Reference: ISCAP Appeal No. 2009-050
NSA MDR No. 54577/Appeal 3390

Please be advised that the Interagency Security Classification Appeals Panel (ISCAP) has concluded its consideration of the mandatory declassification review appeal number 2009-050 filed by you and that the 60-day period during which an agency head may appeal an ISCAP decision to the President has expired. Enclosed is a copy of the document and a chart that outlines the ISCAP decision. With the exception of any information that is otherwise authorized and warranted for withholding under applicable law, we are releasing all information declassified by the ISCAP to you. If you have questions about this appeal, please contact William C. Carpenter at (202) 357-5250.

Sincerely,

MARK A. BRADLEY
Executive Secretary

Enclosures

The National Cryptologic School
Television Center Catalog
INTRODUCTION

1. This is the ninth edition of the National Cryptologic School catalog of television material available for reproduction and distribution within the cryptologic community. The catalog will be updated through periodic announcements of new productions via the "TELEGRAM" and republished entirely as necessary.

2. This catalog includes television programs produced by the NCS Television Center. Not listed are commercial productions which are copyrighted, and productions on one-of-a-kind equipments installed at Headquarters, NSA/CSS. All productions are in color unless otherwise indicated.

3. The Table of Contents is located on page iii and the index begins on page A-1.

4. Productions may be obtained directly from:

   Director
   National Security Agency/Central Security Service
   ATTN: E23
   Fort George G. Meade, MD 20755-6000

5. Tapes are available in ¾" U-Matic, VHS and BETA formats.

6. SCE Field Units and non-NSA/CSS activities requesting material from the catalog, may submit their requests directly to the NCS Television Center (E23). Classified tapes (SI) must be ordered through the unit SSO. SECRET and CONFIDENTIAL tapes may be ordered through the unit COMSEC Custodian. Unclassified tapes may be ordered direct. Due to budgetary constraints, all requests for videotapes must be accompanied by new blank video cassettes. These tapes must be high quality, compatible in format to your playback equipment and of sufficient length to accommodate the running time per copy of the requested production(s).

7. FOR FURTHER INFORMATION CONTACT: 968-7191(a) or 859-6629(b). To obtain copies, memo request: NCS TV Center, E23, FANX II, Attn: Message request, Computer Mail: E23,

Withheld from public release under the National Security Act of 1959, 50 U.S.C. 3605 (P.L. 86-36)

COMSEC
EQUIPMENT
INTRODUCTION TO VINSON (U)  
_TVC-503A  1978
Running Time: 11:30  
Classification: Confidential  
1 Part

(U) An overview of the VINSON Tactical Secure Voice Equipment.

TSEC/KY-57 OPERATOR TRAINING (U)  
_TVC-503B  1978
Running Time: 52:36  
Classification: Confidential  
1 Part

(U) A four-part tape on operating the KY-57 equipment consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-15, loading KYX-15, zeroizing KYK-13, loading KYX-15, changing batteries in KOI-18, KYK-13, and KYX-15; (3) Zeroizing KY-57/KY-58, loading KY-58, changing batteries in KY-58, preparing KY-58 for operation; and (4) Operator's SARK.

TSEC/KY-58 OPERATOR TRAINING (U)  
_TVC-503C  1978
Running Time: 53:15  
Classification: Confidential  
1 Part

(U) A four-part tape on operating the KY-58 equipment consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-13, loading KYX-13, changing batteries in a KOI-18, KYK-13, and KYX-15; (3) Zeroizing the KY-57/KY-58, loading KY-58, changing batteries in KY-58, preparing KY-58 for operation; and (4) Operator's SARK.

NET CONTROLLER TRAINING (U)  
_TVC-503D  1978
Running Time: 75:18  
Classification: Confidential  
2 Parts

(U) A four-part tape on Net Controller operations consisting of: (1) Introduction to VINSON; (2) Zeroizing KYX-15, loading KYX-15, zeroizing KYK-13, loading KYK-13, changing batteries in a KOI-18, KYK-13 and KYX-15; (3) Zeroizing the KY-57/KY-58, loading the KY-57, changing batteries in a KY-57, preparing KY-57 for operations; (4) SARK Variable Generate Operation, setting up a Net, SARK Automatic Remote Keying, SARK Manual Remote Keying.

TSEC/KW-46 BROADCAST SECURITY EQUIPMENT (U)  
_TVC-762  1980
Running Time: 27:17  
Classification: Secret  
1 Part

(U) The KW-46 Broadcast Security Equipment is being developed to replace the TSEC/KW-37 and TSEC/KG-14. The KW-46 videotape presentation consists of two parts. Part I contains a review of the operational capabilities of the KW-46 including discussions on data rates, maintainability, encryption/decryption techniques, and synchronization. The KW-46 keying concept is discussed in detail. Part II is a demonstration of the equipment initialization sequence, the single and multi-channel modes of operation, and the remote keying operation. A copy of the narrative accompanies the tape.

THE UMSTEAD SYSTEM (U)  
_TVC-778  1981
Running Time: 23:39  
Classification: Secret  
1 Part

(U) The UMSTEAD System is a videotape presentation describing the capabilities and operation of the TSEC/CI-11 UMSTEAD system. A description of each component and an operational demonstration are also given on this tape. This presentation is intended to be distributed to major commands and/or agencies to present to them this new concept in secure communications.
TSEC/KG-84 OPERATING INSTRUCTIONS (U)  
Running Time: 45:00  Classification: Confidential  1 Part  
(U) This training videotape demonstrates KG-84 setup, cold start, operation, and troubleshooting at the operator level. A module on fill devices is also included.

TSEC/KG-81 OPERATOR INSTRUCTIONS (U)  
Running Time: 50:00  Classification: Confidential  1 Part  
(U) This videotape describes the basic function, operation, switch settings, strapping options, and keying and rekeying of the KG-81 equipment. It is designed to train new operational military personnel.

STU-II REKEYING (U)  
Running Time: 09:46  Classification: For Official Use Only  1 Part  
(U) This is a step-by-step instructional tape on how to load cryptovariables into a Secure Telephone Unit, Second Generation (STU-II) or KY-71, using either a KOI-18 tape reader or a KYK-13 electronic transfer device.

USING YOUR STU-II (U)  
Running Time: 13:15  Classification: For Official Use Only  1 Part  
(U) This tape provides operating instructions for the Secure Telephone Unit (STU-II) or KY-71. It explains how to use the STU-II as a normal phone (clear mode), a secure phone (secure mode), and as a secure intercom system. It also addresses the physical security requirements for the crypto ignition key (CIK).

UMSTEAD: TODAY AND TOMORROW (U)  
Running Time: 15:40  Classification: Confidential  1 Part  
(U) A description of the UMSSTEAD (CII, COSS), Secure Satellite Communications System. The operational uses, past field developments, and a general explanation of the system are presented. This tape is designed for nontechnical personnel who have a communications need.

KG-84 HIGH SHOCK DESTRUCTION SYSTEM (U)  
Running Time: 10:25  Classification: For Official Use Only  1 Part  
(U) This tape shows how to install and operate a system designed to destroy critical chips inside the KG-84/84A in an emergency. The system is intended for use in high-risk areas when overrun or capture is imminent.

THE TRIBUTARY SYSTEM (U)  
Running Time: 15:25  Classification: Confidential  1 Part  
(U) Shows how to hook up and operate the various equipments which make up the TRIBUTARY System.

UNCLASSIFIED  I-2  Equipment
TSEC/KG-84 DLED: AN OVERVIEW (U)

Running Time: 11:45 Classification: Confidential 1 Part

(U) This overview of the KG-84 capabilities is intended to inform potential users of the equipment. A brief history, a comparison with the KW-7, KW-26, KG-13 and KG-30 equipments, a discussion of functional assets—operational modes, data rates, special features, keying method, variables, fill devices, testing—and information concerning service control, related documents, and NSA information sources are included in the tape.

THE KY-68 AND SELECTED TRI-TAC EQUIPMENTS: AN OVERVIEW (U)

Running Time: 19:21 Classification: Confidential 1 Part

(U) This overview presents various features and functions of the TTC-39, TTC-42 and SB-3955 TRI-TAC circuit switches and the KY-68 Digital Subscriber Voice Terminal. Associated COMSEC equipments are also discussed. This videotape shows advantages of these equipments to prospective users.

TSEC/KG-81 TRUNK ENCRYPTION DEVICE – AN OVERVIEW (U)

Running Time: 12:15 Classification: Confidential 1 Part

(U) This physical and functional description of the KG-81 Trunk Encryption Device is intended for senior enlisted men and junior officers with some communications background. It is designed to augment a briefing aids package on TRI-TAC COMSEC equipments.

KY-90 AN OVERVIEW (U)

Running Time: 13:41 Classification: Confidential 1 Part

(U) An introduction to the Secure Digital Net Radio Interface Unit. A tactical equipment capable of interconnecting various types of single channel radios and TRI-TAC circuit switch subscribers passing digital or analogue voice, teletype, facsimile, or computer data.

STU-III LOW COST TERMINAL (U)

Running Time: 8:57 Classification: Unclassified 1 Part

(U) This tape promotes acquisition of the STU-III, Secure Telephone Unit, by agencies and contractors handling information related to national security, by demonstrating its ease of operation and installation. (This video is a module of CY-188)

INTRODUCTION TO VINSON (U)

Running Time: 11:26 Classification: For Official Use Only 1 Part

PARKHILL MOD (U)

Running Time: 17:00 Classification: For Official Use Only 1 Part

(U) This videotape is an aid to familiarize maintenance personnel with mandatory modifications to all deployed Parkhill COMSEC equipment.
(U) The importance of communications security is highlighted in 6 one and two minute stories from World War II. Through them, the viewer learns how good COMSEC procedures turned the tide.

NATIONAL INFOSEC AWARDS PRESENTATIONS (FOUO) TVC-2312 1990

(FOUO) 1990 National INFOSEC awards presentations.

COMSEC MONITORING CENTER CEREMONY (U) TVC-2350 1990

National CONUS COMSEC Regional Monitoring Center - ribbon cutting ceremony, 5/4/90.
PROCESSING COMSEC EQUIPMENT MODIFICATIONS (U) TVC-572 1979
Running Time: 08:00 Classification: Secret

(U) This seven-minute production informs "S" organization engineers of the necessary procedures in processing a COMSEC equipment modification. A brief history of an actual modification shows the viewer the necessary regulations, published guidelines and forms; the regulating groups involved and the functions of each; requirements of the MOD installers; and duties of the engineer.

COMSEC INTEGRATED LOGISTIC SUPPORT (U) TVC-595 1980
Running Time: 10:10 Classification: For Official Use Only

(U) COMSEC Integrated Logistic Support informs the viewer about the elements of integrated logistic support and the responsibilities of various "S" Offices in implementing ILS. This tape is intended for management personnel and general dissemination.

U.S. COMMUNICATIONS IN JEOPARDY (U) TVC-731 1981
Running Time: 22:40 Classification: Secret Noforn

(A) This tape presents a general overview of the foreign signals intelligence (SIGINT) threat to unprotected U.S. communications. It emphasizes the and includes a dramatized description of organizations, areas of coverage, and methods of operation. The tape would be useful for persons requiring an understanding of the reality of this threat and the resultant need for communications security; it does not presume familiarity with the subject.

COMMUNICATIONS SECURITY — RESEARCH AND ENGINEERING (U) TVC-851 1982
Running Time: 24:00 Classification: Unclassified

(U) An overview of Communications Security—Research and engineering at NSA.

COMSEC AWARENESS (U) TVC-918 1983
Running Time: 00:60 Classification: Unclassified

(U) A one minute spot commercial intended for viewing in conjunction with other TV fare. Its object is to increase basic COMSEC awareness world-wide.

THE HUMAN THREAT TO COMSEC (U) TVC-919A 1983
Running Time: 17:23 Classification: Confidential Noforn

(U) The object of this tape is to alert people to the serious threat to the security of U.S. cryptographic systems and the information they protect and to enlist support for recommended countermeasures.

THE COMSEC CUSTODIAN: A VITAL ROLE (U) TVC-868 1983
Running Time: 25:35 Classification: For Official Use Only

(U) This is an introductory tape to be used in the training of COMSEC Custodians. It contains an overview of the procedures necessary to control COMSEC material properly and covers some of the problems with which the average custodian must cope.
CRYPTOVARIAbles, THE KEYS TO SECURITY (U)  
Running Time: 07:15 Classification: For Official Use Only 1 Part

(U) This videotape is intended to familiarize the viewers with the role of cryptovariables in securing communications, and to give them a better appreciation of the need for special protection of cryptovariables before, during, and after use.

COMSEC SUPPORT FOR COMMAND AND CONTROL OF NUCLEAR WEAPONS (U)  
Running Time: 14:21 Classification: Secret Noforn 1 Part

(U) Describe the

Demonstrates use of the material in simulated operations.

KEYING MATERIAL ACCESS (U)  
Running Time: 15:11 Classification: For Official Use Only 1 Part

(U) This tape, based on a worldwide study of practices and procedures used in handling COMSEC keying material, gives practical suggestions for reducing its vulnerability. Although the study was conducted at U.S. Army commcenters, the principles for reducing access to key are universally applicable.

THE THREAT TO U.S. COMMUNICATIONS IN EUROPE (U)  
Running Time: 48:00 Classification: Secret Noforn 1 Part

An interview with who recounts hostile SIGINT efforts against NATO and U.S. Communications in Europe, and the information that his country was able to gain on U.S. military preparedness.

COMSEC COMMERCIAL: LAND SERIES (U)  
Running Time: 9:00 Classification: Unclassified 1 Part

(U) This tape consists of ten thirty second spots. The possible consequence of interception of U.S. communications by an adversary is depicted using an animated cartoon with ten different captions.

COMSEC COMMERCIAL: SEA SERIES (U)  
Running Time: 9:00 Classification: Unclassified 1 Part

(U) This tape consists of ten thirty second spots. The possible consequence of interception of U.S. communications by an adversary is depicted using an animated cartoon with ten different captions.

THE NAME OF THE GAME, A COMSEC OVERVIEW (U)  
Running Time: 20:35 Classification: Confidential 1 Part

(U) A fast paced overview of Communications Security including transmission security, cryptographic security, emission security, physical security, operations security, and communications cover and deception. NSA's role in present and future COMSEC development is touched on and football analogies are used for added interest. (This Video is a Module of CY-188).
(U) The object is to inform federal personnel, military and civilian, about the dangers of compromising emanations from information processing equipment. The threat to national security is shown and precautionary measures recommended.
MAINTENANCE AND USE OF THE TARGET MASTER ANALYTIC REPOSITORY (U)  

(U) Tape #1 - Introduction to the Target Master Analytic Repository (TMAR), Tape #2 - TMAR Interactive Edit (GRAPHEX) Program, EDIT (GRAPHEX) Program, ADD, Tape #3 - TMAR Interactive Edit (GRAPHEX) Program, EDIT & VIEW, Tape #4 - Updating the TMAR in a TSS Environment, Tape #5 - Operation of the DD 7000 Terminal, Tape #6 - Operation of the IBM 32XX Series Terminal, Tape #7 - Access & Use of TMAR. The objective of the course is to train B Group analysts in the Maintenance and use of the TMAR data base. A student workbook must be used with the videotapes.

PLURIBUS IMP OPERATIONS AND MAINTENANCE (U)  

(U) This program describes the 1st level maintenance of the PLURIBUS IMP. It also provides initial background in the theory and implementation of packet switch computer networks by the Agency.

MASS STORAGE USING DIGITAL OPTICAL DISK (U)  

(U) A demonstration of the capabilities of a prototype digital optical disk recorder, which was used to store and retrieve gazetteer information.

TEKTRONIX R7844 DUAL-BEAM OSCILLOSCOPE (U)  

(U) Tapes 1 & 2 cover the operation of the mainframe, vertical and horizontal plug-in unit controls and connectors. Tape 3 demonstrates basic signal measurements using the R7844 oscilloscope.

HEWLETT-PACKARD 5328A UNIVERSAL COUNTER (U)  

(U) Tape 1 describes options available with the counter, controls and connectors, and their functions. Tape 2 shows how to make basic measurements of Frequency, Period, Time Interval, Time Interval Averaging, Totalizing and Ratio.

SRL MODEL 112C PLO PRF SYNTHESIZER (U)  

(U) Tape 1 covers the controls and connectors and describes their functions. Tape 2 tells how to phase lock to a standard and non-standard reference frequency. It also covers triggering a pulse train on the oscilloscope using the N1, N2, and an external oscillator.

KNOBSTICK ANTENNA (U)  

(U) This brief videotape describes the design and operation of the knobstick antenna which is designed to receive LVHF signals in various parts of the world.
(U) The Computer Based Training Show describes the possibilities of CBT, especially within the constraints of modern training needs.
DATA SYSTEMS
EQUIPMENT MAINTENANCE
ECHELON: SA411-E MOD MANUAL RECEIVER (U)  
**TVC-567**  1979  
*Running Time:* 319:31  
*Classification:* Unclassified  
22 Parts  
(U) Instructs students in the SA411-E Manual Receiver Theory of operation/maintenance, performance characterization, and the receiver integration in the Receiver Subsystem as it related to the ECHELON I expansion program. Approximately 80% of the presentation is devoted to Maintenance Theory.

DELTA DATA 7000T MAINTENANCE TRAINING (U)  
**TVC-729A**  1981  
*Running Time:* 603:30  
*Classification:* Unclassified  
26 Parts  
(U) This course provides maintenance training for the microprocessor experienced technician on the Delta Data 7000T video display terminal. Maintenance manuals must be used with these tapes.

DELTA DATA 3000T CONTROLLER MAINTENANCE (U)  
**TVC-729B**  1981  
*Running Time:* 282:37  
*Classification:* Unclassified  
14 Parts  
(U) This course provides maintenance training for the microprocessor experienced technician on the 3000T Controller. Maintenance manuals must be used with these tapes.

DEMODULATOR GROUP (U)  
OM-62  
OM-62 Demodulator Group  
MD-1130/FGC Demodulator  
IP-1410/FGC Display  
**TVC-832**  1982  
*Running Time:* (A) 52:20  (B) 49:50  
*Classification:* Unclassified  
4 Parts  
(U) LRU Maintenance for OM-62 Demodulator Group. These tapes provide LRU Maintenance Training for the MD-1130/FGC Demodulator and IP-1410/FGC display.

LOW BAND RECORDER ANALYZER OPERATION AND FIELD MAINTENANCE (U)  
**TVC-806**  1982  
*Running Time:* 75:00  
*Classification:* Unclassified  
3 Parts  
(U) This program provides LBRA users operation, calibration, and field maintenance procedures. The information is general in nature but sufficient to allow the user to become comfortable with LBRA applications. The LBRA Manual is often referred to and may be helpful when viewing this material.

HARDWARE INTERFACE UNIT (U)  
**TVC-821**  1982  
*Running Time:* 85:20  
*Classification:* Unclassified  
4 Parts  
(U) The Hardware Interface Unit is an interface between two digitizers and the DMA port on a DEC Computer. This series of tapes provides, an overview complete theory of operation and troubleshooting hints on the interface.

UNCLASSIFIED  
II-3  
Equipment Maintenance
MD-1121/G PSK DEMODULATOR (U)  
Running Time: 97:00  
Classification: For Official Use Only 7 Parts  
(U) This program provides directives for the operation, calibration, and maintenance of the MD-1121/G. This program provides a trained technician with the information that is required to calibrate and maintain this demodulator. Ancillary information is available in Tech. Manual TECO - 0A00-010.

MD-1119 MULTITONE FSK DEMODULATOR (8X) (U)  
Running Time: 113:38  
Classification: Unclassified 5 Parts  
(U) This program demonstrates the operation, alignment, and detailed circuit operation of the MD-1119 demodulator. The program is of sufficient scope and detail to provide a trained technician with the information required to maintain this unit. For additional information the Technical manual and SPEC TEST MD-1119 may be consulted.

THE FIELD MAINTENANCE PROCEDURES FOR TD-1306A/UR DEMULTIPLEXER (U)  
Running Time: 47:50  
Classification: Unclassified 3 Parts  
(U) Diagnosing problems in the demultiplexer and replacement of largest replaceable units (P.C. boards, power supplies, display, keypad). Requires use of digital multimeter.

MD-1118V MULTITONE PSK DEMODULATOR (U)  
Running Time: 174:21  
Classification: Unclassified 11 Parts  
(U) This program provides a trained technician with the information required to accomplish the alignment, testing, repair, and verification of proper operation of the MD-1118V demodulator. For additional details see the MD-1118V Tech. manual.

MD-1120/G MULTITONE FSK DEMODULATOR (U)  
Running Time:  
Classification:  
(U) An eight part series on operating and maintenance procedures of the MD-1120/G Multitone FSK Demodulator.

MD-1120/G MULTITONE FSK DEMODULATOR - INTRODUCTION & OPERATION (U)  
Running Time: 14:00  
Classification: For Official Use Only 1 Part  
(U) This tape provides an overview of the demodulator operating procedures and illustrates proper operation of the unit.

MD-1120/G MULTITONE FSK DEMODULATOR - BLOCK DIAGRAM (U)  
Running Time: 07:40  
Classification: For Official Use Only 1 Part  
(U) This tape illustrates the signal flow through the demodulator and provides some insight into the technical details of the demodulation process.
MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT
BOARDS (PART 1) (U)

Running Time: 22:35

(U) Provides a detailed analysis of the logic and circuitry.
(1) Input automatic gain control
(2) Double buffer shift register
(3) Synthesizer
(4) D to A converter & multiplier
(5) Filter assemblies
(6) Vector sum and comparator

MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT
BOARDS (PART 2) (U)

Running Time: 22:20

(U) Provides a detailed analysis of the logic & circuitry.
(1) Data delay assembly
(2) Real time output
(3) Auto analog phase lock loop
(4) Auto digital phase lock loop

MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT
BOARDS (PART 3) (U)

Running Time: 22:35

(U) Provides a detailed analysis of the logic & circuitry.
(1) Front end timing no. 1
(2) Front end timing no. 2
(3) Keyboard control no. 1
(4) Keyboard control no. 2

MD-1120/G MULTITONE FSK DEMODULATOR - CIRCUIT
BOARDS (PART 4) (U)

Running Time: 16:40

(U) Provides a detailed analysis of the logic & circuitry.
(1) Display register no. 1
(2) Display register no. 2
(3) Power up assembly
(4) Memory times 1 assembly
(5) I/O buffer
(6) Raw data output
MD-1120/G MULTITONE FSK DEMODULATOR - MAINTENANCE (U)

Running Time: 15:50
Classification: For Official Use Only 1 Part
(U) Illustrates calibration procedures, and performance tests which will assist in fault isolation, and maintenance.

MD-1120/G MULTITONE FSK DEMODULATOR - REMOTE CONTROL TEST (U)

Running Time: 05:25
Classification: For Official Use Only 1 Part
(U) Illustrates the procedure for setting up, controlling and verifying the demodulators operating parameters, such as no. of canals, frequency separation and baud rate.

MD-1050/G FSK-DFS DEMODULATOR (U)

Running Time: 83:12
Classification: Unclassified 5 Parts
(U) Maintenance, alignment and test procedures on the MD-1050/G FSK-DFS Demodulator.

SFP5000 HFDF RECEIVER SERIES (U)

Running Time: Classification:
(U) A four part series on overall troubleshooting and maintenance of the HFDF SFP5000 System. It includes Receiver Alignment (TVC-877 A-N); Miscellaneous SFP5000 troubleshooting and maintenance (TVC-865 A-D); Alignment & troubleshooting the FDK 5001 Frequency Synthesizer (TVC-963 A&B); Troubleshooting the AG5000 Tuning Unit (TVC-964 A&B).

PLATH SFP5000 DF RECEIVER ALIGNMENT - ALIGNMENT OF 5550-17 POWER UNIT (U)

Running Time: 09:62
Classification: Unclassified 1 Part
(U) Describes the severe shock hazard inherent with the Plath equipment and the tests that should be performed to insure proper power correction. Tests cover location of all Power Supply and Test Points, measurement of all Power Supply Voltages and adjustments of voltage regulators in the Power Supply Unit.

PLATH SFP5000 DF RECEIVER ALIGNMENT - ALIGNMENT OF 5550-1113 FINAL STAGE (U)

Running Time: 11:37
Classification: Unclassified 1 Part
(U) Covers adjustment of the trace on the Cathode Ray Tube and use of a signal generator to test and adjust the AB, CD and HA Circuitry, in the Final stage.

PLATH SFP5000 RECEIVER ALIGNMENT - ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 1) (U)

Running Time: 23:06
Classification: Unclassified 1 Part
(U) Shows the location of the IF Frame and the procedures to follow to prepare the Frame for alignment. Describes testing of the 5550-1113 Final Stage prior to IF Frame alignment. Describes the use of a signal generator to adjust the circuitry in the AB and CD channels. Additional testing includes measurement and adjustment of the 3rd local Oscillator.

UNCLASSIFIED

II-6
Equipment Maintenance
PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 2) (U)  TVC-877D  1983
Running Time: 15:17  Classification: Unclassified  1 Part

(U) A continuation of tape TVC-877C, however, it covers use of the Plath 95-21 Auxiliary Unit to align the circuitry of the AB & CD IF Channels.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-14 IF HINGED FRAME (PART 3) (U)  TVC-877E  1983
Running Time: 16:08  Classification: Unclassified  1 Part

(U) A continuation of tape TVC-877D, however, it covers testing and adjustment of the HA Channel in the IF Frame. Additional testing covers measurement of the AGC, Automatic Gain Control, range of the IF Frame.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-16 FRAME BELOW (PART 1) (U)  TVC-877F  1983
Running Time: 08:07  Classification: Unclassified  1 Part

(U) Covers testing and alignment of the old type of Frequency Multiplier in the Frame Below. This circuitry increases the frequency of the 1 MHZ input signal to 49 MHZ, which is the 2nd local oscillator used in the SFP5000 receiver.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-16 FRAME BELOW (PART 2) (U)  TVC-877G  1983
Running Time: 16:02  Classification: Unclassified  1 Part

(U) Covers testing and adjustment of the Balance Circuitry in the Frame Below which generates the internal Calibration signals for the SFP5000 receiver. Additional testing covers use of a signal generator to check the input switching Boards and improvement of the automatic Balance Circuitry in the Frame Below.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-13 HF FRAME (PART 1) (U)  TVC-877H  1983
Running Time: 27:20  Classification: Unclassified  1 Part

(U) Shows the location of the HF Frame and describes the procedures used to rotate the Frame into position for alignment. Preliminary testing includes a check of the 5550-14 IF Frame prior to alignment of HF Frame and measurement of the 2nd local oscillator signal - HF alignment includes use of 95–21 Auxiliary Unit to test and adjust the AB and CD Channels and use of a Vector Impedance Meter to measure phase and impedance of the AB and CD input circuitry.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-13 HF FRAME (PART 2) (U)  TVC-877I  1983
Running Time: 16:23  Classification: Unclassified  1 Part

(U) A continuation of tape TVC-877H, however, it covers testing adjustments and Phase/impedance measurements of the HA Channel in the HF Frame. Additional testing consists of checking the AGC, Automatic Gain Control, range of the circuitry in the HF Frame.
PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-15 HS FRAME (PART 1) (U)  
Running Time: 16:08  
Classification: Unclassified  
(U) Shows location of HS Frame and describes the procedure used to prepare the Frame for alignment. Preliminary testing includes use of a signal generator to Test 5550-1113 Final Stage and adjustment of signal levels in Final Stage prior to alignment of circuitry in HS Frame. HS Frame alignment covers use of a receiving signal and Hydra to test and adjust phase and angle automatic circuitry in HS Frame.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-15 HS FRAME (PART 2) (U)  
Running Time: 14:15  
Classification: Unclassified  
(U) A continuation of tape TVC-877K, however, it covers use of a receiving signal and Hydra to test and adjust the GAIN. Automatic Circuitry in the HS Frame. Additional testing consists of checking the AGC Automatic Gain Control, range of the SFP5000 receiver in both the MANUAL and automatic modes of operation.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-15 HS FRAME (AUDIO CHANNELS)  
(PART 1) (U)  
Running Time: 08:26  
Classification: Unclassified  
(U) This portion of the SFP5000 alignment procedures only covers the older type audio circuitry located on Board 5550-1515 in the HS Frames. HS Frame alignment shows use of a Modulated receiving signal and Hydra to Test and adjust the A3 Audio Circuitry on Board 5550-1515. Additional testing includes a check of A3 Start receptor and measurement of the A3 bandwidth.

PLATH SFP5000 RECEIVER ALIGNMENT -
ALIGNMENT OF 5550-15 HS FRAME (AUDIO CHANNELS)  
(PART 2) (U)  
Running Time: 18:20  
Classification: Unclassified  
(U) A continuation of Tape TVC-877M, however, it covers use of a modulated receiving signal and Hydra to check the A1, A2 and SSB Circuitry in the HS Frame. A1 testing includes frequency measurement and adjustment of the BFO, Beat Frequency Oscillator, in HS Frame. A2 testing covers use of audio to check circuitry and Angle Donator to check response of the A2 audio section. SSB alignment includes testing and adjustment of USB, Upper Side Band Section of the HS Frame.

MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE ANGLE DONATOR TEST (U)  
Running Time: 04:42  
Classification: Unclassified  
(U) Describes the use of a Plath Angle Donator to test the SFP5000 DF receiver.
MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE MEASURING ELECTRICAL CABLE LENGTH (U)  

Running Time: 13:54  
Classification: Unclassified  

1 Part  

(U) Describes the proper procedure to use to measure the electrical length of antenna lead-in cables using a VECTOR Impedance Meter.

MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE ANTENNA ELEMENT MAINTENANCE (U)  

Running Time: 15:25  
Classification: Unclassified  

1 Part  

(U) Covers periodic maintenance checks of the Antenna System. Describes the use of a PLATH PPS 200 test transmitter to perform a symmetry test on the antenna system. Covers the use of a PLATH PPS 200 transmitter to make sense adjustments in the FDK5001 Frequency Synthesizer.

MISCELLANEOUS PLATH TROUBLESHOOTING AND MAINTENANCE, GONIOMETER (U)  

Running Time: 16:21  
Classification: Unclassified  

1 Part  

(U) Discusses the basic operation of a PLATH Reducing Goniometer. Covers two types of testing procedures: (1) Resistance test of each Goniometer Port and (2) An operational test of the Goniometer using the SFF5000 DF System as an output indicator.

PLATH DF SYSTEM ALIGNMENT, TROUBLESHOOTING AND TESTING OF THE FDK5001 FREQUENCY SYNTHESIZER (PART 1) (U)  

Running Time: 22:20  
Classification: Unclassified  

1 Part  

(U) Describes various tests that can be performed on the FDK5001 Frequency Synthesizer to insure that it is functioning properly. Part 1 covers Power Supply Testing, Frequency Selector testing, 2nd Oscillator testing and tests associated with the Auxiliary oscillator, 10KHZ pulse shapes, Diode Switch, Carrier suppression, Phase detector and VCO.

PLATH DF SYSTEM ALIGNMENT, TROUBLESHOOTING AND TESTING OF THE FDK5001 FREQUENCY SYNTHESIZER (PART 2) (U)  

Running Time: 20:00  
Classification: Unclassified  

1 Part  

(U) A continuation of TVC-963A Part 2 of the FDK5001 Frequency Synthesizer tests. Covers APC signal measurement and VCO alignment; checking the Frequency Control Signal of the VCO Testing the 100:1 Frequency divides in the VCO circuitry and testing/adjustment of the SSB circuitry in Frame 5531-16.
PLATH DF SYSTEM TROUBLESHOOTING THE AG5000 TUNING UNIT (U)

Running Time: 25:22  
Classification: Unclassified

(U) Describes the proper procedures to remove and replace boards in the AG5000 tuning unit and covers testing of Multiplier Board 5540.1-1114 testing and adjustment of Stabilizer Board 5540.1-1115, and use of the Front Frequency Readout to locate problems in Decode Counter Boards 5540.1-1118 thru 5540.1-1122. Additional discussions cover troubleshooting of the 5540.1-11 Power Supply Section.

PLATH DF SYSTEM SUGGESTED MODIFICATIONS FOR THE AG5000 TUNING UNIT (U)

Running Time: 02:46  
Classification: Unclassified

(U) Describes the corrosion problems associated with the 5540.1-1123 STABILIZER Board which is caused by the four batteries in the AG5000 tuning unit. Discusses the Modifications to Stabilizer Board 5540.1-1123 which should be made to eliminate this damaging problem.

CV–3703 FREQUENCY TRANSLATOR (U)

(U) A three tape series on the introduction, circuit boards and setup and test of the CV–3703 Frequency Translator.

CV–3703 FREQUENCY TRANSLATOR – INTRODUCTION AND FUNCTIONAL BLOCK (U)

Running Time: 14:30  
Classification: For Official Use Only

(U) This program will provide a trained technician with the information required to operate, calibrate, and maintain the CV–3703 translator. Additional information may be found in the CV–3703 technical manual.

CV–3703 FREQUENCY TRANSLATOR – CIRCUIT BOARD DISCUSSIONS (U)

Running Time: 22:00  
Classification: For Official Use Only

(U) A detailed analysis of the translators circuitry.
   (1) Differential phase shift
   (2) Frequency synthesizer board no. 1
   (3) Frequency synthesizer board no. 2
   (4) Translator assembly

CV–3703 FREQUENCY TRANSLATOR – SET UP AND TEST (U)

Running Time: 17:10  
Classification: For Official Use Only

(U) This tape illustrates the test procedures which will verify if the translator is operating properly, and will illustrate the alignment procedures required for the translator.
DF-6 MAINTENANCE AND OPERATION (U)

Running Time: 23:51
Classification: For Official Use Only
9 Parts

(U) Program contains details of DF-6 operation and maintenance. It is designed to cover the complete training course as given to station personnel. (Controlled By: E23)

SYSTEM MAINTENANCE (U)

Running Time: 34:11
Classification: Unclassified
18 Parts

(U) is an 18 part course designed to familiarize the technician with the function and maintenance of the system. The various parts of the course include: overall system fault isolation, block diagram analysis, and troubleshooting techniques for the individual equipments in the system. (Controlled By: E23)

PEEVEY - SYSTEM INTRODUCTION (U)

Running Time: 8:05
Classification: For Official Use Only
1 Part

(U) This videotape is the first of a ten-part series covering the PEEVEY System and its associated functions and equipments. PEEVEY is a data processing output system located in equipments linked together by a central computer and special purpose software. In this series the system, configuration, diagnostics and associated equipments are covered in detail. Besides this tape, the System Introduction, there are five sections on the System Industries 1950 Tape Drive, 1935 Formatter and D3 Diagnostic Device; three sections on the Demand Zebra Label Printers; and one on the System Tests. This series will aid the Hardware Maintenance Technician in maintaining the PEEVEY system. Note: The narrator references 14 tapes. Due to economic constraints, there are 10 tapes in the series.

PEEVEY - 9700 TAPE SUBSYSTEM (U)

Running Time: 63:08
Classification: For Official Use Only
5 Parts

(U) These tapes are intended to provide agency technicians with PEEVEY hardware maintenance training on the System Industries 1950 Tape Drive, 1935 Formatter and D3 Diagnostic Device. 5 Parts (TVC-1915 A, B, C and E/TVC-2332)

PEEVEY - ZEBRA PRINTER (U)

Running Time: 22:57
Classification: For Official Use Only
3 Parts

(U) These tapes are intended to provide agency technicians with PEEVEY hardware maintenance training on the Demand Zebra Label Printer. Three parts.

PEEVEY - SUBSYSTEM TESTS (U)

Running Time: 16:04
Classification: For Official Use Only
1 Part

(U) This tape covers the Subsystem Tests on the PEEVEY System used in testing PEEVEY'S Software Connections.
DATA SYSTEMS
GENERAL
An explanation of the Dispatcher System that provides operators a means to report hardware problems to maintenance. Shows how to enter a request for support into the dispatcher system.

FUTURE POSSIBILITIES: DATA, HARDWARE, SOFTWARE AND PEOPLE CAPT. GRACE B. HOPPER, USNR (U)

(U) Talk in FRIEDMAN AUDITORIUM on 19 August 1982 by Capt Grace B. Hopper, USNR, describing future computer possibilities: DATA, HARDWARE, SOFTWARE AND PEOPLE.

PSL/PSA AN OVERVIEW (U)

(U) To serve as an introduction to perspective users/managers of an automated tool available for describing information systems of any kind.

THE MULTICS ADVANTAGE – AN INTRODUCTION TO MULTICS USING THE DELTA DATA 7000E (U)

(U) An introduction to the MULTICS System including operational procedures for the “first time” user of the Delta Data 7000E terminal.

CSAPQE WORKSHOP – DATABASE MANAGEMENT (U)

(U) The Database Management Presentation will give the CSAPQE aspirant an overview of Database Management. Topics covered include terminology, NSA systems, data model selection problems, relational data model terms, specialized database machines and a brief summary of distributed databases. This is a two part tape.

CSAPQE WORKSHOP – DATA COMMUNICATIONS (U)

(U) The Data Communications Presentation will give the CSAPQE aspirant an overview of data communications terminology including analog and digital signals, synchronous and asynchronous transmission, bandwidth and modulation and digital encoding schemes. Several other PQE relevant terms are also discussed.

CSAPQE WORKSHOP – NETWORKING (U)

(U) The Networking Presentation will give the CSAPQE aspirant an overview of computer and communications networks. Subjects include: Standards organizations, physical topologies, network categories, switching types, network services, error correction and network architecture. Talk also includes in-depth discussion of ISO model of layered protocols. This is a two part tape.
CSAPQE WORKSHOP - SOFTWARE ACQUISITION (U)  
**Running Time:** 60:30  
**Classification:** For Official Use Only  
1 Part  
(U) The Software Acquisition Presentation will give the CSAPQE aspirant an overview of the software acquisition process. Areas covered include: NSA's governing directives, software product management and the software development sequence including requirements, design and build, test and integration and product acceptance.

CSAPQE WORKSHOP - SYSTEM ACQUISITION (1988) (U)  
**Running Time:** 51:46  
**Classification:** Secret CCO  
1 Part  
(U) The System Acquisition Presentation will give the CSAPQE aspirant an overview of the system acquisition process at NSA. 25-5 is discussed.

CSAPQE WORKSHOP - SYSTEM ACQUISITION (1989) (U)  
**Running Time:** 57:40  
**Classification:** Secret CCO  
1 Part  
(U) The System Acquisition Presentation will describe for the CSAPQE aspirant the process used at NSA for acquiring systems with special emphasis on requirements concepts and the acquisition plan. Easy to understand examples are included.

CSAPQE WORKSHOP - GRAPHICS (U)  
**Running Time:** 60:34  
**Classification:** Top Secret Codeword  
1 Part  
(U) The Graphics Presentation will describe for the CSAPQE aspirant the various graphics display technologies with particular emphasis on Raster technology. Other topics covered include color definition and video lookup tables, hardware devices and graphics standards. The talk ends with a slide presentation depicting graphics applications at NSA.

CSAPQE WORKSHOP - ARTIFICIAL INTELLIGENCE (U)  
**Running Time:** 79:52  
**Classification:** Top Secret Codeword  
2 Parts  
(U) The Artificial Intelligence Presentation will give the CSAPQE aspirant an overview including the history of AI, the properties of an AI machine and various problem solving techniques. Examples of LISP, PROLOG and AI projects at NSA are given. This is a two part tape.

CSAPQE WORKSHOP - SUPERCOMPUTING (U)  
**Running Time:** 73:41  
**Classification:** Secret CCO NOCON  
2 Parts  
(U) The Supercomputing presentation will give the CSAPQE aspirant an overview of Supercomputing machines, including Vector Processing, Parallelism, Benchmarks and Pipelining. A brief summary of covernames and operating systems used by the Cryptanalytic Processing Centers at NSA is given. This is a two part tape.

NEURAL NETWORKS (U)  
**Running Time:** 72:42  
**Classification:** For Official Use Only  
1 Part  
(U) This program is a recording of the 17 April 1989 meeting of the Computer and Information Sciences Institute (CISI), which featured a survey of the Neural Network field. The speaker was Dr. Harold Szu of the Naval Research Laboratory, who is a leader in the field. CISI has available for review the viewgraphs used by Dr. Szu at this presentation, but their order does not correspond to the order used during the meeting. Copies available on VHS only.
COMPUTER VIRUS BRIEF WITH ALLAN FOGEL (FOUO)  
Running Time: 14:58  
Classification: Top Secret CCO  
(FOUO) This videotape is a brief about computer viruses.

HP-360 ACTUATOR (U)  
Running Time: 17:42  
Classification: Secret Codeword  
(U) This video contains training information for the HP-360 Actuator Bit Stream Analysis System—including set-up procedures and analysis applications.

HP-9836 ACTUATOR (U)  
Running Time: 18:03  
Classification: Secret Codeword  
(U) This video contains training information for the HP-9836 Actuator Bit Stream Analysis System—including set-up procedures and analysis applications.
SIGINT
EQUIPMENT OPERATION
DROPOUT PHASE I OPERATIONS AND MAINTENANCE (U)  
TVC-543 1979  
Running Time: 424:07 Classification: Secret CCO 18 Parts  
(U) This program is a video presentation of the operations and maintenance training course for the DROPOUT Phase I Collection/Processing System (AN/FRR-102). This program, when supplemented by the system and equipment level manuals, forms a complete operations and maintenance training course for the system.

RINGNESS SYSTEM TRAINING (U)  
(U) A 43 tape series on the RINGNESS system operations, software, hardware, and the Bell and Howell VR3742 Recorder (Controlled By: T154)

CARDIGAN/TERMITE OPERATOR AND MAINTENANCE TRAINING (U)  
TVC-728 1980  
Running Time: 1097:00 Classification: Top Secret CCO 46 Parts  
(U) Instructs students in the operation and maintenance of the CARDIGAN/TERMITE system at the system, subsystem and equipment level. It provides detailed maintenance material for the operator and maintenance man who participated in the formal on-site training course. It also provides follow-on training for replacement personnel as required.

ROCKLAND FFT-512/S SPECTRUM ANALYZER (U)  
TVC-794 1981  
Running Time: 74:17 Classification: Unclassified 6 Parts  
(U) A set of tapes describing the basic theory, operation, and maintenance of the Rockland FFT-512/S spectrum analyzer with options 15, 17 and 20.

ECHELON I TDM SUBSYSTEM (U)  
TVC-559 1981  
Running Time: 402:21 Classification: Unclassified 20 Parts  
(U) The program was implemented to provide the ECHELON I sites with an integrated time division multiplex (TDM) subsystem capability.

COPES (U)  
TVC-842 1981  
Running Time: 16:21 Classification: Secret Codeword 1 Part  
(U) Introduction to COPES philosophy, strategy, and applications. Brief description of COPES, including need, participants, misconceptions, and comparison with other systems.

RINGNESS QRC MODIFICATION (SOFTWARE) (U)  
TVC-739A 1982  
Running Time: 67:03 Classification: Unclassified 6 Parts  
(U) Training course to provide information necessary to maintain/upgrade RINGNESS QRC SOFTWARE. RINGNESS is an operational signals processing system based upon a PDP 11/70 computer, and is located in T154 spaces.

UNCLASSIFIED  
III-1  
Equipment Operation
RINGNESS QRC MODIFICATION (OPERATIONS) (U) TVC-739B 1982
Running Time: 17:42 Classification: Unclassified 2 Parts

(U) These tapes will give the viewer a basic knowledge of the RINGNESS QRC MODIFICATION UNIT in the operational mode with a description of its overall function. There will be no other material used in conjunction with the video tapes.

RINGNESS QRC MODIFICATION - HARDWARE (U) TVC-739C 1982
Running Time: 57:09 Classification: Unclassified 4 Parts

(U) These tapes give an overview of the QRC Modification Signal flow and how to use diagnostic to troubleshoot for repair. No other material required.

REAL TIME RASTER/RECORER REPRODUCER UNIT (U)

(U) A six-tape series on the operation and maintenance of the Real Time Raster/Recorder Reproducer Unit.

REAL TIME RASTER/RECORER REPRODUCER UNIT INTRODUCTION AND EQUIPMENT DESCRIPTION (U) TVC-835A 1984
Running Time: 25:40 Classification: For Official Use Only 1 Part
(U) Tape one is an introduction discussing the RRU's function, physical description, general specifications, and Technical manual.

REAL TIME RASTER/RECORER REPRODUCER UNIT INSTALLATION (U) TVC-835B 1984
Running Time: 07:40 Classification: For Official Use Only 1 Part
(U) Tape two describes the RRU installation, both physically as in rack mounting and printer installation, and electrically as in cable interconnections and voltage selection.

REAL TIME RASTER/RECORER REPRODUCER UNIT OPERATING INSTRUCTIONS (U) TVC-835C 1984
Running Time: 17:10 Classification: For Official Use Only 1 Part
(U) Tape three describes operating instructions from power up to power down. Instruction is also given on Diskette handling procedures and print paper replacement.

REAL TIME RASTER/RECORER REPRODUCER UNIT THEORY OF OPERATION (OPERATING THEORY GENERAL FUNCTIONAL THEORY) (U) TVC-835D 1984
Running Time: 25:10 Classification: For Official Use Only 1 Part
(U) Tape four describes the theory of operation of the operating modes and general functional theory of the printed circuits.
REAL TIME RASTER/RECORDER REPRODUCER UNIT

THEORY OF OPERATIONS FUNCTIONAL DESCRIPTION

OF CARD CIRCUITRY (U)

TVC-835E 1984

Running Time: 21:40

Classification: For Official Use Only

(U) Tape five continues describing the theory of operation. The functional description of Card Circuitry is also discussed.

REAL TIME RASTER/RECORDER REPRODUCER UNIT

MAINTENANCE (U)

TVC-835F 1984

Running Time: 17:10

Classification: For Official Use Only

(U) Tape six is for maintenance training both for preventive maintenance and troubleshooting in case of failure.

HP–3585 ANALYZER SPECTRUM (U)

TVC-1296 1986

Running Time: 15:13

Classification: Confidential

(U) This tape provides a lesson in the use of the Hewlett-Packard 3585 Spectrum Analyzer. The program is divided into two parts. Part I gives a basic overview of the analyzer and its major functions, and Part II gives a study of practical applications for the equipment.

JEWETT II COLLECTION SYSTEM (U)

TVC-1636 1988

Running Time: 18:36

Classification: Secret CCO

(U) The JEWETT II Collection System is covered in design and operation in the videotape. Individual components are highlighted at the remote collection facility as well as many computer controlled features of the collection console at the operations facility.

SAN.DLOT USER TRAINING (U)

TVC-1622 1988

Running Time: 29:36

Classification: Confidential

(U) This nine-part production covers the Sandlot Reporting and Analysis Workstation (IBM AT) in short modules. It gives the viewer a look at the Sandlot hardware functionality and screen information to complement the Sandlot User's Manual. Topics covered include turn-on, logging on and off, setting up the profile, etc.

OCOT II (U)

TVC-1728 1988

Running Time: 7:51

Classification: Top Secret Codeword

(U) This seven-minute video shows signals analysts how to use the Equipment functions, buttons and analysis features are described. Various GSH printout are used to illustrate the system's capabilities.

ANALYSIS TECHNIQUES (U)

TVC-1838 1989

Running Time: 18:13

Classification: Confidential

(U) The Techniques video shows signals analysts how to use the Equipment functions, buttons and analysis features are described. Various GSH printout are used to illustrate the system's capabilities.
SIGINT
EQUIPMENT MAINTENANCE
AN/TNH-21 RECORDER (U) TVC-608 1974
Running Time: 357:56 Classification: Unclassified 9 Parts
(U) A nine-part maintenance series on the TNH-21 including: introduction; system specifications; capstan servo system; phase comparator; system power supply; circuit analysis; drive circuitry; and counter reset. (Black and White)

DROPOUT PHASE I OPERATIONS AND MAINTENANCE (U) TVC-543 1979
Running Time: 424:07 Classification: Secret CCO 18 Parts
(U) This program is a video presentation of the operations and maintenance training course for the DROPOUT Phase I Collection/Processing System (AN/FRR-102). The program, when supplemented by the system and equipment level manuals, forms a complete operations and maintenance training course for the system.

WJ8718/16 HF RECEIVER MAINTENANCE COURSE (U) TVC-546 1979
Running Time: 125:00 Classification: Unclassified 11 Parts
(U) Eleven tapes specifically developed as visual aids to support course learning objectives in the psychomotor domain. Covers: physical characteristics of the receiver and demonstrations of sensitivity/performance tests and alignments/adjustments. Tapes are used as a supplement to Course Modules. Tape content and package labeling is void of any association with NSA/CSS and/or the U.S. Government.

INTERSTATE ELECTRONICS CORPORATION MODEL 490 SPECTRUM SURVEYOR (U) TVC-793 1980
Running Time: 146:59 Classification: Unclassified 15 Parts
(U) Describes: basic theory; operation; and maintenance of the IEC Model 490 spectrum surveyor. The maintenance portion includes twelve Fault Isolation Sequences (FIS) which emphasize analysis of oscilloscope test waveforms found in the IEC 490.

CARDIGAN/TERMITE OPERATOR AND MAINTENANCE TRAINING (U) TVC-728 1980
Running Time: 109:00 Classification: Top Secret CCO 46 Parts
(U) Instructs students in the operation and maintenance of the CARDIGAN/TERMITE system at the system, subsystem and equipment level. It provides detailed maintenance material for the operator and maintenance man who participated in the formal on-site training course. It also provides follow-on training for replacement personnel as required.

ROCKLAND FFT-512/S SPECTRUM ANALYZER (U) TVC-794 1981
Running Time: 74:17 Classification: Unclassified 6 Parts
(U) A set of tapes describing the basic theory, operation, and maintenance of the Rockland FFT-512/S spectrum analyzer with options 15, 17 and 20.
ECHELON I TDM SUBSYSTEM (U)  TVC-559  1981
Running Time: 402:21  Classification: Unclassified  1 Part

(U) The program was implemented to provide the ECHELON I sites with an integrated time division multiplex (TDM) subsystem capability.

ATTAMAN TIME BASE DIGITIZER, ET-C01 (U)  TVC-758  1981
Running Time: 225:18  Classification: Unclassified  11 Parts

(U) The Attaman Time Base Digitizer course ET-C01 provides personnel with the information necessary to maintain and use the unit. The description of the unit will enable the maintenance personnel to diagnose problems in the unit down to the component level.

RACAL R-2174(P) URR OPERATION AND MAINTENANCE (U)  TVC-840  1981
Running Time: 30:13  Classification: Unclassified  1 Part

(U) A tape on the operation and maintenance of the RACAL 2174 HF receiver.
SIGINT
OPERATIONS
THE AN/WLQ-4 (V) SYSTEM (U) TVC-532 1979
Running Time: 17:50 Classification: Secret 1 Part
(U) An overview briefing of the AN/WLQ4 (V) ESM threat warning subsystem covering: equipment; operating position structure and operation; and ESM sub-system operation in a tactical environment.

AN/WLQ-4 (V) SYSTEM, LOGS/AIDS/FILES (U) TVC-576 1979
Running Time: 26:35 Classification: Secret 1 Part
(U) Describes numerous software logs, aids, and files associated with the AN/WLQ-4 (V) System (or E Suite) being installed in... It further describes many of the shore support functions performed by type commanders, area ELINT center and the Naval Electronic Systems Engineering Center, San Diego, California.

ZAKI LIVE (C-CCO) TVC-809 1981
Running Time: 10:50 Classification: Top Secret Codeword 1 Part
(U) This tape is an on-site recording of the operation of the ZAKI collection and forwarding position within... The intended audience are managers, designers, operators, and collectors who are involved in the system design, collection, collection management, or tasking of...

INTRODUCTION TO UP AND DOWN CONVERSION TECHNIQUES (U) TVC-754A 1981
Running Time: 06:30 Classification: Secret Codeword 1 Part
(U) This tape is designed to present to the viewer the basis on why frequency conversion techniques are used and how to apply them. It is intended as an introductory presentation.

OUTBOARD INTERVIEW (U) TVC-849 1981
Running Time: 14:07 Classification: Secret Codeword 1 Part
(U) This tape describes use of the Navy Outboard System.

THE GROUP "A" REMOTE OPERATIONS FACILITY "AROF" (U) TVC-748 1982
Running Time: 13:38 Classification: Top Secret Codeword 1 Part
(U) This program will be used to present visitors with an overview of AROF operations. Following each presentation, visitors will be given a walk-through tour of the operational areas depicted in the videotape.

INTRODUCTION TO THE RADAR AND SIGINT SYSTEMS ON... TVC-844 1982
Running Time: 20:20 Classification: Secret 1 Part
(U) Introduction to the radar and SIGINT systems on...
DOCSR: 3273255

REF ID: A3273254

TIMBERLINE (U)

Running Time: 07:10

Classification: Top Secret CCO

1 Part

(T) Management briefing tape to give an overview of the TIMBERLINE field site.

COLLECTION (S-CCO)

Running Time: 15:36

Classification: Top Secret Code

1 Part

This tape is an introduction to its applications, identification and collection techniques as applied in the

PROBE SNAPSHOT RECORDER (U)

Running Time: 13:17

Classification: Secret Code

1 Part

This is an introduction to the probe snapshot recorder. It explains applicability of probe recordings, capability of the probe and specifically how to go about making Probe Snapshot Recorders in the

OPERATIONS

Running Time: 18:32

Classification: Secret Code

1 Part

This is an introduction to the OPERATIONS. It explains the basic structure and characteristics, how we go about attempting collection and analysis on a live environment in which it is extremely difficult to make recording processes.

RASTERING (S-CCO)

Running Time: 08:36

Classification: Top Secret Code

1 Part

(9) Introduction to the Rastering Techniques on the oscilloscope can be detected by using this specific rastering technique.

RASTERING (S-CCO)

Running Time: 07:11

Classification: Top Secret Code

1 Part

(9) Introduction to Rastering Technique and applications against by using an Oscilloscope Rastering capability.

(9)

Running Time: 26:33

Classification: Secret CCO

1 Part

(9) An overview of the SIGINT operations of

ELIXIR (U)

Running Time: 17:37

Classification: Confidential CCO

1 Part

(U) Description of the capabilities, equipment and software of an Automated Morse Processing System — Project ELIXIR.

SECRET

PSK ANALYSIS TECHNIQUES (U)
Running Time: 19:45  Classification: Confidential CCO

The object of this program is to demonstrate the recognition and analysis techniques that will help the novice analyst quickly identify phase shift keyed transmissions.

SIGINT

CLO SYMPOSIUM: COPING WITH THE CRYPTOLOGIC EXPLOSION (U)
Running Time: 56:02  Classification: Top Secret Codeword Nofo.

This tape describes automatic dialing encountered on TVC-1025 1985
and how to determine the accessed area.

PROJECT FISHWORK (U)
Running Time: 9:04  Classification: Secret CCO

This tape is a description of Project Fishwork as installed TVC-1310 1985
Included is a brief description of major components of the system and its capabilities.

IRSS TRANSCRIPTION WORK STATION (U)
Running Time: 6:51  Classification: Unclassified

An overview of the IRSS Transcription Work Station. This tape shows functions and examples of system operation.

USAF/5TH AF ON NSA (U)
Running Time: 4:22  Classification: Secret CCO

An interview from Fall 1985 with Lt. General Edward L. Tixier, USAF, Commander US Forces Japan and Fifth Air Force, speaking on his need for intelligence and NSA's role in supporting USFJ and Fifth Air Force.

SATELLITE STATION TVC-1430 1986
Running Time: 15:50
Classification: Secret Codeword No for n
1 Part

(S) This tape covers the dedication of the
and speeches and ceremonies
connected with the dedication.

SANDLOT BRIEFING (U) TVC-1545 1987
Running Time: 30:00
Classification: Top Secret Codeword
1 Part

(U) A briefing on the description, capabilities and functionalities of the A24 SANDLOT and
T333 user interface layer.

BRODIE (U) TVC-1244 1987
Running Time: 128:05
Classification: Secret CCO
5 Parts

BILLY CAN III (C) TVC-1663 1988
Running Time: 10:15
Classification: Secret Codeword
1 Part

(C) This tape gives a brief overview of

THE DEFENSE RESEARCH FACILITY, KUNIA (U) TVC-1776 1988
Running Time: 19:23
Classification: Secret CCO
1 Part

(U) This tape is an overview of the mission of DRFK, detailing job responsibilities on site in
Hawaii.

SIGNAL INTERCEPT SYSTEM (U) TVC-1558 1988
Running Time: 23:17
Classification: Secret CCO
1 Part

(U) This videotape covers the features and capabilities of the Signal Intercept
System. Special attention is given to the concepts of signal event detection. The major
components of the system are also covered.

SECRET

Operations
MODEM ANALYSIS TECHNIQUES (U)  

Running Time: 19:02  
Classification: Secret CCO  

(U) This training video describes signal modulation and analysis techniques for various modem types. This video is to be used in conjunction with the MODEM RECOGNITION AND ANALYSIS TECHNIQUES HANDBOOK to aid in training of SEARCH personnel.

NSA SUPPORT TO MILITARY OPERATIONS—AN OVERVIEW (FOUO)  

Running Time: 12:12  
Classification: Secret  

(FOUO) This videotape, the first in a three part series, provides an overview of NSA’s support to military operations. It gives a brief look at the background and history of NSA’s involvement with military operations and touches on the support tool, called “Profiling” as a preview of the succeeding tapes. (This video is a module of CY-188).

NSA SUPPORT TO MILITARY OPERATIONS — CURRENT CAPABILITIES (FOUO)  

Running Time: 17:26  
Classification: Secret CCO  

(FOUO) Part 2 of 3 in the “Support to Military Operations” series. This show covers how NSA supports current operations. It briefly explains the duties of NSOC, the Collection Management Office and the Service Cryptologic Elements. It gives a history of SIGINT’s role in war and crisis situations. And finally, it discusses mission planning architectures. (This video is a module of CY-188).

DEFSMAC (U)  

Running Time: 20:14  
Classification: Top Secret Codeword TK Noforn HVCCJ  

(FOUO) This video covers the mission and operations of the Defense Special Missile and Astronautics Center. Using an example of a missile launch, the video illustrates how intelligence is received and processed through the different divisions that make up DEFSMAC. (This video is a module of CY-188).

SIGINT AND THE REQUIREMENTS PROCESS (U)  

Running Time: 24:03  
Classification: Top Secret TK HVCCJ  

(U) The first half of this videotape defines several types of SIGINT and shows the advantages of its use. The second half covers the procedure for requesting SIGINT and the different types of SIGINT requests. Several world events are used to explain how SIGINT played a key role in their outcome. (This video is a module of CY-188).

SIGINT COLLECTION AND COLLECTION MANAGEMENT (U)  

Running Time: 9:20  
Classification: Top Secret TK HVCCJ  

(FOUO) A basic overview of the techniques of SIGINT collection and collection management. (This video is a module of CY-188)
SIGINT

SIGNS INTELLIGENCE: AN OVERVIEW (U)
(Running Time: 21:16  Classification: Top Secret CCO)
(U) A general orientation to the signals intelligence process.

LINE OF SIGHT SYSTEMS COLLECTION:
(Running Time: 04:42  Classification: Secret)
(The optical frequency SIGINT branch of NSA's Line of Sight Systems group deployed and operated a collection effort at these experiments. This tape documents the deployment effort and results.)

CRYPTANALYSIS AGAINST THE JAPANESE NAVY DURING WORLD WAR II (U)
(Running Time: 09:20  Classification: Confidential 2 Parts)
(U) This is a video tape of a talk delivered by Frank Raven at the winter meeting of the KRYPTOS Society on 3 February 1982. Mr. Raven, who went on to become the Chief of "G" group before his retirement in 1975, played an important role in the cryptanalytic effort against the cipher machines used by the Japanese Navy during World War II. In his presentation, Mr. Raven examines the evolution of these machines (and the corresponding cryptanalysis) from their beginnings in discarded European equipment to the powerful CORAL machine, "the last machine for which I still have respect," says Frank Raven.

SIGNAL ANALYSIS TECHNIQUES (U)
(Running Time: 25:07  Classification: Confidential CCO)
(U) This program reviews the use of search equipment for recognizing common forms of amplitude, frequency and phase modulation. Emphasis is placed on interpreting oscilloscope and spectrum analyzer displays. Equipment configuration and calibration is also reviewed.

STATISTICAL MULTIPLEXING (U)
(Running Time: 09:34  Classification: Secret Codeword)
(U) A description of the new technique of statistical multiplexing and how this technique impacts on the SIGINT community.

FREQUENCY HOPPING AND HYBRID SPREAD SPECTRUM TECHNIQUES (U)
(Running Time: 18:58  Classification: Confidential)
(U) Provides a brief description of frequency hopping to be used as an operational training aid.

REEDWORK/LIGHTSHIP SITE TOUR (U)
(Running Time: 18:00  Classification: Top Secret CCO)
(U) Program provides site tours of its object is to provide the viewer with an overview of site topography, resources available, and the current sigint systems in use.

GENERAL

III-13
FIELD STATION KUNIA (U) TVC-908A 1983
Running Time: 20:47 Classification: Top Secret CCO 1 Part
(U) An overview of Field Station Kunia.

SPREAD SPECTRUM MODULATION TECHNIQUES (U) TVC-976 1983
Running Time: 21:10 Classification: Confidential CCO 1 Part
(U) Tape describes direct sequence and stack carrier spread spectrum technology, discusses applications, provides methods of recognition and details some processing techniques.

THE PARSEC SYSTEM (U) TVC-929 1983
Running Time: 06:17 Classification: Secret CCO 1 Part
(U) This videotape presents an overview of the Parsec System and its primary capability of supporting air-related reporting requirements.

THE THREAT TO U.S. COMMUNICATIONS IN EUROPE (U) TVC-1046 1984
Running Time: 48:00 Classification: Secret Noform 1 Part
25X1, E.O.13526 JRT An interview with a ___________ who recounts hostile SIGINT efforts against NATO and U.S. Communications in Europe, and the information that his country was able to gain on U.S. military preparedness.

INTRODUCTION TO SPEECH PRIVACY SYSTEMS (U) TVC-1010A 1984
Running Time: 21:36 Classification: Secret Codeword 1 Part
(CCO) The tape introduces collection personnel to the subject of enciphered speech signals. Intended to precede descriptions of specific signals, the introduction discusses, in general terms, how to identify and properly collect analog and digital enciphered speech signals.

SPEECH PRIVACY SIGNALS DESCRIPTION (U) TVC-1010B 1984
Running Time: 41:38 Classification: Secret Codeword 1 Part
(CCO) The tape contains descriptions of a number of analog and digital enciphered speech signals. Each description treats what a signal looks and sounds like and how the signal should be identified and collected. Contact G434 for specific signals description tape for your use.

TRAVIS AND DIRECTOR'S TROPHY AWARDS 1983 (U)  
**TVC-1001 1984**

*Running Time: 46:00  Classification: Top Secret Codeword 1 Part*

(U) Live coverage of the planning and ceremonial functions for Travis and the Director's Trophy Awards including video footage at the sites of the nominees.

**SIGNAL RECORDING TECHNIQUES (U)**  
**TVC-1063 1984**

*Running Time: 21:13  Classification: Confidential CCO 1 Part*

(U) Describes recording techniques to be used by field operators to provide better Media for Signal Analysis.

**CINCPAC ON NSA (U)**  
**TVC-1164 1984**

*Running Time: 6:26  Classification: Secret - CCO 1 Part*

(U) Videotape of Admiral Crowe, CINCPAC, speaking on NSA.

**TRANSCRIPTION AIDS (U)**  
**TVC-978 1984**

*Running Time: 7:06  Classification: Top Secret Codeword 1 Part*

(U) This tape visually portrays the five major on-line transcription programs within the system that aid the transcription process. The system was designed by the R831 Keppler Lab and was used by A6 transcribers. The tape is designed to be used as part of a briefing and contains no narration.

**W3 HDL FREQUENCY HOPPING (U)**  
**TVC-1183 1985**

*Running Time: 9:30  Classification: Top Secret Codeword 1 Part*

(U) Demonstration of HDL Frequency Hop work under W3 project.

**TRAVIS AND DIRECTOR'S TROPHY AWARDS 1984 (U)**  
**TVC-1107 A-1 1985**

*Running Time: 141:40  Classification: Top Secret Codeword 9 Parts*

(U) A nine-tape series of an introduction to including the mathematical theory and agency application. Objectives to train the mathematician in the uses of (Controlled by: E42)

**TRAVIS AND DIRECTOR'S TROPHY AWARDS 1984 (U)**  
**TVC-1167 1985**

*Running Time: 7:27  Classification: Confidential 1 Part*

(U) A brief montage of the Travis Trophy ceremony held in May 1985 highlighting the winners of the Travis Trophy and Director's Trophy Awards.

**TRAVIS AND DIRECTOR'S TROPHY AWARDS 1985 (U)**  
**TVC-1392 1986**

*Running Time: 11:48  Classification: Confidential 1 Part*

(U) Travis and Director's Trophy, winners and runners-up.
PCM ANALYSIS TECHNIQUES (U)  
**Running Time:** 14:35  
**Classification:** Confidential CCO  
(U) PCM Analysis Techniques reviews the concepts of waveform sampling, quantizing and encoding. Time Division Multiplexing (TDM) used in Level 1 and higher PCM systems is discussed. PCM–TDM waveforms and spectra are used to explain analysis concepts and techniques.

ADVANCED PSK ANALYSIS TECHNIQUES (U)  
**Running Time:** 18:44  
**Classification:** Confidential CCO  
(U) Advanced PSK Analysis Techniques reviews basic PSK modulation prior to introducing Offset (Staggered) QPSK, 45 degrees Offset PSK, Polyphase and Quadrature Amplitude Modulation (QAM) concepts and techniques. Signal space diagrams, waveforms and other displays are shown. Examples of these signals using CCITT V-Series MODEMS are given.

TRAVIS AND DIRECTOR’S TROPHY CEREMONIES 1986 (U)  
**Running Time:** 12:37  
**Classification:** Confidential  
(U) A capsule of the 1986 Travis and Director’s Trophy Winners.

THE MAN FOR THE SEASON: ROCHEFORT, 1943 (U)  
**Running Time:** 28:30  
**Classification:** For Official Use Only  

U BET YOUR USSID (U)  
**Running Time:** 9:33  
**Classification:** Confidential  
(U) A game show format showing the proper use of delivery indicators (DDI’S) as promulgated in the USSID 519.

FREQUENCY HOPPING THREAT (U)  
**Running Time:** 15:45  
**Classification:** Top Secret CCO  
(E) This tape explains the techniques, advantages and users of frequency hopping equipment around the world. Special emphasis is given to the frequency hopping threat.

CLA EDIT (U)  
**Running Time:** 22:42  
**Classification:** Unclassified  
(U) A Japanese videotape translated into English. The videotape portrays the Japanese version on how the U.S. shot down Admiral Yamamoto and how long it took the U.S. to break the Japanese code that told of Yamamoto’s trip.
AIR INTELLIGENCE IN THE EUROPEAN THEATER (FOUO)  

**Running Time:** 65:21  
**Classification:** Secret Noform  

(FOUO) This is a two part tape. Part I is designed to familiarize aircrews, operations personnel, intelligence specialists and others regarding the roles and missions of most intelligence units in USAF. It covers the types of intelligence provided and explains the ways in which the various intelligence nodes in Europe inter-relate. Part II covers the Collection Assets and Analytical Resources. It also covers the various collection, analysis and distribution techniques used to provide intelligence support throughout Europe.

WESTERN PACIFIC PASSIVE THREAT BRIEF (U)  

**Running Time:** 18:32  
**Classification:** Secret Noform WNINTEL  

(U) Describes the passive threat to U.S. Naval Units operating in the Pacific Ocean areas. Video will be used as training for Fleet Units. Classification of video is Secret Noform WNINTEL.

(WC2X1, E.O.13526)  

**Running Time:** 176:37  
**Classification:** Top Secret Codeword  

(FOUO) This is a four part program on the Intelligence Community perspective of the political, economic and social changes. The objective was to sensitize NSA analysts to the significance of this movement. Part 1 is TVC-2148—Running Time: 59:07—Classification: Top Secret Codeword. Part 2 is TVC-2149—Running Time: 26:42—Classification: Top Secret Codeword. Part 3 is TVC-2150—Running Time: 57:37—Classification: Top Secret Codeword. Part 4 is TVC-2151—Running Time: 33:51—Classification: Top Secret Codeword.

THE CUBAN/_CARIBBEAN PASSIVE THREAT (U)  

**Running Time:** 13:48  
**Classification:** Secret Noform WNINTEL  

(U) This presentation provides an overview of the passive SIGINT threat encountered by U.S. Naval units operating in the Caribbean. Tape will be used as part of the ship’s pre-deployment SIGSEC training.

THE ATLANTIC PASSIVE THREAT (U)  

**Running Time:** 17:12  
**Classification:** Secret Noform WNINTEL  

(U) This presentation provides an overview of the passive SIGINT threat encountered by U.S. Naval units operating in the Atlantic theater. Tape will be used as part of a ship’s pre-deployment SIGSEC training program.

CURRENT ISSUES IN SIGINT REPORTING (FOUO)  

Running Time: 318:28  
Classification: Top Secret Codeword  
7 Parts

(U) A seven part videotape on current issues in SIGINT reporting. Part 1—Seminar jointly sponsored by DDO and NCS on SIGINT reporting, journalism, desktop publishing and customer relations. Address by [ ] Part 2—Talk by [ ] on Project RELOOK. Part 3—Talk on journalism by [ ] Part 4—Talk on DTP by [ ] Part 5—Talk on current reporting and video reporting by [ ] Part 6—Talk on customer relations by Dr. William M. Nolte. Part 7—General discussion at conclusion of symposium.

TRAVIS AND DIRECTOR'S TROPHY (U)  

Running Time: 67:27  
Classification: Top Secret Codeword  
1 Part

(U) Travis and Director's trophy award ceremony. Copies available on VHS only.

U BET YOUR USSID: ONE WEEK LATER (U)  

Running Time: 13:04  
Classification: Confidential  
1 Part

(U) In this, the second episode in the U BET YOUR USSID series, Quiz Master Bert Winkendale tests the skills of two contestants on their knowledge of Delivery Distribution Indicators (DDI's) as they are promulgated in USSID 519. This particular episode deals with DDI's from Annex A; Appendix 2, Annex B and Section 3. This episode opens with the famous Wendy's Fashion Show commercial.

OVERVIEW OF NSOC (U)  

Running Time: 12:53  
Classification: Top Secret Codeword  
1 Part

(U) This overview introduces the viewer to the organization and describes its basic responsibilities. It also provides insight into some specific NSOC responses in critical situations. (This Video is a Module of CY-188).

SIGINT REPORTING (U)  

Running Time: 10:55  
Classification: Top Secret Codeword  
1 Part

(U) This video briefly covers the role and methods of SIGINT reporting at NSA. This includes the various levels of reports and their mechanisms for processing the reports. Examples of how SIGINT reports have influenced foreign policy are also cited as well. (This Video is a Module of CY-188).

TRAFFIC ANALYSIS (U)  

Running Time: 11:50  
Classification: Secret Codeword  
1 Part

(U) A brief overview of Traffic Analysis at NSA. (This Video is a Module of CY-188).

THAT ONE BURNING BRANCH (U)  

Running Time: 5:35  
Classification: Secret  
1 Part

(U) This video covers the mission and operations of the National Telemetry Processing Center. It provides an appreciation of the role of NTPC in SIGINT events as well as giving the audience an understanding of the complexities involved in the NTPC task.
MIJI (U) 1990
Running Time: 20:57  Classification: For Official Use Only
(FOUO) Summary of Meaconing Intrusion, Jamming and Interference threat to our forces and the MIJI reporting program. Tape will be used by X4N, the Joint Electronic Warfare Center and the National Cryptologic School for training of DOD personnel.

BILLYCAN IV (C) 1990
Running Time: 11:08  Classification: Secret Codeword

PROJECT RELOAD (U) 1991
Running Time: 29:57  Classification: Top Secret Codeword
(U) This videotape describes the history, accomplishments and future plans of Project RELOAD, a joint NSA/SCE effort to restore the SIGINT technical health in the field.

PACIFIC/INDIAN OCEAN/PASSIVE SIGINT THREAT BRIEF (U) 1991
Running Time: 23:35  Classification: Secret Nonforn Noncon WNINTEL
(U) The video outlines the passive SIGINT threat in the Pacific and Indian Ocean area and will be used to educate navy personnel in the 3rd/2nd fleets about the threat.

CRYPTANALYSIS (U) 1991
Running Time: 15:08  Classification: Top Secret Codeword
(U) This video defines cryptanalysis, explains some enciphering techniques and covers how cryptanalysis has influenced international events. (This video is a module of CY-188).
COMMUNICATIONS
EQUIPMENT OPERATION
GENERAL SOFTWARE ANALYSIS OF MODEM SIGNALS (U) TVC-880 1982
Running Time: 20:00 Classification: Secret 1 Part
(U) The program discusses the history of telephone channel data transmission, current modem signal technology, and a number of powerful computer analysis techniques developed and implemented by the Signals Analysis Division (W34) of the Office of Search. The division's usage of interactive computer graphics is stressed.

WNSA (U) TVC-1264 1988
Running Time: 8:38 Classification: Secret 1 Part
FCO technology—FCO support systems, narratives and descriptions. News theme presentation of communications center support subsystems.

25X1, E.O.13526 TVC-1725 1989
Running Time: 12:06 Classification: Top Secret Codeword 1 Part
(S) a brief and humorous approach to teaching analysts to recognize

25X1, E.O.13526
COMMUNICATIONS
GENERAL
U.S. COMMUNICATIONS IN JEOPARDY (U)  
Running Time: 22:40  
Classification: Secret Nonfoam  
1 Part

(3-CCO) This tape presents a general overview of the foreign signals intelligence (SIGINT) threat to unprotected U.S. communications. It emphasizes areas of coverage, and methods of operation. The tape would be useful for persons requiring an understanding of the reality of this threat and the resultant need for communications security; it does not presume familiarity with the subject.

THE CRITIC SYSTEM (U)  
Running Time: 16:20  
Classification: Top Secret Codeword  
1 Part

(U) This tape presents an overview of the entire Critic System and gives specific criteria necessary for preparing and transmitting a Critic message.

THE CRITIC SYSTEM (SANITIZED VERSION) (U)  
Running Time: 14:00  
Classification: Confidential  
1 Part

(U) This tape overviews the entire Critic System and gives specific criteria necessary for preparing and transmitting a Critic message. This tape is a sanitized version.

BASIC RADIO THEORY (U)  
Running Time: 11:31  
Classification: For Official Use Only  
1 Part

(FOUO) This videotape introduces the theory behind radio. It also briefly explains Time Division Multiplexing and Frequency Division Multiplexing. This program should be used as a brief introduction or review.
The Electronic Warfare during Close Air Support (EW/CAS) Joint Test Force was formed by OSD for the purpose of examining the effects of electronic warfare on close air support operations in a dense air defense and EW threat environment. This presentation focuses on the results of replica communications jamming employed against U.S. tactics and equipments. Recently, EW/CAS-JTF completed the testing phase for tactical communications jamming with their participation in the GALLANT EAGLE 80-A "FREE PLAY" Joint Reconnaissance Exercise and a combined arms test which simulated a Soviet mechanized rifle division breakthrough into a U.S. Brigade sector supported by USAF Close Air Support and attack helicopters. Those tests, specifically test 5 and 6 are detailed below: Test 5 conducted in February 1980, was a CPX which played a Soviet Motorized Rifle Division against a U.S. Mechanized Infantry Brigade, with associated air support. The Red Forces fielded a Radio Electronic Combat Battalion consisting of 6 UHF jammers, 6 VHF jammers, 3 HF jammers, 28 intercept positions, and 2 ICD teams. Test 6, conducted in March 1980, was a part of the REDCOM FTX GALLANT EAGLE '80 which played the U.S. 1st Infantry Division and 5th Marine Brigade against the 4th Infantry Division. Discusses the effects of the ESM/Jamming ICD efforts, which were primarily to delay and confuse command and control functions at battalion level and below. The tests were constructed to determine operational effects of EW on battle management, rather than to gather technical data.

ORAL PROFICIENCY TESTING (U) TVC-384 1979
Running Time: 23:14 Classification: Unclassified 1 Part
(U) Demonstration interviews in English showing the technique used by several government agencies to assess oral foreign language proficiency. (Can also be purchased through GSA Audiovisual Services)

PRACTICAL HEBREW (U) TVC-893 1982
Running Time: 32:40 Classification: Unclassified (FOUO) 1 Part
(U) This videotape provides audio-visual support to the workbook entitled “Practical Hebrew - Four Skill Reinforcement”, Volumes 1 & 2. The tape is designed to be viewed by the Hebrew language student on a weekly basis and contains 21 Hebrew dialogues in various scenarios.

PRACTICAL HEBREW - PART 2 (U) TVC-944 1983
Running Time: 22:06 Classification: For Official Use Only 1 Part
(U) This videotape provides audio-visual support to the workbook entitled “Practical Hebrew - Four Skill Reinforcement”, Volumes 1 & 2. The tape is designed to be used in conjunction with videotape TVC-893, contains 12 additional Hebrew dialogues and should be viewed by the Hebrew language student on a weekly basis.

CTSREPDLIFLFC BRIEFING (U) TVC-823 1983
Running Time: 9:00 Classification: For Official Use Only 1 Part
(U) Briefing to give new military personnel in the Defense Language Institute’s Foreign Language Course as to the importance of their training, what kind of training they’ll receive at Goodfellow Air Force Base, and what kind of work they will be doing once they get out in the field.

GOLDILOCKS AND THE THREE BEARS (U) TVC-1181 1985
Running Time: 13:13 Classification: Unclassified 1 Part
(U) The children’s story of Goldilocks and the Three Bears is performed in Arabic by graduating language students, with some updating of the dialog.

USARI: THE UNITED STATES ARMY RUSSIAN INSTITUTE (INSCOM) (U) TVC-1062 1985
Running Time: 12:28 Classification: For Official Use Only 1 Part
(U) This videotape provides an introduction to the USA Russian Institute. Information includes school curriculum, Germany lifestyle, interviews and comments from students at the Institute. Taped on location in Garmisch.
USARI: THE UNITED STATES ARMY RUSSIAN INSTITUTE (NSA) (U)

Running Time: 13:39 Classification: Confidential 1 Part

This videotape provides an introduction to the USA Russian Institute. Information includes school curriculum, Germany lifestyle, and interviews and comments from students at the institute. A special segment on NSA students focuses on special assignments available only to NSA members who attend USARI.

SOVIET STUDIES SERIES (U)

A series of videotapes developed in conjunction with the Slavic Languages Division of E3. Tapes, unless otherwise indicated, are in Russian, giving students not only exposure to the language, but the culture as well. Some tapes have separate English and Russian soundtracks.

THE BATTLE OF STALINGRAD (U)

Running Time: 104:55 Classification: For Official Use Only 3 Parts

A detailed account, in Russian, of the Battle of Stalingrad (September 1942 - February 1943), one of the turning points of the Second World War. The tape uses a lecture format, actual film footage and charts to depict day-to-day battle operations. It also discusses the German and Russian political backdrop to the battle. A Russian and English text is available.

THE CITY OF "YES" AND THE CITY OF "NO" ("GOROD DA' I GOROD NYET") (U)

Running Time: 4:12 Classification: For Official Use Only 1 Part

Verse by the Soviet poet Evgenij Evtushenko read in Russian by USA. Text available.

JAZZ IN THE USSR (U)

Running Time: 46:28 Classification: For Official Use Only 1 Part

A survey of the development of jazz in the USSR. Includes musical excerpts and photos of Soviet jazz pioneers. This is a two part show edited onto a single tape. A bilingual booklet is available to accompany the tape.

LIVING IN THE USSR AS A MILITARY ATTACHE (U)

Running Time: 26:14 Classification: For Official Use Only 1 Part

USA, recounts experiences and impressions of family life as an assistant army attache in the USSR from 1979-1981. Narration is in English with Russian translation on a separate audio track on 3/4" tapes. Specify either English or Russian soundtrack when ordering VHS or Beta. Dual language booklet available.

NIGHT BEFORE CHRISTMAS ("NOCH POD ROZHDESTVO") (U)

Running Time: 8:06 Classification: For Official Use Only 1 Part

Russian translation of the popular "Night Before Christmas" is read by USA. Text available.
POTPOURRI OF SOVIET POPULAR MUSIC (U)  
**TVC-1259**  
1986

*Running Time: 26:20*  
*Classification: For Official Use Only*  
1 Part

(U) A musical survey of popular music currently being heard at concerts and on television in the USSR. Narration by [name]. USA. A Russian and English translation are available.

RUSSIAN ACRONYMS (U)  
**TVC-954**  
1983

*Running Time: 60:22*  
*Classification: Unclassified*  
4 Parts

(U) A teaching aid to present the basic idea of Russian acronyms which could also be used as a brief introduction to Russian acronyms, as well as a foundation for development of a more extensive course. A Russian text is available.

LANGUAGE TECHNOLOGY EXPO 88 - TVC-1967 1989

Running Time: 28:54 Classification: Top Secret Codeword

(CO) An increasing number of analyst hours are spent determining whether voice intercept contains talkers of intelligence interest. Indeed, speaker identity is often the only indicator available to the message selection process.

LANGUAGE TECHNOLOGY EXPO 88 - TVC-1968 1989

Running Time: 25:16 Classification: Top Secret Codeword

(C) This short talk will try to highlight the advances occurring in speech technology and the effect they should have on plain voice processing. An overview of R523's most recent efforts will include KEYSTONE-II and JUKEBOX status reports.
new, clearer fashion. One approach is that of the DeLorme Mapping System featuring a digital atlas of the world on CD-ROM satellite-derived imagery and three-dimensional display.

(U) From SEMESTER to a "tapeless" environment. MINSTREL will bring some dramatic changes to the transcriber’s world. This presentation will highlight the capabilities of the MINSTREL system which will bring about these changes and introduce linguists to the next generation of transcription support. Developments in target-specific working aids for MINSTREL will also be presented.

Language-specific operational scenarios exemplifying state-of-the-art on-line language aids capability will be presented. The construction of these working aids is fueled by the development of the MINSTREL transcription support system for the 1990’s. TIMBERWOLF is a multi-organizational effort drawing form A, B, and G groups and the E and R organizations, to make significant inroads into meeting the complex need for on-line language working aids.

A concluding address by Minnie Kenny, Assistant Deputy Director for Administration, and professional linguist and cryptanalyst. The talk envisions future technology for linguists and stresses the communications and teamwork needed to acquire it.

**Classification:** For Official Use only  
1 Part  

(FOUO) Presentation by the NSA/CSS Senior Computer Security Coordinator, _______ suggests practical measures computer security officers can take to develop and enhance the computer security posture of their systems.

CSO CONFERENCE: SECURITY AWARENESS – MAKING IT HAPPEN (U)  
**TVC-2180**  
**1989**  
**Running Time:** 50:01  
**Classification:** For Official Use Only  
1 Part  

(FOUO) Presentation by Mr. Dennis Poindexter from the Department of Defense Security Institute. Mr. Poindexter discusses practical short term strategies for initiating a computer security awareness program.

CSO CONFERENCE: CONFESSIONS OF A CSO (U)  
**TVC-2181**  
**1989**  
**Running Time:** 14:49  
**Classification:** For Official Use Only  
1 Part  

(FOUO) Monologue by _______ a Senior Computer Equipment System Security Officer in the T Organization. _______ discusses her experiences as a computer security officer.

CSO CONFERENCE: ACQUIRING “SECURE” COMPUTER SYSTEMS (U)  
**TVC-2182**  
**1989**  
**Running Time:** 20:37  
**Classification:** For Official Use Only  
1 Part  

(FOUO) Presentation by _______ from the systems acquisition training faculty. Mr. _______ discusses the acquisition process and the computer security measures taken at each stage of the process.

CSO CONFERENCE: SEMESTER NETWORK TRANSFERS – PRESERVING THE DATA LABEL (U)  
**TVC-2183**  
**1989**  
**Running Time:** 27:08  
**Classification:** Confidential  
1 Part  

(FOUO) Presentation by _______ from the SEMESTER software support office. _______ shares the problems her organization encountered with transferring data across systems and the strategies used to solve those problems.
CSO CONFERENCE: OVERVIEW OF UIS AND BELLMASTER (U)

Running Time: 40:52
Classification: For Official Use Only

(FOUO) Presentation by of the T Organization's Applied Technology Division. presents an overview of BELLMASTER and the User Interface System. This talk provides computer security officers with a background on the functionality of these systems.

CSO CONFERENCE: MULTICS INTRUSION DETECTION ALARM SYSTEM (U)

Running Time: 25:08
Classification: For Official Use Only

(FOUO) Presentation by from the National Computer Security Center. Mr. describes the MULTICS Intrusion Detection Alarm System.

SECURITY DAY (U)

Running Time: 53:28
Classification: Secret Noform WNINTEL

(U) The Security Awareness Division (M56) of the Office of Security invites guest speakers to address topics of security interests and concerns to employees and military assignees of the Agency. We endeavor to have each speaker videotaped so that we may offer their presentation to individuals unable to attend the original briefing (due to seating limitations) and to those individuals assigned to various locations and field sites.

THE DNI ON SECURITY AWARENESS (U)

Running Time: 5:00
Classification: For Official Use Only

(U) A video for NAVSECGRU explaining the need for security awareness.

IT'S 11:00 - DO YOU KNOW WHAT YOUR COMPUTER IS DOING? (VERSION 2) (U)

Running Time: 76:17
Classification: Secret CCO

Chief TO3, gives a two part computer security briefing. In part 1, he discusses the role of NSA's Senior Computer Security Coordinator, computer security policy, computer viruses, the COMPUSEC posture and operational computer security risks/vulnerabilities. He describes the AIS Security Officer Program and emphasizes security awareness is the responsibility of all, users and managers alike. In part 2, where he answers questions posed by the audience, further elaborates many computer security issues.

INTEL COUNTERNARCOTICS EFFORT (U)

Running Time: 58:58
Classification: Top Secret Codeword Noform

(U) The security Awareness Division (M56) of the Office of Security invites guest speakers to address topics of security interests and concerns to employees and military assignees of the Agency. We endeavor to have each speaker videotaped, so that we may offer their presentation to individuals unable to attend the original briefing (due to seating limitations) and to those individuals assigned to various locations and field sites.

HANDLE VIA COMINT CHANNELS ONLY

Withheld from public release under the National Security Act of 1959, 50 U.S.C. 3065 (P.L. 86-36)
(U) The Security Awareness Division (M56) of the Office of Security invites guest speakers to address topics of security interests and concerns to employees and military assignees of the Agency. We endeavor to have each speaker videotaped, so that we may offer their presentation to individuals unable to attend the original briefing (due to seating limitations) and to those individuals assigned to various locations and field sites.

THE FIRST NATIONAL OPSEC CONFERENCE--1990 (U)  
Running Time: 620:20  
Classification: For Official Use Only  
10 Parts  

SIGSEC TRAINING (FOUO)  
Running Time: 10:23  
Classification: For Official Use Only  
1 Part  
(U) Telephone Security brief for Department of the Navy, military and civilian personnel and E91. Worldwide distribution.

| THE SYSTEM DEVELOPMENT MODEL PROCESS (U) TVC-952 1982                    |
| Running Time: 19:48  Classification: Unclassified 1 Part               |
| (U) A presentation on the INSCOM Pamphlet 11-25 entitled the System Development Model. It relates to the process which INSCOM interfaces to the Army in the transition of NSA developed systems for ILS support. (This presentation is in greater detail than "The Countdown", TVC-951). It is intended for the working level audience. |

| THE COUNTDOWN (U) TVC-951 1982                                         |
| Running Time: 17:40  Classification: Confidential 1 Part               |
| (U) A presentation on the INSCOM Pamphlet 11-25 entitled the System Development Model. It relates to the process which INSCOM interfaces to the Army in the transition of NSA developed systems for ILS support. |

| TELEPHONE TECHNIQUES (U) TVC-1097 1984                                   |
| Running Time: 52:58  Classification: Unclassified 1 Part               |
| (U) Program on Telephone techniques was prepared for National Security Week 1984. Objective was to inform individuals the proper techniques of telephone etiquette. |

| THE MEILSR PROCESS (U) TVC-915 1984                                     |
| Running Time: 11:30  Classification: For Official Use Only 1 Part       |
| (U) This tape provides a brief overview of the Minimum Essential Integrated Support Requirements process (MEILSR). Designed for all managers involved in the ILS acquisition of SIGINT equipment or systems. The tape shows a MEILSR meeting and covers the required MEILSR forms. |

| MAGNETIC MEDIA DIVISION (U) TVC-1031 1985                                 |
| Running Time: 6:01  Classification: For Official Use Only 1 Part         |
| (U) This tape provides an overview of L14, the Magnetic Media Division. |

| MAGNETIC TAPE HANDLING (U) TVC-1200 1985                                 |
| Running Time: 6:14  Classification: For Official Use Only 1 Part         |
| (U) Proper procedures are described for the handling and storage of magnetic tape. |

| AWACS: NO CAUSE FOR ALARM (U) TVC-1233 1986                              |
| Running Time: 7:10  Classification: For Official Use Only 1 Part         |
| (U) A documentary on the operation and correct usage of the Automatic Waste Collection System. Shot on location in Opa 1 and the IRC complex. |

UNCLASSIFIED IX-1 Logistics
FELT PROGRAM (U)  
Running Time: 3:50  
Classification: Unclassified  
1 Part  
(U) The program shows a literacy tutor talking with her student. The objective is to encourage federal employees to become involved in literacy projects.

PERSPECTIVES OF FORMER DEPUTY DIRECTORS OF R&E (U)  
Running Time: 15:02  
Classification: For Official Use Only  
2 Parts  
(U) Three former Deputy Director's of R & E discuss the challenges in contracting to work in support of NSA acquisition efforts. Copies on VHS only.

SPECIAL DELIVERY - THE WAREHOUSE SYSTEM AT NSA (U)  
Running Time: 5:00  
Classification: For Official Use Only  
1 Part  
(U) A video that demonstrates the new automated package delivery and storage systems at SAB 4 and the NSA facility at Middle River.
THE OPERATIONS INTERVIEW (U)  
Running Time: 12:18  Classification: Unclassified  1 Part
(U) A discussion on the Agency’s use of the Operational Interview and suggestions on how to make it a more effective recruitment tool.

PRINCIPLES IN PRACTICE (U)  
Running Time: 40:45  Classification: Unclassified  1 Part
(U) The program is a series of 5 vignettes depicting ethical conduct for government employees, especially those engaged in contracting activities. The tape comes with a participant’s and a trainer’s guide.

THE CONSENT OF THE GOVERNED (U)  
Running Time: 35:34  Classification: Unclassified  1 Part
(U) The program is a series of 5 vignettes showing situations which can lead to unethical behavior by government employees.

RCS: NSA-760 MONTHLY VOLUME REPORT (U)  
Running Time: 26:15  Classification: Secret  1 Part
(U) This videotape is designed to give communicators detailed instructions for the completion of the NSA-760 report in the correct format. General information on the uses of the statistical data contained in the report is also provided.

COMPUTER CRIMES AND THE LAW (U)  
Running Time: 22:13  Classification: Unclassified  1 Part

TIME AND ATTENDANCE FOR SUPERVISORS (U)  
Running Time: 10:47  Classification: For Official Use Only  1 Part
(U) This videotape outlines for supervisors the responsibilities and forms involved in keeping T & A records for employees. Two office scenes are portrayed showing proper and improper usage of time and attendance procedures.

ROSEDUST GAC ACCOUNTING OVERVIEW (U)  
Running Time: 33:09  Classification: For Official Use Only  1 Part
(U) Establishing and demonstrating a new finance and accounting system named the General Accounting and Reporting under Rosedust.
GENERAL EDUCATION
HP400EL AC VOLTMETER (U)  
Running Time: 06:20  
Classification: Unclassified  
1 Part  
(U) Covers the specifications of the Hewlett Packard HP400EL AC Voltmeter and several demonstrations of the unit's operation (DB, AC output, and DC recorder output).

HP5342A MICROWAVE FREQUENCY COUNTER (U)  
Running Time: 19:03  
Classification: Unclassified  
1 Part  
(U) Covers specifications; an overview of counting technique; and measurement routines (frequency and amplitude) of the Hewlett Packard HP5342A Microwave Frequency Counter. A "walk thru" demonstration of both front and rear panel controls, and service/diagnostic test procedures are covered.

INSTRUCTIONAL OBJECTIVES AND MEDIA SELECTION (U)  
Running Time: 24:40  
Classification: Unclassified  
1 Part  
(U) Covers briefly the development of instructional objectives and using them to guide the selection of audio-visual media. Shows how to use a simple matrix technique for judging and using cost/benefit factors in selecting various media. Produced in conjunction with the Inter-Agency Instructional Television Services Task Team and the Office of Personnel Management.

HP5383A RF FREQUENCY COUNTER (U)  
Running Time: 05:00  
Classification: Unclassified  
1 Part  
(U) The specifications and features of the Hewlett Packard HP5383A RF Frequency Counter are described and are followed by a demonstration of the operation, set-up and test procedures of the unit.

PACKAGING AND WRAPPING (U)  
Running Time: 26:20  
Classification: Unclassified  
1 Part  
(U) A demonstration of wrapping procedures for classified documents.

NSA GEOGRAPHIC INFORMATION CENTER (U)  
Running Time: 03:10  
Classification: Unclassified  
1 Part  
(U) This tape provides an overview of the services and facilities available in the NSA Geographic Information Center.

DIMENSION AND TOLERANCING: THE AMERICAN SYSTEM OF MANUFACTURE (U)  
Running Time: 08:49  
Classification: Unclassified  
1 Part  
(U) To better acquaint government contractors and their vendors with the "basic method" of dimensioning and tolerancing; a historical perspective relevant to modern techniques is examined. Supplement to DoD D 1000, DoD STD 100, and ANSI-Y14.5.
NSA/CSS EDUCATION SERVICES (U)  
Running Time: 5:02  
Classification: For Official Use Only  
1 Part  
(U) An introduction to education at the National Security Agency, and the role of the National Cryptologic School.

HP 3562A SIGNAL ANALYSIS TECHNIQUES (U)  
Running Time: 20:13  
Classification: Confidential CCO  
1 Part  
(U) This tape is an overview analysis of the capabilities of the HP 3562A which apply to MARBURG search operations. Numerous analyzer functions such as waveform and frequency analysis, demodulation, and plotting are demonstrated.

BASICS FOR COR’S (MR–S10) (U)  
Running Time: 129:41  
Classification: Unclassified  
3 Parts  
(U) A course consisting of three tapes of classroom presentation and one pre-recorded lesson directed at Contracting Representatives (CPR’S) for inclusion in the learning centers.

THE THEATRE AND THE CLASSROOM (U)  
Running Time: 46:40  
Classification: Unclassified  
1 Part  
(U) A self-contained program describing basic theatrical principles and their application in the classroom. Topics covered include furniture arrangement, use of effective props and scenery, movement, gesture, voice, music and lighting.

RELIGIOUS CONFLICTS IN THE MIDDLE EAST (U)  
Running Time: 312:00  
Classification: For Official Use Only  
8 Parts  
(U) This is an 8 part seminar on manifestations of religious conflict in the Middle East which touches on Shiite Fundamentalism, the history of Zionism, Right-wing Religious movements in Israel and the conflicting claims for Jerusalem.

PRODUCTION TECHNIQUES (U)  
Running Time: 7:20  
Classification: For Official Use Only  
1 Part  
(U) This brief videotape covers various techniques and concerns of video production when using a video camcorder. Composition, lighting, audio, and limitations of the video medium are briefly covered to guide the new-to-video user to successful videotapes.

SECOND QUARTER CY-187 COURSE (U)  
Running Time: 3900:00  
Classification: Secret Noforn  
65 Parts  
(U) A 65 part documentation of the CY-187 course, Introduction to cryptology. Note: Available only on VHS or BETAMAX.

THE CARE AND HANDLING OF MAGNETIC MEDIA (U)  
Running Time: 7:22  
Classification: Unclassified  
1 Part  
(U) A video to teach workers how to handle magnetic media. It also discusses the tape degaussing and certification process.

UNCLASSIFIED XI-2  
General Education
THE WORLD OF TAPE DEGAUSSING (U)

Running Time: 5:52 Classification: Unclassified

(U) A tape showing new hires and prospective employees how the tape degaussing area functions.

DESIGNING FOR TICCIT (U)

Running Time: 29:20 Classification: For Official Use Only

(U) It is a Computer Based Training course for instructional designers which familiarizes them with training that is computer based.

PROFILING – THE RED FORCE MISSION (FOUO)

Running Time: 17:40 Classification: Secret CCO

(FOUO) This video explains the purpose and use of enemy force mission profiles. It teaches students how to build a profile of enemy actions and how to determine the necessary information needed by military commanders.

PROFILING – THE BLUE FORCE MISSION (FOUO)

Running Time: 17:13 Classification: Secret

(FOUO) This video explains the purpose and use of mission profiles. It teaches students how to build a profile of friendly forces and how to determine what information is needed by military commanders.

EFFECTIVE WRITING – PART 1-9 REVISITED (U)

Running Time: 118:14 Classification: For Official Use Only

(U) This 9 part program concentrates on improving writing skills for office correspondence. Many examples are given showing how style and grammar can improve communication skills.

SOVIET GROUND FORCES EQUIPMENT (U)

Running Time: 21:24 Classification: Secret Noform

(U) The objective of the show is to teach viewers how Soviet Ground Forces equipment is manufactured to meet the needs and goals of Soviet Doctrine. Vehicles examined are the T-72, BMP-2, BTR-70, 2S1 and 2S3. An interview and walk tour are the methods used.

CLASSIFICATION BRIEFING (U)

Running Time: 67:48 Classification: Top Secret Codeword

(FOUO) This tape is an overview briefing of classification. The briefing answers questions like what is National Security information, how to mark it and protect it and what does it mean to your own job? Available on VHS only.

MD-300 (FOUO)

Running Time: 643:30 Classification: Top Secret

(U) The NSA Manager Development Program is designed for mid-level managers and is a systematic program that includes developmental needs, core training and planned developmental activities. Seven parts. Available on VHS only.
CRYPTOLOGIC HISTORY SYMPOSIUM - ORIGINS OF NSA (U)  
RUNNING TIME: 176:57  
CLASSIFICATION: For Official Use Only  
TVC-2459  
1991  
(U) The 1990 Cryptologic History Symposium - This two part video is about the origins of NSA. The Army's and Navy's view of cryptologic consolidation in the post World War II years and the Armed Forces Security Agency. Available on VHS only.

CRYPTOLOGIC HISTORY SYMPOSIUM - THE USE OF HISTORY BY DECISION MAKERS (U)  
RUNNING TIME: 115:46  
CLASSIFICATION: For Official Use Only  
TVC-2463  
1991  
(U) The 1990 Cryptologic History Symposium - This video is about the use of history by decision makers. Available on VHS only.

CRYPTOLOGIC HISTORY SYMPOSIUM - SIGINT AND VIETNAM (U)  
RUNNING TIME: 186:16  
CLASSIFICATION: Secret HVCCO  
TVC-2461  
1991  
(U) The 1990 Cryptologic History Symposium - This two part video is about SIGINT and Vietnam. Subjects are: the Vietnam problem, highlights of cryptology's contribution in Vietnam and SIGINT support at the tactical level — the Army, Navy and Air Force perspective. Available on VHS only.

CRYPTOLOGIC HISTORY SYMPOSIUM - THE ROLE OF COMINT IN THE PACIFIC THEATER IN WWII (U)  
RUNNING TIME: 186:22  
CLASSIFICATION: For Official Use Only  
TVC-2460  
1991  
(U) The 1990 Cryptologic History Symposium - This two part video is about the role of COMINT in the Pacific Theater in WWII. Subjects discussed are: Comint in the battles of Coral Sea and Midway, MacArthur's use of SI in the SW Pacific and SI and the destruction of the Japanese Merchant Fleet. Available on VHS only.

CRYPTOLOGIC HISTORY SYMPOSIUM - SIGINT TO DECISION MAKERS/SUPPORT TO DESERT SHIELD (U)  
RUNNING TIME: 175:39  
CLASSIFICATION: Confidential HVCCO  
TVC-2462  
1991  
(U) The 1990 Cryptologic History Symposium - Subjects are: Origins and development of support to Congress and the Executive Branch and SIGINT in the Situation Room at the White House. Two parts. Available on VHS only.
