: On Saturday Nov. 5, through Sunday afternoon, Nov. 6, select *Northeast Regional* trains will be cancelled between New York and Boston to accommodate the East and West Harbor bridge replacement project in Stonington, Conn.

Safe-2-Safer: Today is the final day to complete the Safe-2-Safer survey. Facilitators and Steering Committees are distributing paper copies at many job locations. Employees also can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E> or by following the link on the home page of the intranet, in the “Employee Info” box.

Flu Vaccinations Offered: Amtrak is offering employees flu shots at no charge at retail clinics across the country. For more information on clinic locations and online registration, go to the intranet under “Safety” → “Health and Medical Services” → “Wellness” → “Retail Flu Clinics.”

Open Enrollment Kits are in the Mail: Look out for your Open Enrollment benefits package being mailed this week.

Chicago Congress Center Employees Move: Beginning at 11 a.m. Friday, Nov. 4, through 8 a.m. Monday, Nov. 7 (Central Time), Chicago Congress Center employees will move to Chicago Union Station. The new address will be 500 West Jackson Boulevard, Chicago, Ill. 60661. During the move, all network services (i.e. servers, shared drive access, voice and data services) will be unavailable to Congress Center employees and all Intercity employees with home and share drive folders that are accessed via Chicago servers.

Daylight Saving Time Ends: Remember to set your clocks back one hour on Sunday (in all states except Arizona). Daylight Saving Time officially ends at 2 a.m. Sunday morning, Nov. 6.

Bear and Wilmington Mechanical Shops Prepare for *Acela Express* Upgrades

About 36 employees from the Bear and Wilmington Mechanical facilities are currently undergoing training in advance of a major work program on the 20 *Acela Express* trainsets, which were first put into service in Dec. 2000.

The work is scheduled to begin in late October and will run through the next three years. Bear will perform work on the coaches, while Wilmington will perform overhaul work on the power cars.

“This major work program — done in partnership with the labor organizations — provides an excellent opportunity for this talented team of employees to learn and apply new skills, while enabling the company to keep the work and expertise in-house,” says Chief Mechanical Officer Mario Bergeron.

In addition to the 36 employees who will be dedicated to the effort full-time, another 15 or so who will fill in as part of a rotating pool.

In addition to overhauling the air brakes, central and auxiliary blocks, blower motors, mechanical doors, air-conditioning and other systems, employees will fix any broken parts or make other repairs as needed based on problems identified through inspections just prior to the work.

Previously, trainsets 2 and 4 received less extensive updates than the other trainsets as part of an “age exploration” study to see how the air-brake equipment performs over time.

All of the trainsets will go through upgrades in this round.

Employees are currently participating in a 12-week training course, two of which are with the High-Speed Rail maintenance teams at Ivy City, in Washington, D.C., and Sunnyside Yard, in New York.

National Preparedness Month Tip: Check batteries in all smoke detectors, flashlights and transistor radios.

9/11 Moment of Remembrance: At 1 p.m. Eastern Daylight Time on September 11, we encourage Amtrak employees to participate in the National Moment of Remembrance by taking a moment to observe, in your own way, those who lost their lives during the terrorist attacks on our nation on September 11, 2001. This year, all of the engines on the system will sound their horns at 1 p.m. (EDT) time in memory of the lives that were lost.

High-Speed Rail: Amtrak took another step toward its next-generation high-speed rail plan featuring 220 mph service on the Northeast Corridor last week, when it selected a team led by KPMG to assist in developing the business and financial plan for the project. The plan, which would include opportunities to leverage private investment, is expected to be completed mid-year 2012.

Construction to Begin in Front Of Washington Union Station

The District of Columbia Department of Transportation is leading a construction project on Columbus Plaza in front of Washington Union Station that officially begins next week.

The project is a partnership between Amtrak, Union Station Redevelopment Corporation, National Park Service, the Architect of the Capitol, Washington Metro Transit Authority and DDOT.

While the details of the project schedule are currently being finalized, it is expected to last more than 540 days. Information about how vehicular and pedestrian traffic will be affected is expected to be available within the next week or two. Construction activities will be carried out in phases to help minimize the effect on the general public, passengers and employees.

More specific information for Washington-area employees will be provided in the coming weeks.

Happy 100th Birthday Baltimore Penn Station!

On Sept. 14, Baltimore's Penn Station will celebrate its 100th anniversary. Penn Station is the eighth busiest train station in Amtrak's system with more than two million passengers annually traveling along the Northeast Corridor or to and from work throughout the Washington/Baltimore area. The station services about 85 Amtrak and 56 MARC commuter trains daily, acting as an integral travel hub along the Northeast Corridor.

Baltimore's Penn Station has not only been an important element in our customers' travel experience but has also served as a catalyst for economic growth and revitalization in Baltimore. Currently, plans are underway to increase that station's role as an economic hub given its close proximity to Baltimore's business district and scenic Inner Harbor area. A hotel has also been proposed for the station's upper floors, as well as a commercial development to be constructed on Amtrak's current surface parking lot adjacent to the station.

Amtrak will celebrate the 100th anniversary of this historic station with a birthday cake, along with an exhibit comprising 40 enlarged historical photographs that will remain on display through the end of September. Amtrak is also proud to recognize some of the station's long-standing employees. The program includes several guest speakers, including local elected officials and a historian who will reminisce about some of the station's memorable moments.

IBB Ratifies Contract

Employees represented by the International Brotherhood of Boilermakers and Blacksmiths have overwhelmingly ratified their new five-year contract. This is patterned after others already reached and provides for wage increases that will be placed into effect shortly.

The majority of unions that represent Amtrak employees have reached new agreements; the remaining unions with which Labor Relations is meeting have already been presented with comprehensive proposals.

Security Volunteers: Thank you to those who volunteered last week in response to the request from the Amtrak Police Department. The increased visibility of Amtrak personnel in stations and on trains during the week around the 9/11 10-year anniversary was greatly appreciated.

Unaccompanied Minor Policy Change: The following changes to the Unaccompanied Minor Policy will become effective for travel on or after Nov. 1: Passengers age 12 and under will no longer be permitted to travel unaccompanied. They must travel with another person who is at least 18 years old. Passengers 13, 14 and 15 years old must travel in accordance with the Unaccompanied Minor Policy guidelines. More information on this policy can be found on the intranet under "How We Work" → "Station Support" → "Policies" → "Reserving and Ticketing."

Government Affairs: On Sept. 14, President and CEO Joe Boardman will testify before the Senate Commerce Committee on the implementation of PRIIA legislation.

Flu Vaccinations Offered: For the third year in a row, Amtrak is offering employees flu shots at no charge. On-site immunization clinics will be set up at larger work sites around the country, and vouchers also will be provided for employees to use at select national pharmacy chains. Dates and times for the clinics will be posted in coming weeks on the intranet under "Safety" → "Health."

National Preparedness Month Tip: Create a desk emergency kit to include: First aid supplies, food bars, medicines, walking shoes, dust mask and flashlight.

California Zephyr Crews Test Customer-Service Pilot

Marketing: The “Great Dome” car will operate on the *Adirondack* from Sept. 15 through Oct. 23 on Train 69 on Thursdays, Saturdays and Mondays; and Train 68 on Fridays, Sundays and Tuesdays. It will then operate on the *Cardinal* from Oct. 29 through Nov. 11 on Train 51 originating on Fridays and Train 50 originating on Saturdays.

Human Resources: Employees may be eligible for a hardship withdrawal against their Amtrak Retirement Savings Plan 401(k) accounts to pay for home repairs caused by earthquakes, hurricanes and floods. Several conditions must be met to qualify, and the minimum withdrawal amount is \$500. Distributions are subject to ordinary income tax and 10 percent additional income tax if you are under age 59 ½. For additional information, contact Fidelity Investments at 1-877-477-AMTK (2685).

Finance: As part of the fiscal year closing process, it is imperative that all liabilities for FY 2011 be accounted for in the year in which they were incurred. Please make sure all invoices are submitted to Accounts Payable as soon as possible.

YEAR END A/P CUTOFF SCHEDULE	
Deliver invoices to A/P to ensure entry into SAP	COB SEPT. 16
PO Receivers (GRIR) Posting to SAP	COB SEPT. 30
eTrax Payment Request Accrual	COB OCT. 11
A/P Invoice Posting to FY 2011	COB OCT. 11
eTrax eAccrual - final day	3 PM OCT. 12
Reversal of all Sept. Accruals	COB OCT. 20

Three hundred on-board service employees, station personnel, conductors and assistant conductors involved with the *California Zephyr* route have been trained recently in a new customer-service model aimed at improving passenger satisfaction and loyalty while also increasing revenue.

The classes are based on research that shows that customers report the highest level of satisfaction when served by employees who:

- Perform random acts of kindness,
- Make an emotional connection,
- Follow “flawless processes,” and
- Pay attention to detail.

When these criteria are met, customers are more likely to seek out services from a company again and to talk about their experience with others, leading to increases in revenue.

The most powerful component of this training is that it is led by *California Zephyr* employees and is being done in collaboration with Product Development, the Central and Pacific Divisions, and George Hall in Employee Development.

The recent training sessions grew out of recommendations in the FY '10 Performance Improvement Plan for the *California Zephyr*, which was developed in accordance with Section 210 of the Passenger Railroad Investment and Improvement Act (PRIIA).

The model — known as HumanSigma® — was developed by Gallup and has been adopted by Disney, Ritz-Carlton Hotels, Starbucks and other major corporations. The approach will be closely evaluated, and if successful, may be adopted for other routes in the future.

Full service on the *California Zephyr* was restored last week, after service disruptions due to flooding and a serious grade-crossing incident in June.

National Preparedness Month Tip: Prepare a car safety kit that includes a blanket, water, small tools, walking shoes, ice scraper and flares.

Mechanical: Amtrak will be showcasing its Mechanical Services at the American Public Transportation Association's (APTA) Expo in New Orleans on Oct. 3 - 5.

Philadelphia-area employees: A discount is available to Amtrak employees interested attending the PA Conference for Women. Enter code PACS23 when registering at PAConferenceForWomen.org.

National Preparedness Month Tip: *Learn what the common disasters and action plans are for your town or city.*

Amtrak Nears Record 30 Million in Ridership

Amtrak is on track to carry a record 30 million passengers this fiscal year, which ends on Friday. Check out the ridership counter on Amtrak.com or follow updates on Facebook www.facebook.com/amtrak and Twitter (www.twitter.com/amtrak).

Safe-2-Safer Survey Launches Next Week

Starting next week, employees will be asked to participate in a voluntary Safe-2-Safer survey (officially called the Organizational Culture Diagnostic Instrument). The responses from this survey will be used to evaluate our progress to date in changing the culture and to determine how to modify Safe-2-Safer to ensure even more progress.

Employees will have the opportunity to complete the survey in a number of ways, depending on location, craft and position. Safe-2-Safer Facilitators and Steering Committees will be disseminating paper copies at many job locations, while employees who have Amtrak email can take the same survey online via a secure external link hosted by a third party (a link will also be posted on the Amtrak intranet home page in the "Employee Info" box). The survey concludes on Oct. 28.

The OCDI survey is completely confidential and anonymous, and no answers can be traced back to any individual. The survey will take approximately 45 minutes to complete. As with the survey taken in 2009, the results will be shared with employees once they're available.

All employees are urged to complete the survey — it's an important vehicle to provide feedback, and change can't happen without your involvement.

Amtrak to Submit Route Performance Plan

A Performance Improvement Plan will be published this week for the *Crescent*, *Lake Shore Limited* and Silver Service (*Palmetto*, *Silver Star* and *Silver Meteor*), as required in the Passenger Rail Investment and Improvement Act of 2008.

PRIIA Section 210 requires that Amtrak embark on a comprehensive program to improve its long-distance services. Amtrak created cross-departmental Performance Improvement Teams to perform in-depth analysis on the routes to identify and make recommendations on route-specific improvements in customer service and product quality. The plan outlines recommendations for improvement; a number of factors, including funding, will determine whether all of them will be implemented. The previous year's Performance Improvement Plans focused on the *Sunset Limited/Texas Eagle*, *California Zephyr*, *Capitol Limited* and *Cardinal*.

This year's comprehensive Performance Improvement Plan will be available on Amtrak.com on Sept. 30 under "Inside Amtrak" → "Reports and Documents," and on the Amtrak intranet.

Jan. 3, 2011

Executives Use Media Attention to Tout Amtrak

Amtrak's record ridership and ticket revenue during the 2010 fiscal year, along with the increasing profile of transportation issues in America, have led to continued media coverage from both industry and consumer news outlets. Amtrak executives are using this attention to further promote the company as the premier high-speed rail provider in the U.S. and an integral part of the nation's transportation system.

Following are excerpts from two items that have been published in recent weeks. For the full story, click the links or visit the website listed:

[President and CEO Joe] Boardman's position on the transit industry is plain and simple. "Rail needs to be and is the backbone of moving freight in this country. It needs to be the backbone of moving people in this country....And if there is not an intercity rail passenger transportation system, then you have failed your country. Period."

...Is Amtrak making the changes needed to become that backbone? Boardman says it already is.... "[We need] to look at both green field high-speed rail like California and Florida, and how we take our own incremental high-speed rail, like is being thought of in the Midwest, in New York and some other places.... What Amtrak is, is we operate railroads."

"Our strength, our key competitive advantages are our men and women and our national interconnectivity. Coast-to-coast, border-to-border."

[Mass Transit](http://www.MassTransitMag.com) (www.MassTransitMag.com)

Dec. 2010-Jan. 2011 Issue

The next half-century will be defined by the emergence of "megaregions" — extended corridors of interconnected metropolitan areas, with shared economic sectors and linked infrastructure. High-speed rail can and should be among those links.

Over the course of its 10 years, Acela high-speed service has improved the connectivity and mobility of the Northeast Corridor megaregion....Amtrak has a bold vision for next-generation high-speed rail in the Northeast, with trains operating at maximum speeds of 220 m.p.h. on a new, two-track route that would supplement the existing service. Such a network would save significant travel time, dramatically improve mobility, and mitigate congestion. ...

This is a revolutionary vision of the future, but one that is also attainable. Acela has shown that high-speed rail does work in America, and that prudent public investments in passenger rail can pay huge dividends. It also has shown Amtrak's ability to innovate and reinvent itself.

Op-Ed by Vice President of High-Speed Rail Al Engel
[Philadelphia Inquirer](http://www.philly.com/inquirer) (www.philly.com/inquirer)

Dec. 21, 2010

Operations Update: *Coast Starlight*, Amtrak *Cascades* and *Pacific Surfliner* began operating according to adjusted schedules on Jan. 2 due to significant track work being performed by Union Pacific Railroad. The adjusted schedules are set to remain in effect until early April.

Marketing: College students in Illinois, Michigan, Missouri and Wisconsin may enter the second annual Amtrak TRAINsportation Video Contest by submitting a train travel-themed video featuring *Lincoln Service*, *Wolverine Service*, *Missouri River Runner* or *Hiawatha Service*. Submissions must be made by Feb. 28, and winners will receive more than \$3,000 worth of prizes. For complete details and rules, visit www.AmtrakTransportationVideoContest.com.

Operations Update: Due to weekend track improvements being performed near Parkesburg, Pa., from Jan. 22 through Feb. 6, westbound *Keystone Service* trains will operate according to later schedules at select stations. In addition, westbound trains will stop at eastbound platforms at Coatesville and Parkesburg during this project.

Operation Lifesaver: Amtrak has received a grant from the Illinois Commerce Commission through its Public Education and Enforcement Research Study (PEERS) to support Operation Lifesaver. The funds will be used to provide materials and close-caption Amtrak's grade crossing safety video for hearing impaired students.

Marketing: Special \$89 roundtrip weekend fares for travel on Thursdays through Mondays are available for *Adirondack Service* trains now through April 28. Additionally, up to two children ages 2-15 may accompany each adult at a special discounted fare of \$44.50.

Company Seeks Items for Amtrak Museum Train

As part of its 40th anniversary celebration, Amtrak will operate a special museum train through major employee hubs across the country, beginning on National Train Day in Washington, D.C., on May 7. Employees are asked to donate or loan Amtrak historical items to outfit the museum train so the company can best illustrate its 40-year history to employees and passengers throughout the nation.

"We're retrofitting three baggage cars that will be pulled by restored F-40 and P-40 locomotives to make a rolling Amtrak museum," explained Joe McHugh, vice president, Government Affairs and Corporate Communications. "We want it to be as rich with Amtrak history as possible so we are looking beyond our own archives and asking employees to donate or loan us items from their personal collections."

Specific items needed for the museum train include china that has been used in dining cars; uniforms from various eras worn by passenger service representatives, red caps, on-board service crews and conductors; advertisements from across the country; ticket stock used throughout the years; and old menus from all trains.

Donated items will be accompanied by a plaque noting the person(s) who made the contribution to the museum. Those who contribute items as a loan will have their name appear in the exhibit brochure. Items must be loaned for a period of at least one year and will be returned to the owner.

To make a donation or loan items to Amtrak for the museum train, contact Suzi Andiman at AndimaS@amtrak.com or 202-906-2537. Items should be clearly marked as either a donation or loan and sent through secure mail, FedEx or UPS along with the owner's name, mailing address and phone number. Donated items are not tax deductible.

Diversity Training Underway

Amtrak's diversity training initiative for Fiscal Year 2011 is now underway, with the first class taking place on Feb. 15 in Wilmington. The diversity training program makes clear the corporation's position on diversity and provides the background and information necessary to work successfully in a diverse environment.

Diversity training is mandatory for all non-agreement employees as follows:

[Classroom Diversity Training](#) is mandatory for non-agreement employees who have no previous record of classroom diversity training. This includes recently hired employees, as well as employees promoted from agreement into non-agreement positions during the previous fiscal year.

[Online Diversity Refresher](#) is mandatory for non-agreement employees who completed classroom and/or online diversity refresher training in FY '08 and prior. The online course is now available.

If you are unsure as to whether to attend a class session or complete the online refresher, please speak with your department's Diversity Training Representative (DT-Rep). [Click here for a list of DT-Reps](#), or refer to the intranet under "Employees" → "Business Diversity" → "Human Resources & Diversity Initiatives Menu" → "Educational Links" → "Amtrak's Diversity Training Initiative."

For a class schedule and complete Diversity Training information [click here](#), or refer to the intranet under "Employees" → "Business Diversity" → "Human Resources & Diversity Initiatives Menu" → "Educational Links" → "Amtrak's Diversity Training Initiative."

Smart IDs to Be Activated

Smart ID badges will be activated at Noon, EST on February 7. Amtrak personnel hired before Nov. 15, 2010, must pick up their Smart IDs before Feb. 7, when their old badges will no longer work. Amtrak personnel hired after Nov. 15 will receive their badges in the coming days, and can continue to use their old badges in the meantime. More information on Smart IDs is available on the intranet under "Police" → "Smart IDs".

Marketing: Amtrak will be featured in the HBO series *Real Sports with Bryant Gumbel* at 10 p.m. EST on Tuesday, Jan. 25. A segment focusing on renowned football journalist Peter King includes his weekly trip from New York to Boston on *Acela Express*. King regularly uses his time aboard the train to write his columns. The episode will re-broadcast several times this week and will be available on HBO On Demand from Jan. 31 – Feb. 21.

Operational Update: In response to customer demand, the *Keystone Service* will add Quiet Car® service starting Jan. 24, providing passengers with a peaceful, quiet atmosphere to work or rest without distraction. *Keystone Service* trains are financed in part through funds made available by the Commonwealth of Pennsylvania Department of Transportation.

Correction: Last week's edition of Amtrak This Week included incorrect information about a grant awarded to Amtrak from the Illinois Commerce Commission to support Operation Lifesaver activities. Amtrak received a notice that the company is eligible for the award, but a grant agreement has not yet been executed. We regret the error.

Operational Update: The *Cascades*, which operates between Eugene, Ore., and Vancouver, B.C., is the latest route to offer Wi-Fi service to passengers as part of AmtrakConnect®. The service has been available on the *Acela* since March 2010. During the coming months, Amtrak plans to add Wi-Fi to additional routes, with the goal of making it available on all trains over the next few years.

Marketing: Listen to the Super Bowl halftime show on your local Westwood One radio station this Sunday to hear who will be awarded the tenth annual Amtrak Player of the Year Award.

Correction: Last week's edition of Amtrak This Week included incorrect information about a grant awarded to Amtrak from the Illinois Commerce Commission to support Operation Lifesaver activities. Amtrak received a notice that the company is eligible for the award, but a grant agreement has not yet been executed. We regret the error.

Dear RedBlock supporters,

The RedBlock dilemma is about confidentiality. It is not hard to understand that the name of someone marking off because they made a mistake should be kept in confidence. Everyone that I have talked to (Union, Management, Regulatory and Oversight agency) understands that and supports the confidentiality that protects those who have made those occasional mistakes. We all live with both a greater sense of confidence in the safety element of the RedBlock program and in the ability to maintain a compassionate program when a mistake is made. That compassion includes peer counselors that are available to help make sure a mistake does not become a habit.

A dilemma is a problem offering at least two solutions or possibilities, of which none are practically acceptable.

So what is the real problem?

It is the Code of Federal Regulations. Specifically its 49 C.F.R. Part 219, Subpart E, "Identification of Troubled Employees". And 49 C.F.R. 240.119(b), "a person who has an active substance abuse disorder may not be certified as a locomotive engineer".

And,

It is the requirement that only a "substance abuse professional" (SAP) can make determinations about whether or not a troubled employee has an active substance abuse disorder, in the case of Amtrak that is the EAP program. RedBlock does not evaluate or diagnose an employee with a substance abuse disorder, and does not mandate that an employee obtain counseling or treatment. Instead Red Block relies on peers, or lay volunteers, to intervene with employees and encourage them to seek assistance. In fact, the lynchpin of the program, and what encourages employees to use the mark-off procedure, is that the process is confidential and does not have any "consequences."

So what is the truth about confidentiality?

When a SAP, such as our EAP program (but includes any professional referral service) determines that we have a "Troubled Employee" with a substance abuse problem, that employee must follow a treatment program prescribed by a Substance Abuse Professional. This process is entirely confidential, by law, unless and until the employee refuses to cooperate in the recommended course of counseling or treatment, at which point, confidentiality may be waived in accordance with applicable regulations. Engineers would not be allowed to perform safety sensitive operations until they successfully complete the treatment recommendations. Everyone agrees with these requirements, including Red Block.

Then why is there a problem?

Because those who have been in charge of administering the Red Block program (all Amtrak Management employees) have been unable to provide the information that FRA has asked for, and the information that the Amtrak office of Inspector General has asked for that would document that Red Block is following the requirements of the regulations.

That set of circumstances has led to both the IG and FRA questioning the “due diligence” of Amtrak’s management in ensuring that the Federal Regulations on substance abuse in the workplace are being properly managed.

Red Block is a Union program. Management employees were being paid to operate that program. That put management at the center of the responsibility for the program, without control of the program. Both the FRA and the IG are holding Amtrak management accountable for the operation of the Red Block program. The IG findings and recommendations are all couched in and start with “The President and CEO must...”, that’s me.

I agree that this is a Union run program. I made a proposal this past December to labor to support that- run it. Amtrak would support the program by paying for three coordinators. Amtrak would make sure that the company meets the requirement of due diligence to prevent drug and alcohol violations under the Federal Regulations by tasking EAP with oversight of the counseling functions, which it is uniquely qualified to do..

I’ve received several emails and some personal comments on the changes, many of them were part of a “grassroots campaign” that just spoke about the confidentiality issue, and the fear that causes among employees. I understand that fear, and I think it has been confused by a lack of understanding about what that means. I have tried to address that in this letter.

It’s time to set this program on the right path, at least the right path as our oversight agencies believe. Fighting the issue of confidentiality for the very few folks that have a substance abuse problem is not the right path. We need to ensure not only safety as our highest calling, but also the tough love it takes to confront any troubled employees that we might have.

Thank you for your service on the Executive Steering Committee, as RedBlock Captains or peer counselors. Help me bring this program to the right path.

Joe Boardman

[Edits: Jen M.](#)

Sustained Excellence

Anthony Danella III

Assistant Supervisor, Track, Engineering, New Brunswick, N.J.

On September 1, 1976, Anthony Danella III began his Amtrak career as a trackman, moved into the role of track foreman in 1985 and then assistant track supervisor in 1987.

Tony's tenacity in all that he does has brought him to this point of recognition in his career. John Semliatschenko, assistant division engineer, describes Tony as consistent over the past 35 years they have known each other, a term oft-repeated by others. He always considers all aspects of a job to ensure a positive ending.

Tony is well respected by his team for being uncompromising when it comes to doing a job right the first time. He oversees seven inspectors and five maintenance foremen and their crews.

Colleagues say Tony is humble enough to listen to his employees, always protective of them and encourages them to follow all of the rules and safety measures. He doesn't hesitate to praise his team in public for a job well done.

Tony has taken the initiative to communicate with residents living near Amtrak rights-of-way to address issues such as downed trees caused by heavy storms. He has been known to actually knock on residents' doors to alert them to damaged trees on their property.

By inspiring a strong work ethic among those he manages, Anthony Danella helps ensure that the rails are safer, quieter and straighter and that passengers have a smooth ride. Adds Semliatschenko: "Tony carries his workload with ease. His tenacity to the very end is what impresses me the most. He is great under fire."

Dear Co-workers,

I know you are all busy doing your best to do your jobs. Those of you who stay on top of what's being reported in the media or the industry blogs, you're aware that there are a lot of proposals and ideas being considered about Amtrak's future, and that can be distracting. It's important for you to know what's being said about us, and I want to do my part to keep you informed.

There are Amtrak critics who will question our capabilities, suggest we lack vision and that Amtrak is not relevant to the country's future. Those views are misguided. Take a look at the Northeast Corridor — an excellent example of what we can do with a complex operation, even with limited resources.

Some of our critics argue that the Northeast Corridor operation should be privatized. The NEC represents a significant portion of our business, and we all have a big stake in the outcome of the Northeast Corridor discussion. I know many of you are not involved in the NEC operation, but it's important for you to know what the background is. This is a story worth knowing.

We own 363 miles of the 457-mile Northeast Corridor (and has a mortgage on the property that is held by US DOT). Fifty-five miles of the corridor are owned by New York and Connecticut and is controlled by Metro-North Railroad, not Amtrak. The 37 miles within Mass is owned by MBTA.

The decision to allow Amtrak to buy the NEC in 1976 needs to be understood in the proper context: The Railroad Revitalization and Regulatory Reform Act of 1976 enabled Amtrak to both acquire the line from the bankrupt Penn Central RR, and get the loan from USDOT. The NEC corridor spans nine states and D.C.; the challenge of retaining intercity rail could not be met with the proliferation of the public takeover of all the commuter rail services in the NEC by states and regional transportation authorities.

At the time the NEC was on the verge of shutdown after decades of deferred investment. One hundred and four of 124 interlocking were hand-operated; only 20 percent of the route had bi-directional signals; there were 49 at-grade-crossings; electrification only existed on the south end; and speeds were held down to 90 mph on the north end.

Leaders in 1976 seem to have understood back then — as do many leaders today — that a well-run NEC was (and is) vital to the region's and the nation's economic health. That is why they made it possible for Amtrak to take it over. They also know that no one state or a group of states are capable of running the corridor. If that were true it would have been set up that way or have evolved as such.

Today, the NEC is a vastly different version of the asset we were entrusted to manage. The entire corridor is electrified; maximum speed is 150 mph; nearly all signals are bidirectional and Positive Train Control will be completed three years before the law requires it; we now have centralized electrification and traffic control along with high-

density train control on Newark-Penn station line. In addition, ridership continues to grow, and air/rail market share is up and rising. In short Amtrak has been and continues to be a good steward of this asset, even with limited resources and year-to-year funding uncertainties.

But we're not finished with the Northeast Corridor. We cannot rest, and we have not rested. While it is difficult to operate a semi-public sector railroad with the uncertain support from the federal government that other railroads in the world also rely on, we continue to plan improvements and establish a vision for the future. Despite the uncertainty, we are not waiting for someone else to tell us what to do.

Under our leadership, we worked with all of the stakeholders — nine states and D.C., commuters and freights — to agree on an NEC Master Plan that provides a common-sense vision of what we need to do to bring the corridor to a state of good repair and make the most of the current infrastructure. The plan will help with capacity, it will increase speeds and it is vital for our commuter partners.

New rail leadership from President Obama and Vice President Biden reflects what we also know to be true. A state-of-good-repair vision is not enough for America to compete at the world-class level. Today, there is political recognition — as there was in 1976 — that advancing passenger rail is a matter of strategic national priority.

So we took the vision many steps further. We developed a vision for next-generation high-speed rail on the NEC that is in line with world-class systems and what is being proposed in Florida and California. We've created a High-Speed Rail department, we have partnered with SNCF and Bechtel in Florida, and we will be in the mix of the competition for California when the time comes.

Our NEC Next-Gen Plan will use the fastest technology available, and trip times from D.C. to Boston will be cut in half. Amtrak knows how to operate fast trains, and we are gaining experience with private-sector partnerships in both Florida and California.

That is the story we need to share about our stewardship of the Northeast Corridor. If provided the funding and political support we need, we can manage high-speed rail systems that rival those abroad. We still have our extreme critics who have not updated their understanding of the progress that this company is making every day, but we also are making believers out of many as well.

We are very capable, we have vision and are relevant to our country's future. We are ready to take on the challenges and opportunities in not just the Northeast Corridor, but in all our business lines from border to border and coast to coast. We are America's Railroad.

Thanks for reading this, and thanks for every thing you do for safety and for our customers.

Sincerely,
Joe B.

Dear Co-workers,

I know we you are all busy doing your best to do your jobs. For those of you who stay on top of what's being reported in the media or the industry blogs, you know there are a lot of proposals and ideas being considered about Amtrak's future, and that can be distracting. It's important for you to know what's being said about us, and I want to do my part to keep you informed.

In May, we'll celebrate our 40th anniversary.

Amtrak owns 363 miles of the 457 mile Northeast Corridor, 55 miles are owned by NY and CT and is controlled by MetroNorth RR, not Amtrak. The 37 miles within Mass is owned by MBTA.

Amtrak owns those 363 miles of the NEC, and has a mortgage on the property that is held by the USDOT.

The decision to allow Amtrak to buy the NEC in 1976 needs to be understood in the proper context: The 4R Act authorized Amtrak to both acquire the line from the bankrupt Penn Central RR, and the loan from USDOT. The NEC corridor spans nine states and DC, the challenge of retaining intercity rail could not be met with the proliferation of the Public takeover of all the commuter rail services in the NEC and elsewhere by states and regional transportation authorities.

Leaders in 1976 seem to have understood back then as well as do many leaders today that a well-run NEC was and is vital to the region's and the nations' economic health. At the time the NEC was on the verge of shutdown after decades of deferred investment. 104 of 124 interlocking were hand-operated; only 20% of the route had bi-directional signals; there were 49 at-grade-crossings; electrification only existed on the south end; speeds were held down to 90 mph on the north end.

Today: The entire corridor is electrified; maximum speed is 150 mph; nearly all signals are bidirectional and Positive Train Control will be complete on the corridor three years before the law requires it; we now have centralized electrification and traffic control along with high-density train control on Newark-Penn station line. In short Amtrak has been and continues to be a good steward of this entrusted asset.

We can not rest, and we have not rested. While it is difficult to operate a semi-public sector railroad with the uncertain support from year to year we have continued to plan improvements during those times of uncertainty. We are not sitting still waiting for someone else to tell us what to do. We know what to do, we have a NEC Master Plan approved by all nine of the States and DC that will bring us to a State of Good of good repair (SOGR). It will help with capacity; it will increase speeds; it is vital for our commuter partners. It was started and completed with a common sense vision of SOGR.

New rail leadership from President Obama and Vice President Biden has emerged in the United States recognizing that a SOGR vision is not going to be good enough for America to compete at the World Class level. The collective vision of Amtrak and the states contained within the NEC Master Plan was not ready to compete for the investment that was available for High Speed Rail with the likes of California or Florida. That is no longer true.

Amtrak leadership reacted quickly with the NEC NextGen Plan, and in addition the Board of Directors approved the establishment of the Vice President of High Speed Rail. We now have partnered with SNCF and Bechtel in Florida, and we will be in the mix of the competition for California when the time comes. We have not yet decided on partners for California.

Amtrak's NEC NextGen Plan will use the fastest technology available, and trip times from DC to Boston will be cut in half. Amtrak knows how to operate fast trains, and we are gaining experience with private sector partnerships in both Florida and California. Amtrak has kept its focus on reducing Debt, cutting it in half over the last five years. We have had two upgrades in our credit rating over the past two years. We are procuring new equipment under a fleet plan that was only talked about two years ago.

We still have our extreme critics who have not updated their understanding of the progress that this company is making everyday, but we also are making believers out of many as well.

We are capable, relevant and ready to take on the challenges and opportunities in not just the Northeast corridor, but in all our business lines from border to border and coast to coast. We are America's Railroad. Thanks for reading this, and thanks for every thing you do for Safety and for our Customers.

Joe B.

February XX, 2011

Dear Co-workers,

I am writing to you about the SAM (Strategic Asset Management) Program and the importance of the SAM training which is now underway. The SAM Program is an example of an investment of great importance that we have made for the health of the company, and with which we need your continued support.

We need to improve our financial systems, make better business decisions based on good information, and compete in a new and more demanding marketplace to remain a leader in our field. The first “release” of the SAM Program, to be launched in early April, will put a new financial system in place that will form the backbone of an integrated system that will allow us to see how materials, time and money fit together in a way that we have not seen before. This system will tie in SAP with many other systems that you may already use such as Ariba, Exacta, Maximo, and Spear to form a comprehensive tool that will allow us to grow and compete effectively.

Your participation and commitment to learning how to make these tools work for you is critical to doing your job and to our success as a company. This means training and preparation, and the continued good business management and maintenance that will give us the professional edge we strive for. To that end, we are providing training of the highest caliber delivered by professionals and some of our own employees who have spent months preparing to aid in the training effort.

I strongly support the benefits that will come from SAM. I hope you will support SAM, participate fully in the training and implementation, and be a part of transformational change in the way we do business.

Thank you for what you do every day to make Amtrak a more efficient and competitive company.

Sincerely,

Joe Boardman
President and CEO

Dear Co-Workers,

For the last three days having difficulty deciding the best way to lead into this note to you. This is my third effort over three days. The subject is our long-distance network, our 15 routes that serve customers coast to coast and border to border.

I believe that the long-distance trains are going to be the subject of debate again. But I believe that the debate must now be different than in the past. Long distance trains provide national connectivity to this nation on the surface of our land in the same way that the nation's electric grid provides for an acceptable quality of life in the rural portions of our United States. The electrical grid operates to sub-stations and distribution points from the power plants so that local distribution companies and public utilities can make sure that all local customers have access. Amtrak's long distance trains do the same thing for the communities that we operate through, our stations become the distribution points for intercity buses, transit systems, taxi's, private auto's and even ferry boats and bikes. It allows our nation the communication and commerce that just is not available any other way.

Amtrak's National System provides for the common good, but today we have become a culture that demands more than the common good for what we will support with public money. Today we want to know what it contributes to our economic benefit. The national budget debate will see Congressional Districts and States adding up their Federal investment in their District and their State in comparison to what they contribute in federal taxes, and in what the Federal subsidy or investment generates in revenue and jobs. Not just for Transportation, but for all of the things we have decided to do with the resources of the nation.

We will not be exempt from needing to defend the support we receive for the national network, and I completely need your help in telling our story in every community that we serve. I need you to tell the story of connectivity; the story of jobs; the story of how the community benefits from having train service. And the story of how communities in a 75 mile radius also benefit from being able to Board an Amtrak train for a 500 mile journey or even journey from one corner of the Nation to anyone of the other three corners. It is our customers and the communities that we serve who will decide if we are worthy of continued support.

My view is that we run this national system complete and connected or we run no long distance trains at all.

I believe the choice is now all or nothing at all, and I know the fear that strikes in some. It is not the time to give in to that fear and debate which route should go or how we would do better if we went a different way. Nor is it the time to dredge up the questions about eliminating Sleepers or Diners. Those are all distractions and they have served nothing more than being ways to avoid the main question, they have been asked many times over the forty years of Amtrak. We have goals that are focused on keeping Food and Beverage costs in control, we have legal requirements to evaluate the performance of every long-

distance route on a three-year rotating basis. We have cut enough over our first forty years; we now have the minimum system that provides national connectivity and mobility. In fact the two routes that we operate three days a week need to be daily.

The main question is: Does the United States Congress and the American Private Freight Rail industry want to keep the bargain they made with the People of the United States in 1971 or don't they? Amtrak belongs to the people of this country, it belongs to every community large and small, it belongs to the "fly over" bread basket, the coastal borders, and our mega regions. We are the stewards for our owners. We know our focus and our jobs, please talk to those who need to know, please keep putting Safety and Customers first.

The truth is that we all know anything else is another series of survival exercises.

Thank you for everything you do to make Amtrak better every day.

Joe B.

Dear Co-workers,

I know that there is a feeling of uncertainty in the air for some of you, and that many of you have questions. I don't have all the answers that many of you are seeking, but I want to tell you where the company is going — knowing what the plan is will at least help reduce some concerns that I have heard expressed.

In October, our board of directors approved a Strategic Plan that sets a new course for our company. I recently asked you to read and become familiar with the Strategic Plan — I will ask you again to do so now — because it is our roadmap to shifting our focus to strengthening the bottom line. As we follow it our company will become stronger, more customer focused, and more bottom line business focused. Amtrak can no longer hunker down in survival mode, and we do not need to. We are a critical asset to this nation; we must serve our nation and our customers well.

Before I get into the changes that I'm seeking, I want you to know that there are no planned or expected service reductions anywhere. Similarly, there are no planned layoffs for agreement-covered employees, other than the normal seasonal adjustments that we go through each year. Nothing different there.

As you know, I am seeking to align how we do business with our Strategic Plan. As I've communicated before, this realignment will result in a reduction in the number of non-agreement employees across all departments. We are not going to reduce any management forces during the coming holidays other than those who have elected and have been approved for the recent Voluntary Separation Incentive Plan. A number of a little more than 150 non-agreement-covered management people have chosen to leave the company via the VSIP, several of them from the senior ranks of management. On behalf of the company, I am grateful for the contributions that they have made through the years. Many of those among the group were close to making a retirement decision, and this program provided the incentive they needed to make a positive affirmation that it was time. I saw many struggle with that choice, as so many have done in the past when it was time to enter into retirement.

Our Strategic Plan We have formally rolled out only one part of that plan from a Business Line point of view which is the Northeast Corridor Infrastructure and Investment Development under Stephen Gardner. Stephen Gardner is hard at work to make our vision for very high speed rail a reality and while doing so improve the infrastructure and its capacity in an incremental way. We must increase current Acela capacity, Commuter access to NYC and advance the State of Good Repair of our entire NEC infrastructure with a collaborative cross functional team of Mechanical, Engineering and Operational efforts that is goal oriented and customer focused. Stephen's success will be our success and he must not be alone in the effort.

Off-Corridor Operations do not cover their basic operating costs, and part of the strategy here is to minimize the costs that are not directly connected with operating the trains in a safe, customer focused, reliable manner. The question to be asked is how does the work

that is being done contribute to doing that, and can it be done differently so that cost is lower without hurting the safety, customer service or reliability? Even more importantly perhaps is; How can we do a better job? Why are we still doing things in a way that does not take advantage of all the improvements available today? What should we stop doing?

We don't have those answer, and no one grand plan is going to give those answers to us, if for no other reason that a grand plan does not allow for the creative ideas of those that are out there doing the work, or who have been asking these questions for years and have nothing but frustrations left.

So that's part of why we don't have all the answers that people are seeking yet.

But I said we have some, and I will give you some of them now:

In Off-Corridor Operations there will be one reporting senior level person that Transportation, Mechanical and Engineering staff will report to. We can not expect a reliable, on-time, customer focused railroad to operate if there is not a focused accountability for that. Further that senior level person while being held to account for both cost and revenue will need to meet the standards and the budgets that are set by the Chief Engineer, Chief Mechanical Officer and Chief Transportation Officer. That same senior level manager will report to the VP for Operations as will each of the Chiefs. This will not be a return to the Strategic Business Unit model. "Operations" is not the same as "Transportation" and I often see that confused in the company. The VP Operations will submit his plan for aligning under this structure in early February and I expect to have given him enough input along the way that it will begin to be implemented by mid to late summer. I expect it to provide fewer levels of management from the top to the bottom, and that will cause an impact to the number of positions.

NEC Operations is one of the Strategic business lines. It will operate differently than the Off-Corridor Structure. The detail on that will not come until after the Off-Corridor structure is set, although once that is know it will help define the boundaries of the Corridor. So this is an area that will need to wait awhile for answers.

There will be one centrally managed Legislative, Government, Policy and Public Affairs function, with a field presence that keeps major contact with our State partners and determines what if any planning needs to be done for a customer or State Partner. Today this function has been split up among too many departments, with a lack of focus and accountability. Some of that change has begun with the dissolution of the Policy and Development Department. We expect 10 to 15 positions will be eliminated with that change.

There will be three planning organizations in the company and they will be relatively small. Facility planning which will be within Real Estate under the CFO will become much more active in proper planning for our Real Estate Assets including our stations; Operations planning under the VP Operations will pick up the Development aspects of the old Policy and Development department along with Section 210 improvement plans and other requests from States and Communities that desire service, and following up and assisting in company identified business opportunities; Strategic Planning which will be

in the President and CEO office and will monitor the Strategic Plan, make adjustment in the plan to keep it current, update the plan or help define course corrections early by paying attention to economic and other business trends to keep Amtrak on top of its game.

Marketing and Product Development will be less marketing and more sales. Product Development will partly become part of operations planning and will partly be retained, but will be smaller. Social media will grow along with the use of other more up-to-date methods of improving our service to our customer. Field functions will be part of operations, part of Legislative, Government, Policy and Public Affairs, or will be a targeted sales function with sales goals or will not exist. The distribution function of the commissary will go to Operations but the Menu Development will stay with Marketing. Call centers will stay with Marketing, and Marketing will pick up accountability for Selling our Management Services to Commuter Operations, evaluating and responding to the solicitations for Commuter Contracts.

There are other changes that will occur as we respond to the requirements of such a new direction. Its often said that change is the only constant that we deal with. We see it in our families and we see it in the world around us.

We are doing these changes for a stronger future, and yet I know when it affects you directly that high minded idea gets lost. That's the tougher part of leading a change. I've tried to mitigate some of this with the VSIP, giving us some room and also allowing those who have other opportunities to pursue them without hurting the company or the people. That won't be enough, and it won't be quick or automatic that the positions that have been vacated will be filled, some will and some won't. When you see them posted and you qualify for them please apply, if your record is good and your skills are the ones that are needed you will stand in a good position to be competitive.

Amtrak costs continue to climb with additional direct salaries and wages, and while some revenue from ridership is up other revenue like federal operating assistance is down that is part of the reason we must cut. But frankly that is not the primary reason. We must operate a more competitive company in a more competitive environment today. We have Global competitors coming into our backyard and convincing members of Congress, State and Commuter Officials and others that they can do a better job than Amtrak. We also are in competition for Federal Assistance across modes, Airlines through the FAA, Highways and the Intercity Buses through the FHWA; Transit, Commuter Rail and Buses through the FTA. We also have to compete with the funding for USDOT Safety programs which comes out of the same appropriation funding.

Reid Joins Amtrak as Chief Corporate Liaison

Transportation industry veteran Peggy Reid joins Amtrak today as chief corporate liaison. This new executive-level position reports directly to President and CEO Joe Boardman. Reid has held multiple senior leadership positions within the U.S. Department of Transportation and will be responsible for improving internal coordination between Amtrak departments on administrative, financial and operational activities.

Prior to joining Amtrak, Reid served for eight years as the Federal Railroad Administration's associate administrator for financial management and administration. She directed all Information Technology, Acquisition and Grants programs and Human Resources, and was also responsible for financial performance and budgeting for the agency and its eight regional offices.

"We can't continue operating as a collection of individual departments if we want to reach our potential," said President and CEO Joe Boardman, noting that programs such as Safe-2-Safer and Strategic Asset Management are moving the company in the right direction. "Peggy's job is to serve as an internal consultant to coordinate the process improvements and strategic planning we need to best serve our passengers and partners."

Other duties Reid assumes are management of organizational development, leading top-priority programs to make sure they align with strategic needs, and advising the CEO and other executives on major policies and issues facing Amtrak.

Reid began her career in the Office of the U.S. Secretary of Transportation. During her tenure at the FRA, she also held the positions of Human Resources director and acting director of Information Technology. She graduated magna cum laude from the University of Maryland with a bachelor's degree in business and holds an associate's communications degree from George Washington University.

Playing politics with the nation's infrastructure

Handcuffs

The interested parties Private investors invited by the US DOT to produce high-speed rail proposals emphasized that a heavy investment by the federal government

a new direction for passenger rail transportation in the United States. Specifically, this proposal will include provisions to bring true high-speed rail to the nation's Northeast Corridor by using public-private partnerships, and inject competition into passenger rail service around the country.

Special to agreement employees on overtime

Dear Co-workers.

When our appropriations were approved by congress this year they put a provision in the legislation that required changed procedures for how the company manages overtime payments to agreement employees.

The new requirements came from a previous requirement for the company to provide a list of our highest paid employees many of which are among the agreement ranks rather than non-agreement management ranks. Congress decided that they would find a way to limit the payment of overtime and they established a limit of \$35,000.00 as the upper limit for overtime before a special approval would be required.

This provision does not begin until January 1, 2012, and we are now working to understand what we will need to do, and then communicate that to both Union Leadership and management staff. We will follow the law and the agreements as we manage this latest requirement.

I write this now because confusion has occurred about this. Overtime is still something that will be paid but we have restrictions when any one agreement person goes over \$35,000.00 in overtime payments.

In the last report we had on overtime we had 1,283 employees that reached that level. The point Congress is making is that we may need additional employees if that is the case.

Of course the unintended consequence Congress has caused with this approach is that very often our most ambitious and productive workers are the ones that are paid the overtime. In fact it is our sense that some of our most dedicated workers are the ones that come in when they are needed. It is unfortunate that has such a consequence. On the other hand there are some situations that seem very badly out of control due to unintended consequences of labor agreements or lack of ability to hire enough help to control the issue. Congress is telling us to fix those situations with this requirement.

When we know how we will manage the impact of this we will address it through your manager and ensure that Union Leadership is fully advised. However even though some postings have occurred that are incorrect please know that this is not the end of overtime, and also please know that I thank you for your work and your willingness to put more time in when business needs or the safety and welfare of the public we serve are at stake. We will get this done in a fair way.

Joe B.

Special to agreement employees on overtime

Dear Co-workers,

I want to clear up some confusion about overtime for agreement-covered employees, in light of a new legal requirement that becomes effective xxxxxx.

When our appropriation was approved by Congress this year, the legislation included a provision that required new procedures for how the company manages overtime payments to agreement employees, establishing a limit of \$35,000 per employee before special approval would be required.

The limit was put into the legislation after we were asked by Congress to submit a list of our highest-paid employees (or functions?), many more of which are among agreement-covered ranks, rather than non-agreement employees. The list included 1,283 employees who exceeded \$35,000 in overtime.

There's a rumor circulating that this is the end of overtime. It is not the end of overtime for agreement-covered employees. Overtime is still something that will be paid, given the nature of some of the work we do. The difference is that we have restrictions when any one agreement employee goes over \$35,000 in overtime payments.

Very often, our most ambitious and productive employees are the ones earning overtime. Some of our most dedicated workers answer the call to come in or stay late. For some of the crafts, overtime is a way for us to make sure we get the job done without affecting service. It is unfortunate that the inadvertent consequence of this obligation applies to some of our most hard-working employees trying to do the right thing.

On the other hand, with this new requirement Congress is telling Amtrak to fix situations in which overtime has been excessive. There are situations that seem out of control for a range of reasons, such as unintended consequences of stipulations in labor agreements, or our not hiring more employees to address gaps in manpower. But we also need to do a better job of managing this part of the business, especially considering our current financial situation and our objective to put more emphasis on our bottom line.

We are currently working to understand exactly what we need to do to manage this requirement. When we know how we will manage the impact of this we will ensure that union leadership is fully advised and we will address it through your manager.

Please know that I thank you for your work and your willingness to put more time in when business needs or the safety and welfare of the public we serve are at stake. We will get this done in a fair way.

Sincerely,

Joe Boardman

Strategic Plan / Voluntary Separation Incentive Program

- Using the Strategic Plan we released in October as our roadmap, we must shift our focus to strengthening the bottom line. The plan — which everyone should read — aligns organizational efforts, prioritizes resource allocation, and measures performance against goals and strategies to put us in a stronger financial and strategic position.
- This plan is centered on accountability for performance, and calls for a sense of discipline and direction that enables us to leave behind the state of survival that hampers our strategic growth. It puts us in a much better position to be an active participant in today's competitive industry and business world.
- As we move forward with this plan, you will see more detailed descriptions of the tactics we'll employ in the annual Budget and Business plan and the Five Year Financial Plan.
- The first realignment of functions under the recently released FY 2011 - 2015 Strategic Plan is the formal integration of ongoing Northeast Corridor planning and development work with Amtrak's efforts to develop a proposed 220 mph next-generation high-speed rail system within a new Northeast Corridor Infrastructure and Investment Development business line.
- This integrated business line will bring together all Amtrak funding, policy and planning decisions regarding NEC improvements to maximize the financial performance of the business line, and to support the current and future operations on the Corridor, including commuter and freight railroad service.
- A critical element of the business line is to ensure the ongoing development of 220 mph high-speed rail, including developing financial and business plans, and communicating the high-speed rail vision for the NEC with Amtrak's stakeholders.
- The truth of our finances will require difficult decisions in the weeks and months ahead.
- We have a great future and we cannot abandon our investments or our plans. We don't have that luxury, and our customers expect us to get better while some of our detractors expect us to fold our tent. We will not do that.
- We need to create an organization and a culture that can manage the ambiguity that comes from the annually changing government support. We will not lose sight of the Amtrak our customers need us to be. We will continue to make the investments that will yield a more efficient and reliable Amtrak.
- We will allocate our resources to continue long-lacking capital investments that have become critical for us in serving our customers, such as the next-generation reservation system and eTicketing; fulfilling our mandatory requirements for stations under the Americans with Disabilities Act; and proceeding with the acquisition of new equipment for our aging fleet.
- In November, Amtrak will be offering non-agreement-covered employees a Voluntary Separation Incentive Payment in order to better allocate its resources and align the structure of the company in accordance with its Strategic Plan and within the financial realities it faces.
- Because the realignment will result in a reduction in the number of non-agreement employees across all departments, the VSIP is being offered as a way to lessen the impact of future involuntary separations. The realignment is expected to occur throughout FY 2012. If the cost-reduction and organizational expectations are not achieved, a Reduction in Force will take place in January 2012.

Dear GC, etc.,

[Forward to Exec Comm and direct reports]

I spent all day yesterday on the Hill talking to our friends about funding for this year. I did not come away with a positive feeling that we will have the sufficient amount of funding we'd hoped for. As you probably know, the numbers vary, and it's not wise to become all-consumed by one number versus another at this point. While we don't know yet what the outcome will be, I think it's important that we all have a sober picture of what we may be facing.

I know that your legislative folks are also visiting and educating our friends and the new members on the Hill, and you are hearing the same numbers that we are.

I have tasked staff to look at how we can save money and yet continue to provide the service that we all know is critical for our customers and our nation. I want each of you to know that it is not a rumor that we are looking at something — we will be looking at as many things as we can. All categories of overhead will be looked at in a fairly short time frame.

Yet even with that, I know that overhead alone may not be sufficient to save enough with the numbers that are being discussed.

There will be financial questions that will be asked in all corners of our company, and it will cause employees to wonder what's up. To that end, I will be keeping employees informed as we learn more. I will be meeting with the full board of directors next week, and they will also want answers as to what this all means for us.

I know this will be a stressful time for all of us. I will do my best to keep you informed. I thank you for the work you and your legislative reps are doing to help educate policy makers about the importance of the service we provide.

Joe Boardman
President and CEO

JM draft 8/29; this is likely too long, but will cut to fit space.

***California Zephyr* Tests Customer-Service Pilot Project**

Some 300 on-board service employees, station personnel, conductors and assistant conductors involved with the *California Zephyr* route have been trained recently in a new customer-service model aimed at improving passenger satisfaction and loyalty while also increasing revenue.

The model — known as HumanSigma® — was developed by Gallup and has been adopted by Disney, Ritz-Carlton Hotels, Starbucks and other major corporations. Gallup's approach is based on research that identifies four major principles as having the strongest bearing on customer loyalty.

“This training has been a major undertaking,” says Jennifer Davis-Page, marketing and product development office in Chicago, noting the high number of on-board employees involved. She says recent service disruptions due to flooding and the two grade-crossing incidents, as well as summer vacations, did delay the training somewhat. This round's final class is now scheduled for the end of October.

Full service on the *California Zephyr* was restored last week

The classes are based on research that shows that customers report the highest level of satisfaction when served by employees who:

- Perform random acts of kindness;
- Make an emotional connection,
- Follow “flawless processes,” and
- Pay attention to detail.

When these criteria are met, customers are more likely to seek out services from a company again and to talk about their experience to others, leading to increases in revenue.

The recent training sessions grew out of recommendations in the FY '10 Performance Improvement Plan for the *California Zephyr*, which was prepared in response to the federal mandate in the Passenger Railroad Investment and Improvement Act, under Section 210.

The approach is being closely evaluated and may be adopted for other routes in the future.

Message from Joe Boardman

Dear Co-workers,

Today we come together at 46 different locations to celebrate our second annual Employee Appreciation Day. I hope that you'll take the time to participate and learn more about what's going on in the company.

We've made a lot of headway in the past year, but I'd like to focus on some of the things we're doing as a company to improve life at Amtrak.

Whether you are a locomotive engineer or a financial analyst, each employee is the power behind the Amtrak brand. You — your ideas, your energy, your know-how — are what makes us America's railroad. And our employees show a loyalty to Amtrak and to the Amtrak family that in my view is uncommon in today's world.

We have our own financial challenges, and as a government-supported business we are fully aware of the responsibilities that come with taxpayer support. But one of the most meaningful investments we can make is in our workforce.

Next month, we'll be unveiling three interconnected resources for employees: the new Human Resources Employee Service Center, the Employee Information Portal and access to the intranet from home for all employees.

Also next month, employees participating in the Fidelity 401(k) Retirement Savings plan will have new lower-cost options in which to invest, allowing you to save more for retirement. The new options are the direct result of the initiative of our Treasurer, Dale Stein, who made securing these new options for employees among his top priorities.

We're devoting resources toward implementing Safe-2-Safer because the

return on a safer working environment — saving a co-worker from an injury or worse — is employees going home to their families at the end of the work day. With Safe-2-Safer, we're also providing managers ongoing training and helping foster a more collaborative environment. While the full benefits of Safe-2-Safer will play out over time, the result is an enduring change in the way we relate to one another, and a safer and more pleasant place to work.

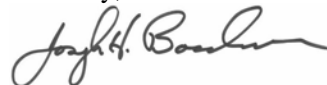

We also offer other resources that are unique to Amtrak. We are among few companies with its own Employee Assistance Program. The benefit of an in-house EAP is that our staff of professional counselors provides confidential support and guidance, but they also understand the unique Amtrak culture.

We also recently marked the 10th annual Operation RedBlock Day, aimed at educating employees about how to promote a drug- and alcohol-free workplace.

Next Saturday, approximately 170 locations in 44 states (including the events in Los Angeles, Chicago, Philadelphia, and Washington) will be hosting National Train Day events — an opportunity to celebrate the American railroad and the people behind it.

These are just a few examples of our efforts to show our commitment to you. We value and appreciate you, and the work you do every day. Thank you and keep working safely.

Sincerely,

Joe Boardman
President and CEO

April 4th 2011

Dear Co-workers;

I spent part of last week in Nashville Tenn., where our Safe2Safer contractor was holding a conference with a broad cross-section of their clients, and those interested in the best practices for improving their safety culture and reducing accidents and injuries. I met many of our own S2S coordinators, and participants from other companies like Disney, and Arch Coal and BNSF and others. Many of Amtrak Senior and Mid managers also participated in the event. I was surprised at the energy, and interest there was by the participants which numbered near 3,000.

Amtrak also participated with the Safety Showcase where each company really tried to tell their story of Safety and the cultural changes that they were engaged in to make safety a way of life in their industry. All of you can be proud of our people, their enthusiasm and their message. Even our K9 unit with APD attended, it felt good to be there and support our Amtrak people as they move us toward a better place with Safety. There was also very strong Union Leadership support demonstrated with a significant number of Local and General Chairs in attendance. I believe that Amtrak is becoming the National Leader in Safety Cultural changes for our industry.

Amtrak is improving in so many ways toward a new vision for itself. Safety is and always will be our number one goal, but I see a much greater focus on our Customers, both our passengers, and our State and Commuter customers, the measure is both ridership which up, and CSI scores which over all are improving.

The Safer, Greener and Healthier Amtrak is appearing and its shaping our future in a positive way for those that will follow us. We are demonstrating leadership on the NEC with a vision for faster trains, along with improvements for our critical infrastructure. We are looking for ways to do more recycling, save more fuel, pay down our debts; improve our organizational structure, reduce our subsidies by raising our revenue and being smarter about costs.

Amtrak is becoming stronger because we are focused on the right things and its noticeable for those who take the time to look. I recently stopped into a NARP meeting and said something like this. "Isn't it great that we have a "Fleet Plan" that can be criticized". "After all it isn't so long ago (before Feb of 2010) that we did not have a fleet plan to criticize". Now we have 150 Long Distance Single level cars on order and 70 Electric Locomotives on order, and we have updated our first fleet plan once and are looking at added criticisms to update it again.

I see many successes by the men and women of Amtrak since I came here in late November of 2008 and I am thankful for them, but there is something we all must keep in mind as we complete things... I once read someplace that "life was an unfinished-ness" which I took to mean that we should not get discouraged by it, but just keep doing what needs to be done. Amtrak is like that... It will always have things that need to be done, or

re-done or changed... it will be “unfinished” but each day it is better, and will continue to be for the future. It is up to all of us to hand it off to the next person or people that follow us in the best condition that we can... Amtrak is an institution that belongs to America, for now we are its “Stewards”.

Thank you for all you do.

Joe b.

Appointments Made to Realign Strategic Functions in Transportation Department

Operating department veterans Robin McDonough and Lois Cunning have been selected for two senior-level Transportation department appointments that are designed to better support the company's strategic initiatives by aligning functions, streamlining operations and strengthening relationships with partners and stakeholders. Both functions are effective as of April 15, and report directly to Vice President of Transportation Richard Phelps.

Robin McDonough has been selected to manage all major business improvements, technology enhancements and strategic planning and analysis. As chief, Business Operations and Technology, she will also oversee special train/private car moves and fuel management. She will put increased attention on planning and analysis, including the centralized review of all service changes and requests for new positions. She will also oversee crew management and train scheduling upon the retirement of Chief, System Operations Jon Tainow in June.

As chief Business Management and Customer Service, Lois Cunning will direct the development and implementation of strategic customer service initiatives and the implementation of initiatives, such as EIM and SAM. Lois will also advance the company's goal of improved connectivity and mobility by aligning the connecting services, like Thruway Bus service. Adding to her recent assumption of responsibility for customer service delivery, she will oversee the 24-hour customer service

desk at CNOC. Lois will continue to direct the financial and organizational management of the department. She will also be responsible for the revenue remittance function, joining together the on-board service, conductor and station audit functions.

Lois and Robin will work very closely together to gain efficiencies and implement strategies for the day-to-day and long-term operation of the department, including tending to the needs of strategic partners.

The appointments encompass two of a three-person management team at CNOC that will be in effect starting in June and reporting to the Vice President of Transportation.

Robin and Lois join Senior Director of System Operations Mike Frazier at CNOC, whose responsibilities center on train operations, service disruptions (and host railroad field coordination), space and equipment control, emergency preparedness and FEMA evacuation trains — making safety and customer service a focal point of all of those functions. Mike will begin reporting directly to Richard Phelps upon the retirement of Jon Tainow.

Human Capital Management Chief Selected

President and CEO Joe Boardman announced today that Barry Melnkovic, a human resources professional with more than 25 years of experience, will join Amtrak as Chief Human Capital Officer on Aug. 15.

Mr. Melnkovic will be responsible for oversight of all human resources functions, diversity initiatives and labor relations. He will report directly to the President and CEO.

“Barry’s experience will advance and enrich an approach to HR that is more in line with our evolving culture,” said Boardman. “He is a leader who has a record of successfully implementing innovative human capital strategies.”

His areas of expertise include labor relations, operational strategic planning, recruitment, organizational development/training, leadership coaching, performance management and workforce development. He is also well-versed in Lean/Six Sigma process improvement methodology.

Mr. Melnkovic was most recently vice president of Talent Management and Business Development at Alistar Consulting, Inc., a global executive search and consulting company. Prior to that, he served as vice president in Human Resources at Owens Corning, Holland America Line, Motor Coach Industries and Lilly Industries.

The change in title and nomenclature from human resources to human capital management represents a change in the scope of responsibilities. Human capital management puts more emphasis on a comprehensive approach to managing the workforce, recognizing its critical role in the development of an organization.

A Message from Joe Boardman

Dear Co-workers,

I've been struck by all of the discussion in the media these days about corporate or organizational culture. As I read news articles about inquiries into other organizations' business practices and what was or wasn't tolerated within their respective "cultures," I think about some of the changes we're making.

There is a very real relationship between culture ("how things really get done") and performance. And when things go wrong, what's often revealed is a culture that wasn't fostering the right values and/or steering the company in the right direction. If you don't believe me, just check the headlines lately.

I believe in Amtrak, and I believe that the investments we're making — including Safe-2-Safer and the Strategic Asset Management (SAM) — are helping cultivate a different Amtrak culture. The culture we're aiming for is one that thrives on collaboration and innovation; that makes decisions that make good business sense.

We're also pursuing a growth-oriented mission, and steering the company to better serve our state and commuter partners by providing them a higher level of customer service while always ensuring safe operations.

To that end, I want to update you on some of our activities on the commuter front. We're currently putting the finishing touches on our joint proposal with Bombardier to operate the Camden and Brunswick Lines of the Maryland Area Regional Commuter (MARC) service, in addition to the Penn Line, which we already operate.

We are also looking ahead to the release of a Request for Proposals to continue to operate Caltrain's Peninsula

Corridor Commuter Rail Service between San Jose and San Francisco. Keeping this contract will further strengthen our strategic partnerships in California — an important market given the state's commitment to expanding rail service.

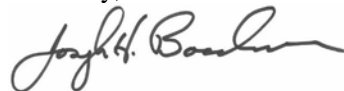

Speaking of California, the Transportation department is ramping up to begin operating Metrolink service on June 26 and we expect to sign the official contract in the very near future.

And while we are preparing for the transition of the Virginia Railway Express business to a competitor, VRE is currently still our customer and they deserve nothing but our best efforts. When that relationship ends, the employees that have been serving VRE in a variety of roles can stay with Amtrak, without resulting in the loss of any jobs for others in the Washington area. I look forward to having them continue to be part of the Amtrak family, pursuing a career in similar or the many other jobs and opportunities throughout our national system, now and in the future.

As I've said before, in years past Amtrak seemed to be focused on survival. Today, our survival relies on being focused on growth. As America's railroad and the only high-speed rail operator in the country, we offer unique expertise and experience and are making investments to secure our position as the provider of choice.

I'll keep you updated on the opportunities we're pursuing and look to you to help us secure them. In the meantime, thank you for your dedication and please work safely.

Sincerely,

Joe Boardman
President and Chief Executive Officer

A Message from Joe Boardman

Dear Co-workers,

I regret to inform you that another company has been chosen as the highest-ranked bidder to operate, and maintain track and equipment for, the Caltrain commuter rail service between San Jose and San Francisco.

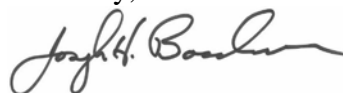

Amtrak has provided train crews, and Engineering and Mechanical employees since 1992. Since then, our employees have contributed to major projects that have brought about transformational changes, including significantly expanding track and signal capacity, and service expansions. I thank all of the employees dedicated to Caltrain service for helping the Peninsula Corridor Joint Powers Board (JPB) achieve its goals and for serving the people of that region so well for so many years.

We will be preparing for the transition of the business to another company, which is projected to formally occur in early 2012. At this point, I don't have much more to share with you about the process, but we will learn more as we work out the details with the JPB. In the meantime, I know that our Caltrain-assigned employees will continue to provide the same professional, safe and reliable service they have for years.

We are naturally disappointed. We have enjoyed our relationship with the JPB and the many people in the area who rely on the service.

While there will be an opportunity for us to learn from this experience, we did put forward a strong proposal and I appreciate all the hard work many people put into it.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Message from Joe Boardman

Dear Co-workers,

Since the official launch of Safe-2-Safer in August 2009, we've made some strides in creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

We have 28 steering committees and more than 500 trained volunteer observers in place across the system. In addition, more than 2,500 supervisors have participated in workshops to help make them more effective leaders.

Most of you were here when we invited all employees to participate in a voluntary survey in 2009. Those results did several things: They provided us with a current snapshot of how employees viewed Amtrak safety, security and leadership culture; provided a baseline from which we could measure improvement in employees' perceptions; and helped shape Safe-2-Safer to address the issues voiced by employees who completed the survey.

Now that we've put Safe-2-Safer in motion, we need your feedback about how it's going. Starting on Oct. 3, we will be asking you to take a voluntary survey, which will take approximately 45 minutes to complete. You will have the opportunity to complete the survey in a number of ways, depending on your location, craft and position. Safe-2-Safer facilitators and steering committees will be disseminating the

paper copies at your job location, while employees who have Amtrak email can take the same survey online via a secure external link hosted by a third party (a link will also be posted on the Amtrak intranet).

Please remember that the surveys are anonymous, and no answers can be traced back to any individual. Only BST representative (Behavioral Science Technologies, who are helping us implement Safe-2-Safer) will see the individual surveys. As we did with the survey taken in 2009, we will be sharing the results once they're available.

We have seen a lot of support for Safe-2-Safer throughout the company, and we have seen the signs that point to progress. I cannot overstate how important it is for us to hear from you about this — we need your participation to measure how far we've come and how far we have yet to go.

Thank you for your support, and look for more information about the survey as we get closer to Oct. 3.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

There is a lot of discussion going on — and more to come — about passenger rail in our country. During his State of the Union address this week, President Obama made specific reference to the critical role high-speed rail has in our country's infrastructure and future.

Yesterday there was a congressional field hearing held in New York City at Grand Central Station by the new Chairman of the House Transportation and Infrastructure Committee, Rep. John Mica. The subject of the hearing was about building “real” or “true” high-speed rail.

Al Engel, our new vice president for High-Speed Rail, and I joined a roundtable discussion of the issues after the official part of the hearing ended — we were not invited to testify before the committee. The addition of a discussion format in connection to a committee hearing was new for me. I guess it was Chairman Mica's way of trying to get the members of the committee and others engaged in a discussion about high-speed rail.

While it's not my intent to represent Chairman Mica's position, his basic argument — as I understand it — comprises three parts: 1. While he appreciates the efforts that have been made to bring high-speed rail to the Northeast, those efforts do not measure up to a world-class standard based on what is available in Europe, Japan and China. 2. The assets of the Northeast Corridor should be privatized with perhaps multiple operators or franchised with the intent of introducing competition as the way to bring this level of service. 3. The distribution of federal high-speed rail funding is too

widely dispersed and insufficient to accomplish the intended purpose of successfully constructing a world-class system, and further the only region of the United States that has the density to support that success is the Northeast.

You may have seen some of the stories in the media about the hearing, and we'll be seeing a lot more as the national debate about the future of passenger rail continues. I want to share with you our position.

In the context of these points of view — and I leave room for understanding them better as they develop — I believe: 1. Amtrak has proven to be a good steward of the Northeast Corridor since we were given that responsibility in 1976 for 363 miles of the 457 miles between Boston and Washington, D.C. Since 1976, we have electrified the entire route, we have nearly doubled the number of passenger trains per day, north-end speeds have gone up from a maximum of 90 mph to 150 mph, south-end speeds are up from 110 mph to 135 mph, travel time is down, ridership is up and continues to grow, Amtrak's air/rail market share is up and rising, and the number of grade crossings are down 80 percent. Given our challenges, we have made significant strides given the federal investment levels over the years.

2. In listening to other points of view, I think the core of their debate about high-speed rail is ultimately about who owns the property and/or operates it — a public entity like Amtrak or private sector entity. I think that's at the heart of the debate. Its major focus is not “real high-speed rail,” its “real estate.” Amtrak was created by Congress precisely because the privately owned railroads could no longer sustain the vital public service of intercity passenger rail. No other company is

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

January 28, 2011 • Page 2 of 2

prepared to take over the Northeast Corridor. No other entity is equipped to cover the long-term capital and operating costs of the NEC.

3. Places other than the Northeast need trip-time competitive rail service. The demand for it is so great that many states received funding for worthy investments to help meet their regional transportation needs. But more funding is needed to rebuild our passenger rail network, and to improve the ability for the freights to accommodate that growth. It is vitally important for passenger rail and high-speed rail systems to provide the connectivity that is needed to make passenger rail viable in the United States. It is not only about having rail as an option for millions of Americans, there are other reasons of national import — reducing our dependence on foreign oil, sound use of our energy and environmental resources, economic recovery and stimulation, and congestion relief are among the others — for advancing passenger rail as a matter of strategic national priority. Putting Amtrak on a list for zero federal funding is both inconsistent with that need, and ill advised in the face of the issues we face domestically and globally.

As I told you last week, we are working hard to educate new members of Congress and the general public about the importance of Amtrak to our nation, and to our nation's future. But the reality is that we are facing a national budget-cutting climate. In the coming weeks we will be learning more about what our federal appropriation for this year will be, and we should be prepared for a lower funding level than we expected.

We may face uncertainty, and hear about cuts all around us, and, yes, there are some things we cannot control. But

there is a lot that we can control. We are a unique company, we are experts in the industry and we are making changes to the way we do business to become a more competitive and responsive partner. I need your help in working hard to stay focused on providing world-class service today. We need to remain prudent about how we invest the federal dollars we've been provided. Don't let the discourse distract you from taking initiative, thinking bold thoughts about how to better meet the needs of our passengers, never letting your eye off the safety of our passengers and one another.

Thank you for your support and for what you do every day.

Joe Boardman

Joe Boardman
President and CEO

Dear Co-workers,

During his State of the Union address this week, President Obama made specific reference to the critical role high-speed rail has in our country's infrastructure and future.

Yesterday there was a congressional field hearing held in New York City at Grand Central Station by the new Chairman of the House Transportation and Infrastructure Committee, Rep. John Mica. The subject of the hearing was about building "real" or "true" high-speed rail.

Al Engel, our new vice president for High-Speed Rail, and I joined a roundtable discussion of the issues after the official part of the hearing ended — we were not invited to testify before the committee. The addition of a discussion format in connection to a committee hearing was new for me. I guess it was Chairman Mica's way of trying to get the members of the committee and others engaged in a discussion about high-speed rail.

While it's not my intent to represent Chairman Mica's position, his basic argument — as I understand it — comprises three parts: 1. While he appreciates the efforts that have been made to bring high-speed rail to the Northeast, those efforts do not measure up to a world-class standard based on what is available in Europe, Japan and China. 2. The assets of the Northeast Corridor should be privatized with perhaps multiple operators or franchised with the intent of introducing competition as the way to bring this level of service. 3. The distribution of federal high-speed rail funding is too widely dispersed and insufficient to accomplish the intended purpose of successfully constructing a world-class system, and further the only region of the United States that has the density to support that success is the Northeast.

You may have seen some of the stories in the media about the hearing, and we'll be seeing more as the national debate about the future of passenger rail continues. I want to share with you our position.

In the context of these points of view — and I leave room for understanding them better as they develop — I believe: 1. Amtrak has proven to be a good steward of the Northeast Corridor since we were given that responsibility in 1976 for 363 miles of the 457 miles between Boston and Washington, D.C. Since 1976, we have electrified the entire route, we have nearly doubled the number of passenger trains per day, north-end speeds have gone up from a maximum of 90 mph to 150 mph, south-end speeds are up from 110 mph to 135 mph, travel time is down, ridership is up and continues to grow, Amtrak's air/rail market share is up and rising, and the number of grade crossings are down 80 percent. Given our challenges, we have made significant strides given the federal investment levels over the years. It is my position that Amtrak should continue as the primary steward of Northeast Corridor assets in collaboration with states and commuter railroads and in a collegial way with the Federal Railroad Administration.

2. In listening to other points of view, I think the core of their debate about high-speed rail is ultimately about who owns the property and/or operates it — a public entity like Amtrak or private sector entity. I think that's at the heart of the debate. Its major focus is not "real high-speed rail," its "real estate." Amtrak was created by Congress precisely because the privately owned railroads could no longer sustain the vital public service of intercity passenger rail. No other company is prepared to take over the Northeast Corridor. No other entity is equipped to cover the long-term capital and operating costs of the NEC.

3. Places other than the Northeast need trip-time competitive rail service. The demand for it is so great that many states received funding for worthy investments to help meet their regional transportation needs. But more funding is needed to rebuild our passenger rail network, and to improve the ability for the freights to accommodate that growth. It is vitally important for passenger rail and high-speed rail systems to provide the connectivity that is needed to make passenger rail viable in the United States. It is not only about having rail as an option for millions of Americans, there are other reasons of national import — reducing our dependence on foreign oil, sound use of our energy and natural resources, economic recovery and stimulation, and congestion relief are among the others — for advancing passenger rail as a matter of strategic national priority. Putting Amtrak on a list for zero federal funding is both inconsistent with that need, and ill advised in the face of the issues we face domestically and globally.

As I told you last week, we are working hard to educate new members of Congress about the importance of Amtrak to our nation, and to our nation's future. More and more of the public is demonstrating their knowledge of the importance of rail with our increasing ridership.

We always face uncertainty, and we will hear about cuts all around us, there are just some things we cannot control. We can keep our faith that the right decisions will be made, and we can work hard for our customers...

Thank you for your support and for what you do every day.

Message From Joe Boardman

Dear Co-workers,

Last week, the board of directors and I recognized the contributions of Chief Information Officer Ed Trainor, as we offered him our best wishes for his retirement that begins this Friday.

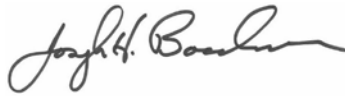

Ed has served Amtrak twice in his career, from xxxx to xxxx, and then again when he returned in Dec. 2006. As CIO, Ed presided over a number of major initiatives in Information Technology, including significant investments in streamlining our systems with Strategic Asset Management and the establishment of group information officers to better meet the business needs of the company. I thank Ed for his perseverance with our technology challenges and for his dedicated service over the years.

While we bid Ed farewell this week, we welcome someone many of you already know to the CIO position. Group Information Officer, Operations, Maintenance and Engineering, Ron Sorozan, has been selected to take over as Chief Information Officer. Reporting directly to me, Ron will start in his new role on Monday, June 20.

Since he joined Amtrak about a year ago, Ron has shown the kind of leadership, skills and technical knowledge that the CIO function requires. Ron has 25 years of experience in IT, including CIO appointments to two companies, and in-depth knowledge of reservation systems. Ron's familiarity with Amtrak's operational and business needs, combined with the customer focus he has shown in his current position, will serve him well in his new function.

Please join me in thanking Ed for his service and welcoming Ron to his new role at Amtrak.

Sincerely,

Joe Boardman
President and CEO

Message From Joe Boardman

Joe Boardman
President and CEO

Dear Co-workers,

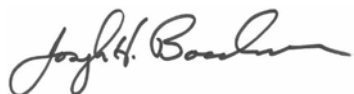

I am very pleased to announce that we've selected Jeffrey Geary, a seasoned railroad industry professional, to lead our operating departments. Effective June 20, Jeffrey will join Amtrak as the vice president of Operations, overseeing the Transportation, Engineering and Mechanical departments.

Jeffrey will report directly to me and will be based in Wilmington, Del. As I've said before and as evidenced by some of the changes I've made, the people running the day-to-day operation of the railroad should be located in the field, closer to the employees they supervise. The vice president of Operations function is squarely focused on operations — Jeffrey will not serve as my deputy or absorb other "corporate" duties — and will have direct accountability for the keeping the railroad running across the system and across Transportation, Engineering and Mechanical functions. This means that he'll be managing our operations in a more integrated way and will

Jeffrey was selected because exhibits the mix of knowledge and qualities I'm looking for, and he shares my focus. We have a strong senior management team in place, and we will continue to evolve as we bring together people who put a premium on collaboration and service quality.

Thank you for your support and for the work you do every day.

Sincerely,

Produced by
Employee Communications

Senior Management Update

Dear Co-workers,

Ensuring that we have a good team in place to maintain the continuity and focus we need to reach our goals is critically important, so I want to update you on some senior management functions.

We will be hiring a vice president of Operations, and the job **has been /will be posted this week/tomorrow/today**. Based in Wilmington, this position will be squarely focused on Operations, and the heads of the Transportation, Mechanical and Engineering departments will report to this person. While the function will report directly to me, this job should not be confused with the formerly abolished chief operating officer function, which served a different role in the company and included a number of other responsibilities outside of Operations. As I've said before, it's important that the folks who operate the railroad day-in and day-out are in the field, so that they are closer to the operation.

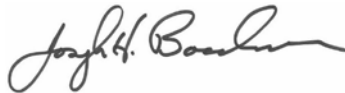

I also want to let you know that Chief Information Officer Ed Trainor has announced that he will be retiring after the initial launch of the Strategic Asset Management project in June of this year. To ensure that we have ample overlap and a smooth transition, we will also be looking for CIO candidates in about two weeks.

In addition, **xxxxx xxxxx** has been selected to manage the Human Resources functions with the **[impending]** retirement of the current of the department, Lorraine Green, on April 1.

For those of you who work with him or his department, vice president of Policy and Development Stephen Gardner while be out on paternal leave **(insert timing?)**. Vice president of Marketing and Product Management Emmett Fremaux and vice president of Government Affairs and Corporate Communications have both agreed to step in for him while he is on leave.

Thank you for your support and for the work you do every day.

Sincerely,

Joe Boardman
President and CEO

Message From Joe Boardman

Dear Co-workers,

I want you to know that I have asked our VP for Environmental Health and Safety, Roy Deitchman, to keep me advised about any issues or concerns that we should have in connection with the Japanese nuclear incident in the aftermath of the massive earthquake that took place there. Roy has worked on radiological health matters, and he is also consulting with our own medical director, Dr. Paul McCausland, who also has considerable experience with nuclear matters as a former nuclear engineer in the U.S. Navy.

The New York Times carried a story yesterday that indicated that the plume of radiation would reach Southern California tomorrow. I quote from the article: "Health and nuclear experts emphasize that radiation in the plume will be diluted as it travels and, at worst, would have extremely minor health consequences in the United States, even if hints of it are ultimately detectable." The article also quotes the head of the Nuclear Regulatory Commission, who stated that the plume posed no danger to the United States.

This is consistent with what Roy has advised both the Executive Committee and our board of directors. According to Roy and Dr. McCausland, since we expect potential exposures to be low, it would be extremely difficult to say what — if any — health effects might result. They added that there is currently no credible source that cites any projected health effects on the

U.S. population. We will continue to monitor the status of the situation.

On another note, we have developed a relationship with people at the East Japan Railway Company (JR East), and they have shared with us that none of their employees or customers perished or suffered major injuries because they had all evacuated safely. Sadly, one of their off-duty employees died and several others were injured. Although some conventional lines are operating at near normal levels, they are working through electrical power supply shortages to try to restore other service. It is heartening to hear them say that they feel restoration of service will encourage people. Our thoughts are with them — and any of our employees who may have family members in Japan — in this very difficult time.

I want you to know that we are keeping an eye on this issue. I hope this is helpful and reassuring to those who work, live and travel on the West Coast. If you want to learn more about this, you can find some good information on the World Health Organization website (www.who.org).

Thank you for your work and for treating our customers well. My best wishes to you and to your families.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

For nearly 150 years, our nation has observed Memorial Day by honoring the men and women who have died in the service of our great country. As America's Railroadsm, we, too, will commemorate Memorial Day this year.

At 3 p.m. local time on Monday, we encourage all Amtrak employees to participate in the National Moment of Remembrance by taking a moment to observe, in your own way, the Americans who have died while defending our nation. This year, as in previous years, all of the engines on the system will sound their horns at 3 p.m. local time as a salute to those who died for our country.

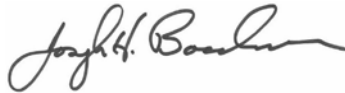

Memorial Day is also a day to remember the men and women who are on active duty. Over the years, many Amtrak employees have served our nation to protect our freedoms and our way of life. I hope you will take a moment to think about the Amtrak employees who are on active duty with the Reserve or the National Guard and are deployed away from their families and friends.

For those uniformed crew members who will be working on Memorial Day, we want to remind you that Amtrak authorizes the wearing of appropriate lapel pins or badges that commemorate your military service. We encourage displaying service crests, unit badges and ribbon pins. Wearing of American flag pins or yellow ribbons is also appropriate.

Memorial Day often marks the start of the summer vacation season for most individuals and families and is greeted with celebration. I hope those of you

who are able to take the holiday enjoy your time off.

To those who are serving or have served, I share a special message: We are proud to support our veterans. I am proud of all of you and grateful for your service to our country.

Message from Joe Boardman

Dear Co-workers,

The House Appropriations Subcommittee today released a proposal for FY '12 that would significantly reduce Amtrak's federal funding, specifically the operating support.

The proposal also prohibits the use of federal operating funds provided to Amtrak to be used for state-supported trains. If enacted by the full Congress, it would effectively eliminate nearly 150 weekday state-supported Amtrak trains and negatively impact the more than nine million passengers who ride those trains each year, and the communities they live in.

While I am intent on doing our very best to continue to carry out our mission of providing national service, the cuts in funding would mean job losses for Amtrak.

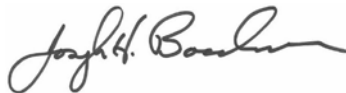

The House proposal is shortsighted and steers our national transportation policy down the wrong road. It will force states that have made decades of investment in passenger rail, and have made rail an important part of their future transportation plans, to eliminate service.

Under PRIIA, which was passed by Congress in 2008, we are already working cooperatively with our state partners to shift more of the costs of state-supported trains directly to the states.

Amtrak is part of the solution, not the problem. We're on the verge of setting new ridership and ticket revenue records. We serve as an economic engine for communities across the country, we help relieve congestion and we help reduce our nation's dependence on foreign oil. And we provide 15 states — nearly half of our departures — the service they want to meet their transportation needs.

We will continue to meet with members of Congress to make our case and explain the repercussions of this budget proposal. This is the start of the legislative process for FY '12, but don't expect this to be like other years in recent history. We are living in a very tough political and economic climate, and it's going to be a challenge.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Since the official launch of Safe-2-Safer in August 2009, we've made some strides in creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

We have 28 steering committees and more than 500 trained volunteer observers in place across the system. In addition, more than 2,500 supervisors have participated in workshops to help make them more effective leaders.

Most of you were here when we invited all employees to participate in a voluntary survey in 2009. Those results did several things: They provided us with a current snapshot of how employees viewed Amtrak safety, security and leadership culture; provided a baseline from which we could measure improvement in employees' perceptions; and helped shape Safe-2-Safer to address the issues voiced by employees who completed the survey.

Now that we've put Safe-2-Safer in motion, we need your feedback about how it's going. Everyone's participation is needed and valued, as we will use the responses to determine how to modify Safe-2-Safer to better ensure that it's helping create a safer workplace. Starting on Oct. 3, we will be asking you to take a voluntary survey, which will take approximately 45 minutes to complete. You will have

the opportunity to complete the survey in a number of ways, depending on your location, craft and position. Safe-2-Safer facilitators and steering committees will be disseminating the paper copies at your job location, while employees who have Amtrak email can take the same survey online via a secure external link hosted by a third party (a link will also be posted on the Amtrak intranet).

Please remember that the surveys are anonymous, and no answers can be traced back to any individual. Only BST representatives (Behavioral Science Technology, who is helping us implement Safe-2-Safer) will see the individual surveys. As we did with the survey taken in 2009, we will be sharing the results once they're available.

We have seen a lot of support for Safe-2-Safer throughout the company, and we have seen the signs that point to progress. I cannot overstate how important it is for us to hear from you about this — we need your participation to measure how far we've come and how far we have yet to go.

Thank you for your support, and look for more information about the survey as we get closer to Oct. 3.

Sincerely,

Joe Boardman
President and CEO

Preparations for Amtrak to Continue Operations during Government Shutdown

Over the weekend, the President and Congress announced a shutdown of the federal government. The shutdown is slated to last until they come to a resolution on the current fiscal budget. However, we do not expect the shutdown to last very long.

Amtrak will continue operations as normal. While the company relies on the government for some funding, the company also uses revenue from ticket sales and other sources to fund operations, and has the resources available to continue service.

Funding Update: Congress has passed legislation to continue funding federal agencies, Amtrak and others that rely on federal support this fiscal year. Final details of the FY '11 budget are being ironed out this week.

Ridership Operations Update: -March marked 17 consecutive months of year-over-year ridership growth for Amtrak and the next March on record. Halfway through the fiscal year, it appears that the company remains on track to Ridership set another annual ridership record. has grown more than 36 percent since 2000 and the trend is expected to continue. This strong performance is part of a long-term trend that has seen Amtrak set annual ridership records in seven of the last eight fiscal years, including more than 28.7 million passengers in FY 2010.

PSSA: The President's Service and Safety Awards (PSSA) Committee is currently accepting nominations for the 2011 President's Service and Safety Awards. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms." The nomination period ends Friday, May 13.

Environmental Update: ~~chieve~~The Medical and Environmental Health and Safety department continue to monitor the releases from the damaged Japanese nuclear plant. The reports indicate there is no health risk to the United States though measurements have found very low levels of radiation. Additional information can be found at www.epa.gov/radiation

Participate in the National Train Day Contest

The National Train Day employee trivia contest is now open at www.TrainDay411.com. Employees can enter the contest for the opportunity to win prizes and to be included in the May issue of

Amtrak Gears Up for 40th Anniversary, Employee Appreciation Day & National Train Day in Full Swing

May will be a busy month, as the company kicks off its 40th anniversary, honors its employees contributions, and celebrates national Train Day in the first week of May.

Special employee ~~events, festivities~~ will be held at more than 50 locations across the country on May 2 to celebrate Amtrak's 3rd Annual Employee Appreciation Day. ~~This year is especially significant as the company begins to celebrate its 40th anniversary and honor the long-standing dedication and service of employees over the years.~~

~~Employee Appreciation Day~~ Events will vary depending on ~~the your~~ location, but most will provide access to local community vendors offering employee discounts on products and services; on-site human resource partners such as Fidelity and Aetna; a number of resources you can use to become safer, greener and healthier; and best of all – free food.

A few days after Employee Appreciation Day, on May 7, Amtrak's fourth annual National Train Day event will take place at Amtrak stations in Washington, D.C., Philadelphia, Chicago, and Los Angeles. Employees, passengers, and railroad enthusiasts will be able to come together to celebrate the history and tradition of railroads in America. There will also be hundreds of local events taking place across the country.

In addition, as part of Amtrak's 40th Anniversary celebration, a special exhibit train will be unveiled to employees and the media on Employee Appreciation Day (May 2) and to the public on National Train Day (May 7) in Washington, D.C. The exhibit train, which is comprised of restored equipment and customized display cars, will embark on a year-long cross

National Train Day Contest Winner

Congratulations to the first winner of this year's National Train Day trivia contest, Elizabeth Thornton, Customer Support Representative, Philadelphia!

A new question for the National Train Day employee trivia contest is posted on www.TrainDay411.com through April 18. Employees can enter the contest for the opportunity to win prizes and to be included in the May issue of *Amtrak Ink*. The contest launched on March 21, and a new question will be posted every two weeks leading up to May 7.

Employees are also encouraged to volunteer at a National Train Day event by signing up online.

Special employee events will be held at more than 50 locations across the country on May 2 to celebrate Amtrak's third annual Employee Appreciation Day. Events will vary depending on the location, but most will include food, access to local vendors offering employee discounts on products and services and on-site human resource partners such as Fidelity and Aetna, in addition to a number of other resources employees can use to become safer, greener and healthier.

In addition, as Amtrak kicks off its 40th Anniversary celebration, a special exhibit train will be unveiled to employees and the media in Washington, D.C. on Employee Appreciation Day. Comprised of restored equipment and customized display cars, the exhibit train will embark on a year-long, cross-country journey after its debut in Washington. Created by and for employees, the train is an opportunity to showcase Amtrak's history to employees and the communities it serves.

Employees located in Washington, D.C., or traveling to the District the week of May 2 may also view the exhibit train throughout the week. The exhibit train will make its official public debut at the National Train Day event in Washington, D.C. More information about the train's schedule, **including viewing hours the week of May 2, will be posted on www.amtrak40th.com starting when?**

On May 7, the fourth annual National Train Day will take place at Amtrak stations in Washington, D.C., Philadelphia, Chicago, and Los Angeles, where employees, passengers, and railroad enthusiasts will come together to celebrate the history and tradition of railroads in America. There will also be hundreds of local events taking place across the country. For more information about all of the celebrations, including a list of events, go to www.TrainDay411.com.

Amtrak Gears Up for Employee Appreciation Day & National Train Day

Special employee festivities will be held at more than 50 locations across the country on May 2 to celebrate Amtrak's 3rd Annual Employee Appreciation Day. This year is especially significant as the company begins to celebrate its 40th anniversary and honor the long-standing dedication and service of employees over the years.

Employee Appreciation Day events will vary depending on your location, but most will provide access to: local community vendors offering employee discounts on products and services; on-site human resource partners such as Fidelity and Aetna; a number of resources you can use to become safer, greener and healthier; and best of all – free food.

A few days after Employee Appreciation Day, on May 7, Amtrak's fourth annual National Train Day event will take place at Amtrak stations in Washington, D.C., Philadelphia, Chicago, and Los Angeles. Employees, passengers, and railroad enthusiasts will be able to come together to celebrate the history and tradition of railroads in America. There will also be hundreds of local events taking place across the country.

In addition, as part of Amtrak's 40th Anniversary celebration, a special exhibit train will be unveiled to employees and the media on Employee Appreciation Day (May 2) and to the public on National Train Day (May 7) in Washington, D.C. The exhibit train, which is comprised of restored equipment and customized display cars, will embark on a year-long, cross country journey after this debut.

Employees located in Washington, D.C., or traveling to the District at that time will be able to view the exhibit train throughout the week; an employee badge is required for entry to the train.

The tour is an opportunity to showcase Amtrak's remarkable history to employees and the communities we serve.

Amtrak.com Posts Record in June, July Achieves Highest Increase in Growth According to Industry Report

Amtrak.com hopefully hit records in June and July that we can point to, and say something else about. The growth the site is experiencing will lead to its strongest year on record, and is projected to reach an internal goal of generating \$1 billion in online bookings later this month.

According to comScore Media Metrix data, travel websites saw record activity in June. Amtrak.com topped the list of travel sector sites with the highest growth in the month of June, increasing 14 percent over ***the previous month.***

“We’re on track for exceeding 30 million passengers this fiscal year, and approximately ***xx*** percent of them are booking through Amtrak.com,” said ***Matt or Roger.*** “For many of our customers, Amtrak.com is the first step in the Amtrak journey, so we’re extremely focused on making it easy to use, accessible and very customer service oriented.”

Amtrak’s eCommerce group leads innovations that have helped the site come first in other areas. Five years ago, Amtrak was the first in the travel industry to launch a site designed for mobile phones. The site, Amtrak2Go, offers customers the ability to book tickets and conduct other transactions on their mobile phone. ***Insert award info somewhere in this graph***

A couple of years later, the group improved functionality of the site, including an interactive route atlas that depicts Amtrak’s national system that is another industry first.

Business travelers are credited for being among the early adopters of smartphones, so it’s no wonder that the travel industry sees this as a valuable sales channel. The employees behind Amtrak.com continue to explore the possibilities — keep an eye out for more news on this front.

Heat Advisories: Heat advisories for many areas of the country this week are reminders to take steps to prevent heat stress. Preventive tips include eating well-balanced meals (avoid heavy meals), getting sufficient sleep, wearing loose-fitting clothing, and drinking plenty of fluids (avoid sugary and caffeinated drinks). Please look out for signs of heat stress in co-workers and passengers.

The Great Migration of African Americans Exhibit Returns to Philadelphia’s 30th Street Station

TO BE EDITED

This display was a major attraction at 30th Street Station during National Train Day and many employees who were not able to view the exhibit due to work schedules have requested it’s return. The exhibit chronicles the Great Migration of African Americans from the rural south to the industrial Northeast, Midwest and West via passenger (and sometimes freight) trains. The migration which took place primarily during 1910 - 1930 was a major step in the full nationalization of the African-American population. The exhibit recognizes and honors the important role that the railroad played in the Great Migration. It will remain on display at the station until August 19, 2011. The exhibit was designed with the help of the Schomburg Center for Research in Black Culture, New York Public Library, African American Museum of Philadelphia, Library of Congress, The Henry Ford®, and University of Chicago and Florida State Archives.

May 2, 2011

Message From Joe Boardman

Dear Co-workers,

I invite you to join the employees at more than 50 offices, crew bases and facilities who will be celebrating our third annual Employee Appreciation Day and marking Amtrak's 40th anniversary today.

Four decades ago, Congress created a company to provide passenger rail service for our nation. Thanks to you and those who have come before us, we have built America's Railroad comprising long-distance, corridor and high-speed rail service that is setting ridership records.

Our accomplishments are a testament to the fortitude, dedication and know-how that you offer every day. It's important to remember that supervisors and peers should take the time to appreciate hard work, not just on an anniversary or Employee Appreciation Day.

While we celebrate our accomplishments, we must continue to build on our strengths, recognize what binds — not what separates — us and, with humility, learn from our successes and our mistakes. I want to cordially invite you to participate in Amtrak's third annual Employee Appreciation Day events taking place in over 50 locations across the country. As Amtrak kicks off its 40th Anniversary celebration this week, Employee Appreciation Day could not have come at a better time. The company certainly would not be the icon it is American culture were it not for each and every dedicated and hard working individual that makes up the Amtrak family.

Like family, it's important that we take care of each other. I encourage you and your co-workers to participate in the Employee Appreciation Day events being held in your area. Make it a priority to

Marketing Update: You can now receive *Amtrak Ink*, *Amtrak This Week* and *Special Employee Advisories* at your personal email rather than receiving paper copies by hand or mail. Sign up on the News & Info section of the Intranet.

Unaccompanied Minor Policy Change: Operations Update: Effective May 6, no minors under age 13 will be allowed to travel unaccompanied. They must travel with another person at least 16 years old. Passengers aged 14 and 15 can travel under the current unaccompanied passenger rules. Passengers age 16 and older travel without restriction. The new policy will help Amtrak ensure the safety and security of minor passengers. More information about the policy will be posted on the Intranet.

Safety Update: The National Association of Railroad Passengers (NARP) will hold its annual Capitol Hill Reception on Tuesday, May 3 from 5:30-7:30 p.m. at the Rayburn House Office Building, Rm. B-354. **Blair Slaughter**, Amtrak principal engineer, industrial design, will be presented with the Burch Memorial Safety Award during the reception. If you would like to attend and did not receive a direct invitation, please send a text message to 301-385-6438. this should be more about the award and congratulating him that the reception itself. I would swap this brief with the box (an employee accomplishment and condense what's in the box as a brief)

Security Update: Effective May 2, Amtrak Police will be checking to make sure that all employees and contractors are wearing proper identification while on Amtrak property. Employees and contractors will no longer be able to access Amtrak property using the old blue and the white identification cards. Amtrak police have been instructed to collect them and advise employees to get proper identification as soon as possible. Proper identification includes Smart IDs, yellow Temporary Identification cards and a Day Pass issued by an Amtrak security guard or police officer. Waiting to hear back from MA Lorimer about this, but it's way too long as it is -anyway. I had a concern about the language (APD stopping people, etc.,) and so we shouldn't repeat that here.

Boardman to Testify Before Senate on FY '12 Budget

Amtrak President and CEO Joe Boardman is scheduled to testify before the Senate Subcommittee on Transportation, Housing and Urban Development on Thursday, May 5 to make a case for Amtrak's federal FY '12 funding.

Amtrak has requested a total of \$2.22 billion for FY '12, divided into \$616 million to support operations, \$1.285 billion for capital programs, and \$271 million for debt service. The Grant and Legislative Request for FY '12 also seeks funding for the purchase of 40 additional *Acela Express* cars and an additional \$50 million to begin design and preliminary engineering work for the Gateway Project.

Mr. Boardman provided similar testimony before the House Subcommittee on Transportation, Housing and Urban Development on April 7.

The Both testimony ies will be are posted on the Intranet under "News" → "Legislative" → "Testimonies,," on May 5.

April 2011 Ridership Best on Record

April marked 18 consecutive months of year-over-year ridership growth and was the best April ever for the company. Ridership increased by 9 percent in April 2011 vs. April 2010, or more than 243,190 passengers. Insert info on the Northeast Regional service (forwarded email).

40th Anniversary Update: The 40th Anniversary kick-off event video is now available on Amtrak's YouTube channel at www.youtube.com/amtrak. Pls add this to the story 40th piece

Health & Wellness Update: The second round of the *Stay on Track...Keep Walking* program started yesterday, May 8, for individuals who have already received pedometers. That competition will run through June 18. For those who registered but have not received a pedometer, the program will run from May 15 through June 25. Contact Malva Reid for more information at mreid@amtrak.com.

Timetable Update: The 2011 Spring/Summer System Timetable takes effect today, May 9.

PSSA Deadline Extension: The President's Service and Safety Awards (PSSA) Committee is accepting nominations for the 2011 awards. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms." The nomination period ends Tuesday, May 31. (did this date change?)

Add Transportation video

Brief about bberry usage

Amtrak Officer of the Year

Det. J. Christopher Glass will be honored as the Amtrak Police Department's Officer of the Year for 2010 at a special ceremony on May 12.

Det. Glass is receiving this prestigious award for his numerous and significant contributions to the Amtrak community. He has served the Amtrak Police Department for 18 years, and is currently assigned as a detective in Riverside, CA.

Amtrak's 40th Anniversary Celebration, Employee Appreciation Day, and National Train Day Kick-Off Successfully

Last week, on May 2, more than a hundred Employee Appreciation Day events (is this number correct – we advertised 50) took place across the country, in conjunction with the kick-off of Amtrak's 40th anniversary on May 1. National Train Day closely followed with four major Amtrak-sponsored events in Washington, D.C., Chicago, Los Angeles, and Philadelphia on May 7 and hundreds more in communities across the nation. An estimated **35,000** people participated in NTD events.

Carolyn Stagger, Recognition Program Manager, who headed up the Employee Appreciation Day activity, said that the program would not have been possible without all the teamwork from the various departments and individuals who volunteered their time and efforts.

This sentiment remains true for the individuals and departments who assisted, volunteered and participated in activities for the 40th anniversary celebration and National Train Day as well. (combine the second and third grafs to save space) **Thank You to everyone who gave of their time and effort for these important events!**

Philadelphia Inquirer Highlights Amtrak's 40th

(Seeing this together, I think it may work better if this is incorporated into the 40th piece)

An article published in the Philadelphia Inquirer on May 5 highlights Amtrak's 40th anniversary and provides readers with a detailed look at where the company is now compared to its beginnings. Below are some excerpts from the article.

"Amtrak turned 40 this week, and the national railroad is finally growing up. With ridership back to a record-setting pace and a rail-friendly president (and vice president) in Washington, Amtrak is no longer limping along the brink of extinction."

...in recent years, Amtrak has enjoyed unprecedented rider support, and newfound political backing. With outspoken support from President Obama and Vice President Biden (a well-known Amtrak commuter), Boardman has pushed for growth and modernization of Amtrak."

To read the full story, visit:

http://www.philly.com/philly/insights/in_politics/20110505_Now_40_Amtrak_is_finally_growing_up.html

Health & Wellness Update: The second round of the *Stay on Track...Keep Walking* program started yesterday, May 8, for individuals who have already received pedometers. That competition will run through June 18. For those who registered but have not received a pedometer, the program will run from May 15 through June 25. Contact Malva Reid for more information at mreid@amtrak.com.

Timetable Update: The 2011 Spring/Summer System Timetable takes effect today, May 9.

PSSA Deadline Extension: The President's Service and Safety Awards (PSSA) Committee is accepting nominations for the 2011 awards. Nomination forms are available on the Intranet at "Employees" → "Awards and Achievements" → "2011 PSSA Nomination Forms." The nomination period has been extended to Tuesday, May 31.

Information Technology: The use of Amtrak computers, facilities or equipment in any manner that could be considered abusive, unethical or inappropriate is not permitted. Read more about Amtrak's policies on computer, Internet, Blackberry, and phone usage on the Intranet at "Library" → "Policies" → "Information Security Policies."

Marketing Update: The winner of the 2nd Annual Amtrak TRAINSportation Video Contest is James Shanek of Oakland Community College in Bloomfield Hills, MI. His video is being featured today during National Train Day at Chicago Union Station.

40th Anniversary Update: To view the 40th Anniversary kick-off event video visit Amtrak's YouTube channel at www.youtube.com/amtrak.

Amtrak Officer of the Year

Det. J. Christopher Glass will be honored as the Amtrak Police Department's Officer of the Year for 2010 at a special ceremony on May 12.

Det. Glass is receiving this prestigious award for his numerous and significant contributions to the Amtrak community. He has served the Amtrak Police Department for 18 years, and is currently assigned as a detective in Riverside, CA.

April 2011 Ridership Best on Record

April marked 18 consecutive months of year-over-year ridership growth and was the best April ever for the company. Ridership increased by 9 percent in April 2011 vs. April 2010, or more than 243,190 passengers. Insert Northeast Regional Service per my previous draft

Today, U.S. Department of Transportation Secretary Ray LaHood announced plans to award \$2 billion to improve high-speed rail across the country. From the \$2 billion, the Federal Railroad Administration awarded Amtrak \$450 million to upgrade its rail infrastructure to support faster and more frequent high-speed rail service, and to improve reliability of service between New York and Washington.

The DOT also awarded \$345 million to several states for other NEC-related projects that will help enhance capability of the current network. Additional funding given to states in the Northeast, the Midwest and California will also benefit Amtrak services through projects to expand service and provide higher-speed intercity passenger rail service.

Amtrak's 40th Anniversary Celebration, Employee Appreciation Day, and National Train Day Kick-Off Successfully

Last week, on May 2, more than a hundred Employee Appreciation Day events took place across the country, in conjunction with the kick-off of Amtrak's 40th anniversary on May 1. National Train Day closely followed with four major Amtrak-sponsored events in Washington, D.C., Chicago, Los Angeles, and Philadelphia on May 7 and hundreds more in communities across the nation. An estimated 38,500 people participated in NTD events.

An article published in the Philadelphia Inquirer on May 5 highlighted Amtrak's 40th anniversary and provides readers with a detailed look at where the company is now compared to its beginnings. Below are some excerpts from the article.

"Amtrak turned 40 this week, and the national railroad is finally growing up. With ridership back to a record-setting pace and a rail-friendly president (and vice president) in Washington, Amtrak is no longer limping along the brink of extinction.

...in recent years, Amtrak has enjoyed unprecedented rider support, and newfound political backing. With outspoken support from President Obama and Vice President Biden (a well-known Amtrak commuter), Boardman has pushed for growth and modernization of Amtrak."

Message from Joe Boardman

Dear Co-workers,

In times of fiscal austerity and uncertainty, it can become easy to get swept up in day-to-day events.

That's one of the reasons Thanksgiving has become my favorite holiday. It reminds me how necessary and beneficial it is to pause and reflect on what we have achieved, sometimes despite tough times.

This has been a period of high energy, achievement and innovation for Amtrak. In our 40th year, we posted record ridership and ticket-revenue — on all of our services, not just the Northeast Corridor. We made major investments in our infrastructure and technology and are in the process of upgrading our fleet with new locomotives and cars. We are moving toward eTicketing on all of our routes.

None of this would have been possible without the talent, dedication and commitment of each of you.

Three years into my job as CEO of this company, I remain humbled by the trust you have invested in me. We have many hard and important decisions ahead of us as we continue to strengthen this company, and I renew my commitment to each of you to lead with integrity and vision, backed by your collective wisdom and input.

As we head into one of the busiest travel times of the year, let's embrace this opportunity to showcase our strengths as America's Railroad®. We'll be adding extra service to accommodate demand on many routes, including along the Northeast Corridor, Amtrak Cascades and the Pacific Surfliner. The historic "Great Dome" car is being added to trains running to and from Chicago. And we'll be offering a traditional Thanksgiving feast on long-distance routes — complete with pumpkin pie — for passengers and for our employees working during the holiday.

Many travelers will be riding Amtrak for the first time, and our efforts to provide efficient and caring service that anticipates and responds to their wants and needs will be the deciding factor in turning these passengers into loyal longtime customers.

Thank you for all that you do. I wish you and your families and friends a festive, relaxed and safe Thanksgiving season.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Joe Boardman', is located below the 'Sincerely,' text.

Joe Boardman
President and CEO

Thanksgiving Timetable: Thanksgiving timetables for the Northeast and Amtrak Cascades are posted on Amtrak.com. As in prior years, both the *Pacific Surfliner* and *Keystone Service* will be all-reserved throughout the holiday period, which runs Nov. 22-28. **After that time, the Fall-Winter timetable will go back into effect.**

Government Affairs: ***H.R. 2112 - the Consolidated and Further Continuing Appropriations Act, 2012 (Rep. Rogers -Appropriations)***

Last Week to Participate in the Voluntary Separation Incentive Plan

Non-agreement employees interested in participating in the Voluntary Separation Incentive Plan may send a completed Election to Participate form to Michael Ramirez via fax at (202) 906-3558 or email ramirem@amtrak.com until Nov. 25.

Non-agreement employees interested in the VSIP may call the Employee Service Center at (888) 694-7372.

Environmental, Health and Safety: Amtrak encourages employees to support the Drug Enforcement Administration's National Prescription Drug Take Back Day on Oct. 29, 2011. This day provides a venue for persons who want to dispose of unwanted and unused prescription drugs. To locate local community prescription drug collection sites visit, www.justice.gov/dea and click the "Got Drugs?" icon. The service is free and anonymous.

Safe-2-Safer Survey: Don't forget to provide your input by completing the Safe-2-Safer survey. Safe-2-Safer Facilitators and Steering Committees are distributing the paper copies at many job locations, or you can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E>. The link is also posted on the home page of the intranet, in the "Employee Info" box. The survey is open to Amtrak employees only and concludes Oct. 28.

Employee Security — Did You Know?

Amtrak Police Department officers are available to escort employees and passengers to their personal vehicles, local parking lots or nearby train stations in many Amtrak locations.

The added safety assistance is available wherever Amtrak police are stationed. To arrange for an escort at any time, day or night, call (800) 331-0008.

Posters are being posted starting this week to remind employees and passengers about this police service.

Employees Honored at President's Service and Safety Awards This Week

Congratulations to the employees from across the country who will be joined by family, friends and co-workers at the 2011 President's Service and Safety Awards in Washington, D.C., this Wednesday.

The annual recognition program celebrates the accomplishments of employees who surpass expectations, and represent a high degree of dedication and commitment.

This year's 217 award winners include 208 employees from 10 departments, two state partners, one external Champion of the Rails and six contractors.

PSSA is an annual employee-driven recognition program; recipients are nominated by their co-workers, and their accomplishments are researched and evaluated by a committee comprised of management and agreement-covered employees from different departments across the country.

Tribute to Conductor Laurette Lee

On Wednesday, October 19, at 8:30 a.m. EDT, a brief ceremony will be held at the Employee Memorial Wall inside Washington Union Station to honor Conductor Laurette Lee. Lee died June 24 when the *California Zephyr* train she was working on was struck by a tractor trailer east of Reno, Nev.

In addition, a moment of silence will be dedicated to her and the others who perished as a result of the incident, at the President's Service and Safety Awards luncheon in Washington, D.C., on the same day.

Environmental, Health and Safety: Amtrak encourages employees to support the Drug Enforcement Administration's National Prescription Drug Take Back Day on Oct. 29, 2011. This day provides a venue for people who want to dispose of unwanted and unused prescription drugs. To locate local community prescription drug collection sites visit, www.justice.gov/dea and click the "Got Drugs?" icon. The service is free and anonymous.

Radio City Holiday Spectacular: Amtrak employees qualify for a 25 percent discount on tickets for select performances to see the Rockettes and other performers at the Radio City Christmas Spectacular in New York, from Nov. 11 through Jan. 2. For more information and to purchase tickets, go to www.radiocitychristmas.com/amemp. Type in the code "AMEMP" on the purchase page to receive the discount.

Human Resources: Non-agreement covered employees should be on the lookout for materials mailed to their homes WHEN that provide more information on the new CIGNA and CVS Caremark benefit partners, transition of care benefits, and more. In addition, employees may contact them through temporary customer service numbers that will be in effect 24/7 from October 24 through December 31, 2011:

- Cigna: 800-564-7642
- CVS Caremark: XXX-XXX-XXXX

Employees may also send questions via email to the Benefits Department at HR_Benefits@amtrak.com.

Year in Review: Do you have photos of your favorite 2011 Amtrak moments? If so, email them, along with a brief description, to Ecom@Amtrak.com for possible inclusion in the December/January issue of *Amtrak Ink*. The deadline for submissions is Nov. 25.

Safe-2-Safer Survey Concludes Next Monday

There's only one week left to complete the Safe-2-Safer survey, which has been extended to Oct. 31. Employees are asked to complete the survey to provide their feedback; the responses survey will be used to evaluate progress to date in changing the culture and to determine how to modify Safe-2-Safer.

Safe-2-Safer Facilitators and Steering Committees are distributing the paper copies at many job locations, or employees can complete the survey by going to <http://bstsolutions.inquisiteasp.com/cgi-bin/qwebcorporate.dll?JD926E>. The link is also posted on the home page of the intranet, in the "Employee Info" box.

The survey is open to Amtrak employees only. Please remember that the surveys responses are anonymous, and no answers can be traced back to any individual. Only BST representatives (Behavioral Science Technology, who is helping us implement Safe-2-Safer) will see the individual surveys.

Washington Union Station Renovation Begins Today

Starting tonight, Washington Union Station will undergo interior restoration to repair damage done to the structure's ceilings as a result of the Aug. 23 earthquake.

While the project will not directly affect Amtrak ticket counter operations and boarding gate areas, it will affect traffic flow through the station. The project is expected to take six to 10 months to complete and will take place in the Main Hall and the adjoining ticketing concourse area and lower-level food court. Work will first begin on the ticketing concourse ceiling, followed by work on the Main Hall around Nov. 1. At this point, access to the Amtrak headquarters offices is not expected to be affected.

All station operations and businesses will continue as normal. During the project, steps will be taken to ensure the safety of employees, passengers and visitors, as well as to minimize the inconvenience to those who work in and visit the station. Way-finding signage will be posted to facilitate traffic inside the station as the project evolves.

Given the Columbus Plaza construction project taking place in front of the main entrance to the station and this restoration project, Amtrak is encouraging passengers to allow additional time to arrive at the station and make their way to the boarding gates. Union Station is the second-busiest station in the Amtrak system.

2012

Amtrak Relief Fund Payroll Deduction Form

I voluntarily authorize the National Railroad Passenger Corporation (Amtrak) to deduct from my paycheck the amount shown below as a donation to the Amtrak Relief Fund. I understand that my donation will be used to provide financial assistance to Amtrak employees who have a financial need due to **Hurricane Sandy**.

Contribution

☐ I wish to make a **one time only** contribution to the Amtrak Relief Fund of \$ _____

☐ I wish to make a contribution **each pay period** of \$ _____
for a **total** of \$ _____

I understand my deduction will stop when my total contribution has been reached.

A Message from Joe Boardman

Dear Co-workers,

As we continue executing our strategic plan, it is critical that we align the various functions within the company in a way that allows us to most efficiently achieve our goals through better collaboration and less bureaucracy. One area where we have identified significant opportunities to improve is emergency management and corporate security.

Currently, we have teams and groups spread across many departments that have responsibilities in these areas. We are creating a new Emergency Management and Corporate Security department to integrate these existing teams into a single, cohesive unit. By doing so, we can more effectively prepare for emergencies and disasters, mitigating their effects and allowing for fast and efficient response and recovery.

Our first and most important goal in the strategic plan is ensuring the safety and security of our employees and customers. The new team will be tasked with identifying opportunities for Amtrak to strategically coordinate, train and put into practice consistent and efficient response and recovery efforts designed to serve our employees and customers in the best way possible.

There are eight functions currently in various departments that I believe are focused in one way or another on emergency management. These are:

1. Station Action Team Coordinators (Amtrak Police)
2. Emergency Preparedness (Transportation)
3. Rail Evacuation Planning (Transportation)
4. Go Team Planning (Transportation)
5. Security Awareness Strategy (Amtrak Police)
6. Corporate Security Strategy (Amtrak Police)
7. Recovery and Resilience Exercise Program (President's Office)
8. Continuity of Operations (President's Office)

These functions will be integrated into a department whose primary focus will be emergency preparedness, continuity of operations and corporate security risk strategy. I believe that combining these functions will provide a framework in which to plan for, respond to and recover from incidents while also establishing and maintaining a uniform corporate security strategy.

Susan Reinertson, who currently oversees our recovery and resiliency exercise program as well as continuity of operations planning, will lead the new Emergency Management and Corporate Security department. She will continue to report to me. I believe Susan's background in homeland security and emergency management consulting as well as her leadership experience at

A Message from Joe Boardman

Dear Co-workers,

I believe you need to understand the truth about our Food and Beverage costs and revenues. To our detriment, the facts of our progress and of our failings have been ignored or, in some cases, misstated.

As I travel throughout our system, I find that most of our employees have their heads in the right place, and are aware that there is room for improvement. We can do better and I hear that from you when we talk. Many of you are properly frustrated that management allows some of our staff to throw away whole sugar packet boxes and salt and pepper and spoons knives and forks... That is wasteful and needs to stop.

I recently read a customer complaint that said whomever sold the customer coffee receipted it at a cost of zero; that is stealing. And it is one of the reasons that we will be conducting a test of cashless sales even though I believe that we will always have customers who will need to use cash. Regardless, employees who steal from the company will be fired. You have good jobs. I ask you to join the majority of the employees in this company and properly sell our products. The overwhelming majority of you come to work everyday and deliver the best product you can with the tools you have been given. Thank you for that.

We do not charge \$9.50 for a hamburger as was alleged by Congressman Mica in a hearing on Food and Beverage held on August 2. We charge \$6.00 in both the *Regional* and *Acela Express* Café Car. I wished I had known that during the hearing. The \$9.50 is the price of a lunch meal served in one of our diners

and includes your drink, a dressed burger and chips.

The Office of Inspector General (OIG) said that our management of Food and Beverage is fragmented. This is true and we are addressing that. Sometimes when the OIG states the obvious it is embarrassing for me as I've been working toward moving the commissary operations from Marketing to Operations for awhile now so that all of Food and Beverage resides in the same department. This change will occur in October. It is important to note that I think that our Inspector General (IG) Ted Alves is committed to helping this company improve and I am glad for it.

Food and Beverage is important to our customers, and it's very tough to make it profitable. We would, however, lose customers and therefore lose more money if we eliminate food and beverage on our Long Distance trains. Overall we have improved greatly in recovering our costs since 2006, moving from recovering 49 percent then to 59 percent in 2011. Thank you for that.

What we lose is largely dependent on the business line. We cover 78 percent of our food and beverage costs on a direct basis in the Northeast Corridor. Keep selling. We can do even better.

I believe that Mr. Mica's visit to a Washington, D.C., McDonald's last Friday afternoon did damage our reputation. We only cover 44 percent of our direct costs on Long Distance services and its where our biggest expenses in provisions, support and labor are so it skews the numbers and sets the stage for stunts like Mr. Mica's and people do not really know what to believe.

We are the most efficient passenger railroad in the United States when

compared with all of the other providers of passenger rail service. We cover 85 percent of our operating costs. Our ridership is up, our revenue is up, we have reduced our debt, we have had our credit rating upgraded and we have a plan for the future that can be fulfilled with the dedication of this workforce, and business and political leadership. Food and Beverage has a good story to tell in its improvement. Unfortunately, our ability to tell that story is being thwarted, but our ability to continue to improve is not. We will improve.

I was joined by three people on the hearing panel who know the truth about what is good and not so good about OBS. Ted Alves, our IG, about whom I have already spoken. Patricia Quinn, Executive Director of the Downeaster rail service in Maine and good partner for Amtrak and Amtrak's own Dwayne Bateman, the vice general chairman of Unite-HERE, Local 43, which represents Amtrak's on-board service workers and a veteran OBS employee. I just want you to know that Dwayne did a great job and understood what he was up against in this hearing. I have to tell you that I am proud to work here with people like Dwayne.

A copy of my testimony before the House Transportation & Infrastructure Committee is available at <http://www.amtrak.com/ccurl/136/822/Amtrak-CEO-Boardman-House-T&I-testimony-Aug-02-2012.pdf>

I know this has been too long and I thank you for bearing with me. Even though this is not upbeat, we are committed to improving our business and helping to contribute to both a stronger nation and stronger competitive business advantage for the communities and businesses we serve.

Thank you for all you do.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

Yesterday, I had an opportunity to go up to Capitol Hill again, this time to testify before the Senate Commerce Committee. The committee had invited me there along with the leadership of the New York and New Jersey Port Authority, New Jersey Transit, and the Metropolitan Transportation Authority to discuss the impact of Hurricane Sandy on the region's transportation system.

While you can't call it a happy situation, I did come away with a renewed appreciation for the hard work we've put into Amtrak over the last couple of years, and a stronger belief than ever that we are on the right course. At this point, we're all pretty much aware of what the impacts from Sandy to our system could be: possibly as much as \$60 million in damage and lost revenues. But it might easily have been several times that much, and all of us who worked on the capital investment program funded by the American Recovery and Reinvestment Act can take some justified pride in the thought that some of the least exciting aspects of the work – things like tree clearance and ditch and right-of-way cleaning – did the most to limit the damage. Similarly, all of the hard work we've put into our fire and life safety program in the New York tunnels made a big difference, and helped us restore service quickly.

While I think we can all take a little justified pride in that work, we should take even more in the cooperative and collaborative relationship we've forged with our partners. The damage that the New York area carriers suffered was simply amazing – New Jersey Transit is asking the Federal government for about \$400 million to fund their recovery from Sandy. That's about what it takes to fund Amtrak's operations for a year. This isn't a reflection on NJT – it's just that in the most affected areas they had so much more to lose than we did, they were squarely in the path of the surge.

I'm pleased at the work you did to help them, and the collaborative spirit with which we undertook to help Transit, Long Island Rail Road, and Metro-North recover from this hurricane. I know it meant a lot to the leaders of those companies, and I think over the long run it's going to help us build and sustain the collaborative relationship we're going to need with the other carriers if we are to develop some of the regional solutions we need to keep traffic moving in New York. I explained what the costs of our Gateway project are going to be, and both the committee and our partners were supportive of the plans. That's going to be very important in the months and years ahead, because we are going to need that support to build more track, tunnel and terminal

capacity in the New York metro area, and to make sure we've got the resilience we need to survive our next big weather event.

At the end of the day, there's a reason for the work we're doing in trying to build a culture of collaboration at Amtrak, and better relationships with our passengers and our business partners are a big part of that. Hearing the kind words that the leadership of our partners had to say about our efforts, I could not have been prouder of this company, and of all of you.

Thanks for everything you did, and continue to do – because you're making a difference every single day.

Sincerely,

Joe Boardman
President and CEO

Employee Appreciation

We received this heartwarming email last week and we were asked to share it with you.

*"Unless you have experienced it, and I know many of you did when Katrina hit New Orleans, you cannot fathom the devastation and utter hopelessness you feel seeing your house and your belongings washed away. For many days after Hurricane Sandy hit the New York/New Jersey area, most of us walked around in a daze, trying to understand the loss and not knowing what to do. The support and donations given by our fellow Amtrak employees was amazing, words cannot express the gratitude and appreciation that was felt by those hit hard by the hurricane. We know we speak for everyone when we say **thank you from the bottom of our hearts!** You helped make a traumatic situation that much better with your love and support. **THANK YOU!!!**"*

Amtrak employees, Penn Station NY - Debbi Hoeler, Felix Martinez, Ellen Rizzo, Tom McClinchy, Dan Borisuck, Jessica Guastella, Naomi Miller and the many others who fell victim to Sandy's rage.

We would like to continue easing the pain that this hurricane produced. You can lend your support to your fellow co-workers by donating to the Amtrak Employee Relief Fund.

Amtrak Employee Relief Fund

A month ago our company established the Amtrak Employee Relief Fund, a peer-to-peer fund, allowing you to make donations via payroll deductions to help our colleagues impacted by Hurricane Sandy. We have collected close to \$11,000 to date in payroll pledges. Donations may be made by completing *NRPC 3238 Amtrak Relief Fund Payroll Deduction* (attached) or sending a check to our lockbox.

Relief Fund Application

The Amtrak Employee Relief Fund application form (*NRPC 3382 A*) for those employees affected by Hurricane Sandy, is now available on the Intranet and is attached. Please note that applications are due by January 18.

We know that you have numerous questions regarding how the funds will be disbursed, how this fund is administered and deadline and contact information. Frequently asked questions (FAQs) and answers are attached as well.

Thanks for all of your generosity and concern.

A Message from Joe Boardman

Dear Co-workers,

I am very proud to announce that today at 9 a.m. Eastern time, Amtrak launched its eTicketing program to all trains within our national network. The activation of this program provides passengers with the convenience of skipping the ticket line and going straight to the gate by printing their tickets anytime, anywhere or by using a smartphone to present the eTicket to the conductor. The eTicketing technology also allows passengers increased flexibility to make or change reservations.

This launch represents a significant step forward for us in improving customer service through more convenient reservation and ticketing options, passenger safety through a near real-time onboard passenger manifest and improves our business and allows for more efficient financial reporting resulting in improved financial performance.

eTicketing has been in place on five pilot routes for several months and the results have quickly exceeded our expectations as rapid acceptance by passengers resulted in shorter lines at ticket counters, reduced use of self-serve Quik-Trak ticket kiosks, fewer lost tickets and less tickets sold onboard the train. Conductors have also provided positive feedback on this initiative as the new eTicketing Mobile Devices (eMD) provides them with more accurate real time passenger information.

This program also allows for en route reporting of equipment problems such as a broken seat which will result in a faster resolution of these problems.

Today's activation is the culmination of over five years of work which has involved groups from throughout the company including Marketing and Product Development, Transportation, IT and Finance. The success we have seen so far could not have been achieved without intense cooperation and coordination with each of these groups. Everyone involved in this program should be extremely proud of what we have achieved and I commend all of you on this considerable milestone in Amtrak's history.

This innovative program places Amtrak among the first passenger rail operators in the world to have successfully deployed a fully electronic ticketing solution for our passengers. For more information on eTicketing, please visit Amtrak.com/eTicketing or refer to this [video](#).

Thank you for all you do.

Sincerely,

Joe Boardman
CEO and President

A Message from Joe Boardman

Dear Co-workers,

On June 15 we will bid farewell to our Chief of Police John O'Connor as he transitions into retirement. I want to take the opportunity to offer Chief O'Connor our best wishes for his retirement and thank him for his service.

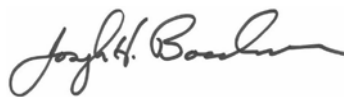

Chief O'Connor has served in the Amtrak Police Department for the last 14 years. Through his time here he has raised the profile of the Amtrak Police Department and has facilitated relationships with local, state and federal partners that make Amtrak better prepared to protect the traveling public. I thank the Chief for his commitment to the safety of our system and for his years of dedicated service.

To support this transition, Assistant Chief of Police Lisa Ann Shahade will report directly to me as of June 16 and will oversee all functions of the Amtrak Police Department as the company begins its search for a permanent replacement for the Chief.

Shahade is a 24-year veteran of the Amtrak Police Department and has served as a Police Officer, Special Agent, Captain, Inspector and Deputy Chief. In her time as Assistant Chief of Police she has directed the 430-member Patrol Division and reported directly to Vice President and Chief of Police O'Connor.

Please join me in thanking Chief O'Connor for his time at Amtrak. In addition, also please provide your full support to Assistant Chief of Police Shahade as she serves in this capacity.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

May 28 is the commemoration of Memorial Day. As you probably know, the custom and the observance of Memorial Day grew out of the Civil War. Originally, the northern and southern states observed different days, but over time, that practice ended.

Today, on a single day, we honor all of the Americans who have died in service to our country regardless of the conflict they fought in or the side they took. While we now observe it on the last Monday of the month of May, the date originally chosen was May 30th – a date free of association with any particular battle or occasion.

At 3:00 p.m. local time on Monday, we encourage all Amtrak employees to participate in the National Moment of Remembrance by taking a moment to observe, each in our own way, the Americans who have died while defending our great nation. This year, as in the past, all of the engines on the system will sound one long whistle at this time, where safe operation permits, as a salute to those who died for our country.

Over the years, Amtrak has been proud to welcome veterans from all of our nation's armed services. In recent years, members of our company have been mobilized to serve overseas in the current conflict, as well as those that have

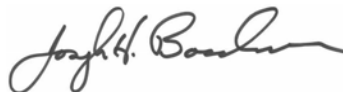

preceded it. We are grateful for their service, and were happy to welcome them home when they returned. And we think about the Amtrak employees who are currently on active duty and are deployed away from their families and friends.

Chairman Carper and I are veterans of the Vietnam War and we are proud of our service. As I travel the Amtrak system I am united in pride with all of our veterans who have served this great nation.

I hope that everyone will be able to take a second this weekend, in the midst of the sometimes hectic joys of a new summer's beginning, to remember those who helped make it possible for us to enjoy prosperous and useful lives.

I wish you a happy, a safe, and above all, a peaceful Memorial Day.

Sincerely,

Joe Boardman

Inclement Weather Policy

We would like to extend our appreciation to all employees who reported during the inclement weather and continue to work to return the railroad to normal operating conditions.

We are grateful for the feedback we received on the Special Employee Advisory – Hurricane Sandy Update #5 which discussed the corporate inclement weather policy for those non-agreement employees who did not report to work last Monday and Tuesday. The decision regarding taking leave and the clarity of the inclement weather policy have both been reviewed bearing in mind the safety of our employees and the lack of precedence in requesting employees to not report to work.

Non-agreement employees **will** be paid for October 29 and October 30. The only exceptions are for those employees who had already input vacation or personal day leave prior to the inclement weather days. Those leave days will remain in EIP. If you had input paid or unpaid leave, please retract it in EIP and this leave will be adjusted in the next payroll cycle (payroll already closed for this period).

Many of our employees worked from home and we are very grateful for that effort put forth. That spirit is one of those unique attributes that sets us apart from so many other companies.

The Human Capital department will review the inclement weather policy and other related policies. Responsibilities and procedures will be made clearer and communicated to you when available.

We appreciate your dedication to Amtrak.

Nor'easter Impacts

A strong Nor'easter will affect the East Coast from this evening through tomorrow. This storm will have greater impact than usual because of the serious impacts of Hurricane Sandy. There are potential wind gusts as high as 60 mph along the coast and accumulating snow in the interior New England area. The wind could bring down more trees leading to additional power outages. Please exercise caution when driving and be prepared for potential loss of power.

Amtrak-to-Amtrak

A number of you have asked how you can help our fellow employees affected by Hurricane Sandy in an effort similar to what was done after Hurricane Katrina.

You are welcome to donate clothing and other much needed items through an Amtrak program being led by the Northeast Corridor business line.

All donated items should be packed in sturdy cardboard boxes and clearly marked with the contents on the outside of the box (children's clothing for example). Please do not use plastic or paper bags as they easily rip and contents could be lost. If you must pack items together, please indicate a summary of the contents on the box exterior. All boxes should be forwarded to:

Michael J. Gallagher
Superintendent, Passenger Services
New York Penn Station

Once received at Penn Station, volunteers will sort the contents for distribution to our affected division employees. We are looking at having all donations at Penn Station by the close of business on November 16.

The following items need not be new (except as indicated by an asterisk), but must be clean and in good condition. Please donate only the following items:

- personal hygiene and grooming items
- school supplies
- men's clothing
- women's clothing
- children's clothing
- toddler's and infant's clothing
- Diapers

- Flashlights / batteries
- Blankets
- Towels/linens*

We are sure that you understand that food and other perishable items cannot be accepted for donation.

Employees should check with the office of the appropriate superintendent, passenger services for exact collection locations in your area. The superintendents are:

- Washington – Linda Davenport
- Miami – Tom Guerin
- Chicago – Joy Smith
- Seattle – Gay Olson
- Oakland – Anthony Chapa
- Los Angeles – Mike Dwyer

The cities and collection deadlines are:

- Baltimore – November 15 until the departure of #66
- Boston – November 15 until departure of # 67
- Chicago- November 15 until the departure of #48
- Jacksonville- November 15 until the departure of # 97
- Los Angeles - collection will be determined by superintendent for transport on # 48 (15) from Chicago
- New York - November 14 and 15
- Miami – November 14 until departure of #98 (15)
- Oakland - collection will be determined by superintendent for transport on # 48 (15) from Chicago
- Philadelphia - November 15 until departure of # 66
- Portland/Sacramento/Seattle - collection to be determined by superintendent for transport on # 48 (15) from Chicago
- Washington - November 15 all day until departure of # 66

Your support of your fellow employees is very much appreciated.

A Message from Joe Boardman

Sunday is Veteran's Day. This day was originally known as Armistice Day, and it was established by Congress to mark the end of the end of the World War I, which came at the eleventh hour of the eleventh day of the eleventh month. We are not the only ones who observe it: November 11 is also commemorated in France, Belgium, and all of the countries of the British Commonwealth as Remembrance Day. It is a measure of the staying power of history and of people that the last veteran of that war died earlier this year at the age of 110, 94 years after its end.

Since 1954, America has celebrated this date as Veteran's Day, and we commemorate all of those men and women who have served our nation in time of war and time of peace. It's easy to comprehend that war zones carry enormous hazards, but it's sometimes a little harder to remember what risks the men and women of our Armed Forces face on a daily basis, both at home and abroad.

We are all thankful for these brave souls, but in the wake of Hurricane Sandy, we are all vividly aware of their courage and energy. You have to wonder, when you read the story of the Coast Guard helicopter crew flying into the teeth of the storm to rescue the crew of a sinking ship, where we find such people. The answer is that we find them on the streets and in the homes

of every town in America. Some have made the service a career, and some particularly hardy spirits elect to do it in their spare time, when they might be resting or playing, but all of the men and women of the Armed Forces are selfless and courageous, and we are lucky to have them as our defenders.

I wish you all a safe, and peaceful Veteran's Day – and I thank all of you who have worn the uniform for the work you have done in defending our country.

Sincerely,

Joe Boardman
President and CEO

Relief Fund to be Established for Amtrak Employees

The outpouring among Amtrak employees in the aftermath of Superstorm Sandy has been inspiring. Many employees have worked around the clock to restore service to the water-soaked Northeast and others have donated essential items and clothing to Sandy victims.

The spirit of that generosity will not be weakened. As the company did in the wake of Hurricane Katrina, Amtrak will again establish a peer-to-peer donation fund, allowing employees across the country to make donations via payroll deductions to help their Amtrak colleagues.

The full details of the Amtrak Employee Relief Fund will be released early next week, including how to make direct donations or to enroll in a payroll deduction to benefit Sandy victims employed by Amtrak. Details on how to apply for the financial assistance will follow that message.

An organization's true character is revealed in the wake of such tragedies. Amtrak employees coast to coast can take pride in the humility and selflessness displayed by their colleagues over the last two weeks. That kindness will carry on through the Amtrak Employee Relief Fund, helping victims restore their homes and heal their hearts.

Full details of the Fund will be announced next week.

**Please distribute at all safety meetings and
post on all employee bulletin boards.**

A Message from Joe Boardman

Thanksgiving is typically the start of the holiday season. It is usually a time of family gatherings, festive meals, and appreciation for our many blessings. I ask that this year you pause for a moment of reflection for those in our Amtrak family and those in the greater New York-New Jersey region whose lives are irrevocably altered. Family members have been lost, property damaged and residences destroyed.

Communities were affected by the powerful, slow-moving storm and were battered by winds, pelted with rains and inundated by storm surges unlike anything in living memory. The Northeast Corridor (NEC), North America's busiest stretch of railroad, also experienced unprecedented damage. Four of the six tunnels under the Hudson and East Rivers, constructed more than a century ago, flooded for the first time with almost 11 million gallons of water. Felled trees blocked tracks and pulled down catenaries while salt water destroyed sensitive electronic signal systems.

Our employees reacted to Hurricane Sandy in a manner that made me extremely proud. I want to thank all of you who took preventative measures to prepare for the hurricane, and especially to those who sprang into action to assess damage, prioritize repairs and coordinate our response across the region. Employees on the ground inspected the entire right-of-way between Boston and Washington, including all movable bridges. Those at CNOC, the Reservation Sales and Call Centers, and corporate headquarters worked to keep you, our passengers and our rail and state partners informed of our progress and the fluidity of the situation. Some of you lost power to your homes and left your families to work many hours to restore the railroad. This dedication in the face of such an unprecedented event is appreciated by all.

Our crews worked to restore service as soon as possible and we are now fully operational. As evidenced by an all time record of 11.4 million passengers in Fiscal Year 2012, the NEC is vital to the region's economy and mobility. We are committed to the long-term maintenance and enhancement of this critical infrastructure to serve today's customers and those of future generations. And we are committed to our employees in the following ways:

Relief Fund

Amtrak has established the Amtrak Employees' Relief Fund to enable all employees to make monetary donations to other employees who have suffered as a result of Hurricane Sandy. You may make a direct contribution by check or through a payroll deduction. Checks should be made out to the National Railroad Passenger Corporation (Amtrak) Employee Relief Fund and sent to the lockbox at:

National Railroad Passenger Corporation (Amtrak) Employee Relief Fund
26462 Network Place
Chicago, IL 60672-1264

Donations may be made by payroll deduction by filling out form *NRPC 3238 Amtrak Relief Fund Payroll Deduction Form*, which can be found on the Intranet home page under "Library" and then "Forms." The form is also attached to this advisory. Employees have the choice of donating a one-time amount or choosing an amount to be deducted from each paycheck until the designated amount is reached.

Lisa Coleman, EEO compliance officer, Law, Kathy Huss, business partner, Human Capital and Keith Warchol, senior treasury associate, Finance have been asked to serve as fund trustees. Details on how employees may apply for financial assistance from the fund will be announced once the process is finalized.

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

November 20, 2012 • Page 2 of 2

Amtrak has applied to the Internal Revenue Service (IRS) for non-profit status for the fund so that donations can be claimed as a charitable contribution by employees when filing income tax returns. If and when the IRS approves the application, the approval will be retroactive to the application date, and employees will be advised.

Northeast Corridor Business Line Donation Effort

On November 7 employees nationally were invited to donate clothing and other needed items through a collection effort led by the Northeast Corridor business line and coordinated by the superintendents, passenger services in their respective areas. In just one week 800 boxes of donations were received in New York. An advisory was distributed to New York Penn Station staff on November 16 announcing that donations would be ready for distribution beginning yesterday. Personal phone calls and one-on-one conversations have been held with all Hurricane Sandy affected employees to advise them that these donations are available to them.

After our own employees' needs are met we are hope to expand this donation distribution effort to employees of both the Metropolitan Transportation Authority and New Jersey Transit. Preliminary conversations have already been held with both the MTA and NJT representatives.

Train of Hope

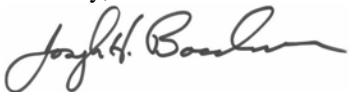

Immediately after the hurricane, two officials in Louisiana discussed how well they understood the heartache that people on the East Coast felt in the aftermath of the hurricane. They had experienced Hurricane Katrina and were so appreciative of the outpouring of donations and support that this nation provided following that devastating event that they wanted to pay it forward in some manner. They developed the concept of "The Train of Hope" and with the assistance of the office of Senator David Vitter of Louisiana, other state officials and Amtrak the concept became a reality.

It took a lot of work from a dedicated group of Amtrak employees to make this happen both logistically and operationally and much physical labor was required to prepare, load and unload the donations that were delivered to the New Orleans station for transport north in a dedicated baggage car on the *Crescent*. Once received at the Newark station, our employees again unloaded more than 30 pallets of donations for residents of hard hit towns in New Jersey.

We and the city of Slidell received a significant amount of local and national press coverage for the Train of Hope. This type of coverage is important for us, but more importantly, we were able to help others in a time of need.

Thank you for all you do everyday, but especially during these last few weeks. Please have a safe holiday.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Thanksgiving is typically the start of the holiday season. It is usually a time of family gatherings, festive meals, and appreciation for our many blessings. I ask that this year you pause for a moment of reflection for those in our Amtrak family and those in the greater New York-New Jersey region whose lives are irrevocably altered. Family members have been lost, property damaged and residences destroyed.

Communities were affected by the powerful, slow-moving storm and were battered by winds, pelted with rains and inundated by storm surges unlike anything in living memory. The Northeast Corridor (NEC), North America's busiest stretch of railroad, also experienced unprecedented damage. Four of the six tunnels under the Hudson and East Rivers, constructed more than a century ago, flooded for the first time with almost 11 million gallons of water. Felled trees blocked tracks and pulled down catenaries while salt water destroyed sensitive electronic signal systems.

Our employees reacted to Hurricane Sandy in a manner that made me extremely proud. I want to thank all of you who took preventative measures to prepare for the hurricane, and especially to those who sprang into action to assess damage, prioritize repairs and coordinate our response across the region. Employees on the ground inspected the entire right-of-way between Boston and Washington, including all movable bridges. Those at CNOC, the Reservation Sales and Call Centers, and corporate headquarters worked to keep you, our passengers and our rail and state partners informed of our progress and the fluidity of the situation. Some of you lost power to your homes and left your families to work many hours to restore the railroad. This dedication in the face of such an unprecedented event is appreciated by all.

Our crews worked to restore service as soon as possible and we are now fully operational. As evidenced by an all time record of 11.4 million passengers in Fiscal Year 2012, the NEC is vital to the region's economy and mobility. We are committed to the long-term maintenance and enhancement of this critical infrastructure to serve today's customers and those of future generations. And we are committed to our employees in the following ways:

Relief Fund

Amtrak has established the Amtrak Employees' Relief Fund to enable all employees to make monetary donations to other employees who have suffered as a result of Hurricane Sandy. You may make a direct contribution by check or through a payroll deduction. Checks should be made out to the National Railroad Passenger Corporation (Amtrak) Employee Relief Fund and sent to the lockbox at:

National Railroad Passenger Corporation (Amtrak) Employee Relief Fund
26462 Network Place
Chicago, IL 60672-1264

Donations may be made by payroll deduction by filling out form *NRPC 3238 Amtrak Relief Fund Payroll Deduction Form*, which can be found on the Intranet home page under "Library" and then "Forms." The form is also attached to this advisory. Employees have the choice of donating a one-time amount or choosing an amount to be deducted from each paycheck until the designated amount is reached.

Lisa Coleman, EEO compliance officer, Law, Kathy Huss, business partner, Human Capital and Keith Warchol, senior treasury associate, Finance have been asked to serve as fund trustees. Details on how employees may apply for financial assistance from the fund will be announced once the process is finalized.

special employee advisory

November 20, 2012 • Page 2 of 2

Amtrak has applied to the Internal Revenue Service (IRS) for non-profit status for the fund so that donations can be claimed as a charitable contribution by employees when filing income tax returns. If and when the IRS approves the application, the approval will be retroactive to the application date, and employees will be advised.

Northeast Corridor Business Line Donation Effort

On November 7 employees nationally were invited to donate clothing and other needed items through a collection effort led by the Northeast Corridor business line and coordinated by the superintendents, passenger services in their respective areas. In just one week 800 boxes of donations were received in New York. An advisory was distributed to New York Penn Station staff on November 16 announcing that donations would be ready for distribution beginning yesterday. Personal phone calls and one-on-one conversations have been held with all Hurricane Sandy affected employees to advise them that these donations are available to them.

After our own employees' needs are met we are hope to expand this donation distribution effort to employees of both the Metropolitan Transportation Authority and New Jersey Transit. Preliminary conversations have already been held with both the MTA and NJT representatives.

Amtrak Harassment Policy

Amtrak is committed to complying with the Federal Railroad Administration's accident reporting regulations **as set forth in 49 CFR Part 225** and the Federal Rail Safety Act's whistleblower protections set forth in **49 U.S.C. 20109**.

Accordingly, Amtrak requires the accurate reporting of all accidents, incidents, injuries and occupational illnesses arising from the operation of the railroad completely and in a timely manner. Amtrak will, under no circumstances, tolerate harassing or intimidating conduct by any employee that is calculated to discourage or prevent any individual from receiving proper medical treatment or from reporting an accident, incident, injury or occupational illness. Amtrak will not tolerate retaliation for accident, incident, injury or occupational illness or avoidance (or attempted avoidance) of FRA reportability through coercion, medical interference or other improper means.

Any employee who engages in harassment, intimidation, retaliation, interference or other prohibited conduct described above will be subject to discipline, up to and including termination. In addition, civil monetary penalties can be assessed, by the Federal Railroad Administration, against any railroad employee, executive, manager or supervisor, who willfully causes a violation of or non-compliance with any part of **49 CFR Part 225**. Furthermore, Amtrak will take immediate disciplinary action, up to and including termination, against any employee who disciplines an individual in retaliation for reporting an injury or who makes any attempt to deny, delay or interfere with medical treatment, which are both prohibited

activities under the FRSA, 49 U.S.C. 20109.

Any employee who has reasonable grounds to believe this policy statement has been violated should contact the **toll-free Ethics and Compliance Hotline at (866) 908-7231**. Amtrak's Dispute Resolution Office (DRO) will conduct an inquiry immediately following the receipt of the complaint. Employees may also contact the Office of the Inspector General at (800) 468-5469 or write to:

Amtrak
Office of the Inspector General
P.O. Box 76654
Washington, DC 20013

If the assigned investigator finds that sufficient evidence exists to support the complaint, a comprehensive investigation will be initiated. Should the inquiry determine that insufficient information exists to support the complaint, the employee will be notified and the case administratively closed.

Employees will be provided whistleblower protection from any retaliatory action taken as the result of reporting conduct they reasonably believe violates this policy. Employees shall be free from restraint, interference, coercion or reprisal for communicating directly or indirectly, information that they believe indicates violation of law or company policy.

A Message from Joe Boardman

Dear co-workers,

Earlier this week I spoke at a Congressional hearing that focused on our reorganization efforts. In the face of tough questions about our financial performance, criticisms of our employees and doubts about the company's longevity, I defended our reorganization process and most importantly you—the employees.

Throughout the six months of this reorganization, I've met many employees who already embody Amtrak's continual-improvement attitude and are customer-focused. We're continually working to better our safety, our customer satisfaction and our bottom line, and that work will never be done. We can always improve, and that's what this reorganization is all about.

Despite the inquiries from Capitol Hill, Amtrak is performing the best in our 41-year history. The testimony offered us a chance to showcase all the hard work we've been doing recently. For example, in light of questions about our financial responsibility, I shared the fact that we've cut our debt by half. We also experienced our best fiscal year for on-time performance and ridership in FY2012. These are real achievements that allow us the stability and resources we need to take the next steps in this reorganization.

Those next steps include bringing accountability and reliability to every position at Amtrak. In my meetings with employees coast to coast, this is one of the biggest points that I stress. This reorganization is not just an operational change, but a cultural change. Many of you are already there, going above and beyond your traditional responsibilities

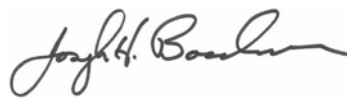

to improve the organization. I thank you for that, and earlier this week I reminded the Congressional committee of all that you do.

As key positions continue to be filled in this reorganization, changes seem to come daily. But they're all made with the goal of improving our safety, customer satisfaction and financial standing. You have done a great job meeting our milestones so far, and I was proud to announce our achievements to members of our nation's Congressional oversight committees. There's promise in what we all can achieve together, and I know you're prepared for the work ahead.

If you'd like to read the [testimony in full](http://Capitolhearings.org), please visit Capitolhearings.org under the House Committee on Transportation and Infrastructure link. Through that link you can also watch a video of the hearing.

Thank you for everything you do everyday for Amtrak.

Sincerely,

Joe Boardman
President and CEO

Hurricane Sandy Update

Safety and security are our number one corporate goals and please keep that in mind over the next few days as the storm intensity increases. Service operations will continually be reviewed and updated communications will be issued as necessary.

Questions will certainly arise about how to handle late arrivals and absences during this period of inclement weather. A summary of our current policy is explained below:

- As long as your Amtrak facility is open and operational, employees are expected to report to work.
- Agreement-covered employees will be covered under your respective collective bargaining agreements; please refer to the applicable section of your agreement.
- If a non-agreement employee cannot report to work, you should notify your supervisor as soon as possible and must take an unused personal day, an unused vacation day or take the day off without pay.

At this point in time, Amtrak has not announced the closing of any facility. This is a very fluid situation and as soon as the potential effects of Hurricane Sandy become clearer we will issue another advisory.

Please check with your usual communication channels and supervisors for updates.

Thank you.

Hurricane Sandy Update #3

Amtrak Northeast Corridor services are cancelled through Tuesday, October 30 due to the continuing effects of Hurricane Sandy. Most up to date information can be located at Amtrak.com/Alerts

Engineering, Operations, Mechanical and Amtrak Police department employees are again expected to report to work tomorrow. Other positions have been or will be annulled or reduced and you are not expected to report for work unless specifically requested by your supervisor. If you have questions on your status for service, please contact your supervisor.

Please continue to check Amtrak.com for any service changes and monitor the Intranet for any employee updates.

Please continue to be safe.

Thanks.

Hurricane Sandy Update #4

We hope that this finds you safe, warm and dry.

On Wednesday, October 31, Amtrak plans on operating modified *Northeast Regional* service from Newark, N.J., to points south, *Keystone*, *Shuttle* and *Downeaster* service to operate and overnight trains will, in some cases, be restored. We ask that you continue to check Amtrak.com for any additional service changes and monitor the Intranet for any employee updates.

All employees should plan on reporting to work tomorrow according to your usual work schedules unless your supervisor informs you differently.

If you have questions on your status for service, please contact your supervisor.

Thanks for all that you have done these past few days.

A Message from Joe Boardman

Dear Co-workers,

Last week, our Inspector General (IG) released a report entitled *Railroad Safety: Amtrak is not Adequately Addressing Rising Drug and Alcohol Use by Employees in Safety-Sensitive Positions* (<http://www.amtrakoig.gov/reading-room>). In part, the IG found that “Amtrak’s hours-of-service (HOS) employees are testing positive for drugs and alcohol more frequently than their peers in the railroad industry. Our analysis of Amtrak’s random drug and alcohol test results shows that these employees have been testing positive for drugs and alcohol at a rate that has been generally trending upward since 2006, and this rate has exceeded the industry average for the past 5 years. The majority of Amtrak’s positive tests since 2006 were for drugs, primarily cocaine and marijuana.”

Amtrak has over 4,400 hours-of-service (HOS) employees, including locomotive engineers, conductors, and train dispatchers, and also some employees who maintain signals equipment (signals employees) and some employees who operate locomotives within the mechanical yard or maintain locomotive cab signal equipment (mechanical employees).

As you must realize, these results are both personally and professionally disturbing. Amtrak is a drug- and alcohol-free workplace and there is no middle ground for this. It is the responsibility of all employees to be knowledgeable of our policy and procedures for maintaining a safe work environment for employees and our customers. One positive test is one too many. No Amtrak employee should be under the influence of illegal drugs or alcohol at work at anytime. It simply will not be tolerated.

The IG made a number of recommendations and we will be working to implement them in a timely manner. These include:

- The percentage of random drug tests will increase from the current 33 percent to 50 percent for all of our HOS employees for Fiscal Year 2013. This will improve our ability to detect and deter drug and alcohol use.
- We will compare drug and alcohol testing results against company goals and industry averages and Amtrak will issue a quarterly report to senior managers in the Operations department starting in January 2013.
- A senior management oversight group will be organized by January 2013 and will meet quarterly with the first meeting scheduled to take place in February 2013. The Drug and Alcohol Prevention Executive Oversight Committee will be chaired by the vice president of Operations.
- We will ensure that the physical observation program meets or exceeds FRA’s guidance by:
 - revising Amtrak’s policy on the frequency of conducting observations to meet or exceed FRA guidance, and ensuring that all HOS supervisors are advised of this change;
 - holding supervisors accountable for performing the required number of observations each quarter;
 - improving the efficiency of the process and/or system used to record the physical observations; and

special employee advisory

October xx, 2012 • Page 2 of 2

- routinely reporting on the number of observations recorded against the company goals and FRA guidance.
- Management will begin drug and alcohol training and/or re-training HOS supervisors beginning March 2013 with a target completion date of March 2014. In connection with this training, management will make sure training is properly documented by individual name and date of the training within SAP.

We run a safe railroad today. No Amtrak locomotive engineer has tested positive in post-accident drug and alcohol testing since the Federal Railroad Administration (FRA) began maintaining records in 1989. And no Amtrak engineers failed the Random Drug and Alcohol testing in 2011.

Furthermore, as recently as June 2011, the FRA has praised our alcohol and drug program. However, the IG has pointed out critical areas for improvement and we are committed to doing so for you and our 30 million customers. If you or a colleague would like confidential and free assistance with a drug or alcohol issue, please call Operation RedBlock at 1-800-44RBLOC (447-2562) or contact your local Employee Assistance Program (EAP) representative (<http://wiki.intranet.nrpc/display/EAP/Home>).

We can and will improve in these critical areas and we are committed to doing so for you and our customers.

Thank you for all you do and for your commitment to maintaining a drug-free and alcohol-free workplace.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

Last week, our Inspector General (IG) released a report entitled *Railroad Safety: Amtrak is not Adequately Addressing Rising Drug and Alcohol Use by Employees in Safety-Sensitive Positions* (<http://www.amtrakoig.gov/reading-room>). In part, the IG found that “Amtrak’s hours-of-service (HOS) employees are testing positive for drugs and alcohol more frequently than their peers in the railroad industry. Our analysis of Amtrak’s random drug and alcohol test results shows that these employees have been testing positive for drugs and alcohol at a rate that has been generally trending upward since 2006, and this rate has exceeded the industry average for the past 5 years. The majority of Amtrak’s positive tests since 2006 were for drugs, primarily cocaine and marijuana.”

Amtrak has over 4,400 hours-of-service (HOS) employees, including locomotive engineers, conductors, and train dispatchers, and also some employees who maintain signals equipment (signals employees) and some employees who operate locomotives within the mechanical yard or maintain locomotive cab signal equipment (mechanical employees).

As you must realize, these results are both personally and professionally disturbing. **Amtrak is a drug- and alcohol-free workplace and there is no middle ground for this.** It is the responsibility of all employees to be knowledgeable of our policy and procedures for maintaining a safe work environment for employees and our customers. No Amtrak employee should be under the influence of illegal drugs or alcohol at work at anytime or test positive for illegal drugs while working. Any employees who abuse drugs and/or alcohol at work are not just a danger to themselves, they are also putting the lives of their fellow workers and the traveling public in danger. This will simply not be tolerated.

The IG made a number of recommendations and we will be working to implement them in a timely manner. These include:

- The percentage of random drug tests will increase from the current 33 percent to 50 percent for all of our HOS employees for Fiscal Year 2013. This will improve our ability to detect and deter drug and alcohol use.
- We will compare drug and alcohol testing results against company goals and industry averages and Amtrak will issue a quarterly report to senior managers in the Operations department starting in January 2013.
- A senior management oversight group will be organized by January 2013 and will meet quarterly with the first meeting scheduled to take place in February 2013. The Drug and Alcohol Prevention Executive Oversight Committee will be chaired by the vice president of Operations.
- We will ensure that the physical observation program meets or exceeds FRA’s guidance by:
 - revising Amtrak’s policy on the frequency of conducting observations to meet or exceed FRA guidance, and ensuring that all HOS supervisors are advised of this change;
 - holding supervisors accountable for performing the required number of observations each quarter;

Dear Co-workers,

Amtrak has completed another successful year. Once again we have achieved record ridership — in nine of the last 10 years — and had the opportunity to serve the travel needs of more than 31.2 million customers. Our ridership is up 49 percent since FY 2000. Your hard work combined with these additional customers and the revenue they produced resulted in the lowest operating subsidy requirements since the company was founded more than 41 years ago. Passenger revenue covered more than 79 percent of our operating expenses. Another 6 percent was covered by the money we made from real estate and other commercial activities. The total 85 percent coverage of operating expenses is far and away the best for any passenger railroad, including commuter services, in this country. Few in the world could top this.

Additionally, our operating subsidy requirement over this last fiscal year was 38 percent less than in 2004 as measured in actual dollars expended, and almost 49 percent less when accounting for inflation.

Our achievements since Amtrak was created 41 years ago have been significant — even more so when it is remembered that during this time there have been eight U.S. presidents, nine Amtrak presidents, several turnovers of our board of directors and a fluctuating congressional leadership. What has been constant has been the dedication of the men and women of Amtrak. Your greatest accomplishment has been preserving intercity passenger rail service in the face of many challenges, infrequent appreciation and frequent second guessing by our critics.

This accomplishment is so important at a time when this country needs a safe, efficient, environmentally friendly and cost-effective means of transportation that is viewed as critical to our quality of life. I would like to say that we won't have to deal with the challenges we have had in the past. Unfortunately, that will not be the case. The debate over the federal budget in the coming years will intensify the scrutiny we're under, regardless of the outcome of the election in November. The implementation of Section 209 of the Passenger Rail Investment and Improvement Act of 2008 means we will have to compete to operate short-distance trains off the Northeast Corridor similar to the way we have competed to operate commuter services. Throughout all of this, our customers remain the most important part of our business. The tickets they buy provide the revenue that makes up the largest portion of our paychecks. We must remember they have transportation choices, and we need to earn their business every day.

We are not sitting idly. We are preparing Amtrak to meet these challenges by running Amtrak like a business. Some have asked what "run Amtrak like a business" means. It means that we must provide service that consistently meets or exceeds the expectations of our customers. It also means we are

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 26, 2012 • Page 2 of 2

always looking for ways to increase our revenues and provide our service at the lowest possible cost. Profit and loss are important principles to us, just as safety, customer service and respect for one another are also foundations of our business.

Some of you are already involved in these initiatives and many of you have heard about them. Others will be rolling out in the coming months. The first was our Strategic Plan that is now a year old. It identified our vision. You can find the specific plan on the Intranet, but it was best summed up by someone I met in my travels across the railroad. When I asked him what he thought our vision was, he said, "Our vision is to be the best in passenger transportation." That means the best in customer service and the best value to our customers, whether they're the people who travel on our trains, our state partners or the federal government that helps fund us.

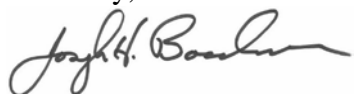

The challenge with strategic plans is making them something more than a dust collector on a bookshelf. We will make ours a living document. The first step in implementing our Strategic Plan is developing the new organizational structure for Operations. This will bring together Transportation, Mechanical and Engineering with a strong focus on exceeding the customers' expectations and increasing efficiency.

Each executive committee member will also be responsible for supporting the corporation's vision and goals and achieving those goals within their own departments. This will initially focus on non-agreement employees who will have new performance plans that are tied to our corporate goals during Fiscal Year 2013. As a result, you will know more clearly how you contribute to our future success.

Every day working as a team, we will be looking for both improvements and new ways to deliver a better travel experience while increasing our revenue and lowering our cost. Providing superior service at the lowest possible cost will be the best way to successfully meet the challenges we will face in the years ahead.

Thank you for everything you did to make Fiscal Year 2012 a success. Let's make 2013 even better.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

I am very proud to announce that we have begun the rollout of an exciting new program for employees on long-distance trains, which will extend to all other Amtrak trains and stations in 2013. This program is designed to help us strengthen our customer focus by providing stellar customer service on every route.

To our customers, *you* are the face of Amtrak. Your actions directly impact how passengers perceive our service. Customers frequently tell us directly about their trip, but as a company we can improve on sharing this feedback with those on the front lines. You deserve to know when a customer praises your service, and likewise, customer feedback about deficiencies in service helps us improve.

Part of the effort to get you more customer feedback is the “Wall of Fame,” a program that I saw in action when I visited Miami a few months ago and which we are now expanding throughout the company. Assistant Superintendent Karen Shannon showed me how she uses new technology that Amtrak recently developed to put customer feedback where it belongs— in the crew base with the crews. And we can do it quickly. We can get feedback from each trip you make back to you on a daily basis. In addition to customer comments, our service managers now have access to employee metrics such as LSA remittances, employee praise rankings and other data of interest to you.

The general superintendents and superintendents of passenger services and operations are also an important

part of the Wall of Fame program, and they’re excited to see it in action.

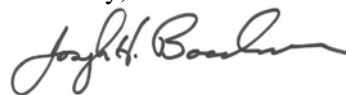

Over the next several months, managers from Transportation and the CSPMI team will be meeting with local crew base management to fully explain the program and help set it in motion. At that time, you will see three things: a “Wall of Fame” or similarly named display that posts customer praise for crew members in their crew bases; a “Wall of Shame” or similarly named board highlighting customer complaints and tips for addressing them; and a wall with performance metrics including rankings of our top employees.

Please be on the lookout in the coming months for this new program. You’ll continue to hear about the program’s progress in company communications, and *Amtrak Ink* will regularly feature our customer service superstars.

Like everything else we do in our rail system, this program took team work. It took cooperation from a variety of departments, and I thank them for their hard work.

Thank you for everything you do for Amtrak everyday.

Sincerely,

Joe Boardman
CEO and President

A Message from Joe Boardman

Dear Co-workers,

There are about seven weeks remaining until the election and I wanted to remind you of Amtrak's policy on political contributions and communications.

Amtrak employees may engage in political activities on their own behalf, on their own time and away from Amtrak premises. You may also make financial contributions of your personal funds to candidates and political entities of your choice, as long as it complies with Amtrak policies, including our Ethical Conduct and Conflict of Interest Policy. Employees, however, may not engage in any political activity on Amtrak premises or use Amtrak property for these purposes, and you cannot be reimbursed for any campaign contributions made from personal funds.

Amtrak Contributions to Candidates for Office

Use of company money for candidate contributions is prohibited. Amtrak may not and does not use company money for any candidate campaign funds including candidate campaign committees, political parties, caucuses or independent expenditure committees.

Use of Amtrak Funds for Political Activities

Laws regulating lobbying and issue advocacy are complicated and change frequently. Violation of these laws can involve significant compliance and reputation risk, which can result in fines or other sanctions. Factors used to evaluate the decision to participate in advocacy groups include the business needs of all Amtrak partners in the market as well as the political risks and benefits.

To manage these risks, Amtrak Government Affairs must be informed of any Amtrak employee activity related to elections campaigns, or communications with elected or other officials, or with advocacy groups, regarding political issues.

Personal Contributions

Nothing in this policy is intended to interfere with the rights of Amtrak employees to make voluntary personal contributions on their own behalf to candidates, political entities and/or advocacy groups of your choice. However, these contributions cannot be expensed to Amtrak.

Personal contributions to candidates or their related entities doing business with Amtrak may require disclosure or have other implications if you are also involved in a procurement involving that business. Please consult with Procurement and/or DJ Stadtler, Vice President of Operations and Chief Ethics Officer with any questions about this.

Communications with Amtrak Employees

Employee use of Amtrak's communications systems, including telephones and e-mail, is restricted to business use. You may not use e-mail or other Amtrak communications systems to discuss or disseminate information involving political, candidate or ballot initiatives. Sending e-mails via the Amtrak e-mail system or computers that support or criticize a candidate for political office is prohibited.

A Message from Joe Boardman

Dear Co-workers,

I am very pleased to announce that DJ Stadtler, the current acting vice president of operations, will continue his role overseeing the transportation, engineering and mechanical departments as the vice president of operations effective immediately.

The time DJ spent at Amtrak as chief financial officer, prior to assuming the role of acting vice president of operations at my request, enabled him to see how Amtrak functions, and having been involved in the details of operations budgets has given him tremendous insight. In the months since his transition in December, DJ has spent time working with senior leaders throughout the operations department to develop a structure that is in line with the Strategic Plan.

In his role as vice president of operations, DJ will be focused on implementing a structure within the operations departments that allows for inter-departmental collaboration, and that better supports the efforts to deliver high-speed, Northeast Corridor, state-supported and long-distance service that meets the expectations of our customers.

Please join me in welcoming DJ into this role and give him your support. Thank you for the work you do every day.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

I am pleased to announce the selection of Barry Eveland, labor coordinator-east, Marlynn (Molly) Turner-Byrdsong, labor coordinator-central, and Martha Henderson, labor coordinator-west to the Operation RedBlock (ORB) Program.

In addition to the three Labor Coordinator appointments, Michael Oathout will serve as the ORB Manager and Arlicia Jones will be the ORB Analyst.

Barry, Michael and Arlicia will be located in Philadelphia. Molly will cover the Central region from Beech Grove, Ind., and Martha will work from Los Angeles, Calif.

Operation RedBlock is a labor developed, joint labor/management company adopted drug and alcohol safety prevention program. ORB emphasizes awareness, education and prevention of drug and alcohol use through union-led prevention committees. Its policy is directed by an Executive Steering Committee consisting of both labor and management representatives. As I advised in my April 12 Advisory, the mark-off process remains confidential and steps have been taken to enhance data security.

Please join me in welcoming Barry, Molly, Martha, Michael and Arlicia to the ORB team on America's Railroad.

Thanks for all you do to keep our customers and our fellow employees safe.

Sincerely,

A Message from Joe Boardman

Dear Co-workers,

I am pleased to announce that Jason D. Molfetas is joining Amtrak today as chief information officer (CIO) to lead the company's information technology (IT) team, and develop and implement world-class state-of-the art systems to support customer service initiatives, enhance business operations and improve financial performance. He will report directly to me.

Mr. Molfetas brings to Amtrak more than 28 years of experience in the IT industry. He most recently served as senior vice president and CIO for Recall, an Australian-based global company involved in secure information management and logistics, digital media and data protection. He simultaneously held the position of general manager for its Brazilian operations.

Prior to joining Recall, Mr. Molfetas served as CIO at Westcon Group and has held global executive positions at Xerox Corporation and Pearson, Publishing, PLC.

His leadership skills and expertise in the IT field will allow us to continue building the partnerships and the new technology systems to advance Amtrak into our bright future.

I would like to express my appreciation to Dee Waddell, acting chief information officer. Being in an acting position is not easy and Dee's leadership and technical knowledge has served us well.

Please join me in thanking Dee and welcoming Jason to America's Railroad.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

I am pleased to announce that effective June 25 Mark Yachmetz, a seasoned rail policy professional, joined Amtrak as Chief, Corporate Research and Strategy.

Mr. Yachmetz will play an integral leadership role within the Office of the President and CEO and will be directly involved in developing and implementing the strategic missions set forth in the FY2011 - FY2015 Strategic Plan.

I have known Mark since I was Commissioner of Transportation for the state of New York, all the way through my years at the Federal Railroad Administration (FRA) and then here as CEO. Amtrak has been well served with Mark's dedication and commitment to making passenger rail better from every view point I have had of him. I am very pleased that he decided to come to this new venue and head this group with the depth of knowledge that he has demonstrated and his complete commitment to Amtrak's mission.

Most recently Mr. Yachmetz was employed at the FRA as the Associate Administrator for Railroad Policy and Development. In this role he was responsible for providing policy direction, executive leadership and oversight for federal railroad investment programs including capital investments promoting the development of high-speed intercity passenger rail service; capital investments and operating assistance provide to Amtrak and the \$35 billion Railroad Rehabilitation and Improvement Financing (RRIF) program of loans and guarantees to the rail industry.

From 1994 until the end of 2011, he also served as the staff to and representative of the Secretary of Transportation in the Secretary's role as an *ex officio* member of Amtrak's Board of Directors.

Please join me in welcoming Mark into this critical role.

Sincerely,

Joe Boardman

Dear Co-workers,

As the July 4 holiday draws near, it is important to remember the service men and women at home and abroad who secure our freedoms and protect this great nation. Their leadership, selflessness and dedication are a source of pride for our country and for our company.

I am proud to say that I am a Vietnam veteran, and I reserve a special place in my heart for holidays like Independence Day. Beyond barbecues and baseball games, this weekend offers us the opportunity to reflect on the sacrifices military families have made to secure our way of life.

Since our inception we've had a close relationship with the armed services, spanning several international conflicts and multiple generations. Amtrak employs more than 1,500 military veterans from all of our nation's armed services and is a member of the Employer Partnership of the Armed Forces program, recruiting at numerous military job fairs across the country. In fact, since January more than 14 percent of our new hires have been veterans.

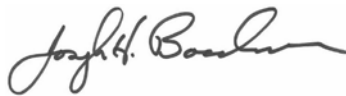

Throughout our business, the hard work of military veterans, reservists and active military personnel is what truly makes Amtrak an essential part of the American experience.

Today I want to speak directly to my brothers and sisters in arms and say thank you for your service and for feeling Amtrak was worthy of your skills upon your return home. For the families and friends of those who made the ultimate sacrifice, I am humbled by the high price they had to pay for our freedom.

I hope you'll join me in showing appreciation to the Amtrak employees who are currently serving our country around the globe and those that have served in the past.

Thank you for your service.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

The U.S House of Representatives has recently adopted a budget resolution for fiscal year 2013. Accompanying the budget resolution is an illustrative report which includes various proposals from the House Budget Committee designed to save \$122.5 billion over 10 years. One proposal references Railroad Retirement Tier I benefits. The proposal states that railroad retirement benefits “are more generous than Social Security in many ways.” The Budget Committee goes on to recommend that legislation adjust Railroad Retirement Tier I benefits “so that its benefits would equal that of Social Security, with an estimated savings to taxpayers of \$2 billion over 10 years.”

Although these proposals have been made by the Budget Committee, legislation has not been introduced to make this change happen, nor would such legislation be under that committee’s jurisdiction. Also, the excess Tier I benefits are paid out of the Tier II Trust fund, which consists of contributions by rail employees and rail employers. The government does not pay for the benefits therefore there would be no savings to the government from the proposed changes.

Historically changes in Railroad Retirement have only been made when management and labor have come to an agreement on changes. To date, neither management nor

labor has been aware of proposed changes and neither would be in support of such changes.

We want employees to be assured that as of now your Railroad Retirement benefits are not endangered or slated for change. If we believe changes to Railroad Retirement benefits become imminent we will promptly let you know.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

May 03, 2012 • Page 1 of 1

Dear Co-workers:

When I joined Amtrak in August 2011, my first priority was to understand how the existing Human Resources department worked, what its priorities were and how we could improve. As I met with numerous teammates in HR as well as other departments, I heard so many great ideas about what we could be doing differently to add value to Amtrak.

Our highest priority is to ensure that we have the right employees, now and in the future, to carry out the Amtrak Strategic Plan and realize our vision. Doing that means serving as business enablers that help departments and business lines recruit, retain and develop talented employees — it's a much different approach than what we've had in the past.

Instead of being focused on personnel transactions and policy, which is still necessary, the new Human Capital department is organized around modern best practices from top companies around the world. This includes delivering "total rewards" and wellness benefits to employees; serving as a business partner to other departments and business lines; continuously improving organizational effectiveness and developing leaders throughout the company. We will also focus on finding opportunities to improve business processes so employees in all departments have to do less administrative work and can focus on their core function.

In addition to other recent changes, I'm happy to announce that we have hired two new leaders to help implement our Human Capital transformation and execute the Amtrak Strategic Plan.

Uzma Burki has joined us as Director, Organization Effectiveness and Leadership Development, where she will lead talent management, change management and learning development initiatives. Uzma has more than 20 years of human capital experience with some of the most well-known organizations in the world. Additionally, she has held profit and loss responsibilities in the financial service sector. She holds master's degrees from Columbia University, Kansas State and Tufts University. She is also a Master Black Belt in Lean Six Sigma.

Scot Naparstek will serve as Director of Human Capital Business Partners. His group will work collaboratively across all functions to execute Human Capital strategies in support of the business. Scot has served manufacturing and financial companies in both human resources and operations leadership positions. He holds an MBA from St. Bonaventure University and an engineering degree from Columbia University.

Please join me in welcoming Uzma and Scot to Amtrak. I look forward to keeping you updated on our progress.

Sincerely,

Barry Melnkovic
Chief Human Capital Officer

Hurricane Sandy Update #6

Current Service Information

Amtrak will provide *Acela Express* and *Northeast Regional* regular weekend service on the Northeast Corridor between Boston and Washington, D.C., via New York City, on Saturday, November 3 and Sunday, November 4. Amtrak services to and from New York City are subject to delay while repairs continue. Most overnight service is restored.

Employee Disaster Assistance Information

Our employees have been impacted by Hurricane Sandy in numerous ways; the tragic loss of loved ones, homes destroyed or severely damaged. Many of our employee families in the hard-hit regions are without power and were forced to evacuate from their homes.

President Obama declared major disasters for New York and New Jersey, making disaster assistance available to those in the heaviest hit areas affected by the storm. Individuals and business owners in the declared areas (counties that have declared a state of emergency) in New York, Connecticut and New Jersey can begin applying for assistance by:

- registering online at www.disasterassistance.gov
- applying via a smartphone at <http://m.fema.gov>
- applying via a phone by calling (800) 621-3362 or TTY (800) 462-7585

In addition to these three ways to apply, you can visit a [disaster recovery center in your area](#) and search for [disaster recovery centers on your smartphone](#).

The American Red Cross has emergency shelters in many states. You can search for open shelters by visiting [the Red Cross website](#), downloading the [FEMA smartphone app](#), or by texting the word “shelter” and a **zip code** to 43362 (4FEMA). For example, if you’re searching for a shelter in the 01234 zip code, you would text **Shelter 01234**.

New York and New Jersey have established some additional contacts:

- New York has the following contacts:
 - a. Hurricane Sandy Helpline for general assistance and applications for disaster assistance 855-NYS-SANDY
 - b. Additional helpline for information on other resources 888-769-7243

Employee Assistance Program

It is critical that if you have not seen or heard from a fellow employee in several days, please call our 24-hour EAP Hotline at 1-800-327-6448 and report this information.

We know that in such devastating situations employees may have numerous issues which may need to be addressed. EAP is available to help you with crisis support and please don't hesitate to reach out. This number is for our employees only.

Union Relief and Assistance

There are three important documents being sent to you along with this advisory. They include information on disaster assistance resources, prescription and medical information and links by union on specific disaster relief assistance.

How to Help

Many employees have asked how they can help. At this time we are encouraging donations to the American Red Cross and other relief organizations.

Numerous blood drives have been cancelled as a result of the storm and the Red Cross has a need for blood donations. To schedule a blood donation or for more information about giving blood or platelets, please visit redcrossblood.org or call 1-800-RED CROSS (1-800-733-2767).

special employee advisory

October 28, 2012 • Page 1 of 1

Hurricane Sandy Update #2

We wanted to inform you that all *Acela Express*, *Northeast Regional*, *Keystone* service and shuttle services are cancelled for trains originating on Monday, October 29. Also the *Empire Service*, *Adirondack*, *Vermont*, *Ethan Allen* and *Pennsylvanian* train services are also suspended, along with overnight services to and from the East Coast. At this point in time, resumption of service is unknown.

Metro North, New York City subways and the Long Island Rail Road will shut down at 7 p.m. this evening. NYC bus service will suspend operation at 9 p.m. tonight. New Jersey Transit, SEPTA, MARC, and VRE will not be operational on Monday, October 29.

Engineering, Operations, Mechanical and Amtrak Police department employees are expected to report to work. Other positions have been or will be annulled or reduced. If you have questions on your status for service, please contact your supervisor.

During this Hurricane Sandy event, arrangements have been made with the local law enforcement agencies that Amtrak **employees with proper company** identification, going to or coming from work, or responding to calls **on railroad business** should be considered essential personnel and should be permitted travel if necessary. Any agency with questions or requiring confirmation of this information should call the Amtrak Police National Communications Center at 1-800-331-0008.

While every possible arrangement is being made for food and housing for those on extended stay, needed employees should be prepared with additional clothing and personal items such as required medication and cash in the event that the ATMs are not operational.

Please check Amtrak.com for any service changes. All other information in this morning's Special Employee Advisory not addressed here remains in effect.

We will continue to keep you advised of any important developments as they are known.

Thank you and please be safe.

Hurricane Sandy Update #2

The predicted landfall of Hurricane Sandy, with associated high winds and heavy rains in the mid-Atlantic region, combined with emergency declarations in several states, has led Amtrak to cancel Northeast Corridor service north of New York starting at 7:00 p.m. on Sunday, October 28, and to cancel nearly all service on the eastern seaboard on Monday, October 29. At this point in time, resumption of service is unknown.

Metro North, New York City subways and the Long Island Rail Road will shut down at 7 p.m. this evening. NYC bus service will suspend operation at 9 p.m. tonight. New Jersey Transit, SEPTA, MARC, and VRE will not be operational on Monday, October 29.

For Amtrak locations within the Northeast Corridor, Engineering, Operations, Mechanical and Amtrak Police department employees are expected to report to work. Other positions have been or will be annulled or reduced and you are not expected to report for work unless specifically discussed or communicated by your supervisor. If you have questions on your status for service, please contact your supervisor.

During this Hurricane Sandy event, arrangements have been made with the local law enforcement agencies that Amtrak **employees with proper company** identification, going to or coming from work, or responding to calls **on railroad business** should be considered essential personnel and should be permitted travel if necessary. Any agency with questions or requiring confirmation of this information should call the Amtrak Police National Communications Center at 1-800-331-0008.

While every possible arrangement is being made for food and housing for those employees working during this period of time, reporting employees should be prepared with additional clothing and personal items such as required medication and cash in the event that the ATMs are not operational.

Please check Amtrak.com for any service changes. All other information in this morning's Special Employee Advisory not addressed here remains in effect.

Hurricane Sandy Update #5

Current Service Information

Amtrak engineering and transportation forces are working together to restore service to and from New York City from points south and north on the Northeast Corridor.

Water has been pumped from one of the two Amtrak tunnels under the Hudson River and repairs continue in order to operate modified service. Among the procedures being followed is the operation of a test train -- without public passengers -- between New York City and Newark, N.J.

Amtrak will make an announcement later today regarding service restoration at New York City. When service resumes, it will be subject to delay while repairs continue.

Reservations and ticketing for the modified service is not yet available. Passengers for the service will be asked to make reservations and/or use the eTicketing option with their computers and smartphones before traveling to Penn Station New York, 30th Street Station in Philadelphia or other Amtrak locations.

Please monitor Amtrak.com/alerts for any further updates today.

Inclement Weather Days

We intend to follow the corporate inclement weather policy for those employees who did not report to work on Monday and Tuesday. Agreement-covered employees should refer to the applicable section of your collective bargaining agreement and/or discuss the policy with your supervisor.

Non-agreement employees who had their supervisor's permission to work from home and worked full days on both Monday and Tuesday do not need to take any action. Employees who worked partial days or not at all should plan to take personal leave, vacation days/hours or take the day off without pay. It is your responsibility to enter those hours in the usual manner as soon as possible through the Employee Information Portal. Should you have any questions, please speak with your supervisor.

December 7, 2012 • Page 1 of 1

Marijuana Still Prohibited by Amtrak Policy

This past November, Washington and Colorado voters legalized the recreational use of marijuana, making them the first U.S. states to decriminalize the practice.

It is important to emphasize that these state initiatives will have no bearing on Amtrak's Drug and Alcohol Policy or drug testing program. The Department of Transportation's Drug and Alcohol Testing Regulation (49 CFR Part 40—Procedures for Transportation Workplace Drug and Alcohol Testing Programs) with which we comply, does not authorize the use of Schedule I drugs, including marijuana, for any reason.

Amtrak's Medical Review Officer (MRO) will **not** verify a drug test as negative based upon learning that an Amtrak employee used "recreational marijuana" where states have passed "recreational marijuana" initiatives. Amtrak's MRO will also **not** verify a drug test as negative based upon information that a physician recommended that the employee use "medical marijuana" where states have passed "medical marijuana" initiatives.

Marijuana remains a drug listed in Schedule I of the federal Controlled Substances Act. It remains **unacceptable** for any Amtrak employee to use marijuana, as per Amtrak's Drug and Alcohol Policy and federal regulations.

We have a responsibility to reassure the traveling public and Amtrak employees that our railroad is the safest it can possibly be.

Safety matters; Amtrak is a drug- and alcohol-free work environment.

Message from Joe Boardman

Dear Co-workers,

I am delighted to announce that effective immediately, Matt Hardison has been named the new chief marketing and sales officer (CMSO) following the retirement of Emmett Fremaux. This position will continue to report directly to me.

This title change is part of an overall strategy to eliminate the title of vice president and foster senior leadership title consistency on the Executive Committee.

Mr. Hardison will be responsible for sales distribution and customer service, field marketing, advertising and sales promotion, Amtrak Guest Rewards, market research and analysis, reservation sales, on-board systems, pricing and revenue management, eTicketing and eCommerce. Matt will be operating this department as a full-function service center for delivery of comprehensive marketing and sales services to our business lines and commercial partners.

Matt joined Amtrak in 1999 as senior director, commercial partnerships and designed and built our loyalty marketing program (Amtrak Guest Rewards) and created new service and product partnerships with a number of airlines, AOL, Yahoo, and MBNA Chase.

In 2002, Mr. Hardison was promoted to the position of chief, sales distribution and customer service. While in this position for the past 10 years, Matt and his team achieved some very notable operational and systems accomplishments including the introduction of WiFi, the successful launch of eTicketing, the locomotive communications system, call center headcount and cost reductions, improvements to revenue management and the much lauded "Julie" voice recognition system.

Prior to joining Amtrak, he was vice president of Hagler Bailly, Inc., a

transportation and technology company where he developed significant new business for that company. And he worked at Apogee Research, Inc. where he rose to be senior vice president and chief operating officer and was responsible for managing all aspects of the business.

Matt has a Master of Business Administration from the Pennsylvania State University and a Bachelor of Science from North Carolina State University.

Undoubtedly, he will provide the necessary leadership and continuous improvement of our business processes as we carry out the vision set forth in our Strategic Plan.

Please join me in welcoming Matt into this role and give him your full support.

Sincerely,

Joe Boardman
President and CEO

February 2, 2012 • Page 1 of 1

Message from Joe Boardman

Dear Co-workers,

Today, we will be submitting our Grant and Legislative Request to Congress for next fiscal year. If you're not familiar with what that is, it's a document we send to Capitol Hill every year describing our plans for the upcoming year and the amount of federal funding support we need to accomplish our goals.

Our request reflects our commitment to continuing strategic capital investments that will yield returns, as a result of better service reliability, improved customer service and expanded service options.

We fully understand the economic and political climate we're living in, and our Strategic Plan envisions necessary improvements in our financial performance, with a goal of reducing the need for operating support.

Our request for next year totals \$2.1 billion, comprising \$450 million in operating support, \$1.4 billion for capital programs (not including an additional \$60 million for advancing NextGen High-Speed Rail along the Northeast Corridor), and \$212 million for debt service.

As a result of increased efficiency, cost controls, better service, record ridership and anticipated increases in revenue, we're asking for less operating support than what Congress has appropriated for this year. That's a strong statement about our ongoing efforts to improve our management and financial health. Amtrak covers 85 percent of its operating costs with non-federal dollars, and we will improve that number in the years to come.

Our lower request for funds for debt service reflects the fact that we've worked hard to manage our finances and have reduced our debt for eight consecutive years.

Our request is heavy on the capital support to help us continue to build for the future — significantly more than the \$657 million appropriated for this year. We will invest in improvements that support faster, more frequent and more reliable service in the Northeast, the Midwest, and elsewhere. We will make infrastructure improvements and advance new high-capacity, high-speed service on the Northeast Corridor, and achieve speed increases on the Michigan Line and Empire Corridor.

We will also replace our aging fleet of electric locomotives and passenger cars used for long-distance trains, and state-supported and other corridor services.

We will also fund safety and security projects, as well as customer-focused programs, such as improving Americans with Disabilities Act station accessibility and continuing the development of our next-generation reservation system.

These investments will help provide employees across departments and across the country the tools to do their jobs better and to deliver better service to our customers.

We have a lot to be thankful for, and we're making progress for our customers and for those who follow us in the future. We are dedicated to continuous improvement and are consistently focused on a "One Amtrak Way" of improving our business processes for the sake of Safety and Security, Customer Focus, Mobility and Connectivity, Environment and Energy, and Excellence in Financial and Organizational performance. Thank you for your support.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

When we first launched Safe-2-Safer in August of 2009, I remember skepticism about what this was all about. Some employees suspected that it was another “flavor of the month,” another gimmick from management. I understood where that sentiment came from. I also knew that changing our safety culture was going to take some time and, in some cases, some convincing. To be honest, I find it difficult to understand how unifying the workforce around safety and security takes convincing. We all want to go home the same way we arrived at work, and we care about each other’s safety.

Since then, we’ve made some progress. Our divisions and departments are at different stages of the process, some more established than others. There are 30 steering committees in place, we’ve trained more than 600 observers and they’ve conducted more than 32,000 observations. More than 2,200 supervisors have participated in workshops to help make them more effective leaders.

What does all this mean? It means that we’re identifying safety risks and taking steps to change or remove them. We’re giving managers tools to provide feedback that is more constructive. We’re not making safety about the ratio anymore; we’re making it about safe behaviors.

Some of that progress is evident in the results of the most recent Safe-2-Safer employee survey conducted by Behavioral Science Technology, who

is helping us implement Safe-2-Safer. According to the overall findings, there was improvement in 10 of the 12 measures in the survey, compared to the first survey done in 2009.

The survey results also point to areas that didn’t show improvement. There are still negative perceptions of management’s support of employees on safety. The results vary widely by departments and regions, which is not surprising since some divisions have only recently started the Safe-2-Safer processes.

The survey results are mixed, and that’s the truth — we still have more work to do. But it’s also true that the safety and security culture at Amtrak has improved, and that Safe-2-Safer is having a positive effect on front-line employees and managers alike. Improvement, even if it’s incremental, is the name of the game. With each degree of improvement, we’ve helped change someone’s life at work for the better and helped reduce injuries.

We expected an uptick in reported injuries after we first instituted Safe-2-Safer, because we removed some of the pressures and barriers against employees reporting injuries. But now we’re starting to see additional improvements — we’ve had fewer reportable employee injuries so far this fiscal year (Oct. 1 through Jan. 31) than the same period last year. It’s too early to say that it’s a sustainable trend, but it’s progress.

Improving safety and security on the railroad is not a passing fad, and Safe-2-Safer is here to stay. Improving safety and security on the railroad is our duty, and everyone is expected to participate. Those of you who remain

skeptical about Safe-2-Safer should talk to other employees who are seeing the benefits. We rely on one another to work safely in this business; it's not a choice, it's a necessity.

If you're interested in learning more about the survey results, they are posted on the intranet under "Safety." I've also attached the overall findings to this message. We asked for your feedback, and we are using it to make adjustments to Safe-2-Safer and to make further improvements within the company. As I speak with senior managers throughout the company, I'm asking each department to develop an action plan to address weaknesses and bolster strengths, based on what you told us in the survey.

I want to thank those of you who took the time to complete the survey. We value your feedback and I assure you that it will be used to improve safety and security for all Amtrak employees.

Thank you for your support.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

When we first launched Safe-2-Safer in August of 2009, I remember skepticism about what this was all about. Some employees suspected that it was another “flavor of the month,” another gimmick from management. I understood where that sentiment came from. I also knew that changing our safety culture was going to take some time and, in some cases, some convincing. To be honest, I find it difficult to understand how unifying the workforce around safety and security takes convincing. We all want to go home the same way we arrived at work, and we care about each other’s safety.

Since then, we’ve made some progress. Our divisions and departments are at different stages of the process, some more established than others. There are 30 steering committees in place, we’ve trained more than 600 observers and they’ve conducted more than 32,000 observations. More than x,xxx supervisors have participated in workshops to help make them more effective leaders. What does all this mean? It means that we’re identifying safety risks and taking steps to remove them. We’re providing managers tools to provide feedback that is more constructive. We’re not making safety about the ratio anymore; we’re making it about safe behaviors.

Some of that progress is evident in the results of the most recent Safe-2-Safer survey conducted by Behavioral Science Technology, who is helping us implement Safe-2-Safer. According to the overall findings, there was improvement in 10 of the 12 measures in the survey, compared to the first survey done in 2009.

The survey results also point to areas that didn’t show improvement. There are still negative perceptions of management’s support of employees on safety. The results vary widely by departments and regions, which is not surprising since some divisions are just getting started with Safe-2-Safer.

The survey results are mixed, and that’s the truth. We still have more work to do. But it’s also true that Safe-2-Safer is having a positive effect on front-line employees and managers alike. Improvement, even if it’s incremental, is the name of the game. With each degree of improvement, we’ve helped change someone’s life at work for the better and helped reduce injuries.

We expected an uptick in reported injuries after we first instituted Safe-2-Safer, because we removed some of the pressures and barriers for employees to report injuries. But we’ve recently seen indicators of a downward trend, with fewer injuries as compared with the same months last year. It’s too early to say that it’s a sustainable trend, but it’s certainly progress.

Safe-2-Safer is not a passing fad — improving safety and security on the railroad is not a fad. It’s our way of improving safety at Amtrak, and it’s here to stay. If you’re interested in learning more about the survey results, they are posted on the intranet under “Safety.”

We asked for your feedback, and we are using it to make adjustments to Safe-2-Safer. Each department head is working on an action plan to address the weaknesses and bolster the strengths, based on what you told us.

I want to thank those of you who took the time to complete the survey. We value your feedback and I assure

Environmental Health and Safety

As we continue executing our strategic plan, it is critical that we align the various functions within the company in a way that allows us to most efficiently achieve our goals. Sometimes this will include realignment of functions and personnel changes.

Effective October 1, 2012:

- Dr. Paul J. McCausland, corporate medical director, will be joining the Human Capital department;
- Victor Zare, public health superintendent, and Craig Caldwell, superintendent environmental, will be moving to the Law department; and
- Camille Ross, senior Environmental Health and Safety coordinator, and Tammy Johnson, executive assistant, will become part of the Operations department.

We know that you will continue to give them your full support as they join their new departments.

Benefits System Error Affects Many Agreement-Covered Employees' Deductions

The January 6 paychecks of many agreement-covered employees did not include deductions for health care benefits. Please note this error does not affect the health care coverage of these employees.

The mistake is the result of a technical error on the part of Amtrak's benefits administrator. This error impacted agreement-covered employees who participate in Amtrak's health care plan and did not make any changes to their benefits elections during the open enrollment period in November 2011.

The deductions that did not appear in the January 6 paycheck are expected to be included in the January 13 paycheck for employees paid weekly, and the January 20 paycheck for employees paid bi-weekly.

We regret the inconvenience this may cause. Employees should rest assured that this error does not affect their medical, dental or vision plan coverage.

If you have questions about your benefits elections, please call the Amtrak Benefits Service Center at (800) 481-4887 or visit www.AmtrakBenefits.com.

Message from Joe Boardman

Dear Co-workers,

During last night's State of the Union speech, President Obama spoke about investing in our nation's infrastructure and future.

At Amtrak, we're also making investments as we build for the future. I recently got a firsthand look at the mock-ups for the long-distance equipment that we have on order, and I'm pleased to see the progress being made there. We also have on order 70 electric locomotives that we'll put to work between Washington and Boston and on the Keystone Corridor.

We're moving ahead with infrastructure investments on the Northeast Corridor that will significantly reduce congestion and increase speeds, while advancing our vision for high-capacity, Next-Gen high-speed rail.

This year, we're continuing to improve our customer service and to provide our employees better tools to do their jobs well. We will launch eTicketing across the system, we will expand the rollout of a new on-board food and beverage point-of-sale system, and we will continue to develop our next-generation reservation system, among other things.

And, we're building an organization that will be more efficient and that enables these and other improvements to take hold. We are in the process of aligning how we work with the goals outlined in our Strategic Plan. If you haven't read it yet, you should — it's a working document that was developed with input from employees across departments. As you've heard me say before, the plan is our roadmap for improving our company, with an emphasis on improving the bottom line.

As you know, we've already made some changes in the organization to reallocate resources in accordance with the plan and our financial circumstances. With the alignment of functions under the Northeast Corridor Infrastructure and Investment Development business line, we're bringing together all of the funding, policy and planning decisions for the NEC and Next-Gen high-speed rail service under one umbrella.

The organizational changes we're making will result in a reduction in non-agreement positions. The Voluntary Separation Incentive Plan helped make some room to support the reorganization. At the end of last week, we began reorganization in the Human Capital (formerly Human Resources), Finance, and Government Affairs and Corporate Communications departments, and as a result some management employees left the company.

I know that reorganizations can be painful. I understand that some people may feel uneasy about change. There are even some people out there who perceive a sense of disorganization that isn't really there. But I think most of us know — in our hearts and minds — that we must make changes at Amtrak. What we're doing is building an Amtrak that will be in a stronger financial and strategic position to do more than just survive; an Amtrak that is more reliable and responsive, and that is structured to grow as our specific business needs and opportunities grow.

The changes we're making are incremental, and will continue to evolve in the coming months. Realignment is a process, not something I want to do across the organization in one fell swoop. And, that's particularly important as we build a more collaborative culture — it's critical that

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

January 25, 2012 • Page 2 of 2

we explore the synergies that we can leverage among departments and business lines as we evolve.

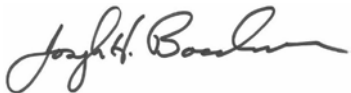

There are people out there who don't want Amtrak to succeed. They are betting against us, no matter what we do. But there are many more who do want Amtrak to succeed.

Last week, our acting head of Operations, DJ Stadtler, and I attended the graduation ceremony of a class of new engineers at the training facility in Wilmington. We talked about the sense of duty associated with transporting people safely. When passengers board our trains, we make a commitment to them to provide safe, reliable and customer-friendly service.

As we build for the future, we're making a commitment to our nation to deliver long-distance, corridor and high-speed service that meets — if not exceeds — our customers' wants, needs and expectations. We will continue to make the investments that yield the more efficient and reliable Amtrak we all want to be part of. Together, our commitment to the railroad and its mission remain steadfast, and our conviction to be a better Amtrak only gets stronger.

Thank you for your support.

A Message from Joe Boardman

Dear Co-workers,

In 1990, Congress passed and the President signed the historic and landmark Americans with Disabilities Act (ADA). This legislation established that access to public transportation for people with disabilities is a civil right. It required transportation providers, including modes of public transportation, be made accessible to people with disabilities in accordance with regulatory requirements that were subsequently promulgated pursuant to the ADA. As a public transportation provider, Amtrak is required to comply with this legislation by making sure that the equipment, facilities and services used by our passengers are accessible to people with disabilities in accordance with applicable regulations. I consider this to be an extremely important and moral responsibility for this company to embrace and to carry out.

Last fall, the U.S. Department of Transportation (DOT) issued a new rule requiring that certain stations served by Amtrak passenger trains provide level boarding for passengers with disabilities. I want you to know that I personally, and this company fully, support this rule and its intentions and as a result we will be advancing level boarding as quickly as possible at all stations where required by the new DOT rule. We will also seek to minimize our reliance on station-based mobile lifts at stations where boarding and alighting is in excess of 7,500 a year.

Prior to this rule, the company had cataloged the complex nature of ownership at our stations and developed a program to make sure that Amtrak was complying with its obligations under the ADA regarding platforms and other aspects of stations in accordance with the then-existing ADA rules and regulations. We were working on plans and letting contracts for construction of accessibility-related improvements when the new DOT rule was published.

The new rule has required us to rethink our program and reset some of its priorities. We are in the process now of preparing an FY13 program which will advance a number of stations across the system. The program will take time to be completed and will require a significant amount of resources. However, I believe that these resources are a truly worthwhile and valuable investment in the future of our company because level boarding will not only assist those persons with a disability but will enhance the boarding and alighting process for all our passengers, ultimately improving our service and reducing the dwell time at many of our station stops.

We have worked very hard to develop a program that is responsive to the needs of our passengers with disabilities and ensures that Amtrak is complying with its obligations under the ADA legislation and regulations, and we expect to continue to increase our productivity towards these goals as we work on stations, platforms and other elements throughout our system in the next few years. In the meantime, please, continue to give all our passengers, including those with a disability, the very highest quality of service they deserve and have come to expect while riding Amtrak.

In the coming months, I will keep you apprised of our progress on this major undertaking, and we will continue to work closely with the organizations that represent people with disabilities and ensure they see first hand our commitment and embrace our plans going forward.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

When we first launched Safe-2-Safer in August of 2009, I remember skepticism about what this was all about. Some employees suspected that it was another “flavor of the month,” another gimmick from management. I understood where that sentiment came from. I also knew that changing our safety culture was going to take some time and, in some cases, some convincing. To be honest, I find it difficult to understand how unifying the workforce around safety and security takes convincing. We all want to go home the same way we arrived at work, and we care about each other’s safety.

Since then, we’ve made some progress. Our divisions and departments are at different stages of the process, some more established than others. There are 30 steering committees in place, we’ve trained more than 600 observers and they’ve conducted more than 32,000 observations. More than 2,200 supervisors have participated in workshops to help make them more effective leaders.

What does all this mean? It means that we’re identifying safety risks and taking steps to change or remove them. We’re giving managers tools to provide feedback that is more constructive. We’re not making safety about the ratio anymore; we’re making it about safe behaviors.

Some of that progress is evident in the results of the most recent Safe-2-Safer employee survey conducted by Behavioral Science Technology, who

is helping us implement Safe-2-Safer. According to the overall findings, there was improvement in 10 of the 12 measures in the survey, compared to the first survey done in 2009.

The survey results also point to areas that didn’t show improvement. There are still negative perceptions of management’s support of employees on safety. The results vary widely by departments and regions, which is not surprising since some divisions have only recently started the Safe-2-Safer processes.

The survey results are mixed, and that’s the truth — we still have more work to do. But it’s also true that the safety and security culture at Amtrak has improved, and that Safe-2-Safer is having a positive effect on front-line employees and managers alike. Improvement, even if it’s incremental, is the name of the game. With each degree of improvement, we’ve helped change someone’s life at work for the better and helped reduce injuries.

We expected an uptick in reported injuries after we first instituted Safe-2-Safer, because we removed some of the pressures and barriers against employees reporting injuries. But now we’re starting to see additional improvements — we’ve had fewer reportable employee injuries so far this fiscal year (Oct. 1 through Jan. 31) than the same period last year. It’s too early to say that it’s a sustainable trend, but it’s progress.

Improving safety and security on the railroad is not a passing fad, and Safe-2-Safer is here to stay. Improving safety and security on the railroad is our duty, and everyone is expected to participate. Those of you who remain

There are 30 steering committees in place, we’ve trained more than 600 observers and they’ve conducted more than 32,000 observations. More than 2,200 supervisors have participated in workshops to help make them more effective leaders.

What does all this mean? It means that we’re identifying safety risks and taking steps to change or remove them. We’re giving managers tools to provide feedback that is more constructive. We’re not making safety about the ratio anymore; we’re making it about safe behaviors.

Some of that progress is evident in the results of the most recent Safe-2-Safer employee survey conducted by Behavioral Science Technology, who

is helping us implement Safe-2-Safer. According to the overall findings, there was improvement in 10 of the 12 measures in the survey, compared to the first survey done in 2009.

The survey results also point to areas that didn’t show improvement. There are still negative perceptions of management’s support of employees on safety. The results vary widely by departments and regions, which is not surprising since some divisions have only recently started the Safe-2-Safer processes.

The survey results are mixed, and that’s the truth — we still have more work to do. But it’s also true that the safety and security culture at Amtrak has improved, and that Safe-2-Safer is having a positive effect on front-line employees and managers alike. Improvement, even if it’s incremental, is the name of the game. With each degree of improvement, we’ve helped change someone’s life at work for the better and helped reduce injuries.

We expected an uptick in reported injuries after we first instituted Safe-2-Safer, because we removed some of the pressures and barriers against employees reporting injuries. But now we’re starting to see additional improvements — we’ve had fewer reportable employee injuries so far this fiscal year (Oct. 1 through Jan. 31) than the same period last year. It’s too early to say that it’s a sustainable trend, but it’s progress.

Improving safety and security on the railroad is not a passing fad, and Safe-2-Safer is here to stay. Improving safety and security on the railroad is our duty, and everyone is expected to participate. Those of you who remain

skeptical about Safe-2-Safer should talk to other employees who are seeing the benefits. We rely on one another to work safely in this business; it's not a choice, it's a necessity.

If you're interested in learning more about the survey results, they are posted on the intranet under "Safety." I've also attached the overall findings to this message. We asked for your feedback, and we are using it to make adjustments to Safe-2-Safer and to make further improvements within the company. As I speak with senior managers throughout the company, I'm asking each department to develop an action plan to address weaknesses and bolster strengths, based on what you told us in the survey.

I want to thank those of you who took the time to complete the survey. We value your feedback and I assure you that it will be used to improve safety and security for all Amtrak employees.

Thank you for your support.

Sincerely,

Joe Boardman
President and CEO

Director Human Capital Operation Announced

Chief Human Capital Officer Barry Melnkovic is pleased to announce that Allie Ingalsbe, a human resources professional with more than 20 years experience, will assume the role of Director of Human Capital Operation effective immediately.

Ingalsbe will play an integral role in helping to transform the human capital function here at Amtrak. She will report directly to the Chief Human Capital Officer.

“Allie’s experience here at Amtrak and previous employers will continue to help advance the evolving role of human capital here at Amtrak,” said Melnkovic. “She is a leader who emphasizes building and maintaining a strong team culture and developing and implementing forward thinking human capital strategies.”

Ingalsbe most recently held the position of Director of Amtrak’s Employee Service Center. Prior to that, she spent her career developing human resource systems and shared services at companies such as Rockwell Automation, Harley Davidson, DSW Shoes and U.S. Bank.

eTicketing National Deployment on Track

To meet the goal of deploying eTicketing over the summer, the eTicketing team is working with the transportation department to train more than 1700 conductors based at 49 crew bases. To-date more than 850 conductors have been trained, scanning more than 40,000 paper value documents a day on more than 200 trains.

During the national eTicketing training period, you will see conductors using the new eTicketing Mobile Device (eMD), as conductors begin to scan existing paper value tickets, while simultaneously punching and pouching tickets.

The scanning of existing paper value tickets is an important part of ensuring the success of the eTicketing program. It allows Amtrak conductors to become familiar with the eMD and the eTicketing system. This process also enables the project team to monitor system performance ahead of the switch over to eTicketing later in the summer. Additionally, scanning conventional tickets presents an immediate safety benefit, providing more trains with an accurate and up-to-date manifest of passengers aboard.

By thoroughly testing the eTicketing system ahead of a national deployment, we are making sure that the system performs as expected from day one of go-live. To this end we have completed a successful pilot of eTicketing on the Downeaster, are in the process of completing a pilot on the City of New Orleans, and are preparing pilots on the San Joaquin and Capitol Corridor services.

One of the inconveniences of field testing our equipment and systems is that sometimes, some of the complexities we face in successfully deploying eTicketing become obvious to the careful observer. For example, we know that some scanners need to be returned to the manufacturer for tuning, and you may see some conductors struggling to successfully scan paper value tickets. The eTicketing team is aware of these problems as they arise and are monitoring the performance of the scanners on a daily basis. The positive side to this is that field testing is helping us shake down our systems and find as many faults as we can, so that we address them and complete preparation for conversion to eTicketing later this summer.

The successful implementation of eTicketing will represent a step forward for Amtrak. We are substantially improving our service to our customers by meeting their need for increased convenience and flexibility in the ticketing process. At the same time, improving the accuracy of the passenger manifest represents another step forward in our Safe-2-Safer goals and addresses long standing requests for improvements from the National Transportation Safety Board. We know our conductors in the field recognize the customer,

Business Lines to be Established in Operations; Other Changes to be Made as Part of Strategic Plan

Last September, Amtrak published its corporate strategic plan that outlines clear goals for the company and several strategies it will execute in order to achieve those goals. Under the direction of the Board and the executive team, the plan was developed through a series of three-day strategy workshops involving more than 150 employees and union leaders representing every department and region.

“One of the most important strategies set in the strategic plan is to reorganize the Transportation, Mechanical and Engineering departments in order to create a single, integrated operating unit,” said President and CEO Joe Boardman. “Another critical strategy is creating business lines within the company so there is clear accountability for the financial performance of individual trains. Both of these strategies will help us achieve our goals in safety and security, financial excellence and customer focus.”

Both strategies will be carried out through a reorganization of the management structure within Operations. The plan, which has been under development since December, will be rolled out in phases over the next 16 months. Full transition to the new structure is scheduled to be complete in October 2013.

“Over the last few months, many of you have been involved in designing the new Operations structure,” said Vice President of Operations DJ Stadtler. “We’ve sought input from nearly 100 front-line employees and managers to make sure the changes are realistic and effective. You have been very honest about what you think will work and what won’t, and together we’ve created a sound plan for moving forward.”

The first step in the transition process will be to hire general managers to run the four business lines that are being established within Operations: Northeast Corridor Services, Long-Distance Services, State Supported Services and Commuter Services. These positions will report to Stadtler and will have full accountability for financial performance of their respective train services. Field operations will report up to the general managers through a new integrated management structure so that each business line has the ability to control costs.

Other groups responsible for delivering revenue, including marketing, sales, revenue management and communications, will be charged with supporting the business lines in managing the overall financial performance of their routes.

The plan does not include any service reductions or planned layoffs for agreement-covered employees. There are also no plans for significant reductions in non-agreement positions, although some positions may be changed, replaced or phased out. Most non-agreement employees' jobs will not change, though reporting structures will.

The general manager positions, as with the majority of the positions that will be filled through this realignment, will be posted and filled through a competitive interview process. Employees will not be asked to reapply for jobs they already perform.

May 11, 2012 • Page 2 of 2

“Operations is not about moving trains, it’s about moving customers who pay for our services and that must always be what drives our actions. We’re going to hold ourselves accountable for safety, financial performance and customer satisfaction — in that order — above everything else,” said Stadtler.

The most significant change will be the way in which terminals are managed. In order to eliminate departmental silos and create integrated service delivery, each major terminal will have a single manager responsible for all train and station services. The existing Transportation, Mechanical and Engineering groups within terminals will all report to a single manager who is accountable for ensuring customers arrive at clean stations with excellent ticketing and boarding services; trains depart on time with superior customer service; and equipment is clean, comfortable and reliable.

The centralized Transportation, Mechanical and Engineering functions will be focused on maintaining standards and setting policy for field operations in order to ensure consistency and efficiency across the system.

Said Stadtler, “It’s important to note that this isn’t solely about accountability — it’s about empowerment. It’s giving our employees the resources to better respond to our customers while improving our financial performance. It’s about an Amtrak that is structured to grow. There will be clear paths for employees to move up within the company. And we expect fewer layers of management from top to bottom so improvements can happen faster with less bureaucracy.”

Amtrak has seen reorganizations before, with varying degrees of success. This new effort has benefited from the input of many long-serving employees. Their insight has been used to incorporate what worked in the past and avoid what did not.

“This is not a recast of the Strategic Business Unit structure,” said Stadtler. “We are creating ownership of our services and moving decision-making closer to the front-line, while keeping support functions centralized. This approach gives us the ability to better serve customers while maintaining efficiencies that will allow us to achieve our financial goals.”

Added Boardman, “We are facing significant challenges right now and there are numerous risks facing our company. The uncertainty around the economy, the political landscape, and other external drivers impact our business. We can’t control these factors, but we can watch them closely and adjust as needed. However, we have complete control over internal factors such as efficiency, teamwork and dedication to customer service. If we get these things right, we are in a much stronger position to deal with the external risks that we face. We can create an Amtrak that is set up to grow over the coming decades, but only if we do it together.”

This is a widespread change and we will continue to provide regular updates about this transition as well as how we plan to evolve the way we deliver service to our customers.

Message from Joe Boardman

Dear Co-workers,

I am very pleased to announce that Polly Hanson is joining Amtrak on December 17 as our new chief of police and will be reporting directly to me.

Ms. Hanson is a well-respected safety and security professional with 30-years of law enforcement experience. She will lead the Amtrak Police Department consisting of over 500 law enforcement officers and civilians across the country who work closely with local, state and federal agencies to ensure the safety and security of passengers, employees and property of our railroad.

Her strong police, security and intelligence background is exactly what is needed to build on the significant progress achieved by the men and women of our police force. Ms. Hanson's leadership skills and management experience will keep the department moving forward to even higher levels of performance.

Ms. Hanson spent 27 years with the Metro Transit Police Department in Washington, D.C., rising through the ranks from police officer and served as Metro's chief of police from 2002 to 2007. She retired from the department as assistant general manager for safety, security and emergency management.

From 2008 to 2011 she worked at the Metropolitan Police Department in Washington, D.C. as executive director, Strategic Services Bureau

with responsibilities including development of policies and procedures, tactical crime analysis, strategic planning, performance management and government relations. Presently, she is director, Office of Law Enforcement and Security at the U.S Department of Interior where she is a commissioned federal special agent providing policy guidance and oversight of law enforcement, intelligence programs and security.

Please join me in welcoming the chief to America's Railroad.

Sincerely,

Joe Boardman
President and CEO

Staffing Announcement

As we continue executing our Strategic Plan, it is critical that we align the various functions within the company in a way that allows us to most efficiently achieve our goals. Sometimes this will include realignment of functions and personnel changes.

Effective October 4, 2012:

- Dr. Paul J. McCausland, Corporate Medical Director, and his staff will be joining the Human Capital department reporting to Robert Lynch, Director Corporate Total Rewards and Wellness.
- Deborah Jowers, Manager, Employee Health Services and her direct reports, Maia Dalton-Theodore, Manager, Employee Assistance Program and her direct reports and Rosa Nesmith, Officer, Human Resources will also be joining the Human Capital department and reporting to Robert Lynch.
- Karen Broadwater, Human Capital Business Partner, will be temporarily assigned responsibility for ADA administration including the ADA Panel.
- Craig Caldwell, Environmental Superintendent, his direct reports and Amtrak's environmental compliance program and policy and program initiatives will be moving to the Law department/General Counsel Eldie Acheson, reporting through Managing Deputy General Counsel Mike Stern.
- Victor Zare, Public Health Superintendent, his direct reports and Amtrak's public health compliance program will be moving to the Law department/General Counsel Eldie Acheson reporting through Senior Associate General Counsel Tom Bloom.
- Camille Ross, Senior Environmental Health and Safety Coordinator, and Tammy Johnson, Executive Assistant, will become part of the Operations department and report temporarily to Chris Jagodzinski, General Manager, East, until the Chief Safety Officer is named.
- Barbara Brill, Director of Industrial Hygiene; Keith Wiertz, Director, Safety Program Implementation; Michael Dagen, Director, Safety Policies and Programs and Sherrie Cook, Manager Safety Reporting and their staffs will also become part of the Operations department and similarly report temporarily to Chris Jagodzinski until the Chief Safety Officer is named.

We know that you will continue to give them your full support during this transition.

Amtrak® Employee Update

November 29, 2012

Amtrak Employees' Relief Fund

Two weeks ago Amtrak established the Amtrak Employees' Relief Fund to enable all employees to make monetary contributions to other employees who have been impacted as a result of Hurricane Sandy. We are delighted to report that **\$9,146** in payroll pledges have been received as of this morning and employees have sent **\$200** in checks to the lockbox set up for this fund.

We are so appreciative for your generosity. And there is still time for those who have not yet had an opportunity to contribute.

Checks can be made out to the National Railroad Passenger Corporation Employee Relief Fund and sent to the lockbox at:

National Railroad Passenger Corporation Employee Relief Fund
26462 Network Place
Chicago, IL 60672-1264

Donations may be made by payroll deduction by filling out *NRPC 3238 Amtrak Relief Fund Payroll Deduction Form* (attached). You have the choice of donating a one-time amount or choosing an amount to be deducted from each paycheck until the desired amount is reached.

Thank you for your spirit of giving.

Amtrak® Employee Update

October 26, 2012

UPDATE FOR ALL NON-AGREEMENT EMPLOYEES

The Amtrak Payroll Department is pleased to announce it's **GOING GREEN!** Beginning with the **November 9th pay date** we will be going paperless. Payroll will no longer print the direct deposit advices for all **non-agreement** direct deposit employees!

All Amtrak **non-agreement** direct deposit employees have 24/7 web-based secured access to the Employee Information Portal which maintains your payroll direct deposit statements. As a part of our ongoing cost-saving initiatives, and coupled with our desire to be environmentally responsible, we take pride in the fact that this new initiative will reduce processing, printing and mailing costs.

Amtrak **non-agreement** employees will be able print *direct deposit advices* directly from Amtrak's Intranet website.

In 3 clicks of a mouse you will be able to see your current direct deposit

- | | |
|----------|--|
| Click #1 | From your work PC go to Amtrak's Intranet and click on the Employee Information Portal |
| Click #2 | Click on BENEFITS and PAYMENTS |
| Click #3 | Click on SALARY STATEMENTS |

THERE YOU GO! There are your most current and prior direct deposit advices

To access from home, smart phone or tablet:

- | | |
|----------|---|
| Click #1 | From Google type in <u>https://employee.amtrak.com</u> and log in |
| Click #2 | Click on BENEFITS and PAYMENTS |
| Click #3 | Click on SALARY STATEMENTS |

THERE YOU GO - your most current and prior direct deposit advices

We hope you will enjoy this feature and we appreciate the opportunity to provide you with this exciting new way of viewing your pay information.

**MARK THE DATE ON YOUR CALENDAR
NOVEMBER 9, 2012**

Amtrak® Employee Update

October 26, 2012

As many of you know, Hurricane Sandy is heading up the East Coast. Weather services are predicting that the storm is unusual in that it has a hurricane center surrounded by a nor'easter. There is a very strong possibility of this significant weather event reaching the Northeast Corridor late Sunday night with the Mid-Atlantic, Northeast, and New England divisions as potential target areas. The system is forecasted to be accompanied by rain, wind, high surf and potential for significant power outages.

We offer the following tips:

- **Listen, act, live:** When there is a risk of severe weather, listen for the warnings on the radio, television, smart phone or whatever device works best for you.
- **Be aware of electricity during major storms:** Avoid using a corded telephone or other electrical appliances until the storm passes.
- **Do not drive on flooded roads:** The speed and depth of the water is not always obvious, and there may be portions of the roadway washed out under the water. Remember: It only takes two feet of water to carry away most cars.
- **Check your family's emergency supply kit** – make certain you have food, water, medications, and other necessities to sustain you, your family and family pets for at least 72 hours.
- **Remember food safety** – power outages and flooding may happen as a result of a tropical storm or hurricane, so have a plan for keeping food safe. Have a cooler on hand to keep food cold, and group food together in the freezer so it stays cold longer.
- **Have an adequate communication plan** - be sure friends and family know how to contact you. Teach family members how to use text messaging as text messages can often get around network disruptions when a phone call can't get through.
- **Be cautious after severe weather:** Listen to your radio or television for information about when it is safe to return and where to get assistance. If unaffected by the emergency, stay out of the damaged area until local officials allow entry.

For information on severe weather preparedness or other hazards, please visit <http://www.ready.gov/hurricanes>, www.noaa.gov or the FEMA website at www.Ready.gov.

Please be safe.

December 10, 2012

PASS RIDER RESPONSIBILITIES UNDER eTICKETING

The introduction of eTicketing has greatly improved the accuracy of onboard train manifests by providing updates in near real time. Amtrak requires accurate ridership data from all trains. Most service that is open to pass riders is eligible for eTicketing, and eTicket travel documents are issued rather than paper value tickets.

When you travel on your pass with an eTicket, please make sure that the Conductor scans and automatically lifts your eTicket **every time you travel**. Some pass riders travel daily and are known to the conductors, and the conductor may just acknowledge you as this has long been the practice. Please don't let that happen. If the Conductor does not ask for your eTicket, please present him or her with your travel document and have it scanned and lifted.

If your eTicket is not scanned on every train, you become a "no-show" for that train, and, just like with revenue passengers, that segment and all future segments in your reservation will be subject to cancellation.

Please make sure that your eTicket is scanned and successfully lifted, no matter the accommodation you may be in – unreserved coach, reserved coach, business class, sleeper, *Acela Express* or *Auto Train*.

December 11, 2012

FLASH PASS CLARIFICATION TO
PASS RIDER RESPONSIBILITIES UNDER eTICKETING

Yesterday's Employee Update on pass rider responsibility under eTicketing generated a large number of questions regarding the use of flash passes.

There is **no** change in the current flash pass process. If a pass rider is traveling on a train and in accommodations which require an eTicket, please make sure that the eTicket is scanned by the Conductor to avoid cancellation of that travel segment and all future segments in your reservation.

July 2, 2012

A Message from Joe Boardman

Dear Co-workers,

As the July 4 holiday draws near, it is important to remember the service men and women at home and abroad who secure our freedoms and protect this great nation. Their leadership, selflessness and dedication are a source of pride for our country and for our company.

I am proud to say that I am a Vietnam veteran, and I reserve a special place in my heart for holidays like Independence Day. Beyond barbecues and baseball games, this weekend offers us the opportunity to reflect on the sacrifices military families have made to secure our way of life.

Since our inception we've had a close relationship with the armed services, spanning several international conflicts and multiple generations. Amtrak employs more than 1,500 military veterans from all of our nation's armed services and is a member of the Employer Partnership of the Armed Forces program, recruiting at numerous military job fairs across the country. In fact, since January more than 14 percent of our new hires have been veterans.

Throughout our business, the hard work of military veterans, reservists and active military personnel is what truly makes Amtrak an essential part of the American experience.

Today I want to speak directly to my brothers and sisters in arms and say thank you for your service and for feeling Amtrak was worthy of your skills upon your return home. For the families and friends of those who made the ultimate sacrifice, I am humbled by the high price they had to pay for our freedom.

I hope you'll join me in showing appreciation to the Amtrak employees who are currently serving our country around the globe and those that have served in the past.

Thank you for your service.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Boardman".

Joe Boardman
President and CEO

eTicketing Summer Launch

As we prepare for the nationwide launch of eTicketing later this summer, you will see a flurry of activity across the company from Marketing, Transportation, IT and others. Currently, the eTicketing team is working with the Transportation department to train more than 1,700 conductors based at 49 crew bases. As you ride the trains, you will start to see more and more conductors using the eTicketing Mobile Device (eMD). In fact, more than 900 conductors have already been trained and are scanning more than 40,000 paper value documents a day on more than 250 trains. So far, we:

- Have completed successful pilot on the *Downeaster*
- Are in the process of completing a pilot on the *City of New Orleans*
- Are preparing to launch pilots on the *San Joaquin* and *Capitol Corridor* services.

Marketing: The Amtrak for iPhone® application has marked a major milestone by exceeding 500,000 downloads. The app delivers customers a quick, convenient way to purchase tickets, review existing reservations, get train status and view station details while on the go. Mobile applications are Amtrak's newest, fastest growing sales channel. Amtrak for iPhone is available free through iTunes.

Operations: Starting today, several Northeast Corridor trains will operate according to revised schedules, due to various bridge, track and tunnel projects underway. *Pacific Surfliner* schedules will also be adjusted in coordination with Metrolink and Coaster schedules that change effective today.

CNOC Hosts Family Day

Special thanks to the employees and their families that participated in this past weekend's Family Day celebration. The celebration that hosted nearly 500 guests included a cookout staffed by employee chefs, an ice cream truck, employee DJ and a clown for the children. Senator Tom Carper, Board Member Mr. DiClemente and Amtrak President Joe Boardman joined the celebration as distinguished guests. Family Day participants were encouraged to visit the 40th Anniversary Exhibit Train that was on display for the public at the Wilmington, Del., station.

Between now and the official launch, conductors will be using the new eTicketing Mobile Device (eMD) to scan traditional paper "value" tickets, prior to punching and pouching them. While, this may seem counterintuitive, scanning existing paper value tickets is important because it allows conductors to become familiar with the eMD. In the interim, doing so also provides an immediate safety benefit for those trains with accurate and up-to-date manifest of passengers aboard. Once eTicketing is launched this summer, customers will begin printing their tickets at home or displaying them on their smart phones and you will see the punch and pouch largely replaced by the scan. Conductors and customers on the *Downeaster*, where eTicketing is already in place, have raved about the ease and simplicity of the new process.

As is to be expected during any training and testing period, we have found a few issues that we are actively in the process of correcting. For example, as a result of a hardware issue, some conductor eMDs have had difficulty scanning paper value tickets. The eTicketing team is monitoring for these types of issues and addressing them as they are identified. In this way, we can ensure that the entire eTicketing system performs as expected from the first day of launch.

The successful implementation of eTicketing will represent a major step forward for Amtrak. We are substantially improving the customer experience for Amtrak customers by meeting their need for increased convenience and flexibility in the ticketing process. At the same time, a much more accurate passenger manifest represents another important step forward in addressing both our Safe-2-Safer goals as well as a long standing request for improvements from the National Transportation Safety Board. We know our conductors in the field recognize the customer, operational and safety benefits of eTicketing, and thank them for their support and dedication to the program.

April 9, 2012

National Train Day Contest Winners

Congratulations to the first two winners of this year's National Train Day trivia contest, Brian Hains, Machinist and Linda Katz, Passenger Service Clerk.

A new question for the National Train Day employee trivia contest is posted on www.TrainDay411.com through April 23. Employees can enter the contest for the opportunity to win prizes.

Also, be sure to check out the Employee Spotlight section featuring past National Train Day volunteers and submit your photos to the Inside Perspective photo gallery. Sign up online today to volunteer at one of the many National Train Day events held at Amtrak stations.

Dear Co-workers,

This year marks the fifth annual National Train Day celebration. Signature events will be held on May 12 at stations in New York City, Philadelphia, Chicago and Los Angeles. Each event will feature free live entertainment, train tours and kids' activities, as well as exhibits and interactive displays about the history of railroads in the United States and the future of high speed rail. Award winning actress, writer and philanthropist, Rosario Dawson, will serve as this year's national spokesperson, and will participate in the week-long celebration leading up to National Train Day in New York.

As in years past, employees will play an essential role in making National Train Day memorable for the thousands of people in attendance. We hope to make this year's National Train Day the most successful to date, and in order to do that we need to reach our goal of 500 employee volunteers at events across the country. Employees interested in volunteering at one of the four major events - or at local events across the country - are encouraged to sign up at www.TrainDay411.com.

In addition to the four major events, local communities will also host their own National Train Day celebrations. Last year, over 200 events took place in communities nationwide. Employees who would like to host their own events or help spread the word about National Train Day, can find more information in the Volunteer section on TrainDay411.com. National Train Day helps raise awareness of the vital role rail plays in our nation's transportation system, while also celebrating the ways trains touch the lives of people across America.

We look forward to celebrating with our employees and making the fifth annual National Train Day a success.

Sincerely,

Emmett Fremaux
Vice President, Marketing and Product Development

Amtrak On Pace to Set New Ridership Record

Routes nationwide have shown an increase in passenger counts for the first six months of fiscal year 2012. A 3.7 percent increase in ridership numbers over the same period last year has us on pace to set a new ridership record again this year.

All Amtrak business lines have experienced growth in the first half of FY 2012, compared to the same period last year, including long-distance trains up 3.0 percent, Northeast Corridor up 5.2 percent and state-supported and other short distance routes up 2.7 percent. The continued ridership growth marks a long-term trend that has led to eight records in the last nine years, including an all time high of 30.2 million passengers in FY 2011.

Mechanical: On April 20, Amtrak will celebrate the grand opening of the Hialeah, Fla., Preventative Maintenance Facility. The new facility will be used to maintain Viewliner, Amfleet II and Heritage diner equipment. The facility replaces the completely open-air environment in which mechanical employees currently work.

Operations Update

A number of significant track work projects begin today that will affect Amtrak service.

Due to speed restrictions imposed by Norfolk Southern Railway (NS), select *Wolverine* and *Blue Water* trains have been operating on adjusted schedules since late March. Over the next few weeks, service and schedule changes will take place on these routes in Michigan as NS makes the repairs needed to remove the slow orders.

Along the Chicago-St. Louis corridor, the Illinois Department of Transportation and Union Pacific Railroad (UP) will resume work to upgrade the route for future high-speed trains. During construction, chartered motorcoach service will be provided for *Lincoln Service* passengers at St. Louis, Alton and Carlinville. The work will also impact the *Texas Eagle*, which will detour between Chicago and St. Louis without making scheduled stops.

UP will also begin work in Colorado along the *California Zephyr* route during several periods through June 7. Starting today, schedules will be adjusted on select dates and beginning next month, Trains 5 and 6 will detour through southern Wyoming between Denver and Salt Lake City, affecting service at intermediate stations.

Conductors to Begin Scanning eTickets on Capitol Corridor and San Joaquin Service

In the next step toward a nationwide eTicketing system, Amtrak will begin piloting eTicketing on two-state supported California rail corridors – the *Capitol Corridor* and Amtrak California *San Joaquin* today.

Conductors will begin scanning “print anywhere” eTickets for one-way and roundtrip travel only. Eticketed travel to or from connecting services will join the pilot program at a later date. The implementation of the eTicketing Pilot in California is another step towards nationwide rollout this summer.

TSA Recognizes Amtrak as Gold Standard

Amtrak is being recognized by the Transportation Security Administration (TSA) for earning TSA’s highest rating in its most recent Baseline Assessment for Security Enhancements (BASE) program.

The TSA BASE program is designed to establish a security standard for individual system security programs and assess progress. The receipt of this award recognizes the dedication Amtrak has to building a strong security program.

Ticketing Positions Change to Provide Higher Level of Customer Service

Effective May 1, the job title for the current ticket agent positions will be changed to passenger services representatives. The roles and responsibilities of this new position will enable employees to step out of the ticket office and provide personalized assistance to customers and support a broader range of customer services. With the launch of eTicketing expected to be offered system-wide this summer — employees may have fewer tickets to issue and more time to assist passengers.

Passenger service representatives, working along with other station employees, will be available to answer questions, help at Quik-Trak Kiosks, assist with baggage, enforce carry-on baggage policies, help board and detain passengers, watch for safety concerns and perform other functions to help ensure passengers' needs are met. Generally, this new role will allow employees to become more engaged with passengers and look for opportunities to provide customers with a seamless travel experience.

Managers have been meeting with station employees during the month of April to discuss the upcoming responsibilities of the new positions and the importance of delivering excellent customer service.

Accounts Payable Goes Green

Through the use of technology and improved business processes the Accounts Payable group is now offering vendors and customers the option to send invoices via email or Fax2Mail. This allows for an improved level of service for our customers while upholding Amtrak's commitment to the environment.

Current invoices with a valid 10 digit SAP Purchase Order Number can be sent via email to APinvoices@amtrak.com or via Fax2Mail at 215-349-2464 / 2467 / 2813 or 4297. Any questions or payment-status inquiries can be sent to the NEW Accounts Payable email at amtrakAP@amtrak.com

National Train Day Volunteers Needed

Volunteers are needed for the National Train Day events in New York, Philadelphia, Chicago and Los Angeles and other areas around the country. To volunteer or to host a National Train Day event in your area, visit www.TrainDay411.com/volunteer. All Amtrak employees and contractors are eligible to volunteer.

National Prescription Drug Take-Back Day

Amtrak encourages employees to support the Drug Enforcement Administration's fourth National Prescription Drug Take-Back Day on Saturday, April 28. To locate a local community collection site to collect expired, unused and unwanted prescription drugs, call 1-800-882-9539 or visit www.justthinktwice.com or www.GetSmartAboutDrugs.com.

For information on Amtrak's Prescription and Over the Counter Drug Policy, call 215-728-2389 or leave a message on Health Services Drug and Alcohol Program's confidential Employee Hotline at 202-906-2255 or ATS 777-2255.

Employee Appreciation Day to be Celebrated in September 2012

Thank you to all the employees who provided feedback on last year's Employee Appreciation Day. After reviewing your feedback we have concluded that it is beneficial to employees to host Employee Appreciation Day and National Train Day at different times of the year.

Moving the company-wide celebration to September should help alleviate scheduling conflicts and allow employees to participate in both of these important Amtrak events. Look for additional details about this year's Employee Appreciation Day in the weeks to come.

Pass Privileges: Amtrak has recently updated its computerized pass file system to periodically purge all dependent children of Amtrak and freight railroad employees that are no longer eligible for pass travel privileges. Proof of full time student status must be sent to the Pass Bureau every year. The policy regarding dependent children pass privileges can be found on the Amtrak intranet under Library → Policies → Employee Pass Voucher, and Service Award Trip Policies.

2012 PSSA Nomination Forms Now Available Online

Nominations are now being accepted for the 2012 President's Service and Safety Awards (PSSA). The PSSA program provides the highest recognition for employees and external business partners who have made outstanding contributions to the company.

A committee of employees representing various departments and locations review the nominations and select award recipients. Later this year, award recipients will be announced and formally recognized at a luncheon to be held in Washington, D.C.

The nomination period runs through Friday, June 22, 2012. Nominations must be submitted by the deadline in order to be considered. PSSA questions can be directed to 2012PSSA@amtrak.com. Nomination forms are posted on the Intranet and can be found at "Employees" → "Awards and Achievements."

Also, please welcome our new PSSA Co-Chairs, Director Employee Relations Dawn Marcelle and Employee Relations Officer Julia Messick.

Updated Fleet Strategy Plan Issued

Amtrak has issued an updated fleet strategy plan that lays out a strategic approach to replacing aging locomotive and passenger rail cars with the acquisition of new equipment. The plan is derived from an analysis of the company's need to replace its existing fleet, manage capacity to meet the forecasted growth in ridership, while also building to support a vision for dramatically expanded U.S. intercity passenger rail.

The plan includes updated information about the two equipment acquisitions that are currently underway. These acquisitions include 70 new electric locomotives to replace the entire electric locomotive fleet now operating on the Northeast and Keystone Corridors and 130 new single-level long-distance cars consisting of diners, sleepers, baggage and baggage/dormitory cars to replace some of the oldest equipment in the fleet that dates back to the 1940s and 1950s.

There is also an extensive update on the work of the Next Generation Equipment Committee — a partnership between Amtrak, states, the Federal Railroad Administration and industry participants. The committee was established by Congress under Section 305 of the Passenger Rail Investment and Improvement Act of 2008, and has to date generated specifications for new corridor equipment including a multi-level car, a single-level car and a high-speed diesel locomotive. The specifications generated by the committee will be used by Amtrak in the coming round of equipment procurement.

The Fleet Strategy Plan can be found on the Amtrak intranet under News → Fleet Strategy Plan.

National Train Day Contest Winners

Congratulations to the latest winner of this year's National Train Day trivia contest, Greg Lucero, Ticket Agent.

The next question for the National Train Day employee trivia contest is posted on www.TrainDay411.com through May 7. Employees can enter the contest for the opportunity to win prizes.

Also, be sure to sign up online today to volunteer at one of the many National Train Day events held at Amtrak stations.

Reorganization Town Halls on West Coast

Vice President of Operations DJ Stadtler will be in Oakland, Sacramento, Portland and Seattle next week to meet employees and answer questions about the Operations reorganization.

While in Oakland and Seattle, Stadtler will host town hall meetings with employees, explaining the reorganization and answering questions. Those dates and times are:

Oakland Mechanical Facility: Aug. 15 at 10 a.m. and 12:30 p.m.

Oakland Water Street: Aug. 15 at 3 p.m.

Seattle Maintenance Facility: Aug. 17 at 7 a.m., 10 a.m. and noon

New Refund Policy for White Day Employee Pass Travel

A new refund process went into effect on July 1, 2012, for Amtrak personal pass riders obtaining an after-the-fact refund when traveling on a white day and the space in which the pass rider traveled did not sell out. Under eTicketing, riders will no longer receive paper value tickets that include receipt stubs; therefore the former process of an employee fastening the original ticket stubs to an authorization letter issued by Finance and remitting for refund is no longer possible and has been discontinued. If a refund is authorized, it will automatically be processed; the Finance department will send the refund information directly to Amtrak Refunds in Philadelphia. The employee will see either a credit posted to his or her credit card account or a check will arrive in the mail.

Please be mindful that if you have several segments on your trip for which a refund is possible, it is very unlikely that you will receive the entire refund at one time. The refunds are processed segment by segment, and may come at different times. Depending on which trains sold out and which did not, you may get a refund for some (or none) of the segments, and not for others.

If you think you are eligible for a refund for white day pass travel taken before June 30, 2012, please keep your original ticket stubs. Letters will continue to be processed and mailed out for white day pass travel taken June 30, 2012 and before. If you do receive a letter, attach the ticket stubs to the letter and remit as directed.

The new refund process will reduce the time it takes for an employee to receive a refund. For detailed information on the new refund policy, visit the employee intranet → library → policies → employee pass, voucher and service award policy → Amtrak employee personal pass procedures.

Eastern North Carolina Thruway Service Announced

Starting this fall, Amtrak will expand its Thruway Service to Eastern North Carolina, providing more access and destination options to Amtrak passengers.

The newly dedicated Thruway motor coach service will establish two Eastern North Carolina routes, one serving the communities of Greenville, New Bern, Havelock and Morehead City, and a second serving Goldsboro, Kinston, Jacksonville and Wilmington. Each route will connect with the Amtrak *Palmetto* train service at the Amtrak station in Wilson, N.C. The *Palmetto* operates twice daily serving 20 stations between New York and Savannah, Ga., and also provides access to the Amtrak national network serving more than 500 stations in 46 states, the District of Columbia and three Canadian provinces.

Using safe, modern, clean and comfortable intercity motor coach equipment, Amtrak Thruway service provides easy, convenient coordinated train/motor coach connections. Based on successful models in many other states, the Eastern North Carolina expansion will work well to serve these diverse communities and destinations.

The new Thruway service routes will provide service to colleges and universities, major military installations and a number of cities and communities that have limited intercity public transportation options.

The Eastern North Carolina Thruway service supports the **Mobility and Connectivity** goal of growing Amtrak's business through new partnerships, routes and frequencies to increase ridership system wide; one of the fundamental goals of the [Amtrak Vision](#), Amtrak's Strategic Plan for the future.

HCESC Did You Know ...

You don't have to call the HCESC (Human Capital Employee Service Center) to change any of your personal information below:

- Address
- Bank Information
- Tax Withholding
- Emergency Contact

The online Employee Self Service tool available through the Employee Information Portal <https://employee.amtrak.com> allows employees to change the above information as often as necessary. The HCESC cannot make changes to these items over the phone.

Initial Phases Complete for Seattle Maintenance Facility

Last week, Amtrak and its partners celebrated the completion of Phase I and Phase II of the four-phase major upgrade of the Seattle Maintenance Facility. The facilities support Amtrak operations and maintenance agreements in the Pacific Northwest for the *Empire Builder*, *Coast Starlight*, *Amtrak Cascades*, and Sounder commuter trains.

The upgraded and new facilities will dramatically improve the capacity, efficiency and working conditions of the shops that perform inspections, testing and maintenance of locomotives and passenger rail equipment. Modern and efficient in design, the upgraded maintenance facility is an enclosed structure over two tracks. It will be primarily used by Talgo to maintain *Amtrak Cascades* trains, however, Amtrak long-distance and Sounder commuter trains will benefit from this investment.

Work completed includes a new three-story maintenance warehouse and administrative office that replaced functions formerly performed in trailers. The \$37 million project was funded by Amtrak's annual capital program and provided approximately 200 construction jobs. Amtrak has approved \$1.4 million for the complete design of Phases III and IV to include construction plans of a service and inspection building. Phase IV involves construction of a new locomotive servicing and repair building. It is estimated 150 construction jobs will be generated annually during the life of the project, expected to be completed by mid 2015.

HCESC Did You Know ...

The Human Capital Employee Service Center (HCESC) processes all leave of absence and return from leave requests.

- A Leave of Absence form (NRPC 3336) should be submitted for all absences that last more than 5 days and submitted as close to the 6th day as possible.
- Late submission of paperwork could result in the loss of the employee's benefits.

For more information on Amtrak's Leave of Absence Policy, visit the company Intranet → Employees → Human Resources → Policies. For processing inquiries, please call or write the HCESC at 888-694-7372 or HRESC@amtrak.com

Basic Refund Policies Revised

Effective August 12, 2012, Amtrak instituted a new refund policy based on logical trips. A logical trip is a grouping of continuous travel with same-day connections. For example, if a passenger's itinerary is Washington, D.C.-Chicago-Seattle with same-day connections, it is considered one logical trip of continuous travel and is identified as Trip 1 in the PNR. If, after a day or more in Seattle, the passenger continues on to San Diego, the itinerary Seattle-Los Angeles-San Diego would be identified as Trip 2. If after a day or more in San Diego the passenger returned to Washington, D.C., the itinerary San Diego-Los Angeles-Chicago-Washington, D.C., would be identified as Trip 3.

Each logical trip will follow a fare type hierarchy for determining the applicable refund policy. A single fare type refund policy will be applied to the total fare (rail fare and accommodation charges) paid for each logical trip. When there are multiple fare elements existing within a single logical trip, the highest-ranking refund policy will apply to the entire logical trip. The five fair type refund policies are, in order of rank:

- Sleeper
- *Acela* First class/non-*Acela* Business class
- Reserved rail fare
- Advance Purchase rail fare
- Unreserved rail fare

Example: A logical trip contains sleeper travel, reserved coach and unreserved coach. The sleeper refund policy applies to the entire logical trip because it is ranked highest.

In many cases, a 10 percent refund fee applies to all money refunded to the passenger (cash, refund check, or credit card credit). The fee applies when called for by the fare type refund hierarchy and is charged whether or not tickets have actually been printed. If a fee applies, the passenger may elect to receive the total amount due, without fee, in the form of an eVoucher good for travel within a year.

By streamlining the refund process, we support the goal of **financial and organizational excellence**, one of the five fundamental goals of [Amtrak's Strategic Vision](#). For complete refund policy details including when refund fees apply, go to the internal Intranet home page, then click Library → Policies → Reservation and Ticketing Policies → Reserving and Ticketing → Refund Policy.

Research Conducted on Amtrak's Voice Response Unit

"Julie," Amtrak's voice response unit (VRU) system on 1-800-USA-RAIL was activated 10 years ago and much has changed since that time. To understand customers' perception of Julie and to see if customers would favorably view the use of Julie for automated assistance on Amtrak.com, the Market Research department conducted customer research on attitudes and perceptions of this system. Six focus groups of seven to eight respondents each were conducted in two key Amtrak markets (Chicago and New York) to help identify appealing physical/personality characteristics for a possible human emulation tool (HET) assistant on Amtrak.com.

The focus group participants were very complimentary about the efficiency of Amtrak's VRU system, Julie's voice and her upbeat personality. Some described Julie as the "gold standard" of virtual assistants. They often liked some of her interactive phrases such as "Got it" and "Is that right?" which put customers at ease and made Julie seem like she had a real personality. Nearly everyone felt that Julie was a positive fit with the Amtrak brand and said her effectiveness and reliability actually elevated the brand.

The research confirmed that these customers felt strongly that the Julie persona should carryover to Amtrak.com as an online virtual assistant. Customers also stressed the desire for consistency across telephone and online platforms and expect the same name, voice and persona of a virtual assistant to be universal across consumer touch points.

Julie's telephone persona was identified as a characteristic that would meet their key criteria for a future online virtual assistant (e.g., a personality that seems to be professional, upbeat and encouraging). They also believe that Julie's voice, demeanor and personality are likeable, efficient and make the brand seem more efficient, modern and friendly.

The positive results of this market research supports the **Customer Focus** goal to advance customer service quality by responding to the wants, needs and expectations of our customers in order to improve their experience and maximize passenger and partner satisfaction, a key goal of *Amtrak's Strategic Plan*.

Amtrak Fact: "Julie" is named for the actual person whose voice Amtrak uses.

Records Management Email Reminder

Prior to September 1, all business record email messages must be moved into User Directed Archives (UDA) folders. The first deletion of email messages not properly protected is scheduled for September 1. If you have not moved your messages into the proper UDA folders, you are risking the permanent loss of valuable business records.

Online instructions for protection of business record email messages is mandatory and can be found on the Internet at <http://apps.nrpc/training/rimtraining/>. Questions should be directed to the Records Management Office at ATS 777-3215 (202-906-3215).

Payroll Department Supports Green Initiatives

In an effort to support to the [Amtrak Strategic Plan](#) and its company-wide vision for excellence in fiscal management, the Payroll department is pleased to announce a new initiative. Coming soon, direct deposit statements for all non-agreement employees will no longer be printed. This cost-saving initiative, coupled with the desire to be environmentally responsible, will reduce processing, printing and mailing costs.

All Amtrak non-agreement direct deposit employees have 24/7 web-based secured access to the Employee Information Portal which maintains payroll direct deposit statements. The electronic direct deposit statements are currently available for review and can be printed by the employee.

To view and print your most current and prior statements; visit the Employee Information Portal → Benefits → Payments → Salary Statements. For inquiries and assistance, employees may call the Payroll Hotline at 1.866.247.2915.

HCESC Did You Know...

The Human Capital Employee Service Center (HCESC) can provide individual assistance to managers and their delegates in the navigation and completion of Human Capital forms?

Assistance is also available via online tutorials located on the Employee Information portal. To access on-line help, visit the company Intranet → Employee Info → Employees → Employee Information Portal → EIP Help. For processing inquiries, please call or write the HCESC at 888-694-7372 or HRESC@amtrak.com.

Amtrak Police Department - Public Notice

The Amtrak Police Department (APD) is scheduled for an on-site assessment as part of the process to attain the highly valued international accreditation for public safety professional excellence as issued by the Commission on Accreditation for Law Enforcement, Inc. (CALEA).

Agency personnel and members of the general public may offer comments via telephone by calling 1-877-AMTRAK1 (1-877-268-7251) on Tuesday August 21, 2012, from 1:00 p.m. to 4:00 p.m. Telephone comments are limited to 10 minutes and must address the agency's ability to comply with CALEA standards. The standards are available for viewing at the APD Operations Support Unit, 30th Street Station, 2955 Market Street, Philadelphia, PA 19104. Captain Gary Heller, accreditation manager, can be reached at 215-349-6760 or one may submit written comments about the APD's ability to comply with the standards for accreditation to CALEA, 13575 Heathcote Blvd., Suite 320, Gainesville, VA 20155. Interested parties may also view information relative to the standards at <http://www.calea.org/content/resources>.

Employee Pass Travel Enhancements Under the eTicketing Process

Amtrak employees traveling under their employee rail privileges may notice conductors using the eTicketing Mobile Device (eMD) to swipe their employee ID card. All Amtrak employees are issued two cards: an employee ID card and a Rail Travel Privilege Card (RTPC). Employee family members are only issued the RTPC. While the conductor must still manually enter the trip origin and destination, the eMD allows conductors to “swipe” an employee ID card and record the employee’s SAP number, saving the time it takes to enter the information necessary on the manifest when an Amtrak employee flashes a pass. Only **active** Amtrak employees may also show their employee ID cards as an alternative to their Rail Travel Privilege Card.

Amtrak employees and retirees, their spouses and dependents, may continue to ride designated trains that allow flash pass travel on a seat-not-guaranteed basis without a reservation by boarding a train and displaying their valid RTPC to the conductor. Since the Rail Travel Privilege Card cannot be read by an eMD, the conductor will manually enter dependent information for those who are using the flash pass process. Those pass riders traveling on trains that do not allow flash pass travel or that are traveling in business class on any train, must make a reservation from pass rider availability and have either a traditional paper value ticket or an eTicket for that train. This is the beginning of many enhancements to the employee pass rider program under the eTicketing process.

HCESC Did You Know ...

The Human Capital Employee Service Center (HCESC) provides support for internal applicants using the E-recruiting portal.

Some helpful tips to remember include:

- NRPC Form 2001 (Employee Information Form) is available online and allows employees to make changes to their education information.
- Only classes that resulted in qualifications necessary for your position will appear in the qualifications section, i.e. Conductor/Engineer Qualifications.
- Employees **must** check the box that releases their profile for the application to be fully submitted.

For inquiries, please call or write HCESC at 888-694-7372 or HRESC@amtrak.com.

Flu Vaccinations Again Offered to All Employees

Amtrak is again offering flu vaccinations at no charge to all employees as an effort to maintain a healthy work environment. On-site immunization clinics will be set up at approximately 39 major work locations throughout the company beginning in September, or employees may obtain a voucher for a free flu shot at a local healthcare provider.

Dr. Paul McCausland, Amtrak’s Medical Director, indicates that the pandemic flu in 2009 was estimated to infect up to 89 million individuals worldwide. While most cases of the flu were not serious, it is likely that up to 400,000 individuals were hospitalized and as many as 18,300 individuals died, with 900 to 1,900 of these deaths occurring in children less than 18 years old. The flu virus changes each year which is why vaccination is the best way to protect yourself and your family from the flu.

“Approximately 3,000 employees took advantage of the Amtrak flu vaccination program in 2010 and 2011, and we expect more employees will take advantage of the program this year,” said Roy Deitchman, vice president, Environmental Health and Safety.

Dates and times of on-site Amtrak clinics are currently being posted in work locations and are available on the company Intranet. A voucher system will be available for employees unable to use the onsite clinics. All information, along with directions on how to register and to obtain the voucher, can be found on the company Intranet under Safety → Health → Health & Medical Services → Work Site Flu Clinics or Retail Clinics to request a voucher.

Only Amtrak employees are eligible for the on-site immunization clinics and vouchers. Contractors and dependents are not eligible.

Reorganization Town Hall Meetings to be Held in Florida

Vice President of Operations DJ Stadtler will be in Miami and Jacksonville this week to meet employees and answer questions about the Operations reorganization.

While in Florida, Stadtler will host Town Hall meetings with employees, explaining the reorganization and answering questions. The dates and times are:

Miami Station: Aug. 29 from 12:30 p.m. to 1:15 p.m.

Hialeah Preventive Maintenance Facility: Aug. 29 from 2:00 p.m. to 2:45 p.m.

Jacksonville Station: Aug. 30 from 2:30 p.m. to 3:15 p.m.

Polly Hanson Named New Chief of Amtrak Police

Effective December 17, Polly Hanson will be joining Amtrak as our new chief of police. Currently, Ms. Hanson is the director, Office of Law Enforcement and Security, at the U.S Department of Interior where she is a commissioned federal special agent providing policy guidance and oversight of law enforcement, intelligence programs and security. Ms. Hanson spent 27 years with the Metro Transit Police Department in Washington, D.C., rising through the ranks from police officer and served as Metro's chief of police from 2002 to 2007. Subsequent to working at Metro, she worked at the Metropolitan Police Department in Washington, D.C., as executive director, Strategic Services Bureau.

Ms. Hanson's leadership skills and management experience will keep the department moving forward to even higher levels of performance.

Tom Quigley Named General Manager, State-supported Services

Effective December 10, Tom Quigley will be joining Amtrak as our new general manager of state-supported services. In this position, Mr. Quigley will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will be based in Oakland, Calif.

Most recently a vice president at Owens Corning, Mr. Quigley improved performance by \$78 million and reduced waste by \$80 million, while remaining steadfastly committed to safety. His experience crosses a full range of functional areas, including having negotiated three of the largest commercial and marketing agreements in the history of Owens Corning. He will use this experience to bring a total business focus to all the state-supported trains and will work closely with other general managers to lead business planning and implement service improvements and productivity enhancements for state-supported routes.

Bruce Pohlot Named Chief Engineer

Effective December 10, Bruce Pohlot will be joining Amtrak as our new chief engineer. In his new role, Mr. Pohlot will be responsible for all construction and maintenance activities for Amtrak-owned right-of-way including track, bridges, buildings, communications, signals and electric traction, plus he will direct the Engineering department's capital program.

Most recently, Mr. Pohlot served as senior vice president and president of PB Transit & Rail, Inc. His work included the development of the railroad division and providing executive direction, leadership and management to its technical excellence center that has project responsibilities for the planning and design of railroad and transit projects. From 1977 to 1998, Mr. Pohlot was at Amtrak serving in a variety of roles including engineer of programs in New York, assistant division engineer in both New York and Baltimore, division engineer for both the Western and Boston divisions, program director of high-speed rail and assistant vice president, Engineering - program management.

Amtrak Acquires Control of the Hudson Rail Line

Effective December 1, Amtrak assumed control of the Hudson Rail Line from CSX Transportation. The Amtrak territory begins just north of Poughkeepsie (at the point where Metro-North Railroad's control ends) and ends west of Schenectady at Hoffmans, N.Y., where westbound Amtrak trains will continue over CSX Transportation controlled track.

Amtrak will now be responsible for all aspects of railroad operations over the territory including dispatching of trains, maintenance of track, bridges and structures. In addition, this initiative allows for the beginning of significant infrastructure improvement projects funded by the New York State Department of Transportation. Such projects include:

- **Installation of a 4th station track at Albany-Rensselaer Station**
 - This will relieve congestion during peak service hours and permit more trains to enter the station at the same time.
- **Construction of a 2nd mainline track between Albany-Rensselaer and Schenectady**
 - This will permit more than one train to move between those cities and eliminate frequent delays encountered by southbound and northbound/westbound trains on close schedules.
- **Design and installation of a new signal system between Hoffmans and Poughkeepsie**
 - This project will replace old technology and improve the reliability of the signal system which will permit more efficient, multiple train operation especially during inclement weather.

VP of Operations to Visit LA, Chicago Employees

This week DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees in Los Angeles and Chicago. The meetings are open to all employees and will be held at the following times:

- Los Angeles: Dec. 4 at 8 a.m. to 8:45 a.m. at 8th St. Coach Yard lunch room
- Los Angeles: Dec. 4 at 6:30 a.m. to 7:15 a.m. & 1 p.m. to 1:45 p.m. at Union Station's Harvey House
- Chicago: Dec. 6 at 6 a.m. to 6:45 a.m. at the Chicago Maintenance Yard, 14th Street, Room 205
- Chicago: Dec. 6 at 11 a.m. to 11:45 a.m. at Union Station Galleria

Employees are invited to attend the meeting, which includes a brief presentation by Mr. Stadtler followed by a question and answer session.

Amtrak Sponsors

How to Train Your Dragon Live Spectacular

West Coast Amtrak travelers and Amtrak employees can now enjoy a \$10 savings off select performances of "How to Train Your Dragon Live Spectacular," a Dreamworks production playing in Tacoma, Wash., and Fresno, San Jose, Sacramento and Anaheim, Calif. This epic arena spectacle immerses audiences into the magical and mythical world of Vikings and Dragons. The sponsorship promotes four state-supported trains – *San Joaquin*, *Pacific Surfliner*, *Amtrak Cascades*, and *Capitol Corridor Service* in all marketing materials and campaigns. To receive the discount, visit www.ticketmaster.com/amtrak - enter code TRAIN.

Amtrak and CP Partner on Special Holiday Train

In the spirit of the holiday season, this past weekend Amtrak and Canadian Pacific (CP) partnered to coordinate the operation of the 14th annual Toys for Tots holiday train through upstate New York, in conjunction with a 50-year tradition carried on by the U.S. Marine Corps Reserve.

This year, Amtrak donated the equipment that was used to operate two special north and southbound trains as well as the on-board personnel and fuel. These trains made 12 selected station stops in upstate New York, and volunteers from Amtrak, CP and the U.S. military helped distribute 1,000 bundles of toys, coats, hats and other assorted clothing items collected as part of this annual program.

For more information about the Toys for Tots Program, visit www.ToysForTots.org

Amtrak Continues to Grow with Climate Counts

The non-profit organization Climate Counts provides an independent and verifiable assessment of a company's commitment to reduce its impact on the environment and climate change. The group uses 22 specific criteria to produce a scorecard to rate how companies have measured their carbon footprint, reduced their impact on climate change, supported effective climate legislation and publicly disclosed their climate actions in a clear and comprehensive manner. In 2010, Amtrak became a member of the Climate Counts Industry Innovators (i2) program.

Climate Counts' scoring system is based on 100 points. Below are our scores for our efforts over the past three calendar years:

2009: 62
2010: 71
2011: 72

Through our continued efforts in the area of climate change, Amtrak's score has been steadily increasing. Some of these efforts include completing a comprehensive greenhouse gas inventory, application of fuel efficient technologies such as dynamic braking and publicly reporting on Amtrak's sustainability efforts through avenues such as the International Union of Railways (UIC) Sustainability Survey. Amtrak's score has consistently been one of the highest in the transportation sector.

Amtrak Trivia... Named after a woman said to be the first love of Abraham Lincoln; what Amtrak train was consolidated with others and renamed in 2009?

Answer: [Ann Rutledge, which was consolidated with the Kansas City Mule and the St. Louis Mule to form the current Missouri River Runner service.](#)

New Thanksgiving Ridership and Revenue Records Set

This Thanksgiving period, Amtrak ridership and ticket revenue both set records. Amtrak carried a record 737,537 passengers during Thanksgiving 2012, up 1.9 percent over the prior record set in 2011. In addition, November 21, the day before Thanksgiving, was the single busiest day in the history of Amtrak with 140,691 passengers. Ticket revenues were a best ever \$56.1 million, up 8.4 percent versus 2011.

Amtrak recovered quickly from Superstorm Sandy and served the same number of Northeast Corridor holiday passengers as in 2011. This year's nationwide implementation of eTicketing enabled passengers to print their own boarding documents or have their smartphones scanned by Amtrak conductors, reducing lines at ticket windows and Quik-TrakSM kiosks.

Additional passengers were accommodated with extra trains scheduled in the Northeast Corridor, Chicago Hub, Pacific Northwest and in California. In addition, this was the first Thanksgiving for the new extended *Downeaster* service to Freeport and Brunswick, Maine, and for Amtrak Thruway bus service in Eastern North Carolina that provides rail connections for eight communities to the *Palmetto* service.

VIA Rail Canada provided several passenger railcars to help make additional seats available on Northeast Corridor trains and on the Albany – Montreal segment of the *Adirondack* service.

Law Department Receives Award of Recognition for Participation in Corporate Diversity Program

Every year, the Delaware Valley chapter of the Association of Corporate Counsel (DELVACCA) sponsors a Diversity Corporate Summer Internship Program aimed at increasing ethnic and racial diversity within corporate legal departments in the Philadelphia metropolitan area.

This year, our Law department received an award of recognition for the Philadelphia office having participated in the program. Under the program, the Law department provided a legal internship to a rising second-year law student at a local area law school. Full-time summer internships in the program are given to members of minority groups traditionally underrepresented in the legal profession. Through its involvement in the program, the Law department provided its intern with a perspective as to the role and activities of in-house counsel, as well as an understanding of career paths that can lead to an in-house legal position.

Amtrak Honored at First Annual Accessibility Excellence Awards

On December 4, the Dr. Rosalyn Simon Award was given to David J. Nelson, officer, Disability Outreach, at the First Annual Accessibility Excellence Awards hosted by the Department of Access Services and the Accessibility Advisory Committee of the Washington Metropolitan Area Transit Authority (Metro). The award, which will be presented annually, is given to an industry professional serving the disability community.

David has a 22-year tenure with Amtrak, and he is responsible for providing accessibility information to the disability community. David is an active member of the National Association of the Deaf (NAD) and represents NAD on issues concerning telecommunications and transportation. Currently, David is president of the District of Columbia Association of the Deaf and the Florida School for the Deaf Alumni Association. Congratulations David.

Plans Advance to Acquire New High-Speed Train Sets for the Northeast Corridor

In order to better meet strong and increasing ridership demand on the Northeast Corridor (NEC), plans were announced last week to acquire new next-generation high-speed train sets, ending the company's plans to purchase 40 additional high-speed passenger cars to add to the existing *Acela Express* fleet.

In early 2013, a Request for Information (RFI) will be issued to formally start the process that will replace the existing 20 *Acela Express* train sets and add additional train sets to expand seating capacity and provide for more frequent high-speed service on the NEC.

"Moving directly to new high-speed train sets is the best option to create more seating capacity, permit higher speeds, and maximize customer comfort all while improving equipment reliability and reducing operating costs," said President and CEO Joe Boardman.

He explained that the previous plan to add 40 new passenger cars with newer technology to the older *Acela* train sets was a stop-gap measure, posed technical challenges and was determined not to be cost effective as well as insufficient to handle new ridership growth projections.

Amtrak Model Train Circles National Christmas Tree

Through January 1, 2013, visitors to the National Christmas Tree in Washington, D.C., can enjoy watching an Amtrak model train circle the 28-foot evergreen located at President's Park, just south of the White House. This is the third year Amtrak has participated in this national tradition in conjunction with the National Park Service, the National Park Foundation (the official charity of America's national parks) and the National Christmas Tree Railroad.

The Amtrak model train is a G scale (1:22.5) and includes two GE Genesis P42 diesel locomotives, four single-level Amfleet passenger cars, plus a café car. The model represents Amtrak's Midwest corridor service, as well as our *Northeast Regional* service south of Washington, D.C., where the trains operate with this type of equipment.

Diary of a Wimpy Kid: Don't Be A Wimp Rule the Rails Sweepstakes

Amtrak and 20th Century Fox Home Entertainment partnered for the Blu-Ray & DVD release of *Diary of a Wimpy Kid - Dog Days*. *Diary of a Wimpy Kid* is a family-fun DVD featuring Greg Heffley in the popular book series.

The promotion, available through December 31, includes a sweepstakes with a grand prize of an Amtrak Vacations Greenbrier Resort Tour in White Sulphur Springs, W.Va., for a family of four. Counter cards and seatbacks were distributed to over 100 Amtrak stations, while placemats with the Amtrak Children's menu was placed on Long-Distance trains. In addition, banners were placed in strategic NEC stations.

Amtrak Virginia Extends Service to Norfolk

On December 12, Amtrak Virginia's *Northeast Regional* service extended to and from Norfolk, providing a same-seat trip from Norfolk to Richmond, Washington, D.C., Baltimore, Philadelphia and cities north. The new service is the result of a partnership between the Virginia Department of Rail and Public Transportation (DRPT), Amtrak, Norfolk Southern, CSX, and the city of Norfolk, all who worked collaboratively to launch the service 10 months earlier than originally projected.

As part of the extension to Norfolk, the service will stop at the Petersburg station in Ettrick, Va. The round-trip train will bring intercity passenger rail service to Norfolk for the first time since 1977, and will link Norfolk with a same-seat ride to Richmond, Washington, D.C., New York City and cities all along the Eastern seaboard.

The Norfolk train marks the third service expansion launched under the Amtrak Virginia partnership, which introduced state-supported service to/ from Lynchburg in October 2009 and to/ from Richmond in July 2010. Virginia is the 15th state to partner with Amtrak for intercity passenger rail service. Virginia routes had sizable ridership gains in fiscal year 2012 over fiscal year 2011 with increases of 14.1 percent on the Washington-Lynchburg route and 11.9 percent on the Washington-Newport News route.

To kick off the new service on December 11, an inaugural train traveled from Washington, D.C., to Norfolk. Amtrak officials including President and CEO Joe Boardman, Amtrak Chairman Tom Carper and Amtrak board members, Virginia Governor Bob McDonnell, Virginia Transportation Secretary Sean Connaughton, DRPT President Thelma Drake, Norfolk Mayor Paul Fraim, CSX and Norfolk Southern officials along with local-elected Virginia officials participated in greeting well-wishers and gave ceremonial speeches at station stops along the new route.

Enterprise Rent-A-Car and National Car Rental to Become Preferred Amtrak Suppliers

Effective January 1, 2013, Enterprise Rent-A-Car and National Car Rental will join the preferred suppliers list of car rental services to Amtrak employees. Enterprise provides a vast network of 7,000 neighborhood locations in the U.S. In addition, Enterprise offers free pick-up service that allows travelers to receive their vehicle with advance notice. For more information visit www.enterprise.com and use Customer ID XZ16182.

National Car Rental offers Amtrak employees the special services of the Emerald Club, which is the premier counter-bypass program that gives travelers special recognition, service and speed. If you are not enrolled in Emerald Club, visit <https://www.nationalcar.com/offer/XZ16182> for complimentary enrollment.

Amtrak Trivia: The depot at this stop is considered one of the oldest served by Amtrak and is home to the Pennsylvania Railroad Technical and Historical Society.

Answer: [Lewistown, Pa.](http://www.lewistownpa.com) The building opened in 1849 and served as a freight house before conversion to passenger use in 1868.

Operations Update: Amtrak Cascades Train 504, which normally operates between Eugene and Portland, will be cancelled February 8 through February 11. Passengers will be provided motorcoach service at all stations on the route.

Marketing: In celebration of Black History Month, Amtrak is featuring the Great Migration of African Americans exhibit on the MyBlackJourney.com microsite. The exhibit, which was first unveiled at last year's National Train Day event in Philadelphia, chronicles the exodus of thousands of African Americans from the rural South aboard passenger trains to the Northeast and other regions of the country in search of better wages and job opportunities.

Amtrak Continues to Focus On Environmental Performance

Amtrak joins other organizations in achieving Climate Registered™ status, another step in its goal to reduce energy usage, carbon emissions and costs.

Amtrak is a member of The Climate Registry (TCR), a non-profit organization founded to set standards for businesses and governments to calculate, verify, and publicly report their greenhouse gas emissions. As a member, Amtrak has committed to reporting standards for calculating and managing greenhouse gas emissions throughout its system, including those from diesel and electric locomotives, passenger rail cars, maintenance equipment, stations, offices and other facilities.

Measuring its carbon footprint in accordance with TCR's program enables Amtrak to prepare for future regulation, identify inefficiencies and potential for cost savings, and to provide real and meaningful data to customers and shareholders about Amtrak's environmental performance.

"Amtrak reduced carbon emissions from locomotive diesel fuel use between 2003 and 2010 through a series of initiatives taken on by Operations, helping us reach our commitment to the Chicago Climate Exchange," said Roy Deitchman, Vice President of Environmental, Health, and Safety at Amtrak. "With the completion of the 2010 GHG Inventory, we are working to better understand our emission sources."

Approximately 80 percent of Amtrak's 2010 emissions resulted from the operation of rolling stock, which includes diesel and electric locomotives. Through partnerships with organizations like The Climate Registry, Amtrak continues to look for ways to contribute to our nation's environmental health by attracting automobile and airline travelers, while simultaneously exploring options for improving our efficiency and reducing fossil fuel consumption.

For more information, visit www.theclimateregistry.org.

February 13, 2012

Faster Speeds Approved for Michigan Trains

Amtrak and the Michigan Department of Transportation (MDOT) are laying the groundwork to shorten trip times by 10 minutes for trains in Michigan after receiving federal approval to increase maximum speeds of trains in western Michigan and northern Indiana to 110 mph, the first expansion of regional high-speed rail outside of the Northeast Corridor. Trip times will be reduced for some train traveling across Amtrak-owned property once schedule negotiations are complete with host railroads.

The speed increase is another significant step in Amtrak's partnership with MDOT to advance customer service by providing faster service, shorter trip times and making train travel a more convenient option in Michigan. Amtrak began raising speeds on the corridor from 79 mph in 2001, to 90 mph in 2002 and to 95 mph in 2005.

To commemorate this achievement, officials from Amtrak, MDOT, the Federal Railroad Administration and General Electric Transportation Systems will ride aboard a special 110 mph train on Wednesday, Feb. 15, that departs Chicago with stops for special events at New Buffalo and Kalamazoo.

The successful deployment of Incremental Train Control System along this segment sets the stage for the expansion of 110 mph service along a 135-mile rail line that runs from Kalamazoo to near Dearborn, for which the state of Michigan received \$346 million in various federal grants to purchase from Norfolk Southern Railway and upgrade it for faster speeds. Construction to upgrade the Kalamazoo – Dearborn segment is expected to begin in spring 2012.

This project will augment the Amtrak-owned segment of the Michigan line to provide for a total of 232 miles of track capable of traveling at speeds of up to 110 mph. As a result, passenger trip times will be reduced by 30 minutes.

House to Take Action on Bill This Week

This week, the House of Representatives is expected to take up the American Energy and Infrastructure Jobs Act (H.R. 7). The legislation, which authorizes funding for highways and other surface transportation projects, includes a provision that would effectively force Amtrak's Food and Beverage (F & B) service to be contracted out by the Federal Railroad Administration to a private company, while still dedicating federal funds to subsidize whatever F & B loss that private company incurs.

Amtrak has been improving the financial performance of this service, reducing the loss from FY 2006 to FY 2010 by \$25.4 million, and is expected to further reduce it by another 26 percent over the next couple of years.

While Amtrak Government Affairs department employees and others have been working to educate members of Congress about the adverse effects and costly result of this and other provisions, the legislative process is complex and can take many turns.

Food and Beverage service in an Amtrak café or dining car is an essential part of the passenger rail product and the customer experience on most Amtrak routes. Market research shows that Amtrak customers value the service. It's also a priority of Amtrak's state partners, who cover the cost of F & B service on their routes.

Employees should stay focused on providing excellent customer service, reinforcing the important value the F & B service provides our customers. Successful and professional service is the best way Amtrak can prove its value.

Finance: Employees are reminded that any time they are seeking to obtain project funding from grants, they should refer to the Amtrak Policy and Instruction Manual, Section 8.14.0, for guidance. Any employee with a potential grant opportunity or pending grant submission should contact Beverly Thorpe, Senior Director Grants Administration at 202-906-2218 or beverly.thorpe@amtrak.com.

Operations Update: Starting Friday evening, Feb. 17, through 5:00 a.m. Tuesday, Feb. 21, Caltrans will perform extensive construction on the Bay Bridge, closing westbound bridge lanes and cancelling most Thruway Motorcoach service to and from San Francisco.

February 21, 2012

Employee Security Awareness Reminder

Protecting America's Railroad® is a critical role of all Amtrak employees and contractors. Amtrak's Smart ID badge is an important part of the overall Amtrak security program. The badge is issued to every employee and contractor, providing you access to the Amtrak facilities you need to do your job.

40th Anniversary Exhibit Train Continues Tour in the Southeast

The 40th anniversary Exhibit Train is making its way to Miami on Saturday, Feb. 25, where employees and their families are invited aboard as part of a Family Day event at the Miami station. The event will take place from 11:30 a.m. until 4:00 p.m. and includes Exhibit Train tours, a cookout, carnival games and prizes. The Exhibit Train and Family Day activities are open to employees and their families only.

The Exhibit Train will make its next two stops for events open to the general public at Richmond, Va., on March 3 and 4, and Raleigh, N.C., on March 10 and 11.

Volunteers are needed to help support the tour. To participate, email your name, shift preference (8:30 a.m. - 1:30 p.m. or 12:30 p.m. - 5:00 p.m.), the day(s) you would like to volunteer, your email address and phone number to greatamericanstations@amtrak.com.

Please write the words "Volunteer" and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Richmond, Va. For more information on the Exhibit Train, visit www.Amtrak40th.com. Each volunteer will receive a 40th anniversary T-shirt to wear during the event.

Your Amtrak Smart ID badge must be worn above waist level on an outermost garment so that it is easy to identify and read at all times while on Amtrak property. If you see someone at an Amtrak facility not wearing a Smart ID badge, ask them about it. If an individual refuses to cooperate, don't put yourself in danger or in an unsafe position; walk away and notify the Amtrak Police Department immediately. It is also important not to let anyone without a visible Smart ID follow you or "piggyback" behind you through secured gates or doors.

For additional information on the Smart ID badge, please refer to the Amtrak Policy and Instruction Manual (APIM) – Section 3.15.0 Employee Identification Card available on the Amtrak intranet at Library → Policies → Amtrak Policy and Instruction manual (APIM) → 3.0 Operations → Employee Identification Card.

Employees are one of Amtrak's greatest security assets and our best defense against anyone who seeks to bring harm to the railroad. It is important that we all remain vigilant and report that activity to the Amtrak Police Department at 800-331-0008 or 911.

Black History Month Celebrated Across the Country

Black History Month is being observed at stations and facilities across the system. A few examples include activities in the Northeast and Pacific Northwest. In Seattle, a board displayed at the crew base provides employees with a rich collection of local community activities and cultural organizations in the Seattle, Tacoma and Portland areas that celebrate Black History Month and the history of African Americans in the Pacific Northwest.

At Philadelphia's 30th Street Station, a bazaar will be held offering a variety of foods, vendors and exhibits on Friday, February 24, from 10:00 a.m. - 3:00 p.m. in the north waiting room. This event is open to employees and the public.

Activities also include the 15th Annual Black History Celebration program at Washington Union Station on Saturday, February 25, from 11:00 a.m. - 3:00 p.m. for employees and their families only, featuring live entertainment and art displays. Additionally, New York employees and the general public may participate in arts and crafts activities at Penn Station in the main rotunda from February 23 through February 29.

Operations: Due to track work being performed by CSX Transportation, starting today and continuing through March 29, northbound *Silver Star* Train 92 will operate approximately five hours earlier. Additionally, on Mondays through Thursdays, *Palmetto* Trains 89 and 90 will be cancelled and *Carolinian* Trains 79 and 80 will operate between Raleigh and Charlotte only through March 29.

Marketing: In response to customer feedback, Amtrak Vacations has expanded its escorted rail journeys for 2012. Amtrak escorted rail journeys are premium travel packages lead by an experienced escort that allow people to travel in small group tours. The five itineraries, including three brand-new additions, feature national parks, local treasures, in depth experiences and must see destinations. Learn more at AmtrakVacations.com/escorted.

Printer Usage at Work

Employees can make individual contributions toward helping Amtrak meet its goals by changing everyday habits.

If you use a printer at work, you can help the company reach its Environment and Energy, and Financial and Organizational Excellence goals by utilizing Amtrak-provided printing resources wisely. In doing so, you can help reduce costs and support Amtrak's commitment to the environment. The guidelines below are designed to help you choose the most cost-efficient printing option when possible:

To Print or Not to Print?	<ul style="list-style-type: none"> ✓ Consider if a paper copy is necessary ✓ Opt to share documents and files electronically, instead of printing copies ✓ For large meetings, use overhead projectors instead of handouts <ul style="list-style-type: none"> ○ Opt for multiple-per-page handouts instead of full-size PowerPoint slides ○ Print the minimum number of copies required
Black & White or Color?	<ul style="list-style-type: none"> ✓ Print in black and white, unless color is required ✓ Color toner is three to four times the cost of black ✓ Don't forget to set black and white as your default printing option
What's Duplexing?	<ul style="list-style-type: none"> ✓ Printers and PCs should be set to print double-sided (duplex) as default ✓ If you printer doesn't duplex, consider another machine
Which Printer is Best?	<ul style="list-style-type: none"> ✓ Rule of thumb: Bigger copiers and printers are more efficient. When you have the option, choose a large, high throughput machine instead of a smaller desk-top model.

Support Amtrak's green goals by recycling or shredding papers and returning used printer cartridges where applicable. Remember that Amtrak printers should only be used for Amtrak business.

Volunteers Needed: The 40th anniversary Exhibit Train will make its next stops in Texas, Oklahoma and Louisiana in January.

Volunteers are needed to help support the tour at the two stops in Texas on Jan. 7 and 8 at the Fort Worth Intermodal Station, and Jan. 21 and 22 at the Amtrak station in San Antonio.

To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day(s) you would like to volunteer, and your email and phone number to greatamericanstations@amtrak.com. Please write the words “Volunteer” and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Fort Worth, Texas. Visit www.Amtrak40th.com for more information on the Exhibit Train.

Internet Usage at Work

As a reminder, Amtrak’s IT networks, which provide intranet and Internet access, are in place for work-related purposes only. This applies in all cases, including when you are:

- Directly plugged into the LAN
- Using the wireless, Wi-Fi network
- Using Amtrak-issued equipment
- Using your own personal device while connected to the Amtrak network (e.g., smart phone or tablet computer)

Over the past several weeks, there has been an increase in the usage of Amtrak’s IT network to access non-work related streaming media and shopping sites. Usage of these types of sites has a direct and negative impact on overall network performance. In addition, it slows down employee productivity and forces Amtrak to invest in additional network bandwidth.

As a result, Amtrak is blocking access to the following websites over its network, effective immediately:

- Streaming audio sites (e.g., Pandora Radio)
- Streaming video sites (e.g., Hulu and Netflix)
- Sports sites (e.g., ESPN and Yahoo Sports)
- Select shopping sites

Amtrak will continue to monitor personal Internet usage to identify any additional sites that are causing network performance issues.

DID YOU KNOW?

When you go to a website, it costs Amtrak money. Unlike your home Internet access where you likely pay a flat fee for unlimited monthly usage, Amtrak pays based on the amount of bandwidth that is used. So when more people use the network to go to Internet sites Amtrak has to buy more bandwidth from our vendors.

Little things we do every day can add up to some big expenses for the company. To help with this effort, the IT department will be sharing tips about how each of us can help reduce Amtrak’s technology-related costs in upcoming editions of Amtrak This Week.

Operations Update: To provide more convenient schedules along the San Luis Obispo - Los Angeles - San Diego corridor, *Pacific Surfliner* trains will operate according to new schedules, starting today. Additionally, over the Martin Luther King holiday, Northeast Corridor trains will operate according to a holiday schedule on Sunday, Jan. 15 and Monday, Jan 16.

Amtrak's Policy on Use of Portable Electronic Devices in Motor Vehicles

Last week, U.S. Transportation Secretary Ray LaHood announced a final rule specifically prohibiting interstate truck and bus drivers from using hand-held cell phones while operating their vehicles. This rule directly relates to Amtrak's Use of Portable Electronic Devices Policy (3.23.1), which applies to all motor vehicle drivers at Amtrak, including 600 commercial drivers.

While the new Department of Transportation rule regulates the use of hand-held cell phones for commercial drivers, Amtrak's Use of Portable Electronic Devices Policy establishes a standard for the use of Portable Electronic Wireless Devices for all employees while operating motor vehicles on duty. Specifically, Section 7.1 of the Policy titled "Usage of Amtrak Issued Portable Electronic Devices While Operating a Vehicle" states:

Portable electronic devices must not be used while operating company owned vehicles, leased vehicles or personal vehicles when the employee is entitled to compensation under the Business Travel Policy. A portable electronic device can be used after the vehicle is safely stopped. Electronic transmissions can then be initiated or reviewed.

It is imperative that Amtrak employees understand and uphold the Use of Portable Electronic Devices Policy.

The policy can be reviewed in its entirety on the Amtrak intranet under "Library" → "Policies" → "Amtrak Policy and Instruction Manual (APIM)."

President and CEO Boardman Outlines 2012 Agenda

Amtrak is moving forward with an aggressive agenda for 2012 and building for the future while strengthening current services, President and CEO Joe Boardman told a group of reporters last week.

“Amtrak is building the equipment, infrastructure and organization needed to ensure our strong growth continues into the future,” said President and CEO Joe Boardman. “We are investing in projects critical for enhancing the passenger experience, essential for supporting our national network of services and vital for the future of America’s Railroad.”

Boardman described how the current orders for 130 new single-level long-distance equipment and 70 electric locomotives for the Northeast will improve reliability, financial and on-time performance, and help drive increases in ridership and revenue.

In terms of building infrastructure, Boardman discussed work to upgrade Northeast Corridor tracks, bridges and other infrastructure; the further integration and advancement of NEC planning efforts to improve the corridor and to develop a high-capacity, next-generation high-speed rail system, including initial planning work for the Gateway Program to provide additional capacity into Manhattan for intercity, commuter and NextGen HSR services.

Boardman also pointed to the national roll-out of eTicketing to all trains this year and, and the ongoing program to modernize the 30-year-old reservation system as specific ways Amtrak is investing in and improving how we do business.

Among other major achievements accomplished in the past year, Amtrak also made Wi-Fi available to 75 percent of all its passengers; launched an iPhone app; reduced its debt for the eighth consecutive year; and completed a massive renewal and integration of its financial, and procurement and materials management systems.

Speaking about the organizational changes underway, Boardman added, “We need to create an organization and a culture that can manage the ambiguity that comes from the annually changing government support. We will not lose sight of the Amtrak our customers need us to be. We will continue to make the investments that will yield a more efficient and reliable Amtrak.”

40th Anniversary: Amtrak’s 40th anniversary website, www.amtrak40th.com, has been recognized with a distinguished 2011 Silver Davey Award. The Davey Award is the premier award honoring outstanding local, regional, and cable TV commercials and programs, as well as the finest video, film and websites.

5th Annual National Train Day Events Announced

Amtrak has begun making preparations for the 5th Annual National Train Day celebration to be held on Saturday, May 12. This year’s main events will be hosted in New York City, Philadelphia, Chicago and Los Angeles, with other events expected at hundreds of communities nationwide.

In early March, Amtrak will launch its employee-only website, TrainDay411.com, where employees can get the latest information on National Train Day.

More than 350 employees volunteered last year’s celebrations, making it the most successful and memorable event to date with more than 40,000 attendees.

Stay tuned for more details, including the TrainDay411.com announcement and for opportunities to sign up to volunteer in this year’s National Train Day events.

Operations Update: Effective today, schedules for select Northeast Corridor trains will change due to the completion of track and overhead electrical work along the Hell Gate line and to improve the reliability during the winter months on the Springfield line.

Organizational Changes Begun in Three Departments

Organizational changes began on Friday, Jan. 20, in the Human Capital (formerly Human Resources), Finance, and Government Affairs and Corporate Communications departments. Non-agreement personnel changes in those departments have been made to help the company allocate resources and align Amtrak's structure in accordance with the Strategic Plan and financial circumstances.

The realignment will continue through this fiscal year and will result in a reduction in non-agreement positions across all departments. This realignment is incremental, in part to ensure that changes in functions in one area complement other areas of the company.

Norfolk Service Expected To Begin This Year

Amtrak could begin serving Norfolk, Va., as soon as Dec. 31, 2012, about 10 months earlier than originally projected.

The round-trip service will bring intercity passenger rail service to Norfolk for the first time since 1977 and will link Norfolk with Richmond, Washington, D.C., and cities as far north as Boston.

The Norfolk service marks the third service expansion launched under the Amtrak Virginia partnership through the Commonwealth's Virginia Department of Rail and Public Transportation (DRPT). State-supported service to Lynchburg and Richmond began in 2009 and 2010, respectively.

"This service will provide immediate relief to road weary travelers between two of the state's most congested regions" said Governor McDonnell. "This service is long overdue and I congratulate our partners and commend their cooperation in moving up the scheduled start date."

BLET Ratifies Contract

Employees represented by the Brotherhood of Locomotive Engineers and Trainmen have overwhelmingly ratified their new five-year contract. Currently, Amtrak has ratified agreements with 10 labor organizations representing a total of almost 12,500 employees, or about 73 percent of the total unionized labor force at Amtrak. This settlement provides for wage increases and other contract changes similar to earlier settlements.

The remaining unions have already been presented with comprehensive proposals, including wage increases.

Operations Update: Track work being performed by Union Pacific Railroad will affect numerous *Pacific Surfliner* trains north of Los Angeles on select dates starting Feb. 1 through Feb. 19.

Exhibit Train Heads Southeast

The 40th anniversary train continues its year-long journey as it heads to the Southeast after completing a large portion of a cross-country tour. In February, the train will be making one public stop in Mississippi and three stops in Florida, including two public events and one employee-only event.

Since the train's debut at National Train Day it has visited more than 30 communities throughout the country, with nearly 45,000 visitors. Volunteers are needed at the following stops:

- Feb. 4 and 5 Multi-Modal Transportation Center, Meridian, Miss.
- Feb. 11 and 12 Amtrak Station, Jacksonville, Fla.
- Feb. 18 and 19 Tampa Union Station, Tampa, Fla.

To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day(s) you would like to volunteer, and your email and phone number to greatamericanstations@amtrak.com. Please write the words “Volunteer” and your preferred volunteer location in the subject line of the email, e.g. Volunteer, Meridian, Miss.

Amtrak To Submit FY 2013 Grant and Legislative Request

Amtrak's plans for next year advance important capital programs, as the company continues to build for the future. The details of those plans are described in budget documents that will be submitted to Congress on Wednesday. Amtrak will submit its FY 2013 Grant and Legislative Request, along with the FY 2013 Budget and Comprehensive Business Plan; the documents support the goals established in the five-year Strategic Plan.

The request totals \$2.1 billion, comprising \$450 million in operating support, \$1.4 billion for capital programs (not including an additional \$60 million for advancing NextGen High-Speed Rail along the Northeast Corridor), and \$212 million for debt service.

Amtrak is asking for less in operating support in FY 2013 as a result of anticipated increases in revenue and cost controls. Amtrak covers about 85 percent of its operating costs with revenue from a range of sources, relying on the federal government for the remainder. In 1975, the federal subsidy covered 52 percent of operations; the percentage has steadily decreased over the years.

In addition, Amtrak's lower request for funds for debt service reflects the fact that Amtrak has reduced its debt for eight consecutive years.

The request reflects the company's commitment to continuing strategic capital investments that will yield returns as a result of better service reliability, improved customer service and expanded service options. Examples include orders for long-distance equipment and electric locomotives that will begin to be deployed in 2013; infrastructure improvements and advancement of new high-capacity, high-speed service on the Northeast Corridor; tools such as eTicketing and the point-of-sale system to help employees do their jobs better and improve customer service; work to make more stations fully ADA compliant; and achieving speed increases on the Michigan Line and Empire Corridor.

The Grant and Legislative Request and the budget documents will be posted on Wednesday, Feb. 1, on Amtrak.com under “About Amtrak” → “Reports & Documents”, and on the Amtrak intranet, under “News” → “Legislative” → “2012”.

July 2, 2012

A Message from Joe Boardman

Dear Co-workers,

As the July 4 holiday draws near, it is important to remember the service men and women at home and abroad who secure our freedoms and protect this great nation. Their leadership, selflessness and dedication are a source of pride for our country and for our company.

I am proud to say that I am a Vietnam veteran, and I reserve a special place in my heart for holidays like Independence Day. Beyond barbecues and baseball games, this weekend offers us the opportunity to reflect on the sacrifices military families have made to secure our way of life.

Since our inception we've had a close relationship with the armed services, spanning several international conflicts and multiple generations. Amtrak employs more than 1,500 military veterans from all of our nation's armed services and is a member of the Employer Partnership of the Armed Forces program, recruiting at numerous military job fairs across the country. In fact, since January more than 14 percent of our new hires have been veterans.

Throughout our business, the hard work of military veterans, reservists and active military personnel is what truly makes Amtrak an essential part of the American experience.

Today I want to speak directly to my brothers and sisters in arms and say thank you for your service and for feeling Amtrak was worthy of your skills upon your return home. For the families and friends of those who made the ultimate sacrifice, I am humbled by the high price they had to pay for our freedom.

I hope you'll join me in showing appreciation to the Amtrak employees who are currently serving our country around the globe and those that have served in the past.

Thank you for your service.

Sincerely,

A handwritten signature in black ink, appearing to read "Joe Boardman".

Joe Boardman
President and CEO

Amtrak Joins International Rail Community at 8th World Congress on High-Speed Rail

Amtrak will be the signature sponsor at the 8th World Congress on High-Speed Rail (HSR) taking place in Philadelphia on July 11-13. The World Congress, organized by the International Union of Railways (UIC) and the American Public Transportation Association (APTA), is being held for the first time in the United States and is designed to bring together more than 1,000 worldwide leaders to exchange views on the development and achievements of high-speed rail (HSR).

At the World Congress, 15 experts from Amtrak will present technical papers on various issues including funding Northeast Corridor HSR improvements, maintaining and managing HSR infrastructure, using technology to improve the customer experience and creating an equipment fleet strategy plan, among other topics.

Technical tours of Amtrak's maintenance and operation facilities in Wilmington, Del., and Queens, N.Y., will be given and Amtrak will have a booth at the Trade Exhibition with displays featuring *Acela Express* service, the Amtrak vision for the future of the Northeast Corridor and the commercial offerings of the railroad's Mechanical Services department.

A new report issued today by Amtrak summarizes and updates the ongoing planning efforts to expand capacity, reduce trip-times, improve reliability and develop a next generation high-speed rail (NextGen HSR) network on the Northeast Corridor.

For more information about Amtrak participation in the 8th World Congress on High-Speed Rail please visit www.8thWorldCongress.Amtrak.com. Additional information about the conference can be found at www.uic-highspeed2012.com.

Safe-2-Safer: Central Division reaches a Milestone

As we continue to implement the practices of Safe-2-Safer, an important milestone has recently been achieved in the Central Division. Employees in the Central Division, Transportation department participated in the observation process over 1,000 times during the month of May. This is the first time that any regional group has achieved this milestone. This achievement is due to the leadership of facilitator Don Wingler, the efforts of the Steering Committee and more than 75 active observers and the support of the Regional Core Team.

By utilizing Safe-2-Safer, the Central Division is having fewer injuries. To date, there have been 5,698 positive conversations about safety addressing 37,164 specific behaviors that contribute to exposure to risk. The more feedback we have, the easier it is to remember to work safely, and the more opportunities we have to learn about and subsequently address situations that create risk.

The foundation of Safe-2-Safer is based on employing success and guidance feedback to change behavior. Each Safe-2-Safer observer recognizes those behaviors that are done safely to encourage repetition. Observing someone at-risk will lead to a positive conversation about changing to a safe behavior.

Safe-2-Safer, the multiyear risk-reduction approach to safety and security, aims to reduce injuries by creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors. This approach provides an opportunity to develop the skills and utilize the talents of all employees by being leaders in safety as observers, trainers, coaches, steering committee members and facilitators. Every level of the company, starting with Mr. Boardman and the Executive Committee, to supervisors and front line employees is involved. It is not a replacement for current safety and security practices — it's an approach to making them even more effective.

Amtrak Joins International Rail Community at 8th World Congress on High-Speed Rail

Amtrak will be the signature sponsor at the 8th World Congress on High-Speed Rail (HSR) taking place in Philadelphia on July 11-13. The World Congress, organized by the International Union of Railways (UIC) and the American Public Transportation Association (APTA), is being held for the first time in the United States and is designed to bring together more than 1,000 worldwide leaders to exchange views on the development and achievements of high-speed rail (HSR).

At the World Congress, 15 experts from Amtrak will present technical papers on various issues including funding Northeast Corridor HSR improvements, maintaining and managing HSR infrastructure, using technology to improve the customer experience and creating an equipment fleet strategy plan, among other topics.

Every level of the company, starting with Mr. Boardman and the Executive Committee, to supervisors and front line employees is involved. It is not a replacement for current safety and security practices — it's an approach to making them even more effective.

Bloomington-Normal, Ill., Station Dedication

Federal and state officials joined representatives of the town of Normal and Amtrak for a ceremonial station dedication of Uptown Station, the new multimodal transportation center that will serve as a station for Amtrak riders (BNL), motorcoach passengers and local transit buses. Uptown Station was the first TIGER funded project under construction and has been completed on time and on budget.

The new transportation center features retail and municipal office space, a community room and a 380-car parking garage. The building has received a Leadership in Energy & Environmental Design (LEED) Silver certification.

The 68,000 square foot facility has a train platform compliant with the Americans with Disabilities Act and will replace the existing Amtrak station in Normal. This station also serves neighboring Bloomington and is the busiest in downstate Illinois.

Amtrak Downeaster Breaks Ridership Record

The Amtrak *Downeaster* has set another ridership record, completing this fiscal year with 528,292 passengers, the highest in its 10-year history.

The Northern New England Passenger Rail Authority (NNEPRA) reports that the ridership figures for the fiscal year that ended June 30 represents the seventh consecutive year of growth. Ridership grew four percent in the fiscal 2012, and ticket revenue grew by 4.5 percent.

The *Downeaster* makes five daily trips between Portland and Boston. Later this year, two of those daily round-trips will extend northward to Freeport and Brunswick, Maine.

Congratulations to our crews and our partners at NNEPRA for reaching this momentous milestone!

The Amtrak Vision for the Northeast Corridor: 2012 Update Report Released Last Week

The Amtrak Vision for the Northeast Corridor: 2012 Update Report was released on Monday, July 9 leading up to the opening ceremonies of the 8th World Congress on High-Speed Rail which was held for the first time in the United States in Philadelphia, PA.

The updated vision plan outlines our ongoing planning efforts to expand capacity on the Northeast Corridor (NEC) to accommodate more trains operating at faster speeds with significantly reduced trip-times and improved service reliability. The report also features our efforts to move forward with developing next generation high-speed rail.

“The NEC region is America’s economic powerhouse and is facing a severe crisis with an aging and congested multi-modal transportation network that routinely operates at or near capacity in key segments. With an expected 30 percent population increase by 2050, we must move beyond mere preservation and rehabilitation of the current system to a new vision for expanded transportation capacity and growth,” said Amtrak President and CEO Joe Boardman.

Amtrak continues to move forward with our vision for the NEC with dedication, commitment and a collaborative spirit to continue to design and implement the improvements that are necessary to serve both the NEC region and our nation moving forward.

To view *The Amtrak Vision for the Northeast Corridor: 2012 Update Report* please visit the Amtrak intranet under News → Reports.

High-Speed Rail Congress Deemed a Success

The 8th World Congress on High-Speed Rail (HSR) recently held in Philadelphia was considered a huge success for Amtrak. During the four-day Congress for which we were the signature sponsor, we were able to advance our NEC vision and build confidence among stakeholders and potential partners that Amtrak is an organization leading the way for HSR in the Northeast Corridor.

More than 700 delegates attended a welcome reception at Philadelphia's 30th Street Station and had the opportunity to tour a train display at the station. Following the welcome reception, approximately 60 partners and speakers joined Amtrak's Board of Directors and Executive Committee members for a reception held on-board the dome car and catered with dishes prepared by Amtrak food services. Technical tours of Amtrak's maintenance and operation facilities in Wilmington, Del., and Queens, N.Y., were offered. The Amtrak booth at the trade show received very positive feedback and we were commended for the overall knowledge, professionalism and passion of our more than 80 volunteers at all of the events.

To view highlights of the Congress and see President and CEO Joe Boardman talk more about the importance of high speed rail in the U.S., visit our YouTube channel at <http://youtube.com/Amtrak>.

New Leadership Positions Posted for Operations

Last week Operations reorganization efforts continued with the posting of two important leadership positions — Chief Transportation Officer and Chief of Customer Service. The search for the individuals to oversee these multi-million-dollar budgets will involve both an internal and an external search, ensuring the best candidates fill the positions. The Chief Transportation Officer will be responsible for setting, managing and maintaining operating rules and policies to ensure that all train operations meet federal requirements and our business needs. While the Chief of Customer Service will oversee system operations, including CNOC, crew-management services, intermodal connectivity, special trains and food and beverage services. Both positions will report directly to DJ Stadtler, vice president of Operations.

In addition to posting the new positions, Stadtler has also formed a special Transition Team comprised of approximately 20 company veterans to offer feedback and guidance on this reorganization. Employees at a variety of locations across the country will get to see Stadtler present and discuss the reorganization during a series of town hall events this summer.

For more information on the Operations reorganization, please visit the employee Intranet.

eTicketing Now Available on Select Amtrak California Thruway Routes

eTicketing has launched on select *Amtrak California* Thruway buses. Routes included in last week's launch are 18A (Hanford-San Luis Obispo-Santa Maria), 18B (Hanford-Visalia) traveling through the Central Valley and coastal communities, routes 3 (Stockton-Sacramento-Redding/Suisun-Fairfield), 20A (Sacramento-Auburn-Reno) and 20C (Sacramento-South Lake Tahoe) in the Sacramento Valley and foothills of Northern California.

eTicketed travel to or from these California Thruway buses now connects to the *Capitol Corridor*® and *Amtrak California San Joaquin*®, two state-supported California rail corridors. Both of these services launched eTicketing in April.

Converting the entire California Thruway bus system to eTicketing will be undertaken in stages with completion prior to the end of fall. Presently, not all tickets will be eTicket eligible. Paper value tickets will still be issued for a multi-ride ticket (such as a monthly or 10-ride ticket). Passengers will also receive paper value tickets if they are traveling on an excluded route, such as other California Thruway buses, the *Pacific Surfliner* route or are traveling beyond the *Capitol Corridor* or *San Joaquin* services on other Amtrak service. For a complete list, please visit Amtrak.com/eTicketing.

Safe-2-Safer Milestone

Congratulations to the Southwest Region – Desert/Gulf Facilitator Robert Villarreal, his management sponsor Ginger Brown and his observers for being the first Safe-2-Safer Steering Committee to achieve an overall monthly contact rate greater than 1.0. Contact rate is a measure of how often feedback is provided on average to each employee in one month. Frequent peer-to-peer contacts coupled with feedback discussions serve as continuous reminders, stimulating changes from at-risk to safe behavior.

Bloomington-Normal, Ill., Station Dedication

Federal and state officials joined representatives of the town of Normal and Amtrak for a ceremonial station dedication of Uptown Station, the new multimodal transportation center that will serve as a station for Amtrak riders (BNL), motorcoach passengers and local transit buses. Uptown Station was the first TIGER funded project under construction and has been completed on time and on budget.

The new transportation center features retail and municipal office space, a community room and a 380-car parking garage. The building has received a Leadership in Energy & Environmental Design (LEED) Silver certification.

The 68,000 square foot facility has a train platform compliant with the Americans with Disabilities Act and will replace the existing Amtrak station in Normal. This station also serves neighboring Bloomington and is the busiest in downstate Illinois.

Amtrak Downeaster Breaks Ridership Record

The Amtrak *Downeaster* has set another ridership record, completing this fiscal year with 528,292 passengers, the highest in its 10-year history.

The Northern New England Passenger Rail Authority (NNEPRA) reports that the ridership figures for the fiscal year that ended June 30 represents the seventh consecutive year of growth. Ridership grew four percent in the fiscal 2012, and ticket revenue grew by 4.5 percent.

The *Downeaster* makes five daily trips between Portland and Boston. Later this year, two of those daily round-trips will extend northward to Freeport and Brunswick, Maine.

Congratulations to our crews and our partners at NNEPRA for reaching this momentous milestone!

The Amtrak Vision for the Northeast Corridor: 2012 Update Report Released Last Week

The Amtrak Vision for the Northeast Corridor: 2012 Update Report was released on Monday, July 9 leading up to the opening ceremonies of the 8th World Congress on High-Speed Rail which was held for the first time in the United States in Philadelphia, PA.

The updated vision plan outlines our ongoing planning efforts to expand capacity on the Northeast Corridor (NEC) to accommodate more trains operating at faster speeds with significantly reduced trip-times and improved service reliability. The report also features our efforts to move forward with developing next generation high-speed rail.

HRESC at Your Service

The Employee Service Center is now in its second(correct?) full year of service to Amtrak employees. Since its inception the Service Center's mission has been to provide comprehensive support for all Human Capital-related inquiries and transactions.

In an effort to better serve Amtrak employees the HRESC recently conducted an employee satisfaction survey through the Amtrak Market Research & Analysis group. One of the key findings from the survey revealed that many Amtrak employees are not clear on the services that are offered through the Employee Service Center. To better inform employees of where they can turn for their Human Capital needs we will be running a Did You Know? section in Amtrak This Week over the next two months highlighting the various services available to employees through the Employee Service Center.

The Employee Service Center, which is staffed entirely by Amtrak employees, is open from 8 a.m. to 8 p.m. Eastern time, Monday through Friday and can be reached via phone at 888-MY-HRESC (888-772-4357) or via email at HRESC@amtrak.com.

July 30, 2012

Union Station Master Plan Unveiled

Last week, Amtrak announced a Master Plan that offers a visionary and practical approach to revitalize the terminal at Washington Union Station. Developed in coordination with other stakeholders including U.S. Department of Transportation, Union Station Redevelopment Corporation, Virginia Department of Rail and Public Transportation, Virginia Railway Express, Maryland Transit Administration, Washington Metropolitan Area Transit Authority and Akridge, it lays the groundwork for an expanded and greatly improved intermodal station that will increase capacity to accommodate future service expansion, deliver the highest quality passenger experience and provide robust support to local and regional economic growth.

The plan will allow Union Station to expand its capacity to accommodate up to triple the number of passengers and double the number of trains using Union Station over a 15-20 year period. Broken into manageable phases, the Master Plan is estimated to cost between \$6.5 and \$7.5 billion (\$2012) and generate \$14.3 billion (\$2012) in regional economic benefit through direct construction expenditures and other related economic impact.

The heart of the plan is the creation of a new train hall that will welcome passengers to the nation's capital, bring natural light to station spaces and better organize the connections to Amtrak, commuter rail, transit, and other transportation services. New passenger concourses, along with a series of new street entrances, will be seamlessly integrated with the existing station, enabling passengers and visitors to easily access the entire station complex and adjoining neighborhoods while experiencing improved amenities and expanded retail opportunities. The Master Plan matches the quality and vision of the original, iconic Union Station design, while creating a world-class transportation hub and preserving Union Station as an architectural treasure.

Importantly, the plan also makes possible the accommodation of tracks, platforms and concourses to support a new Next Generation High-Speed Rail (NextGen HSR) concourse below the existing station platforms to keep pace with the growth projections and plans outlined in the recently released [The Amtrak Vision for the Northeast Corridor: 2012 Update Report](#). This future lower-level concourse could allow for a potential NextGen HSR extension south of Washington to connect with the proposed Southeast HSR Corridor.

President & CEO Joe Boardman said that, "This plan will transform the station into a world-class transportation hub to serve the region and the mobility needs of generations of passengers yet to come."

In addition, Burnham Place, a 14-acre, 3-million square-foot mixed use development will create a new neighborhood out of thin air in downtown Washington, D.C. Suspended above the existing Union Station rail yard, Burnham Place is still in initial planning stages and includes office space, residential units and hotel rooms.

For more information on the Union Station Master Plan, visit: <http://www.greatamericanstations.com/station-news/WUS-master-plan-unveiled>.

HCESC at Your Service

The Human Capital Employee Service Center (HCESC) is now in its second full year of service to Amtrak employees. Since its inception, the Service Center's mission has been to provide comprehensive support for all Human Capital-related inquiries and transactions.

In an effort to better serve Amtrak employees, the HCESC recently conducted an employee satisfaction survey through the Amtrak Market Research & Analysis group. One of the key findings from the survey revealed that many Amtrak employees are not clear on the services that are offered through the HCESC. To better inform employees of where they can turn for their Human Capital needs, we will be running a Did You Know section in Amtrak This Week over the next two months highlighting the various services available to employees through the HCESC.

The Human Capital Employee Service Center, which is staffed entirely by Amtrak employees, is open from 8 a.m. to 7 p.m. Eastern time, Monday through Thursday and 8 a.m. to 5 p.m. on Fridays and can be reached via phone at 888-694-7372 or email at HRESC@amtrak.com.

Get Operations Reorganization Info Online

Thanks to the help of numerous people across the company, Amtrak is moving forward with the Operations reorganization and improving our focus on financial performance and customer service.

As this process continues for the next 15 months, you'll always be able to find the most up-to-date Operations reorganization information on the employee Intranet. By simply going to News→ATW/Advisories→Operations Business Line Communications, you can access the most recent messages from DJ Stadtler, vice president of Operations, as well as advisories from Transition Team members and eventually links to informational videos about the changes.

In the future, employees will continue to receive regular updates about this transition as well as how they can support the five goals outlined in our Strategic Plan. Thank you for your support as the Operations reorganization moves forward.

PSSA: Nominations are being accepted for the 2012 President's Service and Safety Awards. In order to be considered by the PSSA Committee, nominations must be received by Friday, June 22. Nomination forms are posted on the intranet and can be found at "Employees" → "Awards and Achievements" → "President's Service and Safety Awards."

Amtrak Supports International Level Crossing Awareness Day

International Level Crossing Awareness Day (ILCAD) is Thursday, June 7. On that day, Amtrak will partner with the state of Mississippi to share railroad safety information with passengers at the Meridian, Miss., station.

In 2011, there were 2004 highway-rail grade crossing incidents in the United States, with 265 resulting in fatalities and an additional 427 pedestrian trespass fatalities. Amtrak is dedicated to working with local communities, law enforcement agencies and state and federal officials to eliminate needless injuries and deaths resulting from incidents and railroad crossings.

Employees are encouraged to practice safe behaviors around railroad crossing. To download a railroad safety flyer to post on employee bulletin boards, go to Safety → Safety Resources Library → International Level Crossing Awareness Day on the Intranet.

June 4, 2012

Amtrak Plays an Integral Role in Upcoming High-Speed Rail Congress

As the nation's high-speed rail provider, Amtrak is proud to participate in July's 8th World Congress on High-Speed Rail, taking place in Philadelphia. The Congress, which is being held for the first time in the United States, is designed to bring together more than 1,000 worldwide leaders in the high-speed rail arena.

Participants in the Congress, including Amtrak, will engage in forward thinking discussion about high-speed rail development, operations and technologies as well as current achievements that have been made in high-speed rail. Amtrak is proud to have 15 employees who have been selected from a pool of 500 applicants to participate in the two-day Technical Sessions portion of the Congress presenting on various topics including environmental, infrastructure and rolling stock.

As a signature sponsor for the Congress we will host events at 30th Street Station, Phil. and technical tours of the Wilmington Station, CNOC and CTEC in Wilmington, Del. and Sunnyside Yard in Queens, N.Y. Amtrak will also have a booth at the Trade Exhibition which will be open to Congress attendees and invited guests. The events that we will be hosting throughout the Congress provide Amtrak with a unique opportunity to showcase our operation and our vision for high-speed rail. We believe that our employees will enable us to best tell our story and we will be looking for volunteers to act as Amtrak Ambassadors at the various Congress events. We ask that employees along the Northeast Corridor please consider volunteering their time.

We believe the 8th World Congress and the information and experience shared among Amtrak and other world leaders in high-speed rail will provide us with important tools to advance our high-speed rail vision. As the Congress approaches we will continue to keep employees updated through a variety of channels including more news in upcoming editions of *Amtrak This Week*, a story in *Amtrak Ink* and videos located on YouTube featuring Amtrak participants from the Congress to be posted in early July.

Ink Available This Week

The June issue of *Amtrak Ink* will be available on the Intranet this Friday and reach mailboxes the week of June 11. Inside the issue, you can read about Chief John O'Connor's upcoming retirement, coast to coast stimulus improvements and California's glowing customer service. To suggest stories for future issues of *Ink*, please e-mail Ecom@Amtrak.com

PSSA: Nominations are being accepted for the 2012 President's Service and Safety Awards. In order to be considered by the PSSA Committee, nominations must be received by Friday, June 22. Nomination forms are posted on the intranet and can be found at "Employees" → "Awards and Achievements" → "President's Service and Safety Awards."

Volunteers Needed to Help with 8th World Congress Events

Amtrak is participating as a premier sponsor in the upcoming 8th World Congress on High-Speed Rail in Philadelphia, Pa. July 10-13. We are seeking volunteers to assist as Amtrak Ambassadors with the various events we are hosting/participating in during the congress. Ambassador opportunities are as follows:

July 10

- Welcome Reception/Train Display 4:30 p.m. – 10:30 p.m.
- 30th Street Station Philadelphia

July 11

- Trade Exhibition 9 a.m. – 6 p.m., Pennsylvania Convention Center
- Train Display Noon – 8 p.m., 30th Street Station Philadelphia

July 12

- Trade Exhibition 9 a.m. – 6 p.m., Pennsylvania Convention Center
- Train Display Noon – 8 p.m., 30th Street Station Philadelphia

July 13

- Trade Exhibition 8 a.m. – 3p.m., Pennsylvania Convention Center

We encourage employees along the Northeast Corridor to please consider volunteering their time. If you are interested in volunteering please contact Danelle Hunter at ATS 734-2129 or danelle.hunter@amtrak.com.

Amtrak News Clips Delivered To Your Inbox

Starting today, Amtrak News Clips will be delivered to every employee with an Amtrak email address. This is a convenient way for more employees to follow Amtrak in the news and gain greater awareness and information about the many issues affecting the railroad across the country. Currently, employees can only view same-day news clips on the intranet homepage under "News" → "News Clips" and will still be able to do so. With the direct delivery of news clips by email, employees will have personal access to previously posted clips. The distribution list will be regularly updated so that new employees will be added over time.

The news clips are issued Monday to Friday and typically are distributed by 10 am ET. Importantly, the inclusion of a news item in the report does not constitute an endorsement by Amtrak of the accuracy of the reporting or agreement by Amtrak with any opinions expressed. Another source of Amtrak news that employees can follow, mostly from a stations perspective, is from the Amtrak-sponsored GreatAmericanStations.com public website, which features scrolling Amtrak news headlines and is updated daily.

Battle Creek Station Grand Re-Opening Tomorrow

The city of Battle Creek has completed a \$3.6 million renovation and remodeling of the Battle Creek Intermodal Transportation Center and will host a ribbon-cutting event tomorrow to celebrate the re-opening of the station. The event is open to the public and will be attended by local, state and Amtrak officials, and other invited guests.

Facility upgrades include a new entrance/passenger drop-off area, secure long-term parking lot, improved exterior lighting and landscaping as well as remodeled office space for tenants. The interior was completely remodeled and features free Wi-Fi and a passenger lobby with a vending area that includes café seating. The facility serves Amtrak and Greyhound passengers as well as Amtrak/Indian Trails connecting Thruway Motorcoach service between Battle Creek, East Lansing and Flint. Project funding was provided through the American Recovery and Reinvestment Act (ARRA) of 2009.

PSSA: This is the last week to submit nominations for the 2012 President's Service and Safety Awards. In order to be considered by the PSSA Committee, nominations must be received by Friday, June 22. Nomination forms are posted on the intranet and can be found at "Employees" → "Awards and Achievements" → "President's Service and Safety Awards."

Guide to Archived Milestones in *Ink*

During the time *Amtrak Ink* was out of print, the employee Milestones were posted on the Amtrak intranet. Those Milestones will also be featured in future issues of *Ink* beginning with the most-senior January anniversaries until all missed Milestones have been recognized in print.

Please check the magazine each month for the January 2012 to April 2012 Milestones. Below is a guide to when each Milestone will run. This list is subject to change according to space allotted in the magazine.

- **July 2012 Issue:** January 35-year anniversaries & December retirees
- **Aug./Sept. 2012:** January 20-, 25-, 30 and 35-year anniversaries
- **October 2012:** February 35-year anniversaries & January retirees
- **November 2012:** February 20-, 25 and 30-year anniversaries
- **December 2012/January 2013:** March 2012 35-year anniversaries & February retirees
- **February 2013:** March 2012 20-, 25 and 30-year anniversaries
- **March 2013:** April 2012 35-year anniversaries & March retirees
- **April 2013:** April 2012 20-, 25 and 30-year anniversaries

Changes to Medical Leave of Absence (MLOA) Process

Recent changes have been made to the medical leave of absence (MLOA) process, and to the National Railroad Passenger Corporation (NRPC) Form 2717, Treating Physician Medical Status Report/Statement of Disability. The changes to the MLOA process were made to simplify the documentation required when employees are returning to work from a medical leave of absence from six to nine days.

- When you are ready to return to work after being absent six days or more for medical reasons, you must be cleared to return to work by your physician/health care provider.
- If you have been absent six to nine days, and released to full duty, a physician/healthcare provider's note will be accepted in order to return to work.
- For absences of 10 days or more, your physician/healthcare provider must complete Form 2717, including the "Returning to Work Status" section.

NRPC Form 2717 has also been revised to require the employee and the healthcare provider to certify the truth and accuracy of the reported information. Complete details are available on the intranet under "Employees" → "Employee Info" → "Health and Medical Services." Form 2717 can be found on the intranet under "Library" → "Forms". Employees should destroy any old versions of the form and only use the new version.

Message to Photographers: Stay Safe and Stay Away from Railroad Tracks

During this busy summer season of weddings and other festive events, Amtrak and Operation Lifesaver — the rail safety education nonprofit organization — would like to remind our employees and professional photographers to avoid using train tracks as venues for photo shoots.

Using train tracks as a backdrop for portraits is not only dangerous, it is illegal when you are trespassing on private railroad property. About every three hours in the U.S., a person or vehicle is struck by a train, and these collisions can have deadly consequences. Amtrak and Operation Lifesaver are committed to eliminating needless injuries and deaths resulting from incidents at railroad crossings. To view an Operation Lifesaver presentation for photographers on the intranet, go to "Safety" → "Operation Lifesaver".

A Tribute to the Employees on *California Zephyr* Train 5

On June 24, 2011, a semi tractor-trailer struck westbound *California Zephyr* Train 5 in Churchill County, Nev., approximately 70 miles east of Reno, resulting in a tragic incident that claimed the lives of one crew member and several passengers. Amtrak veteran Conductor Laurette Lee was among those who died and is being remembered and missed by those who knew her well and by the entire Amtrak family. We continue to mourn the loss of all those who lost their lives that day.

One year later, we also remember and thank those employees aboard the *California Zephyr* for their heroic actions as they came to the aid of passengers and fellow employees. Their passion and resilience to move others out of harm's way is not forgotten as we reflect on this incident. Their response was extraordinary in a time of crisis and reminds us of the passion they possess for what they do, everyday, for the railroad.

Community Celebrates Station Opening in Lincoln, Neb.

At 11:00 p.m. tonight, the city of Lincoln, Neb., will open a nearly 3,000-square-foot station for *California Zephyr* passengers. The new facility will be located at 510 N Street, just a few blocks west of the current station. To celebrate the opening, Amtrak and local officials, along with members of the community, will gather at the station on Thursday, June 28, for a ribbon-cutting event hosted by the city of Lincoln.

Designed by the local firm of Sinclair Hille Architects, the \$1.3 million project consists of the station and an 800-foot-long metal platform canopy that will protect travelers from inclement weather. This new building also includes a passenger waiting room, ADA-compliant ticket counter and restrooms, and crew base space.

Lincoln is the second-busiest station in Nebraska, serving 11,756 passengers in FY11. Originally known as Lancaster, Lincoln was founded in 1856. It was renamed after the assassination of President Lincoln and became the state capital when Nebraska was admitted to the Union in 1867.

Dear Co-workers,

Being prepared to manage an emergency is a critical element of our operation. Many of our employees are experts in various aspects of emergency management and stand ready to respond at a moment's notice, and I appreciate their dedication.

One of the things we have learned from the emergency response tabletop exercises we have conducted so far this year is that there seems to be differing definitions and expectations of the roles Go Teams play across the company. As a result, we need to provide employees with the structure and tools they need, so that together, we are applying a uniform and coordinated approach to the Go Team concept.

For those of you not familiar with the concept, the Go Team label is used by several departments to indicate skilled troubleshooters that respond to emergencies, such as the Mechanical Go Team, Engineering Go Team and Family Assistance Center Go Team. When a major incident occurs, Managers from Operations, EAP, Contact Centers, Claims, Media Relations and other departments, deploy to their respective teams and are often on call 24/7, handling those responsibilities in addition to their regular job functions.

Based on employee feedback from the tabletop exercises, we are in the process of defining and clarifying the structure of the Go Team, and in particular, formalizing the structure of the Family Assistance Center Go Team. I have directed Chief Operations Administrator Susan Reinertson, who has been managing the Recovery and Resilience Exercise Program and Continuity of Operations, to lead the coordination of all departments to formalize a structure for response teams. This includes procedures for training, exercising and activation in order to respond appropriately and efficiently to an incident that requires such.

Making these improvements are in sync with a number of the goals outlined in the Strategic Plan — Safety and Security, Customer Focus, and Financial and Organizational Excellence — and is another step we're taking to improve Amtrak for its employees and its customers. A more coordinated approach will ensure that Amtrak is prepared to act in the best interests of survivors and victims' families.

Please lend your support to Susan and others who may call upon you for assistance as we work together as efficiently as possible to respond appropriately to emergencies. Thank you for your support.

Joe Boardman
President and CEO

Message From Joe Boardman

Dear Co-workers,

Being prepared to manage an emergency is a critical element of our operation. Many of our employees are experts in various aspects of emergency management and stand ready to respond at a moment's notice, and I appreciate their dedication.

One of the things we have learned from the Recovery and Resilience Program we have conducted so far this year is that there seems to be differing definitions and expectations of the roles Go Teams play across the company. As a result, we need to provide employees with the structure and tools they need, so that together, we are applying a uniform and coordinated approach to the Go Team concept.

For those of you not familiar with the concept, the Go Team label is used by several departments to indicate skilled troubleshooters that respond to emergencies, such as the Mechanical Go Team, Engineering Go Team and Family Assistance Center Go Team. When a major incident occurs, Managers from Operations, EAP, Contact Centers, Claims, Media Relations and other departments, deploy to their respective teams and are often on call 24/7, handling those responsibilities in addition to their regular job functions.

Based on employee feedback from the tabletop exercises, we are in the process of defining and clarifying the structure of the Go Team, and in particular, formalizing the structure of the Family Assistance Center Go Team. I have directed Chief Operations Administrator Susan Reinertson, who has been managing the Recovery and Resilience Exercise Program and Continuity of Operations, to lead the coordination of all departments to formalize a structure for response teams. This includes procedures for training, exercising and activation in order to respond appropriately and efficiently to an incident that requires such.

Making these improvements are in sync with a number of the goals outlined in the Strategic Plan — Safety and Security, Customer Focus, and Financial and Organizational Excellence — and is another step we're taking to improve Amtrak for its employees and its customers. A more coordinated approach will ensure that Amtrak is prepared to act in the best interests of survivors and victims' families.

Please lend your support to Susan and others who may call upon you for assistance as we work together as efficiently as possible to respond appropriately to emergencies. Thank you for your support.

President and CEO

Operations: Amtrak Cascades Trains 510 and 517, which normally serve stations between Seattle and Vancouver, B.C., will be canceled on Mondays only, starting today through April 16, due to track work being performed by BNSF Railway.

40th Anniversary: Amtrak, The First 40 Years, has won a Gold Telly Award. This marks the fourth award the DVD has won. The Telly Award honors outstanding local, regional, and cable television commercials and programs, as well as the finest video and film productions, and work created for the web. The DVD's trailer has also reached more than 50,000 views on Amtrak's YouTube channel located at www.youtube.com/Amtrak.

Enhanced Employee-Only National Train Day Site: TrainDay411.com Set to Launch

This year, Amtrak will host the fifth annual National Train Day on May 12 with events across the country celebrating trains. Last year, more than 350 employees volunteered their time to make National Train Day a memorable experience for more than 40,000 attendees. With the continued help of employee volunteers, we are hoping to make this year's celebration the most successful yet!

Log onto TrainDay411.com later this week from your mobile phone, tablet or desktop. This enhanced site will serve as a resource for employees leading up to May 12, and will offer employees the opportunity to sign up online to volunteer at one of the four major National Train Day events in New York City, Philadelphia, Los Angeles and Chicago, as well as more than twenty-five additional Amtrak-hosted grassroots events across the country. Volunteers will receive a National Train Day shirt for volunteering at an event.

Additional features on TrainDay411.com will include an Inside Perspectives photo gallery that allows employees to submit photos to share train travel from their point of view; an Employee Spotlight section that highlights past National Train Day volunteers; and an updated Trivia Challenge section where employees will have the opportunity to win exclusive prizes. Check out www.TrainDay411.com later this week and visit often to get the latest updates.

MARC Train Service Sees On-time Performance Improvement

The Maryland Transit Administration's (MTA) MARC Train service announced that they recorded some of the best on-time performance (OTP) numbers ever during the month of February. The Penn Line, which is operated by Amtrak and is MARC's busiest line, saw the largest improvement in service with customers experiencing an OTP of 97 percent for the month of February and a 96 percent OTP number year-to-date. Congratulations to the Amtrak employees who have played a role in the noted success of our MARC commuter services.

Conductors to Begin Scanning eTickets on *City of New Orleans* Service

In the next step towards the rollout of a nationwide eTicketing system, conductors on the *City of New Orleans* have begun scanning eTickets using handheld mobile devices today, Monday, March 19.

With the continued rollout of eTicketing throughout the system, Amtrak is providing passengers with extended travel flexibility. Passengers no longer have to pick up their tickets at a station, and they do not have to worry about keeping up with paper tickets that would have to be repurchased if lost. Additionally, they can more easily make changes to their trip itineraries while on the go.

eTicketing offers new efficiencies for the company and crews, including access to real-time passenger manifests and a large reduction in paper usage. These enhancements will enable Amtrak to better manage capacity and revenue.

To continue the advancement of the rollout, the eTicketing team is working with the Transportation department to train nearly 1,700 conductors in the field. During the training period, conductors scan paper value tickets with the new eTicketing device but continue to punch and collect tickets. The scanning process provides Amtrak conductors with the opportunity to become familiar with the new system while also allowing Amtrak to further test the system ahead of the switch to eTicketing.

The eTicketing pilot was successfully launched on the *Downeaster* in November 2011, with the *City of New Orleans* being the latest route to join the pilot program. The rollout will continue on the *Capitol Corridor* and *San Joaquin* in April 2012, with nationwide adoption slated for this summer.

40th Anniversary Exhibit Train

Volunteers Needed: The 40th Anniversary Exhibit Train will make its next two stops at Charleston, S.C., on March 24 and 25 and Wilmington, Del., on March 31 and April 1.

Volunteers are needed to help support the tour. To participate, email your name, shift preference (8:30 a.m. – 1:30 p.m. or 12:30 p.m. – 5:00 p.m.), the day(s) you would like to volunteer, email address and phone number to greatamericanstations@amtrak.com. Please write the words “Volunteer” and your preferred volunteer location in the subject line of the email, e.g. Volunteer-Charleston, S.C.

Visit www.Amtrak40th.com for more information on the Exhibit Train. Each volunteer will receive a 40th anniversary t-shirt to wear during the event.

New Schedule for *Sunset Limited* to Benefit Passengers and Financial Performance

A new schedule for the Amtrak *Sunset Limited* is planned to take effect May 7 that will change the days of the westbound operations and provide better connections for passengers traveling to and through California. The changes are expected to increase both ridership and revenue, while reducing crew layover costs.

The new schedule will provide better connections between the *Sunset Limited*, *Coast Starlight*, *Texas Eagle* and Amtrak corridor services in California. Increases in ridership and revenue are also expected for these trains.

Engineering: Amtrak is reaching a significant milestone in its efforts to replace the existing 104-year old Niantic River Bridge in East Lyme, Conn., with the float-in of the new bascule lift span. As a result, access to the channel beneath the structure will be closed to the maritime community beginning today through Friday, March 30, to allow for the safe movement of construction equipment. Amtrak does not anticipate any significant impact to its rail operations during this time.

Operations Update: Starting today, *Wolverine* Trains 350 and 355 will not operate between Dearborn and Pontiac, due to speed restrictions imposed by Norfolk Southern Railway (NS). Additionally, select *Wolverine* and *Blue Water* trains will operate on adjusted schedules. These changes are expected to continue for the next few weeks until NS completes repairs to restore normal track speeds.

Amtrak Information Cannot Be Used to Open Employee Bank Accounts

A small number of employees have opened bank accounts for employee sponsored functions and/or committees using Amtrak information. Company policy prohibits the use of the Amtrak name, address, or tax identification number for non-company owned bank accounts. Amtrak must ask that any bank account opened for employee sponsored functions utilizing Amtrak information be closed and reopened under ownership of the respective employee group without use of Amtrak information.

The Amtrak Treasurers department will assist any employee group or person with opening new bank accounts under their ownership. Keith Warchol, Senior Treasury Associate Bank Administration, is available to assist and can be reached at (202) 906-3374 (ATS 777-3374).

Participate in the National Train Day Trivia Challenge

The National Train Day employee trivia contest is open at www.TrainDay411.com. Employees can enter the contest for the opportunity to win prizes. Also, be sure to check out the Employee Spotlight section featuring past National Train Day volunteers and submit your photos to the Inside Perspective photo gallery. Sign up online today to volunteer at one of the many National Train Day events held at Amtrak stations.

Operations Update: Due to Norfolk Southern track work, *Piedmont* Trains 74 and 75 will be cancelled and the *Carolinian* will not operate south of Raleigh on May 8-10 and May 15-17. Alternate transportation will not be provided. Additionally, northbound *Silver Star* passengers will be provided motorcoach service at select North Carolina stations.

OBS Training Workshop

The Employee Development department in partnership with Passenger Services continues the roll-out of their new, innovative OBS On-the-Job Trainer Workshop.

This workshop for experienced OBS employees focuses on the skills and knowledge needed to provide new-hire OBS employees productive training trips.

The class also features a training video with television star Hugh Laurie from the hit TV show *House*. Workshops are being held in Los Angeles this week and next week the program will expand to OBS crew bases in New York, Washington, and Lorton.

Join Amtrak for This Year's National Train Day Celebration

This Saturday, May 12 we will celebrate the fifth annual National Train Day with events in New York City, Philadelphia, Chicago and Los Angeles. We still need employee volunteers at the four events to ensure that things run smoothly. Employees can log onto TrainDay411.com from their mobile phone, tablet or desktop computer to sign up to volunteer.

Every year the dedication, loyalty and pride demonstrated by Amtrak employees is what makes National Train Day a success and this year is no different. We hope to make this year's National Train Day the most successful to date as we celebrate the country's love for trains by hosting nearly 40,000 attendees at events across the country.

We look forward to celebrating with our employees and making the fifth annual National Train Day a success!

Conductors to Begin Scanning eTickets on *Heartland Flyer*

In the next step toward a nationwide eTicketing system, starting today Amtrak has begun piloting eTicketing on the *Heartland Flyer*, which operates daily in Oklahoma and Texas.

Conversion to eTicketing is a significant benefit to *Heartland Flyer* passengers, since on-site provision of a traditional paper ticket at an Amtrak ticket office has only been possible on this route at the Fort Worth station and at the Quik-Trak™ kiosks. Conductors will begin scanning "print anywhere" eTickets for one-way and roundtrip travel only. Passengers with more complicated bookings will continue to receive traditional paper value tickets.

Centralized Electrification & Traffic Control Moves to CNOC

After operating out of 30th Street Station, Philadelphia for more than 25 years, the Mid-Atlantic Centralized Electrification & Traffic Control (CETC) function has moved to the new dispatching center in CNOC. The move to the new CETC Theatre at CNOC provides CETC personnel with access to a state-of-the art computerized dispatching system with enhanced operating and safety features and computerized radio systems.

40th Anniversary Exhibit Train Tour Comes to a Close at National Train Day

Employees, retirees, and train enthusiasts received a last opportunity to view the Amtrak 40th anniversary Exhibit Train this past weekend, at National Train Day in New York City, as its year-long journey came to a close. Throughout the tour, the Exhibit Train stopped in 45 locations across the country and welcomed nearly 85,000 visitors, allowing for a look back at our organization's rich history and a glimpse into the future.

The Exhibit Train visited communities large and small, providing Amtrak with the opportunity to strengthen existing partnerships while also forging new relationships. We received support from local and state governments, transit authorities, rail-advocacy groups, and tourism affiliations. The Exhibit Train helped us showcase the vital role intercity passenger rail plays in the communities we serve.

The responses we have received from those who visited the Exhibit Train have been overwhelming. Employees reminisced over the uniforms they once wore, equipment they once rode and commercials they once watched. Current and future passengers enjoyed exploring the uniqueness of train travel and learning about the many places they can travel aboard an Amtrak train.

A national tour like this could not have taken place without the combined efforts of many individuals. More than 525 volunteers, representing outside organizations and Amtrak departments, assisted at various locations as the train traveled coast to coast.

The pride and enthusiasm brought by the individuals and departments that volunteered throughout the year-long journey are what helped to make the Amtrak 40th anniversary Exhibit Train tour a success. Thank you to all that participated – we hope you enjoyed the journey.

Dear Co-workers,

I wanted to extend a heartfelt thank you to everyone who worked on and volunteered at our four major station events, as well as the almost 200 grassroots events that took place across the country. In today's USA Today, there's an article titled "*Ten great places to celebrate National Train Day*," that provides a great description of some of our smaller markets.

The preliminary numbers for the four major events are in and it looks like we welcomed more than 61,000 train enthusiasts to National Train Day this year. Of these, we were able to accommodate about 19,000 individuals through the equipment displays. Year after year, it is the dedication, loyalty and pride demonstrated by Amtrak employees that makes National Train Day a success. Your hard work, once again, helped make the day a memorable one for the thousands who attended.

In Los Angeles, a high-level Chinese delegation presented Amtrak with a bronze sculpture honoring the Chinese contribution to building the transcontinental railroad. In Chicago, Hill Harper (star of CSI-NY) talked about his enjoyment of train travel by relating his trip on the *Southwest Chief*. Rosario Dawson, our national spokesperson, hosted a select group of partners at a pre-National Train Day event educating them on the future of Moynihan Station. And in our first ever NTD event at Grand Central Terminal in New York, we had more than 24,000 attendees.

I'd also like to thank Amtrak's Executive Committee and Board of Directors for their support and active participation in our best National Train Day ever. There is truly a sense of employee pride that is felt and exhibited by all of us on this special day. For those who were unable to attend this year's celebration make sure to check out National Train Day's Facebook page (facebook.com/NationalTrainDay) for pictures from the four major events.

Sincerely,

Emmett Fremaux
Vice President, Marketing and Product Development

Amtrak Officer of the Year

Investigator George W. Gernon will be honored as the Amtrak Police Department's Officer of the Year for 2011 during National Police Week (May 13-19).

Investigator Gernon is receiving this prestigious award for his numerous and significant contributions to the Amtrak community. He has served the Amtrak Police Department for nearly 10 years, and is assigned as an Investigator in the New York Division.

40th Anniversary: Amtrak: The First 40 Years, the documentary created to describe Amtrak's past, present and future in honor of our 40th anniversary, has won its fifth national video award. The documentary received an Award of Excellence, the highest honor given by the Communicator Awards.

Cell Phone Policy: As a reminder to all Amtrak employees, while on duty, you are prohibited from using personal portable electronic devices to conduct personal business. Those devices can only be used during authorized breaks and meal periods. Employees with railroad-supplied devices can use them as necessary to respond to an emergency situation involving Amtrak operations. To view the entire cell phone policy, visit the Intranet under -> Library -> Policies -> Amtrak Policy and Instruction Manual -> 3.0 Operations -> Section 3.23.1 Use of Portable Electronic Devices.

Dear Co-workers,

Since the launch of Safe-2-Safer more than three years ago, we have seen positive impacts to safety, security and our culture at Amtrak. We are in a much better place today than we were in 2009, and for that you should all be proud.

Amtrak is firmly committed to the Safe-2-Safer process that now involves nearly all of our employees system-wide. In order to continue to properly support the implementation of Safe-2-Safer we have extended our partnership with Behavioral Science Technology (BST) for two additional years.

In the coming years, with support from BST, we are going to continue to provide our employees with the same high-quality coaching and training that has made the implementation of Safe-2-Safer a success. We will provide additional management training with a continued focus on the leadership behaviors that move us toward our goals.

You can expect to see increased numbers of observations with feedback, primarily to recognize and thank you for the many safe behaviors you use every day, and to help us all understand how we can avoid putting ourselves or our customers at risk. You can also expect to see the continued elimination of barriers to safe performance, enabling collaboration as we look for opportunities to make Amtrak a safer and more secure place to work.

I want to assure you that I am fully committed to Safe-2-Safer and believe wholeheartedly in the importance of continuing to improve our safety culture here at Amtrak. Together as an organization along with the help of BST, we are pursuing safety excellence; we are demonstrating every day that safety is a core value at Amtrak. I am asking all of you to continue to do your part to make Safe-2-Safer a way of life for Amtrak.

Thank you for your support.

Sincerely,

A handwritten signature in black ink, which appears to read 'Joe Boardman', is positioned above the printed name and title.

Joe Boardman
President and CEO

40th Anniversary: Amtrak: The First 40 Years, the documentary created to describe Amtrak's past, present and future in honor of our 40th anniversary, has won its fifth national video award. The documentary received an Award of Excellence, the highest honor given by the Communicator Awards.

Cell Phone Policy

The earlier personal electronic devices policy that was included in Amtrak This Week was incorrect. Amtrak Operations employees are prohibited from using personal portable electronic devices to conduct personal business on trains. Those devices can only be used during authorized breaks and meal periods. Operations employees with personal or railroad-supplied devices can use them as necessary to respond to an emergency situation involving Amtrak operations.

For employees not on trains, Amtrak-issued wireless devices are to be used for company business only, with the exception of incidental personal use.

To view the entire cell phone policy, visit the Intranet under -> Library -> Policies -> Amtrak Policy and Instruction Manual -> 3.0 Operations -> Sections 3.23.1 and 8.34.1.

Dear Co-workers,

Since the launch of Safe-2-Safer more than three years ago, we have seen positive impacts to safety, security and our culture at Amtrak. We are in a much better place today than we were in 2009, and for that you should all be proud.

Amtrak is firmly committed to the Safe-2-Safer process that now involves nearly all of our employees system-wide. In order to continue to properly support the implementation of Safe-2-Safer we have extended our partnership with Behavioral Science Technology (BST) for two additional years.

In the coming years, with support from BST, we are going to continue to provide our employees with the same high-quality coaching and training that has made the implementation of Safe-2-Safer a success. We will provide additional management training with a continued focus on the leadership behaviors that move us toward our goals.

You can expect to see increased numbers of observations with feedback, primarily to recognize and thank you for the many safe behaviors you use every day, and to help us all understand how we can avoid putting ourselves or our customers at risk. You can also expect to see the continued elimination of barriers to safe performance, enabling collaboration as we look for opportunities to make Amtrak a safer and more secure place to work.

I want to assure you that I am fully committed to Safe-2-Safer and believe wholeheartedly in the importance of continuing to improve our safety culture here at Amtrak. Together as an organization along with the help of BST, we are pursuing safety excellence; we are demonstrating every day that safety is a core value at Amtrak. I am asking all of you to continue to do your part to make Safe-2-Safer a way of life for Amtrak.

Thank you for your support.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Joe Boardman'.

Joe Boardman
President and CEO

Benefits: Amtrak is pleased to announce a new Wellness Coaching program. Through the program provided by United Healthcare, you can partner with an experienced coach over the phone to build a personalized wellness plan. Amtrak agreement employees who are enrolled in United Healthcare's medical plans have access to the Wellness Coaching program at no additional cost. The Wellness Coaching program can be accessed by phone at (800) 478-1057 Monday – Thursday 8 am. – 11 pm. ET, Friday 8 am. – 8 pm. ET and Saturday 9 am. – 5:30 pm. ET.

Amtrak Ink is Back!

Amtrak Ink, a publication for and by Amtrak employees, is returning. There was a brief break in the publication cycle as we moved to a new, more efficient printer and reorganized the content to make it easier for you to learn about all the inspiring developments Amtrak has going on across the country.

The Corporate Communications team also used that time to think of more creative ways to provide *Ink* stories to readers. Amtrak employees will get to see the newest edition of *Ink* when it arrives in their mailboxes next month.

The publication is resuming its normal monthly schedule in June, and Corporate Communications welcomes your feedback on the changes. Please e-mail EComm@Amtrak.com if you have news to share in *Ink* or feedback on the changes.

PSSA Nomination Period is Underway

Nominations are being accepted for the 2012 President's Service and Safety Awards (PSSA). If you have not done so, take a look at the new nomination forms, which have been updated to align with the five goals of our Strategic Plan — to advance Safety and Security, Customer Focus, Mobility and Connectivity, Environment and Energy, and Financial and Organizational Excellence.

The nomination period runs through **Friday, June 22** and will not be extended beyond that date. Nominations must be submitted by the deadline in order to be considered, and incomplete forms will not be accepted. Also, we suggest that you start working on your nomination forms as soon as possible because the information required for the new 2012 forms is different from that of previous years so you may need more time to complete the forms.

Following the nomination deadline, PSSA committee members may reach out to you for assistance as they research nominations. The committee is comprised of agreement and non-agreement employees from all departments. Please support them as they work diligently to select this year's award recipients. The winners will be honored later this year at a ceremony in Washington, D.C.

Nomination forms along with contact information for employees who are available to answer PSSA questions are posted on the intranet and can be found at "Employees" → "Awards and Achievements" → "President's Service and Safety Awards." Questions can also be directed to 2012PSSA@amtrak.com.

Still Have Questions about Annual Enrollment?

Enrollment for your 2013 benefits is now underway. If you have questions, here's where to go for answers:

- **Read all about it.** AmtrakBenefits.com has all the information you need – read the “What You Need to Know” fact sheet, benefit partner materials, pre-enrollment newsletter and enrollment guide.
- **Watch a webcast.** Find out what's new from Aetna (for agreement-covered employees) and Cigna (for non-agreement employees) in less than 30 minutes during a webcast. Both webcasts are located on the company Intranet → Employees → Benefits.
- **Talk to someone with answers.** Specially-trained customer service representatives are available. Agreement-covered employees should call Aetna at **855-526-8725**, or if you live in Massachusetts call Tufts at **800-462-0224**; non-agreement employees should call Cigna at **800-244-6224**. You can also call the Amtrak Benefit Service Center at **800-481-4887**.

Retirement 401(k) Savings Plan

The Retirement 401(k) Savings Plan is an easy and convenient way to save for your financial future. You may contribute between 1 – 40 percent of your salary on a tax-deferred basis, up to IRS limits, into the Retirement 401(k) Savings Plan. In 2013, the IRS limits* are:

- \$17,500 for employees under age 50; and
- \$23,000 for employees age 50 and older.

You can access information about the plan by visiting <https://www.mysavingsatwork.com/amtrak> or calling Fidelity Investments at **1-877-477-AMTK (2685)**.

**Subject to change each year.*

Employee Appreciation Day Survey Reminder

Employee Relations wants your input on how to make next year's Employee Appreciation Day events even better. Please complete an anonymous, five-minute online survey at <https://www.surveymonkey.com/s/8CVHMNN>.

Radio City Christmas Spectacular

Amtrak employees qualify for a 25 percent discount on tickets for select performances to see the Rockettes at the Radio City Christmas Spectacular in New York City from November 9 through December 30. For more information and to purchase tickets, go to www.radiocitychristmas.com/amemp. Type in the code “AMEMP” on the purchase page to receive the discount.

Amtrak Fact... The Seattle King Street Station is listed on the National Register of Historic Places. The clock tower, inspired by the Piazza de San Marco bell tower in Venice, Italy, was constructed of granite and red brick with terra-cotta and cast stone ornamentation. When built in 1906, the clock tower was the tallest building in the city, standing approximately 250 feet tall.

eTicketing Continues on California Thruway Services

On November 1, eTicketing deployment continued on California Thruway services with the launch of Print Anywhere tickets on the following Thruway buses:

Highway 101 Service: 4759, 4761, 4763, 4764, 4768, 4769, 4777, 4784, 4785, 4790, 4796, 6234, 6237.

Salinas-Monterey/Carmel Service: 3511, 3514, 3611, 3614.

On November 6, additional implementation of Print Anywhere tickets is planned for the following:

Fullerton-Palm Springs/Indio Thruway Service: 4968, 4969, 4984, 4985.

President's Service and Safety Award (PSSA) Addition

Phil Bouchard, program manager in Transportation, Wilmington, Del., will receive a PSSA for work on the eTicketing project. Congratulations Phil.

PSSA recipients will be acknowledged at a luncheon to be held this Thursday, November 8, in Washington, D.C.

Amtrak - Wheels to the Rails with Chuggington™

In an effort to drive revenue and ridership to Amtrak and to educate new and existing passengers that Amtrak is a viable and green mode of transportation, a special marketing promotion is in effect with the release of the Chuggington “*Icy Escapades*” DVD. Chuggington is animated children's television series and interactive website which features educational and developmental messages. The promotion is valid through November 30.

Promotion highlights include the placement of seatbacks and counter cards will be placed in over 100 Amtrak stations nationwide. In addition, Chuggington placemats will be placed on Long-Distance trains along with the Amtrak children's menu. Banners will be placed in four Northeast Corridor stations with a web-banner on Amtrak email blasts. The Chuggington “*Icy Escapades*” DVD will showcase an “Amtrak Kids Ride Free” insert in approximately 80,000 DVDs.

The National Highway Traffic Safety Administration, another Chuggington partner, created 100,000 “*Let's Learn about Safety*” activity books that will be in Amtrak stations for our smallest passengers. A downloadable PDF is available on the Amtrak webpage, www.Amtrak.com/chuggington.

Northeast Corridor Thanksgiving Holiday Timetable Now Available

A special Thanksgiving holiday timetable for the Northeast Corridor (NEC), effective November 20 – 26, is now available in print and online. The special timetable also includes *Empire* and *Keystone* service holiday schedules. The Thanksgiving holiday is the busiest travel period of the year, and in the NEC, we will serve more than 300,000 passengers during the holiday week. On the two busiest days - Wednesday and Sunday-NEC trains serve twice as many people as on an average day. To support the increased demand and customer service, “Holiday Extra” trains will be added.

A special Thanksgiving holiday timetable is now available online for *Wolverine* service. Amtrak will operate 18 extra trains in Michigan to supplement regularly scheduled *Wolverine* service. These extra trains will operate between Chicago, Ill., and Kalamazoo/Ann Arbor, Mich. This is the first time that a special holiday timetable is being produced for *Wolverine* service. In addition, a special Thanksgiving holiday schedule for Amtrak *Cascades* service will soon be available online.

2013-2014 Amtrak Vacations Brochure Now Available

The 2013-2014 Amtrak Vacations brochure is now available offering travel packages in more than 40 U.S. and Canadian destinations. The 52-page brochure introduces 22 brand new programs and features a new set of travel packages called “The Great American” series which includes three unique coast-to-coast vacation packages. Amtrak Vacations packages are complete packages that may include rail, air, hotel, transfers, car rentals, sightseeing, events, activities and meals.

Highlights of the 2013-2014 Amtrak Vacations brochure include:

- 28 “Independent Rail Journeys,” which include stops in two or more destinations along a train route or region and include rail, hotel accommodations, sightseeing tours/events, meals and more.
- 18 new rail journeys. Some of the new journeys include packages on the *Crescent*, *Texas Eagle*, *Adirondack*, *Sunset Limited*, *Coast Starlight* and more.
- Five “Escorted Rail Journeys” with 31 departure dates. Escorted Rail Journeys are designed for groups of approximately 20 travelers and include an experienced tour guide to escort the group.
- A new “Rail and Sail” program featuring Celebrity Cruises. Two available packages include New York City with a Bermuda Cruise and Seattle with an Alaska Cruise.
- An early booking discount where customers may save up to \$600 per couple on Escorted Rail Journeys and \$300 per couple on Independent Rail Journeys when booked by December 31, 2012.

An online version of the brochure will be featured on AmtrakVacations.com. Travel agents and customers will be able to view the new brochure online, e-mail packages to friends, or print out pages of interest. Distribution of the brochure will include Amtrak stations, and they may also be ordered via eTrax.

The Smart ID Team is Moving

The Smart ID team is moving its office to better accommodate the growing needs of our employees. Effective December 15, the Smart ID team can be reached at:

Emergency Management & Corporate Security-Smart ID Team
40 Massachusetts Avenue, NE
3rd Floor, 3W 121
Washington, DC 20002
(202) 906-3639: office
(202) 906-2863: fax

Employees based in the Washington, D.C., area may stop in to get all of their Smart ID needs taken care of, including Smart ID orders and renewals, temporary badge assignments and to have their pictures taken.

Amtrak Fact... Amtrak is proud to employ more than 1,500 veterans and is committed to having more than 14 percent of its new hires be veterans this year.

Last Chance – Open Enrollment Ends This Week

The enrollment deadline is almost here: **Friday, November 16, 2012**. If you don’t enroll, your current elections will remain, but at 2013 premium costs. If you want to participate in a Flexible Spending Account or the Legal Benefits Plan (for non-agreement employees), you must enroll each year.

Make sure you have the coverage you need for 2013. Log on to **AmtrakBenefits.com** and review your current elections. After Open Enrollment, you will not be able to make changes to your benefit elections during the year, unless you have an IRS-qualified family status change.

Don’t miss the deadline. Log on to www.AmtrakBenefits.com today.

Pass Rider “Flash Pass” Changes for Employees

Effective November 5, Amtrak employee Smart ID cards may be used as a “flash pass” for travel on corridor trains where “flash passing” is permitted. The two valid forms of identification for “flash pass” travel include:

- The picture Rail Travel Privilege Card (the card with “AMTRAK” vertically written on the left).
- The employee’s Smart ID card (employee ID/building access card), with the blue horizontal stripe.

Rail Travel Privilege Cards will no longer be issued to active Amtrak employees but will continue to be issued to spouses, dependents and retirees for use when “flash passing” on corridor trains.

All Amtrak employees, spouses, dependents and retirees may optionally obtain tickets for “flash pass” corridor trains, and must obtain tickets for any train where “flash passing” is not permitted.

For freight railroad pass riders, an eTicket or paper value ticket must be used on all trains. Contracted employee’s Smart ID cards (with the red horizontal stripe) are not valid for pass travel. For complete details visit the company Intranet → Library → Policies.

Help Improve Amtrak Ink

Like reading *Amtrak Ink* each month? Have a great idea for the magazine? Take our reader survey today!

The survey only takes a few minutes to finish and your feedback will be anonymous. Both surveys cover the same questions, but be sure to access the appropriate survey based on your employment status. Please use the following links to complete this questionnaire:

Non-agreement employees:

<https://www.surveymonkey.com/s/AmtrakInk2012NA>

Agreement employees:

<https://www.surveymonkey.com/s/AmtrakInk2012AG>

If you have difficulty accessing the survey, please contact MarketResearch@Amtrak.com as soon as possible. The survey closes soon, so make your voice heard now.

Thank you for helping to make *Amtrak Ink* better.

November 19, 2012

It's a Wrap – Open Enrollment 2013 Ends

While enrollment for your 2013 benefits is over, there are still a few things you need to know:

- **Review your Confirmation Statement:** In the next few weeks, you will receive a 2013 Enrollment Confirmation Statement of your benefit elections. If your confirmation statement is incorrect, call the Amtrak Benefits Service Center at **800-481-4887**. You have two weeks from the date of the confirmation statement to submit any corrections.
- **Medical ID Cards:** As new participants, agreement-covered employees will receive a new family medical ID card from Aetna. The family ID card can be used for all members of your family covered by the plan. Use your new card with your medical providers starting January 1, 2013, to ensure your benefits are processed correctly. If you don't receive your cards by January 1, Aetna can print a new ID card within seven to ten business days. There also is a feature on www.Aetna.com that allows you to print a temporary card once you are a participant. For non-agreement employees, Cigna offers a similar feature on its website www.myCigna.com for its participants to print or order replacement medical ID cards.

Visit www.AmtrakBenefits.com for information on your benefits.

IMPACT Closing Information

The performance review process for non-agreement employees is changing from "Impact" to "Success Factors," a new web-based, performance-management system effective in FY 2013. In order to close Impact, all FY 2012 Annual Manager Performance Reviews for non-agreement employees must be in a "closed" status by November 27.

For more information, please visit: the Employee Intranet →Employees →Performance Management.

eTicketing Launched on Fullerton Thruway Buses

eTicketing has been successfully launched on the Fullerton Thruway buses, marking an important milestone for Amtrak. All Amtrak-operated ("dedicated") Thruway services in southern California are now print-anywhere enabled.

Last Chance to Improve Amtrak Ink

The *Amtrak Ink* reader survey closes soon. Share your comments and suggest improvements by taking our online survey now!

The survey only takes a few minutes to finish and your feedback will be anonymous. Both surveys cover the same questions, but be sure to access the appropriate survey based on your employment status. Please use the following links to complete this questionnaire:

If you have difficulty accessing the survey, please contact MarketResearch@Amtrak.com as soon as possible. The survey closes this Wednesday, so make your voice heard now.

Aid Delivered to the Northeast

Last week, over 30 pallets of donated supplies to aid Superstorm Sandy victims traveled from Slidell, La., to Newark, N.J., on the "Train of Hope." This train was conceived by Donna O'Daniels, President and CEO of the St. Tammany Parish Tourist and Convention Commission, and Kim Bergeron, director of cultural affairs for the city of Slidell, a community located east of New Orleans that was hit hard by Hurricane Katrina and other storms. A baggage car filled with the relief supplies for storm victims traveled on the *Crescent* and included clothing, diapers, baby food, blankets, batteries and many other critical items.

For more information visit TrainofHope.net.

HCESC Did You Know...

The Human Capital Employee Service Center (HCESC) can provide support while navigating within the Employee Information Portal. The HCESC provides support around the functionality within the portal but doesn't handle technical issues. Technical issues are handled by the IT Help Desk.

Examples of functional issues:

- Help in navigating through HC processes and forms
- Assistance navigating the Jobs Portal
- Guidance in approving transactions within the Inbox

Examples of Technical Issues (Handled by the IT Help Desk 1-888-772-4357):

- Portal Password Resets
- Issue regarding Adobe Reader
- Questions relating to the functioning of Internet Explorer and the portal

If you have any questions, please call or write HCESC at 888-694-7372 or HRESC@amtrak.com.

Amtrak Fact... Authorized by Congress in September 1974, the Amtrak Police Department employs over 500 law enforcement officers and civilians in 38 field locations across the country.

Amtrak Employee & Customer Communications wishes you and your family a safe and happy Thanksgiving holiday.

Partnership with VIA Rail Creates Additional Seating for Thanksgiving Travel

In an arrangement that reflects the spirit of Thanksgiving, Amtrak partnered with its Canadian counterpart, VIA Rail Canada, who agreed to provide passenger rail cars to make additional seats available and allow more friends and family in the hurricane-impacted Northeast to connect over the holiday.

“VIA Rail has been a true partner, reaching out in the aftermath of Hurricane Sandy to offer its friendship and assistance in restoring mobility to the Northeast,” said Amtrak President and CEO Joe Boardman. “Amtrak is grateful for their generosity and also appreciates the support of New York State DOT in this effort. We know the more seats we have, the more people in the region we can bring together to share the holiday.”

“VIA Rail is pleased to help Amtrak, a partner which the Corporation considers very important,” said VIA Rail’s President and CEO Marc Laliberté. “No one is safe from disasters, such as the one that occurred a few weeks ago in the New York area. This small gesture can make a huge difference. We had to find a way to show our solidarity with our partner.”

VIA Rail provided 10 coach cars and two dome cars to be used November 20 - 27 on the New York state-supported *Adirondack* service operating between Albany-Rensselaer and Montreal. This will allow some Amtrak equipment used on that route to be reassigned adding about 300 seats to trains operating on the Northeast Corridor during the holiday travel period and will result in an additional 60 seats being available on the *Adirondack* service.

VIA Rail and Amtrak have a long-standing partnership and jointly transport passengers across the U.S. - Canadian border, facilitating train transfers between New York and Toronto, New York and Montreal, and Portland, Ore., and Vancouver, B.C.

Business Travel Cards for Contractors Expiring at the End of December 2012

Managers with contract employees who have business travel cards are advised that these cards for contract personnel will expire on December 31, 2012. Contractors who need to travel on Amtrak business normally do so using travel vouchers obtained through eTrax, with either single-use vouchers for less frequent travel (and on which *Acela Express* travel or sleeper travel may be specified) or multiple-use vouchers (valid for non-*Acela* coach travel only) when the contractor will travel frequently (with little notice, and more than once a week). By using vouchers we are able to effectively monitor this type of travel. Providing a business travel card to a contractor is a rare exception; the need for this must be thoroughly explained and justified, and each application will be individually reviewed.

Amtrak employees who have business pass privileges will have that privilege automatically extended through December 2014 and need not take action. These business pass privileges are part of the employee’s Arrow pass file record and require no business travel card.

Amtrak Police Department Awarded Law Enforcement Accreditation

The Amtrak Police Department was awarded law enforcement accreditation as of November 18, 2012, by the Commission on Accreditation for Law Enforcement Agencies (CALEA), announced Assistant Chief of Police Lisa A. Shahade.

To achieve accreditation from CALEA, the department had to show compliance with several hundred professional standards as measured by the commission. An assessment team from CALEA conducted an onsite visit in late August 2012, reviewed written materials, conducted interviews with department staff and Amtrak passengers and visited Amtrak’s Consolidated National Communication Center in Wilmington, Washington Union Station, 30th Street Station and the Amtrak Police National Communication Center in Philadelphia and New York Penn Station.

“I am very proud of the daily efforts of our officers to help keep our passengers safe,” Shahade said. “Achieving this prestigious award validates that the daily work of all members of the Amtrak Police Department meet or exceed law enforcement industry standards, while also meeting the safety and security needs of Amtrak passengers.”

As one of the last steps in the review process, Assistant Chief Shahade, Inspector Maureen Powers, and the department’s accreditation manager, Captain Gary Heller, appeared before a CALEA review committee in Jacksonville, Fla., on November 18. The full commission granted accreditation later that day.

CALEA accreditation is a voluntary process. The initial accreditation is for a three-year period. To maintain this accredited status, the department will submit an annual report to show yearly compliance with the standards.

Cyber-Monday Sale on Amtrak Merchandise

Looking for the perfect gift for the train enthusiast in your life? Check out www.amtrak.com/store today for specially-priced Amtrak merchandise and collectables. Amtrak model trains, as well as other select gifts, will be available at the deepest discounts offered to date, with some items reduced up to 40 percent off the manufacturers suggested retail price. Also, a new, limited-edition, holiday ornament is now available. Please note, the standard employee discount is not applicable on cyber-Monday, November 26. Shipping charges apply.

Amtrak Fact ... The *Empire Builder*, operating daily between Chicago and Seattle/Portland, is named for James J. Hill, the builder of the Great Northern Railway.

October 1, 2012

“Ask Julie” introduced on Amtrak.com

On September 23, E-Commerce launched “Ask Julie”, a virtual online assistant on Amtrak.com. By clicking the Ask Julie link on the Amtrak home page and other useful launch points located throughout Amtrak.com, customers can now type questions, phrases or keywords in Ask Julie’s chat window. With her own voice and personality, Ask Julie provides both a verbal and written response along with related links, and displays the site’s most relevant page, benefitting online customers by answering hundreds of frequently asked questions, providing help to assist customers in booking travel and directing customers to the appropriate contact to receive further assistance.

More than 10 years ago, “Julie,” Amtrak’s voice response unit (VRU) system on 1-800-USA-RAIL was activated. With this innovation, Amtrak is using the investment already made in “Julie,” and extending it online with additional features. This allows Amtrak to maintain consistency across all consumer touch-points (telephone and online).

As more than 200,000 customers visit Amtrak.com daily to browse for information, Ask Julie is Amtrak’s latest customer-friendly innovation to make their online experience even better. Ask Julie provides significant value through quicker (matter of seconds) and more accurate responses to questions by retrieving the best answer to a question and utilizing the state of the art knowledge base built with content from Amtrak.com.

“With more than half of our tickets purchased at Amtrak.com, our website has become the single most popular way customers interact with us before traveling,” said Roger Seitzinger, senior director of E-Commerce. “Ask Julie offers customers a more personalized, engaging self-service experience online, while quickly connecting them with the site’s most relevant information.”

Test Trains Operating at 165 MPH

Beginning last week and continuing this week, Amtrak is operating high-speed test trains at 165 mph in four areas covering more than 100 miles of the Northeast Corridor. The tests in Maryland, Delaware, New Jersey, Rhode Island and Massachusetts are locations that may at some future time experience regular 160 mph service.

The tests utilize high-speed *Acela Express* equipment and are measuring the interaction between the train and the track, rider quality and other safety factors. The test runs must be performed at 5 mph above the expected maximum operating speed of 160 mph.

The initial test run is in New Jersey where Amtrak is presently advancing design, engineering and other pre-construction activities for a \$450 million project funded by the federal high-speed rail program. The project includes upgrading track, electrical power, signal systems and overhead catenary wires to improve reliability for Amtrak and commuter rail service, all of which is necessary to permit regular train operations at the faster speeds. Some construction activity is anticipated in 2013, but the project will ramp up dramatically thereafter to be completed in 2017.

Winter System Timetable to be Released in January

The release of the next system timetable will be delayed until January 14, 2013, to allow for the inclusion of several new service additions. These include the [Amtrak Virginia Northeast Regional Service Extension to Norfolk, Va.](#), on Dec. 12, the [Downeaster expanded rail service to Freeport and Brunswick, Maine](#) on Nov. 1 and the new [Amtrak Thruway bus service in Eastern North Carolina](#) that will launch on Oct. 3. Updated route schedules will be available shortly before the service launch and will also be available at Amtrak.com.

Timetables will be produced for the Thanksgiving travel period (Nov. 20 – Nov. 26) and will be available on Nov. 5.

Amtrak Board of Directors Announcements

On September 22, the U.S. Senate confirmed the nomination of Albert DiClemente to be a Director on the Amtrak Board of Directors for a term of five years. DiClemente was first appointed to the Board in 2010.

In March, President Obama nominated former U.S. Rep. Yvonne Brathwaite Burke to the Amtrak Board of Directors. Burke is a member of the Office of Congressional Ethics and the California Transportation Commission. In addition, President Obama announced his intent to nominate Christopher Beall to the Board. Beall is a Partner at Highstar Capital, L.P., an infrastructure investment firm.

Travel Promotions for California Sports Fans

Oakland Raider fans can skip the traffic to the Oakland Coliseum and come aboard the [Capitol Corridor](#) to save 25 percent on travel to select home games through December 16, 2012. With a train station at the [Coliseum](#), fans will be dropped off at the front door. There are 30 trains a day to choose from between Sacramento and the Bay Area.

Through December 30, 2012, football fans heading to a San Diego Chargers home game receive the best available rail fare on select [Pacific Surfliner](#) trains to [San Diego](#) Old Town (OLT) plus transportation on the San Diego Trolley to Qualcomm Stadium to attend the game. Passengers should present their Amtrak eTicket to the Trolley operator for their connection to and from the game. For applicable terms and conditions: visit Amtrak.com →Special Deals.

October 8, 2012

Employees to Receive Human Trafficking Awareness Training

On October 4, Amtrak President and CEO Joe Boardman, along with Secretary of Homeland Security Janet Napolitano and Secretary of Transportation Ray LaHood announced a joint partnership to address the issue of human trafficking awareness and victim identification. The partnership includes delivering an initial training program to educate approximately 8,000 public-facing employees to identify and recognize indicators of human trafficking, as well as how to report suspected cases of human trafficking although there is no evidence that human traffickers are making particular use of Amtrak to conduct this illegal activity. All Amtrak police officers will receive law enforcement specific training in daily roll call.

Expanding on this proactive initiative, all Amtrak employees will receive general awareness training, which may include in-person briefings, online and in-person training sessions. Training materials are under final approval with the Department of Homeland Security and training is expected to begin in the near future.

Aetna Hosts Onsite Visits for Agreement-Covered Employees

Aetna recently announced upcoming site visits at a number of Amtrak locations where employees can learn more about Aetna and get their health benefits questions answered. For the most current date and location information, visit www.AmtrakBenefits.com.

Operation Lifesaver Video

“What Smart Commuters Know,” a fast-paced new animated video, has been developed by the rail safety nonprofit Operation Lifesaver (OL) to help riders understand the importance of avoiding distraction on their daily commute, whether on a subway, light rail or commuter rail system. The 3 ½ minute video will be used by OL trained volunteers during free safety presentations in their communities via computers or iPads.

Learn more about the video and OL work on transit safety at www.oli.org/passengerrail. A digital presentation is available at <http://bit.ly/StviYU>.

Eastern Carolina Thruway Bus Service Begins

On Tuesday, Oct. 2, Amtrak hosted an inaugural run of its new Thruway bus service to the Eastern North Carolina with ceremonies in each community involving representatives from Amtrak, North Carolina Department of Transportation and community dignitaries.

The newly dedicated Thruway bus service launched on Oct. 3 and established two Eastern North Carolina routes, one serving the communities of Greenville, New Bern, Havelock and Morehead City, and a second serving Goldsboro, Kinston, Jacksonville and Wilmington. Each route connects with the Amtrak *Palmetto* train service at the Amtrak Station in Wilson, N.C.

Amtrak Launches Free Android Application

A free Android application (app) is now available for passengers to plan and book travel, check train status, show their eTicket, and change reservations instantly from the convenience of any Android device. The app is available through Google Play and Amazon.

Amtrak for Android delivers features similar to those enjoyed by Amtrak for iPhone users, including the ability to buy and have the eTicket delivered directly to their phone – or to cancel or exchange that same ticket. In addition it offers a redesigned purchase flow, new presentation of train status information and expanded station information.

The Android app joins and complements the Amtrak for iPhone app, which has been downloaded more than one million times since its launch. The free Amtrak for iPhone app is available at the App Store on iPhone and iPod touch or at the iTunes store.

In August, Amtrak launched an app for *Arrive Magazine*, Amtrak’s bimonthly onboard magazine for the Northeast Corridor and selected other routes. The *Arrive Magazine* app is available in the Google Play, Amazon and iTunes stores.

Staff Change

Effective October 4, 2012, Michael Oathout, manager, Operation RedBlock and his staff joined the Operations department reporting temporarily to Chris Jagodzinski, general manager, east, until the Chief Safety Officer is named.

HCESC Did You Know...

The HCESC (Human Capital Employee Service Center) processes educational reimbursements for eligible employees taking approved college courses.

Employees wishing to be reimbursed for an approved college course must complete the Educational Assistance Application and submit it to the HCESC within **45** days prior to the course start date. Submissions must include a fully completed application with department head signature, a course outline, accreditation standards, intent letter and resume. Upon approval, employees must submit a request for reimbursement within **90** days of course completion. Proof of tuition and fees, along with itemized receipts stating which payment method was used and the semester taken must be included.

Reimbursements are processed in time and date order and can take up to **six weeks** to process. Incomplete submissions may cause delay or inability to process the reimbursement request. To locate the Educational Assistance Application with instructions, visit the company Intranet → Library → Forms.

Amtrak Fact... If on its side, the Washington Monument could lay inside of the Washington Union Station concourse. The Washington Monument is approximately 555 feet tall and the concourse of Union Station in Washington, D.C., is about 760 feet in length.

**New Ridership & Revenue Records Set**

Fiscal Year 2012, ending September 30, marked the highest annual ridership total in Amtrak history with more than 31.2 million passengers traveling across the Amtrak system. A year-over-year comparison of FY 2012 to FY 2011 shows ridership grew 3.5 percent to a new record of 31,240,565 passengers.

Ridership on the Northeast Corridor is up 4.8 percent to a record 11.4 million, state-supported and other short-distance routes is up 2.1 percent to a record 15.1 million and long-distance services is up 4.7 percent to their best showing in 19 years at 4.7 million passengers. Further ridership achievements include new records for 25 of 44 Amtrak services, increased ridership on all 15 long-distance routes, and 12 consecutive monthly records with July being the single best month in the company's history. Since FY 2000, Amtrak ridership is up 49 percent.

Ticket revenue jumped 6.8 percent to a best ever \$2.02 billion. Ticket revenue on 14 of 15 long-distance routes increased, with the exception of the *Southwest Chief* ending FY 2012 at just \$520 below FY 2011.

In addition, Amtrak system-wide on-time performance increased to 83 percent, up from 78.1 percent to its highest level in 12 years.

Paperless Payroll for Non-Agreement Employees to begin November 9

The Payroll department is pleased to announce that beginning with the November 9 pay date direct deposit statements for non-agreement employees will no longer be printed. This progressive initiative will reduce processing, printing and mailing costs of direct deposit statements.

All Amtrak non-agreement direct deposit employees have 24/7 web-based secured access to the Employee Information Portal which maintains the payroll direct deposit statements. These electronic statements can be printed and are available for review on the employee Intranet→Benefits→Payments→Salary Statements. For inquiries and assistance, employees may call the Payroll Hotline at 1-866-247-2915.

HCESC Did You Know...

The Human Capital Employee Service Center (HCESC) is committed to processing requests within three business days. To avoid processing delays, please follow the tips below:

- Ensure all forms are completed accurately and with the proper sign-offs.
- Only submit your form once, duplicate submissions may cause a delay in processing.
- When adding a contractor (non-employee) to your organization, you must submit both an "Add Non-Employee" form through the Manager Self-Service portal as well as the NRPC 3334 Non-Employee Information form.
- Help is available for completing forms in Manager Self-Service by clicking on the EIP Help link in the Employee Information Portal.

For inquiries, please call or write HCESC at 888-694-7372 or HRESC@amtrak.com.

Chicago Union Station Designated as a Top 10 Great Public Space

The American Planning Association (APA) recently designated Chicago Union Station (CUS) as one of 10 Great Public Spaces for 2012 under the organization's Great Places in America program. APA Great Places exemplify exceptional character, quality and planning and highlight the role planning and planners play in adding value to communities, including fostering economic growth and creating jobs.

APA singled out CUS for its architectural design and variety of uses from transportation hub to event venue to movie backdrop. Serving roughly 320 trains and 120,000 passengers each day, it is the Windy City's busiest train station and Amtrak's fourth-busiest terminal nationwide. CUS was designed by Daniel Burnham in 1909, representing an innovative approach to passenger rail station design when it opened in 1925.

In 1984, Amtrak took ownership of CUS and the station underwent a \$32 million facelift which included new escalators and a redesigned food court. An ongoing \$40 million renovation includes doubling seating capacity for Amtrak passengers and upgrades of other amenities, including restrooms and restoring air conditioning to the Great Hall. This resulting year-round event venue has increased the station's rental income and helps Amtrak to have a higher cost recovery than other public transportation providers.

Last May, the city of Chicago adopted a new master plan for the station, providing for an estimated 40 percent increase in ridership by 2040. The plan seeks to make the terminal more inviting and improve transfers and connections between Amtrak, Metra commuter rail and suburban and urban buses. For more information, visit www.planning.org/greatplaces.

VP of Operations Visits NY Penn Station-area Employees

Last Friday, DJ Stadtler, vice president of Operations, continued his Town Hall meetings, explaining the Operations reorganization to employees in New York's Sunnyside Yard, the Penn Station Control Center and Penn Station.

As the department's reorganization progresses, the movement of several groups into the Operations department was also completed.

Those organizational changes included: the Food and Beverage and Product Development groups will report up to a new Chief of Customer Service, a position that will be filled in the near term. Several Health and Safety groups will report to the General Manager, East until a Chief Safety Officer is appointed. The Business Analytics group, now in Operations, gives field managers the tools they need to improve daily service. The creation of a new Operations Research and Planning organization, which will be overseen by a new chief, completes this phase of the reorganization.

Amtrak Fact...Part of the Illinois Service, the *Saluki* provides daily service between Chicago and Carbondale, Ill. The train is named after the saluki breed of dog, the mascot of Southern Illinois University.

VP of Operations to Visit Philadelphia 30th Street Station

This Friday, October 26, DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees at Philadelphia's 30th Street Station. The meetings are open to all employees and will be held in the Chapel Conference Room on the 2nd Floor North at the following times:

- 10 a.m. to 10:45 a.m.
- 11 a.m. to 11:45 a.m.
- 12 p.m. to 12:45 p.m.

Mr. Stadler will give a brief presentation and then answer questions. Boston hosts the next series of Operations reorganization Town Hall meetings on November 2.

HCESC Did You Know...

The HCESC (Human Capital Employee Service Center) processes retirement requests. Here are some helpful tips for preparing the necessary paperwork.

- Non-agreement employees (55 or older) must complete and sign the Retirement Income Application (NRPC 2394) prior to or on the last day worked in order to maintain their medical and railroad pass privileges.
- Agreement-covered employees who had non-agreement service and non-agreement employees (under age 55) are not required to submit the Retirement Income Application until 120 days prior to their pension start date.
- The Retirement Recognition Program Form (NRPC 2505), used for issuing retirement plaques, should be submitted for processing by all employees retiring from Amtrak.

Incomplete submission of either of the above forms will cause a delay in processing the request. To locate the retirement forms, visit the company Intranet → Library → Forms. If you have any questions regarding the process, please call or write the Human Capital Employee Service Center at 888-694-7372 or HRESC@amtrak.com.

What Do You Think?

Help make next year's Employee Appreciation Day events even better by completing an anonymous, five-minute online survey at <https://www.surveymonkey.com/s/8CVHMNN>.

Amtrak Fact... In 2011, employees collected more than 281 tons of office paper and mixed paper for recycling. In addition, we recycled almost 1,500 tons of commingled materials – bottles, cans, and mixed paper – from stations, trains and facilities.

110-MPH Rail Demonstration in Illinois

Last week, Illinois Governor Pat Quinn, U.S. Transportation Secretary Ray LaHood, Federal Railroad Administrator Joseph Szabo, Illinois Transportation Secretary Ann L. Schneider, Amtrak Board Chairman Tom Carper and local officials boarded a refurbished Amtrak passenger rail car in Joliet, Ill., as the first official demonstration test of high-speed rail kicked-off with passengers between Dwight and Pontiac at speeds up to 110 mph. The 15-mile demonstration showcased major infrastructure improvements, state-of-the-art signaling and significant technological and safety advancements. With the start of 110-mph service between Dwight and Pontiac expected later this fall, Illinois will join Michigan in becoming the second state outside of the Northeast Corridor to offer high-speed rail service.

In FY 2011, 1.8 million passengers rode Amtrak's four state-supported routes in Illinois, almost double the ridership of six years ago. Ongoing improvements are expected to permit 110-mph trains to run between Dwight and Alton by 2015.

For more information about the Chicago-St. Louis high-speed rail corridor, please visit the project website at www.idothsr.org

Fidelity Investments to Conduct Online Workshops

To help make the most of your Amtrak Retirement Savings Plan, Fidelity Investments is conducting two online presenter-led workshops on October 25. The workshop topics will include "Building a Portfolio for Any Weather" to be held at 2 p.m. EST and "Shifting from Saving to Spending" to be held at 4 p.m. EST.

Building a Portfolio for Any Weather is a beginner-level workshop designed for individuals who are enrolled in their workplace savings plans or are looking to get started and help improve their investment mix through asset allocation and diversification.

Shifting from Saving to Spending is an intermediate-level workshop designed for individuals aged 55 or older who are planning to retire in less than two years and who have a retirement income plan in place.

Both workshops have a call-in number, 1-888-830-8905 and the meeting ID is 887902. To learn more about the workshops and to register, visit <http://webworkshops.fidelity.com> and log in to your Fidelity NetBenefits[®] account. Choose enroll and fill in your contact information to sign-up.

Tufts Health Plan Continues as Healthcare Service Provider for Agreement-Covered Employees in Massachusetts

Recently, Aetna was selected as the new healthcare service provider for Amtrak's agreement-covered employees, effective January 1, 2013. At the same time, a procurement process was underway for employees residing in Massachusetts who are currently covered by the Tufts Health Plan.

Following the completion of that competitive procurement process, the Tufts Health Plan has been selected to continue as the healthcare service provider for agreement-covered employees in Massachusetts. Tufts will also offer expanded disease management and behavioral health programs for participants.

Find out more about the Tufts Health Plan at www.tuftshealthplan.com, or in the 2013 enrollment materials being mailed to agreement-covered employees' homes at the end of October.

AmtrakBenefits.com Ready for Enrollment – Are You?

Everything you need to know about Open Enrollment and your 2013 benefits is now available on AmtrakBenefits.com. The site is up to date with all the latest information, including the 2013 Employee Benefits Enrollment Guide, Frequently Asked Questions (and answers) and resources from our benefit partners.

Get ready for Open Enrollment and enroll online today. Open Enrollment for your 2013 benefits begins today, Monday, October 29 and will end on Friday, November 16, 2012.

Daylight Savings Time Ends November 4

At 2 a.m. Sunday, November 4, 2012, all clocks (except in Arizona) will be set back one hour in accordance with the Uniform Time Standards Act. Amtrak trains en route will proceed to the first station after the time change, and hold there until scheduled Standard Time departure. Passengers on board at the time change will find in most cases that their trip will be one hour longer. Additional details are available on the company Intranet →Library→ Daily Advisories→ October 23.

Coast-to-Coast Track Projects Enhance Service

Last week, work began on the Delaware Third Track Construction Project, creating the addition of a third track along a 1.5-mile segment on the Northeast Corridor, south of Wilmington, Del. The project also includes upgrading infrastructure, rehabilitating two bridges and improving signal and communication systems in the area. Scheduled to be completed in early 2015, the improvements will provide service efficiencies for Amtrak *Acela Express*, *Northeast Regional* service and commuter services.

On the West coast, three new tracks opened at Los Angeles Union Station to serve Metrolink and Amtrak passengers. Additional improvements include a reconstructed platform, a new electronic information system and energy-efficient lighting. The new tracks and passenger platform will help meet growing demand for rail travel on the *Pacific Surfliner* service, which has achieved significantly increased ridership over the last 10 years. The 351-mile *Pacific Surfliner* corridor between San Diego and San Luis Obispo, Calif., is the second busiest corridor in the nation. Los Angeles Union Station serves more than two million Amtrak and Metrolink passengers annually and is the nation's fifth busiest train station.

President's Service and Safety (PSSA) Award Additions

We are pleased to let you know that Dawn Amore, contractor in Marketing, Washington, D.C., is a recipient of a PSSA Award for her work on the Train Communications Project. Robert Ripperger, principal officer in Government Affairs and Corporate Communications (GACC), Washington, D.C., and Thomas L. Stennis III, director, South in New Orleans, La., (GACC) will also receive awards for their contributions on the 40th Anniversary Train Project. Congratulations Dawn, Rob and Todd.

Amtrak Fact... From the Big Apple to the Big Easy, the *Crescent* passes between thirteen states during its daily trips between New York City and New Orleans, the most amount of states traveled through on any Amtrak route.

Downeaster Service Expansion

Beginning Thursday, November 1, two additional towns are slated to be added to the Amtrak *Downeaster*. Service to Brunswick and Freeport, Maine will be added to two of the five daily round trips on scheduled service between Portland, Maine and Boston.

During a two-year construction project, the Amtrak *Downeaster* service expansion required a multi-million-dollar rehabilitation of 30 miles of track. In addition, 36 grade crossings have been rehabilitated and two station platforms have been constructed. The project was funded primarily with a \$38.3 million grant from the American Recovery and Rehabilitation Act (ARRA).

The Amtrak *Downeaster* is managed by the Northern New England Passenger Rail Authority (NNEPRA). In FY 2012, *Downeaster* ridership exceeded 528,000 passengers. With the addition of these two new station stops, an additional 30,000 new riders are expected annually. For more information on this service expansion, visit AmtrakDowneaster.com.

VP of Operations to Visit Boston Employees

This Friday, November 2, DJ Stadtler, vice president of Operations, will continue his Town Hall meetings, explaining the Operations reorganization to employees at Boston's South Hampton Street Yard and South Station. The meetings are open to all employees and will be held at the following times:

- 9 a.m. to 9:45 a.m. at South Hampton Street Yard, 1st floor lunch room, Regional S&I Building
- 11:15 a.m. to 12 p.m. at South Station, 5th floor conference room

The meetings will include a brief presentation by Mr. Stadtler followed by a question and answer session.

HCESC Do You Know...

The HCESC (Human Capital Employee Service Center) processes retirement requests. The information below is provided to clarify the tips given in the October 22 issue of *Amtrak This Week*.

- Non-agreement employees age 55 or older **with five years of Amtrak service** are eligible to retire under the Amtrak Retirement Income Plan. Employees must complete and sign the Retirement Income Plan Application (NRPC 2394) prior to their last day of employment in order to maintain their medical and railroad pass privileges.
- Non-agreement employees and agreement employees who had non-agreement service and **meet the vesting requirement of five years of Amtrak service but not the age requirement at the time of separation may be eligible for a deferred vested benefit anytime after age 55**. You must submit the Retirement Income Plan Application 120 days prior to your intended pension start date.

These are only some helpful tips and are not a complete description of all eligibility requirements. Eligibility for employee benefits, including retiree benefits, are governed by the requirements and provisions set forth in the plan documents. Amtrak reserves the right to modify, suspend or terminate these benefits at any time.

September 4, 2012

Upcoming PCard Changes (JP Morgan Chase VISA to US Bank MasterCard)

Amtrak is pleased to announce that US Bank (MasterCard) has been selected to provide a new Business Procurement GSA PCard program to employees currently holding an Amtrak-branded JP Morgan Chase PCard (VISA). The conversion to US Bank PCards will occur automatically for current JP Morgan Chase PCard holders. Distribution of the new US Bank PCards will take place beginning the week of September 17, 2012. Effective October 1, 2012, the JP Morgan Chase charge cards will expire.

Prior to new card activation, the Acknowledgement for Procurement Card eform must be completed. This necessary eform is located in eTrax→Create→More→Acknowledgement for Procurement Card. Employees needing assistance locating or completing the eform may contact the eTrax Help Desk at ATS 739-4750 or 1-888-445-7677.

Employees who are current JP Morgan Chase PCard holders that have not received an email notification outlining specific details regarding the transition to US Bank by September 14, 2012, should contact Juanita Johnson at johnsoj@amtrak.com.

Operations Town Hall Meetings Continue

Vice President of Operations DJ Stadler continues to meet hundreds of employees and answer questions about the company's Operations reorganization through a series of Town Halls that take him to various locations throughout the system. "With employees' input, we'll continue to move Amtrak in a direction of stellar customer service and strong financial accountability, all in alignment with our Strategic Plan," Stadler says of the tour.

So far in the reorganization, the Transition Team has met and developed subgroups that will help create more detailed organizational charts for the four business lines. The first two general manager positions have been posted for the Northeast Corridor and Long-Distance business lines. In addition, the new roles of Chief of Customer Service and Chief Transportation Officer have been posted for applicants. Future Town Hall locations include Chicago, Los Angeles, New York and Philadelphia and Boston.

Employee Appreciation Day

This year Employee Appreciation Day will be held during the last week of September and not on one particular day. It will celebrate the continuing accomplishments and future commitments of the more than 20,000 men and women who help make Amtrak a safer, more sustainable and financially healthy company.

At locations across the country, employees will be thanked for their service and learn how their daily tasks support our five strategic goals of safety and security, customer service, mobility and connectivity, environmental responsibility and financial and organizational excellence.

Because of employees' different shifts, many locations will hold events throughout the week of September 24-30, 2012, to ensure that managers have an opportunity to thank all of their employees for their service. This year's Employee Appreciation Day comes at the end of the 2012 fiscal year, allowing employees to celebrate all they've achieved during that time and become excited and focused on FY13.

Employee "Keep Walking" Program Continues

The 5th Stay on Track...Keep Walking program will begin on Monday, October 1 through Sunday, November 11. The walking program encourages employee physical fitness and exercise. There are 350 new pedometers available for employees who did not receive one from any of the previous four competitions. All employees who would like to participate need to complete a registration form. The form and instructions are located on the Amtrak Intranet at Safety → Health → Health and Medical Services → Keep Walking → 5th Competition Application Form. Forms must be submitted to keepwalking@amtrak.com and registration closes on September 21. Any questions may be directed to Malva Reid, senior director Health Services at (202) 906-3258 or ATS 777-3258.

HCESC Did You Know ...

The Human Capital Employee Service Center (HCESC) can help you insure that your portal inbox tasks are kept up-to-date while you are away.

Managers going on vacation or taking an extended business trip may appoint a substitute who is under their supervision as a "power of authority" to review, approve or deny requests received in their portal inbox. The substitute will have the ability to approve or decline all tasks that are within the manager's authorization level.

For assistance or questions about how to designate a substitute, contact HCESC at 888-694-7372 or HRESC@amtrak.com.

Great Dome Car Returns

Amtrak passengers will have a unique chance to view fall foliage from the "Great Dome" car this fall. It will operate on the *Adirondack* from September 13 through October 21 on Train 69 on Thursdays, Saturdays and Mondays, and Train 68 on Fridays, Sundays and Tuesdays between Albany, N.Y., and Montreal, Canada. It will then operate on the *Cardinal* from October 27 through November 16 on Train 51 originating on Fridays and Train 50 originating on Saturdays between Washington, D.C., and Chicago. Seats are available on a first-come, first-served basis.

September 10, 2012

New Checked Baggage Program

Effective today, Amtrak is implementing a refined baggage program designed to enhance the safety of our passengers and of our employees. With increasing ridership, baggage volumes onboard trains have also significantly grown. In an effort to maintain the amount of baggage in coach cars, a new baggage program will be implemented in phases. Amtrak's baggage policy is consistent with travel industry standards and offers the best baggage allowances available when compared with other transportation modes.

Carry-On Baggage: There will be no changes to carry-on baggage. Each adult and child (ages 2-15) can carry two items each, free of charge, not including personal items. For passengers traveling with infants under the age of two, additional infant items such as a stroller or a diaper bag will not count against the carry-on baggage limit. Weight and size allowances for allowable carry-on baggage remain the same. The notable change in this category will be improved messaging of Amtrak's carry-on baggage policy to reinforce customer awareness.

Checked Baggage: The checked baggage policy has been modified. Key policy changes include:

- Each passenger can check up to four bags - two free of charge and an additional two for \$20 each.
- Each bag in checked baggage is limited to a size of 75 linear inches (length + width + height). Oversize baggage (76 - 100 linear inches) is accepted for \$20 per bag.
- Luggage must be checked 45 minutes prior to scheduled train departure.
- Rates for storage and parcel check will increase to \$4 (\$5.50 at New York Penn Station) per bag for each 24-hour period.
- Special item rates will increase from \$5 to \$10. Tandem bicycles and kayaks are no longer accepted.
- Each bag checked must be packed within a suitable container; plastic/rubber storage containers are prohibited.

Passengers using Amtrak for business or residential relocation will be allowed to transport their articles for a competitive fee via Amtrak Express.

A new brochure outlining Amtrak's baggage policy is available at all staffed stations. For complete policy details, visit: Amtrak.com → Plan → Baggage Policy & Service.

September is National Preparedness Month

Amtrak is committed to providing its employees with a safe and secure working environment and believes that many of the preparedness activities that are done at work can also benefit employees at home. September is National Preparedness Month and a perfect time to prepare yourself and your family for a disaster by making an emergency plan. As a member of FEMA's READY.GOV Alliance for the past three years, Amtrak has again put together a September 2012 calendar of preparedness suggestions to help you during a natural or manmade disaster at home, at work and in your community.

The National Preparedness 2012 calendar will be posted or distributed in your work area, and is also available for download on the Amtrak Intranet by clicking on the Amtrak Police drop down menu. Please take some time to read the information and share it with your family and friends. This month, make an emergency plan and practice it.

Title Change for Passenger Service Representatives

In the effort to continue to focus and improve upon the customer experience, Amtrak has changed the job title of Passenger Service Representative to Customer Service Representative. This change allows Amtrak to better align this role with our Strategic Plan. Customer Service Representatives will continue to fulfill the same role of responding to the wants, needs and expectations of our customers in order to improve our customers' experiences and satisfaction.

In Remembrance: September 11, 2001

The United States Congress has established a National Moment of Remembrance to remember all the Men and Women who lost their lives during the terrorist attacks on our nation that occurred on September 11, 2001. All Americans are encouraged to pause and reflect upon those lives lost on that tragic day. Amtrak supports this National Moment of Remembrance and on September 11, 2012, all Engineers will sound one long whistle, where safe operation permits, at 1 p.m. Eastern Daylight Time to support this national initiative.

Human Capital Management Policies and Procedures Updates

Human Capital Management (HCM) recently held a review session to evaluate HCM Policies and Procedures and to ensure that they reflect current state practices. The review session hailed participants from various departmental teams across Amtrak's employee population.

To date, 15 revised policies and procedures with minor changes have been published on the company Intranet. The minor changes include changing the department name from Human Resources to Human Capital Management and the department head's title was changed from Vice President, Human Resources to Chief Human Capital Officer (CHCO). In addition, the name of HCM policy and procedure number 7.8.2 was changed from Employment Reference to Release of Employee Information. The name of the policy was changed to more closely reflect its purpose. HCM will continue to demonstrate its collaborative efforts by conducting additional review sessions to address recommendations and requests to further evaluate HCM practices, policies and procedures.

To locate the revised policy changes, visit the company Intranet → Employees → Policies → Amtrak Policy and Instruction Manual (APIM) → 7.0 Human Capital Management.

Amtrak Guest Rewards "Double Days" Promotion

Amtrak Guest Rewards (AGR) has announced a "Double Days" offer allowing members to earn double points on qualifying Amtrak travel from September 5, 2012, through November 16, 2012. Members must register for this offer online at AmtrakGuestRewards.com/DoubleDays to participate. Terms and conditions apply.

HCESC Did You Know ...

The employee information portal can be used to view your pay stubs and make changes to your bank information.

- Pay stubs are available as far back as 2007.
- Bank information can be viewed, edited and a secondary bank added as needed.

If you need assistance navigating the employee portal, please contact the Human Capital Employee Service Center (HCESC) at 866-694-7372 or e-mail HRESC@amtrak.com.

Milestones Reached on the Niantic River Bridge Project

The Niantic River Bridge, located over the Niantic River between East Lyme and Waterford, Conn., serves as a key link for passenger and freight rail traffic along Amtrak's heavily traveled Northeast Corridor. No longer economically feasible to repair, the Amtrak-owned century-old bridge is in need of a full replacement. The project involves the construction of a new two-track, electrified railroad bascule (rolling lift) bridge across the Niantic River 58 feet south of its present location. The \$140 million replacement project is funded in part by the 2009 American Recovery and Reinvestment Act (ARRA) which appropriated \$1.3 billion to Amtrak for capital investment.

Last week, construction of the new Niantic River Bridge reached two major milestones. The old Track 1 and the old bridge were removed from service and the new Track 2 and the new bridge were introduced into service. The new Niantic River Bridge will replace one of the oldest movable bridges in the country, a two-track, bascule bridge that was built in 1907 and is one of five movable bridges along the Northeast Corridor between New Haven, Conn. and Boston, Mass.

Major work elements of the bridge replacement include: construction of new track alignments on both the East and West approaches to the bridge; expansion of the navigation channel beneath the bridge from 45 feet to 100 feet; and an increase in the vertical under-clearance above the water from 11.5 feet to 16 feet. In addition, sections of the Niantic Bay Overlook boardwalk will be reconstructed and the beach replenished. Once the new bridge is constructed and operational, the existing bridge will be removed. Construction is scheduled to be completed in May 2013.

Updates and information on the new [Niantic River Bridge Project](#) can be found on the company website: www.Amtrak.com → About Amtrak → Special Projects → ARRA Projects.

The First 40 Years, 1971-2011 Wins 6th National Video Award

Amtrak: The First 40 Years, 1971-2011, has won its sixth national video award. The program received an Award of Excellence, the highest honor given by the Videographer Awards. The Videographer Awards is one of the most coveted awards in the video industry.

The Award of Excellence was awarded to those projects the judges deemed were written, produced, shot and edited in an exceptional manner.

This documentary has received five other national awards: the AVA, Davey, Telly, MarCom and Communicator Awards.

September 24, 2012

Employee Benefits: 2013 Open Enrollment

Open Enrollment for 2013 benefits will be held from October 29 to November 16, 2012. During that period, employees can make changes to their benefit elections.

In 2013, Aetna will replace UnitedHealthcare as the healthcare service provider for Amtrak agreement-covered employees. This change is a result of the standard process Amtrak is required to follow as a recipient of federal financial assistance to ensure that services are obtained in a manner that promotes free and open competition. If you are an agreement-covered employee, watch for opportunities to learn more about Aetna and your 2013 benefit offerings through onsite meetings and recorded webcasts. In addition, an enrollment newsletter will be mailed to your home in early October.

Last year, Cigna was introduced as the healthcare service provider for non-agreement employees. In 2013, we will help employees make the most of their plan by utilizing the wellness tools Cigna offers to improve their health. In keeping with Amtrak's commitment to environmental stewardship and sustainability, this year's enrollment materials for non-agreement employees will be sent via email and are available online.

All employees can access the latest information about Open Enrollment at www.AmtrakBenefits.com.

Upcoming Civic Conversation

The ninth Amtrak Civic Conversation will take place on September 25-26 in St. Paul, Minn. Invitees include officials representing the states and cities on the *Empire Builder* from Williston, N.D., to Chicago including state DOTs, Congressional offices, CVBs, State Historic Preservation Offices and chambers of commerce.

The event kicks off at the historic St. Paul Union Depot (currently under renovation) with a tour and welcoming reception on September 25 and a full day of presentations on September 26 to include station case studies and success stories, information about funding sources and transportation-oriented development, and ADA requirements.

Employee Appreciation Day eCards

From September 24 – 28, Amtrak is celebrating Employee Appreciation Day with events across the country. Now you can thank your employees and co-workers for a job well done or wish them a Happy Employee Appreciation Day with an eCard. Visit <http://mtmrecognition.com/ecards/amtrak> for instructions.

HCESC Did You Know...

The Human Capital Employee Service Center (HCESC) processes changes to Amtrak's organizational structure.

Managers submitting changes to their organizations through Manager Self Service will see their requests reflected on Org Plus the very next day. Org Plus is an electronic organizational chart that is updated nightly via an information feed pulled directly from SAP, Amtrak's system of record. It is recommended to view your organization in Org Plus daily to ensure it is accurate. To access Org Plus from the Intranet, click on Library → Org Charts.

Drug & Alcohol Policy Reminder

Amtrak is a drug- and alcohol-free workplace and it is the responsibility of all employees to be knowledgeable of Amtrak's policy and procedures for maintaining a safe work environment for employees and our customers. Please read the following documents found on the Intranet under "Safety" → "Health" → "Health and Medical Services":

- Amtrak Drug and Alcohol Policy 7.3.0 and Guidelines
- 49 CFR Part 40 Procedures for Transportation Workplace Drug and Alcohol Testing Programs
- 49 CFR Part 219- Control of Alcohol and Drug Use
- 49 CFR Part 382- Controlled Substance

In addition, Amtrak encourages employees to support the Drug Enforcement Administration's "*National Prescription Drug Take-Back Day*" on Saturday, September 29.

On this day, government, community, public health and law enforcement partners will work together to collect expired, unused and unwanted prescription drugs. To locate local community prescription drug collection sites, visit www.GetSmartAboutDrugs.com and click the "Got Drugs?" icon, or call 1-800-882-9539. The service is free and anonymous.

As a reminder, employees taking prescription medications that have the potential to interfere with the safe performance of their job duties must complete form NRPC 3133 "Authorization to Work with Medications," and submit it to Health Services Medical. For more information, call 215-728-2389 or leave a message on Health Services Drug and Alcohol Program's confidential Employee Hotline at 202-906-2255. Information can also be found on the Intranet under "Safety" → "Health" → "Health and Medical Services" → "Over-The-Counter and Prescription Drugs."

Amtrak Launches History Website

Amtrak recently launched a new website, History.Amtrak.com, dedicated as an extensive archive to the company's rich history.

The site features a collection of historic photographs, ads, route guides, timetable covers and other resources from employees that celebrates Amtrak's more than 40 years as the nation's intercity passenger rail provider. The public is encouraged to share their memorabilia by using the contact link on the site where directions will be provided on how to provide specific items.

In addition to the archives, the site offers a guided tour through Amtrak's history by decade and how it became America's Railroad®. A frequently updated blog provides year-by-year highlights, a look at recently uploaded items and a recap of the our 40th anniversary Exhibit Train's cross-country journey in 2011 and 2012.

PSSA: This is the last week to submit nominations for the 2012 President's Service and Safety Awards. In order to be considered by the PSSA Committee, nominations must be received by Friday, June 22. Nomination forms are posted on the intranet and can be found at "Employees" → "Awards and Achievements" → "President's Service and Safety Awards."

Guide to Archived Milestones in *Ink*

During the time *Amtrak Ink* was out of print, the employee Milestones were posted on the Amtrak intranet. Those Milestones will also be featured in future issues of *Ink* beginning with the most-senior January anniversaries until all missed Milestones have been recognized in print.

Please check the magazine each month for the January 2012 to April 2012 Milestones. Below is a guide to when each Milestone will run. This list is subject to change according to space allotted in the magazine.

- **July 2012 Issue:** January 35-year anniversaries & December retirees
- **Aug./Sept. 2012:** January 35-, 30-, 25 and 20-year anniversaries
- **October 2012:** February 35-year anniversaries & January retirees
- **November 2012:** February 30-, 25 and 20-year anniversaries
- **December 2012/January 2013:** March 2012 35-year anniversaries & February retirees
- **February 2013:** March 2012 30-, 25 and 20-year anniversaries
- **March 2013:** April 2012 35-year anniversaries & March retirees
- **April 2013:** April 2012 30-, 25 and 20-year anniversaries

Changes to Medical Leave of Absence (MLOA) Process

Recent changes have been made to the medical leave of absence (MLOA) process, and to the National Railroad Passenger Corporation (NRPC) Form 2717, Treating Physician Medical Status Report/Statement of Disability. These changes were made to simplify the documentation required when employees are returning to work from a medical leave of absence from six to nine days.

- When you are ready to return to work after being absent six days or more for medical reasons, you must be cleared to return to work by your physician/health care provider.
- If you have been absent six to nine days, and released to full duty, a physician/healthcare provider's note will be accepted in order to return to work.
- For absences of 10 days or more, your physician/healthcare provider must complete Form 2717, including the "Returning to Work Status" section.

NRPC Form 2717 has also been revised to require the employee and the healthcare provider to certify the truth and accuracy of the reported information. Complete details are available on the intranet under "Employees" → "Employee Info" → "Health and Medical Services." Form 2717 can be found on the intranet under "Library" → "Forms". Employees should destroy any old versions of the form and only use the new version.

Message to Photographers: Stay Safe and Stay Away from Railroad Tracks

During this busy summer season of weddings and other festive events, Amtrak and Operation Lifesaver — the rail safety education nonprofit organization — would like to remind our employees and professional photographers to avoid using train tracks as venues for photo shoots.

Using train tracks as a backdrop for portraits is not only dangerous, it is illegal when you are trespassing on private railroad property. About every three hours in the U.S., a person or vehicle is struck by a train, and these collisions can have deadly consequences. Amtrak and Operation Lifesaver are committed to eliminating needless injuries and deaths resulting from incidents at railroad crossings. To view an Operation Lifesaver presentation for photographers on the intranet, go to "Safety" → "Operation Lifesaver".

Amtrak® Employee Update

Operation RedBlock (ORB) would like to wish everyone a safe and happy holiday. OBR is a labor-developed, company-adopted drug and alcohol prevention and intervention program.

Please remember Operation RedBlock is here to help. Our Labor Coordinators are available 24/7 to provide assistance. Operation RedBlock is offered to all Amtrak employees.

For **CONFIDENTIAL** mark-offs please call 1-800-44R-BLOC (1-800-447-2562).

"Saving jobs and saving lives"

When was the last time you looked at your retirement plan?

As a valued partner, we strive to keep you informed about Fidelity resources in your area. Diane Bolden will be available on the following dates for a one on one consultation.

If any of the questions below sound familiar, maybe it's time to schedule a meeting.

- I know I'm participating, but how much am I contributing? What are the limits?
- I think I ignored my retirement account when I left my last job, what should I do about that?
- I am confident about my retirement contributions and portfolio, what else should I be doing?
- I'm counting the days until I retire, but what should I do to prepare for it?

<u>Date</u>	<u>Time</u>	<u>Location</u>
Monday, January 30	9:00 A.M. to 3:00 P.M.	Amtrak - Washington DC 10 G Street Conference Room 10 4W143
Tuesday, January 31	8:30 A.M. to 2:30 P.M.	Amtrak - Washington DC Union Station Starlight Room Gate D

Why Fidelity?

As one of the nation's leading providers of retirement savings plans for not-for-profit institutions, Fidelity Investments has more than 50 years of experience helping people save for their future. Our Workplace Planning and Guidance Consultants understand that one-size-fits-all just doesn't fit all.

Schedule your confidential consultation today!

Memo

Date January 24, 2012
To Amtrak Employees

From Joseph H. Boardman
Department President and CEO
Subject Cooperation with OIG
cc Chairman Tom Carper
Amtrak Inspector General Ted
Alves

Message As Amtrak enters 2012, I want once again to ensure that all Amtrak employees, contractors, and vendors understand the role of Amtrak's Office of Inspector General (OIG), and to address how I expect everyone who works for or with Amtrak to interact with the OIG. To that end, I am re-issuing my September 29, 2010, memorandum to all Amtrak employees, including the attachment. Please take a few minutes to re-familiarize yourself with the issues addressed in this memorandum.

Additionally, I want to emphasize the responsibility of those who work for or with Amtrak and who observe or become aware of crime, fraudulent acts, gross waste of funds, abuse of authority, violations of rules or regulations, or significant mismanagement by an Amtrak employee, contractor, or vendor, or receive an allegation concerning such conduct. It is imperative that any Amtrak employee, contractor, or vendor who observes such conduct or receives an allegation make a report personally by:

- contacting any OIG employee;
- calling the OIG Hotline at (800) 468-5469, which has been established specifically for receiving confidential reports;
- mailing information to the Amtrak Inspector General, P.O. Box 76654, Washington, D.C. 20013; or
- sending a message to the Amtrak OIG through its website: www.amtrakoig.gov.

In order to ensure free and unimpeded access to the OIG, an employee, contractor, or vendor may ask for confidentiality, which will be provided under the terms of the Inspector General Act. Amtrak employees are not required to report their contacts with the OIG to their supervisors.

Following are some typical examples of various matters involving fraudulent acts, criminal activity, gross waste of funds, and abuse of authority or mismanagement that you should report to the OIG:

- theft of Amtrak property;
- embezzlement of Amtrak funds;
- submission of false or fraudulent claims against Amtrak, including employee claims related to healthcare services, claims under the Federal Employers' Liability Act, and vendor or contractor claims for payment;

- contractors or vendors;
- provision of information to vendors or bidders that provides recipients with an unfair advantage over other competitors in the procurement process;
- submission of false or fraudulent documents, such as time cards, with substantial unnecessary or inflated overtime, and travel reports with suspect or inflated reimbursement expenses; and
- procurement/contract fraud involving product substitution, duplicative or unnecessary purchases of high-dollar items, duplicative or inflated billings/invoices/payments to contractors or vendors, and/or unnecessary sole-source contracts with vendors or third parties.

To be clear, these examples are not exhaustive, but illustrative of the types of matters that Amtrak employees and those we work closely with should report to the OIG if observed or are alleged to have occurred.

As you may note from these examples, the OIG works most effectively when it is informed of potential transgressions or wrongdoing at an early stage. Regardless of when one becomes aware of potential fraud, waste, abuse, or mismanagement, however, all Amtrak employees, contractors, and vendors remain obligated to contact the OIG and to cooperate fully during the course of its investigation.

The following examples may help guide you regarding whether to contact the OIG:

- As a supervisor, you are involved in administrative disciplinary proceedings to resolve a situation in which an employee has stolen or embezzled Amtrak funds. You should notify the OIG when you become aware of the allegations. In any event, before taking disciplinary action, finalizing a waiver or other administrative action, you should contact the OIG.
- An employee approaches you complaining that his or her paycheck is short and that he or she was not paid the proper amount. It is not necessary to contact the OIG in this circumstance unless there is a pattern, practice, or trend of suspected fraud involving the payroll system/process/staff over a period of time.
- You have been informed or suspect that an employee may be stealing or embezzling funds, even though you do not have firsthand knowledge. You should immediately report what you have learned to the OIG and await guidance before taking disciplinary action.
- You have heard rumors or received unconfirmed information that Amtrak is about to do or has done business with a contractor or vendor who:
 - is affiliated with a former or current employee,
 - is providing services or products without an appropriate contract or statement of work, or
 - has not gone through the proper procurement or competitive bid process.

You should immediately report what you have learned to the OIG.

- You become aware of certain vendors or suppliers who are providing products or items that consistently fail to perform or fail to meet required specifications. You should immediately report what you have learned to the OIG.

If you have questions on ethical or safety related matters, or believe that you are a victim of

discrimination in violation of Amtrak's Anti-Harassment Policy, you do not need to report this to the OIG, and should follow the Company's process of reporting to your supervisor, Human Resources, the EEO Compliance Unit in the Law Department, or the Amtrak Help-Line at (866) 908-7231, or www.reportlineweb.com/Amtrak.

All offices are expected to review their policies and procedures related to interaction with the OIG and must conform to this guidance.

If you have any questions about this guidance, please contact Amtrak's General Counsel, Eleanor D. Acheson, at ATS 777-2198, or the OIG General Counsel, Colin Carriere, at ATS 777-4355.

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

1.0 PURPOSE

To establish the responsibility and authority of the Amtrak Office of Inspector General ("OIG"), the general principles for ensuring a productive relationship between the OIG and the rest of the company, and to summarize the process followed by the OIG when conducting audits, evaluations, and investigations.

2.0 SCOPE

This policy applies to all Amtrak employees, contractors, programs, and operations.

3.0 RESPONSIBILITY

The head of Amtrak and the Amtrak Inspector General ("Inspector General") are responsible for the interpretation and administration of this policy. As of the date of this policy, the "head" of Amtrak is defined as the Board of Directors of Amtrak (the "Board").

4.0 AUTHORITY AND RESPONSIBILITIES OF THE OIG

4.1 Mission of the OIG. The Inspector General Act of 1978, as amended (5 U.S.C. Appendix 3), hereinafter "IG Act," established the OIG as an independent and objective unit within Amtrak to:

- (a) Provide policy direction for and to conduct, supervise, and coordinate audits and investigations relating to Amtrak programs and operations;
- (b) Provide leadership and coordination and to recommend policies for activities designed (1) to promote economy, efficiency, and effectiveness in the administration of, and (2) to prevent and detect fraud and abuse in Amtrak programs and operations;
- (c) Review existing and proposed legislation and regulations relating to Amtrak programs and operations and make recommendations in its semiannual reports concerning their impact on the economy and efficiency in the administration of programs and operations administered or financed by Amtrak or the prevention and detection of fraud and abuse in such programs;
- (d) Keep the Board of Directors and Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by Amtrak, recommend corrective action concerning such problems, abuses, and deficiencies, and report on the progress made in implementing corrective actions.

4.2 Establishment of the OIG.

- (a) The Inspector General is appointed by the Board of Directors without regard to political affiliation, and solely on the basis of integrity and demonstrated

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations.

- (b) The Inspector General reports to and is under the general supervision of the Board of Directors and is not subject to supervision by any other officer or employee of Amtrak. The Board of Directors cannot prevent or prohibit the Inspector General from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.
- (c) The Inspector General serves as a non-voting, ex officio member of the Executive Committee. This is an important mechanism to foster open communications and facilitate the exchange of information. It allows the IG to be aware of management issues and concerns and to provide appropriate input for management to consider. The IG's role will be limited and subject to the following conditions:
 - (1) The IG will not be a voting member;
 - (2) The IG will not perform programmatic functions or roles, which are proscribed under the IG Act;
 - (3) The IG's participation will be in a mutually agreed capacity, which allows the IG to decide not to attend certain meetings, or Amtrak management to elect to conduct meetings or segments of meetings, without the IG's presence;
 - (4) Both the IG and Amtrak management will respect the IG's statutory requirement to maintain independence and objectivity and will not request participation or agreement with respect to any matter that would impair or compromise that independence or objectivity;
 - (5) The IG will not make management decisions or perform management functions.
- (d) If the Inspector General is removed from office or is transferred to another position or location within Amtrak, the Board of Directors must communicate in writing the reasons for the removal or transfer to both Houses of Congress, at least 30 days before the removal or transfer. The Board of Directors can also take other personnel actions authorized by law.
- (e) The Board of Directors also provides the OIG with appropriate and adequate office space at central and field office locations of Amtrak, together with needed equipment, office supplies, communications facilities and services, and necessary maintenance services.

4.3 Authority of the Inspector General. In carrying out the provisions of the IG Act, the Inspector General is authorized to:

- (a) Conduct audits and investigations and issue reports relating to Amtrak programs and operations that, in the judgment of the Inspector General, are necessary or desirable;
- (b) Have access to all Amtrak records, reports, audits, reviews, documents, papers, recommendations, or other material available to Amtrak which relate

APPROVED	REVISION NO.	SUPERSEDES	PAGE

Office of Inspector General	Inspector General	November 1, 2011	2.1.3

to programs and operations with respect to which the Inspector General has responsibilities;

- (c) Request such information or assistance as may be necessary to carry out the duties and responsibilities provided by the IG Act from any Federal, State, or local governmental agency or unit thereof;
- (d) Require by subpoena the production of information, documents, reports, answers, records, accounts, papers and other data needed to accomplish the functions assigned by the IG Act (procedures other than subpoenas will be used by the Inspector General to obtain documents and information from Federal agencies). Because the Inspector General has access to all Amtrak information, subpoenas are not used to obtain documents and information from Amtrak;
- (e) Administer oaths, affirmations, and affidavits, when needed to carry out the functions assigned by the IG Act;
- (f) Have direct and prompt access to the Board of Directors when necessary for any purpose pertaining to the performance of functions and responsibilities under the IG Act; and
- (g) Enter into contracts and other arrangements for audits, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of the IG Act.

5.0 GENERAL PRINCIPLES GUIDING RELATIONSHIPS WITH THE OIG

5.1 To work together most effectively, the OIG and Amtrak's management, employees, and contractors should:

(a) Interact with professionalism and mutual respect.

- (1) Representatives of Amtrak's management and the OIG should always act in good faith and expect the same from the other.
- (2) Amtrak's management and the OIG share as a common goal the successful accomplishment of Amtrak's mission.

(b) Ensure mutual respect for each mission.

- (1) Amtrak's officers, directors, employees, and contractors should recognize the OIG's primary responsibility and authority to conduct independent and objective audits, evaluations, and investigations of Amtrak programs and operations, and the OIG's responsibility to report to both the Board of Directors and the Congress.
- (2) The OIG will seek to carry out its work with a minimum of disruption to the primary mission of Amtrak.
- (3) Amtrak's management will promptly notify the OIG in the event that it initiates reviews or examinations related to fraud or waste which could be the subject of an OIG audit, investigation, or inspection. Once notified, the Inspector General will determine whether it is a matter subject to the jurisdiction of the OIG and respond promptly to management to determine how to proceed. To the extent the Inspector General deems appropriate, the OIG will coordinate with the responsible

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	3

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

department where management is engaged in a review or examination or litigation involving matters of common interest to the OIG and management.

- (4) If, in the course of its work, the OIG discovers facts or circumstances related to safety or other matters which have some immediacy or may cause significant business or legal harm to the company unless management is notified and given the opportunity to intervene, the Inspector General will, at his discretion, notify and coordinate with appropriate Amtrak managers or the department head in order to address safety issues quickly or to limit significant business or legal harm.

(c) Foster open communications at all levels.

- (1) The OIG's access to information, records, facilities and people must be unimpeded. Amtrak's employees, contractors, and representatives should promptly respond to OIG requests for information to facilitate OIG activities.
- (2) Amtrak managers will be forthcoming in recognizing the existence of challenges that the OIG can help to address.
- (3) Surprises are to be avoided. The OIG will seek to avoid undertaking its work or presenting its findings without reasonable notice to management and management will keep the OIG informed of significant challenges and problems.
- (4) With limited exceptions, primarily related to criminal investigations, the Inspector General will keep the President and the Board of Directors advised of its work and its findings on a timely basis, and the OIG will provide information helpful to Amtrak's management at the earliest possible stage.
- (5) Because some OIG investigations may involve allegations of criminal misconduct or other need for confidentiality, circumstances will dictate whether, and what type of, notice will be given. This will be at the discretion of the Inspector General, with consideration of all factors of confidentiality, sensitivity, and investigative techniques.

(d) Be thorough, objective, and fair.

- (1) The OIG will perform its work thoroughly, objectively, and with due consideration of the point of view of Amtrak's management.
- (2) When working with the OIG, Amtrak's management and staff should objectively consider differing opinions and alternative ways to improve operations.
- (3) Both the OIG and other departments of Amtrak should recognize successes in addressing management challenges and advancing Amtrak's mission.

(e) Respect confidential information.

- (1) The OIG will respect Amtrak's need to protect confidential, sensitive, or privileged information from inappropriate disclosure, while meeting OIG's obligation to report to the Department of Justice, external oversight entities such as Congress, and the public.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	4

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

- (2) The terms confidential, sensitive, and privileged will be accorded the meanings ascribed to them under the Freedom of Information Act (FOIA).
 - (3) Other than the Department of Justice, in disclosing to external oversight entities (such as the Congress, Department of Transportation, OMB, and GAO) or other law enforcement entities, information that may be confidential, sensitive or privileged, the OIG will notify the recipient entities of the confidential, sensitive, or privileged nature of the information and request that they treat the information with the level of protection set forth under the FOIA or as otherwise required by law. If the IG believes there is a significant risk that the information could be released inappropriately, he may, at his discretion, consult with the appropriate department head to ensure that the company's interests are protected.
 - (4) The process to determine the sensitivity of information included in OIG audit, evaluation, and investigative reports that will be subject to public release is described in sections 6 and 7 below.
- (f) Be engaged.**
- (1) The OIG, Amtrak's management, and the Board will work cooperatively to identify the most important areas for OIG work, as well as the best means to address the results of that work, while maintaining the OIG's required independence.
 - (2) Amtrak's leadership will recognize that the OIG's limited resources must also be applied to address work that is initiated by the OIG, requested by members of Congress, or mandated by law or regulation.
- (g) Facilitate the exchange of information.**
- (1) The OIG will keep abreast of Amtrak's programs and operations, and keep Amtrak's management and Board informed of OIG activities and concerns that are raised in the course of the OIG's work.
 - (2) Amtrak's management and Board should ensure that the OIG is kept up to date on current matters and events affecting Amtrak or that may affect it in the future.
 - (3) Amtrak and the OIG will implement mechanisms, both formal and informal, to ensure prompt and regular feedback.
 - (4) All Amtrak employees, contractors, and representatives should understand that the OIG is the primary entity within Amtrak to address issues or concerns related to fraud or abuse; and that they have a responsibility to report suspected violations of the law or Amtrak policy that could result in fraud or abuse.
 - (5) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions.
 - (6) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful authority.

6.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND THE OIG ON INVESTIGATIONS

6.1 General Investigative Process.

- (a) The OIG determines whether it will initiate an investigation once it receives an allegation regarding fraud, abuse, criminal action, or other wrongdoing. Allegations originate from various sources including employees, vendors, Congress, federal agencies, and prosecutors. The OIG may also initiate investigations proactively to ensure that Amtrak is not being subject to fraud, waste, or abuse.
- (b) The investigative process generally involves: (1) determining the basis for an allegation; (2) analyzing the issues involved; and (3) obtaining relevant, objective evidence from individuals and entities, in the form of interviews, documents, tangible objects, and data.
- (c) The OIG follows the Quality Standards for Investigations (issued by the Council of the Inspectors General on Integrity and Efficiency ("CIGIE")) to guide its investigative activity.
- (d) Allegations are reviewed and screened and resources are allocated based on, among other things, the seriousness of the allegations, potential harm to Amtrak or the public, whether a violation of a statute or regulation likely occurred, and the effect of the alleged illegal or improper activity on Amtrak programs and operations.
- (e) If the OIG determines that an investigation should be undertaken, it seeks to obtain all relevant facts by examining documents and other tangible materials and interviewing individuals. When appropriate or required by law, the OIG informs subjects of their legal rights, including the right or opportunity to remain silent and to obtain legal counsel.
- (f) The process may result in one or more of the following OIG actions: administrative report to management, referral to a prosecutor for consideration, or closing the investigation.
- (g) When the investigation substantiates a wrongful act which is considered administrative, the OIG usually prepares an investigative report, which describes the allegation, the factual evidence to support its findings, and recommendations. This report is submitted to management for a written response. These administrative reports often recommend that management take action, but usually do not recommend specific disciplinary action. Privacy concerns usually restrict these reports from public release.
- (h) If an issue identified in an investigative report is a recurring or systemic problem, the OIG may also identify this broader problem to managers and, usually, make recommendations for management to consider in addressing the problem. Management normally is given an opportunity to provide comments before the report is issued. The process for obtaining comments and issuing the report is described in Section 7.2(h).

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	6

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

- (i) If there is evidence of criminal wrongdoing, the OIG presents the report to the Department of Justice or other appropriate prosecutors for their consideration. This may lead to prosecution of the subject(s) in Federal, state, or local court. In cases where there is evidence of criminal wrongdoing, the Inspector General may, in his/her discretion, also refer the report to management for administrative action.

6.2 Requirements And Responsibilities.

(a) **OIG.**

- (1) The Inspector General shall not, after receipt of a complaint or information from an employee, disclose the identity of the employee without the consent of the employee, unless the Inspector General determines such disclosure is unavoidable during the course of the investigation.
- (2) The OIG will ensure that Amtrak's confidential, sensitive, or privileged information as defined in section 5.1(e) above is not inappropriately disclosed by OIG employees.
- (3) Circumstances when the OIG will disclose such information include:
 - (A) referrals to appropriate agencies for law enforcement purposes;
 - (B) disclosures under court order;
 - (C) responses to requests by Congress; and,
 - (D) referrals to other agencies that may have cognizance over the matter.
- (4) The OIG will usually honor an employee's request that counsel be present during an interview. The counsel may not be another employee of Amtrak, paid for by Amtrak (unless approved in accordance with Amtrak's Bylaws and policies), a potential subject, or a witness in the case.
- (5) Employees who allege that action was taken against them as reprisal or retaliation for cooperating with or disclosing information to the OIG while they were employed at Amtrak may request the OIG to investigate their reprisal or retaliation allegations.

(b) **Amtrak Management, Employees, and Contractors.**

- (1) All Amtrak employees must comply with requests for interviews and briefings.
- (2) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions or penalties.
- (3) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful appropriate authority.
- (4) In the context of investigations, managers should not question staff about their interactions with the OIG.
- (5) Any employee who makes a complaint to the OIG with the knowledge that the complaint is false or that it is made with willful disregard for the

Office of Inspector General	Inspector General	November 1, 2011	2.1.3

truth of the information may be held accountable for such statements and may be subject to disciplinary action or criminal prosecution.

7.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND OIG ON AUDITS AND EVALUATIONS

7.1 Types of Audits and Evaluations. The OIG conducts audits and evaluations of Amtrak programs and operations, including performance of contractors. Some audits and evaluations may be specifically required by statute.

- (a) An audit is an independent, formal, and methodical examination of an organization, program, function, or activity, designed to help Amtrak accomplish its mission efficiently and effectively. OIG audits are performed in accordance with Government Auditing Standards (commonly called the Yellow Book).
- (b) Evaluations are reviews of an organization, program, function, or activity. Evaluations are performed in accordance with the Quality Standards for Inspections issued by the CIGIE.
- (c) Audits and evaluations may include financial or performance reviews.
 - (1) Financial reviews include financial statement audits and any other financially related reviews related to Amtrak's financial operations.
 - (2) Performance reviews include evaluating whether Amtrak programs and operations are working efficiently and effectively as well as whether programs are achieving expected results.
- (d) The OIG also routinely gathers information and data but does not use that information in a formal audit report. These activities may be in response to a congressional inquiry, a request for testimony, or routine planning purposes. Normally, OIG staff members assigned to these activities directly contacts responsible managers to collect information. The assigned OIG staff will inform management of the nature of the data gathering effort.

7.2 Audit and Evaluation Processes. The audit and evaluation processes involve the following steps:

- (a) **Audit or Evaluation Planning.** The OIG often conducts informal research to help it develop audit or evaluation plans or to better understand emerging issues. Audit plans outline potential reviews to be conducted, the objectives of each review, and the resources required to conduct them. In developing the audit or evaluation plan for the year, the OIG considers the following:
 - (1) Issues that may pose a risk to or would promote Amtrak's mission;
 - (2) Objectives of Amtrak's Board and senior managers; and
 - (3) Objectives of Congress.
- (b) **Notification.** The OIG will notify responsible management officials of its intent to begin a review.
- (c) **Entrance Conference.** As a general practice, the OIG will request an entrance conference with responsible management officials to advise them of

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	8

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

the objectives and scope of the review and the general methodology that will be followed, and to solicit input from Amtrak officials.

- (d) **Survey.** In some cases, particularly for large or complex reviews, the OIG will perform initial research to refine the objectives, determine the scope, and develop a sound methodology.
- (e) **Field Work.** The OIG analyzes selected areas of a program, activity, or function. It obtains sufficient evidence to support the findings and conclusions and to make recommendations. Frequent interaction with responsible managers and employees occurs during fieldwork.
- (f) **Exit Conference.** Prior to the issuance of a draft audit or evaluation report, the OIG will contact the responsible management official to set up an exit conference to discuss the results of the work. In some cases discussion draft reports or fact sheets are used to facilitate the discussion. The OIG strives to maintain an open channel of communication with managers to ensure that findings, conclusions, and recommendations are accurately and fairly presented in the report.
- (g) **Draft Report.** The OIG provides a draft report to the Audit Liaison, responsible managers of audited organizations, and Amtrak departments affected by the audit findings for their review and comment. The draft report will have been approved by OIG management and will contain the objectives, results, conclusions, and recommendations resulting from the OIG's audit or evaluation.
- (h) **Management Response.** Responsible management officials are normally provided 30 days to respond in writing to the draft report, indicating how they plan to address the findings and recommendations contained in the report. In some cases, the OIG requests a quicker response. Extensions to the established due date will be granted by the responsible Assistant Inspector General.
 - (1) Comments should clearly indicate whether responsible management officials concur with each of the recommendations.
 - (2) Concurrence is when management agrees to implement the recommendation or to take an alternative action that will correct the deficiency, along with actual or estimated completion dates.
 - (3) Nonconcurrence is when management does not agree to implement the recommendation or an acceptable alternative. In this case, management should explain the rationale, and include additional facts, if necessary.
 - (4) Management should also identify any information contained in the report that should be protected from public release on the basis that its release may cause significant business or legal harm to Amtrak (the information so designated must not be subject to public release pursuant to the Freedom of Information Act, as amended, 5 U.S.C. § 552). The responsible manager should also weigh the public benefit of transparency against the harm, or potential harm, to company interests, in light of the fact that the company receives Federal subsidies.
 - (5) With respect to decisions regarding confidential, sensitive or privileged information, the Inspector General will follow the standard set forth in

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	9

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

Section 5.1(e) above. If the OIG disagrees with management's assertion that specific information should be withheld from public release because it is confidential, sensitive, or privileged, the IG will confer with the responsible department head regarding the need to redact the information before publicly releasing the report. If so requested, the department head has one week to articulate in writing to the IG the bases or reasons for protecting the information from disclosure, including identifying the significant business or legal harm anticipated compared to the benefit of transparency. If, following that consultation, the IG determines that the information should be publicly released, he will consult with the Chair before including such information in a publicly released report.

- (i) **Final Report.** The OIG will amend the draft report, as appropriate, based on management's response. The Inspector General makes final determinations about what information will be included in the issued report. The OIG also normally includes the entire management response, along with the OIG's analysis of the response in the final report.
- (j) **Report Distribution.** The OIG usually distributes audit and evaluation reports to the Chairman, other Board members, responsible management officials, and Congress. Final reports are normally public documents and are available on the OIG Web site.
- (k) **Recommendation Follow-up.** Amtrak managers are responsible for implementing OIG recommendations to the extent there is concurrence, and OIG staff and Amtrak's Audit Liaison monitor managers' actions to ensure that recommendations are implemented in a timely manner.

7.3 Audit and Evaluation Process Responsibilities.

(a) **Audit Liaison.**

- (1) The Audit Liaison is an individual, or individuals, designated by Amtrak management to perform the functions outlined in this section.
- (2) Facilitates OIG audits and evaluations with Amtrak management. In this role, the liaison ensures that Amtrak managers are aware of OIG reviews and that OIG staff is provided with initial contacts to begin the review process.
- (3) Coordinates entrance and exit conferences with appropriate Amtrak managers.
- (4) Follows up with Amtrak managers to track the status of management actions to implement OIG recommendations.
- (5) Ensures that management's response to draft reports is coordinated with affected departments, is approved by the head of the audited department or organization and is completed in a timely manner.

(b) **Inspector General Managers.**

- (1) Notifies responsible management officials of the intent to begin a review.
- (2) Contacts responsible management officials and the audit liaison to schedule entrance conferences and exit conferences.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	10

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	November 1, 2011	2.1.3

- (3) Provides copies of draft reports to the Audit Liaison, responsible management officials of audited organizations, and Amtrak departments affected by audit findings.
- (4) Reviews and evaluates management response to the draft report and, as appropriate, either revises the report or provides the OIG's analysis of the response in the final report.
- (5) Grants extensions to the established due date for management comments.
- (6) Distributes final reports to the Audit Liaison and the appropriate Amtrak departments, and makes further distribution to authorized committees and subcommittees of Congress and the public.
- (c) **Responsible Management Officials.** To maximize the value of OIG reports, management officials or their designees will:
 - (1) Attend exit conferences, unless they are waived by agreement with the OIG.
 - (2) Prepare responses to draft OIG reports.
 - (3) State in the proposed management decision whether they concur with the recommendations presented in the corresponding audit or evaluation report or propose alternative actions to correct the deficiency. For nonconcurrences, explain why management does not concur and present additional facts, if necessary.
 - (4) Take prompt and effective action to implement agreed-upon corrective actions.

8.0 OTHER POLICIES

- 8.1 The presumption is that this policy will take precedence in instances where other policies are inconsistent with this policy. When inconsistencies are identified, OIG and management will consult and reconcile differences.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Amtrak Board of Directors By its Chairman, Thomas Carper		2.1.2	11

Memo

Date September 29, 2010
To Amtrak Employees

From  Joseph Boardman
Department President and CEO
Subject Cooperation with OIG
cc Chairman Tom Carper
Amtrak Inspector General Ted Alves

Message As Amtrak approaches FY 2011, I want to ensure that Amtrak managers and staff understand the role of Amtrak's Office of Inspector General (OIG) and to address how I expect Amtrak personnel to interact with the OIG. This memorandum describes the mission of our OIG, its undertakings and Amtrak employees' obligations to the OIG, all as more fully addressed in the "relationship" policy promulgated on March 4, 2010, a copy of which is attached.

As background, the Fiscal Year 2010 Consolidated Appropriations Act (Public Law 111-117) called for an Inspector General (IG) who is a member of the Council of the Inspectors General on Integrity and Efficiency (CIGIE) to determine that Amtrak and the company's Inspector General have agreed upon a set of policies and procedures for interacting with each other that are consistent with the letter and the spirit of the Inspector General Act of 1978, as amended. Amtrak and the Inspector General reached agreement on a set of policies and procedures that we believe are consistent with the letter and spirit of the IG Act.

Carl Clinefelter, Inspector General of the Farm Credit Administration and a CIGIE member, evaluated those policies and procedures as required by the Appropriations Act and determined:

that the Corporation and the IG have agreed to a set of policies and procedures for interacting with each other that are consistent with the letter and the spirit of the Inspector General Act of 1978, as amended (IG Act). As a result, they are now positioned to build a constructive relationship that will enable the Amtrak Office of Inspector General (OIG) to operate unhindered in its role of: 1) promoting economy, efficiency, and effectiveness, 2) preventing and detecting fraud and abuse, and 3) providing a means for keeping the head of the entity and Congress fully and currently informed about the problems and deficiencies relating to Amtrak's programs and operations. Amtrak will benefit by having a properly functioning OIG that remains independent of Corporation programmatic activities and, thus, able to provide objective assessments and recommendations regarding Amtrak operations.

I believe that these new policies and procedures are already helping to rebuild the relationship between Amtrak and the OIG.

The OIG serves as an independent and objective unit within Amtrak, playing an important role in preventing and rooting out fraud, waste, mismanagement and abuse in Amtrak programs and operations. The OIG also endeavors to improve the efficiency of our programs and operations through the performance of audits, evaluations and inspections. To carry out its statutorily required function, the OIG necessarily requires, on a regular basis, information and assistance from Amtrak managers and staff.

It is imperative that, upon request, Amtrak personnel provide OIG auditors, evaluators and investigators with full and unrestricted access to personnel, facilities, records (including, but not limited to, reports, databases and documents), and any other information or material that is needed by the OIG to accomplish its mission. Unrestricted access means that managers and staff are not to impose burdensome administrative requirements or screening procedures that could impede OIG access to needed employees and materials. Management should not attempt to control or influence the free flow of information to and from the OIG or to frustrate the full and unfettered exchange between Amtrak personnel and the OIG.

My expectation is that we will cooperate with the OIG as follows:

1. Managers and staff are to expeditiously provide materials responsive to an OIG request;
2. Materials should be provided to the OIG in the manner requested, rather than routed through an intermediary for review prior to disclosure;
3. Amtrak managers and staff must not conceal information or obstruct OIG audits, investigations or other inquiries. Doing so is against Amtrak policy, and may be in violation of federal law;
4. At any time, the OIG may have access to available information such as policy, guidance, procedures or existing reports and other general information to focus its plans. In the context of specific OIG audits, evaluations or other reviews, the OIG will ordinarily issue a notification letter or kick-off memo to Amtrak management announcing the objectives of the OIG activity. Frequently, a meeting will be scheduled with Amtrak management and the OIG staff to discuss the activity. Under all circumstances, Amtrak managers and staff are to provide complete cooperation upon receipt of such notification; and
5. Amtrak staff are not required to obtain permission from or inform managers before they speak with OIG representatives during audits, evaluations, investigations or other OIG reviews. Staff may, at their own discretion, contact their manager with any questions regarding their responsibility to cooperate with the OIG or their scheduling of meetings with the OIG, unless, in the context of an investigation, they are instructed otherwise by the OIG. In the context of investigations, managers should not question staff about their interactions with the OIG. It should also be clear that any employee who attempts to retaliate against another employee for cooperating or assisting the OIG may be subject to disciplinary action up to and including termination.

The OIG, for its part, has indicated its intent to respect the multiple demands made upon Amtrak managers and staff and, to the extent possible, to seek to accommodate scheduling difficulties or other time constraints that managers and staffs might face. Also, the OIG is committed to honoring requests for confidentiality to the extent permitted by the law and to

handling all Amtrak documents and information in an appropriate manner.

To ensure that reports from audits, evaluations and other reviews (collectively referred to here as "audits") are fairly prepared and presented, the OIG staff will endeavor to provide management with significant opportunities for interaction. To this end, an audit will ordinarily begin with an entrance conference or kick-off meeting and will ordinarily conclude its active phase with an exit conference. Management should attend both entrance and exit conferences and make its views and concerns known. At any time during the course of the audit, Amtrak management may request and meet with the OIG staff to discuss the audit, provide information to clarify management assertions and discuss status and any concerns.

The OIG intends to solicit Amtrak management for input regarding accuracy and tonal quality frequently during the audit up to and including submission of comments to the written audit product. This interaction should help to avoid misunderstandings. The OIG is committed to give full consideration to management comments on discussion drafts and formal draft reports in the course of finalizing reports. Amtrak managers should engage with OIG leadership when it believes that its input is not satisfactorily addressed. In the end, formal Amtrak comments to the formal draft will ordinarily be attached, in their entirety, to the final OIG report. This interactive process, in which the OIG engages management in the audited office in an effort to develop and refine findings and recommendations, is a key part of the OIG process, and Amtrak managers need to see these opportunities for interaction as their primary means of expression in the context of OIG audits.

All offices are expected to review their policies and procedures related to interaction with the OIG and must conform to this guidance.

If you have any questions about this guidance, please contact Amtrak's General Counsel, Eleanor D. Acheson at ATS 777-2198, or the OIG General Counsel, Colin Carriere, at ATS 777-4355.

Attachment

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

1.0 PURPOSE

To establish the responsibility and authority of the Amtrak Office of Inspector General ("OIG"), the general principles for ensuring a productive relationship between the OIG and the rest of the company, and to summarize the process followed by the OIG when conducting audits, evaluations, and investigations.

2.0 SCOPE

This policy applies to all Amtrak employees, contractors, programs, and operations.

3.0 RESPONSIBILITY

The head of Amtrak and the Amtrak Inspector General ("Inspector General") are responsible for the interpretation and administration of this policy. As of the date of this policy, the "head" of Amtrak is defined as the Chairperson of the Board of Directors of Amtrak (the "Chair").

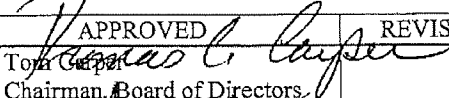

4.0 AUTHORITY AND RESPONSIBILITIES OF THE OIG

4.1 Mission of the OIG. The Inspector General Act of 1978, as amended (5 U.S.C. Appendix 3), hereinafter "IG Act," established the OIG as an independent and objective unit within Amtrak to:

- (a) Provide policy direction for and to conduct, supervise, and coordinate audits and investigations relating to Amtrak programs and operations;
- (b) Provide leadership and coordination and to recommend policies for activities designed (1) to promote economy, efficiency, and effectiveness in the administration of, and (2) to prevent and detect fraud and abuse in Amtrak programs and operations;
- (c) Review existing and proposed legislation and regulations relating to Amtrak programs and operations and make recommendations in its semiannual reports concerning their impact on the economy and efficiency in the administration of programs and operations administered or financed by Amtrak or the prevention and detection of fraud and abuse in such programs;
- (d) Keep the Chair and Congress fully and currently informed concerning fraud and other serious problems, abuses, and deficiencies relating to the administration of programs and operations administered or financed by Amtrak, recommend corrective action concerning such problems, abuses, and deficiencies, and report on the progress made in implementing corrective actions.

4.2 Establishment of the OIG.

- (a) The Inspector General is appointed by the Chair without regard to political affiliation, and solely on the basis of integrity and demonstrated ability in

 Thomas C. Carpenter Chairman, Board of Directors		2.1.1	1

INSPECTOR GENERAL

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

accounting, auditing, financial analysis, law, management analysis, public administration, or investigations.

- (b) The Inspector General reports to and is under the general supervision of the Chair and is not subject to supervision by any other officer or employee of Amtrak. The Chair cannot prevent or prohibit the Inspector General from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.
- (c) The Inspector General serves as a non-voting, ex officio member of the Executive Committee. This is an important mechanism to foster open communications and facilitate the exchange of information. It allows the IG to be aware of management issues and concerns and to provide appropriate input for management to consider. The IG's role will be limited and subject to the following conditions:
 - (1) The IG will not be a voting member;
 - (2) The IG will not perform programmatic functions or roles, which are proscribed under the IG Act;
 - (3) The IG's participation will be in a mutually agreed capacity, which allows the IG to decide not to attend certain meetings, or Amtrak management to elect to conduct meetings or segments of meetings, without the IG's presence;
 - (4) Both the IG and Amtrak management will respect the IG's statutory requirement to maintain independence and objectivity and will not request participation or agreement with respect to any matter that would impair or compromise that independence or objectivity;
 - (5) The IG will not make management decisions or perform management functions.
- (d) If the Inspector General is removed from office or is transferred to another position or location within Amtrak, the Chair must communicate in writing the reasons for the removal or transfer to both Houses of Congress, at least 30 days before the removal or transfer. The Chair can also take other personnel actions authorized by law.
- (e) The Chair also provides the OIG with appropriate and adequate office space at central and field office locations of Amtrak, together with needed equipment, office supplies, communications facilities and services, and necessary maintenance services.

4.3 Authority of the Inspector General. In carrying out the provisions of the IG Act, the Inspector General is authorized to:

- (a) Conduct audits and investigations and issue reports relating to Amtrak programs and operations that, in the judgment of the Inspector General, are necessary or desirable;
- (b) Have access to all Amtrak records, reports, audits, reviews, documents, papers, recommendations, or other material available to Amtrak which relate to programs and operations with respect to which the Inspector General has responsibilities;

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	2

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (c) Request such information or assistance as may be necessary to carry out the duties and responsibilities provided by the IG Act from any Federal, State, or local governmental agency or unit thereof;
- (d) Require by subpoena the production of information, documents, reports, answers, records, accounts, papers and other data needed to accomplish the functions assigned by the IG Act (procedures other than subpoenas will be used by the Inspector General to obtain documents and information from Federal agencies). Because the Inspector General has access to all Amtrak information, subpoenas are not used to obtain documents and information from Amtrak;
- (e) Administer oaths, affirmations, and affidavits, when needed to carry out the functions assigned by the IG Act;
- (f) Have direct and prompt access to the Chair when necessary for any purpose pertaining to the performance of functions and responsibilities under the IG Act; and
- (g) Enter into contracts and other arrangements for audits, studies, analyses, and other services with public agencies and with private persons, and to make such payments as may be necessary to carry out the provisions of the IG Act.

5.0 GENERAL PRINCIPLES GUIDING RELATIONSHIPS WITH THE OIG

5.1 To work together most effectively, the OIG and Amtrak's management, employees, and contractors should:

- (a) **Interact with professionalism and mutual respect.**
 - (1) Representatives of Amtrak's management and the OIG should always act in good faith and expect the same from the other.
 - (2) Amtrak's management and the OIG share as a common goal the successful accomplishment of Amtrak's mission.
- (b) **Ensure mutual respect for each mission.**
 - (1) Amtrak's officers, directors, employees, and contractors should recognize the OIG's primary responsibility and authority to conduct independent and objective audits, evaluations, and investigations of Amtrak programs and operations, and the OIG's responsibility to report to both the Chairman and the Congress.
 - (2) The OIG will seek to carry out its work with a minimum of disruption to the primary mission of Amtrak.
 - (3) Amtrak's management will promptly notify the OIG in the event that it initiates reviews or examinations related to fraud or waste which could be the subject of an OIG audit, investigation, or inspection. Once notified, the Inspector General will determine whether it is a matter subject to the jurisdiction of the OIG and respond promptly to management to determine how to proceed. To the extent the Inspector General deems appropriate, the OIG will coordinate with the responsible department where management is engaged in a review or examination or litigation involving matters of common interest to the OIG and management.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	3

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (4) If, in the course of its work, the OIG discovers facts or circumstances related to safety or other matters which have some immediacy or may cause significant business or legal harm to the company unless management is notified and given the opportunity to intervene, the Inspector General will, at his discretion, notify and coordinate with appropriate Amtrak managers or the department head in order to address safety issues quickly or to limit significant business or legal harm.
- (c) Foster open communications at all levels.**
- (1) The OIG's access to information, records, facilities and people must be unimpeded. Amtrak's employees, contractors, and representatives should promptly respond to OIG requests for information to facilitate OIG activities.
 - (2) Amtrak managers will be forthcoming in recognizing the existence of challenges that the OIG can help to address.
 - (3) Surprises are to be avoided. The OIG will seek to avoid undertaking its work or presenting its findings without reasonable notice to management and management will keep the OIG informed of significant challenges and problems.
 - (4) With limited exceptions, primarily related to criminal investigations, the Inspector General will keep the President and the Chairman advised of its work and its findings on a timely basis, and the OIG will provide information helpful to Amtrak's management at the earliest possible stage.
 - (5) Because some OIG investigations may involve allegations of criminal misconduct or other need for confidentiality, circumstances will dictate whether, and what type of, notice will be given. This will be at the discretion of the Inspector General, with consideration of all factors of confidentiality, sensitivity, and investigative techniques.
- (d) Be thorough, objective, and fair.**
- (1) The OIG will perform its work thoroughly, objectively, and with due consideration of the point of view of Amtrak's management.
 - (2) When working with the OIG, Amtrak's management and staff should objectively consider differing opinions and alternative ways to improve operations.
 - (3) Both the OIG and other departments of Amtrak should recognize successes in addressing management challenges and advancing Amtrak's mission.
- (e) Respect confidential information.**
- (1) The OIG will respect Amtrak's need to protect confidential, sensitive, or privileged information from inappropriate disclosure, while meeting OIG's obligation to report to the Department of Justice, external oversight entities such as Congress, and the public.
 - (2) The terms confidential, sensitive, and privileged will be accorded the meanings ascribed to them under the Freedom of Information Act (FOIA).
 - (3) Other than the Department of Justice, in disclosing to external oversight entities (such as the Congress, Department of Transportation, OMB, and

APPROVED	REVISION NO.	SUPERSEDES	PAGE

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

GAO) or other law enforcement entities, information that may be confidential, sensitive or privileged, the OIG will notify the recipient entities of the confidential, sensitive, or privileged nature of the information and request that they treat the information with the level of protection set forth under the FOIA or as otherwise required by law. If the IG believes there is a significant risk that the information could be released inappropriately, he may, at his discretion, consult with the appropriate department head to ensure that the company's interests are protected.

- (4) The process to determine the sensitivity of information included in OIG audit, evaluation, and investigative reports that will be subject to public release is described in sections 6 and 7 below.

(f) Be engaged.

- (1) The OIG, Amtrak's management, and the Board will work cooperatively to identify the most important areas for OIG work, as well as the best means to address the results of that work, while maintaining the OIG's required independence.
- (2) Amtrak's leadership will recognize that the OIG's limited resources must also be applied to address work that is initiated by the OIG, requested by members of Congress, or mandated by law or regulation.

(g) Facilitate the exchange of information.

- (1) The OIG will keep abreast of Amtrak's programs and operations, and keep Amtrak's management and Board informed of OIG activities and concerns that are raised in the course of the OIG's work.
- (2) Amtrak's management and Board should ensure that the OIG is kept up to date on current matters and events affecting Amtrak or that may affect it in the future.
- (3) Amtrak and the OIG will implement mechanisms, both formal and informal, to ensure prompt and regular feedback.
- (4) All Amtrak employees, contractors, and representatives should understand that the OIG is the primary entity within Amtrak to address issues or concerns related to fraud or abuse; and that they have a responsibility to report suspected violations of the law or Amtrak policy that could result in fraud or abuse.
- (5) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions.
- (6) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful authority.

6.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND THE OIG ON INVESTIGATIONS

6.1 General Investigative Process.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	5

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) The OIG determines whether it will initiate an investigation once it receives an allegation regarding fraud, abuse, criminal action, or other wrongdoing. Allegations originate from various sources including employees, vendors, Congress, federal agencies, and prosecutors. The OIG may also initiate investigations proactively to ensure that Amtrak is not being subject to fraud, waste, or abuse.
- (b) The investigative process generally involves: (1) determining the basis for an allegation; (2) analyzing the issues involved; and (3) obtaining relevant, objective evidence from individuals and entities, in the form of interviews, documents, tangible objects, and data.
- (c) The OIG follows the Quality Standards for Investigations (issued by the Council of the Inspectors General on Integrity and Efficiency ("CIGIE")) to guide its investigative activity.
- (d) Allegations are reviewed and screened and resources are allocated based on, among other things, the seriousness of the allegations, potential harm to Amtrak or the public, whether a violation of a statute or regulation likely occurred, and the effect of the alleged illegal or improper activity on Amtrak programs and operations.
- (e) If the OIG determines that an investigation should be undertaken, it seeks to obtain all relevant facts by examining documents and other tangible materials and interviewing individuals. When appropriate or required by law, the OIG informs subjects of their legal rights, including the right or opportunity to remain silent and to obtain legal counsel.
- (f) The process may result in one or more of the following OIG actions: administrative report to management, referral to a prosecutor for consideration, or closing the investigation.
- (g) When the investigation substantiates a wrongful act which is considered administrative, the OIG usually prepares an investigative report, which describes the allegation, the factual evidence to support its findings, and recommendations. This report is submitted to management for a written response. These administrative reports often recommend that management take action, but usually do not recommend specific disciplinary action. Privacy concerns usually restrict these reports from public release.
- (h) If an issue identified in an investigative report is a recurring or systemic problem, the OIG may also identify this broader problem to managers and, usually, make recommendations for management to consider in addressing the problem. Management normally is given an opportunity to provide comments before the report is issued. The process for obtaining comments and issuing the report is described in Section 7.2(h).
- (i) If there is evidence of criminal wrongdoing, the OIG presents the report to the Department of Justice or other appropriate prosecutors for their consideration. This may lead to prosecution of the subject(s) in Federal, state, or local court. In cases where there is evidence of criminal wrongdoing, the Inspector General may, in his/her discretion, also refer the report to management for administrative action.

6.2 Requirements And Responsibilities.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	6

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(a) **OIG.**

- (1) The Inspector General shall not, after receipt of a complaint or information from an employee, disclose the identity of the employee without the consent of the employee, unless the Inspector General determines such disclosure is unavoidable during the course of the investigation.
- (2) The OIG will ensure that Amtrak's confidential, sensitive, or privileged information as defined in section 5.1(e) above is not inappropriately disclosed by OIG employees.
- (3) Circumstances when the OIG will disclose such information include:
 - (A) referrals to appropriate agencies for law enforcement purposes;
 - (B) disclosures under court order;
 - (C) responses to requests by Congress; and,
 - (D) referrals to other agencies that may have cognizance over the matter.
- (4) The OIG will usually honor an employee's request that counsel be present during an interview. The counsel may not be another employee of Amtrak, paid for by Amtrak (unless approved in accordance with Amtrak's Bylaws and policies), a potential subject, or a witness in the case.
- (5) Employees who allege that action was taken against them as reprisal or retaliation for cooperating with or disclosing information to the OIG while they were employed at Amtrak may request the OIG to investigate their reprisal or retaliation allegations.

(b) **Amtrak Management, Employees, and Contractors.**

- (1) All Amtrak employees must comply with requests for interviews and briefings.
- (2) The failure to cooperate with or the intentional furnishing of false or misleading information to the OIG by Amtrak employees, contract personnel, or representatives, may result in disciplinary action, contract termination, and/or criminal sanctions or penalties.
- (3) Amtrak's managers must ensure that reprisals are not taken against employees who cooperate with or disclose information to the OIG or other lawful appropriate authority.
- (4) In the context of investigations, managers should not question staff about their interactions with the OIG.
- (5) Any employee who makes a complaint to the OIG with the knowledge that the complaint is false or that it is made with willful disregard for the truth of the information may be held accountable for such statements and may be subject to disciplinary action or criminal prosecution.

7.0 COORDINATION BETWEEN AMTRAK OFFICIALS AND OIG ON AUDITS AND EVALUATIONS

- 7.1 Types of Audits and Evaluations. The OIG conducts audits and evaluations of Amtrak programs and operations, including performance of contractors. Some audits and evaluations may be specifically required by statute.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	7

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (a) An audit is an independent, formal, and methodical examination of an organization, program, function, or activity, designed to help Amtrak accomplish its mission efficiently and effectively. OIG audits are performed in accordance with Government Auditing Standards (commonly called the Yellow Book).
- (b) Evaluations are reviews of an organization, program, function, or activity. Evaluations are performed in accordance with the Quality Standards for Inspections issued by the CIGIE.
- (c) Audits and evaluations may include financial or performance reviews.
 - (1) Financial reviews include financial statement audits and any other financially related reviews related to Amtrak's financial operations.
 - (2) Performance reviews include evaluating whether Amtrak programs and operations are working efficiently and effectively as well as whether programs are achieving expected results.
- (d) The OIG also routinely gathers information and data but does not use that information in a formal audit report. These activities may be in response to a congressional inquiry, a request for testimony, or routine planning purposes. Normally, OIG staff members assigned to these activities directly contacts responsible managers to collect information. The assigned OIG staff will inform management of the nature of the data gathering effort.

7.2 Audit and Evaluation Processes. The audit and evaluation processes involve the following steps:

- (a) **Audit or Evaluation Planning.** The OIG often conducts informal research to help it develop audit or evaluation plans or to better understand emerging issues. Audit plans outline potential reviews to be conducted, the objectives of each review, and the resources required to conduct them. In developing the audit or evaluation plan for the year, the OIG considers the following:
 - (1) Issues that may pose a risk to or would promote Amtrak's mission;
 - (2) Objectives of Amtrak's Board and senior managers; and
 - (3) Objectives of Congress.
- (b) **Notification.** The OIG will notify responsible management officials of its intent to begin a review.
- (c) **Entrance Conference.** As a general practice, the OIG will request an entrance conference with responsible management officials to advise them of the objectives and scope of the review and the general methodology that will be followed, and to solicit input from Amtrak officials.
- (d) **Survey.** In some cases, particularly for large or complex reviews, the OIG will perform initial research to refine the objectives, determine the scope, and develop a sound methodology.
- (e) **Field Work.** The OIG analyzes selected areas of a program, activity, or function. It obtains sufficient evidence to support the findings and conclusions and to make recommendations. Frequent interaction with responsible managers and employees occurs during fieldwork.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	8

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

- (f) **Exit Conference.** Prior to the issuance of a draft audit or evaluation report, the OIG will contact the responsible management official to set up an exit conference to discuss the results of the work. In some cases discussion draft reports or fact sheets are used to facilitate the discussion. The OIG strives to maintain an open channel of communication with managers to ensure that findings, conclusions, and recommendations are accurately and fairly presented in the report.
- (g) **Draft Report.** The OIG provides a draft report to the Audit Liaison, responsible managers of audited organizations, and Amtrak departments affected by the audit findings for their review and comment. The draft report will have been approved by OIG management and will contain the objectives, results, conclusions, and recommendations resulting from the OIG's audit or evaluation.
- (h) **Management Response.** Responsible management officials are normally provided 30 days to respond in writing to the draft report, indicating how they plan to address the findings and recommendations contained in the report. In some cases, the OIG requests a quicker response. Extensions to the established due date will be granted by the responsible Assistant Inspector General.
- (1) Comments should clearly indicate whether responsible management officials concur with each of the recommendations.
 - (2) Concurrence is when management agrees to implement the recommendation or to take an alternative action that will correct the deficiency, along with actual or estimated completion dates.
 - (3) Nonconcurrence is when management does not agree to implement the recommendation or an acceptable alternative. In this case, management should explain the rationale, and include additional facts, if necessary.
 - (4) Management should also identify any information contained in the report that should be protected from public release on the basis that its release may cause significant business or legal harm to Amtrak (the information so designated must not be subject to public release pursuant to the Freedom of Information Act, as amended, 5 U.S.C. § 552). The responsible manager should also weigh the public benefit of transparency against the harm, or potential harm, to company interests, in light of the fact that the company receives Federal subsidies.
 - (5) With respect to decisions regarding confidential, sensitive or privileged information, the Inspector General will follow the standard set forth in Section 5.1(e) above. If the OIG disagrees with management's assertion that specific information should be withheld from public release because it is confidential, sensitive, or privileged, the IG will confer with the responsible department head regarding the need to redact the information before publicly releasing the report. If so requested, the department head has one week to articulate in writing to the IG the bases or reasons for protecting the information from disclosure, including identifying the significant business or legal harm anticipated compared to the benefit of transparency. If, following that consultation, the IG determines that the

APPROVED	REVISION NO.	SUPERSEDES	PAGE

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

information should be publicly released, he will consult with the Chair before including such information in a publicly released report.

- (i) **Final Report.** The OIG will amend the draft report, as appropriate, based on management's response. The Inspector General makes final determinations about what information will be included in the issued report. The OIG also normally includes the entire management response, along with the OIG's analysis of the response in the final report.
- (j) **Report Distribution.** The OIG usually distributes audit and evaluation reports to the Chairman, other Board members, responsible management officials, and Congress. Final reports are normally public documents and are available on the OIG Web site.
- (k) **Recommendation Follow-up.** Amtrak managers are responsible for implementing OIG recommendations to the extent there is concurrence, and OIG staff and Amtrak's Audit Liaison monitor managers' actions to ensure that recommendations are implemented in a timely manner.

7.3 Audit and Evaluation Process Responsibilities.

(a) **Audit Liaison.**

- (1) The Audit Liaison is an individual, or individuals, designated by Amtrak management to perform the functions outlined in this section.
- (2) Facilitates OIG audits and evaluations with Amtrak management. In this role, the liaison ensures that Amtrak managers are aware of OIG reviews and that OIG staff is provided with initial contacts to begin the review process.
- (3) Coordinates entrance and exit conferences with appropriate Amtrak managers.
- (4) Follows up with Amtrak managers to track the status of management actions to implement OIG recommendations.
- (5) Ensures that management's response to draft reports is coordinated with affected departments, is approved by the head of the audited department or organization and is completed in a timely manner.

(b) **Inspector General Managers.**

- (1) Notifies responsible management officials of the intent to begin a review.
- (2) Contacts responsible management officials and the audit liaison to schedule entrance conferences and exit conferences.
- (3) Provides copies of draft reports to the Audit Liaison, responsible management officials of audited organizations, and Amtrak departments affected by audit findings.
- (4) Reviews and evaluates management response to the draft report and, as appropriate, either revises the report or provides the OIG's analysis of the response in the final report.
- (5) Grants extensions to the established due date for management comments.
- (6) Distributes final reports to the Audit Liaison and the appropriate Amtrak departments, and makes further distribution to authorized committees and subcommittees of Congress and the public.

APPROVED	REVISION NO.	SUPERSEDES	PAGE
Tom Carper Chairman, Board of Directors		2.1.1	10

SUBJECT	CLASSIFICATION	DATE APPROVED	P/I NUMBER
Office of Inspector General	Inspector General	March 4, 2010	2.1.2

(c) **Responsible Management Officials.** To maximize the value of OIG reports, management officials or their designees will:

- (1) Attend exit conferences, unless they are waived by agreement with the OIG.
- (2) Prepare responses to draft OIG reports.
- (3) State in the proposed management decision whether they concur with the recommendations presented in the corresponding audit or evaluation report or propose alternative actions to correct the deficiency. For nonconcurrences, explain why management does not concur and present additional facts, if necessary.
- (4) Take prompt and effective action to implement agreed-upon corrective actions.

8.0 OTHER POLICIES

- 8.1 The presumption is that this policy will take precedence in instances where other policies are inconsistent with this policy. When inconsistencies are identified, OIG and management will consult and reconcile differences.

Amtrak Employee Update

Join Amtrak, local communities, families and businesses across the country in supporting the first-ever [National Severe Weather Preparedness Week](#)., April 22-28, designated by the Federal Emergency Management Agency (FEMA) and the National Oceanic Atmospheric Administration (NOAA).

Recent tornado outbreaks reminded us that severe weather can strike anywhere and at any time. Just last year, there were more than 1,000 weather-related fatalities and more than 8,000 injuries in the U.S.

It is important to be prepared if severe weather strikes. While we can't prevent severe weather, the following tips may help you stay safe during an emergency.

- **Be prepared:** Familiarize yourself with the evacuation procedures for your station, office or facility. Develop an emergency evacuation plan for your home to protect your family during severe weather.
- **Provide assistance:** Be aware of those who may need assistance at work and at home during an evacuation, and designate someone to assist them.
- **Listen, act, live:** When there is a risk of severe weather, listen for the warnings on the radio, TV, smart phone or whatever device works best for you.
- **Seek cover during tornadoes:** Avoid places with wide-span roofs, such as large hallways. Stay away from windows and open spaces. Get under a piece of sturdy furniture, such as a workbench, heavy table or desk and hold onto it.
- **Be aware of electricity during thunderstorms:** Avoid using a corded telephone or other electrical appliances until the storm passes. Turn off air conditioners.
- **Do not drive on flooded roads:** The speed and depth of the water is not always obvious, and there may be portions of the roadway washed out under the water. Remember: It only takes two feet of water to carry away most cars.
- **Be cautious after severe weather:** Listen to your radio or TV for information about when it is safe to return and where to get assistance. If unaffected by the emergency, stay out of the damaged area until local officials allow entry.

For information on severe weather preparedness or other hazards, visit www.noaa.gov or the FEMA website at www.Ready.gov

I recently met many of you on the West Coast during my Town Hall meetings, where we discussed the best ways to implement the Operations reorganization. Thanks to your comments, along with the assistance of members of the Transition Team and subgroups, we're continuing to move forward with the reorganization.

Your feedback as I was traveling along the *Capitol Corridor*, *Coast Starlight* and Cascades was frank and honest. I appreciate that. With your input, we'll continue to move Amtrak in a direction of stellar customer service and strong financial accountability, all in alignment with our Strategic Plan.

You asked many important questions throughout my travels. I'd like to address two of those directly here. First, of the more than 17,000 Operations employees, the vast majority of you will see no changes to your daily tasks and responsibilities. Also, no one will have to reapply for their current positions. Promotions and movements to positions with new responsibilities will require new interviews, and that is standard operating procedure throughout the company.

Secondly, in Oakland several of you told me, "This reorganization seems to be taking a while." I agree. That is because at the heart of this reorganization is the idea that the resulting improvements and management structure will transcend not just me but all of Amtrak's management and the nation's political changes as well. We're creating a structure that focuses us on our bottom line and providing great customer service. Doing that correctly takes time, and I want to get it right.

I've also had several important meetings with our 24-member Transition Team, which is made up of company veterans from across the country and a variety of departments. Subgroups for the Northeast Corridor and the Long-Distance services have also been formed and already met to begin developing the integrated management system below the business-line general managers and route superintendents. Their input is vital in creating a realistic organizational structure and also important in helping explain the reorganization changes to their colleagues.

Going forward, I'll be making more of these trips and meeting more of you. This week I will be in Miami and Jacksonville. As we progress, I'll continue to provide regular updates as we meet more of our milestones.

Thank you for your cooperation with this process. Please check *Amtrak Ink*, *Amtrak This Week* and the Employee Intranet for continued updates

Sincerely,

DJ Stadtler
Vice President of Operations

December 14, 2012 • Page 1 of 1

Dear Co-workers,

Please join me in welcoming David Nichols as Amtrak's new chief transportation officer (CTO), effective December 17. In this position Dave will be responsible for setting, managing and maintaining operating rules and policies to ensure that all train operations meet federal requirements and Amtrak's business needs. Other aspects of this position include the management of training and certification for locomotive engineers and conductors as well as overseeing the Host Railroads group. He will be based in Philadelphia.

Dave brings 33 years of Amtrak experience to this CTO position, having joined the company in 1979 as a block operator and most recently served as senior director, operating practices. Reporting directly to me, Dave will continue to bring to Amtrak his solid knowledge base of the regulatory landscape, working relationships, and key operating issues at a pivotal time for our company. He will use this experience to bring a total business and safety focus to all business lines and will work closely with the general managers to ascertain that we are meeting our regulatory and compliance guidelines with respect to transportation functions. Dave and his team will also work very closely with the business lines to improve train operating procedures in order to conserve fuel and lower operating costs.

This senior leadership position is part of the company's ongoing effort to align day-to-day operations with the Amtrak Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak, federal and regulatory authorities. Dave also will have matrix management relationships with other groups within the company, including the teams responsible for safety, revenue management, customer service, fleet maintenance and human capital.

Dave holds both a Ph.D. and Master of Arts in history from the University of Cincinnati and a Bachelor of Arts in history from Temple University.

There were many highly professional candidates for this job and I am confident Dave best exhibits the Amtrak values of respect, entrepreneurial spirit and accountability. Please join me in welcoming Dave to this new and vital role at Amtrak. His appointment is an important step forward in the company's continuing reorganization and will make it easier for staff to serve customers and improve the bottom line on all services.

Sincerely,

DJ Stadtler
Vice President of Operations

Business Line Communication

February 12, 2013 • Page 1 of 1

Dear Co-workers,

Please join me in welcoming Jay Commer as Amtrak's new general manager of state-supported services, effective immediately. In this position Jay will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will continue to be based in Oakland, Calif. and will report directly to me.

Many of you know and have worked with Jay. He brings 27 years of Amtrak experience to this new position most recently as general superintendent, Pacific division. Prior to that role, Jay was a principal officer for state contracts with direct responsibility for the contracts, operating agreements and relationships with the Washington and Oregon state Departments of Transportation. Those established relationships will be critical for this new position and he will use this experience to bring a total business focus to all the state-supported trains and will work closely with other general managers to lead business planning and implement service improvements and productivity enhancements for state-supported routes.

Jay attended Chabot College with a major in mechanical engineering. He began with the Southern Pacific in 1976 and worked as a trainman, switchman and locomotive engineer for that road. He joined Amtrak in 1986 and has assumed positions of increasing responsibility throughout the years.

I am confident Jay exhibits the Amtrak values of respect, entrepreneurial spirit and accountability. He also brings an important perspective to this position. I know that you join me in welcoming Jay to this role and will give him your full support.

Sincerely,

DJ Stadler
Vice President of Operations

A Message from DJ Stadtler

Dear Co-workers,

Thanks to the help of numerous people across the company, we're moving forward with the Operations reorganization and improving our focus on financial performance and customer service. Yesterday we took another step forward in this process with the posting of two more important positions — Chief Transportation Officer and Chief of Customer Service. They'll help align our new business lines with our Strategic Plan.

These two leaders will be responsible for multi-million-dollar budgets, and their hard work will directly impact the financial performance of our company. We're looking for two individuals who embody the values that we are trying to institutionalize throughout the company — integrity, service, respect, entrepreneurial spirit, accountability, humility and forgiveness. I know many of you pride yourselves in demonstrating these same values everyday as you work aboard trains and in stations, maintenance yards and support offices across the country. I want to make sure we find the right leaders who do the same.

The Chief Transportation Officer will be responsible for setting, managing and maintaining operating rules and policies to ensure that all train operations meet federal requirements and our business needs. The CTO's group will work closely with business lines to improve train operating procedures to conserve fuel and lower operating costs. Additionally, the group is responsible for maintaining close business relationships with host railroads.

The Chief of Customer Service will oversee system operations, including CNOC, crew-management services, intermodal connectivity, special trains and food and beverage services. The position is also responsible for setting and maintaining standards for station and on-board services and working with business line general managers to ensure those standards are met consistently across the Amtrak system. The purpose for pairing these functions under a customer service leader is to ensure that key operating decisions are made with the customers' experience in mind. Our business is to provide safe and reliable world-class transportation for our customers — not just moving trains. That philosophy must be at the center of everything we do.

Both positions will report directly to me, and I welcome all qualified candidates to apply. We will also be looking externally for the right candidates to fill these jobs to make sure we get the best leader possible for these critical functions.

The CTO's performance will be measured on customer safety/injury metrics, on-time performance, locomotive power consumption ratios and financial metrics. The Chief of Customer Service will be held to measurements including customer satisfaction and revenue growth. All these metrics align with the goals laid out in our Strategic Plan, which focuses Amtrak on financial performance.

A Message from DJ Stadtler

Dear Co-workers,

Yesterday we took a big step forward in our company's Operations reorganization. I had the opportunity to meet with our Transition Team for the first time. That group is made up of 19 employees from a variety of departments, representing an array of perspectives and tenures.

The goal of this team is to manage and coordinate this reorganization successfully and in alignment with our strategic plan. Those chosen to participate will also be ambassadors of the Operations reorganization, explaining the changes over the next 15 months to their colleagues, seeking input and suggesting ways to best implement improvements.

During our first discussion, there was a lot of emphasis put on clear communication and transparency among departments. Along with the Transition Team members, I'll work hard to keep you up to date on our progress and how the reorganization will affect you. With that in mind, I should reinforce that the vast majority of employees will not see any changes to the tasks they complete each day. These changes are meant to improve coordination and collaboration, to increase our focus on the bottom line and will primarily affect higher-level managers, not front-line employees and their supervisors.

I know what some of you may be thinking, "I've been through an Amtrak reorganization before, and this is just the flavor of the month." Yes, there have been past efforts to make Amtrak more financially competitive and operationally efficient, and this time it's different. The Transition Team members are made up of employees who have been with the company 10, 20, 30 and 40 years. The feedback they (and many of you) offered on the current reorganization was frank and will help us create a business structure that transcends management and political changes.

Please don't think that because you are not a member of the Transition Team that you will not have any input on these changes. Going forward, the Transition Team members will be responsible for creating subgroups across the country. Employees who participate in subgroups will play a vital role in communicating the Operations reorganization on an employee-to-employee basis. They'll also gather feedback from their colleagues that will be folded into the work of the Transition Team.

Below is a list of the Transition Team members I'll meet with regularly throughout the reorganization. They were chosen by their vice presidents because they're seen as influencers within their departments and because they bring a special perspective to the Operations reorganization discussion. The members of the subgroups will have these same qualities, and I look forward to meeting you all as I travel the country this summer explaining the reorganization further and gathering your feedback.

They'll also gather feedback from their colleagues that will be folded into the work of the Transition Team.

Below is a list of the Transition Team members I'll meet with regularly throughout the reorganization. They were chosen by their vice presidents because they're seen as influencers within their departments and because they bring a special perspective to the Operations reorganization discussion. The members of the subgroups will have these same qualities, and I look forward to meeting you all as I travel the country this summer explaining the reorganization further and gathering your feedback.

Dear Co-workers,

Please join me in welcoming Doug Varn as Amtrak's new long-distance general manager. In this position Doug will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will be based in Chicago and will be relocating there.

Doug brings decades of Amtrak experience to the company's second general manager position, having joined the company in 1973 and most recently serving as the company's chief of product planning and financial analysis for the Marketing department. Reporting directly to me, Doug will leverage his deep experience to bring operational, financial, and organizational excellence to Amtrak long-distance services. As general manager of the *Auto Train*, he achieved a break-even financial performance and garnered leading CSI scores. His Amtrak professional experience crosses a full range of functional areas, including serving as vice president of planning and finance for the former Intercity SBU. He will use this experience to bring a total business focus to all the long distance trains and will work closely with other general managers to lead business planning and implement service improvements and productivity enhancements for the company's longest routes.

This newly created position is part of the company's ongoing effort to align day-to-day operations with the Amtrak Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak and regulatory authorities. Doug also will have matrix management relationships with other groups within the company, including the teams responsible for marketing and revenue management, fleet maintenance and human capital.

Doug holds a bachelor of arts from Spring Hill College in Mobile, Ala., and pursued additional studies in business at the University of Illinois-Chicago, as well as attended the Amtrak Executive Program at the University of Virginia's Darden School of Business.

Many excellent candidates applied for this position, and I'm confident Doug best exhibits the Amtrak values of respect, entrepreneurial spirit and accountability. Please join me in welcoming Doug to this new and vital role at Amtrak. His appointment is an important step forward in the company's reorganization and will make it easier for staff to serve customers and improve the bottom line on our long-distance routes.

Sincerely,

DJ Stadtler
Vice President of Operations

Business Line Communication

November 21, 2012 • Page 1 of 1

Dear Co-workers,

Please join me in welcoming Tom Quigley as Amtrak's new general manager of state-supported services, effective December 10. In this position Tom will be responsible for functions of the Transportation, Mechanical and Engineering departments within this business line. He will be based in Oakland, Calif., and will be relocating there.

Tom brings decades of executive experience to the company's third general manager position, having led half a dozen organizations to financial and operational success. Reporting directly to me, Tom will bring his solid track record of profitably growing businesses in challenging market environments to Amtrak at a pivotal time for our company. Most recently as a vice president at Owens Corning, he improved performance by \$78 million and reduced waste by \$80 million, while remaining steadfastly committed to safety. His experience crosses a full range of functional areas, including having negotiated three of the largest commercial and marketing agreements in the history of Owens Corning. He will use this experience to bring a total business focus to all the state-supported trains and will work closely with other general managers to lead business planning and implement service improvements and productivity enhancements for state-supported routes.

This newly created position is part of the company's ongoing effort to align day-to-day operations with the Amtrak Strategic Plan. As a result, a clear emphasis will be placed on achieving quantifiable results and ensuring that operations meet the standards and policies set by Amtrak and regulatory authorities. Tom also will have matrix management relationships with other groups within the company, including the teams responsible for marketing and revenue management, fleet maintenance and human capital.

Tom holds a Bachelor of Arts from the University of Minnesota, and pursued additional studies in executive management at Columbia University, Duke University and the University of North Carolina. He also holds a Master's Degree in International Relations from the University of Stockholm.

I am confident Tom exhibits the Amtrak values of respect, entrepreneurial spirit and accountability. He also brings a keen market sense to our company, helping us carry out our Strategic Plan to "run like a business" in everything we do. Please join me in welcoming Tom to this new and vital role at Amtrak. His appointment is an important step forward in the company's reorganization and will make it easier for staff to serve customers and improve the bottom line on our state-supported routes.

Sincerely,

DJ Stadtler

November 21, 2012 • Page 1 of 2

Dear Co-workers,

This is Chief Engineer Frank Vacca's last week with Amtrak. After 27 years with Amtrak and seven in his current position, Frank has accepted a position with the California High-Speed Rail Authority as its chief program manager. In this role he will lead the technical and engineering teams as they work on delivering the state's high-speed rail project.

Some of Frank's many accomplishments in the Engineering department include the implementation of a very aggressive Engineering Management Associate program necessary for us to meet the challenge of the large number of our Engineering employees nearing retirement age. This five year training program for new engineering graduates has resulted in the hiring of over 30 new graduates over the last five years and it is anticipated that we will continue to hire about eight associates per year.

Under Frank's leadership, the Maximo asset management and work order systems were developed and largely completed with full implementation expected by FY15. Our company is far ahead of our counterparts both in North America and in most of the world with regard to railroad asset management and we have been recognized for this advancement. The importance of this system cannot be underestimated as it has all of our assets in an electronic data base which will be updated through a work order system and will play a major role in the determination of costs for users of the Northeast Corridor (NEC) in the PRIIA cost allocation methodology.

Frank departs with great pride in our company and our employees. He recently told me that he "believes and knows that Amtrak's Engineering employees comprise one of the best engineering teams in any railroad in North America and it has been my pleasure to be associated with this team." It is our pleasure to have worked with Frank and he will be missed.

As we bid Frank farewell, I ask you to join me in welcoming our new Chief Engineer Bruce Pohlot back to Amtrak. In this role Bruce will be responsible for all construction and maintenance activities for the right-of-way, including bridges, buildings, communications, signals, electric traction, track and directs the Engineering department's capital program.

Bruce spent the last 13 years at Parsons Brinkerhoff (PB), most recently as a senior vice president. His project responsibilities at PB included the development of the railroad division and executive direction, leadership and management of their subsidiary and technical excellence center which has project responsibilities for the planning and design of railroad and transit projects.

Produced by
Employee Communications

ecom@amtrak.com

Prior to joining PB, Bruce spent 21 years in Amtrak's Engineering department in a variety of positions including engineer of programs in New York, assistant division engineer in both New York and Baltimore, division engineer for both the Western and Boston divisions, program director of high-speed rail and assistant vice president, Engineering, program management.

Mr. Pohlot holds a B.A. in international relations from Lehigh University, a B.S. in civil engineering from Century University, and an M.B.A. from Northeastern University as well as additional coursework in the Executive Program at the University of Virginia's Darden School and George Washington University.

I'm confident that you will support Bruce when he assumes this extremely important role in the corporation. Deputy Chief Engineer, Maintenance, Steve Falkenstein, will be the acting chief engineer during this period of transition.

Please accept my warmest wishes to you and your families for a happy and safe Thanksgiving.

Sincerely,

DJ Stadtler
Vice President of Operations

October 9, 2012 • Page 1 of 2

Dear Co-workers,

We're now four months into the company-wide reorganization that brings front-line, mechanical, engineering and transportation activities in line with our Strategic Plan to run Amtrak like a business, focused on higher levels of customer satisfaction, safety and financial accountability.

Since my last letter to employees, I've been traveling throughout the country meeting many of you and hearing your ideas on how we can successfully execute this reorganization. I want to thank all of the division employees for their hospitality and honesty. I've had the opportunity to be part of many frank conversations about how we can improve Amtrak, and I'm looking forward to building that company with all of you. Those types of Town Hall meetings will continue into 2013.

I also want to shed light on the work that the Operations Transition Team has been doing and the personnel changes taking place with the recent start of the new fiscal year. The Transition Team is a 24-member team comprised of veteran Amtrak employees who are guiding this reorganization. Some are also participating in subgroups who have been meeting to develop the organizational structures for each of the four business lines. Recently I met with all of the Transition Team members in person. Our six-hour meeting allowed for in-depth thinking about how each business line will be organized and structured to align with the goals of our Strategic Plan and how to create improved communications and efficiency for our Operations.

As you can imagine, the Transition Team has a tall order to fill. They're doing a great job. We all left that meeting having made concrete decisions about how the first two business lines, the Northeast Corridor and the Long-Distance lines, will be structured. We all agreed that the leaders within each business line such as the general managers, the terminal superintendents and the route general superintendents will have to be held accountable to certain performance metrics in order to create the ideal business. In addition, we also all agreed that the reorganization must tie the metrics of different trains together to avoid sacrificing service on one train so that another, tied to a manager's performance, can run smoothly. That is not the culture or business structure we want to create, and we've come up with checks so that doesn't happen.

For the rest of the department, there are also organizational changes in Fiscal Year 2013. The Food and Beverage group will report up to a new Chief of Customer Service, a position that I intend to fill in the near term. In addition, several Health and Safety groups, including Operation RedBlock, will report to the General Manager, East until a Chief Safety Officer is named, in order to solidify our commitment to the safety of our employees and customers. Our goal is to have all aspects of Operations focused on the customer and to continuously improve our service and our financial performance.

Product Development will also report to the new Chief of Customer Service. The focus for Product Development continues to be on driving customer value and developing solutions that improve financial and operating performance. As leadership for routes within Operations business lines are established, Product

Produced by
Employee Communications

special employee advisory

October 9, 2012 • Page 2 of 2

Development will transition into supporting these business leaders to improve operating performance.

Business Analytics also has a key role to play in Operations — analyzing performance indicators and giving field managers the tools they need to improve daily service. Again, this is all about being more focused on the customer and our bottom line. The new Operations Research and Planning organization, which will be overseen by a new chief, will unite our operations planning staff in one team structure to foster collaboration and innovation.

You can find more information about the Operations reorganization on the employee Intranet, where all of my past letters are kept, as well as in the October issue of *Amtrak Ink*.

Thank you for your commitment to Amtrak.

Sincerely,
DJ Stadtler
Vice President of Operations

October 16, 2012 • Page 1 of 1

Dear Co-workers,

I am very pleased to announce that Michael J. DeCataldo, Jr., the current general superintendent, Northeast Division, has accepted the position of general manager, Northeast Corridor (NEC) Services, effective immediately. Mike is the first business line general manager to be appointed, and he will be leading the Northeast Corridor operation, which stretches from Boston to Washington. The NEC includes the major rail terminals in New York, Washington, Boston and Philadelphia and the operations at intermediate Amtrak stations and facilities.

The business line structure includes the functions of the Transportation, Mechanical, and Engineering departments within a common business line for the corridor. Mike will have accountability for Amtrak's safety, customer satisfaction, ridership, on-time performance, and financial results for Northeast Corridor. Tens of thousands of Amtrak customers, commuters, and partners depend on us every day. We must all do our individual part to meet our customers' and our partners' expectations and Amtrak's own goals.

Many excellent candidates applied for this challenging position. Mike has the leadership skills, experience and vision for this job. He understands Amtrak's business strategy and our Strategic Plan. His task is to put the plan into action within our highly complex operation.

Mike knows the railroad. Thirty-eight years ago he began as a locomotive fireman for Conrail/Penn Central. He then worked at New Jersey Transit for 11 years in operating positions of increasing responsibility. Mike joined Amtrak in 1995 as the assistant general manager, Customer Services. Most recently he has served as the general superintendent, Northeast Division.

The Northeast Corridor is the fastest, most complex railroad operation in North America. Our NEC business line structure will help Amtrak to focus on performance improvements that our customers, our partners and our employees can measure and take pride in. We are in the process of setting up business lines for long distance, state corridor, and commuter operations, so please watch for further announcements in the coming weeks.

I know that you join me in welcoming Mike to this role and will give him your full support.

Sincerely,

DJ Stadtler
Vice President, Operations

October 19, 2012 • Page 1 of 2

Dear Co-workers,

Our number one goal is to operate the safest and most secure railroad in North America, and as we progress through this reorganization that remains paramount. The well-being of our employees and passengers must always be our top priority. Amtrak's approach for reaching this goal is to create a team-oriented culture that minimizes risks and removes barriers to safety. For example, this fiscal year we will work toward the goal of training 1,400 Safe-2-Safer observers and carrying out more observations than ever before.

As Amtrak continues to focus on safety improvements, we have created a new leadership position within Operations — the Chief Safety Officer — who will continue to develop our core safety programs, such as Safe-2-Safer, and provide leadership to drive continuous safety improvements throughout the company.

The Chief Safety Officer position is now open for applications on Amtrak's career page. The ideal candidate will be someone who understands how Amtrak's business strategies are translated through safety, quantifying how safety improvements bolster the company's bottom line and support its Strategic Plan. This role will have direct reports and will provide functional leadership to all safety personnel within Amtrak.

The Chief Safety Officer's team and responsibilities will include Safety, Industrial Hygiene, Safety Program Implementation, Safety Policies and Programs, Ergonomics, Safety Reporting, Operation RedBlock, and continued support of Environmental and Health in conjunction with the most recent reporting alignments. The candidate must also be able to provide leadership to overall safety efforts at Amtrak, interacting with and influencing all levels of management from the Executive Committee to the front-line supervisor, and working with the leadership of labor unions.

Perhaps most importantly, this leader will embody our company's values including integrity, accountability, and a spirit of service. It is a challenging and essential job for the railroad.

Another important announcement I would like to share with you is the appointment of Chris Jagodzinski as chief of Operations Projects and Performance Improvements. As part of our continuing process to align the Operations department with our corporate Business Lines, I have asked Chris to assist me both in developing final design for the Operations department organization as well to oversee the transition plan to the new organization. During the transition to the new organizational structure, Chris will have an integral role on the transition team and their various subgroups. Chris will have the responsibility to oversee all the current general superintendents in order to maintain a safe, consistent operation as we transition. Once the

Dear Co-workers,

I am very pleased to announce that Michael J. DeCataldo, Jr., the current general superintendent, Northeast Division has accepted the position of general manager, Northeast Corridor Services effective 11/1/12. In this senior management role, Mike will oversee and work with the Transportation, Engineering and Mechanical departments to improve operations and hold managers and employees accountable for performance in this new business line.

A large part of his responsibilities will be to deliver a safe, on-time, consistently enjoyable experience to our customers and improve our financial performance as we continue to align with our Strategic Plan.

Beginning his 38-year railroad career as a locomotive engineer for Conrail/Penn Central, Mike moved to New Jersey Transit where he spent 11 years in operating positions of increased responsibility. He joined Amtrak in 1995 as the assistant general manager, Customer Services and has also served as project director, Rhode Island Freight Improvement Project and general superintendent, New England division.

Mike has significant leadership skills as well as a strong business, labor and customer service background. He brings the proper mix of experience and personality to this very important and challenging position. **PLEASE ADD A BRIEF COMMENT HERE to be used for a quote for the press release.**

I know that you join me in welcoming Mike to this role and will give him your support.

Sincerely,

DJ Stadtler

FREQUENTLY ASKED QUESTIONS

- **What is the Operations Department Reorganization?**
A realignment of the management structure to create business line accountability, dissolve departmental silos and improve customer focus. Manager reporting lines and certain management positions will be adjusted into a new structure.
- **How is this change actually happening?**
A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The vice president of Operations held Town Hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. Drawing from this process, a new management organization structure has been developed. As a result of these changes, over 80 positions will be posted throughout the Operations organization in the next four to six weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.
- **What does it mean to be impacted?**
When the scope of a position is significantly changed or phased out and superseded by a new position, then the employee is impacted. The employee will meet with someone from his/her leadership team and also a Human Capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he/she is qualified. When the reorganization is complete, and the new management structure is in place, then the positions being phased out will be eliminated.
- **What are the best ways for me to benefit from this reorganization?**
The new management structure will help to foster teamwork and customer focus at the facility and route level. New management positions with greater accountability and responsibility are closer to the field and the front line. What this means for each employee is the opportunity to help build a stronger Amtrak through greater collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.
- **If someone receives an impact letter, what is the process for finding another suitable position?**
Positions will be posted on the Employee Information Portal (EIP) career and job section and on this Intranet site throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he/she feels qualified and willing to serve.
- **What is the schedule for the reorganization roll-out?**
Beginning in June, open positions will be posted each week in batches on the EIP career portal (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased to ensure that safety, security and quality of service will not be affected during the transition.

Operations Department Reorganization

Safety and security are our highest priorities.

We operate as **One Amtrak** to serve our customers.

We are **accountable** for performance.

The new organization is an **opportunity** to improve our performance and for employees to advance professionally.

From the desk of Mr. DJ Stadtler

AMTRAK is a registered service mark of the National Railroad Passenger Corporation.

- **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- **If I'm feeling stressed by the changes due to the Operations reorganization; what should I do?**

It is understandable that this change could be stressful. It is strongly encouraged that employees contact the Employee Assistance Program (EAP), a local Human Capital representative, or a supervisor to discuss.

- **If I have additional questions about the changes, to whom should I go?**

The reorganization team is committed to information access for employees. There is a page on the Amtrak Intranet that describes the reorganization in some greater detail. Open lines of communication are encouraged during this change. Supervisors are being equipped with information they need to stay up-to-date and answer your questions. Please talk with your manager about your questions, concerns and comments during this transition. They can then direct any issues to the appropriate channels. In addition, the Human Capital business partners are also a resource for you as they will be working closely with the Operations leadership team throughout this reorganization.

- **What are the ultimate goals of this reorganization?**

- Safety and security remains our highest priority.
- One Amtrak.
- Accountability for performance.
- Dissolving the silos between operating departments.
- Greater ability for managers to make decisions with greater autonomy in order to make adjustments faster and better serve our customers.
- Fewer organizational layers to the front line.

June 11, 2012 • Page 1 of 1

Dear Co-workers,

Thanks to the input of more than 100 front-line employees and managers, we are moving forward with a comprehensive reorganization that I believe will make the company more financially competitive and operationally efficient.

The first step in the Amtrak Operations reorganization is happening today, as two newly created positions are posted for applicants — the general manager of the Northeast Corridor and the general manager of Long-Distance Services. Going forward there will be four general managers in all, each of whom will lead one of the four new business lines within Operations. As laid out in the Strategic Plan, these new business lines are Northeast Corridor Services, Long-Distance Services, State Supported Services and Commuter Services.

The debut of these two general manager positions is the beginning of a transition toward a new, more accountable Amtrak focused on its business lines. The general managers will be working with the Transportation, Mechanical, and Engineering forces to improve operations and hold managers and employees accountable for performance. The general managers are business executive roles who will be accountable for achieving improved results. They will be counting on all of us to do our part.

It is important to remember that this reorganization does not mean employees must reapply for their current positions.

Instead we are creating positions within senior management that will be fully responsible for delivering a safe, on-time, enjoyable experience to our customers. In my search for the right individuals for these roles, I'm taking my time with the goal of getting this reorganization right.

That's why we'll be looking both inside and outside the company for business leaders. If you feel you have the skills, drive and business expertise to become either the Northeast Corridor general manager or the Long-Distance Train general manager, I encourage you to please apply. Other leadership positions will be posted in the coming weeks and months, and we will keep you informed of these opportunities.

This is the first of many changes that this reorganization will bring to Amtrak. While change can be daunting, I'm confident these changes are achievable and will be effective because of the input we have received from employees like you. I believe these improvements will help star employees rise through the ranks and allow our customers to enjoy America's Railroad even more than they do today.

As these changes unfold we will continue to provide you regular updates about this transition as well as how we plan to evolve the way service is delivered to our customers. Thank you for your support as we progress through this transition.

Sincerely,

DJ Stadtler
Vice President, Operations

Dear Co-workers,

Thanks to the input of more than 100 front-line employees and managers, we are moving forward with a comprehensive reorganization that I believe will make the company more financially competitive and operationally efficient. You asked many important questions throughout my travels. I'd like to address two of those directly here. First, of the more than 17,000 Operations employees, the vast majority of you will see no changes to your daily tasks and responsibilities. Also, no one will have to reapply for their current positions. Promotions and movements to positions with new responsibilities will require new interviews, and that is standard operating procedure throughout the company.

of a transition toward a new, more accountable Amtrak focused on its business lines. The general managers will be working with the Transportation, Mechanical, and Engineering forces to improve operations and hold managers and employees accountable for performance. The general managers are business executive roles who will be accountable for achieving improved results. They will be counting on all of us to do our part.

We're now four months into the company-wide reorganization that brings front-line, mechanical, engineering and transportation activities in line with our Strategic Plan to run Amtrak like a business, focused on higher levels of customer satisfaction, safety and financial accountability.

It is important to remember that this reorganization does not mean employees must reapply for their current positions.

Instead we are creating positions within senior management that will be fully responsible for delivering a safe, on-time, enjoyable experience to our customers. In my search for the right individuals for these roles, I'm taking my time with the goal of getting this reorganization right.

This reorganization seems to be taking a while." That is because at the heart of this reorganization is the idea that the resulting improvements and management structure will transcend not just me but all of Amtrak's management and the nation's political changes as well. We're creating a structure that focuses us on our bottom line and providing great customer service. Doing that correctly takes time, and I want to get it right.

That's why we'll be looking both inside and outside the company for business leaders. This is the first of many changes that this reorganization will bring to Amtrak. While change can be daunting, I'm confident these changes are achievable and will be effective because of the input we have received from employees like you. I believe these improvements will help star employees rise through the ranks and allow our customers to enjoy America's Railroad even more than they do today.

As these changes unfold we will continue to provide you regular updates about this transition as well as how we plan to evolve the way service is delivered to our customers. Thank you for your support as we progress through this transition.

- **What is the Operations Reorganization?**

A realignment of the management structure to create business line accountability, dissolve departmental silos, and move decision making and accountability closer to the customer. Manager reporting lines and certain management positions will be adjusted into a new structure.

A transition team of senior managers provided perspective on the best elements of previous Operations organization structures. The Vice President of Operations held town hall meetings throughout the Amtrak system to explain the goals of the reorganization and listen to employee suggestions. Drawing from this process, a new management organization structure has been developed. As a result of these changes, over 80 positions will be posted throughout the Operations organization in the next 4-6 weeks. In order to accomplish a more streamlined organization and align positions appropriately, some employees' current positions will be impacted.

- What is the business case for the reorg
- Question states, "why should employees want to participate" but in this case there is no choice
- What is the impact on the Ops employees?
- How will this change actually happen?
- What are the details?

When the scope of a position is significantly changed or phased out and superseded by a new position, then the employee is impacted. The employee will meet with someone from their leadership team and also a human capital representative who will explain the situation. The employee will continue working in his/her current position until the transition to the new organization is close to complete. This process will take several months at a minimum. During this time, the employee is free to apply for any open position within the company for which he or she is qualified. When the reorganization is complete, and the new management structure is in place, then the positions being phased out will be eliminated.

■ **What are the best ways for me to benefit from this reorganization?**

The new management structure will help to foster teamwork and customer focus at the facility and route level. New management positions with greater accountability and responsibility are closer to the field and the front line. What this means for each employee is the opportunity to help build a stronger Amtrak through greater collaboration and teamwork. There are opportunities for employees to evaluate their career paths and apply for new positions as a result of this reorganization.

■ **If someone receives an impact letter, what is the process for finding another suitable position?**

Positions will be posted on the Amtrak career website throughout the transition, and all employees (regardless if impacted or not) are encouraged to apply for any position for which he or she feels qualified and willing to serve.

■ **How many people are being impacted?**

It is expected that fewer than 60 current employees across the entire Operations organization have positions that will be directly impacted in this reorganization.

■ **What is the schedule for the reorganization roll-out?**

Beginning in June, open positions will be posted each week in batches on the career portal (generally on Wednesdays) and will be open for applications for at least seven days. As positions are filled, the organization will be aligned into the new management structure. The timeline for roll out into the new structure will be phased to ensure that Operation safety, security, and quality will not be affected during the transition.

Comment [01]: See if this makes sense/is correct

■ **When will the reorganization be complete?**

The goal is to have the business line structure in place by the end of this fiscal year, September 30, 2013. The complexity of this transition requires adequate time to complete the process.

- Each train is part of a business line for performance reporting. The business lines are accountable for overall results.
 - This reorganization is NOT a reestablishment of strategic business units.
-

- Operations remains a national, unified department with greater integration of management within facilities.
- Business lines do not change the way we operate train service.
- We are accountable for the performance of each train we operate.
- Over 80 positions will be available for interested applicants.
- All employees have the opportunity to apply for any position(s) for which they feel they are qualified.

Operations is not broken.

Explaining the Reorganization

OPERATIONS

Business Line Communication

June 11, 2012 • Page 4 of 1

- We are not reinventing the wheel. We are transitioning to business lines in order to “Operate like a business,” to better serve our customers and increase our overall performance.
- This is an opportunity to become a stronger business – reducing cost, improving safety, and structuring the organization to provide improved service to customers.
- The goal is to establish business lines by the end of the fiscal year. DJ Stadler has traveled the country to meet with local Amtrak employees to gain their perspectives.
- The opinions, feedback, and suggestions from employees have been taken into consideration when designing the reorganization. This process has not been taken lightly.
- The reorganization asked long-serving employees to share their knowledge; what worked in the past, and what did not work.
- Employees shared the best and worst parts of previous Amtrak organizations and reorganizations, in order to generate this new structure.
- The reorganization is not driven to reduce headcount. The goal is to improve performance, including financial performance. Most management positions are not changing, and employees do not need to reapply for a job that is not changing.
- Even though we report our results by business line, previously there was no management structure within Amtrak that was directly related to business line performance — there was no accountability within the company for each business line.
- Therefore, the new structure is focused on creating management positions with greater accountability for the business line performance., , General managers are accountable for business line performance. There will be a route director for each long- distance train accountable for the individual performance of his or her rout The business lines also hold each other accountable for performance, and they hold the supporting components of Operations and Amtrak, such as terminals, backshops, and other support services accountable for the roles they perform on behalf of the business.

Significant time and resources have been dedicated to this reorganization in order to get it right.

special employee advisory

April 26, 2012 • Page 5 of 6

- This is very different from the old Strategic Business Units (SBUs). The SBUs were mini-companies that operated trains within a particular region of the country. The theory was that this would produce better accountability, customer focus, and management decisions, but in practice it resulted in rising costs, internal competition for resources, and fragmentation of the company. We are not going to split up Amtrak again. Operations will still be managed as a coordinated unit, but there will be greater empowerment and accountability for the performance of the routes.
- A terminal is a complex of facilities that originate, terminate, and perform major servicing of trains. Examples include Boston, New York, Albany, Philadelphia, Washington, Miami, New Orleans, Chicago, Los Angeles, Oakland, and Seattle.
- Within each terminal, many different roles are performed including mechanical servicing and inspection, switching, crew bases, commissaries, and customer service, among others.
- Previously, each terminal organization was managed separately, reporting through the Transportation, Mechanical, and Engineering departments.
- New management positions are being created to lead operations within each terminal. These positions are fully accountable for all the service components within the terminal. The business lines will hold the terminal manager accountable for performance. The terminal manager will work to ensure that employees are working as a team to prevent and solve problems, for maximum safety, efficiency, productivity, and customer service in the terminal.
- Previously, mechanical services for each terminal reported to the Mechanical department through a regional master mechanic. Amtrak is going to transition to a new organization in which mechanical services at each terminal will report into the terminal manager.
- The Mechanical department will still be responsible and accountable for managing the fleet, defining work standards, processes, initiatives, programs, process improvement, financial management, and accountabilities.

How will terminal organizations with integrated be managed?

Comment [A2]: Accountable for accountabiities?

special employee advisory

April 26, 2012 • Page 6 of 6

- The terminal manager and the terminal mechanical team are directly accountable to the Mechanical department for the work to be performed, that the engineering processes and specifications are adhered to, and to meet Amtrak's standards. The terminal team is also accountable to the business lines for mechanical performance and reliability. Delays, breakdowns, and other operating statistics are tracked for accountability.

The reason that the terminal workforce will report to the terminal manager instead of a master mechanic is to have more collaboration across functions locally within the terminal, in order to facilitate teamwork and better

Dear Co-workers,

Thanks to the input of more than 100 front-line employees and managers, we are moving forward with a comprehensive reorganization that I believe will make the company more financially competitive and operationally efficient.

The first step in the Amtrak Operations reorganization is happening today, as two newly created positions are posted for applicants — the general manager of the Northeast Corridor and the general manager of Long-Distance Services. Going forward there will be four general managers in all, each of whom will lead one of the four new business lines within Operations. As laid out in the Strategic Plan, these new business lines are Northeast Corridor Services, Long-Distance Services, State Supported Services and Commuter Services.

The debut of these two general manager positions is the beginning of a transition toward a new, more accountable Amtrak focused on its business lines. The general managers will be working with the Transportation, Mechanical, and Engineering forces to improve operations and hold managers and employees accountable for performance. The general managers are business executive roles who will be accountable for achieving improved results. They will be counting on all of us to do our part.

It is important to remember that this reorganization does not mean employees must reapply for their current positions.

Instead we are creating positions within senior management that will be fully responsible for delivering a safe, on-time, enjoyable experience to our customers. In my search for the right individuals for these roles, I'm taking my time with the goal of getting this reorganization right.

That's why we'll be looking both inside and outside the company for business leaders. If you feel you have the skills, drive and business expertise to become either the Northeast Corridor general manager or the Long-Distance Train general manager, I encourage you to please apply. Other leadership positions will be posted in the coming weeks and months, and we will keep you informed of these opportunities.

This is the first of many changes that this reorganization will bring to Amtrak. While change can be daunting, I'm confident these changes are achievable and will be effective because of the input we have received from employees like you. I believe these improvements will help star employees rise through the ranks and allow our customers to enjoy America's Railroad even more than they do today.

As these changes unfold we will continue to provide you regular updates about this transition as well as how we plan to evolve the way service is delivered to our customers. Thank you for your support as we progress through this transition.

Background

Amtrak and National Park Service will provide onboard educational programs along selected Amtrak routes again in 2012. The program is known as "Trails & Rails." The program consists of National Park Service representatives boarding trains and providing commentary about significant places of interest along the route. The following operation plan for the 2012 Trails & Rails programs is a guide for train service employees. There may be operational issues where this schedule is not followed, interrupted or the city pairs listed may be altered.

Conductor Announcements When Guides are on the Train.

Conductors should make the following announcement when guides are on the train.

Ladies and gentleman, the Trails & Rails Guides from the National Park Service will be on-board the train today until _____ (the city point where the guides finish). Please join them in the _____ (Lounge or Café Car) if you are interested in learning more about the history and highlights along the train's route.

PA Usage by Volunteers

With the exception of announcing the program and its location and a few significant interpretive sites, the narration will be limited to the Lounge Car or other designated area. Guides will utilize their own portable PA systems, when possible. Train wide announcements can be made for significant sightings ("Kodak moments") *like a pod of California Gray Whales or elk or the Mississippi River, etc.*

Meals

On-board guides, individuals being trained to become guides or individuals performing guide audits, and Trails & Rails staff traveling on business travel are to receive complimentary meals. This could be in the Dining Car, Cross Country Cafe or Café Car depending on the service available. Business Travel may be for meetings or research projects, and could take place on any Amtrak train. Any individual working with the Trails & Rails program must have a Trails & Rails ID and/or a National Park Service ID. Meals must be appropriate to the time of day. Please note that there are occasions where the guide services will take place as a special request and may not exactly fit any of the outlined schedules above.

- The Steward/LSA is to provide each Guide with a Meal Check designated as Coach.
- It is mandatory that the Guide sign the meal check including the Guide's ID number and indicate the affiliation (*National Park Service - Trails & Rails Program*) on the bottom of the Coach meal check.
- Meals consist of the following: All items selected will be recorded on the meal check.

Dining Car and Cross-Country Meal Service

- Breakfast consist of one (1) Breakfast entrée and one (1) Breakfast meat along with coffee, tea and a choice of juice. (One or more nonalcoholic revenue beverages - soda or bottled water may be provided to the passenger upon request during the meal period only.)
- Lunch and Dinner consist of one (1) entrée with two (2) sides, one (1) dessert and one (1) non-alcoholic beverage per meal period. (A second non-alcoholic revenue beverage – soda or bottled water may be provided to the passenger upon request during the meal period.) (Refer to Chapter 8, Section 2 “On-Board Service Accounting Procedures,” Letter e. on page 8-185 of the “Service Standards for Train Service & On-Board Service Employees Manual Number 6.1.”)

Café Car Meal Service

Meals should be appropriate to the time of day. (i.e. sandwiches, chips, beverage, etc.)

Normal complementary accounting procedures apply. Refer to Chapter 8, Section 2 “On-Board Service Accounting Procedures”, Letter E. “Complimentary Service” of the “Service Standards for Train Service & On-Board Service Employees Manual Number 6.1”. Page 8-165, Number 1 “Complimentary Service Accounting” (NRPC 3157) explains how to complete the paperwork related to On-Board Guides.

Accommodations On-Board

The schedule of Trails & Rails volunteers make it unlikely that accommodations will be needed enroute. In the event of extreme service disruptions or late trains, Trails & Rails volunteer should be afforded accommodations in the Crew Sleeper (Transition Sleeper) if possible.

Hotel Transportation

Guides generally travel to Amtrak Hotels with the crews in crew transportation. Most of the time, they use the Hotel Shuttle or other service as provided.

This OSA is fulfilled on January 31, 2013 and should be removed from all posting areas.

The latest electronic version of this OSA or the *Service Standards: Manual for Train Service and On-Board Service Employees* is available on the Intranet under Library > Service Standards or on the Internet at <http://customerservice.amtrak.com> under Standards.

Dear Co-workers,

Since the launch of Safe-2-Safer more than three years ago, we have seen positive impacts to safety, security and our culture at Amtrak. We are in a much better place today than we were in 2009, and for that you should all be proud.

Amtrak is firmly committed to the Safe-2-Safer process that now involves nearly all of our employees system-wide. In order to continue to properly support the implementation of Safe-2-Safer we have extended our partnership with Behavioral Science Technology (BST) for two additional years.

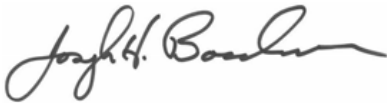

In the following years, with support from BST, we are going to continue to provide our employees with the same high-quality coaching and training that has made the implementation of Safe-2-Safer a success. We will provide additional management training with a continued focus on the leadership behaviors that move us toward our goals.

You can expect to see increased numbers of observations with feedback, primarily to recognize and thank you for the many safe behaviors you use every day, and to help us all understand how we can avoid putting ourselves or our customers at risk. You can also expect to see the continued elimination of barriers to safe performance, enabling collaboration as we look for opportunities to make Amtrak a safer and more secure place to work.

I want to assure you that I am fully committed to Safe-2-Safer and believe wholeheartedly in the importance of changing our safety culture here at Amtrak. Together as an organization along with the help of BST, we are pursuing safety excellence; we are demonstrating every day that safety is a core value at Amtrak. I am asking all of you to continue to do your part to make Safe-2-Safer a way of life for Amtrak.

Thank you for your support.

Sincerely,

A handwritten signature in dark ink, appearing to read "Joe Boardman". The signature is fluid and cursive, with a long horizontal stroke at the end.

Joe Boardman
President and CEO

SPECIAL ORDER

SO#:	# 12-02	X	New Subject:	Officer of the Year 2011
EFFECTIVE:	February 24, 2012		Amends:	
EXPIRES			Rescinds:	
SUBJECT: AMTRAK POLICE DEPARTMENT 2011 OFFICER OF YEAR AWARD				

I am pleased to announce the selection of Investigator George W. Gernon as Amtrak Police Department's Officer of the Year for 2011. Investigator Gernon was chosen to receive this prestigious award for his numerous and significant contributions to the Amtrak community.

Investigator Gernon has been employed by the Amtrak Police Department since March 6, 2003. He has worked as a Police Officer, a Canine Officer in the Mobile Tactical Unit, and presently as an Investigator assigned to the New York Division. Investigator Gernon was selected as Officer of the Month for January 2011.

Some of the significant incidents exhibiting Investigator Gernon's abilities and dedication to duty are as follows:

In January 2011, Investigator Gernon assisted the Drug Enforcement Agency of New Jersey in a drug interdiction of a male adult who was possibly transporting narcotics from Florida to New York. The subject's reservation was located and Investigator Gernon and Drug Enforcement Agency personnel located the individual as he exited the train. The interdiction was successful and one kilogram of heroin was recovered. The subject cooperated with law enforcement, which led to the arrest of two other persons in Newark Penn Station, and seizure of a vehicle.

In March 2011, Investigator Gernon led the investigation of a suspect wanted for a pattern of 20 grand larcenies of passengers inside Penn Station. The subject was identified with the assistance of Criminal Investigations Unit (CIU) members, and was found to have absconded from parole. After an extensive attempt to locate the residence of the subject via surveillance of previous addresses in two states and through family members, the subject was located inside Penn Station attempting to commit another grand larceny, and was arrested. The subject pled guilty and was sentenced to two to four years in prison.

In July 2011, Investigator Gernon was notified by the New York Police Department of a male wanted for an assault possibly attempting to flee the state on an Amtrak train. Investigator Gernon located the subject's reservation via a check of the ARROW system and, along with other CIU Officers, arrested him without incident.

Investigator Gernon and other CIU/Special Operations Unit members were notified of a male traveling from Florida to New York transporting narcotics. The reservation was located and the identified subject was found to be in possession of over 800 oxycodone pills. The subject pled guilty and has been cooperating with law enforcement. To date, four persons have been arrested for narcotics' related activity from this incident.

Special Order
12-04

Title/Subject:
Officer of the Year

On July 29, 2011, Police Officer Jones and Sergeant Kosakowski responded to the Duane Reade store, in New York Penn Station, which had just been robbed at gunpoint for approximately \$18,400. CIU was contacted, and Investigators Gernon and Coiro responded to Penn Station where they found the store manager with her hands zip-tied together. CIU conducted follow-up interviews of Duane Reade employees present during the incident, which revealed that the store manager's collection of earlier shift's receipts violated store protocol. All evidence from the crime was secured and transferred to CIU. Upon examination of surveillance video, it was determined that one of the two suspects involved in the crime resembled the victim's husband.

For approximately four months, Investigator Gernon meticulously mapped out this case as he worked closely with the New York District Attorney's Office, conducted interviews, secured search warrants and video evidence, subpoenaed cell phone records, "pinged" cell sites and conducted surveillance on the Duane Reade manager and her husband.

The four month investigation revealed that the Duane Reed manager, her husband, and an accomplice planned and performed the robbery, and divvied up the proceeds. On November 1, 2011, Investigator Gernon along with CIU members Investigator Kevin McCandless, Investigator Alex Colon and New York Special Operations Unit Agents Marc Deslandes and Michael Cardinali and Detective Steve Ulrich arrested the husband and wife for grand larceny. Upon further interview by Investigator Gernon and Detective Colon of family members, the accomplice voluntarily turned herself in at the Amtrak Police Department New York Command Center and was charged with grand larceny. At the New York District Attorney's Office, the accomplice gave a full written and video statement of her role, as the person who entered the Duane Reade store with a firearm.

In September 2011, Investigator Gernon assisted Investigator McCandless in the investigation and arrest for a larceny that occurred inside New York Penn Station. The subject was a known pickpocket and was on active parole.

In October of 2011, Investigator Gernon assisted Investigator Kevin McCandless in the investigation, surveillance, and arrest of three subjects for burglary/wire larcenies inside Adams Yard. The subjects were entering the yard by cutting a hole in the fence and would then cut and steal copper wire that was stored at the yard. The subjects were arrested, and two cars were seized.

In November 2011, Investigator Gernon conducted a follow-up investigation in regard to a grand larceny reported by an Amtrak passenger in Penn Station New York. Video evidence was secured and based on that evidence a female restaurant employee was interviewed. During the interview, she admitted to finding a credit card and using it to make purchases. The female was arrested for identity theft and grand larceny.

In December 2011, Investigator Gernon and other CIU members conducted "Operation Lucky Bag" inside Penn Station to combat a high number of larcenies occurring. The detail resulted in the arrest of a felon, who had an active extraditable warrant in New Jersey.

Through his ongoing efforts with local law enforcement and Amtrak personnel, Investigator Gernon has continually contributed to employee and passenger safety and security. Investigator Gernon displays the qualities of an exemplary law enforcement officer, worthy of the Amtrak Police Department's "Officer of the Year" Award.

APPROVAL:

Employee Appreciation

We received this heartwarming email last week and we were asked to share it with you.

*"Unless you have experienced it, and I know many of you did when Katrina hit New Orleans, you cannot fathom the devastation and utter hopelessness you feel seeing your house and your belongings washed away. For many days after Hurricane Sandy hit the New York/New Jersey area, most of us walked around in a daze, trying to understand the loss and not knowing what to do. The support and donations given by our fellow Amtrak employees was amazing, words cannot express the gratitude and appreciation that was felt by those hit hard by the hurricane. We know we speak for everyone when we say **thank you from the bottom of our hearts!** You helped make a traumatic situation that much better with your love and support. **THANK YOU!!!**"*

Amtrak employees, Penn Station NY - Debbi Hoeler, Felix Martinez, Ellen Rizzo, Tom McClinchy, Dan Borisuck, Jessica Guastella, Naomi Miller and the many others who fell victim to Sandy's rage.

We would like to continue easing the pain that this hurricane produced.

Amtrak Employee's Relief Fund

A month ago our company established the Amtrak Employee's Relief Fund, a peer-to-peer fund, allowing you to make donations via payroll deductions to help our colleagues impacted by Hurricane Sandy. We have collected close to \$11,000 to date in payroll pledges. Donations may be made by completing *NRPC 3238 Amtrak Relief Fund Payroll Deduction* (attached) or sending a check to our lockbox.

Relief Fund Application

The Amtrak Employees' Relief Fund application form (*NRPC 3382 A*) for those employees affected by Hurricane Sandy, is now available on the Intranet and is attached. Please note that applications are due by January 18.

We know that you have numerous questions regarding how the funds will be disbursed, how this fund is administered and deadline and contact information. Explanations are attached in the FAQ document.

Thanks for all of your generosity and concern.

Amtrak® Employee Update

December 6, 2012

2013

special employee advisory

April xx, 2013 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

Since 2010 Amtrak has, under contract, provided Metrolink, the southern California commuter service, with train and engine crews to operate their trains. After a great deal of consideration, I notified their chief executive officer that we will not be renewing our operating contract when it expires on June 30, 2014.

We will certainly work with their management to ensure a successful transition and we wish them all future success.

We would like to recognize our managers and employees for the excellent job they have done over the past three years and we are depending upon them to continue the professional and dedicated service they demonstrate today through the expiration of the current agreement.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

AMTRAK MONITORS BOSTON MARATHON EXPLOSIONS; EMPLOYEES ASKED TO REMAIN VIGILANT

Amtrak is closely monitoring the situation surrounding the explosions this afternoon at the Boston Marathon. At this time, there are no specific threats to the rail system and both Amtrak and MBTA service are operating as scheduled. As a safety precaution, Amtrak Police, including its K9 units, is conducting heightened patrols of stations and infrastructure nation-wide.

Employees are asked to be extra vigilant and immediately report any suspicious activity or persons to the Amtrak Police Department at 1-800-331-0008. In the event of an emergency, please call 911. Specifically, employees should:

- Report any unattended baggage.
- Be aware of packages, bags or containers that look out of place.
- Report any trespassers along the right-of-way.
- Be alert for any other unusual activity.

Further updates will be provided as necessary.

Alleged Terror Plot Disrupted in Canada

It has been known for several years that Bin Laden suggested the targeting of railroads, infrastructure, bridges, tunnels, airports and other forms of transportation.

Authorities, including the Amtrak Police Department (APD), were notified about a year ago that an alleged Al Qaeda-supported attack of a passenger railroad was under development in Canada and the alleged operatives were under surveillance during that period. APD was very supportive of these investigative efforts.

Collaborative efforts between Canadian law enforcement and intelligence authorities, in a joint cross-border operation with the Federal Bureau of Investigation and the Department of Homeland Security disrupted this alleged terrorist plot.

There is no imminent threat to the public, employees, train passengers or infrastructure. Today's arrests in this investigation ARE NOT LINKED to the Boston Marathon bombing last Monday.

We apologize for not being able to answer any specific questions related to today's events and we will update you as more information becomes available.

Employees are asked to remain vigilant and immediately report any suspicious activity or persons to the Amtrak Police Department at 1-800-331-0008. In the event of an emergency, please call 911. Specifically, employees should "See Something, Say Something" and:

- Report any unattended baggage.
- Be aware of packages, bags or containers that look out of place.
- Report any trespassers along the right-of-way.
- Be alert for any other unusual activity.

AMTRAK CONTINUES TO MONITOR BOSTON MARATHON EXPLOSIONS UPDATES; EMPLOYEES ASKED TO REMAIN VIGILANT

Amtrak continues to monitor the developments surrounding the explosions this week at the Boston Marathon. The Amtrak Police Department (APD) has stepped up patrols and is conducting increased sweeps of stations, trains and railroad property. APD continues to work with local, state and national law enforcement partners in staffing intelligence centers to share and collect information.

Employees are asked to remain vigilant and immediately report any suspicious activity or persons to the Amtrak Police Department at 1-800-331-0008. In the event of an emergency, please call 911. Specifically, employees should:

- Report any unattended baggage.

April 23~~24~~, 2013 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

Section 209 of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA) directs us to work together with all affected states (19 in total) to develop and implement a consistent cost-sharing formula for services under 750 miles outside of the Northeast Corridor. Over the last three years, we worked with our state partners to develop this new costing formula and to get ready for implementing it on October 1, 2013, the beginning of our new fiscal year.

One of the goals of this Congressionally-mandated requirement is having a consistent formula for all our state-supported services ~~is fairness~~ and having the states know that they are being treated equally. Our assumption is that under this new formula, the state-supported trains will continue to operate in the states affected just as they do today. But this raises the question of what we do if a state decides that it ~~is unwilling or unable to~~ will not ~~or cannot~~ pay the costs for routes covered by Section 209. We are hopeful that we will be able to ~~negotiate successfully~~ reach agreement with each of our state partners, and negotiations are underway, but it is a question we have been asked and are prepared to deal with.

~~We sent a letter last Friday to all states affected by Section 209 service informing them that we must have all agreements in place by October 1 if there is to be no loss of service. In other words, Simply put, Amtrak cannot absorb the cost of running these trains and if the Section 209 funding is not available for any particular state train then that service will end. We continue to believe that maintaining these state routes is in the best interest of a national passenger rail system and we are working hard with our state partners to reach agreements that implement the legal mandate in Section 209 of PRIIA. So that there is no confusion about what will happen though, In the event that the state is not able to provide the funding required under the Section 209 formula, and/or does not execute an agreement with Amtrak consistent with the requirements of Section 209, the service will end. Last Friday, we sent a letter last Friday to all states affected by Section 209 service informing them that we must have all agreements in place by October 1 if there is to be no loss of service.~~ We are committed to working with the states to finalize the arrangements to transition the state-supported trains to the Section 209 formula ~~in order to avoid discontinuing the service~~ and we are hopeful that, together, we will be able to ~~negotiate successfully~~ accomplish that.

While we finalize these agreements to continue these corridor routes under Section 209, the best thing we can do is show our state partners and our passengers the true value of the services we provide and that we are a safe and customer-oriented company delivering an important transportation option to their communities. Please dedicate yourselves to provide the very best customer service because that's the best way for us to ensure that our state-supported services continue to grow ~~under the new rules of Section 209.~~

Tom Carper Reappointed to Board of Directors

Tom Carper rejoined the Amtrak board of directors on August 9, following his recent nomination by President Obama and confirmation by the U.S. Senate. He will serve a five-year term.

Mr. Carper had previously served as a member of the board from March 2008 through March 2013. He was elected chairman of the board in January 2009 and served in that capacity until his term on the board expired.

With Mr. Carper's reappointment, there remains only one vacancy on the board.

Mr. Carper was originally nominated by President George W. Bush as a director of the Amtrak board of directors in May 2007 and was confirmed by the U.S. Senate in March 2008. He was a small business owner from Macomb, Ill., and served as mayor of Macomb from 1991 to 2003. He was appointed by the Amtrak board of directors to serve on the Amtrak mayor's advisory council and served as its chair from 2000 to 2001. In 2003, he was named regional director of the West Central region for Opportunity Returns by the Illinois governor. He retired from that position in 2010.

Mr. Carper received his Bachelor of Arts degree from Western Illinois University and served in the U.S. Army from 1967 to 1970 in both Thailand and Vietnam.

A Message from Joe Boardman

Dear Co-workers,

As we continue to work under financial constraints, we must seek out opportunities to save money and increase our bottom line.

Recently, it has been brought to my attention the amount of potential savings we can achieve by reducing our color copying expenses. If we eliminate color copying entirely, we can achieve a potential cost savings of \$540,000. When we add in certain printing costs and individual desk-top printers, our savings have the potential to double.

While I realize that there are times when color copies are necessary and that they can not be entirely eliminated, I ask all of you to be more conscientious of your printing choices.

Here are a few ways in which we can reduce our color copying expenditures:

- When ordering copies from our Philadelphia and Washington, D.C., Reprographics Centers, select black and white copies as your first option.
- Change the default setting on all printers to black and white. This includes those employees with desk-top printers. By doing so, we automatically stop the color printing of drafts and unnecessary copies, saving money on toner and ink.
- Whenever possible, consider going paperless. By going paperless, not only do we save our financial resources but we also support our commitment to preserving the environment.

By simply changing this work process, we alleviate our financial expenditures and preserve resources that can be committed elsewhere, such as on our safety and customer focus initiatives.

Thank you for everything you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman

Dear Co-workers,

As we enter the holiday season, I want to remind all employees, contractors and vendors that Amtrak is a drug- and alcohol-free workplace.

Our dedicated and conscientious employees are Amtrak's most valuable resource; your health and safety and the safety of our customers is our primary concern. Since drug misuse and alcohol abuse may pose a serious threat to health and safety, Amtrak is committed to establishing and maintaining a drug- and alcohol-free workplace. Employees who come to the workplace (on- or off-duty) with drugs and/or alcohol on their persons or in their bodies constitute an unacceptable hazard to themselves, their fellow workers and the traveling public. Amtrak adheres to the Drug Free Workplace Act of 1988, which requires Amtrak to adopt a policy with specific provisions that prohibits the unlawful manufacture, distribution, possession, and use of alcohol and illicit drugs in our workplace. Therefore, Amtrak requires that all employees report for and remain on-duty drug- and alcohol-free.

Amtrak has three programs that assist in this effort:

- Prevention through Operation RedBlock (ORB). Operation RedBlock is a labor-developed company-adopted drug prevention and intervention program for our agreement employees. The program emphasizes awareness, education, and prevention committees
- Treatment programs and services through an Employee Assistance Program (EAP) for all Amtrak employees with drug and alcohol abuse problems. The EAP provides assessment, counseling and referral for treatment or rehabilitation, as appropriate.
- A testing program for drug use and alcohol misuse consistent with applicable law, federal regulation and company policy.

Amtrak provides for supervisory training to assist managers and supervisors in identifying and addressing illegal drug use and alcohol misuse by their employees.

It is the responsibility of all of us to ensure the safety of our customers and ourselves by becoming knowledgeable with the following:

- Amtrak Drug and Alcohol Policy 7.3.0 and Instructions for Supervisors
- Employee Assistance Program Policy 7.4.2
- 49 CFR Part 40 Procedures for Transportation Workplace Drug and Alcohol Testing Programs
- 49 CFR Part 219 – Control of Alcohol and Drug Use
- 49 CFR Part 382 – Controlled Substance and Alcohol Use and Testing
- Operation Red Block – By pass, mark-off procedure

Should you require more information please contact:

Deborah Jowers, Manager D&A Programs at jowersd@amtrak.com

Chian Gavin, Interim Manager EAP at chian.gavin@amtrak.com

A Message from Joe Boardman

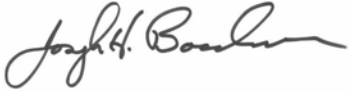

Dear Co-workers,

I am pleased to let you know that tomorrow, we will resume normal operations on the Northeast Corridor between New York and Boston, including the resumption of full *Acela Express*, *Northeast Regional* and *Springfield Shuttle* service following this weekend's severe winter storm.

Our crews have been working around the clock to clear affected track of large amounts of snow, in excess of several feet in some cases. In addition, crews have removed downed trees and made all necessary repairs to allow for full restoration of service.

I appreciate what you do every day and especially these last few days. I know that it is hard to be away from your families during these weather situations and I thank you for that.

Thank you for everything you do for Amtrak.

A Message from Joe Boardman

Dear Co-workers,

I am very happy to let you know that on 12:01 a.m. this past Saturday morning (February 16, 2013), we assumed maintenance responsibilities for the rail line (former Norfolk Southern route) owned by the state of Michigan on behalf of the Michigan Department of Transportation (MDOT). This line is used by the *Wolverine Service* and *Blue Water* trains from Kalamazoo to Central and Eastern Michigan.

As announced in December 2012, MDOT used a grant from the Federal Railway Administration to purchase 135 miles of Norfolk Southern railroad for \$140 million. This line is directly connected to the Amtrak-owned Michigan District, which runs 97 miles from Kalamazoo to Porter, Ind. The result is that nearly 80 percent of the route between Detroit and Chicago is now publically owned and will be maintained for passenger trains at higher speeds.

To conduct daily maintenance of way responsibilities our Engineering department has employed 46 people including:

- 14 Communications and Signal employees, seven of whom transferred from Norfolk Southern to work at Amtrak;
- 31 Track employees, five of whom transferred from Norfolk Southern to work at Amtrak and
- 23 Amtrak employees we were able to bring back from furlough status.
