Re: Freedom of Information Act Request

Tracking Number: 16-FOI-00098

We are further responding to your February 23, 2016 request for information made under the Freedom of Information Act (FOIA), which was received via mail by Amtrak's FOIA Office on March 1, 2016.

Your request seeks a copy of the Amtrak Special Employee Advisories issued during the time period April 2008 to present.

Please find enclosed on CD the above-referenced records.

Your request has been classified as category IV – that is, a request other than for commercial-use from a representative of the news media, or from an educational or non-commercial institution. Requesters in this category receive the first 100 pages of duplication and the first 2 hours of search time free of charge. Thereafter, requestors are charged \$38.00 per hour for search time and 25 cents per page for reproduction of records. There is no charge for processing your request.

If you have any questions regarding the processing of your request, please feel free to contact me at (202) 906-3741 or via e-mail at Hawkins@amtrak.com.

Sincerely,

A handwritten signature in black ink, appearing to read "SHL", written over a horizontal line.

Sharon Hawkins
Lead FOIA Specialist

Amtrak Mourns Passing of C & S Employee

Dear Co-workers,

It is with deep regret that I inform you that the Engineering department employee who was struck by *Acela Express* Train 2150 early this morning in New Carrollton, Md., has passed away.

We all grieve the loss of life, and it is especially painful when we lose one of our own on the railroad.

Our thoughts and profound sympathy are with his co-workers, friends and family; I can only imagine the degree of anguish they feel at this time.

Sincerely,

Alex Kummant
President and CEO

2008 President's Service and Safety Awards Recipients

Amtrak announces the recipients of the 2008 President's Service and Safety Awards, an honor bestowed upon employees who have made extraordinary contributions to the company during the calendar year 2007.

These outstanding employees will be honored this fall at several ceremonies in Chicago; Beech Grove, Ind.; Boston; Washington, D.C.; Philadelphia; New York; Oakland, Calif.; Los Angeles and Jacksonville, Fla. The celebrations will also honor those employees with 30 and 35 years of service in 2008. Congratulations to all recipients!

Achievement

- Donald R. Skinner, Marketing and Product Management
- Fort Worth Mechanical Team, Mechanical:
 - Luis A. Castro
 - Adam T. Cooper
 - Robert L. Dodd
 - Glenn A. Mallott
 - Tommy W. Reynolds

Wage Increases Take Effect in April, Retroactive Payments in May

The new rates of pay and retroactive wage payments for the ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment) and UTU will be paid as follows:

- The new rates of pay for positions in the above crafts take effect on April 1, 2008, and will begin to appear — depending on your union and pay schedule — as early as April 11, and in full in the April 25 paycheck. The first employee medical plan contribution for the above groups will be deducted from the April 25, 2008, paycheck. After that initial deduction in April of \$166.25, contributions in future months will be split between the first and second checks of each month.
- The first installment of the retroactive wage payment (40% of the total adjustment) is scheduled to be paid in a separate check (or through direct deposit) on May 9, 2008, and will be calculated on the wages through March 31, 2008, for employees eligible to receive the retroactive wage payment. A summary report of the full retroactive adjustment along with a list of frequently asked questions and answers will be furnished with the payment to provide employees with information about the calculation and who to contact about specific disputes regarding the payment.

In addition, the contract settlements provide employees with the ability to “opt out” of medical plan coverage, thereby not having to make the monthly contributions as of May 1, 2008. A separate mailing has been sent to employees about the Health Care coverage changes, including the form that must be submitted if employees wish to opt out of Health Care coverage. The required “opt out” form must be returned before April 30, 2008.

Amtrak Statement on Employee Fatality

The following statement was released today with permission from the family of Steven Rychwalski, the Engineering department employee who passed away as a result of being struck by an *Acela Express* train yesterday:

Amtrak is saddened to announce the death of Steven Rychwalski, the employee struck Wednesday morning by an Acela Express train near New Carrollton.

“On behalf of all Amtrak employees, I offer my deepest condolences to the family of Steven Rychwalski,” said Alex Kummant, Amtrak’s President and CEO. “Steven was an exceptional member of the Amtrak family, and we mourn his untimely passing.”

Rychwalski, of White Marsh, Md., was injured early Wednesday, August 20 when he was struck by an Acela Express train north of the New Carrollton station. He was transported to a local hospital where he passed away.

Rychwalski, 22, joined Amtrak in 2005 and was working as an inspector for the Communications & Signals department at the time of his death.

Acela Express 2150 was traveling from Washington to Boston at the time of the incident. There were no injuries on board the train.

Information for Employees Related to Tropical Storm Gustav

Amtrak is closely monitoring the progress of Tropical Storm Gustav as it makes its way toward the Gulf Coast. At this time, it is forecast to become a hurricane and to make landfall on the Gulf Coast as early as Monday night. Because the safety and well-being of our employees is paramount, Amtrak is taking steps to help employees in the region, should Gustav make landfall.

In preparation for the storm's arrival, all employees in the region should ensure they have their supervisor's contact information with them to maintain contact and so that they can obtain information about their work assignments.

To account for employees' whereabouts and safety, all employees in the region are being asked to call in to verify their current location.

Mechanical department employees in the region should call 800-424-0217 ext. 2082 or 302-683-2082 or 302-683-2083.

All other employees in the region should call 877-872-2334. As of this evening, this toll-free hotline will serve as a central reporting number and to field questions from employees affected by the storm.

The hotline personnel will manage a daily roster of employees and distribute it to department heads and supervisors to ensure that employees are accounted for.

On the operations front, as of today, regularly scheduled service has been suspended to and from New Orleans until further notice. *Crescent* Trains 19

and 20 will terminate and originate in Atlanta, *City of New Orleans* Trains 58 and 59 will terminate and originate in Memphis, and *Sunset Limited* Trains 1 and 2 will terminate and originate in San Antonio.

The Federal Emergency Management Agency (FEMA) has already begun evacuating some Gulf Coast cities, including New Orleans.

The company is preparing to run evacuation trains according to its agreement with FEMA. To that end, designated "Go Teams," made up of T & E, Mechanical and OBS crews, along with APD and Mobile Security Teams, are being deployed to operate the evacuation trains from New Orleans to Memphis.

As more information concerning affected employees, facilities and services becomes available, additional advisories will be posted.

Please distribute at all safety meetings and post on all employee bulletin boards.

A Message from President and CEO Joe Boardman

Dear Co-workers,

I want to share with you some of the discussions that took place during the board of directors meeting this week.

First, I want you to know that, I — with unanimous support from the board of directors — will make it my highest priority to seek the funds for the remainder of the retroactive pay in 2009.

At a meeting with labor leaders last month, I said that it was my intent to deliver the retroactive pay in 2009. After the holidays, we plan to seek the necessary funds from Congress and will appeal to our key appropriators on the Hill to make the funds available for this purpose. I will join with labor leaders in taking this message to Capitol Hill.

We have an incredibly dedicated workforce. It's important to me that you know that I value the work you do, and that I will go to Congress for you.

At Congress' request, we have submitted a robust list of projects for consideration for the economic stimulus bill that President-elect Obama has said will be his first legislative priority in 2009. That list includes putting more people to work on our fleet and infrastructure so that we can expand capacity to meet demand. Stored equipment needs to be refurbished and put into service, and more work done on our current fleet so that we run the caliber of service we can all be proud of.

I'm sure you've heard me talk about my goal of a greener, safer, healthier and more connected Amtrak. Everything we do feeds into that goal. From putting additional equipment into service with the help of the stimulus bill (we hope), to fighting for the retroactive pay, to serving as a critical player in the nation's transportation network — it all means a better and stronger Amtrak.

With these goals in sight, we will position ourselves as a transportation leader and the most viable mode in the next energy crisis. Just consider the role Amtrak is playing in the presidential inaugural events. We're transporting the President- and Vice President-elect to Washington, as well as bringing hundreds of thousands of people to the nation's capital. We'll be working hard to accommodate the demand, and I thank all of the employees who will be working that day — including those who sign up to volunteer — to make those trips extremely successful.

I wish you all very happy holidays and please work safely.

Sincerely,

Joe Boardman
President and Chief Executive Officer

P.S. I will be on C-Span's Washington Journal on Tuesday morning, if you have the opportunity to tune in.

Please distribute at all safety meetings and post on all employee bulletin boards.

Unified Security Command

Dear Co-workers,

Effective immediately and until further notice, all security direction and supervision will be unified under Chief Operating Officer William Crosbie.

I thank both the APD and OSSSO in advance for their cooperation.

Mr. Crosbie will decide the best way to ensure both common communication and policy decisions in connection with any and all agencies that coordinate with Amtrak on security and safety issues.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Employee Information for Inauguration Day

Amtrak is taking extraordinary steps to accommodate the demand for service to and from Washington, D.C., for the events associated with Inauguration Day. Millions of people are expected to visit the nation's capital, and the demand will test Amtrak's capabilities on the Northeast Corridor.

"This will be our day to shine, and to show America how critical passenger rail is and how it is done safely, skillfully and professionally," said President and CEO Joe Boardman.

"This is an all-hands-on-deck situation," stated Chief Operating Officer William Crosbie. "We will need all the Northeast Corridor operations, security and APD employees on hand, and we are asking non-operations employees to participate in this historic day by volunteering in stations."

Accordingly, Jan. 20, 2009, is considered a working day for all employees, including those who live in the D.C. area. Everyone scheduled to work that day is expected to work a full day. Any requests for leave must be made in advance and approved by the head of the department if the employee's attendance is determined not to be required that day.

Any early departure for a department on Jan. 20 must be approved by the appropriate Executive Committee member. Requests from non-agreement-covered employees to work from home on that day will not be permitted unless the employee already has a planned work schedule from home that has been pre-approved by management.

Getting To and From Work

Due to extraordinary security measures and significantly altered traffic patterns expected in Washington on Jan. 20, employees should plan their commute to and from work in advance. Build extra time in anticipation of delays due to road closures and crowding. Please check www.inauguration.dc.gov and your local news for information about your commuting options.

MARC and VRE commuter trains will be all-reserved service on that day; however, Amtrak employees reporting for work will be permitted to ride free using their flash pass and are expected to stand on full trains. Both services will operate on adjusted schedules and not all stations will be served. Each service's respective Web site contains information on schedule changes. Normal flash pass privileges will apply to Amtrak trains.

Volunteers Needed

Employee volunteers are urgently needed to assist passengers and manage traffic flow at New York Penn, Philadelphia, Wilmington, Baltimore and Washington on Jan. 20. Employees who want to volunteer should first check with his or her supervisor. Managers are encouraged to allow their direct reports to volunteer when possible.

Those who sign up to volunteer in Washington Union Station will be asked to attend a walk-through on Jan. 19.

To volunteer in New York, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Operational Changes

Extra trains and cars have been added to the Jan. 20 schedule to maximize capacity and inventory has been loaded into the Arrow system. A majority of the extra capacity available is southbound to Washington in the morning and northbound from Washington in the afternoon. Information about service that day is posted on Amtrak.com.

To meet demand, Mechanical forces are reducing shop counts as much as possible and the company has leased equipment from New Jersey Transit.

Further information and details will be provided in the coming weeks.

Tentative Agreements Reached With Three More Unions

Amtrak this week reached tentative agreements with three unions that cover nearly 1,700 employees. Agreements were reached with the Brotherhood of Locomotive Engineers and Trainmen; the International Association of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers; and the Sheet Metal Workers International Association.

The agreements correspond with tentative agreements the company has already reached with 10 other unions since mid-January. Details of the agreements will be sent to members of the unions for ratification.

The nine tentative agreements that were signed on Jan. 18 are out for ratification and results are expected on March 10.

Message from President Kummant on Tentative Labor Agreements

Dear Co-workers,

A few moments ago, Amtrak and representatives of the nine unions before the Presidential Emergency Board signed tentative agreements, thereby averting a strike that could have taken place on Jan. 30.

Details of the agreements will be sent to the respective union members for ratification over the next several weeks, and will not be publicly disclosed until that process has begun.

The nine unions affected are the Brotherhood of Maintenance of Way Employees; International Brotherhood of Electrical Workers; International Association of Machinists and Aerospace Workers; Brotherhood of Railroad Signalmen; Joint Council of Carmen, Helpers, Coach Cleaners and Apprentices; American Train Dispatchers Association; National Conference of Firemen and Oilers/Service Employees International Union; American Railway and Airline Supervisors Association (Maintenance of Equipment, Maintenance of Way).

On behalf of the board of directors, I want to thank the leadership of the labor organizations. It has not been easy for any of us, and I know they share our sense of relief and resolve to move forward in a productive and cooperative spirit to provide excellent passenger rail service.

We have averted a strike that could have had a crippling effect on the lives of millions of Americans. More importantly, we have jointly reached tentative agreements that enable us to get back to what brings us together, rather than what sets us apart. For Amtrak to succeed, we all need to push forward in the same direction.

I encourage everyone to put the disputes from the past behind them and to focus on what we can learn from this experience and how we can grow together.

Sincerely,

Alex Kummant
President and CEO

Important Payroll Message for Agreement-Covered Employees Who Are Paid Weekly

Most weekly paid agreement employees will have an incorrect amount of 55 cents more than should have been deducted for their health care contribution in the August 1, 2008 paycheck. TCU and ASWC represented employees will have no health care deduction with this paycheck, when there should be one. This occurred because of data input errors in the preparation of the checks.

The employees who had 55 cents erroneously deducted will notice a deduction of \$83.12, instead of the proper deduction of \$82.57.

As a result, a one-time correction will be made so that the August 8 paycheck will reflect a deduction of \$82.02, to make up for the extra 55 cents deducted in this Friday's paycheck.

For those TCU and ASWC represented employees who had no health care deduction taken from the August 1 paycheck, a deduction of \$82.57 will be taken from the paychecks dated August 8 and August 15.

A similar correction will be made in the August 8 and August 15 paychecks for part-time TCU employees.

We apologize for any inconvenience this has caused. Please contact the Amtrak Benefits Service Center at 800-481-4887 if you have any questions.

Amtrak Reauthorization Bill Passes House by Large Margin

Yesterday afternoon, the U.S. House of Representatives passed the Passenger Rail Investment and Improvement Act (H.R. 6003). Despite threats of a presidential veto, the bill passed by a vast margin of 311-104.

The bill authorizes \$14.4 billion in federal funding for Amtrak over the next five years. Passed last October, the Senate version of the bill (S. 294) authorized \$11.4 billion. The House and Senate will now meet in a conference committee to reconcile differences between the two bills.

“We’re pleased that the House and Senate have now passed major bills authorizing funding for Amtrak,” said President and CEO Alex Kummant. “Both indicate strong support for our company and our mission to provide America with safe and reliable intercity passenger rail service. The big vote in the House shows Congress understands the critical need for a balanced transportation policy, which includes Amtrak intercity rail.”

Both the House and Senate reauthorization bills contain provisions to provide resources for state of good repair and other important rail development opportunities. And for the first time, they include funds to match state investments in corridor development and equipment procurement.

The last Amtrak reauthorization bill was enacted in December 1997.

Message from President Kummant on Labor Agreements

Dear Co-workers,

I am pleased to announce that the Transportation Communication International Union, the Amtrak Service Workers Council and the ARASA Product Line Supervisors have ratified their contract agreements.

The ratification of these agreements, which cover one-third of our unionized workforce, represents the final step on our path to securing current contracts for all of our nearly 16,000 union-represented employees.

Employees covered by one of these unions should expect to receive retroactive wage payments on or about August 29.

As a reminder, eligible UTU Yardmasters and Stewards are scheduled to receive their retroactive wage payments on July 3. UTU Yardmasters and Stewards will receive a customized summary statement that breaks down the calculation for the individual employee and a comprehensive list of Frequently Asked Questions.

In case you have questions that aren't answered in those documents, please call the call center established to field employees' inquiries (the phone number is in the FAQs you will receive).

My hope is that this last set of agreements formally gives closure to what was a trying period in Amtrak history. We will face a range of challenges and opportunities in the future, and I am counting on a committed, united workforce that can overcome those challenges and seize the opportunities.

Sincerely,

Alex Kummant
President and CEO

Acela Express 2154 Strikes Workers

At approximately 1:15 p.m. today, three persons were reported to have been struck by northbound *Acela Express* Train 2154 just north of the Providence, R.I., station.

The persons involved in the incident were two Amtrak employees and one contractor who were inspecting tracks in the area. One person was fatally injured and the other two were taken to a hospital.

There were 162 passengers and six employees on board Train 2154 at the time of the incident.

The situation is currently unfolding, and updates will be provided as they become available.

Message from President Kummant on *Acela Express* 2154 Incident

Dear Co-workers,

Before I provide you with an update on the incident with *Acela Express* Train 2154 yesterday afternoon, I want to first and foremost express my own sorrow over the loss of life and serious injury as a result of what took place. I know I am not alone in this sentiment, and it pains us all to lose anyone on the railroad.

At approximately 1:15 p.m. yesterday, three people were struck by Train 2154 as they inspected track just north of the Providence station, resulting in the fatality of a contract employee and injuries to two of our Engineering department employees.

One of the Engineering department employees is being treated at a hospital for very serious injuries and our thoughts are with him. The second employee was treated and released from the hospital last night.

The third person involved, a contractor and former Amtrak Engineering department employee, was fatally injured.

I know that you join me in extending our deepest sympathies to the friends and family of the contract employee, whom many knew as part of the Amtrak family.

Our thoughts and well wishes are with the Engineering department employees and their families, as they strive to recover from this.

Sincerely,

Alex Kummant
President and CEO

Wage Increases, Retroactive Wage Payments Take Effect for BLET, SMWIA in May

The new rates of pay and retroactive wage payments for the Brotherhood of Locomotive Engineers and Trainmen and the Sheet Metal Workers International Association will be paid as follows:

- The new rates of pay for BLET and SMWIA positions take effect on May 1, 2008, and will begin to appear as early as May 16, 2008, and in full in the May 23, 2008, paychecks.
- The first employee medical plan contribution of \$166.25 will be deducted from the May 30 paychecks. Due to a programming error, the health care contribution was mistakenly deducted from your May 2, 2008, paycheck. This is being corrected, and that deduction will be added back to your May 9, 2008, paycheck. After the initial deduction on May 30, contributions in future months will be split between the first and second checks of each month.
- The first installment of the retroactive wage payment (40% of the total adjustment) is scheduled to be paid in a separate check (or through direct deposit) on May 30, 2008, and will be calculated on the wages through April 30, 2008, for employees eligible to receive the retroactive wage payment. A summary report of the full retroactive adjustment along with a list of frequently asked questions and answers will be furnished with the payment to provide employees with information about the calculation and who to contact about specific disputes regarding the payment.
- In addition, the contract settlements provide employees with the ability to “opt out” of medical plan coverage, thereby not having to make the monthly contributions as of June 1, 2008. A separate mailing has been sent to employees about the Health Care

coverage changes, including the form that must be submitted if employees wish to opt out of Health Care coverage. The required “opt out” form must be returned before May 16, 2008.

Message from President Kummant on May 9 Retroactive Wage Payments

Dear Co-workers,

I am pleased to inform you that approximately 9,000 employees represented by several unions will receive retroactive wage payments this Friday. In accordance with the agreements reached with the unions, this payment represents 40 percent of the total retroactive adjustment.

In addition to the check or direct deposit notice, eligible employees will receive a customized summary statement that breaks down the calculation for the individual employee, and a comprehensive list of Frequently Asked Questions designed to provide answers about health care benefits deductions and other concerns employees may have regarding these calculations (I've attached a copy to this note).

The process associated with verifying the amount due to each employee is extremely complex and its magnitude is unprecedented for Amtrak. Teams of employees from the Finance, Information Technology, Human Resources and Labor Relations departments have worked diligently for months, analyzing 90 million lines of data related to each of the approximately 9,000 employees' work histories during a period of nearly six years.

Because of the complexity of the computation, I encourage you to thoroughly review the summary statement and the FAQs to help you understand what was included in the calculations. If you have questions that aren't already answered in those documents, we have established a temporary call center (the phone number is in the FAQs) designed to field employees' inquiries. Your inquiry will be logged and assigned a case number by the call center to initiate the review process.

Again, please keep in mind that this is an exceptional event for Amtrak and that the review process could take weeks, depending upon the issue and the volume of calls made. The sooner your call is received, the quicker your issue can be investigated and resolved.

Eligible employees represented by the following unions should receive the retroactive wage payment on May 9: Brotherhood of Maintenance of Way Employees; International Brotherhood of Electrical Workers; International Association of Machinists and Aerospace Workers; Brotherhood of Railroad Signalmen; Joint Council of Carmen, Helpers, Coach Cleaners and Apprentices; American Train Dispatchers Association; National Conference of Firemen and Oilers/Service Employees International Union; American Railway and Airline Supervisors Association (Maintenance of Equipment, Maintenance of Way), International Brotherhood of Boilermakers and Blacksmiths; and United Transportation Union Train Service.

Eligible employees represented by the Brotherhood of Locomotive Engineers and Trainmen and the Sheet Metal Workers International Association are scheduled to receive retroactive wage payments on May 30.

Sincerely,

Alex Kummant
President and CEO

Message from President Kummant on Tentative Labor Agreements

Dear Co-workers,

I am pleased to announce that earlier today, we reached tentative agreements with the Transportation Communication International Union, the American Service Workers Council and the ARASA Product Line Supervisors.

Details of the agreements, which cover one-third of our unionized workforce, will be sent to the respective union members for ratification.

Pending the ratification of the TCU, ASWC and ARASA PLS agreements, all of our nearly 16,000 union-represented employees will soon be operating under current contracts.

Following the distribution of retroactive wage payment checks to approximately 9,500 employees earlier this month, the first installment of the retroactive wage payment (40% of the total adjustment) for employees represented by the BLET and SMWIA will be issued on Friday, May 30.

In addition, UTU Yardmasters and Stewards wage increases will become effective June 1, and those employees are scheduled to receive retroactive wage payments on or about July 3.

Like the distribution of retroactive pay for certain employees on May 9, eligible employees represented by BLET, SMWIA, and UTU Yardmasters and Stewards will receive a customized summary statement that breaks down the calculation for the individual employee, and a comprehensive list of Frequently Asked Questions designed to provide answers about health care benefits deductions and other concerns employees may have regarding the calculations. The FAQ updated for BLET and SMWIA is attached to this note.

Due to the complexity of the computation, if you are one of the

employees receiving a check, you should review the summary statement and the FAQs to fully understand what was included in the calculations. If you have questions that aren't already answered in those documents, we have established a temporary call center (the phone number is in the FAQs) designed to field employees' inquiries.

The retroactive payment calculation requires meticulous attention and the process for verifying the amount due to each employee is extremely thorough. As I've stated before, the scope of this endeavor is unprecedented for Amtrak and is being carried out by a group of dedicated employees from a number of departments.

I am pleased to say that so far in this process, it appears that the temporary call center has served as a helpful tool for employees and we have received a relatively low number of disputes related to the calculations.

I look forward to the ratification of the last of our tentative agreements. It is my hope that as we close this chapter in Amtrak history, we move forward as a united workforce that will collectively focus on how we can grow together.

Sincerely,

Alex Kummant
President and CEO

Amtrak Statement

The following press release is being issued this afternoon:

WASHINGTON – The National Railroad Passenger Corporation today announced the resignation of its President and CEO, Alex Kummant.

“On behalf of the entire Board, I’d like to thank Alex for his leadership over the past two years,” said Donna McLean, Chair of the Board. “During the past two years, the company experienced exciting economic times, strong ridership and revenue growth, solid profit and loss performance, and the advancement of the Amtrak brand overall. He also successfully oversaw the completion of labor agreements with all of the unions representing Amtrak’s employees. We are grateful to Alex for his contributions to the company. We wish him well in his future endeavors.”

Alex Kummant reflected that he was “proud of what the management team at Amtrak had accomplished over the last two plus years and that [he believed] Amtrak had a strong operational and financial base to get through the coming turbulent times.” He continued that he “would help in any way to make this a smooth transition.”

“I’d like to thank Alex for his commitment to Amtrak over the past two years,” said Hunter Biden, Vice Chair of the Board. “Our Board is committed to keeping Amtrak on an aggressive path of performance improvement. Current economic conditions highlight the need for us to continue finding ways to drive quality and customer service across the system. We are moving forward with the development of an aggressive long-term plan for the company, based on the recent legislation passed by Congress.”

After record ridership and revenue in FY08, a downturn in the economy and new legislative requirements present challenges as well as opportunities. In the coming years, Amtrak will need leadership to maximize its potential and utility to the traveling public, while increasing the efficiency of the whole operation. The Board is confident that this transition will be seamless, with William Crosbie, Amtrak’s Chief Operating Officer, as Acting President and CEO for an interim period.

Letter from William Crosbie

Dear Co-workers,

When the board of directors asked me to serve as acting president and chief executive officer, I agreed because of my loyalty to Amtrak and my faith in all of you.

I've been with Amtrak nearly six years and have had the opportunity to travel around the system and get to know many of you. If we haven't yet met, you should know that the railroad has been in my blood long before my time here. My career in the railroad industry started as a child working for my father's construction company. We provided rock drilling, blasting, and heavy construction services to CP Rail. Over 24 years ago, I hired on CP Rail as a Signal Gang Helper "C", and never looked back, working various jobs in freight and passenger rail, as well as transit. I am proud of my service at Amtrak.

I want to assure you that, along with the board of directors, we have a strong leadership team in place that will ensure a seamless transition until a choice is made for the permanent position. In the interim, I expect everyone to maintain focus on what's most important — the day-to-day activities that we all count on you to carry out safely and professionally. As for me, I remain committed to my duties as chief operating officer, in addition to taking on my newly assigned responsibilities.

The course set before us has not changed; we remain focused on operating safe and efficient service with a high degree of customer service, while we continue to move ahead with shaping a passenger railroad that will thrive in the coming decades.

Despite an uncertain economy, our path is in some ways more clearly delineated now than it has been in recent years by the enactment of the authorizing legislation last month.

Yet like most industries, Amtrak is not immune to the downturn in the economy. Now more than ever, we need to work particularly hard to make sure that we hold onto our customers — including the many first-time riders that were introduced to Amtrak in the last year — and entice prospective travelers. We do that by delivering on-time performance where we control it, equipment that is clean and reliable, and service that makes passengers feel welcome and comfortable.

As many of you know, I put a great deal of emphasis on safety. No matter what your job function, the safety of our co-workers and passengers always comes first.

It is your hard work and dedication that have contributed to the record years we've had. I, along with the senior leadership team, am counting on you to help us continue that trend.

Staying safe means staying focused. As always, please look out for one another and keep up the good work.

Sincerely,

William L. Crosbie
Acting President and Chief Executive Officer

Amtrak Selects Transportation Industry Veteran for President and CEO

The following press release is being issued today:

Washington – The National Railroad Passenger Corporation Board of Directors announced today that it has chosen Joseph Boardman, a nationally recognized transportation industry professional, to become president and chief executive officer of the company, effective November 26.

Boardman offers nearly 34 years of experience in the surface transportation industry at city, county, state, and federal government levels; most recently as the administrator at the Federal Railroad Administration.

“In an attempt to maintain the momentum at Amtrak, while finding a permanent CEO candidate, the board has appointed Mr. Boardman for one year, but will conduct a search in the coming months for a permanent CEO,” said Board Chairman Donna McLean. She added that “Amtrak is at a critical juncture and needs a vigorous management vision and ability to take advantage of this unique time. The board has unanimously chosen Mr. Boardman in this capacity because we have complete confidence that his depth of experience and leadership skills will allow Amtrak to maintain growth and implement the requirements of the recently enacted authorization legislation.”

“Joe Boardman knows the industry extremely well, but what makes him exceptionally qualified for the position is that he has the unique perspective of having known Amtrak as a customer and state partner, administrator, and has been involved with Amtrak, in one role or another, over the course of many years,” said board Vice Chair Hunter Biden. “Joe is the right person to help Amtrak during this important period,” he added.

Having served as administrator of the Federal Railroad Administration since April 2005, Boardman was the Department of Transportation designee on the Amtrak board of directors. Prior to his tenure at FRA, he served as commissioner of the New York State Department of Transportation beginning in July of 1997. There, Boardman led a

transformation effort that better enabled the agency to respond to the challenges associated with an expanding global marketplace. In this capacity, Boardman was deeply involved in the operation of the large complement of Amtrak service in the state. In addition, he was chief operating officer of Progressive Transportation Service, Inc., a transportation management company. He was chairman of the Executive Committee of the Transportation Research Board in 2005 and chair of the American Association of the State Highway and Transportation Officials’ Standing Committee on Rail Transportation from 2000 to 2005.

“I am humbled that the board selected me to lead the company, on an interim basis, at this very exciting time. Over the past decade — in one capacity or another — I have been an active participant in the affairs of Amtrak. I have come to know the company, the culture, a number of employees, and I am keenly aware of the challenges facing us right now,” said Boardman. “In my view, a national intercity, interconnected passenger rail service is critically important for the mobility and energy independence of the United States.”

Joe Boardman fills the position following the departure of Alex Kummant earlier this month. Chief Operating Officer William Crosbie served as acting CEO in the interim. “The board is grateful to Bill Crosbie for his dedication to Amtrak and for managing the company during the transition,” McLean added.

Boardman is a lifelong resident of New York, and is the second of eight children born and raised on a dairy farm in Oneida County, which two of his siblings currently operate. In 1966, he volunteered for service in the United States Air Force, serving in Vietnam from 1968 to 1969. Upon receiving an honorable discharge from the Air Force, he earned a Bachelor of Science in Agriculture Economics from Cornell University in Ithaca, N.Y., and a Master of Science in Management Science from the State University of New York at Binghamton. He presently resides with his wife Joanne in Washington, D.C., and has three grown children.

A Message from President and CEO Joe Boardman

Dear Co-workers,

I recognize that most of you are extremely busy doing your part to ensure that we deliver safe and reliable service on the busiest week of the year, so I will keep my introduction short for now.

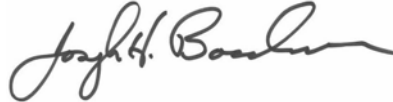

First off, I'd like to thank Bill Crosbie for stepping in as acting president and chief executive officer during the brief interim period — he is a selfless leader and I look forward to working with him very closely in his role as chief operating officer.

Many of you may not know me, but I know you. What I mean is that over the course of more than a decade, I have had the opportunity to work with Amtrak in a number of capacities, the most recent of which was as administrator at the Federal Railroad Administration and the U.S. Department of Transportation's designee on Amtrak's board of directors. What you will come to know about me is that I am more comfortable in the field than I am behind the desk. I will be traveling the system and getting to know you personally on your trains, at your stations, and at your facilities.

I want you know that I believe that a national — interconnected — intercity passenger rail service is critically important for the mobility and energy independence of the United States. I am personally committed to excellence in safety, being more energy-efficient, and establishing an environment where the contributions and innovations of the men and women of Amtrak will combine to build a first-class intercity passenger railroad that all Americans can be both proud of and connected to. That's why I believe in Amtrak.

Please remain focused on providing safe and reliable service to America during the busy Thanksgiving week.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Senate Passes Amtrak Bill

By a vote of 74 to 24, the Senate last night passed a combined Amtrak authorization and rail safety bill.

The authorization enables \$12.9 billion in funding for the FY 2009-2013 period, approximately \$2.5 billion for each year within that period. The legislation includes \$1.9 billion for state grants for rail programs, reforms such as improved accounting and standards for service and on-time performance, and a requirement for a collaborative NEC state-of-good-repair plan.

It is expected that the president will sign the bill into law. The legislation serves as the policy framework for passenger rail and recommends funding levels for the five years; annual appropriations legislation must still be passed by Congress.

In other news, the U.S. DOT this week announced that it would make available \$30 million to match local investments in 15 rail capacity enhancement projects across the country. The funds for states are aimed at reducing delays and expanding capacity on existing intercity passenger rail routes, as well as helping establish new services.

In response to the announcement, the company offered the following statement: "Amtrak has always supported some form of matching federal grants to assist intercity passenger rail capital development, so that states can make choices about where to invest their transportation dollars. These funds, which are provided by Congress, and Secretary Peters' announcement were welcome steps in rail corridor development."

Amtrak Mourns the Loss of Notable Supporters

Amtrak lost two ardent passenger rail supporters as former board member Paul Weyrich and United Transportation Union National Legislative Director James M. Brunkenhoefer both passed away last week. Amtrak whistles across the entire system will blow today and tomorrow at 3 p.m. to honor them.

Best known as a co-founder of the politically conservative Heritage Foundation, Weyrich later founded the Free Congress Foundation, which unlike most similar organizations favored rail mass transit. He served on the Amtrak board — from February 1987 to January 1993— as well as the National Surface Transportation Policy and Revenue Study Commission. A former political reporter, Weyrich was also a prolific writer and publisher of The New Electric Railway Journal.

“Paul Weyrich has been a friend and passionate supporter of Amtrak since the early days of the company’s formation,” said Government Affairs and Corporate Communications Vice President Joe McHugh. “Even after his service on the board ended, he continued to serve the company with great enthusiasm. We will miss him very much.”

Funeral services will be held today at the Holy Transfiguration Melkite Greek-Catholic Church in McLean, Va. Contributions in Weyrich’s honor should be made to the church.

Brunkenhoefer, also known as “Brokenrail,” began his railroad career in 1966 as a trainman for the Southern Pacific Transportation Co. Until his death, he held seniority in the Train and Engine service crafts on the Union Pacific lines in Texas and Louisiana. Before serving as UTU’s national legislative director, Brunkenhoefer served in a number of offices in Local 83 in Houston. In 1980, he became the alternate Texas state legislative director before assuming full directorship of the Texas State Legislative Board in 1982. He served at the national level since 1987.

“It is with great sadness that I recognize the passing of James Brunkenhoefer,” said President and CEO Joe Boardman. “There is no one with a kinder heart for the suffering that another human has. ‘Brokenrail brought compassion and concern to me at a time that I needed it. My prayers and thoughts are with his soul as well as his loved ones during this time of loss. We will all miss him.”

“The passing of James Brunkenhoefer is a loss to the railroad world,” added Labor Relations Vice President Joe Bress. “He exemplified the best in lobbying for the UTU and supporting Amtrak. I will miss his way of refocusing an issue and doing it with passion, humor and personality.”

Funeral services will be held today at Am Kolel Sanctuary in Rockville, Md.

In Other News:

Transportation: Daryl Pesce has been appointed general superintendent of the Central Division, effective Jan. 1, 2008. Former Superintendent of Operations Mike Sherlock is serving as acting general superintendent of the Mid-Atlantic Division.

Operational Update: The Winter 2008 edition of the system timetable, effective Jan. 21 through April 6, is being delivered to stations this month, and incorporates schedule adjustments resulting from maintenance-of-way projects and other operational factors.

Payroll: Due to late releases by numerous tax authorities and the related technical issues associated with applying tax changes to SAP, many 2008 tax rates will not be applied to the first paycheck of 2008 on Jan. 4. It is expected that all of the changes will be received in time to recalculate all affected taxes by the end of January.

FY '08 Appropriations Bill Signed

On Dec. 26, President George W. Bush signed into law H.R. 2764, the omnibus appropriations bill for fiscal year 2008, which includes \$1.325 billion for Amtrak — \$475 million for operating grants and \$850 million for capital improvements (including up to \$285 million for debt service). The bill also includes \$30 million for capital grants to states via the Federal Railroad Administration for new or improved intercity rail passenger service.

Remembering George Warrington

Amtrak mourns the passing of former Amtrak President and Chief Executive Officer George D. Warrington, who succumbed to pancreatic cancer on Dec. 24 after an eight-month battle. As the company's chief executive from Dec. 1997 to April 2002, and chief executive of the Northeast Corridor Strategic Business Unit from July 1994 to Dec. 1997, he presided over the electrification of the north end of the NEC and the launch of *Acela Express* service.

Warrington left Amtrak in 2002 to serve as the executive director of New Jersey Transit. After leaving NJT in 2007, he co-founded Warrington Fox Shuffler, a strategic consulting firm.

Warrington remains in the hearts and minds of many across the Amtrak system and our thoughts are with his family.

In Other News:

Operational Update: Due to Union Pacific's plan to install 87,000 concrete ties in the Pomona, Calif., area, the Ontario, Calif., stop for the *Sunset Limited* Trains 1 and 2 will not be accessible through Feb. 23. Passengers can book to or from Pomona, seven miles west of Ontario.

Benefits: All agreement-covered employees (except FOP) should have received correspondence from Aetna regarding verification of dependent information. To continue dental benefits, Aetna requires a response. For questions, contact Aetna immediately at 866-682-5619.

401(k) Rollout: Employees currently not participating in the Fidelity 401 (k) Retirement Savings Plan will soon receive an enrollment guide and meeting schedule in the mail. Fidelity will hold enrollment meetings for non-participating Amtrak employees beginning Jan. 14. Current participants can now access their accounts at www.mysavingsat-work.com/amtrak.

Human Resources: It's not too late to enter your 2007 absences into mySAP. Not entering your 2007 absences could affect your ability to accrue vacation in 2008. Once your vacation hours reach a maximum of 125 percent of your total vacation entitlement, you will cease to accrue vacation for 2008; lost vacation accrual is not retroactive.

Information Technology: On Jan. 8, Help Desk users will receive an e-mail invitation requesting their participation in a brief online customer satisfaction survey. The e-mail message will direct users to a clickable link to complete the 10-minute questionnaire; Arrow users must cut and paste the link into their Web browser.

PEB Recommendations Made

The Presidential Emergency Board recommendations for settling the ongoing negotiations between Amtrak and nine of its unions were submitted to the President early last week, initiating a 30-day cooling off period. The PEB recommendations are posted on the Intranet home page.

During this period, Amtrak and its unions have an opportunity to identify a resolution based on the recommendations provided by the PEB. If no resolution is reached by midnight on Jan. 29 — and no extension of the cooling off period is agreed to or imposed — either party may seek self-help at 12:01 a.m. on Jan. 30. In the interest of reaching a settlement and averting a strike, it is possible for both parties to agree to extend the length of the cooling off period.

Please be assured that we will keep you apprised of any developments that occur on this matter; in the meantime please remain focused on running a safe and reliable railroad.

Don't Forget: Keep your Mailing Address Current

It is very important that every employee review the Railroad Retirement Board (RRB) form BA-6 that details employees' service months and eligible compensations earned for the last calendar year. This form is sent to every employee's mailing address; to confirm the correct mailing address, employees should call their local RRB office, which is listed under "United States Government" in the telephone directory. Changes of address may also be sent to the RRB headquarters at the address shown on the back of the BA-6 or faxed to 312-751-7190.

Also, W-2 forms will be mailed to employees' current address by Jan. 31. Employees are encouraged to notify Human Resources if their mailing address has changed during the past calendar year.

In Other News:

Engineering: Production's New England Division Rail Team, with the assistance of the New England Division Engineering forces, is installing 3,500 linear feet of patch rail on the curves of the Northeast Corridor north of New Haven, Conn., this week.

Human Resources: The United Way campaign is currently underway and will run through Jan. 31. To obtain a pledge card, contact Carolyn Stagger at ATS 777-3899 or 202-906-3899 or via e-mail at staggec@amtrak.com.

Health Services: Effective Jan. 14, due to the closing of the Chicago Health Services office, employees and departments in the Western Region will now be serviced via the centralized office in Philadelphia. Please direct all applicable communication and correspondence to: Amtrak Health Services; 30th and Market Streets; Mail Box 67; Philadelphia, PA 19104. The phone number is ATS 728-2389 or 215-349-2389; fax: 215-249-2323 (Western) or 215-349-4401 (Eastern).

Benefits: All agreement-covered employees (except FOP) should have received correspondence from Aetna regarding verification of dependent information. To continue dental benefits, Aetna requires a response. For questions, contact Aetna immediately at 866-682-5619.

Corporate Communications: If you haven't already, you will soon be receiving a hard copy of *Amtrak Ink*, in its new magazine format, which is now being mailed to all active employees' homes.

New Procedures in Effect for Requesting Arrow Log Sign-In

To enhance system security, effective Jan. 22, requests to create, modify or delete Arrow IDs will be processed by the Arrow Security Team, replacing the IBM-operated Amtrak Help Desk in Boulder, Colo. All Arrow log sign-in requests must be completed by a supervisor, lead clerk or foreman.

There will be four methods for submitting an Arrow ID request:

1. Sending an e-mail to Sandra Cooper, manager, Reservation System and Testing Support: CooperS@amtrak.com.
2. Sending an Arrow message to queue "MHQ," using the format found on Arrow DRS page G/POL/ARO/P6.
3. Faxing the "Log Sine Request Form" to Arrow Security Team at ATS 777-2493 or 202-906-2493. The form is also on the Intranet: "Library" ► "ARROW" ► "Log Sine Request."
4. Using the Customer Service Request (CSR) process.

Requests received by 4 p.m. EST will be honored on the same business day; requests received after 4 p.m. EST will be honored the next business day. Weekend or holiday requests will be honored the following business day.

Requests for a large quantity of new Arrow log sign-ins (i.e., for new hire classes) may require additional handling time. Those requests from external clients require prior approval from the Information Security Department.

First-time users with a newly assigned log sign-in will be prompted to: enter SAP ID (or last 4 digits of SS#). However, users should only enter the last six digits of their SAP ID; Arrow is being modified to remove the reference to Social Security number.

Any log sign-in inactive for 90 days is automatically deactivated by Arrow, removing it from the Arrow system and terminating access. To restore access, follow the procedures outlined above.

For more information, please contact Sandra Cooper at ATS 777-3905 or 202-906-3905.

Top Story

Landslide in Oregon Affects *Coast Starlight* Service

A massive landslide spanning an estimated 15 miles has severed the Union Pacific railroad north of Chemult, Ore., affecting service of the *Coast Starlight*.

Taking into consideration the low load factors and a cost-benefit analysis of the alternatives, the Transportation department has modified schedules of Trains 11 and 14 today and tomorrow, and cancelled service of northbound trains originating on Jan. 24 through Jan. 31, while southbound trains will be cancelled on Jan. 25 through Jan. 31.

The landslide is reportedly advancing and the area must be stabilized before service can resume, making an estimation of when service can be restored difficult. Amtrak will be monitoring the situation very closely. For complete details, refer to the corresponding Arrow message.

In Other News:

Engineering: The Switch and Rail gang is doing preparatory work for the reconstruction of 14,400 linear feet of Track 2 in the south tube of the North River Tunnel in New York, which will require 26 55-hour weekend outages (10 p.m. Friday through 4 a.m. Monday) throughout the year.

Human Resources: Nomination forms for the President's Service and Safety Awards (PSSA) program will be posted on the Intranet tomorrow and can be found at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms." The nomination period runs until April 11.

Operational Update: The last of the annual West Palm Beach Safety Patrol special trains operate this week between Mangonia Park, Fla., and Washington, D.C., carrying approximately 600 students and 25 chaperones.

Benefits: All agreement-covered employees (except FOP) should have received correspondence from Aetna regarding verification of dependent information. To continue dental benefits, Aetna requires a response. For questions, contact Aetna at 866-682-5619.

Payroll: W-2s will be mailed out soon; expect to receive your W-2 next week.

Top Story

Engineering Department Plans June NEC Maintenance Blitz

Amtrak has begun notifying communities north of New Haven, Conn., of a planned four-day rail outage between New Haven and Boston associated with the replacement of the span of the Thames River Bridge this summer. In June, a vertical lift span will replace the current span on the Thames River Bridge in Groton, Conn., which in recent years has been prone to operating failures. The multi-year project will culminate in the installation of the new span during the four-day rail closure of the bridge in mid-June.

The bridge outage provides the Engineering department an opportunity to conduct a nearly around-the-clock repair and maintenance “blitz” between New Haven and Boston. Taking the rail out of service between New Haven and Boston will enable Engineering crews to complete about a year’s worth of maintenance work in just four days. Operation of the Shore Line East and MBTA commuter services will not be affected by the blitz.

The capital improvement blitz, which is unique in its magnitude and scope, will improve the overall reliability of the infrastructure and reduce the need for future service disruptions due to track outages for maintenance work. The blitz will involve tie replacement, surfacing at interlockings, electric catenary maintenance, road-crossing panel replacement and other bridge, track and platform work.

Amtrak will continue to notify communities north of New Haven, and will be briefing local leaders on the scope of work and the service suspension itself in the coming months.

In Other News:

Engineering: The New York Division-West Concrete Tie Gang is working to remove slow orders on Track 1 between Union and Islen by installing more than 800 concrete ties, and surfacing and stabilizing the track to return to timetable speed.

Operational Update: Due to CSX track work south of Florence, S.C., which has been extended to every Monday through Thursday until Feb. 14, Train 90, the *Palmetto*, will originate at Florence and bypass stops at Savannah, Yemassee, Charleston and Kingstree.

Human Resources: The United Way campaign ends Jan. 31. To obtain a pledge card, contact Carolyn Stagger at ATS 777-3899 or 202-906-3899 or via e-mail at staggec@amtrak.com.

Environmental Health and Safety: In conjunction with the Mechanical department, the Safety Audit group will review potential safety concerns with the Mechanical contractor in Bakersfield, Calif.

In Other News:

Operational Update: Due to Norfolk Southern track work, on Wednesday, Feb. 6, *Carolinian* Trains 79 and 80 will operate between Raleigh and Charlotte only.

Engineering: The New York Division Engineering forces are replacing base corroded rail on Line 1 of the East River Tunnel this week, changing out 12 locations totaling 658 linear feet of track. Line 2 was completed in late January.

Human Resources: Nomination forms for the President's Service and Safety Awards program are posted on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms." The deadline for nominations is Friday, April 11.

Benefits: All agreement-covered employees (except FOP) **must** respond to the Aetna request for verification of dependent information by **Friday, Feb. 29** to avoid termination of dental benefits for dependents. For questions, contact Aetna **immediately** at 866-682-5619.

401(k) Update: Enrollment meetings for the Fidelity Investments 401(k) Retirement Savings Plan are ongoing through March 20. Log on to www.mysavingsatwork.com/amtrak or check the meeting schedule included in "Your Guide to Getting Started" (mailed only to current non-Plan participants) for a meeting at your location.

Partial *Coast Starlight* Service Being Restored

Service on the Sacramento-Los Angeles portion of the *Coast Starlight* route is being restored this week after a massive mudslide severed the Union Pacific Railroad north of Chemult, Ore., on Jan. 19. Northbound Train 14 will begin service on Wednesday, originating in Los Angeles and making all regularly scheduled stops to Sacramento. Southbound Train 11 will begin service on Thursday over the same route. Service north of Sacramento remains suspended until further notice.

"We've been in discussions with Union Pacific and all parties involved throughout this disruption, and the UP has been unable to provide a date the route will be reopened," said Chief Operating Officer William Crosbie.

The initial mudslide buried approximately 3,000 feet of track under as much as 20 feet of dirt and fallen trees and destabilized the surrounding area on the mountain. Restoration efforts have been further complicated by heavy snow in the area. For more details, see corresponding Arrow messages.

In the past week, other weather-related factors have disrupted service. On Jan. 31, unstable avalanche conditions in Glacier National Park made it necessary to terminate *Empire Builder* trains and set up a bus bridge between Havre and Whitefish, Mont. On Feb. 1, heavy snow conditions and a bulldozer that partially fell through a bridge deck caused annulment of *California Zephyr* trains with passengers either bussed back to their origins or put up in hotels.

"We thank and appreciate the crews who worked hard to improvise and manage these difficult situations while keeping passengers safe and comfortable," added Crosbie.

FY '09 Administration Budget Released

The Administration released its FY '09 budget yesterday, which includes no operating funds for Amtrak next year. The \$800 million budget for Amtrak, which is the same number as last year, comprises \$525 million for capital expenses (which includes up to \$285 million for debt service) and \$275 million for efficiency grants. The entire budget is posted on the Internet at www.whitehouse.gov/omb/budget/fy2009. Amtrak plans to present its budget request to Congress later this month.

In Other News:

Transportation: All station locations maintaining a cash drawer must carry a minimum of \$5 in the new presidential \$1 coins. A supply of coins should be ordered with the next station deposit.

Operational Update: Due to Norfolk Southern track work, *Crescent* Trains 19 and 20 will not operate between Atlanta and New Orleans, Mondays through Thursdays only, through March 6.

Engineering: As part of 26 planned 55-hour weekend outages for reconstruction of 14,400 linear feet of Track 2 in the south tube of the North River Tunnel in New York, the Switch and Rail Gang installed the first 1,600 linear feet of track panels this weekend. The High Speed Surfacing Gang surfaced the track to resume service today.

Government Affairs: Transportation Vice President Richard Phelps today testifies before the House Subcommittee on Railroads, Pipelines and Hazardous Materials on "The Role of Intercity Passenger Rail during National Emergencies" at the New Orleans Union Passenger Terminal.

Marketing and Product

Management: If you know of a former Pullman porter who is interested in attending the upcoming Pullman porter celebration in Washington, D.C., on Feb. 25, contact Saunya Connelly at connells@amtrak.com.

Major Campaign on Tap to Expand Marketplace Exposure

This spring marks the beginning of a major marketing initiative designed to generate awareness of train travel through a series of events, promotions and advertising campaigns, which will culminate in the first National Train Day.

Scheduled for May 10, National Train Day commemorates the completion of the Transcontinental Railroad in Promontory, Utah, in 1869, and will feature exhibits, family friendly activities, VIP appearances and musical and entertainment acts in the major markets of Chicago, Los Angeles, Washington, D.C., and New York City.

The six-week campaign leading up to National Train Day encompasses a string of promotions that are part of this year's advertising program. The promotional events target a range of demographics and segments of the overall market, aiming to expand Amtrak's exposure in the marketplace.

"All of the promotional events are bound together under the National Train Day banner," said Vice President Marketing and Product Management Emmett Fremaux. "With rail travel in the public eye in various forms for six weeks and leading up to events in four major cities on May 10, we expect to strengthen our relationship with current riders as well as reach those who aren't familiar with Amtrak's service, and gain market share."

Beginning in March, consumers will start to see National Train Day messaging on board trains, in stations and as part of a national advertising campaign.

Some elements of the campaign are still under development, including plans for employee involvement. Look for updates on the National Train Day campaign in future editions of *Amtrak This Week* and *Amtrak Ink*.

In Other News:

Operational Update: *Acela Express* Train 2151 will now operate five minutes earlier between Boston-South Station, New London, Conn., and all intermediate stations. The train will operate according to its published schedule to all other stations on the route.

Benefits: The *Open Enrollment for 2008 Benefits* handbook incorrectly states that dental implants are a covered expense for non-agreement employees. For a complete description of covered services, refer to the *Amtrak Management Employee Benefits Handbook* at www.amtrakbenefits.com or call the Benefits Service Center at 800-481-4887.

Environmental Health and Safety: High Speed Rail, Mechanical and EHS have initiated a program to separate paper recyclable from trash on *Acela Express* trains in New York, an initial step toward a more comprehensive on-board recycling program that will also include bottles and cans on *Acela* and the *Auto Train*.

Engineering Milestone Achieved

With a calendar year 2007 safety ratio of 2.12 versus the 2.17 of BNSF Railway, Amtrak Engineering bested another Class 1 railroad engineering department in safety for the first time. New York Engineering is the leading division to date in FY '08, with a safety ratio of 0.61. The Engineering department congratulates the entire team. Keep up the good work.

New Security Procedures Launched

*Random baggage screening
conducted by Mobile Security Teams*

Today, the company announced the deployment of new specialized Mobile Security Teams, which will patrol stations and trains and randomly screen passengers and their carry-on baggage on an unpredictable basis.

The Mobile Security Teams supplement patrols already in place to enhance the safety and security of passenger rail travel. This is a further step in improving rail security and minimizing the risk of terrorist threats. The Mobile Security Teams will ultimately be deployed nationwide.

“Keeping our customers and employees safe remains our priority,” said President and CEO Alex Kummant. “These new procedures will strengthen our overall security, and they are vital in our efforts to deter, detect and prevent a terrorist incident on the rail system.”

The Mobile Security Teams’ squads may consist of armed specialized Amtrak police, explosives-detecting K-9 units and armed counter-terrorism special agents in tactical uniforms. They will screen passengers, randomly inspect baggage and patrol stations. These squads also may sweep through trains using K-9 units.

Passengers will have the right to refuse inspection. However, if they do so, they will not be permitted to board the train and will be offered a full refund.

The Mobile Security Teams’ procedures will not affect train schedules. Random passenger baggage inspection is a quick process and typically will take less than a minute.

Kummant to Testify in Support of FY '09 Grant and Legislative Request

President and CEO Alex Kummant will testify this week before the House Appropriations Subcommittee on Transportation, HUD and Related Agencies on the FY '09 Grant and Legislative Request Amtrak submitted to Congress last week. Detailing the company's financial needs for the 2009 fiscal year, the request totals \$1.67 billion, including \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service.

In addition, Amtrak outlined the requirement for a Congressional appropriation for \$114 million to fund the balance of retroactive pay in FY '09 due as a result of the Presidential Emergency Board 242 recommendation.

The total funding request is slightly higher than last year's request, due mainly to rising operating costs. Salaries, wages and employee health benefits that account for approximately 60 percent of total operating expenses will increase in part because of new labor agreements.

Rising diesel fuel costs and uncertainties in the national economy contribute to the higher financial needs as well. The company also seeks to invest in its operations with an aggressive upgrade of information systems.

In regard to capital funding, the vast majority of the \$801 million requested will go toward maintaining a state of good repair, with \$331 million directed at infrastructure and \$176 million earmarked for equipment. Compliance with the Americans with Disabilities Act, technology improvements and improvements in data security also account for large portions of the requested capital funds.

The request initiates the annual appropriations process, which will involve hearings before House and Senate committees and legislation crafted in the late spring or early summer. Typically, appropriations bills are passed in September or October.

The 2009 Grant and Legislative Request can be found in its entirety in the "Legislative News" section of the Intranet and on Amtrak.com under "Inside Amtrak" ► "Other Reports."

Engineering: The Switch and Exchange System and the New England Division Engineering forces are removing derails at the approaches to the Mystic, Thames, Conn and Niantic movable bridges on the NEC between New Haven and Boston.

Operational Update: Due to CSX track work, Regional Train 94 will not operate between Newport News, Williamsburg and Richmond, Va. (Main Street Station), Feb. 26 through Feb. 28. Train 86 will make special stops at these stations, before resuming its normal schedule at Richmond (Staples Mill Road).

Human Resources: The deadline for PSSA nominations is Friday, April 11. Nomination forms are posted on the Intranet at "Employees" ► "Awards and Achievements" ► "2008 PSSA Nomination Forms."

Please Note: President and CEO Alex Kummant recently appointed Chief Operating Officer William Crosbie and Vice President, Government Affairs and Communications Joe McHugh as the executive liaison to Seattle, taking over from Vice President, Procurement and Materials Management Michael Rienzi.

ATTENTION! ATTENTION! FINAL DAYS OF DENTAL AUDIT

All agreement-covered employees (except FOP) must respond to the Aetna request for verification of dependent information by **Friday, Feb. 29** to avoid termination of dental benefits for dependents. For questions, contact

Aetna **immediately** at 866-682-5619.

Engineering: Production C&S, with Mid-Atlantic Division support, will be completing signal system improvements on the Harrisburg Line between Roy (mp 94.3) and Rheems (mp 83.4) interlockings. The upgraded signal system will greatly improve the flexibility of operations by allowing trains to operate at timetable speeds in either direction on either track.

Operational Update: As Union Pacific continues to restore the track damaged by mudslides in January, *Coast Starlight* service has been extended via motorcoach service between Portland, Ore. and Sacramento, Calif. Motorcoach service will also make stops in both directions at Salem, Eugene-Springfield and Medford, Ore., as well as meal and rest stops. Complete train service is expected to resume in April.

Marketing and Product Management: Check your local listings and tune in to watch *Wheel of Fortune* today, March 3, as Amtrak Vacations Grand Canyon Package Tour is being featured on “America’s Game.”

Executive Liaison Program Gives Divisions Access to Top Management

Shortly after joining Amtrak in Sept. 2006, President and CEO Alex Kummant initiated the creation of the Executive Liaison Program in an effort to improve communication between the executive committee and operating divisions across the country. The program has gained traction since its inception, and the company is beginning to see the benefits.

“This program is designed to further promote two-way communication between executive management and employees who make our railroad run on a day-to-day basis,” said COO Bill Crosbie, the program’s coordinator. “Mr. Kummant wanted to make sure that employees working at our major crew bases and facilities had the opportunity to be heard by decision makers, and also make sure those decision makers remain engaged with what’s going on across the company, not just their respective departments here in Washington.”

Every member of the executive committee is assigned to one or more cities where operating facilities are located. Executives are responsible for making periodic visits to those facilities to serve as a sounding board for managers and employees to voice their ideas and concerns.

The program is not in any way designed to supplant local decision making, but rather, to further open the lines of communication and bring the company closer together. A key initiative will be executives helping their respective divisions create a five-year plan for facility improvement. They will also serve as an advocate to make sure divisional projects receive the proper consideration.

“This is an extremely valuable effort,” said Vice President of Government Affairs and Corporate Communications Joe McHugh, who is the liaison to Albany, N.Y., and as of last month, Seattle. “My trips and contacts with people who run our equipment service and maintenance in Albany has been a special part of my time at Amtrak. It is a great group of dedicated people and they have some excellent ideas about improving service and increasing revenue.”

According to McHugh, one such idea came from the operating crews on the *Adirondack*. They suggested putting the company’s only dome car on the train last fall. Said McHugh, “We all worked together to make it happen and it was a big success.”

March 10, 2008

Planning Department Reorganized

Last week, President and CEO Alex Kummant announced the disbanding of the Planning and Analysis department, and the integration of the group's employees into four other departments: Finance; Marketing and Product Management; Transportation; and Strategic Partnerships and Business Development.

"In the past weeks, the board, executive staff and I have been engaged in refocusing Amtrak's strategic plan," said Kummant. "Rather than maintaining a stand-alone department responsible for our strategy, we are re-deploying the department's resources into the wider organization. This is a work in progress and one about which I will be sharing more, as well as seeking employee input and feedback along the way."

Kummant has asked John Bennett, who had served as acting vice president of Planning and Analysis, to coordinate the company-wide effort in the role of assistant vice president of Policy, Standards and Business Integration within the Strategic Partnerships department.

"The executive staff will work to ensure the projects and talents of this group are shared and applied across organizational boundaries as necessary to achieve the best contribution and result," added Kummant.

Operational Updates: *Lake Shore Limited* trains 448 and 449 will not operate between Boston South Station and Albany/Rensselaer on March 18 and 19 due to CSX track work. Motorcoach service will be provided as alternate transportation.

Beginning March 17 and continuing through May 8, *Silver Star* train 92 will depart Miami at 9:50 a.m. and operate on an earlier schedule to Jacksonville and all intermediate stations. From April 28 through May 8, on Mondays through Thursdays only, further schedule adjustments will be made between Kissimmee and Jacksonville.

Human Resources: Remember that nominations for 2008 President's Service and Safety Awards are due by Friday, April 11. Forms are posted on the Intranet at "Employees" ► "Awards and Achievements" ► "2008 PSSA Nomination Forms."

Engineering: This week, Production's Switch Exchange System, with the assistance of New York Division Engineering, is replacing the #12 and #21 switches at Union Interlocking in Rahway, N.J.

Marketing and Product Management: Amtrak is the official transportation sponsor for a fashion show at L.A. Union Station on March 14 as part of the city's fashion week. Celebrities involved include cast members of "America's Next Top Model," "Project Runway" and "The Janice Dickinson Modeling Agency," as well as various actors.

March 17, 2008

Faulty Motors Being Replaced on P-42 Locomotives

Operational Updates: A track-side pile of demolition debris toppled onto tracks this morning just north of Windsor Locks, Conn., resulting in the derailment of Train 490 and suspension of *Vermont* and Amtrak Shuttle service between Springfield, Mass. and Hartford, Conn. No injuries occurred and motorcoach service is being provided as alternate transportation until tracks are restored.

Trains 55 and 56, the *Vermont*, will be replaced by motorcoach service between Springfield, Mass. and Brattleboro, Vt. on Mar. 19 due to CSX track work.

Suspension of *Coast Starlight* service north of Sacramento, Calif. has been extended beyond the previously projected restoration date of April 1. Union Pacific is still restoring severed tracks that resulted from a large mudslide in January. Trains 14 and 11 are now suspended through April 20 and 21, respectively.

Operations Service: The U.S. government has begun issuing redesigned \$5 bills with improved security features. Employees involved in cash transactions with passengers should refer to OSA 08-07 for info on how to recognize counterfeits.

Station Uniform Reminder: New station uniform policies went into effect on March 15 requiring all *uniformed* station supervisors, ushers, baggage handlers and red caps to wear the prescribed blue mesh security vest as their outermost garment. Refer to SOU 08-01 for full details.

Board of Directors Update: Late last week, the U.S. Senate confirmed two nominees for the Amtrak board of directors. Thomas C. Carper, former mayor of Macomb, Ill., and Nancy Naples O'Neill, former commissioner of the New York State Department of Motor Vehicles, will both serve five-year terms.

The Mechanical department is in the midst of a campaign to purge its P-42 locomotive fleet of potentially faulty traction motors. Over the last 16 months, the company has experienced a rash of traction motor failures in its P-42 fleet, resulting in numerous train delays, cancellations and, in some instances, stranded passengers.

The cause of the failures has been identified as a faulty pinion-end bearing in motors built by GE in 2006 and 2007. The Engineering and Mechanical departments have been working diligently with GE to correct the problem. When the bearing fails, it prevents the motor's armature from turning, which ultimately results in a locked axle.

A new bearing has been designed and, to date, 200 new motors have been delivered and installed with no bearing-related failures. According to Chief Mechanical Officer Vince Nesci, the goal is to finish the campaign by changing out 25 motors per week. Each P-42 has four motors.

"We aim to replace all four motors on a locomotive at the same time whenever possible, and then route those on to single locomotive trainsets to reduce the impact on reliability," said Nesci. "This is a big undertaking for the Mechanical department. We currently have 19 P-42s with a full set of new motors and 19 more that only need one more new motor to be fully equipped with the new design."

The new bearings and motors are being built by GE. Mechanical crews join the motors to wheel sets and the finished combinations are then shipped to various shops around the country for installation.

Sweepstakes Launched as Part of National Train Day

As part of the upcoming National Train Day on May 10, Amtrak and MasterCard are celebrating America's natural treasures with the "Amtrak America the Beautiful Sweepstakes with MasterCard."

The promotion launched last week and runs through May 31. During that period, every time a customer uses a MasterCard® to purchase a train ticket, merchandise, or food and beverages, he or she will automatically be entered for a chance to win in the "Amtrak America the Beautiful Sweepstakes with MasterCard." The grand-prize winner will receive his or her choice of any Amtrak Vacations National Parks package for four, valued at up to \$10,000 and a \$5,000 prepaid MasterCard Gift Card. Twenty-five other prizes will also be awarded.

In celebration of National Train Day, Amtrak will also donate \$0.50 to the National Park Service for every MasterCard purchase made with the company, up to a total donation of \$500,000. Since 1994, the National Park Service and Amtrak have partnered on the "Trails and Rails" program, which encourages visiting national parks by train.

"We're proud to bring attention to our national parks this spring and contribute to the critical efforts of the National Park Service," said David Lim, chief, Marketing and Sales Promotions. "Preserving our environment has been the goal of the National Park Service since its inception and traveling by train is another way we can work toward a greener world."

More information on National Train Day and the sweepstakes may be found at NationalTrainDay.com.

National Train Day programs and contests for employees are being finalized now. More information will be provided as it becomes available.

Operational Update: Due to UP track work between March 28 and March 30, Capitol Corridor weekend Trains 746 and 749 are canceled with no alternate transportation. A bus bridge will be used for Capitol Corridor weekend trains between Martinez, Calif., and Richmond, Calif., and Martinez and Oakland, Jack London Square.

Engineering: Track Laying Machine operators, Wilmington Maintenance-of-Way Equipment Shop repairmen and Structures welders are completing repairs and modifications to the TLM in preparation for an April 14 cut-in of the TLM at Elmora.

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the healthcare or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Marketing and Product Management: If you know of a former Pullman porter interested in attending the upcoming Pullman porter celebration in Chicago on May 10, contact Saunya Connelly at connels@amtrak.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms."

National Train Day Promos Continue

As part of an ongoing slate of activities to commemorate National Train Day, Amtrak is launching a new promotion as well as two employee contests to raise awareness of the May 10 celebrations.

The National Train Day “Buy One, Get One Free” promotion, which provides a free companion ticket with the purchase of a full fare adult ticket, is valid for sale on April 4 only and travel on May 10 only. “What better way to celebrate National Train Day than to take advantage of the buy one, get one free offer for travel on May 10,” said Darlene Abubakar, director, Brand Advertising and Sales Promotions.

On the employee front, the “Children of Amtrak” Art Contest begins today. The contest is open to children of Amtrak employees and contractors between the ages of six and 12. The contest judges are looking for art that best captures the essence of train travel and/or National Train Day. Four grand-prize winners will receive a free family trip to one of the National Train Day entertainment venues — Washington, D.C., New York, Chicago or Los Angeles.

Entries must be postmarked by April 24 and received by April 29. For complete contest rules and details on how to participate, log on to www.nationaltrainday.com/employees/artcontest.

The Employee Mini-Essay Contest also begins today. In 50 words or less, employees can respond to a weekly question posted in *Amtrak This Week*. Entries will be judged for style, content, structure and relevance to the topic, and the winning entry will be posted in the following week’s ATW, along with the new question of the week. Weekly winners will receive Amtrak merchandise.

Winning Mini-Essay entries will also be printed in the May issue of *Amtrak Ink*.

Marketing and Product Management/Operational Update:

Amtrak Charter Services will operate charter trains for the 2008 Major League Baseball season for teams including the Baltimore Orioles, Los Angeles Angels, Los Angeles Dodgers, New York Yankees, Philadelphia Phillies, Pittsburgh Pirates and Washington Nationals.

Engineering: Production’s Switch Exchange System, with the assistance of the High-Speed Surfacing Gang and New York Division Engineering forces will be installing the 12A switch within Union Interlocking.

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the health care or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at “Employees” ➡ “Awards and Achievements” ➡ “2008 PSSA Nomination Forms.”

National Train Day Question of the Week

What are the best reasons for traveling by train?

All essays must be submitted by Thursday of each week — with “NTD Mini-Essay Contest” in the subject line — to ecom@amtrak.com. Check back next week for the winning response and a new National Train Day Question of the Week.

Kummant, McLean Defend FY '09 Funding Needs

Board Chairman Donna McLean and President and CEO Alex Kummant testified last Thursday before the Senate Appropriations Subcommittee on Transportation, Housing and Urban Development in support of the company's FY '09 funding request. Amtrak's Grant and Legislative Request for \$1.67 billion was submitted to Congress on Feb. 20.

McLean opened testimony by providing an outline of the board's current effort to refine the company's five-year strategic plan.

"Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider," said McLean. "Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success."

In his prepared statement, Kummant took the opportunity to reiterate the great potential for passenger rail travel in the coming years and provided details on the company's recent successes in ridership and ticket revenue.

Additionally, Kummant said, "To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities," said Kummant. "We are working on increasing revenue, reducing costs, and improving both trip times and system-wide on-time performance."

To reach these goals, Kummant explained, the company seeks \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service. Separately, the company has requested an additional appropriation of \$114 million, which is necessary to fund retroactive payments in FY '09, in accordance with the Presidential Emergency Board recommendation.

"On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable ... I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations," Kummant added.

Operational Update: Starting today, *Empire Service* schedules are adjusted to accommodate Metro-North track work near Beacon, N.Y., and other route maintenance performed by CSX Transportation. The Metro-North track work will also affect *Northeast Regional* and *Acela Express* schedules west of New Haven, Conn.

Engineering: The Northern District Tie Gang has begun installing 60,000 wood ties on the Springfield Line.

Marketing and Product Management: Beginning April 19, the time allowed for employees to book a weekend ticket on *Acela* trains (either class) or non-*Acela* Business class trains will be reduced from three hours before departure to one hour.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms."

National Train Day Question of the Week Winner

What are the best reasons for traveling by train?

The best reason for traveling on an Amtrak train is the ability to relax and take in the surroundings.

Riding on the train allows you a better glimpse of the world around you: vibrantly colored foliage, interesting architecture, animals and people at play.

What a wonderful world it is!

Tonya Williams, Secretary I, Jacksonville, Fla.

National Train Day Question of the Week

What is Amtrak's most scenic route? Why?

All essays, 50 words or less, must be submitted by Thursday, April 10 to ecom@amtrak.com.

April 14, 2008

Partial *Coast Starlight* Service Resumed

Partial *Coast Starlight* service between Los Angeles and Seattle will resume with the northbound Train 14 on Tuesday, April 15. The first southbound Train 11 will depart Seattle on Wednesday, April 16.

Passengers will be provided motorcoach service between Eugene and Klamath Falls, Ore., in both directions. The northbound and southbound *Coast Starlight* Trains 14 and 11 will operate normally between Los Angeles and Klamath Falls.

Train service on the route was suspended between Los Angeles and Seattle on Jan. 19, due to massive landslides over the railroad north of Chemult, Ore. Union Pacific Railroad continues to restore tracks affected by the slides. Currently, freight railroad traffic through the area remains disrupted and is slowly being restored. There is no scheduled date for full restoration of the route at this time.

Amtrak began partial coach only train service on Feb. 1, between Los Angeles and Sacramento, with no alternate transportation north of Sacramento. On Feb. 29, the company introduced motorcoach service between Sacramento and Portland.

UTU Reaches Agreement

Amtrak and the Yardmasters (United Transportation Union) have reached a tentative agreement. Details of the agreement have been sent to union members for ratification.

Important Note

Make sure your time is entered promptly. Employees represented by **ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment), IBB, and UTU** must enter time for work through March 31, 2008, by April 25, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment.

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the results of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

Benefits: Tomorrow is the deadline to submit receipts for healthcare or dependent care flexible spending accounts reimbursement for 2007. For more information, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Travel Reminder: Beginning this Saturday, employees can only book personal tickets for weekend travel aboard *Acela Express* or non-*Acela* Business class trains within one hour of departure, due to heavy ridership.

Reminder: National Train Day is May 10. Station and on-board service advisories and Arrow messages are being distributed today and tomorrow to provide event info and details on the effective display and use of promotional material. For other NTD info, log on to www.NationalTrainDay.com.

National Train Day Question of the Week

What Amtrak destination offers the best attractions for kids?

All essays, 50 words or less, must be submitted by Thursday, April 17 to ecom@amtrak.com.

National Train Day Question of the Week Winner

What is Amtrak's most scenic route? Why?

"To truly experience the beauty of the American landscape, take a ride on the Empire Builder. What other route affords you the opportunity to view such an eclectic panorama that includes city skylines, Great Lakes, rolling farmland, the Mississippi River, Midwestern plains, Glacier National Park and the Cascade Mountains?"

**Bob Cook, Manager,
Call Center Operations, MARSCC
Philadelphia**

NOTE: Don't forget to enter your kids in the "Children of Amtrak" Art Contest; complete rules are attached and can also be found at www.nationaltrainday.com/employees/artcontest.

April 14, 2008

Partial *Coast Starlight* Service Resumed

Partial *Coast Starlight* service between Los Angeles and Seattle will resume with the northbound Train 14 on Tuesday, April 15. The first southbound Train 11 will depart Seattle on Wednesday, April 16.

Passengers will be provided motorcoach service between Eugene and Klamath Falls, Ore., in both directions. The northbound and southbound *Coast Starlight* Trains 14 and 11 will operate normally between Los Angeles and Klamath Falls.

Train service on the route was suspended between Los Angeles and Seattle on Jan. 19, due to massive landslides over the railroad north of Chemult, Ore. Union Pacific Railroad continues to restore tracks affected by the slides. Currently, freight railroad traffic through the area remains disrupted and is slowly being restored. There is no scheduled date for full restoration of the route at this time.

Amtrak began partial “coach only” train service on Feb. 1, between Los Angeles and Sacramento, with no alternate transportation north of Sacramento. On Feb. 29, the company introduced motorcoach service between Sacramento and Portland.

UTU Reaches Agreement

Amtrak and the Yardmasters (United Transportation Union) have reached a tentative agreement. Details of the agreement have been sent to union members for ratification.

Important Note

Make sure your time is entered promptly. Employees represented by ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment), IBB, and UTU must enter time for work through March 31, 2008, by April 25, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment.

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the results of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

Benefits: Tomorrow is the deadline to submit receipts for healthcare or dependent care flexible spending accounts reimbursement for 2007. For more information, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Travel Reminder: Beginning this Saturday, employees can only book personal tickets for weekend travel aboard *Acela Express* or non-*Acela* Business class trains within one hour of departure.

Reminder: National Train Day is May 10. Station and on-board service advisories and Arrow messages are being distributed today and tomorrow to provide event info and details on the effective display and use of promotional material. For other NTD info, log on to www.NationalTrainDay.com.

National Train Day Question of the Week

What Amtrak destination offers the best attractions for kids?

All essays, 50 words or less, must be submitted by Thursday, April 17 to ecom@amtrak.com.

National Train Day Question of the Week Winner

What is Amtrak's most scenic route? Why?

“To truly experience the beauty of the American landscape, take a ride on the Empire Builder. What other route affords you the opportunity to view such an eclectic panorama that includes city skylines, Great Lakes, rolling farmland, the Mississippi River, Midwestern plains, Glacier National Park and the Cascade Mountains?”

**Bob Cook, Manager,
Call Center Operations, MARSCC
Philadelphia**

NOTE: Don't forget to enter your kids in the “Children of Amtrak” Art Contest; complete rules are attached and can also be found at www.nationaltrainday.com/employees/artcontest.

April 21, 2008

19 Days and Counting Until National Train Day

Enthusiasm for National Train Day is building as communities and employees across the system plan open houses, and stations in Washington, D.C., New York, Chicago and Los Angeles gear up for major events on May 10. Visit www.nationaltrainday.com for a list of open houses and events in your area aimed at promoting passenger rail on May 10.

National Train Day materials such as buttons, stickers and posters have been sent to stations and crew bases for use by station and on-board personnel. Events leading up to May 10 include the "Coachella Express," a special train that will carry 500 campers to the festival grounds in Indio, Calif., this Thursday and back on Monday morning.

NOTE: The "Children of Amtrak" Art Contest ends Thursday, complete rules are on the National Train Day Web site at www.nationaltrainday.com/employees/artcontest.

"Take your Daughters and Sons to Work" Safety Rules

Employees are welcome to bring their children to work on Thursday as part of the National "Take our Daughters and Sons to Work Day." However, children are not allowed:

- ➡ At sites where there is train movement or heavy equipment.
- ➡ In the cab of a moving locomotive under any circumstances.
- ➡ Where their presence could disrupt operations or the movement of passengers.
- ➡ In areas where personal protective equipment is required.

National Train Day Question of the Week Winner

What Amtrak destination offers the best attractions for kids?

"Orlando, Fla., gets my vote as the best destination for kids. With its plethora of amusement parks, including Walt Disney World, Universal Studios and Sea World, as well as numerous water parks and wildlife parks, it offers something for every child, including the child in all of us."

Mary Weinberger
Customer Service Representative
MARSCC, Philadelphia

Deadline for Entering Work Through March 31

Employees represented by **ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment), IBB and UTU** must enter time for work through March 31, 2008, by April 25, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment.

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the result of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

National Train Day Question of the Week

How can employees help spread the word about National Train Day?

All essays, 50 words or less, must be submitted by Thursday, April 24 to ecom@amtrak.com.

April 28, 2008

Regional Service Re-Launch Project Underway

The Marketing and Product Management department is working with a multifunctional team that includes NEC Service Operations, System Operations, OBS Service Standards, Food and Beverage, Mechanical, Transportation and Industrial Design to improve current *Regional* service, leading to an enhanced product and an ad campaign slated for mid-June.

Since it kicked off in October 2007, the NEC *Regional* Service “Re-Launch” Project is focused on enhancing overall product quality by improving on-time performance, equipment and service features to grow ridership and revenue on Amtrak’s most heavily traveled service.

“We want to improve every area that touches our passengers to deliver a consistently satisfying travel experience to our expanding customer base,” said Patrick Pietrantonio, director, Product Management-East.

The June 2008 “re-launch” will include a new product identity and advertising — the new name, *Northeast Regional*, and logo will appear on both sides and the center of the Café car; implementation of tactical pricing offers; tighter OTP tolerances; restructured Business class amenities; adjusted seat inventory to better accommodate monthly and multi-ride ticket holders; new and improved menu offerings, and en route cleaning practices and processes.

In addition, the entire *Northeast Regional* fleet will have all-table Café cars in all its trainsets. The Café cars are being centered in the consists to provide easier access for Coach customers, which account for 75 percent of Café car revenue. The Café cars will also undergo a number of interior cosmetic improvements, including more comfortable booth cushions.

The project is being supported by service guides and training videos for OBS and T and E employees.

“The *Regional* service will improve significantly,” said Pietrantonio. “The impact we are looking for will come from a combination of incremental improvements in a variety of areas that will be noticeable to our customers and enhance their travel experience.”

Future plans include additional food service car modifications, more Amfleet coach overhauls, a capital program to increase fleet size, and a plan to operate variable consists to maximize market demand.

Operational Update: Due to CSX Transportation track work, *Pere Marquette* Train 371 will operate one hour earlier to all stations along the route, through Friday, May 2.

Environmental Health and Safety: An FRA-funded safety culture survey — requested by the board of directors — is being conducted among Washington Terminal, crew base and Ivy City employees to assess perceptions of safety management. Surveys are being distributed next week.

Corporate Communications: An interview with President and CEO Alex Kummant is scheduled to air Tuesday, April 29 or Wednesday, April 30 on “NBC Nightly News,” check local listings for broadcast times.

Reminder: The deadline for the “Children of Amtrak” Art Contest is being extended; all entries must be postmarked by Friday, May 2 and received by May 7. Complete rules are on the NTD Web site at www.nationaltrainday.com/employees/artcontest.

National Train Day Question of the Week

What National Train Day events are you most looking forward to?

All essays, 50 words or less, must be submitted by Thursday, May 1 to ecom@amtrak.com.

National Train Day Question of the Week Winner

How can employees help spread the word about National Train Day?

“Spreading the word about National Train Day can take on many forms, from greeting your customers, to sending Amtrak e-cards to “Get Your Choo-Choo On,” to displaying printed materials. Word of mouth is the best tool we have to spread the news about National Train Day and all Amtrak service!”

Donna Engstrom
Support Desk Representative
MARSCC, Philadelphia

May 5, 2008

Five Days Until National Train Day!

Six weeks of promotions, partnerships, special events and an ad campaign culminate this Saturday with the first-ever National Train Day celebration. More than 50 stations and communities — including the Washington, D.C., New York, Chicago and Los Angeles stations — are hosting National Train Day events, which will include such attractions as live entertainment, photo galleries, equipment exhibits and children's activities.

"This first National Train Day is a great opportunity for us to highlight the importance of passenger rail travel," said Emmett Fremaux, vice president, Marketing and Product Management. "So, tell your friends, family and neighbors to join us on Saturday for this unique celebration."

For more information on National Train Day events in your area, log on to www.nationaltrainday.com.

Labor Relations: The tentative agreement reached with the UTU Yardmasters last month has been ratified. Once the agreement is signed, an implementation schedule will be finalized.

Operational Update: The *Coast Starlight* resumes normal operations tomorrow between Los Angeles and Seattle with northbound Train 14. The first southbound Train 11 departs Seattle on Wednesday.

Engineering: The Production Switch Exchange System Gang will be installing the No. 23 switch at Bush Interlocking this weekend, with the assistance of Mid-Atlantic Engineering forces.

Government Affairs: Reps. James L. Oberstar (D-Minn.) and Corrine Brown (D-Fla.) will announce the introduction of the Amtrak reauthorization bill on Thursday. A hearing is scheduled for May 14.

National Train Day Question of the Week

What events and activities would you like to see as part of next year's National Train Day?

All essays, 50 words or less, must be submitted by Thursday, May 8 to ecom@amtrak.com.

National Train Day Question of the Week Winner

What National Train Day events are you most looking forward to?

"The 'Children of Amtrak' Art Contest is the event that I am looking forward to. Children put so much into their projects, and I really enjoy looking at all of the entries. All of them are winners!"

Terry Pryor
Administrative Assistant, IT
Washington, D.C.

Station Improvement Workshop To Be Held in Albuquerque

The Great American Stations project continues this week with another "Civic Conversation" in Albuquerque, N.M., among Amtrak officials, state transportation officials and community leaders to discuss station improvements.

"As was the case at the two previous 'conversations' in Pittsburgh and Denver, we want to direct mayors, civic leaders and state officials toward resources and best practices for rail station in need of upgrades or repairs," said Joe McHugh, vice president, Government Affairs and Corporate Communications.

The morning session on Wednesday includes a review and update on the Americans with Disabilities Act and remarks from Mark Yachmetz, associate administrator, Federal Railroad Administration, and Rich Wessler, NRPC operations officer, BNSF Railway. Meridian, Miss., Mayor John Robert Smith; Ryan Carpenter, director of special projects for Dodge City, Kan., and Andi Udriș, president and CEO of Union Station in Kansas City, Mo., will present case studies highlighting their revitalization plans.

The next "Civic Conversation" is slated for the fall in North Carolina.

May 12, 2008

Safety Record Improvement Earns Industry Recognition

President and CEO Alex Kummant will accept a 2007 E.H. Harriman Memorial Award on behalf of Amtrak this week in Washington. The E.H. Harriman Memorial Awards Institute is presenting the award for most improved safety record among Class I railroads at a luncheon hosted by the Association of American Railroads.

“Winning a Harriman Award is an excellent achievement for Amtrak and the recognition is extremely meaningful,” said Kummant. “While we have instituted a number of initiatives to promote safety on the railroad, this award belongs to each and every employee who earned it by making safety a priority. I am very proud of our employees’ efforts.”

In 2007, the company had a rate of 2.4 FRA-reportable injuries per 200,000 man-hours — an improvement of 27 percent from the prior year and a 46 percent improvement compared to 2005.

“We want to prevent on-the-job injuries and illnesses,” said Roy Deitchman, vice president, Environmental Health and Safety. “The programs and procedures put in place by operating departments have helped, but we can still do better. Safety is a priority at Amtrak and is stressed every day in job briefings, work practices and job safety analysis.”

According to Deitchman, the reduction of injuries can be attributed to implementation of the comprehensive System Safety Program along with adoption of the Six Tenets of Safety which sets standards for performance and accountability for management and agreement employees. Increased safety education at Block Training and Training Camps was also instituted and cross-functional safety teams have been formed to solve specific workplace safety issues.

Note: The Spring/Summer System Timetable becomes effective today, May 12.

Corporate Communications: The 2009 “Picture Our Train” Wall Calendar Photo Contest begins today, May 12. Complete rules are posted on www.Amtrak.com/photocontest and the Intranet. The deadline is July 11.

Government Affairs: On May 14, President and CEO Alex Kummant will testify on the Amtrak reauthorization bill before the House Transportation and Infrastructure Subcommittee.

Labor Update

Retroactive Wage Payment

If you are one of the more than 9,500 union-represented employees who received the first installment (40% of the total amount) of the retroactive wage payments on May 9, please be sure to review the detailed information provided in the summary statement and the Frequently Asked Questions you received with the check or deposit notice. If you have additional questions, please call the temporary call center set up to field payment questions at 1-888-514-0983, Monday-Friday 8 a.m. to 8 p.m. If your question requires further examination, you will be provided a case number that you must include on the Retroactive Wage Payment Inquiry NRPC Form 3287 (available on amtrakbenefits.com and on the Intranet under “Library,” then “Forms”) which should be mailed, along with the necessary supporting documentation, to Payroll Operations at the address on the form.

Deadline for Entering Work Through April 30

Employees represented by BLET and SMWIA must enter time for work through April 30, 2008, by May 16 to ensure that those hours are factored into the first installment of the retroactive wage payment. Any time submitted after May 16 for dates worked prior to April 30 will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the result of those manual adjustments become part of the calculation for the planned second installment of the retroactive wage payment.

National Train Day Question of the Week Winner

What events and activities would you like to see as part of next year’s National Train Day?

“What I would like to see is another contest for the children, like an essay contest. I think it would be really nice to hear what children have to say about trains, they are our future. And art work again, but open the age group to at least 16 years of age.”

**Pauline Kittilson, Lead Accounting Clerk
Philadelphia**

May 19, 2008

CEO Calls for Participation in Operation RedBlock at All Levels

Amtrak is committed to preventing and avoiding on-the-job alcohol and drug abuse in the workplace through the Operation RedBlock program (ORB). Earlier this month, the Operation RedBlock Executive Steering Committee, composed of senior labor union leaders and management, met to recertify its common interest in ORB and reinvigorate the involvement of managers and employees in the program.

“I support and urge the support of all our managers and employees for the RedBlock program. It is important that we maintain a safe working environment free of drugs or alcohol. We all share in this responsibility and I commend the volunteer employees who act in concert to strive toward this common goal,” said President and CEO Alex Kummant.

Noting that tireless commitment from employees and managers at all levels is necessary, Kummant added that Operation RedBlock fosters an environment in which co-workers look out for one another. “The active participation of management in the regional, divisional and local ORB committees is critical,” he added.

Operation RedBlock is a union developed, company adopted, drug and alcohol peer prevention and intervention program. Its mission is to emphasize awareness, education and prevention of substance abuse through union-led committees. More information about Amtrak’s RedBlock program can be found on the company Intranet under the “Employees” menu or at www.redblock.com.

Marketing and Product

Management: As of this month, the USA Rail Pass is now available to any persons regardless of nationality or residence with proper identification. A passport is no longer required to purchase or use the USA Rail Pass, although a passport remains a valid form of identification.

Operational Update: CSX is in the fourth week of a 16-week project in the Rochester subdivision to install 304,940 linear feet of rail between Warners, N.Y., and Corfu, N.Y. Trains operating west of Albany may experience slight delays.

Note: The 2007 Annual Report is now posted on the Intranet under “Library” ➤ “Reports” ➤ “Annual Reports.” It is also posted on Amtrak.com at “Inside Amtrak” ➤ “Annual Reports and Consolidated Financial Statements.”

e-Commerce: The new Asset Disposal Request eForm must be submitted and approved before taking any Amtrak asset (excluding PCs and monitors) off the property. The eForm can be found by clicking “Company eForm” from the eTrax login page ➤ “Request for Asset Disposition.”

May 27, 2008

Internal Marketing Plan Focuses on “Big Six” Services

A new internal education campaign is now underway to help Amtrak call center agents and travel agents better sell the features and benefits of the Marketing department’s “Big Six” trains that comprise the FY ’08 Route Improvement Plan: *City of New Orleans*, *Auto Train*, *Coast Starlight*, *Hiawatha Service*, *San Joaquins* and *Northeast Regional*.

“We want to focus on our sales agents who, in addition to on-board service employees and ticket agents, directly touch customers,” said Hank Koppelman, senior director, Product Management, “and ensure that they have the most accurate information about a particular train service, which should enhance the reservation and sales process.”

The *City of New Orleans* was highlighted in April and the *Auto Train* was the featured service in May. The *Coast Starlight* is the Train of the Month for June.

As part of the plan, route product managers brief — and subsequently quiz — call center agents and travel agents on the features of a given service, such as upgraded dining car services, special equipment or promotions. The anticipated outcome is an increase in revenue and ridership. For example, the *City of New Orleans* showed a 17 percent revenue increase over last year at MARSCC in Philadelphia, and a 2 percent increase at WRSCC in Riverside, Calif., for April. Additionally, a promotion enabling Amtrak Guest Rewards members to earn a 25 percent point bonus for travel on the *Auto Train* resulted in a 2,270 registrations in May, according to Vicky Radke, senior officer, Loyalty Marketing.

Train of the Month is a collaborative effort among Product Management, Marketing, Loyalty Marketing, eCommerce, the Western and Mid-Atlantic Reservation Sales Call Centers and the Travel Agent Sales Center.

Engineering: The Switch Exchange System and Mid-Atlantic Division forces are installing a new interlocking at New Park on the Harrisburg Line in Thorndale, Pa. The first of four #20 turnouts will be installed this weekend during a 55-hour outage.

Operational Update: Due to extensive Union Pacific track work in Springfield, Ill., through May 31, two *Lincoln Service* trains will be canceled and busing/rescheduling will occur on a portion of the route for four others. The *Texas Eagle* will also be delayed, with bus travel to and from Springfield.

Human Resources: A pilot Diversity Youth Career Program is underway with the D.C. Chamber of Commerce to recruit area minority college students for an eight- to 10-week work initiative in the Washington, D.C., metropolitan area, beginning in June.

Alleman Tapped for Top Spot in Mid-Atlantic Division

Steven J. Alleman, deputy chief engineer, Construction, has been appointed general superintendent, Mid-Atlantic Division, effective June 1, replacing Acting General Superintendent Mike Sherlock. Sherlock will assist in the transition process until June 15, before resuming his duties as operations superintendent.

“Steve offers a wealth of experience and knowledge, and he’s demonstrated great skill and leadership as manager for a number of complex projects and operations,” said Vice President, Transportation Richard Phelps. “We should also applaud Mike for stepping up and serving in exemplary fashion during the search for a permanent replacement.”

Alleman joined Amtrak in 1977 as a track worker while attending Virginia Tech. He has served in a variety of roles including New England Division general manager, High Speed Rail program director and senior program director of Fire and Life Safety.

Labor Update

The first installment of the retroactive wage payment (40 percent of the total adjustment) for the approximately 1,900 employees represented by the Brotherhood of Locomotive Engineers and Trainmen and the Sheet Metal Workers International Association will be distributed on Friday, May 30.

June 2, 2008

Engineering: The cutover on the Shell at grade project occurs on Sunday, June 8. The project improves the junction of the Hellgate Line with the New Haven Line to allow a speed increase from 15 mph to 45 mph for Amtrak trains.

Operational Update: Due to Union Pacific track work, the *California Zephyr* will detour through Wyoming via UP's Overland Route affecting service at stations between Denver and Salt Lake City from Sunday, June 8 through Sunday, June 15.

Marketing and Product Management: An "Historical On-Time Performance" link on the Amtrak.com home page now assists passengers in planning their trip by providing a particular train's on-time performance history for the last 12 months, and includes general information about causes for delays.

Benefits Reminder: Employees who have questions regarding their benefits should contact the Amtrak Benefits Service Center at 800-481-4887.

"Picture our Train" Calendar Contest in Full Swing

Now is the time to enter the "Picture our Train" 2009 Wall Calendar Photo Contest. The contest, which began on May 12, is an annual opportunity for employees and train buffs to submit a favorite photo of an Amtrak train to be featured on next year's calendar.

The contest review panels are looking for the best original color photographs featuring a train with the current Amtrak logo and livery visible, including Amtrak California trains, Amtrak *Cascades*®, *Pacific Surfliner*® and *Acela Express* trains. Last year's winning entry, a *Coast Starlight* train passing the majestic Mt. Shasta in Northern California, was submitted by Richard J. Allen, a retired police officer from Cortland, N.Y.

All entries must be an 8 x 10 original color photo suitable for enlargement up to 25 inches.

The grand prize winner will receive a \$1,000 travel voucher and a photo credit on the calendar. Second-through fifth-place contestants will receive travel vouchers as well, ranging from \$100 to \$500. **The contest ends July 11.**

Contestants are reminded to stay away from tracks and railroad rights-of-way and remain in public access areas. The official rules are posted on Amtrak.com/photocontest.

June 9, 2008

Thames River Bridge Lift Span To Be Installed This Weekend

Maintenance Blitz Will Be Conducted During Four-Day Track Outage

Operational Update: The cutover for the Shell at grade project, originally scheduled for June 8, has been postponed and will be rescheduled for later this month.

Marketing and Product Management: The Amtrak Guest Rewards® Web site recently underwent a significant redesign to improve user navigation, provide members with an even higher degree of targeted information, and better position Amtrak Guest Rewards® program partners.

Benefits: The one-year service requirement for enrollment in the 401(k) Retirement Savings Plan has been eliminated for agreement employees, who can now enroll immediately upon hire or anytime thereafter. Enrollment packages will be sent to agreement employees hired within the last year.

Government Affairs: The U.S. House of Representatives will take up consideration of H.R. 6003, the Passenger Rail Investment and Improvement Act of 2008, the House version of the Amtrak reauthorization bill.

This weekend, the movable span of the 90-year-old Thames River Bridge, located between Groton and New London, Conn., will be replaced with a vertical lift span. This is the final stage of a multiyear project designed to improve the reliability of the bridge, reduce the chance of operational failures and minimize train delays.

The span replacement begins Saturday, June 14 and continues through Tuesday, June 17. During this four-day track outage, Amtrak will also perform a maintenance “blitz” between Boston and New Haven that will provide passengers with a smoother ride and significantly improve the reliability of the railroad.

To accommodate this project, service cancellations and adjustments have been made for travel between Boston, New Haven, Conn., and New York. In addition, a special train will operate round-trip between Washington and Boston via Springfield, Mass., on June 15, 16 and 17.

To communicate the service changes between New York and Boston during the four-day changeout, the company launched an extensive outreach campaign that began in February to inform appropriate state and local leaders, passengers and residents of the upcoming construction and service changes.

The company has held numerous local meetings, sent correspondence, produced an informational video, and launched media relations and customer communications campaigns as part of the outreach effort.

More information on this project is available on Amtrak.com through Wednesday, June 18.

Important Notice

Effective May 31, all dependent medical, dental and rail pass benefits are terminated for those employees who did not respond to Aetna's numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

Operational Update: The massive flooding in the Midwest is now affecting the following services, including provisions for alternate motorcoach service: *Empire Builder*, *California Zephyr* and Illinois and Missouri services.

Benefits: All dependent medical, dental and rail pass benefits are terminated for those **agreement** employees who did not respond to Aetna's numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

Information Technology: When sending e-mail across the entire enterprise, distribution lists should cover only those areas directly affected by the announcement. The current policy can be found on the Intranet at Library ► Policies ► Amtrak Policy and Instruction Manual ► 3.0 Operations ► Computer Security and Usage.

Reminder: The 2009 "Picture our Train" Wall Calendar Photo Contest is in full swing. The deadline for submissions is July 11. For more information, log on to Amtrak.com/photocontest.

Coast Starlight Re-Launches with Fanfare

In Los Angeles, Santa Barbara, Portland and Seattle, Amtrak officials and various travel industry representatives were joined by local politicians and passengers to commemorate the re-launch of the *Coast Starlight*.

Across the route, events included ribbon-cutting ceremonies and special receptions designed to generate excitement about the enhanced amenities on board the *Coast Starlight* service that links Los Angeles to Seattle.

Sleeper car passengers are now able to enjoy an exclusive wine and cheese event on board featuring four regional wines and four artisan cheeses, specialty coffees and appetizers for purchase, along with a library, board games and a Parlour car theatre.

Coach passengers can take advantage of new and larger complimentary pillows, new blankets for purchase, at-seat meal and beverage options.

A new and improved Arcade car is available to all passengers.

Update on the Thames River Bridge Project

Following discussions this morning with the contractor working on the Thames River Bridge in Connecticut, there is currently no firm date for the bridge span changeout. The installation of the new lift span is delayed due to complications encountered in the dismantling and removal of the bridge's counterweight.

Once the contractor delivers a firm date, we will issue an operating plan to accommodate the span changeout. We expect an update at the end of the day on Wednesday. Until further notice, we are operating according to a normal schedule between New York and Boston.

June 23, 2008

New Agreements with Maryland Transit Administration Take Effect Next Week

Amtrak recently signed two new contracts with the Maryland Transit Administration (MTA) to continue operations and provide infrastructure access for MARC commuter trains. The Operating Agreement and the Access Agreement, both effective July 1, are five-year deals and the Access Agreement also includes a five-year extension option.

“The new contracts have significant improvements for Amtrak on the financial side as MTA is ramping up its commitment to improving commuter rail service,” explains Jason Steffensen, principal, Commuter Partnerships-Mid-Atlantic.

The new agreements have new and increased incentives for on-time performance and fleet availability. Combined, a revenue increase of approximately 10 percent is expected over last year.

The Access Agreement also includes an increase in funding for recapitalization of existing infrastructure, bringing the new total to \$35 million over the five-year deal. An additional \$220 million is built in for Amtrak to begin implementing part of MTA’s 30-year service expansion plan with projects to improve capacity and reliability.

Amtrak currently has six contracts to operate or support commuter train services. In addition to MARC, they include California’s Caltrain, Connecticut’s Shore Line East, Florida’s Tri-Rail, Virginia’s VRE and Washington’s Sound Transit.

Engineering: At 3 a.m. on Tuesday, the New England Division Tie Gang will begin the installation of 4,000 wood ties on Track 3 from Read to Forrest, just south of Boston. The project will conclude before 4 p.m. on Thursday.

Human Resources: More than 370 nominations have been submitted for this year’s President’s Service and Safety Awards. The winners will be announced in August.

Thames River Bridge Update

The installation of a new lift span on the Thames River Bridge has been rescheduled for June 24 through June 27 due to an unexpected complication encountered by Amtrak and its contractor in dismantling the bridge’s 4 million-pound counterweight.

To accommodate passengers, Amtrak has scheduled substitute rail service between Boston and New York via the inland route through Springfield, as well as other special trains that will serve segments of the Boston-New Haven-New York route. Limited connecting bus service to bypass the bridge outage will also be available during this period.

June 30, 2008

Message from President and CEO Kummant

Dear Co-workers,

I wanted to take an opportunity to share with you some news about how we're doing, as we kick into the busy summer season. With just a couple months left in the fiscal year, ticket revenue through May was almost 14 percent ahead of last year over the same time, and ridership was nearly 11 percent higher. In addition, last month was one for the record books — we earned \$153.4 million in ticket revenue and served 2.58 million riders; both are the largest totals for any single month in company history.

While a range of factors contribute to these achievements, I credit your hard work and dedication for our success. I thank you for your commitment to Amtrak and for persevering in light of the challenges we face.

And we do, and will, encounter some hurdles. A sustained downturn in the economy and uncertainty about its long-term vitality could dampen our momentum. Moreover, the same reason that helps drive up ridership — high gas prices — also causes our costs to soar. We expect to spend close to \$100 million more on diesel fuel than we did last year.

In addition, the problems we're experiencing with locomotive reliability are taking a toll on service and on-time performance, not to mention the front-line employees who are managing failures when they occur. I want you to know that our Mechanical teams are still in the process of replacing faulty traction motors on our P-42 diesel locomotives and they're working on remedies to address the difficulties we're having with our aging fleet of AEM-7 electric locomotives.

We've proven time and again that we tackle challenges with skill, but don't get me wrong — I am not satisfied with just surviving another day. My goal for Amtrak is to realize our ambitions to grow as we become an increasingly important part of the national transportation network. Congress appears to be close to completing a reauthorization bill that will keep us headed in that direction. Both the House and the Senate versions of the bill passed with relatively little opposition, an indication of the support for passenger rail.

We're busy now and the summer's only going to get busier. The highest percentage of injuries occurs during the summer, so please look out for one another and work safely.

Sincerely,
Alex Kummant
President and Chief Executive Officer

Operational Update: Beginning June 30, *Saluki* Train 391 will operate one hour **earlier** to all stations, and *Illini* Train 392 is currently operating one hour and 10 minutes **later** due to Canadian National track work. *Saluki* Train 390 and *Illini* Train 393 will continue operating on a revised schedule through Aug. 5.

Engineering: Production forces are in the process of constructing 10 turnout packages for Shore interlocking in North Philadelphia. These turnouts will be installed as four crossovers and two individual turnouts later in the production season.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from \$0.50 per mile to \$0.58 per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Corporate Communications: Only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Please direct media during regular business hours to 202-906-3860; after hours inquiries should be directed to the Media Relations answering service at 800-562-1904.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest; the deadline for submissions is Friday, July 11. Log onto Amtrak.com/photocontest for official rules.

Thames River Bridge Update:

The Thames River Bridge became operational on Saturday, June 28 with the passage of *Northeast Regional* Train 66 at 5:57 a.m. Engineering forces continue to work toward a July 10 deadline for full operation of the draw span.

Operational Update: On July 9, 10 and 11, Amtrak *Cascades* Train 504 will not operate due to Union Pacific Railroad track work. Passengers will be provided motor-coach service between Eugene, Albany, Salem, Oregon City and Portland, Ore.

Engineering: The compaction grouting project that began on April 1 to stabilize 1,000 feet of concrete floor slabs of the B and P Tunnel in Baltimore is progressing on schedule toward its July 21 completion target.

Human Resources: All non-agreement managers should have completed performance goals discussions with employees and entered FY '08 goals into IMPACT, the online performance management system. The final IMPACT training sessions — 10 a.m. to 11 a.m. and 1 p.m. to 2 p.m. Monday through Friday — are currently underway and will conclude on Friday July 25.

Benefits: New benefit contribution rates go into effect this month for agreement-covered employees, and will be in effect for the next 12 months. For more information, contact the Amtrak Benefits Service Center at 800-481-4887.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest; the deadline for submissions is Friday July 11. Log onto Amtrak.com/photocontest for official rules.

Finance (Correction): The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 50.5 cents per mile to 58.5 cents per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Service Resumes Following Midwest Floods

Service has now been fully restored on all three routes that were temporarily suspended in mid-June due to massive floods throughout the Midwest. The *Empire Builder* and *Southwest Chief* returned to regular service on July 1, while the *California Zephyr* resumed on July 5.

"Floods of this size can wash out tracks and cause a lot of damage to switches and signal systems," said Chief Operating Officer Bill Crosbie. "The host railroads — BNSF, Canadian Pacific and Union Pacific — worked diligently to help us minimize the impact of the floods on our passengers and our business, and we appreciate their efforts."

Missouri Announces \$5 Million to Improve Amtrak Service

Last week, the Missouri Department of Transportation (MoDOT) announced that \$5 million will be provided by the state legislature to improve infrastructure and increase reliability of service between Kansas City and St. Louis. The state is also seeking another \$5 million in matching funds from the federal government.

Amtrak operates two daily Kansas City-St. Louis roundtrips on the Union Pacific Railroad, which currently suffers from heavy freight train congestion. The investment from MoDOT will increase track capacity through the addition of sidings, thereby relieving bottlenecks along the route.

"We're extremely excited about Missouri's new level of commitment to passenger rail service," said Anne Witt, vice president, Strategic Partnerships. "This is a trend we're seeing across the country — states are continually recognizing the need for reliable mass transit options, which equates to a lot of growth potential for our company."

In other news on state support, a previously reported proposal to eliminate funding for Amtrak in Illinois to help balance the state budget is no longer under consideration. The company currently operates more than a dozen daily roundtrips as part of a service contract with the Illinois DOT, and a contract renewal at the current level of \$28 million per year is expected to be completed soon.

Top Story

Extended Agreement with Connecticut DOT Expands Service

On the heels of new and expanded agreements with Maryland for the operation of its MARC commuter rail line, Amtrak has agreed to a five-year extension of its operating and access agreement with the Connecticut Department of Transportation (CDOT) that runs through June 2012.

The company will continue to provide transportation, mechanical and materials management services for CDOT's Shore Line East commuter rail, along with access to territory between New Haven and New London. New weekend service has also begun as part of the deal. Total contract revenue for existing and expanded service is expected to increase by 32 percent annually.

Amtrak currently has six contracts to operate or support commuter train services including MARC and Shore Line East. Others are California's Caltrain, Florida's Tri-Rail, Virginia's VRE and Washington's Sound Transit.

Operational Update: Beginning July 14 through Aug. 14, Trains 470, 490, 493 and 495 will not operate between Hartford, Conn., and Springfield, Mass., due to Amtrak track work. Service will not be provided to Windsor, Conn., but motorcoach service will be provided between Springfield, Windsor Locks, Conn., and Hartford.

Labor Relations: In response to questions from employees, all eligible agreement-covered workers who were on the payroll on Dec. 1, 2007, will receive next year's retroactive pay regardless of whether they retire before the payment is issued.

Engineering: Beginning July 14, the New England Division System Tie Gang S126 will install 11,216 ties on the Springfield Line on the single-track section between Hayden, Conn., and Windsor, Conn., through the third week of August. Motorcoach service will be provided for the two midday shuttle passengers.

Human Resources: Questions related to the IMPACT training for non-agreement-covered managers, which concludes on July 25, should be sent to Impact@amtrak.com. For more performance management information, log onto the performance management Web site via the Intranet: "Employees" ➡ "Performance Management."

Benefits: To schedule appointments with Fidelity representatives, employees may now call 800-642-7131 or visit www.fidelity.com/atwork/reservations. Written confirmations are provided for reservations made two weeks in advance, but reservations may be made as late as 48 hours in advance.

Company Addresses Baggage Car Shortage

Operational Update: Due to Canadian Pacific track work, the eastbound *Empire Builder* will operate on an alternate route between St. Paul-Minneapolis and Chicago on Tuesday, July 22 and Tuesday, July 29. Alternate transportation will be provided at intermediate stations.

Engineering: Over the next two weeks, the Track Laying Machine will replace ties from Rahway, N.J., station to Union Interlocking.

Human Resources: IMPACT training for non-agreement managers, which occurs daily from 10 a.m. to 11 a.m. and 1 p.m. to 2 p.m., ends Friday, July 25. This is a mandatory program for all non-agreement managers.

Benefits: To find out if a Fidelity Investments representative will be in your area or to make an appointment, log onto www.mysavingsatwork.com/amtrak and click on "Meet with a Fidelity Representative." You can also call 800-642-7131 to reserve an appointment at a convenient location.

The amount of baggage on trains has increased dramatically as ridership soars and passengers exceed carry-on limits, causing more demand for baggage equipment. The Mechanical and System Operations departments are taking steps to alleviate the strain as much as possible for front-line employees and passengers.

There are currently 63 baggage cars in the active fleet — 51 are required for revenue service, and the other 12 are allocated for running repair, preventive maintenance and overhaul at terminals in New York, Los Angeles, Chicago and Beech Grove. Currently, 10 baggage cars are due for required air brake maintenance at Beech Grove.

"The problem," explains Mike Frazier, director, System Operations, "is that with 10 cars in Beech Grove, the current operating plan only allows for two more baggage cars to be shopped for any reason elsewhere in the system. This is not feasible or sustainable. We've tried using baggage coaches as a temporary fix, but they simply can't handle the high volume of luggage, which is why we adjusted our plan last week."

That plan includes temporarily suspending baggage car service on Trains 448 and 449, effective July 19. Those cars will be redirected for use on the *Sunset Limited*. Repairs at Beech Grove are also being accelerated; three shopped cars are expected back in service within the next three weeks, according to Deputy Chief Mechanical Officer Terry Schindler.

"We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help," said Schindler. This 58-year-old fleet has been downsized over the years due to restructuring. Should capital funding become available, replacing these cars will become a priority. According to Schindler, the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting the current needs of the fleet.

July 28, 2008

Letter from the COO: Maintain Safety Focus

Dear Co-workers,

As I'm sure you're aware, we are experiencing record ridership across the system, making our regularly busy summer season all the more demanding. But with this increase in passengers comes an increased responsibility to maintain our focus on the safety of our co-workers and our passengers.

Safety is always our top priority. Distractions and short-cuts can put you, your co-workers and passengers at risk, and this is especially critical for employees in operating departments — from conductors to engineers and on-board personnel.

Whether it's a matter of slips, trips and falls or other potential hazards, we can prevent injuries by following proper procedures and being mindful of the safety training, safety briefings, and information provided by your safety committee, among other resources.

To that end, we will be talking to each and every Transportation department employee about his or her safety responsibilities from now through August. All Engineering and Mechanical employees will have similar discussions by the end of September. These individual contacts, which are typically done on a quarterly basis, are part of the Employee Safety section of our System Safety Program.

The discussions are meant to serve as a dialogue, so that we may also learn from you what you do to work safely. Our aim is to foster an environment of open communication regarding personal safety, and in the coming months you'll be hearing more about other safety-related measures we're planning.

Until then, stay alert, focused and safe. Remember — no matter how busy we may get, we are never too busy to operate a safe railroad.

Sincerely,

A handwritten signature in black ink, appearing to read 'William L. Crosbie', is positioned above the printed name.

William L. Crosbie
Chief Operating Officer

Operational Update: On Saturdays and Sundays through Sept. 1, *Ethan Allen* Trains 292 and 296 will be adjusted to accommodate passengers traveling to and from Saratoga Springs, N.Y., for the 2008 Saratoga Races.

Marketing and Product Management: A new fare sale — promoting a 15 percent reduction on select city pairs (10 percent on the *Auto Train*) — is underway to stimulate travel on certain segments of the long-distance routes. Reservations are available through Aug. 8 for travel between Sept. 2 and Dec. 11.

Human Resources: All non-agreement managers who have not yet completed Impact training must do so via a computer-based training module, which is now on the performance management Web site: “Employees” ►► “Performance Management. Select “Impact-CBT” from the “Impact” drop-down menu.

Information Technology: IT has launched a new departmental Intranet page with the same look and feel as the corporate Intranet page. Log on to “How We Work” ►► “Information Technology” to access the site for information related to IT processes and policies.

Operational Update: Beginning Aug. 4, minor changes will be made to many Northeast Corridor train schedules due to track work.

Engineering: The Track Laying Machine will be preparing Track 1 at Princeton Junction, N.J., for a cut-in during the early morning hours on Aug. 5 and then installing 37,000 concrete ties from Ham to Midway through the second week of October.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. This requirement also applies to other situations as determined by DOT or Amtrak. More information can be found online at www.dot.gov/ost/dapc/news.html.

“Picture Our Train” Photo Contest Winners Selected

A San Diego-based attorney is the grand-prize winner of the 2009 “Picture Our Train” Wall Calendar Photo Contest. Marcee Chipman, 61, submitted a stunning shot (below) of a *Pacific Surfliner* on June 27 as it departed the Santa Fe Depot in San Diego.

“My passion for photography has developed to counterbalance my work as a criminal defense attorney,” said Chipman. “It is truly an artistic expression but, more importantly, I like to share the beauty and awesomeness of life in general.”

Chipman added that her submission was an “oh wow” moment for her. “I was walking across the station and saw the palm trees in the afternoon sun, and I wondered how many people in Minnesota would know that palm trees really do grow at a train station.”

This year’s contest launched on May 12 and concluded on July 11, after receiving 283 submissions from 183 entrants; a record number. Congratulations to the second- through fifth-place prize winners:

Second Place: Richard R. Hansen, Morro Bay, Calif.
Third Place: Brian Nicodemus, Akron, Ohio
Fourth Place: Alex Mayes, Fairfax, Va.
Fifth Place: Scott Lothes, Corvallis, Ore.

As the grand-prize winner, Chipman receives a photo credit on the calendar and a \$1,000 travel voucher. Hansen, Nicodemus, Mayes and Lothes will also receive travel vouchers of \$500, \$250, \$150 and \$100 respectively.

Look for the 2009 Wall Calendar this fall.

Operational Update: On Tuesday, Aug. 12 only, all *Wolverine*, *Pere Marquette* and *Blue Water Service* trains will be cancelled due to multiple track work projects performed by Norfolk Southern, Conrail and Amtrak. Motorcoach service will be provided.

Engineering: The 10-megavolt amp transformer at Jericho Park in Bowie, Md., will be returned to service this week, bringing service back to its full 20 MVA capacity.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. More information can be found online at www.dot.gov/ost/dapc/news.html.

Performance Management Update: The first issue of *Focus* newsletter, along with accompanying FAQs, is now available on the performance management Web site to provide the latest information on the company's performance management and pay-for-performance initiative. Log on to Intranet: "Employees" ► "Performance Management" ► "Tools and Resources."

Record-Breaking Numbers Aided by Holiday, Ad Campaigns

July 2008 resulted in the highest ridership and ticket revenue totals in the history of the company. Heavy holiday travel, coupled with successful Amtrak and *Acela Express* advertising campaigns and the National Train Day tie-in, all contributed to 2.75 million trips and more than \$168 million in ticket revenue. Ridership was up 14 percent over last July and 9 percent over budget; ticket revenue jumped 19 percent over last year and 12 percent versus budget.

"Because of market conditions affecting competitive travel modes, combined with on-time performance and other service delivery improvements on some routes, nearly all routes are posting record-breaking ridership levels and significant growth rates versus FY '07," said Emmett Fremaux, vice president, Marketing and Product Development.

Between May and July 2008, the *Downeaster's* ridership numbers increased 38 percent, the highest among short-distance non-Northeast Corridor trains, while the *Coast Starlight* led long-distance trains with a 28 percent jump in ridership over the same period last year.

Among state corridor trains, ridership was up 19 percent and ticket revenue increased by 18 percent. Long distance service also experienced jumps in ridership and revenue, with increases of 12 percent and 25 percent respectively.

Growth rates are slowing along the NEC. Yet, the *Acela Express* and *Northeast Regional* combined to deliver \$7.1 million versus the ticket revenue budget. On the *Acela*, ridership increased 6 percent over last year; ticket revenue improved by 18 percent. *Northeast Regional* ridership was 9 percent better than last year; ticket revenue jumped 15 percent.

Operational Update: On Tuesday, Aug. 12 only, all *Wolverine*, *Pere Marquette* and *Blue Water Service* trains will be cancelled due to multiple track work projects performed by Norfolk Southern, Conrail and Amtrak. Motorcoach service will be provided.

Engineering: The 10-megavolt amp transformer at Jericho Park in Bowie, Md., will be returned to service this week, bringing service back to its full 20 MVA capacity.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. More information can be found online at www.dot.gov/ost/dapc/news.html.

Log on to Intranet: "Employees" ► "Performance Management" ► "Tools and Resources."

California Zephyr Schedule Reduced Via UP Partnership

Effective Monday, August 11, *California Zephyr* schedules will be shortened by as much as 45 minutes, one of the targets established in an agreement between Amtrak and Union Pacific Railroad. The trip-time reduction is part of a multiyear program to return the Overland Route between Salt Lake City and San Francisco to a state of good repair, ultimately allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add more than three hours to the *Zephyr's* schedule while UP performed track work as part of a commitment to improve on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule as planned. This is the third schedule reduction since the program began in June of last year.

"This is another milestone in our effort to improve service and OTP on the *Zephyr*," said Paul Vilter, assistant vice president, Strategic Partnerships. "UP is making great progress toward fulfilling its commitment to reduce slow orders on the route, which allows us to gradually restore the original schedule and deliver on-time arrivals."

Eastbound Train 6 will now depart Emeryville, Calif., 45 minutes later and operate 45 minutes faster to Salt Lake City. The remaining schedule to Chicago will not change. Train 5, originating in Chicago, will operate according to the current schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and 10 minutes of the time added to Train 5 have been removed, while two hours and 20 minutes have been taken from the schedule of Train 6.

"We appreciate UP's efforts related to the *Zephyr*, and we look forward to UP removing slow orders on other Amtrak routes," added Vilter.

Marketing and Product Management:

With 2.75 million trips (14 percent higher than last year), resulting in \$168 million in ticket revenue (19 percent higher), July 2008 was the highest ridership and ticket revenue month on record.

Engineering: The 10-megavolt amp transformer at Jericho Park in Bowie, Md., will be returned to service this week, bringing service back to its full 20 MVA capacity.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. More information can be found online at www.dot.gov/ost/dapc/news.html.

Performance Management Update: The first issue of *Focus* newsletter, along with accompanying FAQs, is now available on the performance management Web site to provide the latest information on the company's performance management and pay-for-performance initiative. Log on to Intranet: "Employees" ► "Performance Management" ► "Tools and Resources."

Corporate Communications: On Thursday, Aug. 14, President and CEO Alex Kummant is scheduled to appear live on CNBC's "Street Signs," which airs from 2 p.m. to 3 p.m.

California Zephyr Schedule Reduced Via UP Partnership

Effective Monday, August 11, *California Zephyr* schedules will be shortened by as much as 45 minutes, one of the targets established in an agreement between Amtrak and Union Pacific Railroad. The trip-time reduction is part of a multiyear program to return the Overland Route between Salt Lake City and San Francisco to a state of good repair, ultimately allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add more than three hours to the *Zephyr's* schedule while UP performed track work as part of a commitment to improve on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule as planned. The Aug. 11 change is the third schedule reduction since the program began in June of last year.

"This is another milestone in our effort to improve service and OTP on the *Zephyr*," said Paul Vilter, assistant vice president, Strategic Partnerships. "UP is making good progress toward fulfilling its commitment to reduce slow orders on the route, which allows us to gradually restore the original schedule and bring greater reliability to the *Zephyr* schedule."

Eastbound Train 6 will now depart Emeryville, Calif., 45 minutes later and operate 45 minutes faster to Salt Lake City. The remaining schedule to Chicago will not change. Train 5, originating in Chicago, will operate according to the current schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and 10 minutes of the time added to Train 5 have been removed, while two hours and 20 minutes have been taken off the schedule of Train 6.

"We appreciate UP's efforts related to the *Zephyr* and, while we will continue to monitor the performance on Trains 5 and 6, we will turn our attention to removing slow orders on other Amtrak routes on the UP system," added Vilter.

Operational Update: From Thursday, Aug. 21 through Monday, Sept. 1, the *Empire Service* and *Maple Leaf* trains will make a special stop at the New York State Fairgrounds in Syracuse, N.Y. During this period, the trains will continue to make their regular stops at the Syracuse station.

Engineering: The Floor Slab Stabilization Project in the Baltimore and Potomac tunnels has recently been completed. Contractor and Engineering forces stabilized more than 1,000 linear feet of tunnel floor by injecting grout.

Human Resources: All Human Resources offices will be closed on Monday, Aug. 25 for an all-HR hands meeting in Baltimore. For emergencies, call the main HR telephone number at ATS 777-2216, which will be checked periodically during the day.

Benefits Reminder: The remaining Fidelity Investments enrollment sessions for the third quarter will be held in Seattle; Los Angeles; Baltimore; Washington, D.C.; Philadelphia; Albany/Rensselaer, N.Y.; Meridian, Miss.; New Orleans; New York City and Florence, S.C. Call 800-642-7131 or visit the reservations Web site at www.fidelity.com/atwork/reservations to make a reservation.

Record-Breaking Numbers Posted in July Offset by Energy Costs

Ridership and ticket revenue hit all-time highs during the month of July, with systemwide trips totaling 2.75 million for the month, generating \$168 million in ticket revenue, which marked increases of 14 and 19 percent over last July, respectively.

These single-month records can be attributed in part to high gas prices, highway congestion, airline issues and environmental awareness among consumers. Other contributors include heavy July 4 travel, along with successful advertising campaigns and National Train Day tie-ins.

However, according to Chief Financial Officer Bill Campbell, operating costs have jumped significantly as well, offsetting the gains in revenue. "These gains in ridership and ticket revenue enable us to absorb rising expenses, especially skyrocketing energy costs. Unfortunately, we're not making any gains — it's a wash."

Currently, the company uses roughly 67 million gallons of diesel fuel each year, in addition to electricity used to operate trains on the Northeast Corridor. Approximately 21 percent of total operating dollars are budgeted for energy.

From May 2007 to May 2008, the price of diesel fuel ballooned by 102 percent. As a result, energy costs for FY '08 are projected to increase by \$100,000 more than the increase in ticket revenue.

"We couldn't predict the remarkable growth in fuel costs," said Campbell. "But because we've done such a great job in boosting ridership and improving revenue management, we aren't drowning like other companies, and we can still provide the high level of service our passengers are used to."

Operational Update: Union Pacific track work resulting from last winter's mudslides will affect north-bound *Coast Starlight* during four periods, beginning Aug. 24 through Oct. 9. Passengers on Train 14 may experience delays of approximately two hours between Klamath Falls and Seattle.

Engineering: The Switch Exchange System, with the assistance of High Speed Surfacing Gang Y042 and Mid-Atlantic Division forces, will be completing the installation of the No. 54 switch in Shore Interlocking. This is the first of nine turnouts planned for replacement at Shore Interlocking in North Philadelphia.

Human Resources: Implementation of the new DOT rule requiring direct observation urine collection for those employees returning to duty following a previous positive reading or follow-up testing **only** has been delayed until Nov. 1. Other federal tests requiring direct observation will follow the procedures as outlined in the new policy.

Marketing and Product Management: Amtrak Mobile Service, which provides customers with access to Amtrak.com via any Web-accessing mobile device, now enables users to request information or provide feedback using a standard "Contact Us" form. It also allows them to check weather reports up to three days in advance of travel.

Retro Pay Coming for Eligible Union Employees

Eligible employees represented by the TCU, ASWC and ARASA (OBS) will receive their retroactive wage payments on Friday, Aug. 29. These employees — approximately one-third of Amtrak's unionized workforce — will also receive a customized summary statement that breaks down the calculation for the individual employee and a comprehensive list of Frequently Asked Questions. Additional questions may be directed at the toll-free number provided in the FAQs.

Message From President Kummant

Dear Co-workers,

While ridership is at an all-time high, we face a number of hurdles that temper that success. Rising expenses (particularly the cost of fuel), on-time performance off the Northeast Corridor, and the condition and size of our fleet are among them.

Last week, I was in Chicago with one of our stalwart supporters in Congress, Sen. Dick Durbin of Illinois, Amtrak board member Tom Carper and Illinois Department of Transportation Secretary Milt Sees to discuss equipment issues and on-time performance in the region. At the 14th St. Yards, Sen. Durbin held a press conference to announce legislation he introduced that would support financing options for the replacement and rehabilitation of our equipment. The Train CARS Act also aims to encourage the revival of the passenger car manufacturing industry in this country.

As you well know, our fleet is aging and, in some cases, there's only so much repairing our Mechanical crews can do. We also need to increase capacity to meet the growing demand for passenger rail.

That demand is leading to tremendous support from members of Congress, state legislators and mayors. In fact, later that day, Sen. Durbin and I were in Bloomington-Normal to meet with several mayors from across the state to discuss on-time performance, especially along the Chicago-St. Louis corridor.

I was talking to some of the employees at the yard about the difficult winter conditions they face there, and I wish I'd had more time there before we had to leave with Sen. Durbin for the meeting with mayors in Bloomington. I will be on the road again this fall, including PSSA ceremonies at nine locations across the system, and look forward to talking to more of you then.

Sincerely,

Alex Kummant
President and CEO

Sept. 2, 2008

Message From COO Crosbie on Hurricane Gustav

Dear Co-workers,

Hurricane Gustav made landfall on the Gulf Coast over the weekend and continues to impact inland communities, but well-orchestrated preparation and evacuation efforts helped safeguard the welfare of the area's residents, and I am very proud to say that Amtrak played a role in making that happen.

The safety of our employees in the area is of utmost importance. It appears that most of the more than 300 employees there left for safer ground. My thoughts are with them — most won't know the condition of their homes and communities until they can get back home — and the company wants to be as helpful as we can to them as they work through this process.

While we regroup and wait for authorization to return to the area, we want to ensure every Amtrak employee affected by this storm is safe and accounted for. Those employees should call to inform us of their whereabouts. Mechanical employees should call 800-424-0217 ext. 2082, APD employees should call 800-331-0008, and all other employees should call 877-872-2334 (employees may also call this number for answers to some general questions). Employees should also maintain contact with their supervisors to check on the status of work assignments.

I want to express my appreciation for all of the hard work and professionalism from the employees who played a part in preparing for Hurricane Gustav, and coordinating and executing three special evacuation trains that took over 2,000 New Orleans area residents safely from that city to Memphis on Saturday and Sunday.

This was a tremendous team effort. General Superintendent Joe Wall and his Southern Division team, including Assistant Superintendent Richard "Butch" Williams, who was the point person for the evacuation operation, did a phenomenal job. Employees from Mechanical, Engineering and Operations, the Central Division, as well as the Go Teams, Mobile Security Teams and Amtrak Police, were also critical to our success. From coordination with FRA and FEMA, to the operation of the trains and the work of our front line employees — and in the face of medical emergencies and fallen trees — you performed exceptionally well.

Amtrak took action as a national transportation asset to assist in the evacuation of the city, and you did us proud. While it is uncertain when we can resume regular service to New Orleans, we are currently working with FEMA to determine when we will transport people back to New Orleans later this week.

Thank you for your dedication, and please keep our employees affected by the storm in your thoughts; it is my hope that they recover from this event safely and quickly. Remember that the hurricane season isn't over yet; Gustav is still active, and we're closely watching Hurricane Hanna and Tropical Storms Ike and Josephine.

Sincerely,

William Crosbie
Chief Operating Officer

Operational Update: On Tuesday, Sept. 2 through Thursday, Sept. 4, and Sunday, Sept. 7 through Wednesday, Sept. 10, *Piedmont* Trains 73 and 74 will operate between Raleigh and Salisbury, N.C., only, due to Norfolk Southern track work. Motorcoach service will be provided between Salisbury, Kannapolis and Charlotte.

Human Resources: Implementation of the new DOT rule requiring all employees to submit to direct observation urine collection for return-to-duty from previous positive tests or follow-up testing **only** has been delayed until Nov. 1. Other federal tests requiring direct observation will follow the procedures as outlined in the current DOT regulation.

Environmental Health and Safety: A five-week EHS and Engineering noise monitoring initiative is underway at various Mid-Atlantic and New England locations. This week's monitoring will occur in New York, Elmora, N.J., and Morrisville, Pa.

Reminder: Don't forget to complete the voluntary and confidential Employee Satisfaction Survey being mailed to your home this week and next. The results of the survey will enable the company to better address issues affecting employees and improve customer service. The deadline to return the completed survey is Oct. 10.

Operational Update on Recent Tropical Storms

While attention is turning back to the Gulf Coast as Amtrak monitors the progress of Hurricane Ike, other areas of the country affected by Tropical Storm Hanna and Hurricane Gustav have begun to return to normal.

After assisting FEMA in the evacuation of New Orleans area residents prior to Hurricane Gustav, Amtrak transported approximately 2,000 evacuees from Memphis back home on two trains last Thursday and Friday. Full revenue service will resume as *City of New Orleans* Trains 59 and 58 return to service today and tomorrow.

Last week, numerous trains were either canceled or limited to partial service due to Tropical Storm Hanna's effect along the East Coast. Despite fallen trees and flooding, all regular service has been resumed.

"The planning and safe execution of train operations for these storms has been absolutely first-class," said Chief Operating Officer William Crosbie. "So many employees have gone out of their way to protect our passengers, our co-workers and our business. We should all be proud of the excellent work, but we also need to remain focused as yet another hurricane is impending."

Operational Update: The temporary service change for the Springfield Shuttle has been extended through Friday, Sept. 26. Trains 470, 490, 493 and 495 will not operate between Hartford, Conn., and Springfield, Mass., due to Amtrak track work; motor-coach service will be provided between Springfield, Windsor Locks, Conn., and Hartford.

Engineering: The New England Division Concrete Tie Gang is continuing its efforts to eliminate slow orders resulting from defective concrete ties on the Shore Line between East Haven, Conn., and Guilford, Conn.

Environmental Health and Safety: A five-week EHS and Engineering noise monitoring initiative is underway at various Mid-Atlantic and New England locations. This week's monitoring will occur in Princeton Junction, N.J.; Elmora, N.J.; Newark, N.J. and at Penn Station in New York.

Corporate Communications: Check out Good Morning America next week! Beginning Monday, Sept. 15 through Thursday, Sept. 18, ABC News' Good Morning America will be broadcasting live from a chartered Amtrak train that will tour the Northeast and terminate in Washington, D.C.

Centennial Celebration Set for October 4-5 in Washington, D.C.

Employees invited to attend, volunteers needed

Employees and their families are invited to the Washington Union Station Centennial Celebration that takes place on Oct. 4, from 10 a.m. to 4 p.m., and Oct. 5, from noon to 4 p.m. The event includes entertainment, railroad memorabilia exhibits and an expansive train display featuring current Amtrak equipment as well as historic locomotives and private cars representing the railroads that have served the station during its 100-year history. The celebration also marks the 20-year anniversary of the station's historic redevelopment. Stay tuned for upcoming information on perks for employees, including special offers on souvenir items.

Help us tell the story — if you have any special memories or photos from Union Station, share them with us. Send them to Employee Communications at ecom@amtrak.com.

Any employee who will be in the area that weekend and would like to volunteer for the event should contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com. Volunteers will be provided a meal and free t-shirt.

Message from President Kummant

Dear Co-workers:

Over the course of the next week, you will receive an Employee Satisfaction Survey in the mail. I cannot stress enough how important it is for you to take a few minutes to complete and return the survey by Oct. 10, answering the questions as sincerely as possible. This is an opportunity for you to tell us your thoughts on what works and what can be made better.

All responses will be mailed directly to a third party and will be kept strictly confidential, and the anonymous, tabulated responses will be sent back to us. Our workforce is our most valuable resource; by participating in the survey you will make your voice heard as we shape the future of the company.

Sincerely,

Alex Kummant
President and Chief Executive Officer

Operational Update: As Texas braces for the arrival of Hurricane Ike in the Corpus Christi area on Saturday, several services are affected.

Sunset Limited Train 1 (11), scheduled to depart New Orleans today, has been canceled between New Orleans, La., and El Paso. Train 2 (12) is canceled between El Paso and New Orleans. Trains 421 (11) and 422 (12) are canceled in both directions between Fort Worth and El Paso.

Texas Eagle Train 21 (11) is canceled between Fort Worth and San Antonio. Train 21 (12) and Train 22 (13) are canceled between St. Louis and San Antonio. *Crescent* Trains 19 (11-13) and 20 (12-14) will not operate between Meridian, Miss., and New Orleans.

No alternate transportation will be provided for any service.

Don't Miss Good Morning America Next Week!

Amtrak, ABC Make History Next Week

Make sure you catch ABC News' Good Morning America next week, as it broadcasts live from an Amtrak charter train, the centerpiece of a five-day Whistle-Stop Tour that will travel across the Northeast and Ohio. Amtrak and ABC will be making history, as this is the first time anything of its kind has been done on live television.

Kicking off the five-day tour, anchors Diane Sawyer, Robin Roberts, Chris Cuomo, Sam Champion and the ABC crew will air the first show Monday while traveling through Massachusetts aboard specially equipped Amtrak equipment and two private rail cars. Powered by two P-42 locomotives, the train will travel through Massachusetts Monday; New York on Tuesday; Ohio, Pennsylvania, Maryland on Wednesday; and West Virginia on Thursday. The tour concludes on Thursday in Washington, D.C.

The 11-car, 874-foot-long traveling studio, operated with Amtrak Train and Engine crews with host railroad pilots and staffed by On-Board Service employees, includes two Superliner Sleeping cars, a Cross Country Café car, two Diner Lounge cars and a Transition Dorm, plus two private cars. The equipment conversion, paid for by GMA, was performed at Beech Grove and at the Albany Maintenance Facility.

"The GMA charter provides us an opportunity to show millions of Americans the benefits of train travel and our capacity to serve travelers from large and small communities across the country," stated Corporate Communications Chief Cliff Black. Spearheaded by the Charter Services group, the tour involves the collaboration of several departments including Transportation, Mechanical, Engineering and Amtrak Police Department, along with the cooperation of Norfolk Southern, CSX Transportation and Housatonic Railroad.

For more detailed information about the Whistle-Stop Tour, including a behind-the-scenes look at the months of preparation put into the project, visit www.abcnews.go.com/gma.

Amtrak This Week is being distributed early to remind employees of GMA's broadcasts from an Amtrak train.

Note: An enthusiastic and heartfelt thank you to everyone who played a role in making the Good Morning America Whistle-Stop Tour train a success last week, including employees in the Transportation, Mechanical, Engineering and Amtrak Police departments.

Operational Changes: For the duration of the equipment upgrade, the Washington-New York *Acela Express* Train 2108 is now Train 2160 and extended to Boston. Train 2162 is now Train 2110 and terminates in New York.

Engineering: Production C&S and Mid-Atlantic division Engineering forces will complete the cutover this week of the new signal system on Track 1 of the Harrisburg Line between Rheems and Cork to allow bi-directional traffic under signal indication at timetable speed. This will greatly improve flexibility on the route for train operations and maintenance activities.

Human Resources: Beginning in October, all desktop users (except SAP users) will be required to create a new password and submit challenge questions and answers in the event of lost or forgotten passwords. This allows employees to reset their password without calling the Help Desk. For instructions, log onto <https://iam.amtrak.ad.nrpc/idm/docs/IAM-Job-Aid.pdf>.

WUS Centennial Celebration: Amtrak is hosting the Washington Union Station Centennial Celebration on Saturday and Sunday, Oct. 4 and Oct. 5, displaying memorabilia, souvenirs and current and historic train equipment. To volunteer and receive a free souvenir t-shirt and meal voucher, contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com.

Frequently Asked Questions About the Employee Satisfaction Survey

The Employee Satisfaction surveys recently mailed to all active employees' homes is an opportunity for employees to provide input on what works and what can be made better. It's completely anonymous; please take the time to complete it and return it by Oct. 10.

What's the purpose of the survey?

While it's not the only way for Amtrak to learn from its employees, the survey is an opportunity for you to sincerely share how you feel about the company, your job, the service we provide and many other facets of your perspective on Amtrak. The survey is an important tool for Amtrak to gauge current performance as an employer and a service provider, and for making improvements in both areas.

Why should I take the time to complete it?

You have a stake in Amtrak, and in the long run, you benefit by making your opinions known. Whether you're on the front lines or in the back offices, you offer a unique perspective on improvements we can make, and we want to know what they are.

Will I hear about the results of the survey, and if so when?

The findings will be tabulated and delivered to Amtrak around the end of the calendar year, and will help the company identify areas for improvement or development. You should expect to hear about the survey results (look for information in *Amtrak Ink* and *Amtrak This Week*) after the new year.

Is the survey confidential?

Yes. The survey is completely confidential and managed by an outside firm. All employees, including those in small departments, are assured that the firm will protect all information or findings that can identify anyone personally.

In fact, we purposely ask that no one volunteer his or her name on the survey. Amtrak wants your honest opinions and recognizes that we need to protect your anonymity in order to obtain them.

I didn't get the survey in the mail. Who do I call to get it mailed to me?

If you did not receive the survey at home, please e-mail ecom@amtrak.com or call (202) 906-3770 to request that one be sent to you. Please remember to include your name and mailing address.

Reminder: Don't forget to complete and return your responses to the Employee Satisfaction Survey by Oct. 10. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com as soon as possible if you have not received the survey.

Operational Changes: Through Oct. 26, *Empire Service* trains 280, 281, 284, 286 and 288 will operate on an adjusted schedule due to track work being performed by Amtrak between Albany-Rensselaer and Buffalo, N.Y.

Engineering: The Switch and Rail Gang will be installing the No. 87 switch on the Hudson Pocket Track Project in Newark, N.J. The new turnout will connect Hudson Yard Tracks 10 and 11 and help restore the yard's operational flexibility.

WUS Centennial Celebration: The Washington Union Station centennial celebration takes place on Saturday, Oct. 4, from 10 a.m. to 4 p.m., and Sunday, Oct. 5, from noon until 4 p.m. Contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com to volunteer.

Vote, But No Politicking on the Job

With the Nov. 4 election approaching, Amtrak employees are encouraged to exercise their right to vote. However, while on the job employees are not advertisements for candidates, propositions or other political issues.

The wearing of political buttons, stickers or other signs of political support or opposition is not allowed. This prohibition also applies to equipment, company vehicles and other company-owned property. It does not apply to your personal vehicle. Thank you for complying, and be sure to exercise your right to vote.

Congress Passes Continuing Resolution for FY '09

House, Senate Action Taken on Amtrak Reauthorization

With the Senate vote on Saturday, Congress approved a continuing resolution that will provide Amtrak funding for FY '09 through March 6, 2009, at the FY '08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

Last week, the House also passed H. R. 2095, a combination of a rail safety bill and Amtrak reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan.

The Senate earlier today approved a procedural measure to clear the way to take up the legislation on Wednesday.

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for positive train control on certain rail main lines used by passenger and freight trains.

Combining the reauthorization legislation with the rail safety bill provided the impetus to finish the reauthorization bill before the end of Congress' session. Given the many items on the legislative agenda and the current financial crisis, having Congress take up Amtrak's reauthorizations as one of its last actions speaks well of the support for passenger rail on Capitol Hill.

October 6, 2008

Collaborative Effort Contributes to Best *Acela Express* OTP

Acela Express trains operated at 92.8 percent on-time performance for the month of September, making it the best OTP month in more than two years and the best month operating under a 16-train plan. The best OTP month ever for the *Acela* was March 2006, when the train ran on time 93.2 percent using 14 of 20 trainsets.

A number of factors are involved in this strong performance including improved crew performance, targeted schedule adjustments, and reductions in infrastructure challenges. The nearly 93 percent OTP for September 2008 contributed to Amtrak's increased air-rail market share along the Northeast Corridor. On the south end of the NEC, the company's air-rail market share increased to 63 percent; 49 percent on the north end.

Final Reminder: The deadline for completing and returning your responses to the Employee Satisfaction Survey is this **Friday, Oct. 10**. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com, and include your home mailing address, as soon as possible if you have not received a survey.

Operational Changes: Due to Union Pacific track work, *Coast Starlight* Train 14 will depart Klamath Falls at 10:25 a.m., two hours later than the published scheduled, but will still operate between Los Angeles, Klamath Falls and intermediate stations. Northbound passengers may experience two-hour delays.

Engineering: On Friday, Oct. 10, the Production Switch Exchange System and Mid-Atlantic Division Engineering will begin the installation of the 32B switch at Shore Interlocking in Philadelphia. The track will be back in service Monday morning.

Benefits: Given the recent news about the economy, employees should direct any questions about their Fidelity 401(k) Retirement Savings Plan to the Fidelity Retirement Services Center at 877-477-AMTK. Representatives are available Monday through Friday, 8 a.m. to midnight EDT.

Health Services: As the influenza season quickly approaches, the Centers for Disease Control and Prevention recommends an annual flu vaccine as the first and most important step in protecting against this serious illness.

Thank You, Centennial Volunteers

Thank you to the many volunteers who donated their time this past weekend to make the Washington Union Station Centennial Celebration a success. From the expansive array of historical locomotives, private cars and current Amtrak equipment to the model rail displays and exhibits, the celebration had something for everyone. The celebration's organizers and volunteers were the backbone of this once-in-a-lifetime event.

Designed by architect Daniel Burnham, Washington Union Station is considered the gateway to the nation's capital. More than 32 million people visit the station each year. The celebration also marked the twentieth anniversary of its renovation and its becoming Amtrak's headquarters.

October 13, 2008

EIM Phase 2 Supports Broad Enterprise Systems Initiative

Amtrak is in the second stage of a five-year Employee Information Management (EIM) program designed to improve employees' access to information from the SAP system via a user-friendly Web browser — referred to as the Employee Information Portal, or EIP. Once this phase is completed, non-agreement-covered managers and employees, and salaried agreement-covered employees will be able to easily check leave balances, view HR data and electronically submit and/or approve leave requests.

“EIM Phase 2 promotes ease of use and a movement toward self-service,” according to Michael Duncan, senior director, Compensation/Benefits and HR Technology.

Identity and access management, another program element, was recently used to match Windows and SAP usernames and passwords for easier access to SAP.

Additionally, the compensation management function will roll out to all managers with non-agreement-covered direct reports on Nov. 12. Mandatory training will begin tomorrow and continue through Friday, Nov. 7, and cover how to enter and approve merit increase recommendations in SAP. The October issue of *SAP Spotlight*, issued via e-mail on Oct. 7, details classroom training locations and dates for online training. Non-agreement managers should have received an e-mail with instructions on how to enroll in the training. For those who have not, contact SAPsupport@amtrak.com as soon as possible.

In early 2009, all salaried, non-agreement users can begin entering leave requests and approvals through EIP.

EIM Phase 2 supports a comprehensive enterprise systems initiative known as Strategic Asset Management (SAM), which will integrate the business practices of Finance, Procurement, Mechanical, Engineering and Transportation. Using SAP and another tool called Maximo, SAM is expected to enhance company productivity by improving the work flow, establishing better processes, and providing consistent information across the company.

Record Ridership Again: Ridership in FY '08 reached nearly 30 million passengers and generated \$1.7 billion in revenue, marking the sixth straight year of ridership and ticket revenue increases.

Operational Changes: On Saturday and Sunday, Oct. 18, 19, 25 and 26, track work being performed by Metro-North Railroad will affect service and schedules along the *Empire Service*, *Ethan Allen*, *Maple Leaf*, *Adirondack* and *Lake Shore Limited* routes.

Marketing and Product Management: A pilot program is currently underway on the *Downeaster* in which conductors are using handheld computers to scan ticket barcodes to electronically record ridership data in real time. This first-of-its-kind pilot is the initial step toward print-at-home tickets for *Downeaster* passengers, beginning next spring.

Engineering: On Saturday, Oct. 18, Bridge Rehab Gang R-901 will employ 16 100-ton hydraulic jacks to lift the four bottom pins to position stabilizing yokes in the center of span No. 4 on the Susquehanna River Bridge as part of the Pin Stabilization Project. Thirteen additional spans will undergo this procedure over the next two years.

PSSA Update: The first of nine regional President's Service and Safety Awards luncheons takes place in Chicago on Wednesday, Oct. 15, followed by another recognition luncheon in Beech Grove, Ind., the next day. Across the country, 84 employees and six external partners will be honored with PSSA awards.

TV Programming Note: On Wednesday, Oct. 15 at 8:30 p.m. EDT, “WETA All Access,” a Washington, D.C.-based public television program, will air a behind-the-scenes look at Washington Union Station, exploring its role as the area's main rail transportation hub and as a tourist destination. The show will also be posted on www.weta.org.

October 20, 2008

Amtrak Signs Warehouse Management Contract

Amtrak today announced that it has selected ARAMARK Corp. to serve as the company's food and beverage warehouse management provider effective Jan. 1, 2009, following a six-month evaluation of bids from vendors. With the expiration of its contract with Gate Gourmet Inc. at the end of this calendar year, Amtrak explored the marketplace in search of best-in-class systems and industry best practices.

"ARAMARK is best equipped to provide the type of service that meets our future needs, as we strive to become more cost-efficient while continuously improving the quality of our service," said Emmett Fremaux, vice president, Marketing and Product Management.

With the contract finalized, a transition steering committee will plan and implement steps to ensure a smooth transfer of operations from the current service provider. The transition process is expected to have little or no impact on routine warehouse activities or passengers.

"We look forward to a smooth transition over the course of the remainder of the calendar year," said Kevin Scott, chief, Service Delivery. "Our objective is to work with all stakeholders to make sure that happens."

ARAMARK Corp. is a leader in professional services, providing award-winning food services, facilities management, and uniform and career apparel to health care institutions, universities and school districts, stadiums and arenas, and businesses around the world.

In April, Amtrak invited potential vendors to submit proposals. As part of the process, a Technical Evaluation Committee was appointed with representatives from the Food and Beverage, Service Delivery and On-Board Systems groups of the Marketing and Product Management department, as well as representatives from the Transportation, Legal, Finance and Procurement departments.

In related news, the company is in the final stages of selecting a vendor to develop a new on-board point-of-sale system to capture food and beverage sales. Once the vendor is selected, Amtrak and the vendor will begin development, which will culminate in a pilot program and a 2010 rollout.

Government Affairs: On Thursday, Oct. 16, President Bush signed into law H.R. 2095, a combined rail safety and Amtrak reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for capital investment in intercity passenger rail programs.

Operational Changes: Beginning Saturday, Oct. 18 through Saturday, Oct. 25, several *Keystone Service* trains will operate on a slightly later schedule due to track work being performed by Amtrak.

Engineering: The final phase of the 138-kilovolt transmission cable replacement project in the Baltimore & Potomac tunnels, which began in August, is continuing on schedule. The new dry, high-voltage power cable system minimizes Amtrak's environmental impact in the Baltimore tunnels.

PSSA Update: President's Service and Safety Awards luncheons take place in Providence, R.I. on Tuesday, Oct. 21 and Friday, Oct. 24 in Washington, D.C. The two events will recognize a combined total of 29 PSSA winners and 67 30- and 35-year employees. Last week's events in Chicago and Beech Grove honored seven PSSA winners and 150 30- and 35-year employees.

Corporate Communications: 2009 wall calendars are now available at <http://amtrak.ai-estore.com> or by calling 800-369-4257. Mail orders to Staples Promotional Products; ATTN: Amtrak Customer Service Representative; 1520 Albany Place, S.E.; Orange City, Iowa 51041.

October 27, 2008

New Initiative Simplifies Travel Voucher Issuance

Slated to go live on Nov. 15, a new travel voucher request (TVR) process will provide automated accountability and reporting capabilities and make it easier than ever for employees to submit requests for travel vouchers. Travel vouchers are typically used by employees without active rail card privileges, vendors and contractors and service award travelers. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Currently, managers, directors and supervisors send a faxed request to the travel office within the Human Resources department for review and processing.

“What was once a laborious, manual process now takes less than five minutes,” said Mike Jones, senior systems analyst, who led the development of this initiative. “And, because we leverage the use of the existing eTrax tool, there are no added costs associated with automating the TVR process.”

After logging on to the eTrax home page, users will be directed to a list of commonly used forms, which will include the travel voucher request form.

Station and administrative training aids can be found on the Intranet. For more information, contact Jones at ATS 777-3127 or JonesMi@amtrak.com.

New Timetable Goes Into Effect Today

The new Fall 2008-Winter 2009 System Timetable that goes into effect today includes minor schedule changes across the system. Notable modifications include the restoration of through coach and lounge service on the *Lake Shore Limited* between Boston and Chicago that will soon include through sleeper service. Faster *Pacific Surfliner* weekend service is now available between Los Angeles and San Luis Obispo, while an additional *Northeast Regional* trip between Washington, D.C., and New York is offered on Thursday afternoons.

Station managers are reminded to remove and destroy all copies of outdated timetables. The Northeast Corridor Thanksgiving edition will be distributed shortly, which will supersede the Fall-Winter version from Nov. 25 to Dec. 1.

Government Affairs: On Oct. 29, Chief Operating Officer Bill Crosbie will testify at a House Transportation and Infrastructure Subcommittee hearing on “Investing in Infrastructure: The Road to Recovery.”

Operational Changes: Beginning Monday, Oct. 27 through Thursday, Dec. 4, westbound *Pere Marquette* Train 371 will depart Grand Rapids, Mich., one hour earlier than scheduled, and will arrive and depart subsequent station stops one hour earlier due to CSX track work.

Engineering: Production’s Switch and Rail Gang is currently installing 3,330 track-feet of panelized concrete ties and rail on Track No. 4 at Metro Park Station. Once the 60-foot track panels are in place, continuous welded rail will be installed. The work is scheduled for completion in mid-November.

PSSA Update: President’s Service and Safety Awards luncheons take place in Philadelphia on Tuesday, Oct. 28 and Wednesday, Oct. 29 in New York. The two events will recognize a combined total of 23 PSSA winners and 151 30- and 35-year employees.

Retirement: In light of a recent fake (phishing) e-mail possibly received by Fidelity clients, including Amtrak personnel, employees are advised to view with suspicion any e-mail asking for account information.

Health Benefits: The 2009 open enrollment period ends Nov. 14. Employees may enroll via www.amtrakbenefits.com or by calling the Amtrak Benefits Service Center at 800-481-4887.

Health Services: Per a U.S. Department of Transportation directive, effective Nov. 1, direct observation of urine specimen collections is **required** for all federal return-to-duty and follow-up drug testing.

November 3, 2008

New Diversity Training Plan to Roll Out

As part of its ongoing commitment to promoting a workplace free of discrimination and harassment, the 2009 diversity training season launches this week with a new focus on how effective diversity initiatives impact the bottom line.

“As Amtrak continues to evolve in response to changes in today’s more diverse market, it’s important to ensure our workforce has a good understanding of diversity — beyond compliance — and how it impacts every facet of our business,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

To that end, the department is implementing a new round of diversity training, including an updated class format and curriculum to ensure alignment with the company’s strategic direction. Technical modifications were also made to the online refresher course to address several functional issues.

The mandatory diversity training requirement remains in effect for all non-agreement employees. Departmental diversity training representatives will assist in identifying those employees required to undergo training, notifying employees of class schedules and registering employees in the training classes.

Classroom: All new non-agreement employees as well as those who have not yet taken diversity training are required to complete training in FY ’09. A schedule of classes and a list of FAQs are posted on the Intranet at <http://wiki.intranet.nrpc/display/Diversity/Diversity+Training>.

Online: All non-agreement employees who have completed training and are due for a refresher (as required every three years) must complete the online course. The online diversity refresher can also be found at <http://wiki.intranet.nrpc/display/Diversity/Online+Diversity+Refresher+Course>.

Training for agreement-covered employees remains a part of their existing training channels, such as Block Training.

Operational Changes: Beginning Nov. 3 through Nov. 24, all *Empire Service* trains operating between Albany-Rensselaer and Niagara Falls, N.Y., (except Train 285) will operate on an adjusted schedule due to track work being performed by CSX Transportation.

Pay-for-Performance: If you have not completed the mandatory compensation management training required for all managers with non-agreement reports, which concludes on Friday, Nov. 7., send an e-mail to carterva@amtrak.com.

Engineering: Production’s Switch and Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, is reconstructing the North Leg of the Perryville Wye. By the Thanksgiving holiday, the gang will lay 1,200 track-feet of panelized wood ties and rail and install continuous welded rail.

Health Services: The U.S. Court of Appeals has delayed the DOT mandate on direct observation of urine specimen collections for federal return-to-work and follow-up drug testing, which was slated to go into effect on Saturday, Nov. 1.

November 10, 2008

Economic Downturn Evident in October Ridership as Growth Slows

After a particularly strong FY '08, the sixth consecutive year of rising ridership and revenue, results from the first month of FY '09 indicate a deceleration in growth thanks to a wide variety of economic factors. While systemwide ridership for the month is up 4 percent over last October and revenue is up 5 percent, both amounts are slightly under budget.

The totals for October were tempered by Northeast Corridor performance, where *Acela Express* and *Northeast Regional* trains combined for roughly 60 percent of the company's overall ticket revenue. Lower gas prices, higher unemployment and the current economic crisis affected NEC travel, especially on *Acela Express*. October ridership for *Acela* and *Northeast Regional* service was down 6 percent and 4.5 percent from last year, respectively. The result was a combined budget shortfall of \$7.8 million for those services.

"The downturn in the economy is causing a large decline in business travel, as evidenced by our performance on the NEC. But these same factors are hurting the airlines even more, allowing us to gain market share," explained Vice President, Marketing and Product Management Emmett Fremaux.

The good news, according to George Raed, chief, Market Research and Analysis, is that overall numbers are buoyed by stronger-than-expected performance on long-distance routes and other corridor services despite these negative factors. In total, long-distance ridership climbed 15 percent and generated 22 percent more revenue than last year. State-supported and other short-distance corridor service ridership and revenue grew by 10 percent and 12 percent, respectively. These numbers reflect improved on-time performance and service quality.

As airlines continue to reduce capacity and increase fares, more travelers are expected to turn to rail service.

"People still have travel needs, and while the overall market may have shrunk for the time being, we have an opportunity to capture long-term passengers who are trying passenger rail — and experiencing its benefits — for the first time," said Fremaux.

Operational Changes: On Nov. 8, 10, 12 and 14, *Coast Starlight* Trains 11 and 14 will operate on an alternate route and will **not** stop at stations between Los Angeles and Sacramento due to Union Pacific track work. Alternate train or thruway motorcoach service is available at most stations affected by the detour.

Engineering: The Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will install the No. 27 switch in Rea Interlocking in Newark, N.J., during a 55-hour weekend outage starting on Friday, Nov. 14.

Benefits: Later this week, employees will receive a letter explaining the transition from SHPS to WageWorks as the company's flexible spending accounts administrator. Also note that the annual open enrollment period for benefits ends this Friday, Nov. 14.

Human Resources/Station Support: The new electronic travel voucher request process is slated to go live on Sat., Nov. 15. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Marketing and Product Management: The Radio City Christmas Spectacular® is now offering employees \$54 orchestra and first mezzanine seats — an \$18 discount — at select non-peak performances through Friday, Dec. 12. Log on to www.radiocitychristmas.com and enter the "AMTRAK" code to receive the discount.

Congratulations to *Downeaster* Conductor Mike Shaw on his election to the Maine House of Representatives, one of a number of employees across the country who engage in public service.

November 17, 2008

Company Prepares for Holiday Ridership Demand

With Thanksgiving quickly approaching — and bringing with it an anticipated surge in ridership — operating departments are putting the final touches on plans to orchestrate a complex logistical challenge. An estimated 700,000 passengers, nearly 40 percent of whom will be on the Northeast Corridor, are expected to take to the rails next week. In addition, station employees, on-board crews and many others are ready to handle the high volume.

“We’re essentially bringing structure to chaos,” said Bruce Van Sant, director, System Operations. “It’s a challenge to handle such high numbers of people on trains and in stations, but we’ve found a way to do it well.”

Two services that do not usually require reservations — *Keystone Service* from Philadelphia to Harrisburg and *Pacific Surfliners* — will require reservations from Nov. 25 to Dec. 1 to prevent overcrowding.

This year, the schedule includes significantly expanded *Acela Express* and *Northeast Regional* service, including added coaches on *Northeast Regional* trains. In the Pacific Northwest, passengers will benefit from 10 extra Amtrak *Cascades* trains.

“On the peak holiday travel days, we pack a lot more into the schedule. This takes a lot of coordination and cooperation from host railroads and commuter lines to make room for our trains. We couldn’t do it without their help,” said Van Sant.

Peak days are the Wednesday, Thursday morning and Sunday of the holiday week. Saturday travel is also becoming more popular as passengers choose to return home sooner. For complete details on Northeast Corridor service, refer to the special Thanksgiving Holiday Timetable.

Employees are reminded that they still have flash-pass privileges according to the normal policy, which does not guarantee a seat, and employees are required to give their seats to revenue passengers when standee conditions occur. As always, please work safely, remain vigilant and report any suspicious activity to Amtrak Police by calling 800-331-0008 or by dialing 911.

Operational Changes: On Mondays through Fridays of each week Nov. 17-21 and Dec. 2-19, *Springfield Shuttle* Trains 470, 490, 493 and 495 will be canceled between New Haven and Hartford, Conn., due to track work. Motorcoach service will be provided.

Pay-for-Performance: Beginning Wednesday, Nov. 19, non-agreement managers who have non-agreement direct reports can access the SAP Compensation Management System to begin entering merit increase recommendations. An e-mail with additional details will be sent to all managers tomorrow.

Benefits: The 2009 open enrollment period concluded Friday, November 14, 2008. If you have any questions about your 2009 benefits, contact the Amtrak Benefits Service Center at 800-481-4887.

Don't Forget to Log 2008 Leave!

All non-agreement employees, ARASA (OBS) supervisors and crew representatives are required to record leave into mySAP/CATS. Leave should be entered as taken. If you have not done so, enter all leave taken to date in 2008 immediately.

Instructions for entering leave can be found at <http://wiki.intranet.nrpc/display/STS/Home>. For more information on how to manage your absences, understand your vacation accrual rates, and generate real-time leave reports, log onto <http://intranet.nrpc/employees/mlt.htm>. To review the vacation policy, refer to HR policy 7.35.3.

November 24, 2008

Auto Train Returned to Service

After a four-day service cancellation due to cracks in auto carrier underframes, the *Auto Train* resumed operation on Saturday with its daily roundtrip between Lorton, Va., and Sanford, Fla.

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of the fleet, which revealed similar cracks. Although no incidents had occurred as a result of these cracks, company officials immediately canceled *Auto Train* service as a precautionary measure until repairs could be made.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at *Auto Train* terminals in Virginia and Florida. These teams worked around-the-clock in 12-hour shifts to weld steel plates to the affected area of the car frame so service could resume as soon as possible.

“We suspended service as a precaution; there is no wavering in our commitment to the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “From the *Auto Train* crew on Tuesday, to other passenger services and call center employees, to the welders who helped fix the equipment, I thank everyone who had a role in handling the situation and restoring service.”

After the decision to cancel the train on Tuesday, Customer Service teams called passengers booked for travel later in the week to inform them of the service cancellations and offer refunds.

The *Auto Train* fleet includes 80 of the two-year-old auto carriers, which have logged approximately 500,000 miles each.

Security: This week security and police patrols will increase throughout the system, including K-9 detection teams. Call APD at 800-331-0008 or dial 911 to report suspicious activity.

Operational Changes: All NEC, *Keystone Service* and *Pacific Surfliner* trains will require reservations from Nov. 25 to Dec. 1. For employees, flash-pass privileges still apply, but pass riders must give up their seat to revenue passengers when standee conditions occur.

Corporate Communications: On Tuesday, Nov. 25 at 10 p.m., as part of its eight-part “Extreme Trains” series, the History Channel is airing a profile on the *Acela Express*. On Dec. 16, the program is highlighting the *Empire Builder*.

Reminder: As part of the Identity and Access Management process, which synchronized SAP and Windows passwords, employees are reminded to submit three challenge questions that can be used to reset the password. Call the Amtrak Help Desk at 800-772-HELP for more information.

Did You Know? Last Monday, Nov. 17, system-wide on-time performance was 88.4 percent, the sixth highest in the last five years, and the best regular weekday operations during the same period.

December 1, 2008

Thanksgiving 2008 Marks Second Highest Holiday Travel Period on Record

Operational Changes: Due to Union Pacific track work, *Lincoln Service Train 303* will be canceled Tuesday, Dec. 2 through Thursday, Dec. 4. Alternate transportation will not be provided; service to most destinations between Chicago and St. Louis is available on other Amtrak trains.

Engineering: From 10 p.m. to 6 a.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department will work on the west slope under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. The project is slated for completion this summer.

Gift Policy Reminder: The Ethical Conduct and Conflict of Interest policy (posted on the Intranet under “Policies”) precludes accepting any gifts valued at more than \$50, and no employee may solicit a gift of any value. Procurement department employees are precluded from accepting any gifts except for “business courtesies” that exceed \$10 in value.

Amtrak’s busiest week of the year wraps up today, and while official ridership and revenue numbers are not yet available, preliminary results indicate another strong Thanksgiving travel season, especially considering current economic conditions and low gas prices.

Overall system ridership dipped 2 percent compared to last year with an estimated 655,000 trips, yet ticket revenue rose by 2 percent to approximately \$43.9 million, due to higher fares and revenue management tactics. The period from Nov. 25 to Dec. 1 ranks as the company’s second highest holiday ridership on record, just behind last year’s Thanksgiving week.

“Considering that overall holiday travel was down appreciably this year, our numbers reflect the growing appeal of passenger rail,” said Emmett Fremaux, vice president of marketing and product management.

Once again, Transportation, Engineering and Mechanical departments collaborated to meet demand across the system by expanding service. Dozens of additional departures and schedule changes took place, while multiple consists included extra cars to maximize availability at peak travel times.

“Our normal operations are incredibly complex, but to ramp up service the way we do at Thanksgiving is truly impressive,” said Bill Crosbie, chief operating officer. “I’d like to thank every employee — and those who volunteered extra time — for working so hard to keep our passengers safe and pleased with their Amtrak experience during the holiday week.”

December 8, 2008

Message from Joe Boardman

Dear Co-workers,

When I started my new position here barely two weeks ago, I hit the ground running, in large part because I've come to know Amtrak pretty well over the years.

On my first day on the job, I took some time to meet employees in Washington Union station. My second day, which happened to be Thanksgiving, I visited the crew base and thanked employees for spending their holiday helping others safely reach their destinations. Last week, I had the opportunity to meet with the leaders of a number of our unions.

A couple things you should know about me: I'm a former member of IBEW and Teamsters. I am a straight shooter, so you'll know where I stand on things. I listen closely and rely on the strengths of well-qualified people to give me their recommendations. I strongly believe that collaboration is a necessity in our business, and I don't have much time for those who stand in its way.

For those who may make incorrect assumptions about my past affiliations, let me be very clear: I am here because I believe in Amtrak. Splitting off the Northeast Corridor or separating the NEC infrastructure from operations are absolutely not in my plans. I not only want to preserve our coast-to-coast, interconnected system but also want to see it prosper.

With your help, we will become a greener, safer and healthier Amtrak. I plan to build on the many opportunities we have to show how critical passenger rail is to the economy and mobility of America, and I will be sharing with you exactly what that means in the coming weeks and months.

If you're thinking that you've heard all this before and you've seen CEOs come and go, that may be. However, as you get to know me (and you will), you'll see that I am personally committed to the success of this railroad. We have some of the best men and women in the field, and I hope you'll join me on the journey.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Operational Changes: Due to track work taking place on the Connecticut River Bridge over the next two weekends, service between New York and Boston is canceled on *Northeast Regional* Train 67 on Dec. 13 and 20, and Train 66 on Dec. 14 and 21.

Operation Lifesaver: If you are an Operations Lifesaver presenter, contact OL Officer Alvin Richardson (ATS 777-3434 or richara@amtrak.com) to make sure you are included in the national presenter database.

Charitable Giving: Pledge cards for the 2008 Employee Charitable Donation Campaign, which runs until Dec. 31, will be distributed to all employees by their respective departments. Employees may make contributions through payroll deductions or on a one-time basis.

PSSA Update: The final regional President's Service and Safety Awards luncheon takes place on Wednesday, Dec. 10 in Jacksonville, Fla., where 17 employees will receive PSSA recognition and 28 will be honored for their 30 and 35 years of service.

Human Resources: Starting Dec. 8, non-agreement managers may begin entering FY '09 goals in the IMPACT system.

December 15, 2008

Ridership and Revenue Drop in November

Overall ridership and ticket revenue for November were down 4 and 6 percent, respectively, against last year mainly due to the current economic crisis hurting Northeast Corridor performance, where ridership declined 12 percent. The drop was offset by a 2 percent ridership increase on other corridor and state-supported services in conjunction with a 2 percent jump in long-distance ridership, which is partly attributable to significant improvements in on-time performance.

“Amtrak’s had tremendous growth over the last five years, and while the numbers are down slightly from last year, ridership and revenue are still relatively strong — especially in these economic conditions,” explained Emmett Fremaux, vice president, Marketing and Product Management.

Company Prepares for Presidential Inauguration

Plans are underway to accommodate huge passenger demand for the Jan. 20 inauguration of President-Elect Barack Obama in Washington, D.C. A crowd of up to five million people is expected to strain the region’s transportation system to its limit, so department officials across the company are collaborating to get ready.

“This is an historic event of national importance, which must be executed with precision,” said William Crosbie, chief operating officer. “We’re looking at every facet of our operations throughout the Mid-Atlantic and Northeast to ensure passengers get in and out of D.C. safely and efficiently.”

Amtrak will be adding capacity and is coordinating with agencies at the federal, state and local levels to maximize security efforts and train operations along the East Coast. Information about how the event will affect Washington-area employees, including how they can volunteer to help in certain stations along the Northeast Corridor, will be available soon.

Engineering: The Switch Exchange System, with the assistance of Mid-Atlantic Engineering, will be wrapping up the installation of the No. 21A switch at Shore Interlocking in Philadelphia. This is the final of seven switches installed in Shore Interlocking this fall.

Benefits: The Amtrak Benefits Web site will not be available from Wednesday, Dec. 17 through Friday, Jan. 2 in order to process benefit elections. Employees can still call the Benefits Service Center at 800-481-4887 to make benefit changes.

Corporate Communications: On Tuesday, Dec. 16 at 10 p.m., as part of its eight-part “Extreme Trains” series, The History Channel is airing a segment on the *Empire Builder*.

Gift Policy Reminder: The Ethical Conduct and Conflict of Interest policy (posted on the Intranet under “Policies”) precludes accepting any gifts valued at more than \$50, and no employee may solicit a gift of any value. Procurement department employees are not allowed to accept any gifts that exceed \$10 in value.

December 22, 2008

Amtrak Mourns the Loss of Notable Supporters

Amtrak lost two ardent passenger rail supporters as former board member Paul Weyrich and United Transportation Union National Legislative Director James M. Brunkenhoefer both passed away late last week. Amtrak whistles across the entire system will blow today for Weyrich and tomorrow for Brunkenhoefer at 3 p.m. to honor them.

Best known as a co-founder of the politically conservative Heritage Foundation, Weyrich later founded the Free Congress Foundation, which unlike most similar organizations favored rail mass transit. He served on the Amtrak board — from February 1987 to January 1993 — as well as the National Surface Transportation Policy and Revenue Study Commission. A former political reporter, Weyrich was also a prolific writer and publisher of *The New Electric Railway Journal*.

“Paul Weyrich has been a friend and passionate supporter of Amtrak since the early days of the company’s formation,” said Government Affairs and Corporate Communications Vice President Joe McHugh. “Even after his service on the board ended, he continued to serve the company with great enthusiasm. He loved this company. We will miss him very much.”

Funeral services will be held today at the Holy Transfiguration Melkite Greek-Catholic Church in McLean, Va. Contributions in Weyrich’s honor should be made to the church.

Brunkenhoefer, also known as “Brokenrail,” began his railroad career in 1966 as a trainman for the Southern Pacific Transportation Co. Until his death, he held seniority in the Train and Engine service crafts on the Union Pacific lines in Texas and Louisiana. Before serving as UTU’s national legislative director, Brunkenhoefer served in a number of offices in Local 83 in Houston. In 1980, he became the alternate Texas state legislative director before assuming full directorship of the Texas State Legislative Board in 1982. He served at the national level since 1987.

“It is with great sadness that I recognize the passing of James Brunkenhoefer,” said President and CEO Joe Boardman. “There is no one with a kinder heart for the suffering that another human has. ‘Brokenrail’ brought compassion and concern to me at a time that I needed it. My prayers and thoughts are with his soul as well as his loved ones during this time of loss. We will all miss him.”

“The passing of James Brunkenhoefer is a loss to the railroad world,” added Labor Relations Vice President Joe Bress. “He exemplified the best in lobbying for the UTU and supporting Amtrak. I will miss his way of refocusing an issue and doing it with passion, humor and personality.”

Funeral services will be held today at Am Kolel Sanctuary in Rockville, Md.

Useful Information for the New Year ...

- If you've moved in the past year, and have not notified Human Resources, submit to your local HR office an updated Employee Information Form, which can be found on the Intranet ("Library" ➡ "Forms") or at the local office. A list of local offices is also on the Intranet at "Employees" ➡ "Human Resources-Offices."
- Make sure the Railroad Retirement Board has your current mailing address. Send it, along with your Social Security number, to the nearest RRB office (visit www.rrb.gov for office locations).
- W-2s will be mailed to your home by Jan. 31.
- Please submit W-4 tax withholding changes to Payroll as soon as possible. To claim tax exempt status in 2009, submit a new W-4 to Payroll by Feb. 16.
- Beginning Jan. 1, the Tier 1 tax rate will be 6.2 percent for compensation up to \$106,800 with a maximum of \$6,621.60 annually. The Tier 2 tax rate is 3.9 percent for compensation up to \$79,200 with a maximum of \$3,088.80.
- Effective Jan. 1, the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for expenses incurred on or after Jan. 1.

Benefits: 2009 FSA elections are now in the WageWorks system. Log on to wageworks.com or call 877-924-3967 to obtain a commuter pass, set up reimbursement through direct deposit, or confirm that your information is accurate in the WageWorks system.

2009 Holiday Schedule

Below is the 2009 holiday schedule for non-agreement employees:

Holiday	Date
New Year's Day	Thursday, Jan. 1, 2009
Martin L. King Jr. Day	Monday, Jan. 19, 2009
President's Day	Monday, Feb. 16, 2009
Memorial Day	Monday, May 25, 2009
Independence Day	Saturday, July 4, 2009
Labor Day	Monday, Sept. 7, 2009
Veterans' Day	Wednesday, Nov. 11, 2009
Thanksgiving Day	Thursday, Nov. 26, 2009
Christmas Day	Friday, Dec. 25, 2009

Because July 4 falls on a Saturday, non-agreement employees hired prior to 2009 are granted an additional personal day and, are therefore entitled to three personal days in 2009. Employees must obtain approval prior to using personal days.

Non-agreement employees hired in 2009 receive personal days based on their date of hire.

Date of Hire	Number of Personal Days
Jan. 1 to May 31, 2009	2
June 1 to Aug. 31, 2009	1
Sept. 1 to Dec. 31, 2009	0

Holidays for agreement-covered employees are subject to each labor agreement.

Frequently Asked Questions Regarding the Retroactive Payments

- **Who should receive a retroactive payment check?**

The current retroactive payments are based on the contract settlements reached with BLET and SMWIA. Adjustments for ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO, IBB, ARASA (Maintenance of Equipment), ARASA (Maintenance of Way) and UTU Train Service were paid earlier in May 2008. Additionally, adjustments for UTU Yardmasters and UTU Stewards, based on their recent contract settlements, are planned for later this summer. Employees in other crafts, such as TCU, ASWC and ARASA (OBS), are not covered by these agreements. Additionally, only employees active in a union covered position on December 1, 2007, or on certain leaves of absence, are entitled to retroactive pay under these contract settlements. If you were previously employed by Amtrak, left the company and subsequently returned to Amtrak service, only the service following your return is subject to the retroactive adjustment.

- **How was the back pay calculated?**

The retroactive pay for BLET and SMWIA employees covers the period from July 1, 2002 through April 30, 2008. In accordance with the terms of the agreements, the wage adjustments were calculated based on the January 1, 2001 rates of pay, which included the 27¢ Cost Of Living Adjustment (COLA) that the agreements rolled into the basic rates. Thereafter, the following percentage increases were applied:

- July 1, 2002 – 6.087%
- July 1, 2003 – 3.000%
- July 1, 2004 – 3.250%
- July 1, 2005 – 2.500%
- July 1, 2006 – 3.000%
- July 1, 2007 – 3.000%

The resulting hourly rates applied to all hours paid during each period reflect the total compensation resulting from the new contracts. The compensation already received for those hours was subtracted from that amount to identify the total retroactive wage adjustment for the period. Finally, from the total retroactive wage adjustment, the following health care contributions were deducted for each month of active service:

- July 1, 2001 through June 30, 2002 - \$ 33.39 per month
- July 1, 2002 through June 30, 2003 - \$ 81.18 per month
- July 1, 2003 through June 30, 2004 - \$ 79.74 per month
- July 1, 2004 through June 30, 2005 - \$ 91.32 per month
- July 1, 2005 through December 31, 2005 - \$ 97.43 per month
- January 1, 2006 through December 31, 2006 - \$123.28 per month
- January 1, 2007 through April 30, 2008 - \$166.25 per month

The result is the gross retroactive adjustment. The check you received (or that is deposited in your account) is 40% of the total amount, less required deductions, in accordance with the terms of the agreement.

- **Are all labor payments included in my back pay calculations?**
 No, payments for other than hours worked, such as differentials, meal allowances, travel reimbursements, etc., were not included in the wage adjustment; only hours paid for or worked are included. Also, time worked in management, including special duty under XX job codes, is not subject to adjustment.
- **When will the balance be paid?**
 In accordance with the terms of the agreement, the balance of the retroactive adjustment (60%) will be paid within one (1) year of the date the initial 40% is paid, subject to the contingency provisions of the agreement. In general, this means payment of the balance depends upon sufficient funding being appropriated by Congress to pay the second installment in Fiscal Year 2009.
- **How do I know the new rates of pay are correct?**
 The new rates of pay for BLET and SMWIA took effect on May 1, 2008. The rates of pay for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBB, IBEW, JCC, NCFO, and UTU Train Service took effect on or about April 1, 2008. Since that time, questions about certain rates were raised by union officers, employees and managers and the rates were subsequently adjusted, where necessary. The corrected rates are what were applied to the back pay calculations. If you believe your rate of pay is wrong, you should contact your local manager or union representative for verification.
- **What is the health care deduction?**
 In the contract settlements, it was agreed that employees would contribute toward the cost of health care coverage at the same level as freight railroad employees. The amounts of the deductions, outlined above, are in line with the payments agreed to as contributed by railroad employees on the freight railroads.
- **What if I am covered by other health insurance?**
 Prior to the current contract settlement, Amtrak provided health care coverage for all employees, regardless of whether that coverage was utilized. Accordingly, the settlement provides for employee contributions for each month of active service. However, under the terms of the agreements, employees may elect to “opt-out” of future medical plan coverage, including medical, prescription drug and mental health/substance abuse benefits. A letter was sent to each employee outlining the benefit changes and the opportunity to opt out of the Amtrak medical plan. While the initial opt out period ended April 30, 2008, for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO and UTU Train Service, and ended on May 16, 2008, for BLET, IBB and SMWIA, employees will have the opportunity to opt out in the future during the open enrollment periods. You may obtain additional information by contacting the Amtrak Benefits Service Center at 800-481-4887.
- **Will 401(k) deductions be taken out of my back pay?**
 In accordance with the terms of the agreement, Amtrak did not deduct contributions toward your 401(k) plan from the retroactive wage adjustment.

- **What deductions will be taken out of my back pay?**

Back payments are subject to the Federal 25% supplemental payment tax withholding rate as well as any percentage based creditor or tax levy deductions, such as state and local taxes. Depending on the state in which you reside, a mandatory supplemental state tax rate may apply as well. Railroad Retirement taxes are deducted at the same percentage rate as normal, up to the annual maximum. Garnishments related to child support are excluded unless the employee is behind on or in arrears on required payments. If this is the case, a deduction will be made for child support. It is recommended that you consult with a tax advisor on the proper treatment of this payment in regards to your tax filing status.

- **What if I have labor hours submitted after the cut off?**

Work performed by BLET and SMWIA employees on or before April 30, 2008, which was not submitted by May 16, 2008, will need to be submitted through the normal process for submitting late labor. Work performed by employees in ARASA(Maintenance of Equipment), ARASA(Maintenance of Way), ATDA, BME, BRS, IAM, IBB, IBEW, JCC, NCFO and UTU Train Service, on or before March 31, 2008, will also need to be submitted through the normal process for submitting late labor. Time submitted after these deadlines will be paid at the old rates and the adjustment will have to be made manually. Those adjustments will be added to the remaining 60% portion of the wage adjustment.

- **Who should I contact if I think the amount of my back pay isn't correct?**

Please refer to the enclosed payroll information summary to assist you in understanding the calculations. Remember, under the contract settlements, only the rates of pay were adjusted. Except for the Reduced Crew Allowance under the UTU Agreement, there were no retroactive adjustments to allowances, differentials or other payments, including payments you may have received for temporary upgrades to management or time in "XX" job codes, or for time worked on positions in those unions that have not yet reached agreements. Questions regarding the payment can be referred to the following toll free number.

1-888-514-0983

The Call Center is staffed Monday through Friday from 8:00 a.m. to 8:00 p.m. EDT. If your question cannot immediately be answered by the call center representative, a case number will be assigned to you and your name, employee number, union and craft, telephone number and the nature of your question will be logged and referred to an appropriate officer for investigation and review.

Please use the attached Retroactive Wage Payment Inquiry Form to document your assertion of a discrepancy. The form is also available on the Internet at www.amtrakbenefits.com and on the Amtrak Intranet site under the Library Tab – click on Forms and select Form NRPC 3287.

You should be prepared to provide details regarding any discrepancy; if it involves health care contributions, information about the particular month(s) in question and why you believe the deduction was incorrect; if it involves the wage adjustment, information as to the specific period in dispute and whether it involves straight time, overtime or other hours paid in order to facilitate a prompt investigation of your issue. With the Form, you must send supporting documentation, such as copies of pay stubs, your work log or time book, showing the hours worked during the period in dispute.

- **Can the field payroll office handle my question?**

Field Payroll, Human Resources and Labor Relations offices **cannot** help with back pay questions, inquiries or disputes. Questions and disputes must be referred to the toll free number listed above. Your issue will be assigned a case number at the time of your call which will be used for the investigation process.

- **How long could I expect resolution on my case to take?**

Only issues with assigned case numbers will be investigated. Once a case number is assigned and your documentation received, you will be contacted within seven to 14 business days to discuss your specific question and determine the necessary course of action. Depending on call volume, it could take longer. Each case will be reviewed and you will be contacted and advised of the findings. Considering the significant number of employees affected by the back pay process, it may take several weeks to thoroughly investigate and respond to your particular issue.

- **How long do I have to dispute my wage adjustment?**

We encourage you to call as soon as possible so that your issue is logged and assigned a case number by the Call Center to initiate the review process. The sooner your call is received, the quicker your issue can be investigated and resolved. The call center is only a temporary resource for handling inquiries about the back pay process, so we urge you to call promptly.

May 30, 2008

Top Story

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at *Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance*. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under *How We Work ⇒ Management Employee Business Travel*.

In a separate travel update, the Internal Revenue Service has announced the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for mileage expenses incurred on or after Jan. 1, 2009.

Benefits: 2009 FSA elections are now in the WageWorks system. Log on to wageworks.com or call 877-924-3967 to obtain a commuter pass, set up reimbursement through direct deposit, or confirm that your information is accurate in the WageWorks system.

Below is the 2008 holiday schedule for non-agreement employees.

Holiday	Date
New Year's Day	Thursday, January 1, 2009
Martin Luther King Jr. Day	Monday, January 19, 2009
President's Day	Monday, February 16, 2009
Memorial Day	Monday, May 25, 2009
Independence Day	Saturday, July 4, 2009*
Labor Day	Monday, September 7, 2009
Veterans' Day	Wednesday, November 11, 2009
Thanksgiving Day	Thursday, November 26, 2009
Christmas Day	Friday, December 25, 2009

*Additional personal day for employees hired prior to 2009

Because July 4 falls on a Saturday, non-agreement employees hired prior to 2009 are granted an additional personal day and are, therefore, entitled to three personal days in 2009. Employees must obtain approval prior to using personal days.

Non-agreement employees hired in 2009 will receive personal days based on their date of hire.

Date of Hire	Number of Personal Days
January 1 to May 31	2
June 1 to August 31	1
September 1 to December 31	0

Holidays for agreement-covered employees are subject to each labor agreement.

12/3/08 Approved by Murphy

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at *Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance*. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under *How We Work ⇒ Management Employee Business Travel*.

In a separate travel update, the Internal Revenue Service has announced the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for mileage expenses incurred on or after January 1, 2009.

TESTIMONY

OF

**DONNA McLEAN
CHAIRMAN, BOARD OF DIRECTORS
AMTRAK**

BEFORE THE

**SUBCOMMITTEE ON TRANSPORTATION, HOUSING
AND URBAN DEVELOPMENT AND RELATED
AGENCIES**

OF THE

SENATE COMMITTEE ON APPROPRIATIONS

THURSDAY, APRIL 3, 2008

Good morning Chairman Murray, Senator Bond, and members of the Committee. Thank you for the opportunity to testify before your committee this morning. My name is Donna McLean, and I am the Chairman of the Board of Amtrak, a position I assumed in November 2007. I was confirmed as a member of the Board of Directors in late July of 2006. Prior to that, I worked as Chief Financial Officer of the Department of Transportation and as the Assistant Administrator for Financial Services at the Federal Aviation Administration. Presently, I work as a consultant and an adjunct professor, and I am based here in Washington, DC.

The Amtrak Board of Directors is a seven-person body, and includes the Secretary of Transportation; currently, five of those seats are filled and two are vacant. I would like to thank the Senate for the recent confirmation of our new board members, Nancy Naples O'Neill of New York and Thomas C. Carper of Illinois. As Chairman, I envision the Board functioning as a governing body, one that provides a combination of oversight and guidance to ensure that the company is working toward the attainment of its strategic objectives. The Board should be in the business of setting goals and monitoring and assessing performance. The day-to-day management of the company and the setting of specific policies within the overarching framework of our strategic goals are going to be the responsibility of Alex and our Executive Committee.

We are currently refining our corporate strategy. We have had a provisional strategy since last summer, and it is included in the business plan we have just published, since it guided the development of our FY 2008 budget. Currently, we are developing a strategy that is multi-year

but provides detailed and specific guidance for the next five years. Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider.

Measuring Success at Amtrak

To succeed, this company must be a safe, convenient and affordable transportation choice for travelers. We recognize that we can't be everywhere, and we know that there are markets where we will not have a competitive advantage. But where we do provide service, it must be professionally operated and as responsive as possible to the needs of the traveling public.

So how do we measure success? As Amtrak's management team and I have been working on our multi-year strategic plan, this is the central question that the Board and I have to answer. As Alex will report, our ridership and ticket revenue numbers are increasing in almost all of our markets. That is success, right? Amtrak's corporate debt is decreasing, which is also good. Our operating subsidy needs are increasing. But at the same time, our subsidy per passenger mile is declining. Our FY 07 on time performance was around 82.3 percent in the Northeast Corridor and our share of the air/rail market has also improved, but our capital needs are growing. Our average on-time performance on our long distance train routes in FY 07 varied from a low of 10.2 percent to a high of 86.2 percent.

The good news is we do a pretty good job of tracking and collecting the basic data we need to inform our analysis. The real challenge is going to be analytical – we are going to need to produce answers that matter to us and are useful to other stakeholders. In other words, we are going to have to do some thinking about what we want to know, why we want to know it, and what it's telling us about consumer demand, about the health of our business, and about our internal efficiency. We will have to rely on some additional measurements such as:

- Operating ratio
- Revenue per available seat-mile
- Cost per available seat-mile
- Load factor
- On-time performance
- Customer satisfaction indices
- Partner (state and commuter authority) satisfaction
- Employee satisfaction
- Safety ratio
- Ridership growth

These measures will be key components of both our day-to-day operations and for planning for the long term.

In my written statement I am submitting several charts and graphs that will give you a better understanding of some of the metrics that we rely on to monitor our performance. It is important for you to know that I am asking the questions of the Board, the management, and the employees of Amtrak – how do we measure ourselves? How can we best position ourselves for the future, and how can we meet the growing demand for our services, given our challenges? As we set out to define success at Amtrak, we will strive to be increasingly transparent in all areas of our business. I feel very strongly that it is our highest responsibility to provide information to Congress and our other stakeholders, and that information should be clear, easy to understand, and transparent.

Intermodal Connections

As we strive to provide a service that is increasingly transparent and successful, as transportation providers, we have a couple of important competitive advantages that we can offer travelers that increase their range of choices. We are trying to think of travel not just in terms of a rail trip, but in terms of the passenger's journey. People don't wake up at 5 in the morning to ride an Amtrak train; they wake up early to get to a meeting in Philadelphia which they just happen to do via Amtrak. We must take into consideration the passengers' need to get to and from the train station, a need that intermodal planners will need to satisfy if we are to provide those essential and convenient connections.

In FY 2007, Amtrak carried 56 percent of what we call the “New York to DC air-rail” market – the people who either flew or took the train. That number has been trending generally upward since 2000, when we had 37 percent of the market share. The *Acela* service has been a big contributor to our market share growth. We believe our market advantage is three fold; our service is frequent and reliable; our service is between city centers; and our stations include intermodal connections to the subway, bus, or taxi. That intermodal connection is key to getting our passengers to their final destination.

This is an important advantage – and one that is not limited to the Northeast Corridor. The Bureau of Transportation Statistics recently studied the connectivity of intercity rail and airport facilities, and concluded that while only 34.5 percent of airports in the 48 contiguous states included connectivity with another mode of mass transportation, about 54.3 percent of intercity rail stations did. I think that’s an important statistic. The ability to offer travelers a range of choices is vital to Amtrak’s appeal, and we consider the development of those connections to be a high priority. This connectivity is currently most marked on the East and West Coasts. This is a pattern not just associated with the Northeast Corridor, but in California, Washington, and Oregon, over 85 percent of the stations have some kind of connectivity, usually bus service. That’s a real benefit to travelers, and we want to work on developing that elsewhere.

And as road congestion grows, I think the ability to travel without having to drive a car is going to be increasingly popular, and we need to be poised to provide consumers with that alternative. We are particularly interested in the possibility of offering connections to airports, and we

currently have direct connections with five airports: Newark, Baltimore-Washington International, Burbank, Oakland, and Mitchell Field in Milwaukee. While these are all traffic feeders for Amtrak, they offer the promise of an essential component of an intermodal national transportation policy – the prospect of a system that allows the various modes to provide the transportation services that maximize the consumer’s utility.

In conclusion, I hope that you are satisfied with the knowledge that Amtrak is moving forward with a strategic vision that should make sense to most people who understand Amtrak’s mission. Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success. We are committed to measuring our performance, continuous improvement, and defining the true meaning of success. And each step of the way, we will do our level best to provide the transparency that is essential to the policymakers, taxpayers, and passengers that provide the resources for Amtrak’s nationwide service.

This concludes my opening statement. I will be happy to answer any questions you might have.

AND URBAN DEVELOPMENT AND RELATED
AGENCIES**

OF THE

SENATE COMMITTEE ON APPROPRIATIONS

THURSDAY, APRIL 3, 2008

Good morning, Madame Chairwoman, and thank you for the opportunity to testify before your committee this morning on Amtrak's financial needs for FY09. As you may know, FY07 finished as a strong year for Amtrak, and FY08 has gotten off to a good start as well. We set an annual ridership record of 25.8 million passengers, the largest in the company's history. We had record summer months and a record Thanksgiving, which are important indicators of the traveling public's preferences and confidence. Our ridership and revenue for FY08 have also been strong; we carried 11.7 percent more riders between the beginning of the fiscal year and the end of February than we carried in FY07, and those riders brought us 14.8 percent more revenue. Finally, we have concluded agreements with most of our unions after years of negotiations. Of the unions before our recent PEB, the members of 9 groups ratified their tentative agreements on March 10, one additional group has ratified an agreement, and we expect the remainder to be complete soon. These agreements follow the recommendations of the Presidential Emergency Board in providing wage increases and retroactive pay to our employees, and our employees will also be making contributions to health care.

With this performance as background, I think it's safe to say that passenger rail service has a bright future. To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities. We are working on increasing revenue, reducing costs, and improving both trip times and systemwide on-time performance. We are also in the process of developing a comprehensive plan for equipment procurement in the coming years; the acquisition of additional equipment is a small component of the FY09 capital request, but we expect it to grow as our electric engines and Amfleet cars approach the end of their useful lives. We are also

working with a number of states to develop and augment short-distance corridor operations. We are, however, quickly bumping up against the limits of our existing equipment capacity at a time when states are seeking new service. To address this problem, we are going to need to begin a new equipment procurement cycle.

To realize these strategic priorities, Amtrak will continue to require a certain core level of operating assistance and capital investment from the Federal government. In FY09, Amtrak will need a total of \$1.671 billion in Federal assistance. Of this total, \$506 million will be required to meet operating costs, \$801.4 million will be invested in capital projects, \$19 million will be required for the funding of Amtrak's Office of the Inspector General, and \$345 million will be spent on debt service. All of these numbers represent increases over our FY08 spending levels, and I will give you some background on them. We have provided additional detail in our FY09 legislative and grant request, which I would ask to have made a part of the record.

We foresee significant cost inflation in several important areas in FY09. The most significant costs will be increases in wages, benefits, and fuel. Wage increases will be a byproduct of the labor agreement, and will add about \$27 million to the FY09 budget, but the largest single category of cost increases is going to be benefits. This is principally a reflection of the growing cost of health care. We expect our total benefits costs to rise by \$50 million in FY09, and the expenses associated with medical treatment and drugs are at the core of it. We expect that the cost sharing provisions in our labor agreements will to some degree restrain medical cost growth, but that growth is still going to be substantial.

I think it's also important to mention at this point that we have a single additional expense that will come due in FY09. As you may know, from 2002 until early this year, this company and many of its unions were unable to agree on the terms of contracts for our employees. In November 2007, the Administration appointed a Presidential Emergency Board (or PEB) under the terms of the Railway Labor Act to hear the dispute and recommend a settlement, which it did in early January. The management of Amtrak has accepted this recommendation, as have nine of our labor groups; we expect that groups whose ratifications and negotiations are ongoing will likewise accept the contract pattern the PEB recommended. The recommended agreement pattern included a pair of lump sum retroactive payments to Amtrak's employees to effectively extend the raises it offered back to the beginning of the negotiating period, and Amtrak accepted the recommendation. Amtrak believes at this time that it has the financial wherewithal to meet our FY08 wage and retroactive pay obligations, as well as its wage obligations in FY09 and FY10. However the 60% (or \$114 million) of the one time "back pay" payment the PEB recommended be made in FY09 is noted separately in the FY09 grant request summary table on page 3 of the leg and grant request, and is not contained in Amtrak's FY09 operating costs. The PEB was aware that Amtrak did not have the means to pay the additional \$114 million and recommended that the decision to fund this amount lies with Congress.

To fund our FY09 capital programs, Amtrak is asking for a total of \$801.4 million. Of this total, we intend to use \$506.9 million to pay for ongoing "state of good repair" (or SOGR) programs dedicated to the rehabilitation of our plant and equipment. In addition to meeting day to day

SOG R requirements, we are undertaking an ambitious capital program in FY08. The replacement of the lift span on the Thames River Bridge in New London, Connecticut will be the centerpiece, and we are planning a large scale repair “blitz” on our New England Division in June to undertake repair and replacement work on the electric catenary, several interlocking plants, and a host of smaller projects. We intend to continue our capital investment program effort in FY09, when our program to replace the lift span on the Niantic River Bridge will hit its stride. Big projects like lift bridge replacement are expensive but enduring – we expect the completed span to last for a lifetime. Though we have an aging fleet, we will also be spending significant capital on bringing it into SOGR.

We are also working to comply with the Americans with Disabilities Act, and our 2009 budget includes \$68.5 million for that effort. ADA compliance is going to be a significant challenge, and Amtrak is seeking an extension of the current compliance deadline of July 26, 2010, because, even if we had the regulatory guidance and resources to comply, it would still be impossible to achieve compliance by that date. Amtrak is fully focused on making its service accessible, and we are pursuing compliance under the terms of the ADA, but we will need additional time to accomplish that. New rules proposed nearly two years ago by the DOT would materially change the standards for compliance under the Act with respect to station platform level requirements, would add millions of dollars to the compliance cost, and would deprive that aspect of compliance of any clarity and certainty. Even under the current law, Amtrak will need more time and more resources to achieve full ADA compliance.

On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable. There are a lot of points that must be considered, and the rising costs of fuel, which now hovers at \$4.00 a gallon and health care and the condition of the economy will all have a bearing on our plans. We're going to need new equipment, both to modernize our fleet and have equipment available for expansion. But from where I sit, the leading indicators continue to trend in the right direction. I believe there is a latent demand for intercity passenger rail service in the United States. In the coming year we will work to inform this discussion and to meet the expectations and needs of our customers. Let me conclude by saying we are going to have some big opportunities ahead, and we will need a strong, skilled and well-trained workforce with high morale if we're going to make the most of them. To that end, these new labor agreements will help. I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations, and I am glad that we have been able to conclude a workable settlement and trust that our employees will embrace it. I also want to thank our Board of Directors, and particularly Donna, for their ongoing support and their wise counsel.

This concludes my opening statement. I will be happy to answer any questions you might have.

Frequently Asked Questions Regarding the Retroactive Payments

- **Who should receive a retroactive payment check?**

The retroactive payments are based on the contract settlements reached with ATDA, BMWE, BRS, IAM, IBEW, JCC, NCFO, IBB, ARASA (Maintenance of Equipment), ARASA (Maintenance of Way) and UTU Train Service. Adjustments for BLET and SMWIA are scheduled to be paid at the end of May 2008. Employees in other crafts, such as TCU, ASWC, ARASA (OBS), UTU Stewards and UTU Yardmasters, are not covered by these agreements. Additionally, only employees active in a union covered position on December 1, 2007, or on certain leaves of absence, are entitled to retroactive pay under these contract settlements. If you were previously employed by Amtrak, left the company and subsequently returned to Amtrak service, only the service following your return is subject to the retroactive adjustment.

- **How was the back pay calculated?**

The retroactive pay covers the period from July 1, 2002 through March 31, 2008. In accordance with the terms of the agreements, the wage adjustments were calculated based on the January 1, 2001 rates of pay, which included the 27¢ Cost Of Living Adjustment (COLA) that the agreements rolled into the basic rates. Thereafter, the following percentage increases were applied:

- July 1, 2002 – 6.087%
- July 1, 2003 – 3.000%
- July 1, 2004 – 3.250%
- July 1, 2005 – 2.500%
- July 1, 2006 – 3.000%
- July 1, 2007 – 3.000%

The resulting hourly rates applied to all hours paid during each period reflect the total compensation resulting from the new contracts. The compensation already received for those hours was subtracted from that amount to identify the total retroactive wage adjustment for the period. Finally, from the total retroactive wage adjustment, the following health care contributions were deducted for each month of active service:

- July 1, 2001 through June 30, 2002 - \$ 33.39 per month
- July 1, 2002 through June 30, 2003 - \$ 81.18 per month
- July 1, 2003 through June 30, 2004 - \$ 79.74 per month
- July 1, 2004 through June 30, 2005 - \$ 91.32 per month
- July 1, 2005 through December 31, 2005 - \$ 97.43 per month
- January 1, 2006 through December 31, 2006 - \$123.28 per month
- January 1, 2007 through March 31, 2008 - \$166.25 per month

The result is the gross retroactive adjustment. The check you received (or that is deposited in your account) is 40% of the total amount, less required deductions, in accordance with the terms of the agreement.

- **Are all labor payments included in my back pay calculations?**
No, payments for other than hours worked, such as differentials, meal allowances, travel reimbursements, etc., were not included in the wage adjustment; only hours paid for or worked are included. Also, time worked in management, including special duty under XX job codes, is not subject to adjustment.
- **When will the balance be paid?**
In accordance with the terms of the agreement, the balance of the retroactive adjustment (60%) will be paid within one (1) year of the date the initial 40% is paid, subject to the contingency provisions of the agreement. In general, this means payment of the balance depends upon sufficient funding being appropriated by Congress to pay the second installment in Fiscal Year 2009.
- **How do I know the new rates of pay are correct?**
The rates of pay for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBB, IBEW, JCC, NCFO, and UTU Train Service took effect on or about April 1, 2008. The new rates of pay for BLET and SMWIA took effect on May 1, 2008. Since that time, questions about certain rates were raised by union officers, employees and managers and the rates were subsequently adjusted, where necessary. The corrected rates are what were applied to the back pay calculations. If you believe your rate of pay is wrong, you should contact your local manager or union representative for verification.
- **What is the health care deduction?**
In the contract settlements, it was agreed that employees would contribute toward the cost of health care coverage at the same level as freight railroad employees. The amounts of the deductions, outlined above, are in line with the payments agreed to as contributed by railroad employees on the freight railroads.
- **What if I am covered by other health insurance?**
Prior to the current contract settlement, Amtrak provided health care coverage for all employees, regardless of whether that coverage was utilized. Accordingly, the settlement provides for employee contributions for each month of active service. However, under the terms of the agreements, employees may elect to “opt-out” of future medical plan coverage, including medical, prescription drug and mental health/substance abuse benefits. A letter was sent to each employee outlining the benefit changes and the opportunity to opt out of the Amtrak medical plan. While the initial opt out period ended April 30, 2008, for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO and UTU Train Service, and will end on May 16, 2008, for BLET, IBB and SMWIA, employees will have the opportunity to opt out in the future during the open enrollment periods. You may obtain additional information by contacting the Amtrak Benefits Service Center at 800-481-4887.

- **Will 401(k) deductions be taken out of my back pay?**
In accordance with the terms of the agreement, Amtrak did not deduct contributions toward your 401(k) plan from the retroactive wage adjustment.
- **What deductions will be taken out of my back pay?**
Back payments are subject to the Federal 25% supplemental payment tax withholding rate as well as any percentage based creditor or tax levy deductions, such as state and local taxes. Depending on the state in which you reside, a mandatory supplemental state tax rate may apply as well. Railroad Retirement taxes are deducted at the same percentage rate as normal, up to the annual maximum. Garnishments related to child support are excluded unless the employee is behind on or in arrears on required payments. If this is the case, a deduction will be made for child support. It is recommended that you consult with a tax advisor on the proper treatment of this payment in regards to your tax filing status.
- **What if I have labor hours submitted after the April 25, 2008 cut off?**
Work performed on or before March 31, 2008, which was not submitted by April 25, 2008, will need to be submitted through the normal process for submitting late labor. Time submitted after the April 25, 2008, cut off will be paid at the old rates and the adjustment will have to be made manually. Those adjustments will be added to the remaining 60% portion of the wage adjustment.
- **Who should I contact if I think the amount of my back pay isn't correct?**
Please refer to the enclosed payroll information summary to assist you in understanding the calculations. Remember, under the contract settlements, only the rates of pay were adjusted. Except for the Reduced Crew Allowance under the UTU Agreement, there were no retroactive adjustments to allowances, differentials or other payments, including payments you may have received for temporary upgrades to management or time in "XX" job codes, or for time worked on positions in those unions that have not yet reached agreements. Questions regarding the payment can be referred to the following toll free number.

1-888-514-0983

The Call Center will be staffed weekdays from 8:00 a.m. to 8:00 p.m. EDT beginning Thursday, May 8, 2008. Additionally, during the first weekend after the wage adjustments are released (Saturday May 10 and Sunday May 11), call center representatives will be available from 8:00 a.m. to 5:00 p.m. EDT. If your question cannot immediately be answered by the call center representative, a case number will be assigned to you and your name, employee number, union and craft, telephone number and the nature of your question will be logged and referred to an appropriate officer for investigation and review.

Please use the attached Retroactive Wage Payment Inquiry Form to document your assertion of a discrepancy. The form is also available on the Internet at www.amtrakbenefits.com and on the Amtrak Intranet site under the Library Tab – click on Forms and select Form NRPC 3287.

You should be prepared to provide details regarding any discrepancy; if it involves health care contributions, information about the particular month(s) in question and why you believe the deduction was incorrect; if it involves the wage adjustment, information as to the specific period in dispute and whether it involves straight time, overtime or other hours paid in order to facilitate a prompt investigation of your issue. With the Form, you must send supporting documentation, such as copies of pay stubs, your work log or time book, showing the hours worked during the period in dispute.

- **Can the field payroll office handle my question?**

Field Payroll, Human Resources and Labor Relations offices **cannot** help with back pay questions, inquiries or disputes. Questions and disputes must be referred to the toll free number listed above. Your issue will be assigned a case number at the time of your call which will be used for the investigation process.

- **How long could I expect resolution on my case to take?**

Only issues with assigned case numbers will be investigated. Once a case number is assigned and your documentation received, you will be contacted within seven to 14 business days to discuss your specific question and determine the necessary course of action. Depending on call volume, it could take longer. Each case will be reviewed and you will be contacted and advised of the findings. Considering the significant number of employees affected by the back pay process, it may take several weeks to thoroughly investigate and respond to your particular issue.

- **How long do I have to dispute my wage adjustment?**

We encourage you to call as soon as possible so that your issue is logged and assigned a case number by the Call Center to initiate the review process. The sooner your call is received, the quicker your issue can be investigated and resolved. The call center is only a temporary resource for handling inquiries about the back pay process, so we urge you to call promptly.

Wage Increases Take Effect in April, Retroactive Payments in May

The new rates of pay and retroactive wage payments for the ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment) and UTU will be paid as follows:

- The new rates of pay for positions in the above crafts take effect on April 1, 2008, and will begin to appear — depending on your union and pay schedule — as early as April 11, and in full in the April 25 paycheck. The first employee medical plan contribution for the above groups will be deducted from the April 25, 2008, paycheck. After that initial deduction in April of \$166.25, contributions in future months will be split between the first and second checks of each month.
- The first installment of the retroactive wage payment (40% of the total adjustment) is scheduled to be paid in a separate check (or through direct deposit) on May 9, 2008, and will be calculated on the wages through March 31, 2008, for employees eligible to receive the retroactive wage payment. A summary report of the full retroactive adjustment along with a list of frequently asked questions and answers will be furnished with the payment to provide employees with information about the calculation and who to contact about specific disputes regarding the payment.

In addition, the contract settlements provide employees with the ability to “opt out” of medical plan coverage, thereby not having to make the monthly contributions as of May 1, 2008. A separate mailing has been sent to employees about the Health Care coverage changes, including the form that must be submitted if employees wish to opt out of Health Care coverage. The required “opt out” form must be returned before April 30, 2008.

Amtrak Mourns Passing of C & S Employee

Dear Co-workers,

It is with deep regret that I inform you that the Engineering department employee who was struck by *Acela Express* Train 2150 early this morning in New Carrollton, Md., has passed away.

We all grieve the loss of life, and it is especially painful when we lose one of our own on the railroad.

Our thoughts and profound sympathy are with his co-workers, friends and family; I can only imagine the degree of anguish they feel at this time.

Sincerely,

Alex Kummant
President and CEO

Amtrak Statement on Employee Fatality

The following statement was released today with permission from the family of Steven Rychwalski, the Engineering department employee who passed away as a result of being struck by an *Acela Express* train yesterday:

Amtrak is saddened to announce the death of Steven Rychwalski, the employee struck Wednesday morning by an Acela Express train near New Carrollton.

“On behalf of all Amtrak employees, I offer my deepest condolences to the family of Steven Rychwalski,” said Alex Kummant, Amtrak’s President and CEO. “Steven was an exceptional member of the Amtrak family, and we mourn his untimely passing.”

Rychwalski, of White Marsh, Md., was injured early Wednesday, August 20 when he was struck by an Acela Express train north of the New Carrollton station. He was transported to a local hospital where he passed away.

Rychwalski, 22, joined Amtrak in 2005 and was working as an inspector for the Communications & Signals department at the time of his death.

Acela Express 2150 was traveling from Washington to Boston at the time of the incident. There were no injuries on board the train.

Information for Employees Related to Tropical Storm Gustav

Amtrak is closely monitoring the progress of Tropical Storm Gustav as it makes its way toward the Gulf Coast. At this time, it is forecast to become a hurricane and to make landfall on the Gulf Coast as early as Monday night. Because the safety and well-being of our employees is paramount, Amtrak is taking steps to help employees in the region, should Gustav make landfall.

In preparation for the storm's arrival, all employees in the region should ensure they have their supervisor's contact information with them to maintain contact and so that they can obtain information about their work assignments.

To account for employees' whereabouts and safety, all employees in the region are being asked to call in to verify their current location.

Mechanical department employees in the region should call 800-424-0217 ext. 2082 or 302-683-2082 or 302-683-2083.

All other employees in the region should call 877-872-2334. As of this evening, this toll-free hotline will serve as a central reporting number and to field questions from employees affected by the storm.

The hotline personnel will manage a daily roster of employees and distribute it to department heads and supervisors to ensure that employees are accounted for.

On the operations front, as of today, regularly scheduled service has been suspended to and from New Orleans until further notice. *Crescent* Trains 19

and 20 will terminate and originate in Atlanta, *City of New Orleans* Trains 58 and 59 will terminate and originate in Memphis, and *Sunset Limited* Trains 1 and 2 will terminate and originate in San Antonio.

The Federal Emergency Management Agency (FEMA) has already begun evacuating some Gulf Coast cities, including New Orleans.

The company is preparing to run evacuation trains according to its agreement with FEMA. To that end, designated "Go Teams," made up of T & E, Mechanical and OBS crews, along with APD and Mobile Security Teams, are being deployed to operate the evacuation trains from New Orleans to Memphis.

As more information concerning affected employees, facilities and services becomes available, additional advisories will be posted.

Please distribute at all safety meetings and post on all employee bulletin boards.

A Message from President and CEO Joe Boardman

Dear Co-workers,

I want to share with you some of the discussions that took place during the board of directors meeting this week.

First, I want you to know that, I — with unanimous support from the board of directors — will make it my highest priority to seek the funds for the remainder of the retroactive pay for the employees represented by 14 of our unions in 2009.

At a meeting with labor leaders last month, I said that it was my intent to deliver the retroactive pay in 2009. After the holidays, we plan to seek the necessary funds from Congress and will appeal to our key appropriators on the Hill to make the funds available for this purpose. I will join with labor leaders in taking this message to Capitol Hill.

We have an incredibly dedicated workforce. It's important to me that you know that I value the work you do, and that I will go to Congress for you.

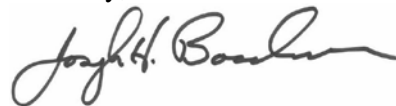

At Congress' request, we have submitted a robust list of projects for consideration for the economic stimulus bill that President-elect Obama has said will be his first legislative priority in 2009. That list includes putting more people to work on our fleet and infrastructure so that we can expand capacity to meet demand. Stored equipment needs to be refurbished and put into service, and more work done on our current fleet so that we run the caliber of service we can all be proud of.

I'm sure you've heard me talk about my goal of a greener, safer, healthier and more connected Amtrak. Everything we do feeds into that goal. From putting additional equipment into service with the help of the stimulus bill (we hope), to fighting for the retroactive pay to keep our employees engaged, to serving as a critical player in the nation's transportation network — it all means a better and stronger Amtrak.

With these goals in sight, we will position ourselves as a transportation leader and the most viable mode in the next energy crisis. Just consider the role Amtrak is playing in the presidential inaugural events. We're transporting the President- and Vice President-elect to Washington, as well as bringing hundreds of thousands of people to the nation's capital. We'll be working hard to accommodate the demand, and I thank all of the employees who will be working that day — including those who sign up to volunteer — to make those trips extremely successful.

I wish you all very happy holidays and please work safely.

Sincerely,

Joe Boardman
President and Chief Executive Officer

p.s. I will be on C-Span's Washington Journal on Tuesday morning, if you have the opportunity to tune in.

Please distribute at all safety meetings and post on all employee bulletin boards.

Employee Information for Inauguration Day

Amtrak is in the operational planning process for the inauguration of President-elect Barack Obama on Jan. 20. With huge passenger demand for service to and from Washington, D.C., and as many as 5 million people traveling to the capital for inaugural events, the company is doing everything in its power to accommodate employees and passengers.

Attendance Policy

The following provisions apply to **all non-agreement employees** working at all facilities between Washington and New York:

Jan. 20 will be a normal work day for all employees, including those in the Washington metro area. Those who wish to take leave on that day must be pre-approved to do so through the standard request process. Departments are required to maintain sufficient personnel coverage in all areas of the business unit for the entire day.

Sick leave on Jan. 20 *will require* a statement from a physician specifically related to the nature of the illness in order for the employee to receive compensation for that day. Employees returning from leave should deliver the statement to their direct supervisor. The supervisor will review the statement and if accepted, it will be forwarded to HR for placement in the employee's personnel file. If the doctor's statement is insufficient, the supervisor can deny the request or request assistance from Health Services for validation.

Employees who work on Jan. 20 are not permitted to leave early unless approved by the Executive Committee member. Each Executive Committee member will determine the appropriate time to allow staff to depart. Requests to work from home on that day will not be permitted unless the employee already has a planned work schedule from home that has been pre-approved by Management.

In the event of major Metro disturbances and/or road blockages that prevent employees from reaching their work location, employees

will have to take a vacation or personal leave day.

Getting To and From Work

Employees should expect delays getting to and from work on Jan. 20 due to traffic and road closures. Please check www.inauguration.dc.gov for information and plan accordingly.

MARC and VRE commuter trains will have all-reserved service on that day, however, Amtrak employees reporting for work will be permitted to ride free using their flash pass but must stand on full trains. Both will operate on adjusted schedules and not all stations will be served. Each service's respective Web site contains information on schedule changes. Normal flash pass privileges will apply to all Amtrak trains.

Volunteers Needed

Employee volunteers are urgently needed to assist passengers and manage traffic flow at stations major stations on the NEC. Employees are not required to take leave when serving in a station but must obtain permission from their supervisor. Managers are encouraged to allow their direct reports to volunteer when possible. To serve in New York, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Operational Changes

Extra trains and cars have been added to the Jan. 20 schedule to maximize capacity and inventory has been loaded into the Arrow system. A majority of the extra capacity available is southbound into Washington in the morning and northbound from Washington in the afternoon.

To meet demand, Mechanical forces are reducing shop counts as much as possible and the company has leased equipment from New Jersey Transit.

Further information and details will be provided in the coming weeks.

Employee Information for Inauguration Day

Amtrak is taking extraordinary steps to accommodate the demand for service to and from Washington, D.C., for the events associated with Inauguration Day. Millions of people are expected to visit the nation's capital, and the demand will test Amtrak's capabilities on the Northeast Corridor.

"This will be our day to shine and show America how critical passenger rail is and how it is done safely, skillfully and professionally," said President and CEO Joe Boardman.

"This is an all-hands-on-deck situation," stated Chief Operating Officer William Crosbie. "We will need all the Northeast Corridor operations, security and APD employees on hand, and we are asking non-operations employees to participate in this historic day by volunteering in stations."

Accordingly, Jan. 20, 2009, is considered a working day for all employees, including those who live in the D.C. area. Everyone scheduled to work that day is expected to work a full day. Any requests for leave must be made in advance and approved by the head of the department if the employee's attendance is determined not to be required that day.

Any early departure for a department on Jan. 20 must be approved by the appropriate Executive Committee member. Requests from non-agreement-covered employees to work from home on that day will not be permitted unless the employee already has a planned work schedule from home that has been pre-approved by management.

Getting To and From Work

Due to extraordinary security measures and significantly altered traffic patterns expected in Washington on Jan. 20, employees should plan their commute to and from work in advance. Build extra time in anticipation of delays due to road closures and crowding. Please check www.inauguration.dc.gov and your local news for information about your commuting options.

MARC and VRE commuter trains will be all-reserved service on that day; however, Amtrak employees reporting for work will be permitted to ride free using their flash pass and are expected to stand on full trains. Both services will operate on adjusted schedules and not all stations will be served. Each service's respective Web site contains information on schedule changes. Normal flash pass privileges will apply to Amtrak trains.

In addition, a limited number of parking spots will be available at the Ivy City coach yard. A shuttle train will be operating that day between the station and the yard.

Volunteers Needed

Employee volunteers are urgently needed to assist passengers and manage traffic flow at New York Penn, Philadelphia, Wilmington, Baltimore and Washington. Employees who want to volunteer should first check with his or her supervisor. Managers are encouraged to allow their direct reports to volunteer when possible.

To volunteer in New York, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Operational Changes

Extra trains and cars have been added to the Jan. 20 schedule to maximize capacity and inventory has been loaded into the Arrow system. A majority of the extra capacity available is southbound into Washington in the morning and northbound from Washington in the afternoon. Information about service that day is posted on Amtrak.com.

To meet demand, Mechanical forces are reducing shop counts as much as possible and the company has leased equipment from New Jersey Transit.

Message from President Kummant on PEB Report

Dear Co-workers,

Earlier this week, the Presidential Emergency Board (PEB) submitted to the president its recommendations for settling the ongoing negotiations between Amtrak and nine of the unions that represent our employees. On Jan. 30, if the PEB recommendations are rejected and no agreements are reached, the parties may pursue self-help.

As you probably know, Amtrak and the unions presented their arguments in testimony before the PEB last month. There are reasons why the major issues that keep us from reaching agreements — full backpay and work rules — remain unresolved. They are complicated and could have significant consequences on the company's financial and competitive position.

Between now and Jan 30, we have an opportunity to negotiate a settlement that what do we want to say (doesn't put the company in dire financial position and that is good for Amtrak and its employees...what do we say about congress)

It's in everyone's interest that we come to a resolution before a strike has a detrimental effect on the economy, the railroad and the millions of Americans who rely on us every day. Not to mention what it could do to divide Amtrak employees.

While there is a great deal at stake, I want to remind everyone that we are currently in the midst of a cooling-off period and must remain focused on running a safe, reliable and customer-focused railroad. It's extremely important that we all maintain the high degree of professionalism that the traveling public has come to expect.

This process is importantI want to thank the five members of the PEB for their service, particularly given the demands of the holiday season.

Sincerely,

Alex Kummant
President and CEO

Message from President Kummant on PEB Report

Dear Co-workers,

By now, I am sure many of you have read or have learned that the Presidential Emergency Board (PEB) issued its set of recommendations on Dec. 30. We now face a clock ticking toward a potential strike. Between now and Jan. 30, we have an opportunity to negotiate a settlement before we reach that point.

This week, we plan to sit down with our unions to discuss an agreement based on the recommendations of the PEB and our conversations on Capitol Hill.

To that end, last week, we held a series of meetings on Capitol Hill about our fiscal situation, particularly with respect to paying more than half of the full amount of retroactive in FY '09. I'll just tell it like it is: this could be painful unless we get some assistance from Congress.

We're not all that far apart on a number of issues. On balance, we're generally in sync on the wage increase and the health care package we'd proposed. But our biggest obstacle to reaching a settlement is — and always has been — our ability to afford full retroactive pay. The position we took with the PEB, as it related to retroactive pay, reflected our best assumptions on the company's ability to pay.

We obviously believe all of our employees deserve to be paid a fair market wage, and our only limitation was simply our ability to pay. What the PEB recommends — full back pay — is a sum of money that isn't readily available and that could significantly affect our operations.

It's in everyone's interest that we come to a resolution before a strike has a detrimental effect on the economy, the railroad and the millions of Americans who rely on us every day. Not to mention what it could do to divide Amtrak employees.

In the meantime, I want to remind everyone that we are currently in the midst of a cooling-off period and must remain focused on running a safe, reliable and customer-focused railroad. If you are a front-line employee and are asked about the potential of a strike, you should let passengers know that we're committed to resolving our issues without a strike and that we plan to operate normally.

It's extremely important that we all maintain the high degree of professionalism that the traveling public has come to expect.

Sincerely,

Alex Kummant
President and CEO

Message from President Kummant on PEB Report

Dear Co-workers,

While the recommendations outlined by the Presidential Emergency Board in its report to the President were not exactly what we had hoped for, we nevertheless had an opportunity to present our case as part of an important process.

We now face a clock ticking toward a potential strike that no one really seems to want. Between now and Jan. 30, we have an opportunity to negotiate a settlement before we reach that point.

We're not all that far apart on a number of issues. On balance, we're in synch on the wage increase and the health care package we'd proposed. But our biggest obstacle to reaching a settlement is — and always has been — our ability to afford full retroactive pay. We're talking about a sum of money that isn't readily available and that could significantly affect our operations.

Last week, we held a series of meetings on Capitol Hill about our fiscal situation, particularly with respect to paying more than half of the full amount of retroactive pay next fiscal year. I'll just tell it like it is: this will be painful unless we get some assistance from Congress.

This week, we plan to sit down with our unions to discuss an agreement based on the recommendations of the PEB and our conversations on the Hill.

It's in everyone's interest that we come to a resolution before a strike has a detrimental effect on the economy, the railroad and the millions of Americans who rely on us every day. Not to mention what it could do to divide Amtrak employees any more than it might have already.

In the meantime, I want to remind everyone that we are currently in the midst of a cooling-off period and must remain focused on running a safe, reliable and

Message from President Kummant on Tentative Labor Agreements

Dear Co-workers,

A few moments ago, Amtrak and representatives of the nine unions before the Presidential Emergency Board signed tentative agreements, thereby averting a strike that could have taken place on Jan. 30.

Details of the agreements will be sent to the respective union members for ratification over the next several weeks, and will not be publicly disclosed until that process has begun.

The nine unions affected are the Brotherhood of Maintenance of Way Employees; International Brotherhood of Electrical Workers; International Association of Machinists and Aerospace Workers; Brotherhood of Railroad Signalmen; Joint Council of Carmen, Helpers, Coach Cleaners and Apprentices; American Train Dispatchers Association; National Conference of Firemen and Oilers/Service Employees International Union; American Railway and Airline Supervisors Association (Maintenance of Equipment, Maintenance of Way).

On behalf of the board of directors, I want to thank the leadership of the labor organizations. It has not been easy for any of us, and I know they share our sense of relief and resolve to move forward in a productive and cooperative spirit to provide excellent passenger rail service.

We have averted a strike that could have had a crippling effect on the lives of millions of Americans. More importantly, we have jointly reached tentative agreements that enable us to get back to what brings us together, rather than what sets us apart. For Amtrak to succeed, we all need to push forward in the same direction.

I encourage everyone to put the disputes from the past behind them and to focus on what we can learn from this experience and how we can grow together.

Sincerely,

Alex Kummant
President and CEO

Important Payroll Message for Agreement-Covered Employees That Are Paid Weekly

Most weekly paid agreement employees will have an incorrect amount of 55 cents more than should have been deducted for their health care contribution from the August 1, 2008 paycheck. TCU and ASWC represented employees will have no health care deduction with this paycheck, when there should be one. This occurred because of data input errors in the preparation of the checks.

The employees who had 55 cents erroneously deducted will notice a deduction of \$83.12 instead of the proper deduction of \$82.57.

As a result, a one-time correction will be made so that the August 8 paycheck will reflect a deduction of \$82.02, to make up for the extra 55 cents deducted in this Friday's paycheck.

For those TCU and ASWC represented employees who had no health care deduction taken from the August 1 paycheck, a deduction of \$82.57 will be taken from the paychecks dated August 8 and August 15.

A similar correction will be made in the August 8 and August 15 paychecks for part-time TCU employees.

We apologize for any inconvenience this has caused. Please contact the Amtrak Benefits Service Center at 800-481-4887 if you have any questions.

Important Message for Agreement-Covered Employees That Are Paid Weekly

Weekly paid agreement employees will have an incorrect amount deducted for their health care contribution from the August 1, 2008 check except for those employees represented by TCU and ASWC. This occurred because of a data input error in the preparation of the checks.

Employees represented by the TCU and ASWC will see no health care deduction. The rest of the weekly paid employees will notice a deduction of \$83.12 — which is 55 cents more than the \$82.57 medical coverage deduction that should be taken in the first two paychecks of every month.

As a result, a one-time correction will be made so that the August 8 paycheck will reflect a deduction of \$82.02, to make up for the extra 55 cents deducted in this coming Friday's paycheck.

For those TCU- and ASWC-represented employees who had no health care deduction taken from the August 1 paycheck, a deduction of \$82.57 will be taken from the paychecks dated August 8 and August 15.

A similar correction will be made in the August 8 and August 15 paychecks for part-time TCU employees.

We apologize for any inconvenience this has caused. Please contact the Amtrak Benefits Service Center at 800-481-4887 if you have any questions.

Important Message for Employees Paid Weekly

Eligible employees represented by the TCU, ASWC and ARASA PLS, which comprise approximately one-third of Amtrak's agreement-covered workforce, are scheduled to receive their retroactive wage payments on August 29.

At that time, those employees will also receive a customized summary statement that breaks down the calculation for the individual employee, and a comprehensive list of Frequently Asked Questions designed to provide answers about health care benefits deductions and other concerns employees may have regarding the calculations.

The payments cover the period from July 1, 2005 through June 30, 2008, in accordance with the agreements. In addition, the new rates of pay took effect June 1, 2008.

Based on the agreements, \$82.57 is deducted from the first two paychecks of agreement-covered employees each month to cover the required medical coverage contribution.

TCU, ASWC no deduction

Due to an incorrect data input problem, many weekly paid agreement employees had either no deduction, or a deduction of \$83.12, for medical coverage on their checks dated August 1. Corrections are being entered into the payroll system so that those affected employees will receive the correct deduction of \$82.57 on their checks dated August 8. For those employees who had no deduction on August 1, a deduction of \$82.57 will be taken on their checks dated August 22. For those employees who had an incorrect deduction on August 1, the excess deduction of \$.55 will be reimbursed on their checks dated August 8.

We apologize for any inconvenience this has caused. Please contact the Amtrak Benefits Service Center at 800-481-4887 if you have any questions.

Important Payroll Message for Agreement-Covered Employees Who Are Paid Weekly

Most weekly paid agreement employees will have an incorrect amount of 55 cents more than should have been deducted for their health care contribution in the August 1, 2008 paycheck. TCU and ASWC represented employees will have no health care deduction with this paycheck, when there should be one. This occurred because of data input errors in the preparation of the checks.

The employees who had 55 cents erroneously deducted will notice a deduction of \$83.12, instead of the proper deduction of \$82.57.

As a result, a one-time correction will be made so that the August 8 paycheck will reflect a deduction of \$82.02, to make up for the extra 55 cents deducted in this Friday's paycheck.

For those TCU and ASWC represented employees who had no health care deduction taken from the August 1 paycheck, a deduction of \$82.57 will be taken from the paychecks dated August 8 and August 15.

A similar correction will be made in the August 8 and August 15 paychecks for part-time TCU employees.

We apologize for any inconvenience this has caused. Please contact the Amtrak Benefits Service Center at 800-481-4887 if you have any questions.

Amtrak Reauthorization Bill Passes House by Large Margin

Yesterday afternoon, the U.S. House of Representatives passed the Passenger Rail Investment and Improvement Act (H.R. 6003). Despite threats of a presidential veto, the bill passed by a vast margin of 311-104.

The bill authorizes \$14.4 billion in federal funding for Amtrak over the next five years. Passed last October, the Senate version of the bill (S. 294) authorized \$11.4 billion. The House and Senate will now meet in a conference committee to reconcile differences between the two bills.

“We’re pleased that the House and Senate have now passed major bills authorizing funding for Amtrak,” said President and CEO Alex Kummant. “Both indicate strong support for our company and our mission to provide America with safe and reliable intercity passenger rail service. The big vote in the House shows Congress understands the critical need for a balanced transportation policy, which includes Amtrak intercity rail.”

Both the House and Senate reauthorization bills contain provisions to provide resources for state of good repair and other important rail development opportunities. And for the first time, they include funds to match state investments in corridor development and equipment procurement.

The last Amtrak reauthorization bill was enacted in December 1997.

Message from President Kummant on Labor Agreements

Dear Co-workers,

I am pleased to announce that the Transportation Communication International Union, the Amtrak Service Workers Council and the ARASA Product Line Supervisors have ratified their contract agreements.

The ratification of these agreements, which cover one-third of our unionized workforce, represents the final step on our path to securing current contracts for all of our nearly 16,000 union-represented employees.

Employees covered by one of these unions should expect to receive retroactive wage payments on or about August 29.

As a reminder, eligible UTU Yardmasters and Stewards are scheduled to receive their retroactive wage payments on July 3. UTU Yardmasters and Stewards will receive a customized summary statement that breaks down the calculation for the individual employee and a comprehensive list of Frequently Asked Questions.

In case you have questions that aren't answered in those documents, please call the call center established to field employees' inquiries (the phone number is in the FAQs you will receive).

My hope is that this last set of agreements formally gives closure to what was a trying period in Amtrak history. We will face a range of challenges and opportunities in the future, and I am counting on a committed, united workforce that can overcome those challenges and seize the opportunities.

Sincerely,

Alex Kummant
President and CEO

Ten Labor Agreements Ratified

The tentative agreements reached with nine unions in January and the UTU (NEC and Off-Corridor, North End) in February have all been ratified by their respective membership. Once the agreements are signed, an implementation schedule will be finalized.

The nine unions with renegotiated agreements in place are the Brotherhood of Maintenance of Way Employees; International Brotherhood of Electrical Workers; International Association of Machinists and Aerospace Workers; Brotherhood of Railroad Signalmen; Joint Council of Carmen, Helpers, Coach Cleaners and Apprentices; American Train Dispatchers Association; National Conference of Firemen and Oilers/Service Employees International Union; American Railway and Airline Supervisors Association (Maintenance of Equipment); American Railway and Airline Supervisors Association (Maintenance of Way).

Acela Express 2154 Strikes Workers

At approximately 1:15 p.m. today, three persons were reported to have been struck by northbound *Acela Express* Train 2154 just north of the Providence, R.I., station.

The persons involved in the incident were two Amtrak employees and one contractor who were inspecting tracks in the area. One person was fatally injured and the other two were taken to a hospital.

There were 162 passengers and six employees on board Train 2154 at the time of the incident.

The situation is currently unfolding, and updates will be provided as they become available.

Message from President Kummant on *Acela Express* 2154 Incident

Dear Co-workers,

Before I provide you with an update on the incident with *Acela Express* Train 2154 yesterday afternoon, I want to first and foremost express my own sorrow over the loss of life and serious injury as a result of what took place. I know I am not alone in this sentiment, and it pains us all to lose anyone on the railroad.

At approximately 1:15 p.m. yesterday, three people were struck by Train 2154 as they inspected track just north of the Providence station, resulting in the fatality of a contract employee and injuries to two of our Engineering department employees.

One of the Engineering department employees is being treated at a hospital for very serious injuries and our thoughts are with him. The second employee was treated and released from the hospital last night.

The third person involved, a contractor and former Amtrak Engineering department employee, was fatally injured.

I know that you join me in extending our deepest sympathies to the friends and family of the contract employee, whom many knew as part of the Amtrak family.

Our thoughts and well wishes are with the Engineering department employees and their families, as they strive to recover from this.

Sincerely,

Alex Kummant
President and CEO

Wage Increases, Retroactive Wage Payments Take Effect for BLET, SMWIA in May

The new rates of pay and retroactive wage payments for the Brotherhood of Locomotive Engineers and Trainmen and the Sheet Metal Workers International Association will be paid as follows:

- The new rates of pay for BLET and SMWIA positions take effect on May 1, 2008, and will begin to appear as early as May 16, 2008, and in full in the May 23, 2008, paychecks.
- The first employee medical plan contribution of \$166.25 will be deducted from the May 30 paychecks. Due to a programming error, the health care contribution was mistakenly deducted from your May 2, 2008, paycheck. This is being corrected, and that deduction will be added back to your May 9, 2008, paycheck. After the initial deduction on May 30, contributions in future months will be split between the first and second checks of each month.
- The first installment of the retroactive wage payment (40% of the total adjustment) is scheduled to be paid in a separate check (or through direct deposit) on May 30, 2008, and will be calculated on the wages through April 30, 2008, for employees eligible to receive the retroactive wage payment. A summary report of the full retroactive adjustment along with a list of frequently asked questions and answers will be furnished with the payment to provide employees with information about the calculation and who to contact about specific disputes regarding the payment.
- In addition, the contract settlements provide employees with the ability to “opt out” of medical plan coverage, thereby not having to make the monthly contributions as of June 1, 2008. A separate mailing has been sent to employees about the Health Care

coverage changes, including the form that must be submitted if employees wish to opt out of Health Care coverage. The required “opt out” form must be returned before May 16, 2008.

May 2, 2008 • Page 1 of 1

Message from President Kummant on May 9 Retroactive Wage Payments

Dear Co-workers,

I am pleased to inform you that approximately 9,000 employees represented by several unions will receive retroactive wage payments this Friday. In accordance with the agreements reached with the unions, this payment represents 40 percent of the total retroactive adjustment.

In addition to the check or direct deposit notice, eligible employees will receive a customized summary statement that breaks down the calculation for the individual employee, and a comprehensive list of Frequently Asked Questions designed to provide answers about health care benefits deductions and other concerns employees may have regarding these calculations (I've attached a copy to this note).

The process associated with verifying the amount due to each employee is extremely complex and its magnitude is unprecedented for Amtrak. Teams of employees from the Finance, Information Technology, Human Resources and Labor Relations departments have worked diligently for months, analyzing 90 million lines of data related to each of the approximately 9,000 employees' work histories during a period of nearly six years.

Because of the complexity of the computation, I encourage you to thoroughly review the summary statement and the FAQs to help you understand what was included in the calculations. If you have questions that aren't already answered in those documents, we have established a temporary call center (the phone number is in the FAQs) designed to field employees' inquiries. Your inquiry will be logged and assigned a case number by the call center to initiate the review process.

Again, please keep in mind that this is an exceptional event for Amtrak and that the review process could take weeks, depending upon the issue and the volume of calls made. The sooner your call is received, the quicker your issue can be investigated and resolved.

Eligible employees represented by the following unions should receive the retroactive wage payment on May 9: Brotherhood of Maintenance of Way Employees; International Brotherhood of Electrical Workers; International Association of Machinists and Aerospace Workers; Brotherhood of Railroad Signalmen; Joint Council of Carmen, Helpers, Coach Cleaners and Apprentices; American Train Dispatchers Association; National Conference of Firemen and Oilers/Service Employees International Union; American Railway and Airline Supervisors Association (Maintenance of Equipment, Maintenance of Way), International Brotherhood of Boilermakers and Blacksmiths; and UTU Train Service.

Eligible employees represented by the Brotherhood of Locomotive Engineers and Trainmen and the Sheet Metal Workers International Association are scheduled to receive retroactive wage payments on May 30.

Sincerely,

Alex Kummant
President and CEO

Message from President Kummant on Tentative Labor Agreements

Dear Co-workers,

I am pleased to announce that earlier today, we reached tentative agreements with the Transportation Communication International Union, the American Service Workers Council and the ARASA Product Line Supervisors.

Details of the agreements, which cover one-third of our unionized workforce, will be sent to the respective union members for ratification.

Pending the ratification of the TCU, ASWC and ARASA PLS agreements, all of our nearly 16,000 union-represented employees will soon be operating under current contracts.

Following the distribution of retroactive wage payment checks to approximately 9,500 employees earlier this month, the first installment of the retroactive wage payment (40% of the total adjustment) for employees represented by the BLET and SMWIA will be issued on Friday, May 30.

In addition, UTU Yardmasters and Stewards wage increases will become effective June 1, and those employees are scheduled to receive retroactive wage payments on or about July 3.

Like the distribution of retroactive pay for certain employees on May 9, eligible employees represented by BLET, SMWIA, and UTU Yardmasters and Stewards will receive a customized summary statement that breaks down the calculation for the individual employee, and a comprehensive list of Frequently Asked Questions designed to provide answers about health care benefits deductions and other concerns employees may have regarding the calculations. The FAQ updated for BLET and SMWIA is attached to this note.

Due to the complexity of the computation, if you are one of the

employees receiving a check, you should review the summary statement and the FAQs to fully understand what was included in the calculations. If you have questions that aren't already answered in those documents, we have established a temporary call center (the phone number is in the FAQs) designed to field employees' inquiries.

The retroactive payment calculation requires meticulous attention and the process for verifying the amount due to each employee is extremely thorough. As I've stated before, the scope of this endeavor is unprecedented for Amtrak and is being carried out by a group of dedicated employees from a number of departments.

I am pleased to say that so far in this process, it appears that the temporary call center has served as a helpful tool for employees and we have received a relatively low number of disputes related to the calculations.

I look forward to the ratification of the last of our tentative agreements. It is my hope that as we close this chapter in Amtrak history, we move forward as a united workforce that will collectively focus on how we can grow together.

Sincerely,

Alex Kummant
President and CEO

Amtrak Statement

The following press release is being issued this afternoon:

WASHINGTON – The National Railroad Passenger Corporation today announced the resignation of its President and CEO, Alex Kummant.

“On behalf of the entire Board, I’d like to thank Alex for his leadership over the past two years,” said Donna McLean, Chair of the Board. “During the past two years, the company experienced exciting economic times, strong ridership and revenue growth, solid profit and loss performance, and the advancement of the Amtrak brand overall. He also successfully oversaw the completion of labor agreements with all of the unions representing Amtrak’s employees. We are grateful to Alex for his contributions to the company. We wish him well in his future endeavors.”

Alex Kummant reflected that he was “proud of what the management team at Amtrak had accomplished over the last two plus years and that [he believed] Amtrak had a strong operational and financial base to get through the coming turbulent times.” He continued that he “would help in any way to make this a smooth transition.”

“I’d like to thank Alex for his commitment to Amtrak over the past two years,” said Hunter Biden, Vice Chair of the Board. “Our Board is committed to keeping Amtrak on an aggressive path of performance improvement. Current economic conditions highlight the need for us to continue finding ways to drive quality and customer service across the system. We are moving forward with the development of an aggressive long-term plan for the company, based on the recent legislation passed by Congress.”

After record ridership and revenue in FY08, a downturn in the economy and new legislative requirements present challenges as well as opportunities. In the coming years, Amtrak will need leadership to maximize its potential and utility to the traveling public, while increasing the efficiency of the whole operation. The Board is confident that this transition will be seamless, with William Crosbie, Amtrak’s Chief Operating Officer, as Acting President and CEO for an interim period.

Letter from William Crosbie

Dear Co-workers,

When the board of directors asked me to serve as acting president and chief executive officer, I agreed because of my loyalty to Amtrak and my faith in all of you.

I've been with Amtrak nearly six years and have had the opportunity to travel around the system and get to know many of you. If we haven't yet met, you should know that the railroad has been in my blood long before my time here. My career in the railroad industry started as a child working for my father's construction company. We provided rock drilling, blasting, and heavy construction services to CP Rail. Over 24 years ago, I hired on CP Rail as a Signal Gang Helper "C", and never looked back, working various jobs in freight and passenger rail, as well as transit. I am proud of my service at Amtrak.

I want to assure you that, along with the board of directors, we have a strong leadership team in place that will ensure a seamless transition until a choice is made for the permanent position. In the interim, I expect everyone to maintain focus on what's most important — the day-to-day activities that we all count on you to carry out safely and professionally. As for me, I remain committed to my duties as chief operating officer, in addition to taking on my newly assigned responsibilities.

The course set before us has not changed; we remain focused on operating safe and efficient service with a high degree of customer service, while we continue to move ahead with shaping a passenger railroad that will thrive in the coming decades.

Despite an uncertain economy, our path is in some ways more clearly delineated now than it has been in recent years by the enactment of the authorizing legislation last month.

Yet like most industries, Amtrak is not immune to the downturn in the economy. Now more than ever, we need to work particularly hard to make sure that we hold onto our customers — including the many first-time riders that were introduced to Amtrak in the last year — and entice prospective travelers. We do that by delivering on-time performance where we control it, equipment that is clean and reliable, and service that makes passengers feel welcome and comfortable.

As many of you know, I put a great deal of emphasis on safety. No matter what your job function, the safety of our co-workers and passengers always comes first.

It is your hard work and dedication that have contributed to the record years we've had. I, along with the senior leadership team, am counting on you to help us continue that trend.

Staying safe means staying focused. As always, please look out for one another and keep up the good work.

Sincerely,

William L. Crosbie
Acting President and Chief Executive Officer

Special Employee Advisory

Dear Co-workers,

I recognize that most of you are extremely busy doing your part to ensure that we deliver safe and reliable service on the busiest week of the year, so I will keep my introduction short for now.

First off, I'd like to thank Bill Crosbie for stepping in as acting president and chief executive officer during the brief interim period — he is a selfless leader and I look forward to working with him very closely in his role as chief operating officer.

Many of you may not know me, but I know you. What I mean is that over the course of more than a decade, I have had the opportunity to work with Amtrak in a number of capacities, the most recent of which was as administrator at the Federal Railroad Administration and the U.S. Department of Transportation's designee on Amtrak's board of directors. What you will come to know about me is that I am more comfortable in the field than I am behind the desk. I will be traveling the system and getting to know you personally on your trains, at your stations, and at your facilities.

I want you know that I believe that a national — interconnected — intercity passenger rail service is critically important for the mobility and energy independence of the United States. I am personally committed to excellence in safety, being more energy-efficient, and establishing an environment where the contributions and innovations of the men and women of Amtrak will combine to build a first-class intercity passenger railroad that all Americans can be both proud of and connected to. That's why I believe in Amtrak.

Please remain focused on providing safe and reliable service to America during the busy Thanksgiving week.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Senate Passes Amtrak Bill

By a vote of 74 to 24, the Senate last night passed a combined Amtrak authorization and rail safety bill.

The authorization enables \$12.9 billion in funding for the FY 2009-2013 period, approximately \$2.5 billion for each year within that period. The legislation includes \$1.9 billion for state grants for rail programs, reforms such as improved accounting and standards for service and on-time performance, and a requirement for a collaborative NEC state-of-good-repair plan.

It is expected that the president will sign the bill into law. The legislation serves as the policy framework for passenger rail and recommends funding levels for the five years; annual appropriations legislation must still be passed by Congress.

In other news, the U.S. DOT this week announced that it would make available \$30 million to match local investments in 15 rail capacity enhancement projects across the country. The funds for states are aimed at reducing delays and expanding capacity on existing intercity passenger rail routes, as well as helping establish new services.

In response to the announcement, the company offered the following statement: "Amtrak has always supported some form of matching federal grants to assist intercity passenger rail capital development, so that states can make choices about where to invest their transportation dollars. These funds, which are provided by Congress, and Secretary Peters' announcement were welcome steps in rail corridor development."

Special Employee Advisory
Monday Sept 22

Amtrak today announced that it has selected ARAMARK Corporation to serve as the company's food and beverage warehouse management provider effective Jan. 1, 2009, following a six-month evaluation of bids from vendors to provide the best service and value to passengers.

With the expiration of its contact with Gate Gourmet International at the end of this calendar year, Amtrak explored the marketplace in search of best-in-class systems and industry best practices.

"ARAMARK is best equipped to provide the type of service that meets our future needs, as we strive to become more cost-efficient while continuously improving the quality of our service," said Vice President of Marketing and Product Management Emmett Fremaux. "I think everyone involved with the operation — from our lead service attendants to the senior management team — will be pleased with the selection of this vendor."

While the contract agreement is being finalized, the transition process to the new vendor begins immediately with the establishment of ARAMARK and Amtrak teams who will be planning and implementing the steps necessary to ensure a smooth transfer of operations from the current service provider. The transition process is expected to have little or no impact on routine warehouse activities or passengers. An Amtrak transition steering committee has also been formed to manage and provide regular communication on the process for employees such as lead service attendants, service attendants and other Amtrak employees associated with the food and beverage operation.

"We look forward to a smooth transition over the course of the next 90 days," said Chief of Service Delivery Kevin Scott. "Our objective is to work with all stakeholders, including the employees and management of Gate Gourmet currently operating the commissaries, to make sure that happens."

ARAMARK Corporation is a leader in professional services, providing award-winning food services, facilities management, and uniform and career apparel to health care institutions, universities and school districts, stadiums and arenas, and businesses around the world. Headquartered in Philadelphia, ARAMARK has approximately 250,000 employees serving clients in 19 countries.

Gate Gourmet Incorporated has been the service provider for the last nine years and participated in the RFP process. Amtrak issued a request for proposal (RFP) in April inviting potential vendors to submit proposals. As part of the process, a Technical Evaluation Committee (TEC) was appointed with representatives from the Food and Beverage, Service Delivery and On-Board Systems Group of the Marketing and Product Management department, as well as representatives for the Transportation, Finance and Procurement departments.

Congress Passes Bill Linking Reauthorization with Rail Safety Measures

On the eve of its election recess, Congress today passed a bill that lumps Amtrak's reauthorization bill with a rail safety bill. By a vote of xxx-xxx, the bill authorizes \$xx.x billion over five years for the company and provides ...

The rail safety portion of the bill calls for ...

The \$xx.x billion reauthorization is the culmination of talks between the House and Senate to reconcile their respective versions. The House version of the reauthorization bill authorized \$14.4 billion over five years while the Senate bill only provided for \$11.4 billion.

Attaching the rail safety bill provided the impetus to finish the reauthorization bill in time for the election recess. With Congress expected to leave Washington as early as Friday and no promises of a lame-duck session, there was no guarantee that another chance to take up the issue would occur this year.

The House also took up a continuing resolution on XXX to fund the federal government beyond next week's start of the new fiscal year. The continuing resolution will fund the federal government at existing FY '08 funding levels through March 6.

Congress May Combine Reauthorization Bill with Rail Safety Measures

In an attempt to get it passed before leaving for the elections, it appears likely that Congress will combine Amtrak's reauthorization bill with a rail safety bill, according to *CongressDaily*.

The House version of the reauthorization bill authorizes \$14.4 billion over five years while the Senate bill only provides for \$11.4 billion. Attaching the rail safety bill may provide the impetus to finish the reauthorization bill.

With Congress trying to leave Washington as early as Friday and no promises of a lame-duck session, congressional sources told the paper that there is no guarantee that another chance to take up the issue will occur this year.

In any event, the House is expected to take up a continuing resolution on Wednesday to fund the federal government beyond next week's start of the fiscal year. If Congress does not take up the reauthorization/rail safety bills, the continuing resolution would fund Amtrak at existing funding levels through March 6.

Congress Passes Continuing Resolution for FY 09; House Action Taken on Amtrak Reauthorization

On the eve of its recess/end of session, Congress took action on Amtrak appropriations and reauthorization legislation this week.

Today/yesterday, Congress approved a Continuing Resolution that will provide Amtrak funding for FY 09 through March 6, 2009, at the FY 08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

The House also passed XXX today/yesterday, a compilation a number of rail-related bills. Essentially combining a rail safety bill and Amtrak's reauthorization bill, the legislation enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan. *Can I talk about OTP fines or the pilot that would allow freights to bid on operating passenger service on current Amtrak routes?*

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for Positive Train Control on certain rail main lines used by passenger and freight trains; guarantees a maximum 12-hour work period and a minimum 10-hour rest period for train crews and signal employees and puts a cap on total monthly work hours for train crews; and requires risk-based safety programs for all major railroads.

The Senate is expected to vote on the XXX today/next week/before the end of the session. The President has threatened to veto the bill.

Combining the reauthorization legislation with the rail safety bill — action on which was spurred by the Metrolink incident on Sept. xx — provided the impetus to finish the reauthorization bill before the end of Congress' session.

Please distribute at all safety meetings and post on all employee bulletin boards.

Food and Beverage Managed Services Contract
Special Employee Advisory or *Amtrak This Week* Top Story
Draft

Amtrak today announced that it has selected ARAMARK Corp. to serve as the company's food and beverage warehouse management provider effective Jan. 1, 2009, following a six-month evaluation of bids from vendors to provide the best service and value to passengers.

With the expiration of its contact with Gate Gourmet Inc. at the end of this calendar year, Amtrak explored the marketplace in search of best-in-class systems and industry best practices.

"ARAMARK is best equipped to provide the type of service that meets our future needs, as we strive to become more cost-efficient while continuously improving the quality of our service," said Emmett Fremaux, vice president, Marketing and Product Management. "I think everyone involved with the operation — from our lead service attendants to the senior management team — will be pleased with the selection of this vendor."

Now that the contract is finalized, a transition steering committee plan and implement steps to ensure a smooth transfer of operations from the current service provider. The transition process is expected to have little or no impact on routine warehouse activities or passengers. The transition steering committee will also manage and provide regular communication on the process for employees such as lead service attendants, service attendants and other Amtrak employees associated with the food and beverage operation.

"We look forward to a smooth transition over the course of the next 90 days," said Kevin Scott, chief, Service Delivery. "Our objective is to work with all stakeholders, including the employees and management of Gate Gourmet currently operating the commissaries, to make sure that happens."

ARAMARK Corp. is a leader in professional services, providing award-winning food services, facilities management, and uniform and career apparel to health care institutions, universities and school districts, stadiums and arenas, and businesses around the world. Headquartered in Philadelphia, ARAMARK has approximately 250,000 employees serving clients in 19 countries.

Gate Gourmet Inc. has been the service provider for the last nine years and participated in the RFP process. Amtrak issued a request for proposals in April, inviting potential vendors to submit proposals. As part of the process, a Technical Evaluation Committee was appointed with representatives from the Food and Beverage, Service Delivery and On-Board Systems groups of the Marketing and Product Management department, as well as representatives for the Transportation, Finance and Procurement departments.

Kummant, McLean Defend FY '09 Funding Needs

Board Chairman Donna McLean and President and CEO Alex Kummant testified last Thursday before the Senate Appropriations Subcommittee on Transportation, Housing and Urban Development in support of the company's FY '09 funding request. Amtrak's Grant and Legislative Request for \$1.67 billion was submitted to Congress on Feb. 20.

McLean opened testimony by providing an outline of the board's current effort to refine the company's five-year strategic plan.

"Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider," said McLean. "Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success."

In his prepared statement, Kummant took the opportunity to reiterate the great potential for passenger rail travel in the coming years and provided details on the company's recent successes in ridership and ticket revenue.

He also outlined strategic some challenges. "To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities," said Kummant. "We are working on increasing revenue, reducing costs, and improving both trip times and system-wide on-time performance."

To reach these goals, Kummant explained, the company seeks \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service. Separately, the company has requested an additional appropriation of \$114 million, which is necessary to fund retroactive payments in FY '09, in accordance with the Presidential Emergency Board recommendation.

"On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable ... I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations," Kummant added.

Officers Testify Before Senate on FY '09 Funding Needs

As the next step in the annual funding process, Board Chairperson Donna McLean and CEO Alex Kummant testified last Thursday before the Senate Appropriations Subcommittee on Transportation, Housing and Urban Development. The company's formal Grant and Legislative Request for \$1.67 billion was submitted to Congress on Feb. 20, and last week's testimonies were an opportunity to present Amtrak's needs in person.

McLean opened testimony by providing an outline of the board's current effort to refine a five-year strategic plan.

"Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider," said McLean. "Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success."

Other issues highlighted by McLean include the importance of intermodal travel, corridor development, and Amtrak's role in the nation's transportation policy to provide a system that offers various modes of travel that maximize the consumer's utility.

In his prepared statement, Kummant took the opportunity to reiterate the great potential for passenger rail travel in the coming years and provided details on the company's recent successes in ridership, revenue and labor negotiations. He also outlined strategic concerns.

"To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities," said Kummant. "We are working on increasing revenue, reducing costs, and improving both trip times and system-wide on-time performance."

To reach these goals, Kummant explained, the company is asking for \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service. In addition, the company has requested an additional \$114 million, which is necessary to fund back-pay requirements in FY '09 as part of the recent labor agreements.

"On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable...I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations," Kummant added.

Partial *Coast Starlight* Service Resumed

Partial rail service aboard the *Coast Starlight* between Los Angeles and Seattle will resume with the northbound Train 14 on Tuesday, April 15. The first southbound Train 11 will depart Seattle on Wednesday, April 16.

Passengers will transfer to motorcoach service between Eugene and Klamath Falls, Ore., in both directions. The northbound and southbound *Coast Starlight* Trains 14 and 11 will operate normally between Los Angeles and Klamath Falls.

Company Solicits Bids for Food and Beverage Operations

In an ongoing effort to improve efficiencies, operating performance and costs controls, Amtrak is issuing a Request for Proposals (RFP) this week to explore ways to strengthen commissary operations and leverage new technologies to enhance Food and Beverage activities. The contract with the current vendor, Gate Gourmet International, is set to expire at the end of the year.

This move reflects Amtrak's need to put into practice state-of-the-art warehouse systems that are efficient, yield excellent customer service and help reduce food and beverage losses. Food and Beverage losses have been cut by 25 percent — more than \$20 million — over the last three years.

Labor Update: Amtrak and the Yardmasters (United Transportation Union) have reached a tentative agreement. Details of the agreement have been sent to union members for ratification.

Important Note About Entering Time

Make sure your time is entered promptly! Employees represented by ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment), IBB, and UTU must enter time for work through March 31, 2008, by April 25, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment.

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the results of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

Benefits: Tomorrow is the deadline to submit receipts for healthcare or dependent care flexible spending accounts reimbursement for 2007. For more information, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Reminder: Beginning this Saturday, employees can only book personal tickets for weekend travel aboard *Acela Express* or non-*Acela* Business class trains within one hour of departure.

19 Days Until National Train Day

Enthusiasm for National Train Day is building as communities and employees across the system plan open houses, and stations in Washington, D.C., New York, Chicago and Los Angeles gear up for major events on May 10. Visit www.nationaltrainday.com for a list of open houses and events or to create an event in your area aimed at promoting passenger rail on May 10.

National Train Day materials such as buttons, stickers and posters have been sent to stations and crew bases for use by station and on-board personnel. Events leading up to May 10 include the “Coachella Express,” a special train that will carry **xxx number** of campers to the festival grounds in Indio, Calif., this Thursday and back on Monday morning.

Deadline for Kids Art contest....

Take our Daughters and Sons to Work Day is Thursday

Employees are welcomed to bring their children to work on Thursday as part of the National “Take our Daughters and Sons to Work Day.” There will be no formal corporate-sponsored events. Please adhere to the following safety guidelines:

Children are not allowed at sites where there is train movement or heavy equipment.
Children are not allowed in the cab of a moving locomotive under any circumstances.
Children are not allowed where their presence could disrupt operations or the movement of passengers.

Children are not allowed in areas where personal protective equipment is required.

Also, please verify your plans with your supervisor before bringing your kids to work.

Marketing and Product Management: Version 4 of “Service Standards: Manual for Train Service and On-Board Service Employees” is now in effect. The newly revised version removes outdated or redundant information and combines chapters to create a more logical flow of information, enabling employees to better perform their duties.

Government Affairs: President and CEO Alex Kummant is testifying on Wednesday on rail capacity before the House Subcommittee on Railroads, Pipelines and Hazardous Materials. On Tuesday, April 29, the House will introduce the Amtrak reauthorization bill; a subsequent hearing on the bill is scheduled for May 1.

Environmental Health and Safety: An environmental compliance audit is being held this week at the Ivy City facility in Washington, D.C., to assess compliance with federal, state and local regulations.

What Amtrak destination offers the best attractions for kids?

Orlando, Fla., gets my vote as the best destination for kids. With its plethora of amusement parks, including Walt Disney World, Universal Studios and Sea World, as well as numerous water parks and wildlife parks, it offers something for every child, including the child in all of us.

What Amtrak destination offers the best nightlife and restaurants for adult passengers?

Northeast Regional Service Making Progress

A *Regional Service* project, currently underway to improve product quality on the *Northeast Regional* trains, has accomplished a number of tasks thanks to the work of a multifunctional team focused on on-time performance, equipment quality, service quality and product quality.

Those items include new menu items on all *Northeast Regional* trains; new menu boards distributed and mounted in the cars; seat back menus on board all Coach cars; food and weekend ad posters installed in all Café cars with bulkhead frames; Operations Service Advisories, service guides and training videos distributed to all crew bases; briefings for all OBS and T and E employees, and the hiring and training of en route cleaners.

“The plan is to ‘re-launch’ the *Regional Service* with advertising support in a mid-June timeframe, with spruced up equipment, operating performance and customer service elements to deliver a consistently good travel experience to an expanding customer base,” said Patrick Pietrantonio, director, Product Management.

The plan is reminiscent of the NEC-*Acela Express* Service Improvement Program, which combined an integrated marketing campaign with an intense focus on customer service, performance management and reduced food and beverage costs. Pietrantonio added that the business goals of the *Northeast Regional* plan is to create a distinct product identity that is different from *Acela* and increasing ridership and revenue without taking business away from *Acela*.

Two other significant accomplishments of the plan include converting the split Dinette cars to all-table cars and centering the Café car on all 21 trainsets, which is expected to increase food and beverage sales by providing better access for Coach passengers.

Operational Update: Due to CSX Transportation track work, *Pere Marquette* Train 371 will operate one hour earlier to all stations along the route, through Friday, May 2.

Environmental Health and Safety: An FRA-funded safety culture survey — requested by the board of directors — is being conducted among Washington Terminal, crew base and Ivy City employees to assess perceptions of safety management; survey forms will be distributed during the week of May 5. The results and subsequent focus group findings will be presented to the board in July.

Media Relations: An interview with President and CEO Alex Kummant will air Wednesday, April 30 on “NBC Nightly News;” check local listings for times in your area.

Reminder: The deadline for the “Children of Amtrak” Art Contest is being extended until Thursday, May 2; all entries must be received by May 7. Complete rules at www.nationaltrainday.com/employees/artcontest.

Note: If you have questions regarding your benefits, contact the Amtrak Benefits Service Center at 800-481-4887.

National Train Day Question of the Week Winner

How can employees help spread the word about National Train Day?

Spreading the word about National Train Day can take on many forms, from greeting your customers to sending Amtrak e-cards to “Get Your Choo-Choo On,” to displaying printed materials. Word of mouth is the best tool we have to spread the news about National Train Day and all Amtrak service!

Donna Engstrom
Support Desk Representative
MARSCC, Philadelphia

National Train Day Question of the Week

What National Train Day events are you most looking forward to?

The Northeast Regional Service Re-Launch Project Underway

The Marketing and Product Management department is working with a multifunctional team that includes NEC Service Operations, System Operations, OBS Service Standards, Food and Beverage, Mechanical, Transportation and Industrial Design to improve current *Regional* service, leading to an enhanced product and an ad campaign slated for mid-June. Since it kicked off in October 2007, the NEC *Regional* Service “Re-Launch” Project is focusing on enhancing overall product quality by improving on-time performance, equipment and service features to grow ridership and revenue on Amtrak’s most heavily traveled service.

“We want to improve every area that touches our passengers to deliver a consistently satisfying travel experience to our expanding customer base,” said Patrick Pietrantonio, director, Product Management-East.

The June 2008 “re-launch” will include a new product identity and advertising — the new name, *Northeast Regional* and logo will appear on both sides and the center of the Café car; implementation of tactical pricing offers; tighter OTP tolerances; restructured Business class amenities; adjusted seat inventory to better accommodate monthly and multi-ride ticket holders; new and improved menu offerings, and en route cleaning practices and processes. In addition, the entire *Northeast Regional* fleet will have all-table café cars in all its trainsets. The café cars are being centered in the consists to provide easier access for Coach customers, which account for 75 percent of Café car revenue. The Café cars will also undergo a number of interior cosmetic improvements, including more comfortable booth cushions.

The project is being supported by service guides and training videos for OBS and T and E employees.

“The *Regional* service will improve significantly,” said Pietrantonio. “The impact we are looking for will come from a combination of incremental improvements in a variety of areas that will be noticeable to our customers and enhance their travel experience.

Future plans include additional food service car modifications, more Amfleet coach overhauls, a capital program to increase fleet size, and a plan to operate variable consists to maximize market demand.

The NEC Regional Service Re-Launch Project Underway

The Marketing and Product Management department is working with a multifunctional team that includes Mechanical, Transportation and Engineering to improve current *Regional* service, leading to an enhanced product and an ad campaign slated for mid-June. Since it kicked off in October 2007, the NEC *Regional* Service “Re-Launch” Project is focusing on enhancing overall product quality by improving on-time performance and equipment and service quality.

“We want to leverage the capabilities demonstrated in the NEC-*Acela* Service Improvement Program to deliver a consistently good travel experience to an expanding customer base,” said Patrick Pietrantonio, director, Product Management.

In the short term, the team has instituted new menu items on all Northeast *Regional* trains, distributed and mounted new menu boards in the cars, created seat back menus for all Coach cars and installed weekend ad posters in all Café cars with bulkhead frames.

The June 2008 “re-launch will also include a new product identity and advertising, implementation of tactical pricing, tighter OTP tolerances, restructured Business class amenities, improved capacity optimization, improved food service offerings, and better cleaning practices and processes. In addition, the split Dinette cars are being converted to all-table cars and the Café cars on all 21 trainsets are being centered on the consists to provide increased access for Coach customers, which account for 75 percent of Café car revenue. The Café cars will also undergo a number of interior cosmetic improvements.

The project is being supported by a number of service guides and training videos for OBS and T and E employees.

“The *Regional* service will not change significantly,” said Pietrantonio. “It is more appropriate to think of the impact we are looking for as a combination of incremental improvements in a variety of areas that touch the customer, rather than a formal re-branding effort.”

Future plans include additional food service car modifications, more Amfleet coach overhauls, a capital program to increase fleet size, and a plan to operate variable consists to maximize market demand.

Kummant, McLean Defend FY '09 Funding Needs

Board Chairman Donna McLean and President and CEO Alex Kummant testified last Thursday before the Senate Appropriations Subcommittee on Transportation, Housing and Urban Development in support of the company's FY '09 funding request. Amtrak's Grant and Legislative Request for \$1.67 billion was submitted to Congress on Feb. 20.

McLean opened testimony by providing an outline of the board's current effort to refine the company's five-year strategic plan.

"Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider," said McLean. "Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success."

In his prepared statement, Kummant took the opportunity to reiterate the great potential for passenger rail travel in the coming years and provided details on the company's recent successes in ridership and ticket revenue.

He also outlined strategic challenges. "To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities," said Kummant. "We are working on increasing revenue, reducing costs, and improving both trip times and system-wide on-time performance."

To reach these goals, Kummant explained, the company seeks \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service. Separately, the company has requested an additional appropriation of \$114 million, which is necessary to fund retroactive payments in FY '09, in accordance with the Presidential Emergency Board recommendation.

"On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable ... I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations," Kummant added.

Operational Update: Starting today, *Empire Service* schedules will be adjusted to accommodate Metro-North track work near Beacon, N.Y., and other route maintenance performed by CSX Transportation. The Metro-North track work will also adjust *Northeast Regional* and *Acela Express* schedules west of New Haven, Conn.

Engineering: The Northern District Tie Gang has begun installing 60,000 wood ties on the Springfield Line.

Marketing and Product Management: Beginning April 19, the booking time for employee weekend personal pass travel on *Acela Express* train (either class) or non-*Acela* Business class will be reduced from three hours to one hour.

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the healthcare or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Question of the Week: What is Amtrak's most scenic route? Why?

Last Week's Question & Winner: What is the best reason for traveling on Amtrak? **The best reason for traveling on an Amtrak train is the ability to relax and take in the surroundings. Riding on the train allows you a better glimpse of the world around you: vibrantly colored foliage, interesting architecture, animals and people at play. What a wonderful world it is!**

Tonya Williams, Secretary I, Jacksonville, Fla.

March 10, 2008

Planning Department Reorganized

Last week, President and CEO Alex Kummant announced the disbanding of the Planning and Analysis department, and the integration of the group's employees into four other departments: Finance; Marketing and Product Management; Transportation; and Strategic Partnerships and Business Development.

"In the past weeks, the board, executive staff and I have been engaged in refocusing Amtrak's strategic plan," said Kummant. "Rather than maintaining a stand-alone department responsible for our strategy, we are re-deploying the department's resources into the wider organization. This is a work in progress and one about which I will be sharing more, as well as seeking employee input and feedback along the way."

Kummant has asked Acting Vice President of Planning and Analysis John Bennett to coordinate the company-wide effort in the role of assistant vice president of Policy, Standards and Business Integration within the Strategic Partnerships department.

"The executive staff will work to ensure the projects and talents of this group are shared and applied across organizational boundaries as necessary to achieve the best contribution and result," added Kummant.

Operational Updates: *Lake Shore Limited* trains 448 and 449 will not operate between Boston and Albany on March 18 and 19 due to CSX track work. Motorcoach service will be provided as alternate transportation.

Beginning March 17 and continuing through May 8, *Silver Star* train 92 will depart Miami at 9:50 a.m. and operate on an earlier schedule to Jacksonville and all intermediate stations. From April 28 through May 8, on Monday through Thursday only, further schedule adjustments will be made between Kissimmee and Jacksonville.

Human Resources: Remember that nominations for 2008 President's Service and Safety Awards are due by Friday, April 11. Forms are posted on the Intranet at "Employees" ► "Awards and Achievements" ► "2008 PSSA Nomination Forms."

Engineering: This week, Production's Switch Exchange System, with the assistance of New York Division Engineering, is replacing the #12 and #21 switches at Union Interlocking in Rahway, N.J.

Marketing and Product Management: Amtrak is the official transportation sponsor for a fashion show at L.A. Union Station on March 14 as part of the city's fashion week. Celebrities involved include cast members of "America's Next Top Model," "Project Runway" and "The Janice Dickinson Modeling Agency" as well as various actors.

FY '09 Funding Request Sent to Capitol Hill

President and CEO Alex Kummant will testify this week before the House Appropriations Subcommittee on Transportation, HUD and related agencies on the FY '09 Grant and Legislative Request Amtrak submitted to Congress last week. Detailing the company's financial needs for the 2009 fiscal year, the request totals \$1.67 billion, including \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service.

In addition, Amtrak outlined the need for a separate \$114 million for retroactive pay in FY '09 should Congress decide to fund the recommendation of the Presidential Emergency Board 242.

The total funding request is slightly higher than last year's request, due mainly to rising operating costs. Salaries, wages and employee health benefits that account for approximately 60 percent of total operating expenses will increase in part because of new labor agreements.

Rising diesel fuel costs and uncertainties in the national economy contribute to the higher financial needs as well. The company also seeks to invest in its operations with an aggressive upgrade of information systems.

In regard to capital funding, the vast majority of the \$801 million requested will go toward maintaining a state of good repair, with \$331 million directed at infrastructure and \$176 million earmarked for equipment. Compliance with the Americans with Disabilities Act, technology improvements and improvements in data security also account for large portions of the requested capital funds.

The request initiates the annual appropriations process, which will involve hearings before House and senate committees and legislation crafted in the late spring or early summer. Typically, appropriations bills are passed in September or October.

The 2009 Grant and Legislative Request can be found in its entirety in the "*Legislative News*" section of the Intranet and on Amtrak.com under "*Inside Amtrak*" and "*Other Reports.*"

ATW Sept 22

The Employee Satisfaction surveys recently mailed to all active employees' homes is an opportunity for employees to provide input on what works and what can be made better. It's completely anonymous; please take the time to complete it and return it by Oct. 10.

What's the purpose of the survey?

While it's not the only way for Amtrak to learn from its employees, the survey is an opportunity for you to sincerely share how you feel about the company, your job, the service we provide and many other facets of your perspective on Amtrak. The survey is an important tool for Amtrak to gauge current performance as an employer and a service provider, and for making improvements in both areas.

Why should I take the time to complete it?

You have a stake in Amtrak, and in the long run, you benefit by making your opinions known. Whether you're on the front lines or in the back offices, you offer a unique perspective on improvements we can make, and we want to know what they are.

Will I hear about the results of the survey, and if so when?

The findings will be tabulated and delivered to Amtrak around the end of the calendar year, and will help the company identify areas for improvement or development. You should expect to hear about the survey results (look for information in *Amtrak Ink* and *Amtrak This Week*) after the new year.

Is the survey confidential?

Yes. The survey is completely confidential and managed by an outside firm. All employees, including those in small departments, are assured that the firm will protect all information or findings that can identify anyone personally.

In fact, we purposely ask that no one volunteer his or her name on the survey. Amtrak wants your honest opinions and recognizes that we need to protect your anonymity in order to obtain them.

I didn't get the survey in the mail. Who do I call to get it mailed to me?

If you did not receive the survey at home, please e-mail ecom@amtrak.com or call (202) 906-3770 to request that one be sent to you. Please remember to include your name and mailing address.

Engineering Department Plans June NEC Maintenance Blitz

Amtrak has begun notifying communities north of New Haven, Conn., of a planned four-day rail outage between New Haven and Boston associated with the replacement of the span of the Thames River Bridge this summer. In June, a vertical lift span will replace the current span on the Thames River Bridge in Groton, Conn., which in recent years had been prone to operating failures. The multi-year project will culminate in the installation of the new span during the four-day rail closure of the bridge in mid-June.

The bridge outage provides the Engineering department an opportunity to conduct a nearly around-the-clock repair and maintenance “blitz” between New Haven and Boston. Taking the rail out of service between New Haven and Boston will enable Engineering crews to complete about a year’s worth of maintenance work in just four days.

The capital improvement blitz, which is unique in its magnitude and scope, will improve the overall reliability of the infrastructure and reduce the need for future service disruptions due to track outages for maintenance work. The blitz will involve tie replacement, surfacing at interlockings, electric catenary maintenance, road-crossing panel replacement and other bridge, track and platform work.

Amtrak will continue to notify communities north of New Haven, and will be briefing local leaders on the scope of work and the service suspension itself in the coming months.

In Other News:

Engineering: The New York Division-West Concrete Tie Gang is working to remove slow orders on Track 1 between Union and Islén. More than 800 concrete ties will be installed, and the track will be surfaced and stabilized to return to timetable speed.

Human Resources: The United Way campaign will run through Jan. 31. To obtain a pledge card, contact Carolyn Stagger at ATS 777-3899 or 202-906-3899 or via e-mail at staggec@amtrak.com.

Operational Update: Due to the mudslides over a 10-mile stretch of Union Pacific tracks between Chemult, Ore., and Eugene, Ore., *Coast Starlight* service is temporarily suspended. A firm date for service restoration has not yet been established, however, the company operating plan was developing assuming service in approximately two weeks.

Environmental Health and Safety: The Safety Audit group will participate with the Mechanical department to audit the company’s mechanical contractor in Bakersfield, Calif. These audits assist contractors by identifying potential mechanical, contracting and safety concerns.

In Other News:

Operational Update: Due to Norfolk Southern track work, on Wednesday, Feb. 6, *Carolinian* Trains 79 and 80 will operate between Raleigh and Charlotte only.

Engineering: The New York Division Engineering forces are replacing base corroded rail on Line 1 of the East River Tunnel this week, changing out 12 locations totaling 658 linear feet of track. Line 2 was completed in late January.

Human Resources: Nomination forms for the President's Service and Safety Awards program are posted on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms." The deadline for nominations is Friday, April 11.

Benefits: All agreement-covered employees (except FOP) **must** respond to the Aetna request for verification of dependent information by **Friday, Feb. 29** to avoid termination of dental benefits for dependents. For questions, contact Aetna **immediately** at 866-682-5619.

401(k) Update: Enrollment meetings for the Fidelity Investments 401(k) Retirement Savings Plan are ongoing through March 20. Log on to www.mysavingsatwork.com/amtrak or check the meeting schedule included in "Your Guide to Getting Started" (mailed only to current non-Plan participants) for a meeting at your location.

Partial *Coast Starlight* Service Being Restored

Service on the Sacramento-Los Angeles portion of the *Coast Starlight* route is being restored this week after a massive mudslide severed the Union Pacific Railroad north of Chemult, Ore., on Jan. 19. Northbound Train 14 will begin service on Wednesday, originating in Los Angeles and making all regularly scheduled stops to Sacramento. Southbound Train 11 will begin service on Thursday over the same route. Service north of Sacramento remains suspended until further notice.

"We've been in discussions with Union Pacific and all parties involved throughout this disruption, and the UP has been unable to provide a date the route will be reopened," said Chief Operating Officer Bill Crosbie.

The initial mudslide buried approximately 3,000 feet of track under as much as 20 feet of dirt and fallen trees and destabilized the surrounding area on the mountain. Restoration efforts have been further complicated by heavy snow in the area. For more details, see corresponding Arrow messages.

In the past week, other weather-related factors have disrupted service. On Jan. 31, unstable avalanche conditions in Glacier National Park made it necessary to terminate *Empire Builder* trains and set up a bus bridge between Havre and Whitefish, Mont. On Feb. 1, heavy snow conditions and a bulldozer that partially fell through a bridge deck caused annulment of *California Zephyr* trains with passengers either bussed back to their origins or put up in hotels.

"We thank and appreciate the crews who worked hard to improvise and manage these difficult situations while keeping passengers safe and comfortable," added Crosbie.

FY '09 Administration Budget Released Today

The Administration released its FY '09 budget today, which includes no operating funds for Amtrak next year. The \$800 million budget for Amtrak, which is the same number as last year, comprises \$525 million for capital expenses (which includes up to \$285 million for debt service) and \$275 million for efficiency grants. The entire budget is posted on the Internet at www.whitehouse.gov/omb/budget/fy2009. Amtrak plans to present its budget request to Congress later this

In Other News:

Transportation: All station locations maintaining a cash drawer must carry a minimum of \$5 in the new presidential \$1 coins. A supply of coins should be ordered with the next station deposit.

Operational Update: Due to Norfolk Southern track work, *Crescent* Trains 19 and 20 will not operate between Atlanta and New Orleans, Mondays through Thursdays only, through March 6.

Engineering: As part of 26 planned 55-hour weekend outages for reconstruction of 14,400 linear feet of Track 2 in the south tube of the North River Tunnel in New York, the Switch and Rail Gang installed the first 1,600 linear feet of track panels this weekend. The High Speed Surfacing Gang surfaced the track to resume service today.

Government Affairs: Transportation Vice President Richard Phelps today testifies before the House Subcommittee on Railroads, Pipelines and Hazardous Materials on "The Role of Intercity Passenger Rail during National Emergencies" at the New Orleans Passenger Terminal.

Major Campaign on Tap to Expand Marketplace Exposure

This spring marks the beginning of a major marketing initiative designed to generate awareness of train travel through a series of events, promotions and advertising campaigns, which will culminate in the first National Train Day.

Scheduled for May 10, National Train Day commemorates the completion of the Transcontinental Railroad in Provo, Utah, and will feature exhibits, family-friendly activities, VIP appearances and musical and entertainment acts in the major markets of Chicago, Los Angeles, Washington, D.C., and New York City.

The six-week campaign leading up to National Train Day encompasses a string of promotions that are part of this year's advertising program. The promotional events target a range of demographics and segments of the overall market, aiming to expand Amtrak's exposure in the marketplace.

"All of the promotional events are bound together under the National Train Day banner," said Vice President Marketing and Product Management Emmett Fremaux. "With rail travel in the public eye in various forms for six weeks and then ending with events in four major cities on May 10, we expect to strengthen our relationship with current riders as well as reach those who aren't familiar with Amtrak's service, and gain market share."

Beginning in March, consumers will start to see National Train Day messaging on board trains, in stations and as part of a national advertising campaign.

Some elements of the campaign are still under development, including plans for employee involvement. Look for updates on the National Train Day campaign in future editions of *Amtrak This Week* and *Amtrak Ink*.

In Other News:

Operational Update: *Acela Express* Train 2151 will now operate five minutes earlier between Boston-South Station, New London, Conn., and all intermediate stations. The train will operate according to its published schedule to all other stations on the route.

Benefits: The *Open Enrollment for 2008 Benefits* handbook incorrectly states that dental implants are a covered expense for non-agreement employees. For a complete description of covered services, refer to the *Amtrak Management Employee Benefits Handbook* at www.amtrakbenefits.com or call the Benefits Service Center at 800-481-4887.

Environmental Health and Safety: High Speed Rail, Mechanical and EHS have initiated a program to separate paper recyclables from trash on the *Acela Express* trains in New York. This is an initial step toward a more comprehensive on-board recycling program that will also include bottles and cans on *Acela* and the *Auto Train*.

Engineering Milestone Achieved

With a calendar year 2007 safety ratio of 2.12 versus the 2.17 of BNSF Railway, Amtrak Engineering bested another Class 1 railroad engineering department in safety for the first time. New York Engineering is the leading division to date in FY '08 (as of Dec.), with a safety ratio of 0.61. The Engineering department congratulates the entire team. Keep up the good work.

New Security Procedures Launched

*Random Baggage Screening
Conducted by Mobile Security Teams*

Today, the company announced the deployment of new specialized Mobile Security Teams, which will patrol stations and trains and randomly screen passengers and their carry-on baggage on an unpredictable basis on the Northeast Corridor.

The Mobile Security Teams supplement patrols already in place to enhance the safety and security of passenger rail travel. This is a further step in improving rail security and minimizing the risk of terrorist threats. The Mobile Security Teams will ultimately be deployed nationwide.

“Keeping our customers and employees safe remains our priority,” said President and CEO Alex Kummant. “These new procedures will strengthen our overall security, and they are vital in our efforts to deter, detect and prevent a terrorist incident on the rail system.”

The Mobile Security Teams’ squads may consist of armed specialized Amtrak police, explosives-detecting K-9 units and armed counter-terrorism special agents in tactical uniforms. They will screen passengers, randomly inspect baggage and patrol stations. These squads also may sweep through trains using K-9 units.

Passengers will have the right to refuse inspection. However, if they do so, they will not be permitted to board the train and will be offered a full refund.

The Mobile Security Teams’ procedures will not affect train schedules. Random passenger baggage inspection is a quick process and typically will take less than a minute.

Kummant to Testify in Support of FY '09 Grant and Legislative Request

President and CEO Alex Kummant will testify this week before the House Appropriations Subcommittee on Transportation, HUD and Related Agencies on the FY '09 Grant and Legislative Request Amtrak submitted to Congress last week. Detailing the company's financial needs for the 2009 fiscal year, the request totals \$1.67 billion, including \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service.

In addition, Amtrak outlined the need for a separate \$114 million for retroactive pay in FY '09 should Congress decide to fund the recommendation of the Presidential Emergency Board 242.

The total funding request is slightly higher than last year's request, due mainly to rising operating costs. Salaries, wages and employee health benefits that account for approximately 60 percent of total operating expenses will increase in part because of new labor agreements.

Rising diesel fuel costs and uncertainties in the national economy contribute to the higher financial needs as well. The company also seeks to invest in its operations with an aggressive upgrade of information systems.

In regard to capital funding, the vast majority of the \$801 million requested will go toward maintaining a state of good repair, with \$331 million directed at infrastructure and \$176 million earmarked for equipment. Compliance with the Americans with Disabilities Act, technology improvements and improvements in data security also account for large portions of the requested capital funds.

The request initiates the annual appropriations process, which will involve hearings before House and Senate committees and legislation crafted in the late spring or early summer. Typically, appropriations bills are passed in September or October.

The 2009 Grant and Legislative Request can be found in its entirety in the "Legislative News" section of the Intranet and on Amtrak.com under "Inside Amtrak" ►► "Other Reports."

Engineering: The Switch and Exchange System and the New England Division Engineering forces are removing derails at the approaches to the Mystic, Thames, Conn and Niantic movable bridges on the NEC between New Haven and Boston.

Operational Update: Due to CSX track work, Regional Train 94 will not operate between Newport News, Williamsburg and Richmond, Va. (Main Street Station), Feb. 26 through Feb. 28. Train 86 will make special stops at these stations, before resuming its normal schedule at Richmond (Staples Mill Road).

Human Resources: The deadline for PSSA nominations is Friday, April 11. Nomination forms are posted on the Intranet at "Employees" ►► "Awards and Achievements" ►► "2008 PSSA Nomination Forms."

Please Note: President and CEO Alex Kummant recently appointed Chief Operating Officer William Crosbie and Vice President, Government Affairs and Communications Joe McHugh as the executive liaison to Seattle, taking over from Vice President, Procurement and Materials Management Michael Rienzi.

TOP STORY

Executive Liaison Program Gives Divisions Access to Top Management

Upon joining Amtrak, President and CEO Alex Kummant initiated the creation of the Executive Liaison Program in an effort to improve communication between the executive committee and operating employees in divisions across the country. The program has gained traction since its inception a year ago, and the company is beginning to see the benefits.

“This program is designed to further promote two-way communication between executive management and employees who make our railroad run on a day-to-day basis,” said COO Bill Crosbie, coordinator of the program. “Mr. Kummant wanted to make sure that employees had the opportunity to be heard by decision makers and also make sure those decision makers remain engaged with what’s going on across the company, not just their respective departments here in Washington.”

Every member of the executive committee is assigned to one or more cities where operating facilities are located. Executives are responsible for making periodic visits to those facilities to serve as a sounding board for managers and employees to voice their ideas and concerns. Executives are also helping their respective divisions create a five-year plan.

“This is an extremely valuable effort,” said Vice President of Government Affairs and Communications Joe McHugh, who is the liaison to Albany, N.Y., and as of last month, Seattle. “A lot of great ideas related to service and equipment usage have come from my field visits. We’ve been able to make some of them a reality to the company’s benefit.”

BRIEFS

Engineering: Production C&S, with Mid-Atlantic Division support, will be completing signal system improvements on the Harrisburg Line between Roy (mp 94.3) and Rheems (mp 83.4) interlockings. The upgraded signal system will greatly improve the flexibility of operations by allowing trains to operate at timetable speeds in either direction on either track.

Marketing and Product Management: Check your local listings and tune in to *Wheel of Fortune* today, March 3, as Amtrak Vacations Grand Canyon Package Tour is being featured on “America’s Game.”

Operational Update: As Union Pacific Railroad continues to restore the track damaged by mudslides in January, *Coast Starlight* service has been extended via motorcoach service between Portland, Ore., and Sacramento, Calif. Motorcoach service will also make stops in both directions at Salem, Eugene-Springfield and Medford, Ore., as well as meal and rest stops. Complete train service is expected to resume in April.

Executive Liaison Program Gives Divisions Access to Top Management

Shortly after joining Amtrak in Sept. 2006, President and CEO Alex Kummant initiated the creation of the Executive Liaison Program in an effort to improve communication between the executive committee and operating divisions across the country. The program has gained traction since its inception, and the company is beginning to see the benefits.

“This program is designed to further promote two-way communication between executive management and employees who make our railroad run on a day-to-day basis,” said COO Bill Crosbie, the program’s coordinator. “Mr. Kummant wanted to make sure that employees working at our major crew bases and facilities had the opportunity to be heard by decision makers, and also make sure those decision makers remain engaged with what’s going on across the company, not just their respective departments here in Washington.”

Every member of the executive committee is assigned to one or more cities where operating facilities are located. Executives are responsible for making periodic visits to those facilities to serve as a sounding board for managers and employees to voice their ideas and concerns.

The program is not to supplant local decision making, but rather, to further open the lines of communication and bring the company closer together. A key initiative will be executives helping their respective divisions create a five-year plan and serving as an advocate to make sure divisional projects receive the proper consideration.

“This is an extremely valuable effort,” said Vice President of Government Affairs and Corporate Communications Joe McHugh, who is the liaison to Albany, N.Y., and as of last month, Seattle. “My trips and contacts with people who run our equipment service and maintenance in Albany has been a special part of my time at Amtrak. It is a great group of dedicated people and they have some excellent ideas about improving service and increasing revenue.”

According to McHugh, one such idea came from the operating crews on the *Adirondack*. They suggested putting the company’s only dome car on the train last fall. Said McHugh, “We all worked together to make it happen and it was a big success.”

National Train Day Promos Continue

As part of an ongoing slate of activities to commemorate National Train Day, Amtrak is launching a new promotion as well as two employee contests to raise awareness of the May 10 celebrations.

The National Train Day “Buy One, Get One Free” promotion, which provides a free companion ticket with the purchase of a full fare adult ticket, valid for sale on April 4 only and travel on May 10 only. “What better way to celebrate National Train Day than to take advantage of the buy one, get one free offer for travel on May 10,” said Darlene Abubakar, director, Brand Advertising and Sales Promotions.

On the employee front, the “Children of Amtrak” Art Contest begins today. The contest is open to children of Amtrak employees and contractors between the ages of six and 12. The contest judges are looking for art that best captures the essence of train travel and/or National Train Day. Four grand-prize winners will receive a free family trip to one of the National Train Day entertainment venues — Washington, D.C., New York, Chicago or Los Angeles.

Entries must be postmarked by April 24 and received by April 29. For complete contest rules, log on to www.nationaltrainday.com/employees/artcontest.

The Employee Mini-Essay Contest also begins today. In 50 words or less, employees can respond to a weekly question posted in *Amtrak This Week*. Entries will be judged for style, content, structure and relevance to the topic, with the winning entry posted in the following week’s ATW, along with the new question of the week. Weekly winners will receive Amtrak merchandise.

Winning entries will also be printed in the May issue of *Amtrak Ink*.

Marketing and Product Management/Operational Update:

Amtrak Charter Services will operate charter trains for the 2008 Major League Baseball season for teams including the Baltimore Orioles, Los Angeles Angels, Los Angeles Dodgers, New York Yankees, Philadelphia Phillies, Pittsburgh Pirates and Washington Nationals.

Engineering: Production’s Switch Exchange System, with the assistance of the High-Speed Surfacing Gang and New York Division Engineering forces will be installing the 12A switch within Union Interlocking.

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the health care or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at “Employees” ➡ “Awards and Achievements” ➡ “2008 PSSA Nomination Forms.”

National Train Day Question of the Week

What are the best reasons for traveling by train?

All essays must be submitted by Thursday of each week — with “NTD Mini-Essay Contest” in the subject line — to ecom@amtrak.com. Check back next week for the winning response and a new National Train Day Question of the Week.

National Train Day Promos Continue

As part of an ongoing slate of activities to commemorate National Train Day, Amtrak is launching a new promotion as well as two contests to get employees excited about the May 10 celebrations.

First is the National Train Day “Buy One, Get One Free” promotion, which provides a free companion ticket with the purchase of a full fare adult ticket. The offer is valid for sale on April 4 only and travel on May 10 only. “What better way to celebrate National Train Day than to take advantage of the buy one, get one free offer for travel on May 10,” said Darlene Abubakar, director, Brand Advertising and Sales Promotions.

On the employee engagement front, the “Children of Amtrak” Art Contest begins today. The contest is open to children of all Amtrak employees and contractors between the ages of six and 12. The contest judges are looking for art that best captures the essence of train travel and/or National Train Day. Four grand-prize winners will be selected and will receive a free family trip to one of the National Train Day entertainment venues—Washington, D.C., New York, Chicago or Los Angeles.

Entries must be postmarked by April 24 and received by April 29. For complete contest rules, log on to www.nationaltrainday.com/employees/artcontest.

The Employee Mini-Essay Contest also begins today. In 50 words or less, employees can respond to a weekly question posted in *Amtrak This Week*. The winning response is posted in the following week’s ATW, along with the new question of the week. A compilation of winning responses will be printed in the May issue of Amtrak Ink. Weekly winners will receive Amtrak merchandise.

Marketing and Product Management/Operational Update:

Amtrak Charter Services will operate charter trains for the 2008 Major League Baseball season. Among the teams contracted for 2008 are the Baltimore Orioles, Los Angeles Angels, Los Angeles Dodgers, New York Yankees, Philadelphia Phillies, Pittsburgh Pirates and Washington Nationals.

Environmental Health and Safety: The Amtrak Pandemic Flu Task Group is currently reviewing and updating the Pandemic Flu Contingency Plan used in the event of a company flu outbreak. The current plan is posted on the Intranet: “Safety” ➤ “Health (Public)” ➤ “Pandemic Flu Contingency Plan.”

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the healthcare or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at “Employees” ➤ “Awards and Achievements” ➤ “2008 PSSA Nomination Forms.”

National Train Day Question of the Week

Why is passenger rail travel so important to the American economy?

All essays must be submitted — with “NTD Mini-Essay Contest” in the subject line — to ecom@amtrak.com. Check back next week for the winning response and a new National Train Day Question of the Week.

Kummant, McLean Defend FY '09 Funding Needs

Board Chairman Donna McLean and President and CEO Alex Kummant testified last Thursday before the Senate Appropriations Subcommittee on Transportation, Housing and Urban Development in support of the company's FY '09 funding request. Amtrak's Grant and Legislative Request for \$1.67 billion was submitted to Congress on Feb. 20.

McLean opened testimony by providing an outline of the board's current effort to refine the company's five-year strategic plan.

"Our strategic priorities must reflect the dual nature of Amtrak, which combines the goals of a private company with the obligations of a public service provider," said McLean. "Our strategy will provide a realistic assessment of what we can do as a transportation provider, of the opportunities we see, and of the types of events and trends that could be obstacles to success."

In his prepared statement, Kummant took the opportunity to reiterate the great potential for passenger rail travel in the coming years and provided details on the company's recent successes in ridership and ticket revenue.

He also outlined strategic some challenges. "To help shape the next few years, Amtrak is focusing its efforts on a set of key strategic priorities," said Kummant. "We are working on increasing revenue, reducing costs, and improving both trip times and system-wide on-time performance."

To reach these goals, Kummant explained, the company seeks \$801 million for capital investments, \$525 million for operating expenses and \$345 million for debt service. Separately, the company has requested an additional appropriation of \$114 million, which is necessary to fund retroactive payments in FY '09, in accordance with the Presidential Emergency Board recommendation.

"On the whole, I think our projections for the upcoming year are responsible, realistic, and attainable ... I appreciate all of the hard work our employees put in every day, sometimes in difficult or trying situations," Kummant added.

Operational Update: Starting today, *Empire Service* schedules will be adjusted to accommodate Metro-North track work near Beacon, N.Y., and other route maintenance performed by CSX Transportation. The Metro-North track work will also adjust *Northeast Regional* and *Acela Express* schedules west of New Haven, Conn.

Engineering: The Northern District Tie Gang has begun installing 60,000 wood ties on the Springfield Line.

Marketing and Product Management: Beginning April 19, the booking time for employee weekend personal pass travel on *Acela Express* train (either class) or non-*Acela* Business class will be reduced from three hours to one hour.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2008 PSSA Nomination Forms."

National Train Day Question of the Week Winner

What are the best reasons for traveling by train?

The best reason for traveling on an Amtrak train is the ability to relax and take in the surroundings.

Riding on the train allows you a better glimpse of the world around you: vibrantly colored foliage, interesting architecture, animals and people at play.

What a wonderful world it is!

Tonya Williams, Secretary I, Jacksonville, Fla.

National Train Day Question of the Week

What is Amtrak's most scenic route? Why?

All essays must be submitted by Thursday of each week to ecom@amtrak.com.

April 21, 2008

19 Days and Counting 'Til National Train Day

National Train Day is less than three weeks away, and the excitement continues to build as more than 30 stations are hosting NTD open houses — in addition to our major events at our stations in Washington, D.C., New York, Chicago and Los Angeles — to promote passenger rail. For a list of scheduled open houses, log onto www.nationaltrainday.com.

Station and on-board personnel now have their National Train Day marketing materials.

In other NTD news, the “Coachella Express” is running this week to transport festival campers to and from the Coachella Valley Music and Arts Festival in Indio, Calif. The train departs Los Angeles Union Station on Thursday at 1:30 p.m., returning on Monday, April 28 at 10:30 a.m.

Marketing and Product Development: As of April 15, Version 4 of “Service Standards: Manual for Train Service and On-Board Service Employees” and “Policy Resource Booklet” are now in effect, and can be found on the Intranet at “Library” ➡ “Service Standards.”

Government Affairs: President and CEO Alex Kummant is testifying on rail capacity Wednesday before the House Subcommittee on Railroads, Pipelines and Hazardous Materials. On Tuesday, April 29, the House will introduce the Amtrak reauthorization bill; a subsequent hearing on the bill is scheduled for May 1.

Environmental Health and Safety: An environmental compliance audit is being held this week at the Ivy City facility in Washington, D.C., to assess compliance with federal, state and local laws.

National Train Day Question of the Week

What Amtrak destination offers the best attractions for adults?

All essays, 50 words or less, must be submitted by Thursday, April 17 to ecom@amtrak.com.

National Train Day Question of the Week Winner

What Amtrak destination offers the best attractions for kids?

“Orlando, Fla., gets my vote as the best destination for kids. With its plethora of amusement parks, including Walt Disney World, Universal Studios and Sea World, as well as numerous water parks and wildlife parks, it offers something for every child, including the child in all of us.”

Mary Weinberger
Customer Service Representative
MARSCC, Philadelphia

NOTE: The “Children of Amtrak” Art Contest ends Thursday; complete rules are on the NTD site at www.nationaltrainday.com/employees/artcontest.

Deadline for Entering Work Through March 31

Employees represented by **ATDA, IAM, IBEW, JCC, NCFO, BMWE, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment), IBB and UTU** must enter time for work through March 31, 2008, by April 25, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment.

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the result of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

“Take your Daughters and Sons to Work” Safety Rules

Employees are welcomed to bring their children to work on Thursday as part of the National “Take our Daughters and Sons to Work Day.” However, children are not allowed:

- ➡ At sites where there is train movement or heavy equipment.
- ➡ In the cab of a moving locomotive under any circumstances.
- ➡ Where their presence could disrupt operations or the movement of passengers.
- ➡ In areas where personal protective equipment is required.

April 21, 2008

19 Days and Counting Until National Train Day

Enthusiasm for National Train Day is building as communities and employees across the system plan open houses, and stations in Washington, D.C., New York, Chicago and Los Angeles gear up for major events on May 10. Visit www.nationaltrainday.com for a list of open houses and events in your area aimed at promoting passenger rail on May 10.

National Train Day materials such as buttons, stickers and posters have been sent to stations and crew bases for use by station and on-board personnel. Events leading up to May 10 include the "Coachella Express," a special train that will carry 500 campers to the festival grounds in Indio, Calif., this Thursday and back on Monday morning.

NOTE: The "Children of Amtrak" Art Contest ends Thursday, complete rules are on the National Train Day Web site at www.nationaltrainday.com/employees/artcontest.

National Train Day Question of the Week

Why do you think promoting passenger rail travel and National Train Day are important?

All essays, 50 words or less, must be submitted by Thursday, April 24 to ecom@amtrak.com.

April 21, 2008

19 Days and Counting 'Til National Train Day

National Train Day is less than three weeks away, and the excitement continues to build as more than 30 stations are hosting NTD open houses—in addition to our major events at our stations in Washington, D.C., New York, Chicago and Los Angeles—to promote passenger rail.

Open houses are scheduled for:

Alexandria, Va.	Jacksonville, Fla.
Alpine, Texas	LaCrosse, Wisc.
Atlanta	Marshall, Texas
Charlottesville, Va.	Newport News, Va.
Cincinnati	Niles, Mich.
Dallas	Richmond, Va.
Del Rio, Texas	Rugby, N.D.
Denmark, S.C.	Sacramento, Calif.
Dodge City, Kan.	Sanderson, Texas
Durham, N.H.	Sanford, Fla.
El Paso, Texas	Seattle
Elizabethtown, Pa.	St. Louis
Emeryville, Calif.	Tampa, Fla.
Fredericksburg, Va.	Williamsburg, Va.
Fort Worth, Texas	Wilmington, Del.
Greensboro, N.C.	Winter Park, Fla.

Station and on-board personnel should now have their National Train Day marketing materials.

In other NTD news, the “Coachella Express” is running this week to transport festival campers to and from the Coachella Valley Music and Arts Festival in Indio, Calif. The train departs Los Angeles Union Station on Thursday at 1:30 p.m., returning on Monday, April 28 at 10:30 a.m.

Marketing and Product Development: As of April 15, Version 4 of “Service Standards: Manual for Train Service and On-Board Service Employees” and “Policy Resource Booklet” are now in effect, and can be found on the Intranet at “Library”► “Service Standards.”

Regional Service Re-Launch Project Underway

The Marketing and Product Management department is working with a multifunctional team that includes Mechanical, Transportation and Engineering to improve current *Regional* service, leading to an enhanced product and an ad campaign slated for mid-June. Since it kicked off in October 2007, the NEC *Regional* Service “Re-Launch” Project is focusing on enhancing overall product quality by improving on-time performance and equipment and service quality.

“The *Regional* service will not change significantly,” said Pietrantonio. “It is more appropriate to think of the impact we are looking for as a combination of incremental improvements in a variety of areas that touch the customer, rather than a formal re-branding effort.”

In the short term, the team has instituted new menu items on all Northeast *Regional* trains, distributed and mounted new menu boards in the cars, created seat back menus for all Coach cars and installed weekend ad posters in all Café cars with bulkhead frames.

The June 2008 “re-launch will also include new product identity and advertising, implementation of tactical pricing, tighter OTP tolerances, restructured Business class amenities, improved capacity optimization, improved food service offerings, and better cleaning practices and processes.

In addition, the split Dinette cars are being converted to all-table cars and the Café cars on all 21 trainsets are being centered on the consists to provide increased access for Coach customers, which account for 75 percent of Café car revenue. The Café cars will also undergo a number of interior cosmetic improvements.

The project is being supported by a number of service guides and training videos for OBS and T and E employees.

Future plans include additional food service car modifications, more Amfleet coach overhauls, a capital program to increase fleet size, and a plan to operate variable consists to maximize market demand.

National Train Day Question of the Week

***What National Train Day events are you
most looking forward to? Why?***

All essays, 50 words or less, must be submitted by Thursday, April 24 to ecom@amtrak.com.

Operational Update: Due to CSX Transportation track work, *Pere Marquette* Train 371 will operate one hour earlier to all stations along the route, through Friday, May 2.

Environmental Health and Safety: An FRA-funded safety culture survey — requested by the board of directors — is being conducted among Washington Terminal, crew base and Ivy City employees to assess perceptions of safety management; survey forms will be distributed during the week of May 5. The results and subsequent focus group findings will be presented to the board in July.

Corporate Communications: An interview with President and CEO Alex Kummant will air Tuesday, April 29 or Wednesday, April 30 on “NBC Nightly News,” check local listings for broadcast times.

Reminder: The deadline for the “Children of Amtrak” Art Contest is being extended until Thursday, May 2; all entries must be received by May 7. Complete rules are on the NTD Web site at www.nationaltrainday.com/employees/artcontest.

Note: If you have questions regarding your benefits, contact the Amtrak Benefits Service Center at 800-481-4887.

National Train Day Question of the Week Winner

How can employees help spread the word about National Train Day?

“Spreading the word about National Train Day can take on many forms, from greeting your customers to sending Amtrak e-cards to “Get Your Choo-Choo On” to displaying printed materials. Word of mouth is the best tool we have to spread the news about National Train Day and all Amtrak service!”

Donna Engstrom
Support Desk Representative
MARSCC, Philadelphia

April 28, 2008

Northeast Regional Service Making Progress

A *Regional Service* project, currently underway to improve product quality on the *Northeast Regional* trains, has accomplished a number of tasks thanks to the work of a multifunctional team focused on on-time performance, equipment quality, service quality and product quality.

Those items include new menu items on all *Northeast Regional* trains; new menu boards distributed and mounted in the cars; seat back menus on board all Coach cars; food and weekend ad posters installed in all Café cars with bulkhead frames; Operations Service Advisories, service guides and training videos distributed to all crew bases; briefings for all OBS and T and E employees, and the hiring and training of en route cleaners.

“The plan is to ‘re-launch’ the *Regional Service* with advertising support in mid-June, with spruced up equipment, operating performance and customer service elements to deliver a consistently good travel experience to an expanding customer base,” said Patrick Pietrantonio, director, Product Management.

The plan is reminiscent of the NEC-*Acela Express* Service Improvement Program, which combined an integrated marketing campaign with an intense focus on customer service, performance management and reduced food and beverage costs. Pietrantonio added that the business goals of the *Northeast Regional* plan is to create a distinct product identity that is different from *Acela* and increasing ridership and revenue without taking business away from *Acela*.

Two other significant accomplishments of the plan include converting the split Dinette cars to all-table cars and centering the Café car on all 21 trainsets, with the latter expected to increase food and beverage sales by providing better access for Coach passengers.

Operational Update: Due to CSX Transportation track work, *Pere Marquette Train 371* will operate one hour earlier to all stations along the route, through Friday, May 2.

Environmental Health and Safety: An FRA-funded safety culture survey — requested by the board of directors — is being conducted among Washington Terminal, crew base and Ivy City employees to assess perceptions of safety management; survey forms will be distributed during the week of May 5. The results and subsequent focus group findings will be presented to the board in July.

Corporate Communications: An interview with President and CEO Alex Kummant will air Wednesday, April 30 on “NBC Nightly News;” check local listings for times in your area.

Safety Record Improvement Earns Industry Recognition

President and CEO Alex Kummant will accept a 2007 E.H. Harriman Memorial Award on behalf of Amtrak this week in Washington. The E.H. Harriman Memorial Awards Institute is presenting the award for most improved safety record among Class I railroads at a luncheon hosted by the Association of American Railroads.

“Winning a Harriman Award is an excellent achievement for Amtrak and the recognition is extremely meaningful,” said Kummant. “While we have instituted a number of initiatives to promote safety on the railroad, this award belongs to each and every employee who earned it by making safety a priority. I am very proud of our employees’ efforts.”

In 2007, the company had a rate of 2.4 FRA-reportable injuries per 200,000 man-hours — an improvement of 27 percent from the prior year and a 46 percent improvement compared to 2005.

“We want to prevent on-the-job injuries and illnesses,” said Roy Deitchman, vice president, Environmental Health and Safety. “The programs and procedures put in place by operating departments have helped, but we can still do better. Safety is a priority at Amtrak and is stressed everyday in job briefings, work practices and job safety analysis.”

According to Deitchman, the reduction of injuries can be attributed to implementation of the comprehensive System Safety Program along with adoption of the Six Tenets of Safety which sets standards for performance and accountability for management and agreement employees. Increased safety education at Block Training and Training Camps was also instituted and cross-functional safety teams have been formed to solve specific workplace safety issues.

Note: The newly issued Spring/Summer System Timetable becomes effective today, May 12.

Corporate Communications: The 2009 “Picture Our Train” Wall Calendar Photo Contest begins today, May 12. Complete rules are posted on www.Amtrak.com/photocontest and the Intranet. The deadline is July 11. Participants are reminded to stay away from tracks and the railroad right-of-way. Tracks, trestles, yards and equipment are private property; trespassers are subject to arrest and fines.

Labor Update

Retroactive Wage Payment

If you are one of the more than 9,500 union-represented employees who received the first installment (40% of the total amount) of the retroactive wage payments on May 9, please be sure to review the detailed information provided in the summary statement and the Frequently Asked Questions you received with the check or deposit notice. If you have additional questions, please call the temporary call center set up to field payment questions at 1-888-514-0983, Monday-Friday 8 a.m. to 8 p.m. If your question requires further examination, you will be provided a case number that you must include on the Retroactive Wage Payment Inquiry NRPC Form 3287 (available on amtrakbenefits.com and on the Intranet under “Library,” then “Forms”) which should be mailed, along with the necessary supporting documentation, to Payroll Operations at the address on the form.

Deadline for Entering Work Through April 30

Employee Employees represented by BLET and SMWIA must enter time for work through April 30, 2008, by May 16 to ensure that those hours are factored into the first installment of the retroactive wage payment. Any time submitted after May 16 for dates worked prior to April 30 will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the result of those manual adjustments become part of the calculation for the planned second installment of the retroactive wage payment.

National Train Day Question of the Week Winner

What events and activities would you like to see as part of next year’s National Train Day?

“What I would like to see is another contest for the children, like an essay contest. I think it would be really nice to hear what children have to say about trains, they are our future. And art work again, but open the age group to at least 16 years of age.”

**Pauline Kittilson, Lead Accounting Clerk

CEO Calls for Participation in Operation RedBlock at All Levels

Amtrak is committed to prevent and avoid on-the-job alcohol and drug abuse in the workplace through the Operation RedBlock program (ORB). Earlier this month, the Operation RedBlock Executive Steering Committee, composed of senior labor union leaders and management met to recertify its common interest in ORB and reinvigorate the involvement of managers and employees in the program.

“I support and urge the support of all our managers and employees for the RedBlock program. It is important that we maintain our safe working environment free of drugs or alcohol. We all share in this responsibility and I commend the volunteer employees who act in concert to strive toward this common goal,” said President and CEO Alex Kummant.

Noting that tireless commitment from employees and managers at all levels is necessary, Kummant added that Operation RedBlock fosters an environment in which co-workers look out for one another. “The active participation of management in the regional, divisional and local ORB committees is critical,” he added.

Operation RedBlock is a union developed, company adopted, drug and alcohol peer prevention and intervention program. Its mission is to emphasize awareness, education and prevention of substance abuse through union-led committees. More information about Amtrak’s RedBlock program can be found on the company Intranet under the “Employees” menu or at www.redblock.com.

Marketing and Product

Management: As of this month, the USA Rail Pass is now available to any persons regardless of nationality or residence with proper identification. A passport is no longer required to purchase or use the USA Rail Pass, although a passport remains a valid form of identification.

Operational Update: CSX is in the fourth week of a 16-week project in the Rochester subdivision to install 304,940 linear feet of rail between Warners, N.Y., and Corfu, N.Y. Trains operating west of Albany may experience slight delays.

Note: The 2007 Annual Report is now posted on the Intranet under “Library” ➤ “Reports” ➤ “Annual Reports.” It is also posted on Amtrak.com at “Inside Amtrak” ➤ “Annual Reports and Consolidated Financial Statements.”

e-Commerce: The new Asset Disposal Request eForm must be submitted and approved before taking any Amtrak asset (excluding PCs and monitors) off the property. The eForm can be found by clicking “Company eForm” from the eTrax log in page ➤ “Request for Asset Disposition.”

Safety Focus Continues Through Operation RedBlock

After recently winning an E.H. Harriman Award for its improved safety record, Amtrak continues its mission of safety with its focus on helping employees and managers prevent on-the-job alcohol and drug abuse through the Operation RedBlock program. Earlier this month, the Operation RedBlock Executive Steering Committee met to explore ways to further strengthen the program.

“Our recent meeting between executives, managers and senior labor representatives reflected everyone’s sincere commitment that we all do our part to maintain a safe and healthy workplace across the system,” said President and CEO Alex Kummant.

Noting that operating a safe railroad requires tireless commitment from employees and managers at all levels, Kummant added that Operation RedBlock fosters an environment in which co-workers look out for one another. He continued by citing how that commitment includes preventing substance abuse-related incidents.

Operation RedBlock is a union developed, company adopted, drug and alcohol peer prevention and intervention program. Its mission is to emphasize awareness, education and prevention of substance abuse through union-led committees. More information about Amtrak’s RedBlock program can be found on the company Intranet under the “Employees” menu.

“Picture our Train” Calendar Contest in Full Swing

Now is the time to enter the “Picture our Train” 2009 Wall Calendar Photo Contest. The contest, which began on May 12, is an annual opportunity for employees and train buffs to submit a favorite photo of an Amtrak train to be featured on next year’s calendar.

The contest review panels are looking for the best original color photographs featuring a train with the current Amtrak logo and livery visible, including Amtrak California trains, Amtrak *Cascades*®, *Pacific Surfliner*® and *Acela Express* trains. Last year’s winning entry, a *Coast Starlight* train passing the majestic Mt. Shasta in Northern California, was submitted by Richard J. Allen, a retired police officer from Cortland, N.Y.

All entries must be an 8 x 10 original color photo suitable for enlargement up to 25 inches.

The grand prize winner will receive a \$1,000 travel voucher and a photo credit on the calendar. Second-through fifth-place contestants will receive travel vouchers as well, ranging from \$100 to \$500. **The contest ends July 11.**

Contestants are reminded to stay away from tracks and railroad rights-of-way, and remain in public access areas. The official rules are posted on Amtrak.com/photocontest.

Engineering: The cutover on the Shell at Grade project occurs on Sunday, June 8. The project improves the junction of the Hellgate Line with the New Haven Line to allow a speed increase from 15 mph to 45 mph for Amtrak trains.

Operational Update: Due to Union Pacific track work, the *California Zephyr* will detour through Wyoming via UP’s overland route affecting service at stations between Denver and Salt Lake City from Sunday, June 8 through Sunday, June 15.

Marketing and Product Management: An “Historical On-Time Performance” link on the Amtrak.com home page now assists passengers in planning their trip by providing a particular train’s on-time performance history for the last 12 months, and includes general information about causes for delays.

Benefits Reminder: Employees who have questions regarding their benefits should contact the Amtrak Benefits Service Center at 800-481-4887.

Operational Update: The massive flooding in the Midwest is now affecting the following services, including provisions for alternate motorcoach service: *Empire Builder*, *California Zephyr* and Illinois and Missouri service.

Benefits: All dependent medical, dental and rail pass benefits are terminated for those **agreement** employees who did not respond to Aetna's numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

Information Technology: When sending e-mail across the entire enterprise, distribution lists should cover only those areas directly affected by the announcement. The current policy can be found on the Intranet at Library ► Policies ► Amtrak Policy and Instruction Manual ► 3.0 Operations ► Computer Security and Usage.

Reminder: The 2009 "Picture our Train" Wall Calendar Photo Contest is in full swing. The deadline for submissions is July 11. For more information, log on to Amtrak.com/photocontest.

Coast Starlight Re-Launches with Fanfare

In Los Angeles, Santa Barbara, Portland and Seattle, Amtrak officials and various travel industry representatives were joined by local politicians and passengers to commemorate the re-launch of the *Coast Starlight*.

Across the route, events included ribbon-cutting ceremonies and special receptions designed to generate excitement about the enhanced amenities on board the *Coast Starlight* service that links Los Angeles to Seattle.

Sleeper car passengers are now able to enjoy an exclusive wine and cheese event on board featuring four regional wines and four artisan cheeses, specialty coffees and appetizers for purchase, along with a library, board games and a Parlour car theatre.

Coach passengers can take advantage of new and larger complimentary pillows, new blankets for purchase, at-seat meal and beverage options.

A new and improved Arcade car is available to all passengers.

Update on the Thames River Bridge Project

Following discussions this morning with the contractor working on the Thames River Bridge in Connecticut, there is currently no firm date for the bridge span changeout. The installation of the new lift span is delayed due to complications encountered in the dismantling and removal of the bridge's counterweight.

Once the contractor delivers a firm date, we will issue an operating plan to accommodate the span changeout. We expect an update at the end of the day on Wednesday. Until further notice, we are operating according to a normal schedule between New York and Boston.

Regional Re-Launch Begins Today

After eight months of collaborative effort, Regional service formally re-launches today as the *Northeast Regional*. The project integrates efforts to create a new product identity with an increased focus on incremental improvements to the customer experience. Ticket revenue expected from *Northeast Regional* rebranding, advertising and associated product and service improvements is targeted at \$10.6 million.

“The goal of the project is to increase ridership and revenue for Regional service without having a negative impact on the *Acela Express* service that travels the same route,” said Emmett Fremaux, vice president, Marketing and Product Management.

The Mechanical, Finance, Transportation, Food and Beverage, NEC Service Operations, Market Research and Pricing departments all have a hand in the plan for improving the customer experience aboard the *Northeast Regional*, including outfitting 36 all-table Café cars, allocating funding to support upgrades, instituting en route cleaners positions, establishing and measuring customer-centric behaviors among on-board staff, creating new menus, building a new advertising campaign, and implementing new tactical pricing offers.

“Establishing the new *Northeast Regional* brand name, with a logo and product identity distinct from the *Acela Express*, is a key step in the FY '08-FY '13 Northeast Corridor business strategy,” Fremaux added. Accordingly, the *Northeast Regional* moniker should be used in all Amtrak documents, business line reports, financial tables and budget documents.

With more than 7 million annual passengers, the *Northeast Regional* is the company's largest product line.

Engineering: At 3 a.m. on Tuesday, the New England Division Tie Gang will begin the installation of 4,000 wood ties on Track 3 from Read to Forrest, on the Northeast Corridor just south of Boston. The project will conclude before 4 p.m. on Thursday.

Operational Update: Under a new contract with FEMA, Amtrak will provide emergency rail transportation in the event of a hurricane from New Orleans to as far as Memphis, Tenn. “Go Team” members are currently being assembled and trained to assist in evacuation efforts.

Human Resources: More than 370 nominations have been submitted for this year's President's Service and Safety Awards. The winners will be announced in August.

Thames River Bridge Update

The installation of a new bridge span on the Thames River Bridge has been rescheduled for June 24 through June 27 due to an unexpected complication encountered by Amtrak and its contractor in dismantling the bridge's 4 million-pound counterweight.

To accommodate passengers, Amtrak has scheduled substitute rail service between Boston and New York via the inland route through Springfield, as well as other special trains that will serve segments of the Boston-New Haven-New York route. Limited connecting bus service to bypass the bridge outage will also be available during this period.

Limited connecting bus service to bypass the bridge outage will also be available during this period.

June 23, 2008

Regional Re-Launch Begins Today

Amtrak recently signed two new contracts with the Maryland Transit Administration (MTA) to continue operations and provide infrastructure access for MARC commuter trains. The Operating Agreement and the Access Agreement, both effective July 1, are five-year deals and the Access Agreement also includes a five-year extension option.

“The new contracts have significant improvements for Amtrak on the financial side as MTA is ramping up its commitment to improving commuter rail service,” explains Jason Steffensen, principal, Commuter Partnerships-Mid-Atlantic.

The new agreements have new and increased incentives for on-time performance and fleet availability. Combined, a revenue increase of approximately 10 percent is expected over last year.

The Access Agreement also includes an increase in funding for recapitalization of existing infrastructure, bringing the new total to \$35 million over the five-year deal. An additional \$220 million is built in for Amtrak to begin implementing part of MTA’s 30-year service expansion plan with projects to improve capacity and reliability.

Amtrak currently has six for-profit partnerships for commuter train services. In addition to MARC, they include California’s Caltrain, Connecticut’s Shore Line East, Florida’s Tri-Rail, Virginia’s VRE and Washington’s Sound Transit.

Engineering: At 3 a.m. on Tuesday, the New England Division Tie Gang will begin the installation of 4,000 wood ties on Track 3 from Read to Forrest, on the Northeast Corridor just south of Boston. The project will conclude before 4 p.m. on Thursday.

Limited connecting bus service to bypass the bridge outage will also be available during this period.

Message from President and CEO Kummant

Dear Co-workers,

I wanted to take an opportunity to share with you some news about how we're doing, as we kick into the busy summer season. With just a couple months left in the fiscal year, ticket revenue through May was almost 14 percent ahead of last year over the same time, and ridership was nearly 11 percent higher. In addition, last month was one for the record books — we earned \$153.4 million in ticket revenue and served 2.58 million riders; both are the largest totals for any single month in company history.

While a range of factors contribute to these achievements, I credit your hard work and dedication for our success. I thank you for your commitment to Amtrak and for persevering in light of the challenges we face.

And we do, and will, encounter some hurdles. A sustained downturn in the economy and uncertainty about its long-term vitality could dampen our momentum. Moreover, the same reason that helps drive up ridership — high gas prices — also causes our costs to soar. We expect to spend close to \$100 million more on diesel fuel than we did last year.

In addition, the problems we're experiencing with locomotive reliability are taking a toll on service and on-time performance, not to mention the front-line employees who are managing failures when they occur. I want you to know that our Mechanical teams are still in the process of replacing faulty traction motors on our P-42 diesel locomotives and they're working on remedies to address the difficulties we're having with our aging fleet of AEM-7 electric locomotives.

We've proven time and again that we tackle challenges with skill, but don't get me wrong — I am not satisfied with just surviving another day. My goal for Amtrak is to realize our ambitions to grow as we become an increasingly important part of the national transportation network. Congress appears to be close to completing a reauthorization bill that will keep us headed in that direction. Both the House and the Senate versions of the bill passed with relatively little opposition, an indication of the support for passenger rail.

We're busy now and the summer's only going to get busier. The highest percentage of injuries occurs during the summer, so please look out for one another and work safely.

Sincerely,
Alex Kummant
President and Chief Executive Officer

Operational Update: Beginning June 30, *Saluki* Train 391 will operate one hour **earlier** to all stations, and *Illini* Train 392 is currently operating one hour and 10 minutes **later**. *Saluki* Train 390 and *Illini* Train 393 will continue operating on a revised schedule through Aug. 5.

Engineering: Production forces are in the process of constructing 10 turnout packages for Shore interlocking in North Philadelphia. These turnouts will be installed as four crossovers and two individual turnouts later in the production season.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from \$0.50 per mile to \$0.58 per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Information Technology: Only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Please direct media during regular business hours to 202-906-3860; after hours inquiries should be directed to the Media Relations answering service at 800-562-1904.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest; the deadline for submissions is Friday, July 11. Log onto Amtrak.com/photocontest for official rules.

 President and Chief Executive Officer

Operational Update: Due to a budget shortfall, the North County Transit District in San Diego will discontinue its participation in the Amtrak Rail 2 Rail program. As a result, NCTD Coaster monthly pass holders are no longer allowed to travel on Amtrak trains, effective 12:01 a.m., Tuesday, July 1.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from \$0.50 per mile to \$0.58 per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest. The deadline for submissions is Friday, July 11.

Operational Update: On July 9, 10 and 11, Amtrak *Cascades* Train 504 will not operate due to Union Pacific Railroad track work. Passengers will be provided motor-coach service between Eugene, Albany, Salem, Oregon City and Portland, Ore.

Engineering: The compaction grouting project that began on April 1 to stabilize 1,000 feet of concrete floor slabs of the B and P Tunnel in Baltimore is progression on schedule toward its July 21 completion target.

Human Resources: All non-agreement managers should have completed performance goals discussions with employees and entered the FY '08 goals into IMPACT, the new online performance management system. The final IMPACT training session is currently underway and will conclude on Friday, July 25.

Finance (Correction): The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from 50.5 cents per mile to 58.5 cents per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Benefits: New benefit contribution rates go into effect this month for agreement-covered employees, and will be in effect for the next 12 months. For more information, contact the Amtrak Benefits Service Center at 800-481-4887.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest; the deadline for submissions is Friday, July 11. Log onto Amtrak.com/photocontest for official rules.

Services Resume Following Midwest Floods

Service has now been fully restored on all three routes that were temporarily suspended in mid-June due to massive floods throughout the Midwest. The *Empire Builder* and *Southwest Chief* returned to regular service on July 1, while the *California Zephyr*, resumed on July 5.

"Floods of this size can wash out tracks and cause a lot of damage to switches and signal systems," said Chief Operating Officer Bill Crosbie. "The host railroads — BNSF, Canadian Pacific and Union Pacific — worked diligently to help us minimize the impact of the floods on our passengers and our business. We appreciate their efforts."

Missouri Announces \$5 Million to Improve Amtrak Service

Last week, the Missouri Department of Transportation (MoDOT) announced \$5 million will be provided by the state legislature to improve infrastructure and increase reliability of service between Kansas City and St. Louis. The state is also seeking another \$5 million in matching funds from the federal government.

Amtrak operates two daily Kansas City-St. Louis round trips on the Union Pacific Railroad, which currently suffers from heavy freight train congestion. The investment from MoDOT will increase track capacity through the addition of sidings, thereby relieving bottlenecks along the route.

"We're extremely excited about Missouri's new level of commitment to passenger rail service," said Anne Witt, vice president, Strategic Partnerships. "This is a trend we're seeing across the country — states are continually recognizing the need for reliable mass transit options, which equates to a lot of growth potential for our company."

In other state news, Illinois Gov. Rod Blagojevich has backed off a proposal to eliminate funding for Amtrak service in 2009 due, in part, to strong public opposition. The proposal was part of a plan to cut nearly \$2 billion in state spending to help balance the state budget. The company currently operates more than a dozen daily round trips as part of a service contract with the Illinois DOT, and a contract renewal at the current level of \$28 million per year is expected to be completed soon.

Company Addresses Baggage Car Shortage

Operational Update: Due to Canadian Pacific track work, the eastbound *Empire Builder* will operate on an alternate route between St. Paul-Minneapolis and Chicago on Tuesday, July 22 and Tuesday, July 29. Alternate transportation will be provided at intermediate stations.

Engineering: Over the next two weeks, as part of the ongoing work to correct defective concrete tie conditions in northern New Jersey, the Track Laying Machine will work west through Rahway, N.J., station to Union Interlocking.

Human Resources: IMPACT training for non-agreement managers, which occurs daily from 10 a.m. to 11 a.m. and 1 p.m. to 2 p.m., ends Friday, July 25.

Environmental Health and Safety: The oil-contaminated area in and around the Sunnyside Yard in New York is currently under remediation, with clean-up being conducted under the oversight of the New York State Department of Environmental Conservation. The project is slated for completion for future rail operations in October.

Benefits: To find out if a Fidelity Investments representative will be in your area or to make an appointment, log onto www.mysavingsatwork.com/amtrak and click on "Meet with a Fidelity Representative." You can also call 800-642-7131 to reserve an appointment at a convenient location.

The amount of baggage on trains has increased dramatically as ridership soars and passengers exceed their carry-on limits, causing more demand for baggage equipment. While the issue may be causing headaches for some front-line employees and passengers, the Mechanical and System Operations departments are taking steps to alleviate the strain as much as possible.

The company currently has 63 baggage cars in the active fleet — 51 are required for revenue service, and the other 12 are allocated as back-up cars for terminals in New York, Los Angeles, Chicago and Beech Grove. Currently, 10 baggage cars are due for required air brake maintenance at the Beech Grove facility, resulting in a shortage.

"The problem," explained Mike Frazier, director, System Operations, "is that with 10 cars in Beech Grove, the current operating plan only allows for two more baggage cars to be shopped elsewhere in the system. This is not feasible or sustainable. We've tried using baggage coaches as a temporary fix, but they simply can't handle the high volume of luggage, which is why we adjusted our plan last week."

That plan includes temporarily suspending baggage car service on Trains 448 and 449, effective July 19. Those cars will be redirected for use on the *Sunset Limited*. Repairs at Beech Grove are also being accelerated; three shopped cars are expected back in service within the next three weeks, according to Deputy Chief Mechanical Officer Terry Schindler.

"We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help," said Schindler. "If capital investments are there to support the current fleet plan, we'll build new baggage cars in two years that are more efficient and easier to load and unload." Schindler added that the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting current needs.

Company Addresses Baggage Car Shortage

According to Schindler, the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting the current needs of the fleet.

Company Addresses Baggage Car Shortage

Operational Update: Due to Canadian Pacific track work, eastbound Train 8/28/808 will operate on an alternate route and will not stop at stations between St. Paul-Minneapolis and Chicago on Tuesday, July 22 and Tuesday, July 29.

Human Resources: IMPACT training for non-agreement managers, which occurs daily from 10 a.m. to 11 a.m. and 1 p.m. to 2 p.m., ends Friday, July 25.

Environmental Health and Safety: The oil-contaminated area in and around the Sunnyside Yard in New York is currently under remediation, with clean-up being conducted under the oversight of the New York State Department of Environmental Conservation. The project is slated for completion for future rail operations in October.

Benefits: To find out if a Fidelity Investments representative will be in your area or to make an appointment, log onto www.mysavingsatwork.com/amtrak and click on "Meet with a Fidelity Representative." You can also call 800-642-7131 to reserve an appointment at a convenient location.

The amount of baggage on trains has increased dramatically as ridership soars and passengers exceed their carry-on limits, causing more demand for baggage equipment. While the issue may be causing headaches for some front-line employees and passengers, the Mechanical and System Operations departments are taking steps to alleviate the strain as much as possible.

The company currently has 63 baggage cars in the active fleet — 51 are required for revenue service, and the other 12 are allocated as back-up cars for terminals in New York, Los Angeles, Chicago and Beech Grove. Currently, 10 baggage cars are due for required air brake maintenance at the Beech Grove facility, resulting in a shortage.

"The problem," explained Mike Frazier, director, System Operations, "is that with 10 cars in Beech Grove, the current operating plan only allows for two more baggage cars to be shopped elsewhere in the system. This is not feasible or sustainable. We've tried using baggage coaches as a temporary fix, but they simply can't handle the high volume of luggage, which is why we adjusted our plan last week."

That plan includes temporarily suspending baggage car service on Trains 448 and 449, effective July 19. Those cars will be redirected for use on the *Sunset Limited*. Repairs at Beech Grove are also being accelerated; three shopped cars are expected back in service within the next three weeks, according to Deputy Chief Mechanical Officer Terry Schindler.

"We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help," said Schindler. "If capital investments are there to support the current fleet plan, we'll build new baggage cars in two years that are more efficient and easier to load and unload." Schindler added that the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting current needs.

Marketing and Product Management:

With 2.75 million trips (14 percent higher than last year), resulting in \$168 million in ticket revenue (19 percent higher), July 2008 was the highest ridership and ticket revenue month ever.

Operational Update: On Tuesday, Aug. 12 only, all *Wolverine*, *Pere Marquette* and *Blue Water Service* trains will be cancelled due to multiple track work projects performed by Norfolk Southern, Conrail and Amtrak. Motorcoach service will be provided.

Engineering: The 10-megavolt amp transformer at Jericho Park in Bowie, Md., will be returned to service this week, bringing service back to its full 20 MVA capacity.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. More information can be found online at www.dot.gov/ost/dapc/news.html.

Performance Management Update: The first issue of *Focus* newsletter, along with accompanying FAQs, is now available on the performance management Web site to provide the latest information on the company's performance management and pay-for-performance initiative. Log on to Intranet: "Employees" ► "Performance Management" ► "Tools and Resources."

Corporate Communications: On Thursday, Aug. 14, President and CEO Alex Kummant is slated to appear live on CNBC's *Street Signs* to discuss the company's record ridership and ticket revenue.

California Zephyr Schedule Reduced Via UP Partnership

Effective Monday, August 11, *California Zephyr* schedules will be shortened by as much as 45 minutes, one of the targets established in an agreement between Amtrak and Union Pacific Railroad. The trip-time reduction is part of a multiyear program to return the Overland Route between Salt Lake City and San Francisco to a state of good repair, ultimately allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add more than three hours to the *Zephyr's* schedule while UP performed track work as part of a commitment to improve on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule as planned. This is the third schedule reduction since the program began in June of last year.

"This is another milestone in our effort to improve service and OTP on the *Zephyr*," said Paul Vilter, assistant vice president, Strategic Partnerships. "UP is making great progress toward fulfilling its commitment to reduce slow orders on the route, which allows us to gradually restore the original schedule and deliver on-time arrivals."

Eastbound Train 6 will now depart Emeryville, Calif., 45 minutes later and operate 45 minutes faster to Salt Lake City. The remaining schedule to Chicago will not change. Train 5, originating in Chicago, will operate according to the current schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and 10 minutes of the time added to Train 5 have been removed, while two hours and 20 minutes have been taken from the schedule of Train 6.

"We appreciate UP's efforts related to the *Zephyr*, and we look forward to UP removing slow orders on other Amtrak routes," added Vilter.

Message from President Kummant

Dear Co-workers:

Over the course of the next week, you will receive an Employee Satisfaction Survey in the mail. I cannot stress enough how important it is for you to take a few minutes to complete and return the survey by Oct. 10, answering the questions as sincerely as possible. This is an opportunity for you to tell us your thoughts on what works and what can be made better.

All responses will be mailed directly to a third party and will be kept strictly confidential, and the anonymous, tabulated responses will be sent back to us. Our workforce is our most valuable resource; by participating in the survey you will make your voice heard as we shape the future of the company.

Sincerely,

Alex Kummant
President and Chief Executive Officer

Operational Update: As Texas braces for the arrival of Hurricane Ike in the Corpus Christi area on Saturday, several services are affected.

Sunset Limited Train 1 (11), scheduled to depart New Orleans today, has been canceled between New Orleans, La., and El Paso. Train 2 (12) is canceled between El Paso and New Orleans. Trains 421 (11) and 422 (12) are canceled in both directions between Fort Worth and El Paso.

Texas Eagle Trains 21 (11-12) and 22 (13-14) are canceled in both directions between Fort Worth and San Antonio. *Crescent* Trains 19 (11-12) and 20 (12-13) will not operate between Meridian, Miss., and New Orleans.

No alternate transportation will be provided for any service.

Don't Miss Good Morning America Next Week!

Amtrak, ABC Make History Next Week

Make sure you catch ABC News' Good Morning America next week, as it broadcasts live from an Amtrak charter train, the centerpiece of a five-day Whistle-Stop Tour that will travel across the Northeast and Ohio. Amtrak and ABC will be making history, as this is the first time anything of its kind has been done on live television.

Kicking off the five-day tour, anchors Diane Sawyer, Robin Roberts, Chris Cuomo, Sam Champion and the ABC crew will air the first show Monday while traveling through Massachusetts aboard specially equipped Amtrak equipment and two private rail cars. Powered by two P-42 locomotives, the train will travel through Massachusetts Monday; New York on Tuesday; Ohio, Pennsylvania, Maryland on Wednesday; and West Virginia on Thursday. The tour concludes on Thursday in Washington, D.C.

The 11-car, 874-foot-long traveling studio, operated with Amtrak Train and Engine crews with host railroad pilots and staffed by On-Board Service employees, includes two Superliner Sleeping cars, a Cross Country Café car, two Diner Lounge cars and a Transition Dorm, plus two private cars. The equipment conversion, paid for by GMA, was performed at Beech Grove and at the Albany Maintenance Facility.

"The GMA charter provides us an opportunity to show millions of Americans the benefits of train travel and our capacity to serve travelers from large and small communities across the country," stated Corporate Communications Chief Cliff Black. Spearheaded by the Charter Services group, the tour involves the collaboration of several departments including Transportation, Mechanical, Engineering and Amtrak Police Department, along with the cooperation of Norfolk Southern, CSX Transportation and Housatonic Railroad.

For more detailed information about the Whistle-Stop Tour, including a behind-the-scenes look at the months of preparation put into the project, visit www.abcnews.go.com/gma.

Amtrak This Week is being distributed early to remind employees of GMA's broadcasts from an Amtrak train.

Amtrak This Week is being distributed early to remind employees of GMA's broadcasts from an Amtrak train.

Service Disruptions: Because Hurricane Ike is expected to make landfall in the Corpus Christi, Texas area as a category 3 or category 4 hurricane on the morning of Saturday, Sept. 13, Amtrak is canceling all *Sunset Limited* and *Texas Eagle* trains on Friday, Sept. 12. No alternate transportation is provided.

Other Operational Updates: On Monday, Sept. 15, due to an equipment upgrade project, Washington-Boston Acela Express Train 2160 will replace Train 2108 and Washington-New York Acela Express Train 2110 will replace Train 2162. Northeast Regional Train 174 will operate on its current schedule between Washington and New York, but will depart New York at 1:30 p.m., 30 minutes later than the published schedule, and will operate approximately 30 minutes later at all stations to Boston.

Message from President Kummant

Dear Co-workers,

Some of you may have already received the Employee Satisfaction Survey that was mailed to each of your homes — many of you may have already received it. I strongly encourage you to take a few minutes to complete and return the survey, answering the questions as sincerely as possible. This is an opportunity for you to tell us your thoughts on what works and what can be made better. By doing so, you will help us shape the future of the company and help improve service for passengers and employees — our most important resource.

Amtrak This Week is being distributed early to remind employees of GMA's broadcast from an Amtrak train.

Note: An enthusiastic and heartfelt thank you to everyone who played a role in making the Good Morning America Whistle-Stop Tour train a success last week, including employees in the Transportation, Mechanical and Amtrak Police departments.

Operational Changes: For the duration of the equipment upgrade, the Washington-New York *Acela Express* Train 2108 is now Train 2160 and extended to Boston. Train 2162 is now Train 2110 and terminates in New York. *Northeast Regional* Train 174 will depart New York 30 minute later, arriving 30 minutes later at all stations to Boston.

Engineering: Production C&S and Mid-Atlantic division Engineering forces will complete the cutover this week of the new signal system on Track 1 of the Harrisburg Line between Rheems and Cork to allow bi-directional traffic under signal indication at timetable speed. This will greatly improve flexibility on the route for train operations and maintenance activities.

Human Resources: Beginning in October, all employees (except SAP users) will be required to create a new password and submit challenge questions and answers in the event of lost or forgotten passwords. This allows employees to reset their password without calling the Help Desk. For instructions, log onto <https://iam.amtrak.ad.nrpc/idm/docs/IAM-Job-Aid.pdf>.

WUS Centennial Celebration: Amtrak is hosting the Washington Union Station Centennial Celebration on Saturday and Sunday, Oct. 4 and Oct. 5, displaying memorabilia, souvenirs and current and historic train equipment. To volunteer and receive a free souvenir t-shirt and meal voucher, contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com.

Frequently Asked Questions About the Employee Satisfaction Survey

The Employee Satisfaction surveys recently mailed to all active employees' homes is an opportunity for employees to provide input on what works and what can be made better. It's completely anonymous; please take the time to complete it and return it by Oct. 10.

What's the purpose of the survey?

While it's not the only way for Amtrak to learn from its employees, the survey is an opportunity for you to sincerely share how you feel about the company, your job, the service we provide and many other facets of your perspective on Amtrak. The survey is an important tool for Amtrak to gauge current performance as an employer and a service provider, and for making improvements in both areas.

Why should I take the time to complete it?

You have a stake in Amtrak, and in the long run, you benefit by making your opinions known. Whether you're on the front lines or in the back offices, you offer a unique perspective on improvements we can make, and we want to know what they are.

Will I hear about the results of the survey, and if so when?

The findings will be tabulated and delivered to Amtrak around the end of the calendar year, and will help the company identify areas for improvement or development. You should expect to hear about the survey results (look for information in Amtrak Ink and Amtrak This Week) after the new year.

Is the survey confidential?

Yes. The survey is completely confidential and managed by an outside firm. All employees, including those in small departments, are assured that the firm will protect all information or findings that can identify anyone personally.

In fact, we purposely ask that no one volunteer his or her name on the survey. Amtrak wants your honest opinions and recognizes that we need to protect your anonymity in order to obtain them.

I didn't get the survey in the mail. Who do I call to get it mailed to me?

If you did not receive the survey at home, please e-mail ecom@amtrak.com or call (202) 906-3770 to request that one be sent to you. Please remember to include your name and mailing address.

Reminder: Don't forget to complete and return your responses to the Employee Satisfaction Survey by Oct. 10. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com as soon as possible if you have not received the survey.

Operational Changes: Through Oct. 26, *Empire Service* trains 280, 281, 284, 286 and 288 will operate on an adjusted schedule due to track work being performed by Amtrak between Albany-Rensselaer and Buffalo, N.Y.

Engineering: The Switch and Rail Gang will be installing the No. 87 switch on the Hudson Pocket Track Project in Newark, N.J. The new turnout will connect Hudson Yard Tracks 10 and 11 and help restore the yard's operational flexibility.

WUS Centennial Celebration: The Washington Union Station centennial celebration takes place on Saturday, Oct. 4, from 10 a.m. to 4 p.m., and Sunday, Oct. 5, from noon until 4 p.m. Contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com to volunteer.

Election Reminder: As Election Day draws near on Tuesday, Nov. 4, employees are encouraged to exercise their right to vote. However, the wearing of political buttons, stickers or other signs of political support or opposition is not allowed. This applies to equipment, company vehicles and other company-owned property.

Congress Passes Continuing Resolution for FY '09

House, Senate Action Taken on Amtrak Reauthorization

With the Senate vote on Saturday, Congress approved a continuing resolution that will provide Amtrak funding for FY '09 through March 6, 2009, at the FY '08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

Last week, the House also passed H. R. 2095, a combination of a rail safety bill and Amtrak reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan.

The Senate earlier today approved a procedural measure to clear the way to take up the legislation on Wednesday.

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for positive train control on certain rail main lines used by passenger and freight trains.

Combining the reauthorization legislation with the rail safety bill provided the impetus to finish the reauthorization bill before the end of Congress' session. Given the many items on the legislative agenda and the current financial crisis, having Congress take up Amtrak's reauthorizations as one of its last actions speaks well of the support for passenger rail on Capitol Hill.

Congress is expected to enter a recess period after Wednesday and it is unclear whether they will return to Washington for a post-election lame duck session.

Reminder: Don't forget to complete and return your responses to the Employee Satisfaction Survey by Oct. 10. Call ATS 777-3770 or e-mail Corporate Communications at ecom@amtrak.com if you have not received the survey. All responses are strictly confidential.

Operational Changes: Through Oct. 26, *Empire Service* trains 280, 281, 284, 286 and 288 will operate on an adjusted schedule due to track work being performed by Amtrak between Albany-Rensselaer, N.Y., and Buffalo, N.Y.

Engineering: The Switch and Rail Gang will be installing the No. 87 switch on the Hudson Pocket Track Project in Newark, N.J. The new turnout will connect Hudson Yard Tracks 10 and 11 and help restore the yard's operational flexibility.

WUS Centennial Celebration: The Washington Union Station centennial celebration will take place on Oct. 4, from 10 a.m. to 4 p.m., and Oct. 5, from noon until 4 p.m. Contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com to volunteer.

Congress Passes Continuing Resolution for FY '09

Preliminary Senate Action Taken on Amtrak Reauthorization

With the Senate's approval during a rare weekend session, Congress on Saturday approved a continuing resolution that will provide Amtrak funding for FY '09 through March 6, 2009, at the FY '08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

Last week, the House also passed H. Res. 2095, a combination of a rail safety bill and Amtrak's reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan.

The Senate earlier today overcame some procedural hurdles to clear the way to take up the legislation on Wednesday.

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for positive train control on certain rail main lines used by passenger and freight trains.

Combining the reauthorization legislation with the rail safety bill provided the impetus to finish the reauthorization bill before the end of Congress' session. Given the many items on the legislative agenda and the current financial crisis, having Congress take up Amtrak's reauthorizations as one of its last actions speaks well of the support for passenger rail on Capitol Hill.

Congress is expected to enter a recess period after Wednesday and it is unclear whether they will return to Washington for a post-election lame duck session.

Final Reminder: The deadline for completing and returning your responses to the Employee Satisfaction Survey is this **Friday, Oct. 10**. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com, and include your home mailing address, as soon as possible if you have not received a survey.

Operational Changes: Due to Union Pacific track work, *Coast Starlight* Train 14 will depart Klamath Falls at 10:25 a.m., two hours later than the published schedule, but will still operate between Los Angeles, Klamath Falls and intermediate stations. Northbound passengers may experience two-hour delays.

Engineering: On Friday, Oct. 10, the Production Switch Exchange System and Mid-Atlantic Division Engineering will begin the installation of the 32B switch at Shore Interlocking in Philadelphia. The track will be back in service Monday morning.

Benefits: Given the recent news about the economy, employees should direct any questions about their Fidelity 401(k) Retirement Savings Plan to the Fidelity Retirement Services Center at 877-477-AMTK. Representatives are available Monday through Friday, 8 a.m. to midnight EDT.

Health Services: As the influenza season quickly approaches, the Centers for Disease Control and Prevention recommends an annual flu vaccine as the first and most important step in protecting against this serious illness.

Acela Express Passengers Enjoy Outstanding OTP

Acela Express trains operated at 92.8 percent on-time performance for the month of September, making it the best OTP month in more than two years and the best month operating under a 16-train plan. The best OTP month ever for the *Acela* was March 2006, when the train ran on time 93.2 percent using 14 of 20 trainsets.

A number of factors are involved in this strong performance including improved crew performance, targeted schedule adjustments, and reductions in infrastructure challenges. The nearly 93 percent OTP for September 2008 contributed to Amtrak's increased air-rail market share along the Northeast Corridor. On the south end of the NEC, the company's air-rail market share increase to 63 percent; 49 percent on the north end.

THANK YOU, CENTENNIAL VOLUNTEERS!

A "Thank You" goes out to each of the many volunteers who donated their time this past weekend to make the Washington Union Station centennial celebration a success. From the expansive array of historical locomotives, private cars and current Amtrak equipment to the model rail displays and historical exhibits, the celebration had something for everyone. The celebration's organizers and volunteers were the backbone of this once-in-a-lifetime event.

Designed by architect Daniel Burnham, Washington Union Station is considered the gateway to the nation's capital. More than 32 million people visit the station each year. The celebration also marked the twentieth anniversary of its renovation.

Final Reminder: The deadline for completing and returning your responses to the Employee Satisfaction Survey is this **Friday, Oct. 10**. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com, and include your home mailing address, as soon as possible if you have not received a survey.

THANK YOU, CENTENNIAL VOLUNTEERS!

A hearty "Thank You" goes out to each of the many volunteers who donated their time this past weekend to make the Washington Union Station centennial celebration a rousing success. From the expansive array of historical locomotives, private cars and current Amtrak equipment to the model rail displays and historical exhibits, the celebration had something for everyone. The celebration's organizers and volunteers were the backbone of this once-in-a-lifetime event.

EIM Phase 2 Supports Broad Enterprise Systems Initiative

Amtrak is in the second stage of a five-year Employee Information Management (EIM) program designed to improve employees' access to information from the SAP system via a user-friendly Web browser — referred to as the Employee Information Portal, or EIP. Once this phase is completed, non-agreement-covered managers and employees and salaried agreement-covered employees will be able to easily check leave balances, view HR data and electronically submit and/or approve leave requests.

"EIM Phase 2 promotes ease of use and a movement toward self service," according to Michael Duncan, senior director, Compensation/Benefits and HR Technology.

Identity and access management, another program element, was recently used to match Windows and SAP usernames and passwords for easier access to SAP.

Additionally, the compensation management function will roll out to all managers with non-agreement-covered direct reports on Nov. 12. Mandatory training will begin tomorrow and continue through Friday, Nov. 7, and cover how to enter and approve merit increase recommendations in SAP. The October issue of *SAP Spotlight*, issued via e-mail on Oct. 7, details classroom training locations and dates for online training. Non-agreement managers should have received an e-mail with instructions on how to enroll in the training. For those who have not, contact SAPsupport@amtrak.com as soon as possible.

In early 2009, all salaried, non-agreement users can begin entering leave requests and approvals through EIP.

EIM Phase 2 supports a comprehensive enterprise systems initiative known as Strategic Asset Management (SAM), which will integrate the business practices of Finance, Procurement, Mechanical, Engineering and Transportation. Using SAP and another tool called Maximo, SAM is expected to enhance company productivity by improving the work flow, establishing better processes, and providing consistent information across the company.

Operational Changes: On Saturday and Sunday, Oct. 18, 19, 25 and 26, track work being performed by Metro-North Railroad will affect service and schedules along the *Maple Leaf*, *Adirondack* and *Lake Shore Limited* routes.

Marketing and Product Management: A pilot program is currently underway on the *Downeaster* in which conductors are using handheld computers to scan ticket barcodes to electronically record ridership data in real time. This first-of-its-kind pilot is the initial step toward print-at-home tickets for *Downeaster* passengers, beginning next spring.

Engineering: On Saturday, Oct. 18, Bridge Rehab Gang R-901 will employ 16 100-ton hydraulic jacks to lift the four bottom pins to position stabilizing yokes in the center of span No. 4 on the Susquehanna River Bridge as part of the Pin Stabilization Project. Thirteen additional spans will undergo this procedure over the next two years.

PSSA Update: The first of nine regional President's Service and Safety Awards luncheons takes place in Chicago on Wednesday, Oct. 15, followed by another recognition luncheon in Beech Grove, Ind., the next day. Across the country, 84 employees and six external partners will be honored with PSSA awards.

Corporate Communications: If you are contacted or approached by members of the press, please remember that only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Please direct media to call 202-906-3860 during business hours; direct after-hours inquiries to the Media Relations answering service at 800-562-1904.

TV Programming Note: On Wednesday, Oct. 15 at 8:30 p.m. EDT, "WETA All Access," a Washington, D.C.-based public television program, will air a behind-the-scenes look at Washington Union Station, exploring its role as the area's main rail transportation hub and as a tourist destination. The show will also be shown on www.weta.org.

EIM Phase 2 Supports Broad Enterprise Systems Initiative

Operational Changes: Due to track work being performed by Amtrak, Springfield Shuttle Trains 470, 490, 493 and 495 will be canceled between Berlin and Hartford, Conn., every Monday through Friday, through Nov. 14. Train 490 will be canceled between New Haven and Hartford.

Marketing and Product Management: A pilot program is currently underway on the *Downeaster* in which conductors are — for the first time — using handheld computers to scan ticket barcodes to electronically record ridership data in real time. This is the first step toward print-at-home boarding passes for *Downeaster* passengers, beginning next spring.

Engineering: On Saturday, Oct. 18, the Bridge Rehab Gang will be jacking the four bottom pins in the center of span No. 4 on the Susquehanna River Bridge as part of the Pin Stabilization Project. Thirteen additional spans will undergo this procedure over the next two years.

PSSA Update: The first of nine regional President's Service and Safety Awards luncheons takes place in Chicago on Wednesday, Oct. 15, followed by another recognition luncheon in Beech Grove, Ind., the next day. Across the country, 84 employees and six external partners will be honored with PSSA awards.

Corporate Communications: Only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Direct media during regular business hours to 202-906-3860; after-hours inquiries should be directed to the Media Relations answering service at 800-562-1904.

Amtrak is in the second stage of a five-year Employee Information Management (EIM) program designed to improve employees' access to information from the SAP system via a user-friendly Web browser — referred to as the Employee Information Portal, or EIP. EIM Phase 2 features a self-service component for non-agreement managers and employees that includes a simple leave request and approval tool and enables them to check leave balances and view current Human Resources-related data. EIM also includes compensation management and identity and access management elements, the latter of which recently matched Windows and SAP usernames and passwords for easy access to SAP.

The compensation management function will roll out to all managers with non-agreement direct reports on Nov. 12. Mandatory training will begin tomorrow and continue through Friday, Nov. 7, and cover how to enter and approve merit increase recommendations in SAP. The October issue of *SAP Spotlight* details classroom training locations and dates for Webinar training. Non-agreement managers should have received an e-mail with instructions on how to enroll in the training. For those who have not, contact SAPsupport@amtrak.com as soon as possible.

On Nov. 13, all non-agreement managers are required to begin entering merit allocations in SAP. In early 2009, all salaried, non-agreement users can begin entering leave requests and approval through EIP.

EIM Phase 2 supports a comprehensive enterprise systems solution known as Strategic Asset Management (SAM), which will integrate the business practices of Finance, Procurement, Mechanical, Engineering and Transportation. Using SAP and another tool called Maximo, SAM is expected to enhance company productivity by improving the work flow, establishing better processes, and providing consistent information across the company.

New Initiative Simplifies Travel Voucher Issuance

Slated to go live in November, the new travel voucher request (TVR) process will provide automated accountability and reporting capabilities and make it easier than ever for employees to submit requests for travel vouchers. Travel vouchers are typically used by employees without active rail card privileges, vendors and contractors and service award travelers. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Currently, managers, directors and supervisors send a faxed request to the travel office within the Human Resources department for review and processing.

“What was once a laborious, manual process now takes less than five minutes,” said Mike Jones, senior systems analyst, who led the development of this initiative. “And, because we leverage the use of the existing eTrax tool, there are no added costs associated with automating the TVR process.”

After logging on to the eTrax home page, users will be directed to a list of commonly used forms, which will include the travel voucher request form.

Station and administrative training aids can be found on the Intranet. For more information, contact Jones at ATS 777-3127 or JonesMi@amtrak.com.

New Timetable Goes Into Effect Today

The new Fall 2008-Winter 2009 System Timetable goes into effect today, and includes minor schedule changes across the system. Notable modifications include the restoration of through service on the *Lake Shore Limited* between Boston and Chicago that will include sleeper service beginning in November. Faster *Pacific Surfliner* weekend service is now available between Los Angeles and San Luis Obispo, while an additional *Northeast Regional* trip between Washington, D.C., and New York is offered on Thursday afternoons.

New timetables have been distributed and are available across the country and station managers are reminded to remove and destroy all copies of outdated timetables from distribution racks. The Northeast Corridor Thanksgiving edition will be distributed shortly, which will supersede the Fall-Winter version from Nov. 25 to Dec. 1.

Government Affairs: On Oct. 29, Chief Operating Officer Bill Crosbie will testify during a House Transportation and Infrastructure Subcommittee hearing on “Investing in Infrastructure: The Road to Recovery.”

Operational Changes: Beginning Monday, Oct. 27 through Thursday, Dec. 4, westbound Train 371 *Pere Marquette* will depart Grand Rapids, Mich., one hour earlier than scheduled, and will arrive and depart subsequent station stops one hour earlier due to CSX track work.

Engineering: Production's Switch and Rail Gang is currently installing 3,330 track feet of panelized concrete track on Track No. 4 at Metro Park Station. Once the 60-foot track panels are in place, continuous welded rail will be installed. The work is scheduled for completion in mid-November.

PSSA Update: President's Service and Safety Awards luncheons take place in Philadelphia on Tuesday, Oct. 28 and Wednesday, Oct. 29 in New York. The two events will recognize a combined total of 23 PSSA winners and 151 30- and 35-year employees.

Human Resources-Retirement: Fidelity has made Amtrak aware of a fake (phishing) e-mail that may be received by Fidelity clients, including Amtrak employees, directing them to provide or update account information. Employees are advised to view with suspicion any e-mail message asking for account information; legitimate business concerns do not ask for such information via e-mail.

Human Resources-Health: Employees and retirees are reminded to participate in the 2009 open enrollment period currently in progress until Nov. 14. Employees may enroll via www.amtrakbenefits.com or by calling the Amtrak Benefits Service Center at 800-481-4887.

Human Resources-Drug and Alcohol: Per a U.S. Department of Transportation directive, effective Nov. 1, direct observation of urine specimen collections is required for all return-to-duty and follow-up drug testing.

Benefits: Fidelity has made Amtrak aware of a fake (phishing) e-mail that may be received by Fidelity clients, including Amtrak employees, directing them to provide or update account information. Employees are advised to view with suspicion any e-mail message asking for account information; legitimate business concerns do not ask for such information via e-mail.

November 3, 2008

New Diversity Training Plan to Roll Out

As part of its ongoing commitment to promoting a workplace free of discrimination and harassment, the 2009 diversity training season launches this week with a new focus on how effective diversity initiatives impact the bottom line.

“As Amtrak continues to evolve in response to changes in today’s more diverse market, it’s important to ensure our workforce has a good understanding of diversity — beyond compliance — and how it impacts every facet of our business,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

To that end, the department is implementing a new round of diversity training, including an updated class format and curriculum to ensure alignment with the company’s strategic direction. Technical modifications were also made to the online refresher course to address several functional issues.

The mandatory diversity training requirement remains in effect for all non-agreement employees. Departmental diversity training representatives will assist in identifying those employees required to undergo training, notifying employees of class schedules and registering employees in the training classes. A list of diversity training representatives is posted on the diversity site on the Intranet.

Classroom: All new non-agreement employees as well as those who have no record of having taken diversity training, will be required to complete training in FY ’09. A schedule of classes and a list of FAQs are posted on the Intranet at <http://wiki.intranet.nrpc/display/Diversity/Diversity+Training>.

Online: All non-agreement employees who have completed training and are due for a refresher (as required every three years) will be required to complete the online course. The online diversity refresher can also be found at <http://wiki.intranet.nrpc/display/Diversity/Online+Diversity+Refresher+Course>.

Training for agreement-covered employees remains a part of their existing training channels, such as block training.

Daylight Savings Time Reminder: In accordance with the Uniform Time Standards Act to set clocks back one hour on Sunday, Nov. 2 at 2 a.m., all Amtrak trains en route will protect departure times at the first station after 2 a.m. and operate on current schedules to their final destinations.

Operational Changes: Beginning Nov. 3 through Nov. 24, all *Empire Service* trains operating between Albany-Rensselaer and Niagara Falls, N.Y., (except Train 285) will operate on an adjusted schedule due to track work being performed by CSX Transportation.

Pay-for-Performance: If you have not completed the mandatory compensation management training required for all managers with non-agreement reports, which concludes on Friday, Nov. 7., send an e-mail to carterva@amtrak.com.

Engineering: Production’s Switch and Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, is in the process of reconstructing the North Leg of the Perryville Wye. By the Thanksgiving holiday, the gang will lay 1,200 track-feet of wood track panels and install continuous welded rail.

Marketing and Product Development: Scheduled for discontinuance on Nov. 1, the provision allowing Northeast Corridor monthly multi-ride ticket holders to upgrade to off-peak Acela Express trains within 30 minutes of departure for \$20 will remain in effect until March 1, 2009.

Health Services: The U.S. Court of Appeals has temporarily delayed the DOT mandate on direct observation of urine specimen collections for federal return-to-work and follow-up drug testing, which was slated to go into effect on Saturday, Nov. 1.

New Diversity Training Plan to Roll Out

As part of its ongoing commitment to promoting a workplace free of discrimination and harassment, the 2009 diversity training season launches this week with a new focus on how effective diversity initiatives impact the bottom line.

“As Amtrak continues to evolve in response to changes in today’s more diverse market, it’s important to ensure our workforce has a good understanding of diversity — beyond compliance — and how it impacts every facet of our business,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

To that end, the department is implementing a new round of diversity training, including an updated class format and curriculum to ensure alignment with the company’s strategic direction. Technical modifications were also made to the online refresher course to address several functional issues.

The mandatory diversity training requirement remains in effect for all non-agreement employees. Departmental diversity training representatives will assist in identifying those employees required to undergo training, notifying employees of class schedules and registering employees in the training classes.

Classroom: All new non-agreement employees as well as those who have not yet taken diversity training are required to complete training in FY '09. A schedule of classes and a list of FAQs are posted on the Intranet at <http://wiki.intranet.nrpc/display/Diversity/Diversity+Training>.

Online: All non-agreement employees who have completed training and are due for a refresher (as required every three years) must complete the online course. The online diversity refresher can also be found at <http://wiki.intranet.nrpc/display/Diversity/Online+Diversity+Refresher+Course>.

Training for agreement-covered employees remains a part of their existing training channels, such as Block Training.

Operational Changes: Beginning Nov. 3 through Nov. 24, all *Empire Service* trains operating between Albany-Rensselaer and Niagara Falls, N.Y., (except Train 285) will operate on an adjusted schedule due to track work being performed by CSX Transportation.

Pay-for-Performance: If you have not completed the mandatory compensation management training required for all managers with non-agreement reports, which concludes on Friday, Nov. 7., send an e-mail to carterva@amtrak.com.

Engineering: Production’s Switch and Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, is reconstructing the North Leg of the Perryville Wye. By the Thanksgiving holiday, the gang will lay 1,200 track-feet of panelized wood ties and rail and install continuous welded rail.

Daylight Savings Time Reminder: In accordance with the Uniform Time Standards Act to set clocks back one hour on Sunday, Nov. 2 at 2 a.m., all Amtrak trains en route will protect departure times at the first station after 2 a.m. and operate on current schedules to their final destinations.

Health Services: The U.S. Court of Appeals has delayed the DOT mandate on direct observation of urine specimen collections for federal return-to-work and follow-up drug testing, which was slated to go into effect on Saturday, Nov. 1.

November 3, 2008

New Diversity Training Plan to Roll Out

As part of its ongoing commitment to promoting a workplace free of discrimination and harassment, the 2009 diversity training season launches next week with a new focus on how effective diversity initiatives impact the bottom line.

“As Amtrak continues to evolve in response to changes in today’s more diverse market, it’s important to ensure our workforce has a good understanding of diversity beyond compliance and how it impacts every phase of our business,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

To that end, the department is implementing a new round of diversity training, including an updated class format and curriculum to ensure alignment with the company’s strategic direction. Technical modifications were also made to the online refresher course to address several functional issues.

However, the mandatory diversity training requirement remains in effect for all non-agreement employees:

Classroom ➡ All new non-agreement employees since the last round of training, as well as those who have no record of diversity training, will be required to complete training in FY '09. A schedule of classes and a list of FAQs are posted on the Intranet at <http://wiki.intranet.nrpc/display/Diversity/Diversity+Training>.

Online ➡ All non-agreement employees who have completed training and are due for a refresher (as required every three years) will be required to complete the online course. The online diversity refresher can also be found at <http://wiki.intranet.nrpc/display/Diversity/Online+Diversity+Refresher+Course>.

Departmental diversity training representatives will coordinate registration. Training for agreement-covered employees remains a part of their existing training channels.

Daylight Savings Time Reminder: In accordance with the Uniform Time Standards Act to set clocks back one hour on Sunday, Nov. 2 at 2 a.m., all Amtrak trains en route will protect departure times at the first station after 2 a.m. and operate on current schedules to their final destinations.

Operational Changes: Beginning Nov. 3 through Nov. 24, all *Empire Service* trains operating between Albany-Rensselaer and Niagara Falls, N.Y., (except Train 285) will operate on an adjusted schedule due to track work being performed by CSX Transportation.

Pay-for-Performance: If you have not completed the mandatory compensation management training required for all managers with non-agreement reports, which concludes on Friday, Nov. 7., send an e-mail to carterva@amtrak.com.

Engineering: Production’s Switch and Rail Gang with the assistance of Mid-Atlantic Division Engineering forces is in the process of reconstructing the North Leg of the Perryville Wye. The gang will be laying 1,200 track-feet of wood track panels and then relaying welded rail. The work is scheduled to be completed prior to the Thanksgiving holiday.

Health Services: Per a U.S. Department of Transportation directive, effective Nov. 1, direct observation of urine specimen collections is **required** for all federal return-to-duty and follow-up drug testing.

November 10, 2008

October Ridership and Revenue Point to Slower Growth

After six consecutive years of rising ridership and revenue and a particularly strong FY '08, results from the first month of FY '09 indicate a deceleration in growth. While systemwide ridership for the month is up 4 percent over last October and revenue is up 5 percent, both amounts are slightly under budget.

The totals for October were tempered by Northeast Corridor performance, where *Acela Express* and *Northeast Regional* trains combine for roughly 60 percent of the company's overall ticket revenue. Lower gas prices, higher unemployment and the current economic crisis affected NEC travel, especially on *Acela Express*. October ridership for *Acela* and *Northeast Regional* service was down 6 percent and 4.5 percent from last year, respectively. The result was a combined budget shortfall of \$7.8 million.

The good news, according to George Raed, chief, Market Research and Analysis, is that overall numbers are buoyed by stronger-than-expected performance on long-distance routes and other corridor services. In total, long-distance ridership climbed 15 percent and generated 16 percent more revenue than last year. State-supported and other short-distance corridor service ridership and revenue grew by 10 percent and 12 percent, respectively. These numbers reflect improved on-time performance and service quality.

"Job losses and decreased revenue are causing a large decline in business travel, as evidenced by our performance on the NEC. But these same factors are hurting the airlines even more, which is allowing us to gain market share," explained Vice President of Marketing and Product Management Emmett Fremaux.

As airlines continue to reduce capacity and increase fares, more travelers are expected to turn to rail service.

"People still have travel needs, and while the overall market may have shrunk for the time being, we have an opportunity to capture long-term passengers who are trying passenger rail — and experiencing its benefits — for the first time," said Fremaux.

Operational Changes: Due to Union Pacific track work, *Coast Starlight* Trains 11 and 14 will operate on an alternate route, with stops at stations between Los Angeles and Sacramento on Nov. 8, 10, 12 and 14. Alternate train or motorcoach service is available at most stations affected by this detour.

Engineering: The Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will install the No. 27 switch in REA Interlocking in Newark, N.J., during a 55-hour weekend outage starting on Friday, Nov. 14.

Benefits: Later this week, employees will receive a letter explaining the transition from SHPS to WageWorks as the company's flexible spending accounts administrator. Also note that the annual open enrollment period for benefits ends this Friday, Nov. 14.

Human Resources/Station Support: The new electronic travel voucher request process is slated to go live on Sat., Nov. 15. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Marketing and Product Management: The Radio City Christmas Spectacular® is now offering employees \$54 orchestra and first mezzanine seats — an \$18 discount — at select non-peak performances through Friday, Dec. 12. Log on to www.radiocitychristmas.com and enter the "AMTRAK" code to receive the discount.

Government Affairs: Amtrak would like to congratulate Conductor Mike Shaw on his election to the Maine House of Representatives, and the countless other employees across the country who engage in public service.

Congratulations to *Downeaster* Conductor Mike Shaw on his election to the Maine House of Representatives, among other employees across the country who engage in public service.

November 10, 2008

Economic Downturn Evident in October Ridership as Growth Slows

After a particularly strong FY '08, the sixth consecutive year of rising ridership and revenue, results from the first month of FY '09 indicate a deceleration in growth thanks to a wide variety of economic factors. While systemwide ridership for the month is up 4 percent over last October and revenue is up 5 percent, both amounts are slightly under budget.

The totals for October were tempered by Northeast Corridor performance, where *Acela Express* and *Northeast Regional* trains combined for roughly 60 percent of the company's overall ticket revenue. Lower gas prices, higher unemployment and the current economic crisis affected NEC travel, especially on *Acela Express*. October ridership for *Acela* and *Northeast Regional* service was down 6 percent and 4.5 percent from last year, respectively. The result was a combined budget shortfall of \$7.8 million for those services.

"The downturn in the economy is causing a large decline in business travel, as evidenced by our performance on the NEC. But these same factors are hurting the airlines even more, allowing us to gain market share," explained Vice President, Marketing and Product Management Emmett Fremaux.

The good news, according to George Raed, chief, Market Research and Analysis, is that overall numbers are buoyed by stronger-than-expected performance on long-distance routes and other corridor services despite these negative factors. In total, long-distance ridership climbed 15 percent and generated 22 percent more revenue than last year. State-supported and other short-distance corridor service ridership and revenue grew by 10 percent and 12 percent, respectively. These numbers reflect improved on-time performance and service quality.

As airlines continue to reduce capacity and increase fares, more travelers are expected to turn to rail service.

"People still have travel needs, and while the overall market may have shrunk for the time being, we have an opportunity to capture long-term passengers who are trying passenger rail — and experiencing its benefits — for the first time," said Fremaux.

Operational Changes: On Nov. 8, 10, 12 and 14, *Coast Starlight* Trains 11 and 14 will operate on an alternate route and will **not** stop at stations between Los Angeles and Sacramento due to Union Pacific track work. Alternate train or thruway motorcoach service is available at most stations affected by the detour.

Engineering: The Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will install the No. 27 switch in Rea Interlocking in Newark, N.J., during a 55-hour weekend outage starting on Friday, Nov. 14.

Benefits: Later this week, employees will receive a letter explaining the transition from SHPS to WageWorks as the company's flexible spending accounts administrator. Also note that the annual open enrollment period for benefits ends this Friday, Nov. 14.

Human Resources/Station Support: The new electronic travel voucher request process is slated to go live on Sat., Nov. 15. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Company Prepares for Holiday Ridership Demand

With Thanksgiving quickly approaching — and bringing with it an anticipated surge in ridership — operating departments are putting the final touches on plans to orchestrate a complex logistical challenge. An estimated 700,000 passengers, 60 percent of whom will be on the Northeast Corridor, are expected to take to the rails next week. In addition, station employees, on-board crews and many others are ready to handle the high volume.

“We’re essentially bringing structure to chaos,” said Bruce Van Sant, director, System Operations. “It’s a challenge to handle such high numbers of people on trains and in stations, but we’ve found a way to do it well.”

Two services that do not usually require reservations — *Keystone Service* from Philadelphia to Harrisburg and *Pacific Surfliners* — will require reservations from Nov. 25 to 28 to prevent overcrowding.

This year, the schedule includes significantly expanded *Acela Express* and *Northeast Regional* service, including added coaches on *Northeast Regional* trains. In the Pacific Northwest, passengers will benefit from 10 extra Amtrak *Cascades* trains.

“On the peak holiday travel days, we pack a lot more into the schedule. This takes a lot of coordination and cooperation from host railroads and commuter lines to make room for our trains. We couldn’t do it without their help,” said Van Sant.

Peak days are the Wednesday, Thursday morning and Sunday of the holiday week. Saturday travel is also becoming more popular as passengers choose to return home sooner. For complete details on Northeast Corridor service, refer to the special Thanksgiving Holiday Timetable.

Employees are reminded that they still have flash-pass privileges according to the normal policy, which does not guarantee a seat, and employees are required to give their seats to revenue passengers when standee conditions occur. As always, please work safely, remain vigilant and report any suspicious activity to Amtrak Police by calling 800-331-0008 or by dialing 911.

Operational Changes: On Mondays through Fridays of each week Nov. 17-21 and Dec. 2-9, *Springfield Shuttle* Trains 470, 490, 493 and 495 will be canceled between New Haven and Hartford, Conn., due to track work. Motorcoach service will be provided.

Pay-for-Performance: Beginning Wednesday, Nov. 19, non-agreement managers can load **approved** performance ratings into the SAP Compensation Management System. Performance ratings in any status other than “approved” will not be accepted by the SAP system. Questions should be directed to impact@amtrak.com.

Benefits: The 2009 open enrollment period concluded Friday, November 14, 2008. If you have any questions about your 2009 benefits, contact the Amtrak Benefits Service Center at 800-481-4887.

Don’t Forget to Log 2008 Leave!

All non-agreement employees, ARASA (OBS) supervisors and crew representatives are required to record leave into mySAP/CATS. Leave should be entered as taken. If you have not done so, enter all leave taken to date in 2008 immediately.

Instructions for entering leave can be found at <http://wiki.intranet.nrpc/display/STS/Home>. For more information on how to manage your absences, understand your vacation accrual rates, and generate real-time leave reports, log onto <http://intranet.nrpc/employees/mlt.htm>. To review the vacation policy, refer to HR policy 7.35.3.

Auto Train Returned to Service

After a four-day service cancellation due to cracks in auto carrier underframes, Auto Train resumed operation on Saturday with its daily roundtrip between Lorton, Va., and Sanford, Fla.

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of the fleet, which revealed similar cracks. Although no incidents had occurred as a result of these cracks, company officials immediately canceled Auto Train service as a precautionary measure until repairs could be made.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at Auto Train terminals in Virginia and Florida. These teams worked around-the-clock in 12-hour shifts to weld steel plates to the affected area of the car frame so service could resume as soon as possible.

“We suspended service as a precaution; there is no wavering in our commitment to the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “From the Auto Train crew on Tuesday, to other passenger services and call center employees, to the welders who helped fix the equipment, I thank everyone who had a role in handling the situation and restoring service.”

After the decision to cancel the train on Tuesday, Auto Train passengers were offered a full refund or the option of remaining on the trains they had boarded for meal service and use of the accommodations they had reserved, without charge. Amtrak also provided hotel vouchers to those passengers who chose to rest over night before driving their cars to their destinations. Additionally, Customer Service teams called passengers booked for travel later in the week to inform them of the service cancellations and offer refunds.

The Auto Train fleet includes 80 of the two-year-old auto carriers, which have logged approximately 500,000 miles each.

Operational Changes: All NEC, Keystone Service and *Pacific Surfliner* trains will require reservations from Nov. 25 to Dec. 1. For employees, flash-pass privileges still apply, which requires pass riders to give their seat to revenue passenger when standee conditions occur.

Security: This week security and police patrols will increase throughout the system, including K-9 detection teams. Call APD at 800-331-0008 or dial 911 to report suspicious activity.

Engineering: From 10 p.m. to 6 p.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department will work on the west slope Rock cut located under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. After a brief winter shutdown, the project is slated for completion in mid- to late summer.

Corporate Communications: On Tuesday, Nov. 25 at 10 p.m., as part of its eight-part “Extreme Trains” series, the History Channel is airing a profile on the *Acela Express*. On Dec. 16, the program is highlighting the *Empire Builder*.

Corporate Communications: On Tuesday, Nov. 25 at 10 p.m., as part of its eight-part “Extreme Trains” series, the History Channel is airing a profile on the *Acela Express*. On Dec. 16, the program is highlighting the *Empire Builder*.

On-Time Performance Update: Last Monday, Nov. 17, system-wide on-time performance was 88.4 percent, the sixth highest in the last five years, and the best regular weekday operations during the same period.

Reminder: As part of the Identity and Access Management process, which synchronized SAP and Windows passwords, employees are reminded to submit three challenge questions that can be used to reset the password. Call the Amtrak Help Desk at 800-772-HELP for more information.

Auto Train Returned to Service

After a four-day service cancellation due to cracks in auto carrier underframes, *Auto Train* resumed operation on Saturday with its daily roundtrip between Lorton, Va., and Sanford, Fla.

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of other equipment, which revealed other such cracks. Company officials immediately canceled *Auto Train* service until repairs could be made.

“This is a great illustration of how our company should operate and the value we place on the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “I commend everyone involved in the detection and repair of these problems, as well as our customer service teams who minimized the inconvenience to our passengers.”

After the decision to cancel the train on Tuesday, *Auto Train* passengers were offered a full refund or the option of remaining on the trains they had boarded for free meal service and use of their reserved accommodations. Amtrak also provided hotel vouchers to those passengers who chose to rest over night before driving their vehicles to their destinations. Additionally, Customer Service teams called passengers booked for travel later in the week to inform them of the service cancellations and offer refunds.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at *Auto Train* terminals in Virginia and Florida. These teams welded steel plates to the affected area of the car frame around the clock so service could resume as soon as possible.

The cancellations resulted in about \$XXX in lost revenue. “Safety is our number one priority, and we will always choose to err on the side of caution. No amount of money is worth risking any kind of injury or accident,” said Crosbie.

The *Auto Train* fleet includes 80 of the two-year-old auto carriers, which have logged approximately 500,000 miles each.

Operational Changes: All NEC, Keystone Service and *Pacific Surfliner* trains will require reservations from Nov. 25 to Dec. 1. For employees, flash-pass privileges still apply, which requires pass riders to give their seat to revenue passenger when standee conditions occur.

Security: This week security and police patrols will increase throughout the system, including K-9 detection teams. Call APD at 800-331-0008 or dial 911 to report suspicious activity.

Engineering: From 10 p.m. to 6 p.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department will work on the west slope Rock cut located under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. After a brief winter shutdown, the project is slated for completion in mid- to late summer.

Corporate Communications: On Tuesday, Nov. 25 at 10 p.m., as part of its eight-part “Extreme Trains” series, the History Channel is airing a profile on the *Acela Express*. On Dec. 16, the program is highlighting the *Empire Builder*.

December 1, 2008

Thanksgiving 2008 Marks Second Highest Holiday Travel Period on Record

Operational Changes: Due to Union Pacific track work, *Lincoln Service Train* 303 will be canceled Tuesday, Dec. 2 through Thursday, Dec. 4. Alternate transportation will not be provided although service to most destinations between Chicago and St. Louis is available on other Amtrak trains.

Engineering: From 10 p.m. to 6 p.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department will work on the west slope Rock cut located under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. The project is slated for completion in mid- to late summer.

Finance: Effective Jan. 1, 2009, the reimbursable mileage rate for private autos (including vans, pickups and panel trucks) used for authorized company business will decrease from \$0.585 per mile to \$0.55 per mile.

Gift Policy Reminder: The Ethical Conduct and Conflict of Interest policy (posted on the Intranet under “Policies”) precludes accepting any gifts valued at more than \$50, and no employee may solicit a gift of any value. Procurement department employees are precluded from accepting any gifts except for “business courtesies” that do not exceed \$10 in value.

Amtrak’s busiest week of the year wraps up today, and while official ridership and revenue numbers are not yet available, preliminary results indicate another strong Thanksgiving travel season, especially considering current economic conditions and low gas prices.

Overall system ridership dipped 2 percent compared to last year with an estimated 655,000 trips, yet ticket revenue rose by 2 percent to approximately \$43.9 million, due to higher fares and revenue management tactics. The period from Nov. 25 to Dec. 1 ranks as the company’s second highest holiday ridership on record, just behind last year’s Thanksgiving week.

“Considering that overall holiday travel was down appreciably this year, our numbers reflect the growing appeal of passenger rail,” said Emmett Fremaux, vice president of marketing and product management.

Once again, operating departments expanded service to meet demand across the system. Dozens of additional *Acela Express*, *Northeast Regional* and *Amtrak Cascades* trains departed as a result of collaboration between Transportation, Engineering and Mechanical departments.

“Our normal operations are incredibly complex, but to ramp up service the way we do at Thanksgiving is truly impressive,” said Bill Crosbie, chief operating officer. “I’d like to thank every employee — and those who volunteered extra time — for working so hard to keep our passengers safe and pleased with their Amtrak experience during the holiday week.”

A Message from Joe Boardman

Dear Co-workers,

When I started my new position here barely two weeks ago, I hit the ground running, in large part because I've come to know Amtrak pretty well over the years.

On my first day on the job, I took some time to meet employees in Washington Union station. My second day, which happened to be Thanksgiving, I visited the crew base and thanked employees for spending their holiday helping others safely reach their destinations. Last week, I had the opportunity to meet with the leaders of a number of our unions.

A couple things you should know about me: I'm a former member of IBEW and Teamsters. I am a straight shooter, so you'll know where I stand on things. I listen closely, and rely on the strengths of well-qualified people to give me their recommendations. I strongly believe that collaboration is a necessity in our business, and I don't have much time for those who stand in its way.

For those who may make incorrect assumptions about my past affiliations, let me be very clear: I am here because I believe in Amtrak. Splitting off the Northeast Corridor or separating the NEC infrastructure from operations are absolutely not in my plans. I not only want to preserve our coast-to-coast, interconnected system but also want to see it prosper.

With your help, we will become a greener, safer and healthier Amtrak. I plan to build on the many opportunities we have to show how critical passenger rail is to the economy and mobility of America, and I will be sharing with you exactly what that means in the coming weeks and months.

If you're thinking that you've heard all this before and you've seen CEOs come and go, that may be. However, as you get to know me (and you will), you'll see that I am personally committed to the success of this railroad. We have some of the best men and women in the field, and I hope you'll join me on the journey.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Operational Changes: Due to track work taking place on the Connecticut River Bridge over the next two weekends, service between New York and Boston is canceled on *Northeast Regional* Train 67 on Dec. 13 and 20, and Train 66 on Dec. 14 and 21, with no alternate transportation provided.

Operation Lifesaver: If you are an Operations Lifesaver presenter, contact OL Officer Alvin Richardson (ATS 777-3434 or richara@amtrak.com) to make sure you are included in the national presenter database.

Charitable Giving: Pledge cards for the 2008 Employee Charitable Donation Campaign, which runs until Dec. 31, will be distributed to all employees by their respective departments. Employees may make contributions through payroll deductions or on a one-time basis.

PSSA Update: The final regional President's Service and Safety Awards luncheon takes place on Wednesday, Dec. 10 in Jacksonville, Fla., where 17 employees will receive PSSA recognition and 28 will be honored for their 30 and 35 years of service.

Human Resources: Starting Dec. 8, non-agreement managers may begin entering FY '09 goals in the IMPACT system.

December 8, 2008

Boardman Message

Message from Joe Boardman

Merit Pay Reminder: Starting Dec. 8, non-agreement managers can begin entering goals in the IMPACT system. All non-agreement employees must have their goals recorded in IMPACT to receive a performance review and be eligible for a merit pay increase.

Operational Changes: Due to track work taking place on the Connecticut River Bridge over the next two weekends, rail service will be shut down between Boston and New York, affecting *Northeast Regional* Train 67 on Dec. 13 and 20 and Train 66 on Dec. 14 and 21.

Operation Lifesaver: If you are an Operations Lifesaver presenter, contact OL Officer Alvin Richardson (ATS 777-3434 or richara@amtrak.com) to make sure you are included in the presenter national database.

Human Resources: Pledge cards for the 2008 Employee Charitable Donation Campaign, which runs until Dec. 31, will be distributed to all employees by their respective departments. Employees who wish to make a contribution may do so through payroll deductions or on a one-time basis.

PSSA Update: The final regional President's Service and Safety Awards luncheon takes place on Wednesday, Dec. 10 in Jacksonville, Fla., where 17 employees will receive PSSA recognition and 28 will be honored for their 30 and 35 years of service.

Corporate Communications: Please remember that only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Please direct media calls to 202-906-3860 during business hours; 800-562-1904 after business hours.

December 22, 2008

Amtrak Mourns the Loss of Notable Supporters

Amtrak lost two ardent passenger rail supporters as former board member Paul Weyrich and United Transportation Union National Legislative Director James M. Brunkenhoefer both passed away last week. Amtrak whistles across the entire system will blow today and tomorrow at 3 p.m. to honor them.

Best known as a co-founder of the politically conservative Heritage Foundation, Weyrich later founded the Free Congress Foundation, which unlike most similar organizations favored rail mass transit. He served on the Amtrak board — from February 1987 to January 1993— as well as the National Surface Transportation Policy and Revenue Study Commission. A former political reporter, Weyrich was also a prolific writer and publisher of The New Electric Railway Journal.

“Paul Weyrich has been a friend and passionate supporter of Amtrak since the early days of the company’s formation,” said Government Affairs and Corporate Communications Vice President Joe McHugh. “Even after his service on the board ended, he continued to serve the company with great enthusiasm. We will miss him very much.”

Funeral services will be held today at the Holy Transfiguration Melkite Greek-Catholic Church in McLean, Va. Contributions in Weyrich’s honor should be made to the church.

Brunkenhoefer, also known as “Brokenrail,” began his railroad career in 1966 as a trainman for the Southern Pacific Transportation Co. Until his death, he held seniority in the Train and Engine service crafts on the Union Pacific lines in Texas and Louisiana. Before serving as UTU’s national legislative director, Brunkenhoefer served in a number of offices in Local 83 in Houston. In 1980, he became the alternate Texas state legislative director before assuming full directorship of the Texas State Legislative Board in 1982. He served at the national level since 1987.

“It is with great sadness that I recognize the passing of James Brunkenhoefer,” said President and CEO Joe Boardman. “There is no one with a kinder heart for the suffering than another human has. ‘Brokenrail brought compassion and concern to me at a time that I needed it. My prayers and thoughts are with his soul as well as his loved ones during this time of loss. We will all miss him.”

“The passing of James Brunkenhoefer is a loss to the railroad world,” added Labor Relations Vice President Joe Bress. “He exemplified the best in lobbying for the UTU and supporting Amtrak. I will miss his way of refocusing an issue and doing it with passion, humor and personality.”

Funeral services will be held today at Am Kolel Sanctuary in Rockville, Md.

Useful Information for the New Year ...

- If you've moved in the past year, notify Human Resources of your current mailing address as soon as possible; 2008 W-2s will be mailed to your home by Jan. 31.
- Make sure the Railroad Retirement Board has your current mailing address as well. Send it, along with your Social Security number, to the nearest RRB office (visit www.rrb.gov for office locations).
- Please submit W-4 tax withholding changes to Payroll as soon as possible. To claim tax exempt status in 2008, submit a new W-4 to Payroll by Feb. 16.
- Beginning Jan. 1, the Tier 1 tax rate will be 6.2 percent for compensation up to \$106,800 with a maximum of \$6,621.60 annually. The Tier 2 tax rate is 3.9 percent for compensation up to \$79,200 with a maximum of \$3,088.80.
- Effective Jan. 1, the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for expenses incurred on or after Jan. 1.

Benefits: 2009 FSA elections are now in the WageWorks system. Log on to wageworks.com or call 877-924-3967 to obtain a commuter pass, set up reimbursement through direct deposit, or confirm that your information is accurate in the WageWorks system

2009 Holiday Schedule

Below is the 2008 holiday schedule for non-agreement employees.

Holiday	Date
New Year's Day	Thursday, Jan. 1, 2009
Martin L. King Jr. Day	Monday, Jan. 19, 2009
President's Day	Monday, Feb. 16, 2009
Memorial Day	Monday, May 25, 2009
Independence Day	Saturday, July 4, 2009
Labor Day	Monday, Sept. 7, 2009
Veterans' Day	Wednesday, Nov. 11, 2009
Thanksgiving Day	Thursday, Nov. 26, 2009
Christmas Day	Friday, Dec. 25, 2009

Because July 4 falls on a Saturday, non-agreement employees hired prior to 2009 are granted an additional personal day and are, therefore, entitled to three personal days in 2009. Employees must obtain approval prior to using personal days.

Non-agreement employees hired in 2009 will receive personal days based on their date of hire.

Date of Hire	Number of Personal Days
Jan. 1 to May 31	2
June 1 to Aug. 31	1
Sept. 1 to Dec. 31	0

Holidays for agreement-covered employees are subject to each labor agreement.

December 29, 2008

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under How We Work ⇒ Management Employee Business Travel.

In a separate travel update, the Internal Revenue Service has announced the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for mileage expenses incurred on or after Jan. 1, 2009.

Below is the 2008 holiday schedule for non-agreement employees.

Holiday	Date
New Year's Day	Thursday, Jan. 1, 2009
Martin L. King Jr. Day	Monday, Jan. 19, 2009
President's Day	Monday, Feb. 16, 2009
Memorial Day	Monday, May 25, 2009
Independence Day	Saturday, July 4, 2009
Labor Day	Monday, Sept. 7, 2009
Veterans' Day	Wednesday, Nov. 11, 2009
Thanksgiving Day	Thursday, Nov. 26, 2009
Christmas Day	Friday, Dec. 25, 2009

Because July 4 falls on a Saturday, non-agreement employees hired prior to 2009 are granted an additional personal day and are, therefore, entitled to three personal days in 2009. Employees must obtain approval prior to using personal days.

Non-agreement employees hired in 2009 will receive personal days based on their date of hire.

Date of Hire	Number of Personal Days
Jan. 1 to May 31	2
June 1 to Aug. 31	1
Sept. 1 to Dec. 31	0

Holidays for agreement-covered employees are subject to each labor agreement.

Benefits: The Amtrak Benefits Web site will not be available from Wednesday, Dec. 17 through Jan. 2 in order to process benefit elections. Employees can still call the Benefits Service Center at 800-481-4887 to make benefit changes.

Amtrak This Week Top Story for Aug. 11
DRAFT – Aug. 6, 2008

Approved by Paul Vilter, Jason Maga, Christine Lanzon

***California Zephyr* Schedule Reduced Via UP Partnership**

Effective today, *California Zephyr* schedules will be shortened by as much as 45 minutes. The reduction is one of the steps agreed to between Amtrak and Union Pacific Railroad as part of a multi-year program to return the Overland Route between Salt Lake City and San Francisco to a state-of-good-repair, allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add over three hours to the *Zephyr*'s schedule while UP performed track work and provided Amtrak with a commitment to improved on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule as planned. This is the third schedule reduction since the program began in June of last year.

“This is another milestone in our effort to improve service and OTP on the *Zephyr*,” said Paul Vilter, assistant vice president, Strategic Partnerships. “UP is making great progress toward fulfilling its commitment to reduce slow orders on the *Zephyr* route, which allows us to gradually restore the original schedule.”

Eastbound Train 6 will now depart Emeryville, Calif., 45 minutes later and operate 45 minutes faster to Salt Lake City. The remaining schedule to Chicago will not change. Train 5, originating in Chicago, will operate according to the existing schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and ten minutes of the time added to Train 5 has been removed, while two hours and 20 minutes have been removed from the schedule of Train 6.

“We appreciate UP's efforts related to the *Zephyr*, and we look forward to UP removing slow orders to other Amtrak routes,” added Vilter.

Amtrak This Week Top Story for Aug. 11
DRAFT – Aug. 6, 2008

Approved by Paul Vilter, Jason Maga, Christine Lanzon

***California Zephyr* Schedule Reduced Via UP Partnership**

Effective today, *California Zephyr* schedules will be shortened by as much as 45 minutes, one of the targets established in an agreement between Amtrak and Union Pacific Railroad. The trip-time reduction is part of a multiyear program to return the Overland Route between Salt Lake City and San Francisco to a state-of-good-repair, ultimately allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add over three hours to the *Zephyr's* schedule while UP performed track work as part of a commitment to improve on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule, as planned. This is the third schedule reduction since the program began in June of last year.

“This is another milestone in our effort to improve service and OTP on the *Zephyr*,” said Paul Vilter, assistant vice president, Strategic Partnerships. “UP is making great progress toward fulfilling its commitment to reduce slow orders on the route, which allows us to gradually restore the original schedule and deliver on-time arrivals.”

Eastbound Train 6 will now depart Emeryville, Calif., 45 minutes later and operate 45 minutes faster to Salt Lake City. The remaining schedule to Chicago will not change. Train 5, originating in Chicago, will operate according to the current schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and 10 minutes of the time added to Train 5 has been removed, while two hours and 20 minutes have been removed from the schedule of Train 6.

“We appreciate UP’s efforts related to the *Zephyr*, and we look forward to UP removing slow orders to other Amtrak routes,” added Vilter.

***California Zephyr* Schedule Reduced Via UP Partnership**

Effective Monday, August 11, *California Zephyr* schedules will be shortened by as much as 45 minutes, one of the targets established in an agreement between Amtrak and Union Pacific Railroad. The trip-time reduction is part of a multiyear program to return the Overland Route between Salt Lake City and San Francisco to a state of good repair, ultimately allowing the *California Zephyr* to operate on a more reliable schedule.

Amtrak and UP agreed in 2006 to temporarily add more than three hours to the *Zephyr's* schedule while UP performed track work as part of a commitment to improve on-time performance. Many track delays have been eliminated and the added time has been removed incrementally from the schedule as planned. Train 5, originating in Chicago, will operate according to the current schedule to Winnemucca, Nev., then operate 30 minutes faster to Emeryville.

Since the program began last June, two hours and 10 minutes of the time added to Train 5 has been removed, while two hours and 20 minutes have been removed from the schedule of Train 6.

“We appreciate UP’s efforts related to the *Zephyr*, and we look forward to UP removing slow orders to other Amtrak routes,” added Vilter.

Operational Update: On Tuesday, Aug. 12 only, all *Wolverine*, *Pere Marquette* and *Blue Water Service* trains will be cancelled due to multiple track work projects performed by Norfolk Southern, Conrail and Amtrak. Motorcoach service will be provided.

Engineering: The 10-megavolt ampere transformer at Jericho Park in Bowie, Md., will be placed back into service this week, bringing service back to its full 20 MVA capacity.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new U.S. Department of Transportation drug testing guidelines mandate direct observation during specimen collection for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. More information can be found online at www.dot.gov/ost/dapc/news.html.

Performance Management Update: The first issue of *Focus* newsletter, along with accompanying FAQs, is now available on the performance management Web site to

provide the latest information on the company's performance management and pay-for-performance initiative. Log on to Intranet: "Employees" → "Performance Management" → "Tools and Resources."

Record-Breaking Numbers Posted in July Offset by Energy Costs

Ridership and ticket revenue hit all-time highs during the month of July, with systemwide trips totaling 2.75 million for the month, generating \$168 million in ticket revenue, which mark increases of 14 and 19 percent over last July, respectively.

These single-month records can be attributed in part to high gas prices, highway congestion, airline issues and environmental awareness among consumers. Other contributors include heavy July 4 travel, along with successful advertising campaigns and National Train Day tie-ins.

However, according to Chief Financial Officer Bill Campbell, operating costs have jumped significantly as well, offsetting the gains in revenue. “These gains in ridership and ticket revenue enable us to absorb rising expenses, especially skyrocketing energy costs. Unfortunately, we’re not making any gains — it’s a wash.”

Currently, the company uses roughly 67 million gallons of diesel fuel each year, in addition to electricity used to operate trains on the Northeast Corridor. Approximately 21 percent of total operating dollars are budgeted for energy.

From May 2007 to May 2008, the price of diesel fuel ballooned by 102 percent. As a result, energy costs for FY '08 are projected to increase by \$100,000 more than the increase in ticket revenue.

“We couldn’t predict the remarkable growth in fuel costs,” said Campbell. “But because we’ve done such a great job in boosting ridership and improving revenue management, we aren’t drowning like other companies and we can still provide the high level of service our passengers are used to.”

Operational Update: From Thursday, Aug. 21 through Monday, Sept. 1, the *Empire Service* and *Maple Leaf* trains will make a special stop at the New York State Fairgrounds in Syracuse, N.Y. During this period, the trains will continue to make their regular stops at the Syracuse station.

Engineering: The Floor Slab Stabilization Project in the Baltimore and Potomac tunnels has recently been completed. Contractor and Engineering forces stabilized more than 1,000 linear feet of tunnel floor by grout injection.

Message From President Kummant

Dear Co-workers,

While ridership is at an all-time high, we face a number of hurdles that temper that success. Rising expenses (particularly the cost of fuel), on-time performance off the Northeast Corridor and the condition and size of our fleet are among them.

Last week, I was in Chicago with one of our stalwart supporters in Congress, Sen. Dick Durbin of Illinois, Amtrak board member Tom Carper and Illinois Department of Transportation Secretary Milt Sees to discuss equipment issues and on-time performance in the region. At the 14th St. Yards, Sen. Durbin held a press conference to announce legislation he introduced that would support financing options for the replacement and rehabilitation of our equipment. The Train CARS Act also aims to encourage the revival of the passenger car manufacturing industry in this country.

As you well know, our fleet is aging and, in some cases, there's only so much repairing our Mechanical crews can do. We also need to increase capacity to meet the growing demand for passenger rail.

That demand is leading to tremendous support from members of Congress, state legislators and mayors. In fact, later that day Sen. Durbin and I were in Bloomington-Normal to meet with several mayors from across the state in to discuss on-time performance, especially along the Chicago-St. Louis corridor.

I was talking to some of the employees at the yard about the difficult winter conditions they face there, and I wish I'd had more time there before we had to leave with Sen. Durbin for the meeting with mayors in Bloomington. I will be on the road again this fall, including PSSA ceremonies at nine locations across the system, and look forward to talking to more of you then.

Sincerely,

Alex Kummant
President and CEO

CENTENNIAL CELEBRATION SET FOR OCTOBER 4-5 IN WASHINGTON

Employees invited to attend, volunteers needed

The Washington Union Station Centennial Celebration will take place on Oct. 4-5, and includes entertainment, railroad memorabilia exhibits and an expansive train display featuring current Amtrak equipment as well as historic locomotives and private cars representing the railroads that have served the station during its 100-year history. The celebration also marks the 20-year anniversary of the station's redevelopment and employees are invited to bring their families. Admission is free.

"This is a celebration of one of our industry's most important buildings and the impact it's had on our nation's capital," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "The station has reached an incredible milestone at a time when passenger rail travel is making a big comeback, and we want to raise awareness of its importance on many different fronts."

Amtrak is hosting the open house event in partnership with Union Station Redevelopment Corporation, Jones Lang LaSalle, District of Columbia DOT and Ashkenazy Acquisitions.

In addition to housing the company's corporate headquarters, Washington Union Station is home to over 100 shops, restaurants and vendors, as well as a movie theater. A true transportation hub, the station is served by Amtrak, DC's Metro subway and buses, and MARC and VRE commuter trains. Approximately 32 million people pass through each year, making it the most visited site in a city filled with national monuments and museums.

Stay tuned for upcoming information on perks for Amtrak employees, including a private viewing of the train display and special offers on souvenir items.

Employee Volunteers Needed

Any Amtrak employee who would like to volunteer during the event should contact Saunya Connelly at ATS 777-4164 or ConnellS@amtrak.com. Volunteers will be provided meals and a free t-shirt.

“Picture Our Train” Photo Contest Winners Selected

A San Diego-based attorney is the grand-prize winner of the 2009 “Picture Our Train” Wall Calendar Photo Contest. Marcee Chipman, 61, submitted a visually stunning shot of a *Pacific Surfliner* on June 27 as it departed the Santa Fe Depot in San Diego.

“My passion for photography has developed to counterbalance my work as a criminal defense attorney,” said Chipman. “It is truly an artistic expression but, more importantly, I like to share the beauty and awesomeness of life in general.”

Chipman added that her submission was an “oh wow” moment for her. “I was walking across the station and saw the palm trees in the afternoon sun, and I wondered how many people in Minnesota would know that palm trees really do grow at a train station.”

This year’s contest launched on May 12 and concluded of July 11, after receiving 283 submissions from 183 entrants. Congratulations to the second- through fifth-place prize winners:

Second Place: Richard R. Hansen, Morro Bay, Calif.

Third Place: Brian Nicodemus, Akron, Ohio

Fourth Place: Alex Mayes, Fairfax, Va.

Fifth Place: Scott Lothes, Corvallis, Ore.

As the grand-prize winner, Chipman receives a photo credit on the calendar and a \$1,000 travel voucher. Hansen, Nicodemus, Mayes and Lothes will also receive travel vouchers of \$500, \$250, \$150 and \$100 respectively.

Operational Update: Beginning Aug. 4, minor changes will be made to many Northeast Corridor train schedules due to Amtrak track work.

Engineering: The Track Laying Machine will be preparing Track 1 at Princeton Junction, N.J., for a cut-in during the early morning hours on Aug. 5 and then installing 37,000 concrete ties from the Ham to Midway Interlocking between Trenton and New Brunswick. This work will continue through the second week of October.

Human Resources (Health Services Drug and Alcohol Programs): Effective Aug. 25, new Department of Transportation urine collection guidelines mandate direct observation for all employees under an Alcohol and Drug Waiver Agreement or Letter of Determination for a federal violation. This requirement also applies to other situations as determined by DOT or Amtrak.

Frequently asked questions regarding the retroactive payments

- **How was the back pay calculated?**

The retroactive pay covers the period from July 1, 2002 through March 31, 2008. In accordance with the terms of the agreements, the wage adjustments were calculated based on the January 1, 2001 rates of pay, which included the 27¢ Cost Of Living Adjustment (COLA) that the agreements rolled into the basic rates. Thereafter, the following percentage increases were applied:

- July 1, 2002 – 6.087%
- July 1, 2003 – 3.000%
- July 1, 2004 – 3.250%
- July 1, 2005 – 2.500%
- July 1, 2006 – 3.000%
- July 1, 2007 – 3.000%

The resulting hourly rates applied to all hours paid during each period reflect the total compensation resulting from the new contracts. The compensation already received for those hours was subtracted from that amount to identify the total retroactive wage adjustment for the period. Finally, from the total retroactive wage adjustment, the following health care contributions were deducted for each month of active service:

- July 1, 2001 through June 30, 2002 - \$ 33.39 per month
- July 1, 2002 through June 30, 2003 - \$ 81.18 per month
- July 1, 2003 through June 30, 2004 - \$ 79.74 per month
- July 1, 2004 through June 30, 2005 - \$ 91.32 per month
- July 1, 2005 through December 31, 2005 - \$ 97.43 per month
- January 1, 2006 through December 31, 2006 - \$123.28 per month
- January 1, 2007 through March 31, 2008 - \$166.25 per month

The result is the gross retroactive adjustment. The check you received (or that is deposited in your account) is 40% of the total amount, less required deductions, in accordance with the terms of the agreement.

- **When will the balance be paid?**

In accordance with the terms of the agreement, the balance of the retroactive adjustment (60%) will be paid within one (1) year of the date the initial 40% is paid, subject to the contingency provisions of the agreement. In general, this means payment of the balance depends upon sufficient funding being appropriated by Congress to pay the second installment in Fiscal Year 2009.

- **How do I know the new rates of pay are correct?**

The rates of pay for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBB, IBEW, JCC, NCFO, and UTU Train Service were placed in effect on or about April 1, 2008. The new rates of pay for BLET and SMWIA were placed in effect on May 1, 2008. Since that time, questions have been raised about certain rates where union officers, employees and managers had questions and the rates were adjusted where necessary. The corrected rates are what were applied to the back pay calculations. If you believe your rate of pay is wrong, you should contact your local manager or union representative for verification.

- **What is the health care deduction?**

In the contract settlements, it was agreed that employees would contribute toward the cost of health care coverage at the same level as freight railroad employees. The amounts of the deductions, outlined above, are in line with the payments agreed to as contributed by railroad employees on the freight railroads.

- **What if I am covered by other health insurance?**

Prior to the current contract settlement, Amtrak provided health care coverage for all employees, regardless of whether that coverage was utilized. Accordingly, the settlement provides for employee contributions for each month of active service. However, under the terms of the agreements, employees may elect to “opt-out” of future medical plan coverage, including medical, prescription drug and mental health/substance abuse benefits. A letter was sent to each employee outlining the benefit changes and the opportunity to opt out of the Amtrak medical plan. While the initial opt out period ended April 30, 2008, for ARASA (Maintenance of Equipment), ARASA (Maintenance of Way), ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO and UTU Train Service, and will end on May 16, 2008, for BLET, IBB and SMWIA, employees will have the opportunity to opt out in the future during the open enrollment periods. You may obtain additional information by contacting the Amtrak Benefits Service Center at 800-481-4887.

- **Will 401(k) deductions be taken out of my back pay?**

In accordance with the terms of the agreement, Amtrak did not deduct contributions toward your 401(k) plan from the retroactive wage adjustment.

- **What deductions will be taken out of my back pay?**

Back payments are subject to the Federal 25% supplemental payment tax withholding rate as well as any percentage based creditor or tax levy deductions, such as state and local taxes. Depending on the state that you reside in, a mandatory supplemental state tax rate may apply as well. Railroad Retirement taxes are deducted at the same percentage rate as normal, up to the annual maximum. Garnishments related to child support are excluded unless the employee is behind on or in arrears on required payments. If this is the case, a deduction will be made for child support. It is highly recommended that you consult with a tax advisor on the proper treatment of this payment in regards to your tax filing status.

- **Why didn't I get a retroactive payment check?**

The retroactive payments are based on the contract settlements reached with ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO, IBB, ARASA (Maintenance of Equipment), ARASA (Maintenance of Way) and UTU Train Service. Adjustments for BLET and SMWIA are scheduled to be paid at the end of May 2008. Employees in other crafts, such as TCU, ASWC, ARASA (OBS), UTU Stewards and UTU Yardmasters, are not covered by these agreements. Additionally, only employees active in a union covered position on December 1, 2007, or on certain leaves of absence, are entitled to retroactive pay under these contract settlements. If you were previously employed by Amtrak, left the company and subsequently returned to Amtrak service, only the service following your return is subject to the retroactive adjustment.

- **Are all labor payments included in my back pay calculations?**

No, payments for other than hours worked, such as differentials, meal allowances, travel reimbursements, etc., were not included in the wage adjustment; only hours paid for or worked are included. Also, time worked in management, including special duty under XX job codes, is not subject to adjustment.

- **What if I have labor hours submitted after the April 25, 2008 cut off?**

Work performed on or before March 31, 2008, which was not submitted by April 25, 2008, will need to be submitted through the normal process for submitting late labor. Time submitted after the April 25, 2008, cut off will be paid at the old rates and the adjustment will have to be made manually. Those adjustments will be added to the remaining 60% portion of the wage adjustment.

- **Who should I contact if I think the amount of my back pay isn't correct?**

Please refer to the enclosed payroll information summary to assist you in understanding the calculations. Remember, under the contract settlements, only the rates of pay were adjusted. Except for the Reduced Crew Allowance under the UTU Agreement, there were no retroactive adjustments to allowances, differentials or other payments, including payments you may have received for temporary upgrades to management or time in "XX" job codes, or for time worked on positions in those unions that have not yet reached agreements. Questions regarding the payment can be referred to the following toll free number.

1-888-514-0983

Starting Thursday, May 8, 2008, the Call Center will be staffed Monday through Friday from 8:00 a.m. to 8:00 p.m. EDT. The first weekend after the wage adjustments are released (Saturday May 10 and Sunday May 11), call center representatives will be available from 8:00 a.m. to 5:00 p.m. EDT. If your question cannot immediately be answered by the call center representative, a case number will be assigned to you and your name, employee number, union and craft, telephone number and the nature of your question will be logged and referred to an appropriate officer for investigation and review.

Please use the attached Retroactive Wage Payment Inquiry Form to document your assertion of a discrepancy. The form is also available on the Internet at www.amtrakbenefits.com and on the Amtrak Intranet site home page under Employee Information – choose the Union tab.

You should be prepared to provide details regarding any discrepancy; if it involves health care contributions, information about the particular month(s) in question and why you believe the deduction was incorrect; if it involves the wage adjustment, information as to the specific period in dispute and whether it involves straight time, overtime or other hours paid in order to facilitate a prompt investigation of your issue. With the Form, you must send supporting documentation, such as copies of pay stubs, your work log or time book, showing the hours worked during the period in dispute.

- **Can the field payroll office handle my question?**

Field Payroll, Human Resources and Labor Relations offices **cannot** help with back pay questions, inquiries or disputes. Questions and disputes must be referred to the toll free number listed above. Your issue will be assigned a case number at the time of your call which will be used for the investigation process.

- **How long could I expect resolution on my case to take?**

Only assigned case numbers will be investigated. Once a case number is assigned and your documentation received, you will be contacted within seven to 14 business days to discuss your specific question and determine the necessary course of action. Depending on call volume, it could take longer. Each case will be reviewed and you will be contacted and advised of the findings. Considering the significant number of employees affected by the back pay process, it may take several weeks to thoroughly investigate and respond to your particular issue.

- **How long do I have to dispute my wage adjustment?**

We encourage you to call as soon as possible so that your issue is logged and assigned a case number by the Call Center to initiate the review process. The sooner your call is received, the quicker your issue can be investigated and resolved. The call center is only a temporary resource for handling inquiries about the back pay process, so we urge you to call promptly.

May 2, 2008

Employee Retroactive Wage Payment Dispute Instructions

Employees who feel that their retroactive pay adjustment was calculated inaccurately must complete and submit the following form along with appropriate justification and documentation to substantiate their claim.

An ADP Payroll Call Center has been established specifically to receive calls related to retroactive payments. In order to have a dispute researched you must have an ADP Call Center case number assigned and included on the form. Case numbers are only provided by the ADP Amtrak Payroll Call Center. Forms that do not contain a case number will not be processed. Due to the large numbers of employees receiving retroactive payments, the investigation and review process may take several weeks to complete. Forms that are not complete will further delay the handling of your particular issue.

The call center is staffed Monday to Friday, 8am to 8pm EDT. Note that the Payroll and Human Resources Field offices do not have access to Retroactive Pay information and will not be able to assist in answering questions or inquiries from employees related to this matter.,

Please direct all inquiries to the ADP Payroll Call Center toll free at 1-888-514-0983.

Your Inquiry Form and all supporting information should be mailed to:

- **Benefit Deduction Errors**

Is the claim related to a benefit deduction? – Yes/No

If yes, complete the following, if no, skip this section

Were there gaps in your service months (where you performed no service) which resulted in an inaccurate benefit deduction claim? – Yes/No

If yes, please define the gap in service (months involved)?

At any time were you suspended from Amtrak-provided benefit coverage?

If yes, please define the period of benefit suspension (month involved)?

- **Retroactive Wage Errors**

Is the claim related to a retroactive wage adjustment? – Yes/No

- Is the claim related to an omission of labor data (hours worked/paid not included – Yes/No

What period(s) of time does the claim relate to?

Please provide details as to the hours worked/paid that you believe were not adjusted, including job code, by date

(Use additional sheets if necessary)

Please provide substantiated proof in the form of pay stubs, earnings and denial statements and/or time books for the period in question.

- Is the claim related to an inaccurate calculation of existing hours paid/worked? – Yes/No

What period(s) of time does the claim relate to?

Please provide details as to the hours worked/paid that you believe were not properly adjusted, including job code, by date.

(Use additional sheets if necessary)

Please provide substantiated proof in the form of pay stubs, earnings and denial statements and/or time books for the period in question.

Other inquiries

Is the claim related to another matter?

Please describe in detail the issue and provide sufficient information to support your claim.

Frequently Asked Questions Regarding ~~the contract settlement~~ Retroactive Payments ~~wage adjustments~~.

- **How was the back pay calculated?**

The retroactive payment, or back pay, covers the period from July 1, 2002, through March 31, 2008. The first check represents 40% of that amount in accordance with the terms of the agreement. -In accordance with the terms of the agreements, the ~~wage adjustments payments~~ were calculated based on the January 1, 2001 rates of pay, which included the 27¢ Cost Of Living Adjustment (COLA) that was rolled into the basic rates. - Thereafter, the following percentage increases were applied:

- July 1, 2002 – 6.087%
- July 1, 2003 – 3.000%
- July 1, 2004 – 3.250%
- July 1, 2005 – 2.500%
- July 1, 2006 – 3.000%
- July 1, 2007 – 3.000%

The resulting hourly rates applied to all hours paid during each period reflect the total compensation resulting from the new contracts. Subtract the compensation already received for those hours to identify the total retroactive wage adjustment for the period. - ~~Then~~ Finally, from the total retroactive wage adjustment, deduct the following health ~~and~~ welfare contributions for each month of active service:

- July 1, 2001 through June 30, 2002 - \$ 33.39 per month
- July 1, 2002 through June 30, 2003 - \$ 81.18 per month
- July 1, 2003 through June 30, 2004 - \$ 79.74 per month
- July 1, 2004 through June 30, 2005 - \$ 91.32 per month
- July 1, 2005 through December 31, 2005 - \$ 97.43 per month
- January 1, 2006 through December 31, 2006 - \$123.28 per month
- January 1, 2007 through March 31, 2008 - \$166.25 per month

The result is the ~~retroactive retroactive-payment~~ adjustment. -The ~~first~~ check you receive (or that is deposited) in your account) on May 9 represents 40% of that amount in accordance with the terms of the agreement.

- **When will the balance be paid?**

In accordance with the terms of the agreement, the balance of the retroactive ~~wage adjustment payment~~ will be paid within one (1) year of the date the initial 40% is paid, subject to the contingency provisions of the agreements. -Contact your union representative for an explanation of the contingency provisions.

- **What is the ~~Health & Welfare~~ health care deduction?**

Formatted: Font: Bold

In the contract settlements, it was agreed that employees would contribute toward the cost of health care coverage at the same level as freight railroad employees ~~on the freight railroads~~. -The amount of these deductions, outlined above, are in line with represents the payments agreed to and contributed by railroad employees on the freight railroads.

- **What if I am covered by other Hhealth Insurance?**

Prior to the current contract settlement, Amtrak provided health care coverage for all employees, regardless of whether that coverage was utilized. -Accordingly, the settlement provides for employee contributions for each month of active service. However, under the terms of the agreement, the contract settlements provide that employees may elect to “opt-out” of future medical plan coverage, including medical, prescription drug and mental health/substance abuse benefits, starting May 1, 2008. - A ~~separate letter mailing~~ was sent to each employee’s home outlining the benefit changes and the opportunity ability to opt out of the Amtrak medical plan. -While the initial opt out period ~~ended~~ will end on April 30, 2008, employees will have the opportunity to opt out in the future during the open enrollment periods. -You may obtain additional information by contacting the Amtrak Benefits Service Center at 800-481-4887.

- **Will 401(k) deductions be taken out of my back pay?**

In accordance with the terms of the agreements, Amtrak will not deduct contributions toward your 401(k) plan from the retroactive payment wage adjustment checks. - It is important to note that back pay payments are subject to the appropriate withholding taxes as well as any percentage-based creditor or tax levy deductions. Garnishments related to child support are exempt unless the active employee is behind on or in arrears on required payments. - If this is the case, then a deduction for child support will be taken ~~out~~.

Formatted: Indent: Left: 0.5"

- **Why didn’t I get a retroactive payment check?**

The retroactive payments wage adjustments are based on the contract settlements reached with ATDA, BMW, BRS, IAM, IBEW, JCC, NCFO, ARASA (Maintenance of Equipment), ARASA (Maintenance of Way) and UTU. **Employees in other crafts are not covered by these agreements at this time (?) settlements.** -Additionally, only employees active in a union-covered position on December 1, 2007, or on certain leaves of absence, are entitled to retroactive pay wage adjustments under these contract settlements. -Questions regarding specific terms of the agreements should be referred to your union representative.

Formatted: Font: Bold

- **Who should I contact if I think the amount of my back pay isn’t correct?**

Please refer to the enclosed payroll information Amtrak has will provided a summary of the payroll information to assist you in understanding the calculations. - Remember, under the contract settlements, the retroactive payment is based on only the rates of pay only were adjusted. -There were no retroactive adjustments to allowances, differentials or other payments, including payments

you may have received for temporary upgrades to management or time in “XX” job codes.

~~Questions regarding specific periods should be referred to your local payroll office, as identified below. It is your the employees responsibility to You should be prepared to~~ provide details regarding any ~~and all discrepanediscrepancies~~, including the specific period in dispute and whether it involves straight time, overtime or other hours paid in order to facilitate a prompt investigation of your issue. **Procedures will be distributed informing employees how to address questions related to payments.**

Centennial Celebration Set for October 4-5 in Washington, D.C.
Employees invited to attend, volunteers needed

The Washington Union Station Centennial Celebration will take place on Oct. 4, from 10 a.m. to 4 p.m., and Oct. 5, from noon to 4 p.m. The event includes entertainment, railroad memorabilia exhibits and an expansive train display featuring current Amtrak equipment as well as historic locomotives and private cars representing the railroads that have served the station during its 100-year history. The celebration also marks the 20-year anniversary of the station's redevelopment. Employees are invited to bring their families and admission is free.

Any Amtrak employee who would like to volunteer during the event should contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com. Volunteers will be provided meals and a free t-shirt.

Stay tuned for upcoming information on perks for Amtrak employees, including a private viewing of the train display and special offers on souvenir items.

Company Solicits Bids for Food and Beverage Operations

In an ongoing effort to improve efficiencies, operating performance and costs controls, Amtrak is issuing a Request for Proposals (RFP) this week to explore ways to strengthen commissary operations and leverage new technologies to enhance Food and Beverage activities, according to company officials.

The contract with the current vendor, Gate Gourmet International, which has been responsible for the company's warehouse management functions for the past eight years, is set to expire at the end of the year.

"This move reflects Amtrak's need to put into practice state-of-the-art warehouse systems that are efficient, yield excellent customer service and help reduce food and beverage losses," said Tom Hall, senior director, Food and Beverage. Company initiatives have reduced the Food and Beverage loss by 25 percent — more than \$20 million — over the last three years.

The competitive bid process, which begins with the release of the RFP, is closely integrated with the Food and Beverage Point-of-Sale (POS) project to develop a new on-board POS system, replace the existing food and beverage management system, and update commissary warehouse operations with a new automated system.

"Through this competitive process, we will select the vendor that provides the best capabilities and value," said Hall. "This move reflects no dissatisfaction with Gate Gourmet, which has been effective in working with the company to reduce commissary costs. Gate Gourmet is invited to participate in the procurement process."

The procurement process is expected to have little or no impact on passengers or routine warehouse activities.

Company Solicits Bids for Food and Beverage Operations

In an ongoing effort to improve efficiencies, operating performance and costs controls, Amtrak is issuing a Request for Proposals (RFP) on April 15 to explore ways to strengthen commissary operations and leverage new technologies to enhance Food and Beverage activities, according to company officials.

The contract with the current vendor, Gate Gourmet International, which has been responsible for the company's warehouse management functions for the past eight years, is set to expire at the end of the year.

"This move reflects Amtrak's need to put into practice state-of-the-art warehouse systems that are efficient, yield excellent customer service and help reduce food and beverage losses," said Tom Hall, senior director, Food and Beverage. Company initiatives have reduced the Food and Beverage loss by 25 percent — more than \$20 million — over the last three years.

The competitive bid process, which begins with the release of the RFP, is closely integrated with the Food and Beverage Point-of-Sale (POS) project to develop a new on-board POS system, replace the existing food and beverage management system, and update commissary warehouse operations with a new automated system.

"Through this competitive process, we will select the vendor that provides the best capabilities and value," said Hall. "This move reflects no dissatisfaction with Gate Gourmet, which has been effective in working with the company to reduce commissary costs. Gate Gourmet is invited to participate in the procurement process."

The procurement process is expected to have little or no impact on passengers or routine warehouse activities.

Contract Settlement Update

As a result of the recently ratified contract settlements with ATDA, IAM, IBEW, JCC, NCFO, BMWE, BRS, ARASA(Maintenance of Way), ARASA(Maintenance of Equipment) and UTU, Amtrak's Payroll and Information Technology Departments ~~have been working on establishing the new rates of pay and~~ calculating the retroactive wage ~~payment~~ adjustments.

The new rates of pay for ~~eligible employees positions~~ in the above crafts will be placed into effect on April 1, 2008. -The first employee health and welfare contribution will be deducted from the paycheck to be issued for April 25, 2008. After that initial deduction in April, contributions in future months will be divided between the first and second checks of each month.

Additionally, the contract settlements provide employees with the ability to "opt out" of health care coverage and avoid the monthly health and welfare contributions. A separate mailing has been sent to employees on the Health Care coverage issue with the required form that must be submitted if employees wish to opt out of Health Care coverage. The opt out form must be returned as soon as possible. Forms will not be accepted after April 30, 2008.

Finally, we anticipate the first installment of the retroactive wage adjustment will be available on May 9, 2008. -A summary report of the full retroactive adjustment along with a list of questions and answers will be furnished with the check in order to provide employees with information about the calculations and contract information for employees with specific disputes regarding the payment.

Contract Settlement Update

Wage Increases Take Effect in April, Retroactive Payments in May

The new rates of pay and retroactive wage payments for the ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA(Maintenance of Way), ARASA(Maintenance of Equipment) and UTU will be paid as follows:

- The new rates of pay for eligible employees in positions in the above crafts will take be placed into effect on April 1, 2008 and begin appearing in the April 25 paycheck. In addition, the first employee health and welfare contribution will be deducted from the April 25 paycheck to be issued for April 25, 2008. After that initial deduction in April, future contributions in future months will be divided between the first and second checks of each month.
- The first installment of the retroactive wage adjustment payment (40% of retroactive pay) will be reflected in the available on May 9 paycheck for work through March 31, 2008. A summary report of the full retroactive adjustment payment (100%), along with a list of frequently asked questions and answers, will be furnished with the paycheck in order to provide employees with information about the calculations and contract information for employees with specific disputes regarding the payment. (what's this? Do we mean "contact information for employees who may dispute the calculations?")

Formatted: Font: Bold

Formatted: Font: Bold

In addition, Additionally, the contract settlements provide employees with the ability to "opt out" of health care coverage, thereby and avoid not make the monthly health and welfare contributions. A separate mailing has been sent to employees about on the the Hhealth CCare coverage issue with the required form that must be submitted if employees wish to opt out of hHealth CCare coverage. The required "opt out" form must be returned as soon as possible. Forms will not be accepted after before April 30, 2008. (Are we posting this letter and the required form on the Intranet in case people don't get it in the mail?)

What about blet, sheetmetal workers, boilermakers 60 days after ratification

Wage Increases Take Effect in April, Retroactive Payments in May

The new rates of pay and retroactive wage payments for the ATDA, IAM, IBEW, JCC, NCFO, BMW, BRS, ARASA (Maintenance of Way), ARASA (Maintenance of Equipment) and UTU will be paid as follows:

- The new rates of pay for positions in the above crafts will take effect on April 1, 2008 **and will begin to appear — depending on the union and pay period schedule — as early as April xx and in full the April 25 paycheck.** The first employee medical plan contribution for the above groups will be deducted from the April 25, 2008 paycheck. After that initial deduction in April, contributions in future months will be divided between the first and second checks of each month.
- The first installment of the retroactive wage payment (40% of the total adjustment) will be paid in a separate check (or through direct deposit) on May 9, 2008. A summary report of the full retroactive adjustment along with a list of frequently asked questions and answers will be furnished with the payment to provide employees with information about the calculation and who to contact about specific disputes regarding the payment.

In addition, the contract settlements provide employees with the ability to “opt out” of medical plan coverage, thereby not having to make the monthly contributions as of May 1, 2008. A separate mailing has been sent to employees about the Health Care coverage changes, including the form that must be submitted if employees wish to opt out of Health Care coverage. The required “opt out” form must be returned before April 30, 2008.

***Coast Starlight* Re-launches with Fanfare along the Route**

In Los Angeles and Santa Barbara, Calif., and Portland, Wash., and Seattle, Amtrak officials and their travel industry partners were joined by local politicians and passengers on June 10 to commemorate the re-launch of the *Coast Starlight* service linking Los Angeles and Seattle.

In Los Angeles Union Station, northbound First Class Sleeping passengers enjoyed a pre-boarding reception in Tracks restaurant, a pilot location inside the station designed to project a Metropolitan Club-like experience, which included complimentary refreshments, on-site ticket collection and immediate baggage handling.

Later, a ribbon-cutting ceremony took place alongside the train and included Southwest Division General Superintendent Joe Yannuzzi; Product Management Chief Brian Rosenwald; Los Angeles City Council member Tom LeBonge, and a number of other rail fans eagerly awaiting a ride on the new and improved *Coast Starlight*.

On the other end of the route, southbound *Coast Starlight* passengers were greeted at the station by a morning reception complete with a balloon archway, muffins and coffee and a ribbon-cutting ceremony.

For a fee, Sleeping car passengers are now able to enjoy an exclusive wine and cheese event on board featuring four regional wines and four artisan cheeses, specialty coffees and appetizers, along with complimentary library and board games and a Parlour car theatre. Coach passengers can take advantage of new and larger complimentary pillows, new blankets for purchase, at-seat meal and beverage options and an Arcade car.

Thanksgiving 2008 Marks Second Highest Holiday Travel Period on Record

Amtrak's busiest week of the year wraps up today, and while official ridership and revenue numbers are not yet available, preliminary results indicate another strong Thanksgiving travel season, especially considering current economic conditions and low gas prices.

Overall system ridership dipped 2 percent compared to last year with an estimated 655,000 trips, yet ticket revenue rose by 2 percent to approximately \$43.9 million, due to higher fares and revenue management tactics. The period from Nov. 25 to Dec. 1 ranks as the company's second highest holiday ridership on record, just behind last year's Thanksgiving week.

"Considering that overall holiday travel was down appreciably this year, our numbers reflect the growing appeal of passenger rail," said Emmett Fremaux, vice president of marketing and product management.

Once again, Transportation, Engineering and Mechanical departments collaborated to meet demand across the system by expanding service. Dozens of additional departures and schedule changes took place, while multiple consists included extra cars to maximize availability at peak travel times.

"Our normal operations are incredibly complex, but to ramp up service the way we do at Thanksgiving is truly impressive," said Bill Crosbie, chief operating officer. "I'd like to thank every employee — and those who volunteered extra time — for working so hard to keep our passengers safe and pleased with their Amtrak experience during the holiday week."

Thanksgiving 2008 Marks Second Highest Holiday Travel Period on Record

Amtrak's busiest week of the year wraps up today, and while official ridership and revenue numbers are not yet available, preliminary results indicate another strong Thanksgiving travel season, especially considering current economic conditions and low gas prices.

Overall system ridership dipped 2 percent compared to last year with an estimated 655,000 trips, yet ticket revenue rose by 2 percent to approximately \$43.9 million, due to higher fares and revenue management tactics. The period from Nov. 25 to Dec. 1 ranks as the company's second highest holiday ridership on record, just behind last year's Thanksgiving week.

"Considering that overall holiday travel was down appreciably this year, our numbers reflect the growing appeal of passenger rail," said Emmett Fremaux, vice president of marketing and product management.

Once again, operating departments expanded service to meet demand across the system. Dozens of additional *Acela Express*, *Northeast Regional* and Amtrak *Cascades* trains departed as a result of collaboration between Transportation, Engineering and Mechanical departments.

"Our normal operations are incredibly complex, but to ramp up service the way we do at Thanksgiving is truly impressive," said Bill Crosbie, chief operating officer. "I'd like to thank every employee — and those who volunteered extra time — for working so hard to keep our passengers safe and pleased with their Amtrak experience during the holiday week."

Operational Update: Due to Union Pacific track work, *Lincoln Service* Train 303 will be canceled Tuesday, Dec. 2 through Thursday, Dec. 4. Alternate transportation will not be provided although service to most destinations between Chicago and St. Louis is available on other Amtrak trains.

Engineering: From 10 p.m. to 6 p.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department will work on the west slope Rock cut located under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. The project is slated for completion in mid- to late summer.

Finance: Effective Jan. 1, 2009, the reimbursable mileage rate for private autos (including vans, pickups and panel trucks) used for authorized company business will decrease from \$0.585 per mile to \$0.55 per mile.

Gift Policy Reminder: The Ethical Conduct and Conflict of Interest policy (posted on the Intranet under "Policies") precludes accepting any gifts valued at more than \$50, and no employee may solicit a gift of any value. Procurement department employees are precluded from accepting any gifts except for "business courtesies" that do not exceed \$10 in value.

Dear Co-workers,

When I started my new position here barely two weeks ago, I hit the ground running, in large part because I've come to know Amtrak pretty well over the years.

On my first day on the job, I took some time to meet employees in Washington Union station. My second day, which happened to be Thanksgiving, I visited the crew base and thanked employees for spending their holiday helping others safely reach their destinations. Last week, I had the opportunity to meet with the leaders of a number of our unions.

A couple things you should know about me: I'm a former member of IBEW and Teamsters. I am a straight shooter, so you'll know where I stand on things. I listen closely, and rely on the strengths of well-qualified people to give me their recommendations. I strongly believe that collaboration is a necessity in our business, and I don't have much time for those who stand in its way.

For those who may make incorrect assumptions about my past affiliations, let me be very clear: I am here because I believe in Amtrak. Splitting off the Northeast Corridor or separating the NEC infrastructure from operations are absolutely not in my plans. I not only want to preserve our coast-to-coast, interconnected system but also want to see it prosper.

With your help, we will become a greener, safer and healthier Amtrak. I plan to build on the many opportunities we have to show how critical passenger rail is to the economy and mobility of America, and I will be sharing with you exactly what that means in the coming weeks and months.

If you're thinking that you've heard all this before and you've seen CEOs come and go, that may be. However, as you get to know me (and you will), you'll see that I am personally committed to the success of this railroad. We have some of the best men and women in the field, and I hope you'll join me on the journey.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and decided there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required for meal expenses. Section 6.8 of the policy outlines restrictions that apply to these changes.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at *Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance*. As meal per diem and hotel maximum rates are periodically subject to change, the current meal per diem and maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax.

In a separate travel update, the Internal Revenue Service has announced the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for mileage expenses incurred on or after January 1, 2009.

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates. The policy changes apply to both agreement and non-agreement covered employees.

“We took a comprehensive look at our business travel policy and decided there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that authority is expanded from executive committee members to include their direct reports, a change that will streamline the approval process.

Meal reimbursements have changed to a per diem program. Instead of submitting meal receipts for a daily maximum of \$50, employees will receive a \$55 daily allowance for food, and receipts are no longer required. These changes were made in an effort to mimic the meal reimbursement program used by the federal government, which has proven to yield faster and easier processing.

An elevation of the maximum nightly hotel rates were also enacted to keep pace with the current lodging market. Allowable room rates, before taxes, have been raised to \$200 in Boston, \$190 in Chicago, \$300 in New York, \$140 in Oakland, \$160 in Philadelphia, \$140 in Seattle and \$205 in Washington, D.C. The national room rate for locations outside these cities now sits at \$120 per night.

The revised policy is posted in its entirety on the Intranet at [NEED ADDRESS](#).

In a separate travel update, the Internal Revenue Service has announced the reimbursable mileage rate will decrease from 58.5 cents per mile to 55 cents per mile to coincide with lower gas prices. This change will become effective for mileage expenses incurred on or after Jan. 1.

Merit Pay Reminder: Starting Dec. 8, non-agreement managers can begin entering goals in the IMPACT system. All non-agreement employees must have their goals recorded in IMPACT to receive a performance review and be eligible for a merit pay increase.

Operational Changes: Due to track work taking place on the Connecticut River Bridge over the next two weekends, rail service will be shut down between Boston and New York, affecting *Northeast Regional* Train 67 on Dec. 13 and 20 and Train 66 on Dec. 14 and 21.

Operation Lifesaver: If you are an Operations Lifesaver presenter, contact OL Officer Alvin Richardson (ATS 777-3434 or richara@amtrak.com) to make sure you are included in the presenter national database.

Human Resources: Pledge cards for the 2008 Employee Charitable Donation Campaign, which runs until Dec. 31, will be distributed to all employees by their respective departments. Employees who wish to make a contribution may do so through payroll deductions or on a one-time basis.

PSSA Update: The final regional President's Service and Safety Awards luncheon takes place on Wednesday, Dec. 10 in Jacksonville, Fla., where 17 employees will receive PSSA recognition and 28 will be honored for their 30 and 35 years of service.

Corporate Communications: Please remember that only authorized Media Relations personnel, or their designees, are permitted to speak to the media. Please direct media calls to 202-906-3860 during business hours; 800-562-1904 after business hours.

Ridership and Revenue Drop in November

Overall ridership and ticket revenue for November were down 4 and 6 percent, respectively, against last year mainly due to the current economic crisis hurting Northeast Corridor performance, where ridership declined 12 percent. The drop was offset by a 2 percent ridership increase on other corridor and state-supported services in conjunction with a 2 percent jump in long-distance ridership, which is partly attributable to significant improvements in on-time performance.

“Amtrak’s had tremendous growth over the last five years, and while the numbers are down slightly from last year, ridership and revenue are still relatively strong — especially in these economic conditions,” explained Emmett Fremaux, vice president, Marketing and Product Management.

Fremaux expects company performance to remain flat against last year until the economy begins to rebound and business travel perks up in the NEC.

Company Prepares for Presidential Inauguration

Plans are underway to accommodate huge passenger demand for the Jan. 20 inauguration of President-Elect Barack Obama in Washington, D.C. A crowd of up to five million people is expected to strain the region’s transportation system to its limit, so department officials across the company are collaborating to make ready.

“This is an historic event of national importance and we will be prepared,” said William Crosbie, chief operating officer. “We’re looking at every facet of our operations throughout the Mid-Atlantic and Northeast to ensure passengers get in and out of DC safely and efficiently.”

Amtrak will be adding capacity and is coordinating with agencies at the federal, state and local levels to maximize security efforts and train operations along the East Coast. Information about how the event will affect Washington-area employees, including how they can volunteer to help in certain stations along the Northeast Corridor, will be available soon.

Engineering: The Switch Exchange System, with the assistance of Mid-Atlantic Engineering, will be wrapping up the installation of the No. 21A switch at Shore Interlocking in Philadelphia. This is the final of seven switches installed in Shore Interlocking this fall.

Benefits: The Amtrak Benefits Web site will not be available from Wednesday, Dec. 17 through Jan. 2 in order to process benefit elections. Employees can still call the Benefits Service Center at 800-481-4887 to make benefit changes.

Corporate Communications: On Tuesday, Dec. 16 at 10 p.m., as part of its eight-part “Extreme Trains” series, the History Channel is airing a segment on the *Empire Builder*.

Gift Policy Reminder: The Ethical Conduct and Conflict of Interest policy (posted on the Intranet under “Policies”) precludes accepting any gifts valued at more than \$50, and no employee may solicit a gift of any value. Procurement department employees are not allowed to accept any gifts except for “business courtesies” that exceed \$10 in value.

Tropical Storm Gustav Update

Amtrak is closely monitoring the progress of Tropical Storm Gustav as it makes its way toward the Gulf Coast. At this time, it is forecast to become a hurricane and to make landfall on the Gulf Coast on Tuesday morning. Because the safety and well-being of our employees is paramount, Amtrak is taking steps to help employees in the region, should Gustav make landfall.

In preparation for the storm's arrival, all employees in the region should ensure that they have contact information for their supervisors. In addition, the 24-hour Employee Assistance Program hotline at **800-327-6448** will serve as a central reporting number and to field questions from employees affected by the storm. **To account for employees' whereabouts and safety, all employees in the region are being asked to call this number to verify their current location after Gustav's landfall.**

The EAP personnel will manage a daily roster of employees and distribute it to department heads and supervisors to ensure that employees are accounted for.

On the operations front, as of today, regularly scheduled service has been suspended to and from New Orleans until further notice. Crescent Trains 19 and 20 will terminate and originate in Atlanta, City of New Orleans Trains 58 and 59 will terminate and originate in Memphis, and Sunset Limited Trains 1 and 2 will terminate and originate in San Antonio.

The Federal Emergency Management Agency (FEMA) has already begun evacuating some Gulf Coast cities, including New Orleans. The company is preparing to run evacuation trains according to its agreement with FEMA. To that end, designated "Go Teams," made up of T & E, Mechanical and OBS crews, along with APD and Mobile Security Teams, are being deployed to operate the evacuation trains from New Orleans to Memphis.

As more information concerning affected employees, facilities and services becomes available, additional advisories will be posted.

Partial Coast Starlight Service Being Restored

Service on a portion of the Coast Starlight route is being restored this week after a massive mudslide severed the Union Pacific Railroad north of Chemult, Ore. on Jan. 19. Northbound train #14 will begin service on Wednesday, originating in Los Angeles and making all regularly scheduled stops to Sacramento. Southbound train #11 will begin service on Thursday over the same route. Service north of Sacramento is still suspended and is not expected to resume for at least two weeks as track restoration efforts continue.

“We’ve been in discussions with Union Pacific and all parties involved attempting to restore Coast Starlight service as quickly as possible,” said President and CEO Alex Kummant. “Our priority in this situation is to minimize the effect on our employees and passengers in a manner that’s most responsible.”

During this partial service restoration, only Coach class will be offered and no sleeping car accommodations will be available. Food and beverage service will be available in a café car only. Passengers will be able to check bags at stations that normally offer that service.

The initial mudslide destabilized the surrounding mountainside and buried approximately 3,000 feet of track under as much as 20 feet of dirt and fallen trees. Restoration efforts have been further complicated by heavy snow in the area. For more details, see corresponding Arrow messages.

Partial Coast Starlight Service Being Restored

Service on the Sacramento-Los Angeles portion of the *Coast Starlight* route is being restored this week after a massive mudslide severed the Union Pacific Railroad north of Chemult, Ore., on Jan. 19. Northbound Train 14 will begin service on Wednesday, originating in Los Angeles and making all regularly scheduled stops to Sacramento. Southbound Train 11 will begin service on Thursday over the same route. Service north of Sacramento remains suspended until further notice.

“We’ve been in discussions with Union Pacific and all parties involved attempting throughout this disruption and even now the UP is unsure as to when the route will be reopened,” said Chief Operating Officer Bill Crosbie.

The initial mudslide buried approximately 3,000 feet of track under as much as 20 feet of dirt and fallen trees and destabilized the surrounding mountainside. Restoration efforts have been further complicated by heavy snow in the area. For more details, see corresponding Arrow messages.

In the past week, other weather-related factors have disrupted service. On Jan. 31, unstable avalanche conditions in Glacier National Park made it necessary to terminate *Empire Builder* trains and set up a bus bridge between Havre and Whitefish, Mont. On Feb. 1, heavy snow conditions and a bulldozer that partially fell through a bridge deck caused annulment of *California Zephyr* trains with passengers either bussed back to their origins or put up in hotels.

“We thank the crews who worked hard to improvise and manage these difficult situations while keeping passengers safe and comfortable,” added Crosbie.

Insert rule

The Administration released its FY '09 budget today, which includes no operating funds for Amtrak next year. The \$800 million budget for Amtrak, which is the same number as last year, comprises \$525 million for capital expenses (which includes up to \$285 million for debt service) and \$275 million for efficiency grants. The entire budget is posted on the Internet at www.whitehouse.gov/omb/budget/fy2009. Amtrak plans to present its budget request to Congress later this month.

Operational Update: Due to Norfolk Southern track work, on Wednesday, Feb. 6, *Carolinian* Trains 79 and 80 will operate between Raleigh and Charlotte only.

Engineering: The New York Division Engineering forces are replacing base corroded rail on Line 1 of the East River Tunnel this week, changing out 12 locations totaling 658 linear feet of track. Line 2 was completed when ?????

Human Resources: Nomination forms for the President's Service and Safety Awards program are posted on the Intranet at "Employees" → "Awards and Achievements" → "2008 PSSA Nomination Forms." The deadline for nominations is Friday, April 11.

Benefits: All agreement-covered employees (except FOP) **must** respond to the Aetna request for verification of dependent information by **Friday, Feb. 29** to avoid termination of dental benefits for dependents. For questions, contact Aetna **immediately** at 866-682-5619.

401(k) Update: Enrollment meetings for the Fidelity Investments 401(k) Retirement Savings Plan are ongoing through March 20. Log on to www.mysavingsatwork.com/amtrak or check the meeting schedule included in "Your Guide to Getting Started" (mailed only to current non-Plan participants) for a meeting at your location.

Major Promotion on Tap to Hype Train Travel

This spring marks the beginning of a major marketing initiative designed to generate awareness of rail travel through a series of events, promotions and advertising campaigns, which will culminate in the first National Train Day. Scheduled for May 10, 2008, National Train Day commemorates the 139th anniversary of the completion of the Transcontinental Railroad in Provo, Utah, and will feature musical and entertainment acts in the major markets of Chicago, Los Angeles, Washington, D.C., and New York City.

The six-week campaign that leads to National Train Day encompasses a string of promotions that are part of this year's advertising program. The promotional events target a range of demographics and segments of the overall market, aiming to expand Amtrak's exposure in the marketplace.

"All of the promotional events are bound together by the National Train Day banner," said Vice President Marketing and Product Management Emmett Fremaux. "With rail travel in the public eye in various forms for six weeks and then ending with events in four major cities, we expect to strengthen our relationship with current riders as well as reach those that aren't familiar with Amtrak's service and gain market share."

Beginning in March, consumers will start to see National Train Day messaging on board trains, in stations and as part of a national advertising campaign. The events on May 10 will include entertainment, exhibits, and VIP appearances.

Some elements of the campaign are still under development, including plans for employee involvement. Look for updates on the National Train Day campaign in future editions of Amtrak This Week and Amtrak Ink.

Operational Update: Due to Norfolk Southern track work, *Crescent* Trains 19 and 20 will not operate between Atlanta and New Orleans, Mondays through Thursdays only, through March 6.

Government Affairs: Transportation Vice President Richard Phelps today testifies before the House Subcommittee on Railroads, Pipelines and Hazardous Materials on "The Role of Intercity Passenger Rail during National Emergencies" at the New Orleans Passenger Terminal.

Marketing and Product Management: If you know of a former Pullman porter who is interested in attending the upcoming Pullman porter celebration in Washington, D.C., on Feb. 25, contact Andre Ledgister at (404) 892-2931, extension 224 or a.ledgister@imagesusa.com.

401(k) Update:

NEW SECURITY PROCEDURES LAUNCHED

Random baggage screening conducted by Mobile Security Team

Today, the company is publicly announcing the deployment of its new specialized Amtrak Mobile Security Team, which will patrol stations and trains and randomly inspect passenger baggage on an unpredictable, rotating schedule. The Mobile Security Team supplements ongoing patrols already in place to enhance the safety and security of passenger rail travel. These are further steps in ongoing efforts to strengthen rail security as a means to minimize the risk of terrorist threats. The Mobile Security Teams will ultimately be deployed nationwide.

“Keeping our customers and employees safe remains our priority,” said CEO Alex Kummant. “These new procedures will strengthen our overall security, and they are vital in our efforts to deter, detect, and prevent a terrorist incident on the rail system,”

The Mobile Security Team’s squads may consist of armed specialized Amtrak police, explosives-detecting K-9 units and armed counter-terrorism special agents in tactical uniforms. They will screen passengers, randomly inspect baggage and patrol stations. These squads also may sweep through trains using K-9 units.

Passengers will have the right to refuse inspection. However, if they do so, they will not be permitted to board the train and will be offered a ticket refund.

The Mobile Security Team’s procedures will not affect train schedules. Random passenger baggage inspection is a quick process and typically will take less than a minute.

Detailed information about the new procedures can be found in the corresponding OSA and ARROW messages.

Engineering: With a FY ’07 safety ratio of 2.12 versus the 2.17 of BNSF Railroad, Amtrak Engineering has bested another Class 1 railroad engineering department in safety for the first time. The New York Engineering forces are the leading division to date in FY ’08, with a safety ratio of 0.61.

Operational Update: Beginning today, *Acela Express* Train 2151 will operate five minutes earlier between Boston-South Station, New London, Conn., and all intermediate stations. The train will operate according to its published schedule to all other stations on the route.

Environmental Health and Safety: High Speed Rail, Mechanical and EHS have initiated a program to separate paper recyclable from trash on the *Acela Express* trains in New York. This is an initial step toward a more comprehensive on-board recycling program that will also include bottles and cans on *Acela* and the *Auto Train*.

Top Story

Operational Update: Operational Update: Due to CSX track work, *Regional* Train 94 will not operate between Newport News, Williamsburg and Richmond, Va. (Main Street Station), Feb. 26 through Feb. 28. Train 86 will make special stops at these stations, before resuming its normal schedule at Richmond (Staples Mill Road).

Government Affairs: President and CEO Alex Kummant will testify before the House Appropriations Subcommittee on Transportation, HUD, and Related Agencies tomorrow and provide an overview of Amtrak's FY '09 request for federal funding, as outlined in the FY '09 Grant and Legislative Request. Amtrak is requesting \$1.671 billion dollars for capital, operating and debt service needs.

Human Resources: The deadline for PSSA nominations is Friday, April 11. Nomination forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2008 PSSA Nomination Forms."

Amtrak This Week

PEB Report Expected Soon

The Presidential Emergency Board (PEB) is expected very soon to release its recommendations on the ongoing labor negotiations between Amtrak and its unions in a report to President Bush. On Jan. 1, a 30-day “cooling off” period began, after which, if the recommendations are rejected or no agreements are reached, the parties may pursue self-help.

Remembering George Warrington

Amtrak mourns the passing of former Amtrak President and Chief Executive Officer George D. Warrington, who succumbed to pancreatic cancer on Dec. 24 after an eight-month battle. As president and CEO from 1998 to 2002 and chief executive of the Northeast Corridor Strategic Business Unit from 1994 to 1997, he presided over the electrification of the north end of the NEC and the launch of *Acela Express* service.

Warrington left Amtrak in 2002 to serve as the executive director of New Jersey Transit. After leaving NJT in 2007, he co-founded Warrington Fox Shuffler, a strategic consulting firm.

Warrington remains in the hearts and minds of many across the Amtrak system and our thoughts are with his family.

Government Affairs: On Dec. 26, President George W. Bush signed into law H.R. 2764, the omnibus appropriations bill for fiscal year 2008, which includes \$1.325 billion for Amtrak — \$475 million for operating grants and \$850 million for capital improvements (including debt service). The bill also includes \$30 million for capital grants to states via the Federal Railroad Administration for new or improved intercity rail passenger service.

Transportation: Daryl Pesce has been appointed general superintendent of the Central Division, effective Jan. 1, 2008. Former Superintendent of Operations Mike Sherlock is serving as acting general superintendent of the Mid-Atlantic Division.

Operational Update: The Winter 2008 edition of the system timetable, effective Jan. 21 through April 6, is being delivered to stations this month, and incorporates schedule adjustments resulting from maintenance-of-way projects and other operational factors.

Payroll: Due to late releases by numerous tax authorities and the related technical issues associated with applying tax changes to SAP, many 2008 tax rates will not be applied to

the first paycheck of 2008 on Jan. 4. It is expected that all of the changes will be received in time to recalculate all affected taxes by the end of January.

January 2, 2008

Amtrak This Week

President Signs Omnibus FY '08 Appropriations Bill

On Dec. 26, President George W. Bush signed into law H.R. 2764, the omnibus appropriations bill for fiscal year 2008, which includes key provisions impacting Amtrak. The Amtrak portion of the bill—totaling \$1.325 billion—includes \$475 million for operating grants and \$850 million for capital improvements, with up to \$285 million for debt service.

The bill also includes \$30 million for capital grants to states by the Federal Railroad Administration for new or improved intercity rail passenger service.

In Memoriam

Amtrak mourns the passing of former Amtrak President and Chief Executive Officer George D. Warrington, who succumbed to pancreatic cancer on Dec. 24 after an eight-month battle. As president and CEO from 1998 to 2002 and chief executive of the Northeast Corridor Strategic Business Unit from 1994 to 1998, he presided over the electrification of the north end of the NEC and the launch of *Acela Express* service.

Warrington left Amtrak in 2002 to serve as the executive director for the New Jersey Transit Corp. After leaving NJT in 2007, he co-founded Warrington Fox Shuffler, a strategic consulting firm.

Warrington remains in the hearts and minds of many across the Amtrak system; our thoughts are his family.

Transportation: Daryl Pesce, formerly Mid-Atlantic Division general superintendent, is the new general superintendent for the Central Division, the first division to be reorganized to create a unified approach between Engineering, Mechanical and Transportation. Mike Sherlock is serving as the acting MAD general superintendent.

Operational Update: The Winter 2008 edition of the system timetable, effective Jan. 21 through April 6, is being delivered to stations this month, and incorporates schedule adjustments resulting from maintenance-of-way projects and other operational factors.

Payroll: Due to late releases by numerous tax authorities and the related technical issues associated with applying tax changes to SAP, many 2008 tax rates will not be applied to the first paycheck of 2008 on Jan. 4. It is expected that all of the changes will be received in time to recalculate all affected taxes by the end of January.

Daryl Pesce has been appointed general superintendent of the Central Division, effective Jan. 1, 2008. Former Superintendent of Operations Mike Sherlock is serving as acting general superintendent of the Mid-Atlantic Division.

Payroll: States' Delay in Releasing 2008 Tax Rate Changes Affects Payroll

Due to late releases by numerous tax authorities and the related technical issues, many 2008 tax rates will not be applied for the first pay of 2008 on January 4th. We hope that all of these changes will be received in time to recalculate all taxes by the end of January. (this doesn't appear to be the last version of this.)

PEB Submits Recommendations to the President

Early last week, the Presidential Emergency Board submitted its recommendations to President George W. Bush for settling the ongoing negotiations between Amtrak and nine of its unions that represent employees. Between now and Jan. 31, the company will have an opportunity to negotiate a settlement that is good for Amtrak and its employees.

Feb. 1 marks the beginning of a third 30-day “cooling off” period, at the end of which, if the proposal is rejected, the parties may pursue self-help.

Don’t Forget: Keep your Mailing Address Current

Each year, the Railroad Retirement Board (RRB) sends employees a BA-6 form, detailing their service months and eligible compensations earned for the last calendar year. It is very important that every employee review the information on this form for accuracy. To confirm the correct mailing address, employees should call their local RRB office, which is listed under “United State Government” in the telephone directory.

Changes of address can also be sent to the RRB headquarters at the address shown on the back of the BAQ-6, or faxed to 312-751-7190.

Also, W-2 forms will be mailed to employees’ current address by Jan. 31. Employees are encouraged to notify Human Resources if their mailing address has changed during the past calendar year.

Operational Changes: Due to Union Pacific’s plan to install 87,000 concrete ties in the Pomona, Calif., area, the Ontario, Calif., stop for the *Sunset Limited* Trains 1 and 2 will not be accessible through Feb. 23. Passengers can book to or from Pomona, seven miles west of Ontario.

Benefits: All agreement-covered employees (except FOP) should have received correspondence from Aetna regarding verification of dependent information. To continue dental benefits, Aetna requires a response. For questions, contact Aetna immediately at 866-682-5619.

Human Resources: It’s not too late to enter your 2007 absences into mySAP. Not entering your 2007 absences could affect your ability to accrue vacation in 2008. Once your vacation hours reach a maximum of 125 percent of your total vacation entitlement, you will cease to accrue vacation for 2008; lost vacation accrual is not retroactive.

401 (k) Rollout: Employees currently not participating in the Fidelity Investments 401 (k) Retirement Savings Plan will soon receive an enrollment guide and meeting schedule in the mail. Fidelity will hold enrollment meetings for non-participating Amtrak employees beginning Jan. 14. Current participants can now access their accounts at www.mysavingsatwork.com/amtrak.

Information Technology: On Jan. 8, Help Desk users will receive an e-mail invitation requesting their participation in a brief online customer satisfaction survey. The e-mail message will direct users to a clickable link to complete the 10-minute questionnaire; Arrow users must cut and paste the link into their Web browser.

PEB Recommendations Made

The Presidential Emergency Board recommendations for settling the ongoing negotiations between Amtrak and nine of its unions were submitted to the President early last week, initiating a 30-day cooling off period. The PEB recommendations are posted on the Intranet home page.

During this period, Amtrak and its unions have an opportunity to identify a resolution based on the recommendations provided by the PEB. If no resolution is reached by midnight on Jan. 29 — and no extension of the cooling off period is agreed to or imposed — either party may seek self-help at 12:01 a.m. on Jan. 30. In the interest of reaching a settlement and averting a strike, it is possible for both parties to agree to extend the length of the cooling off period.

Please be assured that we will keep you apprised of any developments that occur on this matter; in the meantime please remain focused on running a safe and reliable railroad.

Don't Forget: Keep your Mailing Address Current

It is very important that every employee review the Railroad Retirement Board (RRB) form BA-6 that details employees' service months and eligible compensations earned for the last calendar year. This form is sent to every employee's mailing address; to confirm the correct mailing address, employees should call their local RRB office, which is listed under "United States Government" in the telephone directory. Changes of address may also be sent to the RRB headquarters at the address shown on the back of the BA-6 or faxed to 312-751-7190.

Also, W-2 forms will be mailed to employees' current address by Jan. 31. Employees are encouraged to notify Human Resources if their mailing address has changed during the past calendar year.

Operational Changes: Due to Union Pacific's plan to install 87,000 concrete ties in the Pomona, Calif., area, the Ontario, Calif., stop for *Sunset Limited* Trains 1 and 2 will not be accessible through Feb. 23. Passengers may book to or from Pomona, seven miles west of Ontario.

New Procedures in Effect for Requesting Arrow Log Sign-in

Effective Jan. 22, requests to create, modify or delete Arrow IDs will be processed by the Arrow Security Team, replacing the IBM-operated Amtrak Help Desk in Boulder, Colo. All Arrow log sign-in requests must be completed by a supervisor, lead clerk or foreman.

There will be four methods for submitting an Arrow ID request:

1. Sending an e-mail to Sandra Cooper, manager, Reservation System and Testing Support: CooperS@amtrak.com.
2. Sending an Arrow message to queue "MHQ," using the format found on Arrow DRS page G/POL/ARO/P6.
3. Faxing the "Log Sine Request Form" to Arrow Security Team at ATS 777-2493 or 202-906-2493. The form is also on the Intranet: "Library" → "ARROW" → "Log Sine Request."
4. Using the Customer Service Request (CSR) process.

Requests received by 4 p.m. EST will be honored on the same business day; requests received after 4 p.m. EST will be honored the next business day. Weekend or holiday requests will be honored the following business day.

Requests for a large quantity of new Arrow log sign-ins (i.e., for new hire classes) may require additional handling time. Those requests from external clients require prior approval from the Information Security Department.

First-time users with a newly assigned log sign-in will be prompted to: *enter SAP ID (or last 4 digits of SS#)*. However, users should **only** enter the last six digits of their SAP ID; Arrow is being modified to remove the reference to Social Security number.

Any log sign-in inactive for 90 days is automatically deactivated by Arrow, removing it from the Arrow system and terminating access. To restore access, follow the procedures outlined above.

For more information, please contact Sandra Cooper at ATS 777-3905 or 202-906-3905.

Engineering: Production's New England Division Rail Team, with the assistance of the New England Division Engineering forces is installing 3,500 linear feet of patch rail on the curves of the Northeast Corridor north of New Haven, Conn., this week.

Human Resources: Nomination forms for the President's Service and Safety Awards (PSSA) program will be posted on the Intranet by Jan. 22, and the nomination period runs until April 11. The PSSA program, now in its 28th year, provides the highest recognition for employees and external partners who've made outstanding contributions to Amtrak and the passenger rail industry.

Health Services: Effective Jan. 14, due to the closing of the Chicago Health Services office, employees and departments in the Western Region will now be serviced via the centralized office in Philadelphia. Please direct all applicable communication and correspondence to: Amtrak Health Services; 30th and Market Streets; Mail Box 67; Philadelphia, PA 19104. The phone number is ATS 728-2389 or 215-349-2389; fax: 215-249-2323 (Western) or 215-349-4401 (Eastern).

Benefits: All agreement-covered employees (except FOP) should have received correspondence from Aetna regarding verification of dependent information. To continue dental benefits, Aetna requires a response. For questions, contact Aetna immediately at 866-682-5619.

LANDSLIDE IN OREGON AFFECTS COAST STARLIGHT SERVICE

A massive landslide spanning an estimated 15 miles has severed the Union Pacific railroad north of Chemult, Ore., affecting service of the Coast Starlight.

Taking into consideration the low load factors and a cost-benefit analysis of the alternatives, the Transportation department has modified schedules of Trains 11 and 14 today and tomorrow, and cancelled service of northbound trains originating on Jan. 24 through Jan. 31, while southbound trains will be cancelled on Jan. 25 through Jan. 31. The landslide is reportedly advancing and the area must be stabilized before service can resume, making an estimation of when service can be restored difficult. Amtrak will be monitoring the situation very closely. For complete details, refer to the corresponding Arrow message.

Engineering: The Switch and Rail gang is doing preparatory work for the reconstruction of 14,400 linear feet of Track 2 in the south tube of the North River Tunnel in New York, which will require 26 55-hour weekend outages (10 p.m. Friday through 4 a.m. Monday) throughout the year.

Operational Update: The annual West Palm Beach Safety Patrol special trains are currently operating between Mangonia Park, Fla., and Washington, D.C., carrying approximately 600 students and 25 chaperones. The last of the trips takes place this week, Jan. 23 through Jan. 26.

Human Resources: Nomination forms for the President's Service and Safety Awards (PSSA) program will be posted on the Intranet tomorrow and can be found at "Employees" → "Awards and Achievements" → "2008 PSSA Nomination Forms. The nomination period runs until April 11. ENGINEERING DEPARTMENT PLANS FIRST EVER REPAIR BLITZ FOR NEC Government Affairs supports project through communication with local officials

The mid-June four-day closure of the Thames River Bridge to install a new lift span will provide the Engineering department an opportunity to conduct a nearly around-the-clock repair and maintenance “blitz” between New Haven and Boston.

Rather than absorbing the costs associated with potential bus bridges north and south of the bridge during the temporary closure, taking advantage of the rail outage between New Haven and Boston will enable Engineering crews to complete about a year’s worth of maintenance work in just four days.

The blitz, which is unique in its magnitude and scope, will improve the overall reliability of the infrastructure and reduce future service disruptions due to track outages for maintenance work. The blitz will involve tie replacement, surfacing at interlockings, electric catenary maintenance, road-crossing panel replacement and other bridge, track and platform work.

Amtrak has notified officials in the communities north of New Haven, and will be briefing local leaders on the scope of work and the service suspension itself in the coming months.

Engineering Department Plans June NEC Maintenance Blitz

Amtrak has begun notifying communities north of New Haven, Conn., of a planned four-day rail outage between New Haven and Boston associated with the replacement of the span of the Thames River Bridge this summer. In June, a vertical lift span will replace the current span on the Thames River Bridge in Groton, Conn., which in recent years had been prone to operating failures. The multi-year project will culminate in the installation of the new span during the four-day rail closure of the bridge in mid-June.

The bridge outage provides the Engineering department an opportunity to conduct a nearly around-the-clock repair and maintenance “blitz” between New Haven and Boston. Taking the rail out of service between New Haven and Boston will enable Engineering crews to complete about a year’s worth of maintenance work in just four days.

The capital improvement blitz, which is unique in its magnitude and scope, will improve the overall reliability of the infrastructure and reduce the need for future service disruptions due to track outages for maintenance work. The blitz will involve tie replacement, surfacing at interlockings, electric catenary maintenance, road-crossing panel replacement and other bridge, track and platform work.

Amtrak will continue to notify communities north of New Haven, and will be briefing local leaders on the scope of work and the service suspension itself in the coming months.

Operational Update: Due to the mudslides over a 10-mile stretch of Union Pacific tracks between Chemult, Ore., and Eugene, Ore., *Coast Starlight* service is temporarily suspended. A firm date for service restoration has not yet been established, however, the company operating plan was developing assuming service in approximately two weeks.

Human Resources: The United Way campaign is currently underway and will run through Jan. 31. To obtain a pledge card, contact Carolyn Stagger at ATS 777-3899 or 202-906-3899 or via e-mail at staggec@amtrak.com.

Environmental Health and Safety: The Safety Audit group will participate with the Mechanical department to audit the company’s mechanical contractor in Bakersfield, Calif. These audits assist contractors by identifying potential mechanical, contracting and safety concerns.

The blitz will involve tie replacement, surfacing at interlockings, electric catenary maintenance, road-crossing panel replacement and other bridge, track and platform work.

Amtrak will continue to notify communities north of New Haven, and will be briefing local leaders on the scope of work and the service suspension itself in the coming months.

Services Resume Following Midwest Floods

Service has now been fully restored on all three routes that were temporarily suspended in mid-June due to massive floods throughout the Midwest. The *Empire Builder* and *Southwest Chief* returned to regular service on July 1, while the *California Zephyr*, resumed on July 5.

“Floods of this size can wash out tracks and cause a lot of damage to switches and signal systems,” said Chief Operating Officer Bill Crosbie. “Our host railroads — BNSF, Canadian Pacific and Union Pacific—worked diligently to help us minimize the impact of the floods on our passengers and our business. We appreciate their efforts.”

Missouri Announces \$5 Million to Improve Amtrak Service

Last week, the Missouri Department of Transportation (MoDOT) announced \$5 million will be provided by the state legislature to improve infrastructure and increase reliability of service between Kansas City and St. Louis. The state is also seeking another \$5 million in matching funds from the federal government.

Amtrak operates two daily Kansas City-St. Louis round trips on the Union Pacific Railroad, which currently suffers from heavy freight train congestion. The investment from MoDOT will increase track capacity through the addition of sidings, thereby relieving bottlenecks along the route.

“We’re extremely excited about Missouri’s new level of commitment to passenger rail service,” said Anne Witt, vice president, Strategic Partnerships. “This is a trend we’re seeing across the country – states are continually recognizing the need for reliable public transportation options, which equates to a lot of growth potential for our company.”

Illinois Funding Update

Due in part to strong public opposition, Illinois Gov. Rod Blagojevic has backed off a proposal to eliminate funding for Amtrak service in 2009. The proposal was part of a plan to cut nearly \$2 billion in state spending to help balance the state budget. The company currently operates over a dozen daily round trips as part of a service contract with the Illinois DOT and a contract renewal at the current level of \$28 million per year is expected to be completed soon.

Operational Update: On July 9, 10 and 11, Amtrak *Cascades* Train 504 will not operate due to Union Pacific Railroad track work. Passengers will be provided motorcoach service between Eugene, Albany, Salem, Oregon City and Portland, Ore.

Engineering: The compaction grouting project that began on April 1 to stabilize 1,000 feet of concrete floor slabs of the B and P Tunnel in Baltimore is progression on schedule toward its July 21 completion target.

Human Resources: All non-agreement managers should have completed performance goals discussions with employees and entered the FY '08 goals into IMPACT, the new online performance management system. The final IMPACT training session is currently underway and will conclude on Friday, July 25.

Benefits: New benefit contribution rates go into effect this month for agreement-covered employees, and will be in effect for the next 12 months. For more information, contact the Amtrak Benefits Service Center at 800-481-4887.

Finance (Correction): The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from **50.5 cents** per mile to **58.5 cents** per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest. The deadline for submissions is **Friday, July 11.**

Extended Agreement with Connecticut DOT Expands Service

On the heels of new and expanded agreements with Maryland for the operation of its MARC commuter rail line, Amtrak has agreed to a five-year extension of its operating and access agreement with the Connecticut Department of Transportation (CDOT) that runs through June 2012.

The company will continue to provide transportation, mechanical and materials management services for CDOT's Shore Line East commuter rail, along with access to territory between New Haven and New London. New weekend service has also begun as part of the deal. Total contract revenue for the company for existing and expanded service is expected to increase by 32 percent annually.

Amtrak currently has six contracts to operate or support commuter train services including MARC and Shore Line East. Others are California's Caltrain, Florida's Tri-Rail, Virginia's VRE and Washington's Sound Transit.

Operational Update: Beginning July 14 through Aug. 14, Train 470, 490, 493 and 495 will not operate between Hartford, Conn., and Springfield, Mass., due to Amtrak track work. Service will not be provided to Windsor, Conn., but motorcoach service will be provided between Springfield, Windsor Locks, Conn., and Hartford.

Labor Relations: All agreement-covered workers who were on the payroll on Dec. 1, 2007 will receive appropriate back pay regardless of their employment status at the time wage payments are issued.

Engineering: Beginning July 14, the New England Division System Tie Gang S126 will install 11, 216 ties on the Springfield Line on the single-track section between Hayden and Windsor through the third week of August. Motorcoach service will be provided for the two midday shuttle passengers.

Human Resources: Non-agreement managers should have completed their FY '08 performance goals discussions with their employees and entered the goals into IMPACT; training is being conducted daily—10 a.m. to 11 a.m. and 1 p.m. to 2 p.m. through July 25. Questions related to the training should be sent to Impact@amtrak.com. For more performance management information, log onto the performance management Web site via the Intranet: "Employees" → "Performance Management."

401 (k) Update: To schedule an appointment with the Fidelity representative for help with enrolling, increasing contributions or making investment changes, employees can now call 800-642-7131 or visit www.fidelity.com/atwork/reservations. Reservations must be made two weeks in advance to receive a written confirmation via U.S mail. However, reservations can be made as late as 48 hours in advance.

Extended Agreement with Connecticut DOT Expands Service

On the heels of new and expanded agreements with Maryland for the operation of its MARC commuter rail line, Amtrak has agreed to a five-year extension of its operating and access agreement with the Connecticut Department of Transportation (CDOT) that runs through June 2012.

The company will continue to provide transportation, mechanical and materials management services for CDOT's Shore Line East commuter rail, along with access to territory between New Haven and New London. New weekend service has also begun as part of the deal. Total contract revenue for the company for existing and expanded service is expected to increase by 32 percent annually.

Amtrak currently has six contracts to operate or support commuter train services including MARC and Shore Line East. Others are California's Caltrain, Florida's Tri-Rail, Virginia's VRE and Washington's Sound Transit.

Operational Update: Beginning July 14 through Aug. 14, Train 470, 490, 493 and 495 will not operate between Hartford, Conn., and Springfield, Mass., due to Amtrak track work. Service will not be provided to Windsor, Conn., but motorcoach service will be provided between Springfield, Windsor Locks, Conn., and Hartford.

Labor Relations: All agreement-covered workers who were on the payroll on Dec. 1, 2007 will receive appropriate back pay regardless of their employment status at the time wage payments are issued.

Company Addresses Baggage Car Shortage

The amount of baggage on trains has increased dramatically as ridership soars and passengers exceed their carry-on limits, causing more demand for baggage equipment. While the issue may be causing headaches for some front-line employees and passengers, the Mechanical and System Operations departments are taking steps to alleviate the strain as much as possible.

The company currently has 63 baggage cars in the active fleet — 51 are required for revenue service, and the other 12 are allocated as back-up cars for terminals in New York, Los Angeles, Chicago and Beech Grove. Currently, 10 baggage cars are due for required air brake maintenance at the Beech Grove facility, resulting in a shortage.

“The problem,” explains Mike Frazier, director, System Operations, “is that with 10 cars in Beech Grove, the current operating plan only allows for two more baggage cars to be shopped elsewhere in the system. This is not feasible or sustainable. We’ve tried using baggage coaches as a temporary fix, but they simply can’t handle the high volume of luggage, which is why we adjusted our plan last week.”

That plan includes temporarily suspending baggage car service on Trains 448 and 449, effective July 19. Those cars will be redirected for use on the *Sunset Limited*. Repairs at Beech Grove are also being accelerated; three shopped cars are expected back in service within the next three weeks, according to Deputy Chief Mechanical Officer Terry Schindler.

“We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help,” said Schindler. “If capital investments are there to support the current fleet plan, we’ll build new baggage cars in two years that are more efficient and easier to load and unload.” According to Schindler, the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting the current needs of the fleet.

Operational Update: Due to Canadian Pacific track work, eastbound Train 8/28/808 will operate on an alternate route and will not stop at stations between St. Paul-Minneapolis and Chicago on Tuesday, July 22 and Tuesday, July 29.

Human Resources: IMPACT training for non-agreement managers, which occurs daily from 10 a.m. to 11 a.m. and 1 p.m. to 2 p.m., ends Friday, July 25.

Benefits: To find out if a Fidelity Investments representative will be in your area or make an appointment, log onto www.mysavingsatwork.com/amtrak and click on “Meet with a Fidelity Representative.” You can also call 800-642-7131 to reserve an appointment at a convenient location.

Environmental Health and Safety: The oil-contaminated area in and around the Sunnyside Yard in New York is currently under remediation, with clean-up being conducted under the oversight of the New York State Department of Environmental Conservation. The project is slated for completion for future rail operations in October.

“We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help,” said Schindler. This 58-year-old fleet has been downsized over the years due to restructuring. Should capital funding become available, replacing these cars will become a priority. According to Schindler, the challenge lies with striking a balance between investing in equipment that may be retired soon and planning for the future while meeting the current needs of the fleet.

DRAFT – July 17, 2008

Company Addresses Baggage Car Shortage

The amount of baggage on trains has increased dramatically as ridership soars and passengers exceed their carry-on limits. The issue is causing headaches for employees as well as passengers, but the Mechanical and System Operations departments are taking steps to alleviate the strain as much as possible.

The company currently has 63 baggage cars in the active fleet — 51 are required for revenue service, and the other 12 are allocated as back-up cars for terminals in New York, Los Angeles, Chicago and Beech Grove. Like other equipment, baggage cars are required to have air brake maintenance completed every four years and many are due for service. There are currently 10 baggage cars at Beech Grove for service, causing the shortage.

“The problem,” explains Mike Frazier, director, System Operations, “is that the current operating plan only allows for two baggage cars to be shopped at any one time. This is not feasible or sustainable. We’ve tried using baggage coaches as a temporary fix, but they simply can’t handle the high volume of luggage, which is why we adjusted our plan last week.”

That plan includes temporarily suspending baggage car service on Trains 448 and 449. Those cars will be redirected to service on the *Sunset Limited*. Repairs at Beech Grove are also being accelerated with three shopped cars back in service within the next three weeks, according to Terry Schindler, deputy chief mechanical officer.

Said Schindler, “We know this is a serious issue and as long as we can minimize out-of-service cars in the field, this plan should help. If capital investments are there to support the current fleet plan, we’ll build new baggage cars in two years that are newer and more efficient. But that means we can’t invest too much money in fixing cars that could be retired soon.”

ATW Top Story for July 28
DRAFT – July 24, 2008

Dear Co-workers,

As I'm sure you're aware, we are experiencing record ridership across the system, making our regularly busy summer season all the more demanding. But with this increase in passengers comes an increased responsibility to maintain our focus on the safety of our co-workers and our passengers.

Safety is always our top priority. Distractions and shortcuts can put you, your co-workers and passengers at risk, and this is especially critical for employees in operating departments — from mechanics, to Engineering crews, to conductors.

Whether it's a matter of slips, trips and falls or other potential hazards, we can prevent injuries by following proper procedures and being mindful of the safety training, safety briefings, and information provided by a division's safety committee, among other resources.

To that end, we will be talking to each and every Transportation department employee about their safety responsibilities from now through August 30. These individual contacts, which are typically done on a quarterly basis, are part of the Employee Safety section of our System Safety Program. (what about other departments?)

The discussions are meant to serve as a dialogue, so that we may also learn from you what you do to work safely. Our aim is to foster an environment of open communication regarding personal safety, and in the coming months you'll be hearing more about other safety-related measures we're planning.

Until then, stay alert, focused and safe. Remember — no matter how busy we may get, we are never too busy to operate a safe railroad.

Sincerely,

William Crosbie
Chief Operating Officer

William Crosbie
Chief Operating Officer

ATW Top Story for July 28
DRAFT – July 24, 2008

Dear Co-workers,

As we are all well aware, Amtrak is currently enjoying record ridership across the system and our numbers are expected to get even better now that we are in the middle of the peak summer travel season. But with this increase in passengers comes an increased responsibility. More people on our trains means that we are accountable for the safety of more mothers, fathers, daughters, sons, grandparents and grandchildren.

In addition to being responsible for our passengers, we must also remain vigilant in keeping ourselves, and our colleagues, safe while on the job. This is always our top priority, and I want to reinforce the importance of injury prevention and operating rules to every Amtrak employee. This is especially critical for Operations employees — from mechanics, to Engineering crews, to conductors.

Slips, trips and falls have accounted for the majority of recent injuries. We can prevent these injuries by following safety guidelines and watching out for ourselves and others. The System Safety Plan calls for regular face-to-face meetings to discuss issues and injury prevention. To underscore our commitment to operating rules and injury prevention, I've asked all Transportation managers to conduct meetings with each and every employee by the end of August.

The purpose of these meetings, which will be reported in TDRS, is to reinforce the importance of safety, and that failure to follow rules is not acceptable. We also want to continue to create an environment of open communication regarding personal safety. We're in the process of planning other safety-related campaigns, which you will hear more about in the coming months. Until then, stay alert, stay focused and most importantly, stay safe.

Sincerely,

Bill Crosbie
Chief Operating Officer

Marketing and Product Management: A new fare sale — promoting a 15 percent reduction on select city pairs (10 percent on the *Auto Train*) — is underway to stimulate travel on long distance routes. Reservations are available through Aug. 8 for travel between Sept. 2 and Dec. 11.

Operational Update: On Saturdays and Sundays through Sept. 1, *Ethan Allen* Trains 292 and 296 will be adjusted to accommodate passengers traveling to and from Saratoga Springs, N.Y., for the 2008 Saratoga Races.

Human Resources: All non-agreement managers who have not yet completed Impact training must do so via a computer-based training module, which is now on the performance management Web site: “Employees” → “Performance Management. Select “Impact-CBT” from the “Impact” drop-down menu.

Information Technology: IT has launched a new departmental Intranet page with the same look and feel as the corporate Intranet page. Log on to “How We Work” → “Information Technology” to access the site.

“Picture our Train” Calendar Contest in Full Swing

Now is the time to enter the “Picture our Train” 2009 Wall Calendar Photo Contest. The contest, which began on May 12, is an annual opportunity for employees and train buffs to submit a favorite photo of an Amtrak train to be featured on next year’s calendar.

The contest review panels are looking for the best original color photographs featuring a train with the current Amtrak logo and livery visible, including Amtrak California trains, Amtrak *Cascades*®, *Pacific Surfliner*® and *Acela Express* trains. Last year’s winning entry, a *Coast Starlight* train passing the majestic Mt. Shasta in Northern California, was submitted by Richard J. Allen, a retired police officer from Cortland, N.Y.

All entries must be an 8 x 10 original color photo suitable for enlargement up to 25 inches.

The grand prize winner will receive a \$1,000 travel voucher and a photo credit on the calendar. Second- through fifth-place contestants will receive travel vouchers as well, ranging from \$100 to \$500. The contest ends July 11.

Contestants are reminded to stay away from tracks and railroad rights-of-way, and remain in public access areas. The official rules are posted on Amtrak.com/photocontest.

Operational Update: Due to Union Pacific track work, the *California Zephyr* will detour through Wyoming via UP’s overland route affecting service at stations between Denver and Salt Lake City from Sunday, June 8 through Sunday, June 15.

Marketing and Product Management: A “Historical On-Time Performance” link on the Amtrak.com home page now enables passengers to better plan their trip by highlighting a particular train’s on-time performance and causes for possible delays.

Engineering: The cutover on the Shell at Grade project occurs on Sunday, June 8. The project improves the junction of the Hellgate Line with the New Haven Line to allow a speed increase from 15 mph to 45 mph for Amtrak trains.

Benefits: Employees who have questions regarding their benefits should contact the Amtrak Benefits Service Center at 800-481-4887.

Alleman Tapped for Top Spot in Mid-Atlantic Division

The company has selected Steven J. Alleman, deputy chief engineer, Construction, to assume the Washington, D.C.-based role of general superintendent of the Mid-Atlantic Division, effective June 1. Mike Sherlock, acting general superintendent since January, will assist in the transition process until June 15, before resuming his prior role as superintendent of operations based in Philadelphia.

“Steve offers a wealth of experience and knowledge and he’s demonstrated great skill and leadership as manager for a number of complex projects and operations,” said Vice President of Transportation Richard Phelps. “We should also applaud Mike for stepping up and serving in exemplary fashion during the search for a permanent replacement.”

Alleman joined Amtrak in 1977 as a track worker while attending Virginia Tech. During his tenure, Alleman has served in a variety of roles including New England Division general manager, High Speed Rail program director and senior program director of Fire and Life Safety.

Thames River Project to Affect Boston-New Haven-New York Service

Beginning Saturday, June 14 and continuing through Tuesday, June 17, Amtrak will replace the movable span of the 90-year-old Thames River Bridge, located between Groton and New London, Conn. To accommodate this project, service cancellations and adjustments will be made affecting travel between Boston, New Haven, Conn., and New York. This is the final stage of a multi-year project designed to improve the reliability of the bridge, reduce the chance of operational failures and minimize train delays. During this four-day track outage, Amtrak will also perform a maintenance “blitz” between Boston and New Haven that will provide passengers with a smoother ride and significantly improve the reliability of the railroad.

To communicate how service will be affected between New York and Boston during the four-day changeout, the company launched an extensive outreach campaign in February to inform appropriate state and local leaders, passengers and residents of the upcoming construction and service disruption. The company held numerous local meetings, sent written correspondence, produced an informational video, and launched media relations and customer communications campaigns as part of the outreach effort.

More information on this project is available on Amtrak.com through Wednesday, June 18.

Operational Update: On Sunday through Wednesday of each week beginning June 8 through June 25, *Piedmont* Trains 73 and 74 will operate between Raleigh and Salisbury, N.C., only. Motorcoach service will be provided to and from Kannapolis, N.C., and Charlotte, N.C.

Marketing and Product Management: The Amtrak Guest Rewards® Web site recently underwent a significant redesign to improve user navigation, provide a higher degree of one-to-one personalization, enhance “smart” messaging and better position Amtrak’s program partners. Additional enhancements are slated for later during the fiscal year.

Benefits: The one-year service requirement for enrollment in the 401(k) Retirement Savings Plan has been eliminated for agreement employees, who can now enroll immediately upon hire or anytime thereafter. Subsequently, enrollment packages will be sent to agreement employees hired within the last year.

Important Notice: Effective May 31, all dependent medical, dental and rail pass benefits are terminated for those employees who did not respond to Aetna’s numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

MESSAGE FROM PRESIDENT AND CEO KUMMANT

Dear Co-workers,

I wanted to take an opportunity to share with you some news about how we're doing, as we kick into the busy summer season. With just a couple months left in the fiscal year, ticket revenue through May was almost 14 percent ahead of last year over the same time, and ridership was nearly 11 percent higher. In addition, last month was one for the record books — we earned \$153.4 million in ticket revenue and served 2.58 million riders; both are the largest totals for any single month in company history.

While a range of factors contribute to these achievements, I credit your hard work and dedication for our success. I thank you for your commitment to Amtrak and for persevering in light of challenges some of the challenges we face.

And we do, and will, encounter some hurdles. A sustained downturn in the economy and uncertainty about its long-term vitality could dampen our momentum. Moreover, the same reason that helps drive up ridership — high gas prices — also causes our costs to soar. We expect to spend close to \$100 million more on diesel fuel than we did last year.

In addition, the problems we're experiencing with locomotive reliability are taking a toll on service and on-time performance, not to mention the front-line employees who are managing failures when they occur. I want you to know that our Mechanical teams are still in the process of replacing faulty traction motors on our P-42 diesel locomotives and they're working on remedies to address the difficulties we're having with our aging fleet of AEM-7 electric locomotives.

We've proven time and again that we tackle challenges with skill, but don't get me wrong — I am not satisfied with just surviving another day. My goal for Amtrak is to realize our ambitions to grow as we become an increasingly important part of the national transportation network. Congress appears to be close to completing a reauthorization bill that will keep us headed in that direction. Both the House and the Senate versions of the bill passed with relatively little opposition, an indication of the support for passenger rail.

We're busy now and the summer's only going to get busier. The highest percentage of injuries occurs during the summer, so please look out for one another and work safely.

Sincerely,

Alex Kummant
President and Chief Executive Officer

THAMES RIVER BRIDGE UPDATE

The scheduled replacement of the moveable span of the Thames River Bridge, originally scheduled for June 14 through June 17, has been rescheduled for Monday, June 16 through Thursday, June 19 due to unexpected construction complications. Because of the shift in plans, additional Boston-New Haven-New York Inland Route trains and some connecting bus service have been scheduled to bypass the bridge outage during the four-day period.

Government Affairs:

Operational Update: Beginning June 16 through June 24, the *Lincoln Service* and *Texas Eagle* will undergo temporary service adjustments and cancellations along the Chicago-St. Louis corridor due to Union Pacific Railroad track work in Springfield, Ill.

Information Technology: When sending e-mail across the entire enterprise, ensure that distribution lists cover only those areas directly impacted by the announcement. The current policy can be found on the Intranet at Library → Policies → Amtrak Policy and Instruction Manual → 3.0 Operations → Computer Security and Usage.

Dependent Audit for Agreement Employees: All dependent medical, dental and rail pass benefits are terminated for those agreement employees who did not respond to Aetna's numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

Note: Under a new contract with FEMA, Amtrak will provide emergency rail transportation in the event of a hurricane from New Orleans to as far as Memphis, Tenn. "Go Team" members are currently being assembled and trained to assist in evacuation efforts.

A LETTER FROM THE PRESIDENT AND CEO

May sets all-time record for ridership and revenue

Dear Colleagues,

As many of you may already know, last month was a monumental one for Amtrak as we had \$153.4 million in revenue and served 2.58 million riders — both are the largest totals for any single month in company history. These achievements are the latest success in a fiscal year that is proving to be very special.

With four months left in FY 08, ticket revenue is almost 14 percent ahead of last year over the same time, and ridership is nearly 11 percent higher. There are many factors contributing to this wave of success, but most important is the effort and dedication by each member of the Amtrak family. On behalf of the board of directors and the executive committee, I would like to thank you for your hard work and encourage you to keep it up.

While we are setting company records, there are still many challenges facing us as we finish out the fiscal year and look ahead to FY 09. Our operating expenses, particularly fuel costs, continue to rise. We expect to spend over \$215 million on diesel fuel this year, close to \$100 million more than last year.

Additionally, continuing problems with locomotive reliability are impacting our service and on-time performance. We are still in the process of replacing faulty traction motors on our fleet of P-42 diesel locomotives and we're working on remedies for problems with our aging fleet of AEM-7 electric locomotives. Mechanical teams are working diligently to identify the root cause of common failure modes and create solutions to prevent those problems.

Nevertheless, the peak travel season for the year is still ahead of us and I'm excited about capitalizing on our current momentum. Let's continue working together to operate the safest, most productive railroad possible.

Sincerely,

Alex Kummant
President and Chief Executive Officer

THAMES RIVER BRIDGE UPDATE

The scheduled replacement of the moveable span of the Thames River Bridge, originally scheduled for June 14 through June 17, has been rescheduled for Monday, June 16 through Thursday, June 19 due to unexpected construction complications. Because of the shift in plans, additional Boston-New Haven-New York Inland Route trains and some connecting bus service have been scheduled to bypass the bridge outage during the four-day period.

Government Affairs: By a margin of 311-104, the House passed the Passenger Rail Investment and Improvement Act (H.R. 6003), which authorizes \$14.4 billion in federal funding for Amtrak over the next five years. The House and Senate will now conference to reconcile the bill with last year's Senate bill that authorized \$11.4 billion.

Operational Update: Beginning June 16 through June 24, the *Lincoln Service* and *Texas Eagle* will undergo temporary service adjustments and cancellations along the Chicago-St. Louis corridor due to Union Pacific Railroad track work in Springfield, Ill.

Information Technology: When sending e-mail across the entire enterprise, ensure that distribution lists cover only those areas directly impacted by the announcement. The current policy can be found on the Intranet at Library → Policies → Amtrak Policy and Instruction Manual → 3.0 Operations → Computer Security and Usage.

Dependent Audit for Agreement Employees: All dependent medical, dental and rail pass benefits are terminated for those agreement employees who did not respond to Aetna's numerous requests for dependent information; a response is required to reinstate benefits. Call Aetna at 877-277-3368 to check benefits status or obtain a copy of the request.

Note: Under a new contract with FEMA, Amtrak will provide emergency rail transportation in the event of a hurricane from New Orleans to as far as Memphis, Tenn. "Go Team" members are currently being assembled and trained to assist in evacuation efforts.

Engineering: The New England Division Tie Gang will begin the installation of 4,000 wood ties on Track 3 from Read to Forrest, on the Northeast Corridor just south of Boston. The project begins at 3 a.m. Tuesday and concludes before 4 p.m. on Thursday.

Operational Update: Under a new contract with FEMA, Amtrak will provide emergency rail transportation in the event of a hurricane from New Orleans to as far as Memphis, Tenn. “Go Team” members are currently being assembled and trained to assist in evacuation efforts.

Human Resources: The President’s Service and Safety Awards (PSSA) program is diligently researching the more than 370 nominations submitted this year to recognize the accomplishments of employees and external business partners. The final ranking and scoring is scheduled to take place in Wilmington, Del., July 31 and Aug. 1; winners will be announced in August.

Thames River Bridge Update

The installation of a new bridge span on the Thames River Bridge has been rescheduled for **June 24 through June 27** due to an unexpected complication encountered by Amtrak and its contractor in dismantling the bridge’s 4 million-pound counterweight.

To accommodate passengers, Amtrak has scheduled substitute rail service between Boston and New York via the inland route through Springfield, Mass., as well as other special trains that will serve segments of the Boston-New Haven, Conn.-New York route. Limited connecting bus service to bypass the bridge outage will also be available during this period.

Regional Re-Launch Begins Today

After eight months of collaborative effort, the *Regionals* service re-launches today as the *Northeast Regional*. In addition to a new brand name and logo, the project includes an ambitious plan to deliver increased customer service. The goal of the project is to create a new product identity that increases ridership and revenue for the regional service without having a negative impact on the *Acela Express* service that also travels along the Northeast Corridor.

“Enhancing the image of the regional trains—Amtrak’s largest product line, with more than 7 million annual riders—and establishing the new *Northeast Regional* brand name, with a logo and product identity distinct from the *Acela Express*, is a key step in the FY ’08-FY ’13 Northeast Corridor business strategy,” according to Emmett Fremaux, vice president, Marketing and Product Management.

The Mechanical, Finance, Transportation, Food and Beverage, NEC Service Operations, Market Research and Pricing departments all have a hand in the plan for incremental improvements aboard the *Northeast Regional*, including outfitting 36 all-table Café cars, allocating funding to support upgrades, funding en route cleaners positions, establishing

and measuring customer-centric behaviors among on-board staff, creating new menus, building a new advertising campaign, and implementing tactical pricing.

MESSAGE FROM PRESIDENT AND CEO KUMMANT

Dear Co-workers,

I wanted to take an opportunity to share with you some news about how we're doing, as we kick into the busy summer season. With just a couple months left in the fiscal year, ticket revenue through May was almost 14 percent ahead of last year over the same time, and ridership was nearly 11 percent higher. In addition, last month was one for the record books — we earned \$153.4 million in ticket revenue and served 2.58 million riders; both are the largest totals for any single month in company history.

While a range of factors contribute to these achievements, I credit your hard work and dedication for our success. I thank you for your commitment to Amtrak and for persevering in light of challenges some of the challenges we face.

And we do, and will, encounter some hurdles. A sustained downturn in the economy and uncertainty about its long-term vitality could dampen our momentum. Moreover, the same reason that helps drive up ridership — high gas prices — also causes our costs to soar. We expect to spend close to \$100 million more on diesel fuel than we did last year.

In addition, the problems we're experiencing with locomotive reliability are taking a toll on service and on-time performance, not to mention the front-line employees who are managing failures when they occur. I want you to know that our Mechanical teams are still in the process of replacing faulty traction motors on our P-42 diesel locomotives and they're working on remedies to address the difficulties we're having with our aging fleet of AEM-7 electric locomotives.

We've proven time and again that we tackle challenges with skill, but don't get me wrong — I am not satisfied with just surviving another day. My goal for Amtrak is to realize our ambitions to grow as we become an increasingly important part of the national transportation network. Congress appears to be close to completing a reauthorization bill that will keep us headed in that direction. Both the House and the Senate versions of the bill passed with relatively little opposition, an indication of the support for passenger rail.

We're busy now and the summer's only going to get busier. The highest percentage of injuries occurs during the summer, so please look out for one another and work safely.

Sincerely,

A handwritten signature in black ink, appearing to read "Alex Kummant", with a stylized, flowing script.

Alex Kummant
President and Chief Executive Officer

Operational Update: Due to a budget shortfall, the North County Transit District in San Diego will discontinue its participation in the Amtrak Rail 2 Rail program. As a result, monthly NCTD Coaster monthly pass holders are no longer allowed to travel on Amtrak trains.

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will increase from \$0.50 per mile to \$0.58 per mile between July 1 and Dec. 1, 2008. The new rate will be effective for mileage expenses incurred on or after July 1.

Corporate Communications: Only authorized Media Relations personnel are permitted to speak to the media. Please direct media during regular business hours to 202-906-3860; after hours inquiries should be directed to the Media Relations answering service at 800-562-1904.

Reminder: Don't forget to submit your entry for the 2009 "Picture our Train" Wall Calendar Photo Contest. The deadline for submissions is Friday, July 11.

Major Campaign on Tap to Promote Train Travel

This spring marks the beginning of a major marketing initiative designed to generate awareness of train travel through a series of events, promotions and advertising campaigns, which will culminate in the first National Train Day. Scheduled for May 10, National Train Day commemorates the 139th anniversary of the completion of the Transcontinental Railroad in Provo, Utah, and will feature exhibits, family-friendly activities, VIP appearances and musical and entertainment acts in the major markets of Chicago, Los Angeles, Washington, D.C., and New York City.

The six-week campaign leading up to National Train Day encompasses a string of promotions that are part of this year's advertising program. The promotional events target a range of demographics and segments of the overall market, aiming to expand Amtrak's exposure in the marketplace.

"All of the promotional events are bound together under the National Train Day banner," said Vice President Marketing and Product Management Emmett Fremaux. "With rail travel in the public eye in various forms for six weeks and then ending with events in four major cities, we expect to strengthen our relationship with current riders as well as reach those that aren't familiar with Amtrak's service and gain market share."

Beginning in March, consumers will start to see National Train Day messaging on board trains, in stations and as part of a national advertising campaign.

Some elements of the campaign are still under development, including plans for employee involvement. Look for updates on the National Train Day campaign in future editions of *Amtrak This Week* and *Amtrak Ink*.

RE: Top Story for Amtrak This Week

New Agreements with Maryland Transit Administration Take Effect Next Week

Amtrak recently signed two new contracts with the Maryland Transit Administration (MTA) to continue operations and provide infrastructure access for MARC commuter trains. The Operating Agreement and the Access Agreement, both effective July 1, are five-year deals and the Access Agreement also includes a five-year extension option.

“The new contracts have significant improvements for Amtrak on the financial side as MTA is ramping up its commitment to improving commuter rail service,” explains Jason Steffensen, principal, Commuter Partnerships - Mid-Atlantic.

The new agreements have new and increased incentives for on-time performance and fleet availability. Combined, a revenue increase of approximately 10 percent is expected over last year.

The Access Agreement also includes an increase in funding for recapitalization of existing infrastructure, bringing the new total to \$35 million over the five-year deal. An additional \$220 million is built-in for Amtrak to begin implementing part of MTA’s 30-year service expansion plan with projects to improve capacity and reliability.

Amtrak currently has six for-profit partnerships for commuter train services. In addition to MARC, they include California’s Caltrain, Connecticut’s Shore Line East, Florida’s Tri-Rail, Virginia’s VRE and Washington’s Sound Transit.

TOP STORIES

Company Solicits Bids for Food and Beverage Operations

Amtrak is soliciting bids to explore ways to strengthen commissary operations and leverage new technologies to enhance Food and Beverage activities.

The contract with the current vendor, Gate Gourmet International, is set to expire at the end of the year, and a Request for Proposals (RFP) was issued this month.

“Everything we do is with an eye toward improving efficiencies, operating performance and cost controls. We aim to put into practice state-of-the-art warehouse systems that are more efficient, yield excellent customer service and help reduce food and beverage losses,” said Tom Hall, senior director, Food and Beverage. Company initiatives have reduced the Food and Beverage loss by 25 percent — more than \$20 million — over the last three years.

The competitive bid process is closely integrated with the Food and Beverage Point-of-Sale (POS) project to develop a new on-board POS system, replace the existing food and beverage management system, and update commissary warehouse operations with a new automated system.

“This move reflects no dissatisfaction with Gate Gourmet, which has been effective in working with the company to reduce commissary costs,” added Hall. “Gate Gourmet is invited to participate in the procurement process.”

Planning Department Re-Deployed

Last week, President and CEO Alex Kummant announced the disbanding of the Planning and Analysis department, and the integration of the group’s employees into four other departments: Finance; Marketing and Product Management; Transportation; and Strategic Partnerships and Business Development.

“In the past weeks, the board, executive staff and I have been engaged in refocusing Amtrak’s strategic plan,” said Kummant. “Rather than maintaining a stand-alone department responsible for our strategy, we are re-deploying the department’s resources into the wider organization. This is a work in progress and one about which I will be sharing more, as well as seeking employee input and feedback along the way.”

Kummant has asked Acting Vice President of Planning and Analysis John Bennett to assume the role of assistant vice president of Policy, Standards and Business Integration within the Strategic Partnerships department.

BRIEFS

Operational Update: Due to CSX track work, *Lakeshore Limited* trains 448 and 449 will not operate between Boston and Albany, N.Y. on March 18 and 19. Motorcoach service will be provided as alternate transportation.

Human Resources: Remember that nominations for 2008 President's Service and Safety Awards are due by Friday, April 11. Forms are posted on the Intranet at "Employees" > "Awards and Achievements" > "2008 PSSA Nomination Forms."

Engineering: Production's Switch Exchange System, with the assistance of New York Division Engineering, is replacing the #12 and #21 switches at Union interlocking in Rahway, N.J. Work will take place (WHEN?)

Marketing and Product Management: Amtrak is the official transportation sponsor for a fashion show at L.A. Union Station on March 14 as part of the city's fashion week. Celebrities involved include cast members of "America's Next Top Model," "Project Runway" and "The Janice Dickinson Modeling Agency" as well as various actors.

TOP STORY

Faulty Motors Being Replaced on P42 Locomotives

The Mechanical department is in the midst of a campaign to purge its P-42 locomotive fleet of suspect motors that could result in engine failures. Over the last 16 months, the company has experienced a rash of traction motor failures on its fleet of P-42 locomotives, which have resulted in numerous train delays, cancellations and in some instances, stranded passengers.

While the cause of the failures has been identified, the Engineering and Mechanical departments have been working diligently with GE to correct the problem. The cause of the failures has been identified as a faulty pinion-end bearing in motors built by GE in 2006 and 2007, which prevents the motor's armature from turning and thereby causing a locked axle.

A new bearing design has been created, and to date 200 new motors have been delivered and installed, with no bearing-related failures. According to Chief Mechanical Officer Vince Nesci, the goal is to finish the campaign by changing out 25 motors per week.

"We aim to replace these motors in complete locomotive sets whenever possible and route them on to single locomotive trainsets to reduce the impact of the failure mode," **(not sure what this means – does this relate to the four motors?)** said Nesci. "We currently have 19 P-42 locomotives with a full set of new motors and 19 more that only need one more new motors to be equipped with the new design."

The new bearings and motors are being built by GE, with installation performed by Mechanical crews at various shops across the country. Most motor replacements are taking place in Chicago. **(I'm confused – are most being installed in Chicago and then in other Mech locations across the country?)**

BRIEFS

Operational Update: Trains 55 and 56, the *Vermont*, will be replaced by motorcoach service between Springfield and Brattleboro, Mass. on Mar. 19 due to CSX track work.

Faulty Motors Being Replaced on P-42 Locomotives

The Mechanical department is in the midst of a campaign to purge its P-42 locomotive fleet of potentially faulty traction motors. Over the last 16 months, the company has experienced a rash of traction motor failures in its P-42 fleet, which has resulted in numerous train delays, cancellations and in some instances, stranded passengers.

The cause of the failures has been identified as a faulty pinion-end bearing in motors built by GE in 2006 and 2007. The Engineering and Mechanical departments have been working diligently with GE to correct the problem. When the bearing fails, it prevents the motor's armature from turning, which ultimately results in a locked axle.

A new bearing has been designed, and to date, 200 new motors have been delivered and installed with no bearing-related failures. According to Chief Mechanical Officer Vince Nesci, the goal is to finish the campaign by changing out 25 motors per week. Each P-42 has four motors.

"We aim to replace all four motors on a locomotive at the same time whenever possible, and then route those on to single locomotive trainsets to reduce the impact on reliability," said Nesci. "We currently have 19 P-42s with a full set of new motors and 19 more that only need one more new motor to be fully equipped with the new design."

The new bearings and motors are being built by GE and shipped to Beech Grove Maintenance Facility. There, Mechanical crews mate the motors to wheel sets, which are then shipped to various shops around the country for installation. The majority of installations will take place in Chicago.

BRIEFS

Operational Update: Trains 55 and 56, the *Vermont*, will be replaced by motorcoach service between Springfield and Brattleboro, Mass. on Mar. 19 due to CSX track work.

"We aim to replace all four motors on a locomotive at the same time whenever possible, and then route those on to single locomotive trainsets to reduce the impact on reliability," said Nesci. "This is a big undertaking for the Mechanical department. We currently have 19 P-42s with a full set of new motors and 19 more that only need one more new motor to be fully equipped with the new design."

The new bearings and motors are being built by GE. Mechanical crews join the motors to wheel sets and the finished combinations are then shipped to various shops around the country for installation.

BRIEFS

Operational Updates: Suspension of *Coast Starlight* service north of Sacramento, Calif. has been extended beyond April 1 as Union Pacific's track restoration efforts have been slowed by excessively muddy conditions. Rail service will be suspended through to, and including, Trains 14 and 11 originating on April 20 and 21, respectively.

Trains 55 and 56, the *Vermont*, will be replaced by motorcoach service between Springfield and Brattleboro, Mass. on Mar. 19 due to CSX track work.

Operations Service: The U.S. government has begun issuing re-designed \$5 bills with improved security features. Employees involved in cash transactions with passengers should refer to OSA 08-07 for info on how to recognize counterfeits.

Station Uniform Reminder: New station uniform policies went into effect on Mar. 15 requiring all *uniformed* station supervisors, ushers, baggage handlers and redcaps to wear the prescribed blue mesh security vest as their outermost garment. This will help passengers, fellow employees and emergency personnel easily identify Amtrak employees. Refer to SOU 08-01 for full details.

SWEEPSTAKES LAUNCHED AS PART OF NATIONAL TRAIN DAY

As part of the upcoming National Train Day on May 10, Amtrak and MasterCard are celebrating America's natural treasures with the "Amtrak America the Beautiful Sweepstakes with MasterCard."

The promotion launched last week and runs through May 31. During that period, every time a customer uses a MasterCard® to purchase a train ticket, merchandise, or food and beverages, he or she will automatically be entered for a chance to win in the "Amtrak America the Beautiful Sweepstakes with MasterCard." The grand-prize winner will receive his or her choice of any Amtrak Vacations National Parks package for four, valued at up to \$10,000 and a \$5,000 prepaid MasterCard Gift Card. Twenty-five other prizes will also be awarded.

In celebration of National Train Day, Amtrak will also donate \$0.50 to the National Park Service for every MasterCard purchase made with the company, up to a total donation of \$500,000. Since 1994, the National Park Service and Amtrak have partnered on the "Trails and Rails" program, which encourages visiting national parks by train.

"We're proud to be able to bring attention to our national parks this spring and contribute to the critical efforts of the National Park Service," said David Lim, chief, Marketing and Sales Promotions. "Preserving our environment has been the goal of the National Park Service since its inception and traveling by train is another way we can work towards a greener world."

More information on National Train Day and the sweepstakes may be found at NationalTrainDay.com.

National Train Day programs and contests for employees are being finalized now. More information will be provided as it becomes available.

Operational Update: Due to UP track work beginning Friday, March 28 and concluding Sunday, March 30, Capitol Corridor Weekend Trains 746 and 749 are cancelled with no alternate transportation. A bus bridge will be used for Capitol Corridor Weekend trains between Martinez, Calif., and Richmond, Calif., and Martinez and Oakland, Jack London Square.

Engineering: Track Laying Machine operators, Wilmington Maintenance-of-Way Equipment Shop repairmen and Structures welders are completing repairs and modifications to the TLM in preparation for an April 14 cut-in of the TLM at Elmora. The TLM then will begin work in northern New Jersey to correct the concrete tie failures.

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the healthcare or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Marketing and Product Development: If you know of a former Pullman porter interested in attending the upcoming Pullman porter celebration in Chicago on May 10, contact Saunya Connelly at connels@amtrak.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at "Employees" → "Awards and Achievements" → "2008 PSSA Nomination Forms."

NATIONAL TRAIN DAY PROMOS CONTINUE

As part of an ongoing slate of activities to commemorate National Train Day, Amtrak is launching a new promotion as well as two contests to get employees excited about the May 10 celebrations.

First is the National Train Day “Buy One, Get One Free” promotion, which provides a free companion ticket with the purchase of a full fare adult ticket. The offer is valid for sale on April 4 only and travel on May 10 only. “What better way to celebrate National Train Day than to take advantage of the buy one, get one free offer for travel on May 10,” said Darlene Abubakar, director, Brand Advertising and Sales Promotions.

On the employee engagement front, the “Children of Amtrak” Art Contest begins today. The contest is open to children of all Amtrak employees and contractors between the ages of six and 12. The contest judges are looking for art that best captures the essence of train travel and/or National Train Day. Four grand-prize winners will be selected and will receive a free family trip to one of the National Train Day entertainment venues—Washington, D.C., New York, Chicago or Los Angeles.

Entries must be postmarked by April 24 and received by April 29. For complete contest rules, log on to www.nationaltrainday.com/employees/artcontest.

Also beginning today, all employees are encouraged to enter the Employee Mini-Essay Contest. In 50 words or less, employees can respond to a weekly question posted in *Amtrak This Week*. The winning response is posted in the following week’s ATW, along with the new question of the week. A compilation of winning responses will be printed in the May issue of *Amtrak Ink*. Weekly winners will receive Amtrak merchandise.

All essays must be submitted — with “NTD Mini-Essay Contest” in the subject line — to ecom@amtrak.com.

This week’s question is: ***Why is passenger rail travel so important to the American economy?***

Check back next week for the winning response and a new National Train Day Question of the Week.

Marketing and Product Management/Operational Update: Amtrak Charter Services will operate charter trains for the 2008 Major League Baseball season. Among the teams contracted for 2008 are the Baltimore Orioles, Los Angeles Angels, Los Angeles Dodgers, New York Yankees, Philadelphia Phillies, Pittsburgh Pirates and Washington Nationals.

Environmental Health and Safety: The Amtrak Pandemic Flu Task Group is meeting this week to review and update the Pandemic Flu Contingency Plan, which is employed in the event the company is faced with a flu outbreak. The current plan is posted on the Intranet: “Safety” → “Health (Public)” → “Pandemic Flu Contingency Plan.”

Benefits: April 15 is the deadline to submit receipts for reimbursement if you have participated in the healthcare or dependent care flexible spending accounts in 2007. For questions or a reimbursement form, call the Amtrak Benefits Service Center at 800-481-4887 or visit amtrakbenefits.com.

Reminder: The deadline for PSSA nominations is Friday, April 11. Nomination forms are located on the Intranet at “Employees” → “Awards and Achievements” → “2008 PSSA Nomination Forms.”

“Conversation” on Station Improvement Continues in Albuquerque

The Great American Stations project continues this week with another “Civic Conversation” in Albuquerque, N.M., among Amtrak officials, state transportation officials and community leaders to discuss station improvements.

“As was the case at the two previous ‘conversations’ in Pittsburgh and Denver, we want to direct local mayors, civic leaders and state officials toward resources and best practices for rail station in need of upgrades or repairs,” said Joe McHugh, vice president, Government Affairs and Corporate Communications.

The morning session includes a review and update on the Americans with Disabilities Act and remarks from Mark Yachmetz, associate administrator, Federal Railroad Administration, and Rich Wessler, NRPC operations officer, BNSF Railway. After lunch, Meridian, Miss., Mayor John Robert Smith; Ryan Carpenter, director of special projects for Dodge City, Kan., and Andi Udris, president and CEO of Union Station in Kansas City, Mo., will present case studies highlighting their revitalization plans.

The next “Civic Conversation is slated for the fall in North Carolina.

Five Days until National Train Day!

Six weeks of promotions, special events and an ad campaign culminate this Saturday with the first-ever National Train Day celebration to highlight the importance of passenger rail travel. More than 50 stations and communities — including the “Big 4” in Washington, D.C., New York, Chicago and Los Angeles — are hosting National Train Day open houses, which will include such attractions as photo galleries, equipment exhibits and children’s activities.

“With ridership growing to record levels, we continue to see a strong demand for rail travel as a link between growing communities,” said Alex Kummant, president and CEO. “Passenger and freight service is on the rise, and there's never been a better time to celebrate the railroad industry and passenger rail service in the U.S.”

For more information on National Train Day, log on to www.nationaltrainday.com.

Operational Update: The *Coast Starlight* resumes normal operations tomorrow between Los Angeles and Seattle with northboard Train 14. The first southbound Train 11 departs Seattle on Wednesday.

Labor Relations:

Procurement and Materials Management: The new Asset Disposal Request e-Form must be submitted and approved before removing any Amtrak asset — except computers

— from company property. The form can be found by clicking on “Company eForm from the eTrax login page.

Amtrak Police Department: Congratulation to Det. John “Jake” Mumford, the 2007 Amtrak Police Department Officer of the Year for “numerous and significant contributions to the department. He was also awarded NARP’s Dr. Gary Burch Memorial Safety Award in April.

37 Years of Service: Amtrak began operations on May 1, 1971 with Train 235, the New York-Washington *Clocker*, which departed New York Penn Station at 12:05 a.m.

National Train Day Question of the Week Winner

What National Train Day events are you most looking forward to?

The “Children of Amtrak” Art Contest is the event that I am looking forward to. Children put so much into their projects, and I really enjoy looking at all of the entries. All of them are winners!

Terry Pryor
Administrative Assistant, Information Technology
Washington, D.C.

National Train Day Question of the Week

What events and activities would you like to see as part of next year’s National Train Day?

COPY FOR APPROVAL

Approved by Roy Deitchman, Alex Kummant

Safety Record Improvement Earns Industry Recognition

President and CEO Alex Kummant will accept a 2007 E.H. Harriman Memorial Award on behalf of Amtrak this week in Washington. The E.H. Harriman Memorial Awards Institute is presenting the award for most improved safety record among Class I railroads at a luncheon hosted by the Association of American Railroads.

“Winning a Harriman Award is an excellent achievement for Amtrak and the recognition is extremely meaningful,” said Kummant. “While we have instituted a number of initiatives to promote safety on the railroad, this award belongs to each and every employee who earned it by making safety a priority. I am very proud of our employees’ efforts.”

In 2007, the company had a rate of 2.4 FRA-reportable injuries per 200,000 man-hours — an improvement of 27 percent from the prior year and a 46 percent improvement compared to 2005.

“We want to prevent on-the-job injuries and illnesses,” said Roy Deitchman, vice president, Environmental Health and Safety. “The programs and procedures put in place by operating departments have helped, but we can still do better. Safety is a priority at Amtrak and is stressed everyday in job briefings, work practices and job safety analysis.”

According to Deitchman, the reduction of injuries can be attributed to operating departments implementing the comprehensive System Safety Program along with adoption of the Six Tenets of Safety which sets standards for performance and accountability for management and agreement employees. Increased safety education at Block Training and Training Camps was also instituted and cross-functional safety teams have been formed to solve individual workplace safety issues.

Safety Record Improvement Earns Industry Recognition

President and CEO Alex Kummant will accept a 2007 E.H. Harriman Memorial Award on behalf of Amtrak this week in Washington. The E.H. Harriman Memorial Awards Institute is presenting the award for most improved safety record among Class I railroads at a luncheon hosted by the Association of American Railroads.

“Winning a Harriman Award is an excellent achievement for Amtrak and the recognition is extremely meaningful,” said Kummant. “While we have instituted a number of initiatives to promote safety on the railroad, this award belongs to each and every employee who earned it by making safety a priority. I am very proud of our employees’ efforts.”

In 2007, the company had a rate of 2.4 FRA-reportable injuries per 200,000 man-hours — an improvement of 27 percent from the prior year and a 46 percent improvement compared to 2005.

“We want to prevent on-the-job injuries and illnesses,” said Roy Deitchman, vice president, Environmental Health and Safety. “The programs and procedures put in place by operating departments have helped, but we can still do better. Safety is a priority at Amtrak and is stressed everyday in job briefings, work practices and job safety analysis.”

According to Deitchman, the reduction of injuries can be attributed to operating departments implementing the comprehensive System Safety Program along with adoption of the Six Tenets of Safety which sets standards for performance and accountability for management and agreement employees. Increased safety education at Block Training and Training Camps was also instituted and cross-functional safety teams have been formed to solve individual workplace safety issues.

Operational Update: CSX is in the third week of a 16-week project in the Rochester subdivision to install 304,940 linear feet of rail between Warners, N.Y., and Corfu, N.Y.

Transportation: The newly issued Spring/Summer System Timetable becomes effective today, May 12.

Government Affairs: President and CEO Alex Kummant will testify on the Amtrak reauthorization bill on Wednesday, May 14 at 10 a.m. before the House Transportation and Infrastructure Subcommittee.

Corporate Communications: The 2009 “Picture Our Train” Wall Calendar Photo Contest begins today, May 12. Complete rules are posted on www.Amtrak.com/photocontest and the Intranet home page. The deadline is July 11. Participants are reminded to stay away from tracks and the railroad right-of-way. Tracks, trestles, yards and equipment are private property; trespassers are subject to arrest and fines.

National Train Day Question of the Week Winner:

What events and activities would you like to see as part of next year's National Train Day?

What I would like to see is another contest for the children, like an essays contest, I think it would be really nice to hear what children have to say about trains, they are our future. And artwork again, but open the age group to at least 16 years of age.

*Pauline Kittilson, Lead Acct. Clerk
Philadelphia*

Labor Update**Deadline for Entering Work Through April 30**

Employee Employees represented by BLET and SMWIA must enter time for work through April 30, 2008, by May 16, 2008, to ensure that those hours are factored into the first installment of the retroactive wage payment. Any time submitted after May 16, 2008, for dates worked prior to April 30, 2008, will be paid at the old rates and require time-consuming manual adjustments. Accordingly, the result of those manual adjustments would become part of the calculation for the planned second installment of the retroactive wage payment.

Retroactive Wage Payment

If you are one of the more than 9,500 union-represented employees who received the first installment (40% of the total amount) of the retroactive wage payments on May 9, please be sure to review the detailed information provided in the summary statement and the Frequently Asked Questions you received with the check or deposit notice. If you have additional questions about the calculation, please call the temporary call center set up to field payment questions at 1-888-514-0983, Monday-Friday 8 a.m. to 8 p.m. EDT. If your question requires further examination, you will be provided a case number that you must include on the Retroactive Wage Payment Inquiry NRPC Form 3287 (available on amtrakbenefits.com and on the Intranet under "Library," then "Forms") which should be mailed, along with the necessary supporting documentation, to Payroll Operations at the address on the form.

Tentative Agreement Reached

Amtrak has reached a tentative agreement with the UTU Stewards. Details of the agreements will be sent to union members for ratification.

Draft
5/16/08

Safety Focus Continues Through Operation RedBlock

After recently winning an E.H. Harriman Award for its improved safety record, Amtrak continues its mission of safety with its focus on helping employees and managers prevent on-the-job alcohol and drug abuse through the Operation RedBlock program. Earlier this month, the Operation RedBlock Executive Steering Committee met to explore ways to further strengthen the program.

“Our recent meeting between executives, managers and senior labor representatives reflected everyone’s sincere commitment that we all do our part to maintain a safe and healthy workplace across the system,” said President and CEO Alex Kummant.

Noting that operating a safe railroad requires tireless commitment from employees and managers at all levels, Kummant added that Operation RedBlock fosters an environment in which co-workers look out for one another. He continued by citing how that commitment includes preventing substance abuse-related incidents.

Operation RedBlock is a union developed, company adopted, drug and alcohol peer prevention and intervention program. Its mission is to emphasize awareness, education and prevention of substance abuse through union-led committees. More information about Amtrak’s RedBlock program can be found on the company Intranet under the “Employees” menu.

Operational Update: CSX is in the fourth week of a 16-week project in the Rochester subdivision to install 304,940 linear feet of rail between Warners, N.Y., and Corfu, N.Y.

Finance: The 2007 Annual Report is now posted on the Intranet under “Library” → “Reports” → “Annual Reports” → “2007 Annual Report.” It is also posted on Amtrak.com at “Inside Amtrak” → “Annual Reports and Consolidated Financial Statements” → “Annual Report 2007.”

Marketing and Product Management: The USA Rail Pass is now available to any persons regardless of nationality or residence with proper identification. A passport is no longer required to purchase or use the USA Rail Pass, although a passport remains a valid form of identification.

e-Commerce: The new Asset Disposal Request eForm must be submitted and approved prior to any Amtrak asset leaving the confines of company property. The eForm is not required for the disposal of PCs, monitors and other PC equipment, which require a CSR to dispose of this material. The eForm can be found by clicking “Company eForm” from the eTrax log in page → “Request for Asset Disposition.”

RE: Story for 5/27 Amtrak This Week
NOTES: Already approved by Phelps, Sherlock and Alleman

Alleman Tapped for Top Spot in Mid-Atlantic Division

The company has selected Steven J. Alleman, deputy chief engineer - construction, to assume the Washington, D.C.-based role of general superintendent of the Mid-Atlantic Division, effective June 1. Mike Sherlock, acting general superintendent since January, will assist in the transition process until June 15, before resuming his prior role as superintendent of operations based in Philadelphia.

“Steve offers a wealth of experience and knowledge and he’s demonstrated great skill and leadership as manager for a number of complex projects and operations,” said Vice President of Transportation Richard Phelps. “We should also applaud Mike for stepping up and serving in exemplary fashion during the search for a permanent replacement.”

Alleman joined Amtrak in 1977 as a track worker while attending Virginia Tech. During his tenure, Alleman has served in a variety of roles including New England Division general manager, High Speed Rail program director and senior program director of Fire & Life Safety.

Internal Marketing Plan Focuses on “Big Six” Services

A new internal education campaign is now underway to help Amtrak call center agents and travel agents better sell the features and benefits of the “Big Six” trains that comprise the Route Improvement Plan (*Amtrak Ink*, January 2008): *City of New Orleans*, *Auto Train*, *Coast Starlight*, *Hiawatha Service*, *San Joaquins* and *Northeast Regional*.

“With the Train of the Month initiative, we want to focus on our people who directly touch passengers,” said Hank Koppelman, senior director, Product Management, “and ensure that they have the most accurate information about a particular train service, which should enhance the reservation and sales process.”

City of New Orleans was highlighted in April and the *Auto Train* was the featured service in May. The *Coast Starlight* is the Train of the Month for June.

As part of the plan, route product managers brief — and subsequently quiz — call center agents and travel agents on the features of a given service, such as upgraded Dining car services, special equipment or promotions. The anticipated outcome is an increase in revenue and ridership. For example, *City of New Orleans* showed a 17 percent revenue increase over last year at MARSCC in Philadelphia, and a 2 percent increase at WRSCC in Riverside, Calif., for April. Additionally, a promotion enabling Amtrak Guest Rewards members to earn a 25 percent point bonus for travel on the *Auto Train* resulted in a whopping 2,270 registrations in May, according to Vicky Radke, senior officer, Loyalty Marketing.

Train of the Month is a collaborative effort among Product Management, Marketing, Loyalty Marketing, eCommerce, the Western and Mid-Atlantic Reservation Sales Call Centers and the Travel Agent Sales Center.

Operational Update: Due to extensive Union Pacific track work in downtown Springfield, Ill., through May 31, two *Lincoln Service* trains will be canceled and busing/rescheduling will occur on a portion of the route for four others. The *Texas Eagle* will also be delayed, with bus travel to and from Springfield.

Engineering: The Switch Exchange System, with the assistance of Mid Atlantic Division forces is installing a new interlocking at New Park on the Harrisburg Line in Thorndale, Pa. The first of four #20 turnouts will be installed this weekend during a 55-hour outage.

Human Resources: A pilot Diversity Youth Career Program is underway with the D.C. Chamber of Commerce to recruit area minority college students for an eight- to 10-week work initiative in the Washington, D.C., metropolitan area, beginning in June.

Alleman Tapped for Top Spot in Mid-Atlantic Division

The company has selected Steven J. Alleman, deputy chief engineer, Construction, to assume the Washington, D.C.-based role of general superintendent of the Mid-Atlantic Division, effective June 1. Mike Sherlock, acting general superintendent since January, will assist in the transition process until June 15, before resuming his prior role as superintendent of operations based in Philadelphia.

“Steve offers a wealth of experience and knowledge and he’s demonstrated great skill and leadership as manager for a number of complex projects and operations,” said Vice President of Transportation Richard Phelps. “We should also applaud Mike for stepping up and serving in exemplary fashion during the search for a permanent replacement.”

Alleman joined Amtrak in 1977 as a track worker while attending Virginia Tech. During his tenure, Alleman has served in a variety of roles including New England Division general manager, High Speed Rail program director and senior program director of Fire and Life Safety.

New Board Members Confirmed by Senate

Late last week the U.S. Senate confirmed nominees Thomas C. Carper and Nancy Naples O'Neill for the Amtrak board of directors. Both will serve five-year terms.

Carper served as mayor of Macomb, Ill. for 12 years, where he fought to preserve passenger rail service to the region and served as chair of the Amtrak Mayors' Advisory Council. He was then appointed by Illinois Gov. Rod Blagojevich as a regional director for Opportunity Returns, an initiative to spur economic growth and development in the state. Carper earned a bachelor's and Board of Trustees degree at Western Illinois University.

O'Neill was commissioner of the New York State Department of Motor Vehicles under Gov. George Pataki. Prior to her appointment, she served three terms as Erie County (N.Y.) comptroller, where she managed a \$1.1 billion budget. O'Neill also has 20 years of experience on Wall Street, including senior management positions at Chemical Bank, Merrill Lynch and HSBC. O'Neill is a graduate of Marymount College and holds an MBA from Pace University.

October Ridership and Revenue Point to Slower Growth

After six consecutive years of rising ridership and revenue and a particularly strong FY '08, results from the first month of FY '09 indicate a deceleration in growth. While systemwide ridership for the month is up 4 percent over last October and revenue is up 5 percent, both amounts are slightly under budget.

The totals for October were tempered by Northeast Corridor performance, where *Acela Express* and *Northeast Regional* trains combine for roughly 60 percent of the company's overall ticket revenue. Lower gas prices, higher unemployment and the current economic crisis affected NEC travel, especially on *Acela Express*. October ridership for *Acela* and *Northeast Regional* service was down 6 and 4.5 percent from last year, respectively. The result was a combined budget shortfall of \$7.8 million.

The good news, according to George Raed, chief, Market Research and Analysis, is that overall numbers are buoyed by stronger-than-expected performance on long-distance routes and other corridor services. In total, long-distance ridership climbed 15 percent and generate 16 percent more revenue than last year. State-supported and other short-distance corridor service ridership and revenue grew by 10 and 12 percent, respectively. These numbers reflect improved on-time performance and service quality.

“Job losses and decreased revenue are causing a large decline in business travel, as evidenced by our performance on the NEC. But these same factors are hurting the airlines even more, which are allowing us to gain market share,” explained Vice President of Marketing and Product Management Emmett Fremaux.

As airlines continue to reduce capacity and increase fares, more travelers are expected to turn to rail service.

“People still have travel needs, and while the overall market may have shrunk for the time being, we have an opportunity to capture long-term passengers who are trying passenger rail — and experiencing its benefits — for the first time,” said Fremaux.

Economic Downturn Evident in October Ridership as Growth Slows

After a particularly strong FY '08, the sixth consecutive year of rising ridership and revenue, results from the first month of FY '09 indicate a deceleration in growth thanks to a wide variety of economic factors. While systemwide ridership for the month is up 4 percent over last October and revenue is up 5 percent, both amounts are slightly under budget.

The totals for October were tempered by Northeast Corridor performance, where *Acela Express* and *Northeast Regional* trains combine for roughly 60 percent of the company's overall ticket revenue. Lower gas prices, higher unemployment and the current economic crisis affected NEC travel, especially on *Acela Express*. October ridership for *Acela* and *Northeast Regional* service was down 6 and 4.5 percent from last year, respectively. The result was a combined budget shortfall of \$7.8 million.

“Job losses and decreased revenue are causing a large decline in business travel, as evidenced by our performance on the NEC. But these same factors are hurting the airlines even more, which are allowing us to gain market share,” explained Vice President of Marketing and Product Management Emmett Fremaux.

The good news, according to George Raed, chief, Market Research and Analysis, is that overall numbers are buoyed by stronger-than-expected performance on long-distance routes and other corridor services despite these negative factors. In total, long-distance ridership climbed 15 percent and generated 22 percent more revenue than last year. State-supported and other short-distance corridor service ridership and revenue grew by 10 and 12 percent, respectively. These numbers reflect improved on-time performance and service quality.

As airlines continue to reduce capacity and increase fares, more travelers are expected to turn to rail service.

“People still have travel needs, and while the overall market may have shrunk for the time being, we have an opportunity to capture long-term passengers who are trying passenger rail — and experiencing its benefits — for the first time,” said Fremaux.

Company Prepares for Holiday Ridership Spike

With Thanksgiving quickly approaching, and bringing with it an enormous surge in ridership, operating departments are putting the final touches on plans to orchestrate an incredibly complex logistical challenge. An estimated 700,000 passengers, over 60 percent of which are NEC voyagers, will take to the rails for Thanksgiving travel next week.

“We’re essentially bringing structure to chaos,” said Bruce Van Sant, director, System Operations. “It’s a challenge to handle such high numbers of people on trains and in stations, but we’ve found a way to do it well.”

Two routes that do not usually require reservations—*Keystone Service* from Philadelphia to Harrisburg and *Pacific Surfliner*—will require a reservation from Nov. 25 – 28 to prevent overcrowding.

This year, 38 *Acela Express* departures will operate or have extended service that do not occur in a normal week. *Northeast Regional* consists will contain extra cars, and an additional 27 trains will originate or serve extra cities. In the West, passengers will benefit from the origination of 10 extra Amtrak *Cascades* trains.

“On the peak holiday travel days we pack a lot more into the schedule. This takes a lot of coordination and cooperation from host railroads and commuter lines to make room for our trains. We couldn’t do it without their help,” said Van Sant.

Peak days are the Wednesday, Thursday morning and Sunday of the holiday week. Saturday travel is also becoming more popular as passengers choose to return home sooner. For complete details on Northeast Corridor service, refer to the special Thanksgiving Holiday Timetable.

Employees are reminded that they still have flash-pass privileges according to the normal policy, which does not guarantee a seat, and employees are required to give their seats to revenue passengers when standee conditions occur. As always, please work safely, remain vigilant and report any suspicious activity to Amtrak Police by calling 800-331-0008 or by dialing 911.

Company Prepares for Holiday Ridership Demand

With Thanksgiving quickly approaching — and bringing with it an enormous surge in ridership — operating departments are putting the final touches on plans to orchestrate an incredibly complex logistical challenge. An estimated 700,000 passengers, over 60 percent of which are Northeast Corridor voyagers, will take to the rails next week. In addition, station employees and on-board crews are ramped up to handle the high volume.

“We’re essentially bringing structure to chaos,” said Bruce Van Sant, director, System Operations. “It’s a challenge to handle such high numbers of people on trains and in stations, but we’ve found a way to do it well.”

Two services that do not usually require reservations — *Keystone Service* from Philadelphia to Harrisburg and *Pacific Surfliners* — will require reservations from Nov. 25 to 28 to prevent overcrowding.

This year, the schedule includes significantly expanded *Acela Express* and *Northeast Regional* service, including added coaches on *Northeast Regional* trains. In the Pacific Northwest, passengers will benefit from 10 extra Amtrak *Cascades* trains.

“On the peak holiday travel days we pack a lot more into the schedule. This takes a lot of coordination and cooperation from host railroads and commuter lines to make room for our trains. We couldn’t do it without their help,” said Van Sant.

Company Prepares for Holiday Ridership Spike

With Thanksgiving quickly approaching, and bringing with it an anticipated surge in ridership, operating departments are putting the final touches on plans to orchestrate a complex logistical challenge to accommodate the estimated 700,000 passengers expected next week.

“We’re essentially bringing structure to chaos,” said Bruce Van Sant, director, System Operations. “It’s a challenge to handle such high numbers of people on trains and in stations, but we’ve found a way to do it well.”

Service across most of the system, and on every Northeast Corridor train, will require reservations from Nov. 25 – 28 to prevent overcrowding (but most of our trains already require reservations – there are a few unreserved services that will call for reservations that week). To maximize availability, Mechanical forces reduce out-of-service equipment drastically to provide as many seats as possible. (how?)

This year, 38 more *Acela Express* trains will operate than in a normal week while *Northeast Regional* consists will have extra cars, and an additional 15 trains will run. For complete details on Northeast Corridor service, refer to the special Thanksgiving Holiday Timetable.

Outside the NEC, 10 additional Amtrak *Cascades* trains will operate and Michigan service will be adjusted to maximize equipment utilization.

“The total number of trains isn’t significantly higher, but we pack more trains in to the peak days. This takes a lot of coordination and cooperation from host railroads and commuter lines to make room for our trains. We couldn’t do it without their help,” said Van Sant.

Peak days are the Wednesday before the holiday, the morning of Thanksgiving and the following Sunday. Saturday travel is also becoming more popular as passengers choose to return home sooner.

Employees are reminded that they still have flash-pass privileges according to the normal policy, but employees should give their seats to revenue passengers when standee conditions occur. As always, please remain vigilant and report any suspicious activity to Amtrak Police by calling 800-331-0008 or by dialing 911.

Operational Changes: On Monday through Friday of each week beginning Nov. 17-Nov. 21 and Dec. 2–9, *Springfield Shuttle* Trains 470, 490, 493 and 495 will be canceled between New Haven and Hartford, Conn., as track work is performed. Motorcoach service will be provided.

Pay-for-Performance Update: Beginning Wednesday, Nov. 19, non-agreement managers will be able to load **approved** performance ratings into the SAP Compensation Management System. Performance ratings in any status other than “approved” will not be accepted by the SAP system. Questions should be directed to impact@amtrak.com.

Benefits Reminder: The 2009 open enrollment period concluded on Friday, November 14, 2008. If you have any questions about your 2009 benefits, contact the Amtrak Benefits Service Center at 800-481-4887.

Don't Forget to Log 2008 Leave!

All non-agreement employees, ARASA (OBS) supervisors and crew representatives are required to record leave into mySAP/CATS. Leave should be entered immediately when taken. If you have not done so please enter all leave taken thus far for 2008 as soon as possible.

If you're having difficulty entering leave in the system, log on to <http://wiki.intranet.nrpc/display/STS/Home> for instructions. For more information on how to manage your absences, understand your vacation accrual rates, and generate real-time leave reports, log onto <http://intranet.nrpc/employees/mlt.htm>. To review the vacation policy, refer to HR policy 7.35.3 or <http://wiki.intranet.nrpc/download/attachments/3595/7.35.3+Vacation+Policy.pdf?version=1>

Auto Train Returned to Service

After a four-day service cancellation due to cracks in auto carrier underframes, *Auto Train* resumed operation on Saturday with its daily roundtrip between Lorton, Va., and Sanford, Fla.

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of other equipment, which revealed other such cracks. Although no incidents had occurred, company officials immediately canceled *Auto Train* service as a precautionary measure until repairs could be made.

“This is a great illustration of how our company should operate and the value we place on the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “I commend everyone involved in the detection and repair of these problems, as well as our customer service teams who minimized the inconvenience to our passengers.”

After the decision to cancel the train Tuesday, *Auto Train* passengers were offered a full refund or the option of remaining on the trains they had boarded for meal service and use of the accommodations they had reserved, without charge. Amtrak also provided hotel vouchers to those passengers who chose to rest over night before driving their cars to their destinations. Additionally, Customer Service teams called passengers booked for travel later in the week to inform them of the service cancellations and offer refunds.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at *Auto Train* terminals in Virginia and Florida. These teams worked around-the-clock in 12-hour shifts to weld steel plates to the affected area of the car frame so service could resume as soon as possible.

The cancellations resulted in about \$XXX in lost revenue. Said Crosbie, “Safety is our number one priority and we will always choose to err on the side of caution, regardless of the financial impact.”

The *Auto Train* fleet includes 80 of the two-year-old auto carriers, which have logged approximately 500,000 miles each.

Auto Train Returned to Service

After a four-day service cancellation due to cracks in auto carrier underframes, the *Auto Train* resumed operation on Saturday with its daily roundtrip between Lorton, Va., and Sanford, Fla.

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of the fleet, which revealed similar cracks. Although no incidents had occurred as a result of these cracks, company officials immediately canceled *Auto Train* service as a precautionary measure until repairs could be made.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at *Auto Train* terminals in Virginia and Florida. These teams worked around-the-clock in 12-hour shifts to weld steel plates to the affected area of the car frame so service could resume as soon as possible.

“We suspended service as a precaution; there is no wavering in our commitment to the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “From the Auto Train crew on Tuesday, to other passenger services and call center employees, to the welders who helped fix the equipment, I thank everyone who had a role in handling the situation and restoring service.”

On Tuesday of last week, Mechanical crews spotted a crack above the wheel assembly of a shopped auto carrier. This discovery prompted a thorough inspection of other equipment, which revealed other such cracks. Company officials immediately canceled *Auto Train* service until repairs could be made.

“This is a great illustration of how our company should operate and the value we place on the safety of our passengers and employees,” said William Crosbie, acting president and CEO. “I commend everyone involved in the detection and repair of these problems, as well as our customer service teams who minimized the inconvenience to our passengers.”

After the decision to cancel the train on Tuesday, *Auto Train* passengers were offered a full refund or the option of remaining on the trains they had boarded for free meal service and use of their reserved accommodations. Amtrak also provided hotel vouchers to those passengers who chose to rest over night before driving their vehicles to their destinations. Additionally, Customer Service teams called passengers booked for travel later in the week to inform them of the service cancellations and offer refunds.

The Mechanical department deployed welders and materials from Beech Grove and Bear Car Shops to support mechanics at *Auto Train* terminals in Virginia and Florida. These teams welded steel plates to the affected area of the car frame around the clock so service could resume as soon as possible.

The cancellations resulted in about \$XXX in lost revenue. “Safety is our number one priority, and we will always choose to err on the side of caution. No amount of money is worth risking any kind of injury or accident,” said Crosbie.

The *Auto Train* fleet includes 80 of the two-year-old auto carriers, which have logged approximately 500,000 miles each.

Operational Update: Employees are reminded that all NEC, Keystone Service and *Pacific Surfliner* trains will require reservations from Nov. 25 to Dec. 1. Flash-pass privileges still applying according to the standard policy, which requires pass riders to give their seat to revenue passenger when standee conditions occur.

Security: During the heavy Thanksgiving travel, Amtrak will increase its security and police patrols throughout the system, including K-9 detection teams. Employees should

stay alert for suspicious activity and unattended baggage. Remember, if you see something, say something by calling APD at 800-331-0008 or dialing 911.

Engineering: Engineering: From 10 p.m. to 6 p.m., beginning Monday, Dec. 1 and concluding Friday, Dec. 19, the Engineering department and Janod Inc. will begin work on the west slope Rock cut located under the George Washington Bridge in Manhattan as part of the Empire Line Rock Slope Stabilization Project. After a brief winter shutdown, the project is slated for completion in mid- to late summer.

Corporate Communications: On Tuesday, Nov. 25 at 10 p.m., as part of its eight-part *Extreme Trains* series, the History Channel is airing a profile on the *Acela Express*. On Dec. 16, the program is highlighting the *Empire Builder*.

New Diversity Training Plan to Roll Out

As part of its ongoing commitment to promoting a workplace free of discrimination and harassment, the 2009 diversity training season launches this week with a new focus on how effective diversity initiatives impact the bottom line.

“As Amtrak continues to evolve in response to changes in today’s more diverse market, it’s important to ensure our workforce has a good understanding of diversity — beyond compliance — and how it impacts every facet of our business,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives.

To that end, the department is implementing a new round of diversity training, including an updated class format and curriculum to ensure alignment with the company’s strategic direction. Technical modifications were also made to the online refresher course to address several functional issues.

The mandatory diversity training requirement remains in effect for all non-agreement employees. Departmental diversity training representatives will assist in identifying those employees required to undergo training, notifying employees of class schedules and registering employees in the training classes. A list of diversity training representatives is posted on the diversity site on the Intranet.

- **Classroom:** All new non-agreement employees since the last round of training, as well as those who have no record of having taken diversity training, will be required to complete training in FY '09. A schedule of classes and a list of FAQs are posted on the Intranet at <http://wiki.intranet.nrpc/display/Diversity/Diversity+Training>.
- **Online:** All non-agreement employees who have completed training and are due for a refresher (as required every three years) will be required to complete the online course. The online diversity refresher can also be found at <http://wiki.intranet.nrpc/display/Diversity/Online+Diversity+Refresher+Course>.

Training for agreement-covered employees remains a part of their existing training channels, such as block training.

Daylight Savings Time Reminder: On Sunday, Nov. 2, at 2 a.m., all clocks (except in Arizona) will be set back one hour in accordance with the Uniform Time Standard Act. Amtrak trains en route at that time will protect departure times at the first station after 2 a.m. and operate on current schedules to their final destinations.

Operational Update: Beginning Nov. 3 through Nov. 24, all *Empire Service* trains operating between Albany-Rensselaer and Niagara Falls, N.Y., (except Train 285) will operate on an adjusted schedule due to track work being performed by CSX Transportation.

Pay-for-Performance: The mandatory compensation management training required for all managers with non-agreement reports concludes on Friday, Nov. 7. If you have not completed the training, contact Valerie Carter, training logistics coordinator, at carterva@amtrak.com.

Marketing and Product Management: Scheduled for discontinuance on Nov. 1, the provision allowing Northeast Corridor monthly multi-ride ticket holders to upgrade to off-peak *Acela Express* trains within 30 minutes of departure for \$20 will remain in effect until March 1, 2009.

Engineering: Production's Switch and Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, is in the process of reconstructing the North Leg of the Perryville Wye. By the Thanksgiving holiday, the gang will lay 1,200 track-feet of wood track panels and install continuous welded rail.

Health Services: Per a U.S. Department of Transportation directive, effective Nov. 1, direct observation of urine specimen collections is **required** for all federal return-to-duty and follow-up drug testing.

Top Story

Operational Changes: Due to Union Pacific track work, *Coast Starlight* Trains 11 and 14 will operate on an alternate route, with stops at stations between Los Angeles and Sacramento on Nov. 8, 10, 12 and 14. Alternate train or motorcoach service is available at most stations affected by this detour.

Engineering: The Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will install the No. 27 switch in REA Interlocking in Newark, N.J., during a 55-hour weekend outage starting on Friday, Nov. 14.

Benefits: Later this week, employees will receive a letter explaining the transition from SHPS to WageWorks as the company's flexible spending accounts administrator. Also note that the annual open enrollment period for benefits ends this Friday, Nov. 14.

Human Resources/Station Support: The new electronic travel voucher request process is slated to go live on Sat., Nov. 15. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Marketing and Product Management: The Radio City Christmas Spectacular® is now offering employees \$54 orchestra and first mezzanine seats — an \$18 discount — at select non-peak performances through Friday, Dec. 12. Log on to www.radiocitychristmas.com and enter the “AMTRAK” code to receive the discount.

Major Promotion on Tap to Create Buzz for Train Travel

This spring marks the beginning of a major marketing initiative designed to generate awareness and excitement for train travel through a series of events, promotions and advertising campaigns, which will culminate in the first National Train Day. Scheduled for May 10, 2008, National Train Day commemorates the 139th anniversary of the completion of the Transcontinental Railroad in Provo, Utah, and will include musical and entertainment acts, exhibits, VIP appearances and trip giveaways in the major markets of Chicago, Los Angeles, Washington, D.C., and New York City.

Beginning in mid-March, consumers will start to see National Train Day messaging on board trains, in stations and as part of a national advertising campaign.

“National Train Day allows us to engage new customers, strengthen our relationship with current riders, and generate positive buzz for Amtrak, all with an eye toward generating incremental trips,” said David Lim, chief marketing officer.

In the face of airline delays and highway congestion, as well as escalating fuel prices, riding the train is increasingly becoming a more viable travel alternative.

“National Train Day will help to generate excitement for train travel and remind people just how relevant the train is in their everyday lives today,” said Alex Kummant, president and chief executive officer. “Trains helped make America the great country that it is, but today train travel represents a mode of transportation for the future. It’s greener, more modern, and an overall nicer way to travel.”

Pullman Porter Reunions Slated

A Pullman porter tribute celebration is scheduled for Feb. 25 in Washington, D.C., and includes a special reception at Washington Union Station and an evening event on Capitol Hill. The Capitol Hill event coincides with a House resolution by Rep. Charles Rangel (D-N.Y.) to honor A. Phillip Randolph, who organized the Brotherhood of Sleeping Car Porters. Receptions will also be held in Chicago on May 10 and in San Francisco in September (date to be determined).

If you know of a former Pullman porter who is able to travel and would like to attend the celebrations, provide the individual’s name and contact information to Saunya Connelly via e-mail at connels@amtrak.com

Marketing and Product Management: If you know of a former Pullman porter who is able to travel and would like to attend the upcoming Pullman porter celebration in Washington, D.C., on Feb. 25, contact Saunya Connelly via e-mail at connels@amtrak.com

***Acela Express* Passengers Enjoy Outstanding OTP**

Acela Express trains operated at 92.8 percent on-time performance for the month of September, making it the best OTP month in more than two years and the best month operating under a 16-train plan. The best OTP month ever for the *Acela* was March 2006, when the train ran on time 93.2 percent using 14 of 20 trainsets.

A number of factors are involved in this strong performance, including improved crew performance, targeted schedule adjustments, and reductions in infrastructure challenges. The nearly 93 percent OTP for September 2008 contributed to Amtrak's increased air-rail market share along the Northeast Corridor. On the south end of the NEC, the company's air-rail market share increase to 63 percent; 49 percent on the north end.

Final Reminder: The deadline for completing and returning your responses to the Employee Satisfaction Survey is **Friday, Oct. 10**. All responses are strictly confidential. Call ATS 777-3770 or e-mail ecom@amtrak.com, and include your home mailing address, as soon as possible if you have not received a survey.

Operational Update: Due to track work being performed by Amtrak, Springfield Shuttle Trains 470, 490, 493 and 495 will be canceled between Berlin and Hartford, Conn., every Monday through Friday, beginning Oct. 6 through Nov. 14. Train 490 will be canceled between New Haven and Hartford.

Engineering:

Human Resources-Performance Management: Through Nov. 7, non-agreement managers are required to use the IMPACT performance management tool to evaluate their direct reports' annual job performance. Every non-agreement employee with at least 90 days of continuous service must receive an evaluation against established goals. Forward any questions to impact@amtrak.com.

Human Resources-Benefits: Given the recent news about the economy, employees should direct any questions about their Fidelity 401(k) Retirement Savings Plan to the Fidelity Retirement Services Center at 877-477-AMTK. Representatives are available Monday through Friday, 8 a.m. to midnight EDT.

Human Resources-Health Services: As the influenza season quickly approaches, the Centers for Disease Control and Prevention recommends an annual flu vaccine as the first and most important step in protecting against this serious illness.

EIM Phase 2 Supports Broad Enterprise Systems Initiative

Amtrak is in the second stage of a five-year Employee Information Management (EIM) program designed to improve employees' access to information from the SAP system via a user-friendly Web browser — referred to as the Employee Information Portal, or EIP. Once this phase is completed, non-agreement-covered managers and employees and salaried agreement-covered employees will be able to easily check leave balances, view HR data and electronically submit and/or approve leave requests.

"EIM Phase 2 promotes ease of use and a movement toward self service," said Michael Duncan, senior director, Compensation/Benefits and HR Technology.

Identity and access management, another program element, was recently used to match Windows and SAP usernames and passwords for easier access to SAP.

Additionally, the compensation management function will roll out to all managers with non-agreement-covered direct reports on Nov. 12. Mandatory training will begin tomorrow and continue through Friday, Nov. 7, and cover how to enter and approve merit increase recommendations in SAP. The October issue of *SAP Spotlight*, issued via e-mail on Oct. 7, details classroom training locations and dates for online training. Non-agreement managers should have received an e-mail with instructions on how to enroll in the training. For those who have not, contact SAPsupport@amtrak.com as soon as possible.

In early 2009, all salaried, non-agreement users can begin entering leave requests and approvals through EIP.

EIM Phase 2 supports a comprehensive enterprise systems solution known as Strategic Asset Management (SAM), which will integrate the business practices of Finance, Procurement, Mechanical, Engineering and Transportation. Using SAP and another tool called Maximo, SAM is expected to enhance company productivity by improving the work flow, establishing better processes, and providing consistent information across the company.

Operational Changes: On Saturday and Sunday Oct. 18, 19, 25 and 26, track work being performed by Metro-North Railroad will affect service and schedules along the *Maple Leaf*, *Adirondack* and *Lake Shore Limited* routes.

Engineering: On Saturday, Oct. 18, Bridge Rehab Gang R-901 will employ 16 100-ton hydraulic jacks to lift the four bottom pins and insert stabilizing yokes in the center of span No. 4 on the Susquehanna River Bridge as part of the Pin Stabilization Project. Thirteen additional spans will undergo this procedure over the next two years.

Marketing and Product Management: A pilot program is currently underway on the *Downeaster* in which conductors are using handheld computers to scan ticket barcodes to electronically record ridership data in real time. This first-of-its-kind pilot is the initial step toward print-at-home tickets for *Downeaster* passengers, beginning next spring.

PSSA Update: The first of nine regional President's Service and Safety Awards luncheons takes place in Chicago this Wednesday, Oct. 15, followed by another recognition luncheon at Beech Grove, Ind., the next day. Across the country, 84 employees and six external partners will be honored with PSSA awards.

Corporate Communications: If you are contacted or approached by members of the press, please remember that only authorized Media Relations personnel, or their designees, are permitted to speak to the media. During regular business hours, direct media to call 202-906-3860; direct after-hours inquiries to the Media Relations answering service at 800-562-1904.

Warehouse Management Contract Signed

Amtrak today announced that it has selected ARAMARK Corp. to serve as the company's food and beverage warehouse management provider effective Jan. 1, 2009, following a six-month evaluation of bids from vendors to provide the best service and value to passengers.

With the expiration of its contract with Gate Gourmet Inc. at the end of this calendar year, Amtrak explored the marketplace in search of best-in-class systems and industry best practices.

"ARAMARK is best equipped to provide the type of service that meets our future needs, as we strive to become more cost-efficient while continuously improving the quality of our service," said Emmett Fremaux, vice president, Marketing and Product Management. "I think everyone involved with the operation — from our lead service attendants to the senior management team — will be pleased with the selection of this vendor."

With the contract finalized, a transition steering committee will plan and implement steps to ensure a smooth transfer of operations from the current service provider. The transition process is expected to have little or no impact on routine warehouse activities or passengers. The transition steering committee will also manage and provide regular communication on the process for employees such as lead service attendants, service attendants and other Amtrak employees associated with the food and beverage operation.

"We look forward to a smooth transition over the course of the remainder of the calendar year," said Kevin Scott, chief, Service Delivery. "Our objective is to work with all stakeholders to make sure that happens."

ARAMARK Corp. is a leader in professional services, providing award-winning food services, facilities management, and uniform and career apparel to health care institutions, universities and school districts, stadiums and arenas, and businesses around the world.

Amtrak issued a request for proposals in April, inviting potential vendors to submit proposals. As part of the process, a Technical Evaluation Committee was appointed with representatives from the Food and Beverage, Service Delivery and On-Board Systems groups of the Marketing and Product Management department, as well as representatives from the Transportation, Legal, Finance and Procurement departments.

In related news, the company is in the final stages of selecting a vendor to develop a new on-board point-of-sale system to capture food and beverage sales and update commissary warehouse operations. Once the vendor is selected, Amtrak and the vendor will begin development, which will culminate in a pilot program next fall and an early 2010 rollout.

Operational Changes: Beginning Saturday, Oct. 18 through Saturday, Oct. 25, several *Keystone Service* trains will operate on a slightly later schedule due to track work being performed by Amtrak Engineering.

Engineering: The final phase of the 138-kilovolt transmission cable replacement project, in the Baltimore & Potomac tunnels, which began in August, is continuing on schedule. The new dry, high-voltage power cable system minimizes Amtrak's environmental impact in the Baltimore tunnels.

Government Affairs: On Thursday, Oct. 16, President Bush signed into law H.R. 2095, a combined rail safety and Amtrak reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for capital investment for intercity passenger rail programs.

PSSA Update: President's Service and Safety Awards luncheons take place in Providence, R.I. on Tuesday, Oct. 21 and Friday, Oct. 24 in Washington, D.C. The two events will recognize a combined total of 29 PSSA winners and 67 30- and 35-year employees.

Vote, But No Politicking on the Job

With the Nov. 4 election approaching, Amtrak employees are encouraged to exercise their right to vote. However, while on the job employees are not advertisements for candidates, propositions or other political issues.

The wearing of political buttons, stickers or other signs of political support or opposition is not allowed. This prohibition also applies to equipment, company vehicles and other company-owned property. It does not apply to your personal vehicle. Thank you for complying, and be sure to exercise your right to vote.

New Initiative Simplifies Travel Voucher Issuance

Slated to go live in November, the new travel voucher request (TVR) process that uses the existing Internet-based eTrax tool will provide automated accountability and reporting capabilities. In anticipation of the launch, employees are encouraged to log onto <http://mssetxcmb/CBT/travelvoucherrequest.html> to view a tutorial on using TVR.

Currently, managers, directors and supervisors send a faxed request to the travel office within the Human Resources department for review and processing.

“What was once a laborious, manual process now takes less than five minutes,” said Mike Jones, senior systems analyst, who led the development of this initiative. “And, because we leverage the use of the existing eTrax tool, there are no added costs associated with automating the TVR process.”

After logging on to the eTrax home page, users will be directed to a list of commonly used forms, which will include the travel voucher request form.

Station training aids can be found on the Intranet at “How We Work” → “Station Support” → “Station Training” → “Job Aids” → “Booking and Ticketing” → “Non-Revenue Travel Vouchers.”

Administrative training aids can be found on the Intranet at “Library” → “Policies” → “Reservation and Ticketing Policies” → “Employee Pass Procedures” → “Vouchers” → “How to Obtain a Voucher.”

For more information, contact Jones at ATS 777-3127 or JonesMi@amtrak.com.

New Timetable Now in Effect

The new Fall 2008-Winter 2009 System Timetable goes into effect today, and includes minor schedule changes across the system. Notable modifications include the restoration of through service between Boston and Chicago that will include sleeper service beginning in November. Faster weekend service is now available between Los Angeles and San Luis Obispo, while an additional trip between Washington, D.C., and New York is offered on Thursday afternoons.

New timetables have been distributed and are available across the country and station managers are reminded to remove and destroy all copies of outdated timetables from distribution racks. The Northeast Corridor Thanksgiving edition will be distributed shortly, which will supersede the Fall-Winter version from Nov. 25 to Dec. 1.

Operational Changes: Beginning Monday, Oct. 27 through Thursday, Dec. 4, westbound Train 371 *Pere Marquette* will depart Grand Rapids, Mich., one hour earlier than scheduled, and will arrive and depart subsequent station stops one hour earlier due to CSX track work.

Engineering: Production's Switch and Rail Gang is currently installing 3,330 track feet of panelized concrete track on Track No. 4 at Metro Park Station. Once the 60-foot track panels are in place, continuous welded rail will be installed. The work is scheduled for completion in mid-November.

Government Affairs: On Oct. 29, Chief Operating Officer Bill Crosbie will testify during a House Transportation and Infrastructure Subcommittee hearing on "Investing in Infrastructure: The Road to Recovery."

PSSA Update: President's Service and Safety Awards luncheons take place in Philadelphia on Tuesday, Oct. 28 and Wednesday, Oct. 29 in New York. The two events will recognize a combined total of 23 PSSA winners and 151 30- and 35-year employees.

Benefits: Fidelity has made Amtrak aware of a fake (phishing) e-mail that may be received by Fidelity clients, including Amtrak employees, directing them to provide or update account information. Employees are advised to view with suspicion any e-mail message asking for account information; legitimate business concerns do not ask for such information via e-mail.

RE: Top Story for Amtrak This Week

CEO Calls for Participation in Operation RedBlock at All Levels

Amtrak is committed to prevent and avoid on-the-job alcohol and drug abuse in the workplace through the Operation RedBlock program (ORB). Earlier this month, the Operation RedBlock Executive Steering Committee, composed of senior labor union leaders and management met to recertify its common interest in ORB and reinvigorate the involvement of managers and employees in the program.

“I support and urge the support of all our managers and employees for the RedBlock program. It is important that we maintain our safe working environment free of drugs or alcohol. We all share in this responsibility and I commend the volunteer employees who act in concert to strive toward this common goal,” said President and CEO Alex Kummant.

Noting that tireless commitment from employees and managers at all levels is necessary, Kummant added that Operation RedBlock fosters an environment in which co-workers look out for one another. “The active participation of management in the regional, divisional and local ORB committees is critical,” he added.

Operation RedBlock is a union developed, company adopted, drug and alcohol peer prevention and intervention program. Its mission is to emphasize awareness, education and prevention of substance abuse through union-led committees. More information about Amtrak’s RedBlock program can be found on the company Intranet under the “Employees” menu or at www.redblock.com.

Mcs 1/15 9:25 am okay I'm assuming you'll have a separate caption for the photo itself? If so, please drop this in Marlon. If not, you'll need to amend this so that you've got the caption in here – remember that captions are written in present tense.

Penn Farm Show-Caption

Amtrak Customer Advisory Committee members Lucille and Franklin Shearer were among host of Amtrak volunteers who promoted Amtrak service at the 2008 Pennsylvania Farm Show recently in Harrisburg, Pa.

The largest indoor agricultural show in the world, the Pennsylvania Farm Show attracts more than 500,000 visitors over an eight-day period. The show included a farm complex housing a wide variety of animals, fruits and vegetables, as well as numerous arenas with active competitions including rodeos and tractor pulls.

At the Amtrak booth, a combination of more than 30 *Keystone Service* employees, Marketing and Product Management employees, ACAC members and local National Railway Historical Society members distributed timetables, vacation guides, Arrive magazines, plastic luggage ID tags and conductor hats for the kids.

Message from COO Crosbie on Hurricane Gustav

Dear Co-workers,

Hurricane Gustav made landfall on the Gulf Coast over the weekend and continues to impact inland communities, but well-orchestrated preparation and evacuation efforts helped safeguard the welfare of the area's residents, and I am very proud to say that Amtrak played a role in making that happen.

The safety of our employees in the area is of utmost importance. It appears that most of the more than 300 employees there left for safer ground. My thoughts are with them — most won't know the condition of their homes and communities until they can get back home — and the company wants to be as helpful as we can to them as they work through this process.

While we regroup and wait for authorization to return to the area, we want to ensure every Amtrak employee affected by this storm is safe and accounted for. Those employees should call to inform us of their whereabouts. Mechanical employees should call 800-424-0217 ext. 2082, APD employees should call 800-331-0008, and all other employees should call 877-872-2334. Employees should also maintain contact with their supervisors to check on the status of work assignments.

I want to express my appreciation for all of the hard work and professionalism from the employees who played a part in preparing for Hurricane Gustav, and coordinating and executing three special evacuation trains that took over 2,000 New Orleans area residents safely from that city to Memphis on Saturday and Sunday.

This was a tremendous team effort. General Superintendent Joe Wall and his Southern Division team, including Asst. Superintendent Richard "Butch" Williams, who was the point person for the evacuation operation, did a phenomenal job. Employees from Mechanical, Engineering and Operations, the Central Division as well as the Go Teams and Amtrak Police, were also critical to our success. From coordination with FRA and FEMA, to the operation of the trains and the work of our front line employees — and in the face of medical emergencies and fallen trees — you performed exceptionally well.

Amtrak took action as a national transportation asset to assist in the evacuation of the city, and you did us proud. While it is uncertain when we can resume regular service to New Orleans, we are currently working with FEMA to determine when we will transport people back to New Orleans later this week.

Thank you for your dedication, and please keep our employees affected by the storm in your thoughts; it is my hope that they recover from this event safely and quickly. Remember that the hurricane season isn't over yet; Gustav is still active, and we're closely watching Hurricane Hanna and Tropical Storms Ike and Josephine.

Sincerely,
William L. Crosbie
Chief Operating Officer

Message from COO Crosbie on Hurricane Gustav

William L. Crosbie
Chief Operating Officer

Operational Update: On Tuesday, Sept. 2 through Thursday, Sept. 4, and Sunday, Sept. 7 through Wednesday, Sept. 10, *Piedmont* Trains 73 and 74 will operate between Raleigh and Salisbury, N.C., due to Norfolk Southern track work. Motorcoach service will be provided between Salisbury, Kannapolis and Charlotte.

Human Resources: Implementation of the new DOT rule requiring all employees to submit to direct observation urine collection for return-to-duty from previous positive tests or follow-up testing **only** has been delayed until Nov. 1. Other federal test requiring direct observation will follow the procedures as outlined in the current DOT regulation.

Environmental Health and Safety: A five-week EHS and Engineering noise monitoring initiative is underway at various Mid-Atlantic and New England locations. This week's monitoring will occur in New York, Elmora, N.J., and Morrisville, Pa.

Reminder: Don't forget to complete the voluntary and confidential Employee Satisfaction Survey being mailed to your home this week. The results of the survey will enable the company to better address issues impacting employees and improve customer service. The deadline for survey submissions is Oct. 10.

Operational Update on Recent Tropical Storms

While attention is turning back to the Gulf Coast as Amtrak monitors the progress of Hurricane Ike, other areas of the country affected by Tropical Storm Hanna and Hurricane Gustav have begun to return to normal.

After assisting FEMA in the evacuation of New Orleans area residents prior to Hurricane Gustav, Amtrak transported approximately 2,000 evacuees from Memphis back home on two trains last Thursday and Friday. Full revenue service will resume as *City of New Orleans* Trains 59 and 58 return to service today and tomorrow.

Last week, numerous trains were either canceled or limited to partial service due to Tropical Storm Hanna's effect along the East Coast. Despite fallen trees and flooding, all regular service has been resumed.

"The planning and safe execution of train operations for these storms has been absolutely first-class," said Chief Operating Officer William L. Crosbie. "So many employees have gone out of their way to protect our passengers, our co-workers and our business. We should all be proud the excellent work, but we also need to remain focused as yet another hurricane is impending."

Centennial Celebration Set for October 4-5 in Washington, D.C.

Employees invited to attend, volunteers needed

Employees and their families are invited to the Washington Union Station Centennial Celebration that takes place on Oct. 4, from 10 a.m. to 4 p.m., and Oct. 5, from noon to 4 p.m. The event includes entertainment, railroad memorabilia exhibits and an expansive train display featuring current Amtrak equipment as well as historic locomotives and private cars representing the railroads that have served the station during its 100-year history. The celebration also marks the 20-year anniversary of the station's historic redevelopment. Stay tuned for upcoming information on perks for employees, including a private viewing of the train display and special offers on souvenir items.

Help us tell the story — if you have any special memories or photos from Union Station, share them with us. Send them to Employee Communications at ecom@amtrak.com.

Any employee who will be in the area that weekend and would like to volunteer for the event should contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com. Volunteers will be provided meals and a free t-shirt.

Operational Update: The temporary service change for the Springfield Shuttle has been extended through Friday, Sept. 26. Trains 470, 490, 493 and 495 will not operate between Hartford, Conn., and Springfield, Mass., due to Amtrak track work; motorcoach service will be provided between Springfield, Windsor Locks, Conn., and Hartford.

Engineering: The New England Division Concrete Tie Gang is continuing its efforts to eliminate slow orders resulting from defective concrete ties on the Shore Line between Branford, R.I., to East Haven, Conn.

Environmental Health and Safety: A five-week EHS and Engineering noise monitoring initiative is underway at various Mid-Atlantic and New England locations. This week's

monitoring will occur in Princeton Junction, N.J.; Elmora, N.J.; Newark, N.J. and at Penn Station in New York.

Corporate Communications: Check out Good Morning America next week! Beginning Monday, Sept.15 through Thursday, Sept. 18, ABC News' Good Morning America will be broadcasting live from a chartered Amtrak train that will tour the Northeast and terminate in Washington, D.C.

Don't Miss Good Morning America Next Week!

Amtrak, ABC Make History Next Week

Ed. Note: *Amtrak This Week* is being distributed early to remind employees of GMA's broadcast from an Amtrak train.

Make sure you catch ABC News' Good Morning America next week, as it broadcasts live from an Amtrak charter train, the centerpiece of a five-day Whistle-Stop Tour that will travel across the Northeast and Ohio. Amtrak and ABC will be making history, as this is the first time anything of its kind has been done on live television.

Kicking off the five-day tour, anchors Diane Sawyer, Robin Roberts, Chris Cuomo, Sam Champion and the ABC crew will air the first show Monday while traveling through Massachusetts aboard specially equipped Amtrak equipment and two private rail cars. Powered by two P-42 locomotives, the train will travel through Massachusetts Monday; New York on Tuesday; Ohio, Pennsylvania, Maryland on Wednesday; and West Virginia on Thursday. The Tour concludes on Thursday in Washington, D.C.

The 11-car, 874-foot-long traveling studio, operated with Amtrak Train and Engine crews with host railroad pilots and staffed by On-Board Service employees, includes two Superliner Sleeping cars, a Cross Country Café car, two Diner Lounge cars and a Transition Dorm, plus two private cars. The equipment conversion, paid for by GMA, was performed at Beech Grove and at the Albany Maintenance Facility.

"The GMA charter provides us an opportunity to show millions of Americans the benefits of train travel and our capacity to serve travelers from large and small communities across the country," stated Corporate Communications Chief Cliff Black. Spearheaded by the Charter Services group, the tour involved the collaboration of several departments including Transportation, Mechanical, Engineering and Amtrak Police Department, along with the cooperation of Norfolk Southern, CSX Transportation and Housatonic Railroad.

For more detailed information about the Whistle-Stop Tour, including a behind-the-scenes look at the months of preparation put into the project, visit www.abcnews.go.com/gma.

Service Disruptions: Because Hurricane Ike is expected to make landfall in the Corpus Christi, Texas area as a category 3 or category 4 hurricane on the morning of Saturday, Sept. 13, Amtrak is canceling all *Sunset Limited* and *Texas Eagle* trains on Friday, Sept. 12. No alternate transportation is provided.

Operational Changes: On Monday, Sept. 15, due to an equipment upgrade project, Washington-Boston *Acela Express* Train 2160 will replace Train 2108 and Washington-New York *Acela Express* Train 2110 will replace Train 2162. *Northeast Regional* Train 174 will operate on its current schedule between Washington and New York, but will depart New York at 1:30 p.m., 30 minutes later than the published schedule, and will operate approximately 30 minutes later at all stations to Boston.

Finance: Monday, Sept. 15 is the cutoff for posting invoices to the Accounts Payable System. Invoices received after Sept. 15 and not entered into the A/P system will be accrued by Accounts Payable into the General Ledger for inclusion at the end of the fiscal year.

Message from President Kummant

Dear Co-workers,

Some of you may have already received the Employee Satisfaction Survey that was mailed to each of your homes — many of you may have already received it. I strongly encourage you to take a few minutes to complete and return the survey, answering the questions as sincerely as possible. This is an opportunity for you to tell us your thoughts on what works and what can be made better. By doing so, you will help us shape the future of the company and help improve service for passengers and employees — our most important resource.

All responses will be mailed directly to a third party and will be kept strictly confidential. The anonymous, tabulated responses will be sent back to us, and I can't wait for the results. Thanks for your participation.

Sincerely,

Alex Kummant
President and Chief Executive Officer

Don't Miss Good Morning America This Week!

Amtrak, ABC Make History This Week

Make sure you catch ABC News' Good Morning America this week, as it broadcasts live from an Amtrak charter train this week, the centerpiece of a five-day Whistle-Stop Tour that will travel across the Northeast and Ohio. Amtrak and ABC will be making history, as this is the first time anything of its kind has been done on live television.

Kicking off the five-day tour, anchors Diane Sawyer, Robin Roberts, Chris Cuomo, Sam Champion and the ABC crew aired the first show today while traveling through Massachusetts aboard specially equipped Amtrak equipment and two private rail cars. Powered by two **(or is it three?)** P-42 locomotives, the train will travel through Massachusetts today; New York on Tuesday; Ohio Pennsylvania, Maryland on Wednesday; and West Virginia on Thursday. The Tour concludes on Thursday in Washington, D.C.

The 11-car, 874-foot-long traveling studio, operated with Amtrak Train and Engine crews with host railroad pilots and staffed by On-Board Service employees, includes two Superliner Sleeping cars, a Cross Country Café car, two Diner Lounge cars and a Transition Dorm. The equipment conversion, paid for by GMA, was performed at Beech Grove and at the Albany Maintenance Facility.

"The GMA charter provides us an opportunity to show millions of Americans the benefits of train travel and our capacity to serve travelers from large and small communities across the country," stated Corporate Communications Chief Cliff Black. Spearheaded by the Charter Services group, the tour involved the collaboration of several departments including Transportation, Mechanical, Engineering and Amtrak Police Department, along with the cooperation of Norfolk Southern, CSX Transportation and Housatonic Railroad.

For more detailed information about the Whistle-Stop Tour, including a behind-the-scenes look at the months of preparation put into the project, visit www.abcnews.go.com/gma.

Survey Being Mailed This Week to All Active Employees

Dear Co-workers,

Over the course of the next week, you will receive an Employee Satisfaction Survey in the mail. I cannot stress enough how important it is for you to take a few minutes to complete and return the survey by Oct. 10, answering the questions as sincerely as possible. This is an opportunity for you to tell us your thoughts on what works and what can be made better.

All responses will be mailed directly to a third party and will be kept strictly confidential, and the anonymous, tabulated responses will be sent back to us. Our workforce is our most valuable resource; by participating in the survey you will make your voice heard as we shape the future of the company.

Sincerely,

Alex Kummant
President and Chief Executive Officer

Top Story

The Employee Satisfaction surveys recently mailed to all active employees' homes is an opportunity for employees to provide input on what works and what can be made better. It's completely anonymous; please take the time to complete it and return it by Oct. 10.

What's the purpose of the survey?

While it's not the only way for Amtrak to learn from its employees, the survey is an opportunity for you to sincerely share how you feel about the company, your job, the service we provide and many other facets of your perspective on Amtrak. The survey is an important tool for Amtrak to gauge current performance as an employer and a service provider, and for making improvements in both areas.

Why should I take the time to complete it?

You have a stake in Amtrak, and in the long run, you benefit by making your opinions known. Whether you're on the front lines or in the back offices, you offer a unique perspective on improvements we can make, and we want to know what they are.

Will I hear about the results of the survey, and if so when?

The findings will be tabulated and delivered to Amtrak around the end of the calendar year, and will help the company identify areas for improvement or development. You should expect to hear about the survey results (look for information in *Amtrak Ink* and *Amtrak This Week*) after the new year.

Is the survey confidential?

Yes. The survey is completely confidential and managed by an outside firm. All employees, including those in small departments, are assured that the firm will protect all information or findings that can identify anyone personally.

In fact, we purposely ask that no one volunteer his or her name on the survey. Amtrak wants your honest opinions and recognizes that we need to protect your anonymity in order to obtain them.

I didn't get the survey in the mail. Who do I call to get it mailed to me?

If you did not receive the survey at home, please e-mail ecom@amtrak.com or call (202) 906-3770 to request that one be sent to you. Please remember to include your name and mailing address.

Thank You! An enthusiastic and heartfelt THANKS goes out to all of the employees in the Transportation, Mechanical, Engineering, as well as the Amtrak Police Department, for their invaluable efforts to make the Good Morning America Whistle-Stop Tour a great success. Their contributions helped show millions of Americans the benefits of train travel and our capacity to serve travelers from large and small communities across the country.

Operational Changes: For the duration of the equipment upgrade, the Washington-New York *Acela Express* Train 2108 is now Train 2160 and extended to Boston. Train 2162 is now Train 2110 and terminates in New York. *Northeast Regional* Train 174 will depart New York 30 minute later, arriving 30 minutes later at all stations to Boston.

Engineering: Production C&S and Mid-Atlantic division Engineering forces will complete the cutover this week of the new signal system on Track 1 of the Harrisburg Line between Rheems and Cork to allow bi-directional traffic under signal indication at timetable speed. This will greatly improve flexibility on the route for train operations and maintenance activities.

Human Resources: All SAP users' passwords have been reset. When logging on to the Amtrak network, users are now required to create a new password — which becomes both their Windows and SAP password — and subsequently submit a set of challenge questions and answers in the event of a lost or forgotten password. For instructions, log onto <https://iam.amtrak.ad.nrpc/idm/docs/IAM-Job-Aid.pdf>.

Volunteers Needed: Amtrak is hosting the Washington Union Station Centennial Celebration on Saturday and Sunday, Oct. 4 and Oct. 5, displaying memorabilia, souvenirs and current and historic train equipment representing the station's century-old history. To volunteer and receive a free souvenir t-shirt and meal voucher, contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com.

Attention: Employee Survey: Don't forget to complete and return the Employee Satisfaction survey by Friday, Oct. 10. Your confidential responses will help the company better address issues that affect employees and to improve service to customers.

ATW Top Story

Congress Passes Continuing Resolution for FY '09; House Action Taken on Amtrak Reauthorization

During a rare weekend in session, Congress on Saturday approved a Continuing Resolution that will provide Amtrak funding for FY '09 through March 6, 2009, at the FY '08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

Last week, the House also passed H. Res. 1492, a combination of a rail safety bill and Amtrak's reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan.

The Senate is expected to take up the bill this week before leaving to campaign for the upcoming elections.

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for Positive Train Control on certain rail main lines used by passenger and freight trains.

Combining the reauthorization legislation with the rail safety bill provided the impetus to finish the reauthorization bill before the end of Congress' session. Given the many items on the legislative agenda and the current financial crisis, having Congress take up Amtrak's reauthorizations as one of its last actions speaks well of the support for passenger rail on Capitol Hill.

Congress is expected to enter a recess period and it is unclear whether they will return to Washington for a post-election lame duck session.

Congress Passes Continuing Resolution for FY '09; Preliminary Senate Action Taken on Amtrak Reauthorization

With the Senate's approval during a rare weekend session, Congress on Saturday approved a continuing resolution that will provide Amtrak funding for FY '09 through March 6, 2009, at the FY '08 level (\$1.3 billion). In the absence of a formal appropriations bill, the CR serves to continue funding into the start of the new fiscal year on Oct. 1, to maintain current operations.

Last week, the House also passed H. Res. 1492, a combination of a rail safety bill and Amtrak's reauthorization bill, which enables \$12.9 billion in funding for the FY 2009-2013 period. The funding includes \$1.9 billion for state grant programs for rail programs; reforms such as improved accounting and standards for service and on-time performance; and a requirement for a collaborative NEC state-of-good-repair plan.

The Senate earlier today overcame some procedural hurdles to clear the way to take up the legislation on Wednesday.

Authorizing legislation, not to be confused with appropriations legislation, establishes the policy framework for intercity passenger rail and sets the recommended annual funding levels to meet the objectives of the authorization. Federal funding must still be obtained on an annual basis via the congressional appropriations process.

The rail safety portion of the bill mandates and makes funding available for positive train control on certain rail main lines used by passenger and freight trains.

Combining the reauthorization legislation with the rail safety bill provided the impetus to finish the reauthorization bill before the end of Congress' session. Given the many items on the legislative agenda and the current financial crisis, having Congress take up Amtrak's reauthorizations as one of its last actions speaks well of the support for passenger rail on Capitol Hill.

Congress is expected to enter a recess period after Wednesday and it is unclear whether they will return to Washington for a post-election lame duck session.

Operational Update: Through Oct. 26, *Empire Service* trains 280, 281, 284, 286 and 288 will operate on an adjusted schedule due to track work being performed by Amtrak between Albany-Rensselaer, N.Y., and Buffalo, N.Y.

Engineering: The Switch and Rail Gang will be installing the No. 87 switch on the Hudson Pocket Track Project in Newark, N.J. The new turnout will connect Hudson Yard Tracks 10 and 11 and help restore the yard's operational flexibility.

Centennial Update: The Washington Union Station centennial celebration will take place on Oct. 4, from 10 a.m. to 4 p.m., and Oct. 5, from noon until 4 p.m. Contact Saunya Connelly at ATS 777-4164 or ConnelS@amtrak.com to volunteer.

Reminder: Don't forget to complete and return your responses to the Employee Satisfaction Survey by Oct. 10. Call ATS 777-3770 or e-mail Corporate Communications at ecom@amtrak.com if you have not received the survey. All responses are strictly confidential.

Operational Update on Recent Tropical Storms

While attention is turning back to the Gulf Coast as Amtrak monitors the progress of Hurricane Ike, other areas of the country affected by Tropical Storm Hanna and Hurricane Gustav have begun to return to normal.

After assisting FEMA in the evacuation of New Orleans area residents prior to Hurricane Gustav, Amtrak transported approximately 2,000 evacuees from Memphis back home on two trains last Thursday and Friday. Full revenue service will resume as *City of New Orleans* Trains 59 and 58 return to service today and tomorrow.

Last week, numerous trains were either canceled or limited to partial service due to Tropical Storm Hanna's effect along the East Coast. Despite fallen trees and flooding, all regular service has been resumed.

"The planning and safe execution of train operations for these storms has been absolutely first-class," said Chief Operating Officer William L. Crosbie. "So many employees have gone out of their way to protect our passengers, our co-workers and our business. We should all be proud the excellent work, but we also need to remain focused as yet another hurricane is impending."

Survey e-mail/flyer
Sept 30

Amtrak wants to hear from you! If you have not completed and returned the Employee Satisfaction survey that was mailed to your home earlier this month, you're missing an opportunity to share your perspective on everything from how we deliver customer service to your own job satisfaction. It's completely anonymous.

The survey must be completed and returned by Oct. 10. If you did not receive a survey, please call 202 906-3770 (ATS 77-3770) or send an e-mail to ecom@amtrak.com as soon as possible to get one mailed to you.

Survey e-mail/flyer
Oct. 6

Time is running out! The deadline to complete and return the Employee Satisfaction survey that was mailed to your house last month is this Friday, Oct. 10.

Don't miss the opportunity to share your opinion about a range of issues that relate to your job at Amtrak. It's completely anonymous — fill out the survey and send it back by this Friday.

Important Note!

Make sure your time is entered for payroll promptly!

Under the recent contract settlements, employees will be paid retroactive wage adjustments, the first installment of which is to be paid May 9, 2008. Amtrak's Human Resources, Payroll and Information Technologies implemented the new rates on April 1, 2008 and are preparing for payment of the retroactive adjustment. This adjustment will cover the period from July 1, 2002 through March 31, 2008.

In order to ensure that the retroactive pay calculations are correct, it is vital that all time be promptly and accurately entered into the payroll system. **Time reporting for all dates through March 31, 2008, must be entered no later than April 25, 2008, in order to be included in the wage adjustment check.**

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time consuming manual adjustments. The results of those manual adjustments will be included in the second retroactive check in May 2009.

OR

Any time submitted after April 25, 2008, for dates worked prior to March 31, 2008, will be paid at the old rates and require time consuming manual adjustments. The results of those manual adjustments will be paid in the latter part of September, 2008.

2009

special employee advisory

April 2, 2009 • Page 1 of 1

Federal Income Taxes Temporarily Reduced

Beginning April 3, employees may notice that their paychecks are slightly higher than normal due to a reduction in the amount of federal income taxes withheld.

The reduction is part of the “Making Work Pay” income tax credit included in the American Recovery and Reinvestment Act, which was signed into law on Feb. 17.

The reduction provides a \$400 individual income tax credit (\$800 for joint filers) for 2009 and 2010. Rather than taxpayers claiming the credit when they file their federal tax returns, the law directs employers to reduce the amount of income taxes withheld from paychecks at a pro-rated amount throughout the tax year.

Checks issued on April 3 will have both the current pay period federal income tax reduction as well as the retroactive amount due for the time period since Feb. 17.

The credit begins phasing out at a modified adjusted gross income (AGI) above \$75,000 (\$150,000 for joint filers) and no credit is given to employees with a modified AGI of \$95,000 (\$190,000 for joint filers) or more.

Employees do not need to fill out a new Form W-4 unless they feel that the new tax tables will cause them to have taxes under-withheld by the end of the year. In particular, married couples with both spouses earning wages and individuals working multiple jobs at one time may want to file a new Form W-4 and claim either fewer withholding allowances on line 5 or request additional amounts to be withheld on line 6.

For additional help, employees may get the IRS Publication 919, “How Do I Adjust My Tax Withholding?” or visit the IRS website at www.irs.gov and use the “Withholding Calculator.”

To change their Form W-4, employees should contact their local Payroll offices.

Transportation Policy Authority To Join Executive Team

Amtrak today announced the appointment of former Senate Commerce Committee staffer Stephen J. Gardner to the position of vice president, Policy and Development, effective today.

Gardner replaces Vice President of Strategic Partnerships and Business Development Anne Witt, who left the company on April 11. Gardner will report to President and CEO Joe Boardman.

As Vice President, Policy and Development, Gardner will be the lead executive responsible for formulating the policies necessary to carry out Amtrak's mission and strategic plan. Gardner will also oversee the railroad's general development and planning activities as Amtrak pursues growth and improvement through new business opportunities and partnerships. More detailed information about the department's structure will become available as certain functions of the prior organization are integrated with other departments.

President and CEO Joe Boardman, said, "We are very fortunate to have Stephen join our executive team. His extensive transportation policy experience and practical knowledge of railroading make him the best person to help Amtrak formulate and execute the plans that will enable our railroad to grow and develop into a safer, greener, and healthier transportation company."

A recognized authority on transportation policy and legislation, Gardner was the lead surface transportation Democratic professional staff for the U.S. Senate Committee on Commerce, Science, and Transportation's Subcommittee on Surface Transportation and Merchant Marine Infrastructure, Safety, and Security. In this capacity, Gardner directed all legislative and oversight activities related to the safety, security, infrastructure, and operations of railroads, motor carriers, pipelines and hazardous materials

transportation, including overseeing all related Federal agencies.

During his five-year tenure in the Senate, he served on behalf of former Commerce Committee Chairmen Ernest F. Hollings and Daniel K. Inouye, and current Chairman John D. Rockefeller. Prior to his work with Commerce Committee, Gardner worked as legislative assistant for transportation to both Sen. Tom Carper and Rep. Bob Clement.

Prior to his policy work on Capitol Hill, Gardner held various railroad operating positions for Guilford Rail Systems and the Buckingham Branch Railroad.

Amtrak Closely Monitoring Swine Flu Outbreak

The outbreaks of swine flu are being closely monitored by Amtrak's Health Services, and Environmental Health and Safety departments and its cross-departmental Pandemic Flu Task Group.

While at this time, about 20 cases of swine flu have been reported in the United States, the domestic and international situation warrants preparedness and serious attention.

Front line employees are directed to review the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 "Serious Communicable Disease Procedures" on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, "Public Health Guidelines," Section C). The manuals are posted on the Intranet, under "Library," "Wiki," and "Service Standards."

In addition, starting today, all crew briefings are required to include a detailed review of the Serious Communicable Disease procedures and information about swine flu symptoms. Hard copies of the procedures and the attached guidance from the Centers for Disease Control will be made available.

Employees should also take precautions, such as thorough and frequent hand washing, and covering your mouth with your sleeve or a tissue when you cough. Human-to-human spread of swine flu occurs in the same way as regular seasonal flu, through the coughing or sneezing of infected people.

"As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin," said Amtrak's Corporate Medical Director Dr. Tim Pinsky.

If an employee assists a co-worker or passenger who appears to have a respiratory illness and who may have traveled from an

area with confirmed cases of swine flu (at this time, Texas, Kansas, New York, California, Ohio, and Mexico), he or she should try to keep the ill person separated from others as much as possible (three to six feet). All employees should notify CNOC at (800) 424-0217 or ATS 734-2307 if they encounter someone who is exhibiting symptoms of the swine flu. CNOC will serve as a central clearinghouse for this information for trains and Amtrak locations.

Amtrak retains the right to refuse travel or remove from a train any passenger who poses a health hazard to other passengers or employees. Employees should follow proper procedures for doing so in a professional and discreet manner. This policy is printed on the back of each ticket and posted on Amtrak.com.

"We're taking this issue seriously and are working closely with the appropriate federal and state authorities. I am confident that our employees are capable of watchfully managing this kind of situation in a calm and deliberate manner," said Chief Operating Officer William Crosbie.

At this time, no cases of swine flu have been reported on Amtrak trains or facilities.

Amtrak will continue to monitor the situation and will keep you informed as needed.

Please distribute at all safety meetings and post on all employee bulletin boards.

special employee advisory

April 28, 2009 • Page 1 of 1

Retroactive Wage Adjustment To Be Issued May 1

This week, approximately 17,000 employees will receive the remaining 60 percent payment of the retroactive wage adjustment resulting from the 2008 contract settlements between Amtrak and the following unions:

ARASA (Maintenance of Equipment)
ARASA (Maintenance of Way)
ATDA
BLET
BMWE
BRS
IAM
IBB
IBEW
JCC
NCFO
SMWIA
UTU – Train Service
UTU – Yardmasters
UTU – Stewards

In a *Special Employee Advisory* dated March 19, President and CEO Joe Boardman announced that the retroactive wage payment would be made on May 1, 2009, on the 38th anniversary of Amtrak. “The original plan was to issue back pay on a union-by-union basis like the first round of payments, meaning some of you would not receive your check until July. But we want to get the money to you sooner rather than later,” said Boardman.

Please take note of the following reminders:

When the first 40 percent payments were made in 2008, employees who performed service under more than one union contract may have received separate checks/direct deposit statements and summary statements for adjustments made under different contract settlements. The payment made on May 1 will consist of a single check/direct deposit statement, consolidating the 60 percent payment due under all summary statements and contract settlements.

For your reference, the summary statements issued in 2008 reflect the 40 percent payment, the 60 percent payment being made this week and the sum of the two. If you do not have the summary statements sent to you last year, you may obtain a replacement by contacting your local field Payroll Office.

Only hours paid for or worked are included — payments for things such as differentials, meal allowances and travel reimbursements are not included in the wage adjustments.

In accordance with the terms of the contract settlements, Amtrak did not deduct contributions toward your 401(k) plan from the retroactive wage adjustment checks. In addition, this payment is subject to the federal 25 percent supplemental payment tax withholding rate, as well as any percentage-based creditor or tax levy deductions, such as state and local taxes. Depending on the state in which you reside, a mandatory supplemental state tax rate may apply as well. Railroad Retirement taxes are deducted at the same percentage as normal up to the annual maximum.

Garnishments related to child support are exempt unless the employee is behind on or in arrears on required payments. If this is the case, then a deduction was made for child support.

Please distribute at all safety meetings and post on all employee bulletin boards.

special employee advisory

December 4, 2009 • Page 1 of 1

Wage Expense and Tax Changes Will Impact Payroll for Agreement Workers

Effective Jan. 1, Amtrak will be making changes to wage codes and begin withholding taxes from certain payments to employees in accordance with current IRS regulations.

The changes will impact how employees input wages and expenses into the payroll system. Tax withholdings required by the IRS will primarily affect some employees in the Engineering and Mechanical departments.

Per diem allowances for meals for employees in travel status (away over night) will continue to be considered a non-taxable reimbursement. However, payment of per diems and meals for employees who are not in travel status (not in lodging), including meals provided to employees in connection with working overtime must be considered taxable income according to IRS regulations. Additionally, weekly travel allowances must also be considered taxable income.

Uniform allowances will remain non-taxable as long as the employee certifies uniform maintenance expenses quarterly.

It is important to note that there are no changes to any labor contracts.

Over the coming weeks, Finance will transition to the new wage code system and provide training for timekeepers in order to implement this change for the first payroll of 2010.

Attached to this advisory is an information sheet detailing the new wage code system and the associated tax implications. Employees may want to consult with a tax advisor for assistance on ways they may be able to deduct these payments on their personal tax filings.

For questions and concerns, contact Amtrak Payroll at 877-268-7251.

Please post on bulletin boards and distribute at safety briefings.

December 14, 2009 • Page 1 of 1

Congress Passes Amtrak Appropriations for FY 2010

Amtrak's FY 2010 Appropriations bill has been approved by Congress and is expected to be signed by the president as early as today. The Departments of Transportation and Housing and Urban Development, and Related Agencies Appropriations Act of 2010 contains \$1.565 billion in federal support for Amtrak, comprising \$563 million for operating, \$594 million for capital, \$264 million for debt service, and \$144 million to be used for ADA compliance.

While it is the highest appropriation in Amtrak history, it falls short of the \$1.8 billion that was authorized by Congress in the Passenger Rail Investment and Improvement Act and what was subsequently requested by Amtrak in February 2009.

The bill also contains a provision that requires Amtrak to implement the procedures necessary to provide storage and carriage of firearms in checked baggage cars and at Amtrak stations that accept checked baggage, within one year of the bill's enactment. Amtrak's current policy prohibits all firearms, ammunition and other weapons aboard its trains. This includes any being carried on the person, in carry-on baggage or in checked baggage, and applies regardless of whether a passenger has a permit to carry a firearm or weapon.

The current policy remains in effect until it is announced that Amtrak will begin accepting firearms in checked baggage, as required by December 2010. Given the media coverage on this issue and the potential for confusion, guidance to front line employees is being issued this week. Further information will be provided as developments occur.

New CFO Appointed

D.J. Stadtler has been appointed to serve as the chief financial officer. Stadtler joined Amtrak as chief of staff to President and CEO Joe Boardman last month. Stadtler has 20 years of experience in federal financial management and most recently served as deputy CFO at the Federal Railroad Administration.

The appointment follows the departure of William H. Campbell from Amtrak yesterday. Campbell had served as CFO since he joined the company on May 21, 2007.

Final Version of Stimulus Bill Scheduled for Vote

The economic stimulus legislation is currently slated for votes by the House and Senate by week's end and is expected to be signed by President Obama early next week.

The legislation is expected to contain capital funds aimed at creating jobs that will help enhance and improve passenger rail service provided by Amtrak and in partnership with states. The money may only be used to fund or accelerate capital projects.

The company is extremely pleased that Congress has provided significant capital in the bill that would help Amtrak attain a state of good repair and provide more efficient and reliable customer service while providing jobs to workers.

Once the legislation is passed, Amtrak will reconcile its priority list with the bill's final provisions. Information about those details will be shared once it's available.

Update: Important Information for Inauguration Day

Amtrak is preparing for an exceptional day on Jan. 20, when an unprecedented number of people will travel by train to and from Washington Union Station for Inauguration Day. The multi-faceted operation, coupled with the extraordinary security measures in place that day, will be one for Amtrak's history books, as well as the nation's.

"Being part of this historic event and playing such an important role in bringing people to Washington is a once-in-a-lifetime opportunity," said Chief Operating Officer William Crosbie. Part of the overall inaugural experience for many people will involve Amtrak, and it will be a lasting memory.

Be Part of History

While Jan. 20, 2009, is considered a full working day, volunteers are needed at New York Penn, Philadelphia, Wilmington, Baltimore and Washington that day. Volunteers will be given a special commemorative button, and be provided lunch at the end or start of their respective shifts. Employees who want to volunteer should first check with their supervisor; managers are encouraged to allow their direct reports to volunteer when possible.

A large number of employees will be needed in Washington. Those who sign up to volunteer at Union Station may attend — **but are not required to** — an optional walk-through on Jan. 19.

To volunteer in New York, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Getting To and From Work

Employees in the D.C. area should plan their commutes to and from work in advance. Build extra time in anticipation of delays due to road and bridge closures, and crowding. Check www.inauguration.dc.gov and your local

news for information about your commuting options, as they are subject to change. The Union Station garage is expected to remain open, but accessible only via H St. In addition, parking is available at the Ivy City coach yard, where a special shuttle train will be available to take employees to and from the station.

MARC and VRE commuter trains will be all-reserved service on Jan. 20; however, MARC is permitting Amtrak employees reporting for work that day to ride free using their flash pass.

VRE has informed Amtrak that all employees who plan to use VRE on Inauguration Day to come to work will need to submit information to be issued a ticket. There will be no flash passing on VRE.

To obtain a VRE ticket for Jan. 20, employees must supply the following information to Human Resources Service Manager Elisha Lewis via e-mail (LewisE@Amtrak.com) by Jan. 9:

- Employee Name
- Departure and Destination Stations
- Train Number and Time of Departures

This information will be forwarded to VRE and tickets will be issued. Once the information has been submitted to VRE, instructions will be provided on where employees can pick up their tickets. Flash passes will not be accepted on VRE.

Because contractors do not have rail travel privileges and will not be allowed to submit a VRE ticket request or use their badge for MARC travel, contractors will be required to make their own arrangements on Jan. 20.

Both services will operate on adjusted schedules and not all stations will be served. Amtrak employees are expected to stand on full trains. Normal flash pass privileges will apply to Amtrak trains.

Displaying proper Amtrak identification while on the property is always required, and it must be visible and worn above the waist.

Inauguration Day Information

The company is prepared for a historic day on Jan. 20 and will execute a well-orchestrated security, operational and customer service plan to manage the crowds headed to and from Washington Union Station.

Getting To and From Work in D.C.

Employees should plan their commutes to and from work in advance. Build extra time in anticipation of delays due to road and bridge closures, and crowding. Monitor www.inauguration.dc.gov and your local news for information about your commuting options, **as they are subject to change.**

“We know that getting to work for most of us in the D.C. area is going to require extra effort and planning,” said President and CEO Joe Boardman. “If you haven’t yet planned your commuting options, you should do so and please let your supervisor know immediately if you have concerns about getting into work on the 20th.”

The Union Station Metro stop will be open and will run service from 4 a.m. to 2 a.m. The Union Station garage is expected to remain open, but accessible only via H St. Employees should be prepared to show their Amtrak ID to park.

Employees at 10 G Street must show their Amtrak ID and their Sensormatic card to enter the building. Amtrak monthly parkers at 10 G will have access to the garage via their Sensormatic card. The garage will be closed to all other vehicles.

In addition, parking is available at the Ivy City coach yard, where a special shuttle train will be available to take employees to and from the station. Between Jan. 19 at 10 p.m. and Jan. 21 10 a.m., the shuttle will leave the Ivy City Commissary parking lot at 40 minutes past the hour, and from Track 30 to the parking lot 10 minutes past the hour (please see attached schedule for details).

MARC and VRE commuter trains will be all-reserved, will operate on adjusted schedules and will not serve all stations. Where possible, employees are encouraged to ride Amtrak trains, and normal flash pass privileges will

apply. MARC is permitting Amtrak employees reporting for work that day to ride free using their flash pass.

Flash passes will not be accepted on VRE. Employees who requested VRE tickets and received an e-mail confirmation from Elisha Lewis should pick up tickets today through Friday, Jan. 16, **at window 15 in Washington Union Station** between 12 noon and 4 p.m. Employees will need to show ID and sign for the tickets. Please ask for Ms. Faye Hinton.

In all cases, Amtrak employees are expected to stand on full trains. Because contractors do not have rail travel privileges (and were not be allowed to submit a VRE ticket request or use their badge for MARC travel), they must make their own travel arrangements.

Volunteering at Stations

Thank you to all of the employees that have answered the call to volunteer at New York Penn, Philadelphia, Wilmington, Baltimore and Washington on Jan. 20.

Because of the special circumstances at Union Station on Inauguration Day, volunteers in Washington are encouraged to attend a walk-through at the Starlight Room on Jan. 19. You’ll be contacted directly about your shift assignment and what time the walk-through will take place. If you can’t make it, you will be briefed before your shift. After reporting to the Starlight Room on Jan. 20, volunteers will be paired with a law enforcement officer who will serve as their zone captain and be assigned a post for the duration of their shift.

Employees who have committed to working should return the volunteer form to Ken Wiedel no later than tomorrow. If you did not sign up to volunteer in Washington and would still like to do so, please call or e-mail Ken at [ATS 777-3078](mailto:ATS777-3078) or WiedelK@amtrak.com.

As of 2 p.m. on Jan. 20, most of Union Station, including the food court and retail shops, will be closed to the public and Amtrak employees (this does not include the offices).

As always, displaying proper Amtrak identification while on the property is required, and it must be visible and worn above the waist.

Board of Directors News

The following press release is being issued today:

Amtrak Board Names Thomas Carper of Illinois as Chairman

Former Chairman Donna McLean Becomes Vice Chairman

At its regularly scheduled meeting yesterday, Amtrak's Board of Directors unanimously agreed to name Thomas Carper of Illinois as Chairman of the Board. Carper, who has served in various Illinois state and local government positions, including Mayor of the City of Macomb, has been a director on the Amtrak board since March 2008. At the same meeting former Chairman Donna McLean was named Vice Chairman, replacing Hunter Biden, who remains as a board member.

Carper said, "Everything we have done as a board, we've done as a unified body, and this change in our hierarchy is no exception. That this was a unanimous and non-contentious decision is testimony to that fact. I look forward to tackling the exciting challenges and opportunities that lie ahead. Amtrak is ready to play a growing role in strengthening our transportation system and our economy."

The five-member board consists of four voting members, two Democrats, Carper and Biden, and two Republicans, McLean and Nancy Naples. Amtrak President and CEO Joseph Boardman is a non-voting member of the board.

Former Chairman McLean, who was named Vice Chairman, said, "With the change in administration, it's best for the company to have Tom as Chairman. I am pleased to be able to work with Tom and the rest of the board as we face the exciting and challenging years ahead."

As part of the Passenger Rail Investment and Improvement Act of 2008, the Board of Directors of the National Railroad Passenger Corporation (Amtrak) is expected in 2009 to expand to nine members from its current allotment of seven positions, five of which are currently occupied. The President nominates and the U.S. Senate confirms Amtrak Board members.

Amtrak Ethical Conduct and Non-Retaliation Notice

As part of Amtrak's commitment to ethics and compliance, all directors, officers and employees of Amtrak have a duty to promptly report any actual or suspected misconduct.

Failure to fulfill this duty is a violation of Amtrak's Code of Ethics and may result in disciplinary measures up to and including dismissal in appropriate cases.

Failure to report actual or suspected misconduct also may expose the company and its directors, officers and employees to potential criminal and civil penalties, and damages to the company's reputation.

If you have questions about the Code of Ethics or concerns about someone's workplace conduct, first contact your manager. If you do not feel comfortable doing this, you may contact other Amtrak resources available to you:

- The Amtrak Ethics Information Hotline, or
- Amtrak's General Counsel and Corporate Secretary, or
- Amtrak's Office of Inspector General

Amtrak also has a non-retaliation policy that prohibits retaliation against an employee for raising a concern or reporting actual or suspected misconduct in good faith. Anyone may contact the Amtrak Ethics Information Hotline (1-866-908-7231) if they have compliance questions or concerns, and callers

have the right to remain anonymous, if they wish.

Investigations will be conducted in as confidential a manner as possible, depending upon the circumstances presented. Additionally, all employees should be free from fear of retaliation or reprisal, and are authorized to report actual or suspected misconduct to members of Congress, and freely answer questions from Congress without notifying management, if they so desire, regarding the misconduct.

A Message from President and CEO Joe Boardman

Dear Southern California Amtrak
Employees:

I thought it might be helpful for you to
get a note from me about what we
have been doing to grow our business
in Southern California.

For those of you that haven't heard
yet, we have been working hard to
demonstrate Amtrak's interest in
operating the Metrolink service to the
SCRRA Board of Directors. We
believe they have listened to our
message and that we've helped them
think through many of the issues and
challenges that exist if they assume
operation of their trains in-house.

First and foremost, we have put forth
our belief that Amtrak has the people,
the skills, and the experience to be the
best operator of the Metrolink
services. This strength and experience
comes from the men and women of
this company, and it not only includes
each of you in Southern California, but
all of those that work for Amtrak
across the United States. We can bring
expertise from any one of thousands of
people to help address challenges if
needed, and we do so on a frequent
basis.

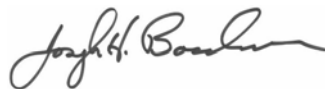

When I visited you this past spring, I
tried to get out and see as much of our
operations that I could, and when I
came in contact with you, I both
thanked you for your work and said
that I would work to pay attention to
West Coast issues. I said you were
important to me and to our future. I
spent a week parked right in the
middle of the L.A. Union Station,
staying overnight on the Beech Grove

business car so that I would see what
we were doing close up and meet more
of you in the process. Amtrak is ready
to grow, and to provide even greater
mobility and connectivity to our
nation. We'd like to see the men and
women who operate trains for
Metrolink today join our Amtrak
family and we are working hard to do
that in a professional way.

Wherever you work for us in Southern
California please know that our future
is bright and that we are here to be the
safest passenger railroad in the world.
I know, and I believe that we all know,
that to be a safer, greener, and
healthier Amtrak, we need to work
together as a company and with our
partners. No matter how the SCRRA
decides to go forward on Metrolink
operations, we will work with the men
and women that are employed there to
make things better.

Thank you, for everything you do and
I will see you this fall for the PSSA
program.

Sincerely,

Joe Boardman

Incoming Chief Mechanical Officer Selected

Deputy Chief Mechanical Officer Mario Bergeron has been chosen for the position of chief mechanical officer, replacing Vince Nesci, who will officially retire on Oct. 2 after 33 years at Amtrak.

Starting his new position on Aug. 1, Bergeron will work hand-in-hand with Nesci through the transition.

“Mario’s collaborative leadership style and thorough knowledge of the business will help position Amtrak as the provider of choice for passenger rail fleet and mechanical services in this era of growing demand for passenger rail,” said Chief Operating Officer William Crosbie.

Bergeron has more than 20 years of experience in the railroad industry. Before joining Amtrak as deputy chief mechanical officer in 2005, he served in a number of headquarter and field-based Mechanical Services positions at CP Rail, including director of Locomotive Maintenance and Planning and director of Car Maintenance and Planning.

Safe-2-Safer Kicks Off in August

Implementation To Take Place in Phases Over the Coming Months

Beginning with an employee survey in August, Amtrak will begin implementing over the course of the next few months a company-wide initiative to reduce safety and security risks.

Safe-2-Safer aims to reduce injuries by creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

“Safe-2-Safer isn’t meant to replace good safety and security practices in place now. It will make them more effective by changing the way managers and employees work together to make sure we all go home safely every day,” said Vice President of Transportation Richard Phelps, who has been tapped to lead its implementation.

Starting Monday and over the course of the next three weeks, all employees will be asked to complete a voluntary survey that will help drive the areas of focus for Safe-2-Safer. The surveys will be completed anonymously, and no answers can be traced back to any individual.

Safe-2-Safer will be implemented in phases, kicking off first in the Mid-Atlantic region, and rolled out in other parts of the country over the next six months.

While Amtrak has made great strides in reducing injuries — a 60 percent reduction since 2004 — the

goal is to reduce injuries even further, as the name suggests.

“Our senior management team and I are fully committed to making Amtrak safer and healthier. We’re seeking support and participation from our unions, our managers and you to get there,” said President and CEO Joe Boardman.

Safe-2-Safer centers on creating a work environment where employees replace at-risk actions with safe ones while removing any barriers that may hinder an employee’s ability to work safely. This is accomplished through training, ongoing coaching and greater accountability for supervisors; and broader employee engagement through peer-to-peer feedback.

Employees in the operating departments will be most directly involved with Safe-2-Safer, but everyone benefits from a safer and more collaborative working environment. Research shows that companies that sustain excellent safety records also perform better overall.

“This is a process and things aren’t going to change overnight,” said Phelps. “But if we all stay open minded and get behind this program, I have no doubt that we can make lasting improvements. At the end of the day, this is about keeping everyone safe, not statistics.”

For additional information, please read the Q and A that accompanies this advisory (also available on the Intranet under “Safety.”)

Please print and distribute this advisory and the attached Q and A to all employees who do not have Amtrak e-mail accounts.

H1N1 Flu Outbreak Elevated to Phase 6 Pandemic

The World Health Organization today raised the H1N1 flu pandemic alert level to Phase 6 in response to the ongoing spread of the virus. According to the Centers for Disease Control, the Phase 6 designation — which indicates that a global pandemic is underway — was issued only because the virus is spreading geographically, not because the illness caused by the H1N1 virus has become more severe.

Over the past several weeks, the virus has spread to more than 70 countries. In the U.S., most infected persons have recovered without medical treatment; however, CDC anticipates more cases, more hospitalizations and more deaths in the coming weeks.

“Even though the outbreak is garnering less visibility in the media, it is still a very serious issue and we must all continue to exercise vigilance and caution,” said Chief Operating Officer William Crosbie. “Our Pandemic Flu Emergency Plan is still in effect and the Task Group continues to meet on a regular basis.”

Crosbie emphasized that Amtrak operations continue as normal, but employees should continue to follow the protocol set up for handling customers, passengers and co-workers who show symptoms of the virus. As a reminder, all potential cases should be reported to CNOC at (800) 424-0217 or ATS 734-2307. CNOC is serving as the central clearinghouse for all suspected cases of H1N1 flu on board trains or in Amtrak facilities.

H1N1 symptoms include a sudden onset of fever greater than 100°F AND coughing, sore throat and/or stuffy or runny nose.

Front line employees should still implement the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 “Serious Communicable Disease Procedures” on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, “Public Health Guidelines,” Section C). The manuals are posted on the Intranet, under “Library”→ “Wiki”→ “Service Standards.”

Each employee is urged to thoroughly wash his or her hands on a regular basis and to always cover his or her mouth with a sleeve or tissue when coughing or sneezing.

Please distribute at all safety meetings and post on all employee bulletin boards.

Amtrak Inspector General to Retire

Fred E. Weiderhold, Jr. served Amtrak for 35 years

Amtrak Inspector General Fred E. Weiderhold, Jr. today informed the Chairman of the Amtrak Board of Directors that he is retiring after 35 years of loyal service to the railroad.

“As Amtrak’s first and only Inspector General, Fred has made important contributions in helping the Board of Directors understand key issues facing the railroad and made useful recommendations to improve how we do business,” Amtrak Chairman Thomas Carper stated. “We thank him for his dedicated service to Amtrak and wish him well in his retirement.”

Carper added that under the federal Inspector General Act, the Amtrak Inspector General is appointed by the Chairman of the Board of Directors. Carper said he takes this responsibility seriously and will soon undertake a search for a replacement that can continue to maintain the integrity, independence and objectivity required of the position.

In addition, Carper said that he has confidence in the Inspector General staff and expects them to carry on their important work during this interim period, including providing effective oversight of how Amtrak is handling the stimulus funds it received from the American Recovery and Reinvestment Act.

Mr. Weiderhold has been the only person to serve as the Amtrak Inspector General since former Amtrak Chairman W. Graham Claytor, Jr. asked him to

establish the Amtrak Office of Inspector General (OIG) in 1989. Previously, he was Amtrak's first Special Assistant to the chairman for Employee Relations, conducting special investigations and acting as the company's first employee ombudsman. He has been one of the longer serving Inspectors General within the OIG community.

Chairman Carper has appointed as interim Inspector General the Honorable Lorraine A. Green, vice president of Human Resources and Diversity Initiatives who will temporarily leave her position to establish an appropriate distance from day-to-day management decisions. She previously was a Senate confirmed deputy director of the federal Office of Personnel Management and served on the President’s Council on Integrity and Efficiency with all the Inspectors General who are appointed by the President.

Paula Porter, assistant vice president of Human Resources, will serve as the acting head of the Human Resources and Diversity Initiatives department.

A Message from Joe Boardman Major safety initiative to begin soon

Dear Co-workers,

When I came here last November, one of the first things I said I wanted was a more collaborative working relationship within this company. We cannot create a safer, greener or healthier company without working together to do it. Our world today is often about being self-sufficient and self-focused, but that is not the reality of how we live and work — it takes all of us to run this railroad.

We all know that being safer is a worthwhile goal, and railroading has a long history of developing work rules that, when followed, provide for a safer and more secure workplace. Amtrak has a good safety record, but it could be better. The rules of compliance will remain as required by the Federal Railroad Administration and others, but to really make the kind of improvements we need to make, we must make changes to how we do our jobs.

From the time I walked in the door, I believed that I would find wonderful people at Amtrak that I not only would come to trust and depend upon, but that are also ready to become involved in the importance of what we do for our nation and in improving our workplace.

I've now traveled around our system (don't worry, if I have not been where you are yet, I'm not done traveling) and based on my conversations with employees, I believe that we are capable of improving safety in a different way. After several months of planning and preparation, Chief Operating Officer Bill Crosbie and I have asked Vice President of Transportation Richard Phelps to lead a transition to a completely new approach to safety and security.

We'll be embarking on a multiyear risk-reduction approach to safety and security that will involve every level of management — starting with me and the executive team — to supervisors and front line employees, and then back up through management to me. The centerpiece of this involves training, coaching and accountability for managers and supervisors; and broader engagement on your part. The tragic Metrorail accident here in Washington, D.C., earlier this week underscores the importance of safety and reaffirms my commitment to this effort.

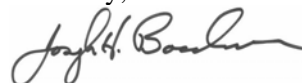

We're not going to eliminate safety and security practices that work. We're not going to ease our focus on compliance. But it's about engaging all of us in a new way.

While there will be a particular focus on the operating departments, all departments are going to benefit. It's no coincidence that companies that sustain safety excellence are also high performing organizations.

It won't be perfect, and that's true because we are human and those two things (perfect and human) just don't belong together. But it will be backed by a commitment from me, Bill Crosbie, Richard Phelps and senior management to improve our safety and our interaction through collaboration on this railroad. It's about a fundamental and enduring shift in the way we work together, and that won't happen overnight.

You'll be hearing more about this in the coming months. It will take all of us to make Amtrak safer, greener and healthier. I look for your support; you have mine.

Sincerely,

Joe Boardman
President and CEO

A Message from President and CEO Joe Boardman

Dear Co-workers,

Late yesterday, Congress approved \$1.49 billion in federal support for Amtrak for the current fiscal year. Up until this point, we'd been operating under a Continuing Resolution (essentially last year's funding level) in the absence of an appropriation for the current fiscal year.

The \$1.49 billion includes \$940 million in capital funds, of which \$285 million is for debt service; and \$550 million in operating funds, of which \$75 million is dedicated to the remainder of the retroactive pay. There's another \$90 million for Federal Railroad Administration capital grants to states.

Since I joined Amtrak in November, I have conveyed to labor leaders and employees that it is among my highest priorities to seek the funds we need from Congress for the second installment of backpay. The remaining backpay totals \$145 million. While we asked Congress for \$114 million, we're being provided \$75 million.

I want you to know that we're going to meet our commitment to deliver the backpay this year. I have the full support of the board of directors on this. We will identify the source of the operating funds that we'll use to begin payment in May. Keep in mind that we cannot use capital funds (typically used for investments in the company), including any of the funds from the stimulus legislation, for backpay.

I believe that there are many ways Amtrak invests in its resources — one of the most important of which is our employees.

We have a dedicated workforce and I value the work you do — delivering on the backpay is one way we can show our commitment to you. Thank you for your support.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

A Message from the CEO

Dear Co-workers,

The board of directors just concluded its March meeting here in Washington where one of the matters discussed was back pay. I'm pleased to announce that the board unanimously supported our decision to pay the remaining 60 percent of retroactive wage payments — a total of \$145 million — on Friday, May 1, the company's 38th anniversary.

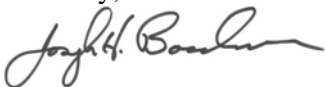

All eligible employees who received the first retro payment will receive the remaining 60 percent in a separate check, even if they have retired, or retire, before May 1.

The original plan was to issue back pay on a union-by-union basis like the first round of payments, meaning some of you would not receive your check until July. But we want to get the money to you sooner rather than later.

With that in mind, the executive team and I worked very hard to find a way to make all the payments on May 1 and the board fully supported our effort.

It is critical that we all work together as we begin to invest an unprecedented \$2 billion in stimulus and FY '09 funding for capital programs, and I look forward to seeing us live up to our collective potential.

Sincerely,

Joe Boardman

President and Chief Executive Officer

Final Stimulus Project List Released

After Vice President Joe Biden announced key capital programs that will be funded by \$1.3 billion in stimulus grants for Amtrak at Washington Union Station on March 13, the full list of projects has been unveiled.

Well over 500 projects will begin across the country over the coming weeks as part of the American Recovery and Reinvestment Act, including approximately 100 for security and life safety improvements and over 400 projects for operating infrastructure, rolling stock and business systems.

“We’re beginning an exceptional chapter in our company’s history,” said Joe Boardman, president and CEO. “The surge in funding for capital improvements is unprecedented and the benefits will be enduring. It is encouraging to see the direction our country is taking to improve our national mobility, reduce our dependence on imported energy and make a stronger, healthier passenger rail system.”

The projects meet all the objectives of the ARRA and the goals of connecting America in safer, greener, healthier ways. Specifically, they aim to improve operating efficiency, increase access for passengers with disabilities, improve safety and security, and reduce energy needs. Approximately 6,000 jobs will be created in the process; some positions will be internal but most will be created by vendors and contractors to support Amtrak project work.

Highlights include replacement of the Niantic River Bridge in Conn., construction of maintenance facilities in

Los Angeles and Seattle, restoration of Amfleet equipment and locomotives, as well as improvements to more than 200 stations across the country.

Security and life safety investments totaling \$450 million will enhance fire detection and mitigation systems and fund security improvements at facilities such as stations, maintenance buildings, bridges and tunnels. These funds also include expansion of Positive Train Control systems on the Northeast Corridor and the Michigan Line.

Complete ARRA project-by-project information broken down by state and by project category, along with a narrative summary, can be found on the Intranet under “How We Work” → “Finance” → “Economic Stimulus Guidelines” or on Amtrak.com under “Inside Amtrak” → “Other Reports.”

Please distribute at all safety meetings and post on all employee bulletin boards.

A Message from Joe Boardman: Employee Appreciation Day

Dear Co-workers,

The recent weeks and months have been full of events that will help advance our company in ways that haven't been possible in a long time. Vice President Joe Biden was at Washington Union Station a couple of weeks ago, announcing the availability of \$1.3 billion in stimulus funds for Amtrak to help spur the economy while making long-lasting investments in Amtrak. This is an opportunity to go beyond the quick fixes we're all too familiar with, and to make enduring, real improvements. We've posted the list and a number of related documents on Amtrak.com and the Intranet to keep you informed.

The recent Passenger Rail Investment and Improvement Act also allows us to plan beyond just the coming year and provides clear direction from Capitol Hill on the future of Amtrak. All this, along with a supportive administration and Congress, presents a great deal of potential for driving us toward a safer, greener, healthier Amtrak.

But I recognize that the difference between potential and realizing that potential is leadership, vision and a committed workforce. It's driven by you individually and us together as a unit.

That's why I am dedicating our 38th anniversary on May 1 to you. May 1 will be a company-wide Employee Appreciation Day, with events at stations and facilities across the country. We will also be remembering our 73 colleagues who have lost their lives in the line of duty.

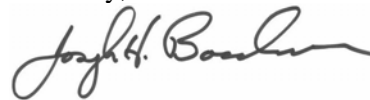

I'm getting to know many of you as I travel and I've read the feedback from the employee surveys we've conducted. Our people work hard, are dedicated and

want to see Amtrak do well, but as an organization we have some challenges to overcome. Improving and consolidating our incompatible business systems is just one example of how we're addressing some of your concerns about efficiency and teamwork between departments.

Better communicating what resources are available to you as an employee is another way we can express our commitment to you. We want the Employee Appreciation Day events to be meaningful and beneficial to you so we'll provide information, tools and resources to become safer, greener, healthier employees, both personally and professionally. Events will include health and wellness screenings, employee discounts on products and services, information on safety and environmental initiatives and more. Executives and other company representatives will also be on hand to answer questions and listen to your concerns.

Employee Appreciation Day is just one gesture to show that I am committed to building an even better, more unified company. Look for more information about Employee Appreciation Day in the coming weeks, and thank you for your dedication and support.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Pandemic Flu Plan Activated

Due to the elevation of the pandemic alert by the federal government and the increase in outbreaks of H1N1 (swine flu) in the United States, Amtrak has activated its Pandemic Flu Contingency Plan.

Amtrak is taking steps to safeguard the welfare of its employees and passengers and following recommendations from the Centers for Disease Control.

Accordingly, it is vitally important that each employee understand and follow the protocol set up for handling customers, passengers and co-workers that show symptoms of the H1N1 virus.

Front line employees are directed to implement the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 "Serious Communicable Disease Procedures" on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, "Public Health Guidelines," Section C). The manuals are posted on the Intranet, under "Library"→ "Wiki"→ "Service Standards."

All crew briefings are required to include a detailed review of the Serious Communicable Disease procedures and information about H1N1 symptoms. Hard copies of the procedures and the attached guidance from the Centers for Disease Control are being made available.

In addition, guidance that augments the Serious Communicable Disease Procedures is being provided to front line employees on handling a person showing symptoms of H1N1.

Employees should notify CNOC at (800) 424-0217 or ATS 734-2307 if they encounter a customer, passenger or employee exhibiting symptoms of H1N1. CNOC is currently serving as the central clearinghouse for this information for trains and all Amtrak locations.

Amtrak retains the right to refuse travel or remove from a train any passenger who

poses a health hazard to other passengers or employees; this policy is printed on the back of each ticket and posted on Amtrak.com. Those passengers will be given full refunds.

If an employee is sick with symptoms of H1N1, he or she should not come to work and should seek medical attention. **See the attached Pandemic Influenza Leave Policy.**

All employees should be familiar with the symptoms of possible H1N1:

- Fever (greater than 100°F)

Plus one or more of the following:

- Sore throat
- Cough
- Stuffy nose/Runny nose

If you encounter an individual with H1N1 symptoms, you should try to keep the ill person separated from others as much as possible (three to six feet).

Each employee should also take precautions, such as thorough and frequent hand washing, and covering your mouth with your sleeve or a tissue when you cough. Human-to-human spread of the virus occurs in the same way as regular seasonal flu, through the coughing or sneezing of infected people.

Based on the information available, current cleaning and disinfecting practices for facilities and equipment is effective against the H1N1 virus. Amtrak is reviewing passenger car cleaning procedures to see if adjustments in methodology or disinfectants need to be made.

Amtrak will continue to monitor the situation and will keep you informed as needed. Please visit www.cdc.gov/h1n1flu/ for more information. Amtrak's plan is posted on the Intranet under "Safety"→ "Health"→ "Pandemic Flu Contingency Plan."

As always, please make sure your contact information is current by contacting your local HR office.

Please distribute at all safety meetings and post on all employee bulletin boards.

special employee advisory

May 8, 2009 • Page 1 of 1

Update on H1N1 Flu Outbreak

On May 1, Amtrak activated its Pandemic Flu Contingency Plan in response to outbreak of H1N1 flu in the United States. The company's Pandemic Flu Task Group has been continuously monitoring the situation and following recommendations of the Centers for Disease Control (CDC) as appropriate to safeguard the well-being of its employees and passengers.

Amtrak operations are continuing as normal, but employees should continue to be mindful of the threat of the H1N1 virus. Background information for the public has been posted on Amtrak.com and can be viewed by clicking the "2009 Flu Outbreak" icon on the bottom right of the home page.

Employees are reminded to follow the protocol set up for handling customers, passengers and co-workers that show symptoms of the H1N1 virus. It is critical that employees notify CNOC at (800) 424-0217 or ATS 734-2307 if they encounter a customer, passenger or employee exhibiting symptoms of H1N1. CNOC is serving as the central clearinghouse for all suspected cases of H1N1 flu on board trains or in Amtrak facilities.

H1N1 symptoms include a recent onset of fever greater than 100°F AND coughing, sore throat and/or stuffy or runny nose.

Front line employees are directed to implement the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 "Serious Communicable Disease Procedures" on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, "Public Health Guidelines," Section C). The manuals are posted on the Intranet, under

"Library"→ "Wiki"→ "Service Standards."

If an employee is sick with symptoms of H1N1, he or she should not come to work and should seek medical attention in accordance with the Pandemic Influenza Leave Policy (see attached).

Each employee is urged to thoroughly wash his or her hands on a regular basis and to always cover his or her mouth with a sleeve or tissue when coughing or sneezing.

At this time, the CDC advises that use of facemasks or respirators is not necessary for the general public. Accordingly, employees may not wear masks while on duty unless they are called for or allowed as part of the job function. Amtrak safety procedures require that all respirators or facemasks used by employees must be provided by the company to maintain compliance with the OSHA Respirator Standard.

Based on the information available, current cleaning and disinfecting practices for facilities and equipment is effective against the H1N1 virus. Amtrak's approved disinfecting chemicals for equipment kill all harmful viral and bacterial microorganisms (including H1N1). A mechanical bulletin is being distributed with additional reminders on cleaning procedures.

Please visit www.cdc.gov/h1n1flu/ for more information. Amtrak's plan is posted on the Intranet under "Safety"→ "Health"→ "Pandemic Flu Contingency Plan."

Please distribute at all safety meetings and post on all employee bulletin boards.

A Message from Joe Boardman

Dear Co-workers,

With Memorial Day upon us, I'm writing to extend a sincere "thank you" to all the men and women within the Amtrak family who have defended our great nation through military service.

At our board of directors meeting this week, Chairman Tom Carper and I had a chance to reflect upon our own military service in Vietnam and share stories of the bravery and honor we were fortunate enough to witness in so many of our fellow soldiers. On behalf of Mr. Carper and myself, I want to express how appreciative and grateful we are for the sacrifice of everyone who has served our nation.

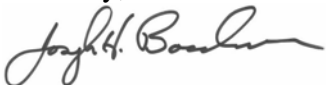

I know many of you have family members and friends fighting overseas right now. Our thoughts are with them and we pray for their safe return.

I encourage all of you to relax and enjoy this holiday weekend. Spend time with your families and have fun. But at some point, please take a moment and reflect on the service and sacrifice of those who have put themselves in harm's way to give us our freedom.

Corporately, we will pay tribute to all our servicemen and women by sounding train horns at 3 p.m. local time on Memorial Day, which will be followed by a moment of silence.

Thanks and have a great holiday.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Chief O'Connor Appointed Interim Head of OSSSO

Plans for Integrated Police and Security Department Underway

Effective today, Amtrak Police Department Chief John O'Connor will oversee the Office of Security Strategy and Special Operations (OSSSO) in an interim capacity. Bill Rooney, who served as vice president of Security Strategy and Special Operations, is leaving his position with Amtrak today.

"Bill Rooney has helped give shape to a security strategy that has led to significant advancements, including the launch of Counterterrorism Units and forging ties with domestic and international counterterrorism officials," said Chief Operating Officer William Crosbie. "We thank him for his service and wish him well in his future endeavors."

Crosbie added that Amtrak will continue to build on those advancements to safeguard the safety and security of its employees, passengers and assets.

O'Connor will oversee OSSSO operations on a temporary basis, while an integrated Police and Security department that encompasses APD and OSSSO functions takes shape.

The planned integration of the two functions is expected to yield a fully integrated and cohesive structure, and a more unified approach to policing and security.

Chairman Carper Announces Appointment of Amtrak Inspector General

Following a comprehensive national search conducted over the past three months, Amtrak Chairman Tom Carper today announced that he has appointed Theodore (Ted) Alves as the incoming Amtrak Inspector General. Alves' start date with the Amtrak Office of Inspector General will be determined shortly.

Carper engaged a leading executive search firm to assist with the search process, and appointed a Selection Committee chaired by Amtrak Board member Nancy A. Naples and comprised of Amtrak Board Vice Chairman Donna McLean, former DOT IG Ken Mead and former Federal Deposit Insurance Corporation IG Gaston Gianni.

"Ted Alves is highly respected in the inspector general community and will provide the leadership, integrity, independence and objectivity required for the position," Carper said.

Alves comes to the Amtrak Office of Inspector General with 35 years of federal service, and is a 2009 recipient of a "Presidential Rank Award" for his exceptional service to the American people and in recognition of his "sustained extraordinary achievement."

He served in the U.S. Department of Transportation Office of Inspector General for eight years in several executive positions until he retired in Jan. 2009. As the Deputy Inspector General from 2006 to Jan. 2009, Alves was responsible for providing executive-level leadership and direction of all Office of Inspector General audits and investigations, as well as for overseeing

operational support activities for that office. From 2001 to 2006, Alves held three progressively responsible executive positions at the U.S. DOT, culminating in the position of Principal Assistant IG for Audits and Evaluations. He also has extensive audit experience at the Federal Emergency Management Agency, the U.S. Agency for International Development and the Government Accountability Office, where he spent 22 years.

Prior to his work at DOT, Alves worked in auditing positions at the Federal Emergency Management Agency, the U.S. Agency for International Development and the U.S. Government Accountability Office, where he spent 22 years.

Acting Inspector General Lorraine Green, who temporarily held the position while a search was being conducted, will be returning as a vice president on the Executive Committee and will report to President and CEO Joe Boardman.

November 10, 2009 • Page 1 of 1

A Message from Joe Boardman

Dear Co-workers,

Tomorrow is Veteran's Day. We observe it on November 11, the anniversary of the armistice that ended the First World War. This day has become a traditional occasion for us to remember the living and the dead who served in the nation's armed forces in time of war. It is a day of gratitude and peace, and it will quickly give way to the holidays that remind us how fortunate we are to live in an age of safety and plenty — holidays such as Thanksgiving, Hanukkah and Christmas.

As Americans, we enjoy all the comforts and freedoms our age has to offer. We enjoy them in part because another generation of Americans is serving as many of us once did for the safety of our country. Many are abroad and serving in the field; some are at work in our stations and along our rights-of-way, ensuring the safe passage of our trains. Some of them even combine the exacting work of the railroad with the obligations of the citizen-soldier. Some, although they may not even know it yet, will someday join our ranks here at Amtrak, and when they come, we will be glad to have them.

It is impossible to distill the essence of military life into a sentence, but easy to compress it into a word: that word is "service." We speak of service on the railroad, too, just as we think in terms of "divisions," and this is no accident. The railroad business has always drawn veterans, many of whom find in our company the dedicated fellowship that comes from the pursuit of a demanding business with high standards of performance and individual responsibility. Run through the ranks of Amtrak, and you will find plenty of former soldiers, sailors, airmen and Marines in our shops, bases,

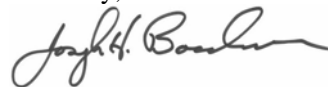

trains and stations. We are proud of them, and we're committed to taking care of them, too.

At its foundation, Amtrak was filled with veterans of the Second World War and of the two conflicts that followed it. Since 1971, America has faced two major wars and a host of minor actions, and the end of each has brought new people into the industry. Chairman Carper and I served in Vietnam, and incredible as it now seems to us, the veterans of the Second World War whom we knew as teachers, elder colleagues and commanders are now leaving us, and will soon rejoin the young friends they left overseas.

When we walk through stations and shop floors we still see plenty of grey heads — but the grey hair belongs to the Vietnam veterans now, and the young men and women who are coming to Amtrak from the service are veterans of a different war in other places. That war, like all wars, continues to take its regrettable toll, and while we honor the survivors today, we must not forget the dead. Only the living can know the fullness of their sacrifice, for the years and the lives they gave up are their last great gift to us.

Many of us are graying now, and when we look back across years filled with work, family and happiness to the scenes of our youth, we hope for two things: one, that all of us can look back on the lives we had led with satisfaction, pride and gratitude; and two, that we can find it in ourselves today to thank God for the sacrifices of the men and women who gave up their lives so that we could enjoy our own.

Sincerely,

Joe Boardman
President and Chief Executive Officer

A Message from Joe Boardman

Dear Co-workers,

Last summer, I promised that I would communicate the Safe-2-Safer survey results once the report was provided to me. Before I get into the survey findings, I want to thank the nearly 10,600 employees who took the time to complete the survey and the 800-plus employees who participated in focus groups held across the country late this summer.

I know that in the past you may not have heard back about surveys you completed, and maybe some of you guessed that it would be the same thing all over again. That's not the case. Attached is the Executive Summary of the report, which is the result of the survey and more than 80 focus groups across the system. The report was prepared by Behavioral Science Technology, Inc., the vendor that conducted the survey and that is helping us implement Safe-2-Safer.

The first recommendation in the BST report is to share the findings with you, along with a commitment to improve. You have both my commitment, along with that of our senior management, to do so. Keep in mind that what we and BST are examining are employees' current perceptions of safety and security at Amtrak, in an effort to strengthen our commitment to safety.

Naturally, people are inclined to ask how we're going to address the issues raised by the report. I just recently received the final report myself and I don't want to rush to produce an Amtrak plan just to say that we did. It is very important that we dedicate time and resources to putting together a plan that is thoughtful and meaningful, and that involves additional input from employees. That alone should serve as an indication to you of my commitment.

You provided us with your perceptions and valuable input, and I will

(and do) treat your views with the respect they deserve. I take this very seriously.

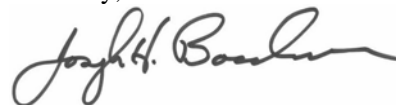

The entire report is more than 200 pages long, so in the interest of being green, we have posted it on the intranet home page, as well as under "Safety." Please ask your supervisor to print it out (double-sided) for you, if you want a copy. I've sent supervisors a memo instructing them to print out copies if employees want to see it. Please treat this summary and the report as internal documents — they may not be distributed outside the company. They are intended for internal review so we can decide how to implement improvements that will work for Amtrak.

I know that most of you work hard to maintain a safe and secure Amtrak. We have a good safety record — BST advised me that Amtrak's survey results are above average when compared to the other Class 1 railroads and transit agencies that also used the survey. But we can do better, and we can do that by changing the ways we relate to safety and security, and to one another. I expect Safe-2-Safer to help accomplish that.

We're all in this together. What binds us is a love for what we do and for the railroad, and that is a strong bond. We must build on that to drive enduring changes that help position us as the provider of choice in an increasingly competitive industry.

You'll be hearing more from me in the coming months about steps we'll be taking to address the results. In the meantime, I thank you for the work you do and please work safely.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

Message from Joe Boardman on Free Seasonal Flu Shots for Employees

Dear Co-Workers,

Over the past year, you've heard me talk about creating a safer, greener, healthier company. My motivation for doing so stems from my belief that a company should be much more than just a business operation. A company is a collection of people that have a responsibility to create value for each other, for customers and for the communities in which it operates.

To that end and given the potentially severe flu season the Centers for Disease Control and Prevention (CDC) is predicting, we will be providing free seasonal flu vaccinations — for the first time ever — to all employees who wish to protect themselves from the seasonal flu. Keep in mind that this is for the seasonal flu, not for the H1N1 flu virus.

Vaccinations will be available in one of two ways: at an on-site clinic set up at work locations (the preferred method), or by using a pre-paid voucher to get a flu shot at a designated pharmacy or other participating entity offering flu shots near you. Either way, make sure you have your Amtrak employee ID (SAP) number.

Work locations with 30 or more employees will host at least one on-site clinic between now and Nov. 15. A list of locations is attached for your reference, but look for flyers and e-mails with information about the dates and times and where to sign up for a vaccine at your location.

For those of you who will not be able to visit one of the on-site clinics, please take advantage of the voucher system. You will need to register for the voucher online or by phone. Please follow the information provided in the

AllOne (the vendor who is administering the vaccinations) Voucher Information Sheet that accompanies this message and please register for, or obtain your voucher by Oct. 15. The information is also posted on the Intranet home page.

Getting a flu vaccination is completely voluntary; however, I encourage everyone to take advantage of the offer. Supervisors and their direct reports should coordinate to make sure employees can get the shot while the on-site clinic is at your location. The CDC advises that getting vaccinated is the most important step in avoiding the seasonal flu virus, and I'll be signing up for mine as soon as the date and time is posted.

We are working with the Federal Emergency Management Agency to see if we qualify for H1N1 vaccinations for employees. We will keep you updated on our progress. Also, please remember that the vaccine is for Amtrak employees — family members and contractors should use their health care coverage for vaccinations.

As always, please remember to wash your hands frequently with soap and water to avoid spreading germs. Covering your mouth and nose when sneezing or coughing is also important.

Providing you the opportunity to get a free flu shot is another way Amtrak can show its commitment to you. Please do your part to keep the flu virus from spreading and stay healthy this fall and winter season.

Sincerely,

Joe Boardman
President and CEO

President Obama to Nominate Two New Board Members

Yesterday afternoon, the White House announced President Obama's intent to nominate two individuals to the Amtrak board of directors.

Bert DiClemente has served as vice president of CB Richard Ellis, Inc., the largest real estate company in the world, since 2003. Previously, he worked at Insignia/ESG and Jackson Cross & Associates as director and associate director, after serving as state director on the staff of then-U.S. Sen. Joe Biden for 20 years.

Anthony Coscia was appointed chairman of the Board of Commissioners of the Port Authority of New York and New Jersey in 2003, where he has broad oversight responsibility in connection with the agency's varied transportation businesses. Coscia is also a partner at Windels Marx Lane & Mittendorf, LLP, one of the New York region's oldest law firms.

Once nominated and confirmed, DiClemente and Coscia would fill two of the four currently open seats on the board. The size of the board was expanded to nine members in April, in accordance with a provision in the Passenger Rail Investment and Improvement Act of 2008.

Once the nominations are officially made, they will require confirmation by the U.S. Senate.

Please distribute at all safety meetings and post on all employee bulletin boards.

Seasonal Flu Shot Voucher Deadline is Next Week

The deadline for Amtrak employees to register for a free seasonal flu shot voucher/coupon has been extended to 5:00 p.m. EDT time on Oct. 20. (The deadline has been extended from the previously announced Oct. 15). The deadline for redeeming the vouchers remains Oct. 22, and employees are strongly encouraged to take advantage of the offer as soon as possible due to shortages of the seasonal flu vaccine in some areas. The voucher program cannot be extended past Oct. 22, 2009.

Amtrak was informed today by AllOne Health, its flu vaccination provider, that because of supply problems with seasonal vaccine, all on-site clinics slated for the next two weeks must be postponed until mid-November, when more vaccines are expected to be made available by their supplier.

While Amtrak still expects to host all on-site flu shot clinics originally scheduled for work locations throughout the system, it is possible that the shortage of vaccines will require cancellation of some of the clinics. Based on the information from AllOne Health, the availability of the vaccine now or later in the season is not guaranteed, so employees should take advantage of the voucher/coupon offer as soon as possible to better ensure they are vaccinated.

Further announcements about specific on-site flu clinics will be made as they are rescheduled and information on vaccine availability is known.

Instructions for registering for a voucher online or by phone are attached to this advisory.

Amtrak Statement on Virginia Railway Express Recommendation

Amtrak issued the following statement today following the Virginia Railway Express (VRE) Operations Board's recommendation to award its commuter rail operations and maintenance services to another bidder. The recommendation is being made to VRE's parent commissions, the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission, for consideration at their Nov. 5, 2009, meetings.

"Amtrak and VRE have had a long and positive working relationship since before the commuter railroad began operations. Amtrak is saddened and disappointed in the recommendation as our employees have invested a great deal of heart, energy, and effort in providing excellent service to VRE passengers since 1992."

Seasonal Flu Vaccine Supply Issues Force Adjustments to Program

Amtrak has been informed by its flu vaccination program provider, AllOne Health, that on-site flu shot clinics at Amtrak work locations must be cancelled because AllOne Health was unable to acquire the necessary supply of vaccine doses.

In an effort to maintain its commitment to providing free seasonal flu vaccine to employees, Amtrak will reimburse employees up to \$40 if they choose to get a seasonal flu vaccination on their own.

“AllOne told us today that they are not able to secure vaccine doses from their manufacturers or suppliers,” said Roy Deitchman, vice president, Environmental Health and Safety. “We are extremely disappointed that these external supply factors, which are outside of our control, have prevented AllOne from carrying out our program as planned. But we hope employees will take advantage of the reimbursement option.”

Employees who have not already been vaccinated but still wish to do so are encouraged to find a seasonal flu shot provider as soon as possible because national supplies are reportedly limited.

Upon receiving a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental
Health and Safety
40 Mass. Ave. NE
3W-104
Washington, D.C. 20002

Receipts must be submitted by Nov. 20. The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1, and the program is only for Amtrak employees.

**Please distribute at all safety meetings
and post on all employee bulletin
boards.**

A Message from Joe Boardman on Commuter Contracts

Dear Co-workers,

Today, the Southern California Regional Rail Authority (SCRRA) board of directors voted to execute a Memorandum of Understanding that essentially lays the groundwork for a contract with Amtrak to operate the Metrolink commuter rail service, starting July 1.

We will be working on the final agreement in the coming weeks, and hope to sign a contract no later than Dec. 11. Amtrak would supply Train and Engine crews, and related management and support staff to operate the Los Angeles-area service.

As some of you may recall, we'd operated this service before, from 1992 to 2005. According to the SCRRA board, they chose to proceed with sole source procurement — meaning not putting the contract out for competitive bid — because it recognizes that Amtrak “provides a depth of relevant experience and of management support for Metrolink operations that is unique in the current passenger rail environment.”

It is our experience and depth of expert knowledge that makes Amtrak the right choice. But we now live in a new era of passenger rail. The opportunities that are being made available thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. Don't kid yourself — we have competition and we must work and act like it.

We were all saddened and disappointed when we learned last

Friday of the Virginia Railway Express (VRE) Operations Board's recommendation to award its commuter service contract to another bidder. Our T and E crews provide outstanding service and they maintained an excellent safety record for the 17 years Amtrak has operated the service. In a letter I sent to those employees today, I described how proud I am of the work they do, and that I value their dedication to providing safe and reliable service. I sincerely hope they will choose to remain part of the Amtrak family when the contract with VRE ends on June 30.

This is not the passenger rail environment of yesteryears — the competition is real. While we have expertise and experience that stands up to competition, we are also making (and will continue to make) significant investments to better position ourselves not simply as a provider, but as the provider of choice. But getting there also involves changing the way we think. When I first came to Amtrak, it seemed as though we only thought about why we couldn't do something. Thinking about what we can do and what we need to do to get there is how we remain competitive and beat out the other guys.

In the past, we seemed focused on survival; today our survival relies on being focused on growth. We all — management and agreement-covered alike — must think big, be innovative and pursue opportunities and decisions that make good business sense. It's incumbent on us to shape a company that thinks beyond just tomorrow and that sets the stage for the newer members of the Amtrak family because

they represent our future, and they deserve their chance at building a career of service and contributing to the advancement of Amtrak's mission. I think we all envision the Amtrak that we can be. No matter what your job, each and every one of us can contribute to a changing mindset and attitude.

I'll keep you informed about the status of the Metrolink contract. In the meantime, thank you for the work you do and please work safely.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

Message From Joe Boardman

Dear Co-Workers,

Next month, I'll be celebrating my first-year anniversary as president and CEO of Amtrak. Over the course of the last 11 months, I have learned a great deal from many of you. I know that you are enthusiastic about what the future holds for Amtrak but may be uncertain about how it all comes together. We continually face an identity crisis because it's not always clear what Amtrak is supposed to be.

That is in large part why I made developing our strategic vision a priority when I joined the company. To that end, we have compiled a Strategic Guidance document that establishes broad goals, creates key performance indicators to measure progress, and outlines the opportunities and challenges facing Amtrak as we pursue a growth-oriented mission. (This document supersedes Amtrak's 2005 Strategic Reform Initiatives.) At the end of the day, our goals are all aimed at better positioning Amtrak to be the provider of choice.

Our Strategic Guidance sets the foundation for the Five Year Financial Plan we submitted to Congress on Oct. 1, and together they encompass our strategy for continuing the growth we've seen since 2002, and for maximizing this historic moment in federal and state support for more passenger rail service.

As you know, we're in the midst of a transformational chapter for Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) provides the direction set by policymakers, and we're seeing exceptional support for growth of passenger rail.

This is not the passenger rail environment of yesteryears — the opportunities that are being made available to us thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

Our strategic vision is built on six fundamental goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. On our own and with the help of stimulus funds, we are making and will continue to make significant and enduring investments toward those goals.

We're creating a safer environment with Safe-2-Safer and installation of Positive Train Control. In addition, we're pursuing multiple avenues to be better stewards of our environment.

We're striving to become healthier by increasing ridership and pursuing growth in state-supported and commuter service, like the new partnership with the Commonwealth of Virginia, the second Amtrak *Cascades* roundtrip to Vancouver, the proposed additional *Piedmont* service in North Carolina next year, and the recent progress toward a final contract to operate the Los Angeles-area Metrolink service.

We're also becoming healthier by investing to bring our equipment and infrastructure to a state of good repair, and we will be producing a fleet plan and request for federal support for equipment procurement in February. We're also making progress toward improving station accessibility for those who are mobility impaired. With

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 29, 2009 • Page 2 of 2

Strategic Asset Management, we're revamping the technologies that power our key operational, financial and human resources business processes to replace outdated systems and redundant or inefficient processes with integrated systems that will improve efficiency.

We're also aiming to improve customer service with a next-generation reservations system and e-Ticketing and the recently re-launched Amtrak.com. In addition, we must exemplify qualities typically attributed to excellent customer service, such as responsiveness, anticipating needs and a high degree of professionalism in our approach to our state and commuter service partners.

As Amtrak grows, so does our capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction and reduction in the demand for foreign oil.

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth. In addition, those looking to enter the passenger rail market will eat our lunch if we don't raise the ante on our competitive edge.

Clear goals are of vital importance for a company; values are just as important because they guide how we go about achieving those goals. Many of the investments we're making call for a new way of thinking and working together. Together and as individuals, we need to stop thinking about what we can't do, and start putting into action what we can do.

I think we all envision the Amtrak that we can be. Each and every one of us can contribute to a changing mindset

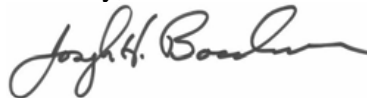

and attitude. We need you to be part of this — we can have the best strategy in the world, but it's no good if we don't own it and live it.

It's difficult to be part of something if the mission is unclear, so take the time to understand the opportunities and challenges we face — our strategy is your strategy.

That's why I encourage you to visit our intranet or Amtrak.com to read our Strategic Guidance and our FY 2010-2014 Five Year Financial Plan. (Both can be found on the intranet under "Library," then "Reports.") In an effort to be greener, we've printed a limited number of copies for a number of locations, but if you can't access the Internet or you would like your own printed copy, please call Charlotte Berry in the Government Affairs department (202 906-3918 or ATS 777-3918) or e-mail BerryC@amtrak.com to request one. The attached summary should also help you better understand our vision and plans.

Thanks for your support and please work safely.

Sincerely,

Joe Boardman
President and CEO

Amtrak Statement on Letter to VRE

Amtrak today issued the following statement:

“Today, Amtrak sent a letter to VRE challenging their notice of intent to award a contract to Keolis Rail Services on the basis of potential improper scoring of proposals and such other bases as may not be known until we gain access to the relevant records previously requested.

The VRE request for proposal was to be scored 80 percent on performance/experience, but the foreign-owned Keolis has no experience operating a railroad in the U.S. or under this country’s strict rail safety and security regulations that are designed to protect the traveling public and the employees operating the trains.

We ask for this challenge to be considered before final action is taken by the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission.”

Please distribute at all safety meetings and post on all employee bulletin boards.

2009 PSSA Recipients Announced

Today, Amtrak announces the recipients of the 2009 President's Service and Safety Awards (PSSA). Each year, the company honors employees and external partners who have made exceptional contributions to Amtrak during the previous calendar year.

The following award winners will be honored this fall at ceremonies in Sacramento, Calif. (Oct. 6); Los Angeles (Oct. 8); Chicago (Oct. 12); Beech Grove, Ind. (Oct. 13); Providence, R.I. (Oct. 27); New York (Oct. 28); Washington, D.C. (Nov. 3); Philadelphia (Nov. 9); and Jacksonville, Fla. (Dec. 3).

Also being honored at the events are employees who have completed 30 and 35 years of service in 2009.

special employee advisory

September 21, 2009 • Page 1 of 1

Pandemic Flu Update

The Centers for Disease Control and Prevention (CDC) anticipates a particularly severe flu season this fall and winter as a result of the spread of seasonal and H1N1 viruses.

Amtrak asks all of its employees to practice healthy habits, including thoroughly washing hands on a regular basis, covering a cough or sneeze with a sleeve or disposable tissue and avoiding touching the eyes, nose or mouth.

In addition, Amtrak will be providing free seasonal flu vaccines for employees at many locations or a voucher to obtain the vaccine at a local clinic or pharmacy, starting in October. Look for more details about the voluntary program in the coming weeks.

“Getting the seasonal flu vaccine is an excellent way to help protect yourself from getting sick and spreading the flu virus,” said Amtrak’s corporate medical director Dr. Tim Pinsky.

The Pandemic Flu Plan activated by Amtrak in May is still in effect, requiring protocols for reporting employee and passenger flu cases, and instituting procedures for front-line employees.

As a reminder, all flu cases involving customers, passengers and employees should be reported to CNOC at (800) 424-0217 or ATS 734-2307. CNOC is serving as the central clearinghouse for all suspected cases of the flu on board trains or in Amtrak facilities.

Front line employees should still be implementing the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 “Serious

Communicable Disease Procedures” on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, “Public Health Guidelines,” Section C). The manuals are posted on the Intranet, under “Library”→ “Wiki”→ “Service Standards.” An updated Operations Standard Advisory and Arrow message will be issued in the coming days.

Flu symptoms include a fever of 100°F or higher AND coughing or sore throat. Other symptoms may include runny or stuffy nose, head and body aches, fatigue, diarrhea or vomiting.

Please review the accompanying Q and A, which serves as a comprehensive guide for employees during the pandemic, and stay informed.

The company’s Pandemic Flu Task Group will continue to monitor the situation and follow recommendations of the CDC as appropriate to safeguard the well-being of its employees and passengers. Stay tuned — as the situation evolves, so will the policies and procedures associated with the pandemic flu.

Please distribute at all safety meetings and post on all employee bulletin boards.

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in the Retirement Income Plan for the Employees of National Railroad Passenger Corporation

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

- | | | |
|----|--|--|
| 1. | Name of Plan: | Retirement Income Plan for the Employees of National Railroad Passenger Corporation (the "Plan") |
| 2. | Plan Number: | 001 |
| 3. | Name and Address
of Plan Sponsor: | National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
| 4. | Employer
Identification Number: | 52-0910053 |
| 5. | Name and Address of
Plan Administrator: | Pension Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
-

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, the non-union employees of the National Railroad Passenger Corporation, or any wholly or majority-owned subsidiary of the National Railroad Passenger Corporation, who have completed one year of eligibility service, as defined in the Plan.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. The number of persons needed for the Department of Labor to comment with respect to this Plan is ten (10) employees. If you request the Department of Labor to comment, your request must be in writing and must specify the matters upon which comments are requested, and must also include: (1) the information contained in items 1 through 4 of this Notice; and (2) the number of persons needed for the Department of Labor to comment.

A request to the Department of Labor to comment should be addressed as follows:

Deputy Assistant Secretary
Employee Benefits Security Administration
ATTN: 3001 Comment Request
U.S. Department of Labor,
200 Constitution Avenue, N.W.
Washington, DC 20210

COMMENTS TO THE INTERNAL REVENUE SERVICE

Comments submitted by you to the Internal Revenue Service must be in writing and received by March 16, 2009. However, if there are matters that you request the Department of Labor to comment upon on your behalf, and the Department of Labor declines, you may submit comments on these matters to the Key District Director to be received within 15 days from the time the Department of Labor notifies you that it will not comment on a particular matter, or by March 16, 2009, whichever is later, but not after March 31, 2009. A request to the Department of Labor to comment on your behalf must be received by it by February 14, 2009, if you wish to preserve your right to comment on a matter upon which the Department of Labor declines to comment, or by February 24, 2009 if you wish to waive the right.

ADDITIONAL INFORMATION

Detailed instructions regarding the requirements for notification of interested parties may be found in Sections 17 and 18 of Revenue Procedure 2008-6. Additional information concerning this application (including, where applicable, an updated copy of the Plan and related trust; the application for determination; any additional document dealing with the application that have been submitted to the Service; and copies of Section 17 of Revenue Procedure 2008-6 are available in the office of the Plan Administrator during normal business hours for inspection and copying. (There is a nominal charge for copying and/or mailing.)

If you have any questions about this Notice, please contact Rosemarie Tana at 202-906-2272.

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in Amtrak's Retirement Savings Plan for Agreement Employees

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

1. Name of Plan: Amtrak's Retirement Savings Plan for Agreement Employees (the "Plan")
2. Plan Number: 003
3. Name and Address of Plan Sponsor: National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285
4. Employer Identification Number: 52-0910053
5. Name and Address of Plan Administrator: Savings Plan Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, employees who 1) are permanent employees of the National Railroad Passenger Corporation, any majority or wholly owned subsidiary of the National Railroad Passenger Corporation, the Chicago Union Station Company, the Washington Terminal Company, or the Union Station Redevelopment Corporation, 2) are members of a unit of employees covered by a collective bargaining agreement, such unit having signed an agreement to participate in the Plan, and 3) have completed a year of service, as defined in the Plan.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. The number of persons needed for the Department of Labor to comment with respect to this Plan is ten (10) employees. If you request the Department of Labor to comment, your request must be in writing and must specify the matters upon which comments are requested, and must also include: (1) the information contained in items 1 through 4 of this Notice; and (2) the number of persons needed for the Department of Labor to comment.

A request to the Department of Labor to comment should be addressed as follows:

Deputy Assistant Secretary
Employee Benefits Security Administration
ATTN: 3001 Comment Request
U.S. Department of Labor,
200 Constitution Avenue, N.W.
Washington, DC 20210

COMMENTS TO THE INTERNAL REVENUE SERVICE

Comments submitted by you to the Internal Revenue Service must be in writing and received by March 16, 2009. However, if there are matters that you request the Department of Labor to comment upon on your behalf, and the Department of Labor declines, you may submit comments on these matters to the Key District Director to be received within 15 days from the time the Department of Labor notifies you that it will not comment on a particular matter, or by March 16, 2009, whichever is later, but not after March 31, 2009. A request to the Department of Labor to comment on your behalf must be received by it by February 14, 2009, if you wish to preserve your right to comment on a matter upon which the Department of Labor declines to comment, or by February 24, 2009 if you wish to waive the right.

ADDITIONAL INFORMATION

Detailed instructions regarding the requirements for notification of interested parties may be found in Sections 17 and 18 of Revenue Procedure 2008-6. Additional information concerning this application (including, where applicable, an updated copy of the Plan and related trust; the application for determination; any additional document dealing with the application that have been submitted to the Service; and copies of Section 17 of Revenue Procedure 2008-6 are available in the office of the Plan Administrator during normal business hours for inspection and copying. (There is a nominal charge for copying and/or mailing.)

If you have any questions about this Notice, please contact Rosemarie Tana at 202-906-2272.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Employees Honored for Military Support

On Dec. 22 at Bear Car Shops, two Amtrak employees will be recognized for their commitment and service to the U.S. armed forces.

Superintendent Lew Wood will be presented with a Patriot Award by the Committee for Employee Support of the Guard, in recognition of his strong support of employee reservists and his leadership in facilitating their participation in the Guard and Reserve. Wood was nominated by Sgt. Michael Lawson, an Air National Guard reservist who is an electrician at Bear Car Shops.

Sgt. Lawson is also being recognized at the ceremony by the International Brotherhood of Electrical Workers with a letter of appreciation for his outstanding service to his country. Lawson is preparing for his third tour of duty in Iraq and Afghanistan.

“This award recognizes the Bear facility’s and Amtrak’s commitment to do our part to help and support the men and women who serve in the military and their families,” said Wood. “The employees at Bear gladly accept the responsibility to give those protecting us everything they need when they are away and when they come home.”

A Message from Joe Boardman

Dear Co-workers,

I want to tell you how proud I am that while the snow this weekend paralyzed the East Coast, Amtrak kept rolling thanks to the dedication of many employees. We’re nearly back to normal and we still have some digging out to do, but I want to extend my sincere thanks and appreciation to each of you who took part in keeping Amtrak operating.

The historic snowstorm that blanketed the Mid-Atlantic and New England regions this weekend wreaked havoc on roads, airports and pretty much anything that moves. Record snowfall from North Carolina to Boston left many travelers stranded, as airports shut down. Washington’s Metro system closed above-ground operations.

Although completely unrelated to the storm, Eurostar rail operations between France and England were suspended for the third day today due to technical failures associated with weather conditions, leaving 90,000 travelers stranded this holiday season, according to news reports.

While Amtrak cancelled some service and experienced delays, trains were nonetheless operating on our railroad; although we experienced significant delays and problems when our trains left our territory south of Washington. It wasn’t easy and we had problems along the way, but the point is that we were operating.

Despite equipment and infrastructure challenges of our own, we still carried thousands of people to their destinations when others couldn’t move — and we did so safely. We accommodated numerous travelers who gave up on the airlines. We carried people home for the holidays while others are still waiting to dig out.

We operated because of the hard work of many employees on the front lines and behind the scenes. Employees who haven’t been home for days, others who battled the weather to make it in, System Operations, Engineering crews, Mechanical employees, station personnel, and on-board service crews — your dedication is impressive.

Having been raised in upstate New York, I know what snowstorms like this can do. It takes a hearty and committed group to persevere. I know we encountered operational problems over the road and we have plenty of opportunities for lessons learned. It takes everyone — from coach cleaner to signalman — to make this railroad run. And it’s just not this event; we manage mudslides in the Pacific Northwest, hurricanes in the South, and other conditions that test our know-how and determination. It’s that experience, expertise, fortitude and dedication that makes Amtrak unique.

Thank you for everything that you do and please have a safe and happy holiday.

Sincerely,

Joe Boardman
President and CEO

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will decrease from 55 cents to 50 cents, effective for mileage expenses incurred on or after Jan. 1.

Human Resources: Leave taken in 2009 must be entered in SAP no later than Dec. 31. Additionally, leave requests for calendar year 2010 can now be submitted.

Human Resources: Employees who have moved in the past year should be sure to update their mailing address by submitting a new Employee Information Form. Forms are available at local Human Resources Offices or on the intranet under "Library"→"Forms." Addresses should be changed by Jan. 10 in order for W-2 tax forms to be mailed to the correct address.

Payroll: Railroad Retirement Tier I and Tier II taxes will remain at the current rates in 2010: 6.2 percent (\$6,324 maximum withholding) and 3.9 percent (\$2,960.10 maximum withholding), respectively.

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2010 must also submit a new form by Feb. 15.

2010 Holiday Schedule

Amtrak will observe the following 2010 dates as holidays for non-agreement employees:

<u>Holiday</u>	<u>Day Observed</u>
New Year's Day	Jan. 1
Martin Luther King, Jr. Day	Jan. 18
President's Day	Feb. 15
Memorial Day	May 31
Independence Day	July 5
Labor Day	Sept. 6
Veteran's Day	Nov. 11
Thanksgiving Day	Nov. 25

Because Christmas Day (Dec. 25) falls on a Saturday, non-agreement employees hired prior to 2010 are granted an additional personal day and are therefore entitled to three personal days in 2010. Employees must obtain supervisory approval prior to using any personal days.

Non-agreement employees hired in 2010 will receive personal days based on their date of hire. Employees hired between Jan. 1 and May 31 will receive two personal days, while those hired June 1 through Aug. 31 are entitled to one personal day. Employees hired Sept. 1 or after will not have any personal days.

Holidays for agreement-covered employees are subject to each specific labor agreement. Employees should check with their union to be sure which holidays are included in each agreement. Some agreement-covered employees also receive personal holidays, the number of which varies by agreement.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library"→"Policies."

Message from Joe Boardman

We are in the midst of the most dynamic period in Amtrak history, and together we're writing a new chapter in the Amtrak story.

While we are safer, greener and healthier, one of our biggest obstacles is inconsistent collaboration within and between departments. In some ways, we collaborate seamlessly; in others, we really fall short. And nowhere is collaboration more important than when it applies to safety and security.

That's why I am personally committed to shifting our approach to safety from one that is punitive to one that is collaborative. Chief Operating Officer Bill Crosbie and I have asked Vice President of Transportation Richard Phelps to lead the day-to-day charge on this initiative. In the coming weeks, you'll be hearing more about how we're going to achieve that.

We'll be implementing a multiyear risk-reduction approach to safety and security that will involve every level of management — starting with me and the executive team — to your supervisor and front line employees, and then back up through management to me. We'll be working hand-in-hand with our unions. The centerpiece of this is training, coaching and accountability for managers and supervisors; and broader employee engagement in safety to create a strong and enduring safety and security culture at Amtrak.

We're not going to eliminate safety and security initiatives that work. We're not going to ease our focus on compliance. But safety isn't a just a statistic, and we need to do away with a culture of finger-pointing.

While there will be a particular focus on the operating departments, all departments are going to benefit. It's no coincidence that companies that sustain safety excellence are also high performing organizations.

This is not another "flavor of the month." It's time for a fundamental and enduring shift in the way we work together, and that won't happen overnight. But it's high time that it begin.

I am fully committed to Amtrak, I share your love of the railroad and what we do on behalf of the country every day. I am also dedicated to showing you Amtrak's commitment to you. A united front on safety and security is a very personal issue for me and it should be for you, too.

We're currently reaching out to the unions and hope to build a bridge on the foundation of this common objective. We'll also be meeting with the executive team next week. You'll be hearing more about this from me, Bill Crosbie and Richard Phelps in the coming weeks and months. Thank you for your support and for what you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

Operation Changes:.

Service Update: The corporate smoking policy has been updated to also prohibit the use of electronic smoking devices in any area that is designated as smoke free on board trains or within stations and offices.

Engineering:.

AMTRAK®

Operational Changes: Due to Union Pacific track work, *Pacific Surfliner* Trains 799, 798 and 792 will not operate between San Luis Obispo and Santa Barbara through Jan. 14. Motorcoach service is available for travel at intermediate stops, except Lompoc-Surf, Calif. At Guadalupe-Santa Maria, northbound buses will drop off only.

Marketing and Product Management:

Effective immediately, Dayton, Ohio-based NCR is the new vendor contracted to develop a new Point-of-Sale (POS) system that automates the sales process and captures food and beverage sales data on trains.

Benefits: Due to the transition to WageWorks, you will be unable to use your commuter reimbursement account to cover January commuting costs. January's payroll deductions will be applied to February's commuting costs and you must pay your January expenses with after-tax dollars. Log on to wageworks.com or call 877-924-3967 by Jan. 10 to place your transit and/or parking order.

Information Technology: As part of the new SAM initiative, select employees will be mailed a Cultural Value Analysis survey this week, the results of which will assess the company's readiness for change. The deadline for survey submission via mail (c/o SAM Initiative, 501 Carr Road, Wilmington, DE 19809) or fax (703-738-7123) is Monday, Jan. 19.

Government Affairs and Corporate

Communications: Voting is now underway — through Jan. 23 — to name the Amtrak service between St. Louis and Kansas City, Mo. Log on to www.morail.org to choose from *Missouri Rail Blazer*, *Missouri River Runner*, *River Cities Corridor*, *ShowMeMO* and *Truman Service*. The new name will be announced on Jan. 30.

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect Dec. 22 and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under How We Work ⇒ Management Employee Business Travel.

AMTRAK®

Operational Changes: On Jan. 19, Martin Luther King Jr. Day, all *Downeaster* trains will operate according to the normal weekday schedules, not the holiday schedule published in the Fall 2008/Winter 2009 System Timetable.

Benefits: The IRS limit for 401(k) pre-tax contributions is now \$16,500. Employees who reach 50 years of age or older in 2009 and contribute the maximum allowed, may contribute an extra \$5,500 “catch up contribution” to the Plan on a pre-tax basis. The combined pre-tax, after-tax and company contributions are limited to 100 percent of an employee’s pay or \$49,000, whichever is less.

CVA Reminder: For select employees who received the Cultural Value Analysis survey, all results must be received via mail (c/o SAM Initiative, 501 Carr Road, Wilmington, DE 19809) or fax (703-738-7123) by Monday, Jan. 19.

Volunteers Still Needed in Washington, New York

To meet Inauguration Day staffing needs in Washington and New York, employees are encouraged to volunteer at their local station with the approval of their supervisor. Employee volunteers will receive a special commemorative button.

To volunteer at New York Penn, contact Mike Gallagher at GallagMk@amtrak.com or ATS 521-7278. To volunteer in Washington, contact Ken Wiedel at WiedelK@amtrak.com or ATS 777-3078.

Amtrak Readies for 2009 Inauguration

With the inauguration of the nation’s 44th president just over a week away, Amtrak is finalizing its operating plan to support what could be the most well-attended event ever in Washington, D.C. Preparations have been underway for months to safely accommodate a massive number of rail passengers to and from Washington Union Station on Jan. 20.

Significant preparation has also been put into operating a charter train that will carry President-elect Barack Obama and Vice President-elect Joe Biden to Washington prior to the inauguration.

“This is a monumental week for the country and Amtrak is playing a vital role — we should all be very proud of our involvement,” said President and CEO Joe Boardman. “As the nation’s greener, safer and healthier travel provider, it’s an honor to be chosen to transport them to Washington for the Inaugural activities and it sends a strong message about the importance of passenger rail in America.”

On Inauguration Day, an estimated 8,000 passengers per hour will arrive and depart on Amtrak, MARC and VRE trains during the morning and afternoon rushes. System Operations has augmented the company’s normal morning inbound and afternoon outbound capacity by 50 percent, by adding extra trains and adding cars where possible. MARC and VRE have both increased capacity as well.

Managing the flow of trains and people through Washington Union Station has been the responsibility of the Mid-Atlantic Division. Efforts have been complicated due to security requirements, but division personnel, Amtrak Police and the Office of Security Strategy and Special Operations have been working closely with local and federal law enforcement to create an effective plan that meets operational and security requirements.

“The security requirements on both days are extraordinary, but APD and OSSSO have been working tirelessly to coordinate with the Secret Service, Metro police and other federal, state and local agencies,” said Chief Operating Officer William Crosbie. “Collaboration within the company has also been exceptional. Engineering and Mechanical crews, Transportation employees and every other department have been focused on successfully completing this mission.”

January 20, 2009

Inauguration Day Operations in Full Swing

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice-president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Today, the second phase of Amtrak's inaugural operation culminates as people from all over the world flood the capital.

Thirty-six Amtrak trains are operating to and from Washington today. The Mid-Atlantic Division Commuter Services group is also managing additional MARC and VRE trains transporting people to Washington. Roughly 8,000 passengers per hour are coming through Union Station during peak morning and afternoon travel.

"This is a historic chapter in our company's history of which we should all be proud. The teamwork and collaboration by everyone involved in preparing and executing our inaugural operations on Jan. 17 and 20 have been superb," said President and Chief Executive Officer Joe Boardman.

A number of departments worked with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen.

"I applaud the work of the employees of the Mid-Atlantic Division and the Northeast Corridor Service Operations and the leadership they, the Amtrak Police Department and the Office of Security Strategy and Special Operations exhibited," said Chief Operating Officer William Crosbie.

Operational Changes: To help improve on-time performance, beginning Jan. 26, *Lincoln Service* Train 302 will operate five minutes later at all stations from St. Louis to Chicago. Also, *Sunset Limited* Train 1 will operate 30 minutes earlier from El Paso, Texas to Los Angeles.

Engineering: Cleanup of the West Class Yard in Hamden, Conn., is underway as the first step in creating a concrete tie staging area to support Track Laying Machine work in the New England Division. The cleanup is expected to be completed by mid-February.

Important Benefits Information

Amtrak is submitting its qualified retirement plans to the Internal Revenue Service for favorable determination letters. These retirement plans must meet certain requirements under federal law in order to qualify for favorable tax treatment. A favorable determination letter is the IRS's opinion that the terms of Amtrak's plans satisfy certain requirements under the Employee Retirement Income Security Act (ERISA) and the tax code. The IRS last issued favorable determination letters to Amtrak for these plans in 2003. Since that time, both the law and the plans have been updated. The upcoming IRS determination letter review will examine the plans to ensure that they comply with current law. As part of this process, participants are invited to comment as to whether the plans meet these requirements.

January 21, 2009

Inauguration Day Operations Conclude

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Footage from the Whistle Stop Tour can be seen on the official White House Web site at www.whitehouse.gov.

Yesterday, three days after transporting Obama and Biden to Washington, the second phase of Amtrak's inaugural operation culminated as people from all over the world flooded the capital.

Ninety Amtrak trains operated to and from Washington yesterday. The Mid-Atlantic Division Commuter Services group also managed additional MARC and VRE trains transporting people to Washington. In total, roughly 8,000 passengers per hour came through Union Station during peak morning and afternoon travel.

A number of departments worked hand-in-hand with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen. Scores of employees slept in offices and in sleeping cars in Washington Monday night to ensure adequate staffing.

"I applaud the efforts and tireless work by all our employees over the past several months to ensure our passengers made it to and from the Inaugural celebration safely and with minimal disruption. We should all feel proud of our involvement in this historic event," said Chief Operating Officer William Crosbie.

Operational Changes: To help improve on-time performance, beginning Jan. 26, *Lincoln Service* Train 302 will operate five minutes later at all stations from St. Louis to Chicago. Also, *Sunset Limited* Train 1 will operate 30 minutes earlier from El Paso, Texas to Los Angeles.

Engineering: Cleanup of the West Classification Yard in Hamden, Conn., is underway as the first step in creating a concrete tie staging area to support Track Laying Machine work in the New England Division. The cleanup is expected to be completed by mid-February.

Important Benefits Information: As required by law, Amtrak is submitting its qualified retirement plans to the IRS for review to affirm that the plans comply with applicable regulations. Plan participants are invited to submit comments on the plans' compliance. See attached documents for more details.

CVA Update: The deadline for submitting responses to the Cultural Value Analysis survey has been extended until Jan. 30. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, DE 19809 or fax to 703-738-7123.

January 26, 2009

Operational Changes: Today, *California Zephyr* Train 5 operates 30 minutes earlier between Elko, Nev., and Emeryville, Calif. Train 6 operates 15 minutes earlier between Emeryville and Salt Lake City.

Government Affairs: On Wednesday, Jan. 28, President and CEO Joe Boardman is scheduled to testify before the House Transportation and Infrastructure Committee on the relationship between freight and passenger rail; Amtrak's present and future roles; and company performance, benefits and needs.

In other news, former Illinois Rep. Ray H. LaHood was sworn in Friday as the new Transportation Secretary.

Important Benefits Information: The 2009 IRS allowable pre-tax contribution limits are now increased to \$120 per month for mass transit and \$230 per month for parking. Log onto amtrakbenefits.com to increase your elections.

Human Resources: In response to non-agreement and salaried agreement employees' queries regarding incorrect vacation balances on their pay stubs, the issue is now resolved. However, with the rollout of the Web-based Employee Self Service function on Feb. 9, the most accurate vacation balance information will be found online.

Final CVA Reminder: The deadline for submitting responses to the Cultural Value Analysis survey has been extended until **this Friday**. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, DE 19809 or fax to 703-738-7123.

New Campaign Aims to Eliminate Stop Signal Violations

To further advance Amtrak's position as the nation's safer, greener and healthier transportation provider, a new campaign is underway that aims to prevent stop signal violations. Initiated by the Transportation department, this comprehensive effort focuses on educating and rewarding Train and Engine employees who contribute to reaching the goal of zero stop signal violations during the fiscal year.

"We're increasing awareness, training and testing to avoid incidents on the railroad," said Steve Strachan, chief transportation officer. "Violating a stop signal could result in a collision or other accident that might cost people their lives, so we're doing everything we can to make sure it doesn't happen."

Each quarter, the campaign will focus on improving situational awareness, restricted speed, communication and teamwork through informational posters and other printed materials, which will be distributed at crew bases across the country. Supervisors will also work with engineers and conductors individually to reinforce the material before testing employees at the end of each quarter.

A unique element of the campaign is the "challenge" coin that will be given to all T&E employees. "We want everyone to keep the coin on them as a reminder of what we're trying to do," explained Strachan. "We want it to build unity among crews and reinforce the importance of safety."

As the year progresses, Strachan and his staff will host conference calls with Transportation supervisors throughout the system to evaluate the campaign and share best practices. At year's end, Strachan hopes to recognize every division for reaching the goal of zero stop signal violations.

Feb. 2, 2009

Station Improvement Activities Take Place This Week

This is an important week with regard to station improvements, as the company submits its latest report to Congress on station accessibility and hosts its fourth Civic Conversation in Savannah, Ga.

The report, a requirement of the Passenger Rail Investment and Improvement Act, outlines Amtrak's plan to make the stations it serves fully accessible to passengers with disabilities in accordance with the Americans with Disabilities Act.

"The report describes our Accessible Stations Development Plan and defines the requirements for funding, timing and cooperation to achieve full accessibility," explained Assistant Vice President, Strategic Partnerships John Bennett. "The report details the additional time and funding of \$1.56 billion we will need for the described improvements and upgrades."

The Civic Conversation on Feb. 3 and 4 is part of Government Affairs' Great American Stations program and is a forum for local, state and federal officials to discuss preservation, restoration, accessibility requirements and local funding options for consideration in upgrading train stations. Attendees are also educated on the importance of stations as local economic drivers and vital cogs in the national transportation network.

"Stations are key to improving our business," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "Even though we own only a small portion of the stations we serve, every station affects our product and each is a direct reflection on Amtrak."

Operational Changes: To improve on-time performance, beginning today, Feb. 2, *Hiawatha Service* Train 342 will operate five minutes later at all stations from Milwaukee to Chicago.

Engineering: This week, Mid-Atlantic Division Engineering forces, with the assistance of Production Engineering's Head End Gang of the Track Laying Machine, will be installing 42 wooden switch timbers and crossties on the No. 2 Track in Davis Interlocking to remove slow orders.

Employee Information Management: Training on the SAP Employee Self-Service (ESS) functionality concludes on Thursday, Feb. 5. Beginning Monday, Feb. 9, all non-agreement and ARASA-OBS employees must enter their leave requests via ESS.

Human Resources: Nomination forms for the 2009 President's Service and Safety Awards (PSSA) program are currently posted on the Intranet and can be found at "Employees" ►► "Awards and Achievements" ►► "2009 PSSA Nomination Forms." The nomination period runs until Tuesday, March 31.

Government Affairs: *Missouri River Runner* is the new name for the state-supported trains between St. Louis and Kansas City, replacing *Missouri Service* and the *Mules*. Submitted by Keith Kohler of Glendale, Mo., *Missouri River Runner* received 37 percent of the nearly 5,500 votes cast in a contest sponsored by the Missouri Department of Transportation and Amtrak.

Feb. 9, 2009

Service Recognition Program to Benefit from New Partner

Amtrak has selected a new partner for its service recognition program in an effort to better acknowledge employees who have reached service milestones. A request for proposals was sent to 12 companies last July with Oklahoma City-based MTM Recognition ultimately winning the bid.

“We wanted to bring a higher level of efficiency, creativity and customer service to the program and MTM has the experience and resources to do just that,” said Recognition Program Manager Carolyn Stagger. “Our goal is to give each department more control over the process and get managers engaged in recognizing their employees.”

Effective immediately, Human Resources will begin working with MTM to analyze and improve the company’s employee appreciation efforts.

MTM is the largest and most diversified award distributor in North America, allowing employees reaching milestones of 10 years or more to choose from a much wider range of gift options. Awards will also be shipped directly to the employee’s work location, making response times faster. Awards for employees celebrating service milestones in the first quarter of 2009 are currently being processed and will be delivered for presentation in the coming weeks.

“One of the strengths of our company is the pride and loyalty of our employees,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives. “Our goal is to make sure every employee feels valued and this is one way we can better show our appreciation.”

Operational Changes: Beginning Feb. 9 through Feb. 13, passengers traveling on Amtrak *Cascades* Trains 500 and 501 will be provided motorcoach service between Seattle, Portland and intermediate stations due to BNSF Railway track work.

Engineering: Construction of the concrete tie staging area in the West Class Yard in Hamden, Conn., to support the Track Laying System North’s work in the New England Division is underway. The track construction is being performed by Production Engineering’s Y182B TLS Prep Gang North and will include the two turnouts and 1,600 feet of track.

Marketing and Product Management: On Tuesday, Feb. 10, a morning media event is scheduled at the Port of Oakland Building in Oakland, Calif., to honor the historical legacies of Pullman porters and their contributions to the nation’s railroads. The event includes a reception and afternoon meet-and-greet with employees.

Government Affairs: On Wednesday, Feb. 11, Chief Operating Officer Bill Crosbie will testify at a hearing before the Surface Transportation Board, offering comments on the recently enacted Passenger Rail Investment and Improvement Act of 2008.

Feb. 17, 2009

Stimulus Bill Includes Funding for Amtrak Capital Programs

Operational Changes: Beginning Feb. 16 through March 15, due to Union Pacific track work, passengers on some morning and early afternoon *Capitol Corridor* trains will be provided motorcoach service between Sacramento and Suisun/Fairfield, Calif., and trains will operate on the remainder of the route according to a modified schedule.

Engineering: The installation of 3,000 linear feet of new track panels on Track No. 2 in the South Tube in New York City is underway in 55-hour outages. This phase of work will be completed in early March.

Information Technology: Beginning Feb. 18, Arrow users are required to change their private ID when prompted on the sign-on page. For more information, contact the Help Desk at 800-772-HELP (4357).

Marketing and Product Management: Beginning March 3, a new low fare will be available for *Acela Express* Business class tickets with 14-day advance purchase. Prices will be as low as \$99 between Washington and New York; \$79 between New York and Boston.

Funding Request Submitted to Congress

In other news, Amtrak submitted its annual Grant and Legislative Request to Congress today, outlining funding needs of \$1.84 billion for FY '10. The request consists of \$975 million for capital improvements, \$580 million for operating costs, \$264 million for debt service and \$21 million for the office of the Inspector General. The company also seeks an additional \$144 million not included in the \$1.84 billion for station accessibility improvements under the Americans with Disabilities Act. The request can be found online at Amtrak.com or the Intranet under "Legislative."

Amtrak will receive a total of \$1.3 billion as part of the economic stimulus bill that President Obama signed today to create jobs and spur economic activity. Of that figure, \$850 million is designated for projects that supplement capital activities for the repair, rehabilitation or upgrade of Amtrak's system, assets or infrastructure and for expanding capacity, including the rehabilitation of rolling stock. Another \$450 million is dedicated to investments in security. The funds must be awarded within 30 days of enactment by the Federal Railroad Administration in the form of grants.

Amtrak has identified 37 capital programs across its system that will create and preserve jobs and/or accelerate progress on Americans with Disabilities compliance, NEC infrastructure, rolling stock, stations, maintenance facilities and yards, customer service, technology and safety. Fourteen of the programs to be funded are in the Northeast Corridor, while 23 support system-wide initiatives that benefit, or are located in, other regions of the country. A separate plan is being finalized for the \$450 million in security investments.

The capital programs must be completed within two years of enactment. Amtrak is currently seeking FRA approval of its proposed programs through the grant agreement process, and expects to have agreements in place some time in March. More information on the projects will be forthcoming.

The legislation also makes available \$8 billion to states for high-speed rail development or other rail investments, in addition to other grants available for surface transportation projects, including rail.

"I am very happy that Congress has given us the chance to address some of our most pressing capital needs. The American Recovery and Reinvestment Act affords us an exciting opportunity to make long-term investments in passenger rail by taking on many of our backlogged construction, technology and rolling stock projects while promoting near-term economic activity," said President and CEO Joe Boardman. "We will put the money to good use."

This infusion of funding under the ARRA should not be confused with the annual appropriation Amtrak receives from the federal government and may not be used to augment the company's regular operating or capital budgets.

AMTRAK®

Operational Changes: Starting today, *Crescent* Trains 19 and 20 are operating on a regular schedule after operating on a modified schedule since Jan. 26, due to Norfolk Southern track work. The successful track work project is expected to lead to improved on-time performance and reduced slow orders.

Engineering: The New England Division Production Gang will complete the replacement of a 100-year-old, seven-foot by eight-foot rail top culvert with a new concrete slab culvert manufactured in-house in Midway/Groton, Conn.

Human Resources: Nominations for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2009 PSSA Nomination Forms." PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggc@amtrak.com.

Benefits Reminder: For information on benefits, employees are reminded to direct their inquiries to the Amtrak Benefits Service Center at 800-481-4887, or log onto amtrakbenefits.com.

Message from the President and CEO

Dear Co-workers,

As I travel across the country, I often meet people who tell me about how much potential Amtrak has. The truth is, Amtrak has seen a promising future since 1971. I know you think you've heard it before, but I'd like to tell you why it's true in 2009.

Three major reasons: For the first time in a long while, we have some clear direction from Congress on the future of Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act is our blueprint and aims to make enduring improvements in passenger rail.

As part of the stimulus bill signed by the president last week, we will receive \$1.3 billion to make significant strides on capital programs. Among other things, we'll return to service 100 cars that are currently sidelined, completely replace the Niantic River Bridge in Connecticut, install more Positive Train Control systems and make major Americans with Disabilities Act modifications to our stations. The law also provides money for states to make rail investments of their own, and they're coming to us for our expertise.

And we have an administration that seems to be building a legacy defined in part by the development of high-speed rail. I believe that this administration is more likely than any other in recent history to be open to making additional investments in passenger rail.

All of these elements combine to help us realize great potential. But that's just it — it's only potential if we don't believe in the direction we're taking and make it happen. Sometimes I wonder if we've become conditioned to low expectations over the years, surviving from year to year, and thinking that no one expects big things from Amtrak. Well, I expect big things from us. We need to open our collective hearts and minds to the Amtrak we know we can be. That is the safer, greener and healthier Amtrak I envision.

That's where vision and leading by example come in. I'm not just talking about forward movement, I'm taking the steps. Just last week, I met with vendors about how quickly they can deliver the Viewliners we need for our long-distance fleet. I intend to replace the electric locomotive fleet and am seeking the funding to do that. I want to electrify the railroad to Richmond and I'll be studying the cost estimates on that next week. And I listen — we have a great deal of talent and dedication; our employees have good ideas and they need to be heard.

The time to harness our future is now and we're moving ahead with renewed energy. I care very much about our future and I know you do, too. Together, we must embrace the opportunities that are before us and run with them — for us, for our customers and for our country.

Sincerely,

Joe Boardman
President and CEO

P.S. By the way, I know everyone wants to know the details of our proposed "stimulus" capital programs, I'll share the list with you as soon as we've finalized it with the FRA — I wouldn't want to mislead you.

AMTRAK®

This Week

AMTRAK®

Benefits: Individual parking and mass transit account balances as of Dec. 31 have been transferred from SHPS to WageWorks. If you have any questions or would like to confirm your mass transit or parking account balance, visit www.wageworks.com or call customer service at 877-924-3967.

Human Resources: All employees should have received their 2008 W-2 Wage and Tax Statement. If you have not received your statement, e-mail Payroll Operations at payroll@amtrak.com.

State Partnerships: Engineering, Transportation, Strategic Partnerships and Government Affairs personnel last week met with Connecticut DOT and Rhode Island DOT on upcoming plans for track work, including improvements to the Springfield Line.

LaHood Joins Board

U.S. Secretary of Transportation Ray LaHood was officially named to the Amtrak board of directors by President Obama on Feb. 26. A native of Peoria, Ill., LaHood is a 14-year veteran of the U.S. House of Representatives, where he served on the Transportation and Infrastructure Committee and later the Appropriations Committee.

Biden Resigns

Also last week, R. Hunter Biden resigned from the board stating, "Serving on the board has been a great honor ... Now that Amtrak has a supportive administration in the White House, I believe my service on the board is not as crucial. I have tremendous confidence in the board and current leadership of Amtrak and am grateful for the opportunity to have served."

Stimulus Programs Under Review

Amtrak's proposal for the use of \$1.3 billion it will receive in stimulus funding as part of the American Recovery and Reinvestment Act is currently under review by the Federal Railroad Administration. The money will be used to begin or accelerate capital programs across the system and make investments in rail security. Approval is expected by mid-March and details will be provided at that time.

In related news, the FRA unveiled an outline of its proposed budget for FY '10 last week, which includes a five-year, \$5 billion high-speed rail state grant program. The funding would augment the \$8 billion for high-speed rail development already included in the ARRA for states. Specifics of the budget's effects on Amtrak are expected to be included in a later version, but the company anticipates it will benefit through state infrastructure projects or by applying for these funds in ways similar to the stimulus package.

APD, OSSSO Host British Transport Police

Members of the British Transport Police are in Washington this week to work with Amtrak Police and the Office of Security Strategy and Special Operations as part of the first major exchange of rail security and counterterrorism practices between the U.S. and U.K. The two groups will jointly patrol stations and trains throughout the week to share lessons learned and best policing practices to better protect rail passengers on both sides of the Atlantic.

Former COO Hackney Passes Away

A distinguished member of the Amtrak family, Thomas P. Hackney Jr., passed away on Feb. 24 at the age of 88 in Huntingdon, W. Va. He retired in 1986 as chief operating officer after seven years of service. Prior to joining the company, Hackney was a machinist in the U.S. Navy during World War II and worked for the Chesapeake & Ohio Railway and Chessie System for nearly 40 years.

"Tom was an 'old school' railroader in every positive sense of the word – he took pride in his trains and his people," said Fred Weiderhold, inspector general. "He effectively led the operations department through its fleet transition and more importantly, he was a friend and mentor to those of us just joining the industry. Much of what he taught is still alive in the company."

Government Affairs: The omnibus bill that includes Amtrak FY '09 appropriations is expected to be passed by Congress this week. Since October, federal funding has been provided at FY '08 levels under Continuing Resolutions. The CR that expired on Friday has been extended through midnight on Wednesday, March 11.

Operational Changes: Due to CSX track work, motorcoach service will be provided on the *Palmetto* between Richmond and Rocky Mount and the *Carolinian* will be cancelled between New York and Raleigh on select weekdays from March 9 through April 17. In addition, *Palmetto* schedules will be slightly adjusted and checked baggage will not be available for travel that includes motorcoach service.

February Performance: System ridership for February was down 9 percent from last year, while revenue fell by 11 percent. However, February 2008 had an extra day due to leap year, which accounts for about half the difference. Long-distance trains continue to offset declines in corridor service, with ridership and revenue increasing 9 and 8 percent over last year, respectively.

Policy Changes: A revised corporate policy on photography and video recording on company property will be distributed this week via Arrow, OSA, and APD General Order. It will also be posted on Amtrak.com and the Intranet under "Security."

Availability of High-Speed Rail Funding Prompts State Activity

Amtrak board of directors Chairman Tom Carper joined Amtrak and Union Pacific officials at Chicago Union Station today for a roundtable discussion with Sen. Dick Durbin (D-IL), Illinois Gov. Pat Quinn and Illinois Transportation Secretary Gary Hannig about funding needs for high-speed passenger rail development from Chicago to St. Louis and the state's plan to compete for stimulus funding.

The American Recovery and Reinvestment Act includes \$8 billion for high-speed and intercity rail investment grants, which will be awarded to states by the Federal Railroad Administration on a competitive basis. The availability of federal funding for high-speed rail under ARRA, along with the \$5 billion President Obama has proposed as part of his transportation budget over the next five years, has spurred states across the country to move on plans for development or expansion of passenger rail service.

"States are seeing real potential for improving rail service and the possibilities of high-speed rail," said Ray Lang, national director, State Relations. Amtrak is working with a number of states that have sought assistance with expanding existing and new rail corridors.

The Federal Railroad Administration is currently crafting the grant program; guidelines are expected to be published by the FRA in mid-June.

What's Your Green I.Q.?

Over the next three weeks, *Amtrak This Week* will test your knowledge of environmental issues. The first person to e-mail the correct answer to ecom@amtrak.com will have his or her photo and answer published in the April "green" issue of *Amtrak Ink*. There must be a new winner each week; employees with full-time environmental duties are not eligible.

This Week's Question:

Amtrak has committed to reducing its greenhouse gas emissions from diesel fuel through its voluntary agreement with the Chicago Climate Exchange; by how much did the company agree to reduce its diesel fuel emissions from 2003 to 2010?

- a) 1.5 percent
- b) 3.0 percent
- c) 6.0 percent
- d) 9.5 percent

Benefits: The federal government has increased the pre-tax mass transit limit from \$120 to \$230 per month. To increase your deduction, log onto amtrakbenefits.com or call 800-481-4887.

PSSA Reminder: Nominations for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms."

Engineering: The Production Switch Exchange System, with the assistance of New York Division Engineering forces, will be completing the reconstruction of the No. 23 crossover at Union Interlocking in Rahway, N.J. this weekend.

Arrow Update: Beginning March 17, all Arrow users must have an eight-digit private ID that includes at least one letter and one number to enhance data security. Users without a complying ID will not be able to enter the system.

Marketing: Visit Amtrak.com to view new TV commercials airing in eight major cities promoting Amtrak train travel and *Acela Express* service. Click the "Family Travel" link in the right-hand margin or go to the *Acela* route page.

What's Your Green I.Q.?

How many tons of scrap metal from maintenance operations did Amtrak recycle last year?

- | | |
|-----------|-----------|
| a.) 10 | b.) 100 |
| c.) 1,000 | d.) 5,000 |

E-mail the correct answer to ecom@amtrak.com. The winner will be selected at random from the first 50 correct responses received and will have his or her photo and answer published in the April "green" issue of *Amtrak Ink*. Employees with full-time environmental duties are not eligible.

Last week's winner was Harris Cohen, project manager, Customer Service Solutions, who correctly answered that Amtrak agreed to reduce its greenhouse gas emissions by 6 percent from 2003 to 2010.

Biden Announces Amtrak Stimulus Programs at Washington Union Station

Further demonstrating the administration's support for passenger rail, Vice President Joe Biden hosted a track-side press conference at Washington Union Station on Friday to announce capital programs that will be funded through the \$1.3 billion provided to Amtrak via the American Recovery and Reinvestment Act.

Joining Biden were Acting FRA Deputy Administrator Jo Strang, board of directors Vice Chairman Donna McLean and 11 members of the U.S. House of Representatives and U.S. Senate.

"For too long we have failed to make the investments we should have been making in Amtrak in order to provide the kind of reliable and secure intercity rail service that our people depend on and our economy needs," said Vice President Biden.

Biden emphasized the necessity of a healthy passenger rail network to relieve highway congestion, reduce pollution and decrease energy needs.

Stimulus programs for Amtrak will include over \$400 million in capital improvements on the Northeast Corridor, including \$105 million to replace the Niantic River Bridge and \$63 million to improve reliability of electrical power.

A total of 68 passenger cars will be repaired and returned to service and \$100 million will be spent on improvements to stations and facilities throughout the system. Also included in the package is \$60 million to install Positive Train Control systems on the Michigan Line. Additionally, the recovery act will fund other technology projects along with security-related infrastructure and station improvements.

"The Vice President understands the importance of our company and we're honored that he personally came to make this announcement here at our corporate headquarters," said President and CEO Joe Boardman. "We have great opportunities ahead of us and we're ready to move on these projects to connect America in safer, greener and healthier ways."

The final FRA-approved list of capital programs to be funded through the stimulus is expected to be posted on the Internet at www.recovery.gov later this week.

Engineering: The System Production Wood Tie Gang will start the installation of 40,000 wood ties on Track 2 of the Springfield Line from Quarry to Mill River on March 30. This is the last phase of a two-year tie renewal program and should be complete in July.

PSSA Reminder: Nominations for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms."

Back Pay Update: President and CEO Joe Boardman announced last week that all eligible agreement-covered employees who received the first round of back payments will receive the remaining 60 percent via separate check on May 1.

What's Your Green I.Q.?

Transportation accounts for what percentage of the total energy used in the United States?

- a.) 10% b.) 25%
- c.) 30% d.) 50%

This is the third and final question of the "Green I.Q." challenge. E-mail the correct answer to ecom@amtrak.com. The winner will be selected at random from the first 50 correct responses received and will have his or her photo and answer published in the April "green" issue of *Amtrak Ink*. Employees with full-time environmental duties are not eligible.

Last week's winner was Gerry Davis, specialist, Finance, who correctly answered that Amtrak recycled 5,000 tons of scrap metal from maintenance operations last year.

America Invited to "Discover the Rail Way" at National Train Day Events on May 9

The second annual National Train Day is set for May 9, and major events are planned at stations in Washington, D.C., Philadelphia, Chicago and Los Angeles, with many more locally organized events in communities nationwide.

This year, guests will "Discover the Rail Way" and celebrate the past, present and future of train travel with live music and entertainment, interactive green exhibits, VIP appearances, a kid's corner, train equipment displays and more.

"Our goal is to celebrate train travel and showcase how trains have shaped our lives and allowed families and friends to stay connected to each other personally and professionally," said Emmett Fremaux, vice president, Marketing and Product Management. "The events will feature interactive exhibits educating the public about the benefits of train travel."

In addition to the four main events, the company is inviting local communities to participate by hosting their own National Train Day event. Templates for signage and collateral materials are provided on the Web at www.NationalTrainDay.com. Last year, employees, chambers of commerce and other local organizations hosted nearly 100 events in communities across the country.

"We had great success in 2008, and have already seen great enthusiasm for this year's National Train Day," said Michele White, director, Entertainment and Sports Marketing. "This is another way for us to build loyalty and enthusiasm for train travel among employees and the communities we serve."

A national celebrity spokesperson will be selected to raise awareness of National Train Day in the media. Additionally, up and coming musical artists will perform at each of the major events. Details are being confirmed and announcements will be made within the next couple of weeks.

Visit www.NationalTrainDay.com for information and updates, or to request assistance in hosting an event at a local train station.

Operations Update: Beginning April 5, schedules for trains operating throughout the Empire District between Niagara Falls, Albany-Rensselaer and New York will be adjusted due to track work being performed by Metro-North Railroad.

Engineering: The Production Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will complete the reconstruction of the No. 85 crossover at Union Interlocking in Rahway, N.J., by installing the 85B switch this weekend.

PSSA Update: The deadline for submitting PSSA nominations has been extended from March 31 to April 17. Forms are posted on the Intranet at “Employees” → “Awards and Achievements” → “2009 PSSA Nomination Forms.”

What’s Your Green I.Q.?

Thank you to all employees who participated in the Green I.Q. challenge.

Last week’s winner was Yolanda Thomas, manager, Information Technology, who correctly answered that transportation accounts for approximately 30 percent of all energy used in the United States.

All three winners and their correct answers will be posted in the upcoming April “green” issue of *Amtrak Ink*.

Crew Uses Defibrillator Training to Save Passenger

On March 28, crew members aboard *Silver Meteor* Train 98 saved the life of a passenger suffering from a heart attack by using the on-board Automatic External Defibrillator.

The passenger began suffering heart attack symptoms and lost consciousness shortly after 9 p.m., when his wife notified Sleeping Car Attendant Eastlyn Delabastide. She immediately alerted Conductor Russell Denson and Assistant Conductor Eric Morrison, who brought the AED and administered one charge, returning the patient’s heartbeat to a normal rhythm. Engineer Bryan Morrison stopped the train in Ravenel, S.C., while the crew monitored the patient until local paramedics arrived.

“This is another life saved thanks to proper training, proper equipment and professional composure of a talented crew,” said Chief Operating Officer William Crosbie. “I want to commend Russell, Eric, Eastlyn and Bryan for a job well done. They’re an example of the great job our employees do every day throughout the system.”

Operations Update: *Regional Shuttle* Trains 495, 493, 490 and 470 are cancelled between New Haven and Hartford, Conn., on Mondays – Fridays starting April 6 to accommodate Springfield Line track work. Alternate motorcoach service will be offered for most city pairs.

Engineering: The System New England Division Tie and Surface Gangs will finish work on the No. 1 track at Meriden, Conn., on the Springfield Line. Work will continue between New Haven and Hartford to replace 36,000 additional wood ties, surface track, weld joints, remove weld-ings straps and clean the right-of-way by June 30.

Benefits: April 15 is the deadline to submit 2008 health or dependent care claims to SHPS. You may be reimbursed for any dependent care expense incurred in calendar year 2008 and healthcare expense incurred between January 1, 2008 and March 15, 2009. If you have any questions, call SHPS at 800-678-6684.

Procurement: Effective immediately, all purchase requisitions related to stimulus projects should include “ARRA” as the first word in the line item description followed by the approved project number and approved dollar amount. All line items must have a valid combination of stimulus function code and work element.

Employee Appreciation Day: In a letter last week, President and CEO Boardman announced that the company’s 38th anniversary on May 1 will be dedicated to the workforce as Employee Appreciation Day. More information on specific events across the country will be provided in the coming weeks.

Major NEC Schedule Changes Beginning Soon

Beginning this month, Amtrak, CSX Transportation, Metro-North Railroad and New England Central Railroad will begin performing extensive track maintenance in the Northeast, resulting in several schedule changes from April through September that will affect *Acela Express*, *Northeast Regional*, *Adirondack*, *Empire Service*, *Ethan Allen Express*, *Maple Leaf*, *Keystone Service*, *Pennsylvanian*, *Lake Shore Limited* and *Vermont* services.

Accordingly, information for station employees, call center agents, On-Board Service and Train and Engine crews will be distributed this week in the form of an Operations Service Advisory (OSA) and Arrow message.

Schedules printed in the Fall 2008-Winter 2009 System Timetable and individual schedule cards for most trains operating in the Northeast will no longer be valid due to the magnitude of the track work and the extent of necessary service changes.

In addition, schedules for many trains operating throughout the Northeast will not be published in the 2009 Spring-Summer System Timetable, which becomes effective May 11, 2009. However, up-to-date schedules will be available for download and printing at Amtrak.com.

Passengers will be notified of these service changes via station and on-board announcements, station notices, seat drops on certain routes and on Amtrak.com. Press releases will also be issued. For current information, passengers should be directed to visit Amtrak.com, call 1-800-USA-RAIL or speak with a ticket agent.

AMTRAK®

This Week

A Weekly Publication

AMTRAK®

Engineering: The System Production Switch & Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, will begin the installation of curve patch rail on the Harrisburg Line's Tracks No. 1 and 4 west of Paoli. The gang will utilize the next five weekends to complete the project.

Transportation: As of April 12, the 559 *Acela Express* departures operated since March 23 had an unprecedented on-time performance of 97.1 percent. Only 16 trains were lost in 21 days thanks to the collaborative efforts of Transportation, Engineering and Mechanical forces in the Mid-Atlantic and Northeast Divisions.

PSSA Reminder: Nominations for the 2009 President's Service and Safety Awards will be accepted through April 17. Forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms."

Corporate Communications: NBC Nightly News and Good Morning America Weekend aired segments on April 11 and 12, respectively, about President Obama's upcoming announcement on the use of the \$8 billion in high-speed rail stimulus funding. Both segments featured President and CEO Joe Boardman. To see the GMA segment, visit <http://abcnews.go.com/GMA/Weekend>.

"Trainiac" Trivia

Answer the following National Train Day-related trivia question correctly and you could receive a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*.

E-mail your answer to ecom@amtrak.com. The winner will be selected at random from those who respond correctly. *Hint: Answers can be found at NationalTrainDay.com.*

Which city is hosting a major National Train Day event for the first time?

- a.) Washington, D.C. b.) Philadelphia
- c.) Chicago d.) Los Angeles

Randy Jackson Signs On for National Train Day

American Idol Judge Randy Jackson will be the official spokesperson for the second annual National Train Day, and will kick-off the festivities in Washington, D.C., on May 9. Other major events will be hosted in Philadelphia, Chicago and Los Angeles, with many smaller events in communities nationwide.

"As one of the hosts of the most watched TV show in America, Randy is supporting our goal of raising the profile of train travel as an important part of American culture," said Emmett Fremaux, vice president of Marketing and Product Management.

"Showing support for Amtrak's National Train Day reinforces my belief that trains are the backbone of America," said Jackson.

The four major events will feature live musical performances from up-and-coming and local artists. The event in Washington will feature Grammy nominee Karina Pasian and a soon-to-be-announced headliner. In Philadelphia, Jon McLaughlin, singer of the Acedemy Award-nominated song "So Close" and singer-songwriter Rachael Yamagata will perform.

Daughter of legendary blues guitarist Johnny Copeland, Shemekia Copeland and emerging R&B artist, Unique, will take the stage in Chicago. And train enthusiasts in Los Angeles will enjoy performances by singer-songwriter Matt Costa and Chana, a new artist who is receiving accolades from several media outlets for her tropical sound.

Employees are invited to bring their families to enjoy the interactive Eco Exhibits, displays of model railroads, as well as Amtrak and historic train cars, paintings from notable train artist J. Craig Thorpe, and more. The AmtraKids Depot will feature educational hands-on activities, appearances by Radio Disney's Rockin' Road Crew, magicians and face painters. For more information, visit NationalTrainDay.com.

Engineering: The System Production Track Laying Machine begins its summer production season at Hunter Interlocking, west of Newark, N.J., installing nearly 5,000 concrete ties over the next four weeks.

Government Affairs: The Senate confirmation hearing for Joseph Szabo, a former United Transportation Union official and President Obama's nominee for FRA Administrator, will take place on April 22.

Employee Appreciation Day Reminder: Amtrak's 38th anniversary on May 1 has been dedicated as Employee Appreciation Day. Special events to help employees become safer, greener and healthier — personally and professionally — will take place at 39 locations across the country.

Be a Part of National Train Day

The second annual National Train Day is on May 9, and employee volunteers are needed to serve a variety of roles. Volunteers will receive a complimentary National Train Day polo shirt and refreshments.

To volunteer at a major event, send your name, department, shirt size and contact information to:

Chicago: Tracy Robinson, Robi3181@amtrak.com
 L.A.: Don Wong, WongD@amtrak.com
 D.C.: Saunya Connelly, ConnelS@amtrak.com
 Phil.: Kecia Babb-Jordan, JordanK@amtrak.com

"Trainiac" Trivia

Which one of this year's National Train Day performers sang at the 2008 Academy Awards?

- a.) Shemekia Copeland b.) Matt Costa
 c.) Rachael Yamagata d.) Jon McLaughlin

E-mail your answer to ecom@amtrak.com. Respond correctly and you could win a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*. *Hint: The answer can be found at NationalTrainDay.com.*

Last week's winner was Jim Gordon, foreman II, Beech Grove Maintenance Facility, who correctly answered that Philadelphia is hosting a major National Train Day event for the first time.

President Obama Unveils Strategy for High-Speed Rail

On April 16, Secretary of Transportation Ray LaHood and Vice President Biden joined President Obama to announce the administration's strategic plan for the development of high-speed rail (HSR). Obama said his plan builds on the highway and aviation development models used over the last century to create a clean, energy-efficient rail system that will fuel economic expansion through public-private partnerships.

The \$8 billion set aside for passenger rail in the American Recovery and Reinvestment Act will be used to jump-start the process by funding infrastructure projects that will improve existing service, corridor capital programs and HSR corridor development.

Amtrak is eligible to apply for ARRA funding for HSR corridor development independently and can apply for infrastructure projects in cooperation with states.

Grants for projects will be given to those that are ready to begin, have completed environmental and preliminary engineering work, and have an emphasis on near term job creation.

"Amtrak applauds the major investment and higher-speed passenger trains called for by the President," said President and CEO Joe Boardman. "We look forward to partnering with federal and state governments to advance new, faster and more frequent train service."

On-Board Recycling Begins Nationwide

An interdepartmental initiative to recycle newspapers, bottles and cans in every food service car across the system is on schedule to be completed this week. Passenger awareness campaigns will also launch aboard certain trains to promote the "greener" service.

"Earth Day is this week (April 22) so there couldn't be a more appropriate time for this project to come to fruition," said Roy Deitchman, vice president, Environmental Health and Safety.

The project is a joint effort between Environmental Health and Safety, Marketing and Product Management, Mechanical, Engineering, Transportation and Government Affairs.

Some food service cars have had existing trash receptacles re-labeled for recycling, while others have been fitted with custom-built containers. The cross-functional team found solutions to meet the needs of on-board crews while also meeting the requirements of FRA fire and safety codes.

"This is a major step forward in making Amtrak service greener and it took a tremendous amount of teamwork," said Chief Operating Officer William Crosbie. "It's great for the environment and it helps build passenger loyalty."

Message From Joe Boardman

Last Thursday I set off on the *Capitol Limited*, beginning a three-week cross-country journey to visit some of our locations, meet employees and call on state partners. In Chicago on Friday, I talked to employees in a Block Training class and visited the yards again. I told employees about the upgrades we'll be making to the mechanical facilities there, such as improving the heating system and replacing the roofs on some buildings.

On Saturday, I met Sen. Tester of Montana for a brief press conference during the *Empire Builder's* dwell time at Havre. One of the reporters asked what I have seen change, and I said take a look at the faces of the employees right here on the "high-line"; they represent our strongest competitive advantage, and they are encouraged with the support that the President, Vice President and legislators like Sens. Tester and Baucus.

As we traveled through Glacier Park people at the Izaak Walton Inn held up a banner saying "We love Amtrak." How wonderfully everyone has treated us along the way — it really makes such a memorable trip to be around committed employees and those who depend on our service.

Today I'm in Seattle, meeting employees and touring the yard. Our employees here do an excellent job of maintaining Amtrak *Cascades* and Sounder commuter service equipment as well as servicing the *Empire Builder* and *Coast Starlight*. Improvements at the Seattle yard are long overdue and we remain committed to building a new facility there.

Tomorrow, I'll take the *Coast Starlight* to Oakland. I'm looking forward to visiting the Oakland Maintenance Facility on Wednesday, as well as the San Jose mechanical facility where our employees provide repair and maintenance service for the Caltrain commuter service. I understand I will also get a chance to meet the crews of the two trains that we had a close call with in Oceanside, along with a planned barbeque for employees in San Diego.

Friday will be spent in Los Angeles, greeting employees at the station and offices there. I'm eager to check out the yard, which is slated for a new preventive maintenance facility for the Superliner equipment our employees work on thanks to stimulus funds. I'm sure I'll find Saturday's visit to the call center in Riverside interesting and maybe even get to listen in on some of our calls.

I'll spend Employee Appreciation Day on Friday in L.A. On that day, 39 locations across the system will be holding events designed to provide you information and resources to be a safer, greener and healthier employee. Smaller locations are observing that day in other ways as well. I designated May 1 Employee Appreciation Day, because while we might celebrate our 38th anniversary on that day, it's the people behind Amtrak that are to be recognized. That will also be the day those eligible will receive the 60 percent of the retroactive pay.

My travels afford me the opportunity to meet many of you and to remind you that we need to adjust our collective thinking to go beyond getting through the day or week. We are in the midst of an historic and pivotal period for passenger rail — think big, because America expects big things from us.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Transportation: Effective June 1, all employees who work on trains that cross the Canadian border will be required to have documents compliant with the Western Hemisphere Travel Initiative established by the U.S. Departments of State and Homeland Security. Acceptable travel documents include a U.S. passport, U.S. passport card or a state-issued enhanced driver's license.

Government Affairs: Chief Financial Officer DJ Stadler will testify on Amtrak's progress on American Recovery and Reinvestment Act projects at a House Transportation and Infrastructure Committee hearing on April 29.

Procurement: Vendors inquiring about projects funded by the American Recovery and Reinvestment Act should be directed to the new Procurement portal for information and guidelines at <http://procurement.amtrak.com>. Progress reports and information on ARRA projects can be found on the Intranet under "How We Work" → "Finance" → "Economic Stimulus Guidelines."

"Trainiac" Trivia

What is the name of the rail car that carried President Obama prior to his inauguration and will be on display in Washington on National Train Day?

- a.) Georgia 300 b.) Dover Harbor
- c.) Cannon Ball d.) Greenwich Harbor

E-mail your answer to ecom@amtrak.com by noon EST on April 30. Respond correctly and you could win a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*.

Last week's winner was Michael Schmidt, engineer, Facility Maintenance, who correctly answered that National Train Day performer Jon McLaughlin sang at the 2008 Academy Awards.

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division forces, has begun installing 10 new turnouts in North Penn Interlocking in Philadelphia. Each turnout will be installed on a 55-hour weekend outage through mid-July.

Government Affairs: Joseph Szabo was confirmed by the U.S. Senate as the 13th administrator of the Federal Railroad Administration on April 29. He most recently served as Illinois state legislative director for the United Transportation Union.

Benefits: Employees with questions about their benefits should call the Amtrak Benefits Service Center at 800-481-4887 or log on to amtrakbenefits.com for more information.

Special Recognition: After a water main break flooded tracks near Baltimore last week, Engineering, Transportation and Mechanical teams worked diligently to manage the disruption and restore service along the Northeast Corridor. "Once again, our employees overcame a challenge with skill and efficiency. Thanks to each one of you for your commitment and professionalism," said COO William Crosbie.

National Train Day is this Saturday

Communities across the country will celebrate National Train Day on May 9. Employees are invited to bring their families to join in the festivities.

Major Amtrak-sponsored events are taking place at Los Angeles Union Station, Chicago Union Station, Philadelphia 30th Street Station and Washington (DC) Union Station from 10 a.m. to 3 p.m. local time.

Congratulations to last week's Trainiac Trivia contest winner, Dianne Ross, manager, Uniform Programs. She correctly answered that President Obama rode in the Georgia 300 rail car prior to his inauguration. The car will be on display in Washington on National Train Day.

Message From Joe Boardman

Dear Co-workers,

I've spent the last 10 consecutive days on the road, visiting our facilities and meeting many of you, from Chicago to Seattle and Oakland and places in between.

I was in Los Angeles for Employee Appreciation Day. We had very good participation and I was very happy to see the health screening that was available for all, along with information on EAP and the support for Operation RedBlock. I'd like to see us find a way to do this every year if you think it was worth it. It's one of the ways Amtrak can show its commitment to you, and it's perfect for becoming "Healthier."

I visited the Riverside Call Center on Saturday and while it was planned for me to listen in on some calls, I found engaging our employees was a better use of my time. I spoke, and listened and I tried to answer questions. I found people who want to get the job done well for Amtrak. I am constantly humbled by how well I am received and treated by the men and women that work in this company. Thank you all for what you do day-in and day-out in your efforts to bring excellent service to our customers.

My journey continues this week with a visit to San Diego. Then I'll be taking the *Southwest Chief* from L.A. back to Chicago, in time to attend the National Train Day event there on May 9. In addition to entertainment and train displays, special exhibits at the events in Los Angeles, Chicago, Philadelphia and Washington, D.C., this year will showcase the positive role passenger rail plays in the economy and sound environmental stewardship. Our national spokesperson, "American Idol" judge Randy Jackson, will help draw national attention, as we aim to raise awareness of the benefits of passenger rail across the country.

But I think events like Employee Appreciation Day and National Train Day also help bring us all closer together, fortifying our sense of purpose. There are dozens of other NTD events being held in communities across the country and I strongly encourage you and your family to visit one of those locations if you can. Go to NationalTrainDay.com for information.

On another more serious note, I want you to know that we are closely monitoring the developments associated with the outbreak of the H1N1 virus and following recommendations from the Centers for Disease Control. We have activated our Pandemic Plan, and have taken some measures to help safeguard the well-being of our employees and passengers. One of the best things you can do for yourself, your co-workers and passengers is to stop the spread of germs by thoroughly and frequently washing your hands. It's an obvious point, but I can't overstate how important this is.

Our employees have a great deal of pride in the work they do and that energy can be felt as I travel across the country. I saw that pride in employees' eyes at the Employee Appreciation Day event in L.A., and I know I'll see it in the faces of employees at National Train Day. Harnessing that energy will drive us to a safer, greener and healthier Amtrak. Thank you for your support. Stay safe and healthy.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Operation Changes: From May 11 through June 25, *Palmetto* Train 90 will operate up to two hours earlier than the published schedule on Mondays through Thursdays due to track work being performed by CSX Transportation.

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division forces, will be installing the 93/87 switch in North Penn Interlocking in Philadelphia this weekend.

Ridership and Revenue: System ridership and ticket revenue for April were down 2 and 5 percent, respectively, compared to last year. Long-distance trains performed best during the month, with an overall gain in ridership of 6 percent and a 7 percent improvement in revenue over last April.

Thank You National Train Day Volunteers

The second annual National Train Day on May 9 was a huge success, with tens of thousands of people attending the four major events held in Washington, D.C., Philadelphia, Chicago and Los Angeles, in addition to 130 events held nationwide.

“These events celebrated the past, present and future of trains in this country and helped us attract potential new passengers and educate the public about the benefits of rail travel,” said Emmett Fremaux, vice president, Marketing and Product Management. “It could not have happened without the hundreds of dedicated employees who teamed up to make it possible.”

New Timetable Now in Effect

The new 2009 Spring/Summer System Timetable that becomes effective today reflects minor nationwide schedule adjustments aimed at improving route performance.

The most notable change is the omission of several schedules for trains that operate in the Northeast including *Acela Express*, *Northeast Regional*, *Empire Service*, *Maple Leaf*, *Keystone Service* and *Vermont*.

These schedules were not published due to several planned schedule changes through September to accommodate track work being performed by Amtrak, CSX Transportation, Metro-North Railroad and New England Central Railroad.

During this period, up-to-date schedules will be posted on Amtrak.com, where they can be downloaded and printed. Passengers are being notified of the changes via station notices, on-board announcements and seat drops on certain routes.

Highlighted schedule changes in Chicago include an earlier departure of 15 minutes by *Capitol Limited* Train 30, while *Lake Shore Limited* Train 48 will depart one hour earlier.

In the south, *Piedmont* Train 73 will depart Raleigh, N.C., 10 minutes earlier than the previous schedule and Train 74 will depart Charlotte, N.C., 25 minutes earlier.

The *Texas Eagle* will depart St. Louis 35 minutes earlier, arriving in Chicago 15 minutes earlier to improve its meets with other trains that operate on the corridor.

Transportation: In honor of the men and women who have given their lives in service to the country, Amtrak will observe a nationwide moment of silence on Memorial Day, May 25, at 3 p.m. local time. Locomotive horns will sound at that time to mark the moment of silence.

Marketing and Product Management:

Amtrak is partnering with the state of Michigan to host Michigan Days on May 22 in Chicago Union Station, where representatives from the various cities and convention and visitors' bureaus provide passengers and employees with travel and tourist information on Michigan cities served by Amtrak.

Public Health: The Amtrak Pandemic Flu Contingency Plan is still in effect in response to the current outbreak of H1N1 (swine) flu. The company is continually monitoring the situation and all possible cases of H1N1 among passengers and staff. Employees are reminded to follow the Serious Communicable Disease Procedures outlined in service manuals.

Disney Train Tour Rolls Out This Week

Amtrak has partnered with Walt Disney Studios and HP to create a four-car interactive trainset that will make 40 stops from coast to coast promoting the upcoming animated film *A Christmas Carol*. The tour kicks off on May 22 in Los Angeles and concludes on Nov. 1 in New York City.

"This is a huge partnership opportunity that allows us to leverage the marketing power of Disney and the spectacular events for which they're known," said Emmett Fremaux, vice president, Marketing and Product Management.

The 16,000-mile "Disney's *A Christmas Carol* Train Tour" will utilize company locomotives, Train and Engine crews and other support staff. On-board technology is being provided by HP. Disney is reimbursing Amtrak for the operating costs.

Each stop will be from one to three days and will include a press conference and free program to simulate the new 3-D digital animation technology used in the movie. Guests will also get a 10-minute sneak preview of the movie, which is set to open in theaters on Nov. 6 and stars Jim Carrey. Amtrak will participate in the press events and be on site at each stop to promote rail service to attendees. Full information can be found at www.ChristmasCarolTrainTour.com.

Company Breaks Ground on Renovation of Sanford Auto Train Terminal

May 18 marks the beginning of the *Auto Train* terminal renovation in Sanford, Fla., with a groundbreaking ceremony attended by U.S. Rep. John Mica (R-FL) along with state, county and local officials as well as District Superintendent Fred Nardelli and other Amtrak employees.

Funded in large part by the American Recovery and Reinvestment Act, the project includes major upgrades to the station's interior and exterior, while an expansion will allow several of the current facility's stand-alone buildings to be consolidated under one roof.

Construction plans call for a new 600-seat enclosed waiting area along with a gift shop and café. Related above-ground and underground utility infrastructure as well as new paving, sidewalks and platform areas will also be constructed.

The new Sanford station, which is scheduled for completion in December 2010, will include a number of energy saving features in the lighting, HVAC and insulating systems.

Operation Changes: Beginning May 25 through June 18, southbound *City of New Orleans* Train 59 will operate on a later schedule from Memphis to New Orleans, due to track work being performed by Canadian National Railway.

Media Relations: Beginning this week, daily news clippings that are distributed via e-mail and available on the Intranet are now easier to use, better organized and more complete thanks to a new technology platform. View the latest media coverage on the Intranet at “News” → “News Clips.”

Information Technology: Laptop users that have experienced problems with outdated information in their Outlook address book can quickly correct the issue while connected to the network. On the Intranet, go to the IT page under “How We Work” and select “Customers Menu” → “Education and Training” → “News You Can Use” → “Microsoft Outlook Information.”

What Did You Think of Employee Appreciation Day?

Dear Co-Workers,

We dedicated the company’s 38th anniversary on May 1 to you as a way to say thanks for the time and effort you put in to running a great railroad. I want to thank everyone who attended, organized and planned an Employee Appreciation Day event — I appreciate your hard work and enthusiasm.

At events across the country, our goal was to provide activities, tools and resources to help you become a safer, greener, healthier employee both personally and professionally.

I’m interested in hearing what you thought about Employee Appreciation Day. What did you find beneficial? What would you change? How can we improve it?

I want to continue using these events to enhance communication throughout the company, so your feedback is very important to me. Please send me an e-mail with your thoughts to the Employee Communications mailbox at ecom@amtrak.com.

I look forward to hearing from you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Boardman', written in a cursive style.

Joe Boardman
President and CEO

New Fare Promotion Offered on NEC Services

A new *Northeast Regional* fare promotion introduced last week offers passengers up to 25 percent off the lowest current fare, with special \$49 fares between Washington-New York and New York-Boston. Tickets must be purchased 14 days in advance for travel between June 2 and Sept. 3.

“Since launching the promotion, we’ve received considerable media coverage and we’re supporting the promotion with an integrated advertising campaign,” said Emmett Fremaux, vice president, Marketing and Product Management.

Additionally, the current fare promotion for *Acela Express* service that began in February has been extended through Sept. 3 and also requires a 14-day advance purchase.

Information Technology: All non-agreement employees and contractors will now be required to take the new Information Security Awareness Training course annually. For details and FAQs, visit the IT page on the Intranet under “How We Work” and click “IT Customers Menu” → “Information Security” → “Security Education.”

Employee Feedback: In a letter to employees last week, President and CEO Joe Boardman requested feedback regarding Employee Appreciation Day on May 1. You can send him an e-mail with your thoughts and suggestions to the Employee Communications mailbox at ecom@amtrak.com.

High-Speed Rail Workshops Conclude This Week

A nationwide series of workshops sponsored by the Federal Railroad Administration (FRA) concludes this week with events in Chicago on June 1 and Philadelphia on June 2.

The goal of the “High-Speed Rail Outreach Tour” is to lay the foundation for strategic partnerships to implement President Obama’s vision for national intercity passenger rail, which is supported by \$8 billion in stimulus funding.

Vice President of Policy and Development Stephen Gardner and other company representatives have been participating in each workshop to present Amtrak’s role and capabilities in future rail development. Topics of discussion include infrastructure requirements, operating funds, equipment needs and policy development.

Attendees include key stakeholders such as state departments of transportation, regional transit authorities, elected officials and labor groups.

“These workshops have given us tremendous insight into the states’ intercity and high-speed passenger rail development plans and ambitions. We’ve brought significant value to these conversations and our participation will make us better prepared to meet the states’ requests for help and partnership during the Recovery Act application process,” said Gardner.

According to Gardner, Amtrak’s primary objective is to be the operator of the national high-speed rail system. To that end, the company is seeking partnerships with states to work on projects that are mutually beneficial and provide growth opportunities.

Additionally, the workshops have provided a forum for the FRA to seek input from stakeholders as required in the American Recovery and Reinvestment Act prior to issuing formal guidance for high-speed rail development by June 17.

Over the last two weeks, five workshops have been held in: Charlotte, N.C.; Orlando, Fla.; Seattle; Sacramento, Calif.; and Houston.

Employee Feedback: In a letter to employees on May 26, President and CEO Joe Boardman requested feedback regarding Employee Appreciation Day. Please send an e-mail with your thoughts and suggestions to the Employee Communications mailbox at ecom@amtrak.com.

Message from Board of Directors Chairman and Vice Chairman

Dear Colleagues,

We just wanted to share some thoughts on our visit to our Ivy City facility in Washington last week.

It was a great opportunity to get a firsthand look at the conventional and High Speed Rail mechanical operation, to meet with General Superintendent Steve Alleman, Superintendent Rick Olson, Master Mechanic - High Speed Rail Dave Schramm, and other key staff. That was followed by a visit with some of our valued employees during a Block Training session — we really enjoyed our conversation.

We left Ivy City with a much better understanding of the complexity of the operation, some of the new operational and safety policies and how critical the cooperation and coordination between mechanical and operations is to the efficiency of the NEC operation. We also left with a greater understanding and appreciation of the work you do to ensure Amtrak operates on time with clean and safe equipment.

It is an exciting time at Amtrak, expectations are high and opportunities are many. Our visit to Ivy City was reassuring; we have the ability, the commitment and most important, the workforce to meet the country's expectations for a safe and efficient passenger rail system. Together, we will exceed expectations.

Keep it up and work safely.

Sincerely,

Tom Carper
Board Chairman

Donna McLean
Board Vice Chairman

Virginia Becomes Newest State Partner

Amtrak has reached an agreement with the Commonwealth of Virginia to operate new state-funded passenger rail service from Washington, D.C., to both Lynchburg and Richmond, Va. The agreement increases the company's number of state partners to 15.

"Amtrak is excited to establish new passenger rail service for Virginia and is seeking opportunities to partner with other states to provide additional rail transportation options," said President and CEO Joe Boardman.

Amtrak will extend current *Northeast Regional* service to offer a Lynchburg-Washington roundtrip beginning in October with additional stops in Charlottesville, Culpeper, Manassas, Burke Center and Alexandria. Lynchburg is also served daily by the *Crescent*.

Richmond is presently served by four *Northeast Regional* daily roundtrips, and a fifth will be added in December as part of the agreement. Intermediate stops include Ashland, Fredericksburg, Quantico, Woodbridge and Alexandria. Other train service to Richmond includes *Carolinian*, *Palmetto* and *Silver Service*.

To make the new service possible, two additional trainsets must be added to the *Northeast Regional* equipment fleet. Virginia will provide up to \$8 million to fund the refurbishment of stored cars, which will be completed at the Bear Car Shops in Delaware. Required infrastructure improvements are also being made by Virginia for overnight storage and service of rolling stock in Lynchburg and Richmond.

Virginia has separately committed up to \$17.2 million in funding over a three-year demonstration period for operating costs.

Amtrak's other current state partners include California, Illinois, Maine, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Washington, and Wisconsin.

Service Update: The corporate smoking policy has been updated to also prohibit the use of electronic smoking devices, or e-cigarettes, in any area that is designated as smoke-free on board trains or within stations and offices.

Marketing and Product Management: A fare promotion is underway to celebrate the 10th anniversary of the *Heartland Flyer*. Discounts on adult and children's tickets are available until June 27 for travel through June 30.

Instructions for Properly Handling Legal Documents

Individuals bringing lawsuits or complaints against Amtrak may attempt to have the summonses and complaints delivered to employees' offices by process servers or by mail. Employees are not authorized to accept these documents on behalf of Amtrak, and should not sign anything indicating that he or she has accepted any kind of legal document on behalf of Amtrak.

Instead, the server should be advised to serve the documents on the Corporate Secretary at Amtrak Headquarters, and any inquiries should be referred to the Law department.

If an employee comes into possession of any legal documents, they should be faxed immediately to the General Counsel in the Law department (ATS 777-2821 or 202 906-2821) and the originals sent via overnight delivery to the General Counsel, 60 Massachusetts Ave, NE, Washington, D.C. 20002. Employees should not hold onto or put off sending these documents to the Law department.

The entire "Handling of Legal Documents" policy is posted on the Intranet under "Library" → "Policies" → "Amtrak Policy and Instruction Manual."

Three Hearings on Future of Passenger Rail Take Place this Week

Senior Amtrak officials will testify at two House Transportation and Infrastructure Committee hearings as well as a Senate Commerce, Science and Transportation Committee hearing this week on topics related to the Passenger Rail Investment and Improvement Act and the American Recovery and Reinvestment Act.

Since the last House T&I hearing on April 29, Amtrak has disbursed about \$41 million in stimulus funding and hired nearly 400 new Engineering and Mechanical employees while making significant progress on implementing the required oversight systems.

New employees will support infrastructure projects along the Northeast Corridor and rolling stock programs at Beech Grove and Bear Car Shops. Over the next 90 days, the company expects to award \$190 million for projects that will be managed directly by Amtrak staff.

The House T&I Committee convened an "Expanding Passenger Rail Service" field hearing in Pittsburgh, Pa., today. PRIIA legislation requires Amtrak to conduct feasibility studies of increased train service in Western Pennsylvania and Senior Director of National State Relations Ray Lang provided a progress report to the committee.

In Washington, President and CEO Joe Boardman will appear before the Senate Commerce, Science and Transportation Committee on June 23 to discuss expectations and timelines for high-speed rail development in the U.S.

On June 25, Boardman will appear before the House T&I Committee to provide a 120-day progress report on Amtrak projects funded by \$1.3 billion in ARRA money.

"These hearings also provide a venue to get the message out that we are taking advantage of the growth opportunities before us," said Joe McHugh, vice president, Government Affairs and Corporate Communications.

Marketing and Product Management:

Children's meals are now available in *Acela Express* First Class, based on the recommendation of employees and passengers on the route. The Food and Beverage department worked with NEC Service Operations to create breakfast, lunch and dinner meals for children age 12 and under.

Station Improvement: A groundbreaking ceremony took place today at the Lancaster, Pa., station to officially begin a \$12 million renovation project funded by federal, state and county agencies. Upon completion in late 2010, *Keystone* and *Pennsylvanian* passengers will benefit from additional parking, retail and meeting space, exterior upgrades, new restrooms and a new HVAC system.

Agreement-Covered Employees to See Wage Increases in July

In accordance with union agreements, most agreement-covered employees will receive a 4.5 percent general wage increase, effective July 1, 2009.

Employees will see the increase first reflected in the paycheck for the pay period that includes July 1.

All eligible agreement-covered employees will receive the increase, except those represented by the Fraternal Order of Police. The FOP agreement includes a wage increase that will go into effect in October.

Monthly payroll deductions for benefit coverage will also change on July 1 as part of the labor agreements. Deductions for full time FOP members will decrease from \$166.60 to \$165.30 due to favorable experience in the FOP dental plan. Deductions will increase from \$165.15 to \$166.69 for full time members of all other unions. Part time employees' deductions will increase from \$9 to \$10.

A Message From Joe Boardman

One of the things that really struck me as I traveled around the system is how welcoming employees have been toward me.

I'd like to think that it's me they're happy to see, but I suspect that's not it — it goes deeper than that. Employees are recognizing that things are looking up for passenger rail and Amtrak and that I am committed to our transformation as we seize opportunities and demonstrate to the nation that we are forward-looking and experts in all things passenger rail.

People generally are happy when they feel like they're part of something that's moving forward — I know I feel that way — and I've come across many people who love the work they do and are proud to work here. For me, each day has its set of challenges, but I truly look forward to coming in every day and am exhilarated to know that we're writing passenger rail history. What a great time to be here.

In fact, we receive thousands of resumes every day from people who dream about working here. If you are a recent new hire, welcome aboard. Your skills and talents rose above those of thousands of applicants. If you're an Amtrak veteran, please help show our new hires the ropes and introduce them to the system. Maybe you didn't get the benefit of someone taking you under his or her wing or even give you a mere introduction, and that is a shame. But I ask you to show the strength of mind and heart to rise above that and to welcome them with open arms. Don't underestimate the power of that spirit — the tone you set will ultimately shape how people view Amtrak.

Together, we can make Amtrak a better place to work for all of us, whether you have 35 years of service or you're in your first year. We have to support each other, because the other real fact is that we have an aging workforce, which means we have to position ourselves as an employer of choice and attract good people to carry on the work of those who retire.

We're living in trying times. Around us, businesses are struggling; however, we are experiencing a renaissance in passenger rail investment. What the future holds for passenger rail is clearer today than in recent memory. We are fortunate to have that outlook and together, we're showing the nation that we've earned it.

Thank you for what you do every day and for your support.

Sincerely,

Joe Boardman
President and CEO

Operation Changes: Through July 9, the *California Zephyr* is operating on an alternate route from Denver to Salt Lake City and motorcoach service is being provided to and from Grand Junction and Glenwood Springs. Service is not available to or from Provo, Helper, Green River Junction, Granby or Fraser-Winter Park. This is the first of six periods through September 24 that the train will detour due to Union Pacific track work.

Human Resources: Revisions have been made to the Professional Development Policy and the Employee Training and Career Development Policy. For information, contact your local Human Resources office or visit the “What’s New” tab on the Intranet home page.

Station Improvement: A dedication ceremony will take place on July 10 for the new train station in Durham, N.C. The 10,000 square foot facility, which includes a new platform and canopy, is a joint project between the North Carolina DOT and the City of Durham. The station currently serves four daily Amtrak trains, with two more being added this fall.

Amtrak Joins North American Coalition on Greenhouse Gas Emissions

Amtrak is the first railroad to sign on as a member of The Climate Registry, a non-profit organization founded to set consistent and transparent standards for calculating, verifying and reporting greenhouse gas emissions among North American states, provinces, territories and Native Sovereign Nations.

As a member, Amtrak has committed to the organization’s comprehensive reporting standards, allowing the company to record and manage greenhouse gas emissions throughout the system — including those from rolling stock, maintenance equipment, offices and facilities — in a standardized format.

By better understanding its total greenhouse gas emissions footprint, the company will identify improvement opportunities, which should lead to reduced overall environmental impact and notable energy cost savings.

Joining The Climate Registry also helps Amtrak to be strategically prepared for future environmental regulation.

On June 26, the U.S. House of Representatives passed the American Clean Energy and Security Act, which, among other things, calls for broad improvements in energy efficiency and new emission standards for locomotives, ships and aircraft. The Senate is expected to consider the legislation later this summer.

“With the potential for enactment of this bill and others like it, we need to have an accurate, comprehensive understanding of our entire system’s environmental impact,” said Roy Deitchman, vice president, Environmental Health and Safety. “We now have access to tools, software and best practices that will help us progress much faster than if we attempted to do this independently.”

Amtrak’s first report will be for the 2010 calendar year and will include emissions data on all six internationally recognized greenhouse gases produced by diesel fuel usage, electricity consumption, refrigerants and other sources.

In 2003, Amtrak became a charter member of the Chicago Climate Exchange and committed to trim its diesel fuel emissions by 6 percent by 2010 — the largest voluntary commitment in the U.S. and the first by a transportation company. CCX, unlike The Climate Registry, is a “cap and trade” market that allows organizations to sell credits earned by exceeding its greenhouse gas reduction goals.

Operation Changes: Due to ongoing track work in the Northeast, schedule changes beginning July 13 will affect *Acela Express*, *Northeast Regional* and *Springfield Shuttle* services. In addition, *Empire Service* and *Maple Leaf* schedules will change due to CSX track work. *Adirondack*, *Empire Builder*, *Ethan Allen Express* and *Lake Shore Limited* schedules will be adjusted with the completion of Metro-North track work.

Expanded Service: Two new *Acela Express* departures will operate between New York and Boston on Sundays beginning July 19. Northbound Train 2258 will depart New York at 7:05 p.m. and southbound Train 2297 will depart Boston at 5:10 p.m.

Human Resources: The Federal Railroad Administration will be on-site in Washington, D.C., beginning July 21 to review the regulatory compliance of Amtrak's drug and alcohol programs. Employees may be asked questions by FRA field inspectors and should assist in any way possible. Amtrak's Drug and Alcohol Policy can be found on the Intranet under "Employees" → "Human Resources Health Services."

First Stimulus-Funded Car Returning to Service

Today, President and CEO Joe Boardman, U.S. Senator Tom Carper (D-Del.) and other elected officials were in Wilmington, Del., as the first car refurbished with funds from the American Recovery and Reinvestment Act departs Bear Car Shops on its way back to the active fleet.

"The real story today is about people – the Amtrak passengers who will ride in these rehabilitated cars and the workers who are doing a great job bringing them back to life," said Boardman, noting that the additional seating capacity on its trains will help connect families, further business relationships, and position Amtrak for expected future growth in ridership.

The car, Amfleet II Coach 25103, was built in 1982 but has been out of service since April 2005, when it was damaged in a rail yard accident in Florida. It is the first of 60 Amfleet cars that will be returned to service by early 2011.

The Amfleet I and II cars in the project are either being converted, rehabilitated from wreck status or undergoing a Level 3 overhaul. The cost per unit ranges from \$615,000 to \$1.4 million depending on the level of work being done.

Two additional ARRA-funded projects will put 15 diesel locomotives and 21 long-distance cars back in the fleet over the same time period. The combined cost of the three projects is \$91 million.

"An expanded fleet is a critical part of our ability to grow," said Vice President of Policy and Development Stephen Gardner. "We need these cars as we pursue new service in partnership with states and also to increase capacity along existing routes where demand exceeds what we can currently offer."

To meet the labor needs of refurbishing and overhauling nearly 100 cars in under two years, the Mechanical department has expanded its force by adding 160 new positions between facilities in Wilmington and Beech Grove, Ind. Competition was extremely high, as the company received 3,200 applications and conducted more than 400 interviews to fill the 160 positions.

Operation Change: Effective now through the end of the Track Laying Machine production season on the Northeast Corridor, Trains 190, 175 and 165 will honor all Shore Line East multi-ride tickets between Old Saybrook and New Haven, Conn., as part of the cross-honoring agreement with Connecticut DOT.

Engineering: The Production Team and New England Division Electric Traction and Signal teams have begun operating the second Track Laying Machine on the NEC. TLM Green, which is planned to install 79,000 concrete ties this year, is currently working west on Track 2 from Old Saybrook, Conn., toward New Haven.

Government Affairs: Amtrak officials will testify at a U.S. House of Representatives Transportation and Infrastructure Committee hearing on July 22 at 2 p.m. EST. The subcommittee on Economic Development, Public Buildings and Emergency Management will discuss a vision for the future intermodal use of Washington Union Station and surrounding community development. The hearing can be viewed live via Web cast at <http://transportation.house.gov>.

Corporate Communications: Look for the combined July-August issue of *Amtrak Ink* the first week of August.

Gulf Coast Service Report Submitted to Congress

Last week, Amtrak delivered its report to Congress detailing potential ways of resuming service between Orlando, Fla., and New Orleans, as required by the Passenger Rail Investment and Improvement Act. The report outlines three potential service options and their respective start-up costs, annual loss and implementation timelines.

Option 1 of the report is to restore the former tri-weekly *Sunset Limited*, Option 2 is an extension of the *City of New Orleans* on a daily schedule to Orlando using the same route as the former *Sunset Limited* and Option 3 is the establishment of a new stand-alone daily service between the two cities.

Option 1 could cost \$32.7 million and take 20 months to begin. Options 2 and 3 could both require up to 48 months to implement and projected startup costs of \$57.6 – \$96.6 million if new equipment is acquired. Capacity improvements that would be needed along this route have not been determined.

“As required by law, we have provided Gulf Coast service options to Congress, but we are not recommending any one option over the others,” said Vice President of Government Affairs and Corporate Communications Joe McHugh. “It’s up to Congress to determine which plan to pursue, if any, and provide the resources to make it happen.”

In addition to start-up costs, resuming service would require an investment of \$32 million for the installation of Positive Train Control. Options 1, 2 and 3 would also bring estimated annual operating losses of \$4.8 million, \$11.7 million and \$18.4 million, respectively.

The full report is available on Amtrak.com at “Inside Amtrak” → “Other Reports” or on the Intranet under “News” → “Legislative.”

Credit Card Information and Data Security Reminder

As part of its current data security program, Amtrak is in the process of upgrading its IT systems and employee training related to the storage and handling of credit card information in accordance with standards set by the Payment Card Industry.

New training modules and policy revisions are in development now, along with a plan to deploy handheld credit card machines for on-board use by conductors.

Look for more information to be distributed this week via OSA, Arrow and other channels. In the meantime, employees are reminded to carefully safeguard all passenger credit card information and avoid writing or printing the information whenever possible. See Credit Card Security Policy 8.10 for details on the Intranet under “How We Work” → “Finance” → “Policies.”

Operation Change: *Pere Marquette* Train 371 will operate one hour and 35 minutes earlier due to CSX track work outside of Grand Rapids, Mich. The schedule change begins today and is effective on weekdays only (except Aug. 5) through Sept. 10.

Operation Change: On Saturdays beginning Aug. 1 through Sept. 7, *Ethan Allen Express* Train 296 (instead of 292) will stop at Saratoga at 6:57 p.m. to better serve passengers traveling for the 2009 season at the Saratoga Race Course. Each roundtrip ticket includes motorcoach transfers to and from the track and a copy of the Post Parade program.

Amtrak Credit Rating Upgraded

On July 21, Standard & Poor's Ratings Services raised the company's corporate credit rating to A- from BBB+, the highest rating for Amtrak in 11 years.

In its research update, S & P referred to Amtrak's outlook as "stable," citing a review of its stand-alone credit profile, recent initiatives to improve operating performance and business prospects, and increased support from Congress.

The report also cited Amtrak's important role in the U.S. economy as a public service, as well as a "demonstration of increased consensus on Amtrak's strategic direction."

Moody's Investor Service currently has Amtrak's corporate credit rating at A2, the highest level ever for the company.

Notable Events Planned for Coming Months

A number of high points slated for the next couple of months will provide momentum going into FY 2010, which begins on Oct. 1, as the company continues to push toward its goal of being a safer, greener, healthier organization. Among other things, these ventures will expand the system, make information more accessible to customers and improve employee efficiency.

As the company continues to pursue high-speed rail development opportunities with states, Board Chairman Tom Carper was in Chicago today for the Midwest High Speed Rail Summit at the invitation of U.S. Senator Dick Durbin (D-IL), Illinois Governor Pat Quinn and Chicago Mayor Richard Daley. The summit aimed to establish formal working relationships among Midwest states for the benefit of passenger rail development.

Other upcoming highlights include the Aug. 3 availability of Amtrak service on Google Transit. After entering a starting location and destination, the popular search engine tool provides directions by either driving, walking or by mass transit, an option that will now include some Amtrak trains.

Also in August, the company will host celebrations to commemorate the 35th anniversary of the *Adirondack* as well as the 25th anniversary of the *Pere Marquette*, both on Aug. 5.

After Bear Car Shops released the first stimulus-funded car into service earlier this month, the Beech Grove Maintenance Facility will complete the first Superliner rehabilitated with funds from the American Recovery and Reinvestment Act. An event is planned there for Aug. 6.

In addition, two notable pilot programs are set to begin in the coming months. A second daily Amtrak *Cascades* roundtrip to Vancouver, B.C., is slated to start this fall and run through the completion of the 2010 Vancouver Winter Olympics in mid-February. The other is a pilot program to test handheld credit card machines on *Keystone Service* trains as part of the company's effort to streamline on-board transactions for conductors and improve data security. The machines will be deployed system-wide through next summer.

Finally, a new extension of *Northeast Regional* service from Washington, D.C., to Lynchburg, Va., will begin in October. As part of a partnership with the Commonwealth of Virginia, the daily roundtrip will make intermediate stops in Alexandria, Burke Center, Manassas, Culpeper and Charlottesville.

Engineering: Bridge Rehab Gang R-905 is ahead of schedule and nearing completion of two bridge deck conversions on Track 2 of the Hudson Line in Castleton, N.Y. The gang is replacing the concrete bridge seats and backwalls, installing new high strength bolts, steel stringers, laterals and concrete deck slabs.

Government Affairs: The U.S. House of Representatives has passed legislation approving \$1.5 billion in Amtrak funding for FY '10 while the Senate is tentatively set to vote in September on a bill to provide \$1.57 billion. After that, members of each group will meet in a conference committee to reconcile the differences in each bill and authorize a final appropriation. Amtrak had requested \$1.84 billion plus \$144 million for ADA needs.

Beech Grove Completes First ARRA-Funded Car for Service in Midwest, West

Amtrak employees will join local and federal elected officials on Aug. 6 at the Beech Grove Maintenance Facility to commemorate the release of the first car rehabilitated with stimulus funding at the facility.

Superliner Sightseer Lounge #33016 is the first car restored for routes serving the Midwest and West using money from the American Recovery and Reinvestment Act. At a total cost of \$32 million, 21 long-distance passenger cars and 15 diesel P-40 locomotives will be returned to service over the next two years after being rehabilitated or overhauled at Beech Grove as a result of the infusion of stimulus funding.

To accommodate the increased workload, 108 employees have been hired at the facility, some of whom had been laid off by automotive and aviation manufacturers. Beech Grove now employs over 600 workers.

This project is in addition to ARRA-funded work being completed at the Bear Car Shops in Delaware. There, 60 Amfleet cars are being returned to service at a cost of \$59 million.

Safe-2-Safer Kicks Off This Week

Starting this week, employees throughout the company will be asked to complete a voluntary survey to support Safe-2-Safer, a new company-wide initiative to reduce safety and security risks. As described in the July 31 *Special Employee Advisory*, Safe-2-Safer will be rolled out on a regional basis over the next six months.

Most employees will be asked to complete the survey in paper form at their work location. Those employees with company e-mail accounts and Internet access may complete the survey online, the link to which will be emailed today. The surveys will be completed anonymously, and no answers can be traced back to any individual.

“For Safe-2-Safer to be effective, we need to know how employees think about safety and why. The surveys are being completed anonymously because we really want open and honest feedback,” said Vice President of Transportation Richard Phelps, who has been tapped to lead the initiative. Results of the survey will be published in October.

Safe-2-Safer will not replace any current safety practices, but aims to improve upon them by creating an environment in which employees at all levels work together to change at-risk behaviors to safe behaviors.

“Our senior management team and I are fully committed to making Amtrak safer and healthier. We’re seeking support and participation from our unions, our managers and you to get there,” said President and CEO Joe Boardman.

Safe-2-Safer will include training, ongoing coaching and greater accountability for supervisors, and broader employee engagement through peer-to-peer feedback. The initiative will be implemented in phases, first kicking off in the Mid-Atlantic region, then being rolled out in other parts of the country.

Employees in both operation and non-operating departments will benefit from a safer and more collaborative working environment. Research shows that companies that sustain excellent safety records also perform better overall.

For more information, please read the Q and A that accompanies this edition of *Amtrak This Week* (also available on the Intranet under “Safety.”)

Mechanical: The Mechanical department ended the month of July with only four FRA-reportable injuries system wide — the least monthly total ever for the department — thanks to the dedication of its employees. A majority of locations had zero injuries for the month.

Your Feedback is Needed

Remember to take the Safe-2-Safer survey by Aug. 24. Feedback from employees throughout the company is critical to the full implementation of the initiative. Most employees can anonymously complete a paper survey at their work location. Those who have an Amtrak e-mail address *and* Internet access can take it online by clicking the link in the upper left corner of the Intranet home page.

Important Note for Non-Operating Department Employees

If completing the survey online, employees in the following departments should select “Administrative/Support” as their department, and “HQ and Business Field Offices” as their geographic region:

- Environmental Health and Safety
- Finance
- Government Affairs and Communications
- Human Resources
- Information Technology
- Labor Relations
- Law
- Policy and Development
- President’s Office

A Message from Joe Boardman

Dear Co-workers,

The U.S. House of Representatives has approved \$1.5 billion in funding for FY ’10, which begins Oct.1. The current Senate number, \$1.57 billion, will likely be taken up by the full Senate in September, and then the two will reconcile the figures for a final appropriation. These numbers fall short of our request and of what is authorized in the Passenger Rail Investment and Improvement Act (PRIIA). We asked for \$1.84 billion, plus \$144 million for ADA needs, and we’ll continue to advocate for that funding level. In the meantime, we’ll have to wait to see what the final outcome means for us, and I’ll keep you posted.

The shortfall (as it stands now) is disappointing, considering the momentum we’re experiencing with the support for rail and the infusion of American Recovery and Reinvestment Act (ARRA) funds. In addition to the investments we’re making with \$1.3 billion in ARRA funds, more than half the states in the country are seeking to partner with us as they compete for \$8 billion in stimulus funds for capital investments in high-speed and intercity service.

It’s an extraordinary time in our history, and we’re making enduring investments while pursuing opportunities that make strategic and business sense to position Amtrak as the provider of choice. Don’t kid yourself thinking that we don’t have competition — we do.

Slowly but surely, we’re also striving to create a more collaborative working environment and change the way we work together. Based on my travels across the system (if we haven’t met yet, I hope we will soon), I think most employees are ready for positive changes.

A year ago, we began Strategic Asset Management (SAM), which rethinks how we do business and optimizes the processes, systems and tools that support the business. A multiyear investment, SAM will result in consolidated and compatible systems for Finance, Procurement, Human Resources, IT and Operations. These will be lasting improvements that alter the way we work together for the better.

We’ve just introduced Safe-2-Safer, an approach to safety and security that encourages a more open dialogue among employees, supervisors and departments. We’re not replacing safety practices — we’ve got a good record (congratulations to Mechanical employees on the safety record in July!) but we need to be safer, creating a workplace where we can talk openly about our safety culture. It’s about all of us going home the same way we came to work, not about “gotcha” tactics. I’ve completed the survey, and I hope you’ve made your voice heard by completing it as well.

Sincerely,

Joe Boardman
President and CEO

Operations Changes: Due to continued track improvements in New Jersey, many *Acela Express*, *Northeast Regional* and *Keystone Service* trains will operate on a slightly later schedule beginning Aug. 17. Eastbound trains from Metropark, Newark International Airport and Newark N.J., will operate two to three minutes earlier.

Stimulus Update: Updated lists of stimulus-funded projects are posted on Amtrak.com under “Inside Amtrak” → “Other Reports.” The lists, which include projects recently approved by the FRA, are also available on the Intranet under “How We Work” → “Finance” → “Economic Stimulus.”

Station Improvement: Southwest Division Assistant Superintendent Joy Smith will help officially open a “Welcome Center” at the Ardmore, Okla., *Heartland Flyer* station this Saturday, Aug. 22, initiating six-day-a-week service by volunteer station hosts.

Safe-2-Safer Survey Closes Aug. 24

There is one full week left to complete the Safe-2-Safer survey, which closes on Monday, Aug. 24.

Don't miss this opportunity to share your perspective. Most employees can complete the paper survey at their work site, while employees who have an Amtrak e-mail address and Internet access can complete it online by clicking the link in the upper-left-hand corner on the Intranet home page.

New Amtrak *Cascades* Service Pilot Expands Service in Pacific Northwest

A second daily Amtrak *Cascades* roundtrip between Portland, Ore., Seattle and Vancouver, B.C., will begin as a pilot program on Aug. 19 and run through the conclusion of the 2010 Olympic Winter Games and the Paralympic Games at the end of March.

Northbound Train 516 is scheduled to depart Portland each day at 2:50 p.m., arriving in Vancouver at 10:45 p.m. Southbound Train 513 will depart Vancouver at 6:40 a.m. and reach Portland at 2:55 p.m.

“The new service is the result of a lot of hard work on the part of many employees throughout the company, particularly in negotiating an agreement that would work for all stakeholders,” said Pacific Division District Superintendent Kurt Laird.

Members of Transportation; Policy and Development; Amtrak Police and Security; and Government Affairs and Corporate Communications were involved in ironing out the details with the Canadian government, the Washington and Oregon Departments of Transportation, BNSF Railway and U.S. Customs and Border Patrol.

“More passenger train travel between Vancouver and Seattle is an important step towards helping boost cross-border tourism,” said British Columbia Minister of State for Intergovernmental Relations Naomi Yamamoto. “We’re very hopeful the expanded service will stay on the rails long past next March.”

In addition, Amtrak *Cascades* passengers will now benefit from the return of all of the route’s Talgo trainsets. Amtrak and WSDOT have completed refurbishment of the train interiors that began last summer.

Safe-2-Safer Survey Closes Today *Thank You to Those Who Participated*

Today is your last chance to complete the Safe-2-Safer survey, which closes today at 5 p.m. PDT.

It's not too late if you fill it out today — most employees can complete the paper survey at their work site, while employees who have an Amtrak e-mail address *and* Internet access can complete it online by clicking the link in the upper-left-hand corner on the Intranet home page.

In addition, more than half of the 82 Safe-2-Safer focus groups scheduled over the course of a six-week period across the country have taken place.

Thank you to the thousands of employees across the system who chose to share their perspectives by completing the survey and/or participating in the focus groups held so far. The results from the survey and focus groups will be published in October.

Your input will help drive Safe-2-Safer, which aims to reduce injuries and bolster security by creating a more collaborative environment.

Operation Change: From Thursday, August 27 through Monday, September 7, *Empire Service* Trains 281, 283, 284 and 288 and *Maple Leaf* Trains 63 and 64 will make a special stop at the New York State Fair in Syracuse, N.Y.

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division Engineering forces, will be installing four wayside turnouts on the division in the coming weeks. This weekend the SES will be installing a #10 wayside turnout at the Mrs. Filbert's warehouse near Baltimore.

Information Technology: All non-agreement employees and contractors are reminded that they must complete the online Information Security Awareness Training course. Log on to www.elementk.com/login.asp/ to access the course. Enter your eight-digit SAP number followed by "amtrak" as the user name (ex. 12345678amtrak) and "amtrak1" as the password.

Benefits: Employees with questions about their benefits should call the Amtrak Benefits Service Center at 800-481-4887 or log on to www.amtrakbenefits.com for more information.

Finance: All invoices incurred during FY '09 must be submitted to Accounts Payable by Sept. 15. Contact Gloria Johnson (ATS 728-1289), Mike Kelly (ATS 728-1502) or Jesse Wilson (ATS 728-1472) with questions or for more information.

Safe-2-Safer Survey Responses Top Goal

Amtrak received 10,604 responses to the Safe-2-Safer employee survey that was conducted Aug. 3-24, surpassing its goal of having 50 percent of employees participate. Additionally, the company is finishing the last of 82 focus groups that will have included more than 800 employees.

“On behalf of Joe Boardman, the board of directors and the executive committee, I want to thank everyone who took the time to share their thoughts on safety and security at Amtrak,” said Chief Operating Officer William Crosbie. “The feedback is incredibly valuable to making Amtrak safer. This initiative has started off with a lot of energy and we’re counting on each employee engaging in Safe-2-Safer.”

Safe-2-Safer is being rolled out on a geographic basis and should formally begin in each region by the end of the year.

Amtrak Prepares for Flu Season *Company To Offer Employees Seasonal Flu Vaccinations*

The Centers for Disease Control is anticipating a potentially severe flu season this year, with the spread of seasonal and H1N1 flu viruses over the course of the fall and winter.

Amtrak’s cross-departmental Pandemic Flu Task Force, along with the Environmental Health and Safety department and the Health Services department, are closely monitoring the situation. The company’s Pandemic Plan is currently being revised based on updated recommendations being made by the CDC and will soon be available to employees.

Amtrak’s Pandemic Flu Plan has been in effect since May, which includes guidance for handling and reporting potential H1N1 flu cases and leave policies.

“Though the health experts indicate uncertainty about the severity and extent of the flu season, we’re taking steps to be prepared to respond to an escalating pandemic,” said Chief Operating Officer William Crosbie. “But each of us has the power to minimize the impact of the flu. We can all take basic steps to avoid spreading germs by frequently washing our hands with soap and water or using a hand sanitizer, using a tissue or sleeve to cover coughs and sneezes, and not touching our eyes, nose or mouth.”

In addition, while the H1N1 vaccine is currently not available, Amtrak is planning to offer free seasonal flu vaccinations starting in October at most of its locations and/or possibly through a voucher system at clinics and pharmacies for those employees who wish to protect themselves from the seasonal flu. The CDC recommends a yearly seasonal flu vaccine as the first and most important step in protecting against seasonal viruses. Look for more information about the vaccinations in the coming weeks.

Employees who have flu symptoms (fever greater than 100 degrees Fahrenheit plus sore throat or cough) should stay home and notify their supervisor, who should then notify CNOC at 800-424-0217.

Coming announcements will provide detailed plans on flu season preparedness and response, including reminders about operating procedures and the revised Pandemic Flu Plan.

A Message from Joe Boardman on Security

Dear Co-workers,

September 11 eight years ago is still a vivid memory for me. Many of us have one connection or another to the loss of life at the World Trade Center, Pentagon or Pennsylvania. I was the Commissioner of Transportation for New York state at that time, and one of my offices was on the 82nd floor of the North Tower; I was not there at the time of the attack but dozens of the men and women of the Department were, and three were lost.

Ignatius Udo Adanga was born in Nigeria and after a long journey for the betterment of his family was a planner with the New York State Department of Transportation. Born in Haiti, Charles Lesperance was an amazing computer systems analyst with advanced degrees from Columbia and a love for cooking. See-Wong Shum was born and raised in Hong Kong and was a computer systems analyst whose restless spirit was continually seeking adventure, which he often found by backpacking through Europe, China or somewhere else. Another vivid memory was the loss of Kevin Reilly, a young NYC firefighter from Engine 207, at whose funeral I presided on behalf of the governor.

I hold all of these men in my memory about this time each year, and I am thankful for the commitment I see in the eyes, the actions and the behaviors of our own Amtrak Police, counterterrorism agents and K-9 explosive detection teams, as they do their best to help keep Amtrak safe and secure.

Last week, Amtrak's police, K-9 and counterterrorism personnel partnered with the Transportation Security Administration and more than 120 local law enforcement agencies to conduct a synchronized rail security operation in 13 Northeast states and the District of Columbia.

This one-day exercise was a training opportunity as well as a manifestation of the broad security network in which Amtrak is a partner. My first priority is the safety and security of each person that works for or interacts with this company, or is a paying customer on one of our trains, and I am proud of the work our police and security personnel do every day to help protect us from those who would do us harm.

Sincerely,

Joe Boardman
President and CEO

Safe-2-Safer: Thank you to all employees who organized or participated in one of the 82 Safe-2-Safer focus groups that concluded last week. In total, more than 800 employees provided feedback and opinions about Amtrak's safety culture and programs.

Finance: Manual accounts payable accruals must be submitted via eTrax eAccrual by 3 p.m. eastern time on Monday, Oct. 12. It is recommended that departments do a final check of posted items before the deadline to account for any missed or duplicate accruals. Contact Mike Kelly (ATS 728-1502) with questions or for more information.

Health Services: Amtrak will soon be offering employees free seasonal flu vaccinations via on-site flu shots or vouchers. Details are still being finalized. Look for more information in the coming weeks.

Got a Slogan? Win Prizes.

Amtrak is creating a systemwide Energy Awareness Campaign and we need your help naming the program! The goal is to raise awareness about reducing energy consumption and costs, and conserving natural resources. The winner will be chosen by the Energy Reduction Subcommittee of the Amtrak Fuel and Energy Committee and will receive recognition and a prize package filled with great Amtrak items!

Slogans must:

- Include the word "Amtrak."
- Focus on conservation and energy reduction.
- Be short, clear and memorable.

Employees should submit entries via e-mail to AskEnvironmental@amtrak.com by Sept. 30 to be considered. The winner will be announced in October, which is Energy Awareness Month. More information can be found on the Intranet under "How We Work" → "Environmental" → "Energy Conservation Awareness."

Operation Update: The Pittsburgh, Pa., station will be open to connecting passengers only on Sept. 24-26 as part of the security measures in place for the G-20 economic summit being held there. Vehicular and pedestrian traffic in and around the station may be significantly restricted or prohibited by the Secret Service.

Station Improvements: The newly constructed station in Leavenworth, Wash., will begin serving *Empire Builder* Train 8 on Sept. 25 and a celebration hosted by the Leavenworth Chamber of Commerce is planned to mark the train's arrival. Train 7 will make its first stop at the station on Sept. 26.

Benefits: Fidelity Investments will now be delivering 401(k) quarterly account statements online at www.NetBenefits.com as part of its green initiative. Employees who wish to continue receiving paper statements should call Fidelity toll-free at 877-477-2685 or visit the site to change delivery methods. An announcement with more details will be mailed to all 401(k) participants this week.

Marketing and Product Management: Be sure to watch the "All Aboard Amtrak with Dr. Phil" episode, which is scheduled to air on Sept. 25. Check your local listings for The Dr. Phil Show broadcast times and station. The special episode was taped on Sept. 9 aboard an *Acela Express* train.

Health Services: Amtrak will soon be offering employees free seasonal flu vaccinations at many work locations and through vouchers to be used at local clinics and pharmacies. Details are still being finalized so look for more information in the coming weeks.

Engineering Completes Major Empire Line Project

The 10-month, more than \$6 million Empire Line Rock Stabilization Project was completed last week, resulting in the removal of 15 mph speed restrictions near the George Washington Bridge, just north of New York City. As a result, trains can now operate at 50 mph, which is expected to yield improved on-time performance for trains operating through the heavily congested area.

Speed restrictions were put in place due to unstable rock slopes that created the potential for debris on the track. Employees from I&C/Capital Projects Sunnyside Yard and other New York Division Engineering crews assisted a specialized construction contractor, Janod, in stabilizing the slopes by removing 407 tons of loose rock and vegetation, applying fiberglass-reinforced concrete, attaching more than 1,000 bolts, and installing nearly 90,000 square feet of wire mesh retaining walls. Additionally, measures were put in place to prevent ice buildup on the slopes.

Update on Proposed Amendment Requiring Amtrak to Carry Firearms

Last week, the U.S. Senate passed an amendment to the 2010 fiscal year Amtrak appropriations bill that would require the company to carry passengers' firearms in checked baggage. However, further legislative activity by both the Senate and House of Representatives must take place before this firearms provision could be sent to the President to be signed into law.

If the amendment becomes law, information about necessary procedures and timelines in connection with carrying out the provision will be issued.

On Friday, Amtrak issued the following statement in response to the proposed legislation:

"Amtrak believes this provision is neither fair nor practical. Our entire annual appropriation to support a national passenger rail system should not be contingent on a compliance deadline Amtrak has stated we cannot meet."

Operation Update: On Oct. 1, the historic “Great Dome” car will be at the Albany-Rensselaer, N.Y., station for a kick-off of its special six week run on the *Adirondack*, providing passengers a unique view of New York’s fall foliage season.

Free Flu Shots Begin Soon

As part of its commitment to employees and to creating a safer, greener, healthier company, Amtrak will offer free seasonal flu vaccinations to all employees over the coming weeks.

The voluntary program will be offered through on-site clinics and a voucher program. Look for a Special Employee Advisory later this week with program details, as well as flyers at work locations.

EIM Project Hitting the Road

Between Oct. 19 and Nov. 6, the Employee Information Management (EIM) program is embarking on a series of “road shows” to give non-agreement managers and employees the latest news on upgrades to the SAP Employee Information Portal (EIP).

At each stop, employees will preview the system and ask questions about the upgraded functionality, which includes new e-recruiting and e-learning modules and increased self-service capabilities. Formal training sessions are planned to be held closer to the launch next spring. Additional information about the road shows will be coming soon. For more information about EIM, contact the project team at EIM@amtrak.com.

The road show will be in Chicago on Oct. 19-20; Oakland on Oct. 21; Riverside, Calif., on Oct. 22; Los Angeles on Oct. 23; Jacksonville, Fla., on Oct. 26; Wilmington, Del., on Oct. 28-29; Philadelphia on Nov. 2-3; New York on Nov. 4-5; and Boston on Nov. 6.

Members of the Board of Directors Visit Facilities

Board of Directors Chairman Tom Carper and Vice Chairman Donna McLean visited three facilities in Wilmington, Del., last week to get a firsthand look at the work being done at the Wilmington Station, the Bear Car Shop and the Consolidated National Operations Center. The station and the Bear shop are both benefiting from American Recovery and Reinvestment Act funding.

In addition to observing the waterproofing of a track bed above the Wilmington station, Carper and McLean toured the renovation of the station. At Bear, they observed Level 3 overhauls being performed on Amfleet equipment and a Diner Light car in the making. After visiting the site of the future Centralized Electrification and Traffic Control (CETC) dispatching center that will be housed on the first floor of the CNOC next spring, the Chairman briefly visited System Operations on the second floor of the building.

“There are many improvements taking place across the system, and we appreciate the opportunity to meet some of the employees who are directly responsible for bringing these projects to fruition and to personally see the amount of work that goes into them,” said Chairman Carper. “One of the most impressive things we heard all day was the positive and supportive relationship between labor and management at Bear — Amtrak’s team must be strong to successfully meet the opportunities and challenges ahead of us.”

New Virginia Service Begins This Week

On Oct. 1, Amtrak will make its first roundtrip from Lynchburg, Va. to Washington, D.C., as part of its newest state partnership with the Commonwealth of Virginia. The service will operate as Trains 171 and 176, an extension of the Boston-Washington *Northeast Regional*.

In celebration of the service launch, the Commonwealth and Amtrak are partnering to operate the “Amtrak Virginia Inaugural Whistle Stop Tour” on Sept. 30. A special train carrying more than 200 invited guests and elected officials will depart Washington Union Station and make stops at every city along the route: Alexandria, Burke Centre, Manassas, Culpepper, Charlottesville and Lynchburg.

Each city will host a brief ceremony and ribbon cutting with remarks by President and CEO Joe Boardman and local civic leaders. Virginia Gov. Tim Kaine is scheduled to participate in events at Charlottesville and Lynchburg. The events are open to the public.

Fiscal Year 2009 Closes with Major Fleet Project Accomplishment

Just prior to the end of the 2009 fiscal year, the Mechanical department achieved a major milestone by meeting its goal to have only four different types of Amfleet I cars in service. The multiyear effort toward standardization puts Amtrak in a position to further improve revenue management, customer satisfaction and operating efficiency.

“Realizing this accomplishment helps support the goals of several departments and I applaud the Mechanical department’s leadership and persistence,” said Chief Operating Officer William Crosbie. “The effort made by the men and women of the Mechanical department on this project reflects the kind of interdepartmental synergy and collaboration we aim for with every project throughout the company.”

At one point, 17 different Amfleet I car types were in service. Mechanical crews at Bear Car Shops have worked since 1999 to standardize Amfleet car interiors to one of four car types: Capstone Coach, Capstone Business Class, Dinette (all tables) and Club Dinette.

The current active Amfleet fleet totals 410 cars, which will grow thanks to additional overhauls being funded by the American Recovery and Reinvestment Act.

The previous lack of consistency meant that Revenue Management did not have accurate seating capacities for NEC trains until consists were finalized, sometimes at the last minute. As a result, inventory levels had to be estimated on the low side and available seats were sometimes left unsold. The standardization project also made all Amfleet I cars more accessible to passengers with disabilities by creating wheelchair space and installing ADA-compliant restrooms.

Additional benefits of the project include fewer types of parts required to be on hand for mechanical work and drastically more efficient fleet management planning.

The Horizon coach fleet is also undergoing a similar standardization project as ADA-compliant toilet modules are added and seating is adjusted to a standard 70-seat layout.

“We know that equipment consistency is a factor in customer satisfaction and we take pride in doing our part to make Amtrak travel better for our passengers,” said Chief Mechanical Officer Mario Bergeron.

Operation Update: Effective October 10, schedules for the *California Zephyr* will change following the completion of track work by the Union Pacific Railroad. All time added to schedules as part of the “get well plan” with UP over the past several years will be removed, successfully concluding a major phase in the collaboration between Amtrak and UP to improve performance on this route.

Operation Update: Beginning Oct. 6 through Oct. 11, several Amtrak *Cascades* trains will be adjusted due to three separate track projects being done by Union Pacific Railroad, BNSF Railway and Canadian National Railway.

Human Resources: Ceremonies honoring 2009 PSSA winners will begin this week as President and CEO Joe Boardman travels to events in Sacramento, Calif., on Oct. 6 and Los Angeles on Oct. 8. Employees with 30 and 35 years of service will also be honored.

Health Services: Free seasonal flu shots will be offered to employees on Oct. 8 from 11 a.m. to 12 p.m. at the Portland, Maine, crew base. Other on-site clinics are being scheduled across the system. Look for posters at respective work locations with specific dates and times.

Congress Passes Continuing Resolution for Federal Appropriations

Amtrak began FY '10 on Oct. 1 operating under a Continuing Resolution in the absence of an appropriations bill from Congress for the new fiscal year. Accordingly, Amtrak’s federal funding through Oct. 31 is set at the FY '09 level of \$1.49 billion. In the interim, a final appropriations bill for FY '10 is being negotiated between the Senate and House of Representatives.

In July, the House of Representatives passed legislation that would provide Amtrak \$1.5 billion for FY '10 while the Senate approved a bill in September providing \$1.57 billion.

FY '09 Ridership and Revenue Indicate Continued Performance Improvement

Amtrak announced last week that it carried 27.2 million passengers and generated \$1.6 billion in ticket revenue in the 2009 fiscal year. Despite lower gas prices and the economic recession that brought high unemployment and a decline in business travel, these totals represent the second-highest annual performance ever for the company.

“We should all be proud of what we were able to accomplish over the last fiscal year,” said Emmett Fremaux, vice president, Marketing and Product Management. “In terms of our own past performance and relative to others in the transportation industry, we did very well.”

Only last year’s ridership and revenue — which benefited from unusual external market forces such as gas prices topping \$4 per gallon — are higher than FY '09 results. Compared to FY '08, overall ridership declined by 5.4 percent and ticket revenue was 7.8 percent lower in FY '09.

“Comparing this year to last is not a good measure because of the unique circumstances in 2008,” said George Raed, chief, Market Research and Analysis. “A better gauge is to look at 2007 and preceding years. When doing that, we see a consistent growth curve since 2002.”

FY '09 ridership exceeded that of FY '07 by 5.1 percent. Ticket revenue was 5.3 percent higher.

Performance on the Northeast Corridor was most impacted by unfavorable economic conditions in FY '09. However, significant improvements in systemwide on-time performance led to increased demand in other parts of the system. Overall OTP for the year surpassed 80 percent, compared to 71 percent in FY '08.

Expansions on many corridors also resulted in new records for certain routes. The Chicago-St. Louis corridor realized a ridership increase of 6 percent over last year and the *Piedmont* benefited from a 3.8 percent increase. *Keystone Service* and the *Vermont* posted annual ridership gains of 2.7 and 1.9 percent, respectively.

Chairman Carper to Testify Before Congress This Week

Board of Directors Chairman Tom Carper will testify before the U.S. House of Representatives Transportation and Infrastructure Committee on Oct. 14 at 2 p.m. Eastern time on the challenges and opportunities for high-speed rail.

A live Web cast of the hearing can be viewed at <http://transportation.house.gov>. Chairman Carper’s testimony will be posted on Amtrak.com under “Inside Amtrak” → “Government Affairs” → “Congressional Testimony.”

Operation Update: On Oct. 15, the Jefferson Bus Line route between Milwaukee and Minneapolis will be available as Amtrak Thruway Service. The addition provides service to several cities that were not previously part of the Amtrak system.

Benefits: The open enrollment period for 2010 benefits will begin on Oct. 26 and continue through Nov. 13. Employees’ personalized enrollment package will be mailed to their homes later this month.

EIM Update: The Employee Information Management program kicks off its series of road shows with non-agreement managers and employees this week in Washington to demonstrate upgrades to the SAP Employee Information Portal. Events will take place in the Union Station Starlight Room on Oct. 14 from 9:30 - 11 a.m. and 2 - 3:30 p.m., and on Oct. 16 from 8:30 - 10 a.m. and 1 - 2:30 p.m.

Human Resources: All non-agreement employees are reminded to input their FY '09 leave in the SAP system. Also, completed Certificates of Compliance with the Conflict of Interest Policy must be turned in by Nov. 30.

Don't Forget: Flu Shot Voucher/Coupon Deadline is This Week

Employees who are unable to get their seasonal flu shot during the on-site clinic at their work location, or prefer to register for a flu vaccine voucher/coupon, must do so by **Oct. 15**. Due to limited quantities of the vaccine nationwide, vouchers should be used by **Oct. 22**.

Instructions on registering for a voucher/coupon can be found on the Intranet home page under “Employee Advisories” → “Oct. 2.”

Engineering: Transformers and other equipment at the Landover, Md., electrical substation that helps power the NEC were replaced last week as part of a program that began in 2002. The work at Landover is being performed four years ahead of schedule thanks to federal stimulus funding. Thirty-nine other substations will also benefit from stimulus funds.

Marketing: Discounted tickets are available for employees on select performances of the *Radio City Christmas Spectacular* in New York through Dec. 10 by calling 866-858-0007 or visiting www.radiocitychristmas.com. Use promotional code "AMTRAK."

EIM Update: The Employee Information Management program continues its road show with non-agreement managers and employees to demonstrate upgrades to the SAP Employee Information Portal. Events this week are: Chicago, Oct. 19-20; Oakland, Oct. 21; Riverside, Calif., Oct. 22; Los Angeles, Oct. 23. For details, contact the project team at EIM@amtrak.com.

Correction: Last week's issue incorrectly listed the deadline for all non-agreement employees to return completed Certificates of Compliance with the Conflict of Interest Policy. All certificates should have been submitted by Oct. 15.

Deadline for Flu Shot Voucher Oct. 20

The deadline for Amtrak employees to register for a free seasonal flu shot voucher/coupon has been extended to 5:00 p.m. EDT time on Oct. 20. The deadline for redeeming the vouchers remains Oct. 22, and employees are strongly encouraged to take advantage of the offer as soon as possible due to shortages of the seasonal flu vaccine in some areas. The voucher program cannot be extended past Oct. 22, 2009.

Amtrak Submits PRIIA Service Studies

Amtrak recently delivered to Congress three feasibility studies on new or expanded rail service along with a plan to facilitate service between the United States and Canada during the 2010 Winter Olympics in Vancouver, B.C., and a report on high-speed service along the Northeast Corridor. These studies and reports were required in Sections 224, 406 and 212(d), respectively, of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA) which reauthorized Amtrak last fall.

Two of the studies address the feasibility of reinstating former Amtrak routes between Chicago and Seattle: the *Pioneer* route via Denver and Salt Lake City and the *North Coast Hiawatha* route through southern Montana. A third study looked at a host of service options impacting Pennsylvania, including an analysis of service changes at Cornwells Heights, Pa. and Princeton Junction, N.J.; a study of additional service between Harrisburg and Pittsburgh, Pa.; and an additional *Capitol Limited* stop at Rockwood, Pa.

"We could not have completed several major studies without the help and hard work of the operating departments, Government Affairs, and Marketing and Product Management," said Stephen Gardner, vice president, Policy and Development.

With assistance from the respective states, host railroads and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

"We looked carefully at a variety of alternatives for each route. We found some that have real potential and others which face significant challenges due to operating constraints, large capital investments, or negative impacts to existing services," said Gardner.

Federal and state policymakers must determine if any of the service options should be pursued, and if so, provide the required levels of capital and operating funding to Amtrak. Upon such a decision, Amtrak will aggressively work with federal and state partners to begin operating the service(s).

The cross-border study required in PRIIA Section 406 outlines recommended Amtrak *Cascades* service modifications along with security and customs enhancements that would help to reduce trip times between Seattle and Vancouver, improve reliability and make the service more competitive.

Amtrak's report required in PRIIA Section 212(d) outlines the infrastructure and equipment improvements necessary to provide regular high-speed rail service at specified trip times between Washington, D.C., New York City and Boston.

The full reports can be found on Amtrak.com under "Inside Amtrak" → "Other Reports" → "PRIIA Submissions and Reports."

Ethics and Compliance: Information regarding the ethics and compliance hotline and reporting provisions of the American Recovery and Reinvestment Act will be mailed to all employees this week. Any fraud, waste or misuse of stimulus funds should be reported to the anonymous Stimulus Transparency Hotline at 866-908-7231 or www.reportlineweb.com/Amtrak.

Operations Update: The Fall 2009-Winter 2010 System Timetable takes effect today.

Engineering: The Production Communications & Signals team, with the assistance of Mid-Atlantic Division forces, will be completing the installation of three new microprocessor-controlled interlockings on the Harrisburg Line this week.

Stations Update: Effective today, trains serving New Buffalo, Mich., will stop at the new station at 225 N. Whitaker St. Two *Wolverine* trains and two *Blue Water* trains will serve the station each day, while the *Pere Marquette* will no longer serve New Buffalo.

EIM Update: The Employee Information Management program continues its road show to demonstrate upgrades to the SAP Employee Information Portal. Events this week are in Jacksonville, Fla., on Oct. 26 and Wilmington, Del., on Oct. 28-29. For details, contact the project team at EIM@amtrak.com.

Benefits: Open enrollment for 2010 benefits has begun and runs through Nov. 13. Changes to benefit elections can be made online at www.amtrakbenefits.com or by calling the Amtrak Benefits Service Center at 800-481-4887.

PSSA Events: PSSA ceremonies honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held this week in Providence, R.I., on Oct. 27 and New York City on Oct. 28.

New Web Site Offers Improved Look and Functionality

On Oct. 25, visitors to Amtrak.com found a revamped Web site that makes booking train reservations online and finding information even easier.

Online ticket sales are expected to increase to more than half of all ticket sales as a result of the improved functionality, potentially generating as much as \$10 million in additional revenue. The project was a collaborative effort between the e-Commerce and Information Technology departments.

“The overhaul of the site is all about the customer,” said Senior Director, e-Commerce, Kathleen Gordon. “The goal is to provide customers with a site that is streamlined and easy to use in order to maximize ticket sales and customer loyalty.”

In addition to upgraded graphics, one of the most notable improvements to the site is a simplified booking process that combines the schedule search, reservation and train status functions into a single dynamic menu. When searching for trains, customers will now see the full day’s schedule, along with a pricing matrix that allows them to select a train based on the lowest fare or shortest trip time. The new shopping cart feature shows different legs of a reserved trip and itemizes the entire purchase.

Other highlights of the redesign include limited availability alerts when inventory of seats and sleeping accommodations are low, improved station pages that link to the interactive route map and an expanded promotions page. An upgraded mobile version of the site for smart phone users was also launched, with additional functionality to be added over the coming months.

Amtrak to Cover Cost of Seasonal Flu Shots for Employees

Late last week, Amtrak was informed by its flu vaccination program provider, AllOne Health, that on-site flu shot clinics at Amtrak work locations must be cancelled because AllOne Health was unable to acquire the necessary supply of vaccine doses. Amtrak will now reimburse employees up to \$40 if they choose to get a seasonal flu vaccination on their own. Employees may mail a copy of their vaccination receipt, along with their full name and eight-digit SAP ID number by Nov. 20 to:

Amtrak Environmental Health and Safety
40 Mass. Ave. NE
3W-104
Washington, D.C. 20002

The vaccination cost will be reimbursed tax-free in the employee’s paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1, and the program is only for Amtrak employees.

Government Affairs: Amtrak will continue operating at FY '09 federal funding levels through Dec. 18 under a second continuing resolution as Congress negotiates a final appropriations bill for FY '10. The previous continuing resolution expired on Oct. 31.

EIM Update: The Employee Information Management program concludes its road show to demonstrate upgrades to the SAP Employee Information Portal this week. Events are in Philadelphia on Nov. 2-3, New York on Nov. 4-5 and Boston on Nov. 6. For details, contact the project team at EIM@amtrak.com.

Benefits: Open enrollment continues through Nov. 13. To participate in the health care or dependent day care FSA or legal services plan in 2010, non-agreement employees must enroll at www.amtrakbenefits.com, even if they are enrolled in 2009. Call 800-481-4887 for more information.

PSSA Events: A PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held this week in Washington, D.C., on Nov. 3.

Energy Conservation Slogan Contest Winner Announced

Amtrak has unveiled its new energy conservation slogan: "Training a nation to conserve energy." The slogan was selected by a judging panel from more than 170 nationwide employee submissions to the Energy Conservation Slogan Contest conducted in October.

The winning slogan was submitted by Joseph Dannemann, project manager, Information Technology, in Washington, D.C. The slogan will be used in conjunction with Amtrak's national initiative to improve energy conservation throughout the company.

Safe-2-Safer Rollout Continues to Expand

Front-line employees and managers in the Mid-Atlantic, Northeast and Southern divisions, along with employees at the three Mechanical backshops, have begun the process of implementing Safe-2-Safer to reduce injury risks, while learning how to make current safety programs more effective.

The rollout of Safe-2-Safer is being conducted on a geographic basis and includes employees from all departments within a geographic region or division. Rollout began in the Mid-Atlantic in July, followed by the Northeast in September and Southern in October. The three Mechanical backshops, which are being treated as a separate region, began the rollout in September. Remaining divisions and Amtrak headquarters will kick off the program in the next several months.

"We're off to a great start," said Chief Operating Officer William Crosbie. "Employees I've talked to have been very enthusiastic about improving their safety and security through Safe-2-Safer and it's beginning to gain momentum as we roll it out across the system."

Within each division, the rollout process begins with all managers and supervisors receiving structured, confidential feedback on their leadership strengths and weaknesses, then working with a leadership coach to improve their managerial skills. Next, various teams of senior leaders, managers, supervisors and labor representatives begin a prescribed program called the Behavior Accident Prevention Process® (BAPP) to identify and reduce common injuries within the local area.

"These first few steps are critical to the success of Safe-2-Safer," said Vice President of Transportation Richard Phelps, the program's executive sponsor. "Safe-2-Safer is a multiyear initiative and it will take some time to see significant results, but this start lays the foundation for a successful program."

For more information and a Safe-2-Safer project calendar, visit the "Safety" page on the Amtrak intranet.

ARRA Ethics and Compliance

Employees will soon receive a letter from President and CEO Joe Boardman about Amtrak's involvement in the American Recovery and Reinvestment Act and the company's efforts to support the goals of the legislation by fueling the economy, putting people and resources to work, and serving as a model of ethical work practices.

Employees are asked to assist in this effort by ensuring transparency, honesty and clarity in Amtrak stimulus projects. Any suspected fraud, waste or abuse of ARRA resources should be reported to a manager or anonymously to the Stimulus Transparency Hotline at 866-908-7231. Anonymous concerns may also be reported online at www.reportlineweb.com/Amtrak.

Benefits: Open enrollment ends on Nov. 13. To participate in the health care or dependent day care Flexible Spending Account or legal services plan in 2010, employees must enroll at www.amtrakbenefits.com, even if they are enrolled in 2009. All other benefits will carry over unless changed or cancelled. Call 800-481-4887 for more information.

PSSA Events: A PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries was held yesterday in Philadelphia.

Marketing and Product Development: Discounted tickets are available for employees on select performances of the *Radio City Christmas Spectacular* in New York through Dec. 10 by calling 866-858-0007 or visiting www.radiocitychristmas.com. Use promotional code "AMTRAK."

Marketing and Product Development: Employees systemwide can now dial the Employee Broadcast System at 877-268-7251 and press 8 to hear suggested ways to deliver a wide variety of on-board service, conductor and attendant announcements. This is part of an initiative for the *Crescent* Route Performance Improvement project.

Safe-2-Safer Update: A calendar of events related to the rollout of Safe-2-Safer is now available on the intranet on the "Safety" page.

2010 Amtrak Wall Calendars Now Available

The 2010 Amtrak wall calendars, featuring a *Northeast Regional* train making its way southbound through the snow at Croydon, Pa., are now available. Distribution to Amtrak work locations started today and will continue for the next two to three weeks.

Additional calendars can be ordered through the Amtrak Online Store at <http://amtrak.ai-estore.com> or by calling Staples Promotional Products at 800-369-4257. The calendars are available in both 11"x 17" and 24"x 34" sizes at \$5 and \$10 each, respectively.

VRE Commissions Make Decision on Service Contract

The two parent commissions of the Virginia Railway Express — the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission — voted last week to continue with the commuter railroad's plan to transition operating and maintenance services from Amtrak to France-based Keolis Rail Services.

Amtrak has stated its commitment to providing high-quality service to VRE and its passengers for the remainder of the contract, which expires on June 30.

Flu Shot Reimbursement Reminder

The deadline for reimbursement of seasonal flu vaccinations for employees is Nov. 20. Upon getting a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
40 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1.

Operations Update: Temporary schedules currently in place for *Empire Service* trains are scheduled to be lifted on Nov. 18, with the completion of several bridge and track work projects along the route.

Stations Update: A new long-term parking facility on Amtrak-owned property opened today at the Gateway Transportation Center in St. Louis.

Transportation: On-Board Service employees have been issued a special lapel pin to increase awareness of recycling programs. The pin must be worn until April 30 on the right breast area of the employee's outermost garment. Crew bases needing additional pins should contact Carla Wright at wrightc@amtrak.com or ATS 728-3700.

Marketing and Product Development: A promotion for the new "Thomas & Friends: Holiday Express™" DVD is in place until Dec. 31. A series of counter cards, bookmarks and mini coloring books are available in over 90 stations and DVDs contain a Kids Ride Free insert.

Last Week for Flu Shot Reimbursements

The deadline for reimbursement of seasonal flu vaccinations for employees is Nov. 20. Upon getting a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
60 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1.

Service to Begin in Stanwood, Wash., This Week

Four Amtrak *Cascades* trains will begin serving Stanwood, Wash., on Nov. 21 as the community celebrates the grand opening of a new train station and its first passenger rail service since 1971. The \$5 million station was funded by the state of Washington.

"This is a great addition to the Amtrak system," said Kurt Laird, district superintendent. "Residents of the Stanwood and Camano Island communities now have direct rail access to the Pacific Northwest and the ability to connect with other parts of the country by train."

Officials from the state of Washington expect the service to boost local tourism and economic development, while providing another point-of-origin for travelers going to the 2010 Winter Olympics in Vancouver, B.C.

"This has been a long time coming, and it's going to make a huge difference for so many people in so many ways," said state Sen. Mary Margaret Haugen (D-Camano Island) in a press release issued last week. "Everywhere I go, people are talking about the train station."

The station grand opening celebration will begin at 9:03 a.m. with the arrival of Northbound Train 510. Amtrak officials, Sen. Haugen and Washington Transportation Secretary Paula Hammond are expected to attend.

Other trains serving Stanwood are Northbound Train 516, departing at 8:14 p.m.; Southbound Train 513, departing at 9:18 a.m.; and Southbound Train 517, which departs at 8:25 p.m.

Passenger rail service in Stanwood/Camano Island was last operated by the Great Northern Railroad 38 years ago.

2010 Amtrak Wall Calendars Now Available

The 2010 Amtrak wall calendars, featuring a *Northeast Regional* train making its way southbound through the snow at Croydon, Pa., are now available. Distribution to Amtrak work locations started last week and will continue for the next two weeks.

Additional calendars can be ordered through the Amtrak Online Store at <http://amtrak.ai-estore.com> or by calling Staples Promotional Products at 800-369-4257. A discount of 15 percent is available to employees for online purchases by using the promo code EMP15. The calendars are available in both 11"x 17" and 24"x 34" sizes at \$5 and \$10 each, respectively.

Message from Joe Boardman

Dear Co-workers,

This week, I'll be celebrating the start of my second year at Amtrak. It was just a year ago that I stepped foot on Amtrak property as president and CEO. It was a particularly exciting time — you could feel the energy, as we were in the midst of the busiest week of our year.

Amtrak Police and K-9 units patrolling, red caps assisting passengers, lead service attendants setting up food and beverage service, conductors welcoming passengers, the bustle of the crew base and the “two-to-go” sound of the horn as trains pull from the station — these are among the sights and sounds of Thanksgiving. Behind the scenes, coach cleaners, dispatchers, track gangs and all the other crafts work together to help provide a safe, reliable and enjoyable experience to the more than 660,000 people we expect to travel aboard Amtrak this week.

What I have always loved about the railroad is the dynamic rhythm that comprises each person's effort in making the operation work well. Each of you contributes to how well we do. It's at the most hectic of times that it is most important that we remain professional and welcoming, and operate reliably and safely. Many people will ride Amtrak for the first time this week, and they'll judge us based on their experience with us. We have a real opportunity to turn first-time riders into regular riders — take the initiative to help make that happen. Most of our passengers have travel options, and we must be thankful that they've chosen to make us part of their holiday experience.

This week, the spotlight will be on us and it will show the nation how Amtrak is an important part of the fabric of communities across the country. But the spotlight on Amtrak and passenger rail will continue to shine long after turkey dinner leftovers are consumed. We have a great deal of opportunities before us and we're operating in an increasingly competitive environment. Whether it's during Thanksgiving or any given Thursday, we must work together to show the nation what Amtrak can do.

In the midst of the bustle this week, take a moment to think about how you can help Amtrak shine. Consider the things for which you are thankful — your job, the camaraderie of your co-workers, your health and your family. Know that I value your hard work and dedication and am thankful for what you do this week and every week.

Please work safely and happy Thanksgiving.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Boardman'.

Joe Boardman
President and CEO

Operations Update: The Thanksgiving Holiday Timetable for Northeast Corridor services will be in effect Nov. 24-30. All NEC, *Keystone Service* and *Pacific Surfliner* trains will require reservations during that time. Employee flash-pass privileges still apply, but pass riders must give up their seat to revenue passengers when standee conditions occur.

Operations Update: Effective Nov. 23, schedules will be adjusted for certain trains operating between Boston and New Haven, Conn., due to ongoing track work. Schedules will also change between Springfield, Mass. and New Haven with the conclusion of track work in this area.

Stations Update: The train station in Norman, Okla., celebrated its 100th anniversary with a series of events last week. The station is served by the *Heartland Flyer*, which celebrated its 10th anniversary this year.

Greener: Locomotive 2015 was placed back in service this week along the Capital Corridor after the engine was retrofitted with systems and components that reduce diesel exhaust by 45 percent.

PSSA Event: The final 2009 PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held on Dec. 3 in Jacksonville, Fla.

Diversity Initiatives: Amtrak's mandatory diversity training for non-agreement employees is now underway for FY '10. The first classroom training session for new employees or employees who have moved into a non-agreement position takes place on Dec. 1 in Washington, D.C. Full information can be found on the intranet under "Employees" → "Business Diversity" → "Educational Links."

Finance Establishes Group to Support Grant Funding

In order to provide improved fiscal and informational support and ensure compliance with appropriate regulations and policy related to grant funding, the Finance department has established a Grants Administration group.

This new group strives to take advantage of all available grant-funded opportunities while fulfilling the associated reporting regulations and audit requirements.

All grant applications must be processed through Finance. Contact Beverly Thorpe, senior director, Grants Administration, at ATS 777-2218 or beverly.thorpe@amtrak.com regarding active grants, pending grant submissions or programs/projects that may qualify for grant funding.

Employees Urged to be Mindful of Cold Weather Risks

As winter approaches and brings with it cold temperatures for much of the system, Amtrak is taking steps to educate employees on how to remain safe in cold-weather conditions and identify and address potential weather-related medical emergencies.

"When most people think of safety, they tend to think about slips, trips and falls, but fail to acknowledge the hazards of working in cold weather," said Chief Operating Officer William Crosbie.

Precautionary measures should be taken when working in cold temperatures such as dressing appropriately and trying to stay hydrated by drinking warm liquids. Ideal work wear includes multiple layers of clothing, including an insulated and waterproof layer, as well as gloves and a winter hat or hard hat liner. Headwear should also provide protection to the ears and face. Overshoes and/or insulated, waterproof boots are also extremely important for guarding against frostbite.

The temperature does not have to be below freezing to cause health problems. Initial effects on the body caused by cold temperatures may be mild, such as shivering or numbness, but can quickly escalate to more severe problems such as frostnip (a mild form of frostbite), frostbite and hypothermia.

After shivering or numbness, the first sign of more serious injuries include discolored skin — usually whitish, yellowish or grayish. If the skin begins to feel hard or waxy, frostbite may be setting in and medical attention should be sought immediately.

A person with possible frostbite should move to a warm area and gently loosen or remove tight clothing or jewelry that may restrict circulation. Warm the affected area slowly using body heat or warm breath, but do not rub the area or apply dry heat, as this may damage the tissue.

Symptoms of hypothermia include fatigue, confusion, stiff muscles and slurring of speech. This condition can quickly become life-threatening, so medical attention should be sought immediately. The individual should be moved to a warm area and wrapped in blankets. Body-to-body contact will also help to slowly raise the victim's body temperature. Monitor the victim's breathing and heart rate, as CPR may become necessary. Do not use electric blankets, hot water bottles or any other kind of artificial heat to warm the victim.

If the person cannot be moved out of the cold, cover them with dry clothing or blankets until help arrives. Providing warm liquids to drink is also helpful.

OSA 09-77, which was issued today, provides further details on working in cold weather. It can be found on the intranet under "Library" → "Service Standards."

Human Resources: Non-agreement employees must enter leave time in SAP as it is taken. Any 2009 leave that has not been entered must be submitted by Dec. 31. In addition, HR is currently developing a solution to accommodate various non-standard work schedules. Look for more information on this soon.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development: An Amtrak model train will circle the National Christmas Tree outside The White House this year, thanks to a partnership with the National Park Service, National Park Foundation and National Christmas Tree Railroad. The 1:22.5 scale model includes two P-42 locomotives, four Amfleet cars and a café car.

Marketing and Product Development: The deadline for employees to purchase discounted tickets to select performances of the *Radio City Christmas Spectacular* in New York is Dec. 10. To order, call 866-858-0007 or visit www.radiocitychristmas.com and use promotional code "AMTRAK."

Host Railroads: Representatives from Amtrak will be in Missouri on Dec. 8 to attend the official opening of a new \$8.1 million, 9,000-foot siding on the Union Pacific Railroad used by Amtrak trains between St. Louis and Kansas City.

Thanksgiving Performance Sets All-Time Record

The final performance report for Thanksgiving week — Amtrak's busiest week of the year — shows a ridership increase of 4 percent over last year and a ticket revenue increase of 1 percent. The 685,876 trips from Nov. 24 - 30 generated \$44.1 million in ticket revenue, which is the best weekly performance in company history.

"Once again, our performance illustrates the growing popularity of passenger rail service, which is a credit to our front line employees who operate a great railroad," said Emmett Fremaux, vice president, Marketing and Product Development. "To outperform our previous ridership record from FY '08, when gas prices were much higher, is a great accomplishment."

Estimates from AAA predicted that overall holiday travel would rise slightly from last year's sharp drop, but that air travel would still decline about 6 percent.

The substantial ridership was managed through a collaborative effort between the Transportation, Engineering and Mechanical departments across the system as additional departures, extended train consists and schedule changes were implemented to maximize availability.

"On behalf of the entire executive team, I want to thank every employee for their dedication to safety and customer service during such a busy time," said President and CEO Joe Boardman.

Executives Participate in National Rail Conference

President and CEO Joe Boardman, Chief Financial Officer DJ Stadtler and Vice President of Policy and Development Stephen Gardner attended a conference on domestic high-speed rail manufacturing hosted by U.S. Secretary of Transportation Ray LaHood on Dec. 4.

Described as a preliminary discussion, the conference focused on investment opportunities arising from the economic stimulus program to create manufacturing jobs in the U.S. The group of government officials, business leaders, union representatives and other railroad industry groups also addressed ways to develop the country's high-speed and passenger rail network.

Safe-2-Safer Update from Richard Phelps

Dear Co-workers,

Since beginning the Safe-2-Safer program this summer, we have made a lot of progress thanks to your support. While many of you may have not yet witnessed the progress we're making, let me assure you that we have been successful in completing the first critical steps of this multiyear program.

Completing the survey and focus groups was a huge milestone and provided us with valuable insight that will help us maximize the effectiveness of Safe-2-Safer. (As a reminder, the full survey and focus group results are posted on the Safety page on the intranet.)

Additionally, all managers/supervisors within the Mid-Atlantic Divisions have completed their first coaching module and some have also started creating a personalized action plan for becoming better safety leaders. Managers in the Northeast Division and Mechanical shops are close behind and as we continue to roll-out systemwide, leaders within every division and department will follow suit.

At the heart of Safe-2-Safer is the Behavior Accident Prevention Process® (BAPP), which begins with local employee teams creating a comprehensive list of behaviors that can help prevent accidents and injuries that have occurred in that area. In locations where we have begun the Safe-2-Safer roll-out, I know many employees are excited about starting BAPP because they recognize how this new way of addressing risk reduction and relating to each other can yield benefits. For that reason we must be committed to doing it correctly rather than quickly.

BAPP hinges on effective *teams* of union workers *and* managers, so over the next several weeks, we will be meeting with every union's representative officers and soliciting from the General Chairmen their perspectives, contributions and insights to make BAPP as successful as possible. Our goal is to better understand the linkage between safety culture and unique safety issues confronting each craft so we can together identify the best fixes and ongoing procedures to accomplish our overarching goal of reducing risks and injuries.

We're committed to improve the way employees, management and labor leaders work together. The executive committee and I believe safety is not about statistics — it's about people. It's about being able to enjoy seasons such as this with our families and friends.

Safe-2-Safer has the potential to make our great railroad an even better place to work. I hope you're as encouraged as I am by what will be taking place and look forward to keeping you informed as we move forward. Please have a safe and happy holiday season.

Sincerely,

Richard Phelps
Safe-2-Safer Executive Sponsor
Vice President of Transportation

Real Estate: The Real Estate Development group recently closed on the purchase of the Sanford *Auto Train* facility property from CSX, a move that will greatly facilitate the ongoing capital projects at the station. This property had been under a short term lease with CSX.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development: To meet passenger demand for a higher level of food service, dining car service is being restored on the New York-Chicago *Lake Shore Limited* beginning Dec. 14. Refurbished Heritage Dining Cars will replace the Diner Light cars that have been part of the consist since 2007.

Amtrak Begins Greenhouse Gas Emissions Survey

Select employees may soon be contacted by the Environmental Health and Safety department, as Amtrak conducts a comprehensive greenhouse gas (GHG) emissions inventory. The inventory is part of Amtrak's membership in The Climate Registry (TCR), a non-profit organization founded to set consistent and transparent standards for businesses and governments to calculate, verify and publicly report their GHG emissions.

Amtrak joined TCR this year as part of its continuing effort to reduce its carbon footprint.

The inventory process will require an assessment of GHG emissions throughout its system including those from diesel and electric locomotives, passenger cars, maintenance equipment, stations, offices and other facilities.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Employees Honored for Military Support

On Dec. 22 at Bear Car Shops, two Amtrak employees will be recognized for their commitment and service to the U.S. armed forces.

Superintendent Lew Wood will be presented with a Patriot Award by the Committee for Employee Support of the Guard, in recognition of his strong support of employee reservists and his leadership in facilitating their participation in the Guard and Reserve. Wood was nominated by Sgt. Michael Lawson, an Air National Guard reservist who is an electrician at Bear Car Shops.

Sgt. Lawson is also being recognized at the ceremony by the International Brotherhood of Electrical Workers with a letter of appreciation for his outstanding service to his country. Lawson is preparing for his third tour of duty in Iraq and Afghanistan.

"This award recognizes the Bear facility's and Amtrak's commitment to do our part to help and support the men and women who serve in the military and their families," said Wood. "The employees at Bear gladly accept the responsibility to give those protecting us everything they need when they are away and when they come home."

A Message from Joe Boardman

Dear Co-workers,

I want to tell you how proud I am that while the snow this weekend paralyzed the East Coast, Amtrak kept rolling thanks to the dedication of many employees. We're nearly back to normal and we still have some digging out to do, but I want to extend my sincere thanks and appreciation to each of you who took part in keeping Amtrak operating.

The historic snowstorm that blanketed the Mid-Atlantic and New England regions this weekend wreaked havoc on roads, airports and pretty much anything that moves. Record snowfall from North Carolina to Boston left many travelers stranded, as airports shut down. Washington's Metro system closed above-ground operations.

Although completely unrelated to the storm, Eurostar rail operations between France and England were suspended for the third day today due to technical failures associated with weather conditions, leaving 90,000 travelers stranded this holiday season, according to news reports.

While Amtrak cancelled some service and experienced delays, trains were nonetheless operating on our railroad; although we experienced significant delays and problems when our trains left our territory south of Washington. It wasn't easy and we had problems along the way, but the point is that we were operating.

Despite equipment and infrastructure challenges of our own, we still carried thousands of people to their destinations when others couldn't move — and we did so safely. We accommodated numerous travelers who gave up on the airlines. We carried people home for the holidays while others are still waiting to dig out.

We operated because of the hard work of many employees on the front lines and behind the scenes. Employees who haven't been home for days, others who battled the weather to make it in, System Operations, Engineering crews, Mechanical employees, station personnel, and on-board service crews — your dedication is impressive.

Having been raised in upstate New York, I know what snowstorms like this can do. It takes a hearty and committed group to persevere. I know we encountered operational problems over the road and we have plenty of opportunities for lessons learned. It takes everyone — from coach cleaner to signalman — to make this railroad run. And it's just not this event; we manage mudslides in the Pacific Northwest, hurricanes in the South, and other conditions that test our know-how and determination. It's that experience, expertise, fortitude and dedication that makes Amtrak unique.

Thank you for everything that you do and please have a safe and happy holiday.

Sincerely,

A handwritten signature in dark ink, appearing to read "Joe Boardman", written in a cursive style.

Joe Boardman
President and CEO

Finance: The reimbursable mileage rate for private automobiles used for authorized Amtrak business will decrease from 55 cents to 50 cents, effective for mileage expenses incurred on or after Jan. 1.

Human Resources: Leave taken in 2009 must be entered in SAP no later than Dec. 31. Additionally, leave requests for calendar year 2010 can now be submitted.

Human Resources: Employees who have moved in the past year should be sure to update their mailing address by submitting a new Employee Information Form. Forms are available at local Human Resources Offices or on the intranet under "Library"→"Forms." Addresses should be changed by Jan. 10 in order for W-2 tax forms to be mailed to the correct address.

Payroll: Railroad Retirement Tier I and Tier II taxes will remain at the current rates in 2010: 6.2 percent (\$6,324 maximum withholding) and 3.9 percent (\$2,960.10 maximum withholding), respectively.

Payroll: Employees are encouraged to review their W-4 Employee Withholding Allowance Certificate. Any status change requires a new W-4 be submitted to Payroll. Employees who wish to claim exempt status for 2010 must also submit a new form by Feb. 15.

2010 Holiday Schedule

Amtrak will observe the following 2010 dates as holidays for non-agreement employees:

<u>Holiday</u>	<u>Day Observed</u>
New Year's Day	Jan. 1
Martin Luther King, Jr. Day	Jan. 18
President's Day	Feb. 15
Memorial Day	May 31
Independence Day	July 5
Labor Day	Sept. 6
Veteran's Day	Nov. 11
Thanksgiving Day	Nov. 25

Because Christmas Day (Dec. 25) falls on a Saturday, non-agreement employees hired prior to 2010 are granted an additional personal day and are therefore entitled to three personal days in 2010. Employees must obtain supervisory approval prior to using any personal days.

Non-agreement employees hired in 2010 will receive personal days based on their date of hire. Employees hired between Jan. 1 and May 31 will receive two personal days, while those hired June 1 through Aug. 31 are entitled to one personal day. Employees hired Sept. 1 or after will not have any personal days.

Holidays for agreement-covered employees are subject to each specific labor agreement. Employees should check with their union to be sure which holidays are included in each agreement. Some agreement-covered employees also receive personal holidays, the number of which varies by agreement.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library"→"Policies."

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in the National Railroad Passenger Corporation Savings Plan

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

- | | | |
|----|---|---|
| 1. | Name of Plan: | National Railroad Passenger Corporation Savings Plan (the “Plan”) |
| 2. | Plan Number: | 002 |
| 3. | Name and Address of Plan Sponsor: | National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
| 4. | Employer Identification Number: | 52-0910053 |
| 5. | Name and Address of Plan Administrator: | Savings Plan Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, those employees employed by the National Railroad Passenger Corporation, Chicago Union Station Company, the Washington Terminal Company and the Union Station Redevelopment Corporation, excluding any such person who is a member of a unit of employees covered by a collective bargaining agreement.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. The number of persons needed for the Department of Labor to comment with respect to this Plan is ten (10) employees. If you request the Department of Labor to comment, your request must be in writing and must specify the matters upon which comments are requested, and must also include: (1) the information contained in items 1 through 4 of this Notice; and (2) the number of persons needed for the Department of Labor to comment.

A request to the Department of Labor to comment should be addressed as follows:

Deputy Assistant Secretary
Employee Benefits Security Administration
ATTN: 3001 Comment Request
U.S. Department of Labor,
200 Constitution Avenue, N.W.
Washington, DC 20210

COMMENTS TO THE INTERNAL REVENUE SERVICE

Comments submitted by you to the Internal Revenue Service must be in writing and received by March 16, 2009. However, if there are matters that you request the Department of Labor to comment upon on your behalf, and the Department of Labor declines, you may submit comments on these matters to the Key District Director to be received within 15 days from the time the Department of Labor notifies you that it will not comment on a particular matter, or by March 16, 2009, whichever is later, but not after March 31, 2009. A request to the Department of Labor to comment on your behalf must be received by it by February 14, 2009, if you wish to preserve your right to comment on a matter upon which the Department of Labor declines to comment, or by February 24, 2009 if you wish to waive the right.

ADDITIONAL INFORMATION

Detailed instructions regarding the requirements for notification of interested parties may be found in Sections 17 and 18 of Revenue Procedure 2008-6. Additional information concerning this application (including, where applicable, an updated copy of the Plan and related trust; the application for determination; any additional document dealing with the application that have been submitted to the Service; and copies of Section 17 of Revenue Procedure 2008-6 are available in the office of the Plan Administrator during normal business hours for inspection and copying. (There is a nominal charge for copying and/or mailing.)

If you have any questions about this Notice, please contact Rosemarie Tana at 202-906-2272.

Information for Agreement-Covered Employees Regarding New Wage Expense and Tax Changes

OVERVIEW

In order to fully comply with current IRS regulations (IRS Treas. Reg. sections 1.32-6 and 1.62-2 and IRS Publications 463 and 1542), Amtrak has realigned the expense wage type codes that are entered into Payroll on a weekly basis. The go-live date for utilization of these new wage types depends upon the payroll area, but must be implemented in time for the first payroll of 2010.

A majority of the accounting and timekeeping changes involve breaking the previous 1241 code into a series of more precise codes, but also involve other wage type codes. While many changes are simply an accounting change, some of the new codes change Amtrak's historical tax treatment of some routine payments. To comply with IRS regulations, Amtrak must begin withholding taxes from certain payments to employees that were not formerly treated as taxable income. If Amtrak does not properly tax these payments, the company and its employees will be exposed to additional tax liabilities by the IRS.

UNCHANGED WAGE CODES

There are three wage type codes that will remain unchanged and will continue to be used according to current policy:

- 12MI for mileage
- 1248 for differentials
- 1245 for uniform allowances

However, for the uniform allowances, there will now be an additional certification requirement. Employees receiving the uniform allowance must certify that the funds are being used for the maintenance of the uniform. More information on this certification will be forthcoming over the next few weeks. Also, 1248 will be used only for differentials; other taxable payments should not be entered using this code.

ELIMINATED WAGE CODE

Wage type code 1243 will no longer be used. It is being replaced by 124X (see below for details).

NONTAXABLE CHANGES

The following wage type codes are being introduced for accounting purposes only. The previous wage type 1241 has been broken into numerous wage types in order to better categorize the different types of expenses that are being incurred by employees:

- 124A – Tools/parts/keys
- 124B – Work boots
- 124C – Company meetings
- 124E – Education/training
- 124F – Office supplies
- 124G – Travel: gas/rental car/airfare/hotel
- 124K – K9 Fees (police only)
- 124L – Licenses/certifications
- 124M – Non gang meals
- 124P – Meal per diem (MW gangs in lodging)
- 124Q – Meals provided by Amtrak
- 1241 – Side miles (LMS only)

Wage types 1240 and 124H will continue to be used for nontaxable meals in LMS; however, there will be new taxable codes discussed below.

TAXABLE CHANGES

In addition to accounting changes, some wage types will now be subject to income taxes to become compliant with IRS regulations:

- 124T – Taxable meals (under 10 hours per day) – paired with 1240 (LMS only)
- 124V – Taxable meals (On Board employees) paired with 124H (LMS only)
- 124Z – Taxable meals per diem (MW Gangs not in lodging) – paired with 124P
- 124W – Weekend travel allowance
- 124X – Overtime meals
- 124U – Taxable uniform allowance (if 100% of allowance is not used to maintain the employee's uniform)

Amtrak Payroll will be providing more detailed information and reference materials in December 2009 during both onsite and WebX training.

CONTACT INFORMATION

For questions about the new system, please contact Amtrak Payroll at 877-268-7251.

Amtrak Pandemic Influenza Leave Policy

It is the policy of Amtrak to promote a safe and healthy environment for its employees and passengers. This policy has been developed to minimize exposure and absenteeism during a pandemic influenza when it is a threat to our employees, their families and the traveling public.

Amtrak is a 24 hour, 7 day a week operation, and all employees are expected to report to work as assigned, except as otherwise provided in this or another Amtrak policy.

Personal Hygiene and Good Health Practices to Maximize Health

To maximize health, you should cover your cough by coughing in to your elbow or into a tissue, and wash hands thoroughly and regularly during the influenza outbreak. If soap and water are not available, using an alcohol based hand cleanser is recommended. Employees are encouraged to avoid touching eyes, noses and mouth as much as possible during an influenza outbreak. All employees are strongly encouraged to do all they can to maintain physical fitness, including eating a healthy diet, controlling body weight, and following their physicians' instructions.

Pandemic Flu Team

Amtrak's Pandemic Flu Team consists of representatives from the operating department, Human Resources, Labor Relations, Corporate Communication, Police and EHS departments. The members of the team are:

Beard, Larry; Emergency Planning
Cooper, Al; EHS
Deitchman, Roy; EHS
Frazier, Michael; Transportation
Lorrain Lech, Labor Relations
Sharon Slaton, Corporate Communications
Lee, King; Police
Nesci, Donna; Customer Service
Petrillo, Mark; EHS
Pfozter, John; IT
Pinsky, Tim; Medical
Reid, Malva; Health Services
Reilly, Don; Mechanical
Scott, Kevin; Customer Services

The responsibility for each team member is included in the Pandemic Flu Emergency Plan.

Designation of Emergency Situation

After being briefed by the Pandemic Flu Team, the President or Chief Operating Officer of Amtrak or their designees can declare a state of emergency. If this is done, the Pandemic Flu emergency plan will be executed and employees are required to follow the established procedures. The procedures are posted on the Amtrak Intranet under the Safety Section, under Public Health.

Federal Mandate

By direction of the President of Amtrak, the company will adhere to any directives issued by the President of the United States and/or federal government regarding closures or extinction of transportation outlets.

Business Continuity

In general, if you or a family member has not been infected with influenza, you are expected to report to work.

If emergency conditions prevent you from reporting to work or from reporting to work on time, you are responsible for notifying your supervisor, if feasible, before or within the first hour of your work shift. Preferably, such notification should be made by a telephone conversation directly with your supervisor. If direct contact is not possible, leaving a detailed voice mail message is recommended. You should leave a phone number where you can be reached.

If you report to work and it appears you have flu symptoms, that may include fever, sneezing, runny nose, coughing, sore throat, headache, muscle aches, or feeling tired and weak, you will be sent home and appropriate sick leave policy or procedure will apply. You are required to provide medical documentation from a medical provider to Health Services clearing you to return to work.

Leave Policy during Pandemic Influenza Crisis

Management

If an employee is out of work because of influenza for one (1) to five (5) days, the employee must use available sick leave, in accordance with Amtrak's Sick Leave Policy and provide medical documentation from a medical provider to Health Services clearing him/her to return to work. Management and ARASA employees out more than six (6) consecutive workdays may be covered under the provision of the Short Term Disability

Income Policy, P/I Number 7.29.1. Please refer to the policy for guidance. Employees must provide medical documentation to support the request for STD income.

If the company is required to go into an emergency closure, employees will be allowed, but not required, to use all earned and unearned vacation and personal leave days for that year.

Agreement Covered Employees

If the President of Amtrak declares a pandemic emergency any absences in the affected area(s) due to sickness related to pandemic emergency during that emergency period would be excluded from the application of the National System Attendance Policy.

If an employee is out of work because of influenza, the procedures in his/her applicable labor agreement regarding sick leave must be followed.

If the company is required to go into an emergency closure, the company will determine if it will exercise the emergency annulment procedures within the respective labor agreements.

Exposure Leave Policy

If an employee has been exposed to a confirmed case of the influenza virus but is asymptomatic, he or she must not come to work through the incubation period as defined by the Centers for Disease Control. If, after this period, he or she remains asymptomatic and is cleared by a medical provider, she or he may return to work with appropriate medical documentation sent to Health Services. During this time, the employee is eligible to take any eligible vacation or sick days up to his/her annual allotment. With supervisory approval, the employee may also be allowed to work from home. Work from home decisions will be made based upon the employee's responsibilities and general work assignments

Taking Care of a Sick Family Member

If the employee is asymptomatic and taking care of a family member who has a confirmed case of the influenza virus, he or she must not come to work through the incubation period as defined by the Centers for Disease Control. If after this period, he or she remains asymptomatic and is not required to continue to be a caretaker and is cleared by a medical provider, she or he may return to work with appropriate medical documentation sent to Health Services. During this time, the employee is eligible to take any eligible vacation or sick days up to his/her annual allotment. With supervisory approval, the employee may also be allowed to work from home. Work from home decisions will be made based upon the employee's responsibilities and general work assignments

Family and Medical Leave Policy

Please reference the Family and Medical Leave Policy located on the Amtrak Intranet.

Emergency Medical Procedures

If an employee is in need of medical attention, please notify his or her immediate supervisor and request assistance. If the situation merits trained medical personnel, contact the Amtrak Police department or call 911 immediately.

Employee Assistance Program

Amtrak offers an Employee Assistance Program (EAP). The EAP provides 24-hour confidential access to assistance and counseling for personal and workplace issues. The EAP can be reached by calling:

Washington, DC	(202) 906-3447; ATS: 777-3447
Boston, MA	(212) 630-7655; ATS: 521-7655
New York, NY	(212) 630-7655; ATS: 521-7655
Philadelphia, PA	(215) 349-1487; ATS: 728-1487
Chicago, IL	(312) 880-5254; ATS: 623-5254
Jacksonville, FL	(904) 766-5133; ATS: 865-5133
Los Angeles, CA	(800) 453-9557; ATS: 761-3438
Oakland, CA	(800) 453-9557; ATS: 761-3438

Sent: Tue May 05 11:44:49 2009
Subject: Re: your message in Amtrak This Week

We send it directly to Donna McLean and Tom Carper, per their request. I'm at the doctor's and can't view the list from the Bberry, so I asked Josh about it. He told me that last week we had a snafoo and he had to rebuild the list, so Carper may not have received what we've sent out this past week.

When this issue has come up in the past, it's been decided not to send board members ATW and employee advisories unless they ask for it. Because we've inquired again (just now), John Carten is checking with Eldie. Would you like them to receive Amtrak This Week and Special Employee Advisories?

Thanks.

Margaret

Subject: your message in Amtrak This Week

Joe,

Attached is a draft of Monday's Amtrak This Week, which includes a message from you. I've surmised what some of your experiences have been, so please correct them or add anecdotes. Please send your edits/approval to me and Josh Raymond, as I'll be in Wilmington a good part of the day tomorrow. I know you're busy, so we can get this out on Tuesday if need be.

Thank you and safe travels.

Margaret

Amtrak Strategic Guidance and FY 2010-2014 Five Year Financial Plan

Summary

Amtrak's [Strategic Guidance](#) discusses the opportunities and challenges presented by the current passenger rail environment and describes the activities being undertaken to reshape, renew and rebuild the railroad. It establishes broad goals and creates key performance indicators to measure Amtrak's progress as it pursues a growth-oriented mission to maximize unprecedented federal and state support for more passenger rail service.

The [FY 2010-2014 Five Year Financial Plan](#) serves as a companion document to, and provides additional detail for, the Strategic Guidance. The Plan for the first time provides financial projections for Amtrak's revenue, operating costs, capital programs and debt service obligations. It also describes specific investments, actions and initiatives Amtrak is planning to take to advance the goals of the railroad and details key performance indicators with targets. It is bound by the authorized funding levels as stated in the Passenger Rail Investment and Improvement Act of 2008 (PRIIA); however, Amtrak's vision extends beyond these constraints.

The Strategic Guidance sets the foundation for the Five Year Financial Plan, and together they encompass the strategy for continuing the growth Amtrak has seen since 2002 and better positions the company to capitalize on this historic moment in passenger rail and secure its leadership position in an increasingly competitive industry. The two documents combined create a new vision that supersedes Amtrak's 2005 Strategic Reform Initiatives and align Amtrak's goals with those passed by Congress in PRIIA and in the Obama administration's Vision for High-Speed Rail in America.

Strategic Guidance

Over the course of the last decade, economic and social trends have led to an increase in the demand for passenger rail. In a period during which airport and highway congestion is growing, fuel prices are volatile, urban centers are expanding and concerns about environmental sustainability are affecting city planning, Congress responded and passed PRIIA.

PRIIA gives states more control over the development and expansion of passenger rail and sets objectives for Amtrak to serve as the nation's intercity passenger rail provider. In addition, the American Recovery and Reinvestment Act (ARRA) provides Amtrak economic stimulus funds with which to make and advance significant investments, while providing states funds to expand service and develop high-speed passenger rail corridors.

It is within this context that Amtrak has set six fundamental strategic goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. Amtrak will advance these goals by improving current service and by partnering with states. To track its progress toward these goals, Amtrak will use nine Key Performance Indicators.

Amtrak's Strategic Guidance also outlines several values that its workforce must embody in order to achieve its goals and remain competitive. Recognizing the value of every employee, and understanding that each employee makes his or her own contribution to the company's well-being and success, the company will strive to foster a working environment that calls for safety and integrity, and encourages qualities such as teamwork, innovation and customer focus.

Development of Intercity Passenger Rail and High-Speed Corridors

PRIIA assigns many roles to Amtrak including being the operator of the national intercity passenger rail network, operator and steward of the Northeast Corridor, operator of high-speed rail, and partner of choice for intercity passenger rail development. Amtrak's role in these partnerships will be that of planner, service provider and expert adviser. With Amtrak's help, the states will strategically plan rail service and the federal government will integrate state plans into a national plan and administer the capital grant program. Amtrak will bring knowledge, expertise, and capacity to these partnerships.

In addition, Congress appropriated \$8 billion in intercity and high-speed passenger rail funding as part of the ARRA. This will begin funding the PRIIA vision and the associated grant programs, and it will require close cooperation between Amtrak and the states to accelerate the pace of development and investment. Amtrak must leverage its experience as the nation's only operator of high-speed trains to support projected growth in new high-speed services.

Funding

During the FY 2010-2014 period, Amtrak will fund 80 percent of its operating need from revenues, a share that will increase as costs shift onto state partners in compliance with federal law. The company will, however, continue to require federal funding for both operating and capital costs.

Ridership and Ticket Revenue

Amtrak aims to increase ridership to 31.4 million passengers by FY 2014, representing a 15 percent jump from 27.2 million in FY 2009. In addition, the railroad expects ticket revenue to grow 20 percent by the end of FY 2014, exceeding \$2 billion annually. Amtrak intends to achieve these goals with the successful implementation of the many initiatives described below.

Safer: Operate the safest passenger railroad in America

Amtrak is undertaking two revolutionary initiatives that will work hand in hand with more traditional approaches to safety. The Safe-2-Safer program strengthens the emphasis on safety within the corporate culture by promoting a more collaborative working environment and ensures a higher reliability of safe behaviors at all levels of the railroad. Amtrak also will implement Positive Train Control across its system to bring the most modern information technologies to the task of controlling and protecting train movements to prevent collisions and other accidents.

Also, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrols, baggage screenings and other activities in stations and on trains. Amtrak will continue to expand its K-9 explosive detection teams, harden more stations and strengthen cooperative inter-agency operations with local, state, and federal law enforcement and counterterrorism partners.

Greener: Increase efficiency, reduce emissions, and make better use of resources

Passenger rail has a smaller carbon footprint than its competitors and Amtrak is proving that it can draw riders from both air and auto in places like the Northeast Corridor, the Midwest and California. Amtrak also is taking action to improve its own Green bottom line by pursuing the following initiatives:

- Conserve energy at buildings and other facilities and reduce diesel locomotive fuel consumption;
- Reduce greenhouse gas emissions by diesel locomotive operations;
- Expand recycling program at facilities, stations and aboard trains and incorporate alternative energy sources such as solar cells and wind turbines where it makes sense to do so;
- Extend electrification to additional routes to utilize low-emission energy generation sources; and
- Purchase more energy-efficient locomotives and extend the life of the existing fleet as warranted.

Healthier: Improve the condition, durability and wholesomeness of every aspect of the company

The health of the company relates to its vital signs — ridership and revenue, the condition of its infrastructure and fleet, financial stability, cost savings and new revenue opportunities, improved business processes and systems and sustained workforce and customer satisfaction.

Amtrak is making enduring investments in all areas of the company to become healthier and grow. To that end, during the next five years, Amtrak will:

State-Supported Services

Building upon existing and developing new partnerships with states to offer new and expanded rail service is a key objective for Amtrak over the next five years. In FY 2008, approximately 47 percent of Amtrak's daily train departures were state-supported, and Amtrak is leveraging its expertise and experience to capitalize on the demand for passenger rail and the opportunities presented by the availability of funds through the American Recovery and Reinvestment Act for passenger rail corridors and high-speed rail.

- Establish agreements for eight service expansions (frequency increases and/or route extensions) through existing state partnerships;
- Form at least two new state partnerships; and
- Increase ridership on state corridors and state financial support as required by federal law.

Reliability

- Maintain Amtrak-owned tracks, infrastructure and equipment in a state of good repair to minimize malfunctions and associated train delays;
- Replace equipment that has reached the end of its life span including 130 single-level long-distance cars, 20 single-level cab cars and 20 electric locomotives;
- Order 470 new single-level cars to replace coaches approaching the end of their life span as funding sources are identified;
- Modernize and replace outdated Information Technology systems and business processes critical to the delivery of service such as for internal business processes and for external reservation and ticketing.

Customer Service: Improve the quality and attractiveness of our service for passengers

Amtrak must offer riders an experience that is convenient, competitive, and pleasant. Convenience and competitiveness are products of trip time and reliability, but customer experience is a product of a range of factors such as accessibility, food service, comfort, and service delivery.

In addition, customer service is at the heart of Amtrak's objective to maintain and forge new agreements with state and commuter service partners. Amtrak strives to exemplify qualities typically attributed to excellent customer service, such as responsiveness, anticipating needs and a high degree of professionalism in its approach to its relationships with its partners. Because of its depth of knowledge and experience, Amtrak serves as expert advisor as well as service provider.

Through FY 2014, Amtrak will:

- Continue with the "Mobility First" accessibility program to create barrier-free pathways from streets/parking areas to platforms and trains;
- Advance self-service reservation booking and ticket delivery programs to implement eTicketing, enhance current Quik-Trak ticket kiosks, better customize the Amtrak.com Web site, and enable ticket retrieval by mobile device;
- Install Wi-Fi Internet access first on *Acela Express* trains and subsequently to other services;
- Continue its Route Performance Improvement Program, which determines best opportunities for improvement on targeted routes; and
- Automate and streamline its Food and Beverage Management System to improve product availability aboard trains.

Financial Performance: Improve our bottom line

Amtrak is a government-supported business, and it must not lose sight of the responsibilities that come with taxpayer support. The company has a positive responsibility to ensure that federal and state money is spent in an economical and efficient manner that provides the nation with effective intercity passenger service and protects the investment the nation has made in its railroad. To this end, Amtrak must ensure that capital money is invested in those projects that return value and that sustain our infrastructure and that operating funds be spent efficiently and return the maximum obtainable benefit for the lowest cost consistent with the need to attract customers and develop new business.

In addition, Key Performance Indicators established in the Strategic Guidance will measure the return on investments made by the company such as cost per available seat mile, customer service index of performance, on-time performance, and ridership growth, among others.

National Needs: Participate and assist with disaster relief and mobilization efforts and help advance national policies and plans

Amtrak was created to provide an essential national service and must support the government in moments of national need as demonstrated by agreements with the Federal Emergency Management Agency to provide services during periods of disaster relief and with the Department of Defense to transport troops. In addition, the railroad is expected to support national policies such as increasing the role of passenger rail as part of a more balanced transportation network. To achieve this goal, Amtrak is supporting the development and expansion of intercity and high-speed rail networks and is partnering with states to provide the required expert analysis and advice needed to advance these plans.

As Amtrak grows, so does its capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

###

2009

Collateral

Dear co-workers,

Amtrak has both a major win and a major loss in commuter rail operations in the past couple of weeks. Amtrak welcomes the return of the Southern California “Metrolink” operation after having lost the contract in 2002. Conversely, Amtrak bids goodbye to the Northern Virginia VRE operation after having operated it for the past 17 years. Both of these operations need to have final details completed before a change-over occurs next summer.

All of us at Amtrak must understand that the same opportunities that we’re pursuing thanks to stimulus funds and unprecedented support for passenger rail are also appealing to others looking to enter the U.S. passenger and commuter rail markets. We’re seeing very clear evidence of that today and we expect more to come.

In addition, along with the competition’s interest in operating the rail service is the interest in supplying the trains, the signal systems, the consulting services, the logistics and many other services that railroads need to operate.

This is not the passenger rail environment of yesteryears — we’re in the midst of a transformational chapter for Amtrak and passenger rail, and the competition is very real. Amtrak must get better at competing by improving the way we work together as a company, and I believe we can and we will. We must look for the products we need in this country and we must support the jobs our nation needs to prosper for the future, but in that we must be better, and we need to take care of each other and of our customers so that we grow stronger and more competitive. As such, we must capitalize on this historic moment in passenger rail and secure our leadership position as the operator of choice in an increasingly competitive industry.

Thank you for the work you do every day of the year to make this the safest railroad in the world. We can stand toe-to-toe with anyone on the high-speed rail, commuter rail, long-distance and corridor service we provide.

Sincerely,

Joe Boardman
President and CEO

Dear co-workers,

Amtrak has both a major win and a major loss in commuter rail operations in the past couple of weeks. Amtrak welcomes the return of the Southern California “Metrolink” operation after having lost the contract in 2002. Conversely, Amtrak bids goodbye to the Northern Virginia VRE operation after having operated it for the past 17 years. Both of these operations need to have final details completed before a change-over occurs next summer.

All of us at Amtrak must understand that passenger rail in the United States is being targeted by foreign-owned interests that wish to operate what they know will be part of the balanced answer for American mobility for the future. Along with that interest in operating the rail service is the interest in supplying the trains; the signal systems; the consulting services; the logistics; and many other services that railroads need to operate. Many are fond of saying that they employ the U.S. workforce to do that, and to some extent that may be true, but today we do not have even one domestic manufacturing enterprise in the United States that builds heavy-duty rail cars used for passenger transportation.

The company that will take over here in Northern Virginia is part of a global conglomerate that currently operates over a dozen companies in the United States that support rail operations, and they are part of one of Europe’s largest High Speed Train manufacturers. Those are not jobs for the United States, they are jobs for the Global mantra of Least Cost Country and maximum profit for the Global conglomerate.

This is not the passenger rail environment of yesteryears — the competition is very real. Amtrak must get better at competing by improving the way we work together as a company, and I believe we can and we will. We must look for the products we need in this country and we must support the jobs our nation needs to prosper for the future, but in that we must be better, and we need to take care of each other and of our customers so that we grow stronger and more competitive. As such, we must capitalize on this historic moment in passenger rail and secure our leadership position as the operator of choice in an increasingly competitive industry.

Thank you for participating in the Safe-2-Safer initiative and for the work you do every day of the year to make this the safest railroad in the world. We can stand toe to toe with anyone on the high-speed rail, commuter rail, long-distance and corridor service we provide. **We can and we will get better and focus on safety excellence which will improve all of our lives.**

Joe Boardman

special employee advisory

April 2, 2009 • Page 1 of 1

Federal Income Taxes Temporarily Reduced

Beginning April 3, employees may notice that their paychecks are slightly higher than normal due to a reduction in the amount of federal income taxes withheld.

The reduction is part of the “Making Work Pay” income tax credit included in the American Recovery and Reinvestment Act, which was signed into law on Feb. 17.

The reduction provides a \$400 individual income tax credit (\$800 for joint filers) for 2009 and 2010. Rather than taxpayers claiming the credit when they file their federal tax returns, the law directs employers to reduce the amount of income taxes withheld from paychecks at a pro-rated amount throughout the tax year.

Checks issued on April 3 will have both the current pay period federal income tax reduction as well as the retroactive amount due for the time period since Feb. 17.

The credit begins phasing out at a modified adjusted gross income (AGI) above \$75,000 (\$150,000 for joint filers) and no credit is given to employees with a modified AGI of \$95,000 (\$190,000 for joint filers) or more.

Employees do not need to fill out a new Form W-4 unless they feel that the new tax tables will cause them to have taxes under-withheld by the end of the year. In particular, married couples with both spouses earning wages and individuals working multiple jobs at one time may want to file a new Form W-4 and claim either fewer withholding allowances on line 5 or request additional amounts to be withheld on line 6.

For additional help, employees may get the IRS Publication 919, “How Do I Adjust My Tax Withholding?” or visit the IRS website at www.irs.gov and use the “Withholding Calculator.”

To change their Form W-4, employees should contact their local Payroll offices.

The reduction is part of the “Making Work Pay” income tax credit included in the American Recovery and Reinvestment Act, which was signed into law on Feb. 17.

The reduction provides a \$400 individual income tax credit (\$800 for joint filers) for 2009 and 2010. Rather than taxpayers claiming the credit when they file their federal tax returns, the law directs employers to reduce the amount of income taxes withheld from paychecks at a pro-rated amount throughout the tax year.

For 2009, tax tables were designed to compress the entire credit into the time remaining after the law was signed. Employees checks issued on April 3 will have both the current pay period federal income tax reduction as well as the retroactive amount due for the time period since Feb. 17.

The credit begins phasing out at a modified adjusted gross income (AGI) above \$75,000 (\$150,000 for joint filers) and is totally phased out at a modified AGI of \$95,000 (\$190,000 for joint filers).

Employees do not need to fill out a new Form W-4 unless they feel that the new tax tables will cause them to have taxes under-withheld by the end of the year. In particular, married couples with both spouses earning wages and individuals working multiple jobs at one time may want to assess their Forms W-4 federal income tax withholdings. IRS Publication 919 provides additional guidance for tax withholding or visit www.irs.gov to use the “Withholding Calculator”.

To change their Form W-4, employees should contact their local Payroll Operations office.

Transportation Policy Authority To Join Executive Team

Amtrak today announced the appointment of former Senate Commerce Committee staffer Stephen J. Gardner to the position of vice president, Policy and Development, effective today.

Gardner replaces Vice President of Strategic Partnerships and Business Development Anne Witt, who left the company on April 11. Gardner will report to President and CEO Joe Boardman.

As Vice President, Policy and Development, Gardner will be the lead executive responsible for formulating the policies necessary to carry out Amtrak's mission and strategic plan. Gardner will also oversee the railroad's general development and planning activities as Amtrak pursues growth and improvement through new business opportunities and partnerships. More detailed information about the department will become available as certain functions of the prior organization are integrated with other departments.

President and CEO Joe Boardman, said, "We are very fortunate to have Stephen join our executive team. His extensive transportation policy experience and practical knowledge of railroading make him the best person to help Amtrak formulate and execute the plans that will enable our railroad to grow and develop into a safer, greener, and healthier transportation company."

A recognized authority on transportation policy and legislation, Gardner was the lead surface transportation Democratic professional staff for the U.S. Senate Committee on Commerce, Science, and Transportation's Subcommittee on Surface Transportation and Merchant Marine Infrastructure, Safety, and Security. In this capacity, Gardner directed all legislative and oversight activities related to the safety, security, infrastructure, and operations of railroads, motor carriers, pipelines and hazardous materials

transportation, including overseeing all related Federal agencies.

During his five-year tenure in the Senate, he served on behalf of former Commerce Committee Chairmen Ernest F. Hollings and Daniel K. Inouye, and current Chairman John D. Rockefeller. Prior to his work with Commerce Committee, Gardner worked as legislative assistant for transportation to both Sen. Tom Carper and Rep. Bob Clement.

Prior to his policy work on Capitol Hill, Gardner held various railroad operating positions for Guilford Rail Systems and the Buckingham Branch Railroad.

More detailed information about the department's structure will become available as certain functions of the prior organization are integrated with other departments.

President and CEO Joe Boardman, said, "We are very fortunate to have Stephen join our executive team. His extensive transportation policy experience and practical knowledge of railroading make him the best person to help Amtrak formulate and execute the plans that will enable our railroad to grow and develop into a safer, greener, and healthier transportation company."

A recognized authority on transportation policy and legislation, Gardner was the lead surface transportation Democratic professional staff for the U.S. Senate Committee on Commerce, Science, and Transportation's Subcommittee on Surface Transportation and Merchant Marine Infrastructure, Safety, and Security. In this capacity, Gardner directed all legislative and oversight activities related to the safety, security, infrastructure, and operations of railroads, motor carriers, pipelines and hazardous materials

transportation, including overseeing all related Federal agencies.

During his five-year tenure in the Senate, he served on behalf of former Commerce Committee Chairmen Ernest F. Hollings and Daniel K. Inouye, and current Chairman John D. Rockefeller. Prior to his work with Commerce Committee, Gardner worked as legislative assistant for transportation to both Sen. Tom Carper and Rep. Bob Clement.

Prior to his policy work on Capitol Hill, Gardner held various railroad operating positions for Guilford Rail Systems and the Buckingham Branch Railroad.

Amtrak Closely Monitoring Swine Flu Outbreak

The outbreaks of swine flu are being closely monitored by Amtrak's Health Services, and Environmental Health and Safety departments and its cross-departmental Pandemic Flu Task Group.

While at this time, about 20 cases of swine flu have been reported in the United States, the domestic and international situation warrants preparedness and serious attention.

Front line employees are directed to review the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 "Serious Communicable Disease Procedures" on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, "Public Health Guidelines," Section C). The manuals are posted on the Intranet, under "Library," "Wiki," and "Service Standards."

In addition, starting today, all crew briefings are required to include a detailed review of the Serious Communicable Disease procedures and information about swine flu symptoms. Hard copies of the procedures and the attached guidance from the Centers for Disease Control will be made available.

Employees should also take precautions, such as thorough and frequent hand washing, and covering your mouth with your sleeve or a tissue when you cough. Human-to-human spread of swine flu occurs in the same way as regular seasonal flu, through the coughing or sneezing of infected people.

"As with all infectious illnesses, one of the most important preventive practices is careful and frequent hand washing. Cleaning hands with soap and water removes potentially infectious material from one's skin," said Amtrak's Corporate Medical Director Dr. Tim Pinsky.

If an employee assists a co-worker or passenger who appears to have a respiratory illness and who may have traveled from an

area with confirmed cases of swine flu (at this time, Texas, Kansas, New York, California, Ohio, and Mexico), he or she should try to keep the ill person separated from others as much as possible (three to six feet). All employees should notify CNOC at (800) 424-0217 or ATS 734-2307 if they encounter someone who is exhibiting symptoms of the swine flu. CNOC will serve as a central clearinghouse for this information for trains and Amtrak locations.

Amtrak retains the right to refuse travel or remove from a train any passenger who poses a health hazard to other passengers or employees. Employees should follow proper procedures for doing so in a professional and discreet manner. This policy is printed on the back of each ticket and posted on Amtrak.com.

"We're taking this issue seriously and are working closely with the appropriate federal and state authorities. I am confident that our employees are capable of watchfully managing this kind of situation in a calm and deliberate manner," said Chief Operating Officer William Crosbie.

At this time, no cases of swine flu have been reported on Amtrak trains or facilities.

Amtrak will continue to monitor the situation and will keep you informed as needed.

Please distribute at all safety meetings and post on all employee bulletin boards.

Retroactive Wage Adjustment To Be Issued May 1

This week, approximately 17,000 employees will receive the remaining 60 percent payment of the retroactive wage adjustment resulting from the 2008 contract settlements between Amtrak and the following unions:

ARASA (Maintenance of Equipment)
ARASA (Maintenance of Way)
ATDA
BLET
BMWE
BRS
IAM
IBB
IBEW
JCC
NCFO
SMWIA
UTU – Train Service
UTU – Yardmasters
UTU – Stewards

In a *Special Employee Advisory* dated March 19, President and CEO Joe Boardman announced that the retroactive wage payment would be made on May 1, 2009, on the 38th anniversary of Amtrak. “The original plan was to issue back pay on a union-by-union basis like the first round of payments, meaning some of you would not receive your check until July. But we want to get the money to you sooner rather than later,” said Boardman.

Please take note of the following reminders:

When the first 40 percent payments were made in 2008, employees who performed service under more than one union contract may have received separate checks/direct deposit statements and summary statements for adjustments made under different contract settlements. The payment made on May 1 will consist of a single check/direct deposit statement, consolidating the 60 percent payment due under all summary statements and contract settlements.

For your reference, the summary statements issued in 2008 reflect the 40 percent payment, the 60 percent payment being made this week and the sum of the two. If you do not have the summary statements sent to you last year, you may obtain a replacement by contacting your local field Payroll Office.

Only hours paid for or worked are included — payments for things such as differentials, meal allowances and travel reimbursements are not included in the wage adjustments.

In accordance with the terms of the contract settlements, Amtrak did not deduct contributions toward your 401(k) plan from the retroactive wage adjustment checks. In addition, this payment is subject to the federal 25 percent supplemental payment tax withholding rate, as well as any percentage-based creditor or tax levy deductions, such as state and local taxes. Depending on the state in which you reside, a mandatory supplemental state tax rate may apply as well. Railroad Retirement taxes are deducted at the same percentage as normal up to the annual maximum.

Garnishments related to child support are exempt unless the employee is behind on or in arrears on required payments. If this is the case, then a deduction was made for child support.

O'Connor Selected To Lead Police and Security Department

Amtrak Chief of Police John O'Connor has been chosen to head the Police and Security department, effective Sept. xx.

The consolidation of the Amtrak Police Department and the former Office of Security Strategy and Special Operations began in late May, which O'Connor managed on an interim basis.

As chief and vice president of Corporate Security, O'Connor will oversee all law enforcement and security activities at Amtrak, consisting of Patrol, Special Operations Corporate Security divisions. He will continue to report to Chief Operating Officer William Crosbie.

"Placing these functions under one cohesive structure yields a unified approach to policing and security," said Crosbie. "Among other accomplishments, Chief O'Connor has established ties with local, state and federal agencies to extend the reach of the APD — it's that kind of vision and leadership that he will also apply to counterterrorism polices and strategies."

O'Connor joined Amtrak in 1998 as commanding officer of the Metropolitan Division in New York. Before joining the Amtrak, he served with the Long Island Rail Road Police Department for 25 years.

Message From Joe Boardman

Dear Co-Workers,

Next month, I'll be celebrating my first year anniversary as president and CEO of Amtrak.

Over the course of the last 11 months, I have learned a great deal from many of you. I know that you are enthusiastic about what the future holds for Amtrak but may be uncertain about how it all comes together. We continually face an identity crisis because it's not always clear what Amtrak is supposed to be. I don't blame you — for a host of reasons, it's not always been clear.

That is in large part why I made developing our strategic vision a priority when I joined the company. We have compiled a document that establishes broad goals, creates key performance indicators to measure progress, and outlines the opportunities and challenges facing Amtrak as we pursue a growth-oriented mission.

Our strategic vision, along with the five year financial plan we submitted to Congress on Oct. 1, encompasses our strategy for continuing the growth we've seen since 2002 and better positioning ourselves to maximize this historic moment in federal and state support for more passenger rail service.

As you know, we're in the midst of a midst of a transformational chapter for Amtrak and passenger rail. We have laws in place that provide the direction set by policymakers, and unprecedented support for growth of passenger rail. The goals are aligned with the Passenger Rail Investment and Improvement Act of 2008 and by the Obama administration's Vision for High-Speed Rail in America.

On our own and with the help of stimulus funds, we are making and will continue to make significant and enduring investments in areas such as equipment, infrastructure and stations; the technologies that power our business processes; and our workforce.

The six goals are to be safer, greener and healthier and to improve its financial performance, its customer service, and meet national needs.

Clear goals are of vital importance for a company; values are just as important because they guide how we go about achieving those goals. Safety, Customer Focus, Continuous Improvement, Teamwork Employee Involvement, Integrity, Employee Development, Innovation and Goodwill.

Safer PTC and Safe-2-Safer
Greener
Healthier

- Financial health
- growth in state supported service, like the new partnership with Virginia and new service to Lynchburg and Richmond in Dec. additional Piedmont service in North Carolina and Cascades (eight frequency increases and/or route extensions, two new partnerships 2010-2014 (also customer service improvement) reliability SOGR infrastructure, fleet (fleet plan with grant and leg request), technology infrastructure/efficiencies, such as – SAM to integrate the key operational, financial and human resources business processes and technologies, replacing outdated systems (improved inventory management, etc.), next generation reservations system and e-Ticketing

Customer Service improving overall experience Mobility First to advance removing physical barriers to train access and boarding for mobility-impaired passengers. E-ticketing and reservations systems, route performance improvement programs, on-board wi-fi, Amtrak.com Financial Performance responsibility to operate efficiently as possible using Key Performance Indicators – ticket revenue growth of 20% from 2010-2014 National Needs

Challenges – national economy, condition of state budgets,

Message From Joe Boardman

Dear Co-Workers,

Next month, I'll be celebrating my first year anniversary as president and CEO of Amtrak. Over the course of the last 11 months, I have learned a great deal from many of you. I know that you are enthusiastic about what the future holds for Amtrak but may be uncertain about how it all comes together. We continually face an identity crisis because it's not always clear what Amtrak is supposed to be. I don't blame you — for a host of reasons, it's not always been clear.

That is in large part why I made developing our strategic vision a priority when I joined the company. To that end, we have compiled a strategic vision document that establishes broad goals, creates key performance indicators to measure progress, and outlines the opportunities and challenges facing Amtrak as we pursue a growth-oriented mission.

Our strategic vision, along with the five year financial plan we submitted to Congress on Oct. 1, encompasses our strategy for continuing the growth we've seen since 2002 and better positioning ourselves to maximize this historic moment in federal and state support for more passenger rail service.

As you know, we're in the midst of a midst of a transformational chapter for Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) provides the direction set by policymakers, and we're seeing unprecedented support for growth of passenger rail. The goals are aligned with the and by the Obama administration's Vision for High-Speed Rail in America.

Our strategic vision is built on six fundamentals goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs.

On our own and with the help of stimulus funds, we are making and will continue to make significant and enduring investments toward those goals.

We're creating a safer environment with Safe-2-Safer and installation of Positive Train Control. We're pursuing multiple avenues to be better stewards of our environment.

We're striving to become healthier by increasing ridership and pursuing growth in state-supported service, like the new partnership with the Commonwealth of Virginia, a second Amtrak *Cascades* roundtrip to Vancouver and impending additional *Piedmont* service in North Carolina. We're investing to bring our equipment and infrastructure to a state of good repair and making progress toward improving station accessibility for those who are mobility impaired. With Strategic Asset Management, we're revamping the technologies that power our key operational, financial and human resources business processes to replace outdated systems and redundant or inefficient processes with integrated systems.

We're also aiming to improve customer service with a next-generation reservations system and e-Ticketing and the soon-to-be re-launched Amtrak.com.

As Amtrak grows, so does our capacity to meet national needs, such as national emergency response, congestion mitigation, emissions reduction, and reduction in demand for foreign oil.

Clear goals are of vital importance for a company; values are just as important because they guide how we go about achieving those goals. Many of the investments we're making call for a new way of thinking and working together.

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth.

We also need you. We can have the best strategy in the world, but it's no good if we

December 4, 2009 • Page 1 of 1

Wage Expense and Tax Changes Will Impact Payroll for Agreement Workers

Effective Jan. 1, Amtrak will be making changes to wage codes and begin withholding taxes from certain payments to employees in accordance with current IRS regulations.

The changes will impact how employees input wages and expenses into the payroll system. Tax withholdings required by the IRS will primarily affect some employees in the Engineering and Mechanical departments.

Per diem allowances for meals for employees in travel status (away over night) will continue to be considered a non-taxable reimbursement. However, payment of per diems and meals for employees who are not in travel status (not in lodging), including meals provided to employees in connection with working overtime must be considered taxable income according to IRS regulations. Additionally, weekly travel allowances must also be considered taxable income.

Uniform allowances will remain non-taxable as long as the employee certifies uniform maintenance expenses quarterly.

It is important to note that there are no changes to any labor contracts.

Over the coming weeks, Finance will transition to the new wage code system and provide training for timekeepers in order to implement this change for the first payroll of 2010.

Attached to this advisory is an information sheet detailing the new wage code system and the associated tax implications. Employees may want to consult with a tax advisor for assistance on ways they may be able to deduct these payments on their personal tax filings.

For questions and concerns, contact Amtrak Payroll at 877-268-7251.

Please post on bulletin boards and distribute at safety briefings.

December 14, 2009 • Page 1 of 1

Congress Passes Amtrak Appropriations for FY 2010

Amtrak's FY 2010 Appropriations bill has been approved by Congress and is expected to be signed by the president as early as today. The Departments of Transportation and Housing and Urban Development, and Related Agencies Appropriations Act of 2010 contains \$1.565 billion in federal support for Amtrak, comprising \$563 million for operating, \$594 million for capital, \$264 million for debt service, and \$144 million to be used for ADA compliance.

While it is the highest appropriation in Amtrak history, it falls short of the \$1.8 billion that was authorized by Congress in the Passenger Rail Investment and Improvement Act and what was subsequently requested by Amtrak in February 2009.

The bill also contains a provision that requires Amtrak to implement the procedures necessary to provide storage and carriage of firearms in checked baggage cars and at Amtrak stations that accept checked baggage, within one year of the bill's enactment. Amtrak's current policy prohibits all firearms, ammunition and other weapons aboard its trains. This includes any being carried on the person, in carry-on baggage or in checked baggage, and applies regardless of whether a passenger has a permit to carry a firearm or weapon.

The current policy remains in effect until it is announced that Amtrak will begin accepting firearms in checked baggage, as required by December 2010. Given the media coverage on this issue and the potential for confusion, guidance to front line employees is being issued this week. Further information will be provided as developments occur.

Wage Expense and Tax Changes Will Impact Payroll for Agreement Workers

Effective Jan. 1, Amtrak will be making changes to wage type codes and begin withholding taxes from certain per diems and expense reimbursements paid to employees in accordance with current IRS regulations.

The changes will impact how timekeepers input wages and expenses into the payroll system. Tax withholdings required by the IRS will primarily affect Engineering and Mechanical employees in only a small number of cases.

Per diem expenses that will now be taxed include those for lodging, travel allowances and overtime meals paid as required by labor agreements when an employee does not actually require such lodging or has undocumented travel allowances or overtime meal allowances for his or her work assignment.

Uniform allowances will remain non-taxable as long as the employee certifies uniform maintenance expenses quarterly.

It is important to note that there are no changes to any labor contracts.

Over the coming weeks, Finance will transition to the new wage code system and provide training for timekeepers in order to implement this change for the first payroll of 2010.

Attached to this advisory is an information sheet detailing the new wage code system and the associated tax implications.

Final Version of Stimulus Bill Scheduled for Vote

The economic stimulus legislation is currently slated for votes by the House and Senate by week's end and is expected to be signed by President Obama early next week.

The legislation is expected to contain capital funds aimed at creating jobs that will help enhance and improve passenger rail service provided by Amtrak and in partnership with states. The money may only be used to fund or accelerate capital projects.

The company is extremely pleased that Congress has provided significant capital in the bill that would help Amtrak attain a state of good repair and provide more efficient and reliable customer service while providing jobs to workers.

Once the legislation is passed, Amtrak will reconcile its priority list with the bill's final provisions. Information about those details will be shared once it's available.

Update: Important Information for Inauguration Day

Amtrak is preparing for an exceptional day on Jan. 20, when an unprecedented number of people will travel by train to and from Washington Union Station for Inauguration Day. The multi-faceted operation, coupled with the extraordinary security measures in place that day, will be one for Amtrak's history books, as well as the nation's.

"Being part of this historic event and playing such an important role in bringing people to Washington is a once-in-a-lifetime opportunity," said Chief Operating Officer William Crosbie. Part of the overall inaugural experience for many people will involve Amtrak, and it will be a lasting memory.

Be Part of History

While Jan. 20, 2009, is considered a full working day, volunteers are needed at New York Penn, Philadelphia, Wilmington, Baltimore and Washington that day. Volunteers will be given a special commemorative button, and be provided lunch at the end or start of their respective shifts. Employees who want to volunteer should first check with their supervisor; managers are encouraged to allow their direct reports to volunteer when possible.

A large number of employees will be needed in Washington. Those who sign up to volunteer at Union Station may attend — **but are not required to** — an optional walk-through on Jan. 19.

To volunteer in New York, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Getting To and From Work

Employees in the D.C. area should plan their commutes to and from work in advance. Build extra time in anticipation of delays due to road and bridge closures, and crowding. Check www.inauguration.dc.gov and your local

news for information about your commuting options, as they are subject to change. The Union Station garage is expected to remain open, but accessible only via H St. In addition, parking is available at the Ivy City coach yard, where a special shuttle train will be available to take employees to and from the station.

MARC and VRE commuter trains will be all-reserved service on Jan. 20; however, MARC is permitting Amtrak employees reporting for work that day to ride free using their flash pass.

VRE has informed Amtrak that all employees who plan to use VRE on Inauguration Day to come to work will need to submit information to be issued a ticket. There will be no flash passing on VRE.

To obtain a VRE ticket for Jan. 20, employees must supply the following information to Human Resources Service Manager Elisha Lewis via e-mail (LewisE@Amtrak.com) by Jan. 9:

- Employee Name
- Departure and Destination Stations
- Train Number and Time of Departures

This information will be forwarded to VRE and tickets will be issued. Once the information has been submitted to VRE, instructions will be provided on where employees can pick up their tickets. Flash passes will not be accepted on VRE.

Because contractors do not have rail travel privileges and will not be allowed to submit a VRE ticket request or use their badge for MARC travel, contractors will be required to make their own arrangements on Jan. 20.

Both services will operate on adjusted schedules and not all stations will be served. Amtrak employees are expected to stand on full trains. Normal flash pass privileges will apply to Amtrak trains.

Displaying proper Amtrak identification while on the property is always required, and it must be visible and worn above the waist.

January 14, 2009 • Page 1 of 1

Inauguration Day Information

The company is prepared for a historic day on Jan. 20 and will execute a well-orchestrated security, operational and customer service plan to manage the crowds headed to and from Washington Union Station.

Getting To and From Work in D.C.

Employees should plan their commutes to and from work in advance. Build extra time in anticipation of delays due to road and bridge closures, and crowding. Monitor www.inauguration.dc.gov and your local news for information about your commuting options, **as they are subject to change.**

“We know that getting to work for most of us in the D.C. area is going to require extra effort and planning,” said President and CEO Joe Boardman. “If you haven’t yet planned your commuting options, you should do so and please let your supervisor know immediately if you have concerns about getting into work on the 20th.”

The Union Station Metro stop will be open and will run service from 4 a.m. to 2 a.m. The Union Station garage is expected to remain open, but accessible only via H St. Employees should be prepared to show their Amtrak ID to park.

Employees at 10 G Street must show their Amtrak ID and their Sensormatic card to enter the building. Amtrak monthly parkers at 10 G will have access to the garage via their Sensormatic card. The garage will be closed to all other vehicles.

In addition, parking is available at the Ivy City coach yard, where a special shuttle train will be available to take employees to and from the station. Between Jan. 19 at 10 p.m. and Jan. 21 10 a.m., the shuttle will leave the Ivy City Commissary parking lot at 40 minutes past the hour, and from Track 30 to the parking lot 10 minutes past the hour (please see attached schedule for details).

MARC and VRE commuter trains will be all-reserved, will operate on adjusted schedules and will not serve all stations. Where possible, employees are encouraged to ride Amtrak trains, and normal flash pass privileges will

apply. MARC is permitting Amtrak employees reporting for work that day to ride free using their flash pass.

Flash passes will not be accepted on VRE. Employees who requested VRE tickets and received an e-mail confirmation from Elisha Lewis should pick up tickets today through Friday, Jan. 16, **at window 15 in Washington Union Station** between 12 noon and 4 p.m. Employees will need to show ID and sign for the tickets. Please ask for Ms. Faye Hinton.

In all cases, Amtrak employees are expected to stand on full trains. Because contractors do not have rail travel privileges (and were not be allowed to submit a VRE ticket request or use their badge for MARC travel), they must make their own travel arrangements.

Volunteering at Stations

Thank you to all of the employees that have answered the call to volunteer at New York Penn, Philadelphia, Wilmington, Baltimore and Washington on Jan. 20.

Because of the special circumstances at Union Station on Inauguration Day, volunteers in Washington are encouraged to attend a walk-through at the Starlight Room on Jan. 19. You’ll be contacted directly about your shift assignment and what time the walk-through will take place. If you can’t make it, you will be briefed before your shift. After reporting to the Starlight Room on Jan. 20, volunteers will be paired with a law enforcement officer who will serve as their zone captain and be assigned a post for the duration of their shift.

Employees who have committed to working should return the volunteer form to Ken Wiedel no later than tomorrow. If you did not sign up to volunteer in Washington and would still like to do so, please call or e-mail Ken at [ATS 777-3078](mailto:ATS777-3078) or WiedelK@amtrak.com.

As of 2 p.m. on Jan. 20, most of Union Station, including the food court and retail shops, will be closed to the public and Amtrak employees (this does not include the offices).

As always, displaying proper Amtrak identification while on the property is required, and it must be visible and worn above the waist.

Board of Directors News

The following press release is being issued today:

Amtrak Board Names Thomas Carper of Illinois as Chairman

Former Chairman Donna McLean Becomes Vice Chairman

At its regularly scheduled meeting yesterday, Amtrak's Board of Directors unanimously agreed to name Thomas Carper of Illinois as Chairman of the Board. Carper, who has served in various Illinois state and local government positions, including Mayor of the City of Macomb, has been a director on the Amtrak board since March 2008. At the same meeting former Chairman Donna McLean was named Vice Chairman, replacing Hunter Biden, who remains as a board member.

Carper said, "Everything we have done as a board, we've done as a unified body, and this change in our hierarchy is no exception. That this was a unanimous and non-contentious decision is testimony to that fact. I look forward to tackling the exciting challenges and opportunities that lie ahead. Amtrak is ready to play a growing role in strengthening our transportation system and our economy."

The five-member board consists of four voting members, two Democrats, Carper and Biden, and two Republicans, McLean and Nancy Naples. Amtrak President and CEO Joseph Boardman is a non-voting member of the board.

Former Chairman McLean, who was named Vice Chairman, said, "With the change in administration, it's best for the company to have Tom as Chairman. I am pleased to be able to work with Tom and the rest of the board as we face the exciting and challenging years ahead."

As part of the Passenger Rail Investment and Improvement Act of 2008, the Board of Directors of the National Railroad Passenger Corporation (Amtrak) is expected in 2009 to expand to nine members from its current allotment of seven positions, five of which are currently occupied. The President nominates and the U.S. Senate confirms Amtrak Board members.

Amtrak Ethical Conduct and Non-Retaliation Notice

As part of Amtrak's commitment to ethics and compliance, all directors, officers and employees of Amtrak have a duty to promptly report any actual or suspected misconduct.

Failure to fulfill this duty is a violation of Amtrak's Code of Ethics and may result in disciplinary measures up to and including dismissal in appropriate cases.

Failure to report actual or suspected misconduct also may expose the company and its directors, officers and employees to potential criminal and civil penalties, and damages to the company's reputation.

If you have questions about the Code of Ethics or concerns about someone's workplace conduct, first contact your manager. If you do not feel comfortable doing this, you may contact other Amtrak resources available to you:

- The Amtrak Ethics Information Hotline, or
- Amtrak's General Counsel and Corporate Secretary, or
- Amtrak's Office of Inspector General

Amtrak also has a non-retaliation policy that prohibits retaliation against an employee for raising a concern or reporting actual or suspected misconduct in good faith. Anyone may contact the Amtrak Ethics Information Hotline (1-866-908-7231) if they have compliance questions or concerns, and callers

have the right to remain anonymous, if they wish.

Investigations will be conducted in as confidential a manner as possible, depending upon the circumstances presented. Additionally, all employees should be free from fear of retaliation or reprisal, and are authorized to report actual or suspected misconduct to members of Congress, and freely answer questions from Congress without notifying management, if they so desire, regarding the misconduct.

A Message from President and CEO Joe Boardman

Dear Southern California Amtrak Employees:

I thought it might be helpful for you to get a note from me about what we have been doing to grow our business in Southern California.

For those of you that haven't heard yet, we have been working hard to demonstrate Amtrak's interest in operating the Metrolink service to the SCRRA Board of Directors. We believe they have listened to our message and that we've helped them think through many of the issues and challenges that exist if they assume operation of their trains in-house.

First and foremost, we have put forth our belief that Amtrak has the people, the skills, and the experience to be the best operator of the Metrolink services. This strength and experience comes from the men and women of this company, and it not only includes each of you in Southern California, but all of those that work for Amtrak across the United States. We can bring expertise from any one of thousands of people to help address challenges if needed, and we do so on a frequent basis.

When I visited you this past spring, I tried to get out and see as much of our operations that I could, and when I came in contact with you, I both thanked you for your work and said that I would work to pay attention to West Coast issues. I said you were important to me and to our future. I spent a week parked right in the middle of the L.A. Union Station, staying overnight on the Beech Grove

business car so that I would see what we were doing close up and meet more of you in the process. Amtrak is ready to grow, and to provide even greater mobility and connectivity to our nation. We'd like to see the men and women who operate trains for Metrolink today join our Amtrak family and we are working hard to do that in a professional way.

Wherever you work for us in Southern California please know that our future is bright and that we are here to be the safest passenger railroad in the world. I know, and I believe that we all know, that to be a safer, greener, and healthier Amtrak, we need to work together as a company and with our partners. No matter how the SCRRA decides to go forward on Metrolink operations, we will work with the men and women that are employed there to make things better.

Thank you, for everything you do and I will see you this fall for the PSSA program.

Sincerely,

Joe Boardman

Incoming Chief Mechanical Officer Selected

Deputy Chief Mechanical Officer Mario Bergeron has been chosen for the position of chief mechanical officer, replacing Vince Nesci, who will officially retire on Oct. 2 after 33 years at Amtrak.

Starting his new position on Aug. 1, Bergeron will work hand-in-hand with Nesci through the transition.

“Mario’s collaborative leadership style and thorough knowledge of the business will help position Amtrak as the provider of choice for passenger rail fleet and mechanical services in this era of growing demand for passenger rail,” said Chief Operating Officer William Crosbie.

Bergeron has more than 20 years of experience in the railroad industry. Before joining Amtrak as deputy chief mechanical officer in 2005, he served in a number of headquarter and field-based Mechanical Services positions at CP Rail, including director of Locomotive Maintenance and Planning and director of Car Maintenance and Planning.

Please distribute at all safety meetings and post on all employee bulletin boards.

Safe-2-Safer Kicks Off in August

*Implementation To Take Place in
Phases Over the Coming Months*

Beginning with an employee survey in August, Amtrak will begin implementing over the course of the next few months a company-wide initiative to reduce safety and security risks.

Safe-2-Safer aims to reduce injuries by creating a more collaborative environment in which employees are enabled to change at-risk behaviors to safe behaviors.

“Safe-2-Safer isn’t meant to replace good safety and security practices in place now. It will make them more effective by changing the way managers and employees work together to make sure we all go home safely every day,” said Vice President of Transportation Richard Phelps, who has been tapped to lead its implementation.

Starting Monday and over the course of the next three weeks, all employees will be asked to complete a voluntary survey that will help drive the areas of focus for Safe-2-Safer. The surveys will be completed anonymously, and no answers can be traced back to any individual.

Safe-2-Safer will be implemented in phases, kicking off first in the Mid-Atlantic region, and rolled out in other parts of the country over the next six months.

While Amtrak has made great strides in reducing injuries — a 60 percent reduction since 2004 — the

goal is to reduce injuries even further, as the name suggests.

“Our senior management team and I are fully committed to making Amtrak safer and healthier. We’re seeking support and participation from our unions, our managers and you to get there,” said President and CEO Joe Boardman.

Safe-2-Safer centers on creating a work environment where employees replace at-risk actions with safe ones while removing any barriers that may hinder an employee’s ability to work safely. This is accomplished through training, ongoing coaching and greater accountability for supervisors; and broader employee engagement through peer-to-peer feedback.

Employees in the operating departments will be most directly involved with Safe-2-Safer, but everyone benefits from a safer and more collaborative working environment. Research shows that companies that sustain excellent safety records also perform better overall.

“This is a process and things aren’t going to change overnight,” said Phelps. “But if we all stay open minded and get behind this program, I have no doubt that we can make lasting improvements. At the end of the day, this is about keeping everyone safe, not statistics.”

For additional information, please read the Q and A that accompanies this advisory (also available on the Intranet under “Safety.”)

Please print and distribute this advisory and the attached Q and A to all employees who do not have Amtrak e-mail accounts.

H1N1 Flu Outbreak Elevated to Phase 6 Pandemic

The World Health Organization today raised the H1N1 flu pandemic alert level to Phase 6 in response to the ongoing spread of the virus. According to the Centers for Disease Control, the Phase 6 designation, which indicates that a global pandemic is underway, was issued only because the virus is spreading geographically, not because the illness caused by the H1N1 virus has become more severe.

Over the past several weeks, the virus has spread to more than 70 countries. In the U.S., most infected persons have recovered without medical treatment; however, CDC anticipates more cases, more hospitalizations and more deaths in the coming weeks.

“Even though the outbreak is garnering less visibility in the media, it is still a very serious issue and we must all continue to exercise vigilance and caution,” said Chief Operating Officer William Crosbie. “Our Pandemic Flu Emergency Plan is still in effect and the Task Group continues to meet on a regular basis.”

Crosbie emphasized that Amtrak operations continue as normal, but employees should continue to follow the protocol set up for handling customers, passengers and co-workers who show symptoms of the virus. As a reminder, all potential cases should be reported to CNOC at (800) 424-0217 or ATS 734-2307. CNOC is serving as the central clearinghouse for all suspected cases of H1N1 flu on board trains or in Amtrak facilities.

H1N1 symptoms include a sudden onset of fever greater than 100°F AND coughing, sore throat and/or stuffy or runny nose.

Front line employees should still be implementing the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 “Serious Communicable Disease Procedures” on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, “Public Health Guidelines,” Section C). The manuals are posted on the Intranet, under “Library”→ “Wiki”→ “Service Standards.”

Each employee is urged to thoroughly wash his or her hands on a regular basis and to always cover his or her mouth with a sleeve or tissue when coughing or sneezing.

Please distribute at all safety meetings and post on all employee bulletin boards.

Amtrak Inspector General to Retire

Fred E. Weiderhold, Jr. served Amtrak for 35 years

Amtrak Inspector General Fred E. Weiderhold, Jr. today informed the Chairman of the Amtrak Board of Directors that he is retiring after 35 years of loyal service to the railroad.

“As Amtrak’s first and only Inspector General, Fred has made important contributions in helping the Board of Directors understand key issues facing the railroad and made useful recommendations to improve how we do business,” Amtrak Chairman Thomas Carper stated. “We thank him for his dedicated service to Amtrak and wish him well in his retirement.”

Carper added that under the federal Inspector General Act, the Amtrak Inspector General is appointed by the Chairman of the Board of Directors. Carper said he takes this responsibility seriously and will soon undertake a search for a replacement that can continue to maintain the integrity, independence and objectivity required of the position.

In addition, Carper said that he has confidence in the Inspector General staff and expects them to carry on their important work during this interim period, including providing effective oversight of how Amtrak is handling the stimulus funds it received from the American Recovery and Reinvestment Act.

Mr. Weiderhold has been the only person to serve as the Amtrak Inspector General since former Amtrak Chairman W. Graham Claytor, Jr. asked him to

establish the Amtrak Office of Inspector General (OIG) in 1989. Previously, he was Amtrak's first Special Assistant to the chairman for Employee Relations, conducting special investigations and acting as the company's first employee ombudsman. He has been one of the longer serving Inspectors General within the OIG community.

Chairman Carper has appointed as interim Inspector General the Honorable Lorraine A. Green, vice president of Human Resources and Diversity Initiatives who will temporarily leave her position to establish an appropriate distance from day-to-day management decisions. She previously was a Senate confirmed deputy director of the federal Office of Personnel Management and served on the President’s Council on Integrity and Efficiency with all the Inspectors General who are appointed by the President.

Paula Porter, assistant vice president of Human Resources, will serve as the acting head of the Human Resources and Diversity Initiatives department.

Message from Joe Boardman

When I came here last November, one of the first things I said I wanted was a more collaborative working relationship within this company. We cannot create a safer, greener or healthier company without working together to do it. Our world today is often about being self-sufficient and self-focused, but that is not the reality of how we live and work — it takes all of us to run this railroad.

We all know that being safer is a worthwhile goal, and railroading has a long history of developing work rules that, when followed, provide for a safer and more secure workplace.

Amtrak has a good safety record, but it could be better. The rules of compliance will remain as required by the Federal Railroad Administration and others, but to really make the kind of improvements we need to make, we must make changes to how we do our jobs.

From the time I walked in the door, I believed that I would find wonderful people at Amtrak that I not only would come to trust and depend upon, but that are also ready to become involved in the importance of what we do for our nation and in improving our workplace.

I've now traveled around our system (don't worry, if I have not been where you are yet, I'm not done traveling) and based on my conversations with employees, I believe that we are capable of improving safety in a different way. After several months of planning and preparation, Chief Operating Officer Bill Crosbie and I have asked Vice President of Transportation Richard Phelps to lead a transition to a completely new approach to safety and security.

We'll be embarking on a multiyear risk-reduction approach to safety and security that will involve every level of management — starting with me and the executive team — to supervisors and front line employees, and then back up through management to me. The centerpiece of this involves training, coaching and accountability for managers and supervisors; and broader engagement on your part. **The tragic Metrorail accident here in Washington, D.C., earlier this week underscores the importance of safety and reaffirms my commitment to this effort.**

We're not going to eliminate safety and security practices that work. We're not going to ease our focus on compliance. But it's about engaging all of us in a new way.

While there will be a particular focus on the operating departments, all departments are going to benefit. It's no coincidence that companies that sustain safety excellence are also high performing organizations.

It won't be perfect, and that's true because we are human and those two things (perfect and human) just don't belong together. But it will be backed by a commitment from me, Bill Crosbie, Richard Phelps and senior management to improve our safety and our interaction through collaboration on this railroad. It's about a fundamental and enduring shift in the way we work together, and that won't happen overnight.

You'll be hearing more about this in the coming months. It will take all of us to make Amtrak safer, greener and healthier. I look for your support; you have mine.

Sincerely,

Joe Boardman
President and CEO

Fpay increase

One of the things that really struck me as I traveled around the system is how welcoming Amtrak employees have been toward me.

I'd like to think that it's me they're happy to see, but I think it goes deeper than that. I think people are recognizing that things are really looking up for passenger rail and Amtrak, and that you've got a person in charge that is committed to

People feel good when they feel like they're part of something that's moving forward.

And people are seeking us – we're hiring enthusiastic, skilled and bright individuals that see a future for Amtrak that's real. We're keeping conductors, etc.,

Please welcome those people and show them the best that Amtrak can be. We've not always been good about helping new people along, and maybe you didn't get the introduction to Amtrak you'd expected. But don't let that cloud your thinking and affect the spirit of the new generation

We need to be putting money into the network in anticipation of the demand that's coming.

We are currently in the midst of the most dynamic period in Amtrak history. With unprecedented political support, federal resources for growth and improvement of passenger rail, the infusion of stimulus funds for capital improvements we've had to put aside for years and direction from Congress that enables us to plan beyond the current fiscal year, together we're writing a new chapter in the Amtrak story.

As I travel throughout the system, I meet employees who seem excited about our future — they're happy they work for Amtrak. Most of you

feel a degree of pride in what you do that is hard to find in other sectors. And we are moving forward. We have a lot of improvements to make and they won't all change things overnight. But the truth is that we're

It's challenging when equipment is run down, or systems aren't integrated,

Part of that new chapter involves building a workforce enthusiastic and bright men and women joining Amtrak for the first time. We receive thousands of resumes every day from people who dream about working here. If you are a recent new hire, welcome aboard. If you are a new XXXposition, your skills and talents rose above XXnumber of applicants. Or maybe you're a XXposition — you beat XXX number others competing for your job.

The skeptics will argue that we're attracting intelligent and qualified people because of the state of the economy. Not so. While there is certainly a larger applicant pool, there are people who see a future for Amtrak and they want to be part of it.

If you're an Amtrak veteran, please help show our new hires the ropes and introduce them to the system. Maybe you didn't get the benefit of someone taking you under his or her wing or even give you a mere introduction, and that is a shame. But I ask you to rise above that and to welcome our new hires with open arms.

We are positioning ourselves as the employer of choice

Skeptics will say that the state of the economy is the reason. That's possible.

A Message from President and CEO Joe Boardman

Dear Co-workers,

Today, Congress approved \$1.49 billion in federal support for Amtrak for the current fiscal year. Up until this point, we'd been operating under a Continuing Resolution (essentially last year's funding level) in the absence of an appropriation for current fiscal year.

The \$1.49 billion includes \$940 million in capital funds, of which \$285 million is for debt service; and \$550 million in operating funds, of which \$75 million is dedicated to the remainder of the retroactive pay. There's another \$90 million for Federal Railroad Administration capital grants to states.

Since I joined Amtrak in November, I have conveyed to labor leaders and employees that it is among my highest priorities to seek the funds we need from Congress for the second installment of backpay. The remaining backpay totals \$145 million. While we asked Congress for \$114 million; we're being provided with \$75 million.

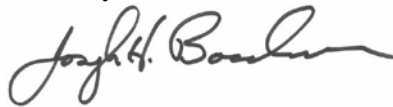

I want you to know that we're going to meet our commitment to deliver the backpay this year. I have the full support of the board of directors on this. We will identify the source of the operating funds that we'll use to begin payment in May. Keep in mind that we cannot use capital funds (typically used for investments in the company), including any of the funds from the stimulus legislation, for backpay.

I have met with labor leaders and I will continue to do so regularly, to ensure that we keep our lines of communication open on this and other issues.

Just as I feel it's important to communicate openly and frequently, I also believe that there are many ways Amtrak invests in its resources — one of the most important of which is our employees.

We have a dedicated workforce and I value the work you do — delivering on the backpay is one way we can show our commitment to you. Thank you for your support.

Sincerely,

Joseph Boardman

Witt To Leave Amtrak

Vice President of Strategic Partnerships and Business Development Anne Witt will be leaving Amtrak on April 11.

“Anne has played a critical role in cultivating and expanding our relationships with state, freight and real estate partners,” said President and CEO Joe Boardman. “While I am saddened by her decision, we wish her well in her future endeavors.”

Over the next four weeks, Witt will assist with the transition and provide input on the future structure of the department.

A Message from President and CEO Joe Boardman

Dear Co-workers,

Late yesterday, Congress approved \$1.49 billion in federal support for Amtrak for the current fiscal year. Up until this point, we'd been operating under a Continuing Resolution (essentially last year's funding level) in the absence of an appropriation for the current fiscal year.

The \$1.49 billion includes \$940 million in capital funds, of which \$285 million is for debt service; and \$550 million in operating funds, of which \$75 million is dedicated to the remainder of the retroactive pay. There's another \$90 million for Federal Railroad Administration capital grants to states.

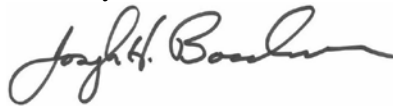

Since I joined Amtrak in November, I have conveyed to labor leaders and employees that it is among my highest priorities to seek the funds we need from Congress for the second installment of backpay. The remaining backpay totals \$145 million. While we asked Congress for \$114 million, we're being provided \$75 million.

I want you to know that we're going to meet our commitment to deliver the backpay this year. I have the full support of the board of directors on this. We will identify the source of the operating funds that we'll use to begin payment in May. Keep in mind that we cannot use capital funds (typically used for investments in the company), including any of the funds from the stimulus legislation, for backpay.

I believe that there are many ways Amtrak invests in its resources — one of the most important of which is our employees.

We have a dedicated workforce and I value the work you do — delivering on the backpay is one way we can show our commitment to you. Thank you for your support.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

Witt To Leave Amtrak

Vice President of Strategic Partnerships and Business Development
Anne Witt will be leaving Amtrak on April 11.

“Anne has played a critical role in cultivating and expanding our relationships with state, freight and real estate partners,” said President and CEO Joe Boardman. “While I am saddened by her decision, we wish her well in her future endeavors.”

Over the next four weeks, Witt will assist with the transition and provide input on the future structure of the department.

A Message from the CEO

Dear Co-workers,

The board of directors just concluded its March meeting here in Washington where one of the matters discussed was back pay. I'm pleased to announce that the board unanimously supported our decision to pay the remaining 60 percent of retroactive wage payments — a total of \$145 million — on Friday, May 1, the company's 38th anniversary.

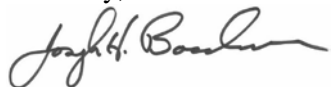

All eligible employees who received the first retro payment will receive the remaining 60 percent in a separate check, even if they have retired, or retire, before May 1.

The original plan was to issue back pay on a union-by-union basis like the first round of payments, meaning some of you would not receive your check until July. But we want to get the money to you sooner rather than later.

With that in mind, the executive team and I worked very hard to find a way to make all the payments on May 1 and the board fully supported our effort.

It is critical that we all work together as we begin to invest an unprecedented \$2 billion in stimulus and FY '09 funding for capital programs, and I look forward to seeing us live up to our collective potential.

Sincerely,

Joe Boardman

President and Chief Executive Officer

Final Stimulus Project List Released

After Vice President Joe Biden announced key capital programs that will be funded by \$1.3 billion in stimulus grants for Amtrak at Washington Union Station on March 13, the full list of projects has been unveiled.

Well over 500 projects will begin across the country over the coming weeks as part of the American Recovery and Reinvestment Act, including approximately 100 for security and life safety improvements and over 400 projects for operating infrastructure, rolling stock and business systems.

“We’re beginning an exceptional chapter in our company’s history,” said Joe Boardman, president and CEO. “The surge in funding for capital improvements is unprecedented and the benefits will be enduring. It is encouraging to see the direction our country is taking to improve our national mobility, reduce our dependence on imported energy and make a stronger, healthier passenger rail system.”

The projects meet all the objectives of the ARRA and the goals of connecting America in safer, greener, healthier ways. Specifically, they aim to improve operating efficiency, increase access for passengers with disabilities, improve safety and security, and reduce energy needs. Approximately 6,000 jobs will be created in the process; some positions will be internal but most will be created by vendors and contractors to support Amtrak project work.

Highlights include replacement of the Niantic River Bridge in Conn., construction of maintenance facilities in

Los Angeles and Seattle, restoration of Amfleet equipment and locomotives, as well as improvements to more than 200 stations across the country.

Security and life safety investments totaling \$450 million will enhance fire detection and mitigation systems and fund security improvements at facilities such as stations, maintenance buildings, bridges and tunnels. These funds also include expansion of Positive Train Control systems on the Northeast Corridor and the Michigan Line.

Complete ARRA project-by-project information broken down by state and by project category, along with a narrative summary, can be found on the Intranet under “How We Work” → “Finance” → “Economic Stimulus Guidelines” or on Amtrak.com under “Inside Amtrak” → “Other Reports.”

A Message from the CEO: Employee Appreciation Day on May 1

Dear Co-workers,

May 1 will mark the 38-year anniversary of our company. You and I are part of a railroad that is a vital piece of our national transportation system — a railroad that began as a collection of pieces from other companies but has turned into a cohesive operation that carries 29 million passengers per year thanks to your hard work and dedication. Your perseverance has created a railroad that the Vice President of the United States recently called “a national treasure.”

What’s exciting is that things are only going to get better. Last week, we announced the full list of projects that will begin with stimulus funding from the American Recovery and Reinvestment Act. This funding, along with backing from the White House and last year’s PRIIA legislation, gives us the support and resources to improve our company in ways that have never been possible before.

So to celebrate what’s been accomplished over the last 38 years and the progress we’re about to make, May 1 will be a company-wide Employee Appreciation Day, with events at stations and facilities across the country. We will also be remembering our 73 colleagues who have lost their life in the line of duty.

We want these to be meaningful and beneficial to you — so rather than just buying pizza or doughnuts for everyone, we’ll provide information, tools and resources to become safer, greener, healthier employees, both personally and professionally. Details will vary by location, but events might include advice from finance professionals on retirement planning, health and wellness screenings, special offers on products and services, giveaways, prizes and more. Executives and other company representatives will also be on hand to answer questions and listen to your concerns.

Since joining the company back in November, one of my highest priorities has been getting to know this railroad those of you that make it run on a day-to-day basis. I’ve been traveling the system, visiting crew bases, meeting with union leadership and reviewing employee survey data. Employee Appreciation Day is just one small gesture to show that I am committed to building an even better, more unified company. We have such an opportunity in front of us — but we have to seize it together.

Sincerely,

Joe Boardman
President and Chief Executive Officer

A Message from Joe Boardman

Dear Co-workers,

Vice President Joe Biden was here at Washington Union Station a couple of weeks ago, announcing the availability of \$1.3 billion in stimulus funds we will be receiving for capital projects to spur the economy while making long-lasting investments in Amtrak.

There's naturally a good deal of interest in the projects, so we posted the FRA-approved list and a number of related documents on Amtrak.com and the Intranet for you to take a look at. These capital projects will help advance our goals by improving our stations, facilities, infrastructure, equipment and systems in ways that would not have been possible this year. This is an opportunity to go beyond the quick fixes we're all too familiar with, and to make enduring, real improvements.

That's one meaningful contributing factor to a safer, greener, healthier Amtrak. But I recognize that the difference between potential and realizing that potential is leadership, vision and a committed workforce. It's driven by you individually and us together as a unit.

That's why I am dedicating our anniversary — May 1 — to you. May 1 will be a company-wide Employee Appreciation Day, with events at stations and facilities across the country. We will also be remembering our 73 colleagues who have lost their lives in the line of duty.

I'm getting to know many of you as I travel and I've read the feedback from the employee surveys we've conducted. Our workforce works hard, is dedicated and wants to see Amtrak do well, but as an organization we have some hurdles to jump. Improving and consolidating our systems so that we don't have 25 different ones — to improve efficiency, teamwork and communication between employees and departments — is just one example of how we're addressing your concerns.

Better communicating what resources are available to you as an employee is another way we can express our commitment to you. We want the events on May 1 to be meaningful and beneficial to you — so rather than just buying pizza or doughnuts for everyone, we'll provide information, tools and resources to become safer, greener, healthier employees, both personally and professionally. Details will vary by location, but events might include advice from financial professionals on retirement planning, health and wellness screenings, and employee discounts on products and services. Executives and other company representatives will also be on hand to answer questions and listen to your concerns.

One of my objectives is getting to know you, listening to your ideas and your concerns, and communicating openly and regularly. I've been traveling the system, visiting crew bases and meeting with union leadership. Employee Appreciation Day is just one small gesture to show that I am committed to building an even better, more unified company.

Look for more information about Employee Appreciation Day in the coming weeks, and thank you for your dedication and support.

Sincerely,

Joe Boardman
President and Chief Executive Officer

A Message from Joe Boardman: Employee Appreciation Day

Dear Co-workers,

The recent weeks and months have been full of events that will help advance our company in ways that haven't been possible in a long time. Vice President Joe Biden was at Washington Union Station a couple of weeks ago, announcing the availability of \$1.3 billion in stimulus funds for Amtrak to help spur the economy while making long-lasting investments in Amtrak. This is an opportunity to go beyond the quick fixes we're all too familiar with, and to make enduring, real improvements. We've posted the list and a number of related documents on Amtrak.com and the Intranet to keep you informed.

The recent Passenger Rail Investment and Improvement Act also allows us to plan beyond just the coming year and provides clear direction from Capitol Hill on the future of Amtrak. All this, along with a supportive administration and Congress, presents a great deal of potential for driving us toward a safer, greener, healthier Amtrak.

But I recognize that the difference between potential and realizing that potential is leadership, vision and a committed workforce. It's driven by you individually and us together as a unit.

That's why I am dedicating our 38th anniversary on May 1 to you. May 1 will be a company-wide Employee Appreciation Day, with events at stations and facilities across the country. We will also be remembering our 73 colleagues who have lost their lives in the line of duty.

I'm getting to know many of you as I travel and I've read the feedback from the employee surveys we've conducted. Our people work hard, are dedicated and

want to see Amtrak do well, but as an organization we have some challenges to overcome. Improving and consolidating our incompatible business systems is just one example of how we're addressing some of your concerns about efficiency and teamwork between departments.

Better communicating what resources are available to you as an employee is another way we can express our commitment to you. We want the Employee Appreciation Day events to be meaningful and beneficial to you so we'll provide information, tools and resources to become safer, greener, healthier employees, both personally and professionally. Events will include health and wellness screenings, employee discounts on products and services, information on safety and environmental initiatives and more. Executives and other company representatives will also be on hand to answer questions and listen to your concerns.

Employee Appreciation Day is just one gesture to show that I am committed to building an even better, more unified company. Look for more information about Employee Appreciation Day in the coming weeks, and thank you for your dedication and support.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Update on H1N1 Flu Outbreak

On May 1, Amtrak activated its Pandemic Flu Contingency Plan in response to outbreak of H1N1 flu in the United States. The company's Pandemic Flu Task Group has been continuously monitoring the situation and following recommendations of the Centers for Disease Control (CDC) as appropriate to safeguard the well-being of its employees and passengers.

Amtrak operations are continuing as normal, but employees should continue to be mindful of the threat of the H1N1 virus. Background information for the public has been posted on Amtrak.com and can be viewed by clicking the "2009 Flu Outbreak" icon on the bottom right of the home page.

Employees are reminded to follow the protocol set up for handling customers, passengers and co-workers that show symptoms of the H1N1 virus. It is critical that employees notify CNOC at (800) 424-0217 or ATS 734-2307 if they encounter a customer, passenger or employee exhibiting symptoms of H1N1. CNOC is serving as the central clearinghouse for all suspected cases of H1N1 flu on board trains or in Amtrak facilities.

H1N1 symptoms include a recent onset of fever greater than 100°F AND coughing, sore throat and/or stuffy or runny nose.

Front line employees are directed to implement the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 "Serious Communicable Disease Procedures" on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, "Public Health Guidelines," Section C). The manuals are posted on the Intranet, under

"Library"→ "Wiki"→ "Service Standards."

If an employee is sick with symptoms of H1N1, he or she should not come to work and should seek medical attention in accordance with the Pandemic Influenza Leave Policy (see attached).

Each employee is urged to thoroughly wash his or her hands on a regular basis and to always cover his or her mouth with a sleeve or tissue when coughing or sneezing.

At this time, the CDC advises that use of facemasks or respirators is not necessary for the general public. Accordingly, employees may not wear masks while on duty unless they are called for or allowed as part of the job function. Amtrak safety procedures require that all respirators or facemasks used by employees must be provided by the company to maintain compliance with the OSHA Respirator Standard.

Based on the information available, current cleaning and disinfecting practices for facilities and equipment is effective against the H1N1 virus. Amtrak's approved disinfecting chemicals for equipment kill all harmful viral and bacterial microorganisms (including H1N1). A mechanical bulletin is being distributed with additional reminders on cleaning procedures.

Please visit www.cdc.gov/h1n1flu/ for more information. Amtrak's plan is posted on the Intranet under "Safety"→ "Health"→ "Pandemic Flu Contingency Plan."

Please distribute at all safety meetings and post on all employee bulletin boards.

May 14, 2009 • Page 1 of 1

Pandemic Flu Plan No Longer in Effect

Based on the Centers for Disease Control announcement that xxxxxx, the emergency situation declared by Amtrak on April 30 is no longer in effect. Accordingly, the Pandemic Flu Contingency Plan and the 2009 Pandemic Leave Policy have been withdrawn.

Amtrak's Environmental Health and Safety department, Health Services and the cross-functional Pandemic Flu Task Group will continue to monitor the situation as appropriate to safeguard the well-being of its employees and passengers.

Because H1N1 is currently considered no more severe than a typical flu virus at this time, employees should not report common flu symptoms to CNOC and/or deny carriage to passengers who exhibit common flu symptoms. However, employees are reminded to follow the protocol set up for handling customers, passengers and co-workers who show symptoms of any serious communicable disease or present a serious medical situation.

While the severity of the threat of H1N1 has subsided at this time, employees should always practice good hygiene, which includes thorough and frequent hand washing and covering the mouth with a sleeve or tissue when coughing or sneezing.

Please distribute at all safety meetings and post on all employee bulletin boards.

A Message from Joe Boardman

Dear Co-workers,

With Memorial Day upon us, I'm writing to extend a sincere "thank you" to all the men and women within the Amtrak family who have defended our great nation through military service.

At our board of directors meeting this week, Chairman Tom Carper and I had a chance to reflect upon our own military service in Vietnam and share stories of the bravery and honor we were fortunate enough to witness in so many of our fellow soldiers. On behalf of Mr. Carper and myself, I want to express how appreciative and grateful we are for the sacrifice of everyone who has served our nation.

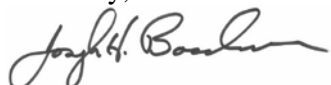

I know many of you have family members and friends fighting overseas right now. Our thoughts are with them and we pray for their safe return.

I encourage all of you to relax and enjoy this holiday weekend. Spend time with your families and have fun. But at some point, please take a moment and reflect on the service and sacrifice of those who have put themselves in harm's way to give us our freedom.

Corporately, we will pay tribute to all our servicemen and women by sounding train horns at 3 p.m. local time on Memorial Day, which will be followed by a moment of silence.

Thanks and have a great holiday.

Sincerely,

Joe Boardman

Chief O'Connor Appointed Interim Head of OSSSO

Plans for Integrated Police and Security Department Underway

Effective today, Amtrak Police Department Chief John O'Connor will oversee the Office of Security Strategy and Special Operations (OSSSO) in an interim capacity. Bill Rooney, who served as vice president of Security Strategy and Special Operations, is leaving his position with Amtrak today.

"Bill Rooney has helped give shape to a security strategy that has led to significant advancements, including the launch of Counterterrorism Units and forging ties with domestic and international counterterrorism officials," said Chief Operating Officer William Crosbie. "We thank him for his service and wish him well in his future endeavors."

Crosbie added that Amtrak will continue to build on those advancements to safeguard the safety and security of its employees, passengers and assets.

O'Connor will oversee OSSSO operations on a temporary basis, while an integrated Police and Security department that encompasses APD and OSSSO functions takes shape.

The planned integration of the two functions is expected to yield a fully integrated and cohesive structure, and a more unified approach to policing and security.

Chairman Carper Announces Appointment of Amtrak Inspector General

Following a comprehensive national search conducted over the past three months, Amtrak Chairman Tom Carper today announced that he has appointed Theodore (Ted) Alves as the incoming Amtrak Inspector General. Alves' start date with the Amtrak Office of Inspector General will be determined shortly.

Carper engaged a leading executive search firm to assist with the search process, and appointed a Selection Committee chaired by Amtrak Board member Nancy A. Naples and comprised of Amtrak Board Vice Chairman Donna McLean, former DOT IG Ken Mead and former Federal Deposit Insurance Corporation IG Gaston Gianni.

"Ted Alves is highly respected in the inspector general community and will provide the leadership, integrity, independence and objectivity required for the position," Carper said.

Alves comes to the Amtrak Office of Inspector General with 35 years of federal service, and is a 2009 recipient of a "Presidential Rank Award" for his exceptional service to the American people and in recognition of his "sustained extraordinary achievement."

He served in the U.S. Department of Transportation Office of Inspector General for eight years in several executive positions until he retired in Jan. 2009. As the Deputy Inspector General from 2006 to Jan. 2009, Alves was responsible for providing executive-level leadership and direction of all Office of Inspector General audits and investigations, as well as for overseeing

operational support activities for that office. From 2001 to 2006, Alves held three progressively responsible executive positions at the U.S. DOT, culminating in the position of Principal Assistant IG for Audits and Evaluations. He also has extensive audit experience at the Federal Emergency Management Agency, the U.S. Agency for International Development and the Government Accountability Office, where he spent 22 years.

Prior to his work at DOT, Alves worked in auditing positions at the Federal Emergency Management Agency, the U.S. Agency for International Development and the U.S. Government Accountability Office, where he spent 22 years.

Acting Inspector General Lorraine Green, who temporarily held the position while a search was being conducted, will be returning as a vice president on the Executive Committee and will report to President and CEO Joe Boardman.

Dear Co-workers,

Today is Veteran's Day. We observe it on Nov. 11, the anniversary of the armistice that ended the First World War. This day has become a traditional occasion for us to remember the living and the dead who served in the nation's armed forces in time of war. It is a day of gratitude and peace, and it will quickly give way to the holidays that remind us how fortunate we are to live in an age of safety and plenty — holidays such as Thanksgiving, Hannukah and Christmas.

As Americans, we enjoy all the comforts and freedoms our age has to offer. We enjoy them in part because another generation of Americans is serving as many of us once did for the safety of our country. Many are abroad and serving in the field; some are at work in our stations and along our rights-of-way, ensuring the safe passage of our trains. Some of them even combine the exacting work of the railroad with the obligations of the citizen-soldier. Some, although they may not even know it yet, will someday join our ranks here at Amtrak, and when they come, we will be glad to have them.

It is impossible to distill the essence of military life into a sentence, but easy to compress it into a word: that word is "service." We speak of service on the railroad, too, just as we think in terms of "divisions," and this is no accident. The railroad business has always drawn veterans, many of whom find in our company the dedicated fellowship that comes from the pursuit of a demanding business with high standards of performance and individual responsibility. Run through the ranks of Amtrak, and you will find plenty of former soldiers, sailors, airmen and Marines in our shops, bases, trains and stations. We are proud of them, and we're committed to taking care of them, too.

At its foundation, Amtrak was filled with veterans of the Second World War and of the two conflicts that followed it. Since 1971, America has faced two major wars and a host of minor actions, and the end of each has brought new people into the industry.

Chairman Carper and I served in Vietnam, and incredible as it now seems to us, the veterans of the Second World War whom we knew as teachers, elder colleagues and commanders are now leaving us, and will soon rejoin the young friends they left overseas. When we walk through stations and shop floors we still see plenty of grey heads — but the grey hair belongs to the Vietnam veterans now, and the young men and women who are coming to Amtrak from the service are veterans of a different war in other places. That war, like all wars, continues to take its regrettable toll, and while we honor the survivors today, we must not forget the dead. Only the living can know the fullness of their sacrifice, for the years and the lives they gave up are their last great gift to us. Many of us are graying now, and when we look back across years filled with work, family, and happiness to the scenes of our youth, we hope for two things: one, that all of us can look back on the lives we had led with satisfaction, pride, and gratitude; and two, that we can find it in ourselves today to thank God for the sacrifices of the men and women who gave up their lives so that we could enjoy our own.

Sincerely,

Joe Boardman

A Message from Joe Boardman

Dear Co-workers,

Last summer, I promised that I would communicate the Safe-2-Safer survey results once the report was provided to me. Before I get into the survey findings, I want to thank the nearly 10,600 employees who took the time to complete the survey and the 800-plus employees who participated in focus groups held across the country late this summer.

I know that in the past you may not have heard back about surveys you completed, and maybe some of you guessed that it would be the same thing all over again. That's not the case. Attached is the Executive Summary of the report, which is the result of the survey and more than 80 focus groups across the system. The report was prepared by Behavioral Science Technology, Inc., the vendor that conducted the survey and that is helping us implement Safe-2-Safer.

The first recommendation in the BST report is to share the findings with you, along with a commitment to improve. You have both my commitment, along with that of our senior management, to do so. Keep in mind that what we and BST are examining are employees' current perceptions of safety and security at Amtrak, in an effort to strengthen our commitment to safety.

Naturally, people are inclined to ask how we're going to address the issues raised by the report. I just recently received the final report myself and I don't want to rush to produce an Amtrak plan just to say that we did. It is very important that we dedicate time and resources to putting together a plan that is thoughtful and meaningful, and that involves additional input from employees. That alone should serve as an indication to you of my commitment.

You provided us with your perceptions and valuable input, and I will

(and do) treat your views with the respect they deserve. I take this very seriously.

The entire report is more than 200 pages long, so in the interest of being green, we have posted it on the intranet home page, as well as under "Safety." Please ask your supervisor to print it out (double-sided) for you, if you want a copy. I've sent supervisors a memo instructing them to print out copies if employees want to see it. Please treat this summary and the report as internal documents — they may not be distributed outside the company. They are intended for internal review so we can decide how to implement improvements that will work for Amtrak.

I know that most of you work hard to maintain a safe and secure Amtrak. We have a good safety record — BST advised me that Amtrak's survey results are above average when compared to the other Class 1 railroads and transit agencies that also used the survey. But we can do better, and we can do that by changing the ways we relate to safety and security, and to one another. I expect Safe-2-Safer to help accomplish that.

We're all in this together. What binds us is a love for what we do and for the railroad, and that is a strong bond. We must build on that to drive enduring changes that help position us as the provider of choice in an increasingly competitive industry.

You'll be hearing more from me in the coming months about steps we'll be taking to address the results. In the meantime, I thank you for the work you do and please work safely.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

Message from Joe Boardman on Free Seasonal Flu Shots for Employees

Dear Co-Workers,

Over the past year, you've heard me talk about creating a safer, greener, healthier company. My motivation for doing so stems from my belief that a company should be much more than just a business operation. A company is a collection of people that have a responsibility to create value for each other, for customers and for the communities in which it operates.

To that end and given the potentially severe flu season the Centers for Disease Control and Prevention (CDC) is predicting, we will be providing free seasonal flu vaccinations — for the first time ever — to all employees who wish to protect themselves from the seasonal flu. Keep in mind that this is for the seasonal flu, not the for the H1N1 flu virus.

Vaccinations will be available in one of two ways: at an on-site clinic set up at work locations (the preferred method), or by using a pre-paid voucher to get a flu shot at a participating pharmacy or other entity offering flu shots near you. Either way, make sure you have your Amtrak employee ID (SAP) number.

Work locations with 30 or more employees will host at least one on-site clinic between now and Nov. 15. A list of locations is attached for your reference, but look for flyers and e-mails with information about the dates and times and where to sign up for a vaccine at your location.

For those of you who will not be able to visit one of the on-site clinics, please take advantage of the voucher system. You will need to register for the voucher online or by phone. Please

follow the information provided in the AllOne (the vendor who is administering the vaccinations) Voucher Information Sheet that accompanies this message and please register for, or obtain your voucher by Oct. 15. The information is also posted on the Intranet home page.

Getting a flu vaccination is completely voluntary; however, I encourage everyone to take advantage of the offer. Supervisors and their direct reports should coordinate to make sure employees can get the shot while the on-site clinic is at your location. The CDC advises that getting vaccinated is the most important step in avoiding the seasonal flu virus, and I'll be signing up for mine as soon as the date and time is posted.

We are working with the Federal Emergency Management Agency to see if we qualify for H1N1 vaccinations for employees. We will keep you updated on our progress. Also, please remember that the vaccine is for Amtrak employees — family members and contractors should use their health care coverage for vaccinations.

As always, please remember to wash your hands frequently with soap and water to avoid spreading germs. Covering your mouth and nose when sneezing or coughing is also important.

Providing you the opportunity to get a free flu shot is another way Amtrak can show its commitment to you. Please do your part to keep the flu virus from spreading and stay healthy this fall and winter season.

Sincerely,

Joe Boardman
President and CEO

President Obama to Nominate Two New Board Members

Yesterday afternoon, the White House announced President Obama's intent to nominate two individuals to the Amtrak board of directors.

Bert DiClemente has served as vice president of CB Richard Ellis, Inc., the largest real estate company in the world, since 2003. Previously, he worked at Insignia/ESG and Jackson Cross & Associates as director and associate director, after serving as state director on the staff of then-U.S. Sen. Joe Biden for 20 years.

Anthony Coscia was appointed chairman of the Board of Commissioners of the Port Authority of New York and New Jersey in 2003, where he has broad oversight responsibility in connection with the agency's varied transportation businesses. Coscia is also a partner at Windels Marx Lane & Mittendorf, LLP, one of the New York region's oldest law firms.

Once nominated and confirmed, DiClemente and Coscia would fill two of the four currently open seats on the board. The size of the board was expanded to nine members in April, in accordance with a provision in the Passenger Rail Investment and Improvement Act of 2008.

Once the nominations are officially made, they will require confirmation by the U.S. Senate.

Pacific, Southwest Divisions Merged

The Pacific and Southwest Divisions under the Transportation department have been combined to
XXXXX.

Joe Deely, who served as the Pacific Division general superintendent left his position with Amtrak today/yesterday.

Anything to say about joe deely

“Joining the two divisions means what,” said Chief Operating Officer William Crosbie.

As a result of the consolidation, General Superintendent Joe Yannuzzi will be managing the day-to-day operations of both divisions, effective today.

“Because the two divisions work so closely together, Joe Yannuzzi is very familiar with the operation and will be working closely with the very capable managers and employees in that region,” said Richard Phelps.

Seasonal Flu Shot Voucher Deadline is Next Week

The deadline for Amtrak employees to register for a free seasonal flu shot voucher/coupon has been extended to 5:00 p.m. EDT time on Oct. 20. (The deadline has been extended from the previously announced Oct. 15). The deadline for redeeming the vouchers remains Oct. 22, and employees are strongly encouraged to take advantage of the offer as soon as possible due to shortages of the seasonal flu vaccine in some areas. The voucher program cannot be extended past Oct. 22, 2009.

Amtrak was informed today by AllOne Health, its flu vaccination provider, that because of supply problems with seasonal vaccine, all on-site clinics slated for the next two weeks must be postponed until mid-November, when more vaccines are expected to be made available by their supplier.

While Amtrak still expects to host all on-site flu shot clinics originally scheduled for work locations throughout the system, it is possible that the shortage of vaccines will require cancellation of some of the clinics. Based on the information from AllOne Health, the availability of the vaccine now or later in the season is not guaranteed, so employees should take advantage of the voucher/coupon offer as soon as possible to better ensure they are vaccinated.

Further announcements about specific on-site flu clinics will be made as they are rescheduled and information on vaccine availability is known.

Instructions for registering for a voucher online or by phone are attached to this advisory.

Amtrak Statement on Virginia Railway Express Recommendation

Amtrak issued the following statement today following the Virginia Railway Express (VRE) Operations Board's recommendation to award its commuter rail operations and maintenance services to another bidder. The recommendation is being made to VRE's parent commissions, the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission, for consideration at their Nov. 5, 2009, meetings.

"Amtrak and VRE have had a long and positive working relationship since before the commuter railroad began operations. Amtrak is saddened and disappointed in the recommendation as our employees have invested a great deal of heart, energy, and effort in providing excellent service to VRE passengers since 1992."

Seasonal Flu Vaccine Supply Issues Force Adjustments to Program

Amtrak has been informed by its flu vaccination program provider, AllOne Health, that on-site flu shot clinics at Amtrak work locations must be cancelled because AllOne Health was unable to acquire the necessary supply of vaccine doses.

In an effort to maintain its commitment to providing free seasonal flu vaccine to employees, Amtrak will reimburse employees up to \$40 if they choose to get a seasonal flu vaccination on their own.

“AllOne told us today that they are not able to secure vaccine doses from their manufacturers or suppliers,” said Roy Deitchman, vice president, Environmental Health and Safety. “We are extremely disappointed that these external supply factors, which are outside of our control, have prevented AllOne from carrying out our program as planned. But we hope employees will take advantage of the reimbursement option.”

Employees who have not already been vaccinated but still wish to do so are encouraged to find a seasonal flu shot provider as soon as possible because national supplies are reportedly limited.

Upon receiving a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental
Health and Safety
40 Mass. Ave. NE
3W-104
Washington, D.C. 20002

Receipts must be submitted by Nov. 20. The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1, and the program is only for Amtrak employees.

A Message from Joe Boardman on Commuter Contracts

Dear Co-workers,

Today, the Southern California Regional Rail Authority (SCRRA) board of directors voted to execute a Memorandum of Understanding that essentially lays the groundwork for a contract with Amtrak to operate the Metrolink commuter rail service, starting July 1.

We will be working on the final agreement in the coming weeks, and hope to sign a contract no later than Dec. 11. Amtrak would supply Train and Engine crews, and related management and support staff to operate the Los Angeles-area service.

As some of you may recall, we'd operated this service before, from 1992 to 2005. According to the SCRRA board, they chose to proceed with sole source procurement — meaning not putting the contract out for competitive bid — because it recognizes that Amtrak “provides a depth of relevant experience and of management support for Metrolink operations that is unique in the current passenger rail environment.”

It is our experience and depth of expert knowledge that makes Amtrak the right choice. But we now live in a new era of passenger rail. The opportunities that are being made available thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. Don't kid yourself — we have competition and we must work and act like it.

We were all saddened and disappointed when we learned last

Friday of the Virginia Railway Express (VRE) Operations Board's recommendation to award its commuter service contract to another bidder. Our T and E crews provide outstanding service and they maintained an excellent safety record for the 17 years Amtrak has operated the service. In a letter I sent to those employees today, I described how proud I am of the work they do, and that I value their dedication to providing safe and reliable service. I sincerely hope they will choose to remain part of the Amtrak family when the contract with VRE ends on June 30.

This is not the passenger rail environment of yesteryears — the competition is real. While we have expertise and experience that stands up to competition, we are also making (and will continue to make) significant investments to better position ourselves not simply as a provider, but as the provider of choice. But getting there also involves changing the way we think. When I first came to Amtrak, it seemed as though we only thought about why we couldn't do something. Thinking about what we can do and what we need to do to get there is how we remain competitive and beat out the other guys.

In the past, we seemed focused on survival; today our survival relies on being focused on growth. We all — management and agreement-covered alike — must think big, be innovative and pursue opportunities and decisions that make good business sense. It's incumbent on us to shape a company that thinks beyond just tomorrow and that sets the stage for the newer members of the Amtrak family because

they represent our future, and they deserve their chance at building a career of service and contributing to the advancement of Amtrak's mission. I think we all envision the Amtrak that we can be. No matter what your job, each and every one of us can contribute to a changing mindset and attitude.

I'll keep you informed about the status of the Metrolink contract. In the meantime, thank you for the work you do and please work safely.

Sincerely,

Joseph Boardman

AT & T Outage Affects Arrow, Network Across System

Due to an AT & T outage, Amtrak's network is down across most of the system, affecting reservations and ticketing (including Quik-Trak kiosks) operations at most stations, with the exception of Washington and Philadelphia. A few stations — Washington, Philadelphia and New York Penn — have e-mail. Amtrak.com is unaffected. There is currently no estimated time of resolution.

While the connectivity at call centers and Julie are down, reservations agents are advising passengers to use Amtrak.com to book reservations and to use their confirmation page as a ticket until the outage is resolved.

Notice of the outage and information about ticketing procedures are being communicated via CNOC pages. General superintendents and district managers are being asked to ensure that they advise station personnel in their respective territories. Conductors will accept e-mail or Amtrak.com confirmations.

Updates will follow when they become available.

Please distribute at all safety meetings and post on all employee bulletin boards.

Message From Joe Boardman

Dear Co-Workers,

Next month, I'll be celebrating my first-year anniversary as president and CEO of Amtrak. Over the course of the last 11 months, I have learned a great deal from many of you. I know that you are enthusiastic about what the future holds for Amtrak but may be uncertain about how it all comes together. We continually face an identity crisis because it's not always clear what Amtrak is supposed to be.

That is in large part why I made developing our strategic vision a priority when I joined the company. To that end, we have compiled a Strategic Guidance document that establishes broad goals, creates key performance indicators to measure progress, and outlines the opportunities and challenges facing Amtrak as we pursue a growth-oriented mission. (This document supersedes Amtrak's 2005 Strategic Reform Initiatives.) At the end of the day, our goals are all aimed at better positioning Amtrak to be the provider of choice.

Our Strategic Guidance sets the foundation for the Five Year Financial Plan we submitted to Congress on Oct. 1, and together they encompass our strategy for continuing the growth we've seen since 2002, and for maximizing this historic moment in federal and state support for more passenger rail service.

As you know, we're in the midst of a transformational chapter for Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) provides the direction set by policymakers, and we're seeing exceptional support for growth of passenger rail.

This is not the passenger rail environment of yesteryears — the opportunities that are being made available to us thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

Our strategic vision is built on six fundamental goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. On our own and with the help of stimulus funds, we are making and will continue to make significant and enduring investments toward those goals.

We're creating a safer environment with Safe-2-Safer and installation of Positive Train Control. In addition, we're pursuing multiple avenues to be better stewards of our environment.

We're striving to become healthier by increasing ridership and pursuing growth in state-supported and commuter service, like the new partnership with the Commonwealth of Virginia, the second Amtrak *Cascades* roundtrip to Vancouver, the proposed additional *Piedmont* service in North Carolina next year, and the recent progress toward a final contract to operate the Los Angeles-area Metrolink service.

We're also becoming healthier by investing to bring our equipment and infrastructure to a state of good repair, and we will be producing a fleet plan and request for federal support for equipment procurement in February. We're also making progress toward improving station accessibility for those who are mobility impaired. With

Produced by
Employee Communications

ecom@amtrak.com

special employee advisory

October 29, 2009 • Page 2 of 2

Strategic Asset Management, we're revamping the technologies that power our key operational, financial and human resources business processes to replace outdated systems and redundant or inefficient processes with integrated systems that will improve efficiency.

We're also aiming to improve customer service with a next-generation reservations system and e-Ticketing and the recently re-launched Amtrak.com. In addition, we must exemplify qualities typically attributed to excellent customer service, such as responsiveness, anticipating needs and a high degree of professionalism in our approach to our state and commuter service partners.

As Amtrak grows, so does our capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction and reduction in the demand for foreign oil.

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth. In addition, those looking to enter the passenger rail market will eat our lunch if we don't raise the ante on our competitive edge.

Clear goals are of vital importance for a company; values are just as important because they guide how we go about achieving those goals. Many of the investments we're making call for a new way of thinking and working together. Together and as individuals, we need to stop thinking about what we can't do, and start putting into action what we can do.

I think we all envision the Amtrak that we can be. Each and every one of us can contribute to a changing mindset

and attitude. We need you to be part of this — we can have the best strategy in the world, but it's no good if we don't own it and live it.

It's difficult to be part of something if the mission is unclear, so take the time to understand the opportunities and challenges we face — our strategy is your strategy.

That's why I encourage you to visit our intranet or Amtrak.com to read our Strategic Guidance and our FY 2010-2014 Five Year Financial Plan. (Both can be found on the intranet under "Library," then "Reports.") In an effort to be greener, we've printed a limited number of copies for a number of locations, but if you can't access the Internet or you would like your own printed copy, please call Charlotte Berry in the Government Affairs department (202 906-3918 or ATS 777-3918) or e-mail BerryC@amtrak.com to request one. The attached summary should also help you better understand our vision and plans.

Thanks for your support and please work safely.

Sincerely,

Joe Boardman
President and CEO

Amtrak Statement on Letter to VRE

Amtrak today issued the following statement:

“Today, Amtrak sent a letter to VRE challenging their notice of intent to award a contract to Keolis Rail Services on the basis of potential improper scoring of proposals and such other bases as may not be known until we gain access to the relevant records previously requested.

The VRE request for proposal was to be scored 80 percent on performance/experience, but the foreign-owned Keolis has no experience operating a railroad in the U.S. or under this country’s strict rail safety and security regulations that are designed to protect the traveling public and the employees operating the trains.

We ask for this challenge to be considered before final action is taken by the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission.”

2009 PSSA Recipients Announced

Today, Amtrak announces the recipients of the 2009 President's Service and Safety Awards (PSSA). Each year, the company honors employees and external partners who have made exceptional contributions to Amtrak during the previous calendar year.

The following award winners will be honored this fall at ceremonies in Sacramento, Calif. (Oct. 6); Los Angeles (Oct. 8); Chicago (Oct. 12); Beech Grove, Ind. (Oct. 13); Providence, R.I. (Oct. 27); New York (Oct. 28); Washington, D.C. (Nov. 3); Philadelphia (Nov. 9); and Jacksonville, Fla. (Dec. 3).

Also being honored at the events are employees who have completed 30 and 35 years of service in 2009.

Pandemic Flu Update

The Centers for Disease Control anticipates a particularly severe flu season this fall and winter as a result of the spread of seasonal and H1N1 viruses.

Amtrak asks all of its employees to practice healthy habits, including thoroughly washing hands on a regular basis, covering a cough or sneeze with a sleeve or disposable tissue and avoiding touching the eyes, nose or mouth.

In addition, Amtrak will be providing free seasonal flu vaccines for employees who wish to protect themselves from the seasonal flu at many locations or a voucher to obtain the vaccine at a local clinic or pharmacy, starting in October. Look for more details about the voluntary program in the coming weeks.

“Getting the seasonal flu vaccine is an excellent way to protect yourself from getting sick and spreading the flu virus,” said Amtrak’s corporate medical director Dr. Tim Pinsky.

The Pandemic Flu Plan activated by Amtrak in May is still in effect, requiring protocols for reporting employee and passenger flu cases, and instituting procedures for front-line employees.

As a reminder, all flu cases involving customers, passengers and employees should be reported to CNOC at (800) 424-0217 or ATS 734-2307. CNOC is serving as the central clearinghouse for all suspected cases of the flu on board trains or in Amtrak facilities.

Front line employees should still be implementing the Serious Communicable Disease Procedures in the Service Standards manual for Train

and On-Board Service (Chapter 2, Section B, number 2 “Serious Communicable Disease Procedures” on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, “Public Health Guidelines,” Section C). The manuals are posted on the Intranet, under “Library”→ “Wiki”→ “Service Standards.” **An updated Operations Standard Advisory and Arrow message are also being issued today.**

Flu symptoms include a fever of 100°F or higher AND coughing, sore throat and/or stuffy or runny nose.

Please review the accompanying Q and A, which serves as a comprehensive guide for employees during the pandemic, and stay informed.

The company’s Pandemic Flu Task Group will continue to monitor the situation and follow recommendations of the Centers for Disease Control (CDC) as appropriate to safeguard the well-being of its employees and passengers. Stay tuned — as the situation evolves, so will the policies and procedures associated with the pandemic flu.

Please distribute at all safety meetings and post on all employee bulletin boards.

Pandemic Flu Update

The Centers for Disease Control and Prevention (CDC) anticipates a particularly severe flu season this fall and winter as a result of the spread of seasonal and H1N1 viruses.

Amtrak asks all of its employees to practice healthy habits, including thoroughly washing hands on a regular basis, covering a cough or sneeze with a sleeve or disposable tissue and avoiding touching the eyes, nose or mouth.

In addition, Amtrak will be providing free seasonal flu vaccines for employees at many locations or a voucher to obtain the vaccine at a local clinic or pharmacy, starting in October. Look for more details about the voluntary program in the coming weeks.

“Getting the seasonal flu vaccine is an excellent way to help protect yourself from getting sick and spreading the flu virus,” said Amtrak’s corporate medical director Dr. Tim Pinsky.

The Pandemic Flu Plan activated by Amtrak in May is still in effect, requiring protocols for reporting employee and passenger flu cases, and instituting procedures for front-line employees.

As a reminder, all flu cases involving customers, passengers and employees should be reported to CNOC at (800) 424-0217 or ATS 734-2307. CNOC is serving as the central clearinghouse for all suspected cases of the flu on board trains or in Amtrak facilities.

Front line employees should still be implementing the Serious Communicable Disease Procedures in the Service Standards manual for Train and On-Board Service (Chapter 2, Section B, number 2 “Serious

Communicable Disease Procedures” on page 2-17, version 4.2 of the manual) and Station Service Manual (Chapter 10.01, “Public Health Guidelines,” Section C). The manuals are posted on the Intranet, under “Library”→ “Wiki”→ “Service Standards.” An updated Operations Standard Advisory and Arrow message will be issued in the coming days.

Flu symptoms include a fever of 100°F or higher AND coughing or sore throat. Other symptoms may include runny or stuffy nose, head and body aches, fatigue, diarrhea or vomiting.

Please review the accompanying Q and A, which serves as a comprehensive guide for employees during the pandemic, and stay informed.

The company’s Pandemic Flu Task Group will continue to monitor the situation and follow recommendations of the CDC as appropriate to safeguard the well-being of its employees and passengers. Stay tuned — as the situation evolves, so will the policies and procedures associated with the pandemic flu.

Please distribute at all safety meetings and post on all employee bulletin boards.

Message from Joe Boardman on Free Seasonal Flu Shots for Employees

Dear Co-Workers,

Over the past year, you've heard me talk about creating a safer, greener, healthier company. My motivation for doing so stems from my belief that a company should be much more than just a business operation. A company is a collection of people that have a responsibility to create value for each other, for customers and for the communities in which it operates.

To that end and given the potentially severe flu season the Centers for Disease Control and Prevention (CDC) is predicting, we will be providing free seasonal flu vaccinations — for the first time ever — to all employees who wish to protect themselves from the seasonal flu. Keep in mind that this is for the seasonal flu, not the for the H1N1 flu virus.

Vaccinations will be available in one of two ways: at an on-site clinic set up at work locations (the preferred method), or by using a pre-paid voucher to get a flu shot at a pharmacy or other entity offering flu shots near you. Either way, make sure you have your Amtrak employee ID (SAP) number.

Work locations with 30 or more employees will host at least one on-site clinic between now and Nov. 15. A list of locations is attached for your reference, but look for flyers and e-mails with information about the dates and times and where to sign up for a vaccine at your location.

For those of you who will not be able to visit one of the on-site clinics, please take advantage of the voucher system. You will need to register for the voucher online or by phone. Please follow the information provided in the

AllOne (the vendor who is administering the vaccinations) Voucher Information Sheet that accompanies this message and please register for, or obtain your voucher by Oct. 15. The information is also posted on the Intranet home page.

Getting a flu vaccination is completely voluntary; however, I encourage everyone to take advantage of the offer. Supervisors and their direct reports should coordinate to make sure employees can get the shot while the on-site clinic is at your location. The CDC advises that getting vaccinated is the most important step in avoiding the seasonal flu virus, and I'll be signing up for mine as soon as the date and time is posted.

We are working with the Federal Emergency Management Agency to see if we qualify for H1N1 vaccinations for employees. We will keep you updated on our progress. Also, please remember that the vaccine is for Amtrak employees — family members and contractors should use their health care coverage for vaccinations.

As always, please remember to wash your hands frequently with soap and water to avoid spreading germs. Covering your mouth and nose when sneezing or coughing is also important.

Providing you the opportunity to get a free flu shot is another way Amtrak can show its commitment to you. Please do your part to keep the flu virus from spreading and stay healthy this fall and winter season.

Sincerely,

Joe Boardman
President and CEO

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in the Retirement Income Plan for the Employees of National Railroad Passenger Corporation

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

- | | | |
|----|--|--|
| 1. | Name of Plan: | Retirement Income Plan for the Employees of National Railroad Passenger Corporation (the "Plan") |
| 2. | Plan Number: | 001 |
| 3. | Name and Address
of Plan Sponsor: | National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
| 4. | Employer
Identification Number: | 52-0910053 |
| 5. | Name and Address of
Plan Administrator: | Pension Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
-

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, the non-union employees of the National Railroad Passenger Corporation, or any wholly or majority-owned subsidiary of the National Railroad Passenger Corporation, who have completed one year of eligibility service, as defined in the Plan.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. The number of persons needed for the Department of Labor to comment with respect to this Plan is ten (10) employees. If you request the Department of Labor to comment, your request must be in writing and must specify the matters upon which comments are requested, and must also include: (1) the information contained in items 1 through 4 of this Notice; and (2) the number of persons needed for the Department of Labor to comment.

A request to the Department of Labor to comment should be addressed as follows:

Deputy Assistant Secretary
Employee Benefits Security Administration
ATTN: 3001 Comment Request
U.S. Department of Labor,
200 Constitution Avenue, N.W.
Washington, DC 20210

COMMENTS TO THE INTERNAL REVENUE SERVICE

Comments submitted by you to the Internal Revenue Service must be in writing and received by March 16, 2009. However, if there are matters that you request the Department of Labor to comment upon on your behalf, and the Department of Labor declines, you may submit comments on these matters to the Key District Director to be received within 15 days from the time the Department of Labor notifies you that it will not comment on a particular matter, or by March 16, 2009, whichever is later, but not after March 31, 2009. A request to the Department of Labor to comment on your behalf must be received by it by February 14, 2009, if you wish to preserve your right to comment on a matter upon which the Department of Labor declines to comment, or by February 24, 2009 if you wish to waive the right.

ADDITIONAL INFORMATION

Detailed instructions regarding the requirements for notification of interested parties may be found in Sections 17 and 18 of Revenue Procedure 2008-6. Additional information concerning this application (including, where applicable, an updated copy of the Plan and related trust; the application for determination; any additional document dealing with the application that have been submitted to the Service; and copies of Section 17 of Revenue Procedure 2008-6 are available in the office of the Plan Administrator during normal business hours for inspection and copying. (There is a nominal charge for copying and/or mailing.)

If you have any questions about this Notice, please contact Rosemarie Tana at 202-906-2272.

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in Amtrak's Retirement Savings Plan for Agreement Employees

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

- | | | |
|----|--|---|
| 1. | Name of Plan: | Amtrak's Retirement Savings Plan for Agreement Employees (the "Plan") |
| 2. | Plan Number: | 003 |
| 3. | Name and Address
of Plan Sponsor: | National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
| 4. | Employer
Identification Number: | 52-0910053 |
| 5. | Name and Address of
Plan Administrator: | Savings Plan Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, employees who 1) are permanent employees of the National Railroad Passenger Corporation, any majority or wholly owned subsidiary of the National Railroad Passenger Corporation, the Chicago Union Station Company, the Washington Terminal Company, or the Union Station Redevelopment Corporation, 2) are members of a unit of employees covered by a collective bargaining agreement, such unit having signed an agreement to participate in the Plan, and 3) have completed a year of service, as defined in the Plan.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. Major NEC Schedule Changes Beginning Soon

Beginning this month, Amtrak, Metro-North Railroad and New England Central Railroad will begin performing extensive track maintenance in the Northeast, resulting in several schedule changes from April through September that will affect *Acela Express*, *Northeast Regional*, *Adirondack*, *Empire Service*, *Ethan Allen Express*, *Maple Leaf*, *Keystone Service*, *Pennsylvanian* and *Vermont* services.

Accordingly, information for station employees, call center agents, On-Board Service and Train & Engine crews will be distributed this week in the form of an Operations Service Advisory (OSA) and Arrow message.

Schedules printed in the Fall 2008-Winter 2009 System Timetable and individual schedule cards for most trains operating in the Northeast will no longer be valid due to the magnitude of the track work and the extent of necessary service changes. In addition, schedules for many trains operating throughout the Northeast will not be published in the 2009 Spring-Summer System Timetable, which becomes effective May 11, 2009. However, up-to-date schedules will be available for download and printing at Amtrak.com.

Passengers will be notified of these service changes via station and on-board announcements, station notices, seat drops on certain routes and on Amtrak.com. Press releases will also be issued. For current information, passengers should be directed to visit Amtrak.com, call 1-800-USA-RAIL or speak with a ticket agent.

Randy Jackson Joins Amtrak for National Train Day

Celebrity spokesperson and musical entertainers announced

American Idol Judge Randy Jackson will be the official spokesperson for the second annual National Train Day, and will kick-off the festivities in Washington, D.C., on May 9. Other major events will be hosted in Philadelphia, Chicago and Los Angeles, with many smaller events in communities nationwide.

“As one of the hosts of the most watched TV show in America, Randy is supporting our goal of raising the profile of train travel as an important part of American culture,” said Emmett Fremaux, vice president of Marketing and Product Management. “We aim to increase ridership by promoting rail travel’s promising future and its influence on the way people connect with each other in their personal and professional lives.”

“Showing support for Amtrak’s National Train Day reinforces my belief that trains are the backbone of America,” said Jackson.

The four major events will feature live musical performances from up-and-coming and local artists. The event in Washington will feature Grammy nominee Karina Pasian and a soon-to-be-announced headliner. In Philadelphia, Jon McLaughlin, singer of the Acedemy Award-nominated song “So Close” and singer-songwriter Rachael Yamagata will perform.

Daughter of legendary blues guitarist Johnny Copeland, Shemekia Copeland and emerging R&B artist, Unique, will take the stage in Chicago. And train enthusiasts in Los Angeles will enjoy performances by singer-songwriter Matt Costa and Chana, a new artist who is receiving accolades from several media outlets for her tropical sound.

Employees are encouraged bring their families to enjoy the interactive Eco Exhibit, displays of model railroads, as well as real Amtrak and historic train cars, paintings from notable train artist J. Craig Thorpe, and more. The AmtraKids Depot will feature educational hands-on activities, appearances by Radio Disney’s Rockin’ Road Crew, magicians and face painters.

Acela Express Pass Policy Reminder

In a letter to employees last week, Vice Presidents Emmett Fremaux and Richard Phelps reminded employees to adhere to the *Acela Express* pass policy to maximize the availability of revenue seats, citing continued demand and anticipated ridership increases resulting from new marketing initiatives.

Employees must have a ticket to ride *Acela* for both business and personal travel and flash-passing is never allowed. Personal travel is not permitted on weekday departures before 9 a.m. or between 2 and 6 p.m.

Trainiac Trivia

Over the next three weeks, *Amtrak This Week* will feature a National Train Day-related trivia question. Answer correctly and you could win a Trainiac prize package and have your photo and answer featured in the May issue of *Amtrak Ink*.

National Train Day commemorates the completion of the first transcontinental railroad in 1869, which joined how many miles of track?

- a.) 1,776
- b.) 1,898
- c.) 2,120
- d.) 2,547

E-mail your answer to ecom@amtrak.com. A winner will be selected at random from those who respond correctly. *Hint: Answers can be found at NationalTrainDay.com.*

Engineering: The System Production Switch & Rail Gang, with the assistance of Mid-Atlantic Division Engineering forces, will begin the installation of 12 strings of curve patch rail on the Harrisburg Line's Track Nos. 1 and 4 west of Paoli this week. The gang will utilize 55-hour weekend outages over the next five weeks to complete the project.

Transportation: As of April 12, 559 *Acela Express* trains operated with a total on-time performance of 97.1 percent since March 23. Only 16 trains were lost in 21 days thanks to the collaborative efforts of Transportation, Engineering and Mechanical forces in the Mid-Atlantic and Northeast Divisions.

Ridership and Revenue: Due to a further decline in travel as a result of the economic downturn, system-wide ridership and ticket revenue for March fell by 10 and 11 percent, respectively, compared to last year. Total ticket revenue for the month was \$127.2 million.

Message From Joe Boardman

Transportation: Effective June 1, all Train and Engine and On-Board Service employees who work on trains that cross the Canadian border will be required to have documents compliant with the Western Hemisphere Travel Initiative established by the U.S. Departments of State and Homeland Security. Acceptable travel documents include a U.S. passport, a U.S. passport card or a state-issued enhanced driver's license.

Government Affairs: Chief Financial Officer DJ Stadtler will testify on Amtrak's progress on American Recovery and Reinvestment Act projects at a House Transportation and Infrastructure Committee hearing on April 29.

Procurement: Vendors inquiring about projects funded by the American Recovery and Reinvestment Act should be directed to the new Procurement portal at <http://procurement.amtrak.com> for information and guidelines. Progress reports and information on ARRA projects can be found on the Intranet under "How We Work" → "Finance" → "Economic Stimulus Guidelines."

"Trainiac" Trivia

What is the name of the rail car that carried President Obama prior to his inauguration and will be on display in Washington on National Train Day?

- | | |
|-----------------|----------------------|
| a.) Georgia 300 | b.) Dover Harbor |
| c.) Cannon Ball | d.) Greenwich Harbor |

E-mail your answer to ecom@amtrak.com by noon EST on April 30. Respond correctly and you could win a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*.

Last week's winner was NAME, TITLE, who correctly answered that National Train Day performer Jon McLaughlin sang at the 2008 Academy Awards.

Last Thursday I set off on the *Capitol Limited*, beginning a three-week cross-country journey to visit some of our locations, meet employees and call on state partners. In Chicago on Friday, I talked to employees in a Block Training class and visited the yards again. I told employees about the upgrades we'll be making to the mechanical facilities there, such as improving the heating system and replacing the roofs on some buildings.

On Saturday, I met Sen. Tester of Montana for a brief press conference during the *Empire Builder's* dwell time at Havre. One of the reporters asked what I have seen change, and I said take a look at the faces of the employees right here on the "high-line," they represent our strongest competitive advantage, and they are encouraged with the support that the President, Vice President and legislators like Sens. Tester and Baucus.

As we traveled through Glacier Park people at the Izaak Walton Inn held up a banner saying "We love Amtrak." How wonderfully they have treated us on our way to Seattle — it really makes such a memorable trip to be around committed employees and those who depend on our service.

Today I'm in Seattle, meeting employees and touring the yard. Our employees here do an excellent job of maintaining Amtrak *Cascades* and Sounder commuter service equipment as well as servicing the *Empire Builder* and *Coast Starlight*. Improvements at the Seattle yard are long overdue and we remain committed to building a new facility there.

Tomorrow, I'll take the *Coast Starlight* to Oakland. I'm looking forward to visiting the Oakland Maintenance Facility on Wednesday, as well as the San Jose mechanical facility where our employees provide repair and maintenance service for the Caltrain commuter service. I understand I will also get a chance to meet the crews of the two trains that we had a close call with in Oceanside, along with a planned barbeque for employees in San Diego.

Friday will be spent in Los Angeles, greeting employees at the station and offices there. I'm eager to check out the yard, which is slated for a new preventive maintenance facility for the Superliner equipment our employees work on thanks to stimulus funds. I'm sure I'll find Saturday's visit to the call center in Riverside interesting and maybe even get to listen in on some of our calls.

I'll spend Employee Appreciation Day on Friday in LA. On that day, 39 locations across the system will be holding events designed to provide you information and resources to be safer, greener and healthier employee. Smaller locations are observing that day in other ways as well. I designated May 1 Employee Appreciation Day, because while we might celebrate our 38th anniversary on that day, it's the people behind Amtrak that are to be recognized. That will also be the day those eligible will receive the 60 percent of the retroactive pay.

My travels afford me the opportunity to meet many of you and to remind you that we need to adjust our collective thinking to go beyond getting through the day or week. We are in the midst of an historic and pivotal period for passenger rail — think big, because America expects big things from us.

Sincerely,

Joe Boardman
President and CEO

ATW 2/23

Dear Co-workers,

As I travel across the country, I often meet people who tell me about how much potential Amtrak has. The truth is, Amtrak has seen a promising future since 1971. I know you think you've heard it before, but I'd like to tell you why it's true in 2009.

Three major reasons: For the first time in a long while, we have some clear direction from Congress on the future of Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act is our blueprint and aims to make lasting improvements in passenger rail.

As part of the stimulus bill signed by the president last week, we will receive \$1.3 billion to make significant strides on capital programs. Among other things, we'll return to service 100 cars that are currently sidelined, completely replace the Niantic River Bridge in Connecticut, install Positive Train Control and make major Americans with Disabilities Act modifications to our stations. The law also provides money for states to make rail investments of their own, and they're coming to us for our expertise.

And we have an administration that is forward-looking when it comes to rail and is more likely than any other in recent history to be open to making additional investments in passenger rail.

All of these elements combine to help us realize great potential. But that's just it — it's only potential if we don't believe in the direction we're taking and make it happen. Sometimes I wonder if we've become conditioned to low expectations over the years, thinking that no one expects big things from Amtrak. Well, I expect big things from us. We need to open our collective hearts and minds to the Amtrak we know we can be.

That's where vision and leading by example come in. I'm not just talking about forward movement, I'm taking the steps. Just last week, I met with vendors about the Viewliners we need to purchase for our long-distance fleet. I want to replace the electric locomotive fleet and am seeking the money to do that. I want to electrify the railroad to Richmond and I'll be studying the cost estimates on that next week. And I listen — we have a great deal of talent and dedication, and our employees have great ideas and they need to be heard.

The time to harness our future is now and we're moving full steam ahead with renewed energy. I care a great deal about this place and I know you do, too. We need to embrace the opportunities that are before us and run with them — for us, for our customers and for our country.

Sincerely,

Joe Boardman

p.s. By the way, I know everyone wants to know what our list of capital programs is, I'll share it with you as soon as we've finalized it with the FRA — I wouldn't want to mislead you.

Engineering: The System Production Track Laying Machine begins its summer production season at Hunter Interlocking, west of Newark, N.J., installing nearly 5,000 concrete ties over the next four weeks.

Government Affairs: The Senate confirmation hearing for Joseph Szabo, a former United Transportation Union official and President Obama's nominee for FRA Administrator, will take place on April 22.

Employee Appreciation Day Reminder: Amtrak's 38th anniversary on May 1 has been dedicated as Employee Appreciation Day. Special events to help employees become safer, greener and healthier — personally and professionally — will take place at 39 locations across the country.

Be a Part of National Train Day

The second annual National Train Day is on May 9, and employee volunteers are needed to serve a variety of roles. Volunteers will receive a complimentary National Train Day polo shirt and refreshments.

To volunteer at a major event, send your name, department, shirt size and contact information to:

Chicago: Tracy Robinson, Robi3181@amtrak.com
 L.A.: Don Wong, WongD@amtrak.com
 D.C.: Saunya Connelly, ConnelS@amtrak.com
 Phil.: Kecia Babb-Jordan, JordanK@amtrak.com

"Trainiac" Trivia

Which one of this year's National Train Day performers sang at the 2008 Academy Awards?

- a.) Shemekia Copeland b.) Matt Costa
- c.) Rachael Yamagata d.) Jon McLaughlin

E-mail your answer to ecom@amtrak.com. Respond correctly and you could win a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*. *Hint: The answer can be found at NationalTrainDay.com.*

Last week's winner was Jim Gordon, foreman II, Beech Grove Maintenance Facility, who correctly answered that Philadelphia is hosting a major National Train Day event for the first time.

President Obama Unveils Strategy for High-Speed Rail

On April 16, Secretary of Transportation Ray LaHood and Vice President Biden joined President Obama to announce the administration's strategic plan for the development of high-speed rail (HSR). Obama said his plan builds on the highway and aviation development models used over the last century to create a clean, energy-efficient rail system that will fuel economic expansion through public-private partnerships.

The \$8 billion set aside for passenger rail in the American Recovery and Reinvestment Act will be used to jump-start the process by funding infrastructure projects that will improve existing service, corridor capital programs and HSR corridor development.

Amtrak is eligible to apply for ARRA funding for HSR corridor development independently and can apply for infrastructure projects in cooperation with states.

Grants for projects will be given to those that are ready to begin, have completed environmental and preliminary engineering work, and have an emphasis on near term job creation.

"Amtrak applauds the major investment and higher-speed passenger trains called for by the President," said President and CEO Joe Boardman. "We look forward to partnering with federal and state governments to advance new, faster and more frequent train service."

On-Board Recycling Begins Nationwide

An interdepartmental initiative to recycle newspapers, bottles and cans in every food service car across the system is on schedule to be completed this week. Passenger awareness campaigns will also launch aboard certain trains to promote the "greener" service.

"Earth Day is this week (April 22) so there couldn't be a more appropriate time for this project to come to fruition," said Roy Deitchman, vice president, Environmental Health and Safety.

The project is a joint effort between Environmental Health and Safety, Marketing and Product Management, Mechanical, Engineering, Transportation and Government Affairs.

Some food service cars have had existing trash receptacles re-labeled for recycling, while others have been fitted with custom-built containers. The cross-functional team found solutions to meet the needs of on-board crews while also meeting the requirements of FRA fire and safety codes.

"This is a major step forward in making Amtrak service greener and it took a tremendous amount of teamwork," said Chief Operating Officer William Crosbie. "It's great for the environment and it helps build passenger loyalty."

Message From Joe Boardman

Last Thursday I set off on the *Capitol Limited*, beginning a three-week cross-country journey to visit some of our locations, meet employees and call on state partners. In Chicago on Friday, I talked to employees in a Block Training class and visited the yards again. I'm sure I'll find Saturday's visit to the call center in Riverside interesting and maybe even get to listen in on some of our calls.

I'll spend Employee Appreciation Day on Friday in L.A. On that day, 39 locations across the system will be holding events designed to provide you information and resources to be a safer, greener and healthier employee. Smaller locations are observing that day in other ways as well. I designated May 1 Employee Appreciation Day, because while we might celebrate our 38th anniversary on that day, it's the people behind Amtrak that are to be recognized. That will also be the day those eligible will receive the 60 percent of the retroactive pay.

My travels afford me the opportunity to meet many of you and to remind you that we need to adjust our collective thinking to go beyond getting through the day or week. We are in the midst of an historic and pivotal period for passenger rail — think big, because America expects big things from us.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Transportation: Effective June 1, all employees who work on trains that cross the Canadian border will be required to have documents compliant with the Western Hemisphere Travel Initiative established by the U.S. Departments of State and Homeland Security. Acceptable travel documents include a U.S. passport, U.S. passport card or a state-issued enhanced driver's license.

Government Affairs: Chief Financial Officer DJ Stadler will testify on Amtrak's progress on American Recovery and Reinvestment Act projects at a House Transportation and Infrastructure Committee hearing on April 29.

Procurement: Vendors inquiring about projects funded by the American Recovery and Reinvestment Act should be directed to the new Procurement portal for information and guidelines at <http://procurement.amtrak.com>. Progress reports and information on ARRA projects can be found on the Intranet under "How We Work" → "Finance" → "Economic Stimulus Guidelines."

"Trainiac" Trivia

What is the name of the rail car that carried President Obama prior to his inauguration and will be on display in Washington on National Train Day?

- a.) Georgia 300 b.) Dover Harbor
- c.) Cannon Ball d.) Greenwich Harbor

E-mail your answer to ecom@amtrak.com by noon EST on April 30. Respond correctly and you could win a Trainiac prize package and have your photo featured in the May issue of *Amtrak Ink*.

Last week's winner was Michael Schmidt, engineer, Facility Maintenance, who correctly answered that National Train Day performer Jon McLaughlin sang at the 2008 Academy Awards.

Engineering: Bridge Rehab Gang R-905 is ahead of schedule and nearing completion of two bridge deck conversions on Track 2 of the Hudson Line in Castleton, N.Y. The gang is replacing the concrete bridge seats and backwalls, installing new high strength bolts, steel stringers, laterals and concrete deck slabs.

Government Affairs: The U.S. House of Representatives has passed legislation approving \$1.5 billion in Amtrak funding for FY '10 while the Senate is tentatively set to vote in September on a bill to provide \$1.57 billion. After that, members of each group will meet in a conference committee to reconcile the differences in each bill and authorize a final appropriation. Amtrak had requested \$1.84 billion plus \$144 million for ADA needs.

Beech Grove Completes First ARRA-Funded Car for Service in Midwest, West

Amtrak employees will join local and federal elected officials on Aug. 6 at the Beech Grove Maintenance Facility to commemorate the release of the first car rehabilitated with stimulus funding at the facility.

Superliner Sightseer Lounge #33016 is the first car restored for routes serving the Midwest and West using money from the American Recovery and Reinvestment Act. At a total cost of \$32 million, 21 long-distance passenger cars and 15 diesel P-40 locomotives will be returned to service over the next two years after being rehabilitated or overhauled at Beech Grove as a result of the infusion of stimulus funding.

To accommodate the increased workload, 108 employees have been hired at the facility, some of whom had been laid off by automotive and aviation manufacturers. Beech Grove now employs over 600 workers.

This project is in addition to ARRA-funded work being completed at the Bear Car Shops in Delaware. There, 60 Amfleet cars are being returned to service at a cost of \$59 million.

Safe-2-Safer Kicks Off This Week

Starting this week, employees throughout the company will be asked to complete a voluntary survey to support Safe-2-Safer, a new company-wide initiative to reduce safety and security risks. As described in the July 31 *Special Employee Advisory*, Safe-2-Safer will be rolled out on a regional basis over the next six months.

Most employees will be asked to complete the survey in paper form at their work location. Those employees with company e-mail accounts and Internet access may complete the survey online, the link to which will be emailed today. The surveys will be completed anonymously, and no answers can be traced back to any individual.

“For Safe-2-Safer to be effective, we need to know how employees think about safety and why. The surveys are being completed anonymously because we really want open and honest feedback,” said Vice President of Transportation Richard Phelps, who has been tapped to lead the initiative. Results of the survey will be published in October.

Safe-2-Safer will not replace any current safety practices, but aims to improve upon them by creating an environment in which employees at all levels work together to change at-risk behaviors to safe behaviors.

“Our senior management team and I are fully committed to making Amtrak safer and healthier. We’re seeking support and participation from our unions, our managers and you to get there,” said President and CEO Joe Boardman.

Safe-2-Safer will include training, ongoing coaching and greater accountability for supervisors, and broader employee engagement through peer-to-peer feedback. The initiative will be implemented in phases, first kicking off in the Mid-Atlantic region, then being rolled out in other parts of the country.

Employees in both operation and non-operating departments will benefit from a safer and more collaborative working environment. Research shows that companies that sustain excellent safety records also perform better overall.

For more information, please read the Q and A that accompanies this edition of *Amtrak This Week* (also available on the Intranet under “Safety.”)

Mechanical: The Mechanical department ended the month of July with only four FRA-reportable injuries system wide — the least monthly total ever for the department — thanks to the dedication of its employees. A majority of locations had zero injuries for the month.

Your Feedback is Needed

Remember to take the Safe-2-Safer survey by Aug. 24. Feedback from employees throughout the company is critical to the full implementation of the initiative. Most employees can anonymously complete a paper survey at their work location. Those who have an Amtrak e-mail address *and* Internet access can take it online by clicking the link in the upper left corner of the Intranet home page.

Important Note for Non-Operating Department Employees

If completing the survey online, employees in the following departments should select “Administrative/Support” as their department, and “HQ and Business Field Offices” as their geographic region:

Environmental Health and Safety
Finance
Government Affairs and Communications
Human Resources
Information Technology
Labor Relations
Law
Policy and Development
President’s Office

A Message from Joe Boardman

Dear Co-workers,

The U.S. House of Representatives has approved \$1.5 billion in funding for FY ’10, which begins Oct.1. The current Senate number, \$1.57 billion, will likely be taken up by the full Senate in September, and then the two will reconcile the figures for a final appropriation. These numbers fall short of our request and of what is authorized in the Passenger Rail Investment and Improvement Act (PRIIA). We asked for \$1.84 billion, plus \$144 million for ADA needs, and we’ll continue to advocate for that funding level. In the meantime, we’ll have to wait to see what the final outcome means for us, and I’ll keep you posted.

The shortfall (as it stands now) is disappointing, considering the momentum we’re experiencing with the support for rail and the infusion of American Recovery and Reinvestment Act (ARRA) funds. In addition to the investments we’re making with \$1.3 billion in ARRA funds, more than half the states in the country are seeking to partner with us as they compete for \$8 billion in stimulus funds for capital investments in high-speed and intercity service.

It’s an extraordinary time in our history, and we’re making enduring investments while pursuing opportunities that make strategic and business sense to position Amtrak as the provider of choice. Don’t kid yourself thinking that we don’t have competition — we do.

Slowly but surely, we’re also striving to create a more collaborative working environment and change the way we work together. Based on my travels across the system (if we haven’t met yet, I hope we will soon), I think most employees are ready for positive changes.

A year ago, we began Strategic Asset Management (SAM), which rethinks how we do business and optimizes the processes, systems and tools that support the business. A multiyear investment, SAM will result in consolidated and compatible systems for Finance, Procurement, Human Resources, IT and Operations. These will be lasting improvements that alter the way we work together for the better.

We’ve just introduced Safe-2-Safer, an approach to safety and security that encourages a more open dialogue among employees, supervisors and departments. We’re not replacing safety practices — we’ve got a good record (congratulations to Mechanical employees on the safety record in July!) but we need to be safer, creating a workplace where we can talk openly about our safety culture. It’s about all of us going home the same way we came to work, not about “gotcha” tactics. I’ve completed the survey, and I hope you’ve made your voice heard by completing it as well.

Sincerely,

Joe Boardman
President and CEO

Operations Changes: Due to continued track improvements in New Jersey, many *Acela Express*, *Northeast Regional* and *Keystone Service* trains will operate on a slightly later schedule beginning Aug. 17. Eastbound trains from Metropark, Newark International Airport and Newark N.J., will operate two to three minutes earlier.

Stimulus Update: Updated lists of stimulus-funded projects are posted on Amtrak.com under “Inside Amtrak” → “Other Reports.” The lists, which include projects recently approved by the FRA, are also available on the Intranet under “How We Work” → “Finance” → “Economic Stimulus.”

Station Improvement: Southwest Division Assistant Superintendent Joy Smith will help officially open a “Welcome Center” at the Ardmore, Okla., *Heartland Flyer* station this Saturday, Aug. 22, initiating six-day-a-week service by volunteer station hosts.

Safe-2-Safer Survey Closes Aug. 24

There is one full week left to complete the Safe-2-Safer survey, which closes on Monday, Aug. 24.

Don't miss this opportunity to share your perspective. Most employees can complete the paper survey at their work site, while employees who have an Amtrak e-mail address *and* Internet access can complete it online by clicking the link in the upper-left-hand corner on the Intranet home page.

New Amtrak Cascades Service Pilot Expands Service in Pacific Northwest

A second daily Amtrak *Cascades* roundtrip between Portland, Ore., Seattle and Vancouver, B.C., will begin as a pilot program on Aug. 19 and run through the conclusion of the 2010 Olympic Winter Games and the Paralympic Games at the end of March.

Northbound Train 516 is scheduled to depart Portland each day at 2:50 p.m., arriving in Vancouver at 10:45 p.m. Southbound Train 513 will depart Vancouver at 6:40 a.m. and reach Portland at 2:55 p.m.

“The new service is the result of a lot of hard work on the part of many employees throughout the company, particularly in negotiating an agreement that would work for all stakeholders,” said Pacific Division District Superintendent Kurt Laird.

Members of Transportation; Policy and Development; Amtrak Police and Security; and Government Affairs and Corporate Communications were involved in ironing out the details with the Canadian government, the Washington and Oregon Departments of Transportation, BNSF Railway and U.S. Customs and Border Patrol.

“More passenger train travel between Vancouver and Seattle is an important step towards helping boost cross-border tourism,” said British Columbia Minister of State for Intergovernmental Relations Naomi Yamamoto. “We’re very hopeful the expanded service will stay on the rails long past next March.”

In addition, Amtrak *Cascades* passengers will now benefit from the return of all of the route’s Talgo trainsets. Amtrak and WSDOT have completed refurbishment of the train interiors that began last summer.

Safe-2-Safer Survey Closes Today ***Thank You to Those Who Participated***

Today is your last chance to complete the Safe-2-Safer survey, which closes today at 5 p.m. PDT.

It's not too late if you fill it out today — most employees can complete the paper survey at their work site, while employees who have an Amtrak e-mail address *and* Internet access can complete it online by clicking the link in the upper-left-hand corner on the Intranet home page.

In addition, more than half of the 82 Safe-2-Safer focus groups scheduled over the course of a six-week period across the country have taken place.

Thank you to the thousands of employees across the system who chose to share their perspectives by completing the survey and/or participating in the focus groups held so far. The results from the survey and focus groups will be published in October.

Your input will help drive Safe-2-Safer, which aims to reduce injuries and bolster security by creating a more collaborative environment.

Operation Change: From Thursday, August 27 through Monday, September 7, *Empire Service* Trains 281, 283, 284 and 288 and *Maple Leaf* Trains 63 and 64 will make a special stop at the New York State Fair in Syracuse, N.Y.

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division Engineering forces, will be installing four wayside turnouts on the division in the coming weeks. This weekend the SES will be installing a #10 wayside turnout at the Mrs. Filbert's warehouse near Baltimore.

Information Technology: All non-agreement employees and contractors are reminded that they must complete the online Information Security Awareness Training course. Log on to www.elementk.com/login.asp/ to access the course. Enter your eight-digit SAP number followed by "amtrak" as the user name (ex. 12345678amtrak) and "amtrak1" as the password.

Benefits: Employees with questions about their benefits should call the Amtrak Benefits Service Center at 800-481-4887 or log on to www.amtrakbenefits.com for more information.

Northeast Regional Tickets to Lynchburg Available

Tickets are now available for the new *Northeast Regional* service to Lynchburg, Va., that begins Oct. 1.

Thanks to a new partnership with the Commonwealth of Virginia, Amtrak will extend current *Northeast Regional* service to offer a Lynchburg-Washington roundtrip. The agreement increases the company's number of state partners to 15.

The agreement also includes a fifth *Northeast Regional* roundtrip to Richmond, which slated to launch in December.

Amtrak's other current state partners are California, Illinois, Maine, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Washington, and Wisconsin.

Stimulus Updateance" → "Economic Stimulus."

-a-week service by volunteer station hosts.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development:

An Amtrak model train will circle the National Christmas Tree outside The White House this year thanks to a partnership with the National Park Service, National Park Foundation and National Christmas Tree Railroad. The 1:22.5 scale model includes two P42 locomotives, four Amfleet cars and a café car.

Marketing and Product Development:

The deadline for employees to purchase discounted tickets to select performances of the *Radio City Christmas Spectacular* in New York is Dec. 10. To order, call 866-858-0007 or visit www.radiocitychristmas.com and use promotional code "AMTRAK."

Host Railroads: Representatives from Amtrak will be in Missouri on Dec. 8 to attend the official opening of a new \$8.1 million, 9,000-foot side track on the Union Pacific Railroad used by *Missouri River Runner* trains.

Human Resources: Non-agreement employees are reminded that leave time must be entered in SAP as it is taken. Any 2009 leave that has not been entered must be submitted by Dec. 31 in order to accrue full vacation entitlement next year.

Thanksgiving Performance Sets All-Time Record

The final performance report for Thanksgiving week — Amtrak's busiest week of the year — shows a ridership increase of 4 percent over last year and a ticket revenue increase of 1 percent. The 685,876 trips from Nov. 22 - 30 generated \$44.1 million in ticket revenue, which is the best weekly performance in company history.

"Once again, our performance illustrates the growing popularity of passenger rail service, which is a credit to our front line employees who operate a great railroad," said Emmett Fremaux, vice president, Marketing and Product Development. "To outperform our previous record from 2008, when gas prices were much higher, is a great accomplishment."

Estimates from AAA predicted that overall holiday travel would rise slightly from last year's sharp drop of 25 percent, but that air travel would still decline another 6 percent.

The substantial ridership was managed through a collaborative effort between the Transportation, Engineering and Mechanical departments across the system as additional departures, extended train consists and schedule changes were implemented to maximize availability.

"On behalf of the entire executive team, I want to thank every employee for their dedication to safety and customer service during such a busy time," said President and CEO Joe Boardman.

Executives Participate in National Rail Conference

President and CEO Joe Boardman, Chief Financial Officer DJ Stadtler and Vice President of Policy and Development Stephen Gardner attended a conference on domestic high-speed rail manufacturing hosted by U.S. Secretary of Transportation Ray LaHood on Dec. 4.

Described as a preliminary discussion on investment opportunities to support high-speed rail, the conference included government officials, business leaders, union representatives and industry groups.

"This was a valuable opportunity to share ideas about what the future of train travel could and should look like," said Boardman. "We will do everything we can to move that vision forward while positioning Amtrak as the provider of passenger rail service in America."

Human Resources: Non-agreement employees must enter leave time in SAP as it is taken. Any 2009 leave that has not been entered must be submitted by Dec. 31. In addition, HR is currently developing a solution to accommodate various non-standard work schedules. Look for more information on this soon.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development: An Amtrak model train will circle the National Christmas Tree outside The White House this year, thanks to a partnership with the National Park Service, National Park Foundation and National Christmas Tree Railroad. The substantial ridership was managed through a collaborative effort between the Transportation, Engineering and Mechanical departments across the system as additional departures, extended train consists and schedule changes were implemented to maximize availability.

"On behalf of the entire executive team, I want to thank every employee for their dedication to safety and customer service during such a busy time," said President and CEO Joe Boardman.

Executives Participate in National Rail Conference

President and CEO Joe Boardman, Chief Financial Officer DJ Stadtler and Vice President of Policy and Development Stephen Gardner attended a conference on domestic high-speed rail manufacturing hosted by U.S. Secretary of Transportation Ray LaHood on Dec. 4.

Described as a preliminary discussion, the conference focused on investment opportunities arising from the economic stimulus program to create manufacturing jobs in the U.S. The group of government officials, business leaders, union representatives and other railroad industry groups also addressed ways to develop the country's high-speed and passenger rail network.

Safe-2-Safer Update from Richard Phelps

Dear Co-workers,

Since beginning the Safe-2-Safer program this summer, we have made a lot of progress thanks to your support. While many of you may have not yet witnessed the progress we're making, let me assure you that we have been successful in completing the first critical steps of this multiyear program.

Completing the survey and focus groups was a huge milestone and provided us with valuable insight that will help us maximize the effectiveness of Safe-2-Safer. (As a reminder, the full survey and focus group results are posted on the Safety page on the intranet.)

Additionally, all managers/supervisors within the Mid-Atlantic Divisions have completed their first coaching module and some have also started creating a personalized action plan for becoming better safety leaders. Managers in the Northeast Division and Mechanical shops are close behind and as we continue to roll-out systemwide, leaders within every division and department will follow suit.

At the heart of Safe-2-Safer is the Behavior Accident Prevention Process® (BAPP), which begins with local employee teams creating a comprehensive list of behaviors that can help prevent accidents and injuries that have occurred in that area. In locations where we have begun the Safe-2-Safer roll-out, I know many employees are excited about starting BAPP because they recognize how this new way of addressing risk reduction and relating to each other can yield benefits. For that reason we must be committed to doing it correctly rather than quickly.

BAPP hinges on effective *teams* of union workers *and* managers, so over the next several weeks, we will be meeting with every union's representative officers and soliciting from the General Chairmen their perspectives, contributions and insights to make BAPP as successful as possible. Our goal is to better understand the linkage between safety culture and unique safety issues confronting each craft so we can together identify the best fixes and ongoing procedures to accomplish our overarching goal of reducing risks and injuries.

We're committed to improve the way employees, management and labor leaders work together. The executive committee and I believe safety is not about statistics — it's about people. It's about being able to enjoy seasons such as this with our families and friends.

Safe-2-Safer has the potential to make our great railroad an even better place to work. I hope you're as encouraged as I am by what will be taking place and look forward to keeping you informed as we move forward. Please have a safe and happy holiday season.

Sincerely,

Richard Phelps
Safe-2-Safer Executive Sponsor
Vice President of Transportation

Real Estate: The Real Estate Development group recently closed on the purchase of the Sanford *Auto Train* facility property from CSX, a move that will greatly facilitate the ongoing capital projects at the station. This property had been under a short term lease with CSX.

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development:

To meet passenger demand for a higher level of food service, dining car service is being restored on the New York-Chicago *Lake Shore Limited* beginning Dec. 14. Refurbished Heritage Dining Cars will replace the Diner Light cars that have been part of the consist since 2007.

Amtrak Begins Greenhouse Gas Emissions Survey

Select employees may soon be contacted by the Environmental Health and Safety department, as Amtrak conducts a comprehensive greenhouse gas (GHG) emissions inventory. The inventory is part of Amtrak's membership in The Climate Registry (TCR), a non-profit organization founded to set consistent and transparent standards for businesses and governments to calculate, verify and publicly report their GHG emissions.

Amtrak joined TCR this year as part of its continuing effort to reduce its carbon footprint.

The inventory process will require an assessment of GHG emissions throughout its system including those from diesel and electric locomotives, passenger cars, maintenance equipment, stations, offices and other facilities.

Safe-2-Safer Update from Richard Phelps

Dear Co-workers,

Since beginning the Safe-2-Safer program this summer, we have made a lot of progress thanks to your support. While many of you may not yet be impacted by the progress we're making, let me assure you that we have been successful in completing the first critical steps of this multiyear program.

Real Estate: The Real Estate Development group recently closed on the purchase of the Sanford *Auto Train* facility property from CSX, a move that will greatly facilitate the ongoing capital projects at the station. This property had been under a short term lease with CSX.

Castleton/Fair Haven, Vt. Station?

TLM Production Results?

ARRA Equipment Refurb Update?

Operations Update:

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Awards: On Tuesday in (WHERE), the Committee for Employee Support of the Guard will present Amtrak with a Patriot Award in recognition of its strong support of employee participation in the Guard and Reserve through leadership and personnel policies. Acting Superintendent, Bear Car Shops, Lew Wood will accept the award on behalf of the company.

2010 Holiday Schedules

Amtrak will observe the following 2010 dates as holidays for non-agreement employees:

New Year's Day	Jan. 1
Martin Luther King, Jr. Day	Jan. 18
President's Day	Feb. 15
Memorial Day	May 31
Independence Day	July 4
Labor Day	Sept. 6
Veteran's Day	Nov. 11
Thanksgiving Day	Nov. 25

Because Christmas Day falls on a Saturday, current non-agreement employees will receive a third personal day to be used in 2010.

Holidays for agreement-covered employees are subject to each specific labor agreement. Employees should check with their union to be sure which holidays are included in each agreement. Some agreement-covered employees also receive personal holidays, the number of which varies by agreement.

For further information regarding holidays and personal days, please refer to the [Amtrak Policy and Instruction Manual](#), on the intranet under "Library"→"Policies".

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Employees Honored for Military Support

On Dec. 22 at Bear Car Shops, two Amtrak employees will be recognized for their commitment and service to the U.S. armed forces.

Superintendent Lew Wood will be presented with a Patriot Award by the Committee for Employee Support of the Guard, in recognition of his strong support of employee reservists and his leadership in facilitating their participation in the Guard and Reserve. Wood was nominated by Sgt. Michael Lawson, an Air National Guard reservist who is an electrician at Bear Car Shops.

Sgt. Lawson is also being recognized at the ceremony by the International Brotherhood of Electrical Workers with a letter of appreciation for his outstanding service to his country. Lawson is preparing for his third tour of duty in Iraq and Afghanistan.

"This award recognizes the Bear facility's and Amtrak's commitment to do our part to help and support the men and women who serve in the military and their families," said Wood. "The employees at Bear gladly accept the responsibility to give those protecting us everything they need when they are away and when they come home."

Dear Co-workers,

I want to tell you how proud I am that while the snow this weekend paralyzed the East Coast, Amtrak kept rolling thanks to the dedication of many employees. We're nearly back to normal and we still have some digging out to do, but I want to extend my sincere thanks and appreciation to each of you who took part in keeping Amtrak operating.

The historic snowstorm that blanketed the Mid-Atlantic and New England regions this weekend wreaked havoc on roads, airports and pretty much anything that moves. Record snowfall from North Carolina to Boston left many travelers stranded, as airports shut down. Washington's Metro system closed above-ground operations.

Although completely unrelated to the storm, across the ocean in France, Eurostar rail operations were suspended for the third day today due to technical failures associated with weather conditions, leaving a reported 90,000 travelers stranded this holiday season.

While Amtrak cancelled some service and experienced delays, trains were nonetheless operating on our railroad; although we experienced significant delays and problems when our trains left our territory south of Washington. It wasn't easy and we had problems along the way, but the point is that we were operating.

Despite equipment and infrastructure challenges of our own, we still carried thousands of people to their destinations when others couldn't move — and we did so safely. We accommodated numerous travelers who gave up on the airlines. We carried people home for the holidays while others are still waiting to dig out.

We operated because of the hard work of many employees on the front lines and behind the scenes. Employees who haven't been home for days, others who battled the weather to make it in, system operations, Engineering crews, Mechanical employees, station personnel, and on-board service crews — your dedication is impressive.

Having been raised in upstate New York, I know what snowstorms like this can do. It takes a hearty and committed group to persevere. I know we encountered operational problems over the road and we have plenty of opportunities for lessons learned. It takes everyone — from coach cleaner to signalman — to make this railroad run. And it's just not this event; we manage mudslides in the Pacific Northwest, hurricanes in the South, and other conditions that test our know-how and determination. It's that experience, expertise, fortitude and dedication that makes Amtrak unique.

Thank you for everything that you do and please have a safe and happy holiday.

Sincerely,

Joe Boardman
President and CEO

Real Estate:

Benefits: Amtrakbenefits.com will not be available from Dec. 14 through Jan. 3 in order to facilitate year-end processing activities. For questions or assistance regarding benefits during that time, call the Amtrak Benefits Service Center at 800-481-4887.

Marketing and Product Development:

Message from Joe Boardman

Dear Co-workers,

Many employees who responded to the Safe-2-Safer survey expressed uncertainty about which injuries should be reported and that at times they felt pressure to avoid reporting an injury. Some of that perceived pressure may stem from the strong emphasis Amtrak has put on the numbers over many years — the injury ratio, how many days an employee has worked injury-free — rather than the people and behaviors.

As a result of your feedback, and in line with Safe-2-Safer, we will no longer set safety goals in terms of a ratio, starting Dec. 31, 2009. While injury ratio will still be measured to comply with FRA requirements, our attention will be on the activities that prevent injuries.

With Safe-2-Safer, we're asking you to help us remove barriers to safe behaviors. The Executive Committee and I are committed to doing our part and discontinuing the long-held practice of measuring performance against the safety ratio and goal when it comes to our employees is one of the steps we're taking.

I care about people and reducing the causes of injuries, not about numbers. In fact, with the environment we're striving for through Safe-2-Safer, the numbers are likely to go up in the short run.

We're also in the process of developing a small set of metrics that focus on key injury prevention activities, as well as the lagging indicator of FRA injury rate. Instead of focusing on celebrating the number of days someone's been injury-free, we want to recognize employees who work hard to maintain a safe working environment and to learn from them what they've done to accomplish that.

Let there be no mistake: All injuries should be reported, and all managers first should be concerned with the welfare of the injured employee, and second be committed to learning how to prevent it in the future.

I sent out a letter to all employees about this last week — if you are a supervisor and for some reason have not shared the letter with your employees, please do so now. This is not a matter I or other members of the senior management team take lightly.

You'll be hearing more from me on all of these issues in the coming week and months. In the interim, I wish you and your families a happy and safe holiday season.

Sincerely,

Joe Boardman
President and CEO

ATW 2/23

Dear Co-workers,

As I travel across the country, I often meet people who tell me about how much potential Amtrak has. The truth is, Amtrak has seen a promising future since 1971. I know you think you've heard it before, but I'd like to tell you why it's true in 2009.

Three major reasons: For the first time in a long while, we have some clear direction from Congress on the future of Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act is our blueprint and aims to make enduring improvements in passenger rail.

As part of the stimulus bill signed by the president last week, we will receive \$1.3 billion to make significant strides on capital programs. Among other things, we'll return to service 100 cars that are currently sidelined, completely replace the Niantic River Bridge in Connecticut, install more Positive Train Control systems and make major Americans with Disabilities Act modifications to our stations. The law also provides money for states to make rail investments of their own, and they're coming to us for our expertise.

And we have an administration that seems to be building a legacy defined in part by the development of high-speed rail. I believe that this administration is more likely than any other in recent history to be open to making additional investments in passenger rail.

All of these elements combine to help us realize great potential. But that's just it — it's only potential if we don't believe in the direction we're taking and make it happen. Sometimes I wonder if we've become conditioned to low expectations over the years, surviving from year to year, and thinking that no one expects big things from Amtrak. Well, I expect big things from us. We need to open our collective hearts and minds to the Amtrak we know we can be. That is the safer, greener and healthier Amtrak I envision.

That's where vision and leading by example come in. I'm not just talking about forward movement, I'm taking the steps. Just last week, I met with vendors about how quickly they can deliver the Viewliners we need for our long-distance fleet. I intend to replace the electric locomotive fleet and am seeking the funding to do that. I want to electrify the railroad to Richmond and I'll be studying the cost estimates on that next week. And I listen — we have a great deal of talent and dedication; our employees have good ideas and they need to be heard.

The time to harness our future is now and we're moving ahead with renewed energy. I care very much about our future and I know you do, too. Together, we must embrace the opportunities that are before us and run with them — for us, for our customers and for our country.

Sincerely,

Joe Boardman
President and CEO

p.s. By the way, I know everyone wants to know the details of our proposed “stimulus” capital programs, I’ll share the list with you as soon as we’ve finalized it with the FRA — I wouldn’t want to mislead you.

Operational Change: *Crescent* Trains 19 and 20 are now operating on a regular schedule after operating on a modified schedule since Jan. 26, due to Norfolk Southern track work. The successful track work project is expected to lead to improved on-time performance and reduced slow orders.

Benefits Reminders: Employees are reminded to call the Amtrak Benefits Service Center at 800-481-4887, or log onto amtrakbenefits.com to discuss their benefits.

Human Resources: Nomination for the 2009 President’s Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at “Employees” → “Awards and Achievements” → “2009 PSSA Nomination Forms. PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggc@amtrak.com.

Operation Changes: Through July 9, the *California Zephyr* is operating on an alternate route from Denver to Salt Lake City and motorcoach service is being provided to and from Grand Junction and Glenwood Springs. Service is not available to or from Provo, Helper, Green River Junction, Granby or Fraser-Winter Park. This is the first of six periods through September 24 that the train will detour due to Union Pacific track work.

Human Resources: Revisions have been made to the Professional Development Policy and the Employee Training and Career Development Policy. For information, contact your local Human Resources office or visit the “What’s New” tab on the Intranet home page.

Station Improvement: A dedication ceremony will take place on July 10 for the new train station in Durham, N.C. The 10,000 square foot facility, which includes a new platform and canopy, is a joint project between the North Carolina DOT and the City of Durham. The station currently serves four daily Amtrak trains, with two more being added this fall.

Amtrak Joins North American Coalition on Greenhouse Gas Emissions

Amtrak is the first railroad to sign on as a member of The Climate Registry, a non-profit organization founded to set consistent and transparent standards for calculating, verifying and reporting greenhouse gas emissions among North American states, provinces, territories and Native Sovereign Nations.

As a member, Amtrak has committed to the organization’s comprehensive reporting standards, allowing the company to record and manage greenhouse gas emissions throughout the system — including those from rolling stock, maintenance equipment, offices and facilities — in a standardized format.

By better understanding its total greenhouse gas emissions footprint, the company will identify improvement opportunities, which should lead to reduced overall environmental impact and notable energy cost savings.

Joining The Climate Registry also helps Amtrak to be strategically prepared for future environmental regulation.

On June 26, the U.S. House of Representatives passed the American Clean Energy and Security Act, which, among other things, calls for broad improvements in energy efficiency and new emission standards for locomotives, ships and aircraft. The Senate is expected to consider the legislation later this summer.

“With the potential for enactment of this bill and others like it, we need to have an accurate, comprehensive understanding of our entire system’s environmental impact,” said Roy Deitchman, vice president, Environmental Health and Safety. “We now have access to tools, software and best practices that will help us progress much faster than if we attempted to do this independently.”

Amtrak’s first report will be for the 2010 calendar year and will include emissions data on all six internationally recognized greenhouse gases produced by diesel fuel usage, electricity consumption, refrigerants and other sources.

In 2003, Amtrak became a charter member of the Chicago Climate Exchange and committed to trim its diesel fuel emissions by 6 percent by 2010 — the largest voluntary commitment in the U.S. and the first by a transportation company. CCX, unlike The Climate Registry, is a “cap and trade” market that allows organizations to sell credits earned by exceeding its greenhouse gas reduction goals.

Operation Changes: Due to ongoing track work in the Northeast, schedule changes beginning July 13 will affect *Acela Express*, *Northeast Regional* and *Springfield Shuttle* services. In addition, *Empire Service* and *Maple Leaf* schedules will change due to CSX track work. *Adirondack*, *Empire Builder*, *Ethan Allen Express* and *Lake Shore Limited* schedules will be adjusted with the completion of Metro-North track work.

Expanded Service: Two new *Acela Express* departures will operate between New York and Boston on Sundays beginning July 19. Northbound Train 2258 will depart New York at 7:05 p.m. and southbound Train 2297 will depart Boston at 5:10 p.m.

Human Resources: The Federal Railroad Administration will be on-site in Washington, D.C., beginning July 21 to review the regulatory compliance of Amtrak's drug and alcohol programs. Employees may be asked questions by FRA field inspectors and should assist in any way possible. Amtrak's Drug and Alcohol Policy can be found on the Intranet under "Employees" → "Human Resources Health Services."

First Stimulus-Funded Car Returning to Service

Today, President and CEO Joe Boardman, U.S. Senator Tom Carper (D-Del.) and other elected officials were in Wilmington, Del., as the first car refurbished with funds from the American Recovery and Reinvestment Act departs Bear Car Shops on its way back to the active fleet.

"The real story today is about people – the Amtrak passengers who will ride in these rehabilitated cars and the workers who are doing a great job bringing them back to life," said Boardman, noting that the additional seating capacity on its trains will help connect families, further business relationships, and position Amtrak for expected future growth in ridership.

The car, Amfleet II Coach 25103, was built in 1982 but has been out of service since April 2005, when it was damaged in a rail yard accident in Florida. It is the first of 60 Amfleet cars that will be returned to service by early 2011.

The Amfleet I and II cars in the project are either being converted, rehabilitated from wreck status or undergoing a Level 3 overhaul. The cost per unit ranges from \$615,000 to \$1.4 million depending on the level of work being done.

Two additional ARRA-funded projects will put 15 diesel locomotives and 21 long-distance cars back in the fleet over the same time period. The combined cost of the three projects is \$91 million.

"An expanded fleet is a critical part of our ability to grow," said Vice President of Policy and Development Stephen Gardner. "We need these cars as we pursue new service in partnership with states and also to increase capacity along existing routes where demand exceeds what we can currently offer."

To meet the labor needs of refurbishing and overhauling nearly 100 cars in under two years, the Mechanical department has expanded its force by adding 160 new positions between facilities in Wilmington and Beech Grove, Ind. Competition was extremely high, as the company received 3,200 applications and conducted more than 400 interviews to fill the 160 positions.

Operation Change: Effective now through the end of the Track Laying Machine production season on the Northeast Corridor, Trains 190, 175 and 165 will honor all Shore Line East multi-ride tickets between Old Saybrook and New Haven, Conn., as part of the cross-honoring agreement with Connecticut DOT.

Engineering: The Production Team and New England Division Electric Traction and Signal teams have begun operating the second Track Laying Machine on the NEC. TLM Green, which is planned to install 79,000 concrete ties this year, is currently working west on Track 2 from Old Saybrook, Conn., toward New Haven.

Government Affairs: Amtrak officials will testify at a U.S. House of Representatives Transportation and Infrastructure Committee hearing on July 22 at 2 p.m. EST. The subcommittee on Economic Development, Public Buildings and Emergency Management will discuss a vision for the future intermodal use of Washington Union Station and surrounding community development. The hearing can be viewed live via Web cast at <http://transportation.house.gov>.

Corporate Communications: Look for the combined July-August issue of *Amtrak Ink* the first week of August.

Gulf Coast Service Report Submitted to Congress

Last week, Amtrak delivered its report to Congress detailing potential ways of resuming service between Orlando, Fla., and New Orleans, as required by the Passenger Rail Investment and Improvement Act. The report outlines three potential service options and their respective start-up costs, annual loss and implementation timelines.

Option 1 of the report is to restore the former tri-weekly *Sunset Limited*, Option 2 is an extension of the *City of New Orleans* on a daily schedule to Orlando using the same route as the former *Sunset Limited* and Option 3 is the establishment of a new stand-alone daily service between the two cities.

Option 1 could cost \$32.7 million and take 20 months to begin. Options 2 and 3 could both require up to 48 months to implement and projected startup costs of \$57.6 – \$96.6 million if new equipment is acquired. Capacity improvements that would be needed along this route have not been determined.

“As required by law, we have provided Gulf Coast service options to Congress, but we are not recommending any one option over the others,” said Vice President of Government Affairs and Corporate Communications Joe McHugh. “It’s up to Congress to determine which plan to pursue, if any, and provide the resources to make it happen.”

In addition to start-up costs, resuming service would require an investment of \$32 million for the installation of Positive Train Control. Options 1, 2 and 3 would also bring estimated annual operating losses of \$4.8 million, \$11.7 million and \$18.4 million, respectively.

The full report is available on Amtrak.com at “Inside Amtrak” → “Other Reports” or on the Intranet under “News” → “Legislative.”

Credit Card Information and Data Security Reminder

As part of its current data security program, Amtrak is in the process of upgrading its IT systems and employee training related to the storage and handling of credit card information in accordance with standards set by the Payment Card Industry.

New training modules and policy revisions are in development now, along with a plan to deploy handheld credit card machines for on-board use by conductors.

Look for more information to be distributed this week via OSA, Arrow and other channels. In the meantime, employees are reminded to carefully safeguard all passenger credit card information and avoid writing or printing the information whenever possible. See Credit Card Security Policy 8.10 for details on the Intranet under “How We Work” → “Finance” → “Policies.”

Operation Change: *Pere Marquette* Train 371 will operate one hour and 35 minutes earlier due to CSX track work outside of Grand Rapids, Mich. The schedule change begins today and is effective on weekdays only (except Aug. 5) through Sept. 10.

Operation Change: On Saturdays beginning Aug. 1 through Sept. 7, *Ethan Allen Express* Train 296 (instead of 292) will stop at Saratoga at 6:57 p.m. to better serve passengers traveling for the 2009 season at the Saratoga Race Course. Each roundtrip ticket includes motorcoach transfers to and from the track and a copy of the Post Parade program.

Amtrak Credit Rating Upgraded

On July 21, Standard & Poor's Ratings Services raised the company's corporate credit rating to A- from BBB+, the highest rating for Amtrak in 11 years.

In its research update, S & P referred to Amtrak's outlook as "stable," citing a review of its stand-alone credit profile, recent initiatives to improve operating performance and business prospects, and increased support from Congress.

The report also cited Amtrak's important role in the U.S. economy as a public service, as well as a "demonstration of increased consensus on Amtrak's strategic direction."

Moody's Investor Service currently has Amtrak's corporate credit rating at A2, the highest level ever for the company.

Notable Events Planned for Coming Months

A number of high points slated for the next couple of months will provide momentum going into FY 2010, which begins on Oct. 1, as the company continues to push toward its goal of being a safer, greener, healthier organization. Among other things, these ventures will expand the system, make information more accessible to customers and improve employee efficiency.

As the company continues to pursue high-speed rail development opportunities with states, Board Chairman Tom Carper was in Chicago today for the Midwest High Speed Rail Summit at the invitation of U.S. Senator Dick Durbin (D-IL), Illinois Governor Pat Quinn and Chicago Mayor Richard Daley. The summit aimed to establish formal working relationships among Midwest states for the benefit of passenger rail development.

Other upcoming highlights include the Aug. 3 availability of Amtrak service on Google Transit. After entering a starting location and destination, the popular search engine tool provides directions by either driving, walking or by mass transit, an option that will now include some Amtrak trains.

Also in August, the company will host celebrations to commemorate the 35th anniversary of the *Adirondack* as well as the 25th anniversary of the *Pere Marquette*, both on Aug. 5.

After Bear Car Shops released the first stimulus-funded car into service earlier this month, the Beech Grove Maintenance Facility will complete the first Superliner rehabilitated with funds from the American Recovery and Reinvestment Act. An event is planned there for Aug. 6.

In addition, two notable pilot programs are set to begin in the coming months. A second daily Amtrak *Cascades* roundtrip to Vancouver, B.C., is slated to start this fall and run through the completion of the 2010 Vancouver Winter Olympics in mid-February. The other is a pilot program to test handheld credit card machines on *Keystone Service* trains as part of the company's effort to streamline on-board transactions for conductors and improve data security. The machines will be deployed system-wide through next summer.

Finally, a new extension of *Northeast Regional* service from Washington, D.C., to Lynchburg, Va., will begin in October. As part of a partnership with the Commonwealth of Virginia, the daily roundtrip will make intermediate stops in Alexandria, Burke Center, Manassas, Culpeper and Charlottesville.

Operation Change: *Pere Marquette* Train 371, funded by the state of Michigan, will operate one hour and 35 minutes earlier due to CSX track work outside of Grand Rapids, Mich. The schedule change begins today and is effective on weekdays only (except August 5) through September 10.

Operation Change: On Saturdays and Sundays beginning Aug. 1 through Sept. 7, *Ethan Allen Express* Trains 292 and 296 will be adjusted to better serve passengers traveling to and from Saratoga Springs for the 2008 season at the Saratoga Race Course. Each roundtrip ticket includes motorcoach transfers to and from the track and a copy of the Post Parade program.

Amtrak Credit Rating Upgraded

On July 21, Standard & Poor's Ratings Services removed Amtrak from CreditWatch and raised the company's corporate credit rating to A- from BBB+, the highest rating in 11 years.

In its press release, S & P said that Amtrak's outlook is now "stable," citing a review of its stand-alone credit profile and increased support from Congress. The release also stated Amtrak has an "important" role for the U.S. economy.

End of Fiscal Year Brings Milestones, Opportunities

Numerous project completions and other milestones that are slated for the next two months will help Amtrak close out the 2009 fiscal year strong and provide momentum going into FY 2010 as the company continues to push toward its goal of being a safer, greener, healthier organization. Among other things, these ventures will expand the system, make information more accessible to customers and improve employee efficiency.

As the company continues to pursue high-speed rail development opportunities with states, Board Chairman Tom Carper was in Chicago today for the Midwest High Speed Rail Summit at the invitation of U.S. Senator Dick Durbin (D-IL), Illinois Governor Pat Quinn and Chicago Mayor Richard Daley. The summit aimed to establish formal working relationships among Midwest states for the benefit of passenger rail development.

Other upcoming highlights include the Aug. 3 introduction of Amtrak service on Google Transit. After entering a starting location and destination, the popular search engine tool provides directions by either driving, walking or by mass transit, where Amtrak trains will now be included as an option.

On Aug. 5, the company will host celebrations to commemorate the 35th anniversary of the *Adirondack* as well as the 25th anniversary of the *Pere Marquette*.

After Bear Car Shops sent the first stimulus-funded car back into service earlier this month, the Beech Grove Maintenance Facility will complete the first Superliner rehabilitation funded by the American Recovery and Reinvestment Act. An event is planned there for Aug. 6.

Two notable pilot programs are set to begin in the coming months as well. A second daily Amtrak *Cascades* roundtrip to Vancouver, B.C., is slated to start this fall and run through the completion of the 2010 Vancouver Winter Olympics in mid-February. Results of the pilot could eventually lead to a permanent second daily train.

Finally, as part of its effort to streamline on-board transactions for conductors and improve data security, the company will launch a pilot program to test handheld credit card machines on *Keystone Service* trains. Conductors will be able to process ticket purchases and upgrades without the need for paper records. The machines will be deployed system-wide through next summer.

Information Technology: All non-agreement employees and contractors will now be required to take the new Information Security Awareness Training course annually. For details and FAQs, visit the IT page on the Intranet under “How We Work” and click “IT Customers Menu” → “Information Security” → “Security Education.”

Employee Feedback: In a letter to employees last week, President and CEO Joe Boardman requested feedback regarding Employee Appreciation Day on May 1. You can send him an e-mail with your thoughts and suggestions to the Employee Communications mailbox at ecom@amtrak.com.

High-Speed Rail Workshops Conclude This Week

A nationwide series of workshops sponsored by the Federal Railroad Administration (FRA) concludes this week with events in Chicago on June 1 and Philadelphia on June 2.

The goal of the “High-Speed Rail Outreach Tour” is to lay the foundation for strategic partnerships to implement President Obama’s vision for national intercity passenger rail, which is supported by \$8 billion in stimulus funding.

Vice President of Policy and Development Stephen Gardner and other company representatives have been participating in each workshop to present Amtrak’s role and capabilities in future rail development. Topics of discussion include infrastructure requirements, operating funds, equipment needs and policy development.

Attendees include key stakeholders such as state departments of transportation, regional transit authorities, elected officials and labor groups.

“These workshops have given us tremendous insight into the states’ intercity and high-speed passenger rail development plans and ambitions. We’ve brought significant value to these conversations and our participation will make us better prepared to meet the states’ requests for help and partnership during the Recovery Act application process,” said Gardner.

According to Gardner, Amtrak’s primary objective is to be the operator of the national high-speed rail system. To that end, the company is seeking partnerships with states to work on projects that are mutually beneficial and provide growth opportunities.

Additionally, the workshops have provided a forum for the FRA to seek input from stakeholders as required in the American Recovery and Reinvestment Act prior to issuing formal guidance for high-speed rail development by June 17.

Over the last two weeks, five workshops have been held in: Charlotte, N.C.; Orlando, Fla.; Seattle; Sacramento, Calif.; and Houston.

June 8, 2009

Virginia Becomes Newest State Partner

Amtrak has reached an agreement with the Commonwealth of Virginia to operate its state-funded passenger rail service, bringing the company's portfolio of state partners to 15.

Amtrak will extend current service to offer daily trains from Washington, D.C., to both Lynchburg and Richmond, Va., beginning in October and December, respectively. Specific schedules and fares are still being finalized by the Virginia Department of Rail and Public Transportation.

"Amtrak is excited to establish new passenger rail service for Virginia and is seeking opportunities to partner with other states to provide additional rail transportation options," said President and CEO Joe Boardman.

Under the agreement, Virginia will pay Amtrak \$17.2 million over a three-year demonstration period.

In addition to Virginia, Amtrak currently has state partnership agreements with California, Illinois, Maine, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Washington, and Wisconsin.

Employee Feedback: In a letter to employees on May 26, President and CEO Joe Boardman requested feedback regarding Employee Appreciation Day. Please send an e-mail with your thoughts and suggestions to the Employee Communications mailbox at ecom@amtrak.com.

Message from Board of Directors Chairman and Vice Chairman

We just wanted to share some thoughts on our visit to our Ivy City facility in Washington last week.

It was a great opportunity to get a firsthand look at the conventional and High Speed Rail mechanical operation, to meet with General Superintendent Steve Alleman, Superintendent Rick Olson, Master Mechanic - High Speed Rail Dave Schramm, and other key staff. That was followed by a visit with some of our valued employees during a Block Training session — we really enjoyed our conversation.

We left Ivy City with a much better understanding of the complexity of the operation, some of the new operational and safety policies and how critical the cooperation and coordination between mechanical and operations is to the efficiency of the NEC operation. We also left with a greater understanding and appreciation of the work you do to ensure Amtrak operates on time with clean and safe equipment.

It is an exciting time at Amtrak, expectations are high and opportunities are many. Our visit to Ivy City was reassuring; we have the ability, the commitment and most important the workforce to meet the country's expectations for a safe and efficient passenger rail system. Together, we will exceed expectations.

Keep it up and work safely.

Sincerely,

Tom Carper
Chairman, Board of Directors

Donna McLean
Vice Chairman, Board of Directors

Virginia Becomes Newest State Partner

Amtrak has reached an agreement with the Commonwealth of Virginia to operate new state-funded passenger rail service from Washington, D.C., to both Lynchburg and Richmond, Va. The agreement increases the company's number of state partners to 15.

"Amtrak is excited to establish new passenger rail service for Virginia and is seeking opportunities to partner with other states to provide additional rail transportation options," said President and CEO Joe Boardman.

Amtrak will extend current *Northeast Regional* service to offer a Lynchburg-Washington roundtrip beginning in October with additional stops in Charlottesville, Culpeper, Manassas, Burke Center and Alexandria. Lynchburg is also served daily by the *Crescent*.

Richmond is presently served by four *Northeast Regional* daily roundtrips, and a fifth will be added in December as part of the agreement. Intermediate stops include Ashland, Fredericksburg, Quantico, Woodbridge and Alexandria. Other train service to Richmond includes *Carolinian*, *Palmetto* and *Silver Service*.

To make the new service possible, two additional trainsets must be added to the *Northeast Regional* equipment fleet. Virginia will provide up to \$8 million to fund the refurbishment of stored cars, which will be completed at the Bear Car Shops in Delaware. Required infrastructure improvements are also being made by Virginia for overnight storage and service of rolling stock in Lynchburg and Richmond.

Virginia has separately committed up to \$17.2 million in funding over a three-year demonstration period for operating costs.

Amtrak's other current state partners include California, Illinois, Maine, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Washington, and Wisconsin.

June 8, 2009

Virginia Becomes Newest State Partner

Amtrak has reached an agreement with the Commonwealth of Virginia to operate its state-funded passenger rail service, bringing the company's portfolio of state partners to 15.

Amtrak will operate daily service from Washington, D.C., on separate routes to both Lynchburg and Richmond, Va., beginning in October and December, respectively.

"This new agreement expands our partnerships with states to grow rail transportation at the corridor level," said Stephen Gardner, vice president, Policy and Development. "We are better equipped than any other organization to help states expand rail service efficiently and effectively."

Under the agreement, Virginia will pay Amtrak \$17.2 million over a three-year demonstration period. Specific schedules and fares are still being finalized by the Virginia Department of Rail and Public Transportation.

In addition to Virginia, Amtrak currently has state partnership agreements with California, Illinois, Maine, Michigan, Missouri, New York, North Carolina, Oklahoma, Oregon, Pennsylvania, Texas, Vermont, Washington, and Wisconsin.

Operational Changes: Beginning June 14 through July 11, *Maple Leaf* Trains 63 and 64 and several *Empire Service* train schedules will be adjusted due to track work being performed by CSX Transportation.

Employee Feedback: In a letter to employees on May 26, President and CEO Joe Boardman requested feedback regarding Employee Appreciation Day. Please send an e-mail with your thoughts and suggestions to the Employee Communications mailbox at ecom@amtrak.com.

Message from Board of Directors Chairman and Vice Chairman

Dear Amtrak employees,

We just wanted to send a brief note to you to share some thoughts after we made a visit to the mechanical facilities at Ivy City in Washington last week.

It was kind of a spur-of-the-moment visit, Seeing the conventional and High Speed Rail side of the operation first-hand blah.

We were lucky enough to visit with employees during a Block Training class, and heard their ideas for

While our visit was brief, we walked away feeling good about the collective mood there. It's a good time to work at Amtrak — we've got resources we haven't had and

Keep it up and stay safe.

Sincerely,

Operation Changes:.

Service Update: The corporate smoking policy has been updated to also prohibit the use of electronic smoking devices in any area that is designated as smoke free on board trains or within stations and offices.

Marketing and Product Management: A fare promotion is underway to celebrate the 10th anniversary of the *Heartland Flyer*. Discounts on adult and children's ticket are available until June 27 for travel through June 30.

Message from Joe Boardman

I learned and saw a lot on my recent trip around the system. One thing I learned is that we don't collaborate with each other very well at times. We can't afford this especially now because we are in an important moment in this company's existence. And what causes me the most concern is what a lack of communication can do to safety on the railroad.

Therefore, beginning today, we are shifting to a more collaborative approach to safety. Chief Operating Officer Bill Crosbie and I have asked Vice President of Transportation Richard Phelps to lead the day-to-day charge on this initiative. In the coming weeks, you'll be hearing more about how we're going to achieve that.

We'll be implementing a multiyear risk-reduction approach to safety and security that will involve every level of management — starting with me and the executive team — to your supervisor and front line employees, and then back up through management to me. The centerpiece of this involves training, coaching and accountability for managers and supervisors; and broader employee engagement to create a stronger and enduring safety and security culture.

We're not going to eliminate safety and security initiatives that work. We're not going to ease our focus on compliance. But safety isn't just a statistic, ***and we need to do away with a culture of finger-pointing*** and with relegating the concept of collaboration to lip service.

While there will be a particular focus on the operating departments, all departments are going to benefit. It's no coincidence that companies that sustain safety excellence are also high performing organizations.

This is not another "flavor of the month" program. It's time for a fundamental and enduring shift in the way we work together, and that won't happen overnight. But it's high time that it begin.

I am fully committed to Amtrak and I share your love of the railroad and what we do on behalf of the country every day. I am also dedicated to showing the company's commitment to you. A united front on safety and security is a very personal issue for me and it should be for you, too.

We're currently reaching out to the unions and hope to build a bridge on the foundation of this common objective. We'll also be meeting with the executive team next week. You'll be hearing more about this from me, Bill Crosbie and Richard Phelps in the coming months. Thank you for your support and for what you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

We are in the midst of the most dynamic period in Amtrak history, and together we're writing a new chapter in the Amtrak story.

While we are safer, greener and healthier, *one of our biggest obstacles is inconsistent collaboration within and between departments. In some ways, we collaborate seamlessly; in others, we really fall short.* And nowhere is collaboration more important than when it applies to safety and security.

Operation Changes:.

Service Update: The corporate smoking policy has been updated to also prohibit the use of electronic smoking devices in any area that is designated as smoke free on board trains or within stations and offices.

Marketing and Product Management: A fare promotion is underway to celebrate the 10th anniversary of the *Heartland Flyer*. Discounts on adult and children's ticket are available until June 27 for travel through June 30.

That's why I am personally committed to shifting to a more collaborative approach to safety. Chief Operating Officer Bill Crosbie and I have asked Vice President of Transportation Richard Phelps to lead the day-to-day charge on this initiative. In the coming weeks, you'll be hearing more about how we're going to achieve that.

We'll be implementing a multiyear risk-reduction approach to safety and security that will involve every level of management — starting with me and the executive team — to your supervisor and front line employees, and then back up through management to me. The centerpiece of this involves training, coaching and accountability for managers and supervisors; and broader employee engagement to create a stronger and enduring safety and security culture.

We're not going to eliminate safety and security initiatives that work. We're not going to ease our focus on compliance. But safety isn't just a statistic, and we need to do away with a *culture of finger-pointing and* with relegating the concept of collaboration to lip service.

While there will be a particular focus on the operating departments, all departments are going to benefit. It's no coincidence that companies that sustain safety excellence are also high performing organizations.

This is not another "flavor of the month" program. It's time for a fundamental and enduring shift in the way we work together, and that won't happen overnight. But it's high time that it begin.

I am fully committed to Amtrak and I share your love of the railroad and what we do on behalf of the country every day. I am also dedicated to showing the company's commitment to you. A united front on safety and security is a very personal issue for me and it should be for you, too.

We're currently reaching out to the unions and hope to build a bridge on the foundation of this common objective. We'll also be meeting with the executive team next week. You'll be hearing more about this from me, Bill Crosbie and Richard Phelps in the coming months. Thank you for your support and for what you do for Amtrak.

Sincerely,

Joe Boardman
President and CEO

Service Update: The corporate smoking policy has been updated to also prohibit the use of electronic smoking devices, or e-cigarettes, in any area that is designated as smoke-free on board trains or within stations and offices.

Marketing and Product Management: A fare promotion is underway to celebrate the 10th anniversary of the *Heartland Flyer*. Discounts on adult and children's tickets are available until June 27 for travel through June 30.

Instructions for Properly Handling Legal Documents

Individuals bringing lawsuits or complaints against Amtrak may attempt to have the summonses and complaints delivered to employees' offices by process servers or by mail. Employees are not authorized to accept these documents on behalf of Amtrak, and should not sign anything indicating that he or she has accepted any kind of legal document on behalf of Amtrak.

Instead, the server should be advised to serve the documents on the Corporate Secretary at Amtrak Headquarters, and any inquiries should be referred to the Law department.

If an employee comes into possession of any legal documents, they should be faxed immediately to the General Counsel in the Law department (ATS 777-2821 or 202 906-2821) and the originals sent via overnight delivery to the General Counsel, 60 Massachusetts Ave, NE, Washington, D.C. 20002. Employees should not hold onto or put off sending these documents to the Law department.

The entire "Handling of Legal Documents" policy is posted on the Intranet under "Library" → "Policies" → "Amtrak Policy and Instruction Manual."

Three Hearings on Future of Passenger Rail Take Place this Week

Senior Amtrak officials will testify at two House Transportation and Infrastructure Committee hearings as well as a Senate Commerce, Science and Transportation Committee hearing this week on topics related to the Passenger Rail Investment and Improvement Act and the American Recovery and Reinvestment Act.

Since the last House T&I hearing on April 29, Amtrak has disbursed about \$41 million in stimulus funding and hired nearly 400 new Engineering and Mechanical employees while making significant progress on implementing the required oversight systems.

New employees will support infrastructure projects along the Northeast Corridor and rolling stock programs at Beech Grove and Bear Car Shops. Over the next 90 days, the company expects to award \$190 million for projects that will be managed directly by Amtrak staff.

The House T&I Committee convened an "Expanding Passenger Rail Service" field hearing in Pittsburgh, Pa., today. PRIIA legislation requires Amtrak to conduct feasibility studies of increased train service in Western Pennsylvania and Senior Director of National State Relations Ray Lang provided a progress report to the committee.

In Washington, President and CEO Joe Boardman will appear before the Senate Commerce, Science and Transportation Committee on June 23 to discuss expectations and timelines for high-speed rail development in the U.S.

On June 25, Boardman will appear before the House T&I Committee to provide a 120-day progress report on Amtrak projects funded by \$1.3 billion in ARRA money.

"These hearings also provide a venue to get the message out that we are taking advantage of the growth opportunities before us," said Joe McHugh, vice president, Government Affairs and Corporate Communications.

Marketing and Product Management:

Children's meals are now available in *Acela Express* First Class, based on the recommendation of employees and passengers on the route. The Food and Beverage department worked with NEC Service Operations to create breakfast, lunch and dinner meals for children age 12 and under.

Station Improvement: A groundbreaking ceremony took place today at the Lancaster, Pa., station to officially begin a \$12 million renovation project funded by federal, state and county agencies. Upon completion in late 2010, *Keystone* and *Pennsylvanian* passengers will benefit from additional parking, retail and meeting space, exterior upgrades, new restrooms and a new HVAC system.

Agreement-Covered Employees to See Wage Increases in July

In accordance with union agreements, most agreement-covered employees will receive a 4.5 percent general wage increase, effective July 1, 2009.

Employees will see the increase first reflected in the paycheck for the pay period that includes July 1.

All eligible agreement-covered employees will receive the increase, except those represented by the Fraternal Order of Police. The FOP agreement includes a wage increase that will go into effect in October.

Monthly payroll deductions for benefit coverage will also change on July 1 as part of the labor agreements. Deductions for full time FOP members will decrease from \$166.60 to \$165.30 due to favorable experience in the FOP dental plan. Deductions will increase from \$165.15 to \$166.69 for full time members of all other unions. Part time employees' deductions will increase from \$9 to \$10.

A Message From Joe Boardman

One of the things that really struck me as I traveled around the system is how welcoming employees have been toward me.

I'd like to think that it's me they're happy to see, but I suspect that's not it — it goes deeper than that. Employees are recognizing that things are looking up for passenger rail and Amtrak and that I am committed to our transformation as we seize opportunities and demonstrate to the nation that we are forward-looking and experts in all things passenger rail.

People generally are happy when they feel like they're part of something that's moving forward — I know I feel that way — and I've come across many people who love the work they do and are proud to work here. For me, each day has its set of challenges, but I truly look forward to coming in every day and am exhilarated to know that we're writing passenger rail history. What a great time to be here.

In fact, we receive thousands of resumes every day from people who dream about working here. If you are a recent new hire, welcome aboard. Your skills and talents rose above those of thousands of applicants. If you're an Amtrak veteran, please help show our new hires the ropes and introduce them to the system. Maybe you didn't get the benefit of someone taking you under his or her wing or even give you a mere introduction, and that is a shame. But I ask you to show the strength of mind and heart to rise above that and to welcome them with open arms. Don't underestimate the power of that spirit — the tone you set will ultimately shape how people view Amtrak.

Together, we can make Amtrak a better place to work for all of us, whether you have 35 years of service or you're in your first year. We have to support each other, because the other real fact is that we have an aging workforce, which means we have to position ourselves as an employer of choice and attract good people to carry on the work of those who retire.

We're living in trying times. Around us, businesses are struggling; however, we are experiencing a renaissance in passenger rail investment. What the future holds for passenger rail is clearer today than in recent memory. We are fortunate to have that outlook and together, we're showing the nation that we've earned it.

Thank you for what you do every day and for your support.

Sincerely,

Joe Boardman
President and CEO

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division forces, has begun installing 10 new turnouts in North Penn Interlocking in Philadelphia. Each turnout will be installed on a 55-hour weekend outage through mid-July.

Government Affairs: Joseph Szabo was confirmed by the U.S. Senate as the 13th administrator of the Federal Railroad Administration on April 29. He most recently served as Illinois state legislative director for the United Transportation Union.

Benefits: Employees with questions about their benefits should call the Amtrak Benefits Service Center at 800-481-4887 or log on to amtrakbenefits.com for more information.

Special Recognition: After a water main break flooded tracks near Baltimore last week, Engineering, Transportation and Mechanical teams worked diligently to manage the disruption and restore service along the Northeast Corridor. "Once again, our employees overcame a challenge with skill and efficiency. Thanks to each one of you for your commitment and professionalism," said COO William Crosbie.

National Train Day is this Saturday

Communities across the country will celebrate National Train Day on May 9. Employees are invited to bring their families to join in the festivities.

Major Amtrak-sponsored events are taking place at Los Angeles Union Station, Chicago Union Station, Philadelphia 30th Street Station and Washington (DC) Union Station from 10 a.m. to 3 p.m. local time.

Congratulations to last week's Trainiac Trivia contest winner, Dianne Ross, manager, Uniform Programs. She correctly answered that President Obama rode in the Georgia 300 rail car prior to his inauguration. The car will be on display in Washington on National Train Day.

Message From Joe Boardman

Dear Co-workers,

I've spent the last 10 consecutive days on the road, visiting our facilities and meeting many of you, from Chicago to Seattle and Oakland and places in between.

I was in Los Angeles for Employee Appreciation Day. We had very good participation and I was very happy to see the health screening that was available for all, along with information on EAP and the support for Operation RedBlock. I'd like to see us find a way to do this every year if you think it was worth it. It's one of the ways Amtrak can show its commitment to you, and it's perfect for becoming "Healthier."

I visited the Riverside Call Center on Saturday and while it was planned for me to listen in on some calls, I found engaging our employees was a better use of my time. I spoke, and listened and I tried to answer questions. I found people who want to get the job done well for Amtrak. I am constantly humbled by how well I am received and treated by the men and women that work in this company. Thank you all for what you do day-in and day-out in your efforts to bring excellent service to our customers.

My journey continues this week with a visit to San Diego. Then I'll be taking the *Southwest Chief* from L.A. back to Chicago, in time to attend the National Train Day event there on May 9. In addition to entertainment and train displays, special exhibits at the events in Los Angeles, Chicago, Philadelphia and Washington, D.C., this year will showcase the positive role passenger rail plays in the economy and sound environmental stewardship. Our national spokesperson, "American Idol" judge Randy Jackson, will help draw national attention, as we aim to raise awareness of the benefits of passenger rail across the country.

But I think events like Employee Appreciation Day and National Train Day also help bring us all closer together, fortifying our sense of purpose. There are dozens of other NTD events being held in communities across the country and I strongly encourage you and your family to visit one of those locations if you can. Go to NationalTrainDay.com for information.

On another more serious note, I want you to know that we are closely monitoring the developments associated with the outbreak of the H1N1 virus and following recommendations from the Centers for Disease Control. We have activated our Pandemic Plan, and have taken some measures to help safeguard the well-being of our employees and passengers. One of the best things you can do for yourself, your co-workers and passengers is to stop the spread of germs by thoroughly and frequently washing your hands. It's an obvious point, but I can't overstate how important this is.

Our employees have a great deal of pride in the work they do and that energy can be felt as I travel across the country. I saw that pride in employees' eyes at the Employee Appreciation Day event in L.A., and I know I'll see it in the faces of employees at National Train Day. Harnessing that energy will drive us to a safer, greener and healthier Amtrak. Thank you for your support. Stay safe and healthy.

Sincerely,

Joe Boardman
President and Chief Executive Officer

Operation Changes: From May 11 through June 25, *Palmetto* Train 90 will operate up to two hours earlier than the published schedule on Mondays through Thursdays due to track work being performed by CSX Transportation.

Engineering: The Production Switch Exchange System, with the assistance of Mid-Atlantic Division forces, will be installing the 93/87 switch in North Penn Interlocking in Philadelphia this weekend.

Ridership and Revenue: System ridership and ticket revenue for April were down 2 and 5 percent, respectively, compared to last year. Long-distance trains performed best during the month, with an overall gain in ridership of 6 percent and a 7 percent improvement in revenue over last April.

Thank You National Train Day Volunteers

The second annual National Train Day on May 9 was a huge success, with tens of thousands of people attending the four major events held in Washington, D.C., Philadelphia, Chicago and Los Angeles, in addition to 130 events held nationwide.

“These events celebrated the past, present and future of trains in this country and helped us attract potential new passengers and educate the public about the benefits of rail travel,” said Emmett Fremaux, vice president, Marketing and Product Management. “It could not have happened without the hundreds of dedicated employees who teamed up to make it possible.”

New Timetable Now in Effect

The new 2009 Spring/Summer System Timetable that becomes effective today reflects minor nationwide schedule adjustments aimed at improving route performance.

The most notable change is the omission of several schedules for trains that operate in the Northeast including *Acela Express*, *Northeast Regional*, *Empire Service*, *Maple Leaf*, *Keystone Service* and *Vermont*.

These schedules were not published due to several planned schedule changes through September to accommodate track work being performed by Amtrak, CSX Transportation, Metro-North Railroad and New England Central Railroad.

During this period, up-to-date schedules will be posted on Amtrak.com, where they can be downloaded and printed. Passengers are being notified of the changes via station notices, on-board announcements and seat drops on certain routes.

Highlighted schedule changes in Chicago include an earlier departure of 15 minutes by *Capitol Limited* Train 30, while *Lake Shore Limited* Train 48 will depart one hour earlier.

In the south, *Piedmont* Train 73 will depart Raleigh, N.C., 10 minutes earlier than the previous schedule and Train 74 will depart Charlotte, N.C., 25 minutes earlier.

The *Texas Eagle* will depart St. Louis 35 minutes earlier, arriving in Chicago 15 minutes earlier to improve its meets with other trains that operate on the corridor.

Transportation: In honor of the men and women who have given their lives in service to the country, Amtrak will observe a nationwide moment of silence on Memorial Day, May 25, at 3 p.m. local time. Locomotive horns will sound at that time to mark the moment of silence.

Marketing and Product Management:

Amtrak is partnering with the state of Michigan to host Michigan Days on May 22 in Chicago Union Station, where representatives from the various cities and convention and visitors' bureaus provide passengers and employees with travel and tourist information on Michigan cities served by Amtrak.

Public Health: The Amtrak Pandemic Flu Contingency Plan is still in effect in response to the current outbreak of H1N1 (swine) flu. The company is continually monitoring the situation and all possible cases of H1N1 among passengers and staff. Employees are reminded to follow the Serious Communicable Disease Procedures outlined in service manuals.

Disney Train Tour Rolls Out This Week

Amtrak has partnered with Walt Disney Studios and HP to create a four-car interactive trainset that will make 40 stops from coast to coast promoting the upcoming animated film *A Christmas Carol*. The tour kicks off on May 22 in Los Angeles and concludes on Nov. 1 in New York City.

"This is a huge partnership opportunity that allows us to leverage the marketing power of Disney and the spectacular events for which they're known," said Emmett Fremaux, vice president, Marketing and Product Management.

The 16,000-mile "Disney's *A Christmas Carol* Train Tour" will utilize company locomotives, Train and Engine crews and other support staff. On-board technology is being provided by HP. Disney is reimbursing Amtrak for the operating costs.

Each stop will be from one to three days and will include a press conference and free program to simulate the new 3-D digital animation technology used in the movie. Guests will also get a 10-minute sneak preview of the movie, which is set to open in theaters on Nov. 6 and stars Jim Carrey. Amtrak will participate in the press events and be on site at each stop to promote rail service to attendees. Full information can be found at www.ChristmasCarolTrainTour.com.

Company Breaks Ground on Renovation of Sanford Auto Train Terminal

May 18 marks the beginning of the *Auto Train* terminal renovation in Sanford, Fla., with a groundbreaking ceremony attended by U.S. Rep. John Mica (R-FL) along with state, county and local officials as well as District Superintendent Fred Nardelli and other Amtrak employees.

Funded in large part by the American Recovery and Reinvestment Act, the project includes major upgrades to the station's interior and exterior, while an expansion will allow several of the current facility's stand-alone buildings to be consolidated under one roof.

Construction plans call for a new 600-seat enclosed waiting area along with a gift shop and café. Related above-ground and underground utility infrastructure as well as new paving, sidewalks and platform areas will also be constructed.

The new Sanford station, which is scheduled for completion in December 2010, will include a number of energy saving features in the lighting, HVAC and insulating systems.

Operation Changes: Beginning May 25 through June 18, southbound *City of New Orleans* Train 59 will operate on a later schedule from Memphis to New Orleans, due to track work being performed by Canadian National Railway.

Media Relations: Beginning this week, daily news clippings that are distributed via e-mail and available on the Intranet are now easier to use, better organized and more complete thanks to a new technology platform. View the latest media coverage on the Intranet at “News” → “News Clips.”

Information Technology: Laptop users that have experienced problems with outdated information in their Outlook address book can quickly correct the issue while connected to the network. On the Intranet, go to the IT page under “How We Work” and select “Customers Menu” → “Education and Training” → “News You Can Use” → “Microsoft Outlook Information.”

What Did You Think of Employee Appreciation Day?

Dear Co-Workers,

We dedicated the company’s 38th anniversary on May 1 to you as a way to say thanks for the time and effort you put in to running a great railroad. I want to thank everyone who attended, organized and planned an Employee Appreciation Day event — I appreciate your hard work and enthusiasm.

At events across the country, our goal was to provide activities, tools and resources to help you become a safer, greener, healthier employee both personally and professionally.

I’m interested in hearing what you thought about Employee Appreciation Day. What did you find beneficial? What would you change? How can we improve it?

I want to continue using these events to enhance communication throughout the company, so your feedback is very important to me. Please send me an e-mail with your thoughts to the Employee Communications mailbox at ecom@amtrak.com.

I look forward to hearing from you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Boardman', written in a cursive style.

President and CEO

New Fare Promotion Offered on NEC Services

A new *Northeast Regional* fare promotion introduced last week offers passengers up to 25 percent off the lowest current fare, with special \$49 fares between Washington-New York and New York-Boston. Tickets must be purchased 14 days in advance for travel between June 2 and Sept. 3.

“Since launching the promotion, we’ve received considerable media coverage and we’re supporting the promotion with an integrated advertising campaign,” said Emmett Fremaux, vice president, Marketing and Product Management.

Additionally, the current fare promotion for *Acela Express* service that began in February has been extended through Sept. 3 and also requires a 14-day advance purchase.

Government Affairs: Amtrak will continue operating at FY '09 federal funding levels through Dec. 18 under a second continuing resolution as Congress negotiates a final appropriations bill for FY '10. The previous continuing resolution expired on Oct. 31.

EIM Update: The Employee Information Management program concludes its road show to demonstrate upgrades to the SAP Employee Information Portal this week. Events are in Philadelphia on Nov. 2-3, New York on Nov. 4-5 and Boston on Nov. 6. For details, contact the project team at EIM@amtrak.com.

Benefits: Open enrollment continues through Nov. 13. To participate in the health care or dependent day care FSA or legal services plan in 2010, non-agreement employees must enroll at www.amtrakbenefits.com, even if they are enrolled in 2009. Call 800-481-4887 for more information.

PSSA Events: A PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held this week in Washington, D.C., on Nov. 3.

Energy Conservation Slogan Contest Winner Announced

Amtrak has unveiled its new energy conservation slogan: "Training a nation to conserve energy." The slogan was selected by a judging panel from more than 170 nationwide employee submissions to the Energy Conservation Slogan Contest conducted in October.

The winning slogan was submitted by Joseph Dannemann, project manager, Information Technology, in Washington, D.C. The slogan will be used in conjunction with Amtrak's national initiative to improve energy conservation throughout the company.

Safe-2-Safer Rollout Continues to Expand

Front-line employees and managers in the Mid-Atlantic, Northeast and Southern divisions, along with employees at the three Mechanical backshops, have begun the process of implementing Safe-2-Safer to reduce injury risks, while learning how to make current safety programs more effective.

The rollout of Safe-2-Safer is being conducted on a geographic basis and includes employees from all departments within a geographic region or division. Rollout began in the Mid-Atlantic in July, followed by the Northeast in September and Southern in October. The three Mechanical backshops, which are being treated as a separate region, began the rollout in September. Remaining divisions and Amtrak headquarters will kick off the program in the next several months.

"We're off to a great start," said Chief Operating Officer William Crosbie. "Employees I've talked to have been very enthusiastic about improving their safety and security through Safe-2-Safer and it's beginning to gain momentum as we roll it out across the system."

Within each division, the rollout process begins with all managers and supervisors receiving structured, confidential feedback on their leadership strengths and weaknesses, then working with a leadership coach to improve their managerial skills. Next, various teams of senior leaders, managers, supervisors and labor representatives begin a prescribed program called the Behavior Accident Prevention Process® (BAPP) to identify and reduce common injuries within the local area.

"These first few steps are critical to the success of Safe-2-Safer," said Vice President of Transportation Richard Phelps, the program's executive sponsor. "Safe-2-Safer is a multiyear initiative and it will take some time to see significant results, but this start lays the foundation for a successful program."

For more information and a Safe-2-Safer project calendar, visit the "Safety" page on the Amtrak intranet.

ARRA Ethics and Compliance

Employees will soon receive a letter from President and CEO Joe Boardman about Amtrak's involvement in the American Recovery and Reinvestment Act and the company's efforts to support the goals of the legislation by fueling the economy, putting people and resources to work, and serving as a model of ethical work practices.

Employees are asked to assist in this effort by ensuring transparency, honesty and clarity in Amtrak stimulus projects. Any suspected fraud, waste or abuse of ARRA resources should be reported to a manager or anonymously to the Stimulus Transparency Hotline at 866-908-7231. Anonymous concerns may also be reported online at www.reportlineweb.com/Amtrak.

Benefits: Open enrollment ends on Nov. 13. To participate in the health care or dependent day care Flexible Spending Account or legal services plan in 2010, employees must enroll at www.amtrakbenefits.com, even if they are enrolled in 2009. All other benefits will carry over unless changed or cancelled. Call 800-481-4887 for more information.

PSSA Events: A PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries was held yesterday in Philadelphia.

Marketing and Product Development: Discounted tickets are available for employees on select performances of the *Radio City Christmas Spectacular* in New York through Dec. 10 by calling 866-858-0007 or visiting www.radiocitychristmas.com. Use promotional code "AMTRAK."

Marketing and Product Development: Employees systemwide can now dial the Employee Broadcast System at 877-268-7251 and press 8 to hear suggested ways to deliver a wide variety of on-board service, conductor and attendant announcements. This is part of an initiative for the *Crescent* Route Performance Improvement project.

Safe-2-Safer Update: A calendar of events related to the rollout of Safe-2-Safer is now available on the intranet on the "Safety" page.

2010 Amtrak Wall Calendars Now Available

The 2010 Amtrak wall calendars, featuring a *Northeast Regional* train making its way southbound through the snow at Croydon, Pa., are now available. Distribution to Amtrak work locations started today and will continue for the next two to three weeks.

Additional calendars can be ordered through the Amtrak Online Store at <http://amtrak.ai-estore.com> or by calling Staples Promotional Products at 800-369-4257. The calendars are available in both 11"x 17" and 24"x 34" sizes at \$5 and \$10 each, respectively.

VRE Commissions Make Decision on Service Contract

The two parent commissions of the Virginia Railway Express — the Northern Virginia Transportation Commission and the Potomac and Rappahannock Transportation Commission — voted last week to continue with the commuter railroad's plan to transition operating and maintenance services from Amtrak to France-based Keolis Rail Services.

Amtrak has stated its commitment to providing high-quality service to VRE and its passengers for the remainder of the contract, which expires on June 30.

Flu Shot Reimbursement Reminder

The deadline for reimbursement of seasonal flu vaccinations for employees is Nov. 20. Upon getting a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
40 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1.

Operations Update: Temporary schedules currently in place for *Empire Service* trains are scheduled to be lifted on Nov. 18, with the completion of several bridge and track work projects along the route.

Stations Update: A new long-term parking facility on Amtrak-owned property opened today at the Gateway Transportation Center in St. Louis.

Transportation: On-Board Service employees have been issued a special lapel pin to increase awareness of recycling programs. The pin must be worn until April 30 on the right breast area of the employee's outermost garment. Crew bases needing additional pins should contact Carla Wright at wrightc@amtrak.com or ATS 728-3700.

Marketing and Product Development: A promotion for the new "Thomas & Friends: Holiday Express™" DVD is in place until Dec. 31. A series of counter cards, bookmarks and mini coloring books are available in over 90 stations and DVDs contain a Kids Ride Free insert.

Last Week for Flu Shot Reimbursements

The deadline for reimbursement of seasonal flu vaccinations for employees is Nov. 20. Upon getting a seasonal flu vaccination, employees may mail a copy of their receipt, along with their full name and eight-digit SAP ID number to the following address:

Amtrak Environmental Health and Safety
60 Mass. Ave. NE, 3W-104
Washington, D.C. 20002

The vaccination cost, up to \$40, will be reimbursed tax-free in the employee's paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1.

Service to Begin in Stanwood, Wash., This Week

Four Amtrak *Cascades* trains will begin serving Stanwood, Wash., on Nov. 21 as the community celebrates the grand opening of a new train station and its first passenger rail service since 1971. The \$5 million station was funded by the state of Washington.

"This is a great addition to the Amtrak system," said Kurt Laird, district superintendent. "Residents of the Stanwood and Camano Island communities now have direct rail access to the Pacific Northwest and the ability to connect with other parts of the country by train."

Officials from the state of Washington expect the service to boost local tourism and economic development, while providing another point-of-origin for travelers going to the 2010 Winter Olympics in Vancouver, B.C.

"This has been a long time coming, and it's going to make a huge difference for so many people in so many ways," said state Sen. Mary Margaret Haugen (D-Camano Island) in a press release issued last week. "Everywhere I go, people are talking about the train station."

The station grand opening celebration will begin at 9:03 a.m. with the arrival of Northbound Train 510. Amtrak officials, Sen. Haugen and Washington Transportation Secretary Paula Hammond are expected to attend.

Other trains serving Stanwood are Northbound Train 516, departing at 8:14 p.m.; Southbound Train 513, departing at 9:18 a.m.; and Southbound Train 517, which departs at 8:25 p.m.

Passenger rail service in Stanwood/Camano Island was last operated by the Great Northern Railroad 38 years ago.

2010 Amtrak Wall Calendars Now Available

The 2010 Amtrak wall calendars, featuring a *Northeast Regional* train making its way southbound through the snow at Croydon, Pa., are now available. Distribution to Amtrak work locations started last week and will continue for the next two weeks.

Additional calendars can be ordered through the Amtrak Online Store at <http://amtrak.ai-estore.com> or by calling Staples Promotional Products at 800-369-4257. A discount of 15 percent is available to employees for online purchases by using the promo code EMP15. The calendars are available in both 11"x 17" and 24"x 34" sizes at \$5 and \$10 each, respectively.

Message from Joe Boardman

Dear Co-workers,

This week, I'll be celebrating the start of my second year at Amtrak. It was just a year ago that I stepped foot on Amtrak property as president and CEO. It was a particularly exciting time — you could feel the energy, as we were in the midst of the busiest week of our year.

Amtrak Police and K-9 units patrolling, red caps assisting passengers, lead service attendants setting up food and beverage service, conductors welcoming passengers, the bustle of the crew base and the “two-to-go” sound of the horn as trains pull from the station — these are among the sights and sounds of Thanksgiving. Behind the scenes, coach cleaners, dispatchers, track gangs and all the other crafts work together to help provide a safe, reliable and enjoyable experience to the more than 660,000 people we expect to travel aboard Amtrak this week.

What I have always loved about the railroad is the dynamic rhythm that comprises each person's effort in making the operation work well. Each of you contributes to how well we do. It's at the most hectic of times that it is most important that we remain professional and welcoming, and operate reliably and safely. Many people will ride Amtrak for the first time this week, and they'll judge us based on their experience with us. We have a real opportunity to turn first-time riders into regular riders — take the initiative to help make that happen. Most of our passengers have travel options, and we must be thankful that they've chosen to make us part of their holiday experience.

This week, the spotlight will be on us and it will show the nation how Amtrak is an important part of the fabric of communities across the country. But the spotlight on Amtrak and passenger rail will continue to shine long after turkey dinner leftovers are consumed. We have a great deal of opportunities before us and we're operating in an increasingly competitive environment. Whether it's during Thanksgiving or any given Thursday, we must work together to show the nation what Amtrak can do.

In the midst of the bustle this week, take a moment to think about how you can help Amtrak shine. Consider the things for which you are thankful — your job, the camaraderie of your co-workers, your health and your family. Know that I value your hard work and dedication and am thankful for what you do this week and every week.

Please work safely and happy Thanksgiving.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe Boardman'.

Joe Boardman
President and CEO

Operations Update: The Thanksgiving Holiday Timetable for Northeast Corridor services will be in effect Nov. 24-30. All NEC, *Keystone Service* and *Pacific Surfliner* trains will require reservations during that time. Employee flash-pass privileges still apply, but pass riders must give up their seat to revenue passengers when standee conditions occur.

Operations Update: Effective Nov. 23, schedules will be adjusted for certain trains operating between Boston and New Haven, Conn., due to ongoing track work. Schedules will also change between Springfield, Mass. and New Haven with the conclusion of track work in this area.

Stations Update: The train station in Norman, Okla., celebrated its 100th anniversary with a series of events last week. The station is served by the *Heartland Flyer*, which celebrated its 10th anniversary this year.

Greener: Locomotive 2015 was placed back in service this week along the Capital Corridor after the engine was retrofitted with systems and components that reduce diesel exhaust by 45 percent.

PSSA Event: The final 2009 PSSA ceremony honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held on Dec. 3 in Jacksonville, Fla.

Diversity Initiatives: Amtrak's mandatory diversity training for non-agreement employees is now underway for FY '10. The first classroom training session for new employees or employees who have moved into a non-agreement position takes place on Dec. 1 in Washington, D.C. Full information can be found on the intranet under "Employees" → "Business Diversity" → "Educational Links."

Finance Establishes Group to Support Grant Funding

In order to provide improved fiscal and informational support and ensure compliance with appropriate regulations and policy related to grant funding, the Finance department has established a Grants Administration group.

This new group strives to take advantage of all available grant-funded opportunities while fulfilling the associated reporting regulations and audit requirements.

All grant applications must be processed through Finance. Contact Beverly Thorpe, senior director, Grants Administration, at ATS 777-2218 or beverly.thorpe@amtrak.com regarding active grants, pending grant submissions or programs/projects that may qualify for grant funding.

Employees Urged to be Mindful of Cold Weather Risks

As winter approaches and brings with it cold temperatures for much of the system, Amtrak is taking steps to educate employees on how to remain safe in cold-weather conditions and identify and address potential weather-related medical emergencies.

"When most people think of safety, they tend to think about slips, trips and falls, but fail to acknowledge the hazards of working in cold weather," said Chief Operating Officer William Crosbie.

Precautionary measures should be taken when working in cold temperatures such as dressing appropriately and trying to stay hydrated by drinking warm liquids. Ideal work wear includes multiple layers of clothing, including an insulated and waterproof layer, as well as gloves and a winter hat or hard hat liner. Headwear should also provide protection to the ears and face. Overshoes and/or insulated, waterproof boots are also extremely important for guarding against frostbite.

The temperature does not have to be below freezing to cause health problems. Initial effects on the body caused by cold temperatures may be mild, such as shivering or numbness, but can quickly escalate to more severe problems such as frostnip (a mild form of frostbite), frostbite and hypothermia.

After shivering or numbness, the first sign of more serious injuries include discolored skin — usually whitish, yellowish or grayish. If the skin begins to feel hard or waxy, frostbite may be setting in and medical attention should be sought immediately.

A person with possible frostbite should move to a warm area and gently loosen or remove tight clothing or jewelry that may restrict circulation. Warm the affected area slowly using body heat or warm breath, but do not rub the area or apply dry heat, as this may damage the tissue.

Symptoms of hypothermia include fatigue, confusion, stiff muscles and slurring of speech. This condition can quickly become life-threatening, so medical attention should be sought immediately. The individual should be moved to a warm area and wrapped in blankets. Body-to-body contact will also help to slowly raise the victim's body temperature. Monitor the victim's breathing and heart rate, as CPR may become necessary. Do not use electric blankets, hot water bottles or any other kind of artificial heat to warm the victim.

If the person cannot be moved out of the cold, cover them with dry clothing or blankets until help arrives. Providing warm liquids to drink is also helpful.

OSA 09-77, which was issued today, provides further details on working in cold weather. It can be found on the intranet under "Library" → "Service Standards."

Fiscal Year 2009 Closes with Major Fleet Project Accomplishment

Just prior to the end of the 2009 fiscal year, the Mechanical department achieved a major milestone by meeting its goal to have only four different types of Amfleet I cars in service. The multiyear effort toward standardization puts Amtrak in a position to further improve revenue management, customer satisfaction and operating efficiency.

“Realizing this accomplishment helps support the goals of several departments and I applaud the Mechanical department’s leadership and persistence,” said Chief Operating Officer William Crosbie. “The effort made by the men and women of the Mechanical department on this project reflects the kind of interdepartmental synergy and collaboration we aim for with every project throughout the company.”

At one point, 17 different Amfleet I car types were in service. Mechanical crews at Bear Car Shops have worked since 1999 to standardize Amfleet car interiors to one of four car types: Capstone Coach, Capstone Business Class, Dinette (all tables) and Club Dinette.

The current active Amfleet fleet totals 410 cars, which will grow thanks to additional overhauls being funded by the American Recovery and Reinvestment Act.

The previous lack of consistency meant that Revenue Management did not have accurate seating capacities for NEC trains until consists were finalized, sometimes at the last minute. As a result, inventory levels had to be estimated on the low side and available seats were sometimes left unsold. The standardization project also made all Amfleet I cars more accessible to passengers with disabilities by creating wheelchair space and installing ADA-compliant restrooms.

Additional benefits of the project include fewer types of parts required to be on hand for mechanical work and drastically more efficient fleet management planning.

The Horizon coach fleet is also undergoing a similar standardization project as ADA-compliant toilet modules are added and seating is adjusted to a standard 70-seat layout.

“We know that equipment consistency is a factor in customer satisfaction and we take pride in doing our part to make Amtrak travel better for our passengers,” said Chief Mechanical Officer Mario Bergeron.

Operation Update: Effective October 10, schedules for the *California Zephyr* will change following the completion of track work by the Union Pacific Railroad. All time added to schedules as part of the “get well plan” with UP over the past several years will be removed, successfully concluding a major phase in the collaboration between Amtrak and UP to improve performance on this route.

Operation Update: Beginning Oct. 6 through Oct. 11, several Amtrak *Cascades* trains will be adjusted due to three separate track projects being done by Union Pacific Railroad, BNSF Railway and Canadian National Railway.

Human Resources: Ceremonies honoring 2009 PSSA winners will begin this week as President and CEO Joe Boardman travels to events in Sacramento, Calif., on Oct. 6 and Los Angeles on Oct. 8. Employees with 30 and 35 years of service will also be honored.

Health Services: Free seasonal flu shots will be offered to employees on Oct. 8 from 11 a.m. to 12 p.m. at the Portland, Maine, crew base. Other on-site clinics are being scheduled across the system. Look for posters at respective work locations with specific dates and times.

Congress Passes Continuing Resolution for Federal Appropriations

Amtrak began FY '10 on Oct. 1 operating under a Continuing Resolution in the absence of an appropriations bill from Congress for the new fiscal year. Accordingly, Amtrak’s federal funding through Oct. 31 is set at the FY '09 level of \$1.49 billion. In the interim, a final appropriations bill for FY '10 is being negotiated between the Senate and House of Representatives.

In July, the House of Representatives passed legislation that would provide Amtrak \$1.5 billion for FY '10 while the Senate approved a bill in September providing \$1.57 billion.

FY '09 Ridership and Revenue Indicate Continued Performance Improvement

Amtrak announced last week that it carried 27.2 million passengers and generated \$1.6 billion in ticket revenue in the 2009 fiscal year. Despite lower gas prices and the economic recession that brought high unemployment and a decline in business travel, these totals represent the second-highest annual performance ever for the company.

“We should all be proud of what we were able to accomplish over the last fiscal year,” said Emmett Fremaux, vice president, Marketing and Product Management. “In terms of our own past performance and relative to others in the transportation industry, we did very well.”

Only last year’s ridership and revenue — which benefited from unusual external market forces such as gas prices topping \$4 per gallon — are higher than FY '09 results. Compared to FY '08, overall ridership declined by 5.4 percent and ticket revenue was 7.8 percent lower in FY '09.

“Comparing this year to last is not a good measure because of the unique circumstances in 2008,” said George Raed, chief, Market Research and Analysis. “A better gauge is to look at 2007 and preceding years. When doing that, we see a consistent growth curve since 2002.”

FY '09 ridership exceeded that of FY '07 by 5.1 percent. Ticket revenue was 5.3 percent higher.

Performance on the Northeast Corridor was most impacted by unfavorable economic conditions in FY '09. However, significant improvements in systemwide on-time performance led to increased demand in other parts of the system. Overall OTP for the year surpassed 80 percent, compared to 71 percent in FY '08.

Expansions on many corridors also resulted in new records for certain routes. The Chicago-St. Louis corridor realized a ridership increase of 6 percent over last year and the *Piedmont* benefited from a 3.8 percent increase. *Keystone Service* and the *Vermont* posted annual ridership gains of 2.7 and 1.9 percent, respectively.

Chairman Carper to Testify Before Congress This Week

Board of Directors Chairman Tom Carper will testify before the U.S. House of Representatives Transportation and Infrastructure Committee on Oct. 14 at 2 p.m. Eastern time on the challenges and opportunities for high-speed rail.

A live Web cast of the hearing can be viewed at <http://transportation.house.gov>. Chairman Carper’s testimony will be posted on Amtrak.com under “Inside Amtrak” → “Government Affairs” → “Congressional Testimony.”

Operation Update: On Oct. 15, the Jefferson Bus Line route between Milwaukee and Minneapolis will be available as Amtrak Thruway Service. The addition provides service to several cities that were not previously part of the Amtrak system.

Benefits: The open enrollment period for 2010 benefits will begin on Oct. 26 and continue through Nov. 13. Employees’ personalized enrollment package will be mailed to their homes later this month.

EIM Update: The Employee Information Management program kicks off its series of road shows with non-agreement managers and employees this week in Washington to demonstrate upgrades to the SAP Employee Information Portal. Events will take place in the Union Station Starlight Room on Oct. 14 from 9:30 - 11 a.m. and 2 - 3:30 p.m., and on Oct. 16 from 8:30 - 10 a.m. and 1 - 2:30 p.m.

Human Resources: All non-agreement employees are reminded to input their FY '09 leave in the SAP system. Also, completed Certificates of Compliance with the Conflict of Interest Policy must be turned in by Nov. 30.

Don't Forget: Flu Shot Voucher/Coupon Deadline is This Week

Employees who are unable to get their seasonal flu shot during the on-site clinic at their work location, or prefer to register for a flu vaccine voucher/coupon, must do so by **Oct. 15**. Due to limited quantities of the vaccine nationwide, vouchers should be used by **Oct. 22**.

Instructions on registering for a voucher/coupon can be found on the Intranet home page under “Employee Advisories” → “Oct. 2.”

Amtrak Submits Service Studies; Reaches PRIIA Milestone

On Friday, Amtrak delivered to Congress three feasibility studies on new or expanded rail service, as required by Section 224 of the Passenger Rail Investment and Improvement Act.

The Pennsylvania service study includes analysis of the following corridors: Cornwells Heights, Pa., to New York City; Princeton Junction, N.J., to Philadelphia; Harrisburg to Pittsburgh, Pa.; and the *Capitol Limited* route between Cumberland, Md., and Pittsburgh. The other two studies address the feasibility of reinstating two separate routes between Chicago and Seattle: the *Pioneer* route via Denver and Salt Lake City, as well as the *North Coast Hiawatha* route through southern Montana.

“PRIIA was only enacted a year ago, and completing several major studies accurately in a relatively short time is a big accomplishment,” said Stephen Gardner, vice president, Policy and Development. “We really appreciate the Operating departments, Government Affairs and Product Management for their help and hard work in delivering these reports to Congress by the Oct. 16 deadline.”

With assistance from respective states and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

“We looked carefully at a variety of alternatives for each route. We found some that have real potential and others that are not good options because of operating constraints or negative impacts to existing ridership and equipment needs,” said Gardner.

Services highlighted in the reports that Amtrak considers worthy of further consideration include an additional *Pennsylvanian* from Pittsburgh to New York and an extra roundtrip between Pittsburgh and Altoona, Pa. Additionally, the report proposes adding a stop in Rockwood, Pa., for the *Capitol Limited*.

The *Pioneer* and *North Coast Hiawatha* studies both conclude that the routes would enhance Amtrak’s network, generate significant ridership and produce public benefits. However, they would also require large capital expenditures and ongoing operating costs that would not be met by ticket revenue.

Also cross-border study Section 406

The full reports can be found on Amtrak.com under “Inside Amtrak”→“Other Reports”→“PRIIA Submissions and Reports.”

Engineering: Transformers and other equipment at the Landover, Md., electrical substation that helps power the NEC are being replaced this week as part of the NEC Re-Energization Program that began in 2002. The work at Landover is being performed four years ahead of schedule thanks to federal stimulus funding. Thirty-nine other substations will also benefit from stimulus funds.

Marketing: Employees once again have the opportunity for significant savings on select performances of the *Radio City Christmas Spectacular* in New York. Discounted tickets are available through Dec. 10 by calling 866-858-0007 or visiting www.radiocitychristmas.com. Use promotional code “AMTRAK”.

EIM Update: The Employee Information Management program continues its road shows with non-agreement managers and employees to demonstrate upgrades to the SAP Employee Information Portal. Events this week are: Chicago, Oct. 19-20; Oakland, Oct. 21; Riverside, Calif., Oct. 22; Los Angeles, Oct. 23. For details, contact the project team at EIM@amtrak.com.

Correction: Last week’s issue incorrectly listed the deadline for all non-agreement employees to return completed Certificates of Compliance with the Conflict of Interest Policy. All certificates should have been submitted by Oct. 15.

Flu Shot Clinics This Week

All

Amtrak Submits PRIIA Service Studies

On Friday, Amtrak delivered to Congress three feasibility studies on new or expanded rail service as required by Section 224 of the Passenger Rail Investment and Improvement Act, along with a plan to facilitate service into Canada during the 2010 Winter Olympics required in Section 406.

The Pennsylvania service study includes analysis of the following corridors: Cornwells Heights, Pa., to New York City; Princeton Junction, N.J., to Philadelphia; Harrisburg to Pittsburgh, Pa.; and an additional *Capitol Limited* stop in Rockwood, Pa. The other two studies address the feasibility of reinstating two separate routes between Chicago and Seattle: the *Pioneer* route via Denver and Salt Lake City, as well as the *North Coast Hiawatha* route through southern Montana.

“We could not have accurately completed several major studies by the Oct. 16 deadline without the help and hard work of the Operating departments, Government Affairs and Product Management,” said Stephen Gardner, vice president, Policy and Development.

With assistance from respective states and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

“We looked carefully at a variety of alternatives for each route. We found some that have real potential and others that are not good options because of operating constraints or negative impacts to existing ridership and equipment needs,” said Gardner.

The reports indicate that an additional *Pennsylvanian* train from Pittsburgh to New York and an extra roundtrip between Pittsburgh and Altoona, Pa., may be worth further consideration. It also shows potential benefit to a Capitol Limited stop in Rockwood, Pa.

The *Pioneer* and *North Coast Hiawatha* studies both conclude that the routes would enhance Amtrak’s network, generate significant ridership and produce public benefits. However, they would also require large capital expenditures and ongoing operating costs that would not be provided by ticket revenue.

Federal and state policymakers must determine if any of the service options should be pursued, and if so, provide the required levels of capital and operating funding to Amtrak. Upon such a decision, Amtrak will aggressively work with Federal and state partners to begin operating the service(s).

The cross-border study required in PRIIA Section 406 outlines recommended Amtrak *Cascades* service modifications along with security and customs enhancements that would make trip times between Seattle and Vancouver more competitive.

The full reports can be found on Amtrak.com under “Inside Amtrak” → “Other Reports” → “PRIIA Submissions and Reports.”

Engineering: Transformers and other equipment at the Landover, Md., electrical substation that helps power the NEC are being replaced this week as part of a program that began in 2002. Correction: Last week’s issue incorrectly listed the deadline for all non-agreement employees to return completed Certificates of Compliance with the Conflict of Interest Policy. All certificates should have been submitted by Oct. 15.

Deadline for Flu Shot Voucher Oct. 20

The deadline for Amtrak employees to register for a free seasonal flu shot voucher/coupon has been extended to 5:00 p.m. EDT time on Oct. 20. The deadline for redeeming the vouchers remains Oct. 22, and employees are strongly encouraged to take advantage of the offer as soon as possible due to shortages of the seasonal flu vaccine in some areas. The voucher program cannot be extended past Oct. 22, 2009.

Amtrak Submits PRIIA Service Studies

On Friday, Amtrak delivered to Congress three feasibility studies on new or expanded rail service as required by Section 224 of the Passenger Rail Investment and Improvement Act, along with a plan to facilitate service into Canada during the 2010 Winter Olympics, as required in Section 406. Amtrak has also delivered its Section 212(d) report on high-speed service along the Northeast Corridor.

Engineering: Transformers and other equipment at the Landover, Md., electrical substation that helps power the NEC were replaced last week as part of a program that began in 2002. The work at Landover is being performed four years ahead of schedule thanks to federal stimulus funding. Thirty-nine other substations will also benefit from stimulus funds.

With assistance from respective states and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

"We looked carefully at a variety of alternatives for each route. We found some that have real potential and others that are not good options because of operating constraints or negative impacts to existing ridership and equipment needs," said Gardner.

Federal and state policymakers must determine if any of the service options should be pursued, and if so, provide the required levels of capital and operating funding to Amtrak. Upon such a decision, Amtrak will aggressively work with federal and state partners to begin operating the service(s).

The cross-border study required in PRIIA Section 406 outlines recommended Amtrak *Cascades* service modifications along with security and customs enhancements that would make trip times between Seattle and Vancouver more competitive.

Amtrak's report required in PRIIA Section 212(d) outlines the infrastructure and equipment improvements necessary to provide regular high-speed rail service at specified trip times between Washington, D.C., New York City and Boston.

The full reports can be found on Amtrak.com under "Inside Amtrak"→"Other Reports"→"PRIIA Submissions and Reports."

Amtrak Submits PRIIA Service Studies

Amtrak recently delivered to Congress three feasibility studies on new or expanded rail service along with a plan to facilitate service between the United States and Canada during the 2010 Winter Olympics in Vancouver, B.C., and a report on high-speed service along the Northeast Corridor. These studies and reports were required in Sections 224, 406 and 212(d), respectively, of the Passenger Rail Investment and Improvement Act of 2008 (PRIIA) which reauthorized Amtrak last fall.

Two of the studies address the feasibility of reinstating former Amtrak routes between Chicago and Seattle: the *Pioneer* route via Denver and Salt Lake City and the *North Coast Hiawatha* route through southern Montana. A third study looked at a host of service options impacting Pennsylvania, including an analysis of service changes at Cornwells Heights, Pa. and Princeton Junction, N.J.; a study of additional service between Harrisburg and Pittsburgh, Pa.; and an additional *Capitol Limited* stop at Rockwood, Pa.

“We could not have completed several major studies without the help and hard work of the operating departments, Government Affairs, and Marketing and Product Management,” said Stephen Gardner, vice president, Policy and Development.

With assistance from the respective states, host railroads and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

“We looked carefully at a variety of alternatives for each route. We found some that have real potential and others which face significant challenges due to operating constraints, large capital investments, or negative impacts to existing services,” said Gardner.

Federal and state policymakers must determine if any of the service options should be pursued, and if so, provide the required levels of capital and operating funding to Amtrak. Upon such a decision, Amtrak will aggressively work with federal and state partners to begin operating the service(s).

The cross-border study required in PRIIA Section 406 outlines recommended Amtrak *Cascades* service modifications along with security and customs enhancements that would help to reduce trip times between Seattle and Vancouver, improve reliability and make the service more competitive.

Amtrak’s report required in PRIIA Section 212(d) outlines the infrastructure and equipment improvements necessary to provide regular high-speed rail service at specified trip times between Washington, D.C., New York City and Boston.

The full reports can be found on Amtrak.com under “Inside Amtrak” → “Other Reports” → “PRIIA Submissions and Reports.”

The voucher program cannot be extended past Oct. 22, 2009.

Amtrak Submits Feasibility Studies; Reaches PRIIA Milestone

Amtrak has fulfilled its requirement to provide Congress with three feasibility studies on new or expanded rail service as called for in Section 224 of the Passenger Rail Investment and Improvement Act.

The required Pennsylvania service study includes analysis of the following corridors: Cornwells Heights, Pa., to New York City; Princeton Junction, N.J., to Philadelphia; Harrisburg to Pittsburgh, Pa.; and the *Capitol Limited* route between Cumberland, Md., and Pittsburgh. The other two studies address the feasibility of reinstating two separate routes between Chicago and Seattle: the *Pioneer* route via Denver and Salt Lake City, as well as the *North Coast Hiawatha* route through southern Montana.

“PRIIA was only enacted a year ago, and completing several major studies accurately in a relatively short time is a big accomplishment,” said Stephen Gardner, vice president, Policy and Development. “We really appreciate the Operating departments, Government Affairs and Product Management for their help and hard work.”

With further assistance from respective states and transit agencies, the reports analyze infrastructure needs, projected yearly revenue, annual ridership forecasts, proposed schedules and an objective assessment of passenger rail needs for each corridor.

“We looked carefully at a variety of alternatives for each route. We found some that have real potential and others that are not good options because of operating constraints or negative impacts to existing ridership and equipment needs,” said Gardner.

Services highlighted in the reports that Amtrak considers worthy of further consideration include an additional *Pennsylvanian* from Pittsburgh to New York and an extra roundtrip between Pittsburgh and Altoona, Pa. Additionally, the report proposes adding a stop in Rockwood, Pa., for the *Capitol Limited*.

The *Pioneer* and *North Coast Hiawatha* studies both conclude that the routes would enhance Amtrak’s network, generate significant ridership and produce public benefits. However, they would also require large capital expenditures and ongoing operating costs that would not be met by ticket revenues.

Amtrak recommends in the reports that federal and state policymakers determine if intercity passenger rail service along each route should be reintroduced and if so, that they provide the required funding. Amtrak would then aggressively work with federal and state partners to restore service.

The full reports can be found on Amtrak.com under “Inside Amtrak”→“Other Reports”→“PRIIA Submissions.”

Engineering: Transformers and other equipment at the Landover, Md., electrical substation that helps power the NEC are being replaced this week as part of the NEC Re-Energization Program that began in 2002. The work at Landover is being performed four years ahead of schedule thanks to federal stimulus funding. Thirty-nine other substations will also benefit from stimulus funds.

Marketing: Employees once again have the opportunity for significant savings on select performances of the *Radio City Christmas Spectacular* in New York. Discounted tickets are available through Dec. 10 by calling 866-858-0007 or visiting www.radiocitychristmas.com. Use promotional code “AMTRAK”.

EIM Update: The Employee Information Management program continues its road shows with non-agreement managers and employees to demonstrate upgrades to the SAP Employee Information Portal. Events this week are: Chicago, Oct. 19-20; Oakland, Oct. 21; Riverside, Calif., Oct. 22; Los Angeles, Oct. 23. For details, contact the project team at EIM@amtrak.com.

Correction: Last week’s issue incorrectly listed the deadline for all non-agreement employees to return completed Certificates of Compliance with the Conflict of Interest Policy. All certificates should have been submitted by Oct. 15.

Flu Shot Clinics This Week

All

Ethics and Compliance: Information regarding the ethics and compliance hotline and reporting provisions of the American Recovery and Reinvestment Act will be mailed to all employees this week. Any fraud, waste or misuse of stimulus funds should be reported to the anonymous Stimulus Transparency Hotline at 866-908-7231 or www.reportlineweb.com/Amtrak.

Operations Update: The Fall 2009-Winter 2010 System Timetable takes effect today.

Engineering: The Production Communications & Signals team, with the assistance of Mid-Atlantic Division forces, will be completing the installation of three new microprocessor-controlled interlockings on the Harrisburg Line this week.

Stations Update: Effective today, trains serving New Buffalo, Mich., will stop at the new station at 225 N. Whitaker St. Two *Wolverine* trains and two *Blue Water* trains will serve the station each day, while the *Pere Marquette* will no longer serve New Buffalo.

EIM Update: The Employee Information Management program continues its road show to demonstrate upgrades to the SAP Employee Information Portal. Events this week are in Jacksonville, Fla., on Oct. 26 and Wilmington, Del., on Oct. 28-29. For details, contact the project team at EIM@amtrak.com.

Benefits: Open enrollment for 2010 benefits has begun and runs through Nov. 13. Changes to benefit elections can be made online at www.amtrakbenefits.com or by calling the Amtrak Benefits Service Center at 800-481-4887.

PSSA Events: PSSA ceremonies honoring award recipients and employees celebrating 30- and 35-year anniversaries will be held this week in Providence, R.I., on Oct. 27 and New York City on Oct. 28.

New Web Site Offers Improved Look and Functionality

On Oct. 25, visitors to Amtrak.com found a revamped Web site that makes booking train reservations online and finding information even easier.

Online ticket sales are expected to increase to more than half of all ticket sales as a result of the improved functionality, potentially generating as much as \$10 million in additional revenue. The project was a collaborative effort between the e-Commerce and Information Technology departments.

“The overhaul of the site is all about the customer,” said Senior Director, e-Commerce, Kathleen Gordon. “The goal is to provide customers with a site that is streamlined and easy to use in order to maximize ticket sales and customer loyalty.”

In addition to upgraded graphics, one of the most notable improvements to the site is a simplified booking process that combines the schedule search, reservation and train status functions into a single dynamic menu. When searching for trains, customers will now see the full day’s schedule, along with a pricing matrix that allows them to select a train based on the lowest fare or shortest trip time. The new shopping cart feature shows different legs of a reserved trip and itemizes the entire purchase.

Other highlights of the redesign include limited availability alerts when inventory of seats and sleeping accommodations are low, improved station pages that link to the interactive route map and an expanded promotions page. An upgraded mobile version of the site for smart phone users was also launched, with additional functionality to be added over the coming months.

Amtrak to Cover Cost of Seasonal Flu Shots for Employees

Late last week, Amtrak was informed by its flu vaccination program provider, AllOne Health, that on-site flu shot clinics at Amtrak work locations must be cancelled because AllOne Health was unable to acquire the necessary supply of vaccine doses. Amtrak will now reimburse employees up to \$40 if they choose to get a seasonal flu vaccination on their own. Employees may mail a copy of their vaccination receipt, along with their full name and eight-digit SAP ID number by Nov. 20 to:

Amtrak Environmental Health and Safety
40 Mass. Ave. NE
3W-104
Washington, D.C. 20002

The vaccination cost will be reimbursed tax-free in the employee’s paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1, and the program is only for Amtrak employees.

October 26, 2009

New Web Site Boasts Improved Look and Functionality

On Oct. 25, visitors to Amtrak.com found an overhauled Web site that makes booking train reservations online and finding information even easier.

Online ticket sales are expected to increase to more than half of all ticket sales as a result of the improved functionality, generating as much as \$10 million in additional revenue. The project was a collaborative effort between the e-Commerce and Information Technology departments.

“This overhaul of the site is all about the customer,” said Senior Director, e-Commerce, Kathleen Gordon. “The goal is to provide customers with a site that is streamlined and easy to use in order to maximize ticket sales and customer loyalty.”

In addition to upgraded graphics, one of the most notable improvements to the site is a simplified booking process that combines the schedule search, reservation and train status functions into a single dynamic menu. When searching for trains, customers will now see the full day’s schedule, along with a pricing matrix that allows them to select a train based on lowest fare or shortest trip time. The new shopping cart feature shows different legs of a reserved trip and itemizes the entire purchase.

Other highlights of the upgrade include limited availability alerts when inventory of seats and sleepers are low, improved station pages that link to the interactive route map and an expanded promotions page. An upgraded mobile version of the site for smart phone users was also launched and more functionality will be added over the coming months.

Operation Update: Schedules contained in the Fall 2009-Winter 2010 System Timetable take effect on Oct. 26.

Engineering: The Production Communications & Signals team, with the assistance of Mid-Atlantic Division forces, will be completing the installation of three new microprocessor-controlled interlockings on the Harrisburg Line this week.

Stations Update: Effective Oct. 26, trains serving New Buffalo, Mich., will stop at the new station at 225 N. Whitaker St. To provide access to more overall destinations, service will increase to two *Wolverine* trains and two *Blue Water* trains per day, while *Pere Marquette* trains will no longer serve New Buffalo.

EIM Update: The Employee Information Management program continues its road show to demonstrate upgrades to the SAP Employee Information Portal. Events this week are in Jacksonville, Fla., on Oct. 26 and Wilmington, Del., on Oct. 28-29. For details, contact the project team at EIM@amtrak.com.

PSSA Events: PSSA ceremonies honoring award recipients and 30- and 35-year employees will be held this week in Providence, R.I., on Oct. 27 and New York City on Oct. 28.

Amtrak to Cover Cost of Seasonal Flu Shots for Employees

Amtrak has been informed by its flu vaccination program provider, AllOne Health, that on-site flu shot clinics at Amtrak work locations must be cancelled because AllOne Health was unable to acquire the necessary supply of vaccine doses. Amtrak will now reimburse employees up to \$40 if they choose to get a seasonal flu vaccination on their own. Employees may mail a copy of their vaccination receipt, along with their full name and eight-digit SAP ID number by Nov. 20 to: Amtrak Environmental Health and Safety, 40 Mass. Ave. NE, 3W-104, Washington, D.C., 20002.

The vaccination cost will be reimbursed tax-free in the employee’s paycheck. Please allow three to four weeks for reimbursement processing. Reimbursement will be provided for seasonal flu vaccinations only, not H1N1, and the program is only for Amtrak employees.

Amtrak, TSA and Local Law Enforcement Conduct Major Rail Security Operation

For the second consecutive year, Amtrak partnered with the Transportation Security Administration and more than 120 local law enforcement agencies throughout 13 states and the District of Columbia in the Northeast last week to conduct Operation ALERTS (Allied Law Enforcement for Rail and Transit Security) — a joint and synchronized rail security operation.

On Sept. 9, Amtrak's police, K-9 and counterterrorism personnel, along with law enforcement and counterterrorism units from the various federal, state and local agencies patrolled 150 train stations between Richmond, Va., and Essex Junction, Vt., to conduct baggage screenings, on-board security sweeps and passenger identification checks during morning and evening rush hours.

"This operation demonstrates how we leverage the wide net of rail security that exists between Amtrak and its partner law enforcement and counterterrorism agencies," said President and Chief Executive Officer Joe Boardman. "We've substantially increased our security presence over the last few years by adding officers, K-9 teams and technology throughout the system, and I am proud of the work and professionalism the men and women of Amtrak's police and security forces exhibit every day."

Operation ALERTS serves as a surge to heighten visible security, while enabling law enforcement and counterterrorism personnel to become more familiar with rail stations and infrastructure. Fostering stronger inter-agency relationships helps enhance communication and emergency response, as well as expand counterterrorism capabilities.

"This kind of operation enhances the readiness and communication capabilities of hundreds of police and security officials stationed in some of the heaviest rail passenger areas along the Northeast Corridor," said Amtrak Police Chief John O'Connor. "Our law enforcement partners in this deployment represent first responder agencies that will protect and defend the railways during any type of emergency or potential threat."

Finance: All invoices incurred during FY '09 must be submitted to Accounts Payable by Sept. 15. Contact Gloria Johnson (ATS 728-1289), Mike Kelly (ATS 728-1502) or Jesse Wilson (ATS 728-1472) with questions or for more information.

Safe-2-Safer Survey Responses Top Goal

Amtrak received 10,604 responses to the Safe-2-Safer employee survey that was conducted Aug. 3-24, surpassing its goal of having 50 percent of employees participate. Additionally, the company is finishing the last of 82 focus groups that will have included more than 800 employees.

“On behalf of Joe Boardman, the board of directors and the executive committee, I want to thank everyone who took the time to share their thoughts on safety and security at Amtrak,” said Chief Operating Officer William Crosbie. “The feedback is incredibly valuable to making Amtrak safer. This initiative has started off with a lot of energy and we’re counting on each employee engaging in Safe-2-Safer.”

Safe-2-Safer is being rolled out on a geographic basis and should formally begin in each region by the end of the year.

Amtrak Prepares for Flu Season *Company To Offer Employees Seasonal Flu Vaccinations*

The Centers for Disease Control is anticipating a potentially severe flu season this year, with the spread of seasonal and H1N1 flu viruses over the course of the fall and winter.

Amtrak’s cross-departmental Pandemic Flu Task Force, along with the Environmental Health and Safety department and the Health Services department, are closely monitoring the situation. The company’s Pandemic Plan is currently being revised based on updated recommendations being made by the CDC and will soon be available to employees.

Amtrak’s Pandemic Flu Plan has been in effect since May, which includes guidance for handling and reporting potential H1N1 flu cases and leave policies.

“Though the health experts indicate uncertainty about the severity and extent of the flu season, we’re taking steps to be prepared to respond to an escalating pandemic,” said Chief Operating Officer William Crosbie. “But each of us has the power to minimize the impact of the flu. We can all take basic steps to avoid spreading germs by frequently washing our hands with soap and water or using a hand sanitizer, using a tissue or sleeve to cover coughs and sneezes, and not touching our eyes, nose or mouth.”

In addition, while the H1N1 vaccine is currently not available, Amtrak is planning to offer free seasonal flu vaccinations starting in October at most of its locations and/or possibly through a voucher system at clinics and pharmacies for those employees who wish to protect themselves from the seasonal flu. The CDC recommends a yearly seasonal flu vaccine as the first and most important step in protecting against seasonal viruses. Look for more information about the vaccinations in the coming weeks.

Employees who have flu symptoms (fever greater than 100 degrees Fahrenheit plus sore throat or cough) should stay home and notify their supervisor, who should then notify CNOC at 800-424-0217.

Coming announcements will provide detailed plans on flu season preparedness and response, including reminders about operating procedures and the revised Pandemic Flu Plan.

Finance: All invoices incurred during FY '09 must be submitted to Accounts Payable by Sept. 15 to be processed appropriately. Contact Gloria Johnson (ATS 728-1289), Mike Kelly (ATS 728-1502) or Jesse Wilson (ATS 728-1472) with questions or for more information.

Safe-2-Safer Survey Responses Top Goal

Amtrak received 10,604 responses to the Safe-2-Safer employee survey that was conducted Aug. 3-24, surpassing its goal of having 50 percent of employees participate. Additionally, the company is finishing the last of 82 focus groups that will have included more than 800 employees.

“On behalf of the board and the executive committee, I want to thank everyone who took the time to share their thoughts on safety and security at Amtrak,” said Chief Operating Officer William Crosbie. “The feedback is incredibly valuable to making Amtrak safer. This initiative has started off with a lot of energy and we’re counting on each employee engaging in Safe-2-Safer throughout the next couple years.”

Safe-2-Safer is being rolled out on a geographic basis and should formally begin in each region by the end of the year.

Preparing for the Start of Flu Season

Amtrak To Offer Employees Flu Vaccinations

The Centers for Disease Control is anticipating a potentially severe flu season this year, with the spread seasonal and H1N1 flu viruses over the course of the fall and winter.

Amtrak’s cross-departmental Pandemic Flu Task Force, along with the Environmental Health and Safety and the Health Services departments, are closely monitoring the situation. The company’s Pandemic Plan is currently being revised based on changes in the recommendations being made by the Centers for Disease Control (CDC) and will soon be available to employees.

Amtrak’s Pandemic Flu Plan has been in effect since May, which includes guidance for handling and reporting potential H1N1 flu cases and leave policies.

“We really don’t know how this will unfold, but we’re taking steps to be prepared to respond to an escalating pandemic,” said **Chief Operating Officer Bill Crosbie/Roy Deitchman, vice president, Environmental Health and Safety and who leads the task force.** “But the real power to minimize its impact lies with each of us individually. We can all take simple steps to avoid spreading germs by frequently washing our hands with soap and water or using a hand sanitizer, using a tissue or sleeve to cover coughs and sneezes, and not touching your eyes, nose or mouth.”

In addition, while the H1N1 vaccine is currently not available, Amtrak is planning to offer free seasonal flu vaccinations at most of its locations for those employees who wish to protect themselves from the seasonal flu, starting in October. The CDC recommends a yearly seasonal flu vaccine as the first and most important step in protecting against seasonal influenza. Look for more information about the vaccinations in the coming weeks.

Employees who have flu symptoms (fever greater than 100 degrees Fahrenheit plus sore throat, cough or runny nose) should stay home and notify their supervisor, who should then notify CNOC at 800-424-0217.

Coming announcements will provide detailed plans on flu season preparedness and response including reminders about operating procedures and the revised Pandemic Flu Plan.

Message From Joe Boardman on Security

Dear Co-workers,

September 11 eight years ago is still a vivid memory for me. Many of us have one connection or another to the loss of life at the World Trade Center. I was the Commissioner of Transportation for New York state at that time, and one of my offices was on the 82nd floor of the North Tower, I was not there at the time of the attack but dozens of the men and women of the Department were, and three were lost.

Ignatius Udo Adanga was born in Nigeria and after a long journey for the betterment of his family was a planner with the New York State Department of Transportation. Born in Haiti, Charles Lesperance was an amazing computer systems analyst with advanced degrees from Columbia and a love for cooking. See-Wong Shum was born and raised in Hong Kong and was a computer systems analyst whose restless spirit was continually seeking adventure, which he often found by backpacking through Europe, China or somewhere else. Another vivid memory was the loss of Kevin Reilly, a young NYC firefighter from Engine 207, at whose funeral I presided on behalf of the governor.

I hold all of these men in my memory about this time each year, and I am thankful for the commitment I see in the eyes, the actions and the behaviors I see in our own Amtrak Police, counterterrorism agents, and our K-9 explosive detection teams, as they do their best to help Amtrak be safe and secure.

Last week, Amtrak's police, K-9 and counterterrorism personnel partnered with the Transportation Security Administration and more than 120 local law enforcement agencies to conduct a synchronized rail security operation in 13 Northeast states and the District of Columbia.

This one-day exercise was a training opportunity as well as a manifestation of the broad security network in which Amtrak is a partner. My first priority is the safety and security of each person that works for, interacts with, or is a paying customer on one of our trains, and I am proud of the work our police and security personnel do every day to help protect us from those who would do us harm.

Sincerely,

Joe Boardman
President and CEO

A Message from Joe Boardman on Security

Dear Co-workers,

September 11 eight years ago is still a vivid memory for me. Many of us have one connection or another to the loss of life at the World Trade Center, Pentagon or Pennsylvania. I was the Commissioner of Transportation for New York state at that time, and one of my offices was on the 82nd floor of the North Tower; I was not there at the time of the attack but dozens of the men and women of the Department were, and three were lost.

Ignatius Udo Adanga was born in Nigeria and after a long journey for the betterment of his family was a planner with the New York State Department of Transportation. Born in Haiti, Charles Lesperance was an amazing computer systems analyst with advanced degrees from Columbia and a love for cooking. See-Wong Shum was born and raised in Hong Kong and was a computer systems analyst whose restless spirit was continually seeking adventure, which he often found by backpacking through Europe, China or somewhere else. Another vivid memory was the loss of Kevin Reilly, a young NYC firefighter from Engine 207, at whose funeral I presided on behalf of the governor.

I hold all of these men in my memory about this time each year, and I am thankful for the commitment I see in the eyes, the actions and the behaviors of our own Amtrak Police, counterterrorism agents and K-9 explosive detection teams, as they do their best to help keep Amtrak safe and secure.

Last week, Amtrak's police, K-9 and counterterrorism personnel partnered with the Transportation Security Administration and more than 120 local law enforcement agencies to conduct a synchronized rail security operation in 13 Northeast states and the District of Columbia.

This one-day exercise was a training opportunity as well as a manifestation of the broad security network in which Amtrak is a partner. My first priority is the safety and security of each person that works for or interacts with this company, or is a paying customer on one of our trains, and I am proud of the work our police and security personnel do every day to help protect us from those who would do us harm.

Sincerely,

Joe Boardman
President and CEO

Safe-2-Safer: Thank you to all employees who organized or participated in one of the 82 Safe-2-Safer focus groups that concluded last week. In total, more than 800 employees provided feedback and opinions about Amtrak's safety culture and programs.

Finance: Manual accounts payable accruals must be submitted via eTrax eAccrual by 3 p.m. eastern time on Monday, Oct. 12. It is recommended that departments do a final check of posted items before the deadline to account for any missed or duplicate accruals. Contact Mike Kelly (ATS 728-1502) with questions or for more information.

Health Services: Amtrak will soon be offering employees free seasonal flu vaccinations via on-site flu shots or vouchers. Details are still being finalized. Look for more information in the coming weeks.

Got a Slogan? Win Prizes.

Amtrak is creating a systemwide Energy Awareness Campaign and we need your help naming the program! The goal is to raise awareness about reducing energy consumption and costs, and conserving natural resources. The winner will be chosen by the Energy Reduction Subcommittee of the Amtrak Fuel and Energy Committee and will receive recognition and a prize package filled with great Amtrak items!

Slogans must:

- Include the word "Amtrak."
- Focus on conservation and energy reduction.
- Be short, clear and memorable.

Employees should submit entries via e-mail to AskEnvironmental@amtrak.com by Sept. 30 to be considered. The winner will be announced in October, which is Energy Awareness Month. More information can be found on the Intranet under "How We Work" → "Environmental" → "Energy Conservation Awareness."

Operation Update: The Pittsburgh, Pa., station will be open to connecting passengers only on Sept. 24-26 as part of the security measures in place for the G-20 economic summit being held there. Vehicular and pedestrian traffic in and around the station may be significantly restricted or prohibited by the Secret Service.

Station Improvements: The newly constructed station in Leavenworth, Wash., will begin serving *Empire Builder* Train 8 on Sept. 25 and a celebration hosted by the Leavenworth Chamber of Commerce is planned to mark the train's arrival. Train 7 will make its first stop at the station on Sept. 26.

Benefits: Fidelity Investments will now be delivering 401(k) quarterly account statements online at www.NetBenefits.com as part of its green initiative. Employees who wish to continue receiving paper statements should call Fidelity toll-free at 877-477-2685 or visit the site to change delivery methods. An announcement with more details will be mailed to all 401(k) participants this week.

Marketing and Product Management: Be sure to watch the "All Aboard Amtrak with Dr. Phil" episode, which is scheduled to air on Sept. 25. Check your local listings for The Dr. Phil Show broadcast times and station. The special episode was taped on Sept. 9 aboard an *Acela Express* train.

Health Services: Amtrak will soon be offering employees free seasonal flu vaccinations at many work locations and through vouchers to be used at local clinics and pharmacies. Details are still being finalized so look for more information in the coming weeks.

Engineering Completes Major Empire Line Project

The 10-month, more than \$6 million Empire Line Rock Stabilization Project was completed last week, resulting in the removal of 15 mph speed restrictions near the George Washington Bridge, just north of New York City. As a result, trains can now operate at 50 mph, which is expected to yield improved on-time performance for trains operating through the heavily congested area.

Speed restrictions were put in place due to unstable rock slopes that created the potential for debris on the track. Employees from I&C/Capital Projects Sunnyside Yard and other New York Division Engineering crews assisted a specialized construction contractor, Janod, in stabilizing the slopes by removing 407 tons of loose rock and vegetation, applying fiberglass-reinforced concrete, attaching more than 1,000 bolts, and installing nearly 90,000 square feet of wire mesh retaining walls. Additionally, measures were put in place to prevent ice buildup on the slopes.

Update on Proposed Amendment Requiring Amtrak to Carry Firearms

Last week, the U.S. Senate passed an amendment to the 2010 fiscal year Amtrak appropriations bill that would require the company to carry passengers' firearms in checked baggage. However, further legislative activity by both the Senate and House of Representatives must take place before this firearms provision could be sent to the President to be signed into law.

If the amendment becomes law, information about necessary procedures and timelines in connection with carrying out the provision will be issued.

On Friday, Amtrak issued the following statement in response to the proposed legislation:

"Amtrak believes this provision is neither fair nor practical. Our entire annual appropriation to support a national passenger rail system should not be contingent on a compliance deadline Amtrak has stated we cannot meet."

Operation Update: On Oct. 1, the historic “Great Dome” car will be at the Albany-Rensselaer, N.Y., station for a kick-off of its special six week run on the *Adirondack*, providing passengers a unique view of New York’s fall foliage season.

Free Flu Shots Begin Soon

As part of its commitment to employees and to creating a safer, greener, healthier company, Amtrak will offer free seasonal flu vaccinations to all employees over the coming weeks.

The voluntary program will be offered through on-site clinics and a voucher program. Look for a Special Employee Advisory later this week with program details, as well as flyers at work locations.

EIM Project Hitting the Road

Between Oct. 19 and Nov. 6, the Employee Information Management (EIM) program is embarking on a series of “road shows” to give non-agreement managers and employees the latest news on upgrades to the SAP Employee Information Portal (EIP).

At each stop, employees will preview the system and ask questions about the upgraded functionality, which includes new e-recruiting and e-learning modules and increased self-service capabilities. Formal training sessions are planned to be held closer to the launch next spring. Additional information about the road shows will be coming soon. For more information about EIM, contact the project team at EIM@amtrak.com.

The road show will be in Chicago on Oct. 19-20; Oakland on Oct. 21; Riverside, Calif., on Oct. 22; Los Angeles on Oct. 23; Jacksonville, Fla., on Oct. 26; Wilmington, Del., on Oct. 28-29; Philadelphia on Nov. 2-3; New York on Nov. 4-5; and Boston on Nov. 6.

Members of the Board of Directors Visit Facilities

Board of Directors Chairman Tom Carper and Vice Chairman Donna McLean visited three facilities in Wilmington, Del., last week to get a firsthand look at the work being done at the Wilmington Station, the Bear Car Shop and the Consolidated National Operations Center. The station and the Bear shop are both benefiting from American Recovery and Reinvestment Act funding.

In addition to observing the waterproofing of a track bed above the Wilmington station, Carper and McLean toured the renovation of the station. At Bear, they observed Level 3 overhauls being performed on Amfleet equipment and a Diner Light car in the making. After visiting the site of the future Centralized Electrification and Traffic Control (CETC) dispatching center that will be housed on the first floor of the CNOC next spring, the Chairman briefly visited System Operations on the second floor of the building.

“There are many improvements taking place across the system, and we appreciate the opportunity to meet some of the employees who are directly responsible for bringing these projects to fruition and to personally see the amount of work that goes into them,” said Chairman Carper. “One of the most impressive things we heard all day was the positive and supportive relationship between labor and management at Bear — Amtrak’s team must be strong to successfully meet the opportunities and challenges ahead of us.”

New Virginia Service Begins This Week

On Oct. 1, Amtrak will make its first roundtrip from Lynchburg, Va. to Washington, D.C., as part of its newest state partnership with the Commonwealth of Virginia. The service will operate as Trains 171 and 176, an extension of the Boston-Washington *Northeast Regional*.

In celebration of the service launch, the Commonwealth and Amtrak are partnering to operate the “Amtrak Virginia Inaugural Whistle Stop Tour” on Sept. 30. A special train carrying more than 200 invited guests and elected officials will depart Washington Union Station and make stops at every city along the route: Alexandria, Burke Centre, Manassas, Culpepper, Charlottesville and Lynchburg.

Each city will host a brief ceremony and ribbon cutting with remarks by President and CEO Joe Boardman and local civic leaders. Virginia Gov. Tim Kaine is scheduled to participate in events at Charlottesville and Lynchburg. The events are open to the public.

AMTRAK®

This Week

A Weekly Publication

AMTRAK®

Operational Changes: Due to Union Pacific track work, *Pacific Surfliner* Trains 799, 798 and 792 will not operate between San Luis Obispo and Santa Barbara until Jan. 14. Motorcoach service is available for travel at intermediate stops, except Lompoc-Surf, Calif. At Guadalupe-Santa Maria, northbound buses will drop off only.

Marketing and Product Management:

Effective immediately, Dayton, Ohio-based NCR is the new vendor contracted to develop a new Point-of-Sale (POS) system that automates the sales process and captures food and beverage sales data on trains.

Government Affairs and Corporate

Communications: Voting is now underway — through Jan. 23 — to name the Amtrak service between St. Louis and Kansas, Mo. Log on to www.morail.org to choose from *Missouri Rail Blazer*, *Missouri River Runner*, *River Cities Corridor*, *ShowMeMO* and *Truman Service*. The new name will be announced on Jan. 30.

Benefits: Due to the transition to WageWorks, you will be unable to use your commuter reimbursement account to cover January commuting costs. January's payroll deductions will be applied to February's commuting costs and you must pay your January expenses with after-tax dollars. Log on to www.wageworks.com or call 877-924-3967 by Jan. 10 to place your transit and/or parking order.

Transportation: Effective Jan. 1, the FRA accident/incident reporting threshold was increased to \$8,900, up from \$8,500, to adequately reflect rising labor and equipment costs since the reporting threshold was last computed in December 2007.

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under How We Work ⇒ Management Employee Business Travel.

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under How We Work ⇒ Management Employee Business Travel.

Operational Changes: Due to Union Pacific track work, northbound *Pacific Surfliner* Train 799 will terminate in Santa Barbara, Calif., and southbound Train 798 and Saturday and Sunday Train 792 are canceled between San Luis Obispo and Santa Barbara, Jan. 3 through Jan. 14. Motorcoach service is available for all travel in between except at Lompoc-Surf, Calif. At Guadalupe-Santa Maria, northbound buses will drop off only with no alternate southbound service at Lompoc-Surf.

Marketing and Product Management: Effective immediately, Dayton, Ohio-based NCR is the new vendor contracted to develop a new Point-of-Sale (POS) system that automates the sales process and captures food and beverage sales data on trains.

Government Affairs and Corporate Communications: Voting is now underway — through Jan. 23 — to name the Amtrak service between St. Louis and Kansas, Mo. Log on to www.morail.org to choose from *Missouri Rail Blazer*, *Missouri River Runner*, *River Cities Corridor*, *ShowMeMO* and *Truman Service*. The new name will be announced on Jan. 30.

Benefits: Due to the transition to WageWorks, you will be unable to use your commuter reimbursement account to cover January commuting costs. January’s payroll deductions will be applied to February’s commuting costs and you must pay your January expenses with after-tax dollars. Log on to www.wageworks.com or call 877-924-3967 by Jan. 10 to place your transit and/or parking order.

Transportation: Effective Jan. 1, the FRA accident/incident reporting threshold was increased to \$8,900, up from \$8,500, to adequately reflect rising labor and equipment costs since the reporting threshold was last computed in December 2007.

Operational Changes: On Jan. 19, Martin Luther King Jr. Day, all *Downeaster* trains will operate according to the normal weekday schedules, not the holiday schedule published in the Fall 2008/Winter 2009 System Timetable.

Benefits: The IRS limit for 401(k) pre-tax contributions is now \$16,500. Employees who reach 50 or older in 2009 and contribute the maximum allowed, may contribute an extra \$5,500 “catch up contribution” to the Plan on a pre-tax basis. The combined pre-tax, after-tax and company contributions are limited to the lesser amount between 100 percent of an employee’s pay or \$49,000.

CVA Reminder: All results of the Cultural Value Analysis surveys must be received via mail (c/o SAM Initiative, 501 Carr Road, Wilmington, DE 19809) or fax (703-738-7123) by Monday, Jan. 19.

Volunteers Still Needed in Washington, New York

To meet Inauguration Day staffing needs in Washington and New York, employees are encouraged to volunteer at their local station with the approval of their supervisor. For their participation in such an historic event, employee volunteers will receive a special commemorative button along with lunch at the end or beginning of their shift.

To volunteer at New York Penn, contact Mike Gallagher at GallagMk@amtrak.com or ATS 521-7278. To volunteer in Washington, contact Ken Wiedel at WiedelK@amtrak.com or ATS 777-3078.

Amtrak Readies for 2009 Inauguration

With the inauguration of the nation’s 44th president just over a week away, Amtrak is finalizing its operating plan to support what could be the most well-attended event ever in Washington, D.C. Preparations have been underway for months to safely accommodate a massive number of rail passengers to and from Washington Union Station on Jan. 20.

Significant preparation has also been put into operating a charter train that will carry President-elect Barack Obama and Vice President-elect Joe Biden from Philadelphia to Washington on Jan. 17.

“This is a monumental week for the country and Amtrak is playing a vital role — we should all be very proud of our involvement,” said CEO Joe Boardman. “As the nation’s greener, safer and healthier travel provider, it’s an honor to be chosen to transport them to Washington for the Inaugural activities and send a strong message about the importance of passenger rail in America.”

On Inauguration Day, an estimated 8,000 passengers per hour will arrive and depart on Amtrak, MARC and VRE trains during the morning and afternoon rushes. System Operations has augmented the company’s normal morning inbound and afternoon outbound capacity by 50 percent, by adding extra trains and adding cars where possible. MARC and VRE have both increased capacity as well.

Managing the flow of trains and people through Washington Union Station has been the responsibility of the Mid-Atlantic Division. Efforts have been complicated due to security requirements, but division personnel, Amtrak Police and the Office of Security Strategy and Special Operations have been working closely with local and federal law enforcement to create an effective plan that meets operational and security requirements.

“The inter-departmental collaboration in preparing for both events has been exceptional. Engineering crews, Mechanical employees and every other department have put in a lot of extra work. Everyone has been pulling in the same direction and giving it their all for weeks and months,” said Chief Operating Officer William Crosbie.

January 21, 2009

Inauguration Day Operations Conclude

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

Operational Changes: To help improve on-time performance, beginning Jan. 26, *Lincoln Service* Train 302 will operate five minutes later at all stations from St. Louis to Chicago. Also, *Sunset Limited* Train 1 will operate 30 minutes earlier from El Paso, Texas to Los Angeles.

Engineering: Cleanup of the West Class Yard in Hamden, Conn., is underway as the first step in creating a concrete tie staging area to support Track Laying Machine work in the New England Division. The cleanup is expected to be completed by mid-February.

Important Benefits Information: As required by law, Amtrak is submitting its qualified retirement plans to the IRS for review to affirm that the plans comply with applicable regulations. Plan participants are invited to submit comments on the plans' compliance. See attached documents for more details.

CVA Update: The deadline for submitting responses to the Cultural Value Analysis survey has been extended until Jan. 30. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, DE 19809 or fax to 703-738-7123.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Footage from the Whistle Stop Tour can be seen on the official White House Web site at www.whitehouse.gov.

Yesterday, three days after transporting Obama and Biden to Washington, the second phase of Amtrak's inaugural operation culminated as people from all over the world flooded the capital.

Thirty-six Amtrak trains operated to and from Washington yesterday. The Mid-Atlantic Division Commuter Services group also managed additional MARC and VRE trains transporting people to Washington. In total, roughly 8,000 passengers per hour came through Union Station during peak morning and afternoon travel.

A number of departments worked hand-in-hand with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen. Scores of employees slept in offices and in sleeping cars in Washington Monday night to ensure adequate staffing.

"I applaud the efforts and tireless work by all our employees over the past several months to ensure our passengers made it to and from the Inaugural celebration safely and with minimal disruption. We should all feel proud of our involvement in this historic event," said Chief Operating Officer William Crosbie.

January 26, 2009

Operational Changes: Beginning on Monday, Jan. 26, as part of the “Get Well Plan” negotiated by Amtrak and Union Pacific, *California Zephyr* Train 5 will now operate 30 minutes earlier between Elko, Nev., and Emeryville, Calif. Train 6 will operate 15 minutes earlier between Emeryville and Salt Lake City.

Government Affairs: On Wednesday, Jan. 28, President and CEO Joe Boardman is scheduled to testify before the House Transportation and Infrastructure Committee on the relationship between freight and passenger rail, Amtrak’s present and future roles, and company performance, benefits and needs.

In other news, former Illinois Rep. Ray H. LaHood was sworn in Friday as the new Transportation Secretary. He is one of two Republicans in the new Obama administration..

Important Benefits Information: The 2009 IRS allowable pre-tax contribution limits are now increased to \$120 per month for parking and \$230 per month for parking. Log onto amtrakbenefits.com to increase your elections.

Human Resources: In response to non-agreement and salaried agreement employees’ queries regarding incorrect vacation balances on their pay stubs, the issue is now resolved. However, with the roll-out of the Web-based Employee Self Service function on Feb. 9, the most accurate vacation balance information will be found online.

Final CVA Reminder: The deadline for submitting responses to the Cultural Value Analysis survey has been extended until **this Friday**. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, DE 19809 or fax to 703-738-7123.

New Campaign Aims to Eliminate Stop Signal Violations

To further advance Amtrak’s position as the nation’s greener, safer and healthier transportation provider, a new campaign is underway that aims to prevent stop signal violations. Initiated by the Transportation department, this comprehensive effort focuses on educating and rewarding Train and Engine employees who contribute to reaching the goal of zero stop signal violations during the fiscal year.

“We’re increasing awareness, training and testing to avoid incidents on the railroad,” said Steve Strachan, chief transportation officer. “Violating a stop signal could result in a collision or other accident that might cost people their lives, so we’re doing everything we can to make sure it doesn’t happen.”

Each quarter, the campaign will focus on improving situational awareness, restricted speed, communication and teamwork through informational posters and other printed materials, which will be distributed at crew bases across the country. Supervisors will also work with engineers and conductors on an individual basis to reinforce the material before testing employees at the end of each quarter.

A unique element of the campaign is the “challenge” coin that will be given to all T&E employees. “We want everyone to keep the coin on them as a reminder of what we’re trying to do,” explained Strachan. “We want it to build unity among crews and reinforce the importance of safety.”

As the year progresses, Strachan and his staff will host conference calls with Transportation supervisors throughout the system to evaluate the campaign and share best practices. At year’s end, Strachan hopes to recognize every division for reaching the goal of zero stop signal violations.

Feb. 17, 2009

Stimulus Bill Includes Funding for Amtrak Projects

Operational Changes: Beginning Feb. 16 through March 15, due to Union Pacific track work, passengers on some morning and early afternoon *Capitol Corridor* trains will be provided motorcoach service between Sacramento and Suisun/Fairfield, Calif., and trains will operate on the remainder of the route according to a modified schedule.

Engineering: The installation of 3,000 linear feet of new track panels on Track No. 2 in the South Tube in New York City is underway in 55-hour outages, with the Switch and Rail Gang replacing the old track and the High Speed Surfacing Gang surfacing the track and returning it to track speed for Monday morning service. This phase of work will be completed in early March.

Information Technology: Beginning Feb. 18, as part of the Payment Card Industry (PCI) compliance process, Arrow users are required to change their private ID when prompted on the sign-on page. For more information, contact the Help Desk at 800-772-HELP (4357).

Human Resources: Nomination for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2009 PSSA Nomination Forms. PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggerc@amtrak.com.

Funding Request Submitted to Congress

In other news, Amtrak submitted its annual Grant and Legislative Request to Congress today, outlining funding needs of \$1.84 billion for FY '10. The request consists of \$975 million for capital improvements, \$580 million for operating costs, \$264 million for debt service and \$21 million for the office of the Inspector General. The company also seeks an additional \$144 million not included in the \$1.84 billion for station accessibility improvements under the Americans with Disabilities Act. The request can be found online at Amtrak.com or the Intranet under "Legislative."

Amtrak will receive a total of \$1.3 billion as part of the economic stimulus bill that President Obama signed today to create jobs and spur economic activity. Of that figure, \$850 million is designated for projects that supplement capital activities for the repair, rehabilitation or upgrade of Amtrak's system, assets or infrastructure and for expanding capacity, including the rehabilitation of rolling stock. Another \$450 million is dedicated to investments in security. The funds must be awarded within 30 days of enactment by the Federal Railroad Administration in the form of grants.

Amtrak has identified 37 capital programs across its system that will create and preserve jobs and/or accelerate progress on Americans with Disabilities compliance, NEC infrastructure, rolling stock, stations, maintenance facilities and yards, customer service, technology and safety. Fourteen of the programs to be funded are in the Northeast Corridor, while 23 support system-wide initiatives that benefit, or are located in, other regions of the country. A separate plan is being finalized for the \$450 million in security investments.

The capital programs must be completed within two years of enactment. Amtrak is currently seeking FRA approval of its proposed programs through the grant agreement process, and expects to have agreements in place some time in March. More information on the projects will be forthcoming.

The legislation also makes available \$8 billion to states for high-speed rail development or other rail investments, in addition to other grants available for surface transportation projects, including rail.

"I am very happy that Congress has given us the chance to address some of our most pressing capital needs. The American Recovery and Reinvestment Act affords us an exciting opportunity to make long-term investments in passenger rail by taking on many of our backlogged construction, technology and rolling stock projects while promoting near-term economic activity," said President and CEO Joe Boardman. "We will put the money to good use."

This infusion of funding under the ARRA should not be confused with the annual appropriation Amtrak receives from the federal government and may not be used to augment the company's regular operating or capital budgets.

Message from the President and CEO

Dear Co-workers,

As I travel across the country, I often meet people who tell me about how much potential Amtrak has. The truth is, Amtrak has seen a promising future since 1971. I know you think you've heard it before, but I'd like to tell you why it's true in 2009.

Three major reasons: For the first time in a long while, we have some clear direction from Congress on the future of Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act is our blueprint and aims to make enduring improvements in passenger rail.

As part of the stimulus bill signed by the president last week, we will receive \$1.3 billion to make significant strides on capital programs. Among other things, we'll return to service 100 cars that are currently sidelined, completely replace the Niantic River Bridge in Connecticut, install more Positive Train Control systems and make major Americans with Disabilities Act modifications to our stations. The law also provides money for states to make rail investments of their own, and they're coming to us for our expertise.

And we have an administration that seems to be building a legacy defined in part by the development of high-speed rail. I believe that this administration is more likely than any other in recent history to be open to making additional investments in passenger rail.

All of these elements combine to help us realize great potential. But that's just it — it's only potential if we don't believe in the direction we're taking and make it happen. Sometimes I wonder if we've become conditioned to low expectations over the years, surviving from year to year, and thinking that no one expects big things from Amtrak. Well, I expect big things from us. We need to open our collective hearts and minds to the Amtrak we know we can be. That is the safer, greener and healthier Amtrak I envision.

That's where vision and leading by example come in. I'm not just talking about forward movement, I'm taking the steps. Just last week, I met with vendors about how quickly they can deliver the Viewliners we need for our long-distance fleet. I intend to replace the electric locomotive fleet and am seeking the funding to do that. I want to electrify the railroad to Richmond and I'll be studying the cost estimates on that next week. And I listen — we have a great deal of talent and dedication; our employees have good ideas and they need to be heard.

The time to harness our future is now and we're moving ahead with renewed energy. I care very much about our future and I know you do, too. Together, we must embrace the opportunities that are before us and run with them — for us, for our customers and for our country.

Sincerely,

Joe Boardman
President and CEO

p.s. By the way, I know everyone wants to know the details of our proposed "stimulus" capital programs, I'll share the list with you as soon as we've finalized it with the FRA — I wouldn't want to mislead you.

Feb. 23, 2009

Message from President and CEO Joe Boardman

Dear Co-workers,

As I travel across the country, I often meet people who tell me about how much potential Amtrak has. The truth is, Amtrak has seen a promising future since 1971. I know you think you've heard it before, but I'd like to tell you why it's true in 2009.

Three major reasons: For the first time in a long while, we have some clear direction from Congress on the future of Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act is our blueprint and aims to make enduring improvements in passenger rail.

As part of the stimulus bill signed by the president last week, we will receive \$1.3 billion to make significant strides on capital programs. Among other things, we'll return to service 100 cars that are currently sidelined, completely replace the Niantic River Bridge in Connecticut, install more Positive Train Control systems and make major Americans with Disabilities Act modifications to our stations. The law also provides money for states to make rail investments of their own, and they're coming to us for our expertise.

And we have an administration that seems to be building a legacy defined in part by the development of high-speed rail. I believe that this administration is more likely than any other in recent history to be open to making additional investments in passenger rail.

All of these elements combine to help us realize great potential. But that's just it — it's only potential if we don't believe in the direction we're taking and make it happen. Sometimes I wonder if we've become conditioned to low expectations over the years, surviving from year to year, and thinking that no one expects big things from Amtrak. Well, I expect big things from us. We need to open our collective hearts and minds to the Amtrak we know we can be. That is the safer, greener and healthier Amtrak I envision.

That's where vision and leading by example come in. I'm not just talking about forward movement, I'm taking the steps. Just last week, I met with vendors about how quickly they can deliver the Viewliners we need for our long-distance fleet. I intend to replace the electric locomotive fleet and am seeking the funding to do that. I want to electrify the railroad to Richmond and I'll be studying the cost estimates on that next week. And I listen — we have a great deal of talent and dedication; our employees have good ideas and they need to be heard.

The time to harness our future is now and we're moving ahead with renewed energy. I care very much about our future and I know you do, too. Together, we must embrace the opportunities that are before us and run with them — for us, for our customers and for our country.

Sincerely,

Joe Boardman
President and CEO

p.s. By the way, I know everyone wants to know the details of our proposed "stimulus" capital programs, I'll share the list with you as soon as we've finalized it with the FRA — I wouldn't want to mislead you.

Operational Changes: *Crescent* Trains 19 and 20 are now operating on a regular schedule after operating on a modified schedule since Jan. 26, due to Norfolk Southern track work. The successful track work project is expected to lead to improved on-time performance and reduced slow orders.

Engineering: This week, the New England Division Production Gang will complete the replacement of a 100-year-old, seven-foot by eight-foot rail top culvert with a new concrete slab culvert manufactured in-house in Midway/Groton, Conn.

Benefits Reminder: Employees are reminded to call the Amtrak Benefits Service Center at 800-481-4887, or log onto amtrakbenefits.com to obtain benefits information.

Human Resources: Nomination for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" ➡ "Awards and Achievements" ➡ "2009 PSSA Nomination Forms." PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggc@amtrak.com.

AMTRAK®

This Week

A Weekly Publication

AMTRAK®

Benefits: Individual parking and mass transit account balances as of Dec. 31 have been transferred from SHPS to WageWorks. If you have any questions or would like to confirm your mass transit or parking account balance, visit www.wageworks.com or call customer service at 877-924-3967.

Human Resources: All employees should have received their 2008 W-2 Wage and Tax Statement. If you have not received your statement, e-mail Payroll Operations at payroll@amtrak.com.

State Partnerships: Engineering, Transportation, Strategic Partnerships and Government Affairs personnel last week met with Connecticut DOT and Rhode Island DOT on upcoming plans for track work, including improvements to the Springfield Line.

LaHood Joins Board, Biden Resigns

U.S. Secretary of Transportation Ray LaHood was officially named to the board of directors by President Obama last Thursday after being confirmed by the Senate in late January. A native of Peoria, Ill., he is a 14-year veteran of the U.S. House of Representatives, where he served on the Transportation and Infrastructure committee and later the Appropriations Committee.

Also last week, R. Hunter Biden resigned from the board stating, "Serving on the board has been a great honor ... Now that Amtrak has a supportive administration in the White House, I believe my service on the board is not as crucial. I have tremendous confidence in the board and current leadership of Amtrak and am grateful for the opportunity to have served."

Stimulus Programs Under Review

Amtrak's proposal for the use of \$1.3 billion it will receive in stimulus funding as part of the American Recovery and Reinvestment Act is currently under review by the Federal Railroad Administration. The money will be used to begin or accelerate capital programs across the system and make investments in rail security. Approval is expected by mid-March and details will be provided at that time.

In related news, the FRA unveiled an outline of its proposed budget for FY '10 last week, which includes a five-year, \$5 billion high-speed rail state grant program. The funding would augment the \$8 billion for high-speed rail development already included in the ARRA for states. Specifics of the budget's effects on Amtrak are expected to be included in a later version, but the company anticipates it will benefit through state infrastructure projects or by applying for these funds in ways similar to the stimulus package.

APD, OSSSO Host British Transport Police

Members of the British Transport Police are in Washington this week to work with Amtrak Police and the Office of Security Strategy and Special Operations as part of the first major exchange of rail security and counterterrorism practices between the U.S. and U.K. The two groups will jointly patrol stations and trains throughout the week to share lessons learned and best policing practices to better protect rail passengers on both sides of the Atlantic.

Former COO Hackney Passes Away

A distinguished member of the Amtrak family, Thomas P. Hackney Jr., passed away on Feb. 24 at the age of 88 in Huntingdon, W. Va. He retired in 1986 as chief operating officer after seven years of service. Prior to joining the company, Hackney was a machinist in the U.S. Navy during World War II and worked for the Chesapeake & Ohio Railway and Chessie System for nearly 40 years.

"Tom was an 'old school' railroader in every positive sense of the word – he took pride in his trains and his people," said Fred Weiderhold, inspector general. "He effectively led the operations department through its fleet transition and more importantly, he was a friend and mentor to those of us just joining the industry. Much of what he taught is still alive in the company."

Engineering: The System Production Wood Tie Gang will start the installation of 40,000 wood ties on Track 2 of the Springfield Line from Quarry to Mill River on March 30. This project completes a two-year tie renewal program and should be complete in July.

PSSA Reminder: Nominations for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms."

Back Pay Update: President and CEO Joe Boardman announced last week that all eligible agreement-covered employees who received the first round of back payments will receive the remaining 60 percent via separate check on May 1.

What's Your Green I.Q.?

Transportation accounts for what percentage of the total energy used in the United States?

- a.) 10%
- b.) 25%
- c.) 30%
- d.) 50%

This is the third and final question of the "Green I.Q." challenge. E-mail the correct answer to ecom@amtrak.com. The winner will be selected at random from the first 50 correct responses received and will have his or her photo and answer published in the April "green" issue of *Amtrak Ink*. Employees with full-time environmental duties are not eligible.

Last week's winner was Gerry Davis, specialist, Finance, who correctly answered that Amtrak recycled 5,000 tons of scrap metal from maintenance operations last year.

America Invited to "Discover the Rail Way" at National Train Day on May 9

The second annual National Train Day is set for May 9, and major events are planned at stations in Washington, DC, Philadelphia, Chicago and Los Angeles, with many more locally organized events in communities nationwide.

This year, guests will "Discover the Rail Way" and celebrate the past, present, and future of train travel with live music and entertainment, interactive green exhibits, VIP appearances, a kid's corner, train equipment displays, and more.

"Our goal is to celebrate train travel and showcase how trains have shaped our lives and allowed families and friends to stay connected to each other personally and professionally," said Emmett Fremaux, vice president, Marketing and Product Management. "The events will feature interactive exhibits educating the public about the benefits of train travel."

In addition to the four main events, the company is inviting local communities to participate by hosting their own National Train Day event. Templates for signage and collateral materials are provided on the Web at www.NationalTrainDay.com. Last year, employees, chambers of commerce and other local organizations hosted nearly 100 events in communities across the country.

"We had great success in 2008, and have already seen great enthusiasm for this year's National Train Day," said Michele White, director, Entertainment and Sports Marketing. "This is another way for us to build loyalty and enthusiasm for train travel among employees and the communities we serve."

A national celebrity spokesperson will be selected to raise awareness of National Train Day in the media. Additionally, up and coming musical artists will perform at each of the major events. Details are being confirmed and announcements will be made within the next couple weeks.

Visit www.NationalTrainDay.com for information and updates, or to request assistance in hosting an event at a local train station.

The majority of our employees are personally committed to delivering high-quality service.

These are things I've witnessed first-hand, and that are supported by the findings of the employee satisfaction survey we received this winter. What I also know is that while those attributes make for a very rich workforce culture, there are other characteristics that are holding us back from being a better Amtrak.

I'm not going to sugar-coat this for you: The survey respondents told us that many of them question the company's commitment to customer service, that they feel teamwork is lacking or discouraged and that fuels a culture of finger-pointing. We do a poor job of communicating, particularly between departments, and some employees question the credibility of what the company communicates.

We do have unique challenges most other companies don't face. We have limited resources and often use band-aids to get us from year to year. We face chronic on-time performance challenges of the NEC and its tough being a front-line employee when we're delayed or have equipment failures on a fleet that's an average 25 years old. Up until October, we did not have any clear direction from Congress about what direction they want Amtrak and passenger rail to take. So many of you have been witness to a flavor of the month or year and it's difficult to set the course straight when we're rowing in different directions. Four CEOs in three years doesn't help. I get it.

One of the reasons it's taken this long for us to start discussing the findings of the survey is that there are no quick fixes, particularly when you're facing ingrained cultural habits and some challenges over which we have little control. But we're going to start righting some of these issues by talking to you, and getting your feedback on what we can do to improve some things.

Message From Joe Boardman

Dear Co-Workers,

Next month, I'll be celebrating my first-year anniversary as president and CEO of Amtrak. Over the course of the last 11 months, I have learned a great deal from many of you. I know that you are enthusiastic about what the future holds for Amtrak but may be uncertain about how it all comes together. We continually face an identity crisis because it's not always clear what Amtrak is supposed to be.

That is in large part why I made developing our strategic vision a priority when I joined the company. To that end, we have compiled a strategic guidance document that establishes broad goals, creates key performance indicators to measure progress, and outlines the opportunities and challenges facing Amtrak as we pursue a growth-oriented mission. (This document supersedes Amtrak's 2005 Strategic Reform Initiatives.) At the end of the day, our goals are all aimed at better positioning Amtrak to be the provider of choice.

Our strategic vision sets the foundation for the five year financial plan we submitted to Congress on Oct. 1, and together they encompass our strategy for continuing the growth we've seen since 2002, and for maximizing this historic moment in federal and state support for more passenger rail service.

As you know, we're in the midst of a transformational chapter for Amtrak and passenger rail. The Passenger Rail Investment and Improvement Act of 2008 (PRIIA) provides the direction set by policymakers, and we're seeing exceptional support for growth of passenger rail.

This is not the passenger rail environment of yesteryears — the opportunities that are being made available to us thanks to stimulus funds and unprecedented support for passenger rail are also opportunities for others to enter new markets. The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

Our strategic vision is built on six fundamentals goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. On our own and with the help of stimulus funds, we are making and will continue to make significant and enduring investments toward those goals.

We're creating a safer environment with Safe-2-Safer and installation of Positive Train Control. In addition, we're pursuing multiple avenues to be better stewards of our environment.

We're striving to become healthier by increasing ridership and pursuing growth in state-supported and commuter service, like the new partnership with the Commonwealth of Virginia, the second Amtrak *Cascades* roundtrip to Vancouver, proposed additional *Piedmont* service in North Carolina next year, and the recent progress toward a final contract with Metrolink.

We're also becoming healthier by investing to bring our equipment and infrastructure to a state of good repair, and we will be producing a fleet plan and request for federal support for equipment procurement in February. We're also making progress toward improving station accessibility for those who are mobility impaired. With Strategic Asset Management, we're

special employee advisory

October 27, 2009 • Page 2 of 2

revamping the technologies that power our key operational, financial and human resources business processes to replace outdated systems and redundant or inefficient processes with integrated systems that will improve efficiency.

We're also aiming to improve customer service with a next-generation reservations system and e-Ticketing and the recently re-launched Amtrak.com.

As Amtrak grows, so does our capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction and reduction in the demand for foreign oil.

Our future together is not without challenges — the state of the national economy and condition of state budgets are a few factors that could hamper our growth. In addition, those looking to enter the passenger rail market will eat our lunch if we don't raise the anti on our competitive edge.

Clear goals are of vital importance for a company; values are just as important because they guide how we go about achieving those goals. Many of the investments we're making call for a new way of thinking and working together. Together and as individuals, we need to stop thinking about what we can't do, and start putting into action what we can do.

I think we all envision the Amtrak that we can be. Each and every one of us can contribute to a changing mindset and attitude. We need you to be part of this — we can have the best strategy in the world, but it's no good if we don't own it and live it.

It's difficult to be part of something if the mission is unclear, so take the time to understand the opportunities and

challenges we face — our strategy is your strategy.

That's why I encourage you to visit the Intranet or Amtrak.com to read our Strategic Guidance and our FY 2010-2014 Five Year Financial Plan. In an effort to be greener, we've printed only a couple copies for a number of locations, but if you can't access the Internet or you would like your own printed copy, please call Charlotte Berry (202 906-3918 or ATS 777-3918) or e-mail BerryC@amtrak.com to request one. The attached fact sheet should also help you better understand our vision and plans.

Thanks for your support and please work safely.

Sincerely,

Joe Boardman
President and CEO

Call Center Script

Due to an AT & T outage, Amtrak's network is down across most of the system, affecting reservations and ticketing (including Quik-Trak kiosks) operations at most stations, with the exception of Washington and Philadelphia.

Advise passengers to use Amtrak.com to book reservations and to use their confirmation page as a ticket until the outage is resolved.

Dear Co-workers,

While I've barely got a couple of weeks under my belt, my knowledge of and experience with Amtrak has enabled me to hit the ground running.

On my first day on the job, I spent time in Washington Union station meeting some of our employees. My second day, which happened to be Thanksgiving, I visited the crew base and thanked employees for spending their holiday helping others safely reach their destinations. I've also met with representatives of Via Rail on xxx and xxxxx.

A couple things you should know about me: I'm a former member of IBEW and Teamsters. I am a straight shooter, so you'll know where I stand on things. I am also a humble leader — I listen closely, and rely on the strengths of well-qualified people to give me their recommendations. I strongly believe that collaboration is a necessity in our business and I don't stomach well those who stand in its way.

For those who may make incorrect assumptions about my past affiliations, let me be very clear: I am here because I believe in Amtrak. Splitting off the Northeast Corridor or separating the NEC infrastructure from operations are absolutely not in my plans. I not only want to preserve our coast-to-coast, interconnected system but also want to see it grow. Anyone who sees my role here differently will be proven wrong.

With your help, we will become a greener, safer and healthier Amtrak. I plan to build on the many opportunities we have to show how critical passenger rail is to America. We will become known as a more energy-efficient, carbon footprint-friendly company that is critical to the mobility of our people and the economy of our country.

We will achieve improvements in safety with targeted goals driven by risk assessment and changing attitudes at all levels of the company. Organizations that practice safety excellence tend to be top performers in their industries, and their employees stay healthy and happy.

What does a healthier Amtrak mean? Among other things, it applies to having solid financials and business processes; it means putting into service equipment that we're proud of; it means working environments that are safe, and that promote collaboration and innovation among employees.

As you get to know me (and you will), you'll see that I want the best for Amtrak. I know our limitations and challenges but I also know our potential and determination. We have some of the best men and women in the field and I hope you'll join me on the journey

I share the incoming administration's vision for a robust passenger rail network.

“To provide efficient and effective intercity passenger rail mobility consisting of high quality service that is trip-time competitive with other intercity travel options...”

We need to ask ourselves the big questions and be serious about the answers – can we provide two-hour service from Washington to New York.

The previous mission statement said Amtrak was to provide “safe and reliable intercity rail passenger service in an economically sound manner that exceeds customer expectation.”

The new statement says the railroad is to provide “efficient and effective intercity passenger rail mobility consisting of high-quality service that is trip-time competitive with other intercity travel options.”

Boardman zeroed in on the term mobility, which he used frequently during his time as New York transportation commissioner. “The mobility piece is going to become much more important,” he said.

When Boardman uses that word, he’s talking about reaching a destination conveniently and on time, regardless of how a person travels.

Increased energy efficiency and electrification of more rail lines also will be higher priorities for Amtrak, Boardman predicted.

greater state operating support to make rail travel more affordable and efficient.

Important Station Improvement Ventures Take Place this Week

This is an important week with regard to station improvements, as the company hosts its fourth Civic Conversation in Savannah, Ga., and submits its latest report to Congress on station accessibility.

The report, a requirement of the Passenger Rail Investment and Improvement Act, outlines Amtrak's plan to make every station fully accessible to disabled passengers in accordance with the Americans with Disabilities Act.

"The report details the current condition of stations and what's needed to make them fully accessible," explained John Bennett, assistant vice president, Strategic Partnerships. "It includes a three-part request for Congress to give us full control over the program, extend our deadline to 2015 and provide us with the \$1.4 billion needed for upgrades."

The Civic Conversation on Feb. 3 and 4 is part of Government Affairs' Great American Stations program and is a forum for local, state and federal officials to discuss preservation, restoration and upgrading of train stations in the region. Attendees are also educated on the importance of stations as local economic drivers and vital cogs in the national transportation network. As upgrades are made, accessibility is a priority.

"Stations are key to improving our business," said Joe McHugh, vice president, Government Affairs and Corporate Communications. "Even though we own only a small portion of the stations we serve, every station affects our product and each is a direct reflection on Amtrak."

Approved by Bennett, Joe McHugh

Important Station Improvement Ventures Take Place this Week

This is an important week in regards to station improvement as the company hosts its fourth Civic Conversation in Savannah, Ga., and submits its latest report to Congress on station accessibility.

“Stations are key to improving our business,” said Joe McHugh, vice president, Government Affairs and Corporate Communications. “Even though we own only a small portion of the stations we serve, every station impacts our product and each is a direct reflection on Amtrak.”

The Civic Conversation on Feb. 3 and 4 is part of Government Affairs’ Great American Stations program and is a forum for local, state and federal officials to discuss preservation, restoration and upgrading of train stations in the region. Attendees are also educated on the importance of stations as local economic drivers and vital cogs in the national transportation network.

Part of the station improvement effort is to make every station fully accessible to disabled passengers. On Feb. 2, Amtrak submitted a status report to Congress on station accessibility in accordance with Passenger Rail Investment and Improvement Act.

“The report essentially outlined the current condition of stations and our plan to make them fully accessible,” explained John Bennett, assistant vice president, Strategic Partnerships. “It includes a three-part request for Congress to give us full control over the program, extend our deadline to 2015 and provide us with the \$1.4 billion needed for upgrades.”

Service Recognition Program to Benefit from New Partner

Amtrak has selected a new partner for its service recognition program in an effort to better acknowledge employees who have reached service milestones. A request for proposals was sent to 12 companies last July with Oklahoma City-based MTM Recognition ultimately winning the bid.

“We wanted to bring a higher level of efficiency, creativity and customer service to the program and MTM has the experience and resources to do just that,” said Recognition Program Manager Carolyn Stagger. “Our goal is to give each department more control over the process and get managers engaged in recognizing their employees.”

Effective immediately, Human Resources will begin working with MTM to analyze and improve the company’s employee appreciation efforts.

MTM is the largest and most diversified award distributor in North America, allowing employees reaching milestones of 10 years or more to choose from a much wider range of gift options. Awards will also be shipped directly to the employee’s work location, making response times faster. Awards for employees celebrating service milestones in the first quarter of 2009 are currently being processed and will be delivered for presentation in the coming weeks.

“One of the strengths of our company is the pride and loyalty of our employees,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives. “Our goal is to make sure every employee feels valued and this is one way we can better show our appreciation.”

Stimulus Bill Includes Funding for Amtrak Projects, Funding Request Submitted to Congress

Amtrak will receive a total of \$1.3 billion as part of the economic stimulus bill that President Obama signed today to create jobs and spur economic activity. Of that figure, \$850 million is designated for projects that supplement capital activities for the repair, rehabilitation or upgrade of Amtrak's system, assets or infrastructure and for expanding capacity, including the rehabilitation of rolling stock. Another \$450 million is dedicated to investments in security. The funds must be awarded within 30 days of enactment by the Federal Railroad Administration in the form of grants.

Amtrak has identified 37 capital programs across its system that will create and preserve jobs and/or accelerate progress on Americans with Disabilities compliance, NEC infrastructure, rolling stock, stations, maintenance facilities and yards, customer service, technology and safety. Fourteen of the programs to be funded are in the Northeast Corridor, while 23 support system-wide initiatives that benefit, or are located in, other regions of the country. A separate plan is being finalized for the \$450 million in security investments.

The capital programs must be completed within two years of enactment. Amtrak is currently seeking FRA approval of its proposed programs through the grant agreement process, and expects to have agreements in place some time in March. More information on the projects will be forthcoming.

The legislation also makes available \$8 billion to states for high-speed rail development or other rail investments, in addition to other grants available for surface transportation projects, including rail.

"I am very happy that Congress has given us the chance to address some of our most pressing capital needs. The American Recovery and Reinvestment Act affords us an exciting opportunity to make long-term investments in passenger rail by taking on many of our backlogged construction, technology and rolling stock projects while promoting near-term economic activity," said President and CEO Joe Boardman. "We will put the money to good use."

This infusion of funding under the ARRA should not be confused with the annual appropriation Amtrak receives from the federal government and may not be used to augment the company's regular operating or capital budgets.

In other news, Amtrak submitted its annual Grant and Legislative Request to Congress today, outlining funding needs of \$1.84 billion for FY '10. The request consists of \$975 million for capital improvements, \$580 million for operating costs, \$264 million for debt service and \$21 million for the office of the Inspector General. The company also seeks an additional \$144 million not included in the \$1.84 billion for station accessibility

improvements under the Americans with Disabilities Act. The request can be found online at Amtrak.com or the Intranet under “Legislative.”

Service Recognition Program to Benefit from New Partner

Amtrak has selected a new partner for its service recognition program in an effort to better acknowledge employees who have reached service milestones. A request for proposals was sent to 12 companies last July with Oklahoma City-based MTM Recognition ultimately winning the bid.

“We wanted to bring a higher level of efficiency, creativity and customer service to the program and MTM has the experience and resources to do just that,” said Recognition Program Manager Carolyn Stagger. “Our goal is to give each department more control over the process and get managers engaged in recognizing their employees.”

Effective immediately, Human Resources will begin working with MTM to analyze and improve the company’s employee appreciation efforts.

MTM is the largest and most diversified award distributor in North America, allowing employees reaching milestones of 10 years or more to choose from a much wider range of gift options. Awards will also be shipped directly to the employee’s work location, making response times faster. Awards for employees celebrating service milestones in the first quarter of 2009 are currently being processed and will be delivered for presentation in the coming weeks.

“One of the strengths of our company is the pride and loyalty of our employees,” said Lorraine Green, vice president, Human Resources and Diversity Initiatives. “Our goal is to make sure every employee feels valued and this is one way we can better show our appreciation.”

Operational Change: Beginning Feb. 9 through Feb. 13, passengers traveling on Amtrak *Cascades* Trains 500 and 501 will be provided motorcoach service between Seattle, Portland and intermediate stations due to BNSF Railway track work.

Engineering: Construction of the concrete tie staging area in the West Class Yard in Hamden, Conn., to support the Track Laying System North’s work in the New England Division is underway. The track construction is being performed by Production Engineering’s Y182B TLS Prep Gang North and will include the two turnouts and 1,600 feet of track.

Government Affairs: On Wednesday, Feb. 11, Chief Operating Officer Bill Crosbie will testify at a hearing before the Surface Transportation Board, offering comments on the recently enacted Passenger Rail Investment and Improvement Act of 2008.

Marketing and Product Management: On Tuesday, Feb. 10, a morning media event is scheduled at the Port of Oakland Building in Oakland, Calif., to honor the historical legacies of Pullman porters and their contributions to the nation’s railroads. The event includes a reception and afternoon meet-and-greet with employees.

Stimulus Bill Includes Funding for Amtrak Projects, Funding Request Submitted to Congress

Amtrak will receive a total of \$1.3 billion as part of the economic stimulus bill that President Obama signed today to create jobs and spur economic activity. Of that figure, \$850 million is designated for projects that supplement capital activities for the repair, rehabilitation or upgrade of Amtrak's system, assets or infrastructure and for expanding capacity, including the rehabilitation of rolling stock. Another \$450 million is dedicated to investments in security. The funds must be awarded within 30 days of enactment by the Federal Railroad Administration in the form of grants.

Amtrak has identified 37 capital programs across its system that will create and preserve jobs and/or accelerate progress on Americans with Disabilities compliance, NEC infrastructure, rolling stock, stations, maintenance facilities and yards, customer service, technology and safety. Fourteen of the programs to be funded are in the Northeast Corridor, while 23 support system-wide initiatives that benefit, or are located in, other regions of the country. A separate plan is being finalized for the \$450 million in security investments.

The capital programs must be completed within two years of enactment. Amtrak is currently seeking FRA approval of its proposed programs through the grant agreement process, and expects to have agreements in place some time in March. More information on the projects will be forthcoming.

The legislation also makes available \$8 billion to states for high-speed rail development or other rail investments, in addition to other grants available for surface transportation projects, including rail.

"I am very happy that Congress has given us the chance to address some of our most pressing capital needs. The American Recovery and Reinvestment Act affords us an exciting opportunity to make long-term investments in passenger rail by taking on many of our backlogged construction, technology and rolling stock projects while promoting near-term economic activity," said President and CEO Joe Boardman. "We will put the money to good use."

This infusion of funding under the ARRA should not be confused with the annual appropriation Amtrak receives from the federal government and may not be used to augment the company's regular operating or capital budgets.

In other news, Amtrak submitted its annual Grant and Legislative Request to Congress today, outlining funding needs of \$1.84 billion for FY '10. The request consists of \$975 million for capital improvements, \$580 million for operating costs, \$264 million for debt service and \$21 million for the office of the Inspector General. The company also seeks an additional \$144 million not included in the \$1.84 billion for station accessibility improvements under the Americans with Disabilities Act. The request can be found online at Amtrak.com or the Intranet under "Legislative."

Operational Change: Beginning Feb. 16 through March 15, due to Union Pacific track work, passengers on some morning and early afternoon *Capitol Corridor* trains will be provided motorcoach service between Sacramento and Suisun/Fairfield, Calif., and trains will operate on the remainder of the route according to a modified schedule.

Engineering: The installation of 3,000 linear feet of new track panels on Track No. 2 in the South Tube in New York City is underway in 55-hour outages, with the Switch and Rail Gang replacing the old track and the High Speed Surfacing Gang surfacing the track and returning it to track speed for Monday morning service. This phase of the work will be completed in early March.

Information Technology: Beginning Feb. 18, as part of the Payment Card Industry (PCI) compliance process, Arrow users are required to change their private ID when prompted on the sign-on page. For more information, contact the Help Desk at 800-772-HELP (4357).

Human Resources: Nomination for the 2009 President's Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms. PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggc@amtrak.com.

Amtrak Readies for 2009 Inauguration

With the inauguration of the nation's 44th president just over a week away, Amtrak is finalizing its operating plan to support what could be the most well-attended event ever in Washington, D.C. Preparations have been underway for months to safely accommodate a massive number of rail passengers to and from Washington Union Station on Jan. 20.

Significant preparation has also been put into operating a charter train that will carry President-elect Barack Obama and Vice President-elect Joe Biden from Philadelphia to Washington on Jan. 17.

"This is a monumental week for the country and Amtrak is playing a vital role — we should all be very proud of our involvement," said CEO Joe Boardman. "As the nation's greener, safer and healthier travel provider, it's an honor to be chosen to transport them to Washington for the Inaugural activities and sends a strong message about the importance of passenger rail in America."

On Inauguration Day, an estimated 8,000 passengers per hour will arrive and depart on Amtrak, MARC and VRE trains during the morning and afternoon rushes. System Operations has augmented the company's normal morning inbound and afternoon outbound capacity by 50 percent, by adding extra trains and adding cars where possible. MARC and VRE have both increased capacity as well.

Managing the flow of trains and people through Washington Union Station has been the responsibility of the Mid-Atlantic Division. Efforts have been complicated due to security requirements, but division personnel, Amtrak Police and the Office of Security Strategy and Special Operations have been working closely with local and federal law enforcement to create an effective plan that meets operational and security requirements.

"The inter-departmental collaboration in preparing for both events has been exceptional. From our Engineering crews to the extra work done by the Mechanical department, everyone has been pulling in the same direction and giving it their all for weeks and months," said Chief Operating Officer William Crosbie.

To meet station staffing needs along the Northeast Corridor, employees are encouraged to volunteer at a local station with the approval of their supervisor. For their participation in such an historic event, employee volunteers will receive a special commemorative button along with lunch at the end or beginning of their shift.

To volunteer at New York Penn, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Changes to Business Travel Policy Now in Effect

A revised corporate policy for Travel and Reimbursable Business Travel Expenses took effect last week and includes notable changes related to air travel, meal allowances and hotel rates.

“We took a comprehensive look at our business travel policy and determined there were updates that needed to be made based on market changes, but we also wanted to make it more efficient for the company and the individual employee,” explained Francis Murphy, Director, Business Travel Services.

Under the old policy, only executive committee members could approve air travel by employees. Now, that approval authority is expanded to include vice presidents and chiefs who report to executive committee members, a change that will streamline the approval process.

Meal reimbursement has also been streamlined with the policy changed to a per diem program that includes an increase in the allowable meal expense from \$50 to \$55 (including taxes and gratuities). Additionally, meal receipts are no longer required except as outlined in Section 6.8 of the policy.

Policy changes also incorporate an elevation of the maximum hotel room rates to keep pace with the current lodging market. The national pre-tax room rate has been increased to \$120. Room rates for specific major cities have been raised as well. They are: \$300 in New York; \$205 in Washington, D.C.; \$200 in Boston; \$190 in Chicago; \$160 in Philadelphia; \$140 in Oakland and; \$140 in Seattle.

The revised policy is posted in its entirety on the Intranet at *Library ⇒ Policies ⇒ Amtrak Policy and Instruction Manual ⇒ Finance*. As meal per diem and hotel maximum rates are periodically subject to change, the current maximum rates are not included in the policy itself and are kept updated and posted on the homepage of the eTravel Worldspan Trip Manager catalog in eTrax and on the Intranet under *How We Work ⇒ Management Employee Business Travel*.

Operational Changes: Due to Union Pacific track work, northbound *Pacific Surfliner* Train 799 will terminate in Santa Barbara, Calif., and southbound Train 798 and Saturday and Sunday Train 792 are canceled between San Luis Obispo and Santa Barbara, Jan. 3 through Jan. 14. Motorcoach service is available for all travel in between except at Lompoc-Surf, Calif. At Guadalupe-Santa Maria, northbound buses will drop off only with no alternate southbound service at Lompoc-Surf.

Marketing and Product Management: Effective immediately, Dayton, Ohio-based NCR is the new vendor contracted to develop a new Point-of-Sale (POS) system that automates the sales process and captures food and beverage sales data on trains.

Government Affairs and Corporate Communications: Voting is now underway — through Jan. 23 — to name the Amtrak service between St. Louis and Kansas, Mo. Log on to www.morail.org to choose from *Missouri Rail Blazer*, *Missouri River Runner*, *River Cities Corridor*, *ShowMeMO* and *Truman Service*. The new name will be announced on Jan. 30.

Benefits: Due to the transition to WageWorks, you will be unable to use your commuter reimbursement account to cover January commuting costs. January's payroll deductions will be applied to February's commuting costs and you must pay your January expenses with after-tax dollars. Log on to www.wageworks.com or call 877-924-3967 by Jan. 10 to place your transit and/or parking order.

Transportation: Effective Jan. 1, the FRA accident/incident reporting threshold was increased to \$8,900, up from \$8,500, to adequately reflect rising labor and equipment costs since the reporting threshold was last computed in December 2007.

Inauguration Day Operations Conclude

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice-president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Yesterday, three days after transporting Obama and Biden to Washington, the second phase of Amtrak's inaugural operation culminated as people from all over the world flooded the capital.

Thirty-six Amtrak trains operated to and from Washington yesterday. The Mid-Atlantic Division Commuter Services group also managed additional MARC and VRE trains transporting people to Washington. In total, roughly 8,000 passengers per hour came through Union Station during peak morning and afternoon travel.

"This is a historic chapter in our company's history of which we should all be proud. The teamwork and collaboration by everyone involved in preparing and executing our inaugural operations on Jan. 17 and 20 have been superb," said President and Chief Executive Officer Joe Boardman.

A number of departments worked hand-in-hand with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen. Scores of employees slept in offices and in sleeping cars in Washington Monday night to ensure adequate staffing.

"I applaud the efforts and tireless work by all our employees over the past several months to ensure our passengers made it to and from the Inaugural celebration safely and with minimal disruption. We should all feel proud of our involvement in this historic event," said Chief Operating Officer William Crosbie.

Operational Changes: To help improve on-time performance, beginning Jan. 26, *Lincoln Service* Train 302 will operate five minutes later at all stations from St. Louis to Chicago. Also, *Sunset Limited* Train 1 will operate 30 minutes earlier from El Paso, Texas to Los Angeles.

Engineering: Cleanup of the West Class Yard in Hamden, Conn., is underway as the first step in creating a concrete tie staging area to support Track Laying Machine work in the New England Division. The cleanup is expected to be completed by mid-February.

Important Benefits Information: As required by law, Amtrak is submitting its qualified retirement plans to the IRS for review to affirm that the plans comply with applicable regulations. Plan participants are invited to submit comments on the plans' compliance. See attached documents for more details.

CVA Update: The deadline for submitting responses to the Cultural Value Analysis has been extended until Jan. 30. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, DE 19809 or fax to 703-738-7123.

Inauguration Day Operations in Full Swing

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice-president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Today, three days after transporting Obama and Biden to Washington, the second phase of Amtrak's inaugural operation culminates as people from all over the world flood the capital.

Thirty-six Amtrak trains are operating to and from Washington today. The Mid-Atlantic Division Commuter Services group is also managing additional MARC and VRE trains transporting people to Washington. In total, roughly 8,000 passengers per hour are coming through Union Station during peak morning and afternoon travel.

"This is a historic chapter in our company's history of which we should all be proud. The teamwork and collaboration by everyone involved in preparing and executing our inaugural operations on Jan. 17 and 20 have been superb," said President and Chief Executive Officer Joe Boardman.

A number of departments worked hand-in-hand with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen. Scores of employees slept in offices and in sleeping cars in Washington last night to ensure adequate staffing.

"I applaud the work of the employees of the Mid-Atlantic Division and the Northeast Corridor Service Operations and the leadership they, the Amtrak Police Department and the Office of Security Strategy and Special Operations exhibited," said Chief Operating Officer William Crosbie.

Operational Changes: To help improve on-time performance, beginning Jan. 26, *Lincoln Service* Train 302 will operate five minutes later at all stations from St. Louis to Chicago. Also, *Sunset Limited* Train 1 will operate 30 minutes earlier from El Paso, Texas to Los Angeles.

Engineering: Cleanup of the West Class Yard in Hamden, Conn., is underway as the first step in creating a concrete tie staging area to support Track Laying Machine work in the New England Division. The cleanup is expected to be completed by mid-February.

Important Benefits Information (see applicable attached notices): Amtrak is submitting its qualified retirement plans to the Internal Revenue Service for favorable determination letters. These retirement plans must meet certain requirements under federal law in order to qualify for favorable tax treatment. A favorable determination letter is the IRS's opinion that the terms of Amtrak's plans satisfy certain requirements under the Employee Retirement Income Security Act (**ERISA**) and the tax code. The IRS last issued favorable determination letters to Amtrak for these plans in 2003. Since that time, both the law and the plans have been updated. The upcoming IRS determination letter review will examine the plans to ensure that they comply with current law. As part of this process, participants are invited to comment as to whether the plans meet these requirements.

New Campaign Aims to Eliminate Stop Signal Violations

To further advance Amtrak's position as the nation's greener, safer and healthier transportation provider, a new campaign is underway that aims to prevent stop signal violations. Initiated by the Transportation department, this comprehensive effort focuses on educating and rewarding Train and Engine employees who contribute to reaching the goal of zero stop signal violations during the fiscal year.

"We're increasing awareness, training and testing to avoid incidents on the railroad," said Steve Strachan, chief transportation officer. "Violating a stop signal could result in a collision or other accident that might cost people their lives, so we're doing everything we can to make sure it doesn't happen."

Each quarter, the campaign will focus on improving situational awareness, restricted speed, communication and teamwork through informational posters and other printed materials, which will be distributed at crew bases across the country. Supervisors will also work with engineers and conductors on an individual basis to reinforce the material before testing employees at the end of each quarter.

A unique element of the campaign is the "challenge" coin that will be given to all T&E employees. "We want everyone to keep the coin on them as a reminder of what we're trying to do," explained Strachan. "We want it to build unity among crews and reinforce the importance of safety."

As the year progresses, Strachan and his staff will host conference calls with Transportation supervisors throughout the system to evaluate the campaign and share best practices. At year's end, Strachan hopes to recognize every division for reaching the goal of zero stop signal violations.

Operational Update: Beginning on Monday, Jan. 26, as part of the "Get Well Plan" negotiated by Amtrak and Union Pacific, *California Zephyr* Train 5 will now operate 30 minutes earlier between Elko, Nev., and Emeryville, Calif. Train 6 will operate 15 minutes earlier between Emeryville and Salt Lake City.

Government Affairs: On Wednesday, Jan. 28, President and CEO Joe Boardman is scheduled to testify before the House Transportation and Infrastructure Committee on a the relationship between freight and passenger rail, Amtrak's present and future roles, and company performance, benefits and needs.

In other news, former Illinois Rep. Ray H. LaHood was sworn in Friday as the new Transportation Secretary. He is one of two Republicans in the new Obama administration.

Benefits: The 2009 IRS allowable pre-tax contribution limits are now increased to \$120 per month for parking and \$230 per month for parking. Log onto amtrakbenefits.com to increase your elections.

Human Resources: In response to non-agreement and salaried agreement employees' queries regarding incorrect vacation balances on their pay stubs, the issue is now resolved. However, with the roll-out of the Web-based Employee Self Service function on Feb. 9, the most accurate vacation balance information will be found online.

Final CVA Reminder: The deadline for submitting responses to the Culture Value Analysis survey has been extended until this Friday, Jan. 30. Mail responses to SAM Initiative, 501 Carr Road, Wilmington, De 19809 or fax to 703-738-7123.

Amtrak Readies for 2009 Inauguration

With the inauguration of the nation's 44th president just over a week away, Amtrak is finalizing its operating plan to support what could be the most well-attended event ever in Washington, D.C. Preparations have been underway for months to safely accommodate a massive number of rail passengers to and from Washington Union Station on Jan. 20.

Significant preparation has also been put into operating a charter train that will carry President-elect Barack Obama and Vice President-elect Joe Biden to Washington prior to the inauguration.

"This is a monumental week for the country and Amtrak is playing a vital role — we should all be very proud of our involvement," said CEO Joe Boardman. "As the nation's greener, safer and healthier travel provider, it's an honor to be chosen to transport them to Washington for the Inaugural activities and sends a strong message about the importance of passenger rail in America."

On Inauguration Day, an estimated 8,000 passengers per hour will arrive and depart on Amtrak, MARC and VRE trains during the morning and afternoon rushes. System Operations has augmented the company's normal morning inbound and afternoon outbound capacity by 50 percent, by adding extra trains and adding cars where possible. MARC and VRE have both increased capacity as well.

Managing the flow of trains and people through Washington Union Station has been the responsibility of the Mid-Atlantic Division. Efforts have been complicated due to security requirements, but division personnel, Amtrak Police and the Office of Security Strategy and Special Operations (OSSSO) have been working closely with local and federal law enforcement to create an effective plan that meets operational and security requirements.

"The security requirements on both days are extraordinary but APD and OSSSO have been working tirelessly to coordinate with the Secret Service, Metro Police and other federal, state, and local agencies," said Chief Operating Officer William Crosbie. "Collaboration within the company has also been exceptional. Engineering and Mechanical crews, Transportation employees and every other department have been focused on successfully completing this mission."

(TO GO IN BOX ON LEFT SIDE)

VOLUNTEERS STILL NEEDED

To meet Inauguration Day staffing needs along the Northeast Corridor, employees are encouraged to volunteer at a local station with the approval of their supervisor. For participating in such an historic event, employee volunteers will receive a special commemorative button along with lunch at the end or beginning of their shift.

To volunteer at New York Penn, contact Mike Gallagher at ATS 521-7278 or GallagMk@amtrak.com. For Philadelphia or Wilmington contact Rick Gadbois at ATS 728-2151 or GadboiR@amtrak.com. To volunteer at Baltimore or Washington, contact Ken Wiedel at ATS 777-3078 or WiedelK@amtrak.com.

Operational Changes: On Jan. 19, Martin Luther King Jr. Day, all *Downeaster* trains will operate according to the normal weekday schedules, **not** the holiday schedule published in the Fall 2008/Winter 2009 System Timetable.

CVA Reminder: All results of the Cultural Value Analysis surveys must be received via mail (c/o SAM Initiative, 501 Carr Road, Wilmington, DE 19809) or fax (703-738-7123) by Monday, Jan. 19.

Benefits: The IRS limit for 401(k) pre-tax contributions is now \$16,500. Employees who reach 50 or older in 2009 and contribute the maximum allowed, may contribute an extra \$5,500 “catch up contribution” to the Plan on a pre-tax. The combined pre-tax, after-tax and company contributions are limited to the lesser amount between 100 percent of an employee’s pay or \$49,000.

Stimulus Programs Still Under Review

Amtrak's proposal for the use of \$1.3 billion it will receive in stimulus funding as part of the American Recovery and Reinvestment Act is currently under review by the Federal Railroad Administration. The list includes 37 projects across the system to repair infrastructure, rolling stock and business systems. The company expects to receive approval by mid-March and details will be provided at that time.

In related news, the FRA unveiled an outline of its proposed budget for FY '10 last week, which includes a five-year, \$5 billion high-speed rail state grant program. The funding would augment the \$8 billion for high-speed rail development already included in the ARRA for states. Specifics of the budget's effects on Amtrak are expected to be included in a later version, but the company anticipates it will benefit through state infrastructure projects or by applying for these funds in ways similar to the stimulus package.

OSSSO Hosts British Transport Police

Members of the British Transport Police are in Washington this week to work with Amtrak Police and the Office of Security Strategy and Special Operations as part of the first major exchange of rail security and counterterrorism practices between the U.S. and U.K. The two groups will jointly patrol stations and trains throughout the week to share lessons learned and best policing practices to better protect rail passengers on both sides of the Atlantic.

Former COO Hackney Passes Away

A distinguished member of the Amtrak family, Thomas P. Hackney Jr., passed away on Feb. 24 at the age of 88 in Huntingdon, W. Va. He retired in 1986 as chief operating officer after seven years of service. Prior to joining the company, Hackney was a machinist in the U.S. Navy during World War II and worked for the Chesapeake & Ohio Railway and Chessie System for nearly 40 years.

"Tom was an 'old school' railroader in every positive sense of the word – he took pride in his trains and his people," said Fred Weiderhold, inspector general. "He effectively led the operations department through its fleet transition and more importantly, he was a friend and mentor to those of us just joining the industry. Much of what he taught is still alive in the company."

LaHood Joins Board

U.S. Secretary of Transportation Ray LaHood was officially named to the board of directors by President Obama on Thursday. A native of Peoria, Ill., he is a 14-year veteran of the U.S. House of Representatives where he served on the Transportation and Infrastructure Committee and the Appropriations Committee. During that time, he supported increased funding for Amtrak and other mass transit legislation.

Operational Changes: Due to CSX track work, *Northeast Regional* Trains 66 and 67 will not operate between Washington and Newport News and Train 94 will operate 3:10 earlier between Newport News and Richmond, Mondays through Thursdays through March 12.

Payroll Operations: All employees by now should have received their 2008 W-2 Wage and Earnings Statement to file their tax returns. If you have not received your statement, contact NAME and NUMBER.

Availability of High-Speed Rail Funding Stimulates States

Amtrak board of directors Chairman Tom Carper joined Amtrak and Union Pacific officials at Chicago Union Station today for a roundtable discussion with Sen. Dick Durbin (D-IL), Illinois Gov. Pat Quinn and Illinois Transportation Secretary Gary Hannig about funding needs for high-speed passenger rail development from Chicago to St. Louis and the state's plan to compete for stimulus funding.

The American Recovery and Reinvestment Act includes \$8 billion for high-speed and intercity rail investment grants, which will be awarded to states by the Federal Railroad Administration on a competitive basis. The availability of federal funding for high-speed rail under ARRA, along with the \$5 billion President Obama has proposed as part of his transportation budget over the next five years has spurred states across the country to move on plans for development or expansion of passenger rail service.

"States are seeing real potential for improving rail service and the possibilities of high-speed rail," said Ray Lang, national director, State Relations. "Amtrak is working with a number of states that have sought assistance with expanding existing and new rail corridors."

The Federal Railroad Administration is currently crafting the grant program; submissions for grants will be accepted starting WHEN.

Government Affairs: The omnibus bill that includes Amtrak FY '09 appropriations is expected to be passed by Congress this week. Since October, federal funding has been provided at FY '08 levels under two Continuing Resolutions. The CR that expired on Friday has been extended through midnight on Wednesday, March 11.

Operational Changes: Due to CSX track work, motorcoach service will be provided on the *Palmetto* between Richmond and Rocky Mount and the *Carolinian* will be cancelled between New York and Raleigh on select weekdays from March 9 through April 17. In addition, *Palmetto* schedules will be slightly adjusted and checked baggage will not be available for travel that includes motorcoach service.

Policy Changes: A revised corporate policy on photography and video recording on company property will be distributed this week via Arrow, OSU, and APD General Order. It is posted on Amtrak.com under "Inside Amtrak" or the Intranet under "Security".

How Green Are You?

Over the next three weeks, *Amtrak This Week* will test your knowledge of environmental issues. The first person to respond to Employee Communications at ecom@amtrak.com with the correct answer will have his or her response and photo published in the April "green" issue of *Amtrak Ink*. There must be a new winner each week; employees with full-time environmental duties are not eligible.

This Week's Question:

Amtrak has committed to reducing its greenhouse gas emissions from diesel fuel through its voluntary agreement with the Chicago Climate Exchange; by how much did the company agree to reduce its diesel fuel emissions from 2003 to 2010?

- a) 0.5 percent
- b) 2.0 percent
- c) 6.0 percent
- d) 9.5 percent

High-Speed Rail Round Table Takes Place in Chicago

Chairman of the Board Tom Carper joined other Amtrak and Union Pacific officials at Chicago Union Station today for a round table session with Sen. Dick Durbin, Gov. Pat Quinn and Illinois Transportation Secretary Gary Hannig.

The American Recovery and Reinvestment Act includes \$8 billion for intercity rail priorities, which will be awarded to states on a competitive basis. The group discussed the funding needs for high-speed passenger rail development from Chicago to St. Louis and the state's plan to compete for stimulus funding.

"States are beginning to see real potential for improving rail service and the possibilities of high-speed rail," said Ray Lang, national director, State Relations. "We're very encouraged that Illinois wants to continue our great relationship by involving us from the beginning in exploring this new endeavor."

In addition to the ARRA, a recently published budget proposal outline for the Federal Railroad Administration included a five-year, \$5 billion program for high-speed rail development.

Government Affairs: The omnibus bill that includes Amtrak appropriations for the remainder of FY '09 is expected to become law this week. Since October, funding has been provided at FY '08 levels under two continuing resolutions.

Operational Changes: Due to CSX track work, motorcoach service will be provided on the *Palmetto* between Richmond and Rocky Mount and the *Carolinian* will be canceled between New York and Raleigh over select weekday periods from March 9 through April 17. In addition, *Palmetto* schedules will be slightly adjusted and checked baggage will not be available for travel that includes motorcoach service.

February Performance: System ridership for Feb. was down 9 percent from last year, while revenue fell by 11 percent. However, Feb. 2008 had an extra day due to leap year, which accounts for about half of the difference.

Policy Changes: A revised corporate policy on photography and video recording on company property is now in effect. Details can be found on Amtrak.com or the Intranet under XXXXX.

How Green Are You?

Over the next three weeks, *Amtrak This Week* will be asking questions to test your knowledge of environmental issues. The first person to respond to the Employee Communications e-mail box with the correct answer will have their response and photo published in the April "green" issue of *Amtrak Ink*. Please submit your answers to ecom@amtrak.com. Good luck!

Amtrak has agreed to reduce its greenhouse gas emissions from diesel fuel through its voluntary agreement with the Chicago Climate Exchange. By how much did the company agree to reduce its diesel fuel emissions from 2003 to 2010?

- a.) 0.5 percent
- b.) 2.0 percent
- c.) 6.0 percent
- d.) 9.5 percent

Note from Joe Boardman

Dear Co-workers,

While I was at the Washington crew base the other day, some employees I was speaking with asked me about the message I wrote last week about the plans for paying the retroactive pay. They were concerned when they read, “We will identify the source of the operating funds that we’ll use to begin payment in May,” that “begin” meant that we wouldn’t pay the full amount of retroactive pay this year.

In case others read it that way, I want to make absolutely clear that **we will** pay out the full second installment of retroactive pay, starting in the beginning of May. My point was that not all of the checks would be issued at the same time. Just as the first installment was distributed according to the date of each union’s agreement last year, we would likely do the same this year.

Again, I just wanted to make sure that everyone understands that I am committed to paying the full retroactive pay. I’ll be updating you on this subject soon.

Sincerely,

Joe Boardman

Biden Announces Amtrak Stimulus Programs at Washington Union Station

Further demonstrating the administration’s support for passenger rail, Vice President Joe Biden hosted a trackside press conference at Washington Union Station on Friday to announce capital programs that will be funded through the \$1.3 billion provided to Amtrak via the American Recovery and Reinvestment Act.

Joining Biden were Acting FRA Deputy Administrator Jo Strang, board of directors Vice Chairman Donna McLean and 11 members of the U.S. House of Representatives and U.S. Senate.

“For too long we have failed to make the investments we should have been making in Amtrak in order to provide the kind of reliable and secure intercity rail service that our people depend on and our economy needs,” said Vice President Biden.

Biden emphasized the necessity of a healthy passenger rail network to relieve highway congestion, reduce pollution and decrease energy needs.

Stimulus programs for Amtrak will include over \$400 million in capital improvements on the Northeast Corridor, including \$105 million to replace the Niantic River Bridge and \$63 million to improve reliability of electrical power.

A total of 68 passenger cars will be repaired and returned to service and \$100 million will be spent on improvements to stations and facilities throughout the system. Also included in the package is \$60 million to install Positive Train Control systems on the Michigan Line. Additionally, the recovery act will fund other technology projects along with security-related infrastructure and station improvements.

“The Vice President understands the importance of our company and we’re honored that he personally came to make this announcement here at our corporate headquarters,” said President and CEO Joe Boardman. “We have great opportunities ahead of us and we’re ready to move on these projects to connect America in safer, greener and healthier ways.”

The final, FRA-approved list of capital programs to be funded through the stimulus funds is expected to be posted on Amtrak.com and on the Intranet later this week.

Benefits: The federal government has increased the pre-tax mass transit limit from \$120 to \$230 per month. This means you may allocate up to \$230 for mass transit expenses on a pre-tax basis. Log onto amtrakbenefits.com or call 800-481-4887 to take advantage of this benefit by changing your payroll deductions.

Human Resources: Nominations for the 2009 President’s Service and Safety Awards (PSSA) will be accepted through March 31. Forms are posted on the Intranet at “Employees” → “Awards and Achievements” → “2009 PSSA Nomination Forms.” PSSA posters are available by contacting Carolyn Stagger at ATS 777-3899 or staggec@amtrak.com.

Engineering: The Production Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will be completing the reconstruction of the # 23 crossover at Union Interlocking in Rahway, N.J. during a 55-hour track outage this weekend. The track is scheduled to be back in service for the Monday morning rush hour.

Arrow Update: Beginning March 17, all Arrow users must have an eight-digit private ID that includes at least one letter and one number to enhance data security. Users without a complying ID will not be able to enter the system without calling the Help Desk.

Marketing: A new TV commercial is now airing in eight major cities across the country to promote Amtrak travel. A second commercial supporting *Acela Express* is also being broadcast in Boston, New York and Washington. To see the new spots, visit Amtrak.com.

What’s Your Green I.Q.?

This Week’s Question:

How many tons of scrap metal did Amtrak recycle last year from maintenance operations?

- a.) 10
- b.) 100
- c.) 1,000
- d.) 5,000

E-mail the correct answer to ecom@amtrak.com. The winner will be selected at random from the first 50 correct responses received. The winner will have his or her photo and answer published in the April “green” issue of *Amtrak Ink*. There must be a new winner each week and employees with full-time environmental duties are not eligible.

**Amtrak Invites America to “Discover the Rail Way”
at National Train Day on May 9th**

The second annual National Train Day is set for May 9, and major events are planned at stations in Washington, DC, Philadelphia, Chicago and Los Angeles, with many more locally organized events in communities nationwide.

This year, guests will “Discover the Rail Way” and celebrate the past, present, and future of train travel with live music and entertainment, interactive green exhibits, VIP appearances, a kid’s corner, train equipment displays, and more.

“Our goal is to celebrate train travel and showcase how trains have shaped our lives and allowed families and friends to stay connected to each other personally and professionally,” said Emmett Fremaux, vice president, Marketing and Product Management. “The events will feature interactive exhibits educating the public about the benefits of train travel.”

In addition to the four main events, the company is inviting local communities to participate by hosting their own National Train Day event. Templates for signage and collateral materials are provided for field employees or local groups on the Web at www.NationalTrainDay.com. Last year, employees, chambers of commerce and other local organizations hosted nearly 100 events in communities across the country.

“We had great success in 2008, and have already seen great enthusiasm for this year’s National Train Day,” said Michele White, director, Entertainment and Sports Marketing. “This is another way for Amtrak to build loyalty and enthusiasm for train travel among its employees and the communities we serve.”

A national celebrity spokesperson will be selected to raise awareness of National Train Day in the media. Additionally, up and coming musical artists will perform at each of the major events. Details are being confirmed and announcements will be made within the next couple weeks.

Visit www.NationalTrainDay.com for information and updates, or to request assistance in hosting an event at a local train station.

National Train Day Aims to Help Customers “Discover the Rail Way”

The second annual National Train Day is set for May 9, and major events are planned at stations in Chicago, Los Angeles, Philadelphia and Washington, with many more locally organized events in communities nationwide.

This year’s theme is “Discover the Rail Way,” and the company plans to help customers do so by providing live music and entertainment, interactive green exhibits, VIP appearances, a kid’s corner and equipment displays.

“Our goal is to bring people to these stations for the entertainment and activities, then expose them to the advantages of rail travel to increase our customer base,” said Emmett Fremaux, vice president, Marketing and Product Management. “We’re celebrating the past, present and future of trains in America by showcasing technology and environmental benefits.”

The Marketing and Product Management department is also providing signage and resources for field employees or local groups who wish to host a National Train Day event at their station. Last year, employees, chambers of commerce and other local organizations hosted more than 80 events in communities across the country.

“An event can be something as simple as offering refreshments to passengers and local residents or it can be much bigger,” said Michele White, director, Entertainment Marketing. “These community events were very successful last year at supporting our effort to celebrate trains and build customer loyalty — we hope to expand our presence this year.”

To support promotional and publicity efforts surrounding Nation Train Day, the company will be hiring a national spokesperson. Additionally, well-known musical artists and entertainers are being sought to perform at each of the four major events. Announcements will be made once contracts are finalized.

Visit www.NationalTrainDay.com for information and updates, or to request assistance in hosting an event at a local train station.

Engineering: The System Production Wood Tie Gang will start the installation of 40,000 wood ties on Track 2 of the Springfield Line from Quarry to Mill River on March 30. This project completes a two-year tie renewal program and should be complete in July.

PSSA Reminder: INSERT TEXT

Back Pay Update: President and CEO Joe Boardman announced last week that all eligible agreement-covered workers who received the first round of back payments will receive the remaining 60 percent via separate check on May 1.

Green IQ: Transportation accounts for what percent of the total energy used in the United States?

- a.) 10%
- b.) 25%
- c.) 30%
- d.) 50%

Last week's winner was Gerry Davis, specialist, Finance, who correctly answered that Amtrak recycled 5,000 tons of scrap metal from maintenance operations last year.

New Program Offers Advancement for Mechanical Department Employees

Employees in the Mechanical department have the opportunity to train for advancement as electricians, machinists or pipefitters through the new Mechanic-in-Training Program.

“Skilled employees are the company’s best asset so we designed this program with the respective labor unions to make sure our Mechanic-in-Training candidates are growing by learning from our most talented craftsmen,” said Chief Mechanical Officer Vince Nesci.

After completing safety training, a Mechanic-in-Training spends approximately one year going through classroom teaching, hands-on instruction and self-study courses in the basics of electronics, equipment systems and specific job functions. Trainees work under the supervision and guidance of a line manager while rotating through various areas of their assigned facility. Once the program is completed, trainees will be assigned to a position or may apply for other open positions.

Applicants for the program must apply for Mechanic-in-Training positions through the standard hiring process and are selected by Human Resources and the Mechanical Superintendent. The program is currently underway at Ivy City and Chicago maintenance facilities and positions are posted based on the recruiting needs per location. For more information, contact Stephanie Pavlakis, senior director, Employee Development, at pavlaks@amtrak.com or ATS 739-2413.

Crew Puts AED Training to Use to Save Passenger

On March 28, crew members aboard *Silver Meteor* Train 98 saved the life of a passenger suffering from a heart attack by using the on-board Automatic External Defibrillator.

The passenger began suffering heart attack symptoms and lost consciousness shortly after 9 p.m., when his wife notified Sleeping Car Attendant Eastlyn Delabastide. She immediately alerted Conductor Russell Denson and Assistant Conductor Eric Morrison, who brought the AED and administered one charge, returning the patient’s heartbeat to a normal rhythm. Engineer Bryan Morrison stopped the train in Ravenel, S.C., while the crew monitored the patient until local paramedics arrived.

“This is another life saved thanks to proper training, proper equipment and professional composure of a talented crew,” said Chief Operating Officer William Crosbie. “I want to commend Russell, Eric, Eastlyn and Bryan for a job well done. They’re an example of the great job our employees do every day throughout the system.”

Operational Update: Beginning April 5, schedules for trains operating throughout the Empire District between Niagara Falls, Albany-Rensselaer and New York will be adjusted due to track work being performed by Metro-North Railroad.

PSSA Nominations: The deadline for submitting PSSA nominations has been extended from March 31 to April 17. Forms are posted on the Intranet at “Employees” → “Awards and Achievements” → “2009 PSSA Nomination Forms.”

Engineering: The Production Switch Exchange System (SES), with the assistance of New York Division Engineering forces, will complete the reconstruction of the No. 85 crossover at Union Interlocking in Rahway, N.J., by installing the 85B switch this weekend.

Payroll Operations: Federal income taxes withheld from employee wages will be reduced in paychecks issued on April 3 as part of the “Making Work Pay” tax credit included in American Recovery and Reinvestment Act. Paychecks will include retroactive deductions from Feb. 17 when the act was signed into law.

New Program Offers Advancement for Mechanics

Entry level employees in the Mechanical department now have the opportunity to train for advancement as electricians, machinists or pipefitters through the new Mechanic-in-Training Program.

“Skilled employees are the company’s best asset so we designed this program with the respective labor unions to make sure our Mechanic-in-Training candidates are growing by learning from our most talented craftsmen,” said Chief Mechanical Officer Vince Nesci.

After completing safety training, a Mechanic-in-Training spends approximately one year going through classroom teaching, hands-on instruction and self-study courses in the basics of electronics, equipment systems and specific job functions. Trainees work under the supervision and guidance of a line manager while rotating through various areas of their assigned facility. Once the program is completed, trainees will be assigned to a position or may apply to other open positions.

Applicants for the Mechanic in Training program are selected through the normal process by Human Resources and the Mechanical Superintendent. For more information, contact Stephanie Pavlakis, senior director, Employee Development, at pavlaks@amtrak.com or ATS 739-2413.

Crew Uses AED to Save Passenger

On March 28, crew members aboard *Silver Meteor* Train 98 saved the life of a passenger suffering from a heart attack by using the on-board Automatic External Defibrillator.

The passenger began suffering heart attack symptoms and lost consciousness shortly after 9 p.m., when his wife notified Sleeping Car Attendant Eastlyn Delabastide. Payroll Operations: Federal income taxes withheld from employee wages will be reduced in paychecks issued on April 3 as part of the “Making Work Pay” tax credit included in American Recovery and Reinvestment Act. Paychecks will include retroactive deductions from Feb. 17 when the act was signed into law.

Members of the Board of Directors

Board of directors Chairman Tom Carper and Vice Chairman Donna McLean visited three facilities in Wilmington, Del., last week to get a first-hand look at the work being done at the Wilmington Station, the Bear Car Shop and the Consolidated National Operations Center. The station and the Bear Shop are both benefiting from funding from the American Recovery and Reinvestment Act.

In addition to observing the waterproofing of one of the track beds above the Wilmington station, Carper and McLean toured the renovation of the station. At Bear, they observed Level 3 overhauls being performed on Amfleet equipment and a Diner-Light car in the making. After visiting the site of the future Centralized Electrification and Traffic Control (CETC) dispatching operation that will be housed on the first floor of the CNOC next spring, they briefly visited the CNOC operation on the second floor of the building.

“We appreciated the opportunity to meet some of the employees who are directly responsible for bringing these projects to fruition and personally seeing the amount of work that goes into them,” said Chairman Carper.

NOTICE TO INTERESTED PARTIES

Notice to all present employees eligible to participate in the National Railroad Passenger Corporation Savings Plan

An application is to be made to the Internal Revenue Service for an advance determination on the qualification of the following employee pension benefit plan:

- | | | |
|----|---|---|
| 1. | Name of Plan: | National Railroad Passenger Corporation Savings Plan (the "Plan") |
| 2. | Plan Number: | 002 |
| 3. | Name and Address of Plan Sponsor: | National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
| 4. | Employer Identification Number: | 52-0910053 |
| 5. | Name and Address of Plan Administrator: | Savings Plan Committee
c/o National Railroad Passenger Corporation
60 Massachusetts Avenue, NE
Washington, DC 20002-4285 |
-

The application will be filed on January 30, 2009 for an advance determination as to whether the Plan meets the qualification requirements of Section 401 of the Internal Revenue Code of 1986, as amended, with respect to the Plan's amendment.

The application will be filed with:

EP Determinations
Internal Revenue Service
P.O. Box 12192
Covington, Kentucky 41012-0192

The employees eligible to participate under the Plan are, in general, those employees employed by the National Railroad Passenger Corporation, Chicago Union Station Company, the Washington Terminal Company and the Union Station Redevelopment Corporation, excluding any such person who is a member of a unit of employees covered by a collective bargaining agreement.

The Internal Revenue Service has previously issued a determination letter with respect to the qualification of this Plan.

RIGHTS OF INTERESTED PARTIES

You have the right to submit to EP Determinations, at the above address, either individually or jointly with other interested parties, your comments as to whether this Plan meets the qualification requirements of the Internal Revenue Code.

You may instead, individually or jointly with other interested parties, request the Department of Labor to submit, on your behalf, comments to EP Determinations regarding qualification of the Plan. If the Department of Labor declines to comment on all or some of the matters you raise, you may, individually, or jointly if your request was made to the Department of Labor jointly, submit your comments on these matters directly to EP Determinations.

REQUESTS FOR COMMENTS BY THE DEPARTMENT OF LABOR

The Department of Labor may not comment on behalf of interested parties unless requested to do so by the lesser of 10 Employees or 10 percent of the employees who qualify as interested parties. The number of persons needed for the Department of Labor to comment with respect to this Plan is ten (10) employees. If you request the Department of Labor to comment, your request must be in writing and must specify the matters upon which comments are requested, and must also include: (1) the information contained in items 1 through 4 of this Notice; and (2) the number of persons needed for the Department of Labor to comment.

A request to the Department of Labor to comment should be addressed as follows:

Deputy Assistant Secretary
Employee Benefits Security Administration
ATTN: 3001 Comment Request
U.S. Department of Labor,
200 Constitution Avenue, N.W.
Washington, DC 20210

COMMENTS TO THE INTERNAL REVENUE SERVICE

Comments submitted by you to the Internal Revenue Service must be in writing and received by March 16, 2009. However, if there are matters that you request the Department of Labor to comment upon on your behalf, and the Department of Labor declines, you may submit comments on these matters to the Key District Director to be received within 15 days from the time the Department of Labor notifies you that it will not comment on a particular matter, or by March 16, 2009, whichever is later, but not after March 31, 2009. A request to the Department of Labor to comment on your behalf must be received by it by February 14, 2009, if you wish to preserve your right to comment on a matter upon which the Department of Labor declines to comment, or by February 24, 2009 if you wish to waive the right.

ADDITIONAL INFORMATION

Detailed instructions regarding the requirements for notification of interested parties may be found in Sections 17 and 18 of Revenue Procedure 2008-6. Additional information concerning this application (including, where applicable, an updated copy of the Plan and related trust; the application for determination; any additional document dealing with the application that have been submitted to the Service; and copies of Section 17 of Revenue Procedure 2008-6 are available in the office of the Plan Administrator during normal business hours for inspection and copying. (There is a nominal charge for copying and/or mailing.)

If you have any questions about this Notice, please contact Rosemarie Tana at 202-906-2272.

Information for Agreement-Covered Employees Regarding New Wage Expense and Tax Changes

OVERVIEW

In order to fully comply with current IRS regulations (IRS Treas. Reg. sections 1.32-6 and 1.62-2 and IRS Publications 463 and 1542), Amtrak has realigned the expense wage type codes that are entered into Payroll on a weekly basis. The go-live date for utilization of these new wage types depends upon the payroll area, but must be implemented in time for the first payroll of 2010.

A majority of the accounting and timekeeping changes involve breaking the previous 1241 code into a series of more precise codes, but also involve other wage type codes. While many changes are simply an accounting change, some of the new codes change Amtrak's historical tax treatment of some routine payments. To comply with IRS regulations, Amtrak must begin withholding taxes from certain payments to employees that were not formerly treated as taxable income. If Amtrak does not properly tax these payments, the company and its employees will be exposed to additional tax liabilities by the IRS.

UNCHANGED WAGE CODES

There are three wage type codes that will remain unchanged and will continue to be used according to current policy:

- 12MI for mileage
- 1248 for differentials
- 1245 for uniform allowances

However, for the uniform allowances, there will now be an additional certification requirement. Employees receiving the uniform allowance must certify that the funds are being used for the maintenance of the uniform. More information on this certification will be forthcoming over the next few weeks. Also, 1248 will be used only for differentials; other taxable payments should not be entered using this code.

ELIMINATED WAGE CODE

Wage type code 1243 will no longer be used. It is being replaced by 124X (see below for details).

NONTAXABLE CHANGES

The following wage type codes are being introduced for accounting purposes only. The previous wage type 1241 has been broken into numerous wage types in order to better categorize the different types of expenses that are being incurred by employees:

- 124A – Tools/parts/keys
- 124B – Work boots
- 124C – Company meetings
- 124E – Education/training
- 124F – Office supplies
- 124G – Travel: gas/rental car/airfare/hotel
- 124K – K9 Fees (police only)
- 124L – Licenses/certifications
- 124M – Non gang meals
- 124P – Meal per diem (MW gangs in lodging)
- 124Q – Meals provided by Amtrak
- 1241 – Side miles (LMS only)

Wage types 1240 and 124H will continue to be used for nontaxable meals in LMS; however, there will be new taxable codes discussed below.

TAXABLE CHANGES

In addition to accounting changes, some wage types will now be subject to income taxes to become compliant with IRS regulations:

- 124T – Taxable meals (under 10 hours per day) – paired with 1240 (LMS only)
- 124V – Taxable meals (On Board employees) paired with 124H (LMS only)
- 124Z – Taxable meals per diem (MW Gangs not in lodging) – paired with 124P
- 124W – Weekend travel allowance
- 124X – Overtime meals
- 124U – Taxable uniform allowance (if 100% of allowance is not used to maintain the employee's uniform)

Amtrak Payroll will be providing more detailed information and reference materials in December 2009 during both onsite and WebX training.

CONTACT INFORMATION

For questions about the new system, please contact Amtrak Payroll at 877-268-7251.

News Briefs-Feb. 2

Operational Change: To improve on-time performance, beginning today, Feb. 2, *Hiawatha Service* Train 342 will operate five minutes later at all stations from Milwaukee to Chicago.

Engineering: Mid-Atlantic Division Engineering forces, with the assistance of Production Engineering's Head End Gang of the TLM (Track Laying Machine) will be installing 42 wood timber and ties on the No. 2 Track in Davis Interlocking this week to remove associated slow orders.

EIM Update: Training on the SAP Employee Self-Service (ESS) functionality concludes on Thursday, Feb. 5. Beginning Monday, Feb. 9, all non-agreement and ARASA-OBS employees must enter their leave requests via ESS.

Human Resources: Nomination forms for the 2009 President's Service and Safety Awards (PSSA) program are currently posted on the Intranet and can be found at "Employees" → "Awards and Achievements" → "2009 PSSA Nomination Forms." The nomination period runs until Tuesday, March 31. The PSSA program, now in its 29th year, provides the highest recognition for employees and external partners who have made outstanding contributions to Amtrak and the passenger rail industry.

Government Affairs: *Missouri River Runner* is the new name for the state-supported Amtrak trains between St. Louis and Kansas City, replacing *Missouri Service* and the *Mules*. Submitted by Keith Kohler of Glendale, Mo., *Missouri River Runner* received 37 percent of the nearly 5,500 votes cast for the five finalists.

Our strategic vision, along with the five year financial plan we submitted to Congress on Oct. 1, encompasses our strategy for continuing the growth we've seen since 2002 and better positioning ourselves to maximize this historic moment in federal and state support for more passenger rail service.

At the end of the day, our goals are all aimed at better positioning Amtrak to be the provider of choice. The investments we're making and the steps we're taking to improve are designed to secure our leadership position in the industry and to stand out from the competition.

Inauguration Day Operations Conclude

On Jan. 17, Barack Obama became the first president-elect to repeat Abraham Lincoln's pre-inauguration train voyage from Philadelphia to Washington. Amtrak was a part of history on Saturday, transporting the president- and vice president-elect and special guests to the nation's capital.

The train, a private charter operated by Amtrak on behalf of the Presidential Inaugural Committee (PIC), originated in Philadelphia, with stops in Wilmington — where Vice President-elect Joe Biden climbed aboard — and Baltimore. The on-board crew was handpicked by the vice-president-elect, a longtime Amtrak rider. Private and public events managed by the PIC took place in Philadelphia, Wilmington and Baltimore.

Yesterday, three days after transporting Obama and Biden to Washington, the second phase of Amtrak's inaugural operation culminated as people from all over the world flooded the capital.

Thirty-six Amtrak trains operated to and from Washington yesterday. The Mid-Atlantic Division Commuter Services group also managed additional MARC and VRE trains transporting people to Washington. In total, roughly 8,000 passengers per hour came through Union Station during peak morning and afternoon travel.

"This is a historic chapter in our company's history of which we should all be proud. The teamwork and collaboration by everyone involved in preparing and executing our inaugural operations on Jan. 17 and 20 have been superb," said Chief Executive Officer Joe Boardman.

A number of departments worked hand-in-hand with PIC, Secret Service and other agencies to ensure safe operations and augment security on both days. Safeguarding the integrity of the right-of-way, executing the operating plans, maximizing the available fleet, managing the flow at Union Station, and volunteering at stations along the corridor were just a few of the many elements of making it all happen. Scores of employees slept in offices and in sleeping cars in Washington Monday night to ensure adequate staffing.

"I applaud the efforts and tireless work by all our employees over the past several months to ensure our passengers made it to and from the Inaugural celebration safely and with minimal disruption. We should all feel proud of our involvement in this historic event," said Chief Operating Officer William Crosbie.

Members of the Board of Directors Visit Facilities

Board of directors Chairman Tom Carper and Vice Chairman Donna McLean visited three facilities in Wilmington, Del., last week to get a firsthand look at the work being done at the Wilmington Station, the Bear Car Shop and the Consolidated National Operations Center. The station and the Bear shop are both benefiting from funding from the American Recovery and Reinvestment Act.

In addition to observing the waterproofing of one of the track beds above the Wilmington station, Carper and McLean toured the renovation of the station. At Bear, they observed Level 3 overhauls being performed on Amfleet equipment and a Diner Light car in the making. After visiting the site of the future Centralized Electrification and Traffic Control (CETC) dispatching center that will be housed on the first floor of the CNOC next spring, they briefly visited System Operations on the second floor of the building.

“There are many improvements taking place across the system, and we appreciate the opportunity to meet some of the employees who are directly responsible for bringing these projects to fruition and to personally see the amount of work that goes into them,” said Chairman Carper.

Final Stimulus Project List Revealed

After Vice President Joe Biden announced key capital programs that will be funded by \$1.3 billion in stimulus grants for Amtrak at Washington Union Station on March 13, the full list of projects has been unveiled.

Well over 500 projects will begin across the country over the coming weeks as part of the American Recovery and Reinvestment Act, including approximately 100 for security and life safety improvements and over 400 projects for operating infrastructure, rolling stock and business systems.

“We’re beginning an exceptional chapter in our company’s history,” said Joe Boardman, president and CEO. “The surge in funding for capital improvements is unprecedented and the benefits will be enduring. It is encouraging to see the direction our country is taking to improve our national mobility, reduce our dependence on imported energy and make a stronger, healthier passenger rail system.”

The projects meet all the objectives of the ARRA and the goals of connecting America in safer, greener, healthier ways. Specifically, they aim to improve operating efficiency, increase access for passengers with disabilities, improve safety and security, and reduce energy needs. Approximately 6,000 jobs will be created in the process; some positions will be internal but most will be created by vendors and contractors to support Amtrak project work.

Highlights include replacement of the Niantic River Bridge in Conn., construction of maintenance facilities in Los Angeles and Seattle, restoration of Amfleet equipment and locomotives, as well as improvements to more than 200 stations across the country.

Security and life safety investments totaling \$450 million will enhance fire detection and mitigation systems and fund security improvements at facilities such as stations, maintenance buildings, bridges and tunnels. These funds also include upgrades to signaling systems for the Northeast Corridor and Michigan Line.

Complete lists of ARRA programs by state and project category can be found on the Intranet under “How We Work” → “Finance” → “Economic Stimulus Guidelines” or on Amtrak.com under “Inside Amtrak” → “Other Reports.”

New Campaign Aims to Eliminate Stop Signal Violations

To further advance Amtrak's position as the nation's greener, safer and healthier transportation provider, a new campaign is underway that aims to prevent stop signal violations. Initiated by the Transportation department, this comprehensive effort focuses on educating and rewarding Train and Engine employees who contribute to reaching the goal of zero stop signal violations during the fiscal year.

"We're increasing awareness, training and testing to avoid incidents on the railroad," said Steve Strachan, chief transportation officer. "Violating a stop signal could result in a collision or other accident that might cost people their lives, so we're doing everything we can to make sure it doesn't happen."

Each quarter, the campaign will focus on improving situational awareness, restricted speed, communication and teamwork through informational posters and other printed materials, which will be distributed at crew bases across the country. Supervisors will also work with engineers and conductors on an individual basis to reinforce the material before testing employees at the end of each quarter.

A unique element of the campaign is the "challenge" coin that will be given to all T&E employees. "We want everyone to keep the coin on them as a reminder of what we're trying to do," explained Strachan. "We want it to build unity among crews and reinforce the importance of safety."

As the year progresses, Strachan and his staff will host conference calls with Transportation supervisors throughout the system to evaluate the campaign and share best practices. At year's end, Strachan hopes to recognize every division for reaching the goal of zero stop signal violations.

As the year progresses, Strachan and his staff will host conference calls with Transportation supervisors throughout the system to evaluate the campaign and share best practices. At year's end, Strachan hopes to recognize every division for reaching the goal of zero stop signal violations.

Amtrak Strategic Guidance and Five Year Financial Plan FY 2010-2014

Summary

Amtrak's Strategic Guidance discusses the opportunities and challenges presented by the current passenger rail environment and describes the activities being undertaken to reshape, renew and rebuild the railroad. It establishes broad goals and creates key performance indicators to measure Amtrak's progress as it pursues a growth-oriented mission to maximize unprecedented federal and state support for more passenger rail service.

The Five Year Financial Plan serves as a companion document to, and provides additional detail for, the Strategic Guidance. Submitted to Congress on Oct. 1, the Plan describes specific investments, actions and initiatives Amtrak is planning to take during the FY 2010-2014 period to advance the goals of the railroad. It is bound by the authorized funding levels as stated in the Passenger Rail Investment and Improvement Act of 2008; however, Amtrak's vision extends beyond these constraints.

The Strategic Guidance sets the foundation for the Five Year Financial Plan, and together they encompass the strategy for continuing the growth Amtrak has seen since 2002 and better positioning the company to capitalize on this historic moment in passenger rail and secure its leadership position in an increasingly competitive industry.

Strategic Guidance

Over the course of the last decade, economic and social trends have led to an increase in the demand for passenger rail. In a period during which airport and highway congestion is growing, fuel prices are volatile, urban centers are expanding and concerns about environmental sustainability are affecting city planning, Congress passed the Passenger Rail Investment and Improvement Act (PRIIA). PRIIA gives states more control over the development and expansion of passenger rail and sets objectives for Amtrak to serve as the nation's intercity passenger rail provider. In addition, the American Recovery and Reinvestment Act (ARRA) provides Amtrak economic stimulus funds with which to make and advance significant investments, while providing states funds to expand service and develop high-speed passenger rail corridors.

It is within this context that Amtrak has set six fundamental strategic goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. Amtrak will advance these goals by improving current service and by partnering with states. To track its progress toward these goals, Amtrak will use nine Key Performance Indicators.

Amtrak's Strategic Guidance also outlines several values that its workforce must embody in order to achieve its goals and remain competitive. Recognizing the value of every employee, and understanding that each employee makes his or her own contribution to the company's well-being and success, the company will strive to foster a working environment that calls for safety and integrity, and encourages qualities such as teamwork, innovation and customer focus.

Funding

During the FY 2010-2014 period, Amtrak will fund 80 percent of its operating need from revenues, a share that will increase as costs shift onto state partners in compliance with federal law. The company will, however, continue to require federal funding for both operating and capital costs.

Ridership and Ticket Revenue

Amtrak aims to increase ridership to 31.4 million passengers by FY 2014, representing a 15 percent jump from 27.2 million in FY 2009. In addition, the railroad expects ticket revenue to grow by 20 percent by FY 2014, exceeding \$2 billion annually. Amtrak intends to achieve these goals with the successful implementation of the many initiatives described below.

Safer: Operate the safest passenger railroad in America

Amtrak is undertaking two revolutionary initiatives that will work hand in hand with more traditional approaches to safety. Safe-2-Safer strengthens the emphasis on safety within the corporate culture by promoting a more collaborative working environment and ensures a higher reliability of safe behaviors at all levels of the railroad. Amtrak also will implement Positive Train Control across its system to bring the most modern information technologies to the task of controlling and protecting train movements to prevent collisions and other accidents.

Also, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrols, baggage screenings and other activities in stations and on trains. Amtrak will continue to expand its K-9 explosive detection teams, harden more stations and strengthen cooperative inter-agency operations with local, state, and federal law enforcement and counterterrorism partners.

Greener: Increase efficiency, reduce emissions, and make better use of resources

Passenger rail has a smaller carbon footprint than its competitors and Amtrak is proving that it can draw riders from both air and auto in places like the Northeast Corridor, the Midwest and California. In addition, Amtrak is taking action to improve its own Green bottom line by pursuing the following initiatives:

- Conserve energy at buildings and other facilities and reduce diesel locomotive fuel consumption;
- Reduce greenhouse gas emissions by diesel locomotive operations;
- Expand recycling program at facilities, stations and aboard trains and incorporate alternative energy sources such as solar cells and wind turbines where it makes sense to do so;
- Extend electrification to additional routes to utilize low-emission energy generation sources; and
- Purchase more energy-efficient locomotives and extend the life of the existing fleet as warranted.

Healthier: Improve the condition, durability and wholesomeness of every aspect of the company

The health of the company relates to its vital signs — ridership and revenue, the condition of its infrastructure and fleet, financial stability, cost savings and new revenue opportunities, improved business processes and systems and sustained workforce and customer satisfaction.

Amtrak is making enduring investments in all areas of the company to become healthier and grow. To that end, during the next five years, Amtrak will:

State Supported Services

- Establish agreements for eight service expansions (frequency increases and/or route extensions) through existing state partnerships;
- Form at least two new state partnerships; and
- Increase ridership on state corridors and state financial support as required by federal law.

Reliability

- Maintain Amtrak-owned tracks, infrastructure and equipment in a state of good repair to minimize malfunctions and associated train delays;
- Replace equipment that has reached the end of its life span including 130 single-level long-distance cars, 20 single-level cab cars and 20 electric locomotives;
- Order 470 new single-level cars to replace coaches approaching the end of their life span as funding sources are identified;
- Modernize and replace outdated Information Technology systems and business processes critical to the delivery of service such as for internal business processes and for external reservation and ticketing.

Customer Service: Improve the quality and attractiveness of our service for passengers

Amtrak must offer riders an experience that is convenient, competitive, and pleasant. Convenience and competitiveness are products of trip time and reliability, but customer experience is a product of a range of factors such as accessibility, food service, comfort, and attractiveness. Through FY 2014, Amtrak will:

- Continue with the “Mobility First” accessibility program to create barrier-free pathways from streets/parking areas to stations, trains and trackside locations;
- Advance self-service reservation booking and ticket delivery programs to implement eTicketing, enhance current Quik-Trak ticket kiosks, better customize the Amtrak.com Web site, and enable ticket retrieval by mobile device;
- Install Wi-Fi internet access first on *Acela Express* trains and subsequently to other services;
- Continue its Route Performance Improvement Program, which determines best opportunities for improvement on targeted routes; and
- Automate and streamline its Food and Beverage Management System to improve product availability aboard trains.

Financial Performance: Improve our bottom line

Amtrak is a government-supported business, and it must not lose sight of the responsibilities that come with taxpayer support. The company has a positive responsibility to ensure that federal and state money is spent in an economical and efficient manner that provides the nation with effective intercity passenger service and protects the investment the nation has made in its railroad. To this end, Amtrak must ensure that capital money is invested in those projects that return value and that sustain our infrastructure and that operating funds be spent efficiently and return the maximum obtainable benefit for the lowest cost consistent with the need to attract customers and develop new business.

In addition, Key Performance Indicators established in the Strategic Guidance will measure the return on investments made by the company.

Efficiency Measures

- Cost per Available Seat Mile (CASM) - cost to move a seat one mile
- Cost Recovery Ratio (CRR) - proportion of our expenses that are met with revenues
- Passenger Miles per Core Employee - Total passenger miles divided by employees in core business lines
- Revenue per Available Seat Mile (RASM) - income produced by moving a seat one mile

Effectiveness Measures

- Safety Ratio - number of reportable injuries per 200,000 man-hours of work
- Customer Service Index (CSI) - survey-generated measure of performance
- Host Railroad Performance - minutes of delay per ten thousand train miles
- On-Time Performance (OTP) - percentage of trains that arrive at their destination within the “threshold of tolerance” for delay
- Ridership Growth - percentage of increase (or decrease) in riders

National Needs: Participate and assist with disaster relief and mobilization efforts and help advance national policies and plans

Amtrak was created to provide an essential national service and must support the government in moments of national need as demonstrated by agreements with the Federal Emergency Management Agency to provide services during periods of disaster relief and with the Department of Defense to transport troops. In addition, the railroad is expected to support national policies such as increasing the role of passenger rail as part of a more balanced transportation network. To achieve this goal, Amtrak is supporting the development and expansion of intercity and high speed rail networks and is partnering with states to provide the required expert analysis and advice needed to advance these plans.

As Amtrak grows, so does its capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

###

Amtrak Strategic Guidance and Five Year Financial Plan FY 2010-2014

Summary

Amtrak's Strategic Guidance discusses the opportunities and challenges presented by the current passenger rail environment and describes the activities being undertaken to reshape, renew and rebuild the railroad. It establishes broad goals ~~and~~ creates key performance indicators to measure Amtrak's progress; ~~and outlines the opportunities and challenges facing Amtrak,~~ as it pursues a growth-oriented mission to maximize unprecedented federal and state support for more passenger rail service.

The Five Year Financial Plan serves as a companion document to, and provides additional detail for, the Strategic Guidance. Submitted to Congress on Oct. 1, the Plan describes specific investments, actions and initiatives Amtrak is planning to take during the FY 2010-2014 period to advance the goals of the railroad. It is bound by the authorized funding levels as stated in the Passenger Rail Investment and Improvement Act of 2008; however, Amtrak's vision extends beyond these constraints.

The Strategic Guidance sets the foundation for the Five Year Financial Plan, and together they encompass the strategy for continuing the growth Amtrak has seen since 2002 and better positioning the company to capitalize on this historic moment in passenger rail and secure its leadership position in an increasingly competitive industry.

Strategic Guidance

Over the course of the last decade, economic and social trends have led to an increase in the demand for passenger rail. In a period during which airport and highway congestion is growing, fuel prices are volatile, urban centers are expanding and concerns about environmental sustainability are affecting city planning, Congress passed the Passenger Rail Investment and Improvement Act ~~of 2008~~ (PRIIA). PRIIA gives states more control over the development and expansion of passenger rail and sets objectives for Amtrak to serve as the nation's intercity passenger rail provider. In addition, the American Recovery and Reinvestment Act (ARRA) provides Amtrak economic stimulus funds with which to make and advance significant investments, while providing states funds to expand service and develop high-speed passenger rail corridors.

It is within this context that Amtrak has set six fundamental strategic goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. Amtrak will advance these goals by improving current service and by partnering with states. To track its progress toward these goals, Amtrak will use nine Key Performance Indicators.

Amtrak's Strategic Guidance also outlines several values that its workforce must embody in order to achieve its goals and remain competitive. Recognizing the value of every employee, and understanding that each employee makes his or her own contribution to the company's well-being and success, the company will strive to foster a working environment that calls for safety and integrity, and encourages qualities such as teamwork, innovation and customer focus.

Funding

During the FY 2010-2014 period, Amtrak will fund 80 percent of its operating need from revenues, a share that will increase as costs shift onto state partners in compliance with federal law. The company will, however, continue to require federal funding for both operating and capital costs.

Ridership and Ticket Revenue

Amtrak aims to increase ridership to 31.4 million passengers by FY 2014, representing a 15 percent jump from 27.2 million in FY 2009. In addition, the railroad expects ticket revenue to grow by 20 percent by FY 2014, exceeding \$2 billion annually. Amtrak intends to achieve these goals with the successful implementation of the many initiatives described below.

Safer: Operate the safest passenger railroad in America

Amtrak is undertaking two revolutionary initiatives that will work hand in hand with more traditional approaches to safety. Safe-2-Safer strengthens the emphasis on safety within the corporate culture by promoting a more collaborative working environment and ensures a higher reliability of safe behaviors at all levels of the railroad. Amtrak also will implement Positive Train Control across its system to bring the most modern information technologies to the task of controlling and protecting train movements to prevent collisions and other accidents.

Also, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrols, baggage screenings and other activities in stations and on trains. Amtrak will continue to expand its K-9 explosive detection teams, harden more stations and strengthen cooperative inter-agency operations with local, state, and federal law enforcement and counterterrorism partners.

Greener: Increase efficiency, reduce emissions, and make better use of resources

Passenger rail has a smaller carbon footprint than its competitors and Amtrak is proving that it can draw riders from both air and auto in places like the Northeast Corridor, the Midwest and California. In addition, Amtrak is taking action to improve its own Green bottom line by pursuing the following initiatives:

Amtrak Strategic Guidance and Five Year Financial Plan FY 2010-2014

Summary

Amtrak's Strategic Guidance discusses the opportunities and challenges presented by the current passenger rail environment and describes the activities being undertaken to reshape, renew and rebuild the railroad. It establishes broad goals and creates key performance indicators to measure Amtrak's progress as it pursues a growth-oriented mission to maximize unprecedented federal and state support for more passenger rail service.

The Five Year Financial Plan FY2010-2014 serves as a companion document to, and provides additional detail for, the Strategic Guidance. The Plan for the first time provides financial projections for Amtrak's revenue, operating costs, capital programs and debt service obligations. It also describes specific investments, actions and initiatives Amtrak is planning to take to advance the goals of the railroad and details key performance indicators with targets. It is bound by the authorized funding levels as stated in the Passenger Rail Investment and Improvement Act of 2008; however, Amtrak's vision extends beyond these constraints.

The Strategic Guidance sets the foundation for the Five Year Financial Plan, and together they encompass the strategy for continuing the growth Amtrak has seen since 2002 and better positioning the company to capitalize on this historic moment in passenger rail and secure its leadership position in an increasingly competitive industry. It also supersedes Amtrak's 2005 Strategic Reform Initiatives which the company adopted in the absence of a congressionally mandated policy, program and appropriations authorization.

Strategic Guidance

Over the course of the last decade, economic and social trends have led to an increase in the demand for passenger rail. In a period during which airport and highway congestion is growing, fuel prices are volatile, urban centers are expanding and concerns about environmental sustainability are affecting city planning, Congress passed the Passenger Rail Investment and Improvement Act (PRIIA).

PRIIA gives states more control over the development and expansion of passenger rail and sets objectives for Amtrak to serve as the nation's intercity passenger rail provider. In addition, the American Recovery and Reinvestment Act (ARRA) provides Amtrak economic stimulus funds with which to make and advance significant investments, while providing states funds to expand service and develop high-speed passenger rail corridors.

It is within this context that Amtrak has set six fundamental strategic goals to be safer, greener and healthier and to improve financial performance, customer service and meet national needs. Amtrak will advance these goals by improving current service and by partnering with states. To track its progress toward these goals, Amtrak will use nine Key Performance Indicators.

Amtrak's Strategic Guidance also outlines several values that its workforce must embody in order to achieve its goals and remain competitive. Recognizing the value of every employee, and understanding that each employee makes his or her own contribution to the company's well-being and success, the company will strive to foster a working environment that calls for safety and integrity, and encourages qualities such as teamwork, innovation and customer focus.

Development of Intercity Passenger Rail and High-Speed Corridors

PRIIA assigns many roles to Amtrak including being the operator of the national intercity passenger rail network, operator and steward of the Northeast Corridor, operator of high-speed rail, and partner of choice for intercity passenger rail development. Amtrak's role in these partnerships will be that of planner, service provider and expert adviser. With Amtrak's help, the states will strategically plan rail service and the federal government will integrate state plans into a national plan and administer the capital grant program. Amtrak will bring knowledge, expertise, and capacity to these partnerships.

In addition, Congress appropriated \$8 billion in intercity and high-speed passenger rail funding as part of the ARRA. This will begin funding the PRIIA vision and the associated grant programs, and it will require close cooperation between Amtrak and the states to accelerate the pace of development and investment. Amtrak must leverage its experience as the nation's only operator of high-speed trains to support projected growth in new high-speed services.

Funding

During the FY 2010-2014 period, Amtrak will fund 80 percent of its operating need from revenues, a share that will increase as costs shift onto state partners in compliance with federal law. The company will, however, continue to require federal funding for both operating and capital costs.

Ridership and Ticket Revenue

Amtrak aims to increase ridership to 31.4 million passengers by FY 2014, representing a 15 percent jump from 27.2 million in FY 2009. In addition, the railroad expects ticket revenue to grow by 20 percent by FY 2014, exceeding \$2 billion annually. Amtrak intends to achieve these goals with the successful implementation of the many initiatives described below.

Safer: Operate the safest passenger railroad in America

Amtrak is undertaking two revolutionary initiatives that will work hand in hand with more traditional approaches to safety. Safe-2-Safer strengthens the emphasis on safety within the corporate culture by promoting a more collaborative working environment and ensures a higher reliability of safe behaviors at all levels of the railroad. Amtrak also will implement Positive Train Control across its system to bring the most modern information technologies to the task of controlling and protecting train movements to prevent collisions and other accidents.

Also, passengers will see a more interactive police and security presence with greater emphasis on random and unpredictable patrols, baggage screenings and other activities in stations and on trains. Amtrak will continue to expand its K-9 explosive detection teams, harden more stations and strengthen cooperative inter-agency operations with local, state, and federal law enforcement and counterterrorism partners.

Greener: Increase efficiency, reduce emissions, and make better use of resources

Passenger rail has a smaller carbon footprint than its competitors and Amtrak is proving that it can draw riders from both air and auto in places like the Northeast Corridor, the Midwest and California. In

addition, Amtrak is taking action to improve its own Green bottom line by pursuing the following initiatives:

- Conserve energy at buildings and other facilities and reduce diesel locomotive fuel consumption;
- Reduce greenhouse gas emissions by diesel locomotive operations;
- Expand recycling program at facilities, stations and aboard trains and incorporate alternative energy sources such as solar cells and wind turbines where it makes sense to do so;
- Extend electrification to additional routes to utilize low-emission energy generation sources; and
- Purchase more energy-efficient locomotives and extend the life of the existing fleet as warranted.

Healthier: Improve the condition, durability and wholesomeness of every aspect of the company

The health of the company relates to its vital signs — ridership and revenue, the condition of its infrastructure and fleet, financial stability, cost savings and new revenue opportunities, improved business processes and systems and sustained workforce and customer satisfaction.

Amtrak is making enduring investments in all areas of the company to become healthier and grow. To that end, during the next five years, Amtrak will:

State-Supported Services

Building upon existing and developing new partnerships with states to offer new and expanded rail service is a key objective for Amtrak over the next five years. In FY 2008, approximately 47 percent of Amtrak's daily train departures were state-supported, and Amtrak is leveraging its expertise and experience to capitalize on the demand for passenger rail and the opportunities presented by the availability of funds through the American Recovery and Reinvestment Act for passenger rail corridors and high-speed rail.

- Establish agreements for eight service expansions (frequency increases and/or route extensions) through existing state partnerships;
- Form at least two new state partnerships; and
- Increase ridership on state corridors and state financial support as required by federal law.

Reliability

- Maintain Amtrak-owned tracks, infrastructure and equipment in a state of good repair to minimize malfunctions and associated train delays;
- Replace equipment that has reached the end of its life span including 130 single-level long-distance cars, 20 single-level cab cars and 20 electric locomotives;
- Order 470 new single-level cars to replace coaches approaching the end of their life span as funding sources are identified;
- Modernize and replace outdated Information Technology systems and business processes critical to the delivery of service such as for internal business processes and for external reservation and ticketing.

Customer Service: Improve the quality and attractiveness of our service for passengers

Amtrak must offer riders an experience that is convenient, competitive, and pleasant. Convenience and competitiveness are products of trip time and reliability, but customer experience is a product of a range of factors such as accessibility, food service, comfort, and attractiveness.

In addition, customer service is at the heart of Amtrak's objective to maintain and forge new agreements with state and commuter service partners. Amtrak strives to exemplify qualities typically attributed to excellent customer service, such as responsiveness, anticipating needs and a high degree of professionalism in its approach to its relationships with its partners. Because of its depth of knowledge and experience, Amtrak serves as expert advisor as well as service provider.

Through FY 2014, Amtrak will:

- Continue with the "Mobility First" accessibility program to create barrier-free pathways from streets/parking areas to stations, trains and trackside locations;
- Advance self-service reservation booking and ticket delivery programs to implement eTicketing, enhance current Quik-Trak ticket kiosks, better customize the Amtrak.com Web site, and enable ticket retrieval by mobile device;
- Install Wi-Fi internet access first on *Acela Express* trains and subsequently to other services;
- Continue its Route Performance Improvement Program, which determines best opportunities for improvement on targeted routes; and
- Automate and streamline its Food and Beverage Management System to improve product availability aboard trains.

Financial Performance: Improve our bottom line

Amtrak is a government-supported business, and it must not lose sight of the responsibilities that come with taxpayer support. The company has a positive responsibility to ensure that federal and state money is spent in an economical and efficient manner that provides the nation with effective intercity passenger service and protects the investment the nation has made in its railroad. To this end, Amtrak must ensure that capital money is invested in those projects that return value and that sustain our infrastructure and that operating funds be spent efficiently and return the maximum obtainable benefit for the lowest cost consistent with the need to attract customers and develop new business.

In addition, Key Performance Indicators established in the Strategic Guidance will measure the return on investments made by the company such as cost per available seat mile, customer service index of performance, on-time performance, and ridership growth, among others.

National Needs: Participate and assist with disaster relief and mobilization efforts and help advance national policies and plans

Amtrak was created to provide an essential national service and must support the government in moments of national need as demonstrated by agreements with the Federal Emergency Management Agency to provide services during periods of disaster relief and with the Department of Defense to transport troops. In addition, the railroad is expected to support national policies such as increasing the role of passenger rail as part of a more balanced transportation network. To achieve this goal, Amtrak is supporting the development and expansion of intercity and high speed rail networks and is partnering with states to provide the required expert analysis and advice needed to advance these plans.

As Amtrak grows, so does its capacity to meet national needs, such as contributing to national emergency response, congestion mitigation, emissions reduction, and reduction in the demand for foreign oil.

###

Former FRA Official Joins Amtrak

D.J. Stadtler, a former Director of the Office of Financial Management at the Federal Railroad Administration has joined Amtrak as chief of staff to President and CEO Joe Boardman.

Having known Stadtler for xx years during his tenure as FRA administrator, Boardman said, “I have seen D.J.’s clear-thinking skills at work. He possesses the ability to break through issues and identify solutions, and always does so in a calm and respectful manner.”

Boardman added that Stadtler’s role is to help manage some of the corporate issues that arise to help free up more time for him to broaden his exposure to the field and build strong connections across the system. “I learn a lot more in the field than behind a desk, and my goal is to do just that.”

Stadtler Bio info

Tomorrow is Veteran's Day. We observe it on November 11, the anniversary of the armistice that ended the First World War. This day has become a traditional occasion for us to remember the living and the dead who served in the nation's armed forces in time of war. It is a day of gratitude and peace, and it will quickly give way to the holidays that remind us how fortunate we are to live in an age of safety and plenty — holidays such as Thanksgiving, Hannukah and Christmas.

As Americans, we enjoy all the comforts and freedoms our age has to offer. We enjoy them in part because another generation of Americans is serving as many of us once did for the safety of our country. Many are abroad and serving in the field; some are at work in our stations and along our rights-of-way, ensuring the safe passage of our trains. Some of them even combine the exacting work of the railroad with the obligations of the citizen-soldier. Some, although they may not even know it yet, will someday join our ranks here at Amtrak, and when they come, we will be glad to have them.

It is impossible to distill the essence of military life into a sentence, but easy to compress it into a word: that word is "service." We speak of service on the railroad, too, just as we think in terms of "divisions," and this is no accident. The railroad business has always drawn veterans, many of whom find in our company the dedicated fellowship that comes from the pursuit of a demanding business with high standards of performance and individual responsibility. Run through the ranks of Amtrak, and you will find plenty of former soldiers, sailors, airmen and Marines in our shops, bases, trains and stations. We are proud of them, and we're committed to taking care of them, too.

At its foundation, Amtrak was filled with veterans of the Second World War and of the two conflicts that followed it. Since 1971, America has faced two major wars and a host of minor actions, and the end of each has brought new people into the industry. Chairman Carper and I served in Vietnam, and incredible as it now seems to us, the veterans of the Second World War whom we knew as teachers, elder colleagues and commanders are now leaving us, and will soon rejoin the young friends they left overseas. When we walk through stations and shop floors we still see plenty of grey heads — but the grey hair belongs to the Vietnam veterans now, and the young men and women who are coming to Amtrak from the service are veterans of a different war in other places. That war, like all wars, continues to take its regrettable toll, and while we honor the survivors today, we must not forget the dead. Only the living can know the fullness of their sacrifice, for the years and the lives they gave up are their last great gift to us. Many of us are graying now, and when we look back across years filled with work, family and happiness to the scenes of our youth, we hope for two things: one, that all of us can look back on the lives we had led with satisfaction, pride and gratitude; and two, that we can find it in ourselves today to thank God for the sacrifices of the men and women who gave up their lives so that we could enjoy our own.

Sincerely,

Joe Boardman
President and CEO

To Amtrak's men and women assigned at VRE,

I know you are now aware that the VRE has announced that it intends to award a contract to Keolis to operate its service starting July 1, 2010. I am disappointed in this result and want you to know that we made every effort to be competitive and to win this contract. We believe that our response was fair and competitive and provided VRE with an experienced workforce that had a great record.

I realize that you have questions as to what this means for you in the future, I know that I would. First, I want you to know that I consider you all part of Amtrak, and I intend to retain you as a part of Amtrak to the best of my ability and the needs of the company. You have my gratitude and admiration for the excellent customer service and commitment to safety that you have provided in service to the VRE and to their customers. I am proud of your service. And, I know that you will do no less right up the end of our contract with VRE on June 30. I have asked staff to think about what you may need to encourage retaining you in VRE service until that time, and then also to look at the ability for you to exercise your national seniority as the service comes to an end so that you don't miss an opportunity, and we don't have any disruption to your years of service.

When our contract with VRE ends, Amtrak will — as we did when this occurred with MBTA and Metrolink — abolish all the positions at VRE. It is that action that triggers your right under the union agreements to bid for positions using your seniority. That will be the last time you have that right at Amtrak; once you accept employment with Keolis your seniority with Amtrak ends. If you decide to leave Keolis once you have been employed by them — even if it's for just one day — you could only return to Amtrak as a new hire without any of the past seniority that you had earned. I have heard a rumor that you may have been told something different, and it's important to me that I clear that up so that you have the correct information. I need to be clear — just as we have done in similar situations in the past, if an employee decides to be employed by Keolis, his or her employment with Amtrak will be terminated, no leave of absence will be provided and seniority with Amtrak will end at that point.

The next few months will be a stressful period for all of us. I ask you to continue to represent Amtrak until the end of the contract, and then to continue with Amtrak in another role consistent with your seniority. You make up the knowledge and experience that makes Amtrak unique and I value your contribution. This is a new era in passenger rail and Amtrak has a bright future. Our stock is rising and there are opportunities to grow. There are many global companies that are realizing this and they understand what I already know: that our key assets are you — the men and women of Amtrak. With your help and support, I am committed to moving our nation toward greater mobility.

Thank you for all that you are doing.

Joe Boardman
President and CEO

Employees Urged to be Mindful of Cold Weather Risks

As winter approaches and brings with it cold temperatures for much of the system, Amtrak is taking steps to educate employees on how to remain safe in cold-weather conditions as well as how to identify and address potential weather-related medical emergencies.

“When most people think of safety, they tend to think about slips, trips and falls, but fail to acknowledge the hazards of working in cold weather,” said Chief Operating Officer William Crosbie.

Precautionary measures should be taken when working in cold temperatures such as dressing appropriately and trying to stay hydrated by drinking warm liquids. The temperature does not have to be below freezing to cause health problems. Ideal work wear includes multiple layers of clothing, including an insulated and waterproof layer, as well as gloves and a winter hat or hard hat liner. Headwear should also provide protection to the ears and face. Overshoes and/or insulated, waterproof boots are also extremely important for guarding against frostbite.

Initial effects on the body caused by cold temperatures may be mild, such as shivering or numbness, but can quickly escalate to more severe problems such as frostnip (a mild form of frostbite), frostbite and hypothermia.

After shivering or numbness, the first sign of more serious injuries due to the cold include discolored skin — usually whitish, yellowish or grayish. If the skin begins to feel hard or waxy, frostbite may be setting in and medical attention should be sought immediately.

A person with possible frostbite should move to a warm area and gently loosen or remove tight clothing or jewelry that may restrict circulation. Warm the affected area slowly using body heat or warm breath, but do not rub the area or apply dry heat, as this may damage the tissue.

Symptoms of hypothermia include fatigue, confusion, stiff muscles and slurring of speech. This condition can quickly become life-threatening, so medical attention should be sought immediately. The individual should be moved to a warm area and wrapped in blankets. Body-to-body contact will also help to slowly raise the victim’s body temperature. Monitor the victim’s breathing and heart rate, as CPR may become necessary. Do not use electric blankets, hot water bottles or any other kind of artificial heat to warm the victim.

If the person cannot be moved out of the cold, cover them with dry clothing or blankets until help arrives. Providing warm liquids to drink is also helpful.

OSA 09-77, which was issued today, provides further details on working in cold weather. It can be found on the intranet under “Library”→“Service Standards.”

Message from Joe Boardman

Dear Co-workers,

Today marks the 40th anniversary of Earth Day, a movement that has taken on international significance and has changed attitudes all over the globe. As we strive to be a greener railroad, we're examining many facets of the business to help ensure better environmental stewardship.

Just this week, we joined the Oklahoma and Texas state Departments of Transportation in announcing the first-ever test of a cleaner and renewable biodiesel fuel blend to power the *Heartland Flyer*. This was made possible by a FRA grant to trial alternate fuels; the fuel used on the *Heartland Flyer* includes beef byproduct refined into biofuel.

While we currently make recycling available on all trains that provide food service, we aim to increase recycling aboard our trains, in stations and at facilities this year.

As a result of our fuel conservation and emissions-reduction efforts, our diesel fuel consumption and carbon emissions fell by 8.5 percent from 2000 to 2008, while ridership grew more than 27 percent over the same period. And we plan to improve on those efforts each year.

We also plan to reduce utility usage by 2 percent at 10 locations with the highest usage, and are implementing measures to reduce computing energy use by 20 percent by FY '12.

We've also partnered with organizations like The Climate Registry, which has helped provide a framework for our first comprehensive greenhouse gas emissions inventory. We're also

working with Climate Counts, an organization that makes independent assessments of companies' commitment to the environment, and Amtrak was recently awarded a score of 62 out of 100 — the highest among transportation-related businesses.

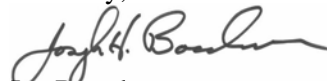

While it often takes innovation to help make the most of our natural resources, there are also things as simple as switching to more energy-efficient light bulbs or printing on both sides of the paper that also make a difference. Half the battle is changing our collective attitudes and changing our behaviors so that we are all more environmentally conscious.

Our Environmental Management Steering Committee, a cross-departmental group of employees that develops strategies to reduce Amtrak's carbon footprint, sets many of these goals. If you have an idea for the steering committee please e-mail Joanne Maxwell at MaxwellJ@amtrak.com.

There are many other goals and accomplishments on the green front, and you can learn more about those in this month's issue of *Amtrak Ink*. But being green is more than measuring up — good environmental stewardship makes us a more efficient operation, a better corporate citizen and a good neighbor to the communities we serve.

"Greener" involves a state of mind that is put to action, and it is what responsible companies need to be. We can all — individually and collectively — help advance our goal of becoming greener.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today we come together at 46 different locations to celebrate our second annual Employee Appreciation Day. I hope that you'll take the time to participate and learn more about what's going on in the company.

We've made a lot of headway in the past year, but I'd like to focus on some of the things we're doing as a company to improve life at Amtrak.

Whether you are a locomotive engineer or a financial analyst, each employee is the power behind the Amtrak brand. You — your ideas, your energy, your know-how — are what makes us America's railroad. And our employees show a loyalty to Amtrak and to the Amtrak family that in my view is uncommon in today's world.

We have our own financial challenges, and as a government-supported business we are fully aware of the responsibilities that come with taxpayer support. But one of the most meaningful investments we can make is in our workforce.

Next month, we'll be unveiling three interconnected resources for employees: the new Human Resources Employee Service Center, the Employee Information Portal and access to the intranet from home for all employees.

Also next month, employees participating in the Fidelity 401 (k) Retirement Savings plan will have new lower-cost options in which to invest, allowing you to save more for retirement. The new options are the direct result of the initiative of our Treasurer, Dale Stein, who made securing these new options for employees among his top priorities.

We're devoting resources toward implementing Safe-2-Safer because the

return on a safer working environment — saving a co-worker from an injury or worse — is employees going home to their families at the end of the work day. With Safe-2-Safer, we're also providing managers ongoing training and helping foster a more collaborative environment. While the full benefits of Safe-2-Safer will play out over time, the result is an enduring change in the way we relate to one another, and a safer and more pleasant place to work.

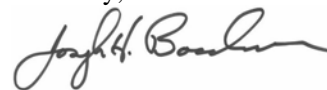

We also offer other resources that are unique to Amtrak. We are among few companies with its own Employee Assistance Program. The benefit of an in-house EAP is that our staff of professional counselors provides confidential support and guidance, but they also understand the unique Amtrak culture.

We also recently marked the 10th annual Operation RedBlock Day, aimed at educating employees about how to promote a drug- and alcohol-free workplace.

Next Saturday, approximately 170 locations in 44 states (including the events in Los Angeles, Chicago, Philadelphia, and Washington) will be hosting National Train Day events — an opportunity to celebrate the American railroad and the people behind it.

These are just a few examples of our efforts to show our commitment to you. We value and appreciate you, and the work you do every day. Thank you and keep working safely.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

I want to update you on some recent developments on the transition with Virginia Railway Express.

We were all surprised by the unexpected announcement this afternoon from VRE that Amtrak would continue to provide Train and Engine crews and operate the commuter service for an additional two-week period beyond June 25.

Our intent all along has been to ensure the continuity of service to the passengers of VRE during this transition.

At this time, we have not finalized an agreement with VRE to provide an extension of service. But we are in negotiations and if an agreement is reached, we would continue to operate through July 9.

As you may know, VRE had proposed a "soft start," which would require that Amtrak would operate the Manassas service only, while the new service provider would operate the Fredericksburg service.

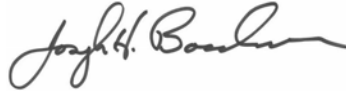

I made it clear that Amtrak would not support such an operation, and that we would not mix union and non-union employees. I told them that it would be solely operated by Amtrak employees, or we would not be party to the agreement. However, our preferred option is for Keolis/VRE to provide full service on June 28 — when they were supposed to.

As I've told the T and E crews currently assigned to VRE service, we have a civic responsibility to the 17,000 daily riders, and we will not allow VRE commuters to suffer a loss in service.

I want our crews to know that I am proud of the work they do and look forward to having them continue to be part of the Amtrak family. We will do our best to keep you updated on further developments.

Thank you for the work you do every day and please keep working safely.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

At about 1:57 a.m. on Sunday morning, a CSX conductor was shot and killed by an intruder who boarded the locomotive while the freight train was stopped at a red signal about four miles outside of the New Orleans Terminal. The engineer was grazed by additional gun fire and played dead while the intruder searched through their pockets. The assailant fled the scene, and an investigation is underway.

Upon hearing about the incident, Amtrak Police Department Chief John O'Connor dispatched four special agents to assist CSX and the New Orleans Police Department with increased security presence. While the *Crescent* does travel through the area, it rarely stops there. Nevertheless, we are closely monitoring activity in the area, and local crews are being briefed to take precautions and to remember to keep cab doors locked. In addition, I've asked that all crews across the system be reminded of safety and security tips during crew briefings this week.

We become so familiar with our daily working environment that it's easy to let our guard down and fall into a false sense of security. Whether it's in New Orleans or anywhere on the railroad, I ask everyone to be mindful of their environment at all times. Sadly, this horrific and senseless act could take place anywhere. Your personal safety and security is paramount — please be watchful, and lock doors that should be locked.

We mourn the loss of one of our brothers and we extend our sympathies to the families of both victims. I will never understand why people commit such horrible acts of violence, but the reality is that it happens, and we must be vigilant and watch out for one another.

Sincerely,

Joe Boardman
President and CEO

June 23, 2010 • Page 1 of 1

Message from Joe Boardman

Dear Co-workers,

Earlier this week, we suffered a high-profile customer service failure in Maryland. One of the MARC commuter trains that we operate for Maryland Mass Transit Administration lost power, along with cooling and ventilation. About 900 people were stuck in a very high-heat environment for about two hours, in some cases taking things in their own hands to improve the situation.

As your President and CEO, I have made a public apology, and called the MTA Administrator, the Maryland Secretary of Transportation, and Gov. O'Malley apologizing and committing to do better. In a letter that we placed on the evening rush-hour MARC trains yesterday, we asked for forgiveness from the MARC passenger population, particularly those directly affected by this failure. Similarly, those involved in this incident have accepted accountability and have committed to improving how we handle these incidents.

We are working in conjunction with MTA to improve service, with managers riding trains, running two locomotives on some trains and other measures so that we're better prepared to troubleshoot if we need to. Just as we have a plan for passenger service recovery in extreme cold weather, we should have the same for severe heat.

This is not about blame — this is about ownership — and there's an important difference. Blame is the culture we're doing away with at Amtrak. It's about ownership, and having the resilience to learn and drive harder to do our very best. That is what we're doing with the MARC operation.

This company is full of daily heroes who make our system work. We get the job done under constantly changing conditions and with daily equipment

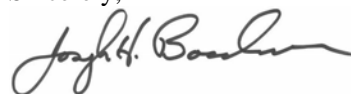

failures, bad weather, or any number of surprises that present significant challenges.

Monday's service failure started out with the same intent. Our people were trying to do the right thing in rescuing the 900 passengers. But it took too long, and the rescue itself went bad when we could not move the stalled train. While our on-board crews were trying to keep people safe, passengers were infuriated that there seemed to be no concern for them. To make matters worse, communication broke down almost everywhere, among our staff, with CNOC, and aboard the train itself.

Are we to "blame"? The answer to that is that we are accountable, and responsible for the safety and security of our passengers. Our recovery effort failed this time. But this experience should serve to strengthen our resolve to learn from the experience, put measures in place — and stick to them — to avoid a repeat occurrence. We must accept responsibility, dust ourselves off and do better. Our confidence in ourselves, and our faith in our ability to correct our course and perform at a higher level has not failed.

We ask a lot of our daily heroes. I thank you for your commitment to provide those who make a choice to ride our trains safe, secure and friendly service. We are all accountable for how we perform and for how — good or bad — that affects others. Please be accountable and maintain that sense of ownership and duty for what you do to make us better each day, and thank you for the work you do to that end.

Sincerely,

Joe Boardman

Message from Joe Boardman

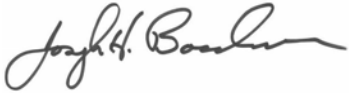

Dear Co-workers,

It is with great regret that I inform you that United Transportation Union (UTU) General Chairman Al Suozzo passed away last night.

I just learned the news during our meeting of the board of directors today and we held a moment of silence in his memory. We were all saddened — he had just attended a meeting here a few weeks ago.

Having begun his career in the railroad industry in 1964, he became UTU General Chairman in 1992. Well-respected by the conductors he represented, he was known for his passion and concern for his members. He presided over numerous contract negotiations and earned the respect of his peers and company officials.

The board of directors and Amtrak offer our condolences to the union and his family.

Sincerely,

Joe Boardman

Message from Joe Boardman

Dear Co-workers,

To support our corporate growth strategy and our goal of remaining the premier operator of high-speed passenger service in the United States, I am creating a new High-Speed Rail department at Amtrak, which will be led by a vice president reporting directly to me.

The board of directors approved this change yesterday at its monthly meeting and we plan to move quickly to fill the new vice president position so he or she can build a department that will focus on pursuing opportunities to expand our high-speed rail operation.

Specifically, this department will work on the planning and development activities that will allow us to significantly increase operating speeds above 150 mph (240 kph) on the Northeast Corridor. It will also pursue partnerships with states and others in the passenger rail industry to develop federally-designated high-speed rail corridors such as the new projects moving forward in California and Florida.

Amtrak's leadership in this area is reaffirmed in the Passenger Rail Investment and Improvement Act of 2008 and we must make every effort to remain in that position.

The increasing demand for passenger rail service means we will face new competition from companies all over the world, but we have

several strategic advantages that we must not waste. We have assets, partnerships and knowledge that others do not. And most importantly we have an extremely skilled team of employees that is unmatched. In short, we are uniquely qualified to meet the goals laid out by President Obama and the administration's *Vision of High-Speed Rail in America*.

Our new High-Speed Rail department will capitalize on these assets to ensure that we keep our position as the most effective, most professional high-speed rail operator in the nation.

We will continue to keep you informed as we develop this new department. In the meantime, please keep up the great work and continue to work safely.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Last Friday morning, an out-of-service MARC train being backed into Washington Union Station collided with a switcher pulling a Dome Car and a private car, as the trains were switching in the yard. The collision sent six people — all Amtrak employees — to area hospitals. Thankfully, all employees were released from the hospitals that day.

The incident investigation has determined that the MARC train passed a stop signal without permission. In addition, preliminary findings show that the assistant conductor, who was responsible for calling the signals to the locomotive engineer, was using a cell phone immediately prior to the collision, in violation of federal rail safety regulations and Amtrak operating rules. That person is currently not performing service, pending the completion of the investigation.

All of us — especially employees in the operating departments — should be familiar with the rules that stem from FRA Emergency Order 26, which prohibits on-duty railroad operating employees from improperly using personal cellular telephones and other distracting electronic devices. A Rules Alert is being distributed to crew bases today to remind employees of the details of how it applies to them.

I say “all of us,” because we are all responsible for our own, as well as one another’s, safety. With the rollout of Safe-2-Safer, we are in the midst of a safety culture transformation. Rules are necessary and must be enforced, but as I’ve said many times, the safety culture we’re developing is not about rules and

“catching” people — it’s about fostering a culture that is committed to identifying and eliminating barriers to safety and unsafe behaviors to prevent injuries in the first place.

Safety is a value — not a rule — that is universally shared and that guides everything we do; every action, every decision. But you can’t impose a value, it’s got to come from each one of us. It’s got to be internalized. Safety is a fundamental value and it comes down to each and every one of us embracing it. It’s easy to relate to, because we all want to go home the way we came in to work. And I know we want the same for all of our co-workers.

Our unions have been cooperative in this regard and I value the relationships we are strengthening as we work together to create a safer work environment.

As I’ve said before in different circumstances, this is not about blame — this is about ownership — and there’s an important difference. Blame is the culture we’re doing away with at Amtrak. Ownership, learning from each other and looking out for one another, help instill a strong safety culture.

Based on feedback from front-line employees and managers alike, I’m encouraged to know that Safe-2-Safer is changing our safety culture for the better. Please keep it up, look out for one another, and thank you for the work you do to accomplish that.

Sincerely,

Joe Boardman
President and CEO

special employee advisory

October 11, 2010 • Page 1 of 2

Message from Joe Boardman

Dear Co-workers,

I am extremely pleased to report to you that we set ridership and ticket revenue records for Fiscal Year 2010, which just ended on Sept. 30.

Thanks to your hard work, we carried 28,716,857 passengers and earned \$1.74 billion in ticket revenue. That's a 5.7 percent increase in ridership and a 9 percent rise in ticket revenue over FY '09. And we beat our previously best year ever, FY '08.

The numbers are important, but it's what's behind them that tells the true story. It's the people — you, your co-workers and the passengers you serve — that make it happen. More and more Americans see passenger rail as the way to get to where they need to go, and when our front line employees put them first, they are the ones that help bring passengers back for another trip. Similarly, all the people behind the scenes — the road foremen, the machinists, the coach cleaners, the marketing officers, among many others — have also contributed to our success.

While our accomplishments are noteworthy, this is no time to rest. We operate in an increasingly competitive industry and we must use last year's success to energize ourselves and continue to drive forward. Just as we must earn the loyalty of the customers who ride our trains, we must work to build stronger ties to our state and commuter customers.

Keep in mind that ridership and ticket revenue are not the only measures of our success in the last year. We aim to be a safer, greener, healthier Amtrak that continually improves customer service and financial performance while

meeting our nation's needs. We strive to be a safer Amtrak, and we're witnessing growing enthusiasm for Safe-2-Safer and the benefits a risk-reducing, more collaborative workforce can bring.

Our efforts toward a greener Amtrak have led to improvements in our energy efficiency. According to the latest data, Amtrak is 20 percent more energy efficient than airlines and 30 percent more efficient than automobiles on a per-passenger-mile basis, improvements on both counts since the previous report.

There are multiple ways we're working toward a healthier Amtrak, whether it's announcing the procurement of 130 single-level long-distance cars or adding the Commonwealth of Virginia as our newest state partner.

One of our more popular customer service improvements is the availability of Wi-Fi on our high-speed *Acela Express* service.

An example of improving our financial performance is the smart revenue management that helped generate more ticket revenue.

And as America's railroad and high-speed operator, we unveiled a vision for next-generation high-speed rail that would help meet national needs by revolutionizing transportation, travel patterns and economic development in the Northeast for future generations.

I want to thank you for everything that you did last year to make Amtrak the preferred choice for so many travelers. As your CEO, it's up to me to report on the year-end results — but when I do, please know that I am representing all of you who had a role in

Message from Joe Boardman

Dear Co-workers,

I am pleased to announce that we selected industry expert and passionate proponent of high-speed rail, Al Engel, to serve as vice president of a new High-Speed Rail department, the mission of which is to advance Amtrak's role as the preferred and premier provider of high-speed rail in America. Al will officially take on his new duties on Oct. 18 and will be based in Philadelphia.

Al will lead further development of our high-speed rail expertise, pursue high-speed rail corridor development opportunities such as the projects in Florida and California in partnership with states and others in the industry, and conduct long-term planning initiatives to improve high-speed rail operations on the Northeast Corridor.

Al is no stranger to Amtrak, the passenger rail industry or high-speed rail. He has more than 40 years of engineering and management experience in transportation, including high-speed rail equipment and infrastructure projects. Some of you may be familiar with his work on the E60CP locomotive procurement and the infrastructure preparation for the *Acela Express* service.

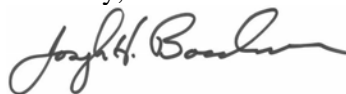

He currently serves as vice president and High-Speed Rail director at AECOM, a global provider of professional technical and management services, where he is serving as senior advisor on a feasibility study commissioned by Amtrak to significantly increase speeds on the Northeast Corridor.

Prior to his current position, he was affiliated with Morgan Stanley as financial advisor. He was the founder, president and CEO of LS Transit Systems — which was later renamed SYSTRA Consulting — and one of the projects he worked on was the California High-Speed Rail Authority Implementation Plan. SYSTRA Consulting is affiliated with the French National Railway and Paris Metro. He also held the position of president and chief operating officer of Atlantic Track and Turnout Co., a steel product fabricator and distributor specializing in rail and track. He began his professional career in the GE Locomotive department, earning positions of greater responsibility up through manager of the Domestic Electric Locomotive business unit.

Al has considerable expertise, is a dedicated advocate for public transportation and shares our conviction that Amtrak plays a vital, leading and necessary role in expanding and operating high-speed rail service across the country.

You'll be hearing more about the configuration of the High-Speed Rail department in the coming weeks and months, and how it fits in with our current organization. We have ample opportunities for synergies and collaboration to expand our presence in the high-speed rail market. Please join me in welcoming Al next month.

Sincerely,

Joe Boardman
President and CEO

Chief O'Connor Testifies Before Senate Committee

Amtrak must focus its efforts on defeating and deterring the most dangerous and likely terror tactics, Vice President and Chief of Amtrak Police John O'Connor told members of a Senate Committee on Wednesday.

O'Connor was invited to appear before the Senate Committee on Commerce, Science and Transportation as part of a panel to provide expert testimony on securing rail and surface transportation networks.

Citing attacks on train systems in Madrid, London, Mumbai and Moscow in recent years, O'Connor stated that future attacks on surface transportation modes would likely occur with the use of an Improvised Explosive Device on a train or in a station, or an active shooter. Accordingly, Amtrak is focused on a growth strategy to address security goals and to make it harder for terrorists to use their preferred strategies to attack stations, trains and passengers.

The plans include strengthening the bomb-detecting K-9 operation, which includes "vapor-wake" teams that can detect residual fumes; increasing the number of baggage screening teams; and bolstering partnerships with federal authorities, including expanding the Visible Intermodal Prevention and Response (VIPR) program with the Transportation Security Administration. The company is also advancing its corporate security goals by using American Recovery and Reinvestment Act funds to assess and fortify vulnerabilities, utilize Station Action Teams and continue to train employees to remain vigilant.

"We are enthusiastic about programs that help us to bring more people, technology and animals to bear on the task of keeping our stations and trains secure," said O'Connor.

Describing the merging of the former Office of Security Strategy and Special Operations and the Amtrak Police Department, O'Connor stated that the new integrated Amtrak Police Department organization would eliminate some duplication of functions and allow better use of personnel and assets, yielding a blend of "customer-oriented policing and robust counterterrorism efforts."

In a letter to Amtrak Police Department employees issued today, President and CEO Joe Boardman pointed out that this change aligns with what many other police departments have done. "These departments have found that they are better able to detect-deter-defend in an integrated public safety and security organization than with separate organizations," he said.

O'Connor's testimony is posted on the intranet, under "News"→ "Legislative," and on Amtrak.com under "Inside Amtrak."

Board Approves Reporting Structure for Labor Relations

The Amtrak board of directors has formalized a change in reporting structure for the Human Resources and Labor Relations departments by approving the appointment of Lorraine Green as vice president, Human Resources, Labor Administration, and Diversity Initiatives, effective immediately.

In addition, the board approved the appointment of Charlie Woodcock to a newly created position, chief labor negotiations officer and assistant vice president. Woodcock will report to Green with respect to labor relations functions; on issues pertaining to labor negotiations and related activities, Woodcock will report directly to President and CEO Joe Boardman.

With the addition of these duties, Green will assume full responsibility for overseeing the Labor Relations department and its functions, as well as support programs for agreement-covered employees.

The decision to make this organizational structure official supports the company's objectives for more effective human capital management. This structure will enable more cohesive management and integration of the activities that influence employees' lives, **including more effective support for agreement-covered employees.**

Board Approves Changes for Labor Relations and Human Resources

The Amtrak board of directors has formalized and made permanent the current reporting structure between Labor Relations and Human Resources that has been in place since January.

As part of the process, the board approved the appointment of Charlie Woodcock to the newly created position of chief labor relations officer and assistant vice president. He was previously assistant vice president of Labor Relations.

Woodcock will report to President and CEO Joe Boardman on issues pertaining to labor negotiations and related activities. On matters related to labor administration, Woodcock will continue to report to Lorraine Green, whose title has been updated to vice president of Human Resources, Labor Administration and Diversity Initiatives.

Green had previously assumed executive responsibility for day-to-day labor administration and support programs for agreement-covered employees. She will retain those duties full-time in addition to human resources and diversity functions.

The decision to make this organizational structure official supports the company's objective to enable more cohesive management and integration of employee programs and practices that provide a more supportive and motivating work environment throughout Amtrak.

ARASA-MW Ratifies Labor Contract

The tentative labor contract with the American Railway and Airway Supervisors Association – Maintenance of Way was ratified this week by the union's membership. Terms of the five-year agreement are patterned after those already reached with other labor organizations.

The wage increases included in the contract will be retroactive to July 1 and union members will receive back pay to account for unpaid earnings to date.

The new contract covers Maintenance of Way supervisors within the Engineering department.

With the ARASA-MW contract ratification, 45 percent of Amtrak's total unionized workforce is now covered by new five-year labor agreements.

Message from Joe Boardman

Dear Co-workers,

Tomorrow, Amtrak will be announcing the purchase of 70 new electric locomotives for use on the Northeast Corridor (including the *Keystone Service*), the first of which will be delivered in February 2013.

The six-year, \$466 million contract has been awarded to Siemens, and will create 250 jobs at its manufacturing plant in Sacramento, Calif., as well as its other facilities in Norwood, Ohio, and Alpharetta, Ga.

Board Chairman Tom Carper and FRA Administrator Joe Szabo will be at the Sacramento facility tomorrow to describe how the new equipment will expand and modernize our fleet. The new equipment will result in improved reliability and better service to our passengers, helping meet the growing demand for passenger rail. The engines will replace locomotives that are between 20 and 30 years old, which many of you know we run very hard.

This news follows the announcement we made in the summer to buy 130 new long-distance rail cars and is the next step in our fleet renewal plan.

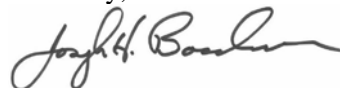

Part of the responsibility of leadership is to ensure that the men and women meeting our mission have the tools they need to do the mission well. Not only does aging and problematic equipment hurt our ability to deliver good service, but I know it also takes a toll on our crews. Expanding and renewing our fleet is not only critical to meeting our nation's transportation needs, but also to creating a safer, greener and healthier Amtrak.

The new locomotives will be equipped with anti-climbing technology and push-back couplers that will help keep the train upright and on the tracks in the event of a collision. In addition, the regenerative braking system in the units will return electricity to the power grid.

As we take delivery of the 70 new locomotives, we will retire 64 older locomotives in our current electric fleet, including 20 DC AEM-7s, 29 AC AEM-7s and 15 HHP-8s. The additional units will be put toward service expansion.

This is an exciting time for our company as we approach our 40-year anniversary. We are making important and lasting changes that will help shape the future of transportation in America. Thank you for all your hard work — let's keep it going.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Operation RedBlock (ORB) takes on a heightened level of attention and importance near the holidays. Many of us attend Christmas parties and other events where alcohol is part of the celebration. ORB volunteers make an important contribution all year long, but especially at this time of year.

Amtrak has an excellent record with ORB, and we know the program works. I am pleased with what I see in that regard.

However, management has not done a good job meeting FRA requirements, and they have told us that we must correct those deficiencies if we are to continue to have a qualified program. Our Office of Inspector General (OIG) has also told me that I need to take action to correct the management of the program.

I strongly support Operation RedBlock, so I asked both the FRA and the OIG to attend a meeting with the RedBlock executive committee and several other union leaders.

That meeting took place on Tuesday afternoon, and there were not a lot of happy faces — not among union, management, FRA, or OIG. But I spent the time needed to explain that I was disappointed with how we as management had been unable to provide the data support that supplied the authenticity for which we were being criticized. I also said that we could — and would — change that, and I made a decision to take this away from management altogether and turn the program over to those whom it belongs to, the men and women of Amtrak.

But I'm not going to just turn it over and walk away. I intend to hand it over and provide financial support for three co-coordinators that are geographically dispersed and are chosen for set two- or three-year terms, rotating among our unions. These would be full-time positions within the unions and paid for by the company.

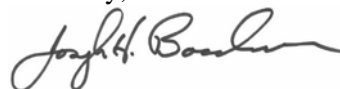

This new structure will come into being sometime in March of 2011, and until then it will continue to be administered by management so that there will be no gap.

I believe ORB will become stronger. The importance of the program to the health, welfare and safety of those who see its benefits every day will provide the motivation to get the data right.

I thank both management and our unions for supporting RedBlock. Together, we will gain the endorsement of both the Federal Railroad Administration, who is required to authenticate the result of all RedBlock programs, and of our own Inspector General, who is working hard to meet a high professional standard in his interaction with the company.

You'll be hearing more about this shift in the coming months. In the meantime, thank you for what you do every day, and please be careful during this busy holiday season.

Sincerely,

Joe Boardman
President and CEO

Jagodzinski Named to New Position of Transportation General Manager-East

Chris Jagodzinski has been tapped as the Transportation department's general manager-east and will report directly to Vice President of Transportation Richard Phelps. Previously, Jagodzinski was senior director, System Operations.

Mike Frazier, director, System Operations, will serve as acting senior director until a permanent replacement is named.

"In his new role, Chris will oversee all aspects of day-to-day railroad operations and business performance within the Central, Northeast, Mid-Atlantic and Southern Divisions as well as NEC Service Operations and assume supervisory responsibility for the respective general superintendents," explained Chief Operating Officer William Crosbie. Jagodzinski will be based in Wilmington, Del.

The position was created to streamline the department's senior management structure and allow the vice president to focus more attention on high level policy and management issues. The department is also conducting a search for a general manager-west to oversee the Southwest and Pacific Divisions.

"I'm excited to have Chris as general manager," said Phelps. "His unique skill set, railroad experience and focus on safety make him an ideal candidate to lead performance

and customer service while supporting the Safe-2-Safer rollout."

Jagodzinski joined Amtrak in 1989 as an assistant transportation manager in Boston while a co-op student at Northeastern University. Since then he has served in various roles including trainmaster, terminal superintendent and assistant chief mechanical officer. Jagodzinski graduated cum laude from Northeastern with a bachelor's degree in transportation and logistics.

A Message from Joe Boardman

Dear Co-workers,

Earlier today, I announced that we had the best ridership of any first quarter (October through December) in Amtrak history, breaking the previous record set in FY 08 — our best year ever.

I made the announcement as part of my remarks at a Transportation Research Forum event, where I also told the group that the state of the railroad is strong and that we are optimistic.

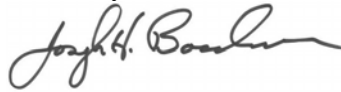

The days of just surviving and uncertainty about the future of passenger rail are behind us. We are focused on growth, and we are making enduring investments to maximize the history-making opportunities before us.

I've attached the speech and hope you'll take the time to read it. It reflects all of the things we're doing this year to secure our position as the provider and partner of choice for commuter, intercity passenger rail and high-speed rail service.

You'll be hearing more from me soon, when the FRA makes its announcement on the grant awards to states for intercity and high-speed rail development. We'll also be submitting our Legislative and Grant Request, which will include a very comprehensive fleet plan.

In the interim, thank you for doing your part to deliver excellent service and please work safely.

Sincerely,

Joseph Boardman
President and Chief Executive Officer

A Message from Joe Boardman on Safety Goals

Dear Co-Workers,

Since we launched Safe-2-Safer last year, I've been telling you about how we are going to change the way we approach safety at Amtrak, and that we would be doing so based on the input you provided us through the Safe-2-Safer survey and focus groups.

One of the things we heard from you is that there is sometimes reluctance to report injuries because to some employees, it appears that blame and punishment are the primary response to reporting an injury. This kind of thinking is one of the things Safe-2-Safer aims to change, and I'm happy to announce to you the first major step we're taking to usher in a new way of doing things.

For many years, Amtrak has measured its safety performance by using injury ratios. While working toward a goal is important, the goal and the numbers in some instances may have contributed to a mindset more focused on managing the ratio rather than truly identifying and reducing the risks that cause injuries.

So effective immediately, injury ratios will no longer be associated with safety goals. We must still record this data to comply with FRA requirements, but the performance of managers and supervisors will no longer be graded on how many injuries occur within their group or department. Instead, we will focus on improving the activities that reduce risk and prevent injuries.

The Executive Committee and I have made this decision because it's vital that employees feel comfortable reporting injuries without fear of being

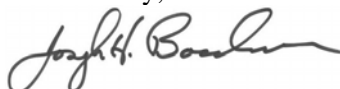

reprimanded or impacting their co-workers' ability to meet a ratio goal. We want managers to be more concerned with the welfare of their employees and creating safe working environments, not statistics. Knowing when and how all injuries occur is the only way we can take action to reduce risks and increase our chances to go home to our families and loved ones every day.

In the absence of injury ratios, we still need ways to measure our safety performance and we are in the process of developing new metrics. Until then, managers and supervisors will have interim safety goals for FY '10 that focus on risk reduction.

Our hope is to someday reach a point where no one in our company gets injured on the job. But instead of celebrating and rewarding people for not reporting any injuries, we want to recognize employees who work hard to reduce risk as much as possible and learn from them what they're doing right.

Safe-2-Safer will provide us all with the tools and knowledge to make Amtrak the safest workplace possible, but it will take commitment from all of us to put them into practice. Changing things that have been in place for so long will not happen overnight, but I have total confidence that we can make it happen together.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

To say that the summer heat has taken its toll on our equipment would be an understatement. While we're taking some steps to address the equipment issues, we're also taking action to put our passengers first when things go wrong.

And they do go wrong. We run our aging fleet very hard, and we have other operational issues that challenge us every day. The key is to make sure that we are prepared to manage service recovery well — and we usually do.

But whether it's a service recovery scenario or making sure that a train is properly cleaned before it departs, each of us is accountable for carrying out the duties of our job. That collective spirit of duty and ownership — a culture of accountability — is what makes great companies great.

There are significant differences between blame and accountability. Blaming is centered on assigning fault, and involves finger-pointing and making excuses. When we blame, we stop communicating effectively and lose our opportunity to get to the heart of the problem. It's negative and rarely leads to real, sustainable improvement. That is not the Amtrak we want and need to be.

On the other hand, accountability is about taking ownership, learning from mistakes and taking action because we strive for a higher standard. Being accountable liberates us to focus on the root cause of an issue and take steps to improve. You can't fix something unless you've taken a look at what caused the problem, not simply who caused the problem.

We must do away with the blame game because it stands in our way of delivering a better service, and fostering an environment driven by responsibility and ownership, not scapegoating.

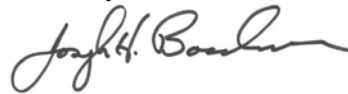

When something goes wrong, we must focus on what drove someone to make a mistake. We need to remember that we rely on one another to run this railroad and that negative events are often not just attributable to just one person. But we are each responsible for doing our part, and if we're not accountable, then something needs to change.

This accountability management philosophy is central to Safe-2-Safer, which is designed to create a safer and more secure workplace by engendering a more collaborative environment.

And if you think that it's just talk, consider the source and my own actions. We have owned up to our mistakes, I have made public apologies for our failures, learned from the experience and we have taken steps to institute measures to avoid repeating them.

I thank you for your dedication. Please work safely and be careful in the summer heat.

Sincerely,

Joe Boardman
President and CEO

Employee Service Center Down Due to Power Outage

The Employee Service Center (1-888-694-7372) is currently down due to a commercial power outage that occurred this morning.

Delmarva Power has advised Amtrak that it expects to restore power in about 12 hours, so it is anticipated that the Employee Service Center will resume operations tomorrow morning. An update will be provided if that changes.

E-mails (hresc@amtrak.com) sent today will be answered in the order they were received once power is restored.

Employees can continue to use the Employee Information Portal on the Amtrak intranet to conduct certain Human Resources functions.

We apologize for the inconvenience and thank you for your patience.

Amtrak to Purchase 130 Rail Cars for Long-Distance Fleet

Amtrak has agreed to buy 130 new single-level rail cars to support national long-distance service as the first step in a long-term, comprehensive fleet renewal plan. The five-year, \$298.1 million contract was awarded to CAF USA, which will manufacture the cars in Elmira, N.Y., where it will add 575 jobs to support the work. The first car is scheduled to roll off the assembly line in October 2012.

“This major equipment purchase demonstrates our strong belief in the future of intercity passenger rail in America and Amtrak’s leading role in meeting this critical national transportation need,” said President and CEO Joe Boardman.

Included in the purchase are 25 sleepers, 25 diners, 55 baggage cars and 25 baggage/dormitory cars. They will replace and supplement the existing fleet. The new equipment will also allow Amtrak to retire some of its oldest cars, which have been in service for over 60 years.

“Passengers will have a better experience traveling with us but these new cars will also make it easier for our crews to provide great service,” said Boardman.

The new equipment will have modern interiors with better layouts along with better lighting, more efficient HVAC systems and improved accessibility for passengers with disabilities.

Passengers will also benefit from additional power outlets and bicycle racks in the baggage cars.

The first year of the five-year contract will be paid for with \$29.8 million from Amtrak’s current revenues which are running above budget estimates due, in part, to ridership that is on a record-breaking pace. Amtrak will seek to fund subsequent years of the contract with other sources such as loans or direct Congressional appropriations.

This equipment purchase is just the first step in Amtrak’s multiyear Fleet Strategy Plan to replace its entire fleet of passenger rail cars and locomotives over the next 30 years and help support the growth of a domestic rail manufacturing industry. Amtrak is currently reviewing bids to replace many of the electric locomotives used along the Northeast Corridor and may make a contract award later this summer.

CAF USA, along with its parent company, Spain-based Construcciones y Auxiliar de Ferrocarriles, is an experienced rail car manufacturer for the global market. CAF USA currently produces rail equipment for several U.S. transit systems at its Elmira, N.Y., facility.

Message from Joe Boardman

Amtrak set a record last week. We ordered 130 long-distance single-level cars to support our East Coast service. It has been 15 years since our last order for single-level long-distance equipment, and back then it was the Viewliner Sleeper.

This order was preceded by releasing a Fleet Strategy Plan this past February, which itself set a record, because it is the first of its kind for Amtrak and it provides all of our supporters and critics something they have been asking for.

We had record snow this winter on the East Coast; we are having record heat this summer. These extremes are hard on our equipment. They are also hard on our passengers and our commuter customers, and of course they make the jobs that we do more difficult.

Even so, we have been getting record support from the Administration and from Congress.

Some of us now see an opportunity to set another record. In FY 2008, Amtrak set a ridership record of 28.7 million riders. Now the executive committee and the board of directors are being told by our scorekeepers that we could break that record this fiscal year, which ends on Sept. 30. But it will be close.

It would be a very good thing for us to be able to do that when gas prices are much lower than they were in 2008, and the economy is still

suffering some lag with the recession. Setting a new ridership record in this environment validates Amtrak and our supporters in the most visible way.

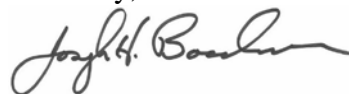

We can do this. We recently tied another record in that we now have 65 percent of the air/rail market between New York and Washington, D.C. The only other time we've had market share this high was in the months immediately after 9/11.

To set a new record it will take all of us — every craft, every department, every person — doing what we can to help take care of our passengers, to help our trains look better and operate better, to keep our stations clean, to encourage others to ride Amtrak. We need to help each other and look out for each other, and that also means our customers.

Let's push ridership over the 29 million mark for this fiscal year.

Thank you to every one of you for all that you do every day.

Sincerely,

Joe Boardman
President and CEO

Message From Chairman Tom Carper

Dear Amtrak employees,

I am extremely pleased to inform you that the board of directors has unanimously agreed to retain President and CEO Joe Boardman for another two-and-a-half years.

Since he was tapped for the job in November of 2008, Joe has set out to provide Amtrak the leadership, vision and stability needed to guide the railroad into this new era of passenger rail.

A couple of weeks ago, Joe told you about a Strategic Guidance document that sets the foundation for Amtrak's FY 2010-2014 Five Year Financial Plan (you should read them — both are posted on the Intranet and on Amtrak.com). Combined, the two documents encompass the strategy for growth and for maintaining of position as the service provider in an increasingly competitive industry.

Joe's current focus includes enhancing safety, improving the reliability of today's services, reducing trip times and increasing speeds, making targeted and effective infrastructure investments, and ensuring the delivery of quality customer service.

Through Joe's leadership, Amtrak is further developing our relationships with state, commuter and other partners. To that end, Joe will continue to work

closely with the Obama administration and states to develop a network of high-speed intercity corridors. His longer-term vision for Amtrak involves implementing a fleet plan to replace

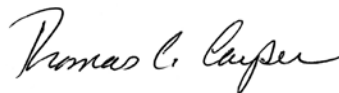

aging locomotives and cars, adding frequencies to current routes and developing service to new markets.

Joe takes an active interest in the Amtrak workforce, visiting facilities and meeting many of you. He is a part of the Amtrak family and is invested in Amtrak's success. He is dedicated to building and strengthening relationships — from states to labor organizations — while striving for a safer, greener and healthier Amtrak.

On behalf of the board, I thank Joe for his commitment and service to Amtrak in this exciting era for passenger rail in America.

single most important thing this board can do for Amtrak at this time is to give it the tools for sustained stability, and key to that is a talented CEO whose leadership will drive continued improvement and growth in the coming years.

Sincerely,

Tom Carper
Chairman, Board of Directors

Message From Board Chairman Tom Carper

Dear Amtrak employees,

I am extremely pleased to inform you that the board of directors has unanimously agreed to retain President and CEO Joe Boardman through 2013.

Since he was tapped for the job in November of 2008, Joe has been a strong and visible leader dedicated to providing Amtrak the vision and stability needed to guide the railroad into this new era of passenger rail.

Joe's focus on a safer, greener and healthier Amtrak will enhance safety, improve the reliability of our services, reduce trip times and increase speeds, yield targeted and effective infrastructure investments, and ensure the delivery of quality customer service. And as we near the end of the fiscal year, it appears we will rival our all-time-high ridership and ticket revenue record from FY 2008.

With the implementation of Safe-2-Safer, he has dedicated himself to creating a safer and more collaborative working environment. His sincere desire to build a culture of accountability and ownership is evident in his own words and deeds.

Through Joe's leadership, we announced last week the purchase of 130 new single-level cars for long-distance service, the first step in making a long-term fleet plan that was issued in February a reality.

Joe is also strengthening our relationships with state, commuter and other partners to add frequencies to current routes and develop service in new markets. In addition, he is setting the stage for Amtrak to be a competitive force as we expand our role in new

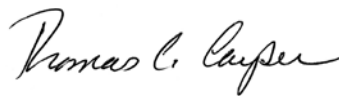

markets as America's only high-speed rail operator.

In addition, Joe takes an active interest in the Amtrak workforce, visiting facilities and meeting many of you. He is a part of the Amtrak family and is committed to building and strengthening relationships, from states to labor organizations.

As you may know, this month we welcomed three new members — Anthony Coscia, Bert DiClemente and Jeffrey Moreland — to the board. We were all proud to make giving Joe a strong vote of confidence one of this new board's first decisions.

On behalf of the entire board, I thank Joe for his commitment and service to Amtrak and look forward to working with him in the coming years.

Sincerely,

Tom Carper

Message from Joe Boardman

Dear Co-workers,

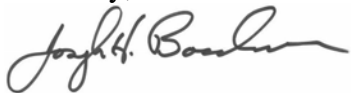

Last week, I told you that I would update you on our negotiations with Virginia Railway Express to continue to provide Train and Engine crews and operate the commuter service for an additional two-week period. Despite an unexpected announcement issued by VRE last Thursday that an agreement had been reached, we were still in negotiations at the time.

Since then, the negotiations have completed and yesterday Amtrak signed an agreement to continue operating both VRE lines through July 9, a two-week extension of the existing agreement.

VRE requested the extension because of the new service provider's inability to assume operations as scheduled on June 28, and our priority is the continuity of service to the VRE passengers during this transition.

I thank our VRE-assigned crews for their dedication and know that they will continue to deliver the professional and outstanding service for which they are known.

Sincerely,

Joe Boardman
President and CEO

Bill Duggan Named to New Position of Transportation General Manager-West

Railroad industry veteran Bill Duggan will become the Transportation department's general manager-west effective July 12, and will report to Vice President, Transportation, Richard Phelps. Duggan was most recently vice president and general manager of rail operations for New Jersey Transit.

Prior to joining New Jersey Transit in 2002, Duggan was vice president of operations and customer service for Amtrak's West Region when the company was organized by strategic business units.

"Bill knows our stakeholders and partners in the West and has a wealth of experience in commuter operations. He's the perfect candidate to maintain our strategic partnerships and manage the general superintendents in the Southwest, Pacific and Pacific Northwest Divisions," said Phelps. "But just as importantly, he has the open, honest and collaborative leadership style that we're trying to build in all our managers through Safe-2-Safer in order to transform our culture."

Duggan will be based in Oakland, Calif., and will work closely with Chris Jagodzinski, who was hired as the general manager-east in February.

The general manager positions were created to streamline the Transportation department's senior management structure and allow the vice president to focus more attention on high level policy and management issues.

Phelps also noted that Safe-2-Safer is now beginning in western divisions and one of Duggan's priorities will be to help implement the management training and peer-to-peer observations known as the Behavior Accident Prevention Process, or BAPP.

Duggan started his railroad career with Penn Central in 1973. He joined Amtrak in 1974 and was promoted to various leadership positions in station operations and passenger services in numerous locations including Washington, D.C., Oakland, Seattle, Boston and Chicago.

Labor Contracts with ASWC and ATDA Ratified

Tentative labor contracts with the Amtrak Service Workers Council (ASWC) and American Train Dispatchers Association (ATDA) were ratified last week by each union's membership and new wage increases included in the agreements will go into effect July 1. Terms of the five-year settlements are patterned after those already reached with other labor organizations.

The new contracts cover On-Board Service employees along with Train Dispatchers and Power Directors.

With the addition of ASWC and ATDA, Amtrak now has new agreements in place covering nearly 7,500 employees.

Message from Joe Boardman

Dear Co-workers,

As many of you know all too well, we are currently experiencing a rash of engine problems — particularly with the electric locomotives on the Northeast Corridor — that is seriously affecting the quality of our service.

The combination of high temperatures and the fact that our locomotives are old and hard-run is resulting in mechanical failures. But saying that this is what happens to aging engines when it's hot is not an acceptable answer. We simply cannot afford any level of complacency on this.

To that end, we have increased the number of mechanical technicians riding Northeast Corridor trains to minimize customer disruptions when equipment failures do occur. Who rides when and where is the result of a daily evaluation based on weather conditions, locomotive type, history and other operational conditions.

To help address the restoration of Head End Power when an engine loses motive power, the Mechanical department is beginning to replace the current mechanical output contactor — the mechanism that can restore HEP to the cars after the main circuit breaker trips — with an electric one on HHP-8 and AEM-7 AC locomotives. This replacement will make it a lot easier to reset HEP and to restore it more quickly, and installation is expected to be completed on the electric fleet by the end of the calendar year.

Modeled after a Mechanical Reliability Bad Actor team for the diesel engines in Chicago, we've established another team for electric locomotives in

Washington to identify the root causes of failures for engines that are chronically breaking down. The team in Chicago has processed more than 40 units with over 7,000 days reported defect-free, so I am hopeful that we'll have similar success on the NEC.

On July 14, we will be expanding Maintenance Events Analysis Program training to Ivy City for some mechanical technicians. MEAP is a relatively new program that provides real-time fault monitoring for our electric locomotive fleet, so that each facility can better diagnose and troubleshoot en-route problems.

In addition, about two weeks ago Engineering's Electric Traction group installed recording volt meters at the Union substation to monitor the voltage for irregularities that would result in a service disruption or mechanical issue. None have been detected, but they will continue to closely monitor the voltage until the number of failures is reduced.

While the recent wave of engine failures is taking place on the Northeast Corridor, we've recently dispatched technical expertise from Chicago to the Southern and Mid-Atlantic divisions to see how we can better support the diesel fleet. In addition, the diesel Process Focus Team is renewing its efforts to address issues with the propulsion system, the largest contributing factor to diesel engine failure.

I know these failures take a toll on our on-board crews. I know that our mechanical forces work hard to maintain equipment that is way past its prime. This is not about pointing fingers, it's about knowing that we CAN do better

and putting our minds together to make things right.

I have communicated to Congress the urgency of replacing our aging fleet and the situation we're facing today is dire. So we are moving forward with the purchase of new equipment and we expect to procure between 20 and 60 electric locomotives in the near future. But please keep in mind that even as we press forward on buying new equipment, we won't take delivery for another two to three years.

We're taking steps to address the mechanical issues that are affecting our service. To our front line employees, I thank you for your dedication. I know it can be challenging when the equipment is failing — it's in the tough times that it's extremely important to maintain our professionalism.

I thank you for working hard to do that and want you to know that we're taking steps to provide you and our passengers with healthier equipment.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

I know you've been hearing a lot from me about our MARC service lately, but I want to keep you in the loop. Whether you're in Seattle, New Orleans or Jacksonville, I want you to know what's going on and how this relates to how we work as a company.

Last night, MARC Train 538 failed to make a scheduled stop at the Odenton, Md., station, stopping about three car lengths past the station. Because of the presence of another train down the track, the train could not be backed into the station. Instead, it proceeded to the next stop, BWI, where passengers were transferred to an *Acela Express* train that made a special stop (it normally doesn't stop there) to take these inconvenienced passengers back to Odenton.

The Maryland Transit Administration Administrator, Amtrak senior managers and I were at the Odenton station this morning apologizing to the passengers who were affected by the 30-minute delay last night. Some of those passengers told me that they were satisfied with our response and that we had made swift arrangements to get them back to their destination. Don't get me wrong, there were plenty of unhappy customers, and I don't blame them.

The Maryland Secretary of Transportation — who was aboard Train 538 last night — delivered a message to MARC passengers this afternoon and I understand her frustration.

Missing the station is certainly a mistake, the incident is under review, and we are accountable for it. However,

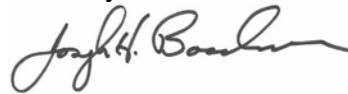

what also happened last night was service recovery done right. Why is this important? It's important because we put the passengers first.

This is not a good situation by any means. What I want you to know — regardless of where you work — is that we have taken ownership of our failures and mistakes, we are investigating them and we are going to fix what is broken. We don't make excuses and don't point fingers; we own our mistakes as much as we own our successes.

We transport people. I know the equipment, on-time performance, and other issues are very important. But people come first and they should always come first when we are making operational decisions — especially in service recovery scenarios.

To the many of you who do put our passengers first — thank you for your dedication.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

As many of you know all too well, we are currently experiencing a rash of engine problems — particularly with the electric locomotives on the Northeast Corridor — that is seriously affecting the quality of our service.

The combination of high temperatures and the fact that our locomotives are old and hard-run is resulting in mechanical failures. But saying that this is what happens to aging engines when it's hot is not an acceptable answer. We simply cannot afford any level of complacency on this.

To that end, we have increased the number of mechanical technicians riding Northeast Corridor trains to minimize customer disruptions when equipment failures do occur. Who rides when and where is the result of a daily evaluation based on weather conditions, locomotive type, history and other operational conditions.

To help address the restoration of Head End Power when an engine loses motive power, the Mechanical department is beginning to replace the current mechanical output contactor — the mechanism that can restore HEP to the cars after the main circuit breaker trips — with an electric one on HHP-8 and AEM-7 AC locomotives. This replacement will make it a lot easier to reset HEP and to restore it more quickly, and installation is expected to be completed on the electric fleet by the end of the calendar year.

Modeled after a Mechanical Reliability Bad Actor team for the diesel engines in Chicago, we've established another team for electric locomotives in

Washington (as part of the current electric Process Focus Team) to identify the root causes of failures for engines that are chronically breaking down. The team in Chicago has processed more than 40 units with over 7,000 days reported defect-free, so I am hopeful that we'll have similar success on the NEC.

Alleman to Fill New Senior Engineering Position

Steve Alleman, formerly the general superintendent of the Mid-Atlantic Division, has been named to the newly created position of deputy chief engineer-special projects.

In this Philadelphia-based role, he will report to Chief Engineer Frank Vacca and manage the implementation of the department's major special projects such as the expansion of Positive Train Control on the Northeast Corridor (NEC) and the Michigan Line, construction related to compliance with the Americans with Disabilities Act and overseeing the NEC Environmental Impact Assessment process.

According to Chief Operating Officer William Crosbie, the position was created to meet the increasing volume of work for the Engineering department thanks to additional capital funding from the Recovery Act and infrastructure projects required in other federal legislation.

"We need a proven leader with the ability to manage these major projects on-time and on-budget," said Crosbie. "But just as important, we want someone who demonstrates safety leadership, is able to work collaboratively and is committed to being a teacher and mentor to employees under his or her supervision. Steve is that person."

Prior to becoming general superintendent in 2008, Alleman served as deputy chief engineer for the Fire & Life Safety Program. He originally joined Amtrak in 1977 as a trackman and has worked in a variety of roles in the Transportation and Engineering departments during his career. Alleman holds a bachelor's degree from Virginia Tech.

Mike Sherlock, superintendent of operations, is the acting general superintendent for the Mid-Atlantic Division until a permanent replacement is named.

Please post on bulletin boards and distribute at safety briefings.

Supplemental Funding Request for Equipment Sent to Congress

*Boardman Testified on FY '11
Budget at House Subcommittee
Hearing*

Amtrak submitted to Congress yesterday a supplemental request to its FY 11 Grant and Legislative Request for \$446 million for the purchase of new equipment.

The \$446 million is in addition to Amtrak's FY '11 request made in February for \$2.1 billion, which is in line with the level recommended in the Passenger Rail Investment and Improvement Act.

President and CEO Joe Boardman focused his testimony today before a House Appropriations Subcommittee on the fleet plan released by Amtrak in February. Boardman noted that the plan "supports the administration's stated intent to develop a domestic rail manufacturing capability, and we do so by projecting long-term large scale procurement streams that will nurture and sustain suppliers."

He added that it will also provide an affordable means for states to add their purchases to our own, with unit cost savings for everyone, especially as the demand for more passenger rail service continues to grow.

In addition, Boardman noted that between 2002 and 2008, Amtrak ridership increased by 32 percent to record-levels and the railroad handled the new passengers without buying a single piece of new equipment.

The \$446 million would set the plan in motion, and fund acquisitions, including 130 single-level long-distance passenger cars and 15 electric locomotives. The procurement process for this equipment was initiated last year.

Citing the equipment's age and the fact that it is the hardest-run in the industry, Boardman stressed the critical need for new equipment.

Boardman's testimony is posted on the intranet under "News" → "Legislative," or on Amtrak.com under "Inside Amtrak."

Joe Boardman Elevates Police Department to Executive Level

President and CEO Joe Boardman announced that effective today, Amtrak Chief of Police John O'Connor will report directly to him, a move that elevates and gives greater visibility to police and security issues at the executive level.

"It's important that matters pertaining to the security of our workforce, passengers and assets be given a direct line to the CEO," said Boardman.

O'Connor oversees all law enforcement and security activities at Amtrak, consisting of Patrol, Special Operations, and Corporate Security divisions.

"Chief O'Connor has built a professional policing organization and ties with local, state and federal agencies to extend the reach of the APD — it's that kind of vision and leadership that he is now applying to counterterrorism polices and strategies," added Boardman.

Until now, the department resided in Operations under Chief Operating Officer Bill Crosbie.

"Our operating departments will continue to work closely with Chief O'Connor and his department to help safeguard our system," added Crosbie.

This shift represents another step in the formalization of the consolidation of the Amtrak Police Department and the former Office of Security Strategy and Special Operations.

Please distribute at all safety meetings and post on all employee bulletin boards.

Amtrak Signs Final Agreement to Operate Metrolink Service

Amtrak today executed a final contract with the Southern California Regional Rail Authority to operate Metrolink trains on all seven lines of the Los Angeles-based commuter rail agency beginning June 26, 2010.

The final agreement provides for an initial four-year operating contract with the potential for two additional three-year extensions. Amtrak will provide the Train and Engine crews — and related management and support staff — required to operate Metrolink trains. The 512 route-mile network covers six counties throughout the Los Angeles region.

SCRRA decided to enter into this contract with Amtrak because of the railroad's unique qualifications and experience in intercity and commuter rail operations, its excellent safety performance, its present operation of intercity trains over four of the seven lines that comprise Metrolink service, and its prior experience as the original operator of Metrolink trains from 1992 to 2005.

"We are pleased to move forward with this board action," said Metrolink CEO Eric Haley. "The depth of relevant experience and management support Amtrak has for our operation is unique in the passenger rail environment and we look forward to working with them again in this capacity."

"Amtrak is proud of our safety record and we are dedicated to providing excellent and efficient service to Metrolink and its passengers," said Amtrak President and CEO Joseph Boardman.

Over the coming weeks and months, Amtrak will work closely with Metrolink, Metrolink's current operator and its employees, and other contractors to ensure a smooth transition.

Please distribute at all safety meetings and post on all employee bulletin boards.

Message from Joe Boardman

Dear Co-workers,

On Friday, April 30, we will celebrate our second companywide Employee Appreciation Day. We instituted Employee Appreciation Day last year to express our thanks for what you do for the company — it's just one way we can show our commitment to you.

We're making many long-lasting investments to position the company for growth, including investments in our workforce. I am committed to helping make Amtrak a more collaborative and unified company, because each one of us has a role to play in our collective success.

We want Employee Appreciation Day to be meaningful and beneficial to you, so we'll provide information, tools and resources that we hope you'll find useful.

After last year's event, I asked for your feedback about Employee Appreciation Day so we could understand what was valuable to you at the events and how we could improve. Some of you took the time to send your thoughts and we have used your feedback to improve this year's program.

At 46 locations throughout the system, we will host events to recognize our many collective accomplishments over the past year, while providing information and resources to help us become safer, greener and healthier — both personally and professionally.

Specifics will vary by location, but planned activities include personal finance and retirement planning sessions with representatives from Fidelity

Investments; health and wellness screenings from Aetna and United Healthcare; "green" tips from local energy conservation organizations; and safety tips and updates from Safe-2-Safer, Operation RedBlock and Operation Lifesaver. We will also be providing information about the new Employee Information Portal, a new Employee Service Center, and how all employees will soon be able to access the company's intranet from home — all aimed at better serving you.

One of the other things that many of you liked last year was the "Did You Know" booklet that offers company information and discounts to Amtrak employees on services from AT&T, Verizon, Carnival Cruise Lines, Pro-FLOWERS, Hertz, Budget and other companies. We've expanded that resource this year to make it even more valuable.

I plan to visit some of our locations in Florida on April 30 (I'm still working out the schedule), so that I can spend that day with some of you. It is a wonderful opportunity to provide leadership for this company today. From all the members of the Executive Committee, the Board of Directors and from me as your CEO, I hope that you are seeing and understanding a new appreciation for what you do every day and not just during this day dedicated to it. Feel free to ask us questions, voice your concerns or just say hello.

Thank you all for your dedication. Please keep up the great work and, as always, work safely.

Sincerely,

Joe Boardman
President and CEO

Commer and Sherlock Named General Superintendents

Amtrak has announced the appointments of Jay Commer and Mike Sherlock as general superintendents of the Pacific and Mid-Atlantic divisions, respectively.

Previously, Commer was principal officer, state contracts, and acting superintendent, Caltrain commuter operations. Sherlock was superintendent of operations and acting general superintendent of the Mid-Atlantic Division.

Vice President of Transportation Richard Phelps explained that he and the executive committee are dedicated to promoting employees who have a leadership style based on collaboration, communication and teamwork in order to build a more unified culture within the company.

Additionally, some of Amtrak's largest commuter partners operate in the Mid-Atlantic and Pacific divisions, which influenced the selections.

"Mr. Boardman is devoted to growing our railroad, and a key part of his strategy is expanding our operating partnerships despite increased competition from other companies," said Phelps. "I am confident that both Jay and Mike have the expertise and commitment to provide the best possible service to our state and commuter partners."

Sherlock began his career with Amtrak as a block operator in 1976. He held positions in the Rules department, Crew Management and System Operations prior to joining the Mid-Atlantic Division. He will report to General Manager-East Chris Jagodzinski.

Commer will temporarily report directly to Phelps until a general manager-west is appointed. Commer joined Amtrak in 1986 as a locomotive engineer and has since held a variety of positions including road foreman and general manager of the California Corridor.

Tentative Agreement Reached with ATDA

Amtrak has reached a tentative agreement on a new labor contract with the American Train Dispatchers Association (ATDA) covering the period of January 1, 2010, through January 1, 2015.

The new contract must be ratified by the union membership and will cover Train Dispatchers, Power Directors and Load Dispatchers on the Northeast Corridor.

In addition to earlier tentative agreements with the International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International Union (TCU), Amtrak now has tentative agreements with five of the 14 labor organizations and two joint councils representing Amtrak employees. About 7,300 employees, or 43 percent of Amtrak's unionized labor force, are affected by these agreements.

Laird Named General Superintendent of the Pacific Northwest Division

Amtrak has announced the appointment of District Superintendent Kurt Laird as general superintendent of the Pacific Northwest Division, effective today.

“This newly created position will strengthen our relationship with Washington and Oregon, states that have been ardent supporters of passenger rail and where there are tremendous opportunities for growth,” said President and CEO Joe Boardman.

This division was not previously under the management of a general superintendent. The creation of this position reflects Amtrak’s commitment to being more responsive to the needs of state and commuter partners, and to the communities Amtrak serves.

Chief Operating Officer William Crosbie cited Laird’s strong relationship with partners, business acumen and a ground-level understanding of good customer service as the qualities that make him best suited for the job.

Laird will oversee all transportation and mechanical operations, including maintenance of the Talgo equipment, the Amtrak *Cascades* service, and Sounder commuter contract.

Laird joined Amtrak in 1977 and has served as the District

Superintendent of the Pacific Northwest District since 2002. He began his railroad career in 1974 as a trackman and then several years as an on-board services crew member. Laird has a Bachelor of Arts degree from Southern Connecticut State College.

Laird will temporarily report directly to Vice President of Transportation Richard Phelps until a general manager-west is appointed.

Amtrak Reaches Tentative Agreement with ASWC

Amtrak has reached a tentative agreement on a new labor contract with the Amtrak Service Workers Council (ASWC) covering the period of January 1, 2010, through January 1, 2015. The ASWC consists of members of the Transportation Communications International Union, Transport Workers Union and UNITE HERE union.

The new contract must be ratified by the union membership and will cover On-Board Service employees such as service attendants, lead service attendants, train attendants and chefs.

With the addition of ASWC, Amtrak now has tentative agreements in place with six labor organizations and joint councils representing 9,200 employees, or 54 percent of the total unionized labor force.

Tentative agreements have also been reached with the American Train Dispatchers Association (ATDA), International Brotherhood of Electrical Workers (IBEW), International Association of Machinists and Aerospace Workers (IAM), the Joint Council of Carmen, Coach Cleaner and Helpers (JCC) and the Transportation Communications International Union-Clerks (TCU-Clerks).

Message from Joe Boardman

Dear Co-workers,

On Monday, May 31, we will observe Memorial Day. For more than a century, our nation has honored the men and women who died in the service of their country at the end of May. The holiday was originally known as Decoration Day, and it was so called because communities turned out to decorate the graves that the Revolution, the War of 1812, and the Civil War had left scattered across the American landscape.

The Twentieth Century's wars took Americans farther afield than many of them had ever been or meant to go, and it was not practical for everyone to come out to decorate graves in France, Italy, or the distant Pacific islands. Today those graves are well tended by people who have as much cause as we do to be grateful for their freedom and the sacrifices that won it, and we now know this holiday as Memorial Day.

In recent years, at the request of Congress, people have begun to observe a national "moment of remembrance" on Memorial Day. They stop what they're doing and observe a minute of silence as a way of honoring the people who gave their lives for our country. Amtrak is America's railroad, and we, too, will commemorate Memorial Day.

This year, as on previous years, all of the engines on the system will sound their horns at 3 p.m. local time as a salute to those who died for our country. Over the years, Amtrak employees have served our nation and have gone in harm's way to protect our freedoms and our way of life.

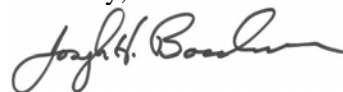

Today I hope you will remember the Amtrak employees who are on active duty with the Reserve or the National Guard and are deployed away from their families and friends.

Memorial Day is customarily regarded as the first day of summer, and it's always an occasion for joy — and after the past winter, I think we can all agree that we're ready for a little summer sun and warmth. I hope those of you who can take the holiday do so, and enjoy the time off. I also hope, however, that if you are away from work that day, you can find a moment to remember the people who gave "their last full measure of devotion" for our country, our people, and our form of government.

For those uniformed crew members who will be working on Memorial Day, Amtrak has authorized the wear of dignified or appropriate lapel pins or badges that commemorate your military service. We wish to encourage wear of service crests, unit badges, and ribbon pins. Wearing of American flag pins or yellow ribbons is likewise appropriate, and everyone who wishes to wear them should feel free to do so.

Amtrak supports our veterans. We are proud of you and grateful for your service, and I hope that everyone can spare a minute or two on Memorial Day to reflect on the sacrifices that secured our freedom, and are preserving it today.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today, we will announce an agreement with French high-speed rail company SNFC and Bechtel Infrastructure Corporation to bid for the contract to design, build, operate, maintain and finance Florida's high-speed rail network between Tampa and Orlando.

The consortium we have formed presents a powerful, full-service team to pursue the high-speed rail contract in Florida.

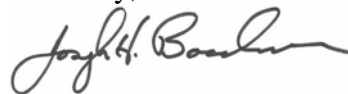

Partnership is central to our future, whether it be with states, freights, or others in the industry. Each partner brings its own brand of experience and knowledge. Bechtel offers demonstrated engineering, construction, and program management expertise; while SNCF has its proven ability to design, operate and maintain high-speed rail systems around the world. As America's high-speed rail provider, we offer a wealth of operational expertise and know-how to the group. Combining SNCF's international experience operating high-speed rail, combined with our own, amplifies what we can offer the citizens of Florida.

What Florida needs is an out-of-the-box high-speed rail system. We believe, along with our partners, that we can deliver that.

As I've mentioned before, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end with the NEC. As you may remember, we recently announced a new High-Speed Rail department, led by Vice President of High Speed Rail Al Engel, to help us advance our ambitions in the high-speed rail arena.

We need to aggressively compete and we need to bring all of the resources to bear to beat out the competition, and with this consortium, we aim to win.

Sincerely,

Joe Boardman
President and CEO

Message from Joe Boardman

Dear Co-workers,

Today, we're announcing an agreement with French National Railways (SNCF) and Bechtel Infrastructure Corporation to bid for the contract to design, build, operate, maintain and finance Florida's planned high-speed rail line between Tampa and Orlando.

The consortium we have formed presents a powerful, full-service team to pursue the high-speed rail contract in Florida.

Partnership is central to our future, whether it be with states, freight railroads, or others in the industry. In this case, each partner brings its unique body of experience and knowledge. Bechtel was the leader in a consortium which brought high-speed rail to the UK (HS1). The SNCF launched high-speed rail service (TGV) in Europe on the Paris to Lyon line in 1981, bringing three decades of high-speed rail implementation and operating expertise to the team.

Bechtel offers demonstrated engineering, construction, and program management expertise; while SNCF has its proven ability to design, operate and maintain high-speed rail systems around the world. As America's high-speed rail provider, we offer a wealth of operational expertise and know-how to the group. Combining SNCF's international high-speed rail experience with our own amplifies

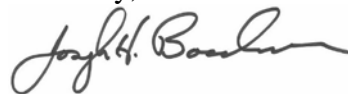

what we can offer the citizens of Florida.

The Florida line is a turn-key project requiring a team that can provide all of the systems needed for a world-class high speed rail operation. We believe, along with our partners, that we can deliver that.

As I've mentioned before, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end with the NEC. As you may remember, we recently announced a new High-Speed Rail department, led by Vice President of High Speed Rail Al Engel, to help us advance our ambitions in the high-speed rail arena.

We need to aggressively compete to secure this leadership position, and by bringing all of our resources to bear, together with our partners in this consortium, we aim to win.

Dear Co-workers,

Today, we will announce an agreement with French high-speed rail company SNFC and Bechtel Infrastructure Corporation to bid for the contract to design, build, operate maintain and finance Florida's high-speed rail network.

The consortium we have formed presents a powerful, full-service team to pursue the high-speed rail contract in Florida. Partnership is central to our future, whether it be with states, freights, or others in the industry.

Each partner brings its own brand of experience and knowledge. Bechtel offers demonstrated engineering, construction, and program management expertise; while SNCF has its proven ability to design, operate and maintain high speed rail systems around the world. As America's high-speed rail provider, we offer a wealth of operational expertise and know-how to the group.

What Florida needs is an out-of-the-box high-speed rail system. We believe, along with our partners, that we can deliver that.

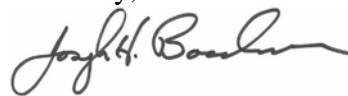

Why not do this on our own? Simply put — we want to win this contract. First, just because we are the only high-speed rail operator in this country doesn't mean that we automatically win the contracts on our own. We need to earn it. Second,

the Florida project is very complex and requires some expertise, like construction, that we just don't offer. Third, I go back to what I said about partners — partnership is a critical element of our ability to grow.

As I've mentioned before, advancing Amtrak's role as the preferred and premier provider of high-speed rail in America doesn't start and end with the NEC. As you may remember, we recently announced a new High-Speed Rail department, led by Vice President of High Speed Rail Al Engel, to help us advance our ambitions in the high-speed rail arena.

We need to aggressively compete and we need to bring all of the resources to bear to beat out the competition, and with this consortium, we aim to win.

Employees Needed to Help Document “A Day in the Life”

Amtrak is producing a commemorative book that will be published next year honoring its 40th anniversary. A very important part of the book will be a chapter devoted to “A Day in the Life” of our company, and employees are asked to help provide photos.

Posters have been distributed across the system with details. Employees who have received the posters are asked to put them up and help spread the word.

“Talk about it with fellow employees — help get other employees interested in being a part of the book so that they can show their friends or families what Amtrak is all about and the great company for which we work,” said Joe McHugh, vice president, Government Affairs and Corporate Communications.

The goal is to have employees play a very large part in the content of the book, especially those who have a talent for photography.

Following are details about the effort:

What: At any hour of the day and night, someone, somewhere is helping keep the Amtrak system running. The goal is to document that in photographs with action shots of employees doing what they do best in order to illustrate “A Day in the Life” of the company for the commemorative book. Photos should feature employees working, and not looking into the camera for a posed photo.

Who: All employees are welcome to participate. Any image that speaks volumes about the dedication, hard work and industriousness of Amtrak employees and their service to its passengers and the nation is ideal.

Where: Photographs can be taken in stations, with passengers, aboard trains, mechanical shops, on engineering project sites, at the contact centers and in offices around the country.

When: Photos must be taken during the week of October 15-22, and should include all shifts. We’d like to get as many employees involved as possible.

Employees whose photo submissions are selected for inclusion in the book will receive photo credit. Submissions must be accompanied by the photographer’s name, phone number and e-mail.

By submitting a photo, employees are indicating that it is their property and that Amtrak has permission to publish it. Employees must be able to secure photo releases from any individuals who are clearly identifiable in a photo they submit (see attached Photo Release Form). Operating employees must still observe all Amtrak and FRA safety and operating rules and regulations relative to the use of electronic devices and cameras on and around trains.

Anyone needing more information or requiring help should contact:

Ann Owens

Employees Needed to Help Document “A Day in the Life”

Amtrak is producing a commemorative book that will be published next year honoring its 40th anniversary. A very important part of the book will be a chapter devoted to “A Day in the Life” of our company, and employees are asked to help provide digital photos.

“Talk about it with fellow employees — help get other employees interested in being a part of the book so that they can show their friends or families what Amtrak is all about and the great company for which we work,” said Joe McHugh, vice president, Government Affairs and Corporate Communications.

The goal is to have employees play a very large part in the content of the book, especially those who have a talent for photography.

Following are details about the effort:

What: At any hour of the day and night, someone, somewhere is helping keep the Amtrak system running. The goal is to document that in photographs with action shots of employees doing what they do best in order to illustrate “A Day in the Life” of the company for the commemorative book. Photos should feature employees working, and not looking into the camera for a posed shot. Photos should be no smaller than 300 dpi, and employees may submit more than one shot.

Who: All employees are welcome to participate. Any image that speaks volumes about the dedication, hard work and industriousness of Amtrak employees and their service to its passengers and the nation is ideal.

Where: Photographs can be taken in stations, aboard trains, mechanical shops, on engineering project sites, at the contact centers and in offices around the country.

When: Photos must be taken during the week of Oct. 15-22 and should include all shifts. We’d like to get as many employees involved as possible. All photos must be received by Oct. 27.

How: Digital photos should be submitted to Ann Owens via e-mail (OwensA@amtrak.com) or if the file is too large, you can send a disc to Ann Owens (10 G St, NE, 3E-537, Washington, D.C. 20002).

Employees whose photo submissions are selected for inclusion in the book will receive photo credit. Submissions must be accompanied by the photographer’s name, phone number and e-mail address.

By submitting a photo, employees are indicating that it is their property and that Amtrak has permission to publish it. Employees must be able to secure photo releases from any individuals who are clearly identifiable in any photo they submit (see attached Photo Release Form). Operating employees must observe all Amtrak and FRA safety and operating rules and regulations relative to the use of electronic devices and cameras on and around trains.

Operations Vice Presidents to Report to CEO

Chief Operating Officer Bill Crosbie will be leaving Amtrak, and the position of chief operating officer will be abolished, effective Oct. 22.

The vice presidents of the operating departments will begin reporting directly to President and CEO Joe Boardman. Just as with other Amtrak vice presidents, they will serve as official members of the company's Executive Committee.

"Bill has made important contributions to Amtrak in the seven years he's been here, and his oversight of the many facets of the operation has supported Amtrak through a period of strong ridership and demand for our services," said Boardman.

Labor Contracts with Four Unions Ratified

Tentative labor contracts with the American Railway and Airway Supervisor Association-Mechanical Foreman (ARASA-ME), the American Railway and Airway Supervisor Association-On-Board Services (ARASA-OBS), the International Brotherhood of Electrical Workers (IBEW) and the International Association of Machinist and Aerospace Workers (IAM) were recently ratified by each union's membership.

Terms of the five-year agreements are patterned after those already reached with other labor organizations, including wage increases each July and January, until the beginning of 2015.

The July 1, 2010, wage increase will be retroactive, and union members will receive back pay to account for unpaid earnings to date.

With the addition of these four contract ratifications, 58 percent of Amtrak's unionized workforce is now covered by new five-year labor agreements.

Message from Joe Boardman

Dear Co-workers,

Tomorrow, Amtrak will be announcing the purchase of 70 new electric locomotives for use on the Northeast Corridor (including the *Keystone Service*), the first of which will be delivered in February 2013.

The six-year, \$466 million contract has been awarded to Siemens, and will create 250 jobs at its manufacturing plant in Sacramento, Calif., as well as its other facilities in Norwood, Ohio, and Alpharetta, Ga.

Board Chairman Tom Carper and FRA Administrator Joe Szabo will be at the Sacramento facility tomorrow to describe how the new equipment will expand and modernize our fleet. The new equipment will result in improved reliability and better service to our passengers, helping meet the growing demand for passenger rail. The engines will replace locomotives that are between 20 and 30 years old, which many of you know we run very hard.

This news follows the announcement we made in the summer to buy 130 new long-distance rail cars and is the next step in our fleet renewal plan.

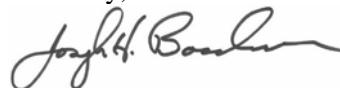

Part of the responsibility of leadership is to ensure that the men and women meeting our mission have the tools they need to do the mission well. Not only does aging and problematic equipment hurt our ability to deliver good service, but I know it also takes a toll on our crews. Expanding and renewing our fleet is not only critical to meeting our nation's transportation needs, but also to creating a safer, greener and healthier Amtrak.

The new locomotives will be equipped with anti-climbing technology and push-back couplers that will help keep the train upright and on the tracks in the event of a collision. In addition, the regenerative braking system in the units will return electricity to the power grid.

As we take delivery of the 70 new locomotives, we will retire 64 older locomotives in our current electric fleet, including 20 DC AEM-7s, 29 AC AEM-7s and 15 HHP-8s. The additional units will be put toward service expansion.

This is an exciting time for our company as we approach our 40-year anniversary. We are making important and lasting changes that will help shape the future of transportation in America. Thank you for all your hard work — let's keep it going.

Sincerely,

Joe Boardman
President and CEO

2010 PSSA Recipients Announced

Amtrak is pleased to announce the recipients of the 2010 President's Service and Safety Awards (PSSA). The company honors employees and external partners each year who have made exceptional contributions to Amtrak. The following award winners will be honored later this fall at a ceremony in Washington, D.C.

Employees who have completed 30 and 35 years of service in 2010 will also be honored at a series of regional celebrations in Beech Grove, Chicago, Jacksonville, Los Angeles, New York, Oakland, Philadelphia, Providence, Seattle and Washington, D.C.

Message from Joe Boardman

Dear Co-workers,

Today, Amtrak released a bold vision of a realistic and attainable next-generation high-speed rail system that could revolutionize transportation, travel patterns and economic development in the Northeast for generations.

With trains operating up to 220 mph (354 kph) on a two-track corridor, we could operate from Washington to New York in 96 minutes and New York to Boston in just 84 minutes, cutting today's trip-times in half. We could offer our passengers at least four hourly high-speed departures in each direction, compared to once per hour today.

As America's Railroad and our country's high-speed rail operator, it is part of our central to our mission to put forth concepts and plans that look beyond what we can operate with what we have today.

Entitled "*A Vision for High-Speed Rail in the Northeast Corridor (NEC)*," the study describes a system that addresses a major national transportation need for generations to come. Given its population, economic densities and demand for intercity travel — which estimates show doubling by 2050 — the Northeast is in need of a next-generation high-speed rail system that will support growth through the next century.

When it's completed in 2040, the new infrastructure would support expected high-speed train ridership of 18 million, but it could accommodate 80 million passengers annually, with a hundred or more frequencies a day in the decades to follow as demand increases.

Building a world-class system of this magnitude would require \$4.7 billion annually, or \$117 billion, over the course of a 25-year construction period.

Certainly, this is a significant investment, but with the billions more needed just to maintain the region's overburdened highway and aviation networks, building a new high-speed, high-capacity railroad may be the more cost-effective solution.

You may remember that this summer we developed an NEC Infrastructure Master Plan that examined how the NEC could meet accommodate growth given the railroad we have today. That study predicted that capacity would max out by 2030 — this next-generation high-speed rail system will provide the necessary new capacity to meet growing demand well beyond 2030.

Our vision meets our safer, greener and healthier goals. We could provide fast, safe and secure travel that reduces energy use and emissions while providing comfortable and reliable service to sustainable communities and helping support the national and regional economies. It would help ease highway and airway congestion and foster "greener" travel for millions of Americans.

Construction of the system alone would mean more than 40,000 annual jobs during the 25-year build-out period, and the operation would yield 7,100 new rail operations jobs.
